A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HI 325 and SPAN 302.)

JWSH 318. Jews and Slavs in Eastern Europe. 3 Credits. H
Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups have shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. "Jews and Slavs" examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both groups. Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as SLAV 318.)

JWSH 320. The Bible Then and Now. 3 Credits.
An introduction and survey of the history and interpretation of the Jewish and Christian bibles from their first formation to the present day. Students will explore the way the text, interpretation and format of the Bible have adjusted over time to accommodate religious, political, social and technological changes. Class will occasionally meet in the university's rare book collection to study rare bibles. (Same as REL 320.)

JWSH 323. The Jewish World of Jesus. 3 Credits. H
An introduction to the figure of Jesus in his ancient Jewish context. What was Jewish life like in Jesus's time? What did the early Jesus movement share with other forms of Judaism, and how did it differ? Evidence from the New Testament, the Dead Sea Scrolls, and other textual and archaeological sources will be used to explore the first-century Jewish society of which both Jesus and the first Christians were a part. (Same as REL 323.)

JWSH 325. Introduction to Judaism. 3 Credits. H
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as REL 325.)

JWSH 326. The Talmud: Its Origins, Nature, and Evolution. 3 Credits. H
This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries. (Same as REL 326.) Prerequisite: REL 104, REL 107, or REL 124 or REL 125, or permission of the instructor.

JWSH 327. Jewish Secular Culture. 3 Credits. HL H
By examining the modern concept of Yiddishkeit (Jewishness), this course explores Jewish secularism as a set of modern intellectual, literary, and
cultural practices that redefined the relationship between the secular and religious in literature, music, theatre, art, humor, and foodways. This interdisciplinary course draws on theoretical approaches from history, cultural studies, religious studies, folklore, and linguistics to examine the different secularizing cultural practices of the Jews in Central and Eastern Europe, as well as in North America.

**JWSH 329. Israeli-Palestinian Conflict: An Introduction. 3 Credits. S**

This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. (Same as GIST 329, HIST 482, and POLS 369.)

**JWSH 330. Mystical Tradition in Judaism. 3 Credits. H**

Mystical experiences and supernatural encounters in Jewish texts and tradition: Dybbuks and demons, angels and Elijah; from ecstatic enlightenment to succumbing to satan - Jewish texts and tradition are riddled with the arcane, the occult and the mystical. This course will mine the sources for a deep exploration of these aspects of Judaism that are most often obscured by "normative" teachings and practices, yet remain deeply embedded in the customs and beliefs of Jews around the world. (Same as REL 329.)

**JWSH 333. Jewish Women and Leadership. 3 Credits. H**

This course explores Jewish women's involvement and activism in their communities and immediate environment. We will explore themes in Jewish women's participation like enfranchisement, labor activism, civil rights, access to healthcare, religious practices, cultural contributions, and family units. Students will have the opportunity to consider the relationship between identity, gender, religion, community, and how these impact individuals' social behavior. Specifically, students will explore how Jewish women have to balance their religious and ethnic identities and efforts to impact their surroundings.

**JWSH 334. Jewish Women and Leadership, Honors. 3 Credits. H**

This course explores Jewish women's involvement and activism in their communities and immediate environment. We will explore themes in Jewish women's participation like enfranchisement, labor activism, civil rights, access to healthcare, religious practices, cultural contributions, and family units. Students will have the opportunity to consider the relationship between identity, gender, religion, community, and how these impact individuals' social behavior. Specifically, students will explore how Jewish women have to balance their religious and ethnic identities and efforts to impact their surroundings.

**JWSH 335. History of Jewish Women. 3 Credits. H**

This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women's lives in both Jewish and non-Jewish society. (Same as HIST 335, WGSS 335.)

**JWSH 336. Jewish American Literature and Culture. 3 Credits. H**

An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folk lore, music, film, and visual art. (Same as ENGL 336.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

**JWSH 337. Religious Zionisms. 3 Credits. H**

A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required. (Same as REL 327.)

**JWSH 338. Languages of the Jews. 3 Credits. H**

From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as LING 338.)

**JWSH 339. Languages of the Jews, Honors. 3 Credits. H**

Honors version of JWSH 338 or LING 338. Languages of the Jews. Prerequisite: Membership in the University Honors Program or consent of instructor. (Same as LING 339.)

**JWSH 341. Hitler and Nazi Germany. 3 Credits. H/W**

An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as GER 341 and HIST 341.)

**JWSH 343. The Holocaust in History. 3 Credits. H**

The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as HIST 343.)

**JWSH 344. Modern Jewish History. 3 Credits. H**

This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of anti-Semitism and the Holocaust. (Same as HIST 344.)

**JWSH 345. Theatre and Genocide. 3 Credits. H**

This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit
in JWSH 645 or THR 645. (Same as THR 345.) Prerequisite: THR 308 or instructor permission.

**JWSH 346. The Jewish Experience in America. 3 Credits.**
This course surveys the history of American Jewry from the 17th to the 20th centuries through overlapping perspectives of economics, politics, ethnicity, culture, and gender. The first part of the course examines the three waves of Jewish immigration - Sephardic ("Spanish-Portuguese"), West-Ashkenazic ("German"), and East Ashkenazic ("Russian") - that took place between the 1600s and World War I: their specific European roots and American circumstances; the different ways in which each group adapted to, interacted with, shaped and was shaped by American life, constructed ideas of community and identity, and influenced those who came later. The second part of the course explores the genesis of an integrated and distinctive modern American "Jewishness" that emerged after World War I and reached its zenith in the 1960s. Informed by interwar and postwar social, economic and demographic transformation and critical domestic and international political developments, this process involved the reconstruction of Jewish identity and community based on the conscious blending of Jewish values, traditions, rituals, and institutions with American notions of personal happiness and success, family, domesticity and upward mobility and the conscious broadening of Jewish concepts of philanthropy and activism based on expanded notions of American Jewry's social and political mission in the United States and the world.

**JWSH 347. Jewish Ethics. 3 Credits. HR H**
In this course we will explore the variety of ways that Judaism and Jewish people have approached ethics, both theoretically and practically. Our investigation will consider the evolution of approaches across time, and variations among different communities, as well as examining how the religious tradition has, at times, differed from actual practice among Jewish people. We will look at theological, philosophical, and sociological elements that inform Jewish ethics, as well as delving into specific issues in Jewish ethics, including autonomy vs. communal norms; business and labor practices; saving a life vs. taking a life; the treatment of animals; marriage and family matters; medical ethics; universalism vs. particularism, and more.

**JWSH 349. Antisemitism: A Long History. 3 Credits. H/W**
This course surveys the genesis, evolution and persistence of antipathy towards Jews and Judaism from late antiquity through the twentieth century, exploring its connections to religious and secular ideologies and its changing nature over time, place, and culture. Using primary source documents, religious and secular art and literature, the mass media and popular expression, the course examines how antisemitism was articulated and implemented, how Jews and Judaism were perceived and represented, and how Jews and Judaism responded to antisemitism. (Same as HIST 349.)

**JWSH 350. Contemporary Jewish Identities. 3 Credits. SC H**
This course explores the variety of ways in which American Jews create Jewish identities as individuals and groups. It traces the emergence of the various current divisions within Judaism: Reform Judaism (which by definition, implies Orthodoxy), then Conservative Judaism, and then the later development of Reconstructionist Judaism. The course also explores other contemporary options for being Jewish: cultural Jews, secular Jews, unaffiliated Jews, religious Jews, and gay or lesbian or transgendered Jews.

**JWSH 361. Jewish Film. 3 Credits. HL H**
An examination of the cultural history of the Jews through films that explore Jewish themes, including but not limited to: issues of tradition and modernity, religion and secularism, immigration, gender, Zionism, anti-Semitism, and the Holocaust. Films studied may be in English and in foreign languages (with English subtitles) like Yiddish, Hebrew, and Russian.

**JWSH 371. Archaeology of Ancient Israel. 3 Credits. H**
Archaeology and art, sites and monuments of ancient Israel from the Neolithic period to Late Roman. Special topics will include the peoples of the region, nomadism and urbanization, the kingdoms of Israel, Second Temple Period, Qumran, Roman Jerusalem, and the creation and development of the synagogue. (Same as CLSX 371.)

**JWSH 382. Jerusalem Through the Ages. 3 Credits. H**
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, HIST 382 and REL 382.)

**JWSH 387. Enemies of Ancient Israel. 3 Credits. H**
An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called "Bad Guys of the Bible" using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as HIST 381 and REL 387.)

**JWSH 395. Study Abroad Topics in Jewish Studies: _____ 3-6 Credits. H**
This course is designed for the study of special topics in Jewish Studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**JWSH 396. Hitler and Nazi Germany, Honors. 3 Credits. H**
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as EARS 396 and HIST 396.) Prerequisite: Membership in University Honors or consent of instructor.

**JWSH 400. Foundations of Jewish Studies. 3 Credits. H**
This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, ethnicities and narratives, languages, customs and the arts. Special attention will be given to various career options available to students of Jewish studies. Not open to students who have completed JWSH 120 or JWSH 610.

**JWSH 410. Israel: From Idea to State. 3 Credits. S**
The course focuses on understanding Israel as a Nation-State of the Jewish people and its challenges regarding the balance between being a Jewish and a Democratic state. In the first part, the course surveys Jewish history in the 19th century, the birth of Zionism, and statehood's progress through the British Mandate. In the second part, students learn about Israel's major contemporary issues by discussing political, ethnic, national, economic, gender, and religious divides and their relation to the pre-statehood period.

**JWSH 412. Mandatory Palestine: 1920-1948. 3 Credits. S**
A review of the thirty-year history of the British Mandate over Palestine, with a focus on the successful nation building by the Jewish people and the demise of the Palestinian project in 1948.
JWSH 414. Israel/Palestine: The War of 1948. 3 Credits. S
The war of 1948 shaped the history of the modern Middle East more than any other single event. Issues that will be discussed include the participating parties, the efforts of the international community, the establishment of Israel, the division of Palestine, and the continuing problem of Palestinian refugees.

JWSH 416. Israel in the First Decade. 3 Credits. S
The course focuses on the formative period of the State of Israel from sociological, economic, religious, and cultural perspectives.

JWSH 420. Politics and Government in Israel. 3 Credits. S
The course is an introduction to the Israeli system of government and its complexities, from a comparative perspective. The course aims to deal with the processes and critical issues that characterize the Israeli political system, as well as dilemmas and conflicts that are part of it since the early days of statehood until today. (Same as POLS 480.)

JWSH 422. Topics in Israeli Society: _____ 3 Credits. U
This course explores the social interconnections and interactions of the various cultures, religions, and ethnic identities in Israel.

JWSH 426. Polls and Public Opinion in Israel. 3 Credits. S
An examination of public opinion in Israel, polls, and their effect on election results, policy making, and politics -- from a comparative perspective. We will discuss the validity of public opinion polls as a measurement tool, its advantages and disadvantages, and its success and failure at predicting election results.

JWSH 434. Arab-Palestinian Society, Culture and Politics. 3 Credits. S
This course introduces students to the study of Arab-Palestinians in Israel, by exploring the construction of Palestinian identity, their social and political structures, their culture, relations with Israeli Jews and the status of integration vs segregation within Israel.

JWSH 440. International Relations of the Middle-East. 3 Credits. S
An overview of the politics and the governmental systems of Middle Eastern nations, including the historic, religious, ideological, economic and cultural forces that shape government policies and social movements.

JWSH 445. Local Self-Governments in Israel. 3 Credits. S
An introduction to the fundamentals of local governments in Israel and their relationships, political, legal, and economic, to the central government.

JWSH 490. Directed Study in Jewish Studies. 3 Credits. H
Intensive reading or research under faculty supervision. Prerequisite: Consent of instructor.

JWSH 491. Directed Study in Jewish Studies, Honors. 3 Credits. H
Honors version of JWSH 490. Intensive reading or research under faculty supervision. Prerequisite: Membership in the University Honors Program or consent of instructor.

JWSH 525. Jews and Christians. 3 Credits. H/W
This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as REL 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor.

JWSH 562. Judaism and Political Theology. 3 Credits. H
A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization, pluralism, democracy, and revolution. (Same as REL 572.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor.

JWSH 590. Research Methods. 3 Credits. U
This seminar will introduce students to appropriate approaches and methods, especially in the Humanities and Social Sciences, for conducting research in Jewish Studies and/or in Israel Studies. Examples will draw on many disciplines, especially in the humanities and social sciences. Students will prepare a research proposal and investigative methodology. Prerequisite: Any JWSH course 300 or above or permission of the instructor.

JWSH 600. Advanced Topics in Jewish Studies: _____ 3 Credits. H
Examination of advanced topics in Jewish Studies. May be repeated if topic varies. Prerequisite: Consent of instructor.

JWSH 601. Senior Seminar in Jewish Studies. 3 Credits. H
Investigation of topics related to Jewish studies from an interdisciplinary perspective: Jewish culture, history, and religion. The course focuses on research methods and intensive writing. Prerequisite: Open only to Jewish studies majors. Suggested for students with senior standing.

JWSH 610. Foundations of Jewish Studies. 3 Credits. H
This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, ethnicities and narratives, languages, customs and the arts. Special attention will be given to various career options available to students of Jewish studies. Not open to students who have completed JWSH 120 or JWSH 400. Prerequisite: Graduate status.

JWSH 645. Theatre and Genocide. 3 Credits.
This seminar focuses on theatre art production under extreme situations. Do artists have a moral obligation to bear witness to genocide and war? Lectures, historical and theoretical readings, play texts, dance performance, and films provide students with a context within which to explore such issues as: the function of the performing arts under duress; the artist's role under and in response to atrocity; and how art aids us to explore the human condition. Class discussion, readings, and individual projects. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to student with credit in JWSH 345 or THR 345. (Same as THR 645.) Prerequisite: THR 308 or graduate standing, or instructor permission.

JWSH 650. Service Learning in Jewish Studies. 3 Credits. S
This course, to be taken in the junior or senior year, is designed to give students the opportunity to apply the knowledge, concepts, and ideas gained in courses in Jewish studies to real-life situations in appropriate agencies and organizations. Open to students in the Jewish Studies program. Prerequisite: Permission of instructor.

JWSH 681. Regimes in the Middle-East and North Africa. 3 Credits. S
Using governmental case-studies in North Africa and the Middle East, this course will examine basic definitions and behaviors of liberal democracies, dictatorships, and hybrid regimes, the transitions between them, and the strategies they (and their leaders) use to stay in power. Prerequisite: JWSH 440 or permission of instructor.

JWSH 695. Study Abroad Advanced Topics: _____ 3 Credits. U
Advanced study abroad topics in Jewish and Israel studies. Prerequisite: Any JWSH course 300 or above or permission of the instructor.

JWSH 700. Topics in Jewish Studies: _____ 3 Credits.
A study of one or more selected topics in Jewish studies. Topics can be on Jewish religion, history, culture, languages, or Israel studies.
Repeatable for credit if topic varies. Prerequisite: Any JWSH course 300 and above, or equivalent by permission of instructor.

**JWSH 729. Research in the Israeli-Palestinian Conflict. 3 Credits.** This course guides students in conducting research on any aspect of the Israeli-Palestinian conflict, such as its history from the Ottoman period to the present day, the social and political effects on Israelis and Palestinians, various narratives, and international responses. Prerequisite: JWSH 329 or JWSH 410 or JWSH 414 or JWSH 412 or JWSH 434 or permission of the instructor.

**Jewish Studies Courses**

**YDSH 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Yiddish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**YDSH 300. Studies in Yiddish: _____ 3 Credits. H**
Examination of special topics in Yiddish. May be repeated if topic varies.

**YDSH 490. Independent Study. 3 Credits. U**
Intensive reading or research under faculty supervision

**Liberal Arts & Sciences Courses**

**HUM 110. Introduction to Humanities. 3 Credits. HL H**
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education, perspectives and methods in the humanities, the humanities and human diversity, and interdisciplinary approaches to understanding and interpreting texts.

**HUM 111. Introduction to Humanities, Honors. 3 Credits. HL H**
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education; perspectives and methods in the humanities; the humanities and human diversity; and interdisciplinary approaches to understanding and interpreting texts. Prerequisite: Membership in the University Honors Program.

**HUM 112. Exploring The Human Condition: _____ 3 Credits. H**
This is a special topics course that provides an interdisciplinary exploration of human experience through the study of specific themes, periods or genres. Through reading and discussion of primary sources and scholarly texts, students will examine issues central to the human condition, be introduced to the methods that disciplines in the humanities use to analyze them, and learn the skills of close reading, critical analysis, and the interpretation of evidence. Assignments require students to analyze source material, synthesize information, solve problems and construct arguments to support conclusions.

**HUM 114. Western Civilization I Honors. 3 Credits. H**
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. Prerequisite: Membership in the University Honors Program or permission of the department.

**HUM 115. Western Civilization II Honors. 3 Credits. H**
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period. Prerequisite: Membership in the University Honors Program or permission of department.

**HUM 125. Introduction to Medical Humanities. 3 Credits. H**
An interdisciplinary introduction to the field of medical humanities, which considers the relationship between medicine and humanistic thought. Students analyze the role of medicine in a variety of genres, while considering the growing importance of narrative and artistic expression in the medical profession. Topics may include: the objectification of the body, ageism, art and self-expression as medical care, and the impact of race, class, and culture on definitions of "illness", "health", and "beauty".

**HUM 133. Technology and the Individual. 3 Credits. H**
This course focuses on the complex relationship among technological change, increasing social complexity, and the individual from the Paleolithic Era to the so-called Computer Revolution, with a particular emphasis on Europe and the United States. Through the study of foundational texts in the history of technology and dystopian fiction, students will analyze a range of technologies from stone tools to smartphones to better understand the social, cultural, and economic forces that underlie technological change and how to critically evaluate assumptions about the nature of that change.

**HUM 140. Introduction to World Literature. 3 Credits. H**
This course provides an introduction to the field of world literature as an approach to critical reading and writing about literary works in a global context. Topics may include: what constitutes literature; challenges to reading works across time or within different cultural traditions; reading works in translation; history of writing technologies and canon formation; literature and market forces; and the literature of global encounters and exchanges. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice.

**HUM 175. Kansas Environment and Culture. 3 Credits. H**
An introduction to the inhabitants of Kansas and their experiences of the unique landscapes found within the state. Through the use of sources such as letters, autobiographies, novels, art, architecture and film, this course explores how Kansas environments have shaped and been shaped by the humans that occupy them, and why Kansas has had a powerful hold on the American imagination.

**HUM 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Humanities. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**HUM 204. Western Civilization I. 3 Credits. H**
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice.

**HUM 205. Western Civilization II. 3 Credits. H**
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period.

**HUM 206. Contemporary Western Civilization. 3 Credits. HL H**
A sequel to the two Western Civilization courses which offers the opportunity to examine influential works of literature, philosophy, history, and political thought written since the end of World War II. In keeping with the decline of colonialism and the growth of global and multicultural
civilization since 1945, the readings of the course are selected from both Western and non-Western writers.

HUM 300. Studies In: ______. 3 Credits. H
An interdisciplinary course, focusing on different topics and drawing on diverse media, cultures, and historical periods. Humanities-based, this course, depending on its topic, may include the arts, the social sciences, and the natural sciences. May be repeated for credit with different topics.

HUM 304. World Literature I. 3 Credits. HL H
The study of great books in English translation from antiquity through the fifteenth century from two or more national literatures.

HUM 308. World Literature II. 3 Credits. HL H
The study of great books in English translation from the sixteenth, seventeenth, eighteenth, and early nineteenth centuries from two or more national literatures.

HUM 312. World Literature III. 3 Credits. HL H
The study of great books in English translation in the modern period (late nineteenth and twentieth centuries) from two or more national literatures.

HUM 320. Being Human in the Workplace. 3 Credits. H
A study of what it means to be human and humane in the workplace. Topics include the concepts of work, the worker, and the workplace; workers' rights; issues of discrimination; business ethics; privacy and confidentiality; bullying; whistle blowing; workplace environment.

HUM 332. Sex in History. 3 Credits. HT H
This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, "perversions" (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as AMS 323, HIST 332 and WGSS 311.)

HUM 340. Understanding the European Migrant Crisis. 3 Credits. H
This course offers students the opportunity to explore the social, political and ethical consequences of transnational migration in a European context. As the foundation of a winter-break study abroad experience in the Humanities Program, the course surveys the history and geography of human mobility across the EU with a focus on concepts such as "fortress Europe," and "shelter Europe," and the borderization of the Mediterranean basin. The main component of the course consists of experiential learning activities. Students engage in site visits, interact with activists and immigrants, and participate in migrant relief projects to better understand the dynamics of immigration policies as well as efforts to foster multiculturalism and integration within the area in question. (The program will take place in select European cities and location may vary by semester.) Prerequisite: Open only to students in the Humanities winter break study abroad program.

HUM 345. Indian Territory. 3 Credits. H
This course examines the cultural, social, economic, environmental, and political background of Indian territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HIST 318 and ISP 345.)

HUM 348. American Indian and White Relations to 1865. 3 Credits. H
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HIST 351, ISP 348.)

HUM 350. American Indians Since 1865. 3 Credits. H
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HIST 352 and ISP 350.)

HUM 364. Pregnancy in Modern Literature. 3 Credits. HL
An examination of pregnancy, childbirth and reproductive control as depicted in literature from various national traditions in the twentieth and twenty-first centuries. This course draws together voices from literature, history, and feminist theory to deepen students' understanding of the ways nationality, class, race, ability, and gender affect the aesthetics surrounding reproduction. Special attention is given to the relationship between society and the pregnant/postpartum individual. Other topics may include: eugenics, contraception, male pregnancy, and speculative reproduction. (Same as WGGS 364.)

HUM 365. Angry White Male Studies. 3 Credits. H
This course charts the rise of the "angry white male" in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HIST 364 and WGGS 365.)

HUM 366. Fat, Food and the Body in Global Perspective. 3 Credits. H
An examination of fat and food as they relate to human embodiment in a variety of world locations. Bringing into a dialogue a number of disciplinary voices, including anthropology, fat studies, feminist theory, food studies, history, medicine, and psychology, the course applies theories of culture and embodiment to select global case studies as a means of approaching the pleasures, anxieties, health implications, and symbolic functions of ingesting food and drink. Topics may include the cultural and gender politics of fatness and thinness; anorexia and feederism; food, sex, and animality; vegetarianism, food scares and food purity movements; neoliberalism and the consuming body; and the material and symbolic aspects of fats and oils. (Same as WGGS 366.)

HUM 373. Aviation in American Culture. 3 Credits. H
This course examines the complex relationship between powered flight and American society from the invention of the airplane to the rise of drone warfare. Through a mixture of scholarly works, personal accounts, and primary sources, we will investigate how use of and access to the airplane became a focal point for the construction and deconstruction of race, gender, and class distinctions and an important site in the struggle
for equality and social justice. Using the airplane as a lens, we will recognize and challenge key assumptions within American technoculture such as technological messianism, technological neutrality, and the role of government in technological development. (Same as HIST 441.)

HUM 375. The Refugee Experience: Stories of Statelessness and Citizenship. 3 Credits.
The course draws on materials from multiple disciplines in the humanities including literature, history, philosophy, and cultural studies, to examine how belonging or not belonging to a state shapes the human experience. Literary texts, theoretical reflections, and historical studies on the subject of mass migration in Europe in the middle of the 20th-century will prepare for discussions of contemporary statelessness as well as responses to the refugee condition in a global context. (Same as PCS 375.)

HUM 380. Modern Themes, Ancient Models: _____ . 3 Credits. H
The study of the evolution of a cultural or literary tradition from the Graeco-Roman world into modern times. The theme of the course will normally vary from semester to semester; topics such as these may be examined: the analysis of a literary genre (e.g. drama, satire, lyric), the transformation of the ancient mythical heritage, the reception of ancient astronomy. Students should consult the Schedule of Classes for the theme of the course in a given semester. With departmental permission, may be repeated for credit as topic varies. (Same as CLSX 350.)

HUM 424. Senior Seminar in Humanities. 3 Credits. H
A seminar to result in the student's integration of knowledge within the Humanities major. Students undertake a project that reflects and utilizes the interdisciplinary perspectives of the humanities. Options for the final project include a portfolio, web page, or significant writing project. Not open to freshmen and sophomores; recommended in the senior year. Prerequisite: Completion of at least 9 hours of upper division courses in the major.

HUM 430. European Civilization in World Context: _____ . 3 Credits. HL H
An introduction to the literature of encounters between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-Saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as EALC 430.) Prerequisite: HUM 114 or HUM 204 and HUM 115 or HUM 205.

HUM 477. Gender and Religion. 3 Credits. H
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as REL 477 and WGSS 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender & Sexuality Studies.

HUM 494. Humanities Directed Study: _____ . 1-3 Credits. H
Investigation of a subject in fields or on topics not covered in regularly scheduled courses. May be repeated for a total of 6 hours. Does not replace or satisfy specific course requirements for the HWC major. May be counted as part of the total junior-senior credit hours required.

HUM 500. Studies in: _____ . 3 Credits. H
A study of significant themes, topics, or problems in the humanities. May also relate an issue in the humanities to the social sciences or natural sciences. May be repeated for credit when the topic varies.

HUM 505. Europe Today. 3 Credits. H
An exploration of major social, political and economic developments post World War II including the rise of the European Union, the integration of Eastern and Western Europe, the growing role of Islam, attitudes towards the United States, and Europe's role in the world economy. Topics may vary based on current events. (Same as EURS 504.) Prerequisite: Junior or senior standing or consent of instructor.

HUM 508. Special Topics in World Literature: _____ . 3 Credits. H
An examination of selected theoretical texts and literary works relevant to the emerging field of "world literature studies" that seeks to account for the ways that global relationships structure literary production, circulation, and reception. Topics and texts vary. May be taken more than once if content differs sufficiently.

HUM 510. Science, Technology, and Society. 2-3 Credits. H
The objective of this course is to provide members of the university community with information that enables them to judge the humanistic, moral, and ethical implications of scientific and technological developments. Formal presentations by guest lecturers, followed by question-and-answer periods, will alternate with panel discussions, symposia, etc., prepared by faculty members drawn from the various departments, schools, and organizational units of K.U.

HUM 524. Chinese Thought. 3 Credits. NW H/W
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and PHIL 506.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy.

HUM 538. Pompeii and Herculaneum. 3 Credits. H
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as CLSX 538, HA 538) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor.

HUM 545. Methodologies in Digital Humanities, Honors. 3 Credits. H
This course addresses research possibilities and ongoing debates in the field of Digital Humanities. Students will examine how digital technologies and methodologies can enhance or suggest new modes of Humanities research. The course focuses on core topics in the field, including text analysis, data visualization, digital mapping, archiving and (digital) cultural studies. We will take a hands-on and critical approach to investigating the benefits and limitation of different digital methods. Course assignments will consist of blog posts and mini projects conducted throughout the semester. At the end of the semester, students will develop a proposal for a project that brings digital methodologies to bear on a research inquiry related to the student's discipline. No prior experience in digital work or technical skills required. Prerequisite: Instructor permission.

HUM 551. Foodways: Native North America. 3 Credits. H
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and ISP 551.) Prerequisite: Upper division course on indigenous/ American Indian history, or permission of the instructor.

HUM 552. Foodways: Latin America. 3 Credits. H
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, ISP 552, and LAC 552.) Prerequisite: Upper division course on Latin American or permission of the instructor.

HUM 757. The Body, Self and Society. 3 Credits. H
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HIST 625, WGSS 575.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor.

HUM 701. Practicum in Teaching Humanities and Western Civilization. 1 Credits.
Discussion of matters relating to teaching in Humanities and Western Civilization courses. Sections may vary according to course topics. Required of all GTAs in the first year of teaching in the Program or for the first semester of a new teaching assignment. Does not count towards completion of coursework for the M.A. or Ph.D. in any field or department. Open only to GTAs employed by the Humanities Program. Graded on a satisfactory/unsatisfactory basis.

HUM 775. Advanced Study in the Body and Senses. 3 Credits.
An intensive examination of the role of the human body in the creation of personal and social identities in the West since the sixteenth century. Emphasis is on understanding how contemporary theories of embodiment are applied to concrete historical or contemporary problems. May be repeated if course content varies sufficiently. (Same as WGSS 775.)

Liberal Arts & Sciences Courses

LA&S 108. Personal Numeracy. 3 Credits. NM
This course will provide the tools to help you understand and make decisions using data. You will learn the basics of human decision making and why relying on numerical data is an important component of good decisions. The class will also help you understand the basics of probability and statistics. This will include fundamental statistical concepts used in everyday decision-making as well as training to perform statistical tests. The class will conclude with applications of numeracy to make sound personal financial decisions regarding spending and borrowing and saving and investing. Throughout the course, you will learn to use Excel to perform calculations, analyze data and spending habits and develop a personal budget.

LA&S 110. Cherokee Language I. 5 Credits. U F1
Emphasizes the vocabulary of and fundamentals of reading and writing the Cherokee language. Students will have an opportunity to learn the language, beliefs, and religious practices of the Cherokee. Taught at Haskell Indian Nations University.

LA&S 120. Cherokee Language II. 5 Credits. U F2
Continuation of Cherokee Language I. Includes an intermediate level of vocabulary skill with increased emphasis on reading and writing. Taught at Haskell Indian Nations University. Prerequisite: LA&S 110.

LA&S 150. Academic Success Seminar. 1 Credits. U
This course provides students with the skills and resources necessary to improve their approach to their academic career. It is designed to help enhance students’ time management and study skills as well as facilitate a connection with student success resources. Students and instructors work together in an interactive learning environment to create an academic foundation for success. Additional topics covered include: test preparation and anxiety; reading comprehension; procrastination; and memory and concentration. Recommended for students with less than a 2.5 GPA.

LA&S 172. Exploring Health Professions. 3 Credits. U
Students will have the opportunity to explore healthcare career pathways broadly and will look more thoroughly at specific pathways of interest through experiential learning activities. Class-time will include discovering the knowledge, skills, and attributes typically seen in health care professionals and the requirements for gaining admission to the various professional degree programs. The course will also discuss important ethical issues in health care and the future direction of the field. This course is designed for KU students who are interested in pursuing a health career. This includes but is not limited to: medicine, pharmacy, physician assistant, physical therapy, and occupational therapy.

LA&S 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in liberal arts and sciences. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

LA&S 200. Topics at HINU: ____. 1-6 Credits. U
Special topics at the undergraduate level. Taught at Haskell Indian Nations University. Special permission from the Provost's Office required.

LA&S 202. History of North American Indian Tribes. 3 Credits. W
Introductory survey of the origin, evolution, and distribution of Indians throughout North America, location of tribes in historic times, their relationships to one another, and their responses to white penetration of the continent. Emphasis on American Indian leadership and major contributions of American Indian people to American society. Taught at Haskell Indian Nations University.

LA&S 204. Contemporary Issues of the American Indian. 3 Credits. H
An overview of current and historical issues which have resulted in policies and regulations affecting American Indians and Alaska Natives. The issues include: education, treaties, sovereignty and self-determination, religion, natural resources, legislation, jurisdiction, reservation and/or urban status, federal trust relationship, tribal economics and enterprises, American Indian policy, federal recognition, and current issues both regional and local. Taught at Haskell Indian Nations University.

LA&S 206. Indian Law and Legislation. 3 Credits. S
An introduction and general overview of federal Indian law and processes and its relationship to tribal governments. Focus will be on sovereignty and its relationship to the internal and domestic laws of the United States government, tribal governments, and the international community. Taught at Haskell Indian Nations University.

LA&S 210. Tribal Resources and Economic Development. 3 Credits. S
Inventory and identify the resources currently available to tribal governments to include natural and human resources and those financial resources available to tribal governments from federal, state, and private resources. Included will be an economic analysis on how to best optimize available resources while recognizing the economic concept of constrained maximization. Taught at Haskell Indian Nations University.
LA&S 230. Cherokee Language III. 5 Credits. U F3
Continuation of Cherokee language II. Taught at Haskell Indian Nations University. Prerequisite: LA&S 230.

LA&S 240. Cherokee Language IV. 5 Credits. U F4
This course is a continuation of LA&S 230. Cherokee Language III, and includes the study of grammar, with particular attention to speaking fluency and continued practice in reading and writing. Taught at Haskell Indian Nations University. Prerequisite: LA&S 230.

LA&S 250. Western Civilization I. 3 Credits. H
The beliefs and values of Western civilization from the eighth century BC to the close of the eighteenth century are compared with the ideas central to American Indian cultural traditions. Fulfills the Western Civilization I requirement for CLAS. Taught at Haskell Indian Nations University.

LA&S 252. Western Civilization II. 3 Credits. H
The beliefs and values of Western Civilization since the close of the eighteenth century are compared with the ideas central to American Indian cultural traditions. Fulfills the Western Civilization II requirement for CLAS. Taught at Haskell Indian Nations University.

LA&S 260. Interpersonal Management. 3 Credits. U
This course is designed to provide students with an understanding of their personal strengths and skills that can be applied in a variety of organizational settings and in society. The course includes skills needed to be successful as a member of both professional and citizen communities, including ethical views, project management, financial management, technology, and information literacy.

LA&S 262. Workplace Success Skills. 3 Credits. U
This course is designed to provide students with the skills and content they need to be successful professionals in a variety of organizational settings. The course includes professional communication skills along with an understanding of organizational culture and context.

LA&S 290. Approaches to Teaching Science and Mathematics I. 1 Credits. U
Science and Mathematics students explore teaching as a career by teaching lessons in elementary classrooms in order to obtain first hand experience planning and implementing inquiry-based curriculum. This course is open to any student who has completed or is concurrently enrolled in a science or mathematics course at KU.

LA&S 291. Approaches to Teaching Science and Mathematics II. 1 Credits. U
Science and Mathematics students continue to explore secondary teaching as a possible career choice by teaching several lessons in a middle school classroom. The students build upon and practice lesson design skills that were developed in LA&S 290, in which they taught in middle school classroom. The students build upon and practice lesson teaching as a possible career choice by teaching several lessons in a middle school classroom. The students build upon and practice lesson design skills that were developed in LA&S 290, in which they taught in middle school classroom. The students build upon and practice lesson design skills that were developed in LA&S 290, in which they taught in middle school classroom. The students build upon and practice lesson design skills that were developed in LA&S 290, in which they taught in middle school classroom.

LA&S 292. Topics and Problems on: _____. 1-6 Credits. U
An interdisciplinary study of different topics. Designed especially for freshmen and sophomores.

LA&S 295. Introduction to Secondary Stem Teaching. 2 Credits. U
The UKanTeach program invites all students who have 45 hours toward their degree and have an interest in teaching secondary mathematics and/or science to take this two-hour UKanTeach course. Students learn quickly whether they are suited to the profession of teaching while also acquiring important communication skills. Through coursework and classroom experiences, students teach four hands-on inquiry-based science/mathematics lessons in local elementary and middle school classrooms. Upon successful completion of this course, students are eligible for acceptance to the UKanTeach program as they complete their bachelors degree. This course is only offered in the summer semester. Prerequisites: Minimum of 45 hours toward a BA or a BS degree.

LA&S 325. Career Transitions. 3 Credits. U
This career development course studies the theories of career development and decision making focusing significantly on self-assessment and occupational research to help students make informed career decisions by better understanding themselves and the world of work in relationship to career transitions. In addition, students will learn valuable networking, personal branding, and job search tips. Prerequisite: KU student who is planning to apply in the current or subsequent academic year to a health professional program including (but not limited to) medicine, pharmacy, physician assistant, physical therapy, and occupational therapy.

LA&S 370. Personal Writing Seminar. 1 Credits. U
This seminar helps students develop their personal writing abilities. Students analyze language and rhetorical choices in the genre of the personal essay. Students demonstrate rhetorical flexibility within the genre, considering audience, purpose, and application of the material. This course is intended for candidates for national fellowships, regardless of University Honors Program membership. (Same as HNRS 370.) Prerequisite: Permission of the Office of Fellowships.

LA&S 372. Preparing for Programs in the Health Professions. 3 Credits. U
Students will participate in experiential learning activities to confirm their interest in the health care professions and prepare documents for their application. Class-time will include exploring crucial health care topics such as ethical standards, the future of medicine, and social determinants of health. Additionally, students will prepare application materials, research professional programs, create a personal statement, participate in mock interviews, and decide where to apply. This course is designed for KU students who are planning to apply in the current or subsequent academic year to a health professional program including (but not limited to) medicine, pharmacy, physician assistant, physical therapy, and occupational therapy.

LA&S 380. Critical Thinking and Advocacy Seminar. 1 Credits. U
The focus of this class is on honing the two basic skills of critical thinking and advocacy. In this seminar, students develop a basic system for critical analysis that can be applied generally; test that critical analysis system in a series of practicums to develop the skills necessary to apply it; and develop a basic system for designing effective and ethical persuasive messages. (Same as ENGL 400.) Prerequisite: Permission of the Office of Fellowships.

LA&S 400. Teaching and Tutoring Writing. 3 Credits. U
Students explore theories and strategies of teaching and tutoring writing across academic disciplines. They learn more about themselves as writers as they build a repertoire of writing techniques useful in their studies, in the workplace, and in their personal lives. By observing and consulting in the writing center, they understand how reflection leads to responsive, ethical, and engaged practice. (Same as ENGL 400.) Prerequisite: ENGL 102 or equivalent.

LA&S 414. Ethnobiology. 5 Credits. N
Integrates Native American traditional knowledge of ecology and biology with modern, western science. One purpose of the course is to preserve the unique knowledge and varied cultural traditions relating to the life sciences that are possessed by indigenous people. Taught at Haskell Indian Nations University. Prerequisite: BIOL 100 or BIOL 150.

LA&S 450. Topics at Haskell Indian Nations University: _____. 1-6 Credits.
Special topics at the junior/senior undergraduate level. Taught at Haskell Indian Nations University. Special permission from the Provost's office required.
LA&S 470. Job Search Skills for Liberal Arts and Sciences Majors. 1 Credits. U
This course is designed to introduce students to the fundamentals of planning and organizing job search strategies. Emphasis is placed on practical application of employment search tools for post-graduation employment or graduate school admission, stressing the value of the arts and sciences degree in the labor market. Prerequisite: Students must be sophomore standing or above.

LA&S 475. Professional Career Management. 3 Credits. U
When envisioning the future, many students consider immediate post-graduation needs but may fail to consider future professional career management, life and career transitions, and career progression. This advanced career development course studies the theories of career development, organizational and industrial psychology, and human resources. Students learn theories from these areas and understand how to apply them to their own professional career, future career transitions, and lifelong career progression. Prerequisite: Students must be sophomore standing or above.

LA&S 480. Preparing for International Careers. 1-3 Credits. U
This course, delivered through an 8-week seminar and week-long study abroad experience, teaches the fundamentals of executing an international job search. The course is open only to participants admitted to the Preparing for International Careers study abroad program. Students must complete a study abroad application and be approved before enrolling in the course.

LA&S 485. Global Career Management. 3 Credits. U
This global career development course studies the theories of cross-cultural communication and analyzes the global economy to help students apply these concepts to their own lifelong career management. Furthermore, the course builds upon the international experiences students are having at KU and also allows any student to gain lifelong knowledge and skills to be successful in a global job search or career transition, by assisting them to articulate their skills and value through a cross-cultural perspective to potential employers. Prerequisite: Students must be sophomore standing or above.

LA&S 490. Internship Exploration. 1-5 Credits. U
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students complete reading and writing assignments, participate in an online discussion and create a final portfolio of internship accomplishments. Hours of credit recorded (1-5) are based on number of hours at internship site and agreement of instructor. Credit hours will be assigned a letter grade. Repeatable for up to 5 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor.

LA&S 492. Topics and Problems on: _____ 1-6 Credits. U
An interdisciplinary study of different topics. Topics include Sanskrit. Designed especially for Juniors and Seniors.

LA&S 494. Senior Seminar in Liberal Arts and Sciences. 3 Credits. H
This course is a seminar to result in the student's integration of knowledge within the liberal arts and sciences. Through lecture and discussion, students explore a series of issues or themes that integrate several disciplines in the humanities, arts, social sciences, and mathematics and natural sciences. A final project (options include a portfolio, web page, paper, presentation) demonstrates the students' knowledge of the concepts, theories, and methods of several disciplines, and their ability to integrate that knowledge across disciplines. Not open to freshmen and sophomores; recommended in the senior year. Prerequisite: Completion of at least 30 junior/senior hours.

LA&S 701. Introduction to Graduate Professional Development. 1 Credits.
This course is designed to introduce early career graduate students to self-assessment and career exploration tools and best practices in developing a professional network and strong mentoring relationships. Emphasis is placed on practical application of career exploration, networking, and managing mentor relationships in order to identify and successfully pursue a variety of career pathways within and beyond the academy. Graded on a satisfactory/unsatisfactory basis.

LA&S 702. Introduction to Career Preparation for Graduate Students. 1 Credits.
This course is designed for 2nd year master's students and mid-career PhD students who are soon to complete or have just completed their comprehensive exams. The course will present various career preparation tools and techniques for careers both within and beyond the academy, and other best practices aimed at supporting students in the completion of their research and creative projects. Topics covered include but are not limited to: individual development plans, project management, building a professional network, informational interviews, CV and resume development, and identifying and applying for funding opportunities. Graded on a satisfactory/unsatisfactory basis. Prerequisite: LA&S 701 or permission by the instructor.

LA&S 703. Fundamentals in Career Planning for PhD Students. 1 Credits.
This course is designed to introduce late-career PhD students to the fundamentals of effective planning and organizing job search and application strategies for a variety of career paths. Emphasis will be placed on career paths beyond the professoriate including the private, non-profit, and public/government sectors. Topics covered include but are not limited to: external opportunities and fellowships for PhDs (ex. Presidential Management Fellowship, ACLS Public Fellows, AAAS Science & Technology Fellowships) in non-academic careers, advanced resume and cover letter development, interview and negotiation skills, and tailoring application materials to specific job postings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: LA&S 702 or instructor permission.

LA&S 720. Introduction to Language Teaching Research. 3 Credits.
An introductory study of topics in language teaching research with the focus on higher education contexts. Intended for graduate students in any area of specialization related to foreign language teaching and learning. Prerequisite: Consent of instructor.

LA&S 792. Topics in: _____ 1-3 Credits.
An interdisciplinary study of a variety of topics from the Liberal Arts and Sciences. Usually intended for graduate students, but may also be taken by qualified upper level undergraduates. May be repeated for credit when topic differs.

Linguistics Courses
LING 106. Introductory Linguistics. 3 Credits. SC S
This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A key goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as ANTH 106.)

LING 107. Introductory Linguistics, Honors. 3 Credits. SC S
This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A core goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as ANTH 107.)

**LING 110. Language and Mind. 3 Credits. SI S**

A study of the relation between language and the human mind, focusing on language as a fundamental aspect of human cognition. Topics include what is innate and what is learned during first and second language acquisition, how we process language, how animals communicate, how language may influence our thoughts, and whether there are areas of the brain specialized for language. Through a range of activities including in-class discussions, hands-on exercises, and linguistic experiments, you will develop your ability to critically evaluate claims about the mind and language and to use evidence from a variety of languages to discover how language is acquired, used, and organized in the human brain.

**LING 111. Language and Mind, Honors. 3 Credits. SI S**

A study of the relation between language and the human mind, focusing on language as a fundamental aspect of human cognition. Topics include what is innate and what is learned during first and second language acquisition, how we process language, how animals communicate, how language may influence our thoughts, and whether there are areas of the brain specialized for language. Through a range of activities including in-class discussions, hands-on exercises, and linguistic experiments, you will develop your ability to critically evaluate claims about the mind and language and to use evidence from a variety of languages to discover how language is acquired, used, and organized in the human brain. Prerequisite: Open only to students admitted to the University Honors Program, or by consent of instructor.

**LING 120. The Physics of Speech. 4 Credits. N**

An introduction to the acoustic structure of speech intended for nonscience majors. Emphasis will be placed on the methods and standards by which scientists measure and evaluate the physical characteristics of speech. Topics will include: simple harmonic motion, the propagation of sound waves, aerodynamic aspects of vocal fold vibration, resonance, digital speech processing, frequency analysis, and speech synthesis. Three class hours and one laboratory per week. (Same as SPLH 220.) Prerequisite: MATH 101 or 104 or equivalent.

**LING 177. First Year Seminar: _____ 3 Credits. SC**

A limited-enrollment, seminar course for first-time freshmen, organized around current issues in linguistics. May not contribute to major requirements in linguistics. First-year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

**LING 180. Study Abroad Topics in Linguistics: _____ 1-3 Credits. U**

This course is designed for the study of special topics in Linguistics. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

**LING 250. Introduction to Translation and Translation Theory. 3 Credits. H**

This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat oral interpretation in detail. (Same as AAAS 250, GERM 240, SLAV 250 and SPAN 202.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

**LING 305. Phonetics I. 3 Credits. S**

This course provides a basic introduction to the study of human speech sounds. Topics to be covered include anatomy and physiology of the speech production apparatus, transcription and production of the world's sounds, basic acoustics, computerized methods for speech analysis, acoustic characteristics of speech sounds, stress, and intonation. A hands-on laboratory project is part of the course. Prerequisite: An introductory course in Linguistics, or by consent of instructor.

**LING 308. Linguistic Analysis. 3 Credits. H**

Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from a variety of languages of different structural types. Prerequisite: LING 106.

**LING 312. Phonology I. 3 Credits. S**

This course focuses on crucial phonological concepts such as contrast, alternation, neutralization, distinctive features, and the syllable. It also provides students with basic skills for phonological analysis, including the selection of underlying representations, rule notation, rule ordering, identifying phonological universals, and how to make an informed decision when multiple analyses are viable. In addition, it discusses the external motivations for phonological grammar and relates phonology to other disciplines in linguistics such as language acquisition and psycholinguistics. Not open to students who have taken LING 712. Prerequisite: LING 305.

**LING 320. Language in Culture and Society. 3 Credits. SC S**

Language is an integral part of culture and an essential means by which people carry out their social interactions with the members of their society. The course explores the role of language in everyday life of peoples in various parts of the world and the nature of the relationship between language and culture. Topics include world-view as reflected in language, formal vs. informal language, word taboo, and ethnography of speaking. (Same as ANTH 320.)

**LING 321. Language in Culture and Society, Honors. 3 Credits. SC S**

An honors section of LING 320 for students with superior academic records. Not open to students who have had ANTH 320 or LING 320. (Same as ANTH 321.) Prerequisite: Membership in the University Honors Program or consent of instructor.

**LING 325. Syntax I. 3 Credits. H**

An introduction to generative syntax with special attention to theory and method. The course covers such topics as phrase structure, the lexicon, transformations and derivation. Prerequisite: LING 106.

**LING 338. Languages of the Jews. 3 Credits. H**

From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as JWSH 338.)

**LING 339. Languages of the Jews, Honors. 3 Credits. H**
Honors version of LING 338 or JWSH 338, Languages of the Jews. (Same as JWSH 339.) Prerequisite: Membership in the University Honors Program or consent of instructor.

LING 343. Bilingualism. 3 Credits. S
This course is an introduction to bilingualism in the U.S. and in the world. It explores the linguistic, sociolinguistic, and psycholinguistic aspects of bilingualism. We will consider how bilingualism impacts language itself, considering the new varieties that emerge as languages come into contact. We will also consider bilingualism at the societal level, considering how language policies and notions of 'prestige' impact language communities and whether they are able to preserve their languages. Finally, we will consider bilingualism at the individual level, considering how using two or more languages on a daily basis impacts language acquisition and language processing. We will also consider whether using more than one language affords certain cognitive advantages. We will discuss these topics to better understand research in this area and think critically about what relevance this research has in real world settings such as homes, classrooms, corporations, and clinical settings. The final project will ask you to make a proposal/argument related to bilingualism based on primary research in this area. The main goal will be to consider how research findings can be used to inform a real-world problem and how to best communicate those findings to the general public.

LING 345. Language and Gender. 3 Credits. S
This course explores the relationship between language use and gender. The course will specifically focus on how gender affects the ways we use spoken language as well as how we interpret the speech of others. Topics to be discussed will include the function of language in social relationships and language variation in different social contexts.

LING 370. Introduction to the Languages of Africa. 3 Credits. NW H/W
A survey of the indigenous languages of Africa from a linguistic perspective, covering the main language families and their geographic distribution, and focusing on the features and structure of the more widely spoken and representative languages in each family (e.g., Fula, Hausa, Maninka, Swahili, Yoruba). (Same as AAAS 370.)

LING 380. Study Abroad Topics in Linguistics: ______. 1-6 Credits. S
This course is designed for the study of special topics in Linguistics at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad.

LING 415. Second Language Acquisition I. 3 Credits. H
Introduction to the study of second language acquisition: The application of theoretical linguistics to the description of the language that a learner acquires, and to the process of acquisition. Prerequisite: An introductory course in linguistics.

LING 418. Introduction to Cognitive Science. 3 Credits. S
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an interdisciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as PHIL 418, PSYC 418, and SPLH 418.) Prerequisite: Consent of instructor.

LING 420. Capstone: Research in Language Science. 3 Credits. S
In this course you will get hands-on experience carrying out research in the language sciences, including designing, conducting, and presenting your own research. Topics covered in the class include formulating a research question and predictions; defining and recognizing critical thinking; using inferential statistics; and understanding common techniques, experiment paradigms, and research tools used in linguistics. Over the course of the semester you will work with classmates and with guidance from the instructor on formulating a research question and carrying out at least one part of the research to address it. This course will build your skills to critically evaluate claims about the world and identify ways to answer open questions—skills that are useful not only for linguistic research but also for career preparation for personal development. Prerequisite: LING 305, LING 312, LING 325, and either LING 415, LING 425, LING 435, or LING 438.

LING 421. Capstone: Typology-Unity and Diversity of Human Language. 3 Credits. S
This course, an on-site practicum in Linguistics, explores the similarities and differences among the worlds’ languages. Students apply their knowledge of phonetics, phonology, morphology, and syntax in describing and analyzing phenomena from a number of languages. The typological perspective that students develop is applied to topics such as word order, morphological typology, case, lexical categories, and valency. In addition to lecture style instruction, students get hands on practice in collecting, transcribing, and analyzing data from different languages through face to face elicitation with native speakers. Instruction builds discipline-specific knowledge and skills for career preparation. Prerequisite: LING 305, LING 312, and LING 325.

LING 425. First Language Acquisition I. 3 Credits. S
An introductory course in the acquisition of child language. The course will examine the fundamental claims of modern first language acquisition theories and evaluate these theories by discussing core findings in domains of children’s acquisition of speech sounds, words, syntax, semantics, and pragmatics. The course will also cover relevant issues including bilingual first language acquisition, cross-linguistic research, child language processing, language and cognition in child development, methods in child language research, and atypical language development. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students who have taken CLDP/LING 709. Prerequisite: An introductory course in linguistics.

LING 430. Linguistics in Anthropology. 3 Credits. S
The study of language as a symbolic system. Exploration into the interrelatedness of linguistic systems, of nonlinguistic communicative systems, and of other cultural systems. (Same as ANTH 430.)

LING 435. Psycholinguistics I. 3 Credits. S LFE
A detailed examination of issues in the processing of language. The course provides a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes are examined. (Same as PSYC 435.) Prerequisite: An introductory course in linguistics or consent of instructor.

LING 438. Neurolinguistics I. 3 Credits. S
The course explores how language is represented and processed in the human brain. This includes a critical survey of the foundations and the current research in the cognitive neuroscience of language, focusing on the techniques of functional brain imaging (fMRI, PET, EEG, MEG, and related methods), and research on aphasia and other language disorders. This course also includes a component providing laboratory experience with brain imaging research on language. Prerequisite: An introductory course in Linguistics.

LING 447. North American Indian Languages. 3 Credits. S
This course introduces students to the indigenous languages of North America. Students critically examine the structures and status of these languages, which have greatly expanded our knowledge of human
language and linguistic theory. Topics include the history and future of North American languages and indigenous speech communities, the history of the field of Americanist linguistics, as well as important linguistic questions raised by phenomena from American languages in phonology, morphology, syntax, semantics, and historical linguistics. Prerequisite: An introductory course in linguistics. Not open to students enrolled in 747.

LING 470. Language and Society in Africa. 3 Credits. NW H/W Examines issues and problems associated with language use in sub-Saharan Africa from a sociological perspective. Topics covered include an overview of the types of languages spoken on the continent: indigenous languages, colonial languages, pidgins and creoles, and Arabic as a religious language; problems associated with the politics of literacy and language planning; writing and standardization of indigenous languages; and the cultural and ideological dilemmas of language choice. (Same as AAAS 470.) Prerequisite: AAAS 103, AAAS 305, or LING 106; or consent of instructor.

LING 490. Independent Study. 1-3 Credits. U A special research project or directed readings in an area of linguistics not covered in other courses. No more than 3 hours of LING 490 may be applied toward the requirements for the major. Prerequisite: Consent of instructor.

LING 491. Topics in Linguistics: ____, 1-3 Credits. H The content, prerequisites, and credits of this course will vary. May be repeated.

LING 496. Honors Essay in Linguistics. 1-3 Credits. H Individual directed research and preparation of an essay on a linguistic topic. Prerequisite: A grade-point average of 3.5 in linguistics and 3.25 in all courses, and consent of the major adviser.

LING 507. Phonetics II. 3 Credits. S This course is a continuation of Phonetics I (LING 305/705) and provides a more detailed survey of acoustic and auditory phonetics. Topics to be covered include vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, prosody, the phonetics of second language acquisition, and the production and perception of cues to gender, talker, region, and socio-economic status. In addition, a number of laboratory projects are required. Prerequisite: LING 305.

LING 514. Phonology II. 3 Credits. S This course discusses the problems in rule-based phonology that led to the development of Optimality Theory. Discussions of Optimality Theory include its basis architecture, the nature of markedness constraints, the role of phonetics in the theory, correspondence between different levels of representation, and how variants of the theory can model free and lexical variation. A selection of the following topics will also be included depending on class interest: interface between phonology and morphology, syntax, and the lexicon, reduplication, loanword phonology, biases in phonological learning, stress, and tone. The course has a particular focus on theory-building, with discussions on the how to lay out the predictions of a theoretical proposal, and how phonological predictions can be tested using experimental methods. Not open to students who have taken LING 714. Prerequisite: LING 312 or consent of instructor.

LING 516. Second Language Acquisition II. 3 Credits. S This course will provide in-depth reading and discussion of several current topics in second language acquisition with a focus on psycholinguistic approaches to second language acquisition and sentence processing. Both theoretical and methodological issues will be discussed. Students will design a research proposal in the course of the semester. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in LING 716. Prerequisite: LING 415 and LING 325; or consent of instructor.

LING 526. Syntax II. 3 Credits. S An advanced course covering one or more current theories of syntax. The course provides in-depth reading and discussion on the major areas of syntactic theory including universal grammar, phrase structure theory; lexicon and argument structure; binding, control, locality conditions; constraints on representation and derivation; and the relation between syntax and the semantic module. Prerequisite: LING 325.

LING 527. Morphology. 3 Credits. S An exploration of several topics in word structure and formation. Covers three broad areas: traditional morphology, morphe-phonology, and morpho-syntax. Traditional morphology includes a survey of several kinds of word formation processes, the internal structure of words, morpheme types, inflection, paradigms, derivation, and compounding. Morpho-phonology deals with phonological constraints on morphological processes and prosodic morphology. Morpho- syntax concentrates on the syntactic properties of morphological phenomena and interaction of syntactic processes and morphology. The course has a strong emphasis on cross-linguistic comparative morphology. Prerequisite: LING 312 and LING 325, or consent of instructor.

LING 531. Semantics. 3 Credits. S This course explores how meaning works in the grammar of natural languages. Students actively learn and apply formal structures to meaning in relation to truth, logic, and morphosyntax. The course emphasizes the role of context in semantic and pragmatic interpretation, including using context-based elicitation techniques to collect semantic data. Other topics include the nature of events and argument structure, tense and aspect, reference and binding, quantification and scope, and the semantic motivation behind syntactic structures. This course is offered at the 500 and 700 level, with additional assignments at the 700 level. Not open to students with credit in LING 731. Prerequisite: LING 525 or consent of instructor.

LING 537. Psycholinguistics II. 3 Credits. S An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. Prerequisite: LING 435 or consent of instructor.

LING 539. First Language Acquisition II. 3 Credits. A second semester course in child language that explores the acquisition of morphology, syntax, and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. Prerequisite: LING 425 or consent of instructor.

LING 541. Field Methods in Linguistic Description. 3 Credits. H The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Techniques of research design, methods of phonetic transcription, grammatical annotation, and analysis of language context. Prerequisite: LING 305, LING 312, and LING 325 or consent of instructor.

LING 542. Neurolinguistics II. 3 Credits. S An in-depth discussion of the representation and processing of language from a cognitive neuroscience perspective. This course involves critical discussion of selected topics of current research interest in neurolinguistics. The course also includes a significant hands-on component, in which students receive training in research on the cognitive neuroscience of language by developing and implementing a new EEG study on an aspect of language, as well as attending a series of mini-labs introducing neuroimaging methods and analyses. Prerequisite: LING 438 or consent of instructor.
LING 543. Language and Culture in Arabic-Speaking Communities. 3 Credits. W
The course examines the links between language structure, patterns of use, language choice, and language attitudes in the diglossic and bilingual Arabic-speaking communities. It also explores language as a reflector and creator of Arab culture (e.g., linguistic encoding of politeness, the Quranic text as the spoken and written word, the role of tropes in Arabic rhetoric). The topics for discussion range from the micro-level language choice to the macro-level issues of national language policies and planning within the domain of government and education across the Arab world. (Same as AAS 543)

LING 570. The Structure of Japanese. 3 Credits. H
This course will explore Japanese, discovering the phonetic, phonological, morphological, syntactic and semantic features of the language, and discussing the actual use of Japanese in social/cultural contexts. The course will also discuss the acquisition of Japanese, both in children and adult learners. This course will be primarily for students who want to learn about the linguistic aspects of Japanese, rather than to gain a practical command of it. (Same as EALC 570.) Prerequisite: A previous LING, JPN, or EALC course.

LING 572. The Structure of Chinese. 3 Credits. H
A detailed study of the phonological and grammatical structure of Chinese and the interactions between language and culture. Depending on student interests, a unit on the pedagogy of teaching Chinese as a foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as EALC 572.)

LING 575. The Structure of: _____. 3 Credits. S
A detailed study of a language, including its phonological, morphological, syntactic and semantic characteristics. The course provides students with a linguistic knowledge of the language rather than a practical command of it. Prerequisite: A course in linguistics.

LING 700. Introduction to Linguistic Science. 3 Credits.
An introduction to the theory and techniques of linguistic science for majors and others intending to do advanced work in linguistics and linguistic anthropology. Emphasis on the sound system, grammatical structure, and semantic structure of languages. Lectures and laboratory sessions. Not open to students who have taken ANTH/LING 106 or ANTH/LING 107. Prerequisite: Graduate standing.

LING 705. Phonetics I. 3 Credits.
This course provides a basic introduction to the study of human speech sounds. Topics to be covered include anatomy and physiology of the speech production apparatus, transcription and production of the world's sounds, basic acoustics, computerized methods for speech analysis, acoustic characteristics of speech sounds, stress, and intonation. A 'hands on' laboratory project is part of the course. Prerequisite: Graduate standing or consent of instructor.

LING 706. Current Linguistic Anthropology. 3 Credits.
The fundamental issues, methods, and theories in contemporary linguistic anthropology. (Same as ANTH 706.) Prerequisite: Graduate standing or consent of instructor.

LING 707. Phonetics II. 3 Credits. LFE
This course is a continuation of Phonetics I (LING 705) and provides a more detailed survey of acoustic and auditory phonetics. Topics to be covered include vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, prosody, the phonetics of second language acquisition, and the production and perception of cues to gender, talker, region, and socio-economic status. In addition, a number of laboratory projects will be required. Prerequisite: LING 705 or consent of instructor.

LING 708. Linguistic Analysis. 3 Credits.
Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from a variety of languages of different structural type. (Same as ANTH 736.) Prerequisite: An introductory course in linguistics. Not open to students who have taken LING 308.

LING 709. First Language Acquisition I. 3 Credits.
An introductory course in the acquisition of child language. The course will examine the fundamental claims of modern first language acquisition theories and evaluate these theories by discussing core findings in domains of children's acquisition of speech sounds, words, syntax, semantics, and pragmatics. The course will also cover relevant issues including bilingual first language acquisition, cross-linguistic research, child language processing, language and cognition in child development, methods in child language research, and atypical language development. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students who have taken LING 425. (Same as CLDP 709.) Prerequisite: Graduate standing or consent of instructor.

LING 712. Phonology I. 3 Credits.
This course focuses on crucial phonological concepts such as contrast, alternation, neutralization, distinctive features, and the syllable. It also provides students with basic skills for phonological analysis, including the selection of underlying representations, rule notation, rule ordering, identifying phonological universals, and how to make an informed decision when multiple analyses are viable. In addition, it discusses the external motivations for phonological grammar and relates phonology to other disciplines in linguistics such as language acquisition and psycholinguistics. Not open to students who have taken LING 312. Prerequisite: LING 705.

LING 714. Phonology II. 3 Credits.
This course discusses the problems in rule-based phonology that led to the development of Optimality Theory. Discussions of Optimality Theory include its basic architecture, the nature of markedness constraints, the role of phonetics in the theory, correspondence between different levels of representation, and how variants of the theory can model free and lexical variation. A selection of the following topics will also be included depending on class interest: Interface between phonology and other components of the grammar (e.g., morphology, syntax, and the lexicon), reduplication, loanword phonology, biases in phonological learning, stress, and tone. The course has a particular focus on theory-building, with discussions on how to lay out the predictions of a theoretical proposal and how phonological predictions can be tested using experimental methods. Not open to students who have taken LING 514. Prerequisite: LING 712.

LING 715. Second Language Acquisition I. 3 Credits.
Introduction to the study of second language acquisition: The application of theoretical linguistics to the description of the language a learner acquires, and to the process of acquisition. Prerequisite: Graduate standing or consent of instructor.

LING 716. Second Language Acquisition II. 3 Credits.
This course will provide in-depth reading and discussion of several current topics including second language acquisition with a focus on psycholinguistic approaches to second language acquisition and sentence processing. Both theoretical and methodological issues will be discussed. Students will design a research proposal in the course of the semester. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit
in LING 516. Prerequisite: LING 715; LING 725, which may be taken concurrently, or consent of instructor.

LING 720. Research Methods in Linguistics. 3 Credits.
This course provides a foundation for designing, conducting, and critically evaluating quantitative and qualitative research in the language sciences. Topics include formulating a research hypothesis, participant selection, ethical considerations, the scientific method, validity, reliability, data collection, dependent and independent variables, descriptive and inferential statistics. This course will serve students who are interested in the basics of research design and statistics for the study of language. Prerequisite: Graduate standing or consent of instructor.

LING 725. Syntax I. 3 Credits.
The basics of theoretical syntax, examining the principles of universal grammar. Topics include phrase structure, relations among syntactic constituents, and the nature of syntactic rules and lexical categories. Prerequisite: Graduate standing or consent of instructor.

LING 726. Syntax II. 3 Credits.
An advanced course covering one or more current theories of syntax. The course will provide in-depth reading and discussion on the major areas of syntactic theory including universal grammar, phrase structure theory, lexical projections of argument structure, binding, control, locality condition, constraints on representation, and the relation between syntax and the semantic module. Prerequisite: LING 725.

LING 727. Morphology. 3 Credits.
An exploration of several topics in word structure and formation. Covers three broad areas: traditional morphology, morpho-phonology, and morpho-syntax. Traditional morphology includes a survey of several kinds of word formation processes, the internal structure of words, morpheme types, inflection, paradigms, derivation, and compounding. Morpho-phonology deals with phonological constraints on morphological processes and prosodic morphology. Morpho syntax concentrates on the syntactic properties of morphological phenomena and interaction of syntactic processes and morphology. The course has a strong emphasis on cross-linguistic comparative morphology. Prerequisite: LING 712, LING 725, or consent of instructor.

LING 731. Semantics. 3 Credits.
This course explores how meaning works in the grammar of natural languages. Students actively learn and apply formal structures to meaning in relation to truth, logic, and morphosyntax. The course emphasizes the role of context in semantic and pragmatic interpretation, including using context-based elicitation techniques to collect semantic data. Other topics include the nature of events and argument structure, tense and aspect, reference and binding, quantification and scope, and the semantic motivation behind syntactic structures. This course is offered at the 500 and 700 level, with additional assignments at the 700 level. Not open to students with credit in LING 531. Prerequisite: LING 725 or consent of instructor.

LING 732. Discourse Analysis. 3 Credits.
This course focuses on linguistic frameworks for the analysis of discourse. Discourse is a linguistic system larger than the sentence (utterance), which connects and contextualizes speech and written text. This course focuses on current issues and theoretical frameworks in the analysis of discourse. Using oral and written data, students will examine how contexts influence and shape linguistic form. Topics covered include transcription systems, the structure and organization of different genres of language, and the performance of social actions, including stance-taking, framing, and the construction of identity. Students will also have an opportunity to perform discourse analytic research on the data of their choice. (Same as ANTH 732.) Prerequisite: ANTH 706 or consent of instructor.

LING 735. Psycholinguistics I. 3 Credits. LFE
A detailed examination of issues in the processing of language. The course will provide a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes will be examined. (Same as PSYC 735.)

LING 737. Psycholinguistics II. 3 Credits.
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. (Same as PSYC 737.) Prerequisite: PSYC 735/LING 735 or consent of instructor.

LING 738. Neurolinguistics I. 3 Credits.
We will explore how language is represented and processed in the human brain. This will include a critical survey of the foundations and the newest state-of-the-art research in the cognitive neuroscience of language, focusing on the techniques of functional brain imaging (fMRI, PET, EEG, MEG, and related methods), and research on aphasia and other language disorders. This course will also include a laboratory component providing hands-on experience with brain imaging research on language. Prerequisite: Graduate standing or consent of instructor.

LING 739. First Language Acquisition II. 3 Credits.
A second semester course in child language which explores the acquisition of morphology, syntax and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. (Same as CLDP 739.) Prerequisite: LING 709 or consent of instructor.

LING 740. Linguistic Data Processing. 3 Credits.
The tools and techniques necessary to analyze linguistic fieldwork data, including research design, recording and elicitation techniques, computational data processing and analysis, and field ethics. Techniques of research, field recording, and data analysis technology. Methods of phonetic transcription, grammatical annotation, and analysis of language context. Practice of techniques via short studies of at least one language. (Same as ANTH 740.) Prerequisite: LING 700 or consent of instructor.

LING 741. Field Methods in Linguistic Description. 3 Credits.
The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Techniques of research design, methods of phonetic transcription, grammatical annotation, and analysis of language context. Practice of techniques via short studies of at least one language. (Same as ANTH 741.) Prerequisite: LING 705 or consent of instructor.

LING 742. Neurolinguistics II. 3 Credits.
An in-depth discussion of the representation and processing of language from a cognitive neuroscience perspective. This course involves critical discussion of selected topics of current research interest in neurolinguistics. The course also includes a significant hands-on component, in which students receive training in research on the cognitive neuroscience of language by developing and implementing a new EEG study on an aspect of language, as well by completing as a series of mini-labs introducing neuroimaging methods and analyses. Prerequisite: LING 738 or consent of instructor.

LING 747. North American Indian Languages. 3 Credits.
This course introduces student to the indigenous languages of North America. Students will critically examine the structures and status of these languages, which have greatly expanded our knowledge of human language and linguistic theory. Topics include the history and future of North American languages and indigenous speech communities, the
history of the field of Americanist linguistics, as well as important linguistic questions raised by phenomena from American languages in phonology, morphology, syntax, semantics, and historical linguistics. Prerequisite: An introductory course in linguistics.

LING 748. Language Contact. 3 Credits.
Theories and case studies of languages in contact. Areal and genetic linguistics, genesis of pidgins and creoles, multilingualism. Social, political, economic, and geographic factors in language change. (Same as ANTH 748.) Prerequisite: A course in Linguistics.

LING 782. Research Methods in Child Language. 3 Credits.
A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as CLDP 782 and PSYC 782.)

LING 794. Proseminar. 3 Credits.
Introduction to the field of linguistics. Topics include research literature and research methods, thesis and grant writing, and ethics in linguistic research. Required for all first-year graduate students in linguistics. Graded on a satisfactory/unsatisfactory basis.

LING 799. Proseminar in Child Language. 2 Credits.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, CLDP 799, PSYC 799 and SPLH 799.)

LING 807. Seminar in Phonetics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of phonetics. Prerequisite: LING 705 or consent of instructor.

LING 814. Seminar in Phonology. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of phonology. Prerequisite: LING 712 or consent of instructor.

LING 822. Seminar in First Language Acquisition. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of first language acquisition. (Same as CLDP 822.) Prerequisite: LING 709 or consent of instructor.

LING 826. Seminar in Syntax. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of syntax. Prerequisite: LING 725 or consent of instructor.

LING 831. Seminar in Semantics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of semantics. Prerequisite: LING 731 or consent of instructor.

LING 837. Seminar in Psycholinguistics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of psycholinguistics. Prerequisite: LING 735 or consent of instructor.

LING 842. Seminar in Neurolinguistics. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of neurolinguistics. Prerequisite: LING 738 or consent of instructor.

LING 850. Topics in Research in Experimental Linguistics: ______. 1-9 Credits.
This course is primarily for students actively engaged in experimental linguistic research. The course provides students with the opportunity to focus on their current research projects and involves critical analysis, presentation, and discussion of research design, methods, statistical analysis, and data interpretation. May be repeated. Prerequisite: Consent of instructor.

LING 851. Research in Language Acquisition and Processing. 1-9 Credits.
This course is primarily intended for students actively engaged in linguistic research on language acquisition, language processing, and neurolinguistics. Students in this course present and discuss study design, methods, data analysis and interpretation of results for their research projects. Professional development topics such as CV development, applications for fellowships, grants and jobs, and the dissemination of research findings are also discussed. May be repeated. Prerequisite: Consent of instructor.

LING 852. Research in Field and Formal Linguistics. 1-9 Credits.
This course is intended for students who are conducting field work on syntax or morphology, typically of an understudied language. The course is structured around a set of topics (variable by semester) which each student will investigate in a particular language. The focus of the course is on data collection and analysis and students will present and discuss the results of their research projects. May be repeated. Prerequisite: Consent of instructor.

LING 860. Seminar in Second Language Acquisition. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of second language acquisition. Prerequisite: LING 715 or consent of instructor.

LING 899. Master's Research Project. 1-3 Credits.
A course for students working on their M.A. Research Project. Normally to be taken during the semester in which the student is submitting the M.A. Research Project. Students must enroll for at least one credit hour. Up to three credits will count toward the minimum number of credits required for the M.A. degree in linguistics.

LING 910. Linguistic Seminar: ______. 1-3 Credits.
The content and prerequisites of this course will vary. May be repeated.

LING 980. Linguistics Field Work. 3-6 Credits.
Independent field work with an informant on a language not normally offered at the University of Kansas, or on a non-standard dialect of one of the more accessible languages. Student must show evidence (file slips for grammatical and phonological analysis, dictionary slips, etc.) of having done the required amount of work without necessarily being able to turn in a completed analysis. Normally for three credits; six credits would be available under certain circumstances such as intensive summer work on location away from the university. Graded on a satisfactory/unsatisfactory basis. Prerequisite: LING 712 and LING 725.

LING 997. Ph.D. Examinations. 1-12 Credits.
A course for students writing answers to the preliminary Ph.D. examination and/or preparing to take the Oral Comprehensive Examination. Normally to be taken during the semester in which the student is submitting answers to the written preliminary examination. May be taken for a maximum of two semesters or twelve credits, whichever comes first. Does not count toward the minimum number of credits required for a graduate degree in linguistics. Graded on a satisfactory/unsatisfactory basis.

LING 998. Independent Study. 1-12 Credits.
A special research project or directed readings in an area of linguistics not covered in other courses. Prerequisite: Written consent of instructor.

LING 999. Doctoral Dissertation. 1-12 Credits.

Mathematics Courses

MATH 2. Intermediate Mathematics. 3 Credits. U
Mathematics (primarily algebra) preparatory to MATH 101. Topics include: solving linear equations, inequalities, and system; solving quadratic,
radical, and rational equations; and introduction to imaginary numbers. Qualification: Two years of high school college preparatory mathematics, algebra and geometry, and a score of 16 or more on ACT mathematics; or a qualifying score on the mathematics placement test. MATH 002 is the lowest level mathematics course offered at the University of Kansas, and does not count towards the 120 credit hours required for graduation. Students not prepared for MATH 101 will be permitted to enroll in MATH 002. However, before enrolling in MATH 002, such students are encouraged to prepare by self-study or by completing a beginning algebra course in high school, community college, or correspondence study.

**MATH 101. College Algebra:** 3 Credits. U
Coordinate systems, functions and their graphs; linear, quadratic, general polynomial, rational, exponential, and logarithmic functions; equations and inequalities; and linear and non-linear systems. Data Driven sections are intended for non-STEM majors and cover college algebra content with increased emphasis on context and interpretation of data, and decreased emphasis on symbolic manipulation. Enrollment in Enhanced sections will benefit students by providing additional instructional time and integrated review of some prerequisite material. Students in Enhanced sections must enroll in MATH 197 as a co-requisite. Not open to students with credit in MATH 104. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. Students with slightly lower ACT scores may be admitted to Enhanced sections based on high school GPA.

**MATH 103. Trigonometry. 2 Credits. U**
The circular functions and their applications. Not open to students with credit in MATH 104. May not be used to fulfill the College mathematics requirement. Prerequisite: MATH 101, or two years of high school algebra and a score of 26 or higher on enhanced ACT mathematics, or a qualifying score on the mathematics placement test.

**MATH 104. Precalculus Mathematics. 5 Credits. U**
An introduction to the elementary functions (polynomial, rational, exponential, logarithmic, and trigonometric) and their properties. Open for only two hours credit for students with credit in MATH 101. Not open to students with credit in MATH 103. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

**MATH 105. Introductory Quantitative Reasoning. 3 Credits. N**
This diverse course introduces students to foundational quantitative reasoning skills that will assist them throughout their college-level work and beyond. Topics may include logic and problem solving, personal finance, elementary statistics and data analysis, voting theory and fair division problems, basic linear programming, and network theory. Students taking this class will gain an appreciation for how mathematical thinking can be used in everyday decision making. Prerequisite: MATH 101 or MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

**MATH 109. Mathematics for Elementary School Teachers I. 3 Credits. U**
This course is designed to give the prospective elementary school teacher an overview of several components of the elementary school mathematics curriculum, including number systems, estimation, inequalities and order, sequences and patterns, sets, and relations and functions. The class meets each week for three one-hour instruction sessions and one two-hour laboratory session. This course may not be used to satisfy the College mathematics requirement. Prerequisite: MATH 101 or equivalent placement.

**MATH 110. Mathematics for Elementary School Teachers II. 3 Credits. U**
Continuation of MATH 109, including geometry (including transformations) and elementary probability and statistics. Class meets each week for three one-hour instruction sessions and one two-hour laboratory session. This course does not serve as a prerequisite for any mathematics course. It may not be used to satisfy the College mathematics requirement. Prerequisite: MATH 109.

**MATH 115. Calculus I. 3 Credits. N**
Elementary differential and integral calculus, with applications in management and the biological sciences. Not open to students with credit in MATH 125 or MATH 145. Prerequisite: MATH 101 or MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

**MATH 116. Calculus II. 3 Credits. NM N**
Continuation of MATH 115 including exponential, logarithmic, and trigonometric functions, techniques of integration, and the calculus of functions of several variables. Not open to students with credit in MATH 127 or MATH 147. Prerequisite: MATH 115 plus a course in trigonometry, or MATH 125 or MATH 145. MATH 103 may be taken concurrently.

**MATH 125. Calculus I. 4 Credits. N**
Limits, continuity and derivatives of algebraic, trigonometric, exponential and logarithmic functions. Curve sketching, optimization and other applications of the derivative. Antiderivatives, Riemann sums, the definite integral, and the fundamental theorem of calculus. Open for only 1 hour credit to students with credit in MATH 115. Not open for credit to students with credit in MATH 116 or MATH 145. Prerequisite: MATH 103 or MATH 104, with a grade of C- or higher; or 3 years of college preparatory mathematics including trigonometry, with a score of 28 or higher on the ACT Mathematics exam.

**MATH 126. Calculus II. 4 Credits. N**
Techniques of integration, including integration by parts. Applications of integration, including volume, arc length, work and average value. Infinite sequences and series and Taylor series. Polar coordinates, vectors and the geometry of space. Open for only 2 hours of credit to students with credit in MATH 116. Not open for credit to students with credit in MATH 146. Prerequisite: MATH 116, MATH 125, or MATH 145, with a grade of C- or higher.

**MATH 127. Calculus III. 4 Credits. N**
Multivariable functions, partial derivatives and their applications, multiple integrals and their applications. Vector-valued functions, line and surface integrals, Green, Gauss and Stokes Theorems. Not open for credit to students with credit in MATH 147. Prerequisite: MATH 126 or MATH 146, with a grade of C- or higher.

**MATH 145. Calculus I, Honors. 4 Credits. NM N**
Limits, continuity and derivatives of algebraic, trigonometric, exponential and logarithmic functions. Curve sketching, optimization and other applications of the derivative. Antiderivatives, Riemann sums, the definite integral, and the fundamental theorem of calculus. Open for only 1 hour credit to students with credit in MATH 115. Not open for credit to students with credit in MATH 116 or MATH 125. Prerequisite: An ACT Math score of 34 or higher, or membership in the University Honors Program and an ACT Math score of 32 or higher.

**MATH 146. Calculus II, Honors. 4 Credits. N**
Techniques of integration, including integration by parts. Applications of integration, including volume, arc length, work and average value. Infinite sequences and series and Taylor series. Polar coordinates, vectors and the geometry of space. Open for only 2 hours credit to students with credit in MATH 116. Not open for credit to students with credit in MATH 126.
Prerequisite: MATH 125, or MATH 145, with a grade of C- or higher; and invitation of the Department of Mathematics.

MATH 147. Calculus III, Honors. 4 Credits. N
Multivariable functions, partial derivatives and their applications, multiple integrals and their applications, Vector-valued functions, line and surface integrals, Green, Gauss and Stokes Theorems. Not open for credit to students with credit in MATH 127. Prerequisite: MATH 126 or MATH 146, with a grade of C- or higher; and invitation of the Department of Mathematics.

MATH 177. First Year Seminar: _____ 3 Credits. NM
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in math. May not contribute to major requirements in math. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

MATH 197. Mathematical Workshops: _____ 1-3 Credits. U
Offered to provide opportunities for deeper understanding of freshman/sophomore mathematics through interactive learning. Topics will vary. May be repeated for additional credit. Prerequisite: Variable.

MATH 209. Functions and Modeling. 3 Credits. N
Study of the use of functions in mathematical modeling, with topics drawn from algebra, analytic geometry, statistics, trigonometry, and calculus. These topics include function properties and patterns, complex numbers, parametric and polar equations, vectors and various growth models. The course also includes inquiry methods, collaborative problem solving, the use of multiple representations and data analysis techniques, and the justification and presentation of results. Central to the course are investigative labs employing various technologies and software. The course is designed to help prepare students for secondary school mathematics teaching. (Same as PHSX 209.) Prerequisite: MATH 126 or MATH 146.

MATH 220. Applied Differential Equations. 3 Credits. N
Linear ordinary differential equations, Laplace transforms, systems of equations, and applications. Not open to those who have taken MATH 320. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher; previous or concurrent enrollment in MATH 290 or MATH 291 recommended.

MATH 221. Applied Differential Equations, Honors. 3 Credits. N
Linear Ordinary Differential Equations, Laplace Transforms, Systems of Equations, Enrichment Applications. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher, and invitation from the Department of Mathematics; previous or concurrent enrollment in MATH 290 or MATH 291 recommended. Not open to students with credit in MATH 320.

MATH 290. Elementary Linear Algebra. 2 Credits. N
Systems of linear equations, matrices, vector spaces, linear transformations, and applications. Not open to those who have taken MATH 590. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher.

MATH 291. Elementary Linear Algebra, Honors. 2 Credits. N
Systems of Linear Equations, Matrices, Vector Spaces, Linear Transformations, Enrichment Applications. Prerequisite: MATH 126 or MATH 146 with a grade of C- or higher, and invitation from the Department of Mathematics. Not open to students who have taken MATH 590.

MATH 296. Special Topics: _____ 1-3 Credits. N
Designed for the study of special topics in mathematics at the freshman/sophomore level. May be repeated for additional credit; does not count toward the major or minor in mathematics. Prerequisite: Variable.

MATH 320. Elementary Differential Equations. 3 Credits. N
Linear ordinary differential equations, series solutions. Laplace transforms. Systems of equations. Not open to those who have taken MATH 220. Prerequisite: MATH 127 or MATH 147 with a grade of C- or higher, and MATH 290 or MATH 291.

MATH 365. Elementary Statistics. 3 Credits. N
This course will cover elementary descriptive statistics of a sample of measurements; probability; the binomial, Poisson, and normal distributions, populations and sampling from populations; and simple problems of statistical inference. May not be counted for junior-senior credit toward a major in mathematics. Not open to students with credit in DSCI 202, BIOL 370, MATH 465, MATH 526, or MATH 628. Prerequisite: MATH 101, MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test.

MATH 409. Topics in Geometry for Secondary and Middle School Teachers. 2 Credits. N
Study of selected topics from Euclidean, non-Euclidean, and transformation geometry chosen to give breadth to the mathematical background of secondary and middle school teachers. May not be counted for junior-senior credit towards a major in mathematics. Prerequisite: MATH 126 or MATH 146. Students enrolled in MATH 409 must concurrently enroll in MATH 410.

MATH 410. Topics in History of Mathematics for Secondary and Middle School Teachers. 1 Credits. N
Study of selected topics from mathematical history chosen to provide students with knowledge of major historical developments in mathematics including individual contributions and contributions from different cultures. These topics will include a historical development of Euclidean and non-Euclidean geometry. May not be counted for junior-senior credit towards a major in mathematics. Prerequisite: MATH 126 or MATH 146. Students enrolled in MATH 410 must concurrently enroll in MATH 409.

MATH 450. Discrete Mathematics. 3 Credits. N
Basic topics in discrete mathematics including sets, logic, relations and functions, graphs and combinatorics. Advanced topics chosen from partially ordered sets and lattices, Boolean algebras, automata, game theory, coding theory, cryptography, optimization and enumeration. Prerequisite: MATH 290.

MATH 500. Intermediate Analysis. 3 Credits. N
A careful formulation of convergence and limits of sequences and functions; continuity and properties of continuous functions; differentiation; the Riemann integral; mean-value theorems and the fundamental theorem of calculus. Not open to students with credit in MATH 765. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

MATH 510. Introduction to the Theory of Computing. 3 Credits. N
Finite state automata and regular expressions. Context-free grammars and pushdown automata. Turing machines. Models of computable functions and undecidable problems. The course emphasis is on the theory of computability, especially on showing limits of computation. (Same as EECS 510.) Prerequisite: EECS 210 and upper-level EECS eligibility.

MATH 526. Applied Mathematical Statistics I. 3 Credits. NM N
A first course in statistics for students with the techniques of calculus at their disposal. The following topics are studied with illustrations and problems drawn from various fields of applications: basic notions of probability and probability distributions; classical estimation and testing procedures for one and two sample problems; chi-square test. Not open to those with credit in MATH 628. Prerequisite: MATH 127 or MATH 147 or MATH 116 (MATH 127 or MATH 147 recommended.)
MATH 530. Mathematical Models. 3 Credits. N
An introduction to mathematical models useful in a large variety of scientific and technical endeavors. Topics include: model construction, Markov chain models, models for linear optimization, graphs as models, and game theory. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

MATH 540. Elementary Number Theory. 3 Credits. N
Divisibility, primes and their distribution, the Euclidean algorithm, perfect numbers, Fermat's theorem, Diophantine equations, applications to cryptography. Prerequisite: MATH 127 or MATH 147.

MATH 558. Introductory Modern Algebra. 3 Credits. N
Development of the number systems. Polynomials. Introduction to abstract number systems such as groups and fields. Not open to students with credit in MATH 791. Prerequisite: MATH 290 or MATH 291.

MATH 559. Modern Geometries. 3 Credits. N
Selected topics in Euclidean geometry. Synthetic and analytic projective geometry; duality, Desargues' theorem, perspectives, conics. Non-Euclidean and metric projective geometries. Prerequisite: MATH 127 or MATH 147.

MATH 581. Numerical Methods. 3 Credits. N
An introduction to numerical methods and their application to engineering and science problems. Applied treatment of elementary algorithms selected from the subject areas: finding roots of a single nonlinear equation, numerical differentiation and integration, numerical solution of ordinary differential equations. Emphasis on implementing numerical algorithms using the computer. Not open to students with credit in MATH 781 or MATH 782. Prerequisite: MATH 220 and MATH 290, or MATH 320.

MATH 582. Computational Data Science. 3 Credits. N
This course provides an introduction to topics in data science and machine learning with an emphasis on computation and applications. Programming for the course uses the student's choice of Matlab, Python, or R. Topics covered include dimension reduction, regression techniques, density estimation, machine learning, data assimilation, and clustering and classification techniques. Prerequisite: MATH 290 or equivalent.

MATH 590. Linear Algebra. 3 Credits. N
Vector spaces, linear transformations, and matrices. Canonical forms, Determinants. Hermitian, unitary and normal transformations. Not open to students with credit in MATH 792. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

MATH 591. Applied Numerical Linear Algebra. 3 Credits. N
An introduction to numerical linear algebra. Possible topics include: applied canonical forms, matrix factorizations, perturbation theory, systems of linear equations, linear least squares, singular value decomposition, algebraic eigenvalue problems, matrix functions, and the use of computational software. Not open to students with credit in MATH 782. Prerequisite: MATH 290 or MATH 291. EECS 138 or equivalent recommended.

MATH 596. Special Topics: _____ 1-3 Credits. N
Arranged as needed to present appropriate material to groups of students. May be repeated for additional credit. Prerequisite: Variable.

MATH 597. Special Topics, Honors: _____ 3 Credits. N
A study of a specialized topic in mathematics. May be repeated for credit when the topic varies. Prerequisite: A previous Honors course in Mathematics or permission of instructor. Other prerequisites depending on topic possible.

MATH 601. Algebraic Topics in Computing: _____ 3 Credits. N
Topics motivated by applications in computer science, studied from a mathematical perspective, and based on methods from linear and abstract algebra. Examples of topics include error-correcting codes, cryptography, and computer algebra. May be repeated with different topics for additional credit. Prerequisite: MATH 290 or MATH 291.

MATH 605. Applied Regression Analysis. 3 Credits. N
This course provides an introduction to regression analysis and statistical learning with an emphasis on mathematical understanding and its software implementation. Programming uses Python, R, or Julia. Covered topics include the following. Linear regression: parameter estimation, confidence ellipsoids and prediction intervals, hypothesis tests. Classification: logistic regression, linear discriminant analysis. Basis expansion: polynomial regression, regression splines. Resampling methods: cross-validation, bootstrap. Shrinkage methods. Model selection: information criteria, forward and backward selection, lasso. Decision trees and random forests: bagging, boosting. Prerequisite: MATH 290 or MATH 291, and MATH 526 or MATH 628.

MATH 608. Statistical Data Science. 3 Credits. N
This course provides an introduction to main statistical concepts in data science with an emphasis on mathematical understanding and its software implementation. Programming uses Python or Julia. Covered statistical models include linear regression and linear classification for high-dimensional problems; support vector machines and flexible discriminants; Bayesian learning and the EM algorithm; Monte Carlo methods; probabilistic graphical models; unsupervised learning. Prerequisite: A calculus-based statistics course (MATH 628 or MATH 526) and a linear algebra course (MATH 290 or MATH 291). Recommended: EECS 138 or equivalent experience.

MATH 611. Time Series Analysis. 3 Credits. N
This course provides an introduction to time series analysis with an emphasis on mathematical understanding and its software implementation. Programming uses Python or Julia. Covered topics include the following. Modeling time series, trend, seasonality and residual process. Autocovariance function, multivariate time series, moving average and autoregression. Stationary processes, linear processes, linear filtering. Confidence intervals for the mean and the autocorrelation, hypothesis tests for a time series model. ARMA models, partial autocorrelation function, parameter estimation methods, forecasting, model selection. Stationary processes in the frequency domain, spectral density, periodogram, smoothing, spectral window. Nonstationary time series, ARIMA models. State-space representation, Kalman recursions. Recurrent neural networks as time allows. Prerequisite: MATH 290 or MATH 291, and MATH 526 or MATH 628.

MATH 624. Discrete Probability. 3 Credits. N
Theory and applications of discrete probability models. Elementary combinatorial analysis, random walks, urn models, occupancy problems, and the binomial and Poisson distributions. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291.

MATH 627. Probability. 3 Credits. N
Introduction to mathematical probability; combinatorial analysis; the binomial, Poisson, and normal distributions; limit theorems; laws of large numbers. Prerequisite: MATH 127 or MATH 147 and MATH 290 or MATH 291.

MATH 628. Mathematical Theory of Statistics. 3 Credits. N
An introduction to sampling theory and statistical inference; special distributions; and other topics. Prerequisite: MATH 627.

MATH 630. Actuarial Mathematics. 3 Credits. N
This course is an introduction to some of the notions and computations in actuarial mathematics. Many computations are associated with compound
MATH 646. Complex Variable and Applications. 3 Credits. N
Analytic functions of a complex variable, infinite series in the complex plane, theory of residues, conformal mapping and applications. Prerequisite: MATH 127 or MATH 147.

MATH 647. Applied Partial Differential Equations. 3 Credits. N
Boundary value problems; topics on partial differentiation; theory of characteristic curves; partial differential equations of mathematical physics. Prerequisite: MATH 127 or MATH 147 and MATH 220 or MATH 221 or MATH 320.

MATH 648. Calculus of Variations and Integral Equations. 3 Credits. N
Topics in the calculus of variations, integral equations, and applications. Prerequisite: MATH 127 or MATH 147 and MATH 220 or MATH 221 or MATH 320.

MATH 650. Nonlinear Dynamical Systems. 3 Credits. N
This course provides an introduction to nonlinear ordinary differential equations and dynamical systems theory with an emphasis on applications. Topics covered include the existence and uniqueness of solutions to initial value problems, as well as the qualitative behavior of solutions, including existence of equilibria, periodic and connecting orbits and their stability. Additional topics include an introduction to bifurcation theory and chaos. Prerequisite: MATH 127 or MATH 147, and MATH 220 or MATH 221 or MATH 320, and MATH 290 or MATH 291.

MATH 660. Geometry I. 3 Credits. N
An introduction to modern geometry. Differential geometry of curves and surfaces, the topological classification of closed surfaces, dynamical systems, and knots and their polynomials. Other topics as time permits. Prerequisite: MATH 127 or MATH 147 and MATH 290 or MATH 291.

MATH 661. Geometry II. 3 Credits. N
Continuation of MATH 660. Prerequisite: MATH 660 or permission of instructor.

MATH 666. Special Topics: ______. 1-3 Credits. N
Arranged as needed to present appropriate material to groups of students. May be repeated for additional credit. Prerequisite: Variable.

MATH 699. Directed Reading. 1-3 Credits. N
Directed reading on a topic chosen by the student with the advice of an instructor. May be repeated for additional credit. Consent of the department required for enrollment.

MATH 724. Combinatorial Mathematics. 3 Credits.
An introduction to enumerative combinatorics. Topics include basic counting principles, induction and recursion, graph theory, partitions and compositions, generating functions, inclusion/exclusion, and Polya-Redfield theory. Prerequisite: MATH 290 or MATH 291 and a MATH course numbered 450 or higher.

MATH 725. Graph Theory. 3 Credits.
Graphs; trees; connectivity; Menger's theorem; eulerian and hamiltonian graphs; planarity; coloring of graphs; factorization of graphs; matching theory; alternating chain methods; introduction to matroids with applications to graph theory. Prerequisite: MATH 290 and a math course numbered 450 or higher.

MATH 727. Probability Theory. 3 Credits.
A mathematical introduction to premeasure-theoretic probability. Topics include probability spaces, conditional probabilities and independent events, random variables and probability distributions, special discrete and continuous distributions with emphasis on parametric families used in applications, the distribution problem for functions of random variables, sequences of independent random variables, laws of large numbers, and the central limit theorem. Prerequisite: MATH 290, or equivalent.

MATH 728. Statistical Theory. 3 Credits. N
Theory of point estimation and hypothesis testing with applications. Confidence region methodologies and relations to estimation and testing. Prerequisite: MATH 727 or equivalent.

MATH 750. Stochastic Adaptive Control. 3 Credits.
Stochastic adaptive control methods. Stochastic processes such as Markov chains and Brownian motion, stochastic integral, differential rule, stochastic differential equations, martingales and estimation techniques. Identification and control of discrete and continuous time linear stochastic systems. Specific applications and simulation results of stochastic adaptive control theory. Prerequisite: MATH 627 and some knowledge of control.

MATH 755. Mathematical Analysis I. 3 Credits.
MATH 755 and MATH 756 are theoretical courses on the fundamental concepts of analysis and the methods of proof. These two courses include the concept of a real number; limits, continuity, and uniform convergence; derivatives and integrals of functions of one and of several real variables. Prerequisite: MATH 290, or equivalent.

MATH 756. Mathematical Analysis II. 3 Credits.
A continuation of MATH 755. Prerequisite: MATH 755.

MATH 781. Numerical Analysis I. 3 Credits.
Finite and divided differences. Interpolation, numerical differentiation, and integration. Gaussian quadrature. Numerical integration of ordinary differential equations. Curve fitting. (Same as EECS 781.) Prerequisite: MATH 320 and knowledge of a programming language.

MATH 782. Numerical Analysis II. 3 Credits.

MATH 783. Applied Numerical Methods for Partial Differential Equations. 3 Credits.
Finite difference methods applied to particular initial-value problems (both parabolic and hyperbolic), to illustrate the concepts of convergence and stability and to provide a background for treating more complicated problems arising in engineering and physics. Finite difference methods for elliptic boundary-value problems, with a discussion of convergence and methods for solving the resulting algebraic system. Variational methods for elliptic problems. Prerequisite: MATH 647 or equivalent.

MATH 790. Linear Algebra II. 3 Credits.
A theoretical course on the fundamental concepts and theorems of linear algebra. Topics covered are: vector space, basis, dimension, subspace, norm, inner product, Banach space, Hilbert space, orthonormal basis, positive definite matrix, minimal polynomial, diagonalization and other canonical forms, Cayley-Hamilton, spectral radius, dual space, quotient space. Prerequisite: MATH 590.

MATH 791. Modern Algebra. 3 Credits.
This course includes the following topics: multiplicative properties of the integers and introductions to group theory, ring theory and field theory. Prerequisite: MATH 290, or equivalent.

MATH 796. Special Topics: ______. 1-3 Credits.
Arranged as needed to present appropriate material for groups of students. May be repeated for credit. Prerequisite: Variable.

MATH 799. Directed Readings. 1-3 Credits.
Directed readings on a topic chosen by the student with the advice of an instructor. May be repeated for additional credit. Consent of the department required for enrollment.

MATH 800. Complex Analysis I. 3 Credits.
Cauchy’s theorem and contour integration; the argument principle; maximum modulus principle; Schwarz symmetry principle; analytic continuation; monodromy theorem; applications to the gamma function and Riemann’s zeta function; entire and meromorphic functions; conformal mapping; Riemann mapping theorem; univalent functions. Prerequisite: MATH 766 or concurrently with MATH 766.

MATH 802. Set Theory. 3 Credits.
Axiomatic set theory; transfinite induction; regularity and choice; ordinal and cardinal arithmetic; miscellaneous additional topics (e.g., extra axioms such as GCH or MA; infinite combinatorics; large cardinals). Prerequisite: MATH 765 or MATH 791, or concurrent enrollment in MATH 765 or MATH 791, or equivalent evidence of mathematical maturity.

MATH 810. Real Analysis and Measure Theory I. 3 Credits.

MATH 811. Real Analysis and Measure Theory II. 3 Credits.
Continuation of MATH 810. Prerequisite: MATH 810.

MATH 820. Introduction to Topology. 3 Credits.
General topology. Set theory; topological spaces; connected sets; continuous functions; generalized convergence; product and quotient spaces; embedding in cubes; metric spaces and metrization; compact spaces; function spaces. Prerequisite: MATH 765.

MATH 821. Algebraic Topology I. 3 Credits.
The fundamental group and covering spaces (including classification); compact surfaces; homology theory, computations (including homotopy invariance) and applications (including Brouwer fixed point theorem); introduction to cohomology theory. Prerequisite: MATH 790 and MATH 791 and MATH 820, or permission of instructor.

MATH 824. Algebraic Combinatorics. 3 Credits.
An introduction to the fundamental structures and methods of modern algebraic combinatorics. Topics include partially ordered sets and lattices, matroids, simplicial complexes, polytopes, hyperplane arrangements, partitions and tableaux, and symmetric functions. Prerequisite: MATH 724 and MATH 791, or permission of the instructor.

MATH 830. Abstract Algebra. 3 Credits.
This is an introductory course covering the basics of module theory over commutative rings. Topics include quotient modules and module homomorphisms; direct sums and free modules; tensor products of modules and exact sequences; projective, injective, and flat modules; direct and inverse limits of modules; the theory of modules over principal ideal domains, and normal forms; graded rings and modules. Prerequisite: MATH 790 and MATH 791.

MATH 831. Abstract Algebra II. 3 Credits.
This course covers foundational topics in commutative algebra not covered in MATH 830. Potential topics include integral extensions, lying over and going-up; normal rings and going-down; Noetherian normalization, and dimension theory for finitely generated algebras over a field; chain conditions, and Noetherian and Artinian rings and modules; local rings and Nakayama’s Lemma; rings of formal power series; completion and flatness; primary decomposition and associated primes; affine algebraic varieties and Hilbert’s Nullstellensatz; the prime spectrum of a ring and the Zariski topology. Prerequisite: MATH 830.

MATH 840. Differentiable Manifolds. 3 Credits.
Multilinear algebra of finite dimensional vector spaces over fields; differentiable structures and tangent and tensor bundles; differentiable mappings and differentials; exterior differential forms; curves and surfaces as differentiable manifolds; affine connections and covariant differentiation; Riemannian manifolds. Prerequisite: MATH 765 and MATH 790.

MATH 850. Differential Equations and Dynamical Systems. 3 Credits. N
Discrete and differentiable dynamical systems with an emphasis on the qualitative theory. Topics to be covered include review of linear systems, existence and uniqueness theorems, flows and discrete dynamical systems, linearization (Hartman-Grobman theorem), stable and unstable manifolds, Poincare sections, normal forms, Hamiltonian systems, and an introduction to bifurcation theory and chaos. Prerequisite: MATH 320 and MATH 766, or permission of instructor.

MATH 851. Topics in Dynamical Systems: ____ 3 Credits.
Topics to be covered include complex dynamical systems, perturbation theory, nonlinear analysis of time series, chaotic dynamical systems, and numerical methods as dynamical systems. Topics may vary. Course may be repeated if topic varies. Prerequisite: MATH 850 or permission of instructor.

MATH 855. Stochastic Processes I. 3 Credits.
Markov chains; Markov processes; diffusion processes; stationary processes. Emphasis is placed on applications: random walks; branching theory; Brownian motion; Poisson process; birth and death processes. Prerequisite: MATH 627 and MATH 765.

MATH 865. Stochastic Processes II. 3 Credits.
This is a second course in stochastic processes, focused on stochastic calculus with respect to a large class of semi-martingales and its applications to topics selected from classical analysis (linear PDE), finance, engineering, and statistics. The course will start with basic properties of martingales and random walks and then develop into the core program on Ito's stochastic calculus and stochastic differential equations. These techniques provide useful and important tools and models in many pure and applied areas. Prerequisite: MATH 727 and MATH 865.

MATH 874. Differential Equations and Dynamical Systems.
Game theory, admissible decision functions and complete class theorems; Bayes and minimax solutions; sufficiency; invariance; multiple decision problems. Prerequisite: MATH 628 and MATH 765.

MATH 881. Topics in Advanced Numerical Linear Algebra: ____ 3 Credits.
Advanced topics in numerical linear algebra including pseudo-spectra, rounding error analysis and perturbation theory, numerical methods for problems with special structure, and numerical methods for large scale problems. Topics may vary. Course may be repeated if topic varies. Prerequisite: MATH 781, MATH 782, MATH 790, or permission of the instructor.

MATH 882. Topics in Advanced Numerical Differential Equations: ____ 3 Credits.
Advanced course in the numerical solution of ordinary and partial differential equations including modern numerical methods and the associated analysis. Topics may vary. Course may be repeated if topic
MATH 890. Fourier Analysis. 3 Credits.
Introduction to modern techniques in Fourier Analysis in the Euclidean setting with emphasis in the study of functions spaces and operators acting on them. Topics may vary from year to year and include, among others, distribution theory, Sobolev spaces, estimates for fractional integrals and fractional derivatives, wavelets, and some elements of Calderón-Zygmund theory. Applications in other areas of mathematics, in particular partial differential equations and signal analysis, will be presented based on the instructor's and the students' interests. Prerequisite: MATH 810 and MATH 800, or instructor's permission.

MATH 896. Master's Research Component. 1-6 Credits.

MATH 899. Master's Thesis. 1-10 Credits.

MATH 910. Algebraic Curves. 3 Credits.
Algebraic sets, varieties, plane curves, morphisms and rational maps, resolution of singularities, Reimann-Roch theorem. Prerequisite: MATH 790 and MATH 791.

MATH 920. Lie Groups and Lie Algebras. 3 Credits.
General properties of Lie groups, closed subgroups, one-parameter subgroups, homogeneous spaces, Lie bracket, Lie algebras, exponential map, structure of semi-simple Lie algebras, invariant forms, Maurer-Cartan equation, covering groups, spinor groups. Prerequisite: MATH 766 and MATH 790 and MATH 791.

MATH 940. Advanced Probability. 3 Credits.
Probability measures, random variables, distribution functions, characteristic functions, types of convergence, central limit theorem. Laws of large numbers and other limit theorems. Conditional probability, Markov processes, and other topics in the theory of stochastic processes. Prerequisite: MATH 810.

MATH 950. Partial Differential Equations. 3 Credits.
Introduction; equations of mathematical physics; classification of linear equations and systems. Existence and uniqueness problems for elliptic, parabolic, and hyperbolic equations. Eigenvalue problems for elliptic operators; numerical methods. Prerequisite: MATH 766.

MATH 951. Topics in Advanced Partial Differential Equations II: _____. 3 Credits.
The course uses functional analytic techniques to further develop various aspects of the modern framework of linear and nonlinear partial differential equations. Sobolev spaces, distributions and operator theory are used in the treatment of linear second-order elliptic, parabolic, and hyperbolic equations. In particular we discuss the kind of potential, diffusion and wave equations that arise in inhomogeneous media, with an emphasis on the solvability of equations with different initial/boundary conditions. Then, we will survey the theory of semigroup of operators, which is one of the main tools in the study of the long-time behavior of solutions nonlinear PDE. The theories and applications encountered in this course will create a strong foundation for studying nonlinear equations and nonlinear science in general. Topics may vary. Course may be repeated if topic varies. Prerequisite: MATH 950 or permission of the instructor.

MATH 960. Functional Analysis. 3 Credits.

MATH 961. Topics in Functional Analysis: _____. 3 Credits.
Continuation of MATH 960. Topics may vary. Course may be repeated if topic varies.

MATH 990. Seminar: _____. 1-10 Credits.

MATH 993. Readings in Mathematics. 1-10 Credits.

MATH 996. Special Topics: _____. 3 Credits.
Advanced courses on special topics; given as need arises. Prerequisite: Variable.

MATH 999. Doctoral Dissertation. 1-10 Credits.

Museum Studies Courses

MUSE 177. First Year Seminar: _____. 3 Credits.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Museum Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

MUSE 301. Museums and Society: Past, Present, Future. 3 Credits.
An introduction to museums and the field of museum studies. Using short lectures, discussion, laboratory exercises, field trips, and guest speakers, students will explore the history, role, and function of museums including types, dimensions, creation and management of collections, exhibition development, administration, and visitor experiences. Includes instruction and practice in writing for a variety of museum contexts and audiences. Designed for students interested in museums and curious about museum careers.

MUSE 400. Directed Readings in Museum Studies. 1-3 Credits.
Directed reading in an area of Museum Studies for which there is no course in the Museum Studies program or in cooperating departments and in which a member of the faculty has expertise. Prerequisite: Consent of instructor.

MUSE 480. Special Topics in Museum Studies: _____. 1-3 Credits.
Courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Instructor permission usually required. Prerequisite: Varies by section and instructor.

MUSE 580. Special Topics in Museum Studies: _____. 1-3 Credits.
Courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Instructor permission may be required. Prerequisite: Successful completion of a History, Art History, Anthropology or Museum Studies course numbered below 500, or permission of instructor.

MUSE 699. Anthropology in Museums. 3 Credits.
The course reviews the history of archeological, ethnographic, physical anthropological and other types of collections. It also considers current issues facing anthropologists, such as: contested rights to collections and the stories that accompany them; representation and interpretation of cultures; art and artifact; conceptualization, design and building of exhibitions; and anthropological research and education in the museum. (Same as ANTH 699.) Prerequisite: ANTH 150 or ANTH 108 or consent of instructor.

MUSE 701. Museum Management. 3 Credits.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and
a simulated museum organization model. (Same as AMS 731, BIOL 785, GEOL 783, and HIST 728.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

MUSE 703. Introduction to Museum Exhibits. 3 Credits.
Presentation of principles and practices of exhibit management, design, and production. Topics will include developing a master plan for museum exhibits; concept development; design, installation, and maintenance of exhibits; design theory; design process; label writing and editing; selection of materials; architectural requirements and building codes; cost estimating; publicity; security; and exhibit evaluation. Consideration will be given to exhibition problems in public and private museums in the areas of anthropology, art, history, natural history, and technology. (Same as AMS 700, BIOL 787, GEOL 781, and HIST 723.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

MUSE 704. Introduction to Collections Management and Utilization. 3 Credits.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, ANTH 798, BIOL 798, GEOL 785, and HIST 725.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

MUSE 705. Introduction to Museum Public Education. 3 Credits.
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, GEOL 784, and HIST 721.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

MUSE 706. Conservation Principles and Practices. 3 Credits.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, GEOL 780, and HIST 722.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

MUSE 707. Practical Archival Principles. 3 Credits.
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as HIST 727.)

MUSE 710. Natural Sciences Curation and Collections Management. 3 Credits.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloguing, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum's paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art's ethnographic collections. Student projects will involve one of the museum's collections with the opportunity for hands-on experience. (Same as BIOL 706.)

MUSE 780. Special Topics: ______. 1-3 Credits.
Advanced courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Prerequisite: Graduate standing in Museum Studies Program or permission of instructor.

MUSE 790. Advanced Study. 1-3 Credits.
Individual research in a specialized topic not ordinarily treated in a Museum Studies core course for which there is a member of the graduate faculty competent and willing to direct a research project. Prerequisite: Consent of instructor.

MUSE 792. Directed Readings. 1-3 Credits.
Directed reading in an area of Museum Studies in which there is no particular course in the Museum Studies program or in cooperating departments but in which there is a member of the graduate faculty competent and willing to direct a program study. Prerequisite: Consent of instructor.

MUSE 799. Museum Internship. 1-6 Credits.
Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, ANTH 799, and GEOL 723.)

MUSE 801. The Nature of Museums. 3 Credits.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as HIST 720.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

MUSE 802. Culture of Museums. 3 Credits.
Culture of Museums is the second of a 2-semester course sequence, and highlights classic texts and current directions in museum studies. It is organized around the core conceptual domains of museums - Materiality, Representation, and Engagement. The course establishes the framework for understanding changes on the horizon for museums, and enables students to be familiar with classic texts in the field. Museums of art, history, natural history, are included, as well as museums large and small. Each week the class will read assigned articles or chapters and will be prepared to discuss and analyze the assignment. In addition, each week there will be several monographs assigned that elaborate and inform the topic. One student will take responsibility for each work and lead discussion concerning the material. The student will familiarize themselves with the work, and should meet with the instructor before class to structure their presentation. In class, the student will lead discussion and emphasize key elements in the work.

MUSE 803. Seminar in Current Museum Topics. 3 Credits.
This course has two core objectives - (1) to consider current issues in and around museums that will have a bearing on the field's future, and (2) to be a springboard for museum studies students to formulate and make substantial headway on their required final projects. Therefore, in addition to each week's readings assigned by the instructor, each student will have several opportunities to select the readings for the rest of the class. The student-assigned readings will be relevant to each student's research, and will (1) help students acquire a more nuanced and critical grasp of works that are key to their research by getting feedback from the rest of the class; and (2) build the class's general awareness of important scholarship in the field.
Philosophy Courses

PHIL 140. Introduction to Philosophy. 3 Credits. HR H
An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge.

PHIL 141. Introduction to Philosophy Honors. 3 Credits. HR H
An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge. Prerequisite: Open only to students in the University Honors Program or by consent of department.

PHIL 148. Reason and Argument. 3 Credits. H
An introduction to the theory and practice of logical analysis. Special emphasis is placed upon the logical appraisal of everyday arguments.

PHIL 150. Philosophical Communication. 3 Credits. S
This course provides an introduction to philosophy, with a focus on the traditional philosophical practice of oral communication and argument. Through exploration of perennial philosophical questions (e.g., Are there different ways of knowing? What makes for a good life? Could computers have minds? Are we obligated to obey the law? What makes you the same person over time?), students develop their ability to participate in various forms of philosophical communication. In this course, students have the opportunity to teach course material to peers, engage in class debates over philosophical issues, and craft short presentations exploring a facet of the course topic.

PHIL 160. Introduction to Ethics. 3 Credits. HR H
An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice.

PHIL 161. Introduction to Ethics Honors. 3 Credits. HR H
An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice. Prerequisite: Open only to students in the University Honors Program or by consent of department.

PHIL 170. The Meaning of Life. 3 Credits. H
This course introduces central questions about the meaning of life. The question itself may be taken in a number of ways: Why is there a universe that contains life? What is the nature or purpose of human beings and persons? What is the point of our existence? Is it possible to lead a meaningful life? This course examines these and other questions relating to meaning in life, such as our place in the physical universe, the possibility and significance of God’s existence, the nature of human persons (including the relation between, and nature of, body, mind, and consciousness), what death tells us about the nature of life and whether it is appropriate to fear death, the nature of ‘the good life’ (including the import for ‘the good life’ of knowledge, success, pleasure, health, friendship, love, in both our physical and mental life, etc.), the nature of value and its relation to meaning in life, and our obligations to other beings.

PHIL 177. First Year Seminar: _______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Philosophy. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

PHIL 180. Introduction to Social and Political Philosophy. 3 Credits. HR H
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty.

PHIL 181. Introduction to Social and Political Philosophy, Honors. 3 Credits. HR H
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty. Prerequisite: Open only to students in the University Honors Program or by consent of department.

PHIL 200. Study Abroad Topics in Philosophy: _______. 1-6 Credits. H
This course is designed for the study of special topics in Philosophy. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

PHIL 210. Playing the Odds: Reasoning, Chance, and Probability. 3 Credits. H
Many of the things we need to think through involve uncertainty. There may be a chance that it will rain, that a flight will get canceled, that a car accident will occur, or that a team will win. Should you buy a $10 parking pass if you know there’s a 5% chance you will get a $100 fine if you don’t buy one? This course will teach you how to think through uncertainty and probability, using philosophical and mathematical techniques, logic, and critical thinking. This course presupposes knowledge of pre-algebra and basic high school algebra.

PHIL 305. The Meaning of Death. 3 Credits. HR
A number of puzzles and paradoxes surround the nature and (dis)value of death. These include: is death a bad thing? If so, when is it a bad thing? Is it rational to fear death? If so, is it rational to regret that we were not born earlier? What is death? Can a person’s death have a valuable meaning? Readings for this course will be taken from Epicurus, Derek Parfit, Fred Feldman, and many others.

PHIL 306. God, Buddhism, and the Good Life. 3 Credits. HR
This course introduces students to rigorous philosophic debates about some gripping existential questions surrounding the value of religion with God, a religion without God (focusing on Buddhism), and atheism. We will explore arguments for opposing answers regarding topics such as: whether atheism threatens the value of life; differences in how the self is viewed in Western and Eastern religions; and differences in how morality is grounded in these different traditions. We will examine the compatibility of atheism with Buddhism, and of Buddhism with belief in God. (Same as REL 306.) Prerequisite: A 100-level Philosophy course or permission of instructor.

PHIL 310. Introduction to Symbolic Logic. 3 Credits. H
An introduction to the theory and practice of elementary symbolic logic. Special emphasis will be placed upon the logical analysis of mathematical proof and upon a proof of the consistency of elementary logic.

PHIL 320. Philosophical Issues in the Life Sciences. 3 Credits. HR H
A philosophical analysis of theoretical and ethical issues that arise in the practice of the life sciences. Discusses the conceptual foundation of the
life sciences—evolutionary theory and genetics. Critically explores the use of statistical and non-human-animal models. Examines ethical issues including problems that arise in human and other animal experimentation, obligations to the environment, proper use of patents, and conflicts in professional duties.

PHIL 323. Philosophy of Psychology. 3 Credits. HR
The philosophy of psychology is a relatively new field of inquiry in philosophy and so the question of what the philosophy of psychology is remains an open question. In this course, we will understand the philosophy of psychology in two ways. First, it is the study of the nature of psychology and the various capacities and mechanisms that make cognition possible. We will consider whether there is a unique psychological level of explanation or whether psychology ultimately reduces to the brain. We will also explore various philosophical puzzles raised by consideration of psychological abilities like memory, attention, and emotion. Second, philosophy of psychology is a subfield of philosophy of science, where we examine a particular science—here, experimental psychology—as a way to explore broader questions about what science is, how science explains phenomena, and how values intersect with its investigations. All of this makes it an exciting time to study the philosophy of psychology as students in this course, student’s interests will play a role in selecting topics and shaping the direction of our inquiry. (Same as PSYC 323.)

PHIL 325. Philosophy of Computation, AI, and Robots. 3 Credits. HR
Computers are everywhere, and they seem to be getting increasingly intelligent. However, it is surprisingly difficult to say what exactly a computer is, and what it means for one to be intelligent. In this course, we will examine arguments about the nature of computation, including how computation is used in science, whether computers and robots could really have minds (or could only just simulate having a mind), and whether the brain might literally be a computer. Prerequisite: An introductory course in philosophy or permission of instructor.

PHIL 330. Belief and the Social. 3 Credits. HR
This is a course in social epistemology. It explores how social phenomena within communities and between individuals bear on issues of belief, justification, and knowledge. Topics may include philosophical examinations of lies, BS (in the technical sense of Frankfurt and others), conspiracy theories, propaganda, disagreement, testimony, expertise, trust, group belief, and epistemic injustice.

PHIL 335. Philosophy of Social Groups and Identities. 3 Credits. H
This course is on social groups, which include teams and clubs as well as gender and racial groups. Topics to be covered might include whether a group exists, in addition to its members, and if so what kind of thing it is; whether group membership in various cases is a matter of members sharing a group identity rather than having certain biological features in common or occupying a common social position; and what it is for someone to have a certain group identity in the first place. Additional topics to be covered might include whether there are different kinds of groups; whether a group can do things, and be responsible for doing things, that none of its members does individually; and whether there are ways in which we should, or shouldn’t, talk about a group and its members. Groups and identities to be discussed might include those relating to gender, race, sexual orientation, and disability.

PHIL 340. Women Philosophers. 3 Credits. HR
This course will examine and evaluate the work of some of the women philosophers in the history of philosophy. The course will focus on a variety of philosophical issues, including social and political issues, such as women's equality and education and political rule; metaphysical issues, such as mind-body dualism, vitalism, and the existence of God; and issues concerning the relationship between philosophy, science, and religion.

PHIL 350. Philosophical Issues in Religion. 3 Credits. H
This course will consider, from a philosophical perspective, some of the problems in religion which arise in the development of "Natural Theology" broadly conceived. (Same as REL 380.)

PHIL 355. Moral Issues in Political Governance. 3 Credits. HR
This course offers a survey of competing ethical frameworks and applies them to issues in governmental policy and political activity. Topics may include the duties and virtues of citizenship, conflict of interest, public health policy, immigration, corruption, the value of patriotism, and conflicts between private and public morality. This course leaves aside debates about what sort of political framework to adopt and focuses on moral issues that matter from most any political perspective.

PHIL 360. Moral Issues in Business. 3 Credits. H
After a brief survey of techniques of moral argument and analysis, particular moral issues related to business will be discussed. These will include such topics as advertising, conflict of interest, personal and corporate responsibility, codes of conduct, private property, strikes, just wage, and the tension between moral ideals and business pressures.

PHIL 368. Moral Issues in Sports. 3 Credits. H
This course is a philosophical investigation of the nature and value of sports. Provides students with an overview of ethical theory and considers principled answers to questions about the values of sports and about how those values can be sustained or demeaned. Students debate a variety of live controversies in sports today such as drugs, cheating, sexism, racism, the role of sports in educational institutions, Title IX, commercialization, and violence.

PHIL 369. Moral Issues in Warfare. 3 Credits. H
This course is a philosophical investigation of the nature and ethical dimensions of warfare and the use of force. It provides students with an overview of ethical theory and considers answers to questions about the principles of just war theory, the values served by these principles, and about how those values can be sustained or demeaned. Students debate a variety of live controversies in warfare today such as just causes for war, when threats ought to be deemed imminent, collateral damage and the nature of non-civilians on the battlefield, and terrorism.

PHIL 370. Moral Issues in Medicine. 3 Credits. H
After a brief survey of techniques of moral argument and analysis, particular moral issues related to medicine will be discussed. The justification and limits of some rules of professional conduct that deal with such matters as confidentiality, truth-telling, and protection of medical research subjects will be considered. Issues relating to death and dying in medicine such as abortion, euthanasia, and the refusal of life-saving medical therapy also will be discussed.

PHIL 375. Moral Issues in Computer Technology. 3 Credits. H
After surveying the nature of ethics and morality and learning some standard techniques of moral argumentation, we shall examine such topics as: property and ownership rights in computer programs and software; privacy in computer entry and records; responsibility for computer use and failure; the "big brother" syndrome made possible by extensive personal data banks; censorship and the world-wide web; computer illiteracy and social displacement; and ethical limits to computer research.

PHIL 380. Environmental Ethics. 3 Credits. H
After a brief survey of techniques of moral argument and analysis, particular moral issues related to the environment will be discussed. These will include such topics (one of which may be dealt with in depth)
as animal rights, rights of future generations, wilderness preservation, population control, endangered species, and economics and public policy. Prerequisite: EVRN 148 or consent of instructor.

PHIL 381. Feminism and Philosophy. 3 Credits. H An examination of topics of philosophical interest that are important in the feminist movement such as the nature of sexism, the concept of sexual equality, the ethics of sexual behavior, the nature of love, feminist analyses of the value of marriage and family, the ethics of abortion, and justifications for preferential treatment of women. (Same as WGSS 381.)

PHIL 382. Philosophy in Literature and Film. 3 Credits. HR A survey of topics of philosophical interest as they appear in literature, film, and the writings of philosophers. We will consider what these arts can contribute to the practice of philosophy and how philosophy might guide our engagement with literature and film.

PHIL 384. Ancient Philosophy. 3 Credits. HR H A survey of the thought of the principal philosophers of ancient Greece, with emphasis on the pre-Socratics, Plato, and Aristotle.

PHIL 386. Modern Philosophy from Descartes to Kant. 3 Credits. HR H A survey of the writings of such principal philosophers of the modern period as Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant.

PHIL 388. Analytic Philosophy: Frege to Quine. 3 Credits. H An introduction to the principal figures in the philosophical tradition that forms the background to contemporary investigations in analytic philosophy of language. Particular attention will be paid to Frege, Russell, Wittgenstein, and Quine. Prerequisite: PHIL 310 or equivalent, or PHIL 310 may be taken concurrently.

PHIL 418. Introduction to Cognitive Science. 3 Credits. S Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PSYC 418, and SPLH 418.) Prerequisite: Consent of instructor.

PHIL 499. Senior Essay. 3 Credits. H This course is required, in addition to regular major requirements, of those students wishing to work for departmental honors in Philosophy. Students wishing to enroll should first speak with the departmental adviser for majors. Prerequisite: Open to senior majors in Philosophy by consent of instructor.

PHIL 500. Studies in Philosophy: ______. 1-6 Credits. H (Topic, instructor, and specific prerequisite to be announced in Schedule of Classes.) A study of particular philosophical problems or thinkers not covered by other courses. The course may be offered concurrently by different instructors under different subtitles, and, may, with the consent of the chair, be taken more than once if content varies.

PHIL 504. Philosophy of Sex and Love. 3 Credits. H A discussion of philosophical issues such as the relation between love, autonomy, and friendship; heterosexual and homosexual relationships; marriage and adultery; rape and sexual harassment; prostitution; and pornography.

PHIL 506. Chinese Thought. 3 Credits. NW H/W A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and HUM 524.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy.

PHIL 508. Early Greek Philosophy. 3 Credits. H/W A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers, with some attention paid to the Sophists and the Hippocratic corpus. (Same as GRK 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor.

PHIL 551. Philosophy of Economics. 3 Credits. HR This course surveys the central concepts, issues and debates surrounding the philosophy of economics. The course is divided into three parts. The first is focused on the nature of economic science, whether it can be separated from value judgments, along with the foundational and methodological issues that arise in economics. The second part of the course provides a survey of several central topics in the philosophy of economics including rational choice theory, game theory, social choice theory, behavioral and neuroeconomics. The third part concerns welfare economics (broadly understood), including the aims of welfare economics, the nature of well-being, the possibility of interpersonal utility comparisons, and the aims of economic institutional design. At the end of this course, students should have knowledge and understanding of central methodological and substantive debates regarding the nature of economic theories. This course should also enhance students' ability to think critically and analytically about the nature of economic theories and the key concepts in the philosophy of economics, write clearly and cogently about philosophical issues that arise in economic, incorporate the ideas, theories and techniques that arise in both philosophy and economics to understand social and economic issues. (Same as ECON 551.) Prerequisite: An introductory course in philosophy or economics, or permission of instructor.

PHIL 555. Justice and Economic Systems. 3 Credits. H An examination of important representative theories of the justness of an economic system, with particular attention paid to such institutions as private property, a market economy, means and relationships of production, and principles of distribution to individuals. The theorists under consideration include Locke, Adam Smith, Marx and Engels, contemporary utilitarians, Rawls, and Nozick. Prerequisite: A course in ethics or an introductory course in economics or in business.

PHIL 557. Kant. 3 Credits. H A survey of the major works of Immanuel Kant, with attention to his critical method and its application to issues in theoretical philosophy, practical philosophy, aesthetics, or the philosophy of history. Prerequisite: PHIL 386.

PHIL 558. Seventeenth Century Philosophy. 3 Credits. H The development of philosophy in the 17th century. Special attention will be paid to such major figures as Descartes, Malebranche, Spinoza, Leibniz, Elisabeth of Bohemia, Cavendish, Conway, Astell, Hobbes, and Locke. Prerequisite: PHIL 386 or consent of instructor.

PHIL 559. Eighteenth Century Philosophy. 3 Credits. H The development of philosophy in the 18th century. Special attention will be paid to such major figures as Hutcheson, Butler, Berkeley, Mandeville, Hume, Smith, Kant, Rousseau, Bentham, Wolstonecraft and Shepherd. Prerequisite: PHIL 386 or consent of instructor.

PHIL 560. Nineteenth Century Philosophy. 3 Credits. H The development of philosophy in the 19th century. Special attention will be paid to such major figures as Hegel, Kierkegaard, Marx, Nietzsche, and Mill. Prerequisite: PHIL 386 or permission of instructor.

PHIL 562. Kierkegaard. 3 Credits. H A study of the thought of Soren Kierkegaard through examination of some of his major writings. Some attention is given to his influence on
the development of existentialist philosophies. Prerequisite: PHIL 384 or PHIL 386.

PHIL 570. Nietzsche. 3 Credits. H
A study of Nietzsche's major writings and ideas, with some attention to his philosophical influence. Prerequisite: PHIL 384 or PHIL 386 or permission of instructor.

PHIL 582. Existentialism. 3 Credits. H/W
A study of the main themes and leading philosophers of the existentialist movement. Prerequisite: Two courses in philosophy.

PHIL 590. Phenomenology. 3 Credits. H
A study of the main themes and leading philosophers of the phenomenological movement. Prerequisite: PHIL 386.

PHIL 592. Contemporary Continental Philosophy. 3 Credits. H
A study of selected topics in 20th century European philosophy, such as hermeneutics, critical theory, and poststructuralism. Figures to be studied could include Heidegger, Gadamer, Adorno, Habermas, and Foucault. Prerequisite: PHIL 386.

PHIL 600. Readings in Philosophy: _____ 1-6 Credits. H
Individual reading on topics not covered in course work. Prerequisite: Consent of instructor.

PHIL 605. The Philosophy of Plato. 3 Credits. H
A survey of the major works of Plato, with attention both to Plato's distinctive arguments and positions in the major areas of philosophy and to the distinctive literary form in which Plato presents his thinking. Prerequisite: PHIL 384.

PHIL 607. The Philosophy of Aristotle. 3 Credits. H
A survey of the major works of Aristotle, with the aim of understanding Aristotle's distinctive formulations of central philosophical questions, the arguments he presents for his answers to those questions, and the systematic interconnections between his positions in the different areas of philosophy. Prerequisite: PHIL 384.

PHIL 608. Hellenistic Philosophy. 3 Credits. H
Survey of Stoicism, Epicureanism, and Scepticism from their beginnings through the second century AD. Prerequisite: PHIL 384 and another course in philosophy.

PHIL 610. Metalogic. 3 Credits. H
Propositional calculus, predicate calculus, consistency, decidability of formal systems, the paradoxes and number concept will be covered. Prerequisite: PHIL 310 or EECS 210 or MATH 450 or consent of instructor.

PHIL 611. Topics in Symbolic Logic: _____ 1-3 Credits. H
This course is a workshop in any of a variety of topics in symbolic logic of special importance to contemporary analytic philosophy, such as modal logic, tense logic, axiomatic set theory, Goedel's theorems, model theory, etc. May be repeated for credit as topics vary. Prerequisite: PHIL 310.

PHIL 612. Modal and Non-classical Logics. 3 Credits. H
This course provides an investigation of logics beyond first-order predicate logic, including modal logic, non-classical logic, and second-order logic. Prerequisite: PHIL 310 or EECS 210 or MATH 450 or consent of instructor.

PHIL 620. Philosophy of Natural Science. 3 Credits. H
An examination of conceptual and foundational issues in the natural sciences. Topics may include the methodology of science (the nature and status of laws, the precise way in which experiment contributes to theory) and puzzles concerning the content of science (the status of space and time, the problematic nature of quantum mechanics). Prerequisite: PHIL 310 or PHIL 610, or permission of instructor.

PHIL 622. Philosophy of Social Science. 3 Credits. H
A critical examination of the methods, concepts, and practices of the social sciences. Topics to be considered may include: theories of explanation, methodological individualism vs. holism, objectivity, the role of rationality, myth and the unconscious in the explanation of behavior, and the value neutrality of science. Prerequisite: One previous course in philosophy, or permission of instructor.

PHIL 630. Philosophy of Mathematics. 3 Credits. H
An examination of varying conceptions of the role and status of mathematical arguments. Topics may include realism/anti-realism, the consequences of Goedel's Incompleteness Theorems, the role of mathematics in the sciences, and an examination of such historical thinkers as Plato, Frege, Russell, Wittgenstein, Goedel, and Hilbert. Prerequisite: PHIL 310 or PHIL 610, or permission of instructor.

PHIL 638. Philosophy of Language. 3 Credits. H
An examination of the nature of language using the methods of analytic philosophy. Topics may include meaning, truth, reference, language and thought, and the nature of linguistic rules. Prerequisite: PHIL 388 or permission of instructor.

PHIL 648. Theory of Knowledge. 3 Credits. H
An examination of the nature of knowledge. Topics may include the concept of knowledge, knowledge of the external world, induction, theories of justification, and scientific knowledge. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor.

PHIL 650. Metaphysics. 3 Credits. H
An examination of some of the central issues in metaphysics. Topics may include causation, the mind-body problem, free will and determinism, modality, natural kinds, the nature of properties, and personal identity. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor.

PHIL 654. Philosophy of Mind. 3 Credits. H
An examination of the nature of mind using the methods of analytic philosophy. Topics may include consciousness, perception, propositional attitudes, thought and language, action and intention, mind and body, the prospects for scientific psychology, and personal identity. Prerequisite: PHIL 388 or permission of instructor.

PHIL 662. Aesthetics. 3 Credits. H
A study of some of the central themes and problems in aesthetics, such as the beautiful and the sublime in nature and the arts. Prerequisite: Two courses in philosophy or graduate standing.

PHIL 666. Rational Choice Theory. 3 Credits. H
This course is an introduction to the philosophical issues surrounding individual decision theory, game theory, and social choice theory. This includes issues of scientific theory selection, the nature of preference, the uses of games to model social interaction, and the ethical and political implications of Arrow's impossibility theorem. Formal techniques of modeling and proof, akin to those used in logic and mathematics, will be used in much of the course. Prerequisite: Two courses in economics, a philosophy course numbered 500 or above, or consent of instructor.

PHIL 668. Political Philosophy. 3 Credits. H
A systematic analysis of the concepts of politics, with reference to representative political theories. Prerequisite: A course in philosophy and a course in political science.

PHIL 670. Contemporary Ethical Theory. 3 Credits. H
An examination of some major moral philosophers and some important issues in ethical theory since the beginning of the twentieth century. Topics covered typically include intuitionism, emotivism, utilitarianism,
virtue ethics, and the relationship between morality and rationality. Prerequisite: PHIL 160 or PHIL 161 or two courses in philosophy.

PHIL 671. Feminist Theories in Ethics. 3 Credits. H This course addresses the role (if any) that gender plays in constructing ethical theories. Topics include the impact of culture, affect, and the body on our understanding of gender differences and the importance of these differences for ethics. Prerequisite: PHIL 160 or PHIL 161, or two previous philosophy courses.

PHIL 672. History of Ethics. 3 Credits. H An interpretive and critical examination of central texts in the history of moral philosophy, which may include works by Aristotle, Hume, Kant, and J.S. Mill. Prerequisite: PHIL 160 or PHIL 161 or two previous philosophy courses.

PHIL 674. Philosophy of Law. 3 Credits. H An examination of the concept of law and of legal reasoning. In addition, the course may consider such topics as natural law, legal excuses, the relations between law and morality, civil disobedience, civil liberties, the concept of property. Prerequisite: Two courses in philosophy or one course in philosophy and one course in law or consent of instructor.

PHIL 676. Medical Ethics: Life and Death Issues. 3 Credits. H After a brief survey of techniques of moral argument and analysis especially as they pertain to the moral impermissibility of murder, particular moral and conceptual issues relating to death and dying in medical contexts will be addressed. Topics such as abortion, infanticide, suicide, euthanasia, the definition of death, and the right to refuse lifesaving medical therapy will be included. Prerequisite: Two courses in biology or consent of instructor.

PHIL 677. Medical Ethics: Professional Responsibilities. 3 Credits. H After a brief survey of techniques of moral argument and analysis, particular moral issues related to the obligations of health care professionals and the rights of patients will be discussed. These will include such matters as confidentiality, truth-telling, informed consent, the ethics of research on human subjects, psychosurgery, the rights of the mentally ill, and the rights of the mentally retarded. Prerequisite: Two courses in biology or consent of instructor.

PHIL 800. Proseminar. 3 Credits. Intensive supervised training in and application of the techniques of research. Required of every graduate student seeking an advanced degree in the first or second semester of enrollment. Passing this tutorial constitutes partial fulfillment of the Ph.D. RSRS requirements. Consent of instructor required for repeating the course. Prerequisite: Graduate standing.

PHIL 805. Plato. 3 Credits. Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor.

PHIL 807. Aristotle. 3 Credits. Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor.

PHIL 820. Topics in the History of Philosophy: _____ 3 Credits. This course may be offered by different instructors under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: 500-600 level course as specified or permission of instructor.

PHIL 824. Hume. 3 Credits. Prerequisite: PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor.
Classes. Prerequisite: PHIL 555 or PHIL 666 or PHIL 668 or PHIL 674 or permission of instructor.

PHIL 885. Topics in Law and Philosophy. 3 Credits.
Explores various topics at the intersection of law and philosophy. Content varies but may include: What is freedom and what role should government play in a free society? What is equality and what is the best way to achieve it? What is the relationship between law and social justice? What is the source and value of human rights? Should social and economic rights be legally guaranteed? How should government redress historical injustices such as slavery, apartheid, and the Holocaust? Students must complete a substantial seminar paper.

PHIL 899. Master's Thesis. 1-6 Credits.
Six hours of credit will be awarded upon completion of the master's thesis, but no more than six hours of credit may be obtained in this course altogether. Graded on a satisfactory progress/limited progress/no progress basis.

PHIL 900. Research in Philosophy: __. 1-3 Credits.
Intensive research in philosophy. This course may be taken through individual arrangement, or in connection with small research seminars which are offered occasionally. Students may only enroll for three hours in any given semester. May be repeated if content varies significantly. Prerequisite: Twelve hours of graduate work.

PHIL 901. Qualifying Paper. 3 Credits.
Independent research on any topic that a graduate student and a faculty member shall agree on. It shall result in a tightly focused 20-30 page paper. The student's written work will be repeatedly evaluated over the semester by the director, and the final product must be defended in an oral examination conducted by a three-member faculty committee (including the director). Prerequisite: Students must be admitted to the Ph.D. program and have successfully completed the Ph.D. core courses requirement.

PHIL 999. Dissertation. 1-12 Credits.
This course may be taken more than once, but not for more than twelve hours of credit in any one semester. Graded on a satisfactory progress/limited progress/no progress basis.

Physics & Astronomy Courses

ASTR 150. Seminar in Physics, Astronomy and Engineering Physics. 0.5 Credits. N
This course is intended for all students in physics, astronomy, and engineering physics. Course content includes topics of current interest in all fields of physics and astronomy and an introduction to professional ethics and frameworks for ethical decision making. Topics covered include but are not limited to nanotechnology, cosmology, nuclear and high energy physics, galactic evolution, condensed matter physics, space physics, biophysics, and plasma physics. Course will include hands on demonstrations, group in-class activities and general advising information. (Same as PHSX 150.)

ASTR 177. First Year Seminar: __. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Astronomy. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

ASTR 191. Contemporary Astronomy. 3 Credits. NP N
The structure and evolution of the universe, from nearby planets to distant quasars, is examined. Topics include recent discoveries concerning planets, stars, pulsars and black holes as well as their evolution, the structure of the universe today and how it will be in the future. The emphasis is descriptive rather than mathematical. (Same as PHSX 191.) Prerequisite: Eligibility for MATH 101.

ASTR 196. Contemporary Astronomy Laboratory. 1 Credits. NP N
LFE
An introduction to astronomical observations and modern data analysis methods. Students will carry out independent investigations as well as standard exercises. This is an online course, delivered through Canvas. (Same as PHSX 196.) Prerequisite: Corequisite: ASTR 191.

ASTR 390. Undergraduate Problems. 1-3 Credits. N
Undergraduate observational or theoretical problems in astronomy. Maximum credit, six hours. Prerequisite: Permission of instructor or academic advisor.

ASTR 391. Physical Astronomy, Honors. 3 Credits. NP N
An honors, calculus-based introduction to astronomy and astrophysics, required for astronomy majors. Components of the Universe - from planetary systems, stellar systems, large scale structure and cosmology - are examined to illuminate the physics principles which govern their evolution. Prerequisite: MATH 125, and either permission of instructor, or participation in the University Honors Program.

ASTR 394. The Quest for Extraterrestrial Life. 3 Credits. NP N
An introduction to the search for planets around other stars and for life in the universe beyond the earth. A discussion of the astronomical conditions under which life might form and the biological conditions of life formation and evolution. Methods of searching for extraterrestrial life will also be discussed. Prerequisite: An introductory course in astronomy, biology, or geology.

ASTR 501. Honors Research. 1-4 Credits. N
This course is for students seeking Departmental Honors in Astronomy, Engineering Physics, or Physics to fulfill the undergraduate research requirement. At the completion of the required four hours of total enrollment, a written and oral report of the research is required. (Same as EPHX 501 and PHSX 501.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

ASTR 503. Undergraduate Research. 1-4 Credits. N
This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as EPHX 503 and PHSX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

ASTR 591. Stellar Astronomy. 3 Credits. N
Fundamentals of stellar astronomy including astronomical optics and techniques, coordinate and time systems, stellar spectroscopy, properties of normal, binary, and variable stars. Prerequisite: PHSX 212 and PHSX 236 or PHSX 214. An introductory astronomy course is desirable.

ASTR 592. Galactic and Extragalactic Astronomy. 3 Credits. N
A study of stellar groups, the interstellar medium, galactic structure and dynamics, galaxies, and cosmology. Prerequisite: ASTR 591 or consent of instructor.

ASTR 596. Observational Astrophysics. 3 Credits. NP N
Students will acquire practical experience with astronomical equipment and as well as with data reduction techniques used in research and educational contexts. ASTR 596, combined with an independent research experience, provides a pathway for students to demonstrate creativity and the integration of background knowledge. Prerequisite: Corequisite: ASTR 591.

ASTR 691. Astrophysics I. 3 Credits. N
An introduction to radiation processes, thermal processes, and radiative transfer in stellar atmospheres and the interstellar medium. (Same as EPHX 691 and PHSX 691.) Prerequisite: PHSX 313 or consent of instructor.

ASTR 692. Astrophysics II. 3 Credits. N
The formation and evolution of stars, nucleosynthesis of the elements, and the physical processes of high energy physics. Prerequisite: ASTR 691 or consent of instructor.

ASTR 791. Seminar in Astrophysics. 1 Credits.
Seminar designed to cover current topics in the physics of the Universe beyond the solar system. The content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. Open to undergraduates with twelve hours of physics/astronomy courses numbered 500 or above, or consent of instructor.

ASTR 792. Topics in Advanced Astrophysics. 3 Credits.
This course will address one or more of the following advanced topics in astrophysics: high energy astrophysics, nuclear astrophysics, galactic and extragalactic astrophysics, space physics, cosmology, astro-biophysics, and the interstellar and intergalactic media (ISM/IGM.) This course may be repeated for credit if topical content differs. (Same as PHSX 792.) Prerequisite: ASTR 692 or permission of instructor.

ASTR 795. Space Plasma Physics. 3 Credits.
The physics of fully ionized gases in magnetic fields and their application to interplanetary processes, planetary radiation belts, and the surface of the sun. The motion of charged particles in magnetic fields, magnetohydrodynamic waves, the solar wind and the magnetosphere. (Same as PHSX 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631.

ASTR 815. Computational Methods in Physical Sciences. 3 Credits.
Advanced computer applications in physical science, General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document computer programs to solve physical problems. (Same as PHSX 815 and CHEM 914.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above.

Physics & Astronomy Courses

PHSX 111. Introductory Physics. 3 Credits. NP N
A one-semester survey of classical and modern physics, designed primarily for liberal arts students. Typical subjects include the laws of motion, gravity, electricity and magnetism, sound, light, quantum mechanics, atomic and subatomic physics. Subjects are treated mainly conceptually with some use of basic data. Prerequisite: Eligibility for MATH 104.

PHSX 114. College Physics I. 1-4 Credits. NP N LFE
Principles and applications of mechanics, fluids, heat, thermodynamics, and sound waves. Three class hours and one laboratory per week. This course emphasizes the development of quantitative concepts and problem solving skills for students needing a broad background in physics as part of their preparation in other major programs, and for those who wish to meet the laboratory science requirement of the College. Students who enroll in this course are expected to have had 3.5 years of college-prep math, including trigonometry. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 211 or PHSX 216 or PHSX 212 or PHSX 236. Prerequisite: MATH 104 or a score of 25 or higher on ACT mathematics.

PHSX 115. College Physics II. 1-4 Credits. N LFE
A continuation of PHSX 114. Principles and applications of electricity, magnetism, light, atomic physics, and nuclear physics. Three class hours and one laboratory per week. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 212 or PHSX 236. Prerequisite: PHSX 114.

PHSX 116. Introductory Physics Laboratory. 1 Credits. U LFE
A laboratory exploring classical and modern physics, designed primarily for liberal arts students. Experiments in motion gravity, electricity and magnetism, sound, light, atomic and subatomic physics are designed to teach physics concepts and basic laboratory techniques. One two-hour lab period per week. Counts as a laboratory science when preceded or accompanied by PHSX 111. Prerequisite: Eligibility for MATH 104. Corequisite: PHSX 111.

PHSX 150. Seminar in Physics, Astronomy and Engineering Physics. 0.5 Credits. N
This course is intended for all students in physics, astronomy, and engineering physics. Course content includes topics of current interest in all fields of physics and astronomy and an introduction to professional ethics and frameworks for ethical decision making. Topics covered include but are not limited to nanotechnology, cosmology, nuclear and high energy physics, galactic evolution, condensed matter physics, space physics, biophysics, and plasma physics. Course will include hands on demonstrations, group in-class activities and general advising information. (Same as ASTR 150.)

PHSX 177. First Year Seminar: _______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Physics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

PHSX 191. Contemporary Astronomy. 3 Credits. NP N
The structure and evolution of the universe, from nearby planets to distant quasars, is examined. Topics include recent discoveries concerning planets, stars, pulsars and black holes as well as their evolution, the structure of the universe today and how it will be in the future. The emphasis is descriptive rather than mathematical. (Same as ASTR 191.) Prerequisite: Eligibility for MATH 101.

PHSX 196. Contemporary Astronomy Laboratory. 1 Credits. NP N LFE
An introduction to astronomical observations and modern data analysis methods. Students will carry out independent investigations as well as standard exercises. This is an online course, delivered through Canvas. (Same as ASTR 196.) Prerequisite: Corequisite: ASTR 191.

PHSX 201. Calculus Supplement to College Physics I. 1 Credits. N
A calculus-based course in classical mechanics and thermodynamics for students who have had an algebra-based course in classical mechanics and thermodynamics. This course, combined with PHSX 114, covers the content of PHSX 211 or PHSX 210. Prerequisite: PHSX 114 and MATH 116 or MATH 125. Corequisite: MATH 126; and permission of the department.

PHSX 202. Calculus Supplement to College Physics II. 1 Credits. N
A calculus-based course in electricity and magnetism for students who have had an algebra-based course in electricity and magnetism. This course, combined with PHSX 115, covers the content of PHSX 212.
Prerequisite: PHSX 115 and permission of the department. Corequisite: MATH 126.

PHSX 209. Functions and Modeling. 3 Credits. N
Study of the use of functions in mathematical modeling, with topics drawn from algebra, analytic geometry, statistics, trigonometry, and calculus. These topics include function properties and patterns, complex numbers, parametric and polar equations, vectors and various growth models. The course also includes inquiry methods, collaborative problem solving, the use of multiple representations and data analysis techniques, and the justification and presentation of results. Central to the course are investigative labs employing various technologies and software. The course is designed to help prepare students for secondary school mathematics teaching. (Same as MATH 209.) Prerequisite: MATH 126 or MATH 146.

PHSX 210. General Physics I for Engineers. 3 Credits. N
Introduction to classical mechanics and thermodynamics designed for students in the School of Engineering who have completed MATH 125 or MATH 145 with a grade of C or better. Students not admitted to the School of Engineering must receive permission from instructor. PHSX 210 and PHSX 211 cannot both be taken for credit. Prerequisite: MATH 125 or MATH 145 with a grade of C or better; co-requisite MATH 126 or MATH 146; courses in high school physics and/or chemistry recommended.

PHSX 211. General Physics I. 4 Credits. NP N LFE
Introduction to classical mechanics and thermodynamics. Designed for students in engineering and physical science majors. Prerequisite: MATH 116 or MATH 125 or MATH 145. Corequisite MATH 126 or MATH 146; courses in high school physics and/or chemistry are recommended.

PHSX 212. General Physics II. 3 Credits. N LFE
Study of electricity, magnetism, waves, and optics. Prerequisite: PHSX 210, PHSX 211, or PHSX 213; MATH 126 or MATH 146. Co-enrollment in MATH 127 or MATH 147 is strongly encouraged.

PHSX 213. General Physics I Honors. 1-5 Credits. NP N LFE
An honors section of PHSX 211 and PHSX 216. Credit for fewer than five hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in Astronomy, Physics, or Engineering Physics. Courses in high school physics and chemistry are strongly recommended. Prerequisite: MATH 125 or MATH 145; co-requisite MATH 126 or MATH 146; and permission of instructor.

PHSX 214. General Physics II Honors. 1-4 Credits. N LFE
An honors section of PHSX 212 and PHSX 236. Credit for fewer than four hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in Astronomy, Physics, or Engineering Physics. Prerequisite: PHSX 216 together with either PHSX 211 or PHSX 210; or PHSX 213, and permission of instructor. Corequisite: MATH 127 or MATH 147.

PHSX 216. General Physics I Laboratory. 1 Credits. N LFE
Experiments in classical mechanics and thermodynamics. The course includes practice in the ethics of recording and presentation of data. Counts as a laboratory science when accompanied by PHSX 210 or PHSX 211. Prerequisite: Corequisite: PHSX 210 or PHSX 211.

PHSX 236. General Physics II Laboratory. 1 Credits. N LFE
Experiments in electricity and magnetism, waves and sound. Students will practice data reduction and error analysis in ways that are consistent with professional ethics. Prerequisite: Corequisite: PHSX 212.

PHSX 313. General Physics III. 3 Credits. N LFE
This course is an introduction to modern physics. The topics covered in this course include special relativity, optics, and introductions to quantum mechanics and its applications. Prerequisite: PHSX 212 and PHSX 236, or PHSX 214, or PHSX 202, or EECS 220, or EECS 221. Corequisite: MATH 320 or MATH 220 or MATH 221.

PHSX 315. Introduction to Computation for Physics and Astronomy. 3 Credits. N
This course introduces the use of computational techniques as applied to solving problems in physics and astronomy. It serves as a gateway to the use of such methods in upper level classes and research. Highlighted techniques will include the use of numerical methods for the solution of differential equations encountered in physics and astronomy, the use of random numbers for simulation and modeling, data analysis using computers, and data visualization. Problems will be drawn from a wide variety of physical applications including mechanics, electromagnetism, thermodynamics, and stellar dynamics. Students will develop their own computer programs to investigate, illustrate, and report their results. Prerequisite: EECS 138 or EECS 168 or EECS 169, or permission of the instructor. Corequisite: PHSX 212 or PHSX 214.

PHSX 316. Intermediate Physics Laboratory I. 1 Credits. U LFE
Experiments in optics and modern physics. Development of experimental skills, data reduction, error analysis, and technical writing. One lab meeting per week and one lecture per week on topics including error analysis and experimental design, and the development of professional ethics in regard to citation and data presentation. Prerequisite: Corequisite: PHSX 313.

PHSX 395. Physics Education Theory and Practice. 3 Credits. N
This course focuses on how people teach, learn, and understand key concepts in physics, including an introduction to physics education research. Topics include student conceptions, assessments, impacts of student identity, metacognition, and nature of science. Current issues and tensions in science and math education will be discussed, especially as it relates to physics instruction. This course also provides students firsthand experience in planning and implementing a phenomena-based curriculum through teaching lessons in elementary or middle school classrooms. Prerequisite: Corequisite: PHSX 313.

PHSX 400. Topics in Physics and Astronomy: ______. 1-3 Credits. N
A course on special topics in physics and astronomy, given as the need arises. Course may be repeated for different topics. Each section may have prerequisites to be determined by the instructor.

PHSX 420. Science and Policy. 3 Credits. N
An introduction to the relationship between science and public policy. The mutual interactions between public policy and scientific practice are explored within an ethical framework with examples that include energy and sustainability issues. An experiential course where students will be asked to develop and implement ethical solutions and engage meaningfully on a practicum project for local, regional, national, or international partners who are working on policy decisions which have technology implications. Honors credit is available for this course. Prerequisite: Eligibility for MATH 101.

PHSX 500. Special Problems. 1-5 Credits. N
Work in some area of physics beyond the topics or material covered in other courses. For some problems, continued enrollment in consecutive
semesters may be appropriate. Prerequisite: One junior-senior course in science in an area related to the problem and consent of instructor.

PHSX 501. Honors Research. 1-4 Credits. N
This course is for students seeking Departmental Honors in Astronomy, Engineering Physics, or Physics to fulfill the undergraduate research requirement. At the completion of the required four hours of total enrollment, a written and oral report of the research is required. (Same as ASTR 501 and EPHX 501.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

PHSX 503. Undergraduate Research. 1-4 Credits. N
This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as ASTR 503 and EPHX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor.

PHSX 518. Mathematical Physics. 3 Credits. N
Applications of modern mathematical methods to problems in mechanics and modern physics. Techniques include application of partial differential equations and complex variables to classical field problems in continuous mechanics, unstable and chaotic systems, electrodynamics, hydrodynamics, and heat flow. Applications of elementary transformation theory and group theory, probability and statistics, and nonlinear analysis to selected problems in modern physics as well as to graphical representation of experimental data. (Same as EPHX 518.) Prerequisite: PHSX 313; MATH 220 or MATH 221 or MATH 320; or permission of instructor.

PHSX 521. Mechanics I. 3 Credits. N
Newton's laws of motion. Motion of a particle in one, two, and three dimensions. Motion of a system of particles. Moving coordinate systems. (Same as EPHX 521.) Prerequisite: PHSX 213 or PHSX 211 and PHSX 216; MATH 127 or MATH 147; MATH 290 or MATH 291; and MATH 220, MATH 221 or MATH 320.

PHSX 531. Electricity and Magnetism. 3 Credits. N
This course will explore the properties of electric and magnetic fields, including electrostatics, Gauss' Law, boundary value methods, electric fields in matter, electromagnetic induction, magnetic fields in matter, the properties of electric and magnetic dipoles, and of dielectric and magnetic materials. (Same as EPHX 531.) Prerequisite: PHSX 214, or PHSX 212 and PHSX 236, or PHSX 202; PHSX 521 or EPHX 521 or special permission; MATH 127 or MATH 147; MATH 290 or MATH 291; and MATH 220, MATH 221, or MATH 320.

PHSX 536. Electronic Circuit Measurement and Design. 4 Credits. N LFE
A laboratory course that explores the theory and experimental techniques of analog and digital electronic circuit design and measurement. Topics include transient response, transmission lines, transistors, operational amplifiers, and digital logic. (Same as EPHX 536.) Prerequisite: PHSX 214 or PHSX 212 and PHSX 236; MATH 127 or MATH 147; and MATH 290 or MATH 291. PHSX 313 and 316 recommended.

PHSX 594. Cosmology and Culture. 3 Credits. N
A survey of modern physical cosmology, its recent historical roots, and creation myths from many world cultures. An examination of the effects of these stories on their parent cultures.

PHSX 598. Research Methods. 3 Credits. N LFE
An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling, laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UKanTeach program. (Same as CHEM 598.) Prerequisite: At least one course at the 100 level or above in CHEM, MATH, or PHSX.

PHSX 600. Special Topics in Physics and Astrophysics: ______. 3 Credits. N
Different topics will be covered as needed. This course will address topics in physics and astrophysics not covered in regularly offered courses. May be repeated if topic differs. (Same as EPHX 600.) Prerequisite: Permission of instructor.

PHSX 601. Design of Physical and Electronic Systems. 4 Credits. N LFE
A laboratory course emphasizing the application of physical principles to the design of systems for research, monitoring, or control. Topics include the use of microcomputers as controllers, interfacing microcomputers with measurement devices, and use of approximations and/or computer simulation to optimize design parameters, linear control systems, and noise. (Same as EPHX 601.) Prerequisite: Twelve hours of junior-senior credit in physics or engineering, including one laboratory course.

PHSX 611. Introductory Quantum Mechanics. 3 Credits. N
An introduction to quantum mechanics, emphasizing a physical overview. Topics include the formalism of nonrelativistic quantum mechanics with emphasis on linear algebra, the 3-dimensional Schrodinger equation with applications to the hydrogen atom; harmonic oscillator; and time-independent perturbation theory. (Same as EPHX 511.) Prerequisite: PHSX 313, PHSX 521 or EPHX 521, and MATH 290 or MATH 291.

PHSX 615. Numerical and Computational Methods in Physics. 3 Credits. N
An introduction to the use of numerical methods in the solution of problems in physics for which simplifications allowing closed-form solutions are not applicable. Examples are drawn from mechanics, electricity, magnetism, thermodynamics, and optics. (Same as EPHX 615.) Prerequisite: PHSX 313, MATH 320 or equivalent, and EECS 138 or equivalent.

PHSX 616. Physical Measurements. 4 Credits. N LFE
A laboratory course emphasizing experimental techniques and data analysis, as well as scientific writing and presentation skills. Experiments will explore a range of classical and modern physics topics. Students will also practice ethical decision making using case studies appropriate for the discipline. (Same as EPHX 616.) Prerequisite: PHSX 313, PHSX 316 or EPHX 316, and PHSX 521 or EPHX 521. (PHSX 521 or EPHX 521 may be taken concurrently.)

PHSX 621. Mechanics II. 3 Credits. N
Continuation of PHSX 521. Lagrange's equations and generalized coordinates. Mechanics of continuous media. Tensor algebra and rotation of a rigid body. Special relativity and relativistic dynamics. (Same as EPHX 621.) Prerequisite: PHSX 521 or EPHX 521.

PHSX 631. Electromagnetic Theory. 3 Credits. N
Maxwell's equations, wave propagation, optics and waveguides, radiation, relativistic transformations of fields and sources, use of covariance and invariance in relativity. Normally a continuation of PHSX 531. (Same as EPHX 631.) Prerequisite: EPHX 531 or PHSX 531.

PHSX 641. Introduction to Nuclear Physics. 3 Credits. N
Experimental methods in nuclear physics, elementary concepts and simple considerations about nuclear forces, alpha and beta decay, gamma radiation, nuclear structure, and reaction systematics. (Same as EPHX 641.) Prerequisite: PHSX 313 and PHSX 611 or EPHX 611.
PHSX 655. Optics. 3 Credits. N
Geometric optics. Wave properties of light: interference, diffraction, coherence. Propagation of light through matter. Selected topics in modern optics, e.g., lasers, fibers. (Same as EPHX 655.) Prerequisite: PHSX 531 or EPHX 531 or PHSX 212 or PHSX 214 and special permission from instructor.

PHSX 661. Introduction to Elementary Particle Physics. 3 Credits. N
This course covers properties and interactions of quarks, leptons, and other elementary particles; symmetry principles and conservation laws; broken symmetry; gauge bosons; the fundamental interactions; grand unified theories of strong, electromagnetic, and weak interactions; the cosmological implications of elementary particle physics. (Same as EPHX 661.) Prerequisite: PHSX 611 or EPHX 611, and MATH 220, MATH 221, or MATH 320.

PHSX 671. Thermal Physics. 3 Credits. N
This course introduces thermodynamics from statistical considerations and presents the associated techniques for calculating the thermodynamic properties of systems. Highlighted applications of these techniques include the elementary kinetic theory of transport processes and statistical descriptions of both Fermi-Dirac and Bose-Einstein systems. (Same as EPHX 671.) Prerequisite: PHSX 611 or EPHX 611.

PHSX 681. Introduction to Solid State Physics. 3 Credits. N
This course is an introduction to the properties of crystals and amorphous solids, including lattice vibrations and thermal properties, with a particular emphasis on the behavior of electrons and holes in the energy bands of metals, semiconductors, superconductors, and insulators. (Same as EPHX 681.) Prerequisite: PHSX 313 and PHSX 611 or EPHX 611.

PHSX 691. Astrophysics I. 3 Credits. N
An introduction to radiation processes, thermal processes, and radiative transfer in stellar atmospheres and the interstellar medium. (Same as ASTR 691 and EPHX 691.) Prerequisite: PHSX 313 or consent of instructor.

PHSX 693. Gravitation and Cosmology. 3 Credits. N
An overview of topics relevant to gravitation and modern cosmology: special relativity, tensor notation, the equivalence principle, the Schwarzschild solution, black holes, and Friedmann models. Cosmic black body radiation, dark matter, and the formation of large-scale structure. The idea of quantum gravity and an introduction to the current literature in cosmology. (Same as EPHX 693.) Prerequisite: PHSX 313 and MATH 220, MATH 221, or MATH 320.

PHSX 700. Colloquium. 1 Credits.
Topics of current interest in physics, astronomy, and atmospheric science. Repeated enrollments are permitted.

PHSX 701. Major Experiments and Observations in Classical and Contemporary Physics. 1-3 Credits.
Critique, discussions, and interpretation of the most important discoveries and observations in physics.

PHSX 702. Introductory Physics Pedagogy. 1 Credits.
This course will address basic elements of pedagogy in specific relation to the teaching of physics and astronomy labs. It contains such elements as: peer and instructor evaluations of teaching, reading and discussion of pedagogical materials, development of online course material, and discussion of teaching methods. This course may be repeated for credit. Prerequisite: Permission of instructor.

PHSX 703. Proposal Writing. 1 Credits.
Means and methods for preparing a successful proposal. This course will discuss how to find funding and other award opportunities. Students will learn how to develop an effective application and will complete an application. Intended for early career graduate students and advanced undergraduate students.

PHSX 711. Quantum Mechanics I. 3 Credits.

PHSX 717. Graduate Seminar. 1 Credits.
First year graduate students meet to survey research opportunities in the department and develop skills in giving oral presentations in physics and related areas. Students will also learn about topics in responsible scholarship that may include: the origin of ideas and the allocation of credit, the treatment of data, scientific misconduct, intellectual property and entrepreneurship, the researcher in society, collaborative research, mentor/trainee responsibilities, and safe practices.

PHSX 718. Mathematical Methods in Physical Sciences. 3 Credits.
Review of complex variable theory; introduction to the partial differential equations of physical systems; Fourier analysis; special functions of mathematical physics; and chemistry. (Same as CHEM 718.) Prerequisite: Two semesters of junior-senior mathematics.

PHSX 719. Physics and Astronomy Graduate Problem Solving. 1 Credits.
This course teaches students skills in solving graduate level physics and astronomy problems. Graded on a satisfactory/unsatisfactory basis.

PHSX 721. Chaotic Dynamics. 3 Credits.
Topics covered may include the following: dynamical systems, attractors, sensitive dependence on initial conditions, chaos, one-dimensional maps, strange attractors and fractal dimensions, fat fractals, the horseshoe map, symbolic dynamics, linear stability of periodic orbits, stable and unstable manifolds, Lyapunov exponents, topological entropy, quasiperiodicity, strange nonchaotic attractors, nonattracting chaotic sets, fractal basin boundaries, renormalization group analysis, intermittency, crisis and chaotic transients. Prerequisite: Mechanics (PHSX 521, or its equivalent), ordinary differential equations (MATH 320, or its equivalent), and some computer programming knowledge.

PHSX 727. Advanced Geophysics: ______. 1-3 Credits.
Topics to vary with demand and include heat flow, wave propagation, synthetic seismograms, groundwater exploration, geothermal exploration, electrical methods in exploration, rock mechanics-tectonophysics, rock magnetism, geomagnetism, paleomagnetism, geophysical inverse theory, and others upon sufficient demand. May be repeated for different topics. (Same as GEOL 771.) Prerequisite: GEOL 572 or consent of instructor.

PHSX 731. Molecular Biophysics. 3 Credits.
Methods and concepts in contemporary molecular biophysics are discussed. Particular emphasis is placed on the thermodynamics of macromolecular interactions and quantitative methods of data analysis. Basic enzymology and biophysical spectroscopy will also be reviewed. Prerequisite: PHSX 212, MATH 125, and either CHEM 135 or CHEM 175.

PHSX 741. Nuclear Physics I. 3 Credits.
Experimental methods in nuclear physics, elementary concepts and simple considerations about nuclear forces, alpha and beta decay, gamma radiation, nuclear structure, and reaction systematics. Prerequisite: PHSX 511.

PHSX 761. Elementary Particles I. 3 Credits.
Particle accelerators and detectors; quarks and leptons; invariance principles and conservation laws; strong, electromagnetic, and weak interactions of elementary particles; unification of electroweak and other interactions. Prerequisite: Corequisite: PHSX 711.

PHSX 781. Solid State Physics I. 3 Credits.
Classification of solids, structure and symmetry of crystals; lattice vibrations and thermal properties of solids; electric and magnetic properties; electron theory of metals and semiconductors; electronic and atomic transport processes; theory of ionic crystals. Prerequisite: PHSX 511 (or CHEM 648) and PHSX 671 (or CHEM 646).

PHSX 791. Seminar in Astrophysics, Cosmology, and Space Physics. 1 Credits.
Seminar designed to cover current topics in the physics of the Universe beyond the solar system. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. Open to undergraduates with twelve hours of physics/astronomy courses numbered 500 or above, or consent of instructor.

PHSX 792. Topics in Advanced Astrophysics. 3 Credits.
This course will address one or more of the following advanced topics in astrophysics: high energy astrophysics, nuclear astrophysics, galactic and extragalactic astrophysics, space physics, cosmology, astro-biophysics, and the interstellar and intergalactic media (ISM/IGM.) This course may be repeated for credit if topical content differs. (Same as ASTR 792.) Prerequisite: ASTR 692 or permission of instructor.

PHSX 793. Physical Cosmology. 3 Credits.
Discussion of how fundamental laws of physics govern the evolution of the universe as a whole along with its structure. Survey of cosmogenic clues in the observable universe, including observed structures, cosmic background radiation and evidence for dark matter. Development of the universe, including theories of initial conditions; cosmological phase transitions; generation of possible relics and dark matter; symmetry breaking; baryon asymmetry; nucleosynthesis; recombination, gravitational instability and the formation of structure; current experimental techniques. Prerequisite: PHSX 718. Recommended: PHSX 693.

PHSX 795. Space Plasma Physics. 3 Credits.
The physics of fully ionized gases in magnetic fields and their application to interplanetary processes, planetary radiation belts, and the sun. The motion of charged particles in magnetic fields, magnetohydrodynamic waves, the solar wind, the ionosphere, and the magnetosphere. (Same as ASTR 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631.

PHSX 800. Graduate Problems. 1-5 Credits.
Advanced laboratory problems, special research problems, or library reading problems. Repeated enrollments are permitted.

PHSX 801. Advanced Topics. 1-3 Credits.
Lectures on advanced material not covered by regular courses. The topics are not limited but generally address recent experimental or theoretical developments in subjects such as superconductivity, nuclear physics, elementary particle physics, quantum field theory, gauge and unified theories, nonlinear or chaotic systems, space plasma physics, and astrophysics and cosmology. Repeated enrollments are permitted.

PHSX 811. Quantum Mechanics II. 3 Credits.
This advanced course in quantum mechanics covers scattering theory, time dependent perturbation theory, density-matrix formalism, entanglement, and relativistic quantum mechanics, e.g. Klein-Gordon and Dirac equations. Additional advanced topics may be covered at the discretion of the instructor. Prerequisite: PHSX 711.

PHSX 815. Computational Methods in Physical Sciences. 3 Credits.
Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document computer programs to solve physical problems. (Same as ASTR 815 and CHEM 914.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above.

PHSX 821. Classical Mechanics. 3 Credits.
Vector and tensor notation; review of Newtonian mechanics; Lagrangian mechanics; linear vector spaces and matrix theory with applications to the theory of small oscillations; rigid bodies; Hamiltonian formalism. Special relativity. Prerequisite: Twelve hours of junior-senior courses in physics.

PHSX 831. Electrodynamics I. 3 Credits.
Electrostatics and magnetostatics; Maxwell’s equations; plane waves; waveguides. Prerequisite: PHSX 718 and PHSX 821.

PHSX 841. Nuclear Physics II. 3 Credits.
Nuclear forces and the two-body problem; nuclear models; phenomenological treatment of nuclear reactions and decay processes. Prerequisite: PHSX 741 and PHSX 811.

PHSX 855. Advanced Optics. 3 Credits.
Advanced topics in optics that may include: Laser principles and techniques, light propagation in dielectrics, absorption and luminescence, interaction of light with free electrons and phonons, nonlinear optics, photonic devices, and optical spectroscopy.

PHSX 861. Elementary Particles II. 3 Credits.
Theoretical analysis of the standard model of strong and electroweak interactions. Applications to decay and scattering processes with comparison to experiments. Selected topics in non-perturbative physics. Examples of tests to probe beyond the standard model. Prerequisite: PHSX 761. Corequisite: PHSX 911.

PHSX 871. Statistical Physics I. 3 Credits.
Review of and advanced topics in thermodynamics; the Maxwell relations; the third law; phase transitions. Kinetic theory: the Boltzmann equation; transport phenomena. Statistical mechanics: ideal Maxwell-Boltzmann, Fermi-Dirac and Bose-Einstein gases; ensemble theory; derivation of the laws of thermodynamics. Prerequisite: PHSX 711 and PHSX 821. PHSX 671 is recommended.

PHSX 881. Solid State Physics II. 3 Credits.
More advanced topics in solid state physics that may include: diamagnetism, paramagnetism, ferromagnetism, and antiferromagnetism; electron and nuclear spin magnetic resonance; dielectric properties and ferroelectricity; photoconductivity and luminescence. Prerequisite: PHSX 631 and PHSX 711 (or CHEM 750).

PHSX 895. Plasma Physics. 3 Credits.
Magnetohydrodynamics, including discussion of shocks, waves, and stability theory; statistical mechanical foundations; kinetic theory; microstability; non-linear phenomena. Prerequisite: PHSX 795.

PHSX 899. Master’s Research/Thesis. 1-10 Credits.
Research work (either experimental or theoretical) in physics for students working toward the master’s degree. Repeated enrollments are permitted. Graded on a satisfactory progress/limited progress/no progress basis.

PHSX 911. Quantum Mechanics III. 3 Credits.
PHSX 912. Quantum Field Theory. 3 Credits.

PHSX 915. Relativity. 3 Credits.
Reviews of special relativity, manifolds, tensors, and geometry. General coordinate covariance and general relativity. Applications to classical theory of gravitation: weak field tests, isotropic, homogeneous cosmology, Schwarzschild solution. Selected advanced topics. Prerequisite: A total of 10 hours of junior/senior work in physics and mathematics, including at least concurrent enrollment in MATH 464.

PHSX 917. Seminar in Theoretical Physics. 1 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 931. Electrodynamics II. 3 Credits.
Inhomogeneous Maxwell's equations and multipole radiation fields; special theory of relativity; radiation from accelerated charges; scattering and dispersion. Prerequisite: PHSX 831.

PHSX 947. Seminar in Nuclear Physics. 1 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 957. Seminar in Physics Education Research. 1 Credits.
Seminar designed to cover current topics in physics education research. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course.

PHSX 967. Seminar in Particle Physics. 1 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 971. Advanced Statistical Mechanics. 3 Credits.
Advanced equilibrium statistical mechanics and introduction to nonequilibrium statistical mechanics. Topics include: the theory of liquids, critical phenomena, linear response theory and time correlation functions, Langevin dynamics, and molecular hydrodynamics. (Same as CHEM 950.) Prerequisite: PHSX 871 or CHEM 917.

PHSX 987. Seminar in Solid State Physics. 1 Credits.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary.

PHSX 999. Ph.D. Dissertation Research. 1-12 Credits.
Research work (either experimental or theoretical) in physics for students working toward the Ph.D. degree. Repeated enrollments are permitted. Graded on a satisfactory progress/limited progress/no progress basis.

Political Science Courses

POLS 102. Introduction to Political Science as a Career. 1 Credits. S
Provides an overview of the discipline of political science; emphasizes developing an understanding of opportunities in political science at the University of Kansas and careers with a political science degree. Major sub-fields within the discipline are discussed as well as the benefits of particular tracks within the departmental coursework. The course helps students plan their goals for their education and match those goals to career goals. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Enrollment by permission of the instructor only.

POLS 110. Introduction to U.S. Politics. 3 Credits. SF S
An introduction to basic American governmental institutions, political processes, and policy.

POLS 111. Introduction to U.S. Politics Honors. 3 Credits. SF S
Open only to students in the College Honors Program or by consent of instructor.

POLS 125. Intelligence: Supporting National Security. 3 Credits. S
This course examines the evolution of the U.S. Intelligence Community and how it is adapting to new international security challenges. The course discusses the historical background of U.S. intelligence and how political ideology, domestic policies, technology, and the threat have shaped today's U.S. Intelligence Community. The course provides an overview of the roles, missions, and structure of the U.S. Intelligence Community and how the various components support national security decision makers. The course also provides an overview of diplomacy and intelligence as tools of statecraft. Course looks at foreign intelligence services, their targets, and operational successes and failures. Finally, the course addresses emerging national security issues potentially shaping future U.S. intelligence operations. On completion of the course, students will have an in-depth understanding of the U.S. Intelligence community, how it supports national security decision makers, and how it can influence policy development.

POLS 130. US Intelligence Community. 3 Credits. S
This course provides a comprehensive look at the roles, missions, and structure of the U.S. Intelligence Community. Students will develop an understanding of the components of the intelligence process used by the U.S. Intelligence Community: (1) planning and direction, (2) collection, (3) processing, (4) analysis and production, and (5) dissemination. This course also addresses the various polices and executive orders shaping intelligence collection both domestically and abroad, such as, intelligence oversight and restrictions on sharing and dissemination of information within and between local, state, and federal government agencies and the private sector. On completion of the course, students will have an in-depth understanding of the roles of the various components of the U.S. Intelligence Community and the intelligence processes used to support national security decision makers.

POLS 150. Introduction to Comparative Politics. 3 Credits. SF S
An introduction to the comparative study of political systems emphasizing governmental structures, parties, electoral techniques, and recent trends in the field. The course also considers major differences between (1) representative and autocratic systems, and (2) developed and underdeveloped nations.

POLS 151. Introduction to Comparative Politics Honors. 3 Credits. SF S
Open only to students in the College Honors Program or by consent of instructor.

POLS 170. Introduction to International Politics. 3 Credits. SF S
A study of the nation-state system including the role of nationalism, sovereignty, and power. Patterns of state action including neutralism, collective security, war, and cooperation through international organizations are stressed. Specific examples of contemporary international problems are also analyzed and discussed.

POLS 171. Introduction to International Politics Honors. 3 Credits. SF S
Open only to students in the College Honors Program or by consent of instructor.

POLS 177. First Year Seminar: SF S
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Political Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.
POLS 199. Data I: Dealing with Data. 3 Credits.  S
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as ECON 199, PSYC 199 and SOC 199.)

POLS 249. Study Abroad Topics in Political Science: ______. 1-6 Credits.  S
This course is designed for the study of special topics in Political Science at the freshman/sophomore level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

POLS 301. Introduction to Political Theory. 3 Credits.  S
An examination of the perennial issues and major concepts in political philosophy. Ideas such as community, liberty, equality, justice, and democracy are examined in order to understand the various meanings given to these concepts in political discourse and to understand the role of these ideas in various political theories.

POLS 302. Introduction to Political Theory, Honors. 3 Credits.  S
Honors Version of POLS 301. An examination of the perennial issues and major concepts in political philosophy. Ideas such as community, liberty, equality, justice, and democracy are examined in order to understand the various meanings given to these concepts in political discourse and to understand the role of these ideas in various political theories. Prerequisite: Open only to students in the University Honors Program.

POLS 304. Contemporary Political Thought. 3 Credits.  S
An examination of the major theoretical questions concerning citizenship and government in modern society. Major ideologies and important contemporary philosophers are examined to determine how they address such issues as the meaning of the public interest, the just distribution of power and privilege, the proper role of government in society, and legitimate methods for making collective decisions. Formerly known as POLS 501. Not open to students with credit in POLS 501. Prerequisite: POLS 301 or consent of instructor.

POLS 306. Political Science Methods of Inquiry. 3 Credits.  S
An introduction to the social science methods of investigation and analysis that are used in political science as a discipline and, in many cases, in public and private sector analytical work as well. The nature of political science data sources and methods of data collection, the logic of social scientific inquiry, and key methods of data analysis are emphasized. Prerequisite: POLS 110 or POLS 150 or POLS 170 (or their Honors equivalents), or consent of instructor.

POLS 308. Topics in Social Justice: ______. 3 Credits.
The study of selected problems in social justice or equity. Course is repeatable for different topics.

POLS 310. Contemporary Issues in U.S. Politics. 3 Credits.  S
An examination of issues and problems concerning government and politics in American society. This course is intended primarily for non-majors, and does not meet the junior/senior level course field distribution requirement.

POLS 312. Latinx Politics in the U.S.. 3 Credits.  S
An overview of the political position of Latinx in the United States. The focus is on the three largest Latinx groups in the U.S.: Mexican-Americans, Cuban-Americans, and Puerto Ricans; as well as an examination of other South American and Central American populations in the U.S. The main topics include identity formation, the political circumstances of Latinx individuals and communities, relationship to the electoral process, political behavior, and the policy process. Formerly known as POLS 512. Not open to students with credit in POLS 512.

POLS 313. Comparative U.S. State Politics. 3 Credits.
This course covers a variety of topics related to U.S. state government and politics by examining the fundamental institutions of state government, the policy making process of state governments, and social science theory and tools for understanding state politics and policy. The course takes a comparative approach to studying the states: the states are laboratories in the sense that we can explore various theories of politics and policy across the states, benefiting from the fact that the states are more similar than countries, but also different enough to isolate how differences between states shape political and policy outcomes. Prerequisite: POLS 110 or consent of instructor.

POLS 315. Campaigns and Elections. 3 Credits.  S
This course examines the behavior of candidates, campaigns, and voters in the electoral process. Topics will include the role of media, the impact of money, the operations of political campaigns and the effect of campaign laws. Formerly known as POLS 615. Not open to students with credit in POLS 615.

POLS 316. Public Opinion and American Democracy. 3 Credits.  S
This course examines the construction, administration, and interpretation of public opinion polls. The course will also examine the role of public opinion in the democratic process and the formation of public opinion. Formerly known as POLS 516. Not open to students with credit in POLS 516.

POLS 317. The U.S. Congress. 3 Credits.  S
This course studies how the U.S. Congress works as a lawmaking body in the contemporary political context, but also how its functioning today differs from the past and the changes that have brought about these differences. In our examination of the U.S. Congress today and across time, we will analyze its institutional features and procedures and the changing roles of the political parties operating within it. This course is offered at the 300 level and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS 617. Prerequisite: POLS 110 or consent of the instructor.

POLS 318. The Presidency. 3 Credits.  S
The office of the President of the United States, its place in the constitutional and political system. Emphasis is given to modern experience and current problems. Formerly known as POLS 618. Not open to students with credit in POLS 618. Prerequisite: POLS 110 or consent of the instructor.

POLS 320. Introduction to Public Policy. 3 Credits.  S
Offers an introduction to the policy-making process covering policy formulation, adoption, and implementation. Overview of major theories of the policy-making process, the actors involved in the process, and the constraints and enhancements offered by the broader political environment. The theoretical frameworks are applied to several substantive policy areas.

POLS 321. Public Policy Analysis. 3 Credits.  S
An introduction to the study and analysis of public policy with emphasis on the concepts and techniques of policy thinking. The methods of policy description, explanation, evaluation, and choice will be applied to a variety of policy topics, e.g. health care, defense, environmental protection, education, etc. Formerly known as POLS 621. Not open to students with credit in POLS 621. Prerequisite: Sophomore level or consent of the instructor.

POLS 323. The Politics of Social Policy. 3 Credits.  S
An examination of the formulation and execution of key social policies in the United States, such as welfare policy, crime and drug control policy, disability rights policy, education policy, and social regulatory policy concerning controversial social issues such as abortion and gun control. Formerly known as POLS 623. Not open to students with credit in POLS 623. Prerequisite: Sophomore level or consent of the instructor.

POLS 325. Intelligence Analytics. 3 Credits. S
This course develops advanced critical thinking, writing, oral communication skills by enhancing the student's ability to apply analytic tradecraft methods to intelligence products. Course emphasizes in-class, hands-on exercises to enhance the student's ability to apply structured analytic techniques, critically assess bias and logical fallacies in information sources, critiquing analytical products, and applying sound analytical tradecraft to individual and team writing exercises and oral presentations. Course also emphasizes the team-oriented environment of the intelligence profession, specifically focusing on standards of practice found in US intelligence agencies. On completion of the course, students will have an understanding of the analytic processes and guidelines the U.S. Intelligence Community uses to create intelligence products for national security decision makers. Prerequisite: POLS 125 and POLS 130.

POLS 333. Conspiracy Theories and Misinformation. 3 Credits. S
This course is a critical study of conspiracy theories and misinformation and their role in public opinion, attitudes, and political activism, primarily (but not exclusively) in the U.S political context. Throughout the semester, we discuss how social scientists define and distinguish these terms and examine contemporary social science explanations for why people believe in conspiracy theories and misinformation and also why these beliefs are resistant to change. The course integrates research from political science, psychology, communication studies, sociology, and other disciplines. We discuss the influence of conspiracy theories and misinformation in politics, as well as how political dynamics impact conspiratorial and misinformed beliefs in the mass public. Prerequisite: Sophomore standing or consent of the instructor.

POLS 345. Counterintelligence. 3 Credits. S
This course provides an overview and history of the counterintelligence discipline; the structure and operations of the U.S. counterintelligence community including its legal foundation; and the privacy and civil liberties implications of counterintelligence operations. Course discusses how counterintelligence has evolved from the Cold War-era, with its focus on counter espionage, to 21st Century challenges such as threats from non-state actors and to our cyber networks. Course also addresses the emerging national security issues which will shape future U.S. counterintelligence operations. On completion of the course, students will have an understanding of how the U.S. counterintelligence capabilities and programs work to detect and neutralize the impact of espionage against US interests. Prerequisite: POLS 125 and POLS 130.

POLS 348. Politics of Western Europe. 3 Credits. W
This course is an introduction to European politics, pursuing three goals. First, the class is designed to introduce you to a variety of different aspects of European political systems, their main political actors, and basic historical traditions. Our second objective focuses on discussing contemporary dynamics and transformations in the nature of political participation and representation across European political systems. Third, you will become acquainted in some detail with the institutions and operating procedures of four political systems that we focus on: France, Germany, Great Britain, and the European Union. These systems represent the range of traditions we encounter in Western and Central Eastern Europe so they serve as an example of how European politics work. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS 648. (Same as EURS 348.) Prerequisite: POLS 150.

POLS 354. Politics of Russia and Post-Soviet States. 3 Credits. S/W
This course examines the collapse of the Soviet system and the problems of transforming centrally planned authoritarian states into a free market democracies. We explore the roles of ethnic and national tensions, irredentism, foreign policy dynamics, natural resources and economic decay, along with the relevant cultural factors that intersect with politics and governance in the region. Formerly known as POLS 654. Not open to students with credit in POLS 654. Prerequisite: POLS 150 or consent of the instructor.

POLS 355. Politics of East-Central Europe. 3 Credits. S/W
This course analyzes Communist political theory in its application to the countries of East-Central Europe with consideration of their traditional backgrounds and their patterns of political, social, and economic developments. It constructs a theoretical model of the communist state and discusses its variations by description and comparison of the governments and political processes of Albania, Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Rumania, and Yugoslavia. Formerly known as POLS 655. Not open to students with credit in POLS 655. Prerequisite: POLS 150 or consent of the instructor.

POLS 356. Politics of East Asia. 3 Credits. NW S/W
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. Formerly known as EALC/POLS 656. Not open to students with credit in EALC 656 or POLS 656. (Same as EALC 356.)

POLS 359. Latin American Politics. 3 Credits. S/W
This course will explore the major challenges to development and democratization in the region, from the colonial era to the present times. Throughout, we will use comparative academic literature, newspaper articles, and movies to grasp the great diversity of the political dynamics of Latin America. The course will start with colonialism, state formation, and economic development strategies (e.g., ISI and neoliberal economic policies). Then, we will move on to processes of democratic and nondemocratic rule: populism, military coups, democratization, the left turn, and problems of political representation. We will end with an analysis of current political issues the region is facing today, including economic instability, inequality, clientelism, corruption, and crime. Formerly known as POLS 659. Not open to students with credit in POLS 659. Prerequisite: POLS 150 or consent of the instructor.

POLS 360. Ancient Roots of Modern Politics. 3 Credits. S
This course examines the political thought and practice of Ancient Greece and Rome, and the enduring impact of these cultures upon contemporary political institutions. Students will consider topics such as origins of democracy in Ancient Athens; the Roman Republic as a model for the constitution of the United States; and the causes and results of Rome's transition from Republic to monarchy. The course will also introduce students to key perspectives in the analysis of ancient and modern politics, for example constitutional theory, political psychology, and source criticism. All readings will be in English; no knowledge of any ancient languages is required. (Same as CLSX 360.)

POLS 361. Politics of the Middle East. 3 Credits. S/W
Survey of domestic and international political developments in the Middle East. Topics include: emergence of the modern nation-state, the role of Islam, leadership patterns, competing political ideologies, prospects for democratization, foreign policy relations, and regional conflicts. Formerly
known as POLS 661. Not open to students with credit in POLS 661. Prerequisite: Sophomore level or consent of the instructor.

POLS 362. Women and Politics. 3 Credits. S
This course exposes students to contemporary research on women and politics by surveying the sub-fields of political science. Topics include women's representation in the U.S., women and U.S. public policy, gender and legal theory, international women's movements, women and revolution, and women as political elites. We will examine the ways in which feminist theory and women's activism have challenged the narrow focus of the discipline as well as redefined women's place in society. Prerequisite: Sophomore level or consent of the instructor.

POLS 363. Populism and Nationalism. 3 Credits. S
This course will acquaint students with the various understandings and manifestations of populism and nationalism around the world, including the United States. While considering the rich array of social science theory addressing these political phenomena, we will examine their existence around the world and at home and highlight the importance of the concepts of identity, citizenship, and practices of exclusion among others. The concepts of nationalism and populism are far from synonymous, but they both underscore the challenges in the dynamic interaction between politics, society, identity and culture(s). Formerly known as POLS 663. Not open to students with credit in POLS 663.

POLS 364. Elections and Political Parties around the World. 3 Credits. S
This course explores the dynamics involved in elections for political parties in both democratic and authoritarian environments around the world. In doing so, we examine the impact of electoral systems, the opportunities and changes in media technology, and the types of regimes in shaping campaigns, voter mobilization, and political party organization and behavior. We also discuss the roles of parties, mainstream and extreme, and their influence on party systems and the outcomes at the polls. Formerly known as POLS 564. Not open to students with credit in POLS 564. Prerequisite: POLS 150 or consent of the instructor.

POLS 365. Politics in Africa. 3 Credits. W
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. Formerly known as POLS 665. Not open to students with credit in AAAS 600 or POLS 665. (Same as AAAS 365.) Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor.

POLS 366. Political Economy of East Asia. 3 Credits. S
This course provides basic understanding of fiscal, monetarist, and trade politics; how governments in East Asia use them to pursue growth; the extent to which these governments follow or controvert economics to pursue growth; and how the performances of economies in East Asia relate to the U.S. and global economies. Formerly known as POLS/EALC 666. Not open to students with credit in POLS/EALC 666. (Same as EALC 666.)

POLS 368. Political Representation in Comparative Perspective. 3 Credits. NW S
This course provides students with the analytical tools to understand representation and accountability in developing democracies. We analyze why parties and elections vary so dramatically across countries and across time, with particular focus on the global south. The course is organized in three parts. The first focuses on party systems as structures, and students learn what political parties and party systems are, where they come from, and how analysts classify party systems. Second, we study parties as organizations, what parties do, and how they change. In the third unit of the course, we turn our attention to voters, examining the determinants of voter participation and preferences. Prerequisite: POLS 150 or consent of the instructor.

POLS 369. Israeli-Palestinian Conflict: An Introduction. 3 Credits. S
This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. (Same as GIST 329, HIST 482, and JWSH 329.)

POLS 371. United States Foreign Policy. 3 Credits. S/W
An evaluation of the formulation of United States foreign policy in the post-World War II period. Economic, military, and diplomatic dimensions of policy; internal and external influences on policy; theories of foreign policy decision-making. Formerly known as POLS 670. Not open to students with credit in POLS 670.

POLS 373. International Organization. 3 Credits. S
In this course, international organizations are examined with special emphasis devoted to the United Nations. A central theme of the course rests upon the question of whether strengthened international organization offers the only alternative to further world wars. Formerly known as POLS 673. Not open to students with credit in POLS 673. Prerequisite: POLS 170 or consent of instructor.

POLS 375. Russian Foreign Policy. 3 Credits. S/W
Examination of the history of Soviet and Russian foreign policy and current issues of foreign policy in the Post-Soviet era. Analysis of foreign policy making in Russia and the other Post-Soviet states. Emphasis on the changed nature of international security problems after the cold war and on the role of foreign policy in economic development. Formerly known as POLS 675. Not open to students with credit in POLS 675. Prerequisite: POLS 170 or consent of instructor.

POLS 378. Chinese Foreign Policy. 3 Credits. S/W
An in-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. This course is offered at the 300 level and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS 678. Prerequisite: Sophomore level or consent of the instructor.

POLS 379. International Conflict. 3 Credits. S
The goal of this course is to gain an analytical understanding of the conditions, processes, and events which lead to the outbreak and escalation of war. This course focuses predominantly on the causes of interstate conflict, but also includes a brief examination of the causes of civil war. The course highlights the complexity of the conflict subject matter, scrutinizing through the many lenses of International Relations (IR) theory, including but not limited to realism and the balance of power, levels of analysis, misperception, rivalries, grievances, bargaining, and insecurity. In addition, the course applies existing theoretical and empirical research to an examination of case studies which include World War I, World War II, and the Cold War. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS 679. Prerequisite: Sophomore level or consent of the instructor.

POLS 390. Introduction to Public Administration. 3 Credits. S
Introduction to administration, public policy and policy makings is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the
three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 330.) Prerequisite: POLS 110.

POLS 391. Introduction to Public Administration, Honors. 3 Credits. S
Introduction to administration, public policy and policy making, for honors students, is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 331.) Prerequisite: POLS 110.

POLS 399. Data 2: Foundations of Data Science. 3 Credits. S
Data science empowers its users to provide data-drive solutions to problems and questions in the world. This course provides foundational skill and knowledge behind this power. This knowledge and skill includes learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. (Same as ECON 399 and PSYC 399.) Prerequisite: PSYC 199/POLS 199/ECON 199 or EEC 138; and PSYC 210 or MATH 365 or ECON 426 or POLS 306 or SOC 380 or MATH 101 or MATH 104 or MATH 115 or MATH 121.

POLS 400. Contemporary Feminist Political Theory. 3 Credits. S
A detailed introduction to feminist thought post-1960. Examines feminism in relation to the categories of political theory: liberal feminism, socialist feminism, radical feminism, and postmodern feminism. Within these categories and separately, we will also consider feminism as it is influenced by women traditionally excluded from mainstream feminist thought, namely U.S. woman of color and women of post-colonial societies. This course is a service learning course that provides students with on-site practicum, mentoring, and networking skills. Prerequisite: Sophomore level or consent of the instructor.

POLS 403. Politics in Literature. 3 Credits. S
This course provides an examination and analysis of the portrayal of politics and political problems in literature. Classical and modern texts will be considered, including dramas, poems, and novels. Formerly known as POLS 503. Not open to students with credit in POLS 503. Prerequisite: Sophomore level or consent of the instructor.

POLS 407. Modern Political Theory. 3 Credits. S
An analysis of works by various authors, with the intention of exploring the political ideas that emerge in conjunction with the appearance of modern science in the 17th century, the Enlightenment, and the revolutions they inspired. Topics will include the modern conceptions of the nature of being, truth, justice, and the relationship of the individual to the community, and inquiry about whether those revolutions fulfilled the principles of modern political philosophy. This course is offered at the 400 and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS 607. Prerequisite: POLS 301 or consent of the instructor.

POLS 409. Topics in Political Theory: _____ . 3 Credits. S
A study of selected theorists in relation to a topic in political theory. Sample topics include: revolution; authority and community; elements of political power; political elites: ideology, human nature in politics, political conflict, etc. Theorists will range from ancient to contemporary. Course is repeatable for different topics. Formerly known as POLS 609. Not open to students with credit in POLS 609. Prerequisite: POLS 301 or consent of the instructor.

POLS 410. Constitutional Law: Governmental Powers. 3 Credits. S
The Supreme Court viewed as a political branch of our government. Special emphasis on the Court's role in determining powers of government and their relationships. Formerly known as POLS 610. Not open to students with credit in POLS 610. Prerequisite: Junior level or consent of instructor.

POLS 411. Constitutional Law: Civil Liberties. 3 Credits. S
The constitutional limits on governmental powers are studied with special emphasis on constitutional guarantees of individuals freedoms. Formerly known as POLS 611. Not open to students with credit in POLS 611. Prerequisite: Junior level or consent of instructor.

POLS 413. Psychology in Politics. 3 Credits. S
An examination of psychological perspectives on political phenomena. Topics include political personality, foreign policy decision making, international conflict and cooperation, voting behavior, and political participation and socialization. Formerly known as POLS 612. Not open to students with credit in POLS 612. Prerequisite: Sophomore level or consent of the instructor.

POLS 414. Urban Politics. 3 Credits. S
This course examines the social, cultural, economic, and structural differences among cities and an investigation into how these factors affect urban politics and policies. Specific topics include leadership, governmental reform, citizen participation, inter-ethnic conflict, and economic development. Formerly known as POLS 614. Not open to students with credit in POLS 614. Prerequisite: Sophomore level or consent of the instructor.

POLS 415. American Political Parties. 3 Credits. S
Survey of the development of the American political party system, stressing party organization, nominating systems, campaigns, elections, role of mass media, and party finances. Formerly known as POLS 515. Not open to students with credit in POLS 515. Prerequisite: POLS 110 or consent of the instructor.

POLS 416. Interest Group Politics. 3 Credits. S
Study of internal group organization and the politics of interests within the U.S. policy-making process. Formerly known as POLS 616. Not open to students with credit in POLS 616. Prerequisite: POLS 110 and/or POLS 320 or consent of the instructor.

POLS 419. Topics in American Politics: _____ . 1-3 Credits. S
A study of selected contemporary problems of policy or politics in the United States. Course is repeatable for different topics. Formerly known as POLS 619. Not open to students with credit in POLS 619. Prerequisite: POLS 110 or consent of the instructor.

POLS 420. Formulation of Public Policy. 3 Credits. S
This course provides an analysis and evaluation of the structures and processes involved in the formulation of public policy at all levels of government. Formerly known as POLS 620. Not open to students with credit in POLS 620. Prerequisite: Sophomore level or consent of the instructor.

POLS 425. Extremist Groups and Government Response. 3 Credits. S
This course examines the rise and fall of political extremist and terrorist groups from the 19th to 21st century and how the U.S. government has responded to these groups. The course stakes out a position that political extremism develops from within broader political social movements and that government actions and policies foster or inhibit extremism. Special attention will be given to the public policy process regarding extremists and terrorists, including many elements of counter-extremism and counterterrorism, and whether government overreacts to extremist groups. Issues and themes will include groups such as left-wing terrorism in the 1960s and 1970s, right-wing and anticommunist groups, hate crime,
environmental extremists, citizen militia groups, Jihadist groups, and anti-abortion groups, among others. Prerequisite: Sophomore level or consent of the instructor.

POLS 426. Political Polling and Survey Research. 3 Credits. S
This course focuses on the role of polling in the political process and introduces the theory and methods used in survey research. Topics include the role of polling in campaigns and the policy process, how survey research firms produce polls, analysis of polling for campaigns and public opinion, the psychology of survey response, survey construction, and sampling. Other data collection techniques commonly used in politics and political science such as focus groups and experiments will be covered. Students will conduct original surveys. Formerly known as POLS 626. Not open to students with credit in POLS 626. Prerequisite: POLS 306 or consent of instructor.

POLS 429. Topics in Public Policy: _____. 1-3 Credits. S
Examination of the U.S. political system and policy formulation and administration through intensive analysis of selected current public policy problems. Sample topics include the environment, education, and economic well-being. Course is repeatable for different topics. Formerly known as POLS 629. Not open to students with credit in POLS 629. Prerequisite: Sophomore level or consent of the instructor.

POLS 430. Politics of Identity. 3 Credits. S
This seminar explores the nature of identity and how identity is relevant to politics and policy with a focus on political attitudes and behavior, institutions, and public policy. Topics include individual and group identity; identities such as gender, racial, sexual orientation, and partisan; and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. This course is offered at the 400 and 600 level with additional assignments at the 600 level. Not open to students with credit in POLS/WGSS 630. Prerequisite: An introductory course in political science or consent of the instructor.

POLS 433. Iran, Turkey, and the Kurds. 3 Credits. S
This course examines the contemporary political and social dynamics within these three communities residing along the northern stretch of what is commonly referred to as the Middle East. Using social and political theory as a starting point, students will comparatively study critical elements and issues facing the members of these societies. Issues and themes for comparison will include the structure and institutions of politics, nation-building and nationalism, Islam and politics, women and politics, and regional and global engagement. Formerly known as GIST/POLS 633. Not open to students with credit in GIST/POLS 633. (Same as GIST 433.) Prerequisite: GIST 220, POLS 150, or consent of instructor.

POLS 443. The European Union. 3 Credits. S
This course will introduce students to the politics of the European Union. The course will cover three closely connected topics. First, it will discuss the institutional make-up of the EU, such as the European Commission, the European Parliament, the European Council, and the European Court of Justice. It will assess how well these institutions deal with the growing importance of transnational issues, such as migration and economic policy issues. Second, the course will examine how national governments pursue national interests at the level of the European Union. Thirdly, the class will study how well the EU represents the citizens of European countries and assess the extent to which the EU has successfully developed into a supra-national federation. This course is offered at the 400 and 600 level with additional assignments at the 600 level. Not open to students with credit in EURS 604/POLS 643. Prerequisite: POLS 150 or consent of instructor.

POLS 444. Justice and Public Policy in Democratic Societies. 3 Credits. S
Examines the ethical and philosophical choices that inform public policy in democratic societies. The guiding idea of the course is that public policies reflect underlying decisions about the nature of state authority and the just use of that authority. The theoretical focus is on modern European and American liberal democratic thought; the empirical focus is global. Among the policy issues examined in the course are public education, immigration, gender equality, same-sex marriage, and drugs. Formerly known as POLS 644. Not open to students with credit in POLS 644. Prerequisites: An introductory course in political science or consent of the instructor.

POLS 445. Corruption, Crisis and Scandal. 3 Credits. S
This course investigates political events and decisions that are considered illegal or illegitimate. Cases from the U.S. and around the world are considered. Issues discussed include the misuse of governmental power and funds, electoral fraud, and bribery. Conditions under which problems arise and reforms that address them are considered. Formerly known as POLS 645. Not open to students with credit in POLS 645. Prerequisite: POLS 150 or consent of instructor.

POLS 449. Study Abroad Topics in Political Science: _____. 1-6 Credits. S
This course is designed for the study of special topics in Political Science at the junior/senior level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

POLS 452. Politics in Europe. 3 Credits. S
The study of the politics and government of Europe. Major countries are covered in depth, while smaller democracies are grouped according to political concepts. Formerly known as POLS 652. Not open to students with credit in POLS 652. Prerequisite: POLS 150 or consent of the instructor.

POLS 453. Gender, War, and Peace. 3 Credits. S
This course explores ways in which militarization and warfare are gendered processes. We ask, what does war tell us about gender, and what does gender tell us about war? Though the majority of fighters are men, women are essential to war efforts. They also represent a high proportion of the casualties of war. Yet women are rarely examined in relation to war; thus we work to uncover women's experiences of war. We also look to women's contributions to the peace movement in terms of both theory and practice, asking: Is peace a feminist issue? Should feminists support women's access to combat positions or oppose the military? What if women ruled the world—would that end wars? Does militarized masculinity harm men more than benefit them? How do states mobilize citizens to war and how is the process gendered? Prerequisite: Sophomore level or consent of the instructor.

POLS 458. Democracy and Human Rights in Latin America. 3 Credits. S/W
This course will explore the relationship between democracy and human rights in Latin America. How do Latin American democracies fare in protecting the human rights of their most vulnerable citizens, including the poor, women, black and indigenous people, and people that are LGBTQ+? First, we explore the processes of democratization in the region in the 1980s and 1990s. We then examine the causes of populism and competitive authoritarianism in the Andes, and the origins of processes of democratic backsliding and democratic breakdown in El Salvador, Nicaragua, and Venezuela. Finally, we study the status of human rights in the region, paying particular attention to the trends in poverty, inequality, crime, violence against women, and rising migration. Prerequisite: POLS 150 or consent of the instructor.

POLS 460. Politics of Development: Latin America, Africa, and Asia. 3 Credits. NW S/W
This course focuses on the topics and themes pertinent to the political dynamics observed in many developing countries. This includes the examination of such areas as the role of the military, styles of political leadership, development of political institutions, land tenure systems, the role of the middle sectors, the nature of bureaucracy, the activity of the students, and foreign policy attitudes. We explore these themes by studying cases and examples from Latin America, Africa, and Asia. Formerly known as POLS 660. Not open to students with credit in POLS 660. Prerequisite: POLS 150 or consent of the instructor.

POLS 463. Comparative Political Economy. 3 Credits. S
This course studies fiscal, monetarist, and trade policies to assess the usefulness and problems posed by these policy instruments across countries. This includes examining exchange rates, interest rates, budget deficit, trade deficit, and debt, to understand their composition and relevance to domestic economy, employment, investment, development, and international trade, the problems they pose, and how these may be overcome. We then examine when, how, and why government enacts these instruments across countries and regions. Formerly known as POLS 563. Not open to students with credit in POLS 563. Prerequisite: POLS 150 or consent of the instructor.

POLS 467. Islam and Politics. 3 Credits. W
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as the intersections of political Islam and democratic politics, state regulation of Islam, religion and Islamism's role in nation-building, formal state institutions and opposition movements in authoritarian contexts. We also look at the complex ways in which religion intersects with gender dynamics and identity politics in Muslim-majority countries. This course is offered at the 400 level and 600 level with additional assignments at the 600 level. Not open to students with credit in GIST/POLS 667 or SOC 640. (Same as GIST 467.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

POLS 468. Politics and Society in China. 3 Credits. NW H/W
Examines the epochal changes that have occurred in China from Deng Xiaoping's rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 "pro-democracy" movement at Tiananmen. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and economic decentralization, and leadership succession. A previous course on China is helpful, but not mandatory. This course is offered at the 400 level and 600 level with additional assignments at the 600 level. Not open to students with credit in EALC 585/POLS 668.

POLS 469. Topics in Comparative Politics: . 1-3 Credits. S
A study of selected contemporary problems of policy or politics affecting several countries. Course is repeatable for different topics. Formerly known as POLS 669. Not open to students with credit in POLS 669. Prerequisite: POLS 150 or consent of the instructor.

POLS 471. Politics of Human Trafficking. 3 Credits. S
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGS 714, POLS 714, or GIST 714. (Same as GIST 471 and WGSS 514.) Prerequisite: Sophomore standing or consent of instructor.

POLS 472. International Political Economy. 3 Credits. S
In this course, structural theories of the international political economy provide the framework for a consideration of the nature of hegemony, the management problem of multinational corporations, the role of international regimes and organizations, development, and dependency. Formerly known as POLS 672. Not open to students with credit in POLS 672. Prerequisite: POLS 170 or consent of instructor.

POLS 475. International Cooperation. 3 Credits. S
This course provides an examination of the gains possible from international cooperation and the barriers to achieving cooperation. Theoretical perspectives on international cooperation will be explored along with cases such as trade, the environment, arms control, and the European community. Formerly known as POLS 671. Not open to students with credit in POLS 671. Prerequisite: Sophomore level or consent of the instructor.

POLS 476. International Relations of Asia. 3 Credits. S/W
An intensive study of the problems of ideological conflict, strategic relations, strategic arrangements, economic cooperation, and cultural exchange in East and Southeast Asia with special emphasis upon the roles of major world powers. Formerly known as POLS/EALC 676. Not open to students with credit in POLS/EALC 676. (Same as EALC 476.) Prerequisite: POLS 170 or consent of the instructor.

POLS 477. U.S. National Security Policy. 3 Credits. S
This course provides an investigation into (1) how security policy is made; (2) the evolution of changing assumptions, strategies and goals since 1945; and (3) the present policy and its alternatives. Formerly known as POLS 677. Not open to students with credit in POLS 677. Prerequisite: Sophomore level or consent of the instructor.

POLS 479. East Asian Security. 3 Credits. NW S
This course examines the major international security challenges in the vital region of the Asia-Pacific. It does so by surveying 1) the military history of East Asia, 2) contemporary security challenges in the region, and 3) relevant issues in Asian security, including the U.S.-China Rivalry. The course will introduce students to various theories from security studies and foreign policy analysis to help frame these policy debates. Students will also develop their research, analytical reasoning, critical thinking, teamwork, and public speaking skills through in-class simulations.

POLS 480. Politics and Government in Israel. 3 Credits. S
The course is an introduction to the Israeli system of government and its complexities, from a comparative perspective. The course aims to deal with the processes and critical issues that characterize the Israeli political system, as well as dilemmas and conflicts that are part of it since the early days of statehood until today. (Same as JWSH 420.)

POLS 482. Transnational Terrorism. 3 Credits. S
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes,
and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism. Formerly known as POLS 582/GIST 585. Not open to students with credit in POLS 582/GIST 585. (Same as GIST 482.) Prerequisite: Sophomore level or consent of instructor.

POLS 484. International Law: The State and the Individual. 3 Credits. S
International law has assumed an increasingly significant role in international life. This course will examine major law including (but not limited to); the changing status and role of the state; rights of minorities and self-determination; the environment; and human rights. The course will examine the central questions and the relevant international legal principles associated with each issue. Formerly known as POLS 684. Not open to students with credit in POLS 684. Prerequisite: Junior level or consent of instructor.

POLS 485. International Law: Laws of Armed Conflicts. 3 Credits. S
This course examines the principles, roles, and functions of international law in the conduct of war. As the course reviews the development and application of the basic rules of armed conflict, several current issues and conflicts are addressed including; the legitimate use of force; the proper definitions of combatants and civilians; actions that constitute war crimes, the legality of new weapons technology, and, if the laws of armed conflict apply to the current "war on terrorism." Formerly known as POLS 685. Not open to students with credit in POLS 685. Prerequisite: Junior level or consent of instructor.

POLS 486. International Human Rights. 3 Credits. S
The course introduces students to historical and philosophical bases of contemporary human rights, theoretical approaches and methodological challenges to studying human rights questions, and acquaints them with the main topics, controversies, and tensions in the scholarship, practice and politics of human rights. Formerly known as GIST/POLS 686. Not open to students with credit in GIST/POLS 686. (Same as GIST 486.) Prerequisite: POLS 170 or consent of instructor is required.

POLS 489. Topics in International Relations: __________. 1-3 Credits.
This course examines selected problems in international relations. Course is repeatable for credit if different topics. Formerly known as POLS 689. Not open to students with credit in POLS 689. Prerequisite: POLS 170 or consent of the instructor.

POLS 492. Field Work in Politics and Policy-Making. 3-6 Credits. S
This offering provides course credit for field work in politics and policy-making that takes place outside the department's Spring Semester internship programs in Washington, D.C. and Topeka. Consent of Instructor is required prior to enrollment.

POLS 493. Directed Readings. 1-3 Credits. U
Individual and supervised readings in selected areas of political science. Course is repeatable for different areas; however, only 3 hours of directed readings can be applied to the major. Prerequisite: Junior level and consent of department.

POLS 494. Washington Semester Intern Seminar. 3 Credits. S
Intern seminar in Washington, D.C. Students meet weekly during Washington Semester program, in speaker/seminar format. Participation is expected, and a term paper is a requirement. Prerequisite: Consent of instructor.

POLS 495. Topeka Semester Intern Seminar. 3 Credits. S
Intern seminar at statehouse in Topeka. Students meet weekly during this program, in speaker/seminar format. Participation is expected, and a term paper is a requirement. Prerequisite: Consent of instructor.

POLS 496. Washington Semester Field Work. 3-6 Credits. S
Supervised internships in public and private agency offices in the Washington, D.C. area. This course is open only to students who are participating in the department's organized, supervised, semester-long Washington internship program. In order to be eligible for the program, students must have junior or senior standing, an overall grade-point average of 2.75, must have completed POLS 110 and have a 3.0 grade point average in all political science courses. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor is required prior to enrollment.

POLS 497. Topeka Semester Field Work. 3-6 Credits. S
Supervised internships in public and private agency offices in the Topeka area. This course is open only to students who are participating in the department's organized, supervised, semester-long Topeka internship program. In order to be eligible for the program, students must have junior or senior standing, an overall grade point average of 2.75, must have completed POLS 110 and have a 3.0 grade-point average in all political science courses. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor is required prior to enrollment.

POLS 498. Honors Thesis. 3-6 Credits. S
Political science majors who in their senior year who wish to become candidates for graduation with honors in political science must enroll in and successfully complete six hours of honors thesis work. Consent of the department is required and candidate must have minimum grade point averages of 3.5 in political science courses and 3.25 in all courses, in both in-residence and combined work.

POLS 499. Capstone Research/Field Work Experience. 3 Credits. S
Capstone research and/or field work experience project for political science majors. Project specified under the direction of a faculty mentor and approved by the undergraduate director. Prerequisite: Senior standing and 12 hours of upper division credit in POLS.

POLS 517. Policing the Womb. 3 Credits. S
Women's reproductive bodies have at times been made hypervisible, subject to medical, legal, and social surveillance and intervention, while at other times invisible. Across these practices, gender and race have been socially constructed in particularly limited ways, which the state has used to justify restrictive case law rulings and policies governing reproductive outcomes. This course is designed to critically examine the history, development, and outcomes of policies and cultural practices related to reproduction that have limited people's decisional autonomy. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGS 717. (Same as WGS 517.) Prerequisite: Any previous course in WGSS.

POLS 520. Political Campaigns. 3 Credits. H
This course will examine the communication involved in political campaigns. Students will be exposed to theories and ideas related to campaigns and will apply this knowledge to current political activity. Although the primary focus of the course is politics, students interested in public relations and strategic communication also benefit from learning and practicing media relations strategies. The mediated nature of modern political communication, as well as the communication strategies of campaigns and journalists, will be examined in a semester-long simulated campaign. By the end of the semester, students will become more
informed users and consumers of political campaign messages. (Same as COMS 607.) Prerequisite: COMS 130.

POLS 521. Mass Media and Politics. 3 Credits. H
The primary goal of this course is to critically examine the role of mass media in U.S. politics. Students learn how information makes it into news coverage, as well as how media content affects individuals, political campaigns, and governing decisions. The course covers media effects theories, news bias and polarization, political entertainment, and other topics. Although the primary focus of the course is politics, students interested in public relations and strategic communication also benefit from learning about U.S. journalism. By the end of the semester, students will be able to critically evaluate political and media systems in the U.S. (Same as COMS 335.) Prerequisite: COMS 130.

POLS 528. Environmental Justice and Public Policy. 3 Credits. S
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several public policy areas that have been impacted by the environmental justice movement: hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as EVRN 528.) Prerequisite: POLS 306 or a statistics class or consent of instructor.

POLS 561. Liberation in Southern Africa. 3 Credits. W
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and HIST 561.)

POLS 607. Modern Political Theory. 3 Credits. S
An analysis of works by various authors, with the intention of exploring the political ideas that emerge in conjunction with the appearance of modern science, the Enlightenment, the Industrial Revolution, and Romanticism. Topics will include the modern conceptions of the nature of being, truth, justice, and the relationship of the individual to the community. Prerequisite: Sophomore level or consent of the instructor.

POLS 613. Comparative U.S. State Politics. 3 Credits. S
A systematic comparative analysis of structures, functions, and policies of state political systems. Prerequisite: Junior level or consent of the instructor.

POLS 617. The Congress. 3 Credits. S
Descriptive and comparative analysis of legislative institutions and processes in the United States, covering Congress and state legislatures. Prerequisite: Sophomore level or consent of the instructor.

POLS 624. Environmental Politics and Policy. 3 Credits. S
Analysis of environmental policies and the formulation and implementation of environmental policy. Examines the history and development of environmental politics as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as EVRN 620.)

POLS 625. Extremist Groups and Government Response. 3 Credits. S
Examines left- and right-wing extremist political groups in America and how the government has developed policies and respond to these groups. Special attention will be given to the process of policy adoption and implementation and how the government might respond to extremist groups in the future. Issues and themes will include groups such as the left-wing terrorists of the 1960s and 1970s, right-wing anticommunist groups of the 1950s and 1960s, international terrorists acting in the U.S., hate crime, ecoterrorism, citizen militia groups, and pro- and anti-abortion extremist groups. Prerequisite: Sophomore level or consent of the instructor.

POLS 628. The Politics of Public Health. 3 Credits. S
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation's public health, explore the role of government in reducing risk and promoting well being, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as EVRN 628.) Prerequisite: POLS 110 and POLS 306 are recommended.

POLS 630. Politics of Identity. 3 Credits. S
This seminar explores the nature of identity and how identity is relevant to politics and policy with a focus on political attitudes and behavior, institutions, and public policy. Topics include individual and group identity, identities such as gender, racial, sexual orientation, and partisan, and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. (Same as WGSS 630.) Prerequisite: Sophomore level or consent of the instructor.

POLS 643. The European Union. 3 Credits. S
This course will introduce students to the politics of the European Union. The course will cover three closely connected topics. First, it will discuss the institutional make-up of the EU, such as the European commission, the European parliament, the European Council, and the European court of justice. It will assess how well these institutions deal with the growing importance of transnational issues, such as migration and economic policy issues. Second, the course will examine how national governments pursue national interests at the level of the European Union. Third, the class will study how well the EU represents the citizens of European countries. Finally, the course will assess the extent to which the EU has successfully developed into a supra-national federation. (Same as EURS 604.) Prerequisite: Sophomore standing or consent of instructor.

POLS 648. Western European Politics. 3 Credits. W
This class is an introductory course to European politics which pursues three goals. First, the class is designed to introduce you to a variety of different aspects of European political systems, their main political actors, and basic historical traditions. A second objective consists of discussing the enormous transformation of European politics that is currently underway in Europe. Third, you will become acquainted in some detail with the institutions and operating procedures of four political systems that we focus on: France, Germany, Great Britain, and the European Union. These systems represent the range of traditions we encounter in Western and Central Eastern Europe so they serve as an example of how European politics work. Prerequisite: POLS 150.

POLS 662. Gender and Politics in Africa. 3 Credits. S
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political roles during the pre-colonial and colonial society. Next, we examine the
impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender and development, HIV/AIDS and women's health, gender and militarism. We also explore women's roles in political institutions, civil society organizations, trade and labor unions, and transnational movements. We also examine contemporary constructions of masculinity and femininity in African states and explore how these constructions affect social policy and national political agendas. (Same as AAAS 662 and WGSS 662.) Prerequisite: Sophomore level or consent of instructor.

POL 667. Islam and Politics. 3 Credits. W
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as the intersections of political Islam and democratic politics, state regulation of Islam, religion and Islamism's role in nation-building, formal state institutions and opposition movements in authoritarian contexts. We also look at the complex ways in which religion intersects with gender dynamics and identity politics in Muslim-majority countries. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses and includes a presentation of the findings of the research. Not open to students with credit in POLS 467. (Same as GIST 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

POL 668. Politics and Society in China. 3 Credits. NW H/W
Examines the epochal changes that have occurred in China from Deng Xiaoping's rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 "pro-democracy" movement and the events at Tiananmen Square. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and economic decentralization, and leadership succession. A previous course on China is helpful, but not mandatory. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 468. (Same as EALC 585.)

POL 674. Global Justice and Foreign Policy. 3 Credits. H
This course helps students understand philosophical perspectives and clarifies the role that ethics plays in foreign policy around the world. We examine key ethical debates, including those addressing human rights, issues related to economic and political justice, the just war theory (jus ad bellum), just conduct of war (jus in bello), and humanitarian intervention. Students will be guided throughout the course to develop a synthesizing research project that draws from other coursework. Prerequisite: Junior level or consent of instructor.

POL 678. Chinese Foreign Policy. 3 Credits. S/W
An in-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses. Not open to students with credit in POLS 378. (Same as EALC 678 and GIST 678.) Prerequisite: Sophomore level or consent of the instructor.

POL 679. International Conflict. 3 Credits. S
The goal of this course is to gain an analytical understanding of the conditions, processes, and events which lead to the outbreak and escalation of war. This course focuses predominantly on the causes of interstate conflict, but also includes a brief examination of the causes of civil war. The course highlights the complexity of the conflict subject matter, scrutinizing war through the many lenses of International Relations (IR) theory, including but not limited to realism and the balance of power, levels of analysis, misperception, rivalries, grievances, bargaining, and insecurity. In addition, the course applies existing theoretical and empirical research to an examination of case studies which include World War I, World War II, and the Cold War. Students will be guided throughout the course to develop a synthesizing research project that draws from other coursework. Not open to students with credit in POLS 379. Prerequisite: Sophomore level or consent of the instructor.

POL 682. Trafficking, Organized Crime and Terrorism: U.S. Government Response. 3 Credits. S
The course addresses multiple ways, in which international terrorism, organized crime, and trafficking intersect and new challenges that the trafficking-terrorism nexus poses to national and international security. It surveys national and international responses by the U.S. government to the crime-terror nexus. Prerequisite: POLS 110, or POLS 170, or POLS 150, or POLS 425, or POLS 482 or consent of instructor.

POL 687. Introduction to Cyber Intelligence. 3 Credits. S
Course will provide instruction about the fundamental principles, impact and issues of cyber intelligence. Course will focus on cyber intelligence supporting operations in cyberspace (to include risk management functions, cyber defense, cyber espionage, and cyber-attack) as well as intelligence developed through cyberspace. Topics include cyber-threats, cyber defense, and cyber warfare as well as ethical and legal considerations. In addition to providing a foundation of understanding cyber intelligence within the context of the United States, this course will analyze cyber capabilities of nations and non-nation state actors. Learning outcomes for students include an understanding of the cyber intelligence cycle and structured analytic techniques in providing cyber intelligence products to national security and organizational leadership. Students will also gain an understanding of cyber threat actors and complexity of emerging threats. Prerequisite: Instructor permission.

POL 688. U.S. Counterterrorism Approaches to International and Domestic Terror Groups. 3 Credits. S
The course will cover U.S. counterterrorism policy and practices historically and in the current era. For international (multinational) terrorism, the course will focus on how the historical actions of western powers contributed to the rise of terrorist groups, as well as the evolution of U.S. responses to these groups. Groups examined could include Hamas and Al-Qaida. For domestic terrorism, the course will focus on the evolution of counterterrorism responses within the U.S., with particular attention to far-right terrorism, including the Oklahoma City Bombing. We will examine U.S. counterterrorism policy in the law, as well as in the practices of Intelligence, Department of Defense, and law enforcement. Prerequisite: POLS 125 or POLS 130 or permission from the instructor.

POL 690. Research and Diplomacy Lab. 3 Credits. S
This course is designed to provide students with basic tools and an understanding of interdisciplinary social science research and to simultaneously partner with an innovative program implemented by the US Department of State. While learning about the research process and research design, students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer with whom they have contact through videoconferencing throughout the semester. The team engages in extensive and systematic research to address the problem and presents their finding in a formal report presented to the State Department in the desired format. Prerequisite: GIST 220 or POLS 150 or POLS 170 or instructor permission.

POL 691. Diplomacy Lab. 1 Credits. S
This course is a supplemental research lab designed to partner with a jr/sr level course offering an innovative program implemented by the US Department of State. Students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer. This one-credit hour course is intended to function as a special lab project and must be taken in conjunction with a standard course that has a diplomacy lab option. Prerequisite: Instructor permission required.

POLS 692. International Security and Migration Policy. 3 Credits. S

This course examines the politics of migration in receiving and sending states with special attention to the policies of developed democracies, including the US and UK, and the member states of the European Union and Schengen zone. It aims to introduce students to the theories of international migration with special attention to the migration-security nexus. Toward this end, topics cover neoclassical economic models of international migration, the effects of globalization on migration policies, and how perceived economic and security interests shape migration policies. Second, the course will cover the political consequences of migration for sending and receiving states, the economics and politics of migration, including remittances, public opinion, interest group politics, and the role of institutions. Third, the course encompasses different types of migration policies including visas, asylum and refugee admissions, and citizenship and naturalization. Finally, the course examines the foreign policy consequences of international migration, giving special consideration to the migration-security nexus. Throughout the course students are exposed to two major questions: (1) what are the effects of migration on both the states that receive immigrants and the states that send emigrants and (2) how do policymakers respond to these effects? Prerequisite: POLS 170.

POLS 699. Community Data Lab. 3 Credits. S

Data science empowers its users to provide data-driven solutions to problems and questions in the world. This course provides students an opportunity to work on real-world problems that come from local and state governments, health care, education, and small businesses across the state of Kansas. Students will gain experience working from start to finish on delivering data-driven solutions for these problems. In doing so, students will further develop knowledge and skills in learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. Students will also gain professional skills learning to work with different organizations across the state. (Same as PSYC 699) Prerequisite: PSYC/POLS/ECON/SOC 199; ECECS 138; PSYC 210 or MATH 365 or ECON 426 or POLS 306 or SOC 380; PSYC/POLS/ECON 399; MATH 101 or MATH 104; or departmental approval.

POLS 705. Research Design for Political Science. 3 Credits.

Introduction to the discipline of political science, the philosophy of science, research design, and data acquisition. Prerequisite: Graduate standing or consent of instructor.

POLS 706. Research Methods I. 3 Credits.

An introduction to quantitative research methods, including probability theory, hypothesis-tests, and multiple regression. Includes regression diagnostics, the treatment of numeric and categorical predictors, interaction effects and elementary nonlinear models. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and lab sessions where computing applications are taught.

POLS 707. Research Methods II. 3 Credits.

This course covers basic techniques for multivariate analysis, focusing on multiple regression. Topics include interpretation of regression statistics, diagnostics for common problems, dummy variables, instrumental variables, basic time series methods including adjustment for autocorrelated error, logistic models, and nonlinear modeling; additional techniques may be covered at the discretion of the instructor. Prerequisite: POLS 706.

POLS 708. Advanced Qualitative Research Methods. 3 Credits.

An examination of qualitative research approaches frequently employed within political science. Topics may include the use of case studies, archival and documentary research, content analysis, interviewing and focus group techniques, ethnographic fieldwork, narrative and discourse analysis, and others. The course will examine the strengths and limitations of these methods in relation to major research traditions such as culturalist approaches, historical institutionalism, rational choice, and constructivism. Prerequisite: POLS 705 and either graduate standing or consent of instructor.

POLS 714. Politics of Human Trafficking. 3 Credits.

This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GIST 471, POLS 471, or WGSS 514. (Same as GIST 714 and WGSS 714.) Prerequisite: Graduate standing.

POLS 716. Political Behavior. 3 Credits.

A seminar for students interested in understanding the public opinion, voting, and other forms of political participation. This course will include a discussion of the formation, measurement of political attitudes as well as an examination of protest and other forms of extra-legal participation. Prerequisite: Graduate standing or consent of instructor.

POLS 719. Topics in the American Political Institutions: ______. 3 Credits.

A seminar to be offered as occasion demands, dealing with, but not limited to special topics in the presidency, congress, and judicial processes. Prerequisite: Graduate standing or consent of instructor.

POLS 720. The Scope of Public Policy. 3 Credits.

Introductory graduate course in the examination of public policy making. Considers institutions, basic theoretical frameworks, and standard methods, and places policy-making within a broad political context. Emphasizes American examples, but relevant comparative material is employed. Prerequisite: Twelve hours of political science.

POLS 754. Politics and Government of Russia and the Central Eurasian States. 3 Credits.

The collapse of the Soviet system and the problems of transforming a central planned authoritarian state into a free market democracy. The roles of ethnic and national tensions, economic decay, and cultural factors. Prerequisite: Eight hours in the social sciences and/or history, including POLS 150, or consent of instructor.
POL 769. Topics in Comparative Politics: ___._ 3 Credits.
This course is a study of selected themes in comparative politics at the graduate level.

POL 782. Transnational Terrorism. 3 Credits.
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism.

POL 789. Topics in International Relations: ___._ 2-3 Credits.
A study of selected problems in international relations. Prerequisite: Consent of instructor.

POL 810. American Politics. 3 Credits.
A survey and critical examination of recent theoretical developments and research focusing on national institutions, electoral behavior, and policy-making processes. Emphasis is given to conceptualizing and analyzing the changing nature of the American political system.

POL 812. Political Psychology. 3 Credits.
A critical examination of the principal areas in current literature in political psychology, including psychological perspectives on mass political behavior, elite decision making, and international relations. Attention will be given to articulating and evaluating theories, constructing research questions and programs, and comparing methodologies.

POL 820. Policy Formulation and Adoption. 3 Credits.
Survey of the literature on the institutional, socioeconomic, and political forces influencing the formulation and adoption of public policy, as well as policy change, at all levels of government. Topics include problem definition, agenda setting, and the methods of decision-making. This is a research seminar so students will be required to conduct an original research project.

POL 825. Urban Policy and Administration. 3 Credits.
This course explores the development, implementation and evaluation of public policy in the local government context. It examines a variety of policy tools used to address urban problems and applies theories of the policy process, intergovernmental relations, and institutions to municipal governance. In so doing, the course examines a range of current substantive policy and administrative issues facing urban communities and governments. (Same as PUAD 825.)

POL 850. Introduction to Comparative Politics. 3 Credits.
This course provides a graduate level introduction to the field of Comparative Politics. Among topics it will survey are: the history and development of the field; classic works and major founding concerns of the field; methodological and epistemological debates; competing paradigms which had characterized Comparative Politics (structural-functionalism, culturalists, state-centrists, institutionalists, rational choice, and other); theory building and the role of area studies.

POL 851. Comparative Institutions and Government. 3 Credits.
This course provides a survey of the subfield of political institutions within Comparative Politics. Among the topics it will cover are: identifying regime types (democracy vs. non-democracy); comparative electoral systems; party systems; presidential vs. parliamentary systems; comparative legislatures; constitutional engineering and democratic transitions, and others. Prerequisite: POLS 850.

POL 857. Comparative Political Behavior. 3 Credits.
The course introduces students to the vast literature on comparative elections and comparative political parties. It pursues a twofold goal. First, the course surveys the large comparative electoral behavior literature. The themes covered in the first half include a discussion of why voters participate in elections, how voters form preferences, how psychological processes affect mass views, and how these, in turn, influence party preferences. Second, the course introduces students to the supply-side of politics and the role of political parties. This second part of the course, therefore, examines why parties form in the first place, what motives they have, what choices they offer in short, how and why parties compete. Together, the way voters form preferences and the logic of party formation illuminate a central element of the democratic process.

POL 870. International Relations. 3 Credits.
Critical evaluation of the major approaches to international relations and their application to conflict and conflict resolution, foreign policy, and international political economy.

POL 878. Conducting and Analyzing Fieldwork in Developing Countries. 3 Credits.
An introduction to fieldwork and surveys conducted in developing and non-democratic countries. The course covers the challenges of conducting interviews and surveys in these countries. The intent is to develop the research skills necessary for data collection and fieldwork as well as evaluating an analyzing survey data collected by other researchers in developing countries. Prerequisite: POLS 705 or equivalent or consent of the instructor.

POL 899. Thesis. 1-6 Credits.
Enrollment for writing thesis for master's degrees. Graded on a satisfactory progress/limited progress/no progress basis.

POL 904. Statistical Computing Foundations. 3 Credits.
This is an interdisciplinary course for social science researchers who need to develop routines to estimate and evaluate statistical models. It introduces tools for software development, primarily with the statistical programming language R (and related languages like C). Topics include code organization and optimization, concurrent version management, LaTeX document preparation, and high-performance computing on the KU Linux cluster. Examples from various fields are considered. Prerequisite: Two courses in graduate level statistics and familiarity with R.

POL 906. Advanced Regression. 3 Credits.
Covers topics appropriate for a second course in regression analysis. The content will vary according to the interest of the instructor and students, but will generally include such topics as multiple imputation of missing data, the generalized linear model (GLM), and specialized models for longitudinal data. The course will include a review of the principles of maximum likelihood estimation and applications of matrix algebra and differential calculus in statistical applications.

POL 909. Topics in Methodology: _____. 3 Credits.
An intensive seminar in a method (or a variety of relevant methods) of theoretical or empirical research designed for Ph.D. students only. Emphasis is on deepening the understanding and ability to use advanced methods of analysis. Prerequisite: Admission to the Ph.D. program or consent of instructor.

POL 911. The U.S. Congress. 3 Credits.
This seminar employs various theoretical and methodological perspectives to explore the burgeoning post-1960 literature on Congress. Traditional subjects such as committees, parties, and elections are
examined through applications of formal models, behavioral analyses, and participant observation.

**POLS 913. State and Local Politics. 3 Credits.**
Research seminar on various aspects of state and local government, such as reformed institutions, fiscal stress, citizen participation, and various policy problems.

**POLS 915. American Political Parties. 3 Credits.**
A survey of the theories and research findings dealing with political parties in American politics, including third and minor parties. Topics to be covered include the development and evolution of the party system, the nature of party organization and the recruitment of party activists, the role of parties in the electoral process, the impact of parties upon public policy, and party reform.

**POLS 919. Topics in U.S. Government and Politics: _____ 2-3 Credits.**
A seminar to be offered as occasion demands, dealing with, but not limited to, bureaucracy, legislative policy, federalism, and special problems in U.S. politics.

**POLS 940. Teaching Political Science. 1 Credit.**
A discussion of teaching methods and approaches. Students are expected to develop a personal teaching portfolio that describes their outlook on teaching political science and provides sample teaching materials. This course must be taken by all graduate teaching assistants and assistant instructors during the first year of their appointment. Grades are issued on a pass/fail basis.

**POLS 954. Politics in Post-Soviet States. 3 Credits.**
In-depth study of the politics of Russia, Ukraine, and the other Post-Soviet states. Focus on the problems of transforming a centrally planned authoritarian system to a free market democracy.

**POLS 955. Politics of Advanced Industrial Societies. 3 Credits.**
Theory and research on the patterns of behavior that characterize the politics of North America, Europe, and developed regions of Asia. Topics include corporatism and alternative forms of interest intermediation, economic theories of socialization and electoral choice, and the role of the state; its finances, adaptation, and the problem of power and legitimacy. Prerequisite: POLS 850 or permission of instructor.

**POLS 959. Advanced Topics in Comparative Politics: _____ 1-3 Credits.**
This course is an advanced level study of selective topics in comparative government and politics. Prerequisite: Must have completed either POLS 850, POLS 851, or POLS 857.

**POLS 970. Foreign Policy Analysis. 3 Credits.**
Designed to acquaint students with the principal theories, approaches and types of empirical analysis generally employed to explain and interpret the creation and implementation of foreign policy. Topics include rational actor models, collective and bureaucratic processes, societal influences, cognitive and psychological factors, and comparative foreign policy. Prerequisite: POLS 870. An undergraduate United States foreign policy class is recommended.

**POLS 972. Theories of International Conflict. 3 Credits.**
An in-depth study of theories and research on international conflict. Topics will range from anthropological studies of conflict in primitive societies to contemporary theories of nuclear conflict. The course will also cover current empirical research methodology and results of research on international conflict, as well as models of conflict processes. Prerequisite: POLS 870.

**POLS 973. International Political Economy. 3 Credits.**
Provides an eclectic survey of major developments in the field. Topics include the intellectual origins of IPE; the historical evolution of the international system; North-South and Western trade, investment, and monetary relations; foreign aid, debt technology transfer, development, international economic institutions (e.g., IMF, IBRD, MNCs, etc.). (Same as SOC 873.) Prerequisite: POLS 870 or consent of instructor.

**POLS 977. Ethics in International Relations Theory. 3 Credits.**
This course examines how issues of International Ethics have been treated in International Relations theory. This course begins by reviewing several theoretical perspectives of International Relations and how these perspectives have historically understood the role ethics plays in international politics. By the end of the semester, students should have a firm understanding of (1) the salient issues of international ethics in world politics and (2) whether and how IR scholars have (theoretically and methodologically) placed those issues in their research paradigms. The issue areas the course will cover include, but are not limited to, human rights doctrines, issues of economic and political justice, just war theory (jus ad bellum) and just conduct of war (jus in bello), and humanitarian intervention. The course will assess the role international law has played in stemming and/or punishing human rights abuses. Students will review several historical cases of genocide, as well as several cases of truth and reconciliation commissions.

**POLS 979. Topics in International Relations: _____ 3 Credits.**
To be offered periodically when topics of special interest arise.

**POLS 980. International Organizations. 3 Credits.**
Considers theoretical and empirical work on international governmental and non-governmental organizations (IOs). Specifically highlights the evolving scholarly debates regarding the function, design, and delegation of authority to IOs as well as their behavior and change. Explores these questions in depth through a wide range of cases, including comprehensive coverage of the United Nations, Bretton Woods Institutions, and the European Union, and their activities in issue areas concerning international security, trade, finance, development, humanitarian aid, and the environment.

**POLS 993. Directed Readings. 1-5 Credits.**
Designed to meet the needs of graduate students whose study in political science cannot be met with present course. Prerequisite: Consent of instructor.

**POLS 997. Preparation for the Comprehensive Examination. 1-6 Credits.**
An independent reading course for students preparing to take the Ph.D. comprehensive examination. May be taken for two semesters or six credits, whichever comes first. Graded A, B, C, D, or F depending on the results of the comprehensive examination.

**POLS 999. Doctoral Dissertation. 1-15 Credits.**
Enrollment for writing doctoral dissertations. Graded on a satisfactory progress/limited progress/no progress basis.

**Psychology Courses**

**PSYC 102. Orientation Seminar in Psychology. 1 Credits.**
Provides an overview of the discipline of psychology. Emphasizes developing an understanding of opportunities in psychology at the University of Kansas, exploring service-learning options related to the major, and helping students plan goals for their education through an understanding of their personal values and options within and outside the discipline. Open to KU-degree-seeking students only. Contact the Psychology Department to enroll in the course. Non-degree-seeking and non-KU students may enroll in the course by signing up with KU Continuing Education. Graded on a satisfactory/unsatisfactory basis.
PSYC 104. General Psychology. 3 Credits. SI S
A basic introduction to the science of psychology.

PSYC 105. General Psychology, Honors. 3 Credits. SI S
Open to students in College or Departmental Honors programs or by permission of instructor.

PSYC 177. First Year Seminar: _____ 3 Credits. SI
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in psychology. May not contribute to major requirements in psychology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

PSYC 199. Data I: Dealing with Data. 3 Credits. S
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as ECON 199, POLS 199 and SOC 199.)

PSYC 200. Research Methods in Psychology. 3 Credits. S
An examination of the scientific “ways of knowing” employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Prerequisite: PSYC 104.

PSYC 201. Research Methods in Psychology, Honors. 3 Credits. S
An examination of the scientific “ways of knowing” employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Open to students in University and Departmental Honors programs or by permission of instructor. Not open to students taking PSYC 200. Prerequisite: PSYC 104.

PSYC 202. Study Abroad Topics in: 1-6 Credits. S
This course is designed for the study of special topics in Psychology equivalent to courses at the 100 and 200 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

PSYC 210. Statistics in Psychological Research. 3 Credits. S
An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Prerequisite: PSYC 104.

PSYC 211. Statistics in Psychological Research, Honors. 3 Credits. S
An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Open only to student in University and Departmental Honors programs or by permission of instructor. Not open to students who have taken PSYC 210. Prerequisite: PSYC 104.

PSYC 250. Human Development. 3 Credits. S
This course examines the psychological, social, and physical development of humans across the lifespan from conception through infancy, childhood, adolescence, adulthood and death. The course will explore the broad array of factors that contribute to development including cognitive, emotional, social, neurological, physical, genetic, and environmental influences. (Same as ABSC 250.) Prerequisite: PSYC 104 or PSYC 105.

PSYC 318. Cognitive Psychology. 3 Credits. S
An introduction to contemporary research and theory in human learning and memory, relevant perceptual processes, and higher functions such as language. Prerequisite: PSYC 104.

PSYC 319. Cognitive Psychology, Honors. 3 Credits. S
Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.

PSYC 320. Personality. 3 Credits. S
A survey of personality theories, development, assessment and current research. Prerequisite: PSYC 104.

PSYC 321. Personality, Honors. 3 Credits. S
Honors version of PSYC 320. Open to students in College or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.

PSYC 323. Philosophy of Psychology. 3 Credits. HR
The philosophy of psychology is a relatively new field of inquiry in philosophy and so the question of what the philosophy of psychology is remains an open question. In this course, we will understand the philosophy of psychology in two ways. First, it is the study of the nature of psychology and the various capacities and mechanisms that make cognition possible. We will consider whether there is a unique psychological level of explanation or whether psychology ultimately reduces to the brain. We will also explore various philosophical puzzles raised by consideration of psychological abilities like memory, attention, and emotion. Second, philosophy of psychology is a subfield of philosophy of science, where we examine a particular science-here, experimental psychology-as a way to explore broader questions about what science is, how science explains phenomena, and how values intersect with its investigations. All of this makes it an exciting time to study the philosophy of psychology-as students in this course, student's interests will play a role in selecting topics and shaping the direction of our inquiry. (Same as PHIL 323.)

PSYC 333. Child Development. 3 Credits. S
A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Prerequisite: PSYC 104.

PSYC 334. Child Development, Honors. 3 Credits. S
A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Open to students in University or Departmental Honors Programs or by permission of instructor. Prerequisite: PSYC 104.

PSYC 350. Psychological Disorders. 3 Credits. S
A broad survey of psychopathology, with a focus on the primary symptoms, causes, consequences, and treatments of its major manifestations, including: anxiety disorders, mood disorders, trauma-related disorders, eating disorders, substance-use disorders, personality disorders, and psychotic-spectrum disorders. Relevant scholarship from neuroscience, cognitive science, medicine, behavioral science, and sociocultural perspectives will be integrated throughout. Prerequisite: PSYC 104.

PSYC 351. Psychological Disorders, Honors. 3 Credits. S
Open to students in College or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.
PSYC 360. Social Psychology. 3 Credits. S
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Prerequisite: PSYC 104.

PSYC 361. Social Psychology, Honors. 3 Credits. S
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104.

PSYC 370. Behavioral Neuroscience. 3 Credits. N
A survey of topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 371. Behavior Neuroscience, Honors. 3 Credits. N
A survey of basic topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology, an introductory course in Biology and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 375. Cognitive Neuroscience. 3 Credits. N
A survey of topics related to the biological processes underlying cognition in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and functional neuroanatomy. Selected topics within the area of cognitive neuroscience also covered, such as sensory processing, hearing, vision, learning and memory, attention, motor control, language, hemispheric asymmetry, executive function, and neuroplasticity. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 380. Clinical Neuroscience. 3 Credits. N
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dystonic movement disorders, and senile dementia. Prerequisite: An introductory course in Psychology, an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 381. Clinical Neuroscience, Honors. 3 Credits. N
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dystonic movement disorders, and senile dementia. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology, an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 385. Social Neuroscience. 3 Credits. S
This course is designed to acquaint students with the Social Neuroscience approach as well as recent findings using this approach. The class will focus on particular social phenomena and (a) evaluate the utility of current social neuroscience research examining these phenomena and (b) consider future experimental designs using the Social Neuroscience approach to further inform our understanding of each phenomenon. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211.

PSYC 390. The Psychology of Aging. 3 Credits. S
Social, psychological, and economic adjustments required by aging; changes in cognition, role and personality necessitated by advancing age. Not open to students with credit in PSYC 691. Prerequisite: PSYC 104.

PSYC 399. Data 2: Foundations of Data Science. 3 Credits. S
Data science empowers its users to provide data-driven solutions to problems and questions in the world. This course provides foundational skill and knowledge behind this power. This knowledge and skill includes learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. (Same as ECON 399 and POLS 399.) Prerequisite: PSYC 199/POLS 199/ECON 199 or EECS 138; and PSYC 210 or MATH 365 or ECON 426 or POLS 306 or SOC 380 or MATH 101 or MATH 104 or MATH 115 or MATH 121.

PSYC 402. Study Abroad Topics in: _____, 1-6 Credits. S
This course is designed for the study of special topics in Psychology equivalent to courses at the 300 to 600 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

PSYC 410. Intimate Relationships. 3 Credits. S
A social psychological perspective on adult intimate relationships, examining friendship, dating, committed relationships, and the dissolution of committed relationships. Topics include romance, jealousy, self-disclosure, power, loneliness, and social support. Discussion of heterosexual and homosexual relationships, traditional forms (e.g., marriage) of relationships as well as alternative lifestyles (e.g., cohabitation) and gender-linked differences in relationships. (Same as WGSS 410.) Prerequisite: PSYC 104.

PSYC 412. Introduction to Motivation and Emotion. 3 Credits. S
An examination of contemporary issues, theories, and research in motivation and emotion. Prerequisite: PSYC 360 or PSYC 361, or consent of instructor.

PSYC 418. Introduction to Cognitive Science. 3 Credits. S
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PHIL 418, and SPLH 418.) Prerequisite: Consent of instructor.

PSYC 430. Cognitive Development. 3 Credits. S
A basic survey course in the development of thinking and understanding in normal children. The course will cover Piaget's theory and information processing theories at the advanced undergraduate level. Topics include perception, attention, learning, memory, language, problem solving, and individual differences from birth to the mid-teens. Prerequisite: PSYC 104 or ABSC 160.

PSYC 435. Psycholinguistics I. 3 Credits. S LFE
A detailed examination of issues in the processing of language. The course provides a survey of research and theory in psycholinguistics,
reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes are examined. (Same as LING 435.) Prerequisite: An introductory course in linguistics or consent of instructor.

**PSYC 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N**

This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primateology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, BIOL 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

**PSYC 460. Honors in Psychology. 1-2 Credits. S**

A seminar for juniors and seniors in the Honors Program in Psychology. Students who have been admitted to the Honors Program in Psychology may enroll for one credit for one or both semesters of their junior year and are required to enroll for two credits for both semesters in their senior year.

**PSYC 465. Stereotyping and Prejudice Across Cultures. 3 Credits. S**

This course covers a variety of theoretical views concerning the origins of stereotypes and the factors that maintain them, as well as how and when the revision of such beliefs take place. Analysis of various stereotypes (including gender and race) and the experience of prejudice across a variety of cultural contexts is examined. Many difficult social issues are discussed in depth. Prerequisite: PSYC 360 or PSYC 361; or consent of instructor.

**PSYC 468. Psychology of Women. 3 Credits. S**

A survey of the psychological theories about women; similarities and differences in the behavior of women and men; the effects of biological and social factors on the behavior of women and men; and issues of concern to women of different races, sexual orientations, ages, and so forth. (Same as WGSS 488.) Prerequisite: Any previously completed course in PSYC or WGSS.

**PSYC 469. Seminar: _____ 1-5 Credits. U**

Discussion of current problems in psychological theory and research. Prerequisite: PSYC 104.

**PSYC 470. Introduction to Contemporary Psychotherapies. 3 Credits. S**

Review of current psychotherapies with special references to their underlying philosophies, theories of personality, techniques, and effectiveness. Issues concerning the use of drugs in the treatment of mental disorders are also reviewed. Prerequisite: PSYC 104.

**PSYC 472. Psychology of Sleep and Dreaming. 3 Credits. S**

This course reviews recent evidence on the roles of dreaming and dreamless sleep. Psychological, developmental, personality, and social psychological aspects are considered. Prerequisite: PSYC 104.

**PSYC 480. Independent Study. 1-5 Credits. U**

Investigation of a special research problem or directed reading in an area not covered in regular courses. No more than 3 hours of PSYC 480 may be counted toward the minimum hours required for the major. Prerequisite: Consent of instructor.

**PSYC 481. Research Practicum. 1-5 Credits. U**

Guided participation in ongoing research programs to augment quantitative skills through direct practicum experience. No more than 3 hours of PSYC 481 may be counted toward the Psychology minor or the Psychology, Developmental Psychology, and Behavioral Neuroscience major requirements. Prerequisite: PSYC 200 or PSYC 201 or PSYC 210 or PSYC 211 or consent of instructor.

**PSYC 482. Sensation and Perception. 3 Credits. S**

Introduction to human sensory and perceptual capabilities. Topics include: sensory systems, perceptual development, and perceiving color, objects, space, movement, sound, speech, touch, smell, and taste as well as various perceptual illusions. Prerequisite: PSYC 104.

**PSYC 483. Undergraduate Internship in Psychology. 1-3 Credits. U**

Students conduct psychology focused fieldwork in an organization related to their professional/career goals. Credit hours are determined on the basis of 120 clock hours for 3 credit hours, 80 clock hours for 2 credit hours, and 40 clock hours for 1 credit hour. An internship plan (contract) is developed by the student in conjunction with the student’s academic adviser and signed off by the academic adviser and an authorized agent of the internship site. At the conclusion of the internship experience, the authorized agent of the internship site writes the academic adviser indicating that the student has met the goals of the internship plan and the hours required. No more than 3 hours of PSYC 483 may be counted toward the minimum hours required for the major. Prerequisite: Admission to the Psychology major.

**PSYC 484. Classroom to Career. 3 Credits. S**

Students who are preparing to enter the workforce are introduced to current challenges and trends in professional development and workforce psychology. In addition to discussion of interdisciplinary research centered around career management topics such as preventing burnout, recognizing and eliminating bias in interviews, or predictors of job satisfaction and productivity, emphasis is placed on the creation of a job dossier and tools to help bridge skills from the classroom and their place in an individuals’ career. Prerequisite: Junior or senior status.

**PSYC 492. Psychology and Social Issues. 3 Credits. S**

A study of psychological aspects of selected social issues in contemporary American society. Race relations and the civil rights movement. Political extremism. Public opinion and social change. Social psychological approaches to a variety of social problems. Prerequisite: PSYC 360 or 361, or consent of instructor.

**PSYC 499. Conceptual Issues in Psychology. 3 Credits. S**

This course examines classic issues in psychology—free-will and determinism, nature and nurture, the mind-body problem, approaches to human action, cultural influences on psychological theories, the evolution of intellectual paradigms, and inductive and deductive approaches to social scientific research—from multiple perspectives within psychology and related social sciences. Prerequisite: PSYC 104 or equivalent.

**PSYC 500. Intermediate Statistics in Psychological Research. 3 Credits. U**

A second course in statistics with emphasis on applications. Analysis of variance, regression, analysis, analysis of contingency tables; possibly selected further topics. Prerequisite: Grade of B- or better in PSYC 210 or PSYC 211.

**PSYC 502. Human Sexuality. 3 Credits. S**

An introduction to the field of human sexuality. Topics to be covered include sexual anatomy and physiology, fertilization, pregnancy, birth and
lactation, contraception, human sexual response, sexuality across the life cycle, love, marriage, alternatives to marriage, sexual orientation, sex differences in behavior, parenthood, sexually transmitted diseases, sex and the law, and sex education. (Same as WGSS 502.) Prerequisite: Any previous coursework in either WGSS or PSYC.

**PSYC 513. Behavioral Economics. 3 Credits.**
Decisions link our thoughts to our actions and as a result define who we are and who people think we are. This makes decision making a fundamental life skill. But, can we make better decisions? This course will introduce you to the science of decision making that has developed as scholars including biologists, economists, mathematicians, philosophers, psychologists, and others have sought to answer this very question. Over the course of the semester we will examine what we have learned so far such as how people predict and mispredict events, how people make decisions and how their decisions can be quite irrational from one perspective but simultaneously appear quite reasonable, how people bargain and why they sometimes choose to cooperate and other times not, and why negotiating can be so difficult. (Same as ECON 513.) Prerequisite: PSYC 104 or ECON 142; MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126.

**PSYC 521. Women and Violence. 3 Credits. S**
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. The nature, prevalence, causes, and consequences of violence against women are discussed. (Same as WGSS 521.) Prerequisite: PSYC 104.

**PSYC 533. The Psychology of Addictive Behaviors. 3 Credits. S**
The course will take an in-depth look at addiction processes using an interdisciplinary perspective. The course will cover processes that lead to the development of substance use disorders, as well as advanced topics in prevention and treatment. Addiction is a behavioral disorder, and the seminar will focus heavily on learning theory and conditioning processes that can yield problem substance use. Readings will be derived from a variety of sources, including both animal and human studies. This seminar is appropriate for graduate students from a variety of disciplines, as well as advanced undergraduate students who satisfy the prerequisite requirements. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in PSYC 823. Prerequisite: PSYC 104.

**PSYC 535. Developmental Psychopathology. 3 Credits. S**
A review of contemporary psychological and developmental disorders of children and youth. Course presents current models of psychopathology, classification systems, assessment methods, and treatment approaches designed for the individual, the family, and the community. Specific attention is given to age, gender, and cultural differences and similarities. Topics include: anxiety disorders, oppositional behavior disorders, physical/sexual abuse, learning disabilities, depression, chronic physical illness, and autism. (Same as ABSC 535.) Prerequisite: ABSC 160 or PSYC 333, or instructor permission.

**PSYC 545. Culture and Psychology. 3 Credits. S**
The course considers the relationship between culture and psyche. One theme throughout the course involves revealing the cultural grounding of psychological functioning. The second and complementary theme involves identifying the psychological processes involved in the phenomenon of culture. Prerequisite: PSYC 333, 334, 360 or 361 or consent of instructor.

**PSYC 566. Psychology and the Law. 3 Credits. S**
An application of psychological processes and concepts to the American legal system. Among the topics covered are the socialization of legal attitudes, opinions about the purposes of the criminal justice system and especially of prisons, the concept of "dangerousness," the nature of jury decision making, and the rights of prisoners, patients, and children.

**PSYC 570. Group Dynamics. 3 Credits. S**
A study of the processes underlying the dynamics of the group, including the observation of group phenomena and a consideration of their relation to research findings. Prerequisite: PSYC 360 or 361, or consent of instructor.

**PSYC 580. Research Lab. 1-5 Credits. S**
Supervised research under the guidance of a faculty member in the Department of Psychology. Students will be part of a collaborative laboratory environment, and will be involved in research design, data collection, and data analysis, and will take part in regularly scheduled laboratory meetings. Prerequisite: Permission of instructor.

**PSYC 590. Nonverbal Communication. 3 Credits. S**
Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems. (Same as COMS 590.) Prerequisite: COMS 356 or PSYC 210 or PSYC 211.

**PSYC 592. Psychological Significance of Physical Illness and Disability. 3 Credits. S**
A lecture course to help students become more aware of and responsive to the psychological needs of persons with physical illnesses or disabilities. Emphasis is upon the meanings of such conditions in individuals' lives and the effects of treatment and rehabilitation settings on psychological adaptation. Prerequisite: PSYC 104.

**PSYC 595. Eating and Weight Disorders. 3 Credits.**
This course is an intensive seminar in which students will critically examine up-to-date research and theoretical models on eating and weight disorders. Content will include diagnosis and assessment, as well as psychological, social, cognitive, biological, and "addiction" model influences/perspectives. Students will gain exposure to literature on treatment and prevention of eating disorders and obesity. Class will include critical discussion, brief lecture, and active-learning strategies to facilitate learning during class. Students will also participate in group work. Prerequisite: PSYC 350 or instructor permission.

**PSYC 598. Positive Psychology. 3 Credits. S**
An introduction to the core assumptions and research findings associated with human strengths and positive emotions. Also an exploration of interventions and applications informed by positive psychology in counseling and psychotherapy, and its application to school, work, family and other close relationships. (Same as EPSY 580.) Prerequisite: PSYC 104 or consent of instructor.

**PSYC 605. Health Psychology. 3 Credits. S**
Review of research and theory concerning the role of psychological factors in the development of physical illness and the contribution of psychologists to the treatment and prevention of physical illness. Prerequisite: PSYC 104.

**PSYC 620. Experimental Psychology: Sensation, Perception, and Cognition. 6 Credits. S**
Lectures and laboratory work on human sensory processes and how they result in perceptions of the environment. Experience is provided in designing and implementing research as well as in the skills necessary for statistical analysis, interpretation of data, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor.
PSYC 625. Experimental Psychology: Methods in Psychophysiology and Neuroscience. 6 Credits. S
Lectures and laboratory work on psychophysiology and neuropsychology research methods. Overview of psychophysiological tools to measure the central and peripheral nervous systems. Experience designing and implementing neuropsychology and psychophysiology research. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor.

PSYC 626. Adolescent Behavior and Development. 3 Credits. S
Impact of factors of social environment and physical growth upon psychological development from puberty to young adulthood. (Same as ABSC 626.) Prerequisite: PSYC 104, PSYC 333, or ABSC 160.

PSYC 630. Clinical Psychology. 3 Credits. S
The historical and empirical foundations of clinical psychology. Significant trends in theory, research, and social organization which have shaped clinical practice. A review of clinical practice. Prerequisite: PSYC 104.

PSYC 632. Advanced Child Behavior and Development. 3 Credits. S
An advanced course in child development that includes a survey of the field's principles and theoretical approaches, and current issues in research and practice. Topics will include: prenatal development, cognition and language, social-emotional development, socialization influences in childhood, developmental psychopathology, and social policies. (Same as ABSC 632.) Prerequisite: ABSC 160, PSYC 333, or instructor permission, or senior or graduate status.

PSYC 650. Statistical Methods in Behavioral and Social Science Research I. 4 Credits. S
Elementary distribution theory; t-test; simple regression and correlation; multiple regression and multiple correlation; curvilinear regression; logistic regression; general linear model. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 790 will have different course requirements. Prerequisite: A grade of B- or better in a beginning course in statistics (e.g., PSYC 210 or PSYC 211, MATH 365, POLS 306, COMS 356, SOC 380, or equivalent) is recommended, or consent of instructor.

PSYC 651. Anova and Other Factorial Designs. 4 Credits. S
Course covers one-way analysis of variance, linear trends, contrasts, post hoc tests; multi-way analysis of variance for crossed, blocked, nested, and incomplete designs; analysis of covariance; repeated measures analysis of variance; general linear model. Applications across the social, educational, and behavior sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 791 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 667. Factor Analysis. 4 Credits. S
This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 887 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 689. Conceptual Issues in Human Sexuality. 3 Credits. S
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 689.) Prerequisite: Any previously completed course in PSYC or WGSS.

PSYC 690. Seminar: ______. 1-5 Credits. U
Discussion of current problems in psychological theory and research. Prerequisite: PSYC 104 and sophomore status.

PSYC 691. The Psychology of Aging. 3 Credits. S
Social, psychological, and economic adjustments required by aging; changes in cognition, role and personality necessitated by advancing age. Not open to students with credit in PSYC 590. Prerequisite: PSYC 104 or consent of instructor.

PSYC 693. Multivariate Analysis. 4 Credits. S
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 893 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 694. Multilevel Modeling I. 4 Credits. S
Introduction to statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. Emphasis will be on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 894 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 696. Structural Equation Modeling I. 4 Credits. S
Introduction to statistical methods for modeling latent variables. Topics include a review of latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, and hierarchical CFA. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 896 will have different
PSYC 697. Longitudinal Data Analysis. 3 Credits. S
Reviews and contrasts various statistical models for the analysis of change. Course focuses on techniques to analyze longitudinal (repeated measures) data beyond the repeated-measures ANOVA framework. Applications across the behavioral and social sciences are emphasized. Students taking this course as PSYC 991 will have different course requirements. Prerequisite: PSYC 696 or equivalent, or consent of instructor.

PSYC 698. Bayesian Data Analysis. 3 Credits.
This course will provide a tutorial introduction to doing Bayesian data analysis. The course is intended to make advanced Bayesian methods accessible to all students in the behavioral and social sciences. During the course we will cover the fundamental of Bayesian methods and work from the simplest model up through hierarchical or multilevel models for all types of data from binary to continuous to count data. By the end of the course each student should be able to carry out their own Bayesian data analysis for nearly any question they might ask in the social and behavioral sciences. Open only to undergraduate students. Not open to students with credit in PSYC 797. Prerequisite: PSYC 650 or equivalent, or consent of instructor.

PSYC 699. Community Data Lab. 3 Credits. S
Data science empowers its users to provide data-driven solutions to problems and questions in the world. This course provides students an opportunity to work on real-world problems that come from local and state governments, health care, education, and small businesses across the state of Kansas. Students will gain experience working from start to finish on delivering data-driven solutions for these problems. In doing so, students will further develop knowledge and skills in learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. Students will also gain professional skills learning to work with different organizations across the state. (Same as POLS 699)
Prerequisite: PSYC/POLS/ECON/SOC 199; EECS 138; PSYC 210 or MATH 365 or ECON 426 or POLS 306 or SOC 380; PSYC/POLS/ECON 399; MATH 101 or MATH 104; or departmental approval.

PSYC 704. Research Practicum in Clinical Child Psychology. 3 Credits.
This course provides students in the Clinical Child Psychology Program with the opportunity to enhance and consolidate their research activities by fulfilling one of the elective cluster course requirements. This practicum involves a contract with a research advisor and the program director. The contract includes definable products and dates for completion to prepare research for submission for publication, develop a grant proposal, or conduct additional research project independent of other requirements in the program. The course is not to be taken as an overload, but is to be part of a full-time course schedule. May be repeated. (Same as ABSC 704.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 705. Special Topics in Clinical Child Psychology: ______. 3 Credits.
A course offering detailed discussion of the literature and research methods of a special topic within clinical child and pediatric psychology. Topic and instructor may change by semester and will be announced in the Schedule of Classes. May be repeated. (Same as ABSC 706.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 723. Advanced Cognitive Psychology. 3 Credits.
Advanced cognitive psychology reviewing theories of pattern recognition, attention, working memory, language comprehension and problem solving. Emphasis will be placed upon the application of these theories to real-life situations. Prerequisite: PSYC 104 and six additional credit hours in psychology, or permission of the instructor.

PSYC 725. Cognitive Neuroscience. 3 Credits.
A survey of the critical issues within cognitive and behavioral neuroscience. The course will provide information about neuronal physiology, functional neuroanatomy, and psychophysiological research methods. Human cognition and the neurophysiology that subserves the primary cognitive functions will be discussed.

PSYC 735. Psycholinguistics I. 3 Credits. LFE
A detailed examination of issues in the processing of language. The course will provide a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processing will be examined. (Same as LING 735.)

PSYC 737. Psycholinguistics II. 3 Credits.
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. (Same as LING 737.) Prerequisite: PSYC 735/LING 735 or consent of instructor.

PSYC 774. Advanced Social Psychology I. 3 Credits.
First semester of a two-semester course. Designed to provide a thorough background in social psychology and to motivate a continuing exploration of theoretical problems and issues in the field. Combines examination of historical development of theories and methods in social psychology with analysis of theoretical and methodological approaches to a variety of contemporary topics.

PSYC 775. Advanced Social Psychology II. 3 Credits.
A continuation of PSYC 774.

PSYC 780. Research Lab. 1-5 Credits. S
Supervised research under the guidance of a faculty member in the Department of Psychology. Students will be part of a collaborative laboratory environment, and will be involved in research design, data collection, and data analysis, and will take part in regularly scheduled laboratory meetings. Prerequisite: Permission of instructor.

PSYC 782. Research Methods in Child Language. 3 Credits.
A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as CLDP 782 and LING 782.)

PSYC 787. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences; human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, COMS 787, and SOC 767.)

PSYC 790. Statistical Methods in Psychology I. 4 Credits.
Elementary distribution theory; t-test; simple regression and correlation; multiple regression and multiple correlation; curvilinear regression; logistic regression; general linear model. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications
are taught. Prerequisite: A beginning course in statistics and graduate standing, or consent of instructor.

PSYC 791. Statistical Methods in Psychology II. 4 Credits.
Continuation of PSYC 790. One-way analysis of variance, linear trends, contrasts, post hoc tests; multi-way analysis of variance for crossed, blocked, nested, and incomplete designs; analysis of covariance; repeated measures analysis of variance; general linear model. Applications across the social, educational, and behavior sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

PSYC 792. Data Science for the Social and Behavioral Sciences. 3 Credits.
Data science empowers its users to provide data-driven solutions to problems and questions in the world. This course provides foundational skills and knowledge behind this power. This knowledge and skillset include learning to formulate effective questions to answer with data, computer programming, data management and wrangling, exploratory data analysis and visualization, statistical inference and prediction, data-driven decision making, and communication. Different offerings of this course may focus on different skills and use different programming languages, so check with the instructor. Prerequisite: PSYC 790 or equivalent graduate level course introductory statistics course.

PSYC 797. Bayesian Data Analysis. 3 Credits.
This course will provide a tutorial introduction to doing Bayesian data analysis. The course is intended to make advanced Bayesian methods accessible to all students in the behavioral and social sciences. During the course we will cover the fundamental of Bayesian methods and work from the simplest model up through hierarchical or multilevel models for all types of data from binary to continuous to count data. By the end of the course each student should be able to carry out their own Bayesian data analysis for nearly any question they might ask in the social and behavioral sciences. Not open to students with credit in PSYC 698. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

PSYC 799. Proseminar in Child Language. 2 Credits.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, CLDP 799, LING 799, and SPLH 799.)

PSYC 800. Experimental Psychology: _____ . 3 Credits.
An advanced survey of theory and research in a selected area of experimental psychology. Continual enrollment for four semesters is required of entering graduate students in experimental psychology. Open to other students with graduate standing in psychology or a closely related field. May be repeated with permission.

PSYC 803. Fundamentals of Psychological Assessment and Intervention with Children. 3 Credits.
Lecture and supervised experience covering the theoretical and empirical literature on assessment and intervention methods for children, adolescents, and families. Students will learn and demonstrate evidence-based clinical interviewing skills, behavioral observation techniques, risk assessment techniques, therapeutic communication approaches, strategies for providing assessment feedback to families, and ethical principles related to the provision of assessment and psychotherapy (including client file and resource management.) The course requires interaction with clinical populations and communication with referral sources. (Same as ABSC 803.) Prerequisite: Graduate student in clinical child psychology program.

PSYC 805. History of Psychology. 3 Credits.
A historical survey of basic concepts and theories in psychology with emphasis on their relationship to contemporary problems in theory.

PSYC 809. Professional Issues: Clinical Child Psychology. 1 Credits.
Consideration of special problems confronting the child and family oriented scientist-practitioner, and in the development of a professional identity. Topics include critical issues, including ethical, legal, cultural, empirical, and clinical aspects of research and practice. May be repeated. (Same as ABSC 809.) Prerequisite: Graduate standing in clinical child psychology.

PSYC 810. History and Ethics in Psychology. 3 Credits.
A historical survey of basic concepts and theories in psychology with emphasis on their relationship to contemporary issues. Examination of historical and contemporary code of ethics and its application to the conduct of clinical psychologists.

PSYC 811. Achievement and Intellectual Assessment in Clinical Child Psychology. 3 Credits.
Course covers the basic theory, research, administration, and reporting of psychological assessment of development, intelligence, and achievement for children, adolescents, and adults within cultural and developmental contexts. The range of psychological instruments examined includes, for example, WIAT, K-ABC, W-J, S-B, WISC, WAIS, and WPPSI. (Same as ABSC 811.) Prerequisite: Graduate student in clinical child psychology.

PSYC 812. Behavioral and Personality Assessment of Children. 3 Credits.
Lecture, laboratory, field work, and supervision. Theory and applications in the psychological evaluation of children with standardized assessment techniques. The administration, scoring, interpretation, and reporting of behavioral and personality functioning in children. (Same as ABSC 812.) Prerequisite: Graduate standing in clinical child psychology.

PSYC 815. Design and Analysis for Developmental Research. 3 Credits.
Coverage of the philosophy and basic principles of group-design research, with a special emphasis on designs that are appropriate for developmental studies. Designs for both experimental and quasi-experimental research are covered, and appropriate statistical procedures are presented concomitantly with the designs. Individual-difference analyses and statistical control issues are also addressed.

PSYC 818. Experimental Research Methods in Social Psychology. 3 Credits.
Systematic discussion of the techniques of research in social psychology, with practice in the utilization of selected methods. Prerequisite: One course in social psychology in addition to introductory social psychology.

PSYC 819. Field and Evaluation Research Methods in Social Psychology. 3 Credits.
Basic principles and practices of field methods in basic and applied research in social psychology and related fields; relationships between field and laboratory studies; special emphasis on survey and evaluation research methods and study designs; client and respondent relationships; research and public policy.

PSYC 821. Women and Violence. 3 Credits.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. Research on the nature, prevalence, causes, and consequences of violence against women is discussed. (Same as WGSS 821.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

PSYC 823. The Psychology of Addictive Behaviors. 3 Credits.
The course will take an in-depth look at addiction processes using an interdisciplinary perspective. The course will cover processes that lead to the development of substance use disorders, as well as advanced topics in prevention and treatment. Addiction is a behavioral disorder, and the seminar will focus heavily on learning theory and conditioning processes that can yield problem substance use. Readings will be derived from a variety of sources, including both animal and human studies. This seminar is appropriate for graduate students from a variety of disciplines, as well as advanced undergraduate students who satisfy the prerequisite requirements. This course is offered at the 500 and 800 level with additional assignments at the 800 level. Not open to students with credit in PSYC 533. Prerequisite: PSYC 104 or equivalent.

PSYC 825. Social Development. 3 Credits.
A lecture and discussion course in social development. It includes such topics as theoretical approaches to the study of social development, as well as the literature on family processes, peer relations, aggression and prosocial behavior, child abuse and neglect, family violence, child care, and the media. (Same as ABSC 825.) Prerequisite: A course in child psychology or development.

PSYC 832. Clinical Health Psychology: Health Promotion and Disease Prevention. 3 Credits.
An overview of the field of health psychology as applied to health promotion and disease prevention. Content areas include history and current research regarding behavioral and psychosocial risk factors for disease, as well as empirically supported assessment and therapeutic techniques for risk factor reduction and health promotion. Prerequisite: Graduate student in psychology or health-related fields, or permission of instructor.

PSYC 833. Clinical Health Psychology: Acute and Chronic Illness. 3 Credits.
An overview of the field of health psychology as applied to acute and chronic illness in adult, adolescent, and child populations. Content areas include psychological aspects of acute and chronic illness, including relevant empirically supported assessment and intervention strategies, adherence to medical regimens, pain, and enhancement of the psychologist's role in medical settings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

PSYC 834. Clinical Health Psychology: Physical Aspects of Health and Disease. 3 Credits.
An overview of physical manifestations of health and disease. Content areas include overview of anatomy and physiology of each body system, description of how deviations form normal anatomical development and physiological function result in common disorders, methods for distinguishing psychological from organic etiologies, indications of side effects of medications for common disorders, and description of roles of key members of health care team members. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

PSYC 835. Clinical Practicum IV: Health. 3 Credits.
Supervised assessment and treatment of individuals and families within a medical setting, as well as multidisciplinary consultation. Inpatient and outpatient clinical health psychology rotations may include pediatrics, oncology, pain, rehabilitation, and other health psychology related fields. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 970 and graduate student in clinical health psychology specialty.

PSYC 836. Clinical Practicum V: Health. 3 Credits.
Continuation of PSYC 835. Prerequisite: Graduate student in clinical health psychology specialty.

PSYC 838. Assessment and Management of Chronic Pain Across the Life Span. 3 Credits.
Focuses on chronic pain affecting a person's life span from childhood to older adults. Topics include traditional versus modern biopsychosocial models along with treatments/measurements of chronic pain. In addition to medical and non-medical (mainly cognitive-behavioral) treatments for chronic pain. Also discussed will be experimental designs/determining significance in pain research and ethical/policy issues related therein. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

PSYC 839. Palliative Care in Health Psychology. 3 Credits.
Based on the biopsychosocial model, this course focuses on the current practice of palliative care in community and hospital settings by health care professionals. Classes will be discussion based, centered on current issues and controversies in care of the chronically ill and dying. Recent research will be highlighted, as will cultural perspectives on death. Students will be expected to identify applicable literature for presentation and class discussion, along with assigned readings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor.

PSYC 840. Psychology of Women's Health. 3 Credits.
A seminar devoted to examination of psychosocial and behavioral factors in women's health. Content areas include women and the health care system, social roles and health, gender differences, and similarities in morbidity and mortality, gynecologic health, chronic diseases, and health-related behaviors. Prerequisite: Graduate student in psychology or health-related field, or by permission of instructor.

PSYC 841. Stress and Coping. 3 Credits.
Theories and research on conceptualization, assessment, and effects of stress. Focus on coping processes and other determinants of adjustment to stressful conditions. Discussion of psychological interventions for managing stress and trauma. Prerequisite: Graduate student in psychology or related fields.

PSYC 842. Specialized Health Psychology Practicum. 1-3 Credits.
Specialized advanced practicum in clinical health psychology, with an area of emphasis mutually defined by student and instructor. Prerequisite: Consent of instructor.

PSYC 844. Mental Health and Aging. 3 Credits.
Reviews recent research and application in the field of mental health and aging. Theoretical perspectives appropriate for understanding mental health issues with increased age are discussed. The epidemiology, assessment, diagnosis, and treatment methods associated with a variety of mental health conditions are surveyed. The community mental health resources available for older adults are discussed as well as practically-related issues such as evaluations of functional independence and competency among older adults. Prerequisite: Graduate student in psychology or related health field, or permission of instructor.

PSYC 845. Impression Formation and Interpersonal Behavior. 3 Credits.
Intensive investigations of the processes involved in impression formation and of the effects of established impressions upon interpersonal communications. (Same as COMS 835.) Prerequisite: PSYC 670 or COMS 535.

PSYC 846. Practicum in Clinical Child Psychology I. 1-3 Credits.
Introductory practicum experience for the Clinical Child Psychology Program. Orientation to psychological evaluation and treatment of
children, adolescents, and their families and initial development of professional self-assessment skills. Students acquire specific clinical competencies through shadowing cases, assisting with interpretation of test of intelligence and academic achievement, conducting behavioral observations in field settings, and performing co-therapy of cases presenting to the KU Child and Family Services Clinic. May be taken in more than one semester. (Same as ABSC 846.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 847. Practicum in Clinical Child Psychology II. 1-3 Credits.
Intermediate practicum experience for the Clinical Child Psychology Program. Development of specific competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire specific clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic. Students develop ability to identify specific treatment goals and select therapeutic interventions that are conceptually congruent with clients' presenting problems and are based on sound empirical evidence. Students also develop the ability to integrate and synthesize test results, interview material, and behavioral observations into coherent case conceptualizations. May be taken in more than one semester. (Same as ABSC 847.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 848. Clinical Practicum VI: Health. 3 Credits.
Intensive clinical psychology practice, including group and individual supervision that may be taken either through Clinical Psychology or an approved site outside of the university. Focus is on the acquisition and demonstration of advanced therapy skills with a focus on acquiring core Health Psychology competencies. Graded on a satisfactory/unsatisfactory basis. Prerequisite: PSYC 835 and PSYC 836 and graduate student in clinical health psychology specialty.

PSYC 849. Clinical Practicum VII: Health. 3 Credits.
Continuation of PSYC 848. Graded on a satisfactory/unsatisfactory basis. Prerequisite: PSYC 848 and graduate student in clinical health psychology specialty.

PSYC 850. Assessment I: Foundations of Psychological Assessment. 3 Credits.
Introduction to the history, methods and theory underlying psychological assessment techniques and methods. Students learn to administer, score, and interpret mental status exams and intelligence tests for children, adolescents and adults. Structured diagnostic assessments are introduced and practiced. Psychological report writing is introduced and practiced. The psychometric theory underlying the construction and validation of personality assessment instruments is reviewed. Prerequisite: Graduate student in clinical psychology or consent of instructor.

PSYC 855. Assessment II: Integrative Psychological Assessment. 3 Credits.
Lecture, laboratory and field work. Students learn to administer, score and interpret various personality assessment instruments. Students apply skills acquired in previous coursework to write integrated psychological assessment reports based on anamnesis, structured interview data, intelligence tests, and both objective and projective personality assessment instruments. Prerequisite: PSYC 850 or consent of instructor.

PSYC 860. Affective Science. 3 Credits.
An in-depth analysis of current research and theory in affective bases of psychological science. Emphasis will be placed on basic research on emotion, culture, and psychophysiology using a broad range of experimental, psychophysiological, and neural methods to test theories about affective psychological mechanisms underlying human behavior. Prerequisite: Graduate student in psychology or health-related fields.

PSYC 870. Cognitive Development. 3 Credits.
A lecture/discussion course in cognitive development. The course will contrast the theory and research of Jean Piaget and his followers, with an information processing or cognitive psychology approach to issues. Topics include development of perception, attention and information getting; memory and metamemory; problem solving; discrimination learning and concept formation; and individual differences in cognitive styles and strategies. Prerequisite: A course in child psychology or development, a course in cognitive psychology, or consent of instructor.

PSYC 881. Proseminar in Quantitative Behavioral and Social Sciences. 1 Credits.
This course is an open forum discussion of issues, topics, and presentations in quantitative behavioral and social sciences. The course can be repeated for credit and is open to any graduate student in any discipline across the behavioral and social sciences.

PSYC 887. Factor Analysis. 4 Credits.
This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

PSYC 888. Diversity Issues in Clinical Psychology. 3 Credits.
Review of individual differences pertaining to culture, ethnicity, race, gender, sexual orientation, age, etc., as these have an impact upon theory, research, assessment, and treatment issues in clinical psychology. (Same as ABSC 888.) Prerequisite: Graduate status in clinical psychology, or instructor permission.

PSYC 889. Conceptual Issues in Human Sexuality. 3 Credits.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 889.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

PSYC 890. Foundations of the Mind. 3 Credits.
Advances in cognitive psychology have illuminated the way in which we understand mind and mental processes and have the power to affect how we conduct our lives as moral beings (e.g., Are human beings alone in the animal kingdom in possessing minds?). In this graduate course, we will cover key historical and social events that shaped the field; when and how cognitive psychology became a science; and future directions of studying the mind, especially in light of cognitive neuroscience. Students will analyze and critically evaluate cognitive psychological theory, empirical research, and practice in a historical context, as well as develop ideas, critiques, and conclusions of their own on the accomplishments and prospects of the science of cognitive psychology. Readings and discussion include an analysis of significant theoretical, historical, and empirical work of topics in cognitive psychology, as well as the cognitive and brain sciences more generally.
PSYC 893. Multivariate Analysis. 4 Credits.
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

PSYC 894. Multilevel Modeling. 4 Credits.
Statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. There will be a heavy emphasis on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the social, educational, and behavior sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

PSYC 896. Structural Equation Modeling I. 4 Credits.
Introduction to statistical methods for modeling latent variables. Topics include a review latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, Hierarchical CFA, and Multi-trait Multi-Method SEM. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor.

PSYC 897. Master’s Thesis in Clinical Child Psychology. 1-10 Credits.
Supervised research experience completing thesis leading to master’s degree. (Same as ABSC 897.)

PSYC 898. Proseminar: Professional Issues in Clinical and Health Psychology. 1 Credits.
Discussion of current theoretical, empirical, and applied issues in clinical and health psychology involving students, faculty, guest speakers. Prerequisite: Graduate student in clinical psychology.

PSYC 899. Thesis. 1-10 Credits.
Thesis hours. Graded on a satisfactory progress/limited progress/no progress basis.

PSYC 903. Proseminar in Social Psychology. 1 Credits.
A series of research talks on topics relevant to social and personality psychology featuring different weekly speakers from inside and outside the university. Graded on a satisfactory/unsatisfactory basis.

PSYC 905. Psychopathology in Children. 3 Credits.
Diagnosis and treatment of psychological problems in childhood and adolescence. Preference given to graduate students in child clinical psychology, school psychology, and counseling psychology. (Same as ABSC 905.) Prerequisite: Fifteen hours of graduate credit in psychology or consent of instructor.

PSYC 925. Seminar in Cognitive, Affective, and Social Bases of Psychology. 3 Credits.
Integrative examination of foundations and contemporary issues in the cognitive, affective, and social bases of psychological science. Review of the historical development of psychological theories and research in cognitive, affective, and social aspects of behavior, and examination of recent developments and contemporary trends in these areas. Topics include mood, emotion, and emotion regulation, memory, attention, perception, decision-making, group relations, attributions, discrimination, and attitudes. Prerequisite: Graduate standing in clinical or counseling psychology, or consent of instructor.

PSYC 943. Advanced Practicum in Clinical Child Psychology III. 1-3 Credits.
Advanced practicum experience for the Clinical Child Psychology Program. Development of advanced competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., formal case presentation), and modeling of clinical competencies for junior students. Students will demonstrate the ability to implement empirically derived therapeutic interventions in consideration of individual differences, cultural values, and individual preferences. Students in external practicum sites will demonstrate an understanding of evidence-based models of consultation and provision of consultation to care providers in professional contexts. May be taken in more than one semester. (Same as ABSC 943.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 944. Advanced Practicum in Clinical Child Psychology IV. 1-3 Credits.
Advanced practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies in assessment, intervention, and consultation with children, adolescents, and their families through didactics, field experience, and supervision in the semester(s) prior to required clinical internship. Students demonstrate advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., integrated case presentation), and modeling of clinical competencies for junior students. Course requirements include the development of portfolios for demonstration of clinical competencies and application to clinical internships. May be taken in more than one semester. (Same as ABSC 944.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

PSYC 946. Theories and Methods of Psychotherapy. 3 Credits.
Comparative examination and analysis of major theories and approaches to psychotherapeutic interventions, core principles of therapeutic change, scientific approaches to establishing treatment efficacy, current intervention issues. Prerequisite: Nine hours in graduate clinical psychology or consent of instructor.

PSYC 947. Advanced Practicum in Clinical Child Psychology V. 1-5 Credits.
Specialized practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies related to supervision and consultation in clinical psychology. With faculty supervision, students will develop and demonstrate the ability to provide effective supervision to less advanced students in the program in selected cases appropriate to the service setting. Further development of advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum, and modeling of clinical competencies for junior students. May be taken in more than one semester. (Same as ABSC 947.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.
PSYC 950. Clinical Supervision and Consultation: Theory & Research. 1 Credits.
Lecture, readings, and discussion of theory and research related to the practices of clinical supervision and consultation. Developmental and competency based approaches to supervision with exposure to other approaches. Professional issues, ethics, and multicultural aspects of supervision and consultation. Prerequisite: Previous or concurrent enrollment in PSYC 969 or consent of instructor.

PSYC 951. Clinical Supervision Practicum. 1-3 Credits.
Fieldwork in supervision under direction of instructor. Practice in supervision of clinical work, assessment, psychotherapy, and documentation. Prerequisite: Previous or concurrent enrollment in PSYC 950 and PSYC 969, or consent of instructor.

PSYC 955. Close Relationships and Adult Attachment: Theory, Research, and Current Controversies. 3 Credits.
Review of attachment theory literature and the research it has generated in clinical developmental, personality, and social psychology. The course will allow discussion of a wide range of issues including the evolution of behavioral systems that underlie close human relationships, the developmental roots of relational styles and affect-regulation processes, the role of mental representations in interpersonal behavior, and some of the attachment and close relationship processes involved in good and poor mental health. Prerequisite: Graduate standing or consent of instructor.

PSYC 956. Social Neuroscience. 3 Credits.
Acquaint students with the Social Neuroscience approach as well as recent findings using this approach. The course will focus on particular social phenomena and (a) evaluate the utility of current social neuroscience research examining these phenomena and (b) consider future experimental designs using the Social Neuroscience approach to further inform our understanding of each phenomenon. After being acquainted with foundational concepts, students will analyze findings in a number of core content domains (including emotions, emotion regulation, self, stereotyping, attitudes and beliefs, social decision making, cooperation, close relationships), focusing on neuroscience's contribution beyond traditional methods. Prerequisite: Graduate standing or consent of instructor.

PSYC 960. Advanced Psychopathology. 3 Credits.
Review of current nosology of adult psychopathological syndromes emphasizing development of diagnostic skills. Critical survey of recent research and theory related to the etiology, course, prognosis, and treatment of adult psychopathological conditions. Prerequisite: Graduate student status in clinical psychology, clinical child psychology, or counseling psychology.

PSYC 961. Biological Foundations of Psychopathology. 3 Credits.
A review of fundamental topics in the neurosciences and their relevance to selected psychopathological disorders. The fundamental topics are taken from genetics, neuroanatomy, neurophysiology, and neurochemistry. The disorders include schizophrenia, depression, anxiety disorders, Alzheimer's disease, Parkinson's disease, and Huntington's disease. Prerequisite: Graduate student in clinical psychology or consent of instructor.

PSYC 963. Clinical Child Psychology Internship. 1 Credits.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by qualified clinical child psychology faculty and field staff clinicians. Required of all clinical child psychology program students. An intensive guided experience in application of clinical child psychology theory, methods, and practices. Integrates scientific and clinical aspects of field.

(Same as ABSC 963.) Prerequisite: Completion of Ph.D. comprehensive examinations, graduate standing in clinical child psychology, and permission of clinical child psychology faculty.

PSYC 964. Clinical Practicum I. 3 Credits.
Lecture, laboratory and field work, and supervision appointment. Psychological evaluation and treatment of individuals, couples, families, and groups; supervised, progressive experience in psychological treatment and in the clinical evaluation of intellectual, personality, and social functioning. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: Graduate student in clinical psychology program.

PSYC 965. Clinical Practicum II. 3 Credits.
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964 or permission of instructor.

PSYC 966. Clinical Practicum III. 1-3 Credits.
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964 or permission of instructor.

PSYC 968. Research Methods in Clinical Psychology. 3 Credits.
Systematic consideration of research methods in clinical psychology including identification of a research problem, selection of the research design and assessment strategies, and methods of evaluating the results. The principles, pitfalls, artifacts, biases, and sources of controversy in research in this area are also covered. Prerequisite: Graduate standing in clinical or counseling psychology.

PSYC 969. Clinical Practicum IV. 3 Credits.
Lecture, laboratory, field work, and supervision appointment. Advanced psychological treatment of the individual, couple, family, and group client; supervised, progressive experience in the clinical application of psychotherapeutic treatment methods with emphasis on the use of empirically supported interventions where possible. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 966 or consent of instructor.

PSYC 970. Clinical Practicum V. 3 Credits.
A continuation of PSYC 969. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 969 or consent of instructor.

PSYC 971. Essentials of College Teaching. 1 Credits.
This course introduces the essentials of learning and teaching to graduate students who are or plan to be teaching in a higher education setting. Students will learn evidence-based, student-focused instruction methods that are necessary for student success. This course emphasizes theoretical and practical concepts important to college teaching, including creating a supportive learning environment, facilitating active learning, motivating students, and developing inclusive teaching strategies.

PSYC 974. Clinical Psychology Internship. 1-3 Credits.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by clinical psychology faculty and field staff clinical psychologists. Required of all clinical psychology program students. An intensive guided experience in the application of clinical psychology theory, methods, and practices. An emphasis upon the relationships between scientific and clinical functions. Integrations between research and clinical practice. Prerequisite: Completion of Ph.D. comprehensive examinations and consent of clinical psychology faculty.

PSYC 975. Professional and Ethical Problems in Clinical Psychology. 3 Credits.
Interprofessional relationships, case security, legal aspects, ethical code of practice, clinic administration, and problems in the clinical practice of
psychology. Issues involving ethics in research will also be explored. Prerequisite: Consent of instructor.

**PSYC 976. Therapeutic Interventions with Children. 3 Credits.**
Clinical approaches to the therapeutic treatment of children with special emphasis on research findings and laboratory (practicum) experience. A survey of relationship therapies, operant strategies, system approaches, parent education and play therapy by the right therapist for a specific child with a particular problem. (Same as ABSC 976.) Prerequisite: Instructor permission.

**PSYC 977. Specialized Clinical Practicum. 1-4 Credits.**
Lecture; laboratory and field work, and supervision appointment.
Specialized psychological services for the evaluation and/or treatment of the individual client or the group or the institution. Investigation of and experience in a special practicum area not covered in regular courses. Prerequisite: Students must consult with members of the clinical faculty and propose an acceptable project in advance of enrollment.

**PSYC 980. Special Problems in Psychology. 1-5 Credits.**
Investigation of a special research problem or directed reading in an area not covered in regular courses. Prerequisite: Consent of instructor.

**PSYC 981. Advanced College Teaching. 1 Credits.**
This course extensively explores learning and teaching in a higher education setting, and is intended for graduate students who are or plan to be teaching in a higher education setting. Students will learn advanced evidence-based, student-focused instruction methods that will enhance college student learning, development, and identity. This course considers sophisticated theoretical and practical concepts important to college teaching, including designing an engaging course, improving students' cognitive skills, cultivating student autonomy and purpose, creating meaningful assessments, and understanding the role of teaching within the professoriate. Prerequisite: PSYC 971 recommended.

**PSYC 982. Issues in Scientific Conduct. 3 Credits.**
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as CLDP 982 and SPLH 982.)

**PSYC 986. Interprofessional and Integrated Behavioral Health Care. 3 Credits.**
Overview of current interprofessional care models in primary care. Review integrated behavioral health care approaches to common mental health disorders and approach to lifestyle issues, such as smoking, exercise and poor sleep, and how they impact health. Learn how medical and behavioral health services come together within primary care at an interprofessional level to deliver health care. Review research emerging on integrated and interprofessional care models. Prerequisite: Graduate student in psychology, health related field, or permission of instructor.

**PSYC 991. Longitudinal Data Analysis. 3 Credits.**
Reviews and contrasts various statistical methods for the analysis of change. Course focuses on various techniques to analyze longitudinal (repeated-measures) data beyond the repeated-measures ANOVA framework. Techniques covered included latent change scores, latent difference scores, individual-differences modeling of latent residual and change scores, intra-individual differences modeling (e.g., growth curve, mixed modeling) and growth mixture modeling. Applications across the behavioral and social sciences are emphasized. Prerequisite: PSYC 896 or equivalent, or consent of instructor.

**PSYC 993. Seminar: _____ 1-5 Credits.**

**PSYC 998. Doctoral Dissertation in Clinical Child Psychology. 1-10 Credits.**
Research experience making original contribution to literature in clinical child psychology. (Same as ABSC 998.)

**PSYC 999. Dissertation. 1-12 Credits.**
Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis.

**Public Affairs & Adm, School Courses**

**LWS 330. Introduction to Law & Society. 3 Credits. S**
Offers an introduction to the interdisciplinary field of law and society. Surveys the role of law in social processes and the influence of these processes on law, and introduces alternative theoretical perspectives on these processes.

**LWS 332. Methods in Law and Society. 3 Credits. S**
Surveys the various methods used in law & society research and prepares students to be sophisticated readers of basic socio-legal research, capable of evaluating the quality of the research design and methods. Prepares students to participate as research assistants in original studies.

**LWS 333. The Pursuit of Rights: Law, Democracy & Power. 3 Credits. S**
Examines how law and legal norms, particularly rights, support social and political institutions yet also may be used to challenge these institutions and foster change. Particularly examines the role of law in supporting but also challenging hierarchies of race, ethnicity and gender. Surveys major studies of these processes both domestically and across the globe. Prerequisite: LWS 330 or permission of the instructor.

**LWS 443. Theoretical Foundations of Law & Society. 3 Credits. S**
This course examines classic texts from institutional, functional, and economic theories of law that have served as the basis for Law & Society research. It then considers the continued development of those classical theories to make sense of important current social and legal problems. Students will practice using theory to make sense of puzzling empirical patterns, and developing theoretical explanations of their own. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in LWS 643 or LWS 743. Prerequisite: LWS 330.

**LWS 494. Topics in Law & Society: _____ 3 Credits. U**
Study of selected topics in law and society. Course may be repeated for credit if content varies. Not open to students with credit in LWS 694 or LWS 794 if the topic is the same. Prerequisite: LWS 330.

**LWS 691. Internship in Law & Society. 1-3 Credits. S**
Designed to provide law & society students an applied learning experience in a relevant public, non-governmental, or nonprofit organization. Students are required to critically reflect on their experience through a variety of academic assignments throughout their internship experience. Prerequisite: LWS 330 and LWS 332, and permission of instructor.

**LWS 699. Capstone in Law and Society. 3 Credits.**
Integrates learning across the Law & Society curriculum with an applied, original research experience. Class topics rotate depending on faculty research agenda and current policy foci. Students gather and analyze data throughout the class, and present their final work to a variety of audiences. The product is an original research presentation that advances knowledge. Prerequisite: LWS 330 and LWS 332.

**LWS 743. Theoretical Foundations of Law and Society. 3 Credits.**
This course examines classic texts from institutional, functional, and economic theories of law that have served as the basis for Law & Society research. It then considers the continued development of those classical theories to make sense of important current social and legal problems. Students will practice using theory to make sense of puzzling empirical patterns, and developing theoretical explanations of their own. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in LWS 443. Prerequisite: Graduate student standing or faculty approval.

LWS 794. Topics in Law & Society: ______. 3 Credits.
Study of selected topics in law and society. Course may be repeated for credit if content varies. Not open to students with credit in LWS 494 if topic is the same. Prerequisite: Graduate student standing or faculty approval.

Public Affairs & Adm, School Courses

PUAD 177. First Year Seminar: _____. 3 Credits. SF
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in public administration. May not contribute to major requirements in public administration. First-year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: Open to Freshmen only (less than 30 hours).

PUAD 305. Introduction to Project Management. 3 Credits.
An exploration of the technical aspects of project management and the human aspects of project leadership. The course integrates conceptual approaches with practical applications of knowledge and skill sets. The course addresses the Project Management Body of Knowledge (PMBOK—as created by the Project Management Institute) and project leadership competencies including leading, communicating, negotiating, problem solving, and influencing. Not available to students with credit in PUAD 407 and 607.

PUAD 330. Introduction to Public Administration. 3 Credits. S
Introduction to administration, public policy and policy makings is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as POLS 390.) Prerequisite: POLS 110.

PUAD 331. Introduction to Public Administration, Honors. 3 Credits. S
Introduction to administration, public policy and policy making, for honors students, is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as POLS 391.) Prerequisite: POLS 110.

PUAD 332. Quantitative Methods for Public Administration. 3 Credits. S
Focuses on building the quantitative analysis skills of students in public administration. Students learn basic and intermediate statistics, and methods of data analysis and interpretation. Students gain exposure to the uses of data in public organizational settings.

PUAD 333. Hard Choices in Public Administration: _____. 3 Credits. S
Focuses on some of America’s most vexing public policy challenges and emphasizes the political context of difficult choices. Course examines models of decision-making and the process of policy analysis. Students learn how to apply the tools of policy analysis to make policy judgments. Prerequisite: PUAD 330 or PUAD 331.

PUAD 401. Administration of Justice. 3 Credits. S
Examines the administration of justice and focuses on differential and discriminatory treatment in policing, criminal prosecutions, trials, sentencing, or imprisonment. Also considered are the basis and impact of racial profiling, harassment, arbitrary detention, and abusive treatment of members of racial and ethnic groups, immigrants, and/or other vulnerable groups by law enforcement, and disparate treatment by prosecutors and the courts. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 601 or PUAD 701.

PUAD 402. Diversity and Social Equity in Public Administration. 3 Credits. S
Analyzes diversity and leadership in public and private institutions along ethnic, racial, and gender lines and the challenges of the facilitation of open dialogue on diversity. Examines the political, historical, social, and economic reasons why Americans of different ethnic, racial, and gender groups hold divergent views about major public policy areas, as well as fundamental views about democratic participation. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 602 or PUAD 702. Prerequisite: PUAD 330 or PUAD 331.

PUAD 403. Foundations of the Nonprofit Sector. 3 Credits. H/S
This course provides an overview of the U.S. nonprofit sector, its history, scope, diversity and its positioning among and between the private and public sectors of the U.S. economy. The course explores the legal framework under which nonprofit organizations operate and are regulated. Economic, political, social, organizational and giving theories of the sector are reviewed in order to understand the sectors existence, roles and activities with particular attention to philanthropy and voluntarism. Distinct contributions to society as well as contemporary challenges faced by the sector are examined. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 603 or PUAD 703. Prerequisite: PUAD 330, or POLS 110, or MGMT 305, or a PUAD master’s core course, or consent of instructor. Junior status or above is also required.

PUAD 404. Resource Development and Management in Nonprofit Organizations. 3 Credits. H
This course provides an overview of the broad range of activities relevant to acquisition, management and utilization of resources in nonprofit organizations. The course identifies the primary strategies through which resources are generated with emphases on grantwriting, fundraising, social entrepreneurship, and public/private partnerships. Development of organizational identity and management of public relations is examined in relation to resource and relationship development. Strategies for management of resources to ensure long-term benefit and sustainability are explored. Not available to students with credit in PUAD 604. Prerequisite: PUAD 403.

PUAD 405. Managing Nonprofit Relationships. 3 Credits. H
This course considers the set of relationships that nonprofit leaders must balance within the organization and beyond organizational boundaries. Both internal relationships (with staff, volunteers, and board members) and external relationships (with stakeholders, other organizations, and the community at large) are critical to mission accomplishment. This course provides students with the resources necessary to understand the challenges and opportunities related to building and maintaining these relationships. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in PUAD 605 or PUAD 705.
PUAD 406. Nonprofit Accountability: Public Needs and Public Values. 3 Credits. H
This course examines the role of the nonprofit sector in society by posing broad questions about why nonprofit organizations are held accountable, to whom they are accountable, and detailing how organizations can satisfy accountability demands. The course investigates the public role of the nonprofit sector in society, identifies the stakeholders that are integral to an organization's mission, and describes and critiques the financial and evaluation tools that nonprofits can use to ensure their social viability. Not available to students with credit in PUAD 606. Prerequisite: PUAD 403.

PUAD 408. Collaboration in Public Administration. 3 Credits. S
Managers must work effectively across organizational and sector boundaries to solve problems and produce public value. This course considers the forces contributing to the need for collaborative governance, changing management tasks and competencies, and how to address key collaborative challenges. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 608 and PUAD 708.

PUAD 431. Bureaucracy, Public Administration, and the Private Sector. 3 Credits. S
Examines the problems posed by behaviors within and by bureaucracies. Provides students with a set of conceptual tools for understanding the organizational environment in which policy analysts ply their profession and the role of a manager within such organizations. Offers strategies for the policy professional seeking to navigate large bureaucracies. Readings and class discussions integrate theoretical analyses of organizations with detailed case studies. Prerequisite: PUAD 330 or PUAD 331.

PUAD 432. Conducting the People's Business Ethically. 3 Credits. S
Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership, as well as strategies to build strong institutional cultures and support ethical practices in institutions. Considers moral and political theory by focusing on contemporary cases and issues. Students learn how to identify moral issues in public life and public management. There is a special focus on the integration of moral concerns into public discussion in a manner that contributes to good policy and does not polarize issues. This course considers moral and political theory by focusing on contemporary cases and issues.

PUAD 433. Metropolitics and Macroproblems: The American City in Local and Global Context. 3 Credits. S
An interdisciplinary study of American cities, focusing on the rapidly changing demographic, physical, political, social, and economic changes. Sunbelt cities, edge cities, the rustbelt cities, planned and unplanned suburban communities, as well as declining center cities and newly revitalized downtowns are considered. The role of immigration and migration in reshaping the urban environment, and the effects of globalization are also examined.

PUAD 435. Generating, Allocating and Managing Public Resources. 3 Credits. U
This course is devoted to topics in public budgeting, finance and financial management. These activities play a central role in public management. The intent of this course is to understand the role these activities play in local, state, and federal governments and to see how policy and management are shaped and influenced by budgets, financial reports, and tax policy.

PUAD 436. Managing People in Public Organizations. 3 Credits. U
Effective human resources management is one of the key goals of organizations in both the public and private sectors. This course focuses on human resources management in a public sector context with particular emphasis placed upon past, current, and future challenges in the field. The course covers topics such as the recruitment, selection, and compensation of public sector employees, as well as more contemporary issues such as diversity management and public sector personnel reform.

PUAD 439. Concepts of Civil Society. 3 Credits. U
Concepts of community, social capital, and civil capacity building, and their relations to effective community functioning, democratic politics, and administrative expertise. Not available to students with credit in PUAD 639.

PUAD 441. Public Service Leadership. 3 Credits. U
This course is based on the premise that leadership is not confined to the top tiers of organizations and that each individual can and should develop their leadership abilities. To that end, this course examines the concept of leadership through a variety of lenses-individual, environmental, and follower perspectives-in public, nonprofit and private contexts. Special emphasis will be placed on scholarly practice and perspectives of individual leadership assessment and development. This course is offered at the 400 and 700-level, with additional assignments at the 700-level. Not available to students with credit in PUAD 641 and PUAD 741.

PUAD 494. Topics in Public Administration: ______. 3 Credits. S
An introductory study of selected topics in public affairs and administration. Course may be repeated for credit if content varies. Course may be offered in lecture or online format. Not open to students with credit in PUAD 694 if the topic is the same.

PUAD 691. Internship in Public Service. 1-6 Credits. U
Designed to provide public administration students an applied learning experience in either a public or nonprofit organization. Open to majors in Public Administration only. Prerequisite: One of the following: PUAD 330, 331, PUAD 332, PUAD 333, and consent of instructor required.

PUAD 701. Administration of Justice. 3 Credits.
Examines the administration of justice and focuses on differential and discriminatory treatment in policing, criminal prosecutions, trials, sentencing, or imprisonment. Also considered are the basis and impact of racial profiling, harassment, arbitrary detention, and abusive treatment of members of racial and ethnic groups, immigrants, and/or other vulnerable groups by law enforcement, and disparate treatment by prosecutors and the courts. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 401.

PUAD 702. Diversity and Social Equity in Public Administration. 3 Credits.
Analyzes diversity and leadership in public and private institutions along ethnic, racial, and gender lines and the challenges of the facilitation of open dialogue on diversity. Examines the political, historical, social, and economic reasons why Americans of different ethnic, racial, and gender groups hold divergent views about major public policy areas, as well as fundamental views about democratic participation. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 402.

PUAD 703. Foundations of the Nonprofit Sector. 3 Credits.
This course provides an overview of the U.S. nonprofit sector, its history, scope, diversity and its positioning among and between the private and public sectors of the U.S. economy. The course explores the legal framework under which nonprofit organizations operate and are regulated. Economic, political, social, organizational and giving theories of the sector are reviewed in order to understand the sectors existence, roles and activities with particular attention to philanthropy and voluntarism. Distinct contributions to society as well as contemporary challenges faced by the
sector are examined. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 403.

**PUAD 705. Managing Nonprofit Relationships. 3 Credits.** This course considers the set of relationships that nonprofit leaders must balance within the organization and beyond organizational boundaries. Both internal relationships (with staff, volunteers, and board members) and external relationships (with stakeholders, other organizations, and the community at large) are critical to mission accomplishment. This course provides students with the resources necessary to understand the challenges and opportunities related to building and maintaining these relationships. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in PUAD 405.

**PUAD 708. Collaboration in Public Administration. 3 Credits.** Managers must work effectively across organizational and sector boundaries to solve problems and produce public value. This course considers the forces contributing to the need for collaborative governance, changing management tasks and competencies, and how to address key collaborative challenges. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not available to students with credit in PUAD 408.

**PUAD 741. Public Service Leadership. 3 Credits.** This course is based on the premise that leadership is not confined to the top tiers of organizations and that each individual can and should develop their leadership abilities. To that end, this course examines the concept of leadership through a variety of lenses-individual, environmental, and follower perspectives-in public, nonprofit and private contexts. Special emphasis will be placed on scholarly practice and perspectives of individual leadership assessment and development. This course is offered at the 400 and 700-level, with additional assignments at the 700-level. Not available to students with credit in PUAD 441.

**PUAD 824. Creating Good Public Policy. 3 Credits.** This course is an introduction to policy making in the United States with the aim of providing students with the skills and knowledge necessary to make and communicate good decisions about public policy. Competing theoretical approaches will be used to understand the policy making process. The class will highlight interactions between residents, organized interest groups, governments, the economy, and the environment. It introduces basic approaches for stakeholder analysis and methods for developing evidence-based policies or programs. Students will discuss common obstacles to good policy-making and the tensions of making public policy in a political environment.

**PUAD 825. Urban Policy and Administration. 3 Credits.** This course explores the development, implementation and evaluation of public policy in the local government context. It examines a variety of policy tools used to address urban problems and applies theories of the policy process, intergovernmental relations, and institutions to municipal governance. In so doing, the course examines a range of current substantive policy and administrative issues facing urban communities and governments. (Same as PUAD 825.)

**PUAD 828. Nonprofit Management and Policy. 3 Credits.** This course focuses on the economic, social, and legal foundations of the nonprofit sector. Nonprofits are examined in the context of a three-sector economy, with emphasis on the ways in which nonprofits compensate for market failures and government failures. The course examines government-nonprofit relations in the modern welfare system and offers an in-depth examination of the health, education, and welfare functions as performed by nonprofits. This course also provides exposure to selected topics in nonprofit management such as grant writing, board relations, advocacy, fundraising and volunteer management.

**PUAD 834. Human Resource Management. 3 Credits.** This course presents the context and practice of effective human resource management, with emphasis on the political, legal, historical, and ethical dimensions of public employment. This course considers the functions of workforce management, including: 1) planning of work and the allocation of labor to that work, 2) acquisition of employees and their competencies, knowledge, skills, and abilities, 3) development of employees to channel, improve and create new knowledge, skills, and abilities, and 4) maintaining the working relationship between employee and employer. Students will apply workforce management theories and techniques to contemporary organizational challenges and investigate the tensions inherent to balancing competing values (such as: responsiveness/neutrality and efficiency/equity) and meeting conflicting demands of organizational stakeholders and society.

**PUAD 835. Managing Public Money. 3 Credits.** This course covers essential financial management practices and the budgetary processes of the United States federal, state and local governments. It provides an overview of major revenue, spending, and debt financing policies.

**PUAD 836. Data Informed Decision-Making. 3 Credits.** This course examines an array of data analysis tools that, when mastered, will increase students' abilities to analyze, synthesize, think creatively, solve problems, and make decisions. It covers concepts of research design, probability, inferential statistics, and introduces quantitative approaches to examine public management and public policy decisions.

**PUAD 837. Advanced Public Budgeting and Finance. 3 Credits.** In this class, students examine the design and impacts of budgetary institutions and processes in-depth. Students are introduced to and apply various technical analyses for budgetary policymaking, such as forecasting, financial statement analysis, and cost analysis. Prerequisite: The successful completion of PUAD 835 with a grade of C of higher or instructor approval is needed to enroll.

**PUAD 839. Topics in Public Administration: _____ 3 Credits.** Study of selected topics in public administration.

**PUAD 841. Context, Ethics and Legal Environment of Public Administration. 3 Credits.** This course explores the environment in which public administrators work that both empowers and constrains what public administrators can do. Through discussion, cases, and classic readings, the course explores the accepted uses and procedures of the field. This includes the intellectual history, the political and legal context, the tensions between democracy and bureaucracy, and ethical decision making.

**PUAD 842. Law and Public Management. 3 Credits.** This course introduces constitutional and administrative law issues that face public administrators, with a particular focus on the state and local level. Using legal reasoning as a decision-making tool, the context of often-competing administrative values-efficiency, effectiveness, and equity-will be considered. While administrators do not face constitutional issues every day, this course examines how constitutional values often-competing administrative values-efficiency, effectiveness, and equity-will be considered. While administrators do not face constitutional issues every day, this course examines how constitutional values often-competing administrative values-efficiency, effectiveness, and equity-will be considered. While administrators do not face constitutional issues every day, this course examines how constitutional values often-competing administrative values-efficiency, effectiveness, and equity-will be considered. While administrators do not face constitutional issues every day, this course examines how constitutional values often-competing administrative values-efficiency, effectiveness, and equity-will be considered.
It emphasizes approaches to understanding the dynamics of individuals, groups, and teams within organizations.

**PUAD 849. Law, Courts, and Public Policy. 3 Credits.**

This course provides an overview of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. Prerequisite: Graduate standing or consent of instructor.

**PUAD 850. Intergovernmental Relations. 3 Credits.**

This course focuses on the fiscal and administrative relationships among the three levels of government - federal, state, and local - in the United States. A number of topics will be examined, including a history of intergovernmental relations, the political, constitutional, and legal foundations of the intergovernmental system, and intergovernmental fiscal policy. The impact of the intergovernmental system will be assessed from the perspective of specific areas and intergovernmental programs.

**PUAD 851. Infrastructure Management. 3 Credits.**

This course introduces students to infrastructure management from a local government perspective. Through a heavy reliance on guest speakers and site visits, it provides an overview of infrastructure development, financing, and maintenance. Throughout the course, students are taught to think in terms of systems and collaborative relationships.

**PUAD 853. Policy Analysis. 3 Credits.**

This course exposes students to the conceptual foundations and applied techniques associated with identifying, describing, and seeking solutions to public policy problems. Recognizing that it often occurs in a context where competing values and perspectives are often strongly held, students will learn the designs and methodologies to conduct policy analysis systematically and with minimal bias. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.

**PUAD 854. Innovation and Organizational Change. 3 Credits.**

This course will examine theories of innovation and organizational change as applied to public organizations. Particular emphasis will be placed on the concepts of innovation in bureaucratic organizations, on the process of successful change in organizations, and on leadership and employees' roles.

**PUAD 856. Management and Information Technology. 3 Credits.**

An introduction to the concepts of information policy and management of technology within governmental organizations. The course covers the effects of technology on government and society as well as information policy (privacy, security and access) and their importance to democracy. The course also includes a leadership perspective on planning, funding, and implementation of technology systems in governmental organizations as well as the role of Chief Information Officer.

**PUAD 857. Performance Management and Governance. 3 Credits.**

This course examines the practice and governance challenges of performance management and budgeting in the public sector. Topics covered in this course include: a) the governance context of performance measurement and management; b) the historical and theoretical foundation of performance measurement and management; c) the global trend of performance-oriented reforms; d) the practice and politics of performance measurement and management; and e) governance and ethical issues in managing for results. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.

**PUAD 858. Performance Audit. 3 Credits.**

This course examines the practice of performance audit at the national, state, and local levels. Topics covered in the course include: a) the concept of performance audit and the roles of auditors in performance management; b) performance audit systems and standards at the national, state and local levels; c) performance audit methodologies and techniques; d) the establishment of audit criteria; e) the concept and practice of risk and vulnerability analysis; f) the reporting and communication of performance audit results. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.

**PUAD 860. Governing Sustainable Communities. 3 Credits.**

This course examines the role that communities can play in advancing environmental, economic, and social sustainability. Although sustainability has traditionally been viewed as an international or national issue, the unit of action has been shifting downward. Cities, in particular, have been characterized as a key "battleground for sustainability." This is in part because an estimated 50 percent of the global population, including 84 percent of the U.S. population, lives in urban areas, and those numbers are only projected to increase. Moreover, local governments have authority over many decisions that are directly related to sustainability, including land use, transportation, housing, local food policy, energy efficiency, and the character of local economic development. In this class we examine these and related issues from a community-level and institutions perspective in order to assess how social and governmental structures, priorities, pressures and constraints influence the prospect for urban sustainability. A particular focus is placed on understanding how local and regional governments implement and manage sustainability.

**PUAD 861. Data Analytics. 3 Credits.**

The course is an introduction to data analytics in public administration and policy analysis. It teaches basic programming in R and SAS, covers basic applications of data analytics such as regression analysis and machine learning, and teaches basic tools of data visualization, including GIS. The course also reviews the political, legal, organizational, and ethical challenges of data analytics usage and the professional responsibilities public administrators have in using these tools. Students are expected to be familiar with basic statistical analysis and have already taken MPA-level statistics or an equivalent course. This course satisfies an elective requirement for students who are completing the Performance Management certificate. Prerequisite: PUAD 836 or equivalent academic engagement that includes quantitative analysis up to multi-variate regression.

**PUAD 862. Emergency Management in the United States: Theory and Practice. 3 Credits.**

This course covers the history, context, and practice of emergency management, blending in the theory and concepts of intergovernmental relations and collaborative leadership methods that are essential to the practice. The course will cover emergency management, as practiced in the United States, the National Incident Management System (NIMS), and the intergovernmental relationships that must be cultivated among all branches of government, non-profits, and private sector entities to plan, mitigate, respond to and recover from all disasters both natural and manmade.

**PUAD 863. Program Evaluation. 3 Credits.**

In this course, students learn the designs and methods used to evaluate the performance of public programs, policies, and organizations. Evaluation is rooted in trying to understand cause and effect relationships in complex situations and correctly attributing impact to intervention. Emphasis is placed on approaches to measure social outcomes. Through a series of evaluation case studies, students will use evidence and empirical methods to assess whether public action achieves its desired
outcomes. Prerequisite: The completion of a graduate-level statistics class or instructor approval is required to enroll.

**PUAD 892. Internship Experience in Local Government Administration. 1-3 Credits.**

This course is to supplement and enhance a part-time internship or current work experience in a local government or non-profit agency. It challenges students to examine their work experience to provide them the knowledge, background, and skills needed to successfully lead and manage in a local government or non-profit organization. The course requires students to reflect, write, and discuss their part-time internship (or current work experience) and study how the experience relates to public administration theory, leadership, and management competencies. As this course focuses on local government management, all students are required to attend a professional conference designated by the instructor. Graded on a satisfactory/unsatisfactory basis.

**PUAD 893. Directed Readings. 1-3 Credits.**

Designed to meet the needs of advanced students whose study in public administration cannot be met with current course work.

**PUAD 894. Professional Development Seminar I: Public Admin Contemporary Issues & Competency Assessment. 3 Credits.**

This intensive seminar examines students’ current experiences as full time interns and considers workplace and community concerns within the context of contemporary issues. The transition from an academic to a professional work setting is emphasized in discussion and reflective assignments. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Open only to MPA students who are required to complete a full-time internship in their second year of study.

**PUAD 895. Professional Development Seminar II: Leading to Create a Culture for High Performance. 3 Credits.**

In this intensive week-long seminar students will examine what high performance means, how performance happens in an organization and the various principles of public leadership that most effectively guide organizational culture. The course is intended to stimulate thoughts and learnings about high-performance organizations, organizational values, and explores strategies that can create the type of culture that inspires and enables employees to excel. The seminar format provides an opportunity for introspection in individual beliefs and characteristics, group discussion for the exchange of diverse views, and classroom instruction to explore the latest thinking in public sector leadership. Ultimately, the seminar is designed to train and empower public administrators to live the Athenian oath in their organization and community.

**PUAD 897. Public Administration Contemporary Issues and Competency Assessment. 3 Credits.**

This course exposes students to the contemporary issues in public management and analysis of competencies for public management in four theme areas. Students will participate in discussions of issues and in three assessments of their preparation to lead public organizations. Students will complete the MPA Final Essay which focuses on integration of course and work experience in relation to the values theme of the MPA program. Graded on a satisfactory/unsatisfactory basis.

**PUAD 898. Leading to Create a Culture for High Performance. 3 Credits.**

In this intensive seminar, students will examine what high performance means, how performance happens in an organization and the various principles of public leadership that most effectively guide organizational culture. The course is intended to stimulate thoughts and learnings about high-performance organizations, organizational values, and explores strategies that can create the type of culture that inspires and enables employees to excel. The seminar format provides an opportunity for introspection in individual beliefs and characteristics, group discussion for the exchange of diverse views, and classroom instruction to explore the latest thinking in public sector leadership. Ultimately, the seminar is designed to train and empower public administrators to live the Athenian oath in their organization and community.

**PUAD 899. Excelling in the Practice of Public Administration. 1 Credits.**

This course is taken in the final semester of the MPA degree and serves as a culminating review and reaplication of the core competencies and learning objectives emphasized throughout the curriculum. Centered on the development of an applied final report, and emphasizing a process of targeted peer review, this course aims to develop reflective practitioners and ensure that students integrate the range of core competencies and skills essential to leading and managing in public-serving organizations and serving diverse communities. Prerequisite: Students are expected to be in the final semester of MPA study.

**PUAD 930. Research Seminar in Public Administration and Democracy. 3 Credits.**

This course focuses on the democratic context of public administration. Topics could include how democracy shapes the practice of public administration; the functioning of public administration in a constitutional democracy; issues relating to control and discretion of public administrators; citizenship and representative bureaucracy; theories of bureaucratic values such as equity, justice and efficiency, ethics and accountability; theories of institutions.

**PUAD 931. Research Seminar in Public Management. 3 Credits.**

This course, on the topic which increasingly is approached as an interdisciplinary field, focuses on the management of public and non-profit agencies. Topics could include: the nature of public agencies and the roles of public executives, managers, and professionals; distinctions between public, private, and non-profit agencies in America and internationally; creating and managing organizational networks; leadership; work motivation; and the ethics of decision-making.

**PUAD 932. Seminar in the Intellectual History of Public Administration. 3 Credits.**

This course will analyze the intellectual currents that undergird the theories and concepts in public administration. There are three primary perspectives crosscutting the topics. They are historical, cultural and analytical.

**PUAD 934. Research Methods in Public Administration. 3 Credits.**

The course examines issues of research and epistemology with an emphasis on connecting theory and research and doing research in field settings.

**PUAD 935. Advanced Quantitative Methods for Public Administration. 3 Credits.**

This seminar will assist students to develop a thorough competence in both theory and application of multivariate statistical models of the types that are commonly used to study questions of organization and policy in the public sector. These will include inference for the general linear regression model under a wide variety of specifications, as well as a consideration of path models and systems of simultaneous equations. The principal goal of this course is to strengthen the ability of doctoral students in public administration to work methodologically as independent scholars using relatively advanced designs and technique in their work.

**PUAD 936. Policy Analysis and Program Evaluation. 3 Credits.**

This course examines the theoretical foundations and analytical components of policy analysis and program evaluation, common tools for assessing alternative courses of public action and program effectiveness. This examination will include a review and critique of common quantitative
and qualitative approaches, including cost-benefit analysis, cost-effectiveness analysis, and quasi-experimental design.

**PUAD 937. Qualitative Methods in Public Administration. 3 Credits.**

This course examines the concepts and practices of qualitative research. The focus will be on field research and the collection of "textual data" through observation, interviewing, and documents. The course will also examine the interpretation and analysis of qualitative data and how to present qualitative findings.

**PUAD 939. Topics in Public Administration: _____. 1-3 Credits.**

A study of selective topics in public administration. Course may be taken more than once.

**PUAD 943. Constitutional Foundations of Public Administration. 3 Credits.**

This course provides grounding in the constitutional premises of public administration including executive, legislative, and judicial powers, and federalism, and those issues associated with the development of economic institutions and processes such as taxation, employment regulation, and commerce controls.

**PUAD 949. Law, Courts, and Public Policy. 3 Credits.**

This course provides an in-depth analysis of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. As part of the course requirements, students will conduct original empirical research.

**PUAD 998. Directed Reading on Public Administration. 1-6 Credits.**

Designed to meet the needs of graduate students whose study in public administration cannot be met with present course. Prerequisite: consent of instructor.

**PUAD 999. Dissertation. 1-15 Credits.**

Enrollment for writing doctoral dissertations. Graded on a satisfactory progress/limited progress/no progress basis.

### Public Affairs & Adm, School Courses

**SPAA 400. Law Enforcement Leadership. 3 Credits.**

The course covers leadership and management concepts in the context of law enforcement agencies. The course provides an introduction to leadership and management functions including fiscal management, human resources, and strategic planning as well as the organization of decision making and training functions. Students will learn research verified concepts of leadership and management within the context of the United States law enforcement environment. (Same as CRIM 400.)

**SPAA 691. Internship Experience. 1-3 Credits. S**

Designed to provide students an applied learning experience in a relevant public, non-governmental, or nonprofit organization. Students are required to critically reflect on their experience through a variety of academic assignments throughout their internship experience. Prerequisite: Permission of academic unit.

**SPAA 692. Research Experience. 1-3 Credits. S**

Designed for advanced undergraduate students. Students enhance their research skills by working one-on-one with a faculty member on an independent scholarly project. Students are required to complete a final project or presentation, through advising and consultation with the designated faculty member. Prerequisite: Permission of academic unit.

**SPAA 693. Directed Readings. 1-3 Credits. S**

For advanced undergraduate students who wish to study a specific topic of interest that is not covered in the curriculum. Each student must complete a proposal outlining his or her topic request and submit to the Undergraduate Coordinator. Prerequisite: Permission of the academic unit.

### Public Affairs & Adm, School Courses

**UBPL 200. Sustainability and Society. 3 Credits.**

This course will introduce the concept of sustainability, examining its early iterations, recent applications, and possible future transformations. Critical analysis of sustainability as a concept and societal goal will be a course cornerstone. We will examine two contemporary social issues that are relevant to students at the University of Kansas. Social science perspectives will be emphasized, but, because sustainability necessitates an interdisciplinary perspective, the course will consider the contributions of a wide range of disciplines to these issues.

**UBPL 300. Planning the Sustainable City. 3 Credits.**

A broad introduction to the field of urban planning as a technical profession, a process of decision-making, and a governmental function. The multi-disciplinary nature of planning as an area for professional practice in the geographical, socio-economic and political contexts of the U.S. is stressed. We will explore the promise and limitations of planning in the context of mitigating and adapting to climate change. The course is intended for both the student who is considering planning as a major field of study and the student with primary interest in a related field who would like a working knowledge of past and current planning in the U.S.

**UBPL 402. Special Topics in Urban Planning: _____. 3 Credits.**

Intended for undergraduate individual or group projects/research in an urban planning topic.

**UBPL 407. Sustainability and the Future of Transportation. 3 Credits.**

This course examines the worldwide impact of how we travel, and how that is changing with the development of new technologies in transportation. Our study starts with an overview of different modes of transportation and their use across the globe, then moves into the environmental, economic, equity, and energy factors that influence the sustainability of our ways of travel. Once we examine our present reality, we then peer into the future and examine the potential of evolving developments in transportation, including electric vehicles, autonomous cars, shared mobility, and the COVID-19 pandemic. Topic areas include worldwide differences in the use of modes of transportation, spatial relations and interactions between transportation and land use, and how sustainability principles interact with policy, market forces, and personal behavior in transportation. Upon completion of the course, students will be able to 1) evaluate the sustainability of transportation proposals and developments, 2) develop transportation improvements that contribute to enhancing equity in transportation while mitigating environmental impacts and energy use, and 3) practice enhanced critical thinking, logic, reasoning, and professional communication abilities. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 707.

**UBPL 410. Housing Policy and Planning. 3 Credits.**

This course explores contemporary U.S. housing issues and introduces the various methods used by the public sector as it intervenes in housing markets. Governments at all levels employ many different approaches to achieve housing goals. This course will examine many of these approaches to help students understand what these housing programs are supposed to accomplish and how well they work. In all cases, the objective of the course is to educate planners so that they have a firm understanding of housing programs that exist and a grasp of
the methods used to select housing strategies for implementation by the public sector. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 710.

UBPL 420. Sustainable Land Use Policy and Planning. 3 Credits.
This course introduces students to the issues that planners and decision makers face as they strive to promote sustainability, especially within the context of land use planning. Emphasis will be placed on the theoretical and policy considerations that guide the work of planners. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 720.

UBPL 425. Environmental Planning Techniques. 3 Credits.
An understanding of natural processes is an essential aspect of developing appropriate and effective environmental plans and policies, and creating context- and ecosystem-sensitive site designs. The course covers a variety of topics within environmental and sustainable land use planning. Each topic is examined with respect to the scope of the issues, the methods of analyzing and/or measuring those issues, and the ways those issues can be addressed to avoid or mitigate environmental problems. The main topics will include 1) soils, 2) water and land use, 3) urban ecology, wildlife habitats, and urban biodiversity, and 4) energy, climate change, and natural hazards. The primary purposes of this course are to: 1) Gain an overview of the range of environmental topics and challenges involved in sustainable land use planning; 2) Develop familiarity with common principles and datasets used in environmental planning analysis; and 3) Apply techniques of environmental analysis to build skills applicable in practice. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 725.

UBPL 450. Transportation Policy and Planning. 3 Credits.
This course is designed to provide a broad overview of urban transportation. The role which transportation systems and networks play in facilitating the movement of people as motorists, cyclists, and pedestrians is explored. Methods through which transportation systems are planned for and evaluated are discussed as are major policy issues confronting decision makers within the field. Upon completion of this course, students will be able to 1) comprehend transportation plans and policy documents, 2) evaluate the broader impacts of transportation decisions, and 3) develop and evaluate transportation planning and policy interventions which address current and future issues. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 750.

UBPL 480. Climate Change and Hazards Planning. 3 Credits.
This course covers planning for climate change and disasters. Floods, heat waves, droughts, extreme storms, sea level rise, and the wide range of other climate-related hazards are (or soon will) impact virtually every aspect of the social, economic, and environmental systems on which we all depend. While the challenges of making our communities more sustainable and resilient are daunting, innovative plans, policies, programs, and projects are being developed and implemented all around the world. This course will cover four main topics: 1) the basic science and concepts of climate change and disasters, 2) learning from decades of knowledge about planning for natural hazards, 3) mitigating climate change by reducing greenhouse gas emissions, and 4) adapting to the impacts of climate change. Each topic will be addressed primarily at the local (city, county or regional) scale, with a primary focus on planning in the United States. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 780.

UBPL 701. Directed Readings. 1-6 Credits.

Designed to meet the needs of students whose study in urban planning cannot be met with the present courses. Prerequisite: Consent of instructor.

UBPL 705. Urban Economic Theory and Analysis. 3 Credits.
This course examines the economic forces which shape and affect cities. In the first part of the course, theories of location are considered. With the help of these theories our objectives are to understand why cities exist, why they are located where they are, the distribution of city sizes, the causes of regional and metropolitan growth and decline, and the spatial distribution of alternative activities within cities. Part two of this course introduces analysis methods which aid in the comprehension of local and regional economic characteristics and in decision-making concerning the distribution of resources within cities.

UBPL 707. Sustainability and the Future of Transportation. 3 Credits.
This course examines the worldwide impact of how we travel, and how that is changing with the development of new technologies in transportation. Our study starts with an overview of different modes of transportation and their use across the globe, then moves into the environmental, economic, equity, and energy factors that influence the sustainability of our ways of travel. Once we examine our present reality, we then peer into the future and examine the potential of evolving developments in transportation, including electric vehicles, autonomous cars, shared mobility, and the COVID-19 pandemic. Topic areas include worldwide differences in the use of modes of transportation, spatial relations and interactions between transportation and land use, and how sustainability principles interact with policy, market forces, and personal behavior in transportation. Upon completion of the course, students will be able to 1) evaluate the sustainability of transportation proposals and developments, 2) develop transportation improvements that contribute to enhancing equity in transportation while mitigating environmental impacts and energy use, and 3) practice enhanced critical thinking, logic, reasoning, and professional communication abilities. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 407.

UBPL 710. Housing Policy and Planning. 3 Credits.
This course explores contemporary U.S. housing issues and introduces the various methods used by the public sector as it intervenes in housing markets. Governments at all levels employ many different approaches to achieve housing goals. This course will examine many of these approaches to help students understand what these housing programs are supposed to accomplish and how well they work. In all cases, the objective of the course is to educate planners so that they have a firm understanding of housing programs that exist and a grasp of the methods used to select housing strategies for implementation by the public sector. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 410.

UBPL 715. Community and Neighborhood Revitalization. 3 Credits.
The course introduces students to a range of community development concepts and approaches in the context of urban change in the United States. In this context, this course helps students understand the various theories of neighborhood change, community development strategies, and a range of principles for developing neighborhood revitalization initiatives focusing on revitalization strategies for inner-city neighborhoods. In this course, community development interventions are understood as facilitating, strengthening, and improving less-advantaged communities.

UBPL 716. Neighborhood Analysis and Evaluation. 3 Credits.
This course explores social theories of Community, how those theories have influenced concepts for neighborhood development, and how to apply the idea of Community to local neighborhood planning and community development. It also teaches how to analyze neighborhood conditions to understand and describe neighborhoods and inform neighborhood improvement strategies. It explores ways to analyze and interpret quantitative indicators—demographic, economic, physical, and social conditions—which exist at the neighborhood level. It teaches students how to investigate and analyze opportunities, assets, and challenges confronting the neighborhood. It introduces students to community asset mapping.

**UBPL 720. Sustainable Land Use Policy and Planning. 3 Credits.**
This course introduces students to the issues that planners and decision makers face as they strive to promote sustainability, especially within the context of land use planning. Emphasis will be placed on the theoretical and policy considerations that guide the work of planners. This course is offered at the 400 and 700 level with additional assignments at the 700 level, not open to students with credit in UBPL 420.

**UBPL 725. Environmental Planning Techniques. 3 Credits.**
An understanding of natural processes is an essential aspect of developing appropriate and effective environmental plans and policies, and creating context- and ecosystem-sensitive site designs. The course covers a variety of topics within environmental and sustainable land use planning. Each topic is examined with respect to the scope of the issues, the methods of analyzing and/or measuring those issues, and the ways those issues can be addressed to avoid or mitigate environmental problems. The main topics will include 1) soils, 2) water and land use, 3) urban ecology, wildlife habitats, and urban biodiversity, and 4) energy, climate change, and natural hazards. The primary purposes of this course are to: 1) Gain an overview of the range of environmental topics and challenges involved in sustainable land use planning; 2) Develop familiarity with common principles and datasets used in environmental planning analysis; and 3) Apply techniques of environmental analysis to build skills applicable in practice. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 425.

**UBPL 730. City and County Planning. 3 Credits.**
This course is about how to create plans and put the pieces of cities together in a sustainable manner, balancing the competing values of economy, ecology, equity, and livability. It introduces students to the planning process in the U.S., what makes great plans, the basic implementation tools for planning (zoning, capital improvement plans, engineering standards, and subdivision regulations.) We will learn about the Comprehensive Plan along with specialized plans for transportation, housing, land use, and the environment.

**UBPL 735. Site Planning and Design. 3 Credits.**
Site planning is the arrangement of elements (buildings, landscaping, parking, open space) on particular pieces of property. This class focuses on the site planning process and the implementation of site design standards through regulations. We will delve into the elements and principles of design and ask these big questions: What makes great public spaces? What makes great neighborhoods? What makes great streets? What can we do to steer development in the direction of greatness?

**UBPL 736. Planning Law and Institutions. 3 Credits.**
This course explores the legal principles underlying the institutions, practices, and processes of city planning. Subjects to be discussed include zoning, eminent domain, subdivision regulation, transfer of development rights, environmental regulation, growth management, and other planning mechanisms used to guide urban growth and control the use of land. Particular attention will be paid to conflict resolution and negotiation. Students should emerge from the course with a solid understanding of the logic and routine practice of planning in a procedural and institutional context.

**UBPL 741. Foundations of Compassionate Critical Thinking. 3 Credits.**
This course engages students with research methods (research design, inferential statistics, and survey methods) within the broad suite of relationship skills on which successful planning analysis and public service careers depend. These relationship skills ironically are commonly referred to as ‘soft skills,’ in spite of, the hard work they often require. By embedding ‘soft skills’ within ‘hard skills’ (quantitative methods), we will examine a variety of motivations for public service and planning through a consistent lens of advancing equity. We use compassion as a framework for integrating science and practice related to a) emotions, relationships, and self-care, b) reasoning and cognitive biases, c) networks of relationships, and d) broader social, economic, and political systems. We pay particular attention to countering racism, sexism, and other forms of exclusion and oppression which can be hidden within seemingly technical/rational research methods and analyses. Through the course, we consider how planners can use research and communication to help the public and decision makers in the near term, even as there is great uncertainty about the future.

**UBPL 742. Applied Data and Spatial Analysis. 3 Credits.**
Planners work with quantitative data, much of which are spatial in nature. They use quantitative information to address questions they encounter in planning and policymaking and make decisions. Planners gather, summarize, analyze, and present data they have collected themselves or have obtained from secondary sources. Planners may also review and assess quantitative analyses prepared by others. This course is designed to prepare students to critically review analyses prepared by others and conduct basic statistical analysis of data. It introduces students to key concepts and tools in quantitative analysis and research methods relevant to urban planning and policy. It prepares students to understand, interpret, and more importantly, critically assess quantitative data analyses and results they would encounter in urban planning and allied disciplines.

**UBPL 746. GIS Applications for Design and Planning. 3 Credits.**
This course will explore a range of Geographic Information Systems (GIS) applications for students in architecture and planning. It will be structured as a workshop, starting with a review of basic GIS concepts and procedures. Different digital data sources will be explored, along with file sharing (import and export) capabilities. The focus will be on applications at different scales using projects in architecture, site planning, environmental planning, urban analysis, and regional analysis. Three dimensional analysis will also be introduced. Each student will develop a final project as a synthesis of earlier exercises and as an application relevant to their individual professional interests.

**UBPL 750. Transportation Policy and Planning. 3 Credits.**
This course is designed to provide a broad overview of urban transportation. The role which transportation systems and networks play in facilitating the movement of people as motorists, cyclists, and pedestrians is explored. Methods through which transportation systems are planned for and evaluated are discussed as are major policy issues confronting decision makers within the field. Upon completion of this course, students will be able to 1) comprehend transportation plans and policy documents, 2) evaluate the broader impacts of transportation decisions, and 3) develop and evaluate transportation planning and policy interventions which address current and future issues. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 450.

**UBPL 756. Data Driving Transportation. 3 Credits.**
The transportation systems of the world are the product of many decisions, all of which are heavily influenced by the methods we use to study and create those systems. This course explores the research methods that can be employed in planning and analyzing transportation. Content areas include history and theory of transportation planning and modeling, traditional and recent advancements in transportation modeling, and analyzing land-use/transportation interaction, freight travel, public transportation, and non-automotive travel demand, including public transit and non-motorized modes. Upon completion of this course, students will be able to 1) practice advanced skills in descriptive, graphical, GIS, and quantitative analytical methods for transportation, 2) evaluate the impact of transportation investments using those methods and 3) apply enhanced critical thinking, logic, reasoning, and professional communication abilities.

**UBPL 758. Transportation for Livable Cities. 3 Credits.**
Transit use, walking, and cycling are becoming increasingly important in efforts to promote health, sustainability, social equity, and livability in cities. This course will introduce students to current practices associated with planning for and delivering public transit service and bicycle/pedestrian infrastructure. Upon completion of this course, students will be able to 1) assess the ability of the transportation network to serve transit users, pedestrians, and cyclists; 2) identify how to introduce various modes of transportation; and 3) develop ideas to promote complete, safe, and equitable transportation networks.

**UBPL 763. Politics and Public Management. 3 Credits.**
Planners and public administrators operate within highly technical yet political environments. Planners and administrators often try to bring consensus, efficiency, effectiveness, and action-taking to communities, but the very structure of our democracies promotes conflict and stalemate. Understanding how to manage power, structure, and agency in policy making will help planners and administrators become savvier as they balance their roles as advisors, educators, facilitators, advocates, managers, and leaders. The course includes theories of policy making and leadership. Students apply those theories to specific case studies associated with different policy areas (transportation, economic development, hazard mitigation, sustainability, historic preservation, etc.). Through research and case studies this class explores the trials, tribulations, and triumphs of planners and administrators as they seek to manage politics in their careers.

**UBPL 764. Real Estate Development. 3 Credits.**
This course is designed to provide a working knowledge of the mechanics of real estate development for those in the public sector, particularly for urban planners and public administrators. Topics covered include: development analysis; project planning, design, and construction; finance and debt structuring; implementation; understanding debt and equity; and the impact of public policies, such as, policies for affordable housing and historic preservation. Projects developed within the region will be examined to illustrate and explore how public sector programs guide and direct the real estate development process.

**UBPL 777. Equity, Justice, and American Cities. 3 Credits.**
In U.S. cities, many groups are marginalized by inequitable conditions and access to services such as quality housing, transportation, employment opportunities, education, and health care. Social inequalities of race, class, and gender shape and are shaped by social conflicts and processes of uneven urban development and resource distribution. This class is intended to be a place where students think critically about urban social relations and gain a better understanding of social justice, inequality, access, and privilege as they relate to urban space. Strategies in which to address inequality via urban planning and policy development efforts are explored and evaluated.

**UBPL 780. Climate Change and Hazards Planning. 3 Credits.**
This course covers planning for climate change and disasters. Floods, heat waves, droughts, extreme storms, sea level rise, and the wide range of other climate-related hazards are (or soon will be) impacting virtually every aspect of the social, economic, and environmental systems on which we all depend. While the challenges of making our communities more sustainable and resilient are daunting, innovative plans, policies, programs, and projects are being developed and implemented all around the world. This course will cover four main topics: 1) the basic science and concepts of climate change and disasters, 2) learning from decades of knowledge about planning for natural hazards, 3) mitigating climate change by reducing greenhouse gas emissions, and 4) adapting to the impacts of climate change. Each topic will be addressed primarily at the local (city, county or regional) scale, with a primary focus on planning in the United States. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in UBPL 480.

**UBPL 785. History and Theory of Planning. 3 Credits.**
The course serves as an introduction to the history of city planning and “how to plan” in general. Planners are particularly concerned with future consequences of current action. In looking to the future, knowing past history is a good place to start. Also, planning theorists have thought deeply about how best to plan and their thoughts and advice can serve planners and decision-makers well when they are facing unknowns.

**UBPL 802. Special Topics in Urban Planning: _____ . 3 Credits.**
Study of selected topics in urban planning.

**UBPL 806. Thesis - Graduate Research. 1-6 Credits.**
Independent study and research related to the master’s thesis. Prerequisite: Consent of instructor.

---

**Religious Studies Courses**

**REL 100. Introduction to Religious Ethics. 3 Credits.**
In this class we will learn how religious values are used to make ethical judgments, but we will also ask if and how those judgments influence practices or the behavior of people in their everyday lives. What causes a disjunction between norms and behavior? What is the tension between different values when deciding how to act? What about differences of opinion between and even within different religious traditions? What happens when societal expectations conflict with religious values or vice versa? Or when ethical reasoning leads to two different conclusions about how to act? Using specific cases, such as human rights, environmental and sexual ethics, race and violence students will learn how ethical reasoning unfolds in different religious traditions, what values support that reasoning and what happens in society when those values compete.

**REL 102. Violence and Religious Ethics. 3 Credits.**
This course will examine the connection between violence and religion from an ethical perspective. It will focus primarily on Jewish, Christian and Muslim ethical theories, which will be compared and applied to specific cases. We will also consider the ethical justifications for inter-religious conflict and the impact violence has had on targeted religious communities. The course will begin with an interrogation of the meaning of religion, ethics and religious violence-exploring questions like: Are religions inherently violent? Are theories derived from religious ethics used to justify violence? How are acts of violence morally justified? We will then consider these questions in more depth by comparing ethical theories within Judaism, Christianity and Islam, such as just war theory and jihad theory, to see whether religions encourage or seek to curb violence. In addition, each moral theory will be studied in light of specific historical or present cases. Case studies include the Crusades, Medieval Spain, ISIS, white nationalism in America, and recent killings in places.
of worship. The course will end on a positive note, by examining ethical theories within religions that promote peace, and comparing theories that justify peace with theories that justify war.

REL 104. Introduction to Religious Studies. 3 Credits. HR H
This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Not open to students who have taken REL 105.

REL 105. Introduction to Religious Studies, Honors. 3 Credits. HR H
This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 104.

REL 106. Asian Religions. 3 Credits. HR/NW H/W
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. (Same as EALC 105.)

REL 107. Jews, Christians, Muslims. 3 Credits. HR H
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. (Same as JWSH 107.)

REL 124. Understanding the Bible. 3 Credits. HR H
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as JWSH 124.)

REL 125. Understanding the Bible, Honors. 3 Credits. HR H
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as JWSH 125.)

REL 130. Myth, Legend, and Folk Belief in East Asia. 3 Credits. NW H/W
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the world view of the ordinary peoples of East Asia. (Same as ANTH 293, EALC 130.)

REL 137. Religious Ethics and Moral Decisions. 3 Credits. H
When faced with ethical dilemmas how do we decide what is the right course of action? In what ways are our decisions affected by religious ideas about morality? In this class we examine the ethical problems we encounter every day in light of the solutions offered from various religious traditions. Cases to be examined include issues of life and death, war and peace, sexual morals, torture, the treatment of animals and the environment.

REL 138. Religion and Moral Decisions, Honors. 3 Credits. H
Honors version of REL 137. Introduction to religious viewpoints on individual and social ethics. This course examines the influence of religious thought on the making of moral decisions, and on value development in relation to specific moral issues. Open only to students who have been admitted to the University Honors Program or by permission of instructor.

REL 171. Religion in American Society. 3 Credits. HR H
A broad introduction to religion in American culture. This class emphasizes the well-established religions with large followings (viz. Judaism, Catholicism, Eastern Orthodoxy, and Protestantism). Some attention is also given to other religions active in America. Other topics covered include the relationship of church and state, religion in ethnic and racial minority groups, and women and religion. (Same as AMS 290.)

REL 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Religious Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

REL 190. Special Topics in Religion: ____. 3 Credits. H
Topic and instructor to be announced in Schedule of Classes. May be offered by different instructors under different subtitles, and may be taken more than once if subject matter varies sufficiently.

REL 200. Study Abroad Introductions to: ____. 1-4 Credits. H
This course is designed for the study of special topics in Religious Studies. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

REL 290. Topics in Religion and Society: ____. 3 Credits. H
Special topics to be announced in Schedule of Classes, according to research interests of faculty and students. A particular aspect of the study of religion and culture will be emphasized. Course may be taken more than once if the subject matter varies.

REL 306. God, Buddhism, and the Good Life. 3 Credits. HR
This course introduces students to rigorous philosophic debates about some gripping existential questions surrounding the value of religion with God, a religion without God (focusing on Buddhism), and atheism. We will explore arguments for opposing answers regarding topics such as: whether atheism threatens the value of life; differences in how the self is viewed in Western and Eastern religions; and differences in how morality is grounded in these different traditions. We will examine the compatibility of atheism with Buddhism, and of Buddhism with belief in God. (Same as PHIL 306.) Prerequisite: A 100-level Philosophy course or permission of instructor.

REL 310. Religion in Korea. 3 Credits. W
Survey of religious thought and practice in Korea from the Three Kingdoms period to the present. Formerly known as REL 510. Not open to students with credit in REL 510.

REL 314. The Black Church in America. 3 Credits. H
This course covers the “visible” church, the “invisible” church, and the Black church as an “invisible institution,” and shows how agency is ascribed through the Black church. The course covers the history, heritage, roles, social and spiritual theology and dynamics of the Black church and situates the Black church within the Abrahamic religions of Judaism, Christianity, and Islam, with Africa as the beginning site for understanding the Black church and its transmigration from its African roots to the present. The class shows how the Black church developed through spiritual/sacred and hegemonic encounters, prompting the rhetorical question posed by a prominent Black church scholar: “What is African American religion?” Because of the dominant American hegemony encountered by the Black church, it must be understood as part of a larger freedom-seeking agendum that allowed its members to assert power over competing images to shape the meaning of theological allegiance, as well as the treatment of black bodies, through theology, rituals, rites, ceremonies and other religious practices. Topics covered in the course include identity through the Black church, the black conversion
experience, worship styles, Black preaching, Black music, gender roles, sexuality, liberation theology, health practices, and the impact of COVID-19 on the Black church. (Same as AAAS 314.)

REL 315. Miracles, Martyrs, and Heretics. 3 Credits. H/W
A study of ancient Christian culture and religion employing the popular categories of miracles, martyrs and heretics as entry points into the basic features of religious thought and practice. Prerequisite: An undergraduate course in the humanities.

REL 316. Ancient Magic and Witches. 3 Credits. H
This course provides a survey of magic and witchcraft in ancient Greece and Rome and interprets these practices through anthropological theories of magic and witchcraft. Emphasized topics may include magicians, witches, ghosts, spirits, demons, divination, and spells. This course considers issues such as how magic works, how people engage with the divine, the marginalization of magical practitioners, and the difference between magic, witchcraft and religion. All readings will be in English; no knowledge of any ancient languages is required. (Same as CLSX 316.)

REL 320. The Bible Then and Now. 3 Credits.
An introduction and survey of the history and interpretation of the Jewish and Christian bibles from their first formation to the present day. Students will explore the way the text, interpretation and format of the Bible have adjusted over time to accommodate religious, political, social and technological changes. Class will occasionally meet in the university’s rare book collection to study rare bibles. (Same as JWSH 320.)

REL 323. The Jewish World of Jesus. 3 Credits. H
An introduction to the figure of Jesus in his ancient Jewish context. What was Jewish life like in Jesus’s time? What did the early Jesus movement share with other forms of Judaism, and how did it differ? Evidence from the New Testament, the Dead Sea Scrolls, and other textual and archaeological sources will be used to explore the first-century Jewish society of which both Jesus and the first Christians were a part. (Same as JWSH 323.)

REL 325. Introduction to Judaism. 3 Credits. H
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as JWSH 325.)

REL 326. The Talmud: Its Origins, Nature, and Evolution. 3 Credits. H
This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries. (Same as JWSH 326.) Prerequisite: REL 104, REL 107, or REL 124 or REL 125, or permission of the instructor.

REL 327. Religious Zionisms. 3 Credits. H
A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required. (Same as JWSH 337.)

REL 329. Mystical Tradition in Judaism. 3 Credits. H
Mystical experiences and supernatural encounters in Jewish texts and tradition: Dybbuks and demons, angels and Elijah; from ecstatic enlightenment to succumbing to satan - Jewish texts and tradition are riddled with the arcane, the occult and the mystical. This course will mine the sources for a deep exploration of these aspects of Judaism that are most often obscured by "normative" teachings and practices, yet remain deeply embedded in the customs and beliefs of Jews around the world. (Same as JWSH 330.)

REL 330. Native American Religions. 3 Credits. NW H/W
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative (myth), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization.

REL 333. Magic, Mysteries, Mummies in Ancient Egypt. 3 Credits. H
A study of ancient Egyptian culture and religion employing the popular categories of magic, mysteries and mummies as entry points into the basic features of religious belief and practice. Prerequisite: Any course in the Humanities or Social Sciences.

REL 334. Studies in Ritual: _____. 3 Credits. H
A study of ritual theory and a comparative study of ritual activity among selected religious traditions. May be repeated if topic varies.

REL 339. History of Religion in America. 3 Credits. H
Survey of the development of religious institutions and ideas in America from colonial times to the present. Emphasis is given to the mainstream religious traditions (Protestant, Catholic, Jewish), but attention is also paid to other phenomena, including nonwestern and native American religions.

REL 341. Mysticism. 3 Credits. H
The nature of mystical experience and reflection as expressed in selected mystical literature of the world's religions.

REL 345. Christianity. 3 Credits. H
An introductory examination of the history, doctrines, and practices of Christianity. Selected readings from the creeds, papal decrees, and major Christian theologians.

REL 350. Islam. 3 Credits. NW H/W
Islam's Origins, the prophet Muhammed, the Holy Koran, religious symbols and moral mandates, and historical developments. (Same as AAAS 349.)

REL 355. Muslim Societies. 3 Credits. H
In this class we study Muslim societies throughout the world. We examine variation between regions by looking at Muslim history and culture in different countries, such as Pakistan, Indonesia, Mali, Bosnia, Egypt, Yemen, and others.

REL 357. Women and Gender in Islam. 3 Credits. H
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. (Not open to students who have taken REL 657.)

REL 360. The Buddhist Tradition in Asia. 3 Credits. W
A historical and geographical survey of the Buddhist tradition from its origins in India to modern day developments in the three major regional Buddhist cultures of Southeast Asia, Tibet, and East Asia (China, Korea, and Japan). Prerequisite: Prior coursework in Asian studies or permission of instructor.

REL 362. Studies in Yoga & Meditation. 3 Credits. H
Historical and thematic investigation into Yoga and meditation, including classical formulations, esoteric practices, and contemporary developments and debates.

REL 365. Hinduism. 3 Credits. H
An introduction to the diversity and richness of Hinduism from the Vedic period to the present; explores Hindu practices, beliefs, and communities using primary texts and extensive audio-visual resources.
REL 370. Judaism and Sexuality. 3 Credits. H
An exploration of the complex interactions of Judaism, Jewishness, and sexuality. The course serves as a basic introduction to traditional Jewish understandings of gender and power, love and sex, and the body and embodiment. It also introduces the changes undergone by this tradition under the impact of contemporary feminism and queer theory.

REL 372. Religion and the Environment in the United States. 3 Credits. HR H
This class examines the variety of ways religious and environmental attitudes intersect in US culture, and how religious traditions can be (and have been) used both to alienate people from the environment and to foster an ethic of environmental responsibility. The course will focus on appreciating the diversity within and across religious traditions when it comes to attitudes on the environment, and understanding the different contexts and assumptions that lead to such diversity. Amidst all this diversity, similarities will also be noted in how people from all different backgrounds are drawing on the resources of their religious traditions to promote more sustainable ways of being. (Same as EVRN 372.)

REL 373. The Supreme Court and Religious Issues in the United States. 3 Credits. H
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Not open to freshmen. (Same as HIST 373.)

REL 374. Religious Perspectives on Selfhood and Sexuality. 3 Credits. H
The nature of the self in its individual and social dimensions. Self experienced and expressed in sexuality. Survey of viewpoints in religious literature. (Same as WGSS 374.)

REL 379. Prophets and Profits. 3 Credits. H
The course will examine what religious traditions have had to say about controversies in economic ethics, focusing on how religious thinkers develop arguments on the basis of methods particular to their traditions. At the same time, it presents these traditions alongside secular approaches to economic ethics. Judaism, Christianity, Islam, Hinduism, and Buddhism will be considered, as will liberalism, Marxism, feminism, and natural law theory. Topics include economic inequality, wealth accumulation, licit and illicit commerce, slavery, and profit. Attention will also be paid to the methodological challenges of the study of the topic, which necessarily brings together political economy, ethics, economic history, and hermeneutics. Students will work with a diverse array of primary sources, from ancient scriptures to modern thinkers. The ultimate goal will be to understand how it is possible for thinkers within the same religious tradition to take differing stances on economic ethics, while considering themselves wholly grounded in tradition, depending on their relationships to the modern secular approaches we discuss.

REL 380. Philosophical Issues in Religion. 3 Credits. H
This course will consider, from a philosophical perspective, some of the problems in religion which arise in the development of “Natural Theology” broadly conceived. (Same as PHIL 350.)

REL 381. Religions, Epidemics, & Pandemics. 3 Credits. H
This course looks at the relationship between religion and medicine with a focus on epidemics and pandemics throughout Western history. The course objective is to prepare the student to summarize, discuss, illustrate, and evaluate the history of religious thought and practice in relation to the history of medicine. It surveys the ancient to the modern period with a focus on the great epidemics. Topics and case studies include priestly medicine in ancient societies, modern medicine, religious responses to disease and medicine, ancient plagues and epidemics, the Black Death, the flu pandemic of 1918-1920, and the recent Covid-19 pandemic.

REL 382. Jerusalem Through the Ages. 3 Credits. H
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world’s most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, HIST 382 and JWSH 382.)

REL 387. Enemies of Ancient Israel. 3 Credits. H
An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called “Bad Guys of the Bible” using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as HIST 381 and JWSH 387.)

REL 400. Study Abroad Special Topics: _____. 1-4 Credits. H
This course is designed for the study of special topics in Religious Studies equivalent to courses at the 300 to 600 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

REL 404. Undergraduate Seminar in Religion: _____. 1-3 Credits. H
Topic, instructor, prerequisite and hours of credit to be announced in Schedule of Classes. Particular subject matter any given semester responding to student interest and taking advantage of special faculty competence. Class discussion, readings, and individual projects.

REL 405. Directed Study in Religion. 1-4 Credits. H
Investigation of a special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. May be repeated, with maximum cumulative credit of four hours. Course taken for one hour of credit may not be used to fulfill College distribution requirement. Prerequisite: One previous course in religious studies at the University of Kansas and permission of instructor.

REL 425. Religion and Film. 3 Credits. H
An examination of the treatment of religious themes through the medium of film and an examination of the attitudes of religious organizations toward films and film production. Selected films will be viewed and analyzed from the perspectives taken within religious studies.

REL 450. Popular Culture in the Muslim World. 3 Credits. NW H
A study of pop songs, television, comics, and other idioms of popular culture from different parts of the Muslim world, with attention to Muslims’ sense of humor, tragedy, aesthetics, and pertinent issues of the day. (Same as AAAS 450.)

REL 477. Gender and Religion. 3 Credits. H
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as HUM 477 and WGSS 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender & Sexuality Studies.

REL 490. Senior Seminar in Theories and Methods. 3 Credits. H
A capstone course for religious studies majors to survey methods and theories in religious studies. Prerequisite: Religious Studies major or permission of the instructor.

REL 494. Research Internship. 1-3 Credits. S
Practical research experience in Religious Studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach
project. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis. May be used as a component of the Research Experience Program (REP). Prerequisite: Permission of the instructor.

REL 499. Undergraduate Honors Research. 1-3 Credits. H
Required for Departmental Honors. May be taken more than once; total credit not to exceed 6 hours. Prerequisite: Open only to candidates for degree with departmental honors and with consent of the student's research supervisor.

REL 500. Readings in Non-English Religious Texts. 1-4 Credits.
This course provides directed readings for students in either primary or secondary texts related to religious studies utilizing material in languages other than English.

REL 507. Religion in India. 3 Credits. NW H/W
Survey of religious thought and practice in India from the Vedic period to the present.

REL 509. Religion in Japan. 3 Credits. NW H/W
Survey of religious thought and practice in Japan from the Jomon period to the present. (Same as EALC 509.)

REL 511. Buddhist Art of Korea. 3 Credits. H
Introduction to the history of Buddhist architecture, painting, sculpture and illuminated scriptures in Korea from the 4th through the 19th centuries, with particular emphasis on their stylistic, geographical, social, devotional and literary contexts. Not open to students who have taken HA 361 or HA 561. Work requirements will be greater for graduate students. (Same as HA 561.) Prerequisite: A college level introduction to Asian art history, or consent of instructor.

REL 525. Jews and Christians. 3 Credits. H/W
This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as JWSH 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor.

REL 560. Modern Jewish Thought. 3 Credits. H
This course examines how a number of prominent Jewish thinkers from the seventeenth century through the present have encountered and engaged the special challenges posed by modernity to religious traditions, including the challenge of science to the validity of miracles, the challenge of the secular state to religious authorities, and the challenge of historical studies to the integrity of scripture. Thinkers covered may include Spinoza, Mendelssohn, Frankel, Hirsch, Geiger, Hermann Cohen, Buber, Rosenzweig, Arendt, Scholem, Leo Strauss, Levinas, and Derrida. Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor.

REL 572. Judaism and Political Theology. 3 Credits. H
A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization, pluralism, democracy, and revolution. (Same as JWSH 562.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor.

REL 585. New Religious Movements (Western). 3 Credits. H
A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, rooted primarily in Christianity and Judaism.

REL 586. New Religious Movements (Nonwestern). 3 Credits. H/W
A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, which have developed primarily from sources other than Christianity and Judaism.

REL 657. Women and Gender in Islam. 3 Credits. W
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. (Not open to students who have taken REL 357.) (Same as AAAS 657.) Prerequisite: AAAS 349/REL 350, graduate standing, or permission of instructor.

REL 671. American Communes. 3 Credits. H
An examination of utopian communities in North America from the seventeenth century to the present. The course will survey the history, literature, and social dynamics of representative communal societies and movements including the Shakers, the Hutterites, the Oneida Community, Catholic religious communities, egalitarian communities, and other religious and secular communities.

REL 701. Approaches to the Study of Religion. 3 Credits.
An introduction to the various methods by which social scientists, historians, philosophers, and theologians study the meaning, influence, and significance of religion as an integral part of society and its cultural heritage. Prerequisite: Graduate student or permission of instructor.

REL 704. Russian Orthodoxy in Historical Perspective. 3 Credits.
This course examines Russian Orthodoxy as a religious system and the institution of the Russian Orthodox Church from its first appearance in Russia to the present. It focuses on beliefs and practices of the clergy and laity; institutional structures; the relationships between Church and State; interactions with non-Orthodox religious communities; responses to Soviet atheist policies; Orthodox influences on political theory, philosophy, literature, and the fine arts. (Same as REES 704.)

REL 724. Magic and Myth in Ancient Egypt. 3 Credits.
A study of the basic features of ancient Egyptian culture and religion, with an emphasis on magic, myth and archaeology. Prerequisite: An introductory course in Religious Studies or consent of instructor.

REL 734. Studies in Ritual: ____. 3 Credits.
A study of ritual theory and a comparative study of ritual activity among selected religious traditions. May be taken more than once if topic varies.

REL 761. Seminar in Western Religious Thought: ____. 3 Credits.
An analysis of the thought of selected thinkers of the Christian, Jewish, and/or Islamic traditions. May be taken more than once if subject matter varies sufficiently. Prerequisite: REL 512 or REL 539 or permission of the instructor.

REL 800. Readings. 1-4 Credits.

REL 827. Seminar in Religion, Text and Textuality. 3 Credits.
This seminar explores issues surrounding the production and use of authoritative religious texts (sacred texts) in religious traditions, including such topics as scripturality and canon, scriptural hermeneutics, and material and ritual dimensions of scriptural practice. Specific case studies and content to be selected by the instructor.

REL 837. Seminar in Religion, Media and Performance. 3 Credits.
This seminar explores aspects of performance and the media of performance in lived religion, which might include such topics as ritual, the body, mass media and the internet, and visual and material culture. Specific case studies and content to be selected by the instructor.
REL 847. Seminar in Religion, Society and Social Change. 3 Credits.
This seminar explores issues regarding the social dimensions of religiosity/lived religion, ranging from aspects of religious institutionalization, authority, and normativity to alternative religiousities and alterity. Specific case studies and content to be selected by the instructor.

REL 857. Seminar in Religious Subjectivity, Experience, and Narrative. 3 Credits.
This seminar explores issues regarding the subjective and experiential dimension of lived religiosity, including such things as religious experience and mysticism, modes of personal religious expression and embodiment, and dynamics of personal and collective religious narrative and identity. Specific case studies and content to be selected by the instructor.

REL 899. Thesis. 1-3 Credits.

Slavic, German, and Eurasian Studies Courses

BCRS 104. Elementary Bosnian/Croatian/Serbian I. 5 Credits. U F1

Beginning language course. Development of basic communicative and cultural competencies with interactive approach. Students acquire communicative skills for elementary personal and social needs. They are introduced to the basic Bosnian/Croatian/Serbian language rules and to the cultural context in which Bosnian/Croatian/Serbian discourse occurs. Through regular engagement with authentic multimedia materials they learn to recognize differing aspects of Bosnian/Croatian/Serbian and American life, culture, and values.

BCRS 105. Elementary Bosnian/Croatian/Serbian I, Honors. 5 Credits. U F1

Similar to BCRS 104 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor.

BCRS 108. Elementary Bosnian/Croatian/Serbian II. 5 Credits. U F2

Second-semester language course, continuation of BCRS 104. Further development of basic communicative and cultural competencies with interactive approach. Students continue the acquisition of communicative skills for elementary personal and social needs and their introduction to the basic Bosnian/Croatian/Serbian language rules and cultural context in which Bosnian/Croatian/Serbian discourse occurs. Through regular engagement with authentic multimedia materials they learn to recognize differing aspects of Bosnian/Croatian/Serbian and American life, culture, and values. Prerequisite: BCRS 104 or BCRS 105, or placement by examination.

BCRS 109. Elementary Bosnian/Croatian/Serbian II, Honors. 5 Credits. U F2

Continues BCRS 105. Similar to BCRS 108 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: BCRS 104 or 105. Open only to students admitted to the University Honors Program, or by permission of instructor.

BCRS 150. Beginning Bosnian/Croatian/Serbian I. 3 Credits. H

Fundamentals of B/C/S grammar, reading, speaking, and writing. Introduction to the cultural context in which B/C/S discourse occurs. Online course, designed to accommodate the needs of students regardless of age, educational background, or occupation who want to acquire some basic communicative skills in B/C/S. No previous knowledge of BCS or other foreign languages required. The course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Not open to students with credit in BCRS 104 or BCRS 105.

BCRS 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Bosnian/Croatian/Serbian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

BCRS 204. Intermediate Bosnian/Croatian/Serbian I. 3 Credits. U F3

Second-year language course. Further development of communicative and cultural competencies with a content-based, interactive approach. Students develop the ability to understand and produce short written and spoken texts in BCS through engagement with a variety of authentic materials representative of cultural diversity of the studied area. They contrast and compare features of individual BCS-speaking countries and their cultures as well as differing aspects of B/C/S and American life, culture, and values. Prerequisite: BCRS 108 or permission of the instructor.

BCRS 205. Intermediate Bosnian/Croatian/Serbian I, Honors. 3 Credits. U F3

Similar to BCRS 204 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: Open only to students who have received an A in BCRS 108 or an A or B in BCRS 109, and who are admitted to the University Honors Program, or by permission of instructor.

BCRS 208. Intermediate Bosnian/Croatian/Serbian II. 3 Credits. U F4

A continuation of BCRS 204. Prerequisite: BCRS 204.

BCRS 209. Intermediate Bosnian/Croatian/Serbian II, Honors. 3 Credits. U F4

Similar to BCRS 208 but with additional work aimed at accelerating the student's progress to proficiency and widening understanding of cultural context. Prerequisite: BCRS 204 or 205. Open only to students admitted to the University Honors Program, or by permission of instructor.

BCRS 380. Intensive Croatian. 6 Credits. U

This program consists of a six-week intensive language course in intermediate and advanced Croatian phonetics, conversation, and grammar, and is offered each summer in Croatia. In addition to the practical language work, there is a program of lectures on modern Croatian history, literature, and other cultural topics. Various excursions and tours bring the students into first-hand contact with the people, natural beauty and culture of Croatia. This program is a cooperative effort between the University of Kansas and faculty of the University of Zadar.

BCRS 504. Advanced Bosnian/Croatian/Serbian I. 3 Credits. H/W FP

A practical Bosnian/Croatian/Serbian course involving the advanced study of the grammar, reading of texts on a variety of subjects, conversation and composition. Taught in Bosnian/Croatian/Serbian. Designed for students who have had two or more years of Bosnian/Croatian/Serbian language. Prerequisite: BCRS 208, or equivalent.

BCRS 508. Advanced Bosnian/Croatian/Serbian II. 3 Credits. H/W FP

A practical Bosnian/Croatian/Serbian course involving the advanced study of the grammar, reading of texts on a variety of subjects, conversation and composition. Taught in Bosnian/Croatian/Serbian. Designed for students who have had two and one-half or more years of Bosnian/Croatian/Serbian language. Prerequisite: BCRS 504, or equivalent.
BCRS 675. Readings in Bosnian/Croatian/Serbian. 1-6 Credits. H/W FP
Individually tailored readings and independent work in Bosnian/Croatian/Serbian language and culture. Prerequisite: Two years of Bosnian/Croatian/Serbian, and consent of instructor.

Slavic, German, and Eurasian Studies Courses

CZCH 104. Elementary Czech I. 5 Credits. U F1
First semester. Essentials of grammar, practice in speaking and writing Czech. Simple readings from selected texts.

CZCH 108. Elementary Czech II. 5 Credits. U F2
Second semester. A continuation of CZCH 104. Prerequisite: CZCH 104.

CZCH 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Czech. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

CZCH 204. Intermediate Czech I. 3 Credits. U F3
Second-year course in the language with emphasis on reading, composition, and conversation. Prerequisite: CZCH 108.

CZCH 208. Intermediate Czech II. 3 Credits. U F4
A continuation of CZCH 204. Prerequisite: CZCH 204.

CZCH 675. Readings in Czech. 1-6 Credits. H/W FP
Prerequisite: Reading knowledge of Czech language, and consent of instructor.

Slavic, German, and Eurasian Studies Courses

GERM 100. German Reading Course I. 3 Credits. U
Primarily for graduate students in other departments but also open to seniors planning to pursue graduate study. Fundamentals of grammar and reading texts of medium difficulty. Does not count toward undergraduate language requirement. Previous study of German not necessary. Not open to native speakers of German.

GERM 101. German Reading Course II. 3 Credits. U
Continuation of GERM 100. Advanced grammar and reading advanced texts in the students’ respective fields. Does not count toward undergraduate language requirement. Not open to native speakers of German. Prerequisite: GERM 100 or permission of instructor.

GERM 104. Elementary German I. 5 Credits. U F1
Introductory German; no previous German required. Development of students’ balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on everyday topics and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 201. Prerequisite: GERM 104 or placement by examination.

GERM 111. Introduction to German I. 3 Credits. U
Introduction to German for special purposes; no previous German required. Provides basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Introduction to the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement.

GERM 112. Introduction to German II. 3 Credits. U
Continuation of GERM 111. Further development of basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Continued exploration of the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 111 or permission of instructor.

GERM 124. German Cinema in Context. 3 Credits. HL H
Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the films’ sources, ideologies, techniques, and artistic achievements. Does not count toward the German major or minor.

GERM 125. German Cinema in Context (Honors). 3 Credits. HL Course content similar to GERM 124. Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the films’ sources, ideologies, techniques, and artistic achievements. Does not count toward German major or minor.

GERM 128. Introduction to the Arts in German-Speaking Europe. 3 Credits. H
Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 328.

GERM 130. Global Issues in Germany. 3 Credits. H
This course explores significant current global political, social, and cultural issues in Germany such as climate change, race, commemorating the past, and energy. We will also discuss Austrian & Swiss responses to such issues. Taught in English. Does not count toward the German Studies major or minor.

GERM 132. The City of Berlin in German Culture. 3 Credits. H
Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 332.

GERM 145. Fairy Tales from the Brothers Grimm to Disney and Beyond. 3 Credits. H
Once upon a time fairy tales were not the Disneyfied children's stories we know and love. For centuries folk and fairy tales have fueled the popular imagination around the world. Though they are nowadays intended for children, this has not always been the case. This course provides an introduction to folk and fairy tales with special attention to the German
tradition. We investigate the evolution of tales from the Brothers Grimm to modern adaptations in film, television, theater, and art. Along the way, we will seek answers to questions such as: Why is the stepmother always evil? Why does the prince never have a name? And why do things always come in threes? At the same time, we will ask what fairy tales are, how their functions have evolved over time and across cultures, and how they teach and perpetuate cultural norms and stereotypes. Various interpretations of fairy tales will be explored, including their potential for social subversion through reinterpretation and rewriting. Taught in English. Can count toward German Studies concentration or minor with department approval.

GERM 201. Intermediate German I. 3 Credits. U F3
Continuation of GERM 108. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 202. Prerequisite: GERM 108 or placement by examination.

GERM 202. Intermediate German II. 3 Credits. U F4
Continuation of GERM 201. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who successfully complete this course should take GERM 301. Prerequisite: GERM 201 or placement by examination.

GERM 301. High Intermediate German I. 3 Credits. H/W FP
Continuation of GERM 201. Further development of students' knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on the topics related to professional communication and to interpret, compare, and contrast German and American business cultural phenomena. Emphasis on interaction. Recommended for students planning to take GERM 352 and GERM 462. Not open to native speakers of German. Prerequisite: GERM 201 or placement by examination.

GERM 302. High Intermediate German II. 3 Credits. H/W FP
Continuation of GERM 301. Refinement and expansion of students' use of German. Reading and discussion in German of literary and non-literary texts (spoken, written, multimedia), combined with intensive grammar review. Emphasis on better understanding German grammatical structures and acquisition of vocabulary. Not open to native speakers of German. Students who complete this course successfully should take GERM 401. Prerequisite: GERM 301 or placement by examination.

GERM 315. Magic, Murder, Monsters: German Literature and the Modern Era. 3 Credits. H
Introduction in English to German writers 1750-present featuring texts about the supernatural and monstrous. Students examine how encounters with magic and construction of monsters reflect particular cultural anxieties, fears, and ideals as relating to historical developments, industrialization, and scientific advancement. Discussion of themes such as gender, sexuality, class, race, empire, war, politics, and technology
in German-speaking Europe. Readings include works in translation by influential German writers. Open to first-year students and non-majors. GERM 315 is required for admission to all courses beyond GERM 402 except GERM 462. (Same as EURS 315.)

GERM 320. Border Crossings in German Culture. 3 Credits. HT
Taught in English. Exploration of writers, filmmakers, and artists who have emigrated from, or migrated to German-speaking Europe. Emphasis on both their transnational impact and their representations of border crossings. Topics may include exile communities before, during, and after World War II and multiculturalism in contemporary Germany, Austria, and Switzerland.

GERM 322. Study Abroad Topics in German Studies: ______. 1-5 Credits. H
This course is for 300-level German Studies courses taught in German taken while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies. Prerequisite: GERM 302 or the equivalent.

GERM 328. The Arts in German-Speaking Europe. 3 Credits. HL
Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 128.

GERM 330. Topics in: ______. 3 Credits. H
Taught in English. Interdisciplinary study of selected aspects of the society or culture of German-speaking Europe or of the European experience. Does not count toward the German major or minor.

GERM 332. Berlin in German Culture. 3 Credits. HL
Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 132.

GERM 333. German Conversation and Idioms. 3 Credits. H
Intensive practice in conversational German with instruction in proper pronunciation as well as an introduction to idiomatic usage. Only for students in the KU Summer Language Institute in Holzkirchen, Germany or in courses offered through the KU Language Training Center. Prerequisite: GERM 202 or equivalent fourth-semester German course.

GERM 334. Review of German Grammar. 3 Credits. H
Intensive review and practice of select topics in German grammar. Offered only for students in the KU Summer Language Institute in Holzkirchen, Germany or in courses offered through the KU Language Training Center. Prerequisite: GERM 202 or equivalent fourth-semester German course.

GERM 336. The German Transatlantic Experience. 3 Credits. U
Introduction to the migration of German-speaking Europeans to North America, 17th century-present. Consideration of European and North American factors motivating migration, the journey to the New World, the experiences of immigrants and their descendants, and the ways in which German-speaking Europeans shaped the multicultural history of America. Taught in English.

GERM 341. Hitler and Nazi Germany. 3 Credits. H/W
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. Particular attention is paid to the moral and ethical dilemmas facing individuals living under the Nazi regime, as well as those concerning victims and perpetrators in the Holocaust. (Same as HIST 341 and JWSH 341.)

GERM 350. Studies in German Language, History, and Culture. 3 Credits. SC H
Students visit museums and cultural sites in Cologne, Berlin, Munich, and other locations, with a focus on the 20th century. Discussion and written assignments in German. Offered only for the KU Summer Language Institute in Holzkirchen, Germany. Prerequisite: GERM 202 or equivalent fourth-semester German course.

GERM 353. German Conversation. 3 Credits. H/W/F P
Further development of practical conversational skills for students with intermediate proficiency in German. Discussion of topics from everyday German life and current affairs, based on German newspapers and magazines. May be repeated but counts only once toward the major or minor. Not open to native speakers of German. Prerequisite: GERM 202.

GERM 362. German and Germany in Global Business Culture I. 3 Credits. H/W
High-intermediate content-based course with focus on the language skills needed to engage actively with the German business world, including applying for internships and jobs. Introduction to common cultural practices in the German business environment. Use of multimedia sources to explore current events and issues in Germany and their significance within a global business context. Not open to native speakers of German. Prerequisite: GERM 202 or the equivalent.

GERM 370. German Studies Topics: ______. 3 Credits. H
Exploration of German Studies topics such as literature, film, philosophy, social institutions, language, the arts, media. Topics vary, and course may address topics across a narrow or broad time frame. Course conducted in German. May be repeated if content varies. Prerequisite: GERM 302.

GERM 375. Topics in Film of German-Speaking Europe: ______. 3 Credits. H
Examination of topics such as Expressionism, Turkish-German culture in contemporary German film, popular filmmaking, post-unification film, German literature as film, German film and national identity. Topics and periods vary. Prerequisite: GERM 302.

GERM 400. Introduction to German Literary Masterpieces. 3 Credits. H/W/F P
For students enrolled in the KU Summer Language Institute in Germany. Selected works of major German Language writers of the 19th and 20th centuries. Not open to native speakers of German. Prerequisite: GERM 302.

GERM 401. Advanced German I. 3 Credits. H/F P
Continuation of GERM 302. Expansion and refinement of proficiency in German (speaking, listening, reading, writing), increased understanding of German grammatical structures, development of a more sophisticated vocabulary, and introduction to stylistics through discussion and analysis of literary and nonliterary texts. Students successfully completing GERM 401 may take all other GERM courses at the 400 and 500 levels. Prerequisite: GERM 302.
GERM 402. Advanced German II. 3 Credits.  H F P
Continuation of GERM 401. Development of advanced proficiency in German through analysis and discussion of literary and nonliterary texts and practice in advanced composition. Emphasis in both discussions and papers on style and rhetoric and on developing skill in textual analysis. Focus on advanced German grammar and on style and idiomatic expression in spoken and written German. Prerequisite: GERM 401.

GERM 411. German Culture 1150-1750. 3 Credits.  H F P
Exploration of major cultural periods and movements within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 315 and GERM 401.

GERM 412. German Culture 1750-Present. 3 Credits.  H F P
Exploration of major cultural periods and movements 1750-present within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 315 and GERM 401.

GERM 421. Exiles, Migrants, and Refugees in German Literature and Film. 3 Credits.  H What does it mean to cross a border in today’s world? This course explores different examples of “border crossing” in German-speaking Europe and in their broader European and transatlantic context. Engaging with literature, film, and works of art from the 20th to 21st centuries, we will address topics such as fictional representations of America; exile literature before and during World War II; the Berlin Wall and divided Germany; and migration and multiculturalism in contemporary Germany, Austria, and Switzerland. This course is taught in German. Prerequisite: GERM 302.

GERM 453. Investigation and Conference: ______. 1-3 Credits.  H/W F P
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work is required. Not open to native speakers of German.

GERM 462. German and Germany in Global Business Culture II. 3 Credits.  H/W F P
Advanced content-based course with focus on the language skills needed to examine the German social market economy, legal forms of companies, and the business planning process. Use of multimedia sources to explore current German business and economic issues in international, transatlantic, and global contexts. Team research project and presentation. Prerequisite: GERM 362 or permission of instructor.

GERM 475. Topics in German Studies: ______. 3 Credits.  H F P
Exploration of cultural forms such as literature, film, philosophy, social institutions, linguistics, the arts, and the press. Examination of how cultural meaning is produced and interpreted. Topics vary, and course may address topics across a narrow or broad time frame. May be repeated if content varies. Prerequisite: GERM 315 and GERM 401.

GERM 482. Literature and Culture of German-Speaking Europe 1830-1918. 3 Credits.  H F P
Exploration of literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401.

GERM 501. Advanced German III. 3 Credits.  H F P
Focus on usage-based grammar of contemporary German. Extensive reading and analysis of grammatical structures in context and integration of form, meaning, and use. Exploration of grammatical structures using contemporary electronic textual analysis tools. Prerequisite: GERM 402.

GERM 560. Structure of the German Language. 3 Credits.  H F P
This course provides an overview of the structure of modern standard German. Students will explore different levels of the linguistic system of German (including phonology, morphology, and syntax) and complete practical exercises. Prerequisite: GERM 315 and GERM 401.

GERM 575. Topics in Genre: ______. 3 Credits.  H F P
Study of the definition, style, form, and content of a specific literary genre in German-language literature and the social, cultural, political, and economic factors that led to its emergence. Consideration of the genre's suitability for particular writers or periods. Topic and period vary. May be repeated if content varies. Prerequisite: GERM 315 and GERM 401.

GERM 579. Investigation and Conference: ______. 1-3 Credits.  H/W F P
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work is required. Prerequisite: GERM 315 and GERM 401.

GERM 580. Senior Capstone Course: German-Speaking Europe Today. 3 Credits.  H F P
Students write and present a research paper on an aspect of contemporary German-speaking Europe. Focus on learning or refining the linguistic and research-related skills needed to produce a research paper. Students synthesize their knowledge of German Studies with coursework they have completed in other disciplines. Conducted in German and English. Required of all German Studies majors in senior year. Prerequisite: GERM 315, GERM 401, and senior standing.

GERM 598. Research for Departmental Honors. 3 Credits.  H F P
Research for a departmental honors project, on a topic chosen in conjunction with the faculty advisor. Emphasis on independent study and writing. Open to students with previous coursework in German at the 400 level, an overall 3.0 GPA, and at least a B+ average in advanced work in German. Prerequisite: GERM 315, GERM 401, senior standing, and permission of Undergraduate Advisor.

GERM 599. Departmental Honors Project. 3 Credits.  H F P
Continuation of GERM 598. Course consists of completion of Departmental Honors project. Quality of project determines whether student receives credit only or Honors in German. Prerequisite: GERM 598.

Slavic, German, and Eurasian Studies Courses

PCS 120. Introduction to Peace and Conflict Studies. 3 Credits.  H T H
An introduction to the content and methods of peace studies. Peace studies is a multidisciplinary and interdisciplinary approach to the study of war and peace. Building on and integrating the work of various fields of study, the course examines the causes of structural and direct violence within and among societies and the diverse ways in which humans have sought peace, from conquest and balance of power to international organizations and nonviolent strategies.

PCS 329. History of War and Peace. 3 Credits.  H L H
A study of the changing nature of warfare and the struggle to bring about peace. Topics include pacifism, the "military revolution" that created the first professional armies; the development of diplomatic immunity, truces, and international law; the peace settlements of Westphalia, Utrecht, Vienna, Versailles, and San Francisco; the creation of peace movements and peace prizes; the evolution of total war, civil war, and guerrilla warfare involving civilians in the twentieth century; the history of the League of
Nations and United Nations; and the rise of intergovernmental and non-governmental organizations.

**PCS 350. Study Abroad in Topics in Peace and Conflict Studies: _____**. 1-5 Credits. H
This course is designed for the study of special topics in Peace and Conflict Studies at the Junior/Senior level. Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in Peace and Conflict Studies. May be repeated for credit if content varies.

**PCS 375. The Refugee Experience: Stories of Statelessness and Citizenship. 3 Credits.**
This course draws on materials from multiple disciplines in the humanities including literature, history, philosophy, and cultural studies, to examine how belonging or not belonging to a state shapes the human experience. Literary texts, theoretical reflections, and historical studies on the subject of mass migration in Europe in the middle of the 20th-century will prepare for discussions of contemporary statelessness as well as responses to the refugee condition in a global context. (Same as HUM 375.)

**PCS 550. Classics of Peace Literature. 3 Credits. HL H**
A study of influential proposals for world peace from Erasmus’ The Complaint of Peace (1515) to the 1995 Hague Appeal for World Peace. Selected writings by such authors as Erasmus, Hugo Grotius, Jean-Jacques Rousseau, Immanuel Kant, Henry Thoreau, Henri Dunant, Berth von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin Luther King, Jr., are considered. (Same as EURS 550.) Prerequisite: HUM 204 or HUM 205.

**PCS 555. Topics in Peace and Conflict Studies: _____**. 3 Credits. H
This course offers specialized or interdisciplinary perspectives on historical, political, social, and religious movements, institutions, societies, agencies, or texts dealing with conflict resolution. May be repeated for credit with different topics.

**PCS 556. Education for Peace and Non-Violence. 3 Credits. H**
This course reviews the history, aims and methodology of peace education. Topics include examination of the roots and causes of social violence; educational initiatives that seek to reduce structural and direct violence; and teaching methodologies in the field of multicultural education and pedagogy.

**PCS 560. Directed Study in Peace and Conflict Studies. 1-3 Credits. H**
Practicum or research under the supervision of a faculty member and with the approval of the Peace and Conflict Studies Minor. Individual conferences, reports, and papers, and, in the case of practicum, supervised experience with an approved organization or agency. Prerequisite: Completion of three core courses in the minor.

**PCS 565. The Literature of Human Rights. 3 Credits. H**
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as EURS 565 and GIST 560.) Prerequisite: Junior/Senior standing or consent of instructor.

**PCS 650. Senior Seminar in Peace and Conflict Studies. 3 Credits. H**
This capstone seminar provides a sustained and in-depth study of a particular topic in Peace and Conflict Studies, to be chosen by the instructor. Each student is required to carry out a substantive research project to produce a term paper or comparable work. Required for completion of minor. Prerequisite: Students must have completed at least nine hours in the minor before enrolling.

**PCS 801. Peace and Conflict Studies: Texts and Methods. 3 Credits.**
An interdisciplinary study of the historic literature on human conflict and peacemaking and the methods used to analyze and interpret the literature. Peace literature encompasses a range of genres that include religious teachings, philosophical essays, political proposals, treaties and conventions, fiction, poetry, and drama. Approaches to solutions to human conflict cover a spectrum including political revolution, diplomacy and treaties, international law and organizations, and world government. Students produce a substantial graduate-level research project. PCS 801 is required for the Graduate Certificate in Peace and Conflict Studies, and to be taken as early as possible in the students program of study. Open only to graduate students.

**PCS 850. Peace and Conflict Studies Research Seminar. 3 Credits.**
The capstone of the Graduate Certificate program, providing a sustained and in-depth study of a particular topic in Peace and Conflict Studies, to be chosen by the instructor. The members of the seminar have the option of doing a research project or supervised practicum resulting in a substantial paper that integrates their work in the program. Required for the Graduate Certificate and open only to graduate students. Prerequisite: At least six hours of course work toward the Graduate Certificate including PCS 801.

**Slavic, German, and Eurasian Studies Courses**

**PERS 110. Elementary Iranian/Dari/Tajik Persian I. 5 Credits. U F1**
Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Five hours of class per week.

**PERS 120. Elementary Iranian/Dari/Tajik Persian II. 5 Credits. F2**
Continuation of PERS 110. Vocabulary acquisition, pronunciation, grammar, and writing. Course includes reading of simple texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Five hours of class per week. Prerequisite: PERS 110 or departmental permission.

**PERS 210. Intermediate Iranian/Dari/Tajik Persian I. 3 Credits. U F3**
A continuation of PERS 120. Course emphasizes oral and written work in Persian. Systematic review of grammar and introduction to reading in cultural texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 120 or departmental permission.

**PERS 220. Intermediate Iranian/Dari/Tajik Persian II. 3 Credits. U F4**
A continuation of PERS 210. Course emphasizes oral and written work in Persian. Systematic review of grammar and introduction to reading in cultural texts. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students...
to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 210 or departmental permission.

**PERS 310. Advanced Iranian/Dari/Tajik Persian I. 3 Credits. U FP**
Enhancement of speaking, comprehension, reading and writing abilities in Persian. Readings from Persian literature introduced. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 220 or placement exam that establishes a level of proficiency in Persian suited to Advanced Persian I.

**PERS 320. Advanced Iranian/Dari/Tajik Persian II. 3 Credits. U FP**
Enhancement of speaking, comprehension, reading and writing abilities in Persian. Readings from Persian literature introduced. Main emphasis on Iranian Persian; acquaintance with basic differences between Iranian, Dari and Tajik Persian. Interested students to be provided with additional opportunities to improve their linguistic skills in the dialect of their interest. Prerequisite: PERS 310 or placement exam that establishes a level of proficiency in Persian suited to Advanced Persian II.

**PERS 593. Directed Study in Persian Culture and Literature:**
This course is designed for students seeking proficiency in Persian beyond PERS 320. The instructor directs the student through readings and materials in Persian that add to the student's substantive knowledge of Persian culture in Iran, Afghanistan, and Tajikistan. May be taken multiple semesters for credit with varying content. Prerequisite: PERS 320 and consent of instructor.

**Slavic, German, and Eurasian Studies Courses**

**PLSH 104. Elementary Polish I. 5 Credits. U F1**
First Semester. Essentials of grammar, practice in reading, writing, and speaking Polish.

**PLSH 105. Elementary Polish, Honors. 5 Credits. U**
Honors version of PLSH 104, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor.

**PLSH 108. Elementary Polish II. 5 Credits. U F2**
Second semester. A continuation of PLSH 104. Prerequisite: PLSH 104.

**PLSH 109. Elementary Polish II, Honors. 5 Credits. U**
A continuation of PLSH 105. Honors version of PLSH 108, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: PLSH 104 or PLSH 105. Open only to students admitted to the University Honors Program, or by permission of instructor.

**PLSH 177. First Year Seminar:**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Polish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**PLSH 204. Intermediate Polish I. 3 Credits. U F3**
Second-year course in the language with emphasis on reading, composition, and conversation. Prerequisite: PLSH 108.

**PLSH 208. Intermediate Polish II. 3 Credits. U F4**
A continuation of PLSH 204. Prerequisite: PLSH 204.

**PLSH 504. Advanced Polish I. 3 Credits. H/W FP**
A practical Polish language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Polish. Designed for students who have had two or more years of Polish language. Prerequisite: PLSH 208 or equivalent.

**PLSH 508. Advanced Polish II. 3 Credits. H/W FP**
A practical Polish language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Polish. Designed for students who have had two and one-half or more years of Polish. Prerequisite: PLSH 504 or equivalent.

**PLSH 675. Readings in Polish Language and Literature. 1-6 Credits. H/W FP**
Directed individual readings on various topics concerning Polish literature and/or language. Prerequisite: Two years or four semesters of Polish, and consent of instructor.

**Slavic, German, and Eurasian Studies Courses**

**REES 110. Understanding Russia and Eastern Europe. 3 Credits. SC H/W**
A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students will watch a movie every two weeks as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 310.

**REES 111. Understanding Russia and Eastern Europe, Honors. 3 Credits. H/W**
A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students in the course watch one feature film from Russia or Eastern Europe per week as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 311. Prerequisite: Open only to students in the University Honors Program, or by permission of instructor.

**REES 177. First Year Seminar:**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Russian, East European, and Eurasian Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**REES 220. Societies and Cultures of Eurasia. 3 Credits. W**
The purpose of this course is to acquaint students with the societies and cultures of Eurasia (primarily Central Asia, Russia, and the Caucasus region). This interdisciplinary course reviews the geography, history, economics, social and political structures, religion, literature, music, and
art of the region. The focus is mainly on the twentieth-century and topics of interest include the collapse of empires, the rise and fall of communism, the disintegration of the USSR and rise of authoritarianism, nationalism, and various forms of Islam in the region.

REES 221. Societies and Cultures of Eurasia, Honors. 3 Credits. W

The purpose of this course is to acquaint students with the societies and cultures of Eurasia (primarily Central Asia, Russia, and the Caucasus region). This interdisciplinary course reviews the geography, history, economics, social and political structures, religion, literature, music, and art of the region. The focus is mainly on the twentieth-century and topics of interest include the collapse of empires, the rise and fall of communism, the disintegration of the USSR and rise of authoritarianism, nationalism, and various forms of Islam in the region. Open only to students admitted to the University Honors Program or by permission of instructor.

REES 310. Understanding Russia and Eastern Europe. 3 Credits. NW S/W

A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students in the course watch one feature film from Russia or Eastern Europe per week as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 110.

REES 311. Understanding Russia and Eastern Europe, Honors. 3 Credits. SC S

A multidisciplinary introduction to Russia and Eastern Europe. The course explores the geography, history, and politics of this complex region, as well as the diverse cultures, ethnicities, languages, and religions. A special focus of the course is the current socio-political situation in Russia and Eastern Europe in the context of the fall of communism nearly 30 years ago and the ongoing post-communist transition. Students in the course watch one feature film from Russia or Eastern Europe per week as a visual representation of issues discussed via scholarly articles and chapters, newspaper articles and news clips, video lectures, documentary and animated films, music videos, and literature. This course is offered at the 100 and 300 level with additional assignments at the 300 Level. Not open to students with credit in REES 111.

REES 480. Topics in Russian and East European Studies: ____. 1-3 Credits. H

Interdisciplinary examination of topics involving two or more disciplines in Russian, East European, and Eurasian studies.

REES 492. Research Methods in Russian, East European, and Eurasian Studies. 3 Credits. H

Development of interdisciplinary research skills and familiarity with resources and issues in the study of Russian, East European, and Eurasian Studies. Preparation for REES 496.

REES 496. Capstone Research Seminar in Russian and East European, and Eurasian Studies. 3 Credits. H

Interdisciplinary original research conducted using at least one REES language and resulting in a research paper. Prerequisite: REES 492.

REES 498. Directed Readings. 1-3 Credits. H

Individual and supervised readings in selected areas of Russian, East European, and Eurasian Studies. Prerequisite: Prior permission of instructor and either CREES director or associate director.

REES 499. Capstone Research Seminar in Russian, East European, and Eurasian Studies, Honors. 3 Credits. H

Research and writing of a substantial paper, involving interdisciplinary original research and use of sources in at least one REES language, and presentation of this paper to an Honors committee of three REES faculty members. This thesis must be substantially different from any other Honors thesis. Prerequisite: REES 492.

REES 510. Understanding Central Asia. 3 Credits. NW S/W

An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in REES 710. (Same as GEOG 590.) Prerequisite: One previous interdisciplinary area studies course or the instructor's permission.

REES 704. Russian Orthodoxy in Historical Perspective. 3 Credits.

This course examines Russian Orthodoxy as a religious system and the institution of the Russian Orthodox Church from its first appearance in Russia to the present. It focuses on beliefs and practices of the clergy and laity; institutional structures; the relationships between Church and State; interactions with non-Orthodox religious communities; responses to Soviet atheist policies; Orthodox influences on political theory, philosophy, literature, and the fine arts. (Same as REL 704.)

REES 710. Understanding Central Asia. 3 Credits.

An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in REES 510 or GEOG 590.

REES 799. Directed Readings in Russian and East European Studies. 1-5 Credits.

REES 895. Special Problems in Area Studies: ____. 3 Credits.

Interdisciplinary examination of topics involving two or more of the cooperating disciplines in Russian and East European studies.

REES 897. Research. 1 Credits.

Enrollment to fulfill Masters continuous enrollment rule. Prerequisite: Completion of all degree requirements except submission of seminar paper or comprehensive examination.

REES 898. Seminar in Russian and East European Studies. 3 Credits.

Mastery of interdisciplinary research skills, and knowledge of resources and scholarship on the study of Russian, east European, and Eurasian Studies.

REES 899. Capstone Research Seminar in Russian, East European, and Eurasian Studies. 3 Credits.

Research, write, and present a professional-quality paper, involving interdisciplinary original research, consultation with REES faculty, and
substantial use of sources in at least one REES language. Prerequisite: REES 898.

**Slavic, German, and Eurasian Studies Courses**

**RUSS 104. Elementary Russian I. 5 Credits. U F1**
First semester. Five hours of basic language acquisition and oral practice per week. Essentials of grammar, practice in comprehending, speaking, reading, and writing Russian.

**RUSS 105. Elementary Russian I, Honors. 5 Credits. U**
Honors version of RUSS 104, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: Open only to students admitted to the University Honors Program, or by permission of instructor.

**RUSS 108. Elementary Russian II. 5 Credits. U F2**
Second semester. Five hours of basic language acquisition and oral practice per week. Essentials of grammar, practice in comprehending, speaking, reading, and writing Russian. A continuation of RUSS 104. Prerequisite: RUSS 104.

**RUSS 109. Elementary Russian II, Honors. 5 Credits. U**
A continuation of RUSS 105. Honors version of RUSS 108, with additional work aimed at accelerating students progress to proficiency and expanding their cultural competence. Prerequisite: RUSS 104 or RUSS 105. Open only to students admitted to the University Honors Program, or by permission of instructor.

**RUSS 110. Intensive Elementary Russian. 10 Credits. U F1/F2**
Intensive course in elementary Russian providing the student with a complete survey of Russian grammar, and proficiency in understanding, reading, and speaking basic Russian. Twenty contact hours per week. Same content as RUSS 104 and RUSS 108 combined.

**RUSS 150. Beginning Russian I. 3 Credits. U**
Fundamentals of Russian grammar, reading, speaking, and writing. Course designed to accommodate the needs of students regardless of age, educational background, or occupation. No previous knowledge of Russian or other foreign languages required.

**RUSS 152. Beginning Russian II. 3 Credits. U**
Continuation of RUSS 150. Does not fulfill BA foreign language requirement. Prerequisite: RUSS 150 or equivalent.

**RUSS 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Russian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**RUSS 204. Intermediate Russian I. 5 Credits. U F3**
This course is designed to develop speaking, reading, and listening proficiency within the context of a review of grammar. Prerequisite: RUSS 108, RUSS 110, or equivalent.

**RUSS 208. Intermediate Russian II. 5 Credits. U F4**
Continuation of RUSS 204. Completes the undergraduate foreign language requirement. The course is designed to develop speaking, reading, and listening proficiency within the context of detailed grammatical review. Prerequisite: RUSS 204 or equivalent.

**RUSS 212. Second Year Russian I. 3 Credits. U F3**
A review of Russian and further development of all four language skills. This course is intended for non-specialists and for students fulfilling the language requirement. Prerequisite: RUSS 108 or RUSS 110.

**RUSS 216. Second Year Russian II. 3 Credits. U F4**
Continuation of RUSS 212. More focused development of students’ oral skills and reading abilities. This course fulfills the college foreign language requirement. Prerequisite: RUSS 204 or RUSS 212.

**RUSS 250. Continuing Russian I. 3 Credits. U**
Fundamentals of Russian grammar, reading, speaking, and writing. Course designed to accommodate the needs of students regardless of age, educational background, or occupation. Does not count towards the fulfillment of the undergraduate language requirement. Does not count towards the undergraduate major in Slavic. Prerequisite: RUSS 152 or equivalent.

**RUSS 252. Continuing Russian II. 3 Credits. U**
A continuation of RUSS 250. Does not count towards the fulfillment of the undergraduate language requirement. Does not count towards the undergraduate major in Slavic. Prerequisite: RUSS 250 or equivalent.

**RUSS 504. Advanced Russian I. 3 Credits. H/W FP**
A practical Russian language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Russian. Designed for students who have had four semesters of Russian. Prerequisite: RUSS 208 or RUSS 216.

**RUSS 508. Advanced Russian II. 3 Credits. H/W FP**
A practical Russian language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Russian. Designed for students who have had two and one-half or more years of Russian language. Prerequisite: RUSS 504.

**RUSS 512. Russian for the Professions I. 3 Credits. U FP**
This course focuses on the active mastery of language structures and vocabulary needed for people using Russian in professional capacities, particularly such as business and journalism. Materials will be drawn from the current Russian press and electronic media. Designed for students who have had basic language training and want to develop specialized language skills. Prerequisite: RUSS 208 or RUSS 216.

**RUSS 516. Russian for the Professions II. 3 Credits. U FP**
A continuation of RUSS 512. Prerequisite: RUSS 504, RUSS 512, or RUSS 522.

**RUSS 522. Problems in Translating Russian into English I. 3 Credits. H/W FP**
Introduction to the process of translating texts from Russian, focusing on kinds of translation, lexical and textual factors, and the revision process. Prerequisite: Two years minimum of Russian language courses.

**RUSS 550. Advanced Conversation, Composition, and Grammar in Russia: Summer Program. 6 Credits. H/W FP**
Held in Russia. Twenty-four hours of class work weekly, plus lectures and excursions, for six weeks at St. Petersburg University. Prerequisite: RUSS 208 or the equivalent of twenty-two hours of Russian language courses.

**RUSS 657. Readings in Russian. 1-6 Credits. H/W FP**
Prerequisite: Two years of Russian, and consent of instructor.

**RUSS 700. Classics of Russian Culture. 3 Credits.**
This advanced Russian language class explores the monuments of Russian culture (1700-1980) in the context of the country’s history, customs, artistic traditions and literary trends. It is designed to develop reading, writing, and speaking skills of advanced language students and includes the preparation of written and oral reports in Russian. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

**RUSS 704. Contemporary Russian Culture. 3 Credits.**
This advanced Russian language class explores issues in contemporary Russian culture (literature and the arts, societal trends and issues, politics, and national life) based on Russian film, television, and print materials. It is designed to develop reading, writing, and speaking skills of advanced language students who wish to develop high levels of fluency, accuracy, and idiomatic expressiveness. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

**RUSS 708. Russian Phonetics and Grammar. 3 Credits.**
A survey of fundamental issues in Russian phonetics, morphology, and syntax. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing the major linguistic categories of Russian. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

**RUSS 712. Introduction to Russian Literature. 3 Credits.**
Readings for this advanced Russian language class will be drawn from representative prose, poetry, and drama of 19th or 20th century authors. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing the major texts and literary trends of the Russian tradition. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

**RUSS 716. Stylistics. 3 Credits.**
Practical examination of the features of stylistic registers available in contemporary Russian, ranging from slang to colloquial speech to educated journalistic, scientific, and literary styles. The course will develop reading, writing, and speaking skills necessary for discussing and analyzing stylistic registers. Includes the preparation of both written and oral reports. Discussion format; conducted entirely in Russian. Prerequisite: RUSS 508 or equivalent.

**Slavic, German, and Eurasian Studies Courses**

**SLAV 101. Introduction to Slovene. 1 Credits. H**
Teaches skills for survival communication in Slovene and basic orientation in Slovene culture. Blended short course, designed to give a student rudimentary linguistic and cultural preparation for functioning in Slovene-speaking environment. Recommended for participants of study abroad in Slovenia. No previous knowledge of Slovene or other foreign languages required. The course does not count toward undergraduate language requirement.

**SLAV 104. Elementary Slavic Language I: ______. 5 Credits. U F1**
First semester. Essentials of grammar, practice in speaking and writing a Slavic language. Simple readings from selected texts. Course may be used to teach the fundamentals of any Slavic language, for example, Slovenian, Macedonian, Slovak, etc.

**SLAV 140. Understanding Russia. 3 Credits. HT H/W**
An introduction to literature, history, political systems, spirituality, and the visual arts from a Russian perspective.

**SLAV 141. Understanding Russia, Honors. 3 Credits. HT H/W**
An introduction to literature, history, political systems, spirituality, and the visual arts from a Russian perspective.

**SLAV 144. Survey of Russian Literature in Translation. 3 Credits. HL H/W**
A survey of the principal works of Russian literature including such authors as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Pasternak, Solzhenitsyn, and others.

**SLAV 145. Survey of Russian Literature in Translation, Honors. 3 Credits. HL H/W**
A survey of the principal works of Russian literature including such authors as Pushkin, Gogol, Dostoevsky, Tolstoy, Chekhov, Pasternak, Solzhenitsyn, and others.

**SLAV 148. Introduction to Slavic Folklore. 3 Credits. HL H/W**
An introduction to the various forms of folklore among the Slavic peoples, with particular emphasis on the folk literature, customs, and artifacts of Russia, Poland, and the South Slavic countries.

**SLAV 149. Introduction to Slavic Folklore, Honors. 3 Credits. HL H/W**
An introduction to the various forms of folklore among the Slavic peoples, with particular emphasis on the folk literature, customs, and artifacts of Russia, Poland, and the South Slavic countries.

**SLAV 152. Robots, Rockets, Radios: Progress and Technology in 20th-Century Slavic Literatures. 3 Credits. HL**
This course introduces students to masterworks of literature written in response to the technological advances of the 20th century by some of the best authors in Czech, Polish, Russian, Ukrainian, and formerly Yugoslav literatures. The writers covered include Karel Capek, Yuri Olesha, Valerian Pidmohylny, Ivo Andric, Stanislav Lem, Vaclav Havel, and Oksana Zubuzhko. Literary readings are supplemented with screenings of several films from the region. The course analyzes the ideological contexts in which these texts appeared, such as Soviet communism’s dependence on technology and industrialization, post-World War II disillusionment with ideas of progress, and the Space Race.

**SLAV 177. First Year Seminar: ______. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Slavic. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: Open to Freshmen only (less than 30 hours).

**SLAV 205. Muslim Lives: Politics, Culture, and Society. 3 Credits. S**
The course provides a general introduction to Muslim communities and societies by surveying some of the major aspects of Muslims’ lived experiences from the early Islamic period to the modern globalized world. It will challenge the essentialized notion of a “Muslim world,” which is usually presented as a monolithic society. Through the course, students will develop a basic understanding of the rich diversity of Muslim communities in terms of cultural mores, religious practices, and sociopolitical conditions. Religious and sociopolitical practices will be analyzed in their ethical and moral perspectives. (Same as GIST 205.)

**SLAV 230. The Vampire in Literature, Film, and Television. 3 Credits. H**
The vampire has been a fascinating and terrifying imagined other in human society for centuries. This course begins with the historical development of the vampire legend in Eastern Europe leading up to its contemporary Russian and English literary and cinematic variations. We will contextualize the various incarnations of the vampire and endeavor to consider the ethical significance of such a figure, through questions such as: What are the moral implications of becoming or being a vampire subject? Are there different ethical rules at play? Are vampires always unethical?

**SLAV 250. Introduction to Translation and Translation Theory. 3 Credits. H**
This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has
been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat oral interpretation in detail. (Same as AAAS 250, GERM 240, LING 250 and SPAN 202.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

SLAV 305. Language, Gender, and Sexuality. 3 Credits. S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, GIST 303, JWSH 305 and WGSS 325.)

SLAV 310. Modern Turkey: Culture and Society. 3 Credits. H/W
As a country that is geographically in the middle of a strategic global region, a key NATO ally, a candidate for EU membership, and representing a mix of democratic traditions, military coups, and authoritarian leaders combined with periods of rapid and drastic socioeconomic transformation, for one reason or another, Turkey seems to always be a country under the spotlight. This course is designed to give an overview of Modern Turkey and familiarize the student with its history, society and culture. Topics to be covered include the early republican period, ethnic and religious minorities, religion and secularism, music, cuisine, women, gender and sexuality, religious and national holidays, cinema and TV, among others. The primary purpose of this course is to help students develop necessary analytical and interpretive skills to identify, compare, and analyze Turkish cultural practices, products and perspectives as they relate to basic social, political, and historical contexts. No background knowledge of Turkey or the Turkish language is required. (Same as GIST 310 and TURK 310.)

SLAV 316. The Peoples and Cultures of Southeastern Europe Through Film. 3 Credits. HL H
This course presents an introduction to the study of the culture of the South Slavs and other peoples of Southeastern Europe, combining background modules in geography, linguistic culture, history, folklore and contemporary cultural criticism with critical viewings of artistic films. The course serves as an introduction to humanistic inquiry about the peoples and cultures of Southeastern Europe.

SLAV 317. The Peoples and Cultures of Southeastern Europe Through Film, Honors. 3 Credits. HL H
This course is similar in content to SLAV 316, but with an additional honors project. Prerequisite: Eligibility for or admission to the university Honors Program.

SLAV 318. Jews and Slavs in Eastern Europe. 3 Credits. H
Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups have shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. “Jews and Slavs” examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both groups. Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as JWSH 318.)

SLAV 320. Graphic Novels as Memory. 3 Credits. H
This course examines the interaction between literature and memory, in particular how authors respond to major historical events and contribute to shaping the collective memory of those events. Students will read graphic novels inspired by memories of the Holocaust and Communism. Through the visual and textual mix of the graphic novel, we will consider the impact of historical upheavals on the lives of ordinary individuals, drawing connections to contemporary national and global socio-political problems. Students will write on these topics in a variety of academic and non-academic genres, including: journal, article summary, synthetic essay, analytical essay, and reflection essay/creative writing. (Same as GIST 321.)

SLAV 322. Soviet and Post-Soviet Russian Cinema. 3 Credits. H
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences) and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. (Same as FMS 322.)

SLAV 330. Russian Business Culture. 3 Credits. H
The course examines how geography, history, and traditions of Russia impact its contemporary business practices. It addresses influence of Russian culture on business communication (verbal and nonverbal), relationship building, the role of manager, the functioning of teams, negotiation, and decision making. Topics also include cultural aspects of relationship between businesses and the state, entrepreneurialism, advertising, and consumerism. Students examine business practices that foreign businessmen encounter in Russia.

SLAV 340. The Language Landscape of Eastern Europe. 3 Credits. H
Topics include current events, such as the resurgence of ethnonationalism, in which language and identity projects are aided by the internet and social media as well as case studies of emergent language-based nations. Students will gain an appreciation of the key role that languages play in creating a diverse Eastern Europe. This course will help prepare students for careers in international business, diplomacy, and politics, among others. This course is offered at the 300 and 500 level with additional assignments as the 500 level. Not open to students with credit in SLAV 341 or SLAV 540.

SLAV 341. The Language Landscape of Eastern Europe, Honors. 3 Credits. HT H
Topics include current events, such as the resurgence of ethnonationalism, in which language and identity projects are aided by the internet and social media as well as case studies of emergent language-based nations. Students will gain an appreciation of the key role that languages play in creating a diverse Eastern Europe. This course will help prepare students for careers in international business, diplomacy, and politics, among others. This course is offered at the 300 and 500 level with additional assignments as the 500 level. Not open to students with credit in SLAV 340 or SLAV 540. Prerequisite: Membership in the College Honors Program or consent of instructor.

SLAV 370. War and Violence Russian Literature and Film. 3 Credits. H
This course focuses on artistic representations of violence resulting from historical events such as World War II, Soviet collectivization, the Gulag, and political purges. We consider Soviet literature and film, including works by Isaac Babel, Andrei Platonov, Anna Akhmatova, and Alexander Solzhenitsyn. Readings in English. The course is offered at the 300 and 500 levels, with additional assignments at the 500 level.

SLAV 379. Topics in _____. 1-3 Credits. H/W
Exploration of Slavic cultural forms such as literature, film, linguistics, arts, and press. Topics vary, and course may address topics across a narrow or broad time frame. May be repeated if content varies.

SLAV 495. Senior Capstone Seminar. 3 Credits. H/W
The Senior Capstone Seminar offers undergraduate majors an opportunity to define, design and execute a substantial research/creative project under the mentorship of a faculty member. The project integrates the knowledge and skills gained in the coursework for the major and across the undergraduate curriculum, and demonstrates the students competence in the field of Slavic studies. Prerequisite: Slavic major status, senior standing.

SLAV 499. Honors Thesis. 3 Credits. H/W
Independent study and preparation of honors thesis. Required of all students working for a degree with honors in Slavic languages and literatures.

SLAV 500. Russia Today. 3 Credits. H/W
Study and discussion of contemporary problems in Russia and the former Soviet Union; readings in Russian, based on articles in newspapers, journals, etc. Conducted in Russian. Prerequisite: RUSS 208 or equivalent.

SLAV 503. Post-Soviet Communication. 3 Credits. H/W
The course is designed to acquaint students with the shifting manner of public discourse in Post-Soviet Russia and help them to explore in some depth cross-cultural communication between America and Russia. In addition to contemporary and historical background on Russian communicative practices, students examine discourse in business development, mass media, marketing, and advertising. All readings in English. (Same as COMS 503).

SLAV 506. Masterworks of Polish and Czech Literature. 3 Credits. H/W
A survey of West Slavic Literature and Civilization (Polish and Czech) from its beginnings to the present with emphasis on the most important trends: Renaissance, Romanticism, Positivism/Realism, Modernism and Avant-guard; Socialist realism, and Post-modernism. The course combines lecture, discussion and small group activities. Movie clips, recordings, and slides are used to reflect various cultural dimensions of West Slavic Civilization. No knowledge of Polish or Czech is required. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 706. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 508. South Slavic Literature and Civilization. 3 Credits. H/W
An introductory survey of the literature and culture of the South Slavic peoples: the Slovenes, Croats, Bosniacs, Serbs, Montenegrins, Macedonians and Bulgarians. No language required.

SLAV 510. The Russian Literary Genius. 3 Credits. H/W
Topics and problems in Russian cultural history as treated in the masterworks of Russian literature. Readings selected from the works of Pushkin, Tolstoy, Dostoevsky, Pasternak, Bulgakov, Solzhenitsyn, and other great Russian writers. Readings in English, no prerequisite for non-Russian majors. Russian majors will do some of the readings in Russian.

SLAV 516. Love, Lust and Liberty: Polish and Czech Film Adaptations. 3 Credits. H/W
A comparative study of several most representative and best works of 19th- and 20th-century Polish and Czech fiction and drama and their film adaptations. By providing a broad cultural and historical background of the works, the course offers a thorough introduction to modern culture of Poland and the Czech Republic. Readings and discussions are in English, and no knowledge of Polish or Czech is required.

SLAV 522. The Grammatical Categories of Russian: Linguistic Units, Functions and Meanings. 3 Credits. H/W
This course covers the main grammatical categories of Russian, including word formation, case, animacy, voice and reflexive verbs, imperatives, aspect, and word order. It is intended not only for linguists but anyone seeking a better understanding of the grammatical systems of Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 722. Prerequisite: Two years of Russian language study or the equivalent.

SLAV 526. The Pragmatics of Slavic Languages. 3 Credits. H/W
This course introduces students to the study pragmatics: the relationship between utterances, the contexts in which these utterances were produced, and their reception and interpretation by the speakers. It investigates how grammatical choices on the sentence level (such as case, aspect, impersonalization, and more) affect and are influenced by the context in which utterances are produced, and how social variables such as gender, age, peer pressure, institutional power, and other factors are influential in production and interpretation of meaning. Other topics include extra-linguistic elements such as gesture and prosody, (im)politeness expressions, the pragmatics of narratives, and cross-cultural differences in contexts and reception of specific speech genres. Prerequisite: RUSS 508 or consent of instructor.

SLAV 530. Introduction to Russian Poetry. 3 Credits. H/W
An introduction to the principles of Russian versification and to masterpieces of Russian poetry selected from the 18th, 19th, and 20th centuries. Students will learn to read, translate, and analyze poems in terms of rhyme, meter, euphony, metaphor, and other prosodic features. Emphasis will be placed upon preparing students for independent study and appreciation of Russian poetry in the original. Prerequisite: Language proficiency.

SLAV 532. Dostoevsky. 3 Credits. H/W
A study of the life and works of Fyodor Dostoevsky. In translation. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 732. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 534. Tolstoy. 3 Credits. H/W
A study of the life and works of Leo Tolstoy. In translation. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 734. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 540. The Language Landscape of Eastern Europe. 3 Credits. H/W
Topics include current events, such as the resurgence of ethnonationalism, in which language and identity projects are aided by the internet and social media as well as case studies of emergent language-based nations. Students will gain an appreciation of the key role that languages play in creating a diverse Eastern Europe. This course will help prepare students for careers in international business, diplomacy, and politics, among others. This course is offered at the 300 and 500 level with
additional assignments as the 500 level. Not open to students with credit in SLAV 340 or SLAV 341.

SLAV 550. The Russian Novel in the Age of Realism. 3 Credits. H/W
This course traces the evolution of the Russian novel from its beginnings with Pushkin and through the novels of Turgenev, Goncharov, Dostoevsky, Tolstoy, and others. In translation. Russian majors will read most works in Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 760. Prerequisite: Two years of Russian language or consent of the instructor.

SLAV 558. Readings in Slovene. 1-6 Credits. H
Individually tailored coursework in Slovene, from beginning to advanced level. Can include development of all four skills depending on the needs of the student. Prerequisite: Consent of instructor.

SLAV 556. The Woman Question in Nineteenth-Century Russian Literature. 3 Credits. H
An exploration of the "woman question" in nineteenth-century Russia as treated in literary texts. Authors to be included are: Tolstoy, Turgenev, Dostoevsky, Chekhov, as well as women writers such as Karolina Pavlova and Evgenia Tur, and prominent literary and social critics. Readings in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 764. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 557. Post-Soviet Literature. 3 Credits. H
A survey of post-Soviet literary art, from approximately 1985 to the present, dealing with a range of subjects including the emergence of literature from the strictures of socialist realism and its relationship to concepts of postmodernism and postcolonialism. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 767. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 570. War and Violence Russian Literature and Film. 3 Credits. H
This course focuses on artistic representations of violence resulting from historical events such as World War II, Soviet collectivization, the Gulag, and political purges. We consider Soviet literature and film, including works by Isaac Babel, Andrei Platonov, Anna Akhmatova, and Alexander Solzhenitsyn. Readings in English. The course is offered at the 300 and 500 levels, with additional assignments at the 500 level.

SLAV 572. Russian and East European Science Fiction. 3 Credits. H
A comprehensive introduction to Russian, Soviet, and East European science fiction as it emerged in dialogue with utopian thinking, fantasy writing, and other cultural trends, and to how it responded to wider social contexts. Particular emphasis will be placed on the unique features of the Slavic science fiction tradition and its relationship to the dominant Western forms of the genre. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 772. Prerequisite: Any previous course in SLAV or RUSS.

SLAV 600. Biography of a City: _____ . 3 Credits. H/W
Examination in depth of the historical, social, intellectual, and artistic development of one or more major Slavic urban centers.

SLAV 626. The Cultural Impact of Ottoman Empire on the South Slavs. 3 Credits. H
An examination of the cultural development of the South Slavs in the context of the Ottoman invasions and subsequent rule (14th-19th century), focusing on the frontier aspects of the Balkans, military culture, religion, economics and banditry, as well as other aspects of material and folk culture. No language requirement. Prerequisite: SLAV 316 or SLAV 508; or consent of instructor.

SLAV 630. Slavic Folklore. 3 Credits. H/W
Introduction to the phenomena and problems of Slavic folklore. Prerequisite: Two years of Russian on the college level.

SLAV 664. Soviet Russian Literature: 1930-1990. 3 Credits. H/W
Readings in the period, in all genres. In translation; no prerequisite for non-Russian majors. Russian majors are required to have senior standing and read most works in Russian.

SLAV 668. Nabokov. 3 Credits. H/W

SLAV 675. Readings in Slavic Studies (English). 1-3 Credits. H
Directed readings on Slavic culture in English. For non-majors. Prerequisite: Instructor permission.

SLAV 678. Readings in Slavic Linguistics. 1-6 Credits. H/W
Directed individual readings on various topics concerning Slavic linguistics. Prerequisite: Proficiency in at least one Slavic language, and consent of instructor.

SLAV 706. Masterworks of Polish and Czech Literature. 3 Credits.
A survey of West Slavic Literature and Civilization (Polish and Czech) from its beginnings to the present with emphasis on the most important trends: Renaissance, Romanticism, Positivism/Realism, Modernism and Avant-guard; Socialist realism, and Post-modernism. The course combines lecture, discussion and small group activities. Movie clips, recordings, and slides are used to reflect various cultural dimensions of West Slavic Civilization. No knowledge of Polish or Czech is required. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 506.

SLAV 710. Introduction to Slavic Languages and Linguistics. 3 Credits.
The Slavic languages and peoples, including briefly: their origin, prehistory, and early culture. Basic linguistic methodology as applied to Slavic material from the beginnings of Slavic linguistics to the present.

SLAV 712. Russian Poetry: Twentieth Century. 3 Credits.
Readings from the works of the major poets, in Russian. Prerequisite: Language proficiency.

SLAV 722. The Grammatical Categories of Russian: Linguistic Units, Functions and Meanings. 3 Credits.
This course covers the main grammatical categories of Russian, including word formation, case, animacy, voice and reflexive verbs, imperatives, aspect, and word order. It is intended not only for linguists but anyone seeking a better understanding of the grammatical systems of Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 522. Prerequisite: Two years of Russian language study or the equivalent.

SLAV 723. Soviet and Post-Soviet Russian Cinema. 3 Credits.
A comprehensive introduction to Soviet cinema and its legacies in post-Soviet Russia. The course will examine what distinguished Soviet film industry from those in other countries and the ways in which it impacted the development of cinema worldwide. Films are analyzed both as artistic works (with attention to formal qualities, cinematic styles, and influences)
and as documents that provide insight into the socio-political contexts of the times when they were made. We will also discuss influential contributions by Soviet filmmakers to our understanding of what makes film unique as an art form. The course is offered at the undergraduate and graduate level, with additional assignments at the graduate level. Not open to students with credit in SLAV 322/FMS 322. (Same as FMS 722.) Prerequisite: Graduate standing or instructor permission.

**SLAV 726. Chekhov. 3 Credits.**
A study of the life and works of Anton Chekhov. Open to senior Russian majors and graduate students. Readings in Russian. Prerequisite: Three years of Russian or the equivalent.

**SLAV 732. Dostoevsky. 3 Credits.**
A study of the life and works of Fyodor Dostoevsky. In translation. No prerequisite. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 532.

**SLAV 734. Tolstoy. 3 Credits.**
A study of the life and works of Leo Tolstoy. In translation. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 534.

**SLAV 740. Introduction to Graduate Studies in Slavic Languages and Literatures. 3 Credits.**
This course is an introduction to the skills required of students doing graduate degrees in Slavic languages and literatures; areas covered include 1) introduction to literary theory and criticism, 2) bibliography and research methods, including database management software, 3) preparation and presentations of a research/conference paper, 4) technology training, including web design, on-line portfolio, and digital humanities, and 5) professional ethics and awareness of the academic market and alternative careers. We will also be working on practical, professionally useful goals, such as how to (better) make use of technology, how to create a CV and modify it for different positions, how to write an abstract, and how to produce a conference paper. Course requirements will include a variety of smaller assignments and two larger projects, a web-based professional portfolio and an 8 to 10-page conference paper.

**SLAV 748. Old Church Slavic. 3 Credits.**
A course in the first written language of the Slavs (9-12th centuries AD), with discussion of Indo-European, Baltic and Common Slavic background. Prerequisite: Two years of Russian or the study of another ancient Indo-European language.

**SLAV 754. Seminar in Slavic Verbal Aspect. 3 Credits.**
A detailed examination of the morphology and usage of verbal aspect in Russian and other Slavic languages, which is a particularly troublesome area for foreign learners of Russian. Prerequisite: SLAV 522.

**SLAV 760. The Russian Novel in the Age of Realism. 3 Credits.**
This course traces the evolution of the Russian novel from its beginnings with Pushkin and through the novels of Turgenev, Goncharov, Dostoevsky, Tolstoy, and others. In translation. Russian majors will read most works in Russian. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 550. Prerequisite: Two years of Russian language or consent of the instructor.

**SLAV 762. Russian Theatre and Drama from Stanislavski and Chekhov to the Present. 3 Credits.**
A study of the development of Russian theatre and dramatic literature from 1898 to the present. Lectures and readings in English. (Same as THR 725.)

**SLAV 764. The Woman Question in Nineteenth-Century Russian Literature. 3 Credits.**
An exploration of the "woman question" in nineteenth-century Russia as treated in literary texts. Authors to be included are: Tolstoy, Turgenev, Dostoevsky, Chekhov, as well as women writers such as Karolina Pavlova and Evgenia Tur, and prominent literary and social critics. Readings in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 564.

**SLAV 767. Post-Soviet Literature. 3 Credits.**
A survey of post-Soviet literary art, from approximately 1985 to the present, dealing with a range of subjects including the emergence of literature from the strictures of socialist realism and its relationship to concepts of postmodernism and postcolonialism. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 567.

**SLAV 772. Russian and East European Science Fiction. 3 Credits.**
A comprehensive introduction to Russian, Soviet, and East European science fiction as it emerged in dialogue with utopian thinking, fantasy writing, and other cultural trends, and to how it responded to wider social contexts. Particular emphasis will be placed on the unique features of the Slavic science fiction tradition and its relationship the dominant Western forms of the genre. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in SLAV 572.

**SLAV 804. Comparative Slavic Linguistics. 3 Credits.**
An examination of the development of the Slavic languages from the Common Slavic period to the present, proceeding from Indo-European. Prerequisite: Graduate standing in Russian.

**SLAV 824. Proseminar in Methods of Teaching Slavic Languages I. 1-3 Credits.**
Required for all teaching assistants, assistant instructors engaged in the teaching of Slavic languages and persons planning for careers in teaching Slavic languages. Combines discussion of theoretical teaching concepts with practical solution of problems arising concurrently in Slavic language courses. Students enrolled for two or three hours will study advanced Slavic grammar topics and stylistics as they apply to the teaching of Slavic languages.

**SLAV 899. Ph.D. Seminar Slavic Linguistics. 3 Credits.**
Topics in Slavic linguistics. Content will vary. May be repeated. Prerequisite: Ph.D. student in Slavic Languages and Literatures.

**SLAV 999. Dissertation. 1-9 Credits.**
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis.

**Slavic, German, and Eurasian Studies Courses**

**TURK 104. Elementary Turkish I. 5 Credits. U F1**
Basic language acquisition, including essentials of grammar, speaking, and writing standard Turkish.

**TURK 108. Elementary Turkish II. 5 Credits. U F2**
Continuation of TURK 104. Prerequisite: TURK 104.

**TURK 177. First Year Seminar: ______. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Turkish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics
are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**TURK 204. Intermediate Turkish I. 3 Credits. U F3**
Second-year course in Turkish language with emphasis on reading, composition, and conversation. Prerequisite: TURK 108.

**TURK 208. Intermediate Turkish II. 3 Credits. U F4**
Continuation of TURK 204. Prerequisite: TURK 204.

**TURK 310. Modern Turkey: Culture and Society. 3 Credits. H/W**
As a country that is geographically in the middle of a strategic global region, a key NATO ally, a candidate for EU membership, and representing a mix of democratic traditions, military coups, and authoritarian leaders combined with periods of rapid and drastic socioeconomic transformation, for one reason or another, Turkey seems to always be a country under the spotlight. This course is designed to give an overview of Modern Turkey and familiarize the student with its history, society and culture. Topics to be covered include the early republican period, ethnic and religious minorities, religion and secularism, music, cuisine, women, gender and sexuality, religious and national holidays, cinema and TV, among others. The primary purpose of this course is to help students develop necessary analytical and interpretive skills to identify, compare, and analyze Turkish cultural practices, products and perspectives as they relate to basic social, political, and historical contexts. No background knowledge of Turkey or the Turkish language is required. (Same as GIST 310 and SLAV 310.)

**TURK 314. Turkish Culture Through Film and Literature. 3 Credits. H**
This course introduces the student to Turkish culture, with a focus on the 20th and 21st centuries, mainly through films and literature. Among the topics are Turkey's geography, politics, history, religion, feminism, poetry, music and cuisine. This interdisciplinary course does not require any previous knowledge of Turkey or the Turkish Language; it is open to both undergraduate and graduate students. Representative works of major authors and film directors will be discussed and analyzed in their historical, political and theoretical contexts. The course is offered at the 300 and 500 levels, with additional assignments at the 500-level.

**TURK 514. Turkish Culture Through Film and Literature. 3 Credits. H**
This course introduces the student to Turkish culture, with a focus on the 20th and 21st centuries, mainly through films and literature. Among the topics are Turkey's geography, politics, history, religion, feminism, poetry, music and cuisine. This interdisciplinary course does not require any previous knowledge of Turkey or the Turkish Language; it is open to both undergraduate and graduate students. Representative works of major authors and film directors will be discussed and analyzed in their historical, political and theoretical contexts. The course is offered at the 300 and 500 levels, with additional assignments at the 500-level. Prerequisite: REES 550 or permission of instructor.

**TURK 675. Readings in Turkish:** ___. 3 Credits. U FP
Prerequisite: Two years of college-level Turkish and consent of instructor. May be repeated for credit if content varies.

**Slavic, German, and Eurasian Studies Courses**

**UKRA 104. Elementary Ukrainian I. 5 Credits. U F1**
First semester. Five hours per week of recitation and drill in the spoken language. Essentials of grammar, practice reading, writing and speaking Ukrainian.

**UKRA 108. Elementary Ukrainian II. 5 Credits. U F2**
Second semester. Continuation of UKRA 104. Prerequisite: UKRA 104.

**UKRA 177. First Year Seminar:** ___. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Ukrainian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**UKRA 204. Intermediate Ukrainian I. 3 Credits. U F3**
Second year course in Ukrainian language with emphasis on reading, composition, and conversation. Prerequisite: UKRA 108.

**UKRA 208. Intermediate Ukrainian II. 3 Credits. U F4**
Second semester. Continuation of UKRA 204. Prerequisite: UKRA 204.

**UKRA 504. Advanced Ukrainian I. 3 Credits. H**
This is a practical Ukrainian language course that will help students acquire advanced-level proficiency in the skills of speaking, reading, writing, and listening. Cultural understanding and pragmatic competence are given special emphasis. Taught in Ukrainian. Designed for students who have had two or more years of Ukrainian language. Prerequisite: UKRA 208 or consent of instructor.

**UKRA 508. Advanced Ukrainian II. 3 Credits. H**
This is a practical Ukrainian language course that will help students acquire advanced-level proficiency in the skills of speaking, reading, writing, and listening. Cultural understanding and pragmatic competence are given special emphasis. Taught in Ukrainian. Designed for students who have had two-and-a-half or more years of Ukrainian language. Prerequisite: UKRA 504 or consent of instructor.

**SOC 104. Elements of Sociology. 3 Credits. SC S**
The study of social life, including how human groups are organized, how they change, and how they influence individuals. Consideration is given to a variety of human organizations and social institutions and how these groups and institutions both determine, and are determined by, human beings. This course may not be taken for credit by those who have taken SOC 304.

**SOC 105. Elements of Sociology, Honors. 3 Credits. SC S**
The study of social life, including how human groups are organized, how they change, and how they influence individuals. Consideration is given to a variety of human organizations and social institutions and how these groups and institutions both determine, and are determined by, human beings. Open only to students on dean's honor roll or enrolled in Honors Program, or consent of instructor. May not be taken by those who also have credit for SOC 304.

**SOC 130. Comparative Societies. 3 Credits. NW S/W**
Description and analysis of the culture, structure, and development of societies that are historically unrelated to the traditions of Western civilization.

**SOC 131. Comparative Societies, Honors. 3 Credits. NW S**
Description and analysis of the culture, structure, and development of societies that are historically unrelated to the traditions of Western Civilization. Open only to students enrolled in the University Honors program or by consent of instructor. May not be taken by students who have credit in SOC 130.

**SOC 150. Self and Society. 3 Credits. SI S**
Discusses the way our identities, values, and behavior have been and continue to be shaped by social and situational factors. Attention is paid to the influence of factors like language, culture, social roles, specific social institutions, and broad structures of inequality and power on how we see ourselves and others. May not be taken by anyone who has completed SOC 305 or its equivalent.

SOC 160. Social Problems and American Values. 3 Credits. SF S
This course is designed to explore competing explanations for the causes of, and cures for, the enduring problems of American society. The course critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. May not be taken by anyone who has already completed SOC 306 or its equivalent.

SOC 161. Social Problems and American Values, Honors. 3 Credits. SF S
Explores competing explanations for the causes of, and cures for, the enduring problems of American society. Critically analyzes dominant definitions of social problems, the political and economic roots of these problems, and the public policies aimed at reducing them. This course may not be taken for credit by those who have taken SOC 160 or SOC 306. Open only to students admitted to the University Honors Program or by consent of instructor.

SOC 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Sociology. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

SOC 199. Data I: Dealing with Data. 3 Credits. S
Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to derive knowledge and insights from data. This course teaches students the core concepts of inference and computing, working with real behavioral, economic, geographic, physical, social, and text data. Students obtain basic statistics training from a computational perspective using simulation to answer questions, explore problems, and delve into social issues surrounding data analysis such as privacy and design. (Same as ECON 199, POLS 199 and PSYC 199.)

SOC 200. Sociological Introduction to: _____ 3 Credits. S
A sociological introduction to selected topics of current interest in Sociology. Please refer to the schedule of classes for current topics offered. Check the Sociology Department website for course descriptions of current special topics course offerings. May be repeated for credit as topics vary.

SOC 220. Sociology of Families. 3 Credits. SC S
Analysis of the family as a social institution primarily in the U.S. context. Topics considered are: current and historical changes in how the family is constituted, contrasting sociological theories of family relationships, sexuality in relation to family life, the coexistence of love and hate in families, family dissolution and reformation, and the care of children. A key theme is diversity: social class, gender, race/ethnicity, and age. May not be taken by anyone who has already taken SOC 308 or its equivalent.

SOC 230. Introduction to Social Inequality in the U.S.. 3 Credits. S
By the end of this course, students will be able to describe the major dimensions of inequality in the U.S. (including race, class, and gender), understand the structural basis of inequality, critically assess how inequality exists in major social institutions, and understand how inequalities in race, class, and gender shape social interaction.

SOC 280. Introduction to Social Research. 3 Credits. S
An introduction to the nature and methods of social research, including both qualitative and quantitative approaches. Topics may include: hypothesis formulation and testing; how to design a research project, collect and analyze data; elementary statistical procedures; and ethical issues. Prerequisite: Six hours of Sociology credit, including SOC 104/ SOC 105/SOC 304. A minimum GPA of 2.3 in all Sociology courses is strongly recommended for students planning to enroll in this course.

SOC 295. Study Abroad Topics in: _____. 1-6 Credits. S
This course is designed for the study of special topics in Sociology at the freshman/sophomore level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. No more than 6 hours of SOC 295 or SOC 495 may count towards the Sociology major or minor.

SOC 304. Principles of Sociology. 3 Credits. SC S
An introduction to sociological concepts, methods, and substantive findings more intensive than that provided in SOC 104. Students may take this course in lieu of SOC 104 to satisfy requirements for the major and the minor. This course may not be taken for credit by those who have taken SOC 104.

SOC 305. Principles of Self and Society. 3 Credits. SI S
Discusses the way our identities, values, and behavior have been and continue to be shaped by social and situational factors. Attention is paid to the influence of factors like language, culture, social roles, specific social institutions, and broad structures of inequality and power on how we see ourselves and others. This course provides a more intensive coverage of the subject matter than that provided in SOC 150. May not be taken by anyone who has already taken SOC 150 or its equivalent.

SOC 306. Principles of Social Problems. 3 Credits. SF S
This course is designed to explore competing explanations for the causes of, and cures for, the enduring problems of American society. The course critically analyzes dominant definitions of social problems, the political and economic roots of those problems, and the public policies aimed at reducing them. This course provides a more intensive coverage of the subject matter than that provided in SOC 160. May not be taken by anyone who has already completed SOC 160 or its equivalent.

SOC 308. Principles of Family Sociology. 3 Credits. SC S
Analysis of the family as a social institution primarily in the U.S. context. Topics considered are: current and historical changes in how the family is constituted, contrasting sociological theories of family relationships, sexuality in relation to family life, the coexistence of love and hate in families, family dissolution and reformation, and the care of children. A key theme is diversity: social class, gender, race/ethnicity, and age. This course provides a more intensive coverage of the subject matter than that provided in SOC 220. May not be taken by anyone who has already taken SOC 220 or its equivalent.

SOC 312. Population and Society. 3 Credits. S
An examination of the causes and consequences of population change in the United States and around the world with special focus on the impact of changes in populations on social institutions. We use social demographic perspectives to explore patterns of birth, illness, death, population concentration, population migration and immigration, and changes in these over time. Prerequisite: One of the following: SOC 104, SOC 110, SOC 150, SOC 160, or SOC 220.

SOC 320. Organizations in Society. 3 Credits. S
An analysis of complex organizations in modern societies. Attention is given to the rise of bureaucracy in business and government; the way organizations influence and respond to their social cultural environments; and the various roles that individuals play in organizations. Prerequisite: A principal course in sociology.
SOC 321. Wealth, Power, and Inequality. 3 Credits. S
This class focuses on economic inequality and the political and social forces that create and sustain it in the United States and internationally. The variables of race, ethnicity, status, and gender are analyzed as they relate to the differences in the distribution of wealth and power, and attention is paid to how these multiple variables shape opportunities.

SOC 324. Being Deviant in America. 3 Credits. S
In this course students will study traits, conditions, actions, and behaviors that violate social norms and elicit negative societal reactions. This includes the social, cultural, and individual factors that explain deviance; motivations behind deviant behavior; and efforts by society to control deviants. In short, you will undertake a sociological examination of those on the margins of society and societal efforts to “deal with” them. (Same as AMS 324.)

SOC 326. Health, Gender, and Society. 3 Credits. S
Comparative examination of the health status of men and women in relation to key elements of contemporary societies, including not only medicine and health care services, but also systems of social inequality and stratification, cultural constructions of gender, and social policies. Emphasis will be placed on the U.S.; however, the course also will provide international comparisons and an overall global context.

SOC 330. American Society. 3 Credits. S
The social structure and organization of American society with special reference to long-term and recent social changes. (Same as AMS 330.) Not open to students with credit for SOC 132. Prerequisite: A principal course in sociology.

SOC 332. The United States in Global Context. 3 Credits. S
Examines the influence abroad of US culture, policies and practices and the impact of other countries on US culture, society, and politics. Among the topics that may be examined are race, ethnicity, colonialism, imperialism, migration, technology, communications and media, popular culture, language, health, domestic and transnational organizations, as well as economic, political, religious, military and educational institutions. (Same as AMS 332).

SOC 335. American Society, Honors. 3 Credits. SC S
The social structure and organization of American society with special reference to long-term and recent social changes. Not open to students who have credit for AMS 330 or SOC 330. Open to students in the University Honors Program, students on the dean's honor roll, and by permission of the department.

SOC 340. The Community. 3 Credits. S
Structures, functions, and processes of change in local communities; interrelations of towns and small cities with rural areas and metropolitan centers with their hinterlands. Prerequisite: A principal course in sociology or ANTH 108 or ANTH 308.

SOC 341. Urban Sociology. 3 Credits. S
Examination of the process of urbanization in modern societies, including the size, growth, functions, and ecology of cities and systems of cities; such urban social institutions as the economy, politics, and the family; and major contemporary urban policies and problems. Each topic will be analyzed from several sociological perspectives. Prerequisite: A principal course in sociology.

SOC 342. Sociology of Immigration. 3 Credits. S
International migration reshapes politics, economics, social relations, and racial/ethnic identities. Using the United States and other countries as case studies, we explore the variations among immigrant groups and their experiences in social institutions such as the family, religion, education, labor market, and government. We consider the influence of national origin, gender, class, and culture on immigration and reception experiences, as well as issues of assimilation, transnationalism and identity. Prerequisite: SOC 104.

SOC 343. American Racial and Ethnic Relations. 3 Credits. S
Race is an ever-present feature of American life. It is a polarizing topic in our politics and a prism through which we perceive social differences. In this course, we examine the major institutions and societal forces that shape the reality of race in thought and in material reality. Moving from past to present, we consider how slavery, segregation, the urban ghetto, and mass incarceration contribute to the social construction of race. By reviewing traditions of research on race in the U.S. and abroad, students will analyze how legacies of race and racism in the U.S. continue to influence our identities, culture, politics, and relations of power and inequality.

SOC 350. Transnational Migration. 3 Credits. S
A historically-conscious, sociological exploration of political, cultural and health issues involved in transnational migration, this course invites the student to situate current transnational migration within specific historical social processes within both postcolonial Africa and the postcolonial West. The course examines parallels from the experience of migration in other parts of the world, specifically Asia and Latin America. The aim is an understanding and appreciation of both the interconnectedness of the world's peoples and, crucially, of the world's histories.

SOC 352. Sociology of Sex Roles. 3 Credits. S
An examination of sex roles, sex stereotypes, and major issues involved in sex-role research. Emphasizes explanations of inequality between American males and females in the family and at work. The course is designed around lectures, panels, workshops, and films.

SOC 355. Protest, Activism, and Dissent. 3 Credits. S
This course explores theories and concepts related to collective behavior and social movements. We will examine why people protest, what strategies and tactics activists use and why, and the conditions under which protest succeeds or fails. We will focus on contemporary social movements in the United States, examining dissent and activism of both the political left and right.

SOC 360. Sociology of Social Control. 3 Credits. S
This course examines changing methods of social control in society. Social control can be formal (e.g., law and criminal justice system) or informal (e.g., families, peer groups). This course examines the ways that we, as a society, attempt to respond to matters such as deviance, illness, crime, and poverty. This course will survey the many varieties of formal and informal social control faced by individuals in society, and the ways in which individuals resist and conform to various disciplinary and control regimes. Prerequisite: a principal course in Sociology.

SOC 363. The Sociology of Culture. 3 Credits. S
This class explores the role of cultural forms (music, film, fashion, food, and art) in everyday life. Throughout the semester, we will critically engage with core topics in cultural sociology, including, how culture reflects the social order, the role of culture in reproducing race, gender, and class inequality, the processes by which cultural forms are socially created and received, and the relationship between culture and historical change.

SOC 364. Society, Popular Culture, and the Media. 3 Credits. S
An overview of sociological theory and research on culture created and distributed through the mass media and its role in shaping our common sense interpretations of our daily lives. Topics include the social organization of the media, the relation between popular culture and the media, themes communicated in various elements of popular culture, and how various groups interpret cultural messages and incorporate them in their lives.
SOC 380. Elementary Statistics and Data Analysis. 3 Credits. S
An introduction to social scientific data analysis, with an emphasis on descriptive and inferential statistics. Specific topics include sampling, measures of association and correlation, significance testing, the logic of causal inference, the use of computer programs for data analysis, multivariate analysis, and the critical evaluation of social science research findings. Prerequisite: MATH 101.

SOC 384. Environment, Power, and Justice. 3 Credits.
This course is focused on the relationships between human beings and the planet (the environment, resources, places). We explore the major insights of sociology (primarily how to understand power and inequity) and apply them to our relationship with climate change, environmental justice, water, land, soil, food, viruses, animals, each other, and the future. Using the concept of the sociological imagination that connected one’s biography with one’s historical and class context as a starting point, this course expands C. Wright Mills’ foundational insight to incorporate both the background knowledge of environmental relationships between society and the planet. This course also builds a research skillset to understand, debate, and develop them at the same time. Skill-building assignments develop research skills related to library searching, research question formation, assessing and using valid sources, sociological observation, interviewing, and data analysis. Combined with a diverse set of readings, we explore the social, cultural, political, legal, and ethical debates that shape the contemporary and unfolding environmental issues. Topics may include environmental justice, environmental social movements, science communication, sustainability, biodiversity, environmental ethics, policy, land use change, and greenwashing. (Same as EVRN 384.)

SOC 385. Environmental Social Problems. 3 Credits. S
This course introduces key concepts in environmental sociology. The core goal of environmental sociology is to understand the relationship between society and the planet. Environmental sociology explores the relationships between social systems and the ecosphere, including interdisciplinary work that explores interactions within and between institutions, social groups, and natural and built environments. Environmental Sociology also includes study of the origins and impacts of technology, the social causes of environmental change, the environmental causes of social change, and the consequences of social inequalities and power relationships for socio-environmental dynamics. As human beings we live in the natural world and use its resources including the air, soil and water, yet we often separate ourselves from nature. Environmental sociology opens a dialogue between people and nature that will be explored through readings, discussion and assignments related to important environmental issues in Kansas and beyond, including climate change, energy production and consumption, material inequality, environmental justice, transportation, food and agriculture, and ethical frameworks. In particular this course uses sociological theory and sociological environmental research to illuminate the identification, evolution, and potential solution pathways to environmental social problems. (Same as EVRN 385.)

SOC 386. Sociology of Global Food. 3 Credits. U
The Sociology of Global Food offers a critical examination of the global food system since the Industrial Revolution. Topics include the industrialization of agriculture, sustainable agriculture, and the role of food and agriculture in organizing society. This course discusses the emergence of current debates around food and agriculture including food activism, technological developments, human/environment relationships, and labor issues. There is a lab component to this course. (Same as EVRN 386.) Prerequisite: Junior standing.

SOC 400. Sociology Special Topics: ______. 3 Credits. S
The study of selected topics of current interest in Sociology. Check the notes section in the schedule of classes for the description of this course. May be repeated for credit as topics vary.

SOC 401. Sociology Special Topics, Honors: ______. 3 Credits. S
The study of selected topics of current interest in Sociology. Contact department for course descriptions of current offerings. May be repeated for credit as topics vary. Open only to students in the University Honors Program, or consent of the instructor. Prerequisite: Enrollment in the University Honors Program, or consent of the instructor.

SOC 405. Sociology of Aging and the Life Course. 3 Credits. S
A survey of theory and research in social gerontology, giving primary attention to aging and the aged as affected by social organization, including such social institutions as familial, economic, political, and health care; organizational processes such as social stratification; and living environments including community and housing. In these contexts, certain demographic, cross-cultural, social-psychological, and physiological aspects of aging will also be considered.

SOC 410. Sociology of Death and Dying. 3 Credits. S
The primary purpose of this course is to provide an understanding of the ways in which the experiences of death and dying are shaped by social structures. This course will also acquaint the student with the social implications of death and dying and to examine death-related behaviors, both individual and collective, through which these aspects of life are experienced. This course covers theoretical, practical, cross-cultural and historical aspects of death and dying. Social, psychological, biomedical, economic and legal issues surrounding death and dying are explored. Students examine their own ideas, feelings and attitudes towards death and dying, and reflect on the origins and significance of those beliefs. Prerequisite: Junior or Senior Standing.

SOC 424. Sociology of Health and Medicine. 3 Credits. S
This introductory course in medical sociology examines how social factors influence health and the organization of medical services. Students explore the distribution and experiences of illnesses across key social categories (e.g., gender, social class, etc.) The course also addresses contemporary issues in health and medicine, such as how health care systems vary cross-nationally, the training of health care workers, patient-physician relationships, and the use of medical technologies.

SOC 425. Sociology of Global Health. 3 Credits. S
The course explores social dimensions of health throughout the world. It examines how infectious and degenerative diseases have reflected and affected the demographics, social structure, economy, and culture of societies, and how societies have mobilized their political, economic, social and cultural resources to deal with health challenges. It focuses in particular on the role of socioeconomic inequality—both within and across countries—in shaping the emergence, spread, prevention, and treatment of disease. Prerequisite: A sociology course at the 100 or 200-level.

SOC 427. School and Society. 3 Credits. S
This course examines education as a social institution and the reciprocal relationship between schools and society. It focuses particularly on the relationship between education and inequality and on education in the U.S., but also includes international comparisons. Prerequisite: Junior or Senior standing or permission of instructor.

SOC 430. Cross-Cultural Sociology. 3 Credits. W
A systematic introduction to cross-cultural issues from the standpoint of sociology, designed to acquaint students with the full range of substantive and methodological issues that arise in comparative sociological inquiry, with a primary focus on non-western societies. Specific topics to be addressed may include war and peace, stratification and inequality, race
and ethnicity, and political authority and power, all viewed in the light of cross-cultural research and theory.

SOC 436. Ethnicity in the United States. 3 Credits. S
An examination of the history, sociology, and culture of U.S. ethnic categories (e.g., American Indians, Latinos, Asian Americans, Jewish Americans, Irish Americans). The specific group studied varies from semester to semester. Course may be repeated for credit with different topics. (Same as AMS 436.)

SOC 437. Global Ethnic and Racial Relations. 3 Credits. W
This course uses written and visual materials to examine race, ethnicity, and nationalism around the world. Emphasis is on ways in which social forces, gender roles, sexual practices, cultural patterns, and political organization work together to construct and reinforce ethnic, racial, and national identities, boundaries, movements, and conflicts. Historical and contemporary comparisons are made between the U.S. and countries in Africa, Asia, the Americas, the Caribbean, Europe, the Pacific Islands, and the Middle East. (Same as AAAS 437 and AMS 437.)

SOC 450. Gender and Society. 3 Credits. S
An overview of sociological theory and research on the social practices constructing men and women as "opposites" and creating systematic inequality between them in class-, race-, and nation-specific ways. We consider arguments and evidence that gender is something we are, something we do, a part of every social institution, and a major aspect of how we are organized as a society.

SOC 454. Women and Work. 3 Credits. S
Sociological investigation of women's changing relationship to paid and unpaid labor in the economy and the family. Several theories are compared in these contexts: Characteristics of employed women, including occupational distribution and pay; women's experiences in "traditional" and "nontraditional" occupations, including professions and management; socialization and education for employment; integration of marriage, housework, and child care; anti-discriminatory laws and policies. Prerequisite: A principal course in Sociology.

SOC 455. Society and the Economy. 3 Credits. S
An analysis of how economic organizations such as firms and markets are embedded within broader social structures with attention being given to such topics as: world economic crises and their social bases; capitalist and socialist economies; primitive and advanced economic systems; multinational corporations; the nature of housework; and the transformation of economic systems.

SOC 461. Competing Perspectives on Crime and Deviance. 3 Credits. S
Advanced analysis of the social organization and cultural processes of deviance, including crime, violence, and social control. The course surveys and applies sociological, as well as criminological, theoretical perspectives in deviance. Particular attention is paid to the economic, gender, sexual, and racial inequalities and diversity of experience that shapes, and is shaped by, deviance in American society.

SOC 462. Violence and Society. 3 Credits. S
This class applies a sociological perspective to the various forms of violence that beset modern society. We will consider a range of behavior and practices commonly considered violent, including suicide, harassment, sexual assault, street crime, gun violence, terrorism, and genocide. We will address the extent, impact, and sociological significance of these forms of violence. We will also consider the failures and successes of various organizational, institutional, and legal solutions to violence.

SOC 463. Sociology of Surveillance. 3 Credits. S
An overview of social science theory and research on the practices for keeping close watch on people. Surveillance strategies are adopted in the interests of security, governance, and commerce, but also for personal care, empowerment, resistance, and even play. We consider a host of social, political, ethical, and legal questions related to long-standing notions of privacy, civil liberties, and personal autonomy.

SOC 480. Sociological Theory. 3 Credits. S
An introduction to the principal texts in sociological theory and the ideas that made them important. Primary materials are emphasized, ranging from medieval to the current age. The goal of the course is to show continuity and change in the theoretical tradition of sociology, and to demonstrate the continued importance of classical ideas. Prerequisite: SOC 104 or SOC 105 or SOC 304 or permission of instructor.

SOC 490. Internship in Sociology. 3 Credits. S
The purpose of this course is to encourage students to think sociologically about social issues by working as volunteer interns for non-profit community or campus organizations. Enrollment must be approved by a faculty mentor and the departmental Undergraduate Studies Committee. For additional information go to the Sociology department website. Prerequisite: 21 credits in sociology with a 3.0 GPA and permission of the instructor.

SOC 495. Study Abroad Advanced Topics in. 1-6 Credits. S
This course is designed for the study of special topics in Sociology at the junior/senior level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. No more than 6 hours of SOC 295 or SOC 495 may count towards the Sociology major or minor.

SOC 499. Honors Course. 3-6 Credits. S
Intensive study and research under faculty direction including the writing of a thesis. Enrollment may be split between two semesters, but no grade will be given until completion of the thesis. Admission to honors candidacy is open only to majors who have shown a marked capability for independent study and have completed either SOC 280 or SOC 480.

SOC 525. Sociology of Work. 3 Credits. S
A consideration of problems in the conceptual and empirical definition of occupations and professions. It will involve the examination of the process of professionalization, the differentiation and integration of labor, career patterns, the work situation, the study of leisure, and the social consequences of changes in occupations and professions. Prerequisite: A principal course in sociology.

SOC 529. Globalization. 3 Credits. S
Addresses sociological aspects of the growth of transnational economic, cultural, institutional, and political interconnections, the freer and faster movement of goods, images, ideas, people, and institutional forms across national borders, and the consequences and problems of these processes. The focus is on recent (later 20th century to the present) global restructuring in the context of historical shifts in capitalist development. (Same as GIST 529.) Prerequisite: SOC 104 or GIST 220.

SOC 532. Sociology of the Middle East. 3 Credits. NW S
The sociological analysis of social, historical, and contemporary issues pertaining to the Middle East and to relations between the Middle East and other regions of the world. We use sociological theoretical perspectives to address such topics as nationalism and identity; religion, race and ethnicity; gender, socioeconomic development, and sociopolitical and economic relations with the United States. Prerequisite: One of the following: SOC 104, SOC 110, SOC 150, SOC 160, or SOC 220.

SOC 560. Law and Criminal Justice. 3 Credits. S
An analysis of the sources and procedures of development of the criminal law and analysis of the practices of law enforcement, prosecution, and judicial action, principally in the United States. Prerequisite: A principal course in sociology.

SOC 600. Sociological Perspectives: _____. 3 Credits. S
Analysis of various sociological perspectives and/or the application of various perspectives to a given social phenomenon. May be repeated as topics vary. Prerequisite: A principal course in sociology.

SOC 617. Women and Health Care. 3 Credits. S
Critical analysis of the current health status and health needs of women, exploring how lay, medical, and research assumptions have influenced both the clinical/scientific literature and the organization of health services. The course includes a focus on historical patterns in women's health issues and social change actions. (Same as HP&M 620.)

SOC 619. Political Sociology. 3 Credits. S
The study of politics and society in the United States and abroad, including power and authority—who has them, how are they acquired, when are they challenged; state formation, the expansion of central governments, and patterns of political domination; political and nationalist movements; the politics of gender, class, race, and ethnicity; political culture and ideology; ethnic and nationalist conflict; revolution and political change. Prerequisite: A principal course in sociology or consent of instructor.

SOC 629. Sociology of Sport. 3 Credits. S
Examination of organized sport as a social institution and its relation to other social institutions (e.g., political, economic, educational, and religious), with special emphasis on American society. Analysis of the social correlates of sports participation and a consideration of the role of sport in social change. Prerequisite: A principal course in American studies or sociology, or consent of instructor.

SOC 640. Islam and Politics. 3 Credits. W
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as the intersections of political Islam and democratic politics, state regulation of Islam, religion and Islamism's role in nation-building, formal state institutions and opposition movements in authoritarian contexts. We also look at the complex ways in which religion intersects with gender dynamics and identity politics in Muslim-majority countries. Students will be guided throughout the course to develop a synthesizing research project that draws from other courses and includes a presentation of the findings of the research. Not open to students with credit in GIST/POLS 467. (Same as GIST 667 and POLS 667.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor.

SOC 660. Sociology of Mental Illness. 3 Credits. S
The sociology of mental illness concerns itself with the study of mental disorders as social phenomena. The course will be concerned with (1) the social factors and social processes that contribute to mental disorders, (2) the social definitions of mental disorders as forms of social deviance, (3) the social facets in the treatment and care of disordered persons, and (4) the social aspects of the prevention of mental disorders. Prerequisite: A principal course in sociology.

SOC 662. Corrections. 3 Credits. S
Legal systems for handling offenders and the development of the laws creating these systems. Emphasis on the various parts (police, courts, probation, penal institutions, and parole) of the system will vary. Prerequisite: A principal course in sociology.

SOC 698. Individual Undergraduate Research. 1-12 Credits. S
Library or field research either as part of an ongoing project or as an independent study project. One to twelve hours. May be taken from one or more faculty during one or more semesters, the total hours not to exceed 12. No more than 3 credits may be applied to satisfy requirements for the sociology major. Prerequisite: Two courses in sociology and consent of instructor.

SOC 707. Seminar in Historical Sociology. 3 Credits.
Each seminar will explore problems at the intersection of sociology and history. Topic and instructors will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics and students may take more than one topic. No prerequisite.

SOC 722. Sociology of Gender. 3 Credits.
This course will offer a range of sociological perspectives on the role of gender in society. The particular substantive focus will vary each semester to allow flexibility for in-depth analysis of gender relationships in such areas as politics, health and aging, and work.

SOC 760. Social Inequality. 3 Credits.
A comprehensive review of the major theoretical and empirical approaches used in the study of institutionalized social inequality. Reference to the origins, forms, cultural and structural variations and their changes over time, consequences and ideologies of social inequality. Prerequisite: A distribution course in sociology.

SOC 767. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, COMS 787, and PSYC 787.)

SOC 780. Advanced Topics in Sociology: _____. 3 Credits.
Topics will vary from semester to semester and instructor to instructor to allow flexibility for in-depth analysis of particular topics.

SOC 802. Classical Social Theory. 3 Credits.
This seminar will focus on the later 19th and early 20th century "theories of society," addressing the origins and developmental tendencies of Western modernity and their relation to premodern social orders. Primary texts of the major theorists (e.g., Marx, Durkheim, Nietzsche, Weber, Simmel, and Mead) will be studied in historical context. The tradition's analytical and critical resources and problematic features will also be explored. Finally, the connections between this tradition and contemporary sociological approaches will be explored.

SOC 803. Issues in Contemporary Theory: _____. 3 Credits.
A critical examination of recent trends and debates in sociological theory. This is a thematically oriented course in which classical as well as contemporary views will be explored. Attention will be directed to theoretical issues under discussion in fields such as symbolic interactionism, semiotics, ethnography, and others.

SOC 810. Sociological Inquiry. 3 Credits.
The goals of this course are to understand the characteristics of sociologically interesting and rigorous research and to design a research proposal that shares those characteristics. Students will read books and articles representing a variety of research approaches (ethnographies, surveys, interviews, document analyses, historical studies, comparative research, etc.), and will analyze those approaches in order to understand their theoretical and methodological significance. Students will also distribute their proposals to the other students in the course for comment.
and critique. Assignments will include a research proposal such as a draft for an external grant proposal, M.A. thesis proposal for students at the M.A. level or a dissertation proposal draft for students at the Ph.D. level. Course may be repeated for credit toward graduate degree. Prerequisite: The course is open only to students enrolled in the Sociology graduate program.

SOC 811. Sociological Research. 3 Credits.
The use of the scientific method to study social phenomena including: the formulation and testing of hypotheses; techniques for collecting data; measuring social variables; interpreting research findings; the relationship of theory and facts. Course may be repeated for credit toward graduate degree. Prerequisite: The course is open only to students enrolled in the Sociology graduate program.

SOC 812. Analytic Methods in Sociology. 3 Credits.
Consideration of quantitative methods of analysis including both parametric and non-parametric techniques. Prerequisite: A course in statistics.

SOC 820. Political Sociology. 3 Credits.
This course offers an overview of the different perspectives and key arguments comprising the field of political sociology, including both classical and contemporary readings. The issues studied in this field include the nature of power and the nature of the state, relations between state and society, and social movements, political organization and civic participation, political culture, voting behavior, comparative political systems, warfare, democracy and economic development, citizenship, nationalism, revolutions, and globalization.

SOC 824. Health and Social Behavior. 3 Credits.
This course provides students with an analytic understanding of the organization, professional, and interpersonal behavior that characterizes contemporary health and health care. Emphasis is placed on examination and integration of conceptual frameworks theories, and research findings bearing on basic behavioral/managerial issues such as authority relations in health care settings, models of illness behavior and health services utilization, the impact of organizational structure on employee and client attitudes and behavior, and the culture of professional medicine in relation to patient care.

SOC 873. International Political Economy. 3 Credits.
Provides a broad survey of major developments in the field. Topics include the intellectual origins of international political economy; the historical evolution of the international system; North-South and Western trade, investment, and monetary relations; foreign aid, debt technology transfer, development, international economic institutions (e.g., International Monetary Funds, World Bank, Multinational Corporations, etc.). (Same as POLS 973.)

SOC 891. Individual Master's Readings. 1-6 Credits.
Individual study of special topics or problems by students working on a master's degree.

SOC 892. Teaching Seminar. 1-3 Credits.
Seminar on sociology course design and development. Topics covered include syllabus design, exam strategies and design, course design, content of and approaches to teaching introductory and other sociology courses, student grading and evaluation. Required of all teaching assistants assigned to courses in sociology. May not be repeated for credit toward graduate degree.

SOC 893. Leading Discussion Sections in Sociology. 1 Credits.
This course covers matters relating to the teaching of discussion sections in sociology. Topics covered will include the current week's reading assignments, material that will be covered in the lecture, upcoming exams or other assignments, and potential activities for discussion sections. This course does not count toward completion of 54 hours of graduate credit hours required for the PhD program in sociology. Graded on a satisfactory/unsatisfactory basis. Prerequisite: A current GTA appointment to lead discussion sections in sociology.

SOC 899. Thesis. 1-8 Credits.
Thesis hours. Graded on a satisfactory progress/limited progress/no progress basis.

SOC 900. Seminar on Special Topics in Theory: ______. 3 Credits.
Each seminar will explore problems of theory in sociology. Topic and instructor will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics, and a student may take more than one topic.

SOC 902. Contemporary Social Theory. 3 Credits.
The focus of the course is on prominent late twentieth and early twenty-first century social theorists (e.g., Daniel Bell, Pierre Bourdieu, Michel Foucault, Anthony Giddens, Nancy Fraser, David Harvey, Alex Honneth, Jean Baudrillard), who have had substantial impact on North American social thought and sociology and often in other parts of the globe as well. The texts focus on large-scale, national and global sociocultural and socioeconomic structures, cultural formations, and social changes. The course stresses primary readings but also addresses the various approaches in historical, intellectual, and political context, their relations to earlier classical theories, and connections to more specialized sociological practices.

SOC 910. Seminar on Special Topics in Methods: ______. 3 Credits.
Each seminar will explore problems of methods in sociology. Topic and instructor will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics, and a student may take more than one topic.

SOC 920. Seminar on Special Topics in Social Organizations: ______. 3 Credits.
Each seminar will explore problems of social organization in sociology. Topic and instructor will be announced in the Schedule of Classes. Seminars will be offered by different instructors on different topics, and a student may take more than one topic.

SOC 991. Individual Doctoral Readings. 1-6 Credits.
Individual study of special topics or problems by students working on a doctorate.

SOC 995. Professionalization Proseminar. 3 Credits.
The main objective of this course is to help students understand and deal with several "nuts and bolts" professional issues regarding the discipline of sociology and being a professional sociologist. This course is for advanced doctoral students who are close to being on the job market, whether they are pursuing academic or non-academic careers.

SOC 999. Dissertation. 1-12 Credits.
Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis.

Spanish & Portuguese Courses

PORT 104. Elementary Brazilian Portuguese I. 5 Credits. U F1
This course introduces students to the essential vocabulary and fundamentals of grammar of Brazilian Portuguese through practice in speaking, listening comprehension, reading and writing. Active preparation and participation required. Classes conducted in Portuguese. Emphasis on conversation.

PORT 106. Elementary Brazilian Portuguese, Accelerated I. 3 Credits. U F1
PORT 108. Elementary Brazilian Portuguese II. 5 Credits. U F2
A continuation of PORT 104. Prerequisite: PORT 104.

PORT 110. Elementary Brazilian Portuguese, Accelerated II. 3 Credits. U F2
A continuation of PORT 106. Prerequisite: PORT 106.

PORT 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Portuguese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

PORT 212. Intermediate Brazilian Portuguese I. 3 Credits. U F3
A review of Brazilian Portuguese grammar, with practice in reading, composition, and conversation. Prerequisite: PORT 108 or PORT 110 or consent of instructor.

PORT 216. Intermediate Brazilian Portuguese II. 3 Credits. U F4
A continuation of PORT 212. Prerequisite: PORT 212.

PORT 220. Intensive Intermediate Brazilian Portuguese. 3-6 Credits. U F3/F4
The course is designed for students who have completed the first year of Portuguese language studies at KU or equivalent. This course covers the same material as PORT 212 and PORT 216. Prerequisite: PORT 108, or consent of the instructor.

PORT 300. Brazilian Culture. 3 Credits. HT H
Prehistoric and colonial Portuguese origins of Brazil and its independent development in the nineteenth and twentieth centuries. Key aspects of economic, political, and social factors; special attention to intellectual history. Readings in English.

PORT 340. Textual Analysis and Critical Reading. 3 Credits. HL H FP
Introduction to Brazilian cultural and literary studies. Critical readings and interpretation of Brazilian cultural expressions with emphasis on acquiring the skills and vocabulary for discussing and writing critical analyses. Conducted in Portuguese. Not open to students who have taken PORT 540. Prerequisite: Grade of A or B in PORT 216 or consent of instructor.

PORT 347. Brazilian Studies: _____ 3 Credits. H FP
A topics course dedicated to the study of special historical moments, authors, or themes in Brazilian literary and cultural history. Topics studied always lead to an examination of Brazilian culture and society through the critical study of literature, film, and music, in contrast with aspects of U.S. culture or other Latin American societies. Although the course may cover multiple genres and periods, it always emphasizes the plurality of Brazilian people, its history of slavery and immigration, diverse ethnic composition, rich religious milieu, and complex class system. Students also discuss the differences between the geographical regions in the country, and discuss controversial topics such as racism and religion. Given the historical similarities between the two societies, students must confront the experiences they learn about in Brazil to similar ones in the United States. Course conducted in Portuguese and may be repeated for credit as the topic varies. Not open to students who have taken PORT 547. Prerequisite: PORT 216 or consent of instructor.

PORT 348. Portuguese Language and Brazilian Culture for Business. 3 Credits. H FP
Cultural studies approach to contemporary Brazilian society for students interested in business. Explores how Brazilians negotiate their place in a global cultural context and how they perceive business. Readings include selections from literature, history, journalism, social analysis, and popular culture and business. Exercises help English speakers develop analytical skills, as well as vocabulary and communication skills related to business and professional life in Brazil. Not open to students who have taken PORT 548. Prerequisite: PORT 216 or consent of instructor.

PORT 365. Studies in Brazilian Film: _____. 3 Credits. H FP
A theoretical and historical approach to Brazilian film with special attention to thematic concerns, such as cultural and national identity, and of literary discourse. Given in Portuguese or English. May be repeated for credit as topic varies. Students will be expected to attend film screenings in addition to regular class meetings. Not open to students who have taken PORT 565. Prerequisite: Consent of instructor.

PORT 388. Intermediate Brazilian Portuguese Conversation. 1 Credits. U
Conversational reinforcement with an emphasis on oral communication skills in a cultural context. Two class meetings per week. Prerequisite: PORT 212 or consent of instructor.

PORT 394. Special Readings in Brazilian Studies. 1-3 Credits. H FP
Direct readings in (a) fields not covered by student's course work, and/or (b) field of student's special interest approved by the department. May be repeated for credit if content varies. Prerequisite: PORT 216 and three-hours upper-division credit in Portuguese, or consent of instructor.

PORT 471. Studies in Brazilian Culture and Civilization: _____. 1-3 Credits. H FP
A study of Brazilian culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. May be repeated for credit if content varies.

PORT 475. Studies in Brazilian Literature: _____. 1-3 Credits. H FP
A study of the literature of a particular author, group of authors, period, genre, region, or theme. Available only to study-abroad participants. May be repeated for credit if content varies.

PORT 488. Advanced Brazilian Portuguese Conversation. 1 Credits. U
Two recitations weekly. More advanced than PORT 388. Prerequisite: PORT 216 or consent of the instructor.

PORT 490. Intensive Advanced Portuguese. 3-6 Credits. H/W FP
This is a composition course for students with an intermediate level of the language to develop control of written communication at an advanced level. Advanced composition, conversation, and stylistics, plus an introduction to Brazilian literature. Prerequisite: Four semesters of Portuguese, or consent of instructor.

PORT 509. Portuguese Phonetics and Phonology. 3 Credits. H/W FP
An analytical and practical study of contemporary Portuguese phonetics. Prerequisite: PORT 490 and PORT 488, or consent of instructor.

PORT 540. Textual Analysis and Critical Reading. 3 Credits. HL H FP
A more intensive treatment of the content of PORT 340. Not open to students who have taken PORT 340. Prerequisite: Consent of instructor.
PORT 547. Brazilian Studies: ______. 3 Credits. H FP
A more intensive treatment of the content of PORT 347. Not open to students who have taken PORT 347. Prerequisite: PORT 216 or consent of instructor.

PORT 548. Portuguese Language and Brazilian Culture for Business. 3 Credits. H FP
A more intensive treatment of the content of PORT 348. Course conducted in Portuguese. Not open to students who have taken PORT 348. Prerequisite: Consent of instructor.

PORT 565. Studies in Brazilian Film: ______. 3 Credits. H FP
A more intensive treatment of the content of PORT 365. Not open to students who have taken PORT 365. Prerequisite: Consent of instructor.

PORT 611. Accelerated Basic Portuguese for Spanish Speakers. 3 Credits. U
Contrastive phonological and morphological analysis of standard Spanish and the major dialect of Brazilian Portuguese, followed by a presentation of major grammatical and phonological stumbling blocks for Spanish speakers. Drills on grammar, syntax, and pronunciation emphasize those areas in which Brazilian Portuguese differs most significantly from Spanish. Prerequisite: Graduate student status in Spanish. Undergraduates in Spanish may be admitted with consent of instructor.

PORT 612. Accelerated Basic Portuguese for Spanish Speakers II. 3 Credits. U
A continuation of PORT 611, with special emphasis on reading and writing skills. Prerequisite: PORT 611.

PORT 742. The Brazilian Novel. 3 Credits.
The development of the novel in Brazil and analysis of representative works of the nineteenth and twentieth centuries. Prerequisite: A fourth semester course in Portuguese or consent of instructor.

PORT 760. Contemporary Brazilian Literature. 3 Credits.
A survey of Brazilian cultural expressions and literature in the Twentieth Century. Conducted in Portuguese. Prerequisite: PORT 216 or consent of instructor.

PORT 780. Special Readings in Portuguese and Brazilian Literature. 1-3 Credits.
May be taken more than once; total credit not to exceed five hours. Directed private readings with conferences with instructor. Prerequisite: Consent of department.

PORT 785. Special Topics in Brazilian Cultural and Literary Studies: ______. 3 Credits.
Topics vary by semester. The course may be taken more than once, with full credit, provided there is no duplication in the material covered. Conducted in Portuguese.

PORT 970. Seminar in Brazilian Literature: ______. 3 Credits.

Spanish & Portuguese Courses

SPAN 101. Orientation Seminar in Spanish and Portuguese. 1 Credit. H
Provides an overview of the field of Hispanic Studies. Emphasizes developing an understanding of opportunities in Spanish and Portuguese at KU and the Spanish and Portuguese program curricula, exploring service-learning and other extracurricular options available at KU and beyond, and helping students plan goals for their education through an understanding of their personal values and aspirations as they relate to the field. Graded on a satisfactory/unsatisfactory basis.

SPAN 104. Elementary Spanish I. 5 Credits. U F1
For beginning students of Spanish who do not place into SPAN 111. Active preparation and participation required. Classes conducted in Spanish. Not open to native speakers of Spanish.

SPAN 107. Elementary Spanish Conversation. 1-4 Credits. U
Activities to improve elementary level conversation skills. Does not fulfill any portion of the College of Liberal Arts and Sciences foreign language requirement. Available only to study abroad participants.

SPAN 108. Elementary Spanish II. 5 Credits. U F2
This course prepares students for Intermediate level study of Spanish. Active preparation and participation is required. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: Completion of SPAN 104 or placement. See departmental guidelines.

SPAN 111. Intermediate Elementary Spanish. 5 Credits. U F1/F2
For students who have had some previous study of Spanish, but who do not place into the Intermediate level. This course prepares students for Intermediate level study of Spanish. Active preparation and participation required. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: At least one previous high school or college course in Spanish or placement. See departmental guidelines.

SPAN 170. Hispanic Language, Culture and Civilization I-A: ______. 1-3 Credits. U
For students in their first year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major or the language requirement. May be repeated for credit if content varies.

SPAN 171. Hispanic Language, Culture and Civilization I-B: ______. 1-3 Credits. U
A continuation of SPAN 170. For students in their first year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major or the language requirement. May be repeated for credit if content varies.

SPAN 177. First Year Seminar: ______. 3 Credits. HL
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in Spanish. May not contribute to major requirements in Spanish. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

SPAN 202. Introduction to Translation and Translation Theory. 3 Credits. H
This course provides an introduction to the concepts of applied translation as well as an overview of translation theory. Translation is a severely misunderstood activity and profession, and mechanical translation has been justifiably downgraded in communicative foreign language teaching. This course is intended for students of any foreign language (classical or modern) who are interested in the field and profession of literary and non-literary translation. The course focuses on written translation and does not treat (oral) interpretation in detail. (Same as AAAS 250, GERM 240, LING 250 and SLAV 250.) Prerequisite: Study of a foreign language, minimum two semesters of the same language.

SPAN 212. Intermediate Spanish I. 3 Credits. U F3
A fully integrated content-based and form-focused approach to intermediate-level Spanish. Students process and practice a wide range of vocabulary and grammatical structures in order to complete tasks that promote critical exploration of the Spanish-speaking world and the development of listening, reading, speaking, writing, and intercultural
competencies. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111 or placement. See departmental guidelines.

SPAN 213. Honors Intermediate Spanish I. 3 Credits. U F3
Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111 with a grade of A, or permission of the department

SPAN 216. Intermediate Spanish II. 3 Credits. U F4
A continuation of SPAN 212. A fully integrated content-based and form-focused approach to intermediate-level Spanish. Students process and practice a wide range of vocabulary and grammatical structures in order to complete tasks that promote critical exploration of the Spanish-speaking world and the development of listening, reading, speaking, writing, and intercultural competencies. Emphasis on process writing. Classes conducted in Spanish. Not open to native speakers of Spanish. Prerequisite: SPAN 212 or placement.

SPAN 217. Honors Intermediate Spanish II. 3 Credits. U F4
Not open to native speakers of Spanish. Prerequisite: SPAN 212 or SPAN 213 with a grade of A, or permission of the department.

SPAN 220. Intensive Intermediate Spanish. 6 Credits. U F3/F4
This course is designed for students who would like to acquire proficiency in Spanish more rapidly. The material covered in the course is the same as in SPAN 212 and 216. Not open to native speakers of Spanish. Prerequisite: SPAN 108 or SPAN 111, with a grade of A or B.

SPAN 270. Hispanic Language, Culture and Civilization II-A: _____ 1-3 Credits. U
For students in their second year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies.

SPAN 271. Hispanic Language, Culture and Civilization II-B: _____ 1-3 Credits. U
A continuation of SPAN 270. For students in their second year of language study or the equivalent. An intensive orientation to the culture of Spanish-speaking countries. Includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major nor the language requirement. May be repeated for credit if content varies.

SPAN 300. Developments in Hispanic Cultures. 3 Credits. HL H
The development of social and cultural patterns in the Spanish-speaking world, including the intersection of those patterns with issues related to politics, economics and/or personal values. Assigned readings may be in English or in Spanish. Does not count toward the Spanish major. Prerequisite: SPAN 108, SPAN 109, or SPAN 111; or two years of high school Spanish.

SPAN 302. The Spanish Inquisition. 3 Credits. H
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HIST 325 and JWSH 315.)

SPAN 322. Spanish Grammar: Form and Meaning in Context. 3 Credits. U FP
Analysis of the most important morphological and syntactic phenomena with an emphasis on their form and function through a review of salient grammatical points in preparation for advanced work in Spanish. Recommended for students who have completed Spanish 216, 217, or 220 with a grade of C or higher, or placement through examination. Course does not count toward the Major. Prerequisite: Four semesters of college-level Spanish or the equivalent. Students who have taken SPAN 324 or SPAN 325 may take this course with the permission of instructor.

SPAN 323. Spanish Composition and Cultural Analysis. 3 Credits. U FP
Systematic review of writing in Spanish, intensive study of vocabulary and stylistics for formal written communication, and development of essential writing and analytical skills for advanced courses in Spanish. Prerequisite: SPAN 216 or SPAN 217 or SPAN 220 with a grade of C or higher; or SPAN 322, or consent of instructor.

SPAN 324. Grammar and Composition. 3 Credits. U FP
Systematic grammar review and development of essential writing skills for advanced courses in Spanish. Recommended for students with a grade of B or better in SPAN 216, SPAN 217, or SPAN 220. Concurrent enrollment in SPAN 328 is strongly recommended, and completion of both SPAN 324 and SPAN 328 is required for enrollment in SPAN 340 and SPAN 346. Prerequisite: SPAN 216 or SPAN 217 or SPAN 220 with a grade of C or higher; or SPAN 322.

SPAN 325. Spanish for Heritage Learners. 3 Credits. H FP
A comprehensive review of the Spanish language for students whose personal or cultural ties to the language do not include extensive formal academic study, with an emphasis on the development of skills tied to cultural analysis and communication (written and oral) necessary for success in more advanced courses in Spanish. (Same as AMS 325.) Prerequisite: SPAN 216, or SPAN 217, or SPAN 220, or appropriate placement test score as defined by the Department of Spanish & Portuguese, or consent of the Department of Spanish & Portuguese, or consent of instructor.

SPAN 326. Spanish for Health Care Workers. 3 Credits. FP
This course is designed to provide students with the linguistic and cultural competencies necessary to communicate with and help treat Spanish speaking patients with limited English proficiency. Includes a general review of pertinent grammar, specific vocabulary groups relating to assessment and care of patients, vocabulary to establish rapport, and discussions leading to cultural competencies. Students who have completed SPAN 424 or above may take the course with the permission of the instructor. Prerequisite: Completion of SPAN 216 with a grade of C or better.

SPAN 328. Intermediate Spanish Conversation. 2 Credits. U FP
Conversational reinforcement of topics presented in SPAN 323 or SPAN 324 with an emphasis on oral communication skills in a cultural context. Concurrent enrollment in SPAN 328 is strongly recommended. Completion of both 324 and 328 is required for enrollment in SPAN 340 and SPAN 346. Two class meetings per week. Not available to study abroad participants. Prerequisite: SPAN 216 or SPAN 217 or SPAN 220 with a grade of C or higher; or SPAN 322.

SPAN 329. Intermediate Spanish Conversation II: _____ 1 Credits. U FP
Open to students who have completed SPAN 328 and heritage speakers. Native speakers may take the course with permission of the instructor. The course topic will focus on Spanish conversation in a particular professional setting, such as business, theater, law, film, medicine, and fine arts. Course may be repeated for credit if the topic varies. Prerequisite: SPAN 328 or consent of instructor.
SPAN 330. Service Learning Internship Spanish. 1-3 Credits. U FP
An opportunity for students to utilize and improve their Spanish language skills in an internship or volunteer work in business, schools, government, hospitals, churches, and various types of service organizations. Students must have approval of instructor to register and must provide written confirmation of acceptance for volunteer work in an agency that provides service to a Spanish-speaking public before the course begins. Periodic supervisor evaluations and a reflection journal in Spanish are required, in addition to other materials requested by the instructor. Class format may be an independent internship taken for variable credit under instructor supervision. Will not count toward Spanish major. Prerequisite: Students must have completed a minimum of 12 hours of Spanish in courses at the 200-level or above, and completion of SPAN 324 with a grade of B or better.

SPAN 340. Textual Analysis and Critical Reading. 3 Credits. HL H/W FP
Critical readings and interpretation of Hispanic literatures, with emphasis on acquiring the skills and vocabulary necessary for discussing and writing literary analyses. Taught in Spanish. Prerequisite: SPAN 323, or SPAN 324 and SPAN 328, or SPAN 325. A grade of B- or higher in SPAN 323 or SPAN 324 or SPAN 325 is strongly recommended for students enrolling in this course. Concurrent enrollment in SPAN 346 is strongly recommended.

SPAN 346. Transatlantic Hispanic Cultures. 3 Credits. H FP
This course offers an introductory overview of Hispanic cultures, focusing on the political, economic, social, linguistic, and artistic development that shaped the historical and cultural bonds between Latin America and Spain. Enhances the cultural competence acquired in previous Spanish classes and prepare students for upper-level work in the major. Taught in Spanish. Prerequisite: SPAN 323, or SPAN 324 and SPAN 328, or SPAN 325. A grade of B- or higher in SPAN 323 or SPAN 324 or SPAN 325 is strongly recommended for students enrolling in this course. Concurrent enrollment in SPAN 340 is strongly recommended.

SPAN 370. Hispanic Language, Culture and Civilization III-A: _____ 1-3 Credits. U FP
An intensive orientation to the culture of Spanish-speaking countries. Also includes elements of grammar, conversation, and composition. Available only to study-abroad participants. Will not count toward the Spanish major. May be repeated for credit if content varies.

SPAN 371. Hispanic Language, Culture and Civilization III-B: _____ 1-3 Credits. U FP
A continuation of SPAN 370. An intensive orientation to the culture of Spanish-speaking countries. Also includes elements of grammar, conversation, and composition. Available only to study abroad participants. Will not count toward the Spanish major. May be repeated for credit if content varies.

SPAN 424. Advanced Spanish Composition and Grammar. 3 Credits. H/W FP
Extensive practice in writing, with attention to vocabulary, grammar usage, and discourse structure. Thorough review of syntax and grammar. Conducted in Spanish. Concurrent enrollment in SPAN 428 is strongly recommended. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 428. Advanced Spanish Conversation. 2 Credits. U FP
Emphasis on developing fluid expression of opinions, ideas, and points of view through discussion of selected texts and cultural materials. Two class meetings per week. Taught in Spanish. Concurrent enrollment in SPAN 424 is recommended. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or higher in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 429. Spanish Phonetics. 3 Credits. H/W FP
An analytical and practical study of contemporary Spanish phonetics. Prerequisite: SPAN 424 and SPAN 428, or consent of instructor.

SPAN 440. Topics in Transatlantic Hispanic Studies: _______ 3 Credits. H/W FP
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. Readings will include selections from both Spain and the countries of Spanish America. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 441. Special Topics in Spanish Literature and Culture: _______ 1-3 Credits. H FP
A topics course dedicated to the study of special historical moments, topics, authors, or themes in Spanish literary and cultural history. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. This course may be used to partially or fully fulfill 400-level Spanish literature requirement. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 442. Special Topics Latin American Literature and Cultures: _______ 1-3 Credits. H FP
A topics course dedicated to the study of special historical moments, topics, authors, or themes in Latin American literary and cultural history. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. This course may be used to partially or fully fulfill 400-level Peninsular Latin American literature requirement. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 443. Topics in Hispanic Studies - Peninsular Emphasis: _______ 3 Credits.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. Readings may include selections from both Spain and the countries of Spanish America but the peninsular content will be significant and the course will count toward the Peninsular literature requirement in the Spanish major. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 444. Topics in Hispanic Studies - Latin American Emphasis: _______ 3 Credits.
A topics course dedicated to the study of special historical moments, topics, authors, or themes in literary and cultural history. Readings may include selections from both Spain and the countries of Spanish America, but the Spanish American content will be significant and the course will count toward the Latin American literature requirement in the Spanish major. The course may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.
SPAN 446. Spanish Culture. 3 Credits. H/W FP
A study of the development of Spanish culture with particular emphasis on history, customs and traditions, and literary trends and artistic tendencies that constitute Spain's specific contribution to Western civilization. Conducted in Spanish. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 447. Latin American Cultures: ____. 3 Credits. H/W FP
The description and interpretation of Latin American cultures, with particular attention to history, ethnology, folklore, and the arts. The course may focus on particular countries or geographical areas. Conducted in Spanish. May be repeated for credit as topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 448. Spanish Language and Culture for Business. 3 Credits. H FP
Cultural studies approach to contemporary Spanish American societies for students with an interest in business. Explores how individuals from Spanish American countries negotiate their place in a new cultural context, and how different groups in Spanish America perceive business (negocios). Readings include selections from literature, history, journalism, social analysis, and popular culture. Exercises help non-native speakers develop analytical skills as well as vocabulary and communication skills related to international business and professional life. Conducted in Spanish. Prerequisite: SPAN 323, or SPAN 324 and SPAN 328, or SPAN 325, or consent of instructor. A grade of B- or higher in SPAN 323, 324 or 325 is strongly recommended for students enrolling in this course.

SPAN 450. Medieval Spanish Studies: ____. 3 Credits. H FP
Reading and analysis of Spanish literature and culture to 1500. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 451. Early Modern Spanish Studies: ____. 3 Credits. H FP
Reading and analysis of Spanish literature and culture from 1500 to 1800. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 452. Nineteenth Century Spanish Studies: ____. 3 Credits. H FP
Reading and analysis of the literature and culture of Spain of the 1800s. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 453. Twentieth Century Spanish Studies: ____. 3 Credits. H FP
Reading and analysis of the literature and culture of Spain from 1900 to the present. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 460. Colonial Spanish-American Studies: ____. 3 Credits. H FP
Reading and analysis of Spanish-American literature and culture from the Conquest to Independence, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 461. Nineteenth Century Spanish-American Studies: ____. 3 Credits. H FP
Reading and analysis of Spanish-American literature and culture from Independence to 1900, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 462. Twentieth Century Spanish-American Studies: ____. 3 Credits. H FP
Reading and analysis of Spanish-American literature and culture from 1900 to the present, organized by topic. The course may cover multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 463. National Traditions in Spanish America: ____. 3 Credits. H FP
Reading and analysis of Spanish-American literature and cultural history from the perspective of a selected nation or nations. The course explores the role of literature and cultural expression in constructing the modern nation and local traditions. Readings may cover selections from multiple genres, authors, and periods. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of "C" or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 464. Reading and Analysis of U.S. Latino/a Literatures: ____. 3 Credits. H FP
The course covers multiple genres, authors, periods, regions, or topics. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 340 or consent of instructor. A grade of C or better in SPAN 340 is strongly recommended for students enrolling in this course.

SPAN 470. Studies in Spanish Culture and Civilization: ____. 1-3 Credits. H FP
A study of Spanish culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. Maybe repeated for credit if content varies.

SPAN 471. Studies in Spanish-American Culture and Civilization: ____. 1-3 Credits. H FP
A study of Spanish American national or regional culture with emphasis on one or more of the following aspects: history, politics, ethnology, anthropology, religious and secular traditions, issues of cultural identity, music, art, architecture, and popular culture. Available only to study-abroad participants. Maybe repeated for credit if content varies.
A study of the literature and cultural production of a particular author, group of authors, period, genre, region, or theme. Available only to study-abroad participants. May be repeated for credit if content varies.

SPAN 475. Studies in Latin-American Literature and Culture: ______. 1-3 Credits. H FP
A study of the literature and cultural production of a particular author, group of authors, period, genre, country, region, or theme. Available only to study-abroad participants. May be repeated for credit if content varies.

SPAN 494. Special Readings in Spanish. 1-3 Credits. H/W FP
Directed reading in (a) fields not covered by student's course work, and/or (b) field of student's special interest approved by the department. Conferences. May be repeated for credit if content varies. Prerequisite: Twenty-five hours of Spanish.

SPAN 496. Honors in Spanish. 3 Credits. H/W FP
Honors seminar. May be repeated for credit. Required of all students working for a degree with honors in Spanish.

SPAN 501. Studies in Hispanic Literature: ______. 3 Credits. H
A study of the literature of a particular author, period, genre, country, region, or theme. May be repeated for credit as the topic varies. May be taken for elective credit in the Spanish major. Will not count toward the Latin American literature requirement in the Spanish major. Prerequisite: SPAN 340, plus completion of one junior-senior level literature course in any language.

SPAN 520. Structure of Spanish. 3 Credits. H/W FP
A study of the Spanish language as it is spoken today, from perspectives of contemporary linguistics. Reading and analysis of recent publications in the field. Prerequisite: SPAN 424 and SPAN 428, or consent of the instructor.

SPAN 522. Advanced Studies in Spanish Language: ______. 3 Credits. H/W FP
Extensive language analysis and practice on one topic such as stylistics, translation, conversation/spoken discourse, or creative writing. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 424 and SPAN 428, or consent of the instructor.

SPAN 540. Colloquium on Hispanic Studies: ______. 3 Credits. H FP
An advanced course dedicated to the critical study of special historical moments, topics, authors or themes in literary and cultural history. This course is designed to provide sophistication, focus, and analytical depth in literary and cultural study through exploration of secondary sources as well as theoretical material. Reading may include selections from both Spain and the countries of Spanish America and may cover multiple genres, authors, periods, or regions. Course conducted in Spanish and may be repeated for credit as the topic varies. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses.

SPAN 550. Colloquium on Spanish Film. 3 Credits. H FP
A theoretical and historical exploration of Spanish cinema. Students will be expected to attend film screenings in addition to regular class meetings. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses.

SPAN 560. Colloquium on Latin American Film. 3 Credits. H FP
An overview of Latin American cinema from its origins to the present with particular attention to thematic concerns, such as cultural and national identity, and of literary discourse. Students will be expected to attend film screenings in addition to regular class meetings. Prerequisite: SPAN 424 and six hours of 400-level Spanish literature courses.

SPAN 570. Studies in Hispanic Linguistics: ______. 3 Credits. U FP
Theoretical and applied analysis of one or more of the following components of the Spanish language: phonology/phonetics, morphology, syntax, semantics, pragmatics. May be repeated for credit if content varies. Prerequisite: SPAN 424 and SPAN 428.

SPAN 681. Language Teaching for Oral Proficiency. 1 Credits. U FP
A summer course designed principally for secondary school language teachers. Provides an orientation to proficiency-based models in foreign language instruction, national standards in the rating of foreign language proficiency, and curriculum development sessions which address issues of articulation in foreign language curricula. (Not applicable toward a major or graduate degree in German.)

SPAN 722. Special Topics in Spanish Literature: ______. 2-3 Credits.
The content of this course will vary, and the course may be taken more than once with full credit, provided there is no duplication in the material studied. Prerequisite: A survey course in Spanish peninsular literature taught in Spanish.

SPAN 730. Topics in the Literature of 13th- and 14th-Century Iberia: ______. 3 Credits.
A theoretically informed study of representative works from 13th- and 14th-century Iberia. Course may be repeated for credit provided that the topic changes.

SPAN 734. Print Culture in Early Modern Spain. 3 Credits.
A study of the literature produced during the period of early printed books with emphasis on the diffusion of new literary forms during the late 15th- and early 16th-centuries.

SPAN 739. Topics in Early Modern Spanish Drama: ______. 3 Credits.
Selected plays of such authors as Lope de Vega, Tirso de Molina, Calderón, and María de Zayas. Course may be repeated for credit provided that the topic changes.

SPAN 745. Don Quixote. 3 Credits.
Linguistic and literary study. Examination of traditional interpretations. The life and thought of Cervantes. Theoretical readings.

SPAN 761. Modern Spanish Poetry. 3 Credits.
Modern poetry of Spain, beginning with Bequer and ending with the "Generation of the 1920's." Close study of the works of the major poets; readings in poetic theory. Prerequisite: A general survey course of the literature of Spain of the 18th, 19th, and 20th centuries.

SPAN 780. Introduction to Hispanic Studies. 3 Credits.
What does the field of Hispanic Studies encompass? How do we understand our roles as scholars, as teachers, and as members of our communities? How does the field of Hispanic Studies reflect and act upon the dialectics between our thoughts, our actions, our words, and our worlds? With specific attention to incoming graduate students, this course sets out to show how Hispanic Studies is a venue to engage in transdisciplinary work and through a variety of methods and approaches. SPAN 780 invites students to reflect on their current career path, and on their role as beginning scholars in Hispanic Studies. The course combines theoretical texts with various forms of cultural expression -including the literary- providing incoming graduate students with a glimpse at the multiple directions and possibilities in the field. In addition, it exposes incoming students to resources available to them at KU, both in and
outside the department. Prerequisite: Graduate student status in Spanish. Undergraduates in Spanish may be admitted with consent of instructor.

SPAN 781. Colonial Identities. 3 Credits.
This course centers on the dynamics of identity of Creoles, Amerindians, Blacks and members of the castes in colonial Spanish America. It concentrates on how members of these racial and ethnic groups relate to coloniality, space, place and gender.

SPAN 785. Special Topics in Spanish-American Literature: _____ 2-3 Credits.
The content of this course will vary, and the course may be taken more than once, with full credit provided there is no duplication in the material covered. Prerequisite: A survey course in Spanish American literature.

SPAN 795. Literary Theory and Criticism. 3 Credits.
Systematic study of the development of theories of literature. Emphasis usually placed on twentieth century although scope may vary. Prerequisite: 700-level course in Spanish or concurrent enrollment.

SPAN 801. Teaching Spanish in Institutions of Higher Learning. 3 Credits.
Required of all teaching assistants who teach beginning Spanish at the University of Kansas for the first time. Instruction in classroom procedures for first year Spanish, demonstration of teaching techniques, and survey of current methodology.

SPAN 802. Colloquium in Methods of Teaching Spanish Language. 1-3 Credits.
Combines discussion of theoretical teaching concepts and development of pedagogical materials with practical solutions arising concurrently in Spanish languages courses.

SPAN 898. Investigation and Conference. 1-10 Credits.
Individually directed work to fill the student's needs not met by available organized courses. One to three hours of credit in any semester. Maximum total credit for the M.A. degree is three hours. May be taken with full credit as often as recommended by department.

SPAN 922. Seminar in Spanish Literature and Culture: _____ 3 Credits.
An intensive investigation of a particular topic in Spanish Literature and Culture; content will vary in terms of topics, genres, and time periods covered. The course may be taken more than once with full credit, provided there is no duplication. Prerequisite: Graduate standing.

SPAN 940. Seminar in Trans-Atlantic Literatures and Cultures: _____ 3 Credits.
An intensive investigation of a particular topic in Spanish and Latin American Literatures and Cultures; content will vary in terms of topics, genres, and time periods covered. The course may be taken more than once, with full credit provided there is no duplication. Prerequisite: Graduate standing.

SPAN 961. Seminar: Medieval Literature: _____ 3 Credits.

SPAN 985. Seminar in Spanish American Literature and Culture: _____ 3 Credits.
An intensive investigation of a particular topic in Spanish American Literatures and Cultures; content will vary in terms of topics, genres, and time periods covered. The course may be taken more than once, with full credit provided there is no duplication. Prerequisite: Graduate standing.

SPAN 999. Dissertation. 1-12 Credits.
Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis.

Speech-Language-Hearing Courses

SPLH 161. Survey of Communication Disorders. 3 Credits. SI S
Provides a general understanding of normal and deviant speech, language, and hearing in adults and children. This course considers the normal development of communication behavior, the nature of communication disorders, and the interaction of speech pathology and audiology with allied fields (e.g., education, medicine, psychology, special education).

SPLH 177. First Year Seminar: _____ 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Speech-Language and Hearing. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

SPLH 220. The Physics of Speech. 4 Credits. N
An introduction to the acoustic structure of speech intended for nonscience majors. Emphasis will be placed on the methods and standards by which scientists measure and evaluate the physical characteristics of speech. Topics will include: simple harmonic motion, the propagation of sound waves, aerodynamic aspects of vocal fold vibration, resonance, digital speech processing, frequency analysis, and speech synthesis. Three class hours and one laboratory per week. (Same as LING 120.) Prerequisite: MATH 101 or 104 or equivalent.

SPLH 250. Study Abroad Topics in: _____ 1-5 Credits. S
A course designed to enhance international experience in topic areas related to speech-language-hearing at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

SPLH 418. Introduction to Cognitive Science. 3 Credits. S
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PHIL 418, and PSYC 418.) Prerequisite: Consent of instructor.

SPLH 430. Communication in Autism. 3 Credits.
This course will provide you with an introduction to the characteristics and communication of individuals with Autism Spectrum Disorder (ASD). This course will focus on diagnostic criteria, early identification, communication assessment and intervention considerations, and partnering with families who have family members with ASD. This course is offered at the 400 and 800 levels with additional assignments at the 800 level. Not open to students with credit in SPLH 830.

SPLH 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449,
SPLH 450. Study Abroad Topics in: ____. 1-5 Credits. S
A course designed to enhance international experience in topic areas related to speech-language-hearing at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

SPLH 451. Directed Study Abroad in Speech-Language-Hearing. 1-3 Credits. S
An independent study designed to enhance international experience in topic areas related to speech-language-hearing. Investigation of special topic or project selected by the student with advice, approval, and supervision by a KU SPLH instructor and an authorized agent of the study abroad site. Experience must be arranged through the Office of KU Study Abroad. Such study may take the form of directed reading and/or directed research/clinical observation. A daily journal and final report is required. A maximum of six hours of credit may be counted, with no more than three in a single area of study. Prerequisite: Consent of instructor

SPLH 452. Examining Global Perspectives in Speech-Language-Hearing: ____. 3 Credits.
For students enrolled in an SPLH-sponsored Study Abroad program. Students participate in 12 hours of meetings in preparation for the Study Abroad experience. Pre-trip meetings focus generally on multi-cultural issues relevant to speech-language-hearing practice as well as specific cultural, linguistic, and service delivery issues for the target country. Students spend two weeks abroad, visiting sites to observe different types of service delivery for people with disabilities and places that are culturally and historically relevant. Periodic debriefing and small group discussions are conducted during the time abroad. A daily journal and post-visit reflection paper is required. Prerequisite: Instructor permission required.

SPLH 453. Principles of Speech Science. 3 Credits. N
Survey of the physiology of speech production, and the physics of sound. Emphasis upon methodologies in the laboratory study of normal speech. Prerequisite: SPLH 120 or SPLH 220, or concurrent enrollment in SPLH 220 or consent of instructor.

SPLH 454. Principles of Hearing Science. 3 Credits. N
This class discusses the concepts and principles relevant to normal hearing processing: anatomy, psychophysical methods, and basic subjective correlates of the auditory system. Prerequisite: SPLH 120, or concurrent enrollment in SPLH 120, or consent of instructor.

SPLH 456. Fundamentals of Clinical Phonetics. 1 Credits. S
Introduction to classification of American English speech sounds based on articulatory phonetics. Practice in phonetic transcription and analysis of normal and abnormal speech. Laboratory exercises to give students hands-on experience with selected topics from lecture. Prerequisite: Corequisite: SPLH 220.

SPLH 456. Language Science. 3 Credits. S
Introduction to structure/function of human languages as it relates to language development and disorders; processes involved in the expression and reception of language and the methodologies employed to study these processes.

SPLH 458. Departmental Research. 1-8 Credits. S
Study may be directed toward either reading for integration of knowledge and insight in Speech-Language-Hearing, or original research in the field. Student creates a plan of activities at the beginning of each semester under the mentor's guidance. Student and mentor review this plan at the end of each semester to evaluate progress. Departmental Honors students must complete a written report or a public oral presentation detailing the purpose, methods, results, and impact of the research. This final product partially fulfills the requirements for Departmental Honors. (Eight hours maximum credit, which may be distributed through 4 semesters. No student may enroll for more than 4 hours of credit in a given semester.) Prerequisite: Consent of Departmental Research Coordinator.

SPLH 459. Directed Study in Speech-Language-Hearing. 1-3 Credits. S
Investigation of special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading and/or directed research/clinical observation. Individual reports and conferences. (Distribution credit given for two-three hours only.) A maximum of six hours of credit may be counted, with not more than four in a single area of study.) Prerequisite: Consent of instructor.

SPLH 516. Speech Perception. 2 Credits. S
Acoustic and perceptual characteristics of phonemes, words, and connected speech for normal-hearing adults and infants; how speech perception is assessed clinically and is affected by hearing loss, aging, use of amplification, talker differences, and linguistic factors. Prerequisite: SPLH 120 Physics of Speech. Prerequisite or Corequisite: SPLH 463 Principle of Hearing Science.

SPLH 556. Language Development. 3 Credits. SI S
Study of language acquisition in children, including phonologic, morphologic, syntactic, and semantic components. Methods of language measurement, the role of comprehension, and pragmatic aspects of language use are included. May be taught in lecture or online format.

SPLH 558. Introduction to Audiological Assessment and Rehabilitation. 4 Credits. U
Introduction to methods for assessing and treating hearing disorders in adults and children, as well as conditions that result in hearing loss. Course includes clinical observation and extensive hands-on experience with clinical techniques. Prerequisite: SPLH 463.

SPLH 571. Introduction to Speech-Language Pathology. 4 Credits. U
This course provides training in clinical management of communicative disorders in children and adults. Principles of evaluation, application of diagnostic information, intervention planning, intervention process, data collection and application, report writing, and interactions with parents and other professionals are examined. Participation in observation and laboratory activities is required.

SPLH 588. Multicultural Considerations in Speech-Language-Hearing I. 1 Credits. S
This course introduces foundational concepts of culture and diversity, bilingualism, bias, and components and processes leading to cultural competency. Students explore health and educational disparities in the
United States and beyond. Students will reflect on their cultural identity, and how their experiences and perspectives may differ from others, and how their experiences can influence service delivery in speech-language pathology and audiology. Prerequisite: SPLH 566 or LING 415 or consent of instructor.

**SPLH 589. Multicultural Considerations in Speech-Language-Hearing II. 1 Credits.**
This course builds on foundational concepts from SPLH 588 by exploring potential cultural and linguistic characteristics of populations that are typically underrepresented in many sectors of the United States, including education and health care. Case studies are implemented to examine cultural and linguistic influences on assessment and treatment processes in speech-language pathology and audiology. Prerequisite: SPLH 588.

**SPLH 620. The Communicating Brain: The Ultimate Personal Computer. 3 Credits.**
This course introduces the study of human neuroscience with a particular focus on human communication. The course provides an overview of the relevant anatomical structures and function along with an introduction to the basic methods used to investigate central nervous system function. Students are introduced to the study of perceptual, motor, and language function in the nervous system through a series of examples drawn from normal function and clinical cases. The examples are selected to highlight how these systems develop and are influenced by experience, implantable devices developed to interface with the nervous system, and how computers and animals are used as models to learn about nervous system function. Prerequisite: A 400-level course in SPLH, or consent of instructor.

**SPLH 660. Research Methods in Speech-Language-Hearing. 3 Credits.**
Research Methods is about the methods used to conduct, describe and evaluate science in communication disorders. Goals for learner outcomes include: 1) evaluation of research including adequacy of research to address scientific and clinical problems, 2) reading, summarizing and describing research through a literature review, 3) describing a hypothetical research study that addresses a specific question or hypothesis identified by the student, and 4) providing constructive peer reviews of research paper drafts. Prerequisite: 9 credits of SPLH course work; English 101 and ENGL 102 (or course meeting core skill in written communication); or consent of instructor.

**SPLH 668. Introduction to Audiological Rehabilitation. 2 Credits.**
Introduction to methods for treating hearing disorders in adults and children, as well as conditions that result in hearing loss. Course includes clinical observation and extensive hands-on experience with clinical techniques. This course should only be taken by graduate students in SPLH who have not completed this prerequisite. Not open to students with credit in SPLH 568. Prerequisite: Graduate standing.

**SPLH 716. Speech Perception. 2 Credits.**
Acoustic and perceptual characteristics of phonemes, words, and connected speech for normal-hearing adults and infants; how speech perception is assessed clinically and is affected by hearing loss, aging, use of amplification, talker differences, and linguistic factors. (Same as AUD 816.)

**SPLH 736. Foundations of Early Intervention. 3 Credits.**
This course explores evidence-based principles and practices of providing early intervention services, including requirements of IDEA Part C, mission and key principles of early intervention and recommended practices and standards. Students will engage in guided field observations of assessment, intervention and collaborative practices, reflective practice and teaming/coaching activities. (Same as SPED 736.)

**SPLH 737. Infants and Toddler with Significant Needs. 3 Credits.**
This course explores the challenges infants and toddlers with significant developmental needs face and how to best support their participation in daily activities. Challenges faced by medical, physical, communication, social-emotional, hearing, vision, and mental health issues will be discussed along with how to support these needs across disciplines and in the home and community activities. This course will provide in-depth review of the unique challenges these children and families face and how providers from various backgrounds can work together to best support children and families. Environmental adaptations and direct instructional techniques to maximize independence tailored to the infant and toddler's strengths and needs will be explored. Information is also provided on assistive technology designed to provide supports. Functional behavioral assessment procedures, proactive intervention strategies and psycho-educational approaches as well as the development of collaborative support plans will be studied. (Same as SPED 737.)

**SPLH 752. Examining Global Perspectives in Speech-Language-Hearing: ____. 2-3 Credits.**
For students enrolled in an SPLH-sponsored Study Abroad program. Students may be required to participate in pre-program meetings in preparation for the Study Abroad experience. Pre-trip meetings will focus generally on multi-cultural issues relevant to speech-language-hearing practice as well as specific cultural, linguistic, and service delivery issues for the target country. Students may be required to facilitate discussions or prepare presentations for these meetings. While abroad, students will observe and/or provide different types of service delivery for people with disabilities and visit places that are culturally and historically relevant. Periodic debriefing and small group discussions will be conducted during the time abroad. Credit hours will be determined based on the specific experience in consultation with the instructor(s).

**SPLH 764. Seminar in: ____. 1-3 Credits.**
The subject matter of this seminar will be special topics from speech pathology and audiology. Special prerequisite may be established for a given topic.

**SPLH 799. Proseminar in Child Language. 2 Credits.**
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, CLDP 799, LING 799 and PSYC 799.)

**SPLH 816. Language Development. 3 Credits.**
Study of language acquisition in children, including the morphologic, syntactic, and semantic components. Methods of language measurement, the role of comprehension, and pragmatic aspects of language use will be included. Not open to students who have credit for SPLH 566. Laboratory by appointment.

**SPLH 820. Developmental Phonological Disorders. 2 Credits.**
Focuses on speech and non-speech characteristics of children with developmental phonological disorders. Emphasis placed on collection and phonetic transcription of speech samples, phonological analysis of transcribed data, and decision-making processes in assessment and intervention.

**SPLH 822. Dysarthria/Apraxia. 2 Credits.**
This course describes the neuroanatomic bases of motor-speech processes, the diagnosis, classification, assessment, prognosis, and treatment of dysarthria(s) and apraxia(s).

**SPLH 824. Fluency Disorders. 2 Credits.**
The nature of stuttering in children and adults is discussed. Theories regarding etiology, development, and maintenance of the disorder are presented. Emphasis is placed on various clinical approaches to assessment, measurement, and treatment.

**SPLH 826. Phonatory Disorders. 2 Credits.**
This course reviews the function of the laryngeal and respiratory mechanisms including the parameters and processes of phonation. Primary content addresses diagnosis, description, and treatment of organic and non-organic disorders of phonation.

**SPLH 828. Speech Disorders in Special Populations. 2 Credits.**
This course reviews anatomy and physiology of the velopharyngeal mechanism. Diagnosis and management of velopharyngeal dysfunction and associated problems are considered. Anatomic, physiologic, and rehabilitation associated with certain oral, pharyngeal, and laryngeal abnormalities discussed. Emphasis is on the speech problems of adults following medical management. Populations include individuals with laryngectomies, glossectomies, and tracheotomies.

**SPLH 830. Communication in Autism. 3 Credits.**
This course will provide an introduction to the characteristics and communication of individuals with Autism Spectrum Disorder (ASD). This course will focus on diagnostic criteria, early identification, communication assessment and intervention considerations, and partnering with families who have family members with ASD. This course is offered at the 400 and 800 levels with additional assignments at the 800 level. Not open to students with credit in SPLH 430.

**SPLH 832. Dysphagia. 2 Credits.**
This course covers normal and disordered swallowing. Evaluation and treatment of swallowing disorders, the dysphagia team, and dysphagia in special populations are considered.

**SPLH 833. Dysphagia Treatment in Adults. 2 Credits.**
This course is designed to build critical thinking and analysis skills for developing and implementing appropriate treatment plans for adults with dysphagia. Foundations of non-instrumental swallow assessment, rehabilitation, and compensation will be addressed. This course will also cover issues of ethics, cultural considerations in dysphagia management, and professional communication. Learning experiences will include evidence-based curriculum, hands-on practice, and critical thinking activities. Prerequisite: SPLH 832.

**SPLH 834. Augmentative and Alternative Communication and Literacy. 2 Credits.**
This course is designed to provide resources and information to prepare students to collaborate with others in increasing the literacy opportunities and skills of individuals with complex communication needs, particularly those who use augmentative and alternative communication.

**SPLH 838. Augmentative and Alternative Communication in Schools. 2 Credits.**
This course provides information about augmentative and alternative communication (AAC) services in school settings. Students will participate in readings and activities that will provide information concerning the roles, responsibilities, and contributions of school speech-language pathologists relative to AAC.

**SPLH 840. Language Disorders of Children: Infants and Toddlers. 2 Credits.**
This course examines factors relating to language disorders in the birth to three population. At-risk populations, as well as those with known etiologies, are considered. Information on assessment, intervention, and service delivery models is addressed. Issues relating to Public Law 99-457 are also examined.

**SPLH 842. Language Disorders of Children: Preschool. 2 Credits.**
This course examines language disorders of preschool-age children in the late preschool years. The course includes information on incidence, characteristics, assessment, and intervention. Theoretical issues and their implication for language intervention are also examined.

**SPLH 844. Language Disorders of Children: School Age. 2 Credits.**
This course examines language development during the school years and how problems in this development interact with school performance. Emphasis is placed on the role of the speech-language pathologist in the early identification, assessment, and remediation of language-learning problems.

**SPLH 846. Language Disorders of Adults. 2 Credits.**
Neurological aspects of language processes, classification of aphasia, and assessment of language deficits are discussed. Management approaches including intervention strategies and rehabilitation are also considered.

**SPLH 848. Language Disorders of Special Populations. 2 Credits.**
This course focuses on communication differences in individuals with intellectual disabilities, autism, cerebral palsy, dual sensory impairments, and other conditions affecting communication competence. Communication characteristics as well as assessment and intervention strategies are studied.

**SPLH 850. Cognitive-Linguistic Disorders of Adults. 2 Credits.**
This course will prepare students to work with adults with acquired cognitive-linguistic disorders, with a focus on: Alzheimer's Disease, Traumatic Brain Injury, and Right Hemisphere Disorder, including etiologies and disease processes. Theoretical and practical knowledge will be presented regarding the primary cognitive domains of attention, memory, and executive function, as well as their impact on discourse-level language. The course will cover neuroanatomy, assessment procedures, interventions, family/communication partner training, and psychosocial aspects of cognitive-linguistic disorders.

**SPLH 852. Augmentative and Alternative Communication in Developmental and Intellectual Disabilities. 2 Credits.**
This course describes augmentative and alternative communication (AAC) assessment and intervention issues as they apply to children and adults with intellectual and developmental disabilities. Areas of study include AAC systems, assessment strategies and procedures, intervention strategies, and AAC information resources.

**SPLH 853. Augmentative and Alternative Communication and Adult Acquired Disorders. 2 Credits.**
This course will discuss the concepts and evidence related to assessment and intervention in the area of augmentative and alternative communication for adults with acquired disorders. Content will be related specifically to adults with acquired communication disorders and focus more on high tech than low tech but information and evidence related to...
both will be presented. Information about AAC systems appropriate for adults, assessment protocols, approaches to intervention, and advocacy will be applied in a case-based format.

SPLH 854. Reading Disorders. 2 Credits.
This course addresses the perceptual, linguistic, and cognitive processes utilized in written communication. Acquired and developmental disorders of written language are examined in relation to issues concerning characteristics, etiology, early identification, assessment, and remediation.

SPLH 856. Bilingual Child Speech-Language Assessment and Intervention. 2 Credits.
This course will address best practices for conducting appropriate, least-biased assessment and intervention with bilingual populations, specifically English learners (ELs). We will examine topics covering the assessment, diagnosis, and treatment of speech (phonology; fluency) and language (morphosyntax; semantics) skills distributed across two languages in bilingual individuals with speech and or language disorders. We will also explore issues pertinent to bilingual clinical service delivery including federal law mandates, working with interpreters, cultural sensitivity and humility with multicultural populations (children and caregivers), consideration of dialectal variation, non-standardized assessment and intervention approaches, ongoing assessment during intervention, writing measurable intervention goals for bilingual speakers, advocating for bilingual families, and problematic clinical scenarios. The course will primarily focus on bilingual speech-language assessment and intervention with Spanish-speaking ELs. However, the underlying core clinical principles and approaches apply to ELs who speak languages other than Spanish.

SPLH 860. Evaluation of Speech and Language. 2 Credits.
Provides a general framework for speech and language evaluations. Issues related to initiation and termination of treatment are discussed. Practice is provided in evaluating norm- and criterion-referenced information used in diagnostic, referral, and treatment decisions.

SPLH 861. Seminar in Research Methodology in Speech Pathology and Audiology: ____. 3 Credits.
This seminar is concerned with the design, instrumentation, execution, and reporting of research in audiology and speech pathology. SPLH 760 or its equivalent and some statistics are recommended before entering this seminar.

SPLH 862. Clinical Processes. 1 Credits.
Orients student to clinical procedures, policies, requirements, and expectations of program. Therapy models, planning, and philosophies are discussed along with implementation and evaluation of therapy procedures. Professional issues are also considered. May be repeated for credit.

SPLH 864. Advanced Clinical Practice in Speech-Language Pathology. 1-6 Credits.
Students conduct supervised clinical work in a variety of settings. May be repeated for credit. Prerequisite: Department approval. Group and individual conferences with staff required.

SPLH 866. Field Study in Speech-Language Pathology. 5 Credits.
The field study provides work experiences in clinical activities. The student takes this course near the end of the degree program. Assignments include supervised work in a variety of approved settings. May be repeated for credit. Prerequisite: Advisor's consent.

SPLH 868. Professional Issues. 1 Credits.
Forum for the presentation and discussion of scientific and professional issues by faculty and advanced graduate students. May be repeated for credit.

SPLH 874. Master's Research Practicum. 1-3 Credits.
This course is designed to give students experience in conducting research. Students apply and extend their knowledge and skills by participating in a research project under the supervision of a mentor. Students may assist with or independently conduct research in speech, language, or hearing. Prerequisite: SPLH 660 or equivalent research methods course.

SPLH 876. Independent Study in Problems of Speech, Language, and Hearing. 1-6 Credits.
Investigation of special topics by individual master's level students. Paper required. Prerequisite: Consent of instructor.

SPLH 888. Multicultural Considerations in Speech-Language-Hearing I. 1 Credits.
This course introduces foundational concepts of culture and diversity, bilingualism, bias, and components and processes leading to cultural competency. Students explore health and educational disparities in the United States and beyond. Students will reflect on their cultural identity, and how their experiences and perspectives may differ from others, and how their experiences can influence service delivery in speech-language pathology and audiology. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. Prerequisite: SPLH 888 or consent of instructor.

SPLH 889. Multicultural Considerations in Speech-Language-Hearing II. 1 Credits.
This course builds on foundational concepts from SPLH 888 by exploring potential cultural and linguistic characteristics of populations that are typically underrepresented in many sectors of the United States, including education and health care. Case studies are implemented to examine cultural and linguistic influences on assessment and treatment processes in speech-language pathology and audiology. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. Prerequisite: SPLH 888 or consent of instructor.

SPLH 899. Master's Thesis. 1-6 Credits.
Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis.

SPLH 900. Proseminar in Communicative Disorders. 1 Credits.
A weekly forum for students and faculty to discuss professional issues and interdisciplinary research in communicative disorders and related fields. May be repeated for credit. Limited to two hours credit counted toward an MA or AuD degree. Limited to four hours credit counted toward the PhD degree. Graded on a satisfactory/unsatisfactory basis.

SPLH 964. Seminar in: _____. 1-3 Credits.
The subject matter of this seminar will be special topics from speech pathology and audiology, including those related to research methodology and research or academic careers. Special prerequisites may be established for a given topic.

SPLH 970. Independent Study in Problems of Speech and Hearing. 1-6 Credits.
Investigation of special topics by individual students. Paper required.

SPLH 974. Doctoral Research Practicum. 1-6 Credits.
Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting an experimental investigation in speech or hearing.

SPLH 975. Directed Teaching: Speech Pathology and Audiology. 1-3 Credits.
Provides experiences in classroom and laboratory instruction under supervision of graduate faculty. Variable credit to reflect amount of instructional responsibility assumed. May be repeated up to a maximum of six semester hours.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Women, Gender and Sexuality Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

WGSS 196. Study Abroad Topics in: ____. 1-6 Credits. S
This course is designed for the study of special topics in Women’s Studies. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

WGSS 305. Women, Gender, and Sexuality in the North American West. 3 Credits. H
This course will provide students with an overview of how the history of women have profoundly shaped and given meaning to the development of the North American West (which includes present-day states and provinces in the U.S., Canada, and Mexico). The class will examine the lives of women who represent diverse backgrounds, lands, and time periods in this western region. In addition to women, lectures, readings, and discussion will focus on the themes of gender, masculinity, class, race, ethnicity, sexuality, labor, and environment. Broad in chronological scope that spans pre-contact into the twenty-first century, this course is not a comprehensive survey. Rather, the class will examine how women and groups of women across the region defended, survived, explored, cultivated, and imagined the West as a place that defined their homes, migrations, settlement patterns, as well as sites of captivity, displacement, war, and development. (Same as HIST 405.)

WGSS 311. Sex in History. 3 Credits. HT H
This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, “versions” (paraphilias); sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as AMS 323, HIST 332, and HUM 332.)

WGSS 319. History, Women, and Diversity in the U.S.. 3 Credits. H
This survey course explores the history of being female in America through a focus on the ways differences in race, sexuality, ethnicity, class, and life cycle have shaped various aspects of women’s lives. Themes to be explored could include, but are not limited to: social and political activism; intellectual developments; family; women’s communities; work; sexuality; and culture. (Same as HIST 319.)

WGSS 320. From Goddesses to Witches: Women in Premodern Europe. 3 Credits. HT H
This course examines the social, cultural, and political contexts of women’s spirituality and their relations to gender relations in Europe from about 30,000 B.C.E. to the 16th century Protestant Reformation. Lectures move both chronologically and topically, covering such subjects as goddess-worshiping cultures, women’s roles in Christian and Jewish societies, symbols of women, and male attitudes toward women. Students will be able to participate in weekly discussions of primary and secondary source readings about women. (Same as HIST 320.)

WGSS 321. From Mystics to Feminists: Women’s History in Europe 1600 to the Present. 3 Credits. HT H
This survey of women’s history in Europe looks at changing patterns of women’s economic roles and family structures in preindustrial and industrial society, the importance of women in religious life, cultural
assumptions underlying gender roles, and the relationship of women to political movements, including the rise of feminism. (Same as HIST 321.)

WGSS 322. LGBTQ U.S. History, 1600-1900. 3 Credits.  H
This course will take students on the first part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The first part of this two course sequence begins in the colonial period and ends around 1900 as modern categories of sexuality and sexual orientation came into existence. We will examine the ways in which individuals who craved intimacy with members of the same sex understood and negotiated their desires in an often hostile world. And we will consider how Early America's remarkable diversity shaped this history of same-sex love and desire. (Same as HIST 322.)

WGSS 323. LGBTQ U.S. History, 1900-Present. 3 Credits.  H
This course will take students on the second part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The second part of this two course sequence focuses on the twentieth and twenty-first centuries. We will examine the changing understanding of non-normative sex, love, and desire; the political tactics, framings, and fights around sexual identities and rights; and the intersection of structural inequalities including, but not limited to, race, class, ability, and gender with LGBTQ histories. Please note that WGSS 322 or HIST 322 is not a prerequisite for WGSS 323 or HIST 323, though students interested in LGBTQ history should consider taking both. (Same as HIST 323.)

WGSS 324. History of Women and the Body. 3 Credits.  H
This course examines different notions about women and their bodies from a historical perspective. It discusses the arguments and circumstances that have shaped women's lives in relation to their bodies, and women's responses to those arguments and circumstances. This course covers a wide geographical and chronological spectrum, from Ancient societies to the present, from Latin America and the Middle East, to North America and Western Europe. (Same as HIST 324.)

WGSS 325. Language, Gender, and Sexuality. 3 Credits.  S
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, GIST 303, JWSH 305 and SLAV 305.)

WGSS 327. Perspectives in Lesbian, Gay, Bisexual, and Transgender Studies. 3 Credits.  S
An exploration of the experiences and histories of people who identify as lesbian, gay, bisexual, and/or transgender (LGBT); of the influences on these experiences by individuals, the state, and artistic, legal and medical discourses; and of the intersections between sexual orientation, sexuality, ethnicity, class, and religion.

WGSS 329. Introduction to Queer Theory: Tools for Deconstructing Gender. 3 Credits.  H
In the 1970s and 1980s, LGBT activists began questioning basic knowledge about sexuality and the body, challenging rigid identity categories, and offering new ways to think about gender. We now call this approach “queer theory,” and this course will introduce students to the texts and debates that have shaped this intellectual tradition. From ancient eunuchs to drag kings and queens, queer theory highlights how gender norms operate as forms of violence and oppression. We will explore how queer theory helps us understand difference, including its intersections with theories of feminism, race, and disability.

WGSS 330. Women in Contemporary African Literature. 3 Credits. NW H
A critical study of issues and questions raised about women in contemporary African literature and implications for the larger society through the analysis of theme, language, characterization, roles and functions of women in selected works. (Same as AAAS 340.)

WGSS 331. Sex and Gender in New Media. 3 Credits.
How do gender and sexuality shape digital worlds, and how do these spaces shape our understanding of ourselves? This course analyzes new media like social networking sites, gaming, and dating apps. Students will explore the identities, relationships, and communities that have emerged across these platforms, with a focus on the possibilities and challenges they offer for gender and sexual expression.

WGSS 333. The Politics of Physical Appearance. 3 Credits.  S
An interdisciplinary analysis of standards of physical attractiveness and cultural conceptions of women's bodies. Includes analysis of how these standards change across time and cultural groups, and of the impact of these standards on women as individuals and on social and political outcomes.

WGSS 335. History of Jewish Women. 3 Credits.  H
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women’s gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women’s lives in both Jewish and non-Jewish society. There are no prerequisites for this course. (Same as HIST 335, JWSH 335.)

WGSS 339. Feminism and Social Change. 3 Credits.
How do feminists go about fighting for social change? From social media hashtags to citywide protests, what methods do they use, and how do they justify them? Where have they been effective, and what lessons can we learn from those successes? This course investigates historical and contemporary efforts to change the world, with an emphasis on movements for women's rights and queer liberation in the United States.

WGSS 344. Black Feminist Theory. 3 Credits.  HL H
This course will study the critical discourse produced by black female intellectuals, writers, and activists about their race, gender, sexual, and class identities. Students will explore black women’s distinct positionality through an examination of their theory as well as their praxis from the nineteenth century to the contemporary moment. By tracing the evolution of black feminist thought, the class will explore black women’s initiation of and engagement with political, social, and artistic conversations in various fields of scholarly inquiry including—but not limited to—literature, history, sociology, political science, and the law. (Same as AAAS 344 and ENGL 344.) Prerequisite: WGSS 101, AAAS 104, or prior completion of one 200-level English course.

WGSS 350. Black Love and Romance. 3 Credits.  H
This course will examine representations of love and romance in African American literature and culture. In addition to the romance novel genre, the course studies different kinds of cultural texts, such as art, film, and music. It explores romantic relationships among black people, including related topics such as sex, desire, marriage, and singleness, and how these interpersonal relationships build families, communities, and collective bonds. The class will consider both the content and aesthetics of diverse texts in order to think about how black people connect intimately as well as how various social and cultural politics underline the nature of those intimacies.

WGSS 351. Women and Leadership: The Legislative Process. 3 Credits. S
Examines current and historical roles and impacts of women involved in legislatures. Explores what difference women make when they are public officials. Students meet with local women legislators, lobbyists and political officials. Students learn how to analyze issues, access power, lobby, and organize at the grassroots. The course is designed to prepare students for an optional legislative internship during the subsequent semester.

WGSS 355. International Women’s Rights. 3 Credits. SC
Women face discrimination and abuse around the world: at home, in the workplace, and in the public sphere. How are these systems of oppression connected? How are women working together for change, and what can you do to support their efforts? This course will investigate what feminist solidarity looks like around the world, with an emphasis on connections across different cultural and political contexts. (Same as GIST 355.)

WGSS 359. Introduction to Feminist Theory. 3 Credits. H
Feminist theories are influential and provocative ideas that present different ways to understand the lives of women and feminine people. This course introduces key trends in feminist theory from the last 120 years. Why are women and feminine people disadvantaged in realms as diverse as poverty, climate change, sexual exploitation, and violence? Feminist theories provide frameworks for understanding, interrogating, and debating the roots of these challenges and possible avenues for change. Students will learn to compare the strengths and weaknesses of different ideas by applying them to works of literature. Additionally, the course considers the relationship between queer theory and feminism from a perspective that affirms the identities of trans individuals. People of all genders, sexualities, and identities benefit from studying feminist theories because learning theory means learning to think about the world in new ways. Prerequisite: Sophomore standing is required. An introductory course in WGSS is helpful but not required.

WGSS 364. Pregnancy in Modern Literature. 3 Credits. HL
An examination of pregnancy, childbirth and reproductive control as depicted in literature from various national traditions in the twentieth and twenty-first centuries. This course draws together voices from literature, history, and feminist theory to deepen students’ understanding of the ways nationality, class, race, ability, and gender affect the aesthetics surrounding reproduction. Special attention is given to the relationship between society and the pregnant/postpartum individual. Other topics may include: eugenics, contraception, male pregnancy, and speculative reproduction. (Same as HUM 364.)

WGSS 365. Angry White Male Studies. 3 Credits. H
This course charts the rise of the “angry white male” in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HIST 364 and HUM 365.)

WGSS 366. Fat, Food and the Body in Global Perspective. 3 Credits. H
An examination of fat and food as they relate to human embodiment in a variety of world locations. Bringing into a dialogue a number of disciplinary voices, including anthropology, fat studies, feminist theory, food studies, history, medicine, and psychology, the course applies theories of culture and embodiment to select global case studies as a means of approaching the pleasures, anxieties, health implications, and symbolic functions of ingesting food and drink. Topics may include the cultural and gender politics of fatness and thinness; anorexia and feedingism; food, sex, and animality; vegetarianism, food scares and food purity movements; neoliberalism and the consuming body; and the material and symbolic aspects of fats and oils. (Same as HUM 366.)

WGSS 374. Religious Perspectives on Selfhood and Sexuality. 3 Credits. H
The nature of the self in its individual and social dimensions. Self experienced and expressed in sexuality. Survey of viewpoints in religious literature. (Same as REL 374.)

WGSS 376. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL H
An examination of Japanese attitudes toward love, sexuality and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students who have taken EALC 575/ WGSS 576. (Same as EALC 375.)

WGSS 380. African Art and Gender. 3 Credits. HL H
How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of “craft.” This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 780/HA 780. (Same as AAAS 380 and HA 360.)

WGSS 381. Feminism and Philosophy. 3 Credits. H
An examination of topics of philosophical interest that are important in the feminist movement such as the nature of sexism, the concept of sexual equality, the ethics of sexual behavior, the nature of love, feminist analyses of the value of marriage and family, the ethics of abortion and justifications for preferential treatment of women. (Same as PHIL 381.)

WGSS 389. The Anthropology of Gender: Female, Male, and Beyond. 3 Credits. NW W
This course will introduce students to cultural constructions and performances of masculinity, femininity, and alternative genders across time and space. Topics and cases will be drawn from primarily non-Western cultures, ranging from Japanese markets to Pacific Rim gardens, and from Haitian voudou to Maya royal politics. This course uses research by archeologists, linguists, biological anthropologists, and sociocultural anthropologists. (Same as ANTH 389.)

WGSS 396. Studies in: ____. 3 Credits. H
The interdisciplinary study of selected and different aspects of women's studies in different semesters.

WGSS 397. Study Abroad Topic in: ____. 1-6 Credits.
This course is designed for the study of special topics in Women's Studies at the junior/senior level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies.

WGSS 410. Intimate Relationships. 3 Credits. S
A social psychological perspective on adult intimate relationships, examining friendship, dating, committed relationships, and the dissolution of committed relationships. Topics include romance, jealousy, self-disclosure, power, loneliness, and social support. Discussion of heterosexual and homosexual relationships, traditional forms (e.g., marriage) of relationships as well as alternative lifestyles (e.g., cohabitation) and gender-linked differences in relationships. (Same as PSYC 410.) Prerequisite: PSYC 104.

WGSS 418. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Credits. NW H
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. Recommended: A course in East Asian studies. Not open to students who have taken EALC 618. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. (Same as EALC 418.) Prerequisite: One course in EALC or WGSS.

WGSS 440. Communication and Gender. 3 Credits. S
Focuses attention on the relationship between communication and gender, including both physical and psychological dimensions. Topics include: sex role orientations and stereotypes; perceived and actual differences in verbal and nonverbal communication behaviors; the influence of gender on communication in a variety of contexts. (Same as COMS 440.) Prerequisite: COMS 130, or COMS 230.

WGSS 468. Psychology of Women. 3 Credits. S
A survey of the psychological theories about women; similarities and differences in the behavior of women and men; the effects of biological and social factors on the behavior of women and men; and issues of concern to women of different races, sexual orientations, ages, and so forth. (Same as PSYC 468.) Prerequisite: Any previously completed course in PSYC or WGSS.

WGSS 477. Gender and Religion. 3 Credits. H
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as HUM 477 and REL 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender & Sexuality Studies.

WGSS 498. Independent Study. 1-3 Credits. S
Intensive reading or research under faculty supervision culminating in the writing of a paper or research report. Can be used in two-course sequence for departmental honors in WGSS, followed by WGSS 499. Prerequisite: Permission of instructor required.

WGSS 499. Honors in Women, Gender and Sexuality Studies. 3 Credits. S
An individual research or creative project under the direction of a specialist in the area of the student's interest. May be counted towards the total hours required for the major. Prerequisite: WGSS 498 with a grade of an A or B, or equivalent independent study/research credits with approval of the project adviser and the Women, Gender and Sexuality Studies honors coordinator. Majors only.

WGSS 501. Doing Feminist Research. 3 Credits. S
How is feminist research more than research that just focuses on women? What does it mean to do research in a feminist way? This course explores feminist critiques of traditional methods and asks how we can build knowledge that is more just, collaborative, and politically engaged. Students practice basic skills in qualitative research methods like interviewing and participant observation, and they learn how to design their own research project using these methods. Suggested for the junior year. Prerequisite: Any previous coursework in WGSS or by permission of instructor.

WGSS 502. Human Sexuality. 3 Credits. S
An introduction to the field of human sexuality. Topics to be covered include sexual anatomy and physiology, fertilization, pregnancy, birth and lactation, contraception, human sexual response, sexuality across the life cycle, love, marriage, alternatives to marriage, sexual orientation, sex differences in behavior, parenthood, sexually transmitted diseases, sex and the law, and sex education. (Same as PSYC 502.) Prerequisite: Any previous coursework in either WGSS or PSYC.

WGSS 510. History of American Women: Colonial Times to 1870. 3 Credits. H
A survey of women's history in the United States, which will consider women's roles as housewives, mothers, consumers, workers, and citizens in pre-industrial, commercial and early industrial America. (Same as AMS 510 and HIST 530.)

WGSS 511. History of American Women: 1870 to Present. 3 Credits. H
A survey of women's history in the United States, which includes radical and reform movements, the impact of war and depression, professionalization, immigration, women's work, and the biographies of leading figures in women's history. (Same as AMS 511 and HIST 531.)

WGSS 514. Politics of Human Trafficking. 3 Credits. S
This course examines the politics of human trafficking—both labor and sex trafficking—using an interdisciplinary approach. We begin by understanding how contemporary modern-day trafficking is operating and how it is defined by various groups. We study texts by social scientists, humanists, and journalists working in the field to get a more comprehensive picture of trafficking today. We also examine some of the key policies internationally, comparatively, and domestically that address human trafficking. Human trafficking has been one of the most non-partisan issues we have seen in the past several decades. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. Using critical approaches, we will examine the limitations of many of the anti-trafficking movements and initiatives operating globally and work to understand how the framing of this issue can have a significant impact on the prevention of exploitation. This course is offered at the 400/500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 714, POLS 714, or GIST 714. (Same as GIST 471 and POLS 471.) Prerequisite: Sophomore standing or consent of instructor.

WGSS 515. Gender and Sexuality in Greek Culture. 3 Credits. H
This course explores various approaches to the study of gender and sexuality in Greek antiquity. Contents will vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as CLSX 515.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

WGSS 516. Gender and Sexuality in Roman Culture. 3 Credits. HL H
This course explores various approaches to the study of gender and sexuality in Roman antiquity. Contents vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as CLSX 516.) Prerequisite: Graduate status, or 6 credit hours
in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

WGSS 517. Policing the Womb. 3 Credits. S
Women's reproductive bodies have at times been hypervisible, subject to medical, legal, and social surveillance and intervention, while at other times invisible. Across these practices, gender and race have been socially constructed in particularly limited ways, which the state has used to justify restrictive case law rulings and policies governing reproductive outcomes. This course is designed to critically examine the history, development, and outcomes of policies and cultural practices related to reproduction that have limited people's decisional autonomy. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 717. (Same as COMS 552.) Prerequisite: Any previous course in WGSS.

WGSS 521. Women and Violence. 3 Credits. S
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. The nature, prevalence, causes, and consequences of violence against women are discussed. (Same as PSYC 521.) Prerequisite: PSYC 104.

WGSS 533. Rococo to Realism: Painting in Europe c. 1750-1848. 3 Credits. H
This course considers European painting c. 1750 to 1848 within the context of dramatic political and industrial revolutions. Exploring the power of the visual to engage with broader circumstances and to effect change, we will examine the ways in which shifting constructions of gender, empire, colonialism, race, slavery, and class were addressed by such artists as Watteau, David, Vigée-Lebrun, Delacroix, Géricault, Goya, Turner, Constable, Ingres, Daumier, Bonheur, and Courbet. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 333. (Same as HA 533.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

WGSS 534. Impressionism and Post-Impressionism: 1848-1900. 3 Credits. H
This course considers French painting 1848 to 1900, a period marked by unprecedented technological advancements, the restructuring of Paris, and the rise of consumer culture. As large sections of the city were leveled to make way for broad boulevards, cafés, and department stores, some artists strove to represent the ever-changing spectacle of urban life; others found their inspiration away from the city, Focusing on Manet, Degas, Caillebotte, Morisot, Cassatt, Monet, Renoir, Seurat, Gauguin, Van Gogh, and Cézanne, we will explore how artists engaged with shifting constructions of modernity, gender, fashion, public and private, empire, race, class, and consumer and leisure cultures. This course is offered at the 300 and 500 levels with additional assignments at the 500 level. Not open to students with credit in HA 334. (Same as HA 534.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor.

WGSS 540. Skin, Sex, and Disease. 3 Credits. H
This course explores the complex historical relationships between gender, race, health, sickness, and oppression over time. Students examine the impact race and gender have on structuring experiences of health, sickness and health care; and examine the political activism surrounding definitions and concepts of health. Prerequisite: Any previous course in WGSS or by permission of instructor.

WGSS 549. History of Feminist Theory. 3 Credits. H
This discussion course will cover the development of feminist theories from the late Middle Ages to the 1970s. Reading will include Pisan, Wollstonecraft, Mill, Freud, Woolf, Beauvoir, Friedan, Daly, Kristeva, and others. (Same as HiST 649.) Prerequisite: Any previous course in WGSS or HiST or permission of instructor.

WGSS 552. The Rhetoric of Women's Rights. 3 Credits. H
An analysis of the themes and rhetorical strategies of the women's rights movement in America. The course will view the struggle for women's rights from a historical perspective and will conclude with contemporary issues concerning the role of women in society. (Same as COMS 552.) Prerequisite: COMS 130 or COMS 230.

WGSS 553. Making a Pandemic: The History and Politics of HIV/AIDS. 3 Credits. H
HIV/AIDS is a global pandemic fueled as much by political and historical forces as by epidemiology. This course will chart the disease's emergence, evolution of medical understanding and treatment, and spread of the pandemic through the lens of global structural inequalities, attitudes around sexuality, racism, and the lasting impact of colonialism. Through readings, assignments, films, and discussion, this course will lay bare for students the ways in which the current AIDS epidemic results as much from the disease's design itself as from the social and political world in which it operates. With HIV/AIDS as the focus, students will analyze and gain understandings of how different countries/communities/regions have experienced and responded to the disease, how those responses are informed by local cultural, historical, and political landscapes, and how larger global political forces have created the pandemic of today. Prerequisite: Any previous course in WGSS or by permission of instructor.

WGSS 560. Race, Gender and Empire. 3 Credits. NW
This course considers how colonialism has shaped race and gender, historically and today. It explores how Europeans justified colonial rule through sexist beliefs about Native peoples and how sexual exploitation was built into colonial occupation. Film, literature, and political essays help us examine the lasting legacies of these ideas and resistance against them - a field known as postcolonial studies. We use this lens to trace historical attitudes about the white man's burden into contemporary issues in international politics, asking how human rights programs and military intervention maintain global inequality and produce new kinds of empires. (Same as AAAS 560.) Prerequisite: Any WGSS or AAAS course, or permission of the instructor.

WGSS 562. Gender and Politics. 3 Credits. S
This course exposes students to contemporary research on gender and politics by surveying the sub-fields of political science. Topics include understanding the role of gender in politics in the U.S., gender and U.S. public policy, gender and legal theory, international gender politics and movements, gender and political economy, and gender and revolution. We will examine the ways in which feminist theory and gender activism have challenged the narrow focus of the discipline. Prerequisite: Sophomore level or consent of the instructor.

WGSS 563. Gender, Sexuality and the Law. 3 Credits. H
This course provides a broad introduction to Western legal systems (especially the American legal system) and then focuses on how sex, gender, and sexuality operate in and are understood by those systems and how the law is a site of social and political struggle. Topics may include intimate relations, First Amendment law, sexual harassment and employment discrimination; reproduction policies and governance; rape and sexual assault; gender identity discrimination; and the legal understandings and constructions of equal protection and due process. No prior knowledge of legal concepts is necessary. Prerequisite: Any previous course in WGSS or by permission of instructor.

WGSS 565. Gender, Culture, and Migration. 3 Credits. S
This course examines the gendered experiences of transnational migration through a combination of ethnography, literature, film, and news media. How do different people experience the desire to migrate, the logistics of movement, and life in a faraway place? How does mobility shape ideas of family, community, and nation? How do class, race,
sexuality, and legal status also affect these experiences, especially in rendering certain groups vulnerable to abuse and exploitation? Attention will also be paid to gendered thinking against migration, including the ways gender and sexuality intersect xenophobia, border enforcement, refugee recognition, deportation policy, and contemporary political debates. Prerequisite: Any 100 level AAAS course, WGSS 101, AMS 100, AMS 110, or GIST 220.

WGSS 567. Native Feminisms. 3 Credits. SC H/W
This course examines the foundation of Native feminist scholarship and the history of Native feminism activism. The class will begin by considering whether feminist theory can support contemporary Native women Native Two-Spirit (LGBTQ+) in their struggles against settler colonialism and heteropatriarchy. While the course begins by examining the North American experience, the course will also cover a range of international indigenous contexts, with a focus on the Global South and the Indigenous Pacific. Topics explored include the history of settler-colonialism, cultural revitalization and gender roles, change and continuity under cycles of settler-colonialism, the connection between colonialism and sexual violence in Native communities, debates over citizenship and sovereignty, and contemporary Native gender roles and identities. During the conclusion of the course, students will learn to identify how Native feminism informs activism and practice. (Same as ISP 567.) Prerequisite: Any previous course in WGSS or ISP, or by permission of instructor.

WGSS 575. The Body, Self and Society. 3 Credits. H
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HIST 625, HUM 575.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor.

WGSS 576. Love, Sexuality and Gender in Japanese Literature. 3 Credits. HL H
An examination of Japanese attitudes toward love, sexuality, and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students with credit in EALC 375/ WGSS 376. (Same as EALC 575.) Prerequisite: One course in EALC or WGSS.

WGSS 583. Love, Sex, and Globalization. 3 Credits. S
Escalating transnational flows of information, commodities, and people have created innumerable kinds of "intimate" contacts on a global scale, such as mail order brides, child adoption, sex tourism, commodified romance, and emotional labor. Exploring the ways that cultural artifacts of intimacy are rendered, fetishized, and reified in a free market economy, this course examines how discourses on love and sex encounter, confront, and negotiate the logics of the capitalist market, the discrepant narratives of (colonial) modernity, and the ethics of pleasure. In doing, this course navigates the treacherous interplay among emotions-specifically love, sex, and money, seeking the potential and limits of cultural politics of emotions. (Same as ANTH 583.) Prerequisite: Any previous course in ANTH or WGSS.

WGSS 598. Sexuality and Gender in African History. 3 Credits. W
An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project in consultation with the instructor. (Same as AAAS 598 and HIST 598.)

WGSS 600. Feminist Contemporary Political Theory. 3 Credits. S
A detailed introduction to feminist thought post-1960. Examines feminism in relation to the categories of political theory: liberal feminism, socialist feminism, radical feminism, and postmodern feminism. Within these categories and separately, we will also consider feminism within the frameworks and perspectives of Black feminist thought, anti-colonial feminism, transnational feminism, and BIPOC communities. Prerequisite: Sophomore level or consent of the instructor.

WGSS 601. Seminar in Women, Gender and Sexuality Studies. 3 Credits. S
Investigation of a topic related to women, gender or sexuality from an interdisciplinary perspective. Open only to majors in Women & Sexuality Studies and majors in Human Sexuality. Suggested for the senior year. Prerequisite: WGSS 501.

WGSS 630. Politics of Identity. 3 Credits. S
This seminar explores the nature of identity and how identity is relevant to politics and policy with a focus on political attitudes and behavior, institutions, and public policy. Topics include individual and group identity, identities such as gender, racial, sexual orientation, and partisan, and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. (Same as POLS 630.) Prerequisite: Sophomore level or consent of the instructor.

WGSS 650. Service Learning in Women, Gender and Sexuality Studies. 3 Credits. S
This course, to be taken in the senior year, is designed to give students the opportunity to apply women's studies knowledge and ideas gained through course work to real-life situations in various agencies and women's centers. Open to Women's Studies majors and others with significant Women's Studies backgrounds. Prerequisite: Permission of instructor is required.

WGSS 652. Jazz and American Culture. 3 Credits. H
This course considers cultural and social histories of jazz, from the 1920s through the present day, as sites for exploring ideological struggles over such fields as race, class, gender, sexuality, democracy, capitalism, freedom, community, Americanness, and globalization in the U.S. The course will explore such questions as the following: What music was called jazz at what times and places? What did it mean to whom? Who played it? Who wrote about it? Who listened to it? Who danced to it? Who policed it? Who produced it? Who used it to rebel? Who used it to survive? What did all of these practices mean to participants? The course will examine struggles over social meanings in the U.S. through a study of jazz performance, labor, representation, marketing, consumption, censorship, and historiography. Prerequisite: A course in American studies, American history, or consent of instructor. (Same as AMS 650.)

WGSS 653. Gender, Peace, and Conflict. 3 Credits. S
This course explores ways in which militarization, conflict, and warfare are gendered processes. We ask, what does war tell us about gender, and what does gender tell us about war? How do race and geo-political political systems affect conflict and peace-making? In what ways does gender affect the range of peace processes, including peace movements, peace negotiations, disarmament, demobilization, and reintegration? How do states mobilize citizens to war and how is the process gendered? Prerequisite: Sophomore level or consent of the instructor.

WGSS 662. Gender and Politics in Africa. 3 Credits. S
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political
roles during the pre-colonial and colonial society. Next, we examine the
impetus, methods, and path of liberation struggles and how gender roles
were shaped, shifted, and changed during these struggles. The majority
of the class focuses on current issues in African politics, including gender
and development, HIV/AIDS and women's health, gender and militarism.
We also explore women's roles in political institutions, civil society
organizations, trade and labor unions, and transnational movements. We
also examine contemporary constructions of masculinity and femininity
in African states and explore how these constructions affect social policy
and national political agendas. (Same as AAAS 662 and POLS 662.)
Prerequisite: Sophomore level or consent of instructor.

WGSS 689. Conceptual Issues in Human Sexuality. 3 Credits. S
An examination of the social construction of sexuality and research
methods and issues relevant to sexuality. These concepts are applied
to various topics, such as defining and conceptualizing sex and gender,
sexual dysfunction, sexual orientation, the social control of sexuality,
sexual coercion and abuse, and abstinence-only sex education. The
course does not cover anatomical or physiological aspects of sexuality.
(Same as PSYC 689.) Prerequisite: Any previously completed course in
PSYC or WGSS.

WGSS 696. Studies in: ____. 3 Credits. S
Interdisciplinary study of different aspects of women's studies in different
semesters.

WGSS 701. Seminar in: ____. 3 Credits.
A research seminar in women's studies. Instructor and topic will vary.

WGSS 710. History of American Sexuality. 3 Credits.
This graduate seminar examines the history and significance of sexuality
in American history from colonial times to the present. It will employ
gender as an analytic category to explore the lived experiences of both
men and women, as well as to question the formation of economic,
political, and social institutions. Of necessity the class will examine
the ways in which race, class, religion, and region, affect ideas about
sexuality and its practice. Subjects will include abortion, contraception,
prostitution, illegitimacy, homosexuality, rape, marriage, and the "sexual
revolution." Prerequisite: Graduate standing.

WGSS 711. Feminist Jurisprudence. 3 Credits.
This seminar examines the role of law in perpetuating and remedying
inequities against women. After studying the historical emergence of
sexual equality law in the United States, we discuss several paradigmatic
feminist legal theories, including formal equality, MacKinnon's
"dominance" theory, relational/cultural feminism, intersectionality and
queer theory. We then proceed to apply these analytical structures to
various substantive areas of law of particular concern to women, including
but not limited to pregnancy, sexual assault, domestic violence, and
employment discrimination. Students will also present their own research
to the class.

WGSS 713. The Politics of Marriage. 3 Credits.
This course focuses on the history and contemporary politics of the
institution of marriage, concentrating primarily on the US context, but
with exploration of marriage in other countries as well. We will consider
how the law regulates marriage as well as the lived reality of marriage for
the couples who enter it. Topics include romance, engagement, gender
roles in marriage, divorce, child marriage, arranged marriage, same-sex
marriage, and polygamy. Prerequisite: Graduate standing.

WGSS 714. Politics of Human Trafficking. 3 Credits.
This course examines the politics of human trafficking—both labor
and sex trafficking—using an interdisciplinary approach. We begin by
understanding how contemporary modern-day trafficking is operating
and how it is defined by various groups. We study texts by social
scientists, humanists, and journalists working in the field to get a more
comprehensive picture of trafficking today. We also examine some of
the key policies internationally, comparatively, and domestically that
address human trafficking. Human trafficking has been one of the most
non-partisan issues we have seen in the past several decades. Yet, the
current movement to end trafficking also has deep chasms and ideological
divisions. Using critical approaches, we will examine the limitations
of many of the anti-trafficking movements and initiatives operating
globally and work to understand how the framing of this issue can have a
significant impact on the prevention of exploitation. This course is offered
at the 400/500 and 700 level with additional assignments at the 700 level.
Not open to students with credit in GIST 471, POLS 471, or WGSS 514.
(Same as GIST 714 and POLS 714.) Prerequisite: Graduate standing.

WGSS 717. Policing the Womb. 3 Credits.
Women's reproductive bodies have at times been made hypervisible,
subject to medical, legal, and social surveillance and intervention, while at
other times invisible. Across these practices, gender and race have been
socially constructed in particularly limited ways, which the state has used
to justify restrictive case law rulings and policies governing reproductive
outcomes. This course is designed to critically examine the history,
development, and outcomes of policies and cultural practices related to
reproduction that have limited people's decisional autonomy. This course
is offered at the 500 and 700 level with additional assignments at the 700
level. Not open to students with credit in POLS/WGSS 517.

WGSS 775. Advanced Study in the Body and Senses. 3 Credits.
An intensive examination of the role of the human body in the creation
of personal and social identities in the West since the sixteenth century.
Emphasis is on understanding how contemporary theories of embodiment
are applied to concrete historical or contemporary problems. May be
repeated if course content varies sufficiently. (Same as HUM 775.)

WGSS 797. Directed Readings. 1-3 Credits.
Directed reading in an area of women's studies in which there is no
appropriate course in the offerings of the Women's Studies Program, but
in which there is a member of the cooperating graduate faculty competent
and willing to direct the program of study.

WGSS 800. History of Women, Gender and Sexuality Studies. 3
Credits.
An introduction to the field of women, gender, and sexuality studies,
paying particular attention to its development, its reception by and
influence on academic disciplines, and its institutionalization. Prerequisite:
Graduate standing and consent of the instructor.

WGSS 801. Feminist Theory. 3 Credits.
A survey of contemporary feminist theories produced within and across
disciplines (including but not limited to, eco-feminism, and liberal,
cultural, materialist, psychoanalytic, radical, and black feminist thought).
Prerequisite: Graduate standing and consent of the instructor.

WGSS 802. Feminist Methodologies. 3 Credits.
How is feminist research more than just research on feminist topics?
What, if any, implications do various feminist theories have for how
we conduct research and for what we count as knowledge? This
graduate seminar explores the joint epistemological and methodological
foundations of feminist research in the humanities and social sciences.
We will practice different research methods, assess their strengths and
limitations, and learn how to integrate them in project design. Prerequisite:
Graduate standing and consent of the instructor.

WGSS 803. Feminist Pedagogy. 1.5 Credits.
The goal of the course is to teach students to teach. By reading core
texts of feminist pedagogy, understanding critical theories, and attending
seminars at the Center for Teaching Excellence selected by instructor
and student, students will learn how to present knowledge and stimulate learning in the classroom, as well as such practical skills as leading discussion sections, preparing and presenting class sessions, developing syllabi, devising fair grading and helpful advising, and solving pedagogical problems like maintaining civility in the classroom and coping with academic misconduct. Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students.

WGSS 804. Professionalization Seminar in Women, Gender, and Sexuality Studies. 1.5 Credits.
The goal of this course is to train students in the skills essential to becoming effective scholars and educators, and successful members of the profession. The material to be covered by these three iterations includes 1) the ethics and practice of feminist research (e.g., protection of human subjects, conflicts of interest, confidentiality, legal strictures); 2) the practical aspects of producing knowledge (e.g., writing research papers, proper citation methods, conference presenting, responding to peer reviews); and 3) acquiring and securing a place in the work force (e.g., CV preparation, job interviews, grant writing, getting promotion [and, in the academy, tenure]). (Same as HIST 804.) Prerequisite: Must be Women, Gender, and Sexuality Studies graduate students.

WGSS 811. Black Feminist Theory. 3 Credits.
This course surveys black feminist theory and thought across various disciplines. It examines the critical figures, texts, investments, and debates constituting this evolving discourse, which centers black women's social, political, and cultural praxis as well as considers their intersectional positionalities. Prerequisite: Graduate standing.

WGSS 812. Affect and Queer Theory. 3 Credits.
Since the mid-1980s affect has become central to the study of affective labor, anticipatory temporality, and neoliberal biopolitics across the social sciences and humanities. Exploring feminist epistemology of the lived experience, queer theory of nonnormative temporality, and postcolonial studies of the body politic, this course interrogates the interrelation of affect, knowledge, and power in and outside scholarly knowledge production, and rethinks pervasive binaries such as epistemology/ontology, discourse/materiality, and reason/emotion. It will also examine the possibilities and limitations of dominant affect theory and seek methodology to study affect more inclusively and critically.

WGSS 821. Woman and Violence. 3 Credits.
An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. Research on the nature, prevalence, causes, and consequences of violence against women is discussed. (Same as PSYC 821.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

WGSS 835. Colloquium in the History of Gender. 3 Credits.
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as AMS 835 and HIST 895.)

WGSS 889. Conceptual Issues in Human Sexuality. 3 Credits.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as PSYC 889.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor.

WGSS 999. Doctoral Dissertation. 1-12 Credits.
Original research that is to be incorporated into a PhD dissertation. Graded on a satisfactory progress/limited progress/no progress basis.

Department of African and African-American Studies

Overview

Founded in 1970, the Department of African and African-American Studies (AAAS) provides an interdisciplinary space at the University of Kansas for studying historical and contemporary relationships among African and African-descended people. As a community of scholars and teachers, AAAS offers learning experiences for students to enrich their knowledge of African people on the Continent, as well as people of African descent in the Americas. Our academic wings span the humanities, the social sciences, and some professional fields. The Department’s areas of emphasis include art and culture; religion and rhetoric; families, gender and sexuality; and political economy. AAAS boasts concentrations in African Studies, African-American Studies, Arabic and Islamic Studies, and Haitian/Caribbean Studies at the B.A., B.G.S., and M.A. levels.

In addition to our Undergraduate Major (https://afs.ku.edu/our-academic-programs/), and Master’s Program (https://afs.ku.edu/graduate-program/), AAAS has an Undergraduate Minor (https://afs.ku.edu/our-academic-programs/) and two Graduate Certificates (https://afs.ku.edu/certificate-overview/). As part of our mission of developing students’ cultural literacy from pan-Africanist, African-centered and Diasporic perspectives, the Department coordinates several languages: Amharic, Arabic, Kiswahili, Haitian Creole, Hausa, Somali, and Wolof, supported by Study Abroad opportunities. The Department also draws strength and vitality from two allied centers and an institute: the Kansas African Studies Center (http://kasc.ku.edu/), the Langston Hughes Center (http://langstonhughes.ku.edu/), and the Institute of Haitian Studies (https://haitianstudies.ku.edu/).

Given the breadth and depth of all that we offer, and the fact that we function genuinely as both an African and African-American studies unit, AAAS is the only department of its kind at a public or private university in Kansas and among the Big XII institutions. We demonstrate that a robust racial/ethnic and area studies presence attracts and retains a diverse faculty and student body, creates inclusive learning environments for the campus, produces lifelong learners, and supports KU’s leadership in delivering a dynamic, forward-looking Liberal Arts education that (1) encourages an appreciation of different ways of knowing; and (2)
prepares informed and productive citizens in Kansas, the region, the nation, and the globalizing community of the twenty-first century.

Undergraduate Programs

The undergraduate academic program focuses mainly on Africa, Afro-America, and Arabic, but due attention is paid to the Caribbean and Latin America. The program deepens the knowledge and enriches understanding of the history and culture of African peoples in Africa, the Middle East, and the Americas as a necessary and desirable end in itself but also as a useful background for professionals whose careers may involve them in these geographical and cultural areas. Essentially interdisciplinary, the major gives students a basis for interpreting the historical and contemporary experiences of African peoples in Africa, the Middle East, and the Americas, both broadly and in relation to a particular region, historical period, or cultural manifestation. The major, with its flexibility and opportunity for fieldwork, encourages students to engage in independent study, if possible in a relevant community. Most undergraduate courses are also open to nonmajors.

Graduate Programs

The objective of the graduate program in African and African-American Studies at the University of Kansas is to produce scholars, teachers, administrators, and other professionals who have the intellectual and scholarly capacity and skills to make ongoing contributions to the world in which they live. Our graduate program encourages students to adapt a critical perspective, requiring an integrative approach to the study of history, politics, economics, the arts, languages, culture, anthropology, and geography that does not abstract them from their political and social contexts, but rather relocates them within the social and political contexts from which they developed. Students are required to focus not only on the experiences of Africans and African-Americans, but also on the links of those experiences to the cultural, political, and economic forces of the larger world to which Africans and African-Americans have been, and are, inextricably connected.

The Department of African and African-American Studies offers interdisciplinary substantive and language courses leading to the Master of Arts degree in two areas of concentration: (1) African, and (2) African-American studies. The master's degree in African and African-American Studies has two related objectives: (1) it fulfills the educational needs of persons who seek positions with organizations in both the public and private sectors, and (2) it prepares persons who desire to pursue the terminal degrees in their field. The program emphasizes broader concepts in the humanities and the social sciences, but provides an option for concentration in either African or African-American Studies.

The Department of African and African-American Studies also offers two graduate certificates, one in African Studies and another in African-American Studies. The Graduate Certificate programs enable graduate students to formally claim expertise in an area of the fields of African Studies or African-American Studies through completion of 12 hours of graduate coursework.

Kansas African Studies Center

The Kansas African Studies Center (http://www.kasc.ku.edu/) coordinates and develops the interdisciplinary interests of Africanists across the University of Kansas, and promotes the understanding and study of Africa in the university, the state, and the region. Its mission includes the enhancement of curriculum, the sponsorship of research, the organization of conferences, the promotion of special projects, the acquisition of library and related sources, the conduct of outreach programs, the seeking and acquisition of grants and special funding to make these activities possible and to assist the university in their realization.

Langston Hughes Center

The Langston Hughes Center (http://www2.ku.edu/~lhcaas/Home.html) (formerly the Langston Hughes Resource Center, founded in 1998) is an academic research and educational center that builds upon the legacy and creative and intellectual insight of African American author, poet, playwright, folklorist, and social critic, Langston Hughes. The center coordinates, strengthens, and develops teaching, research, and outreach activities in African American studies, and the study of race and culture in American society at the University of Kansas and throughout the region. The center is a hub of critical examination of black culture, history, literature, politics, and social relations. In addition, like Hughes himself, the center has a Diasporic focus, promoting research and discussions on Africans in the Americas, the Caribbean, and Africa. Toward these ends, the Langston Hughes Center regularly sponsors conferences, lectures, seminars, and forums on a variety of topics; coordinating activities with, among other groups, the Kansas African Studies Center and the Center of Latin American Studies and Caribbean Studies at KU.

Institute of Haitian Studies

The Institute of Haitian Studies (https://haitianstudies.ku.edu/) has as its main goal supporting and promoting Haitian Studies and Haitian culture through teaching, research, invited speakers, conferences, symposia and community engagement activities. The center’s mission includes examining Haiti’s importance in the Americas as the first Black republic as well as its historical, geopolitical and cultural connections with the United States. The center also promotes the Haitian Creole language, the largest type of Creole spoken by Creole communities around the world through the teaching and dissemination of Haitian Creole. Through Kansas University's Scholar Works (https://kuscholarworks.ku.edu/handle/1808/10885/), the center has made a number of materials in Haitian Creole available for the public’s use. The Center is affiliated with the Kansas African Studies Center and the Center for Latin American and Caribbean Studies.

Courses

**AAAS 102. Arabic and Islamic Studies. 3 Credits. SC W**

An introduction to the study of Islam and the Arabic language in relation to Islamic cultures in Africa, the Mediterranean region, and beyond. Topics covered include the historical origins of Islam in relation to the Arabic language and its cultures of origin. This course is interdisciplinary, including attention to the topic from the perspectives of historical unfolding of both the language and religion, geographic and cultural perspectives, political and economic concerns, and aesthetic perspectives, including literature and the arts. **AAAS 103. Introduction to Africa. 3 Credits. NW/SC S/W**

An introduction to the interdisciplinary study of African cultures and societies focusing on contemporary life on the continent. Topics to be covered include the geography, history, politics, and economics of the continent, as well as the religion, languages and literatures, music, and the arts. The interdisciplinary perspective will provide students with a sound basis for understanding contemporary African societies. **AAAS 104. Introduction to African-American Studies. 3 Credits. SC U**

Interdisciplinary introduction to the basic concepts and literature in the disciplines covered in African American Studies. Includes the social sciences, and humanities (including history, religion, and literature) as well
as conceptual framework for investigation and analysis of Black history and culture and society.

**AAAS 105. Introduction to African History. 3 Credits. NW H/W**
An introduction to important historical developments in Africa. Topics include empires, kingdoms, the slave trade, European colonialism, liberation movements, national identities, and a return to independence. (Same as HIST 104.)

**AAAS 106. The Black Experience in the Americas. 3 Credits. HT H/W**
An interdisciplinary study of the history of the African peoples of the New World, relating their cultures and institutions to the African background and to their peculiar New World experiences up to and including the nineteenth century. While the main emphasis is on the U.S.A., attention is also paid to the Caribbean and Latin America. Approaches include demography, economics, social and political developments, literature, and music. (Same as HIST 109.)

**AAAS 115. Introduction to African History, Honors. 3 Credits. NW H/W**
An intensive version of AAAS 105/HIST 104. An introduction to important historical developments in Africa, mainly south of the Sahara. Topics include early history, empires and city-states, the slave trade, southern Africa, partition and colonialism, the independence era, military and civilian governments, and liberation movements. Approaches include literature, the visual arts, politics, economics, and geography. Open only to students in the University Honors Program or by consent of instructor.

**AAAS 116. The Black Experience in the Americas, Honors. 3 Credits. HT**
An intensive version of AAAS 106. Open only to students on Dean's Honor Roll or enrolled in Honors Program, or consent of instructor.

**AAAS 160. Introduction to West African History. 3 Credits. W**
This course treats West African history through the first part of the twentieth century. The student is provided with a perspective on the major historical patterns that gave rise to West Africa's development as an integral part of world history. Special attention is paid to anthropological, geographical, and technological developments that influenced West African political and socioeconomic changes. (Same as HIST 160.)

**AAAS 177. First Year Seminar: _____ 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in African & African-American Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**AAAS 200. Directed Studies. 3 Credits. U**
This course is designed for the study of special topics related to Africana at the freshman/sophomore level. It prepares students for continued practice in cultural reading and writing and for the academic rigor that awaits them at the upper levels. Prerequisite: Consent of department.

**AAAS 203. Culture and Health. 3 Credits. H/W**
This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as GEOG 201 and GIST 210.)

**AAAS 204. Culture and Health, Honors. 3 Credits. H/W**
Honors version of AAAS 203, GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the
analysis of Reconstruction, Black leaders, organizations and movements, the Harlem Renaissance, migration, and race relations. Demographic variables covered include socio-economic class, education, political persuasion, and influence by avant-garde cultural changes. (Same as AMS 306 and HIST 359.)

AAAS 307. Modern Africa, Honors. 3 Credits. NW H
An intensive version of HIST 300. A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as HIST 307.) Prerequisite: Open only to students admitted to the University Honors Program, or by consent of the instructor.

AAAS 310. Introduction to Black Education in the US. 3 Credits.
This course examines the educational experiences of African American children from Emancipation through more contemporary periods today. The class explores topics including intersectionality, schools and inequality, hip-hop education, post-Reconstruction, and race. The course centers education studies, children and youth studies, gender, history, social sciences, Black studies, policy, and law. The class is interdisciplinary and supports different fields of study across multiple degree programs.

AAAS 314. The Black Church in America. 3 Credits. H
This course covers the “visible” church, the “invisible” church, and the Black church as an “invisible institution,” and shows how agency is ascribed through the Black church. The course covers the history, heritage, roles, social and spiritual theology and dynamics of the Black church and situates the Black church within the Abrahamic religions of Judaism, Christianity, and Islam, with Africa as the beginning site for understanding the Black church and its transmigration from its African roots to the present. The class shows how the Black church developed through spiritual/sacred and hegemonic encounters, prompting the rhetorical question posed by a prominent Black church scholar: “What is African American religion?” Because of the dominant American hegemony encountered by the Black church, it must be understood as part of a larger freedom-seeking agenda that allowed its members to assert power over competing images to shape the meaning of theological allegiance, as well as the treatment of black bodies, through theology, rituals, rites, ceremonies and other religious practices. Topics covered in the course include identity through the Black church, the black conversion experience, worship styles, Black preaching, Black music, gender roles, sexuality, liberation theology, health practices, and the impact of COVID-19 on the Black church. (Same as REL 314.)

AAAS 316. Ministers and Magicians: Black Religions from Slavery to the Present. 3 Credits. H
This course examines the history and diversity of African American religious expression from slavery until the present, emphasizing both mainstream and alternative faiths. It covers the religious world views of enslaved Africans, and examines faiths inside and outside of Christianity. Topics may include: independent black churches, magical practices, the Holiness and Pentecostal movements, black Islam, religious freemasonry, and esoteric faiths. The class emphasizes the influence of gender, class, race, migration, and urbanization on black religion. (Same as AMS 316 and HIST 316.)

AAAS 320. African Studies In: _____. 3 Credits. NW H/W
Lecture and discussion course in African area of current interest. May be repeated for credit toward the major. Only open to students admitted to the University Honors Program or with permission of the instructor.

AAAS 322. Legal Issues and the African American. 3 Credits. H
This course examines civil issues in African-American communities and populations, and their legal ramifications. Topics such as the penal system, court sentencing, death penalty, cultural norms, law enforcement and civil liberties are critically examined within social and humanistic theories.

AAAS 323. African-American Studies In: _____. 3 Credits. H
Lecture and discussion course in African-American area of current interest. May be repeated for credit toward the major.

AAAS 325. Popular Black Music. 3 Credits. H
This is a comparative study of popular music produced in Africa, and the African Diaspora. The praxis, theories, histories, forms, artists and audiences are discussed.

AAAS 326. Social Media & African Popular Culture. 3 Credits. U
This course deals with popular creative forms and critical commentaries (re)produced and/or re-circulated by ordinary people - as opposed to the social and political elites - in the context of social media in Africa. Social media in Africa stages an unprecedented explosion of new popular forms, and digital genres circulate the perspectives of everyday people. With the understanding that popular culture is an arena in which non-elite subjects in different African countries create aesthetic forms, we will examine in this course the implications of literary and cultural expressions from different regions of Africa that are born-digital and mediated through new forms of digital genres. Students will explore how forms of popular culture - including Nollywood films, and other expressive forms on YouTube and other social media - serve as a running commentary both on contemporary Africa as well as on historical processes and changes in the continent.

AAAS 327. African American Culture. 3 Credits.
This course defines African American culture and seeks to identify ways in which it is distinct, both in terms of its roots and ongoing evolution.

AAAS 330. Black Leadership. 3 Credits. H
The course focuses on the concept of leadership and on Black leadership in the United States. An in-depth analysis of selected case studies of Black leaders both historical and contemporary. Some attention will be given to the dispersion of Africans into the Americas and the leadership that emerged, conditioned both by environmental factors and the psychology engendered by the system of slavery. Selected successful Black leaders will be invited to visit the class from time to time. (Same as AMS 340.)

AAAS 332. Introduction to African Literature. 3 Credits. NW H/W
Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention is paid to historical development and to traditional literature. (Same as ENGL 326.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

AAAS 333. Introduction to Caribbean Literature. 3 Credits. H/W
Reading, analysis, and discussion of fiction, poetry, and drama from the Caribbean, including a small selection of Spanish, French, and Dutch Antillean works in translation. (Same as ENGL 339.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course.

AAAS 334. Introduction to African Dance Theatre. 2 Credits. NW U
An introduction to the general techniques of non-verbal theatrical conventions in African cultures. Practical training in movement vocabulary will be supplemented by lectures on the "text" of performance. (Same as DANC 334 and THR 334.)

AAAS 336. Introduction to African Literature, Honors. 3 Credits. NW H/W
Reading, analysis and discussion of contemporary fiction, poetry, and drama from Africa. Brief attention is paid to historical development and to traditional literature. Prerequisite: Open only to students admitted to the University Honors Program or with consent of instructor. Not open to students who have taken AAAS 332.

AAAS 340. Women in Contemporary African Literature. 3 Credits. NW H
A critical study of issues and questions raised about women in contemporary African literature and implications for the larger society through the analysis of theme, language, characterization, roles and functions of women in selected works. (Same as WGSS 330.)

AAAS 344. Black Feminist Theory. 3 Credits. HL H
This course will study the critical discourse produced by black female intellectuals, writers, and activists about their race, gender, sexual, and class identities. Students will explore black women's distinct positionality through an examination of their theory as well as their praxis from the nineteenth century to the contemporary moment. By tracing the evolution of black feminist thought, the class will explore black women's initiation of and engagement with political, social, and artistic conversations in various fields of scholarly inquiry including but not limited to literature, history, sociology, political science, and the law. (Same as ENGL 344 and WGSS 344.) Prerequisite: WGSS 101, AAAS 104, or prior completion of one 200-level English course.

AAAS 349. Islam. 3 Credits. NW H/W
Islam's Origins, the prophet Muhammed, the Holy Koran, religious symbols and moral mandates, and historical developments. (Same as REL 350.)

AAAS 351. Africa's Human Geographies. 3 Credits. NW S/W
An introduction to historical, cultural, social, political, and economic issues in Africa from a geographic perspective. The course begins with the historical geography of humanity in Africa, from ancient times through to the present. Other topics include cultural dynamics, demography, health, rural development, urbanization, gender issues, and political geography. Case studies from Eastern and Southern Africa will be used to illustrate major themes. (Same as GEOG 351.)

AAAS 353. Modern and Contemporary African Art. 3 Credits. H
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists' engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 569/HA 569. (Same as HA 353.)

AAAS 355. African Theatre and Drama. 3 Credits. NW H/W
A study of the origin and development of continental African theatre and its affinity to the Levant. Traditional, colonial and contemporary dramatic theories and experiments will be examined in play selections. (Same as THR 326.)

AAAS 356. African-American Theatre and Drama. 3 Credits. H
A historical study of Black theatre in the U.S.A. from its African genesis to its contemporary Americanness. Epochs in African-American dramaturgy will be critically examined. (Same as THR 327)

AAAS 365. Politics in Africa. 3 Credits. W
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. Formerly known as POLS 665. Not open to students with credit in AAAS 600 or POLS 665. (Same as POLS 365.) Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor.

AAAS 370. Introduction to the Languages of Africa. 3 Credits. NW H/W
A survey of the indigenous languages of Africa from a linguistic perspective, covering the main language families and their geographic distribution, and focusing on the features and structure of the more widely spoken and representative languages in each family (e.g., Fula, Hausa, Maninka, Swahili, Yoruba). (Same as LING 370.)

AAAS 372. Religion, Power, and Sexuality in Arab Societies. 3 Credits. NW S
This course examines theories of religion, discourse, power, gender and sexuality in their application to Arab societies. The course introduces different aspects of Arab cultures. Through canonical works, we study political domination, tribal social organization, honor, tribe, shame, social loyalty, ritual initiations and discuss how these issues speak generally to anthropological inquiry. Regionally specific works are then framed by an additional set of readings drawn from anthropological, linguistic, and social theories. (Same as ANTH 372.)

AAAS 377. African Design. 3 Credits. H/W
This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 677/HA 677. (Same as HA 377.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

AAAS 380. African Art and Gender. 3 Credits. HL H
How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study how formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 780/HA 780. (Same as HA 360 and WGSS 380.)

AAAS 388. The Black Woman. 3 Credits. S/W
An interdisciplinary study of the role of Black women in our society, from the African background through the plantation experience to the present. Prerequisite: One course in the social sciences and/or humanities or consent of instructor.

**AAAS 400. Readings in: ______. 3 Credits. U**

Investigation of a subject selected by a student in consultation with a departmental adviser and conducted under supervision. Individual reports and conferences. Open only to students who have completed at least six credit hours in African and African-American studies. Cannot be repeated for credit. Prerequisite: Consent of instructor.

**AAAS 415. Women and Islam. 3 Credits. H/W**

Addresses the widely-held stereotype of Muslim women as pawns in a patriarchal socio-religious context. Investigating the Muslim cultures of certain regions, the course will examine the manner in which indigenous culture was influenced by the introduction of Islam and the historical impact of Islam on women's social roles. Focusing principally on social change in the 20th century, the course will consider how socio-political change affects religious roles where religion is integrally involved in daily life. To what extent is individualism valued, and how are the pressures of late 20th century life mediated? The course will draw on texts from history, sociology, and literature. Prerequisite: REL 107 or AAAS 349/REL 350 or consent of instructor.

**AAAS 420. Intercultural Communication: The Afro-American. 3 Credits. H/W**

An examination of the barriers to effective communication between black Americans and non-black Americans. (Same as COMS 447.) Prerequisite: COMS 130 or COMS 230.

**AAAS 429. Postcolonial Theatre and Drama. 3 Credits. NW H/W**

The course develops an understanding of the postcolonial concept and its different manifestations in theatre and drama across nations and cultures. It approaches postcolonialism as a way of reading theatre, and as a genre within theatre by exploring how the "colonial project" has refigured the concept, content, and context of theatre in both colonized and colonizing cultures. In addition to the study of postcolonial playwrights and their works, the course is also an introduction to postcolonial theory and its critics. (Same as THR 429.)

**AAAS 432. Francophone African Literature. 3 Credits. NW H/W**

This course is an introduction to 20th century African literature written in French, covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include negritude, African identity in the wake of colonialism, Islam, and women's writing. Classes will be conducted in English. Students may read the texts in French or in translation. (Same as FREN 432.) Prerequisite: ENGL 102 and a 200-level English course.

**AAAS 433. Islamic Literature. 3 Credits. NW H/W**

This course focuses on literature that reflects Islamic culture from its inception to contemporary times. Beginning with attention to the importance of the spoken word in the establishment of Islam, course readings and lectures follow the place of literary works in confirming Islamic perspectives. Readings include selections from the Qur'an, classical works of poetry and narrative, and contemporary autobiography. Authors are from Africa and the region of the Golden Age of Islam, including the best known: al-Ghazali (d.1111 C.E.), Attar (d. circa 1193-1235), Ibn Arabi (d. 1240 C.E.), Rumi (d. 1273), Saadi (d.1291), Hafiz (d. 1389 C.E.), and Shah (contemporary), as well as readings by and about less well known Muslim women scholars and Sufis in all historical periods. Readings are all in English translations.

**AAAS 434. African Women Writers. 3 Credits. NW H/W**

This course focuses on four decades of African women's writing from all regions of the continent. Works included deal with a wide variety of issues relevant to African women, as well as universal issues of conceptions of gender roles, and the struggle to attain personal rights and freedom within traditional cultural frameworks.

**AAAS 435. Muslim Women's Autobiography. 3 Credits. NW H/W**

This course examines the realities of Muslim women's experiences as conveyed in their own voices. Works are drawn from all over the world, from Africa and the Middle East to Europe and the U.S. and cover the nineteenth and twentieth centuries.

**AAAS 437. Global Ethnic and Racial Relations. 3 Credits. W**

This course uses written and visual materials to examine race, ethnicity, and nationalism around the world. Emphasis is on ways in which social forces, gender roles, sexual practices, cultural patterns, and political organization work together to construct and reinforce ethnic, racial, and national identities, boundaries, movements, and conflicts. Historical and contemporary comparisons are made between the U.S. and countries in Asia, the Americas, the Caribbean, Europe, the Pacific Islands, and the Middle East. (Same as AMS 437 and SOC 437.)

**AAAS 442. The Politics of Racial Injustice in the United States. 3 Credits.**

In this course, students will examine, in detail, four historical eras in which the American people struggled over anti-Black racial injustice in the United States. While the role and efficacy of social change movements and grass-roots activism in that struggle will be analyzed, the course will emphasize political, policy, and institutional responses and remedies to the problem of American racism. In particular, discussions, readings, and assignments will evaluate the successes and failures of specific legislative, judicial, administrative, and organizational interventions. How and why these responses developed and fared as they did will be analyzed. The debates over their efficacy will be the focal point of this course. (Same as REL 442.)

**AAAS 450. Popular Culture in the Muslim World. 3 Credits. NW H**

A study of pop songs, television, comics, and other idioms of popular culture from different parts of the Muslim world, with attention to Muslims' sense of humor, tragedy, aesthetics, and pertinent issues of the day. (Same as REL 450.)

**AAAS 460. Topics and Problems in African and African-American Studies. 1-3 Credits. H/W**

Individual investigation of special topics in African and African-American studies. May not be repeated for credit toward the major. Prerequisite: Six hours in African and African-American studies or consent of instructor.

**AAAS 470. Language and Society in Africa. 3 Credits. NW H/W**

Examines issues and problems associated with language use in sub-Saharan Africa from a sociological perspective. Topics covered include an overview of the types of languages spoken on the continent: indigenous languages, colonial languages, pidgins and creoles, and Arabic as a religious language; problems associated with the politics of literacy and language planning; writing and standardization of indigenous languages; and the cultural and ideological dilemmas of language choice. (Same as LING 470.) Prerequisite: AAAS 103, AAAS 305, or LING 106; or consent of instructor.

**AAAS 496. Field Experience. 3 Credits. H/W**

A supervised placement in practical situations where students actively participate in organized work within the community, to be completed with an acceptable paper. The course may be taken in the United States, Caribbean, or Africa to meet the B.A. degree requirement in African and African-American Studies. Open only to junior and senior majors or by consent of the department.
AAAS 501. Regional History: ____. 3 Credits. H/W
A survey of the major political, social, economic and intellectual trends in a region of Africa or the Americas. Prerequisite: Five hours of distribution courses in history.

AAAS 502. Directed Language Study: ____. 5 Credits. U
Study of an African language at Elementary I and Elementary II levels under individual supervision and with the aid of self-instructional material. Open to juniors and seniors in good standing and graduate students only and with permission of the department. May be repeated for up to 10 credit hours. Cannot be used to fulfill BA foreign language requirement.

AAAS 503. Directed Language Study: ____. 3 Credits. U
Study of an African language at Intermediate I and Intermediate II levels under individual supervision and with the aid of self-instructional material. Open to juniors and seniors in good standing and graduate students only and with permission of the department. May be repeated for up to 6 credit hours. Cannot be used to fulfill BA foreign language requirement.

AAAS 504. Directed Language Study I: ____. 3 Credits. U
Study of an African language at Advanced I and Advanced II levels under individual supervision and with the aid of self-instructional material. Open only to juniors and seniors in good standing, graduate students and with permission of the department. May be repeated for up to 6 credit hours. Cannot be used to fulfill BA language requirement.

AAAS 505. Directed Language Study II: ____. 3 Credits. U
Designed for native and near native speakers, this course involves reading of materials published in an African language intended for conversation, oral presentation, and writing by native speakers. May be repeated for up to 6 credit hours. Prerequisite: Native or near native speaker proficiency or consent of instructor.

AAAS 511. The Civil Rights Movement. 3 Credits. H
An examination of the Civil Rights Movement in American History. Emphasis is placed on the activities of major Civil Rights organizations, Civil Rights legislation and its impact on American life, and conflicts between integrationist and separatist forces in politics, economics, education, culture and race relations in the United States. (Same as HIST 514.)

AAAS 518. Capitalism and the Black Experience. 3 Credits. H
This is an upper level course designed to analyze the experiences that define the African American relationship to the American economy. The course begins with the slave trade and ends in the present. It explores and explains how African American economic development intimately intertwined with the movement for freedom. Students will learn how African Americans addressed issues around slavery, housing, banking, capitalism/socialism, underground economy, and gentrification. This course is chronological in nature with thematic elements. Lectures will provide brief histories and conceptual framework for readings. This background will help students understand and explore how black identity, culture, and politics interact with economy. However, the bulk of the course will operate as a seminar. By the end of the course, students will be able to summarize African American past experiences with capitalism and its relevance to contemporary economic issues affecting African American people today. (Same as AMS 518 and HIST 518.) Prerequisite: Any American Studies or History courses on American History.

AAAS 520. African Studies In: ____. 3 Credits. NW H/W
Upper level lecture and discussion courses in African area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Prerequisite: Junior/Senior in good standing.

AAAS 521. African Studies In, Honors: ____. 3 Credits. H/W
Upper level lecture and discussion courses in African area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Open only to students admitted to the University Honors Program or with permission of the instructor. Prerequisite: Junior/senior in good standing

AAAS 522. African-American Studies In, Honors: ____. 3 Credits. H
Upper level lecture and discussion courses in African-American area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Open only to students admitted to the University Honors Program or with permission of the instructor. Prerequisite: Junior/Senior in good standing.

Upper level lecture and discussion courses in African-American area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Open only to students admitted to the University Honors Program or with permission of the instructor. Prerequisite: Junior/Senior in good standing.

AAAS 524. African-American Studies In, Honors: ____. 3 Credits. H
Upper level lecture and discussion courses in African-American area of current interest and/or taking advantage of faculty resources in topics relevant to the major. May be repeated for credit toward the major. Open only to students admitted to the University Honors Program or with permission of the instructor. Prerequisite: Junior/Senior in good standing.

AAAS 532. Studies in Islam. 3 Credits. H
Study of religious thought, practice, and institutions of Islam with an emphasis on the examination of primary documents.

AAAS 534. The Rhetoric of Black Americans. 3 Credits. H
A study of the rhetoric of Black Americans, from their earliest protest efforts to the contemporary scene, with the focus on the methods and themes employed to alter their status in American society. (Same as COMS 551.) Prerequisite: COMS 130. Skills in basic composition essential.

AAAS 536. Islamic Art and Architecture in Africa. 3 Credits. N
Study of Islamic art and architecture in various cultural and geographical settings, from the first mosques of North African and the Swahili coast to contemporary Islamized masquerades in West Africa. We consider art objects and architectural sites in terms of religious practice, trade and commerce, ritual and political power, and contemporary expression. (Same as HA 536.) Prerequisite: AAAS 102, AAAS 103, HA 100, or HA 150; or permission of instructor.

AAAS 543. Language and Culture in Arabic-Speaking Communities. 3 Credits. W
The course examines the links between language structure, patterns of use, language choice, and language attitudes in the diglossic and bilingual Arabic-speaking communities. It also explores language as a reflector and creator of Arab culture (e.g. linguistic encoding of politeness, the Quranic text as the spoken and written word, the role of tropes in Arabic rhetoric). The topics for discussion range from the micro-level language choice to the macro-level issues of national language policies and planning within the domain of government and education across the Arab world. (Same as LING 543.)

AAAS 545. Unveiling the Veil. 3 Credits. NW H
This course seeks to unveil a complex cultural practice that has been misconstrued by many scholars. It explores the versatility of the meaning of the veil. It examines the ways in which the veil has become a symbol of privacy, cultural identity, religious assertion, resistance and liberation, besides being a symbol of constraint, oppression, backwardness, and sexual mystery.

AAAS 550. Senior Seminar in: ____. 3 Credits. H/W
Small discussion groups, each designed to consider a specific, clearly defined topic, using an interdisciplinary approach and requiring the demonstration of a comprehensive knowledge of the fundamentals in the field as appropriate to the topic. Class discussion based on
AAAS 551. Environmental Issues in Africa. 3 Credits. S
Acquaints students with the complexities of debates on environmental problems in Sub-Saharan Africa. Topics addressed may include deforestation, desert expansion, wildlife conservation, soil erosion, climate change, coral reef destruction, water resources development, mangrove preservation, and the environmental effects of war, industrialization, and urbanization. Class presentations and projects synthesize the perspectives of both human and physical geography. (Same as GEOG 550.) Prerequisite: GEOG 104 or permission of instructor.

AAAS 553. Geography of African Development. 3 Credits. W
Acquaints students with the values and social parameters of African agricultural and pastoral practice. Topics include customary land rights, African perspectives on the natural world, gender issues in African agriculture, and the urbanization of African cultures. The course also contrasts African views with those of Western development practitioners and donor agencies. Case studies from different countries are used to highlight the continent's regional differences. (Same as GEOG 553.)

AAAS 554. Contemporary Health Issues in Africa. 3 Credits. S
The course examines health and nutrition in African communities, using the methods of biological and medical anthropology. Fundamental to the approach taken in the course is the understanding that the health of human groups depends on interactions between biological and cultural phenomena in a particular ecological context. One topic will be selected per semester to examine in detail the full array of epidemiological factors contributing to patterns of specific diseases. AIDS, childhood diseases, and reproductive health of African women are among possible topics. Course material will be selected from scholarly and medical publications, as well as coverage in the popular media. The use of a variety of sources will enhance understanding of the biological and cultural issues involved, and will help students identify possible bias and misinformation in popular coverage of events such as famine or epidemic in African settings. (Same as ANTH 545.) Prerequisite: An introductory course in either Anthropology or African Studies.

AAAS 555. African Film. 3 Credits. W
A critical study of Africa and its peoples as depicted in films. The aesthetic, cultural, economic, political, historical, and ideological aspects of African films are examined. (Same as FMS 544.)

AAAS 560. Race, Gender and Empire. 3 Credits. NW
This course considers how colonialism has shaped race and gender, historically and today. It explores how Europeans justified colonial rule through sexist beliefs about Native peoples and how sexual exploitation was built into colonial occupation. Film, literature, and political essays help us examine the lasting legacies of these ideas and resistance against them - a field known as postcolonial studies. We use this lens to trace historical attitudes about the white man's burden into contemporary issues in international politics, asking how human rights programs and military intervention maintain global inequality and produce new kinds of empires. (Same as WGSS 560.) Prerequisite: Any WGSS or AAAS course, or permission of the instructor.

AAAS 561. Liberation in Southern Africa. 3 Credits. W
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as HIST 561 and POLS 561.)

AAAS 569. Modern and Contemporary African Art. 3 Credits. H
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists' engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 353/HA 353. (Same as HA 569.) Prerequisite: Junior/Senior standing and at least one course at the 100-level or above in AAAS or HA.

AAAS 574. Slavery in the New World. 3 Credits. H/W
Slavery, slave culture, and the slave trade in the U.S., Latin America, and the Caribbean will be examined comparatively. Attention will also be given to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. (Same as HIST 574.)

AAAS 583. Migration, Diasporas and Development. 3 Credits. S
This course introduces students to key concepts in global migration and its implications on development in migrant sending states particularly those on the African continent. It will explore the various migration patterns from Africa (e.g., migration between North Africa and Europe in the aftermath of the Arab Spring), South-South migration, the 'brain drain' of skilled professionals and its implications for development, and the role of diasporas in development. The course will also assess the integration of migrants in major migrant destination regions. Finally, the course will provide students with an opportunity to critically examine the relationship between migration and development in a particular national context of their choice. (Same as GEOG 583.) Prerequisite: GEOG 102 or consent of instructor.

AAAS 584. Black American Literature. 3 Credits. H
A study of the literature written by Black Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of Black literature as well as on a critical analysis of major autobiographical, poetic, and fictional works.

AAAS 598. Sexuality and Gender in African History. 3 Credits. W
An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project in consultation with the instructor. (Same as HIST 598 and WGSS 598.)

AAAS 600. Politics in Africa. 3 Credits. W
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in AAAS 365/POLS 365. Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor.

AAAS 611. History of the Black Power Movement. 3 Credits. H
Examines the Black Power Movement in its many manifestations, beginning with a discussion of its political and cultural background: the transition from Civil Rights to Black Power in the African American Freedom Movement of the 1960s; the impact on African Americans of African decolonization and the spread of anti-colonial and anti-imperialist movements throughout other parts of the globe. The course also examines the Black Arts Movement and its influence on the Black Power Movement and vice versa. Therefore, some attention will also be paid to the music, literature, theater, and the graphic arts of the period, and the aesthetic and political critiques of these artistic forms. Prerequisite: AAAS 511 not required but recommended.

AAAS 630. The Life and Intellectual Thought of W.E.B. Du Bois. 3 Credits. H
A critical examination of W. E. B. Du Bois, paramount black scholar and activist whose massive body of scholarly work spans the period from late 19th through the mid-20th centuries. Course covers the major works of Du Bois. Topics include Du Bois as sociologist, historian, propagandist, and creative writer. Moreover, the course deals with Du Bois as an intellectual in conversation with other black thinkers, including individuals such as, Booker T. Washington, Alexander Crummell, Anna Julia Cooper, Ida B. Wells-Barnett, Marcus Garvey, E. Franklin Frazier, Walter White and Thurgood Marshall.

AAAS 657. Women and Gender in Islam. 3 Credits. W
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. (Not open to students who have taken REL 357.) (Same as REL 657.) Prerequisite: AAAS 349/REL 350, graduate standing, or permission of instructor.

AAAS 662. Gender and Politics in Africa. 3 Credits. S
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women’s political roles during the pre-colonial and colonial society. Next, we examine the impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender and development, HIV/AIDS and women’s health, gender and militarism. We also explore women’s roles in political institutions, civil society organizations, trade and labor unions, and transnational movements. We also examine contemporary constructions of masculinity and femininity in African states and explore how these constructions affect social policy and national political agendas. (Same as POLS 662 and WGSS 662.) Prerequisite: Sophomore level or consent of instructor.

AAAS 677. African Design. 3 Credits. NW H/W
This course examines the conceptualization of the “decorative” arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as “decorative art” and “craft” still operative, and how do they reflect ideas about race and gender? How have African artists approached “traditional” design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists’ writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 377/HA 377. (Same as HA 677.) Prerequisite: An Art History course 100 level or above, or consent of instructor.

AAAS 690. Investigation and Conference. 1-3 Credits. H/W
Individual and supervised readings in selected areas of African and African-American studies which will be an investigation of a subject selected by the student with the advice and direction of an instructor. Individual reports and conferences. Prerequisite: Seniors and consent of department.

AAAS 695. Honors Project in: _______. 3 Credits. H
An individual research project in African-American or African studies under the direction of a specialist in the area of the student’s interest, the results of the project to be presented in written form and to be defended before a committee of three faculty members as provided for under the requirements for Honors. Majors only and permission of instructor.

AAAS 700. Africa in World Politics. 3 Credits.
A 20th-century and 21st-century study of the combined internal and external forces that precipitated the rise of Africa, the major African issues in international relations, and Africa's impact on the modern world. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 701. Politics in Africa. 3 Credits.
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 715. Seminar in African Art. 3 Credits.
A concentrated study of a special topic relating to African Art studies. Different topics are offered in different semesters. Prerequisite: Nine hours of Art History and/or consent of instructor.

AAAS 716. Women in Islam. 3 Credits.
Addresses the widely-held stereotype of Muslim women as pawns in a patriarchal socio-religious context. Investigating the Muslim cultures of certain regions, the course will examine the manner in which indigenous culture was influenced by the introduction of Islam and the historical impact of Islam on women’s social roles. Focusing principally on contemporary social change, the course will consider how socio-political change affects religious roles where religion is integrally involved in daily life. To what extent is individualism valued, and how are the pressures of late 20th-century and early 21st-century life mediated? The course will draw on texts from history, sociology, and literature. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 720. Intercultural Communication: The Afro-American. 3 Credits.
An examination of the barriers to effective communication between Black Americans and non-Black Americans. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 723. Special Topics in Africana Studies: _______. 3 Credits.
Seminar in an area of current interest in African and African-American Studies. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

AAAS 727. African-American Culture. 3 Credits.
This course defines African American culture and identifies ways in which it is distinct. The course identifies the roots of African American culture, as well as the transformations occurring over time. The course covers identity issues and considers the possibility of complex, multi-identity structures. The course addresses the issues of whether there is
a common narrative or a common root metaphor for African American culture, how this is known epistemologically, internally and externally, and how epistemological "knowledge" is appropriated. Course pedagogy includes text readings, case studies, performance events, and media events.

**AAAS 730. Black Leadership. 3 Credits.**

The course focuses on the concept of leadership and on Black leadership in the United States. An in-depth analysis of selected case studies of Black leaders both historical and contemporary. Some attention will be given to the dispersion of Africans into the Americas and the leadership that emerged, conditioned both by environmental factors and the psychology engendered by the system of slavery. Selected successful Black leaders will be invited to visit the class from time to time. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 731. African Literature. 3 Credits.**

Introduction to African Literature. Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention will be paid to historical development and to traditional literature. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 732. Francophone African Literature. 3 Credits.**

This course is an introduction to 20th-century and modern Francophone African literature covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include negritude, African identity in the wake of colonialism, Islam, and women's writing. Classes will be conducted in English. Students may read the texts in French or in translation. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 733. Islamic Literature. 3 Credits.**

Contemporary literature that is set in the context of Muslim cultures provides for an examination of Muslim identity on its own terms. This course focuses on the literary examination of works by Muslim authors from Egypt, Sudan, Senegal, Guinea, Mali, Morocco, Nigeria, and Niger. From the perspective of both male and female authors, the issue of what it means to be a Muslim is considered through fictional accounts set in contemporary contexts. Some works will be read in translation from Arabic or French; others are written originally in English. Cultures considered in this course vary widely in their origins and customs, which allows for a focus on the one pervasive element they share in common: Islam as it shapes people's lives. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 734. African Women Writers. 3 Credits.**

This course focuses on African women's writing from all regions of the continent. Works included deal with a wide variety of issues relevant to African women, as well as universal issues of conceptions of gender roles, and the struggle to retain personal rights and freedom within traditional cultural frameworks. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 749. Islam. 3 Credits.**

Islam's origins, the prophet Muhammed, the Holy Koran, religious symbols and moral mandates, and historical developments. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 750. Popular Culture in the Muslim World. 3 Credits.**

A study of pop songs, television, comics, and other idios of popular culture from different parts of the Muslim world, with attention to Muslims' sense of humor, tragedy, aesthetics, and pertinent issues of the day.

**AAAS 760. Topics and Problems in African and African-American Studies. 3 Credits.**

Individual investigation of special topics in African and African-American studies. May not be repeated for credit. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 770. Language and Society in Africa. 3 Credits.**

Examines issues and problems associated with language use in sub-Saharan Africa from a sociological perspective. Topics covered include an overview of the types of languages spoken on the continent: indigenous languages, colonial languages, pidgins and creoles, and Arabic as a religious language; problems associated with the politics of literacy and language planning, writing and standardization of indigenous languages; and the cultural and ideological dilemmas of language choice. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 774. Topics in Literatures of Africa and the African Diaspora. 3 Credits.**

An intensive study of the literatures of Africa and/or African diaspora (people of African descent dispersed around the world). This study will focus on the major characteristics of a particular period, genre, mode, and/or theme in literatures such as African, Caribbean, Afro-Brazilian, African American, African Canadian, Black British. Critical theories pertinent to writers and their work will be covered. Topics may include studies in drama, poetry, or the novel; migration narratives; literature of a particular era, such as the Harlem Renaissance, Negritude, or the Black Arts Movement; representations of gender, etc. As topics vary by semester, the course may be repeated for credit. (Same as ENGL 774.)

**AAAS 780. African Art and Gender. 3 Credits.**

How does the rich relationship between art and gender provide an organizing metaphor for African artists across space and time? How do artists shape understandings of gender? In this course, we will examine gender in artistic practice alongside cultural binaries and consider how gender historically operated to define distinct roles for artists. We will study formulations of gender and race intersected to impact artistic production and classification during the colonial and postcolonial periods. We will analyze materiality and the metaphor of childbirth, gender and Islamic textiles, and the concept of "craft." This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not open to students with credit in AAAS 380/HA 360/WGSS 380. (Same as HA 780.) Prerequisite: Any previous AAAS course.

**AAAS 788. The Black Woman. 3 Credits.**

An interdisciplinary study of the role of Black women in our society, from the African background through the plantation experience to the present. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 801. Introduction to Africana Studies: African-American. 3 Credits.**

An introduction to, and overview of, the historical, intellectual, and professional foundations of African-American Studies; a multidisciplinary examination of the key texts and issues in the field. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 802. Introduction to Africana Studies: African. 3 Credits.**

An introduction to, and overview of, the historical, intellectual, and professional foundations of African Studies; a multidisciplinary...
examination of the key texts and issues in the field. Additional advanced-
level coursework is required for students in this course beyond lower-level
courses of the same name and/or description.

AAAS 803. Research Methods in Africana Studies. 3 Credits.
A multidisciplinary introduction to the range of research methods
employed to examine African and African-American history, cultures, and
societies. Additional advanced-level coursework is required for students in
this course beyond lower-level courses of the same name and/or description.

AAAS 804. Seminar in Africana Studies. 3 Credits.
An interdisciplinary, comparative exploration of the histories, cultures, and
societies of Africans and peoples of African descent. Students will be
required to utilize the skills gained in AAAS 801 and AAAS 802 to design
and implement a project that will be critically assessed in the seminar.
Additional advanced-level coursework is required for students in this
course beyond lower-level courses of the same name and/or description.
Prerequisite: AAAS 801 and AAAS 802 or consent of instructor.

AAAS 811. The Civil Rights Movement. 3 Credits.
An examination of the Civil Rights Movement in American History.
Emphasis is placed on the activities of major Civil Rights organizations,
Civil Rights legislation and its impact on American life, and conflicts
between integrationist and separatist forces in politics, economics,
education, culture and race relations in the United States. Additional
advanced-level coursework is required for students in this course beyond
lower-level courses of the same name and/or description.

AAAS 812. The Black Power Movement. 3 Credits.
This course will examine the Black Power Movement in its many
manifestations, beginning with a discussion of its political and cultural
background: the transition from Civil Rights to Black Power in the Afro-
American freedom movement of 1960's; the impact on African Americans
of African decolonization and the spread of anti-colonial and anti-
imperialist movements throughout other parts of the globe. There will also
be some examination of the Black Arts Movement and its influence on
the Black Power Movement and vice versa. Therefore, some attention
will also be paid to the music, literature, theater, and the graphic arts of
the period, and the aesthetic and political critiques of these artistic forms.
Additional advanced-level coursework is required for students in this
course beyond lower-level courses of the same name and/or description.

AAAS 827. Popular Culture in Africa. 3 Credits.
This course examines multiple expressions of popular culture in
contemporary Africa, focusing on the aesthetics of forms such as music,
theatre, dress, street art, and popular literary genres, as well as the
social themes they deal with and the societies that produce them. The
approach will be based on a critical reconsideration of notions such as
traditional versus modern culture, elite versus folk art, westernization, and
cultural hybridity, in order to find better ways of discussing the cultural
vibrancy of everyday life in contemporary Africa. Additional advanced-
level coursework is required for students in this course beyond lower-level
courses of the same name and/or description.

AAAS 830. The Life and Times of W.E.B. Du Bois. 3 Credits.
A critical examination of the life and thought of W. E. B. Du Bois,
paramount black scholar and activist whose massive body of scholarly
work spans the period from late 19th through the mid-20th centuries.
Course covers the major works of Du Bois. Topics include Du Bois as
sociologist, historian, propagandist, and creative writer, taking into
account his often shifting views on art and culture, politics, leadership,
civil rights and the color line, trade unionism, Pan-Africanism, socialism,
internationalism, and, of course, double consciousness, among other
issues. Moreover, the course will deal with Du Bois as an intellectual
in conversation with other black thinkers, including individuals such as
Booker T. Washington, Alexander Crummell, Anna Julia Cooper, Ida B.
Wells-Barnett, Marcus Garvey, E. Franklin Frazier, Walter White and
Thurgood Marshall. Additional advanced-level coursework is required for
students in this course beyond lower-level courses of the same name and/or
description.

AAAS 832. Comparative Black Literature. 3 Credits.
Reading, analysis, and discussion of contemporary fiction, poetry, and
drama from Africa, the Caribbean, and the United States. Brief
attention will be paid to historical development and to traditional literature.
Additional advanced-level coursework is required for students in this
course beyond lower-level courses of the same name and/or description.

AAAS 834. The Rhetoric of Black Americans. 3 Credits.
A study of the rhetoric of Black Americans, from their earliest protest
efforts to the contemporary scene, with the focus on the methods and
themes employed to alter their status in American society. Additional
advanced-level coursework is required for students in this course beyond
lower-level courses of the same name and/or description.

AAAS 843. Language and Culture in Arabic-Speaking
Communities. 3 Credits.
The course examines the links between language structure, patterns of
use, language choice, and language attitudes in the diglossic and bi-
lingual Arabic-speaking communities. It also explores language as a
reflector and creator of Arab culture (e.g., linguistic encoding of politeness,
the Quranic text as the spoken and written word, the role of tropes in
Arabic rhetoric). The topics for discussion range from the micro-level
language choice to the macro-level issues of national language policies
and planning within the domain of government and education across
the Arab world. Additional advanced-level coursework is required for
students in this course beyond lower-level courses of the same name and/or
description.

AAAS 851. Environmental Issues in Africa. 3 Credits.
Acquaints students with the complexities of debates on environmental
problems in Sub-Saharan Africa. Topics addressed may include
deforestation, desert expansion, wildlife conservation, soil erosion, climate
change, coral reef destruction, water resources development, mangrove
preservation, and the environmental effects of war, industrialization,
and urbanization. Class presentations and projects synthesize the
perspectives of both human and physical geography. Additional
advanced-level coursework is required for students in this course beyond
lower-level courses of the same name and/or description.

AAAS 855. African Film and Video. 3 Credits.
A critical study of Africa and its peoples as depicted in films and videos.
The aesthetic, cultural, economic, political, historical, and ideological
aspects of African films and videos will be examined. Additional
advanced-level coursework is required for students in this course beyond
lower-level courses of the same name and/or description.

AAAS 874. Slavery in the New World. 3 Credits.
Slavery, slave culture, and the slave trade in the U.S., Latin America, and
the Caribbean will be examined comparatively. Attention will also be given
to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 884. Black American Literature. 3 Credits.**
A study of the literature written by Black Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of Black literature as well as on a critical analysis of major autobiographical, poetic, and fictional works. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 885. Race and the American Theatre. 3 Credits.**
The representation(s) of race in significant texts and performance styles in American theatre analyzed according to political ideologies, dramatic movements and the impact of these factors on the representation of the "other" in the theatre.

**AAAS 890. The Rise and Fall of Apartheid. 3 Credits.**
This course will deal with the fifty years of South African history during which apartheid came to be formulated, supported, and perpetuated, and the forces that were responsible for its disintegration by 1990. Reference will also be made to the transformation process since April 1994. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 898. Sexuality and Gender in African History. 3 Credits.**
An examination of the history of sexuality and gender in Africa focused on the 19th-century to the present. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Additional advanced-level coursework is required for students in this course beyond lower-level courses of the same name and/or description.

**AAAS 899. Thesis. 1-6 Credits.**
Investigation and research of a topic for a master's thesis. A maximum of 6 thesis hours may be counted toward the 33 hours required for the degree.

**Courses**

**AMHR 110. Elementary Amharic I. 5 Credits.**
Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of Amharic.

**AMHR 120. Elementary Amharic II. 5 Credits.**
A continuation of AMHR 110. Readings in cultural texts. Prerequisite: AMHR 110.

**AMHR 177. First Year Seminar: _____ 3 Credits.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Amharic. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**AMHR 210. Intermediate Amharic I. 3 Credits.**
Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Amharic texts and discussion in Amharic. Prerequisite: AMHR 120.

**AMHR 220. Intermediate Amharic II. 3 Credits.**

**Courses**

**ARAB 101. Introduction to Modern Standard Arabic. 3 Credits.**
The goal of this course is to begin developing reading, speaking, listening, writing, and the essentials of Modern Standard Arabic grammar. This course will also provide an introduction to the culture of the Arabic speaking world. Three hours of class per week delivered face-to face plus outside use of recorded text materials. This course does not satisfy any KU language requirement. Prerequisite: Instructor permission required

**ARAB 102. Introduction to Modern Standard Arabic II. 3 Credits.**
Continuation of ARAB 101. Further development of basic familiarity with the Modern Standard Arabic language, focusing on speaking, listening, reading, writing, and the essentials of Arabic grammar. Continued exploration of the culture of the Arab-speaking world. Three hours of class per week delivered face-to face plus outside use of recorded text materials. This course does not satisfy any KU language requirement. Prerequisite: ARAB 101.

**ARAB 110. Elementary Arabic I. 5 Credits.**
Five hours of class per week. Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of Arabic.

**ARAB 120. Elementary Arabic II. 5 Credits.**
Five hours of class per week. A continuation of ARAB 110. Readings in cultural texts. Prerequisite: ARAB 110.

**ARAB 177. First Year Seminar: _____ 3 Credits.**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Arabic. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ARAB 210. Intermediate Arabic I. 3 Credits.**
Three hours of class conducted in Arabic. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Arabic texts and discussion in Arabic. Prerequisite: ARAB 120.

**ARAB 220. Intermediate Arabic II. 3 Credits.**
Three hours of class conducted in Arabic. Continuation of ARAB 210. Discussion in Arabic of texts studied. Prerequisite: ARAB 210.

**ARAB 310. Advanced Arabic I. 3 Credits.**
A practical Arabic language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Arabic. Designed for students who have had two or more years of Arabic study. Open to native speakers. Prerequisite: ARAB 220 or consent of instructor.

**ARAB 320. Advanced Arabic II. 3 Credits.**
A continuation of ARAB 310. Prerequisite: Satisfactory completion of ARAB 310 or consent of instructor.

**ARAB 401. Readings in Arabic I. 3 Credits.**
Designed for native and near-native speakers, this course involves reading newspapers and other publications in the language intended for native speakers, conversation, oral presentations, and advanced grammar. Prerequisite: Native or near-native speaker proficiency or consent of instructor.

**ARAB 402. Readings in Arabic II. 3 Credits.**
Continuation of ARAB 401.

Courses

HAIT 110. Elementary Haitian I. 3 Credits. U F1
Beginning course in the vernacular language of Haiti, Martinique, Guadeloupe and other areas of the Caribbean and the Indian Ocean. Conversational approach, with essentials of grammar. Reading of basic texts. Special attention to folk culture as expressed by language. No previous knowledge of another foreign language is required.

HAIT 120. Elementary Haitian II. 3 Credits. U F2
Continuation of HAIT 110, with further readings in Haitian literature. Prerequisite: HAIT 110 or consent of instructor.

HAIT 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Haitian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

HAIT 230. Intermediate Haitian I. 3 Credits. U F3
Continued practice in conversation and composition; intensive and extensive readings from contemporary press, short story, poetry, and folk tales. Prerequisite: HAIT 120 or consent of instructor.

HAIT 240. Intermediate Haitian II. 3 Credits. U F4
Continuation of HAIT 230, with additional readings from theatre, novel, and historical texts. Prerequisite: HAIT 230 or consent of instructor.

HAIT 300. Contemporary Haitii. 3 Credits. NW H
Detailed analysis of recent Haitian history. The focus will include interactions between religion, social structure, politics, economics and international relations. (Same as AAAS 302.) Prerequisite: AAAS 301/HAIT 200, or consent of instructor.

HAIT 350. Advanced Haitian I. 3 Credits. U FP
Course objective is a sophisticated command of understanding, speaking, reading, and writing Haitian. Texts include newspapers and other Haitian publications as well as spoken material produced essentially for native speakers. Conversation and oral presentations. Keeping of personal journal in Haitian.

HAIT 360. Advanced Haitian II. 3 Credits. U FP
Continuation of HAIT 350, plus advanced readings from Haitian authors such as Carrie Paultre, Frank Etienne, Lyonel Desmarattes, and Michel-Rolph Trouillot.

HAIT 497. Directed Studies in Haitian. 1-15 Credits. U FP
May be taken more than once, total credit not to exceed fifteen hours. Material not covered by course work, and/or in field of student's special interest. Conferences. Course taken for one hour of credit may not be used to fulfill College's humanities distribution requirement. Prerequisite: Six hours of Haitian Creole and consent of instructor.

HAIT 500. Directed Studies in Haitian Language and Literature. 1-15 Credits. U FP
Advanced work in either language or literature or both. May be taken more than once, total credit not to exceed fifteen hours. Conferences. As a three-credit-hour course, it may count toward a major in African and African-American studies. No knowledge of Haitian or French is required. Prerequisite: AAAS 301 or HAIT 200, or consent of instructor.

HAIT 700. Investigation and Conference. 1-6 Credits.
Supervised individual readings in selected areas of Haitian language, literature, and culture. Individual reports and conferences. Prerequisite: Consent of instructor.

Courses

KISW 110. Elementary KiSwahili I. 5 Credits. U F1
Five hours of class per week. Basic level or oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of KiSwahili.

KISW 120. Elementary KiSwahili II. 5 Credits. U F2
Five hours of class per week. A continuation of KISW 110. Readings in cultural texts. Prerequisite: KISW 110.

KISW 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in KiSwahili. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

KISW 210. Intermediate KiSwahili I. 3 Credits. U F3
Three hours of class conducted in KiSwahili. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern KiSwahili texts and discussion in KiSwahili. Prerequisite: KISW 120.

KISW 220. Intermediate KiSwahili II. 3 Credits. U F4

KISW 310. Advanced KiSwahili I. 3 Credits. U FP
A practical KiSwahili language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in KiSwahili. Designed for students who have had two or more years of KiSwahili study. Open to native speakers. Prerequisite: KISW 220 or consent of instructor.

KISW 320. Advanced KiSwahili II. 3 Credits. U FP
A continuation of KISW 310. Prerequisite: Satisfactory completion of KISW 310 or consent of instructor.

KISW 401. Readings in KiSwahili I. 3 Credits. U F P
Designed for native and near-native speakers, this course involves reading newspapers and other publications in the language intended for native speakers, conversation, oral presentations, and advanced grammar. Prerequisite: Native or near-native speaker proficiency or consent of instructor.

KISW 402. Readings in KiSwahili II. 3 Credits. U FP
Continuation of KISW 401.
Three hours of class conducted in Somali. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Somali texts and discussion in Somali. Prerequisite: SOMI 120.

Courses

WOLO 110. Elementary Wolof I. 5 Credits. H F1
Five hours of class per week. Basic level of oral fluency and aural comprehension. Vocabulary acquisition, pronunciation, grammar, and writing. Reading of simple texts. Not open to native speakers of Wolof.

WOLO 120. Elementary Wolof II. 5 Credits. U F2
Five hours of class per week. A continuation of WOLO 110. Readings in cultural texts. Prerequisite: WOLO 110.

WOLO 177. First Year Seminar: _____, 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Wolof. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

WOLO 210. Intermediate Wolof I. 3 Credits. U F3
Three hours of class conducted in Wolof. Intermediate oral proficiency and aural comprehension. Systematic review of grammar. Writing skills beyond the basic level. Introduction to modern Wolof texts and discussion in Wolof. Prerequisite: WOLO 120.

WOLO 220. Intermediate Wolof II. 3 Credits. U F4

WOLO 310. Advanced Wolof I. 3 Credits. U FP
A practical Wolof language course involving advanced study of the grammar, reading of texts on a variety of subjects, conversation, and composition. Taught in Wolof. Designed for students who have had two or more years of Wolof study. Open to native speakers. Prerequisite: WOLO 220 or consent of instructor.

WOLO 320. Advanced Wolof II. 3 Credits. U FP
A continuation of WOLO 310. Prerequisite: Satisfactory completion of WOLO 310 or consent of instructor.

WOLO 401. Readings in Wolof I. 3 Credits. U FP
Designed for native and near-native speakers, this course involves reading newspapers and other publications in the language intended for native speakers, conversation, oral presentations, and advanced grammar. Prerequisite: Native or near-native speaker proficiency or consent of instructor.

WOLO 402. Readings in Wolof II. 3 Credits. U FP
Continuation of WOLO 401.

Bachelor of Arts and Bachelor of General Studies in African and African-American Studies

The Department of African & African-American Studies (AAAS) will provide you with a unique center for studying the relationships among and between all people of African descent. In order to fulfill the mission of the AAAS department, you will investigate the connections between US and global histories, culture, and social and economic systems. Black Studies, or Africana Studies more broadly, is an interdisciplinary and multi-disciplinary approach to studying the experiences of African people, and African-descended people across the Diaspora. It grew most directly out of campus demands made by black students, and their allies and supporters, during the mass protest movement of the late 1960's and early 1970's.

From the outset, the goal of Africana Studies was to transform higher education, chiefly by addressing the lack of faculty and staff diversity; altering traditional curricula limited by Eurocentric paradigms; linking academic teachings and scholarship with social and civic engagement; and raising critical questions about the overall missions of higher education.

The department area of emphasis include art and culture, religion and rhetoric, families, gender and sexuality; and political economy. Through scholarship, teaching, campus and community service, and public programming, the department promotes not only critical thinking and creative problem-solving, but also expands our understanding of citizenship in a rapidly changing, multiracial, global society.

The Department also draws strength and vitality from three other units: the Kansas African Studies Center (http://kasc.ku.edu/), The Langston Hughes Center (https://langstonhughes.ku.edu/) and the Institute for Haitian Studies. (http://haitianstudies.ku.edu/)

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years' catalogs.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Capstone Requirements**

Students must complete both of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>AAAS 496</td>
<td>Field Experience</td>
<td>3</td>
</tr>
<tr>
<td>or AAAS 690</td>
<td>Investigation and Conference</td>
<td>3</td>
</tr>
<tr>
<td>AAAS 550</td>
<td>Senior Seminar in: _____</td>
<td>3</td>
</tr>
</tbody>
</table>

**Fieldwork**

Field experience is a junior/senior option for majors. Fieldwork may be done anywhere in the U.S. or abroad. Careful arrangements must be made long in advance. Consult the department a full semester before enrollment.

**Major Hours**

Satisfied by 33 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**

Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator.

Sample 4-year plans for the BA degree in African and African-American Studies can be found here (p. 1065) or by using the left-side navigation.

Sample 4-year plans for the BGS degree in African and African-American Studies can be found here (p. 1066) or by using the left-side navigation.

**Departmental Honors**

For graduation with honors, an undergraduate must maintain a minimum grade-point average of 3.5 in the major and must complete 3 additional hours by enrolling in AAAS 695. AAAS 695 is evaluated by a committee composed of the instructor plus two other faculty members approved by the chair. An affirmative recommendation by this committee is essential to graduation with honors, provided that the other requirements have been met. A student who plans to graduate with honors must file a declaration of intent form with the departmental honors coordinator, preferably during his or her junior year, but no later than at enrollment for the final undergraduate semester.

The department encourages majors in the African studies and Arabic and Islamic studies concentrations to spend a semester or an academic
year in Africa. Similarly, majors in the African-American studies concentration may spend a semester or an academic year in the Caribbean. Consult the department and the Office of Study Abroad (http://www.studyabroad.ku.edu/).

## BA in African and African-American Studies

Below is a sample 4-year plan for students pursuing the BA in African and African-American Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

<td>3</td>
<td>Second Area of Study/Elective/Degree/Junior-Senior Hours</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Hours 15**

### Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Many of the AAAS introductory options fulfill KU Core Goals:

- Arabic & Islamic Studies: AAAS 102 (3H, 3S, 4.2)
- African Studies: AAAS 103 (3S), AAAS 105/AAAS 115 (1.1, 3H), AAAS 160 (3H, 4.2)
- African-American Studies: AAAS 104 (4.1), AAAS 106/AAAS 116 (4.1)

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
4. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
5. African and African Diasporic languages include: Arabic, Haitian, Kiswahili, Somali, and Wolof - possibly others by availability and faculty approval. Total hours in language sequence may vary. Work with your advisor for specific degree mapping to meet all minimum hours requirements.
6. Students must select from one of two areas.
### BGS in African & African-American Studies

Below is a sample 4-year plan for students pursuing the BGS in African and African-American Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

**Total Hours 120**

1. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
2. Hour requirements (incl. 45 jhr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
3. Students must select from one of two areas.

Please note:

- All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
- The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
- Many of the AAAS introductory options fulfill KU Core Goals: Arabic & Islamic Studies: AAAS 102 (3H, 3S, 4.2) African Studies: AAAS 103 (3S), AAAS 105/AAAS 115 (1.1, 3H), AAAS 160 (3H, 4.2) African-American Studies: AAAS 104 (4.1), AAAS 106/AAAS 116 (4.1)

BGS students in AAAS are not required to study African or African-diasporic language, but they can.

### Minor in African and African-American Studies

African and African-American Studies offers two minors: the African & African-American Studies minor and the African & African Diasporic Languages minors. These minors make excellent cultural studies companions to all of the professional degrees on campus, as well as other College programs. Please review the "requirements" tab for further details. Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years' catalogs (http://catalogs.ku.edu/)
# African & African-American Studies Minor

Minor in African and African Diasporic Languages

The African & African Diasporic Languages minor is offered through the Department of African & African-American Studies. It is an excellent cultural studies companion to all of the professional degrees on campus, as well as other College programs. The minor allows advanced study in one of the following languages: Arabic (https://afs.ku.edu/arabic/), Haitian-Creole (https://afs.ku.edu/haitian-creole/), Kiswahili (https://afs.ku.edu/kiswahili/) and Wolof (https://afs.ku.edu/wolof/). Some advanced language study may be eligible for Foreign Language & Area Studies Fellowships. (https://flas.ku.edu/apply/) Additional information on each language can be found by clicking the appropriate link above. Please review the "requirements” tab for further details. Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years’ catalogs» (http://catalogs.ku.edu/)

Prerequisite Knowledge

In order to start the minor courses, students must complete one of the following sequences:

- **ARAB 110** Elementary Arabic I & ARAB 120 and Elementary Arabic II
- **HAIT 110** Elementary Haitian I & HAIT 120 and Elementary Haitian II
- **KISW 110** Elementary KiSwahili I & KISW 120 and Elementary KiSwahili II
- **WOLO 110** Elementary Wolof I & WOLO 120 and Elementary Wolof II

Requirements for the Minor

Complete one of the following language sequences:

- **Intermediate Language I**
  - **ARAB 210** Intermediate Arabic I

---

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by a minimum of 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in African and African Diasporic Languages

The Certificate in African and African Diasporic Languages is offered through the Department of African & African-American Studies. The Certificate Program enables students to formally claim expertise in one of our languages, Arabic (https://afs.ku.edu/arabic/), Haitian-Creole (https://afs.ku.edu/haitian-creole/), Kiswahili (https://afs.ku.edu/kiswahili/) and Wolof (https://afs.ku.edu/wolof/), after completion of the elementary and intermediate level course sequences. It is an excellent pathway for non-degree seeking students, particularly online, to get certification of language training. It is also a wonderful cultural studies companion to all of the professional degrees on campus, as well as other College programs. Additionally, completion of the certificate is a stepping stone for those who seek to complete our African and African Diasporic Languages (https://afs.ku.edu/african-and-african-diasporic-languages/) minor, with more advanced study of the languages offered within the department.

Generally, completion of two elementary and two intermediate language courses in a single AAAS language. The table below shows the courses that will be part of this certificate. The actual course list will be maintained on a website so that the courses counting toward the certificate can be updated routinely as the languages available at KU change, which could occur with changes in Title VI funding and with changes in departmental faculty. Any language taught by the department will be added to the website list of languages that satisfy the requirements of this certificate.

Courses available face-to-face

Minor Hours
Satisfied by at least 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours completed at KU.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from courses numbered 300 or higher in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.00 GPA in all minor courses. GPA calculations include all courses in the field of study, included F's and repeated courses.
Master of Arts in African and African-American Studies

The Department of African and African-American Studies offers interdisciplinary substantive and language courses leading to the Master of Arts degree in two areas of concentration: (1) African, and (2) African-American studies.

The master's degree in African and African-American Studies has two related objectives: (1) it fulfills the educational needs of persons who seek positions with organizations in both the public and private sectors, and (2) it prepares persons who desire to pursue the terminal degrees in their field. The program emphasizes the broader concepts in the humanities and the social sciences but provides an option for concentration in either African or African-American Studies.

The integrative focus of the curriculum is an important characteristic of the interdisciplinary nature of this program. In this regard, the candidate should develop the capacity to continue as a self-educator throughout their career. Broad background study in this field enables the graduate to assimilate newly-acquired skills and methodologies quickly. Graduates should be prepared to cope with the rapid changes in Africa and the African diaspora. The program places considerable emphasis on both the internal and external forces which affect African and African-American societies. The continuity and change in Africa and their impact on world civilizations are emphasized in both the required courses and through electives.

Students may further refine their studies by selecting courses under the African Studies concentration for Arabic and Islamic Studies and under the African-American Studies concentration for Haitian Studies. Accommodation also exists for members of the Armed Forces to complete their studies on any and all regions of the African continent in less than 2 years if they are willing to study through summer.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. Program

Prospective students are admitted to the M.A. program for the fall or spring semester.

- Application deadline for fall admission: May 1. For first consideration of funding, it is highly encouraged to apply by January 15.
- Application deadline for spring admission: October 1

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy. To be considered for admission, a student must hold a bachelor’s degree. A full list of the required application materials can be found on the Department’s website (https://afs.ku.edu/grad-admission/).

Non-native speakers of English must meet Graduate Studies’ English proficiency requirements (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

M.A. Degree Requirements

The African and African-American studies M.A. program takes 2 years of full-time study. Nine upper-division and graduate courses, in addition to a thesis or additional course work for a creative critical project option, are required for the degree—a total of 33 credit hours.

Area of specialization

Students are expected to choose 5 courses in their areas of specialization. Courses should be selected in consultation with the student’s faculty advisor and/or the Director of Graduate Studies. A list of graduate-level courses that can count toward the M.A., offered in AAAS and in other departments, can be found on the AAAS website.

Students can take 6 credit hours outside the department in related course offerings including among others American studies; anthropology; art; communication studies; economics; education; English; film and media studies; geography; history; philosophy; political science; religion; sociology; theatre; and women, gender, and sexuality studies.

Thesis Option

AAAS 899 Thesis 6

No more than 6 thesis hours may be applied toward the 33 credit hours.

Critical Creative Project Option

A critical creative project option is also available. If this option is chosen, the student will take 2 more 3-hour specialization courses and develop a creative project containing 2 pieces of work including, but not limited to, research papers, creative/artistic works, exhibitions, and digital humanities projects.

Thesis/Critical Creative Project Defense

A final oral defense of the thesis or creative critical project is required and is held during the student’s final semester in the program. The defense includes questions about the thesis/project topic, argument, methodology, as well as questions that discuss the topics within large contexts of the field. After the defense, the committee will deliberate regarding the outcome (satisfactory or unsatisfactory).
Course Level Requirement

Students pursuing an M.A. in African & African-American Studies must take 50% or more of their course work at the 700 level or above. Core courses and thesis hours (if applicable) count toward this requirement.

Research Skills

Students will fulfill a language/research skills requirement in accordance with the concentration chosen. Language/research skills courses must be at the 500 level or above to be counted toward the 33 hours required for the degree.

1. A master’s degree in African and African-American studies with an African studies concentration requires proficiency in an African language. Proficiency may be fulfilled by 1 of the following:
   • Completing 2 years of college-level language study at KU, at an equivalent institution, or through an intensive course. Language courses offered on a regular basis at KU that count toward proficiency are Amharic, Arabic, Hausa, KiSwahili, Somali, Wolof and any one of the number of African languages for which the Kansas African Studies Center has pedagogical materials and proficiency-testing capabilities.
   • The equivalent of 2 years of an approved language.
   • Proof that the student is a native speaker of an African language.

2. A master’s degree in African and African-American studies with an African-American Studies concentration requires that a student
   • Fulfill the African language requirement outlined above, or
   • Fulfill Haitian Creole or any other non-African language requirement employing standards comparable to those governing the African language requirement outlined above, or
   • Demonstrate competence in a research skill relevant to the student’s specific concentration in African-American studies. Competence in a research skill is certified by the department’s Director of Graduate Studies.

In consultation with their advisors and to the satisfaction of the department, students must demonstrate that their choice of a language or research skill is appropriate for their specific research interest in the field of African-American studies.

Handbook for Graduate Students

Detailed information, application deadlines, and general information may be found in the Graduate Student Handbook.

Students are encouraged to review Graduate Studies’ policies (https://ogs.ku.edu/policies/) related to master’s programs for information about other requirements that may apply.

While completing degree requirements, graduate students are expected to understand and follow Office of Graduate Studies policies (https://ogs.ku.edu/policies/) relevant to their student status and academic standing.

Plan of Study

Students are expected to discuss their plans of study with the graduate advisor. The information that follows is only a guide toward that discussion, using fall admission as an example:

Dual Degree: MA in Museum Studies and African and African-American Studies

Museum Studies and African and African-American Studies offer dual master’s degrees with coordinated curricula so students are able to complete 2 M.A. degrees in 3 years. 15 graduate credit hours are applied to both programs, allowing students to complete a 33-credit-hour AAAS degree and a 36-credit-hour Museum Studies degree with just 54 graduate credits.

This program of study is designed to enhance and diversify opportunities for graduate students who are motivated to enter the cultural heritage field as specialists in African and African-American Studies. This 3-year dual program allows students expand their contacts with faculty, enhance their professional networks, and deepen their knowledge of both fields of study.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Students seeking admission to the dual degree will complete just one application but must meet the admission requirements for both programs.

Museum Studies M.A. - Admission Requirements (http://museumstudies.ku.edu/how-apply/)
Museum Studies Requirements for Dual M.A.

1. Museum Studies Core
   - MUSE 801 The Nature of Museums
   - MUSE 802 Culture of Museums
   - MUSE 803 Seminar in Current Museum Topics
   - The Museum Studies Core ensures that all Museum Studies students gain a comprehensive understanding of the theories, history, techniques, and problems common to museums, historical agencies and related institutions. MUSE 803, taken in the student's third semester of study, is a research course that enables students to conduct research or other creative activities that advance the discipline of museum studies.

2. Museum Professional Areas
   - Students will develop expertise in the principal specialties of museum work by completing at least three professional area courses (9 credit hours), at least one of which must be a Museum Studies (MUSE) course. Many courses in other departments may fulfill requirements. It is the responsibility of students, and their faculty advisors, to ensure that individual courses meet program requirements based on the general relevance of the course and assurance that the student's work will be applicable to museum studies by meeting with instructors and examining syllabi. Additional detail of Museum Professional Areas courses and completion requirements can be found on the Master of Arts in Museum Studies Degree Requirements page.

3. Museum Experience
   - While enrolled in the Museum Studies M.A. Program, students are required to gain at least 500 hours of museum experience, of which at least 250 hours must be in an approved, professionally supervised internship. Students enroll in 3 credit hours of MUSE 799: Museum Internship to meet this requirement.

African & African-American Studies Requirements for Dual M.A.

   - AAAS 801 Introduction to Africana Studies: African-American
   - AAAS 802 Introduction to Africana Studies: African
   - AAAS 803 Research Methods in Africana Studies
   - AAAS 804 Seminar in Africana Studies

5. African & African-American Studies Area of Specialization
   - Students are expected to choose 2 courses in their area of specialization. Courses must be numbered 500-level or above, have a AAAS course number, and be selected in consultation with the student's faculty advisor.

Shared Requirements

6. Dual Degree Electives
   - Any graduate-level MUSE or AAAS course may count as an elective. Out-of-field courses must be approved by the Directors of Graduate Study for both programs.

7. Final Project or Thesis
   - Students completing the dual-degree program are required to defend either a final project or thesis in their final semester. The student should consult with their African & African-American Studies and Museum Studies faculty advisors to identify a project or thesis topic that effectively incorporates both areas of study. Faculty advisors from both programs will oversee and evaluate the project or thesis. Students who choose to complete a thesis must enroll in 3 credit hours of AAAS 899 in their final semester in lieu of an elective course. Students who choose to complete a final project will take 15 credit hours of dual degree electives as described above.

Each student will successfully defend their final project or thesis as their master's examination. The final exam committee, chosen by the student, must have at least four members; at least two from the Museum Studies area and at least two from the African & African-American Studies area.

If a student decides to complete only the MUSE M.A. or AAAS M.A. and withdraw from the other program, they must complete all requirements for the stand-alone degree.

Course-Level Requirement and Selection Process

Courses must be taken at the 500-level or higher to count for graduate credit. Students pursuing a Dual M.A. in Museum Studies and African & African-American Studies must take 50% or more of their coursework at the 700-level or above. Core courses and thesis hours (if applicable) count toward this requirement.
All courses, aside from the core, must be selected in consultation with the student's faculty advisors (one in MUSE, one in AAAS). The Museum Studies Program maintains a list of professional area and elective course options, and it is available, along with the Graduate Student Handbook, on the MUSESTUDENTS Microsoft Teams site or upon request. African & African-American Studies maintains a list of graduate electives (https://afs.ku.edu/afscourses/) on its website.

**Graduate Policy**

Students are encouraged to review Graduate Studies' policies (https://ogs.ku.edu/policies/) related to master's degree programs for information about other requirements that may apply.

**Graduate Certificate in African Studies**

**Academic goals of the program**

The central objective of the Department of African & African-American Studies (AAAS) and The Kansas African Studies Center (KASC) in this certificate program is to formally recognize the expertise students in a range of disciplines already obtain in African Studies, in a manner that enhances students' career opportunities. The Graduate Certificate in African Studies enables graduate students to formally claim expertise in an area of the field of African Studies, through completion of 12 hours of graduate coursework.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admissions criteria**

Eligibility criteria for admission to the certificate program follow Graduate Studies' admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission, an applicant must hold a bachelor's degree.

Application requirements differ for current KU students versus non-KU students. Please visit the Department's website (http://afs.ku.edu/applying/) for a full list of the required application materials. Non-native speakers of English must meet Graduate Studies' English proficiency requirements (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

In close consultation with the Director of Graduate Studies, a student designs a coherent sequence of three elective courses. All courses, including language course work, must be at the 500-level or above. At least one of the elective courses (three credit hours) must be taken at the 700-level or above. Only courses with an Africa focus may count toward the required hours. No more than three hours of directed readings or independent study may be counted. A list of graduate-level courses with an Africa focus, offered in AAAS and in other departments, can be found on the AAAS website (https://afs.ku.edu/afscourses/).

Students are encouraged to review Graduate Studies' policies (https://ogs.ku.edu/policies/) related to graduate certificate programs for information about other requirements that may apply.

**Graduate Certificate in African-American Studies**

**Academic goals of the program**

The central objective of the Department of African & African-American Studies (AAAS) in this certificate program is to formally recognize the expertise students in a range of disciplines already obtain in African-American Studies in a manner that enhances students' career opportunities. The Graduate Certificate in African-American Studies enables graduate students to formally claim expertise in an area of the field of African-American Studies through completion of 12 hours of graduate coursework.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admissions criteria**

Eligibility criteria for admission to the certificate program follow Graduate Studies' admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission, an applicant must hold a bachelor's degree.

Application requirements differ for current KU students versus non-KU students. Please visit the Department's website (http://afs.ku.edu/applying/) for a full list of the required application materials. Non-native speakers of English must meet Graduate Studies' English proficiency requirements (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

Students are encouraged to review Graduate Studies’ policies (https://ogs.ku.edu/policies/) related to graduate certificate programs for information about other requirements that may apply.

### Department of American Studies

American Studies at the University of Kansas is an interdisciplinary department whose faculty and students think critically about community, identity, and social justice in American culture, politics, and society. We study the multiple and contested meanings of “American” both nationally and transnationally, in terms of race, gender, ethnicity, religion, class, region, age, and sexuality. To prepare students to engage a diverse and globalized society, we must learn from and about communities who have been too often marginalized in society and in the academy.

Such an inclusive definition of “American” requires an equally capacious understanding of scholarship. Recognizing the critical impact of difference and power on the formation of traditional scholastic disciplines, American Studies embraces research methods that combine, cross, and stretch conventional academic boundaries. We encourage scholars to advance civic discourse at the local, national, and global levels. Through rigorous analysis of historical and current events, encompassing official institutions, social and religious movements, popular and media culture, and other areas, we illuminate the complex formations of American community and identity, both within and beyond US borders.

American Studies produces undergraduate and graduate students who are global citizens and understand the meanings of America and its populations, its cultural and social history and diversities, and its dynamic place among other nation-states. Our undergraduate majors and minors develop practical and intellectual skills that support their careers in a range of public sector and private sector areas such as public humanities, advocacy and non-profit organizations, marketing and human resources, education, mediation, social services, and the law. Our graduate students go on to varied and successful careers as university faculty members and administrators, as well as staff members and directors of non-profit organizations such as museums and historical societies.

### Undergraduate Programs

American studies offers an interdisciplinary undergraduate program in which faculty and students think critically about the many institutional and cultural meanings of America, popular culture, society, and identity. Through studying topics such as film, jazz, literature, visual culture, gender, race, and religion, American studies investigates America in the present and the past, beyond both disciplinary and national boundaries. Given our recognition of the critical impact of difference and power in American life, we insist that a student’s program consider the profound impact of diversity on society and address differential power structures in American life and social relations. Motivated advanced students have the opportunity to work independently on research and service projects.

### Graduate Programs

American studies is an interdisciplinary program offering graduate work on society and culture in the United States — past, present, and in global context. It accommodates a variety of individual academic objectives. All students are asked to define 3 concentrations — such as historical periods, conceptual problems, or topical subjects — and to draw on appropriate university resources relating to those areas. Students must demonstrate coherence in their graduate work and be able to show relationships between their concentrations and the wider sociocultural system. To accomplish this, students must develop knowledge (including historical perspective) in the humanities and social sciences.

For a current list of participating faculty members, please visit the department’s website (http://americanstudies.ku.edu/faculty/).

Students who are interested in enrolling in graduate-level coursework in the Department of American Studies without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (https://americanstudies.ku.edu/admission/) for further details.

### Courses

**AMS 100. Introduction to American Studies. 3 Credits.** HT H

An introduction to the history and key concepts of American Studies. Students explore major changes in American culture through the critical reading and analysis of primary and secondary source material. Not open to students who have taken AMS 101.

**AMS 101. Introduction to American Studies, Honors. 3 Credits.** HT H

An introduction to the history and key concepts of American Studies. Students explore major changes in American culture through the critical reading and analysis of primary and secondary source material. Not open to students who have taken AMS 100. Prerequisite: Membership in the University Honors Program or approval by the American Studies Program.

**AMS 110. American Identities. 3 Credits.** SC S

An interdisciplinary introduction to individual and group identities over time. Students explore theories and methods relating to identity from various perspectives, such as race, class, gender, sexuality, age, religion, and region. Not open to students who have taken AMS 112.

**AMS 112. American Identities, Honors. 3 Credits.** SC S

An interdisciplinary introduction to individual and group identities over time. Students explore theories and methods relating to identity from various perspectives, such as race, class, gender, sexuality, age, religion, and region. Not open to students who have taken AMS 110. Prerequisite: Membership in the University Honors Program or instructor permission.

**AMS 177. First Year Seminar: _____. 3 Credits.** U

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Americana Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**AMS 260. America's Latinos/Latinas. 3 Credits.** U

An introduction to the Latino/a population (Mexican-Americans, Puerto Ricans, Cuban-Americans, Dominican-Americans, and Central and South
the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, “perversions” (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans’ identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as HUM 332, HIST 332 and WGSS 311.)

AMS 324. Being Deviant in America. 3 Credits. S
In this course students will study traits, conditions, actions, and behaviors that violate social norms and elicit negative societal reactions. This includes the social, cultural, and individual factors that explain deviance; motivations behind deviant behavior; and efforts by society to control deviants. In short, you will undertake a sociological examination of those on the margins of society and societal efforts to “deal with” them. (Same as SOC 324.)

AMS 325. Spanish for Heritage Learners. 3 Credits. H
A comprehensive review of the Spanish language for students whose personal or cultural ties to the language do not include extensive formal academic study, with an emphasis on the development of skills tied to cultural analysis and communication (written and oral) necessary for success in more advanced courses in Spanish. (Same as SPAN 325.) Prerequisite: SPAN 216, or SPAN 217, or SPAN 220, or appropriate placement test score as defined by the Department of Spanish & Portuguese, or consent of the Department of Spanish & Portuguese, or consent of instructor.

AMS 330. American Society. 3 Credits. H
The social structure and organization of American society with special reference to recent social changes. (Same as SOC 330.) Prerequisite: An introductory course in sociology or American studies.

AMS 332. The United States in Global Context. 3 Credits. S
Examines the influence abroad of US culture, policies and practices and the impact of other countries on US culture, society, and politics. Among the topics that may be examined are race, ethnicity, colonialism, imperialism, migration, technology, communications and media, popular culture, language, health, domestic and transnational organizations, as well as economic, political, religious, military and educational institutions. (Same as SOC 332.)

AMS 340. Black Leadership. 3 Credits. H/W
The course focuses on the concept of leadership and on black leadership in the United States; an in-depth analysis of selected case studies on black leaders, both historical and contemporary. Some attention will be given to the dispersion of Africans into the Americas and the leadership that emerged, conditioned both by environmental factors and the psychology engendered by the system of slavery. Selected successful black leaders will be invited to visit the class from time to time. (Same as AAAS 330.)

AMS 344. Case Study in American Studies: ___. 3 Credits. H
This course examines in depth a specific American studies or theme.

AMS 345. Cultural Studies. 3 Credits. H
Students gain awareness of major scholars and “schools” that have pursued critical, interdisciplinary research or cultural processes and products in the field of American Studies. Topics may include cultural materialism, semiotics, nationalism, ethnic/racial identity, gender and sexuality, cultural politics, mass media, public spheres, social space and place, commodity consumption, music, and popular culture.

AMS 360. Theory and Method. 3 Credits. H
An introduction through a topical theme to theories and methods currently used in American Studies. Prerequisite: AMS 100, AMS 110 and AMS 332 or their equivalent, or consent of instructor.

**AMS 365. Angry White Male Studies. 3 Credits. H**
This course charts the rise of the “angry white male” in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as HIST 364, HUM 365 and WGSS 365.)

**AMS 390. Geography of the United States and Canada. 3 Credits. S**
A study of the different physical, economic, and cultural settings in the United States and Canada which form the basis for the various forms of livelihood. Emphasis on the United States. (Same as GEOG 390.) Prerequisite: An introductory geography course, or background in United States or Canadian history, social science, or culture, or consent of instructor.

**AMS 436. Ethnicity in the United States: _____. 3 Credits. S**
An examination of the history, sociology, and culture of U.S. ethnic categories (e.g., American Indians, Latinos, Asian Americans, Jewish Americans, Irish Americans). The specific group studied varies from semester to semester. Course may be repeated for credit with different topics. (Same as SOC 436.)

**AMS 437. Global Ethnic and Racial Relations. 3 Credits. W**
This course uses written and visual materials to examine race, ethnicity, and nationalism around the world. Emphasis is on ways in which social forces, gender roles, sexual practices, cultural patterns, and political organization work together to construct and reinforce ethnic, racial, and national identities, boundaries, movements, and conflicts. Historical and contemporary comparisons are made between the U.S. and countries in Africa, Asia, the Americas, the Caribbean, Europe, the Pacific Islands, and the Middle East. (Same as AAAS 437 and SOC 437.)

**AMS 494. Topics in: _____. 1-4 Credits. H**
Interdisciplinary study of selected aspects of American society or culture or of the American experience.

**AMS 496. Social Justice Perspectives and Experiences. 3 Credits. S**
An experiential learning course in which students select and participate in public/civic engagement activities in a selected area undertaken in consultation with and under the direction of a faculty member. Students meet regularly to discuss and evaluate their field experiences and to collectively problem solve identified challenges to the justice work with which they are engaged. Students produce a final project on the experience that integrates the engagement experience and academic materials. Prerequisite: AMS 100 and AMS 110.

**AMS 510. History of American Women--Colonial Times to 1870. 3 Credits. H**
A survey of women's roles as housewives, mothers, consumers, workers, and citizens in pre-industrial, commercial, and early industrial America. (Same as HIST 530 and WGSS 510.)

**AMS 511. History of American Women--1870 to Present. 3 Credits. H**
A survey of women's history in the United States that will include radical and reform movements, the impact of war and depression, professionalization, immigration, women's work and the biographies of leading figures in women's history. (Same as HIST 531 and WGSS 511.)

**AMS 518. Capitalism and the Black Experience. 3 Credits. H**
This is an upper level course designed to analyze the experiences that define the African American relationship to the American economy. The course begins with the slave trade and ends in the present. It explores and explains how African American economic development intimately intertwined with the movement for freedom. Students will learn how African Americans addressed issues around slavery, housing, banking, capitalism/socialism, underground economy, and gentrification. This course is chronological in nature with thematic elements. Lectures will provide brief histories and conceptual framework for readings. This background will help students understand and explore how black identity, culture, and politics interact with economy. However, the bulk of the course will operate as a seminar. By the end of the course, students will be able to summarize African American past experiences with capitalism and its relevance to contemporary economic issues affecting African American people today. (Same as AAAS 518 and HIST 518.) Prerequisite: Any American Studies or History courses on American History.

**AMS 550. Research Seminar in: _____. 3 Credits. H**
A seminar exploring a specific American studies theme. A research paper or equivalent project is required. Prerequisite: AMS 360 (a grade of C or better is recommended) or consent of instructor. Cannot be taken concurrently with AMS 551, AMS 552 or AMS 553.

**AMS 551. Research Project in American Studies. 3 Credits. H**
Independent research on a selected topic under the direction of a faculty member. Students write an original research paper or complete an equivalent project in another medium, grounded in primary as well as secondary sources. Prerequisite: AMS 550 or consent of instructor.

**AMS 552. Public Service in American Studies. 3 Credits. H**
Independent public service in a selected area undertaken in consultation with and under the direction of a faculty member. Students produce a final written project on the experience that integrates the public service experience and academic materials, or complete an equivalent project in another medium. Prerequisite: AMS 550 or consent of instructor.

**AMS 553. Honors in American Studies. 3 Credits. H**
Honors equivalent of AMS 551. May be taken twice for credit. Three hours of AMS 553 may be substituted for a course in an appropriate category in the American Studies major. Prerequisite: AMS 550, eligibility for departmental honors, or consent of instructor.

**AMS 650. Jazz and American Culture. 3 Credits. H**
This course considers cultural and social histories of jazz, from the 1920s through the present day, as sites for exploring ideological struggles over such fields as race, class, gender, sexuality, democracy, capitalism, freedom, community, Americanness, and globalization in the U.S. The course will explore such questions as the following: What music was called jazz at what times and places? What did it mean to whom? Who played it? Who wrote about it? Who listened to it? Who danced to it? Who policed it? Who produced it? Who used it to rebell? Who used it to survive? What did all of these practices mean to participants? The course will examine struggles over social meanings in the U.S. through a study of jazz performance, labor, representation, marketing, consumption, censorship, and historiography. Prerequisite: A course in American studies, American history, or consent of instructor. (Same as WGSS 652.)

**AMS 694. Directed Readings. 1-4 Credits. H**
Consent of instructor is required.

**AMS 696. Studies in: _____. 3 Credits. H**
Interdisciplinary study of different aspects of the American experience in different semesters.

**AMS 700. Introduction to Museum Exhibits. 3 Credits.**
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as BIOL 787, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**AMS 714. Conservation Principles and Practices. 3 Credits.**
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as BIOL 700, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**AMS 730. Introduction to Collections Management and Utilization. 3 Credits.**
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, BIOL 798, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**AMS 731. Museum Management. 3 Credits.**
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as BIOL 785, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**AMS 737. Music in America. 3 Credits.**
A survey of historical developments from the Pilgrims to the present. (Same as MUSC 759.) Prerequisite: One course in the field of music history and literature or consent of instructor.

**AMS 767. Multidisciplinary Perspectives on Gerontology and Aging. 3 Credits.**
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences,human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, COMS 787, PSYC 787, and SOC 767.)

**AMS 797. Introduction to Museum Public Education. 3 Credits.**
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as BIOL 784, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**AMS 799. Museum Internship. 1-6 Credits.**
Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as ANTH 799, GEOL 723, and MUSE 799.)

**AMS 801. Introduction to American Studies. 3 Credits.**
An introduction to the field of American Studies through an examination of some of the classic and innovative works, issues, debates, and controversies in the history and the literature of American Studies.

**AMS 802. Theorizing America. 3 Credits.**
Drawing from a broad range of perspectives (e.g., cultural theory, social theory, literary theory, etc.), this course will introduce students to current theoretical debates in American studies and the concepts that inform them.

**AMS 803. Research Methods in American Studies. 3 Credits.**
An introduction to the range of interdisciplinary research methods in American studies. Emphasis will be placed on an examination of the assumptions, logics, and procedures involved in various approaches to understanding American society and culture.

**AMS 804. Research Seminar. 3 Credits.**
An intensive application of theoretical and methodological issues to the development of specific substantive research problems. Students will be expected to design and implement a study that will be critically assessed in the seminar.

**AMS 805. American Pluralism: Race, Ethnicity, and Religion in American Life. 3 Credits.**
Analysis of the dynamics of intercultural and intergroup relations in America with special emphasis on the examination of major conceptual perspectives that have characterized the study of race, ethnicity, and religion in American life.

**AMS 808. Studies in: _____ 3 Credits.**
Interdisciplinary study of different aspects of the American experiences in different semesters.

**AMS 835. Colloquium in the History of Gender. 3 Credits.**
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as HIST 895 and WGSS 835.)

**AMS 896. Examination Preparation. 1-6 Credits.**
Directed and independent study in preparation for the M.A. examination. May be repeated.

**AMS 899. Thesis. 1-6 Credits.**
Investigation of a topic for master's thesis. Total enrollment in this course may not exceed six hours of credit. Graded on a satisfactory/limited progress/no progress basis.

**AMS 900. Teaching Seminar. 1-6 Credits.**
This seminar is designed to assist students in the preparation, presentation, and evaluation of teaching in American Studies. Graded on a satisfactory/unsatisfactory basis.

**AMS 996. Examination Preparation. 1-9 Credits.**
Directed and independent study in preparation for the doctoral comprehensive examinations. May be repeated.

**AMS 997. Directed Readings. 1-4 Credits.**
Directed reading in an area of American culture in which there is no appropriate course in the offerings of the American Studies program or
of the cooperating departments, but in which there is a member of the
graduate faculty competent and willing to direct a program of study.

**AMS 998. Seminar in: ______. 3 Credits.**
Topics vary from semester to semester. Graduate students are consulted
in selecting topics.

**AMS 999. Dissertation. 1-12 Credits.**
Dissertation Credit. Graded on a satisfactory progress/limited progress/no
progress basis.

---

**Bachelor of Arts and Bachelor of General Studies in American Studies**

**Career Opportunities**
American Studies graduates are prepared for a broad array of
occupations. Recently our graduates have entered jobs in museums,
libraries, social policy, government, politics, journalism and education.
Many have entered graduate work in American studies or disciplines
in their concentrations. See an advisor for a list of American studies
courses that may meet teacher licensure requirements in history and
social sciences.

**Undergraduate Admission**

**Admission to KU**
All students applying for admission must send high school and college
transcripts to the Office of Admissions. Prospective first-year students
should be aware that KU has qualified admission requirements that all
new first-year students must meet to be admitted. Consult the
Office of Admissions (http://admissions.ku.edu/) for application deadlines and
specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for
information about international admissions.

Students considering transferring to KU may see how their college-
level course work will transfer on the Office of Admissions (http://
credittransfer.ku.edu/) website.

**Requirements for the B.A. or B.G.S. Major**

**American Studies Core Knowledge and Skills**
Majors must complete a course in each of the following areas:

<table>
<thead>
<tr>
<th>Code</th>

**American Studies Required Electives/Emphases**
Majors must select 1 of 7 special emphases or design their own.
Self-designed emphases must be approved in their entirety by an
American studies advisor and the undergraduate studies director before
implementation. Meet with your academic advisor to determine course
options that best meet your interests in this option. Prepare for this
advising session by completing a key word search in the Schedule of
Classes (https://classes.ku.edu/).

- **American Cultural Studies.** Satisfied by 4 courses, 3 of which are at
  300+ level (possible key words: American culture).

Students considering graduate study should take at least 2 courses beyond major requirements. These should be selected in consultation with a faculty advisor.

Capstone experience

Majors must complete 1 of the following:

• Research Seminar in: ______. Satisfied by AMS 550.
• By application, advanced students may pursue a focused project of research or service under the supervision of a faculty member. Satisfied by AMS 551, AMS 552, or AMS 553.

American Studies Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Major Junior/Senior Major Attempts**
Summary includes American Studies junior/senior (300+) hours attempted, including F’s and incompletes.

**Graduation Plan**

With careful planning and commitment to a full-time course load, you can graduate in 4 years. Download a sample 4-year plan (p. 1081) for American studies.

**Double Majors**
American studies majors are encouraged to take a second major in a related field, such as history, English, political science, sociology, anthropology, religious studies, African and African-American studies, economics, or art history. Because the major is interdisciplinary, a second major is relatively easy to achieve during the usual 4 years of undergraduate study.

**Opportunities for Original Projects**

By application, advanced students may pursue a focused project of research or service under the supervision of a faculty member. AMS 551, AMS 552, and AMS 553 function as independent research and service project electives.

A sample 4-year plan for the BA degree in American Studies can be found here: American Studies (p. 1081), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in American Studies can by found here: American Studies (p. 1082), or by using the left-side navigation.

**Departmental Honors**

An honors program allows seniors to do independent work under faculty direction toward completion of an honors thesis. Enrollment in AMS 553 is required. By special arrangement, students may design independent study programs to meet concentration requirements. Graduation with honors is awarded to students who meet College honors requirements, which, in addition to the course requirements includes a major GPA of 3.5.

**BA in American Studies**

### Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. See the Degree Requirements tab for a list of courses that fulfill this major requirement.
4. These AMS courses can fulfill different KU Core Goals. Individual degree mapping is done in partnership with your advisor.
5. Hour requirements (incl. 45 j/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. AMS majors complete one special emphasis, totaling 12 hours (4 classes) within the major. Three of four courses must be 300+. Majors select from options in the catalog and work with a faculty advisor to develop their emphasis and select classes. Emphasis allows deeper study of a student’s area of interest before taking senior seminar (AMS 550) in their final spring term.
7. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BGS in American Studies**

Below is a sample 4-year plan for students pursuing the BGS in American Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.

Minor in American Studies

The minor in American Studies offers students an opportunity to incorporate American Studies as an interdisciplinary field of study along with their chosen major and degree. The minor is open to all students. Many students who minor in our program do so because they want to pair their interest in the humanities and social justice with their work in STEM fields. Others find our major to be a particularly complimentary field of study for those who are currently majoring in other fields within the humanities, social sciences, or natural sciences.

Requirements for the Minor

Students selecting this minor must complete the following:

<table>

AMS 332 The United States in Global Context

Choose four American Studies courses (any course with an AMS 12 prefix or courses cross-listed with AMS courses) (12 hours) at the junior/senior level

Note: Only 1 course in the minor may be shared with your major.

Minor Hours & GPA

While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 GPA in all courses in the minor. GPA calculations include all courses in the field of study including Fs and repeated courses.

Minor in Chicanx and Latinx Studies

Welcome to the Chicanx and Latinx Studies minor! As an interdisciplinary program focused on social justice, culture, and history, the minor is designed to offer undergraduate students a dynamic understanding of the historical, social, and cultural complexities of Chicanx and Latinx communities in the United States. The minor also introduces students to the major conversations within this multi-faceted field, opening up the diversity of Chicanx and Latinx cultures and experiences to further exploration. Students enrolled in the minor are encouraged to engage with the social forces shaping the broad array of Chicanx and Latinx experiences in the United States and beyond.

Requirements for the Minor

Students selecting this minor must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Core Courses</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>AMS 260</td>
<td>America's Latinos/Latinas</td>
<td></td>
</tr>
<tr>
<td>ANTH 562</td>
<td>Mexamerica</td>
<td></td>
</tr>
<tr>
<td>LAC 302</td>
<td>Topics in Latin American Area Studies:_____</td>
<td></td>
</tr>
<tr>
<td>LAC 602</td>
<td>Topics in Latin American Studies:_____</td>
<td></td>
</tr>
<tr>
<td>ENGL 337</td>
<td>Introduction to U.S. Latino/a Literature</td>
<td></td>
</tr>
<tr>
<td>POLS 419</td>
<td>Topics in American Politics:_____ (Latino Politics)</td>
<td></td>
</tr>
<tr>
<td>SPAN 464</td>
<td>Reading and Analysis of U.S. Latino/a Literatures:_____ (conducted in Spanish)</td>
<td></td>
</tr>
<tr>
<td>SW 455</td>
<td>Topics in Social Welfare:_____ (Social Work with Latinos)</td>
<td></td>
</tr>
</tbody>
</table>

The following topics courses also may count toward the minor, if the particular topic offered in a given semester focuses on U.S. Latino/as:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>AMS 344</td>
<td>Case Study in American Studies:_____</td>
<td></td>
</tr>
<tr>
<td>AMS 494</td>
<td>Topics in:_____</td>
<td></td>
</tr>
<tr>
<td>AMS 551/553</td>
<td>Research Project in American Studies (if the research focuses on U.S. Latino/as)</td>
<td></td>
</tr>
<tr>
<td>SPAN 440</td>
<td>Topics in Transatlantic Hispanic Studies:_____ (conducted in Spanish)</td>
<td></td>
</tr>
<tr>
<td>SPAN 540</td>
<td>Colloquium on Hispanic Studies:_____ (conducted in Spanish)</td>
<td></td>
</tr>
<tr>
<td>SW 555</td>
<td>Diversity, Equity and Inclusion in Social Work Practice</td>
<td></td>
</tr>
</tbody>
</table>

A course with a service-learning component, such as one of the following, may also count in this category, with permission of the Latino/a studies advisor, if the service learning component is in a Latino/a community in the U.S.:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>AMS 552</td>
<td>Public Service in American Studies</td>
<td></td>
</tr>
<tr>
<td>SPAN 330</td>
<td>Service Learning Internship Spanish (variable credit)</td>
<td></td>
</tr>
<tr>
<td>SOC 490</td>
<td>Internship in Sociology</td>
<td></td>
</tr>
</tbody>
</table>

Other courses with at least 75 percent U.S. Latino/a content may count toward the minor with permission of the Latino/a studies advisor.

Latino/a Studies Required Electives

Students selecting this minor must complete 2 additional courses (6 hours) from any course above not used to satisfy the requirement and any of the following:

<table>
<thead>
<tr>

What is Social Justice?

Social justice refers to fair and equal institutions, laws, practices, and social relationships. It allows all of us to participate fully in and contribute to our communities and to realize our full potential as members of society and human beings. Issues of social justice affect educational and employment access and outcomes, health and welfare, everyday living and the general well being of our society. This minor invites you to investigate and reflect on the history and current state of social justice, on social relations as affected by race and ethnicity, economic class, gender, sexuality, religion, ability, and other forms of diversity. This minor also supports and encourages the study of activism and advocacy for social justice. It will help you to recognize and address persistent inequalities that are detrimental to the overall quality of life of this increasingly diverse US society of the 21st century, and thus gives you the potential to contribute directly to the realization of social justice.

Who will benefit from the Social Justice Minor?

This minor will complement undergraduate majors in the professional schools and all divisions of the College, from the traditional disciplines such as history, sociology and geography to interdisciplinary majors such as human biology, African and African American studies, Women, Gender, and Sexuality Studies, Education, and Social Work—to name just a few.

The minor will bring a depth to your profile for a wide range of specialized private and public sector positions, whether you proceed directly into the workforce upon graduation or pursue advanced degrees leading to careers in government, education, business, public service, law, medicine, or emerging areas of research. Regardless of the area you choose, you will be served well by the Social Justice Minor.

What skills and knowledge will I gain?

You will:

Develop the analytical and communication skills so that you are able to offer informed and practical contributions to your workplace policies and practices.

Develop the intellectual foundation to contribute to and thus to help build a more just and fair society.

Understand how inequality works as a persistent part of our society rather than merely as a matter of prejudice and misunderstanding.

Be a better informed member of society and participant in both your work and living communities.

Better understand and be able to explain structural inequities and injustices related to race/ethnicity, gender and sexuality, economic class, institutional barriers, and other aspects of diversity in the U.S. and transnationally.

Understand ways various groups of activists and organizers have worked to democratize society more fully and realize the meanings of citizenship and freedom.

Apply your knowledge to real life issues of social justice and fairness.
The curriculum for the Certificate includes breadth and depth of knowledge and a basic analytical skill set for understanding race and ethnicity in the U.S.

Minimum of 12 total credit hours, 6 hours must be at the JR/SR level. All Certificate coursework must be completed at KU in class or in on-line course settings. Students who complete certificate requirements at other institutions may substitute one course only in the instance that the course is a direct transfer articulation equivalent to KU. Students may petition, through AMS, for the other courses to be counted towards the certificate.

One course from a Professional School (e.g. Social Work) may be applied to the Certificate.

Minimum 2.0 KU GPA in coursework applied to the certificate.

Curriculum

I. General Knowledge/Analytical Skills (3 hours)

Basic theoretical concepts, key terms, and introduction to multidisciplinary and interdisciplinary subfields of study

• AMS 110/111 American Identities, or
• AMS 100/101 Introduction to American Studies

II. Depth of Knowledge at the 300 level (6 hours)

These courses emphasize a greater mastery of knowledge beyond the core that focuses on one or more subfields of study and enables the application of key concepts, theoretical, and analytical knowledge and skills to multidisciplinary and interdisciplinary subfields of study on race and ethnicity in the United States. See attached list for courses.

III. Elective from General or Depth of Knowledge list of courses (3 hours)

Courses that do not appear on the approved list must be approved by the AMS undergraduate advisor. Courses approved for exceptions will be approved for all students. (Edits approved by Jennifer Hamer 2.22.16)

Master of Arts in American Studies

American Studies is an interdisciplinary program offering graduate work on society and culture in the United States--past, present, and in a global context. It accommodates a variety of individual academic objectives. All students are asked to define a concentration--a period or problem--and to draw on appropriate university resources relating to that area. Students must demonstrate coherence in their graduate work and be able to show relationships between their concentrations and the wider socio cultural system. To accomplish this, students must develop knowledge (including historical perspective) in the humanities and social sciences.

The Master of Arts in American Studies is a free-standing degree. Students admitted to the M.A. program may hold bachelor’s degrees in any field and will be considered for admission based on the merit of their application. Students nearing completion of the M.A. program may apply to the Ph.D. program through an in-department application process.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. in American Studies

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission, a student must hold a bachelor's degree. Admission is based primarily on the applicant’s statement of academic objectives, record of prior studies at the undergraduate or graduate level, and references from persons familiar with the applicant’s work. Evidence of preparation for graduate study may include substantial work in American Studies or related fields, such as American history, literature, art, media, sociology, anthropology, political science, journalism, or interdisciplinary studies.

A full list of the required application materials can be found on the American Studies website (https://americanstudies.ku.edu/admission/).

Non-native speakers of English must meet Graduate Studies’ English proficiency requirements. (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/)

M.A. Degree Requirements

The Master of Arts in American Studies requires 30 credit hours, including courses and the completion of a research article or thesis.

Elective Methods

1 course selected by the student and their faculty advisor provides methodological support for the student's research. This may be a 500+ AMS or non-AMS methods course.

Elective Topics

3 courses, selected in consultation with the faculty advisor, constitute a coherent concentration, including historical depth in a defined area that prepares the student for either the master's thesis or publishable article. Courses must be numbered 500 or above and may be AMS or non-AMS courses. At least 50% of the course work counted toward the degree must be 700-level or above. The AMS core courses count toward this requirement.

Thesis Hours

After completing required courses, the student enrolls in AMS 899 and continues enrolling in thesis hours until their article or thesis is accepted by their defense committee.

Research Project and Defense

Students complete a project of original research, resulting in a thesis or scholarly article. A committee of three faculty members evaluates the project, and the student provides an oral defense.

Thesis Option

The thesis is an original piece of research and a contribution to the scholarly literature. It is smaller in scale than a doctoral dissertation and is not expected to have a comparable impact on the field. Theses typically range in length from 50 to 100 pages, divided into chapters, and are available to the public.

Article Option

The article option is intended for students who plan to extend their research project to the doctoral level or other continued professional activity. The article is an original piece of research and should be around 8,000 words in length. It should be written and formatted for submission to a scholarly, peer-reviewed journal relevant to the topic and approach of the research. The article does not have to be accepted for publication as a requirement of graduation.

The Defense/M.A. Examination

The student must complete an oral defense of either the article or the thesis. A majority of the committee members must approve the defense with an assessment of Pass or Pass with Honors in order for the requirement to be met.

Handbook

Further details about meeting the degree requirements can be found in the Department's Graduate Handbook. Students are also encouraged to review Graduate Studies’ policies (https://ogs.ku.edu/policies/) related to master's programs for information about other requirements that may apply.

Transition from the M.A. Program

Students admitted to the M.A. Program in American Studies at KU must petition the Department if they wish to continue for the Ph.D. This requires an internal application process, including the submission of a research statement and letter of support from a KU American Studies faculty member. All admissions to the Ph.D. program are at the discretion of the Graduate Committee.

Dual Master of Urban Planning and Master of Arts in American Studies

This program combines the two-year Master of Urban Planning degree and the two-year Master of Arts degree in American Studies into a two and one-half year program. This program is designed for students interested in careers in policy planning and research involving the arts, social planning, cultural activities and facilities, and historic preservation.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Dual M.A./M.U.P.

Students seeking admission to the dual degree must meet the admission requirements for both programs. Please see the American Studies (https://americanstudies.ku.edu/admission/) and Urban Planning (https://urbanplanning.ku.edu/application/) websites for their respective admission requirements.

Eligibility criteria for admission follow Graduate Studies’ admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission, a student must hold a bachelor’s degree.

Non-native speakers of English must meet Graduate Studies’ English proficiency requirements (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

M.U.P. Degree Requirements

The M.U.P portion of the dual degree requires 36 credit hours. While completing the following degree requirements, graduate students are expected to understand and follow Office Graduate Studies policies relevant to their student status and academic standing.

M.U.P. Required Core Courses

M.U.P. Electives

Master of Urban Planning Electives:

Elective coursework can be selected from the department’s graduate course offerings focusing in the areas of housing, transportation, or sustainable land use. Additional detail of elective courses and completion requirements can be found on the MUP Degree Requirements page. Students are encouraged to consult the UBPL Program Director when choosing elective courses.

M.A. in American Studies Degree Requirements

The American Studies M.A. portion of the dual degree requires 24 credit hours of course work and an oral defense of the master’s thesis or article.

<table>

**Electives in American Studies**

These courses, selected in consultation with the faculty advisor, will serve as the student’s area of concentration, preparing them for their thesis or publishable article. Electives must have an AMS course number and must be taken at the 700-level or above.

<table>
<thead>
<tr>
<th>Thesis/Article Hours</th>
<th>3</th>
</tr>
</thead>
</table>

Thesis Option

The thesis is an original piece of research and a contribution to the scholarly literature. It is smaller in scale than a doctoral dissertation and is not expected to have a comparable impact on the field. Theses typically range in length from 50 to 100 pages, divided into chapters, and are available to the public.

Article Option

The article option is intended for students who plan to extend their research project to the doctoral level or other continued professional activity. The article is an original piece of research and should be around 8,000 words in length. It should be written and formatted for submission to a scholarly, peer-reviewed journal relevant to the topic and approach of the research. The article does not have to be accepted for publication as a requirement for graduation.

The Defense/M.A. Examination

The student must complete an oral defense of either the article or the thesis. The final exam committee, chosen by the student, must have at least four members; at least two from the Urban Planning area and at least two from the American Studies area. Optimally, committee members should be provided a draft of the project at least one month prior to the defense date. A majority of the committee members must approve the defense with an assessment of Pass or Pass with Honors in order for the requirement to be met.

Course Level Requirement

Students pursuing a dual M.U.P. and M.A. in American Studies must take 50% or more of their coursework at the 700 level or above. Core courses and thesis hours (if applicable) count toward this requirement.
Handbook

Further details about meeting the degree requirements can be found in each department's Graduate Student Handbook. Students are also encouraged to review Graduate Studies' policies (https://ogs.ku.edu/policies) related to master's degrees for information about other requirements that may apply.

If a student decides to complete only the M.A. or M.U.P. and withdraw from the other program, they must complete all requirements for the stand-alone degree.

Doctor of Philosophy in American Studies

The Ph.D. is the terminal degree in American Studies. In the Ph.D. program, we seek to educate, mentor, and place scholars who will make innovative contributions to American Studies and related fields, both inside and outside of the academy. We do this by providing advanced training and practice in interdisciplinary research as well as by fostering an intellectual community of students and faculty within the department and across the wider University. We emphasize the development of independent programs of study while directing and enabling students' professionalization as researchers and teachers.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Ph.D. in American Studies

Eligibility criteria for admission to the Ph.D. program follow Graduate Studies' admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission, a student must hold a bachelor's degree. Preference may be granted to students who hold a master's degree in American Studies or a related field.

Admission is based primarily on the applicant's statement of academic objectives, record of prior studies at the undergraduate or graduate level, and references from persons familiar with the applicant's work. Evidence of preparation for graduate study may include substantial work in American Studies or related fields, such as American history, literature, art, media, sociology, anthropology, political science, journalism, or interdisciplinary studies.

A full list of the required application materials can be found on the American Studies website (https://americanstudies.ku.edu/admission/).

Non-native speakers of English must meet Graduate Studies' English proficiency requirements (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

Ph.D. Degree Requirements

The Doctor of Philosophy in American Studies requires the completion of 8 courses (24 credit hours), the comprehensive examination, enrollment in dissertation hours, and the dissertation. In consultation with the faculty advisor, the student develops a plan of work that will provide expertise in three concentration fields of study. The comprehensive examination certifies the student’s preparation in the concentration fields and readiness to conduct research at a professional level. Ph.D. students may choose to earn the M.A. in American Studies while pursuing the doctorate, upon completion of their course requirements and the defense of a publishable article. The Ph.D. program culminates in the completion and defense of the dissertation.

Graduate Seminars

3 seminars numbered 700 or higher. These courses, selected in consultation with the student’s faculty advisor, may be AMS or non-AMS seminars.

<table>
<thead>
<tr>
<th>Code</th>
<th>Core Courses</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
</table>

Research Skills Course

1 elective methods course, selected by the student and faculty advisor, to provide methodological support for the student’s program of research. Along with AMS 803, this course fulfills the Research Skills and Responsible Scholarship requirement (RS2). This may be an AMS or non-AMS methods course.

M.A. in American Studies (optional). Upon completion of all coursework requirements, the student may choose to present a publishable article manuscript and defend it to a committee. The committee assesses the manuscript and oral defense with a grade of Pass, Pass with Honors, or No Pass, by majority vote. This defense serves as an exam for the M.A. in American Studies.

Transition from the M.A. Program. Students admitted to the M.A. in American Studies at KU must petition the Department if they wish to continue for the Ph.D. This requires an internal application process, including the submission of a research statement and letter of support from a KU American Studies faculty member. All admissions to the Ph.D. program are at the discretion of the Graduate Committee.

Comprehensive Examination. Following the completion of required courses, the student enrolls in AMS 997 Examination Preparation to prepare for the comprehensive examination. In consultation with the faculty advisor, the student may also enroll in additional seminars or directed readings courses to prepare. When the advisor deems the student prepared, the student may apply to the Department to take the comprehensive examination, which is in two parts. The student must first sit for a time-limited, open-materials written examination which consists of 3 questions representing each exam field. Committee members review the written examination answers and assess them with a grade of Pass, Revision, or No Pass. A vote of Pass by at least 3 committee members qualifies the student to complete the oral portion of the examination. A vote of Revision by at least 3 members requires the student to complete a revision process. A majority vote of No Pass, after the written examination...
or the revision, will require the student to sit for a new examination in the following semesters. Students who receive a grade of No Pass on two consecutive written examinations must discontinue from the program.

With a passing grade on the written examination, the student may sit for the oral examination before the examination committee. The exam begins with a brief presentation by the student followed by committee questions related to the written portion of the exam or any part of their course work leading up to the exam.

The committee will assess the student’s performance in the oral examination with a grade of Pass or No Pass. A grade of Pass must be supported by at least 4 members of the committee. The committee may also vote to grant Honors, reflecting a student’s outstanding performance on both the written and oral examinations. If 4 committee members do not vote for a grade of Pass, the student may sit for a second oral examination after a period of at least 90 days, and after completing any additional reading or other preparation recommended by the committee. Students receiving a grade of No Pass after the second oral examination must discontinue from the program. A grade of Pass certifies the student as a doctoral candidate in the Department for a period of up to 5 years.

Dissertation. The dissertation must be an original work of research that advances the interdisciplinary field of American Studies. The student must submit a brief prospectus of the dissertation project, including a detailed plan of work. All members of the dissertation committee must endorse the prospectus in order for the project to go forward.

Upon completion of the dissertation research the student must defend the dissertation before all committee members in the “final oral examination,” or dissertation defense. After posing questions to the student about the dissertation work, committee members deliberate and vote on a grade of Satisfactory or Unsatisfactory. A grade of Satisfactory requires a majority vote, and may be contingent on the completion of specific revisions by a designated due date. The committee may also recommend that a student earning a satisfactory grade be considered for Honors by the Department. Honors are conferred at graduation by the Department, reflecting outstanding work in all aspects of the doctoral program.

Handbook. Further details about meeting the degree requirements can be found in the Department’s Graduate Handbook. Students are also encouraged to review Graduate Studies’ policies (https://ogs.ku.edu/policies/) related to doctoral programs for information about other requirements that may apply.

Department of Anthropology

The Anthropology Department at the University of Kansas

Anthropologists are concerned with the origin, history, and future of the human species. Our mission is to further our understanding of past and present human societies in their cultural, biological, and environmental contexts. As flows of people, ideas, money, and goods are crossing borders at unprecedented speeds, we are encountering human diversity now, more than ever before. The discipline provides students the knowledge and skills they will need to navigate these complex, multicultural, and rapidly changing worlds. Because we study what it is to be human, the field is one of the most wide-ranging of the academic disciplines.

There are four main subdisciplines of anthropology: Archaeology is concerned with studying the human past based on the material culture left behind. Biological or physical anthropology is concerned with human evolution and variation. Linguistic anthropology focuses on the relationship between language and culture, as well as the documentation of the history and evolution of languages over time and across space. Cultural anthropology is concerned with the many ways humans organize themselves to live together, questioning past and present patterns of meaning and power relationships on local and global scales. Anthropologists across all of the subdisciplines apply holistic, comparative, and evolutionary perspectives and a range of methodologies in their research. We are committed to fieldwork and the application of this knowledge to helping people better understand one another.

Why Study Anthropology?

Students have many reasons for wanting to major in anthropology. Some are curious about the origins of the human species. Others are fascinated the diversity of human experiences in ancient and modern periods. Some students intend to pursue international careers, where they will use languages and work in cultural contexts very different from those in which they were raised. Others plan to work in museums collecting and curating human cultural resources. Some wish to pursue graduate training in one of the field's subdisciplines, while others seek to use their anthropological training as preparation for professional schools, including law, medicine, public health, journalism, business, and engineering. There are many professions where the broad scientific, humanistic, and multicultural knowledge available through the study of anthropology can be useful—in education, healthcare, law, social work, business, human resources, public affairs, cultural resource management, or laboratory research.

Anthropological Research Opportunities at KU

- Laboratory of Biological Anthropology (LBA): Founded in 1975, the LBA was established as a research center of the University of Kansas. The LBA has supported graduate and undergraduate student research in biological anthropology, human genetics, and genetic epidemiology.
- Archaeological Research Center: Located in historic Spooner Hall on the main campus, the archaeology laboratory offers research space and support to Anthropology faculty and graduate students, Archaeology staff, Museum Studies interns, affiliate curators and research associates and visiting scholars.
- Field Schools: Anthropology faculty offer field schools in archaeology, biological anthropology, and cultural anthropology. Undergraduates and graduate students have conducted independent and collaborative research in the United States, including Alaska; Mexico, Central, and South America; sub-Saharan Africa; and Asia.

Undergraduate Programs

Undergraduate course work in anthropology is designed for students majoring in anthropology as part of a liberal education, for students majoring in anthropology as preparation for postgraduate professional training, and for students in other areas who wish to do supplementary work in anthropology.

Courses for Nonmajors

Most courses are open to nonmajors and, depending on the course, can be used to meet College principal course distribution requirements in natural sciences, social sciences, or humanities. The department offers many courses that fulfill the non-Western culture requirement. ANTH 100 General Anthropology and ANTH 160/ANTH 360 The Varieties of Human Experience are recommended for students interested in anthropology who do not intend to major in it.

Graduate Programs

The graduate program consists of about 15 faculty members and about 40 students, giving a professor-student ratio of about 1 to 2.5 and allowing a great deal of direct interaction between faculty and students. The department awards M.A. and Ph.D. degrees and has successfully placed most recipients of graduate degrees in professional positions.

The department offers graduate training in archaeology, biological anthropology, linguistic anthropology, and social/cultural anthropology. It has expertise in applied anthropology, anthropological genetics, molecular genetics, evolutionary studies, language contact and endangerment, medical anthropology, paleoanthropology, symbolic anthropology, visual anthropology, New World and Old World prehistory, and geoarchaeology. Geographic strengths include Asia, Europe, Latin America, Native North America, the Pacific, Sub-Saharan Africa, and the contemporary United States.

The department is closely associated with the Laboratory of Biological Anthropology and the Center for Archaeological Research.

Courses

ANTH 100. General Anthropology. 3 Credits. SC S
This course is an introduction to the discipline of Anthropology. Our goal is to understand human diversity in the past, present, and future through the lenses of the four primary fields of Anthropology: Archaeology, Biological Anthropology, Linguistic Anthropology, and Sociocultural Anthropology. Students will be introduced to major concepts, research approaches, important findings, and critical controversies within the discipline as a whole. We will investigate such questions as: How did humans evolve? How have human cultures and languages developed? What tools, technologies, and new kinds of knowledge and expertise emerge in the face of global environmental, social, political, and economic change?

ANTH 102. Succeeding in Anthropology. 1 Credits. S
This course is designed to enhance students’ chances for success in anthropology major and life after college. Students will learn how to maximize their possibilities for gaining academic assistance, grants, and career building, as well as design strategies for winning jobs, entry into graduate programs, and paid internships at home and abroad. Graded on a satisfactory/unsatisfactory basis.

ANTH 106. Introductory Linguistics. 3 Credits. SC S
This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A key goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as LING 106.)

ANTH 107. Introductory Linguistics, Honors. 3 Credits. SC S
This course provides an introduction to the scientific study of human language, surveying a number of areas that are central to linguistic theory (sound, structure, and meaning). The course builds fundamental skills in analyzing linguistic data, drawing on examples from languages spoken all over the world. A core goal of the course is to present the argument that all language varieties have systematic rules. Students will be asked to critically examine this argument, drawing on empirical research in linguistics. (Same as LING 107.)

ANTH 108. Introduction to Cultural Anthropology. 3-4 Credits. SC S
An introduction to the nature of culture, language, society, and personality. Included in this survey are some of the major principles, concerns, and themes of cultural anthropology. The variety of ways in which people structure their social, economic, political, and personal lives. Emphasized are the implications of overpopulation, procreative strategies, progress and growth of cultural complexity, developments in the Third World, and cultural dynamics in Western as well as in non-Western societies.

ANTH 109. Introduction to Cultural Anthropology, Honors. 3-4 Credits. SC S
An honors section of ANTH 108 for students with superior academic records.

ANTH 110. Introduction to Archaeology. 3-4 Credits. HT H
A general introduction to the history methods, theories, and principles of the study of archaeology. Lectures, and discussions sections cover the essential archaeological approaches, methods and practice: what is the material evidence that archaeologists collect, and how they collect and analyze it in order to understand humans of the past, their social organization, economy, subsistence, diet, technology, trade, exchange, symbol systems; how geological, palaeoenvironmental, paleontological, and genetic evidence contribute to archaeology and what was the effect of environmental and climate change on human evolution and global dispersal; what is the role of knowing the past, public archaeology, culture heritage preservation, and archaeological ethics in the modern world. Discussion sections will be used to examine material covered in lectures and in readings related to specific topics, and to explore relevant visual materials - archaeological artifacts, collections, and media sources.

ANTH 111. Introduction to Archaeology, Honors. 3-4 Credits. HT H
An honors section of ANTH 110 for students with superior academic records.

ANTH 115. World Prehistory. 3 Credits.
A general introduction to the evolution of human culture around the world from the Lower Paleolithic to the emergence of complex societies. This course covers what archaeology has revealed about the experience of humankind from the origins of stone tool use to the earliest urban settlements in the Middle East, Africa, Asia, Europe, and the Americas.

ANTH 150. Becoming Human. 3 Credits. N
This course examines the biological evolution and archaeological record of humanity from the earliest human origins to the origins of civilization, and asks: Where did we come from? What makes us human? Where are we going? By unraveling the fundamental connections between biological evolution and culture, our goal is to help students appreciate...
how knowledge of the human past is relevant to our modern lives, whether as a KU student today, or as a future parent, medical patient, consumer, or citizen. Not open to students that have taken ANTH 309.

**ANTH 151. Becoming Human, Honors. 3 Credits. N**
An honors section of ANTH 150 for students with superior academic records. Not open to students who have had ANTH 150. Prerequisite: Enrollment in the Honors Program.

**ANTH 160. The Varieties of Human Experience. 3 Credits. NW S/W**
An introduction to basic concepts and themes in cultural anthropology by means of the comparative study of selected cultures from around the world, for the purpose of appreciating cultural diversity. Emphasis is on systems of belief and meaning. Not open to students who have taken ANTH 360.

**ANTH 162. The Varieties of Human Experience, Honors. 3 Credits. NW S/W**
An honors section of ANTH 160 for students with superior academic records. Not open to students who have had ANTH 160 or ANTH 360.

**ANTH 177. First Year Seminar: ______. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Anthropology. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ANTH 210. Archaeology's Greatest Hits. 3 Credits. S/W**
This course is a broad survey of the most spectacular archaeological discoveries of our time. It tells the story of pioneers and scientist-adventurers in their quest for knowledge of human prehistory. These discoveries became historically significant because they embodied major theoretical advances and evolutionary leaps in our understanding of the past. While reviewing archaeology's greatest discoveries, this course will investigate many of the major events, such as the critical evaluation of evidence or the development of appropriate scientific techniques, that eventually established archaeology as a scientific endeavor.

**ANTH 212. Archaeological Myths and Realities. 3 Credits. S**
Archaeology is concerned with explaining mysteries of the human past ranging from the origins of human beings to the rise and fall of civilizations. This course is designed to guide students in investigations of mysteries that capture the popular imagination, but which many scientists do not wish to discuss. What is the scientific evidence for the Biblical account of Creation, the Great Flood, or the Tower of Babel? Was the Great Pyramid encoded with lost knowledge or predictions of the future? Did Chinese, Africans, Celts, or Vikings visit the Americas before Columbus? Is Stonehenge an astronomical observatory? Who built the giant statues on Easter Island? Where are the lost continents of Atlantis and Lemuria? The methods and theories of archaeology and anthropology will be used to address these and other questions. We will develop methods of evaluating information available from various published and online sources to judge when a claim represents a revolutionary new idea or a strategy for extracting money from the uninformed? Students will learn to be critical consumers of scientific and non-scientific information, and our goal will be to identify ways to be skeptical while maintaining an open mind when confronted with conflicting claims.

**ANTH 291. Study Abroad Topics in: ______. 1-5 Credits. S**
A course designed to enhance international experience in topic areas related to anthropology at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

**ANTH 293. Myth, Legend, and Folk Beliefs in East Asia. 3 Credits. NW H/W**
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the traditional world view of the peoples of East Asia. (Same as EALC 130, REL 130.)

**ANTH 301. Anthropology Through Films. 3 Credits. S**
An exploration of the human ways through films. Cross-cultural interpretations by filmed records of varieties of interpersonal relations seen through such aspects of culture as hunting, war, marriage, religion, sex, kinship, and death. Patterns of interactions are analyzed by examples from cultures around the world, primarily the non-Western world.

**ANTH 303. Peoples and Cultures of North Africa and the Middle East. 3 Credits. NW S**
This course familiarizes students with the peoples and cultures of North Africa and the Middle East. It examines the cultural, demographic, and religious diversity of the region, as well as the development of the early Islamic community and the formation of Islamic institutions. Issues such as religion and politics, inter-religious relations, nation-building, Islamic response to colonialism, Palestinian-Israeli conflict, Islamic resurgence, secularism, democratization, and gender, are also explored. (Same as AAAS 303.)

**ANTH 304. Fundamentals of Biological Anthropology. 3 Credits. NB N**
Biological anthropology is an exciting discipline concerned with humans as biological beings living in cultural and natural settings. We are interested in questions pertinent and important to the scientific, social, and political agendas of the world. Material covered in this class will encourage you to pursue questions about the relationship of humans to the rest of the animal kingdom, the origin, maintenance, patterning, and significance of human biological variation, the nature of heredity, and human evolution. We will discuss the human and primate fossil records, human variation, race, and genetics. Students can expect a strong emphasis on scientific literacy, that is, how the process of scientific inquiry works. When you finish this course, you will have the tools to distinguish between reliable and unreliable sources of scientific information and a solid grounding in the fundamentals of biological anthropology.

**ANTH 308. Fundamentals of Cultural Anthropology. 3 Credits. SC S**
This course covers the fundamental concepts, theories, and practices of cultural anthropology. It teaches students how to think anthropologically through a survey of classic and contemporary ethnographic texts, spanning a range of geographic and cultural areas. Applying a holistic lens, students will critically analyze inequality, globalization, and human cultural differences across time and space. Topics will include: fieldwork and ethnography; racism; ethnicity and nationalism; gender, sexuality, and kinship; socioeconomic class; the global economy; politics and power; religion; health and development; and art and media. This course logically follows ANTH 160/ANTH 162/ANTH 360. Not open to students who have taken ANTH 108 or ANTH 109.

**ANTH 309. Becoming Human. 3 Credits. N**
A more intensive treatment of ANTH 150. This course examines the biological evolution and archaeological record of humanity from the earliest human origins to the origins of civilization, and asks: Where did we come from? What makes us human? Where are we going? By unraveling the fundamental connections between biological evolution
and culture, our goal is to help students appreciate how knowledge of the human past is relevant to our modern lives, whether as a KU student today, or as a future parent, medical patient, consumer, or citizen. Not open to students that have taken ANTH 150.

**ANTH 310. Fundamentals of Archaeology. 3 Credits. HT S**
An introduction to the history, methods, theories, and principles of archaeology. This course covers essential archaeological approaches, methods and practices to answer such questions as: What is the material evidence that archaeologists collect and how do they analyze it in order to understand humans of the past, their social organization, economy, subsistence, diet, technology, trade, exchange, and symbol systems? How do geological, palaeoenvironmental, palaeontological, and genetic evidence contribute to archaeological understandings of human biological and social evolution? What was the effect of environmental and climate change on human evolution and global dispersal? How are knowledge of the past, public archaeology, culture heritage preservation, and archaeological ethics used in the modern world? Prerequisite: ANTH 150 or permission of instructor.

**ANTH 311. Archaeology Roadshow. 3 Credits. S**
This is a 15-day, interdisciplinary field-trip course in the archaeology and paleoecology of a specific region. It provides students with high-impact learning experiences in a field setting, centered on visits to national parks, archaeological sites, and ecological and paleoecological field locations. More specifically, students have daily field-lab assignments related to different components of archaeology and ecology, for example vegetation identification and analysis, geomorphological mapping and description, archaeological-site stratigraphic mapping and description, archaeological-site survey and recording, field-artifact analysis, and bison ecology and behavior “ethogram.” Students complete learning modules as they tour important archaeological and paleontological sites with course instructor and local specialists. Course may be repeated once for credit if region varies. Prerequisite: Permission of instructor.

**ANTH 315. The Prehistory of Art. 3 Credits. S**
A survey of prehistoric art focusing on the material record and interpretations of rock art (paintings, engravings on rock surfaces in rock-shelters, caves and in open air sites) and portable art created by prehistoric people. The emphasis is on the small-scale societies (hunter-gatherer and early food producers) around the world before the appearance of written records in respective geographic areas. Environmental, social and cultural contexts in which these art forms were created are discussed along with a review of past scholarship and current interpretive approaches to this old and enduring expression of human creativity. Course may be offered in lecture or online format. (Same as HA 315.)

**ANTH 317. Prehistory of Europe and Asia. 3 Credits. S**
A survey of 1.7 million years of prehistory from the peopling of the Eurasian supercontinent through the Bronze Age. The course focuses on the growth of culture, considering economy and technology, art and architecture. Topics include Neanderthals and Denisovans, emergence of modern humans during the Ice Age, transition to agriculture, and evolution of cultural complexity, comparing East and West. Prerequisite: A course in anthropology, history, geography, or permission of the instructor.

**ANTH 318. Peoples of the Great Plains. 3 Credits. S**
A survey of the diverse and changing lifeways of Native Americans in the Great Plains region from the time of the earliest inhabitants more than 13,000 years ago to the modern era. Collections of prehistoric and historic Native American material culture will be used to illustrate the diversity of technologies and artistry of indigenous Great Plains peoples.

**ANTH 320. Language in Culture and Society. 3 Credits. SC S**
Language is an integral part of culture and an essential means by which people carry out their social interactions with the members of their society. The course explores the role of language in everyday life of peoples in various parts of the world and the nature of the relationship between language and culture. Topics include world-view as reflected in language, formal vs. informal language, word taboo, and ethnography of speaking. (Same as LING 320.)

**ANTH 321. Language in Culture and Society, Honors. 3 Credits. SC S**
An honors section of ANTH 320 for students with superior academic records. Not open to students who have had ANTH 320 or LING 320. (Same as LING 321.) Prerequisite: Membership in the University Honors Program or consent of instructor.

**ANTH 323. Environmental Dynamics in India. 3 Credits. S/W**
This course introduces students to the relationships the people of India have had with their landscape from ancient times to the present. Students will learn about diverse ecosystems and the indigenous peoples they have harbored from the high Himalayas altitudes to the coastal regions, from the desolate arid deserts to the rain forests of India. The class will discuss how the very nature of the relationship of the people with their land has changed over the long course history of South Asia with specific case studies of environmental challenges, failures and successes. Examples of possible cases include: the Chipko movement led by the women of the Himalayas to save their forests from loggers; the traditions of creating lakes and water conservation lifestyles in the arid region of Rajasthan; and nature worship and cases of leopards and tigers receiving protection by the very villages they terrorize. (Same as GIST 323.)

**ANTH 325. Language, Gender, and Sexuality. 3 Credits. S**
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as GIST 303, JWSH 305, SLAV 305 and WGSS 325.)

**ANTH 330. Forensic Anthropology. 3 Credits. S**
This course focuses on the study of forensic anthropology as related to medico-legal death investigation. It includes overview of the Coroner's System, death scene investigation techniques, DNA and Geoscience applications, statutes and laws, review of injuries and interpretations, child death investigation and its uniqueness, identification of the body, coordination with law enforcement and the legal world, how to obtain the necessary information in order to complete a case, cause vs. manner of death, types of death and how to identify, how to deal with families and the public, and social responsibilities associated with forensic science.

**ANTH 340. Human Variation and Evolution. 3 Credits. N**
An examination of biochemical and physical variability in contemporary human populations. Topics include: genetic basis of human diversity, evolutionary theory, population genetics, blood groups, biochemical variations, body size and shape, pigmentation, and other morphological characteristics. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

**ANTH 341. Human Evolution. 3 Credits. N**
The evolutionary processes and events leading to the development of humans and the humanlike forms from primate ancestors; fossil hominids
and the origin of modern Homo Sapiens. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 343. Food, Nutrition and Culture. 3 Credits. S
The course is a cross-cultural survey of human dietary practices (foodways). Students are introduced to the concepts of nutrition, diet and cuisine. Evolutionary and adaptive aspects of human diets and cuisines are considered. Nutritional, environmental/technological, social and ideological aspects of regional and ethnic foodways are examined. Invited lecturers from different cultural traditions offer indigenous perspectives on their foodways.

ANTH 345. Introduction to Human Evolutionary Biology. 4 Credits. N
This course takes students on the evolutionary journey of the human species: from the origin of the primate order to modern human population diversity. It examines human adaptations to extreme environments, nutrition and the role of the microbiome in human health, and human evolutionary genomics in the foundations of immunity and their intersection with public health. It evaluates our Neandertal ancestry, and tracks major human migrations and dispersals in the peopling of the world. All topics are examined through the lens of molecular evolutionary approaches to the study of human diversity. An introduction to biology or biological anthropology course is recommended.

ANTH 352. Controversies on the Living and the Dead. 3 Credits. N
A critical analysis of conflicting perspectives on scientific and anthropological research, past and present. Topics considered include the nature of science, colonialism in anthropology and biology, origin stories and human evolution, the ethics of research in ancient and contemporary populations, eugenics, biological race, and the relationship between humans and our extinct hominin relatives. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 359. Anthropology of Sex. 3 Credits. N
An evolutionary perspective on the behavior and biology of males and females in human society. Topics will include the evolution of sexual dimorphism, social and biological issues in human reproduction, primate social patterns, human sexual behavior and taboos, sex and social structure, and the sociobiology of sex.

ANTH 360. The Varieties of Human Experience. 3 Credits. NW S/W
A more intensive treatment of ANTH 160. An introduction to basic concepts and themes in cultural anthropology by means of the comparative study of selected cultures from around the world, for the purpose of appreciating cultural diversity. Emphasis is on systems of belief and meaning. Not open to students who have taken ANTH 160.

ANTH 367. Introduction to Economic Anthropology. 3 Credits. S
This course uses ethnographic case materials to explore the ways humans provision themselves under different social and environmental conditions. It introduces the basic theories, concepts, and debates of economic anthropology and provides a foundation for more advanced courses in this subdiscipline. Prerequisite: ANTH 108 or ANTH 160/ANTH 162 or ANTH 308 or ANTH 360 or permission of instructor.

ANTH 368. The Peoples of China. 3 Credits. NW S/W
An analysis of the cultural origin, diversity, and unity of the peoples of China. Emphasis on historical development, social structure, cultural continuity and change, and ethics. (Same as EALC 368.)

ANTH 372. Religion, Power, and Sexuality in Arab Societies. 3 Credits. NW S
This course examines theories of religion, discourse, power, gender and sexuality in their application to Arab societies. The course introduces different aspects of Arab cultures. Through canonical works, we study political domination, tribal social organization, honor, tribe, shame, social loyalty, ritual initiations and discuss how these issues speak generally to anthropological inquiry. Regionally specific works are then framed by an additional set of readings drawn from anthropological, linguistics, and social theories. (Same as AAAS 372.)

ANTH 379. Indigenous Traditions of Latin America. 3 Credits. NW S/W
A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken LAC 634. (Same as LAC 334.)

ANTH 380. Peoples of South America. 3 Credits. NW S/W
A survey of native peoples and cultures of South America from the time of initial Western contacts to the present day.

ANTH 382. People and the Rain Forest. 3 Credits. S
An analysis of the cultural origin, diversity, and unity of the peoples of the neotropics. Emphasizing the peoples of Amazonia, the course introduces students to topics associated with the economic, political, and cultural dimensions of social life in rain forest communities.

ANTH 389. The Anthropology of Gender: Female, Male, and Beyond. 3 Credits. NW W
This course will introduce students to cultural constructions and performances of masculinity, femininity, and alternative genders across time and space. Topics and cases will be drawn from primarily non-Western cultures, ranging from Japanese markets to Pacific Rim gardens, and from Haitian voudou to Maya royal politics. This course uses research by archeologists, linguists, biological anthropologists, and sociocultural anthropologists. (Same as WSS 389.)

ANTH 391. Topics in Anthropology: ______. 3 Credits. S
This course offers students an opportunity to study classical and emerging topics in the four primary fields of Anthropology: Biological Anthropology, Linguistics, Sociocultural Anthropology, and Archaeology. Concepts and approaches to each field will be used to investigate past and present examples from around the world. Topics will be examined with an emphasis on the unity of the anthropological approach.

ANTH 397. Integrating Anthropology. 3 Credits. S
An introduction to the historical background, practice, and ethical issues involved in the creation, presentation, and dissemination of anthropological information in a museum setting. Students participate in the study of a collection of material culture (artifacts) from the Museum of Anthropology, culminating in development of a script for an exhibit.

ANTH 400. Topics in Anthropology, Honors: ______. 3 Credits. H
Selected issues and theories in contemporary anthropology (cultural, linguistic, biological, archaeological) for honors students. Topic for semester to be announced. May be repeated for credit if content varies. Prerequisite: Admission to University Honors Program or permission of instructor.

ANTH 401. Integrating Anthropology. 3 Credits. S
Capstone course that integrates the primary fields of anthropology. Students apply concepts and approaches from each field to a particular topic in preparation for and presentation of a cross-disciplinary and integrative final project. Prerequisite: Completion of ANTH 150/ANTH 151
or ANTH 160/ANTH 162/ANTH 360 and any two other anthropology courses.

ANTH 406. Archaeological Research Methods. 3 Credits. S LFE
A survey of basic field methods and laboratory procedures associated with specimen acquisition, preparation, analysis, classification, and measurement of archaeological materials. In this course students will apply archaeological methods to the study of stone tools, ceramics, and animal bone, learn which field and lab methods to use in a range of research scenarios, interpret human behavior on the basis of artifacts and features recovered from archaeological sites, use introductory flintknapping techniques to produce a stone tool, study the major dating and chronological methods used in archaeology, and complete labs and projects that require analysis and interpretation of archaeological materials. Prerequisite: ANTH 110/ANTH 111 or ANTH 150/ANTH 151 or ANTH 310 or permission of instructor.

ANTH 415. The Rise of Civilization. 3 Credits. S
A study of evolutionary processes leading to the birth of the early great urban civilizations of the Old World and the New World. Patterns of growth and similarities and differences in the rise of urban complexes and states in Mesopotamia, Egypt, the Indus Valley, and in Mexico/Guatemala and Peru. (Same as HIST 415.)

ANTH 418. Summer Archaeological Field Work. 1-8 Credits. S
Under the direction of a professional archaeologist, undergraduate and graduate students are taught proper procedures for the excavation and laboratory analysis of data from a prehistoric or historic archaeological site. Data gathered may be used for additional graduate research. Enrollment by application; limited to twenty students. A fee for subsistence costs will be charged.

ANTH 419. Training in Archaeological Field Work. 1-6 Credits. S
Undergraduate and graduate students are taught techniques of archaeological field work, including survey and excavation, as well as laboratory procedures, including artifact classification and curation.

ANTH 420. Archaeological Theory. 3 Credits. S
This advanced undergraduate seminar reviews the history of scientific archaeological thought, major theoretical paradigms, and current trends in archaeology. Topics include the major theoretical “movements” in the development of anthropological archaeology and how other disciplines have influenced explanation in archaeology, particularly cultural anthropology, geology, history, and evolutionary biology. Prerequisite: Completion of an introductory course in ANTH or permission of instructor.

ANTH 430. Linguistics in Anthropology. 3 Credits. S
The study of language as a symbolic system. Exploration into the interrelatedness of linguistic systems, of nonlinguistic communicative systems, and of other cultural systems. (Same as LING 430.)

ANTH 431. Constructed Languages. 3 Credits. S
Constructed languages are devised by individuals to facilitate international communication (Esperanto) or to enhance fictional or fantasy worlds (Lapine, Newspeak, Klingon, Elvish, Navi, the Common Tongue, Valyrian). Invented or constructed languages provide a means to study both the universals of linguistic expression (grammar) and the cultural contexts from which they emerge. Students will construct languages and evaluate the cultural motivations of existing ConLangs. Prerequisite: ANTH 106 or ANTH 107 recommended.

ANTH 442. Anthropological Genetics. 3 Credits. N
Principles of human genetics involved in biological anthropology. The genetics of non-Western populations considered within an evolutionary framework. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 445. Topics in Biological Anthropology: _____. 3 Credits. N
Seminar concentrating on selected problems and issues in contemporary biological anthropology. Topic for semester to be announced. Prerequisite: An introductory course in biological anthropology, biology, or permission of instructor.

ANTH 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N LFE
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as BIOL 449, SPLH 449, and PSYC 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

ANTH 459. Anthropology of Sex, Honors. 3 Credits. S
The course is an introduction to the evolutionary study of human sexual behavior. Using an explicitly Darwinian framework, it examines the biological basis for human mate selection, male and female mating strategies, child-birth and child-care practices, parental care, marriage, and family structure. The power of Darwinian theory to predict human sexual behavior is tested in anthropological field studies, designed and carried out by students in the class. Class time is allocated for discussion of students' research as it progresses through each stage, and results are presented in the last weeks of the semester. Prerequisite: An introductory course in biology or biological anthropology. Admission to the University Honors Program or permission of instructor.

ANTH 462. Field Methods in Cultural Anthropology. 3 Credits. S LFE
This course introduces students to ethical considerations, methods used in ethnographic fieldwork, field notes, coding data, analysis, and write-up. Students design and carry out research projects. Prerequisite: ANTH 108 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 360 or permission of instructor.

ANTH 465. Genocide and Ethnocide. 3 Credits. S
This course provides students with a conceptual and historical synopsis of genocide and ethnocide from an anthropological perspective. Taking its lead from a human rights orientation, the course assesses why such atrocities must be confronted. This includes grappling with ethical, legal and definitional ambiguities surrounding the concepts of genocide and ethnocide. We will explore a range of cases in the 20th and 21st centuries, while focusing on diverse conditions leading to genocide, ethnocide, population displacements, human trafficking and the modern phenomena of refugee camps. The course will analyze the role of the modern state, colonialism, political ideologies, ethnicity and nationalism as major forces underpinning ethnocide and genocidal campaigns. Based primarily on a select review of cases of ethnocide and genocide, the class examines how to spread global awareness and communal engagement by actively protecting human rights. (Same as GIST 465.)

ANTH 474. Applied Cultural Anthropology. 3 Credits. S
Applications of anthropological theory, methods, and findings in programs of community and national development, public health, international aid, and military assistance. Examination of the role of the anthropologist,
of ethics and values in intervention schemes, and of the organization of planned change in applied programs. Intensive analysis of selected case studies.

ANTH 484. Magic, Science, and Religion. 3 Credits. NW S/W
A comparative study of religion and systems of value and belief in non-Western cultures.

ANTH 491. Study Abroad Topics in: ______. 1-5 Credits. SC S
A course designed to enhance international experience in topic areas related to topics in anthropology at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

ANTH 496. Reading and Research. 1-6 Credits. S
Individual investigation of special problems in anthropology. Maximum of three credit hours in any one semester. Prerequisite: Permission of instructor.

ANTH 497. Field Experience. 1-6 Credits. S
A supervised field or laboratory-based experience in the United States or abroad. Students may receive this credit for an independent or collaborative research project or in conjunction with field school participation. Students may also acquire credit for supervised placements in organizations, agencies, museums or other settings in which they apply anthropological knowledge to real-life situations and actively participate in organized work within a community. The field experience should not duplicate any other regularly available course. A contract between mentor and student is required at the beginning of the experience, and a reflection paper is required at the end of the experience. Students are strongly recommended to have completed at least one anthropology methods course prior to enrolling in Field Experience. Prerequisite: Permission and supervision by anthropology instructor required.

ANTH 499. Senior Honors Research. 3-6 Credits. S
Individual research under the direction of one or more instructors in the department. Minimum of three credit hours in any one semester. Prerequisite: A grade-point average of 3.50 in anthropology and 3.25 in all courses, and permission of instructor.

ANTH 500. Topics in Archaeology: ______. 3 Credits. S
Seminar concentrating on selected problems and issues in contemporary archaeology. Topic for semester to be announced. Course may be repeated for a maximum of nine hours of credit. Prerequisite: Successful completion of a course in archaeology at any level, or by permission of instructor.

ANTH 501. Topics in Sociocultural Anthropology: ______. 3 Credits. S
Course concentrating on selected problems, theories, and issues in contemporary sociocultural anthropology. Topic for semester to be announced.

ANTH 502. Topics in Anthropological Linguistics: ______. 3 Credits. S
Course concentrating on selected problems, theories, and issues in contemporary anthropological linguistics. Topic for semester to be announced.

ANTH 503. Topics in Biological Anthropology: ______. 3 Credits. S
Course concentrating on selected problems, theories, and issues in contemporary biological anthropology. Topic for semester to be announced.

ANTH 504. North American Archaeology. 3 Credits. S
A general survey of the archaeology of North America. Detailed coverage of selected problems.

ANTH 505. Prehistory of Eastern North America. 3 Credits. S
A survey of the archaeological record of eastern North America from the late Pleistocene to the time of European contact. The diverse environments of eastern North America are considered in conjunction with the dynamic climatic and ecological changes which have occurred during the past 20,000 years to provide a background for study of the prehistoric groups who occupied the region. Topics will include the change in economies, technologies, and organization from the earliest hunter-gatherers through the development of pre-Colombian complex societies. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 506. Pre-Hispanic Mexico and Central America. 3 Credits. NW S/W
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotecs, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as HIST 571 and LAC 556.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor.

ANTH 507. The Ancient Maya. 3 Credits. S/W
An intensive examination of current scholarship on the ancient Maya civilization of Mexico and Central America. The course will consider Maya culture from its roots in early villages of the Preclassic period to the warring city-states of the Postclassic period. Topics will include settlement and subsistence systems, sociopolitical evolution, art and architecture, myth and symbolism, and Maya hieroglyphic writing. An important theme of the course will be the relevance of the Precolombian Maya for understanding complex societies and contemporary Latin American Culture. Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, or Indigenous Studies, or permission of instructor.

ANTH 508. Ancient American Civilizations: The Central Andes. 3 Credits. W
An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of "vertical" environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huari, Tiahuanaco, Chimú, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnohistoric documents. (Same as HIST 572 and LAC 558.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, or Indigenous Studies, or permission of instructor.

ANTH 509. Ancient Central America. 3 Credits. NW S
This course will examine the Precolombian cultures of the region situated between Mesoamerica to the north and the Central Andes to the south, focusing principally on the countries of Honduras, Nicaragua, Costa Rica, Panama, and Colombia. Once regarded as an "Intermediate Area" on the peripheries of the ancient civilizations to the north and south, the area of southern Central America and northern South America is now recognized as a center of innovation from very remote times up until the Spanish Conquest. The archaeological remains of stone tools, pottery, jade carvings, gold and copper ornaments, and a wide variety of structures will be interpreted within the context of information on subsistence,
settlement patterns, social organization and religious ideology. Issues of the relationships with populations of regions in major culture areas to the north and south will also be considered in detail. (Same as LAC 559.) Prerequisite: ANTH 110 or ANTH 115.

ANTH 510. Environmental Archaeology. 3 Credits. S
An interdisciplinary exploration of the paleoecological context in which past humans interacted with the natural environment encompassing plants, animals, and landscape; including advanced method, theory, and macro, micro, and molecular applications in paleoenvironmental reconstruction. Prerequisite: ANTH 110, ANTH 310, or permission of instructor.

ANTH 511. Archeology of Inequality. 3 Credits. S
Archaeological record of funerary rites, architecture, ceremonial objects and nutritional indicators is often the sole evidence of inequality in the past, especially in the absence of written sources or unbiased historical observations. Case studies describing past small-scale and emergent complex societies worldwide are chosen to help understand the interplay between individual status and rank (achieved or ascribed), group inequality and subordination (class, caste, gender, age, race), wealth (material, embodied, relational), and the role of power and resistance in shaping these societies. Egalitarianism as a leveling mechanism in many of the past societies is also explored. Prerequisite: Junior or Senior or Graduate status, or permission of the instructor.

ANTH 516. Hunters and Gatherers. 3 Credits. S
The diversity of hunter-gatherer cultures documented in the ethnographic and archaeological records is considered on a global scale, with particular attention given to the relationships between environment, technology, and organization. The evolution of hunter-gatherers from the earliest hominids until their interaction with more complex societies is considered, with emphasis given to the variation and nature of change in these societies. Prerequisite: ANTH 108 or ANTH 150/151 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 310 or permission of instructor.

ANTH 517. Geoaarcheology. 3 Credits. N
Application of the concepts and methods of the geosciences to interpretation of the archeological record. The course will focus primarily on the field aspects of geoaarcheology (e.g., stratigraphy, site formational processes, and landscape reconstruction), and to a lesser extent on the array of laboratory approaches available. (Same as GEOG 532.) Prerequisite: GEOG 104, ANTH 110, or ANTH 310.

ANTH 519. Lithic Technology. 3 Credits. S
An introduction to the analysis and interpretation of prehistoric stone industries. Topics discussed include origins and development of lithic technology, principles of description and typology, use and function of stone tools; interpretation of flint knapping. Prerequisite: An introductory course in archaeology.

ANTH 520. Archaeological Ceramics. 3 Credits. S
Practicum in the method and theory of pottery analysis in archaeology. Topics include manufacturing techniques, classification, and compositional analysis of pottery artifacts, as well as strategies for interpreting the role of ceramic vessels in food production, storage, and consumption; social and ritual activities; trade and exchange; and the communication of ideas. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 521. Zoarcheology. 3 Credits. S
This course is intended to complement faunal identification with practical involvement in analyses and interpretation of archaeological faunal assemblages using a variety of modern methods. Students will participate in the study of specific archaeological faunal remains, development of comparative zoological collections, and in middle-range research to document the variety of agents that affect faunal remains. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 523. Great Plains Archaeology. 3 Credits. S
A survey is provided of the archaeological record and its interpretations for the Great Plains area of North America. The records from earliest human occupation, variation in hunter and gatherer societies, to horticultural and farming societies, and the historic period are reviewed. The history of archaeological research in the region, explanatory frameworks and models, and discussion of changes in economy, technology, mobility, social organization, and population movements are among the topics of concern. Prerequisite: ANTH 110, ANTH 310, or permission of instructor.

ANTH 544. Origins of Native Americans. 3 Credits. N
A survey of the genetic, linguistic, historic, archaeological, and morphological evidence for the origins of indigenous populations of the Americas. Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

ANTH 545. Contemporary Health Issues in Africa. 3 Credits. S
The course examines health and nutrition in African communities, using the methods of biological and medical anthropology. Fundamental to the approach taken in the course is the understanding that the health of human groups depends on interactions between biological and cultural phenomena in a particular ecological context. One topic will be selected per semester, to examine in detail the full array of epidemiological factors contributing to patterns of specific diseases. AIDS, childhood diseases, and reproductive health of African women are among possible topics. Course material will be selected from scholarly and medical publications, as well as coverage in the popular media. The use of a variety of sources will enhance understanding of the biological and cultural issues involved and will help students identify possible bias and misinformation in popular coverage of events such as famine or epidemic in African settings. (Same as AAAS 554.) Prerequisite: An introductory course in either anthropology or African studies.

ANTH 561. Indigenous Development in Latin America. 3 Credits. S
Surveys the history of the development enterprise since WWII, examines the marginalization and impoverishment of Latin America’s indigenous peoples, and provides training to carry out projects for and with them to enhance their quality of life. Development is understood not merely technological or economic, but also social, emotional, and educational. Students work in teams to design their own mock development project. A 3-credit non-obligatory companion course, Applied Anthropological Field School among the Ch'orti' Maya, will follow in the intersession after each version of this course. (Same as LAC 561.) Prerequisite: ANTH 100, ANTH 108, ANTH 160 or LAC 100; or consent of instructor.

ANTH 562. Mexamerica. 3 Credits. SC H
This class surveys the relations between Mexico and the U.S. as nation-states, and among Mexicans, Mexican Americans, and Anglo Americans (to a lesser extent other U.S. citizens) in historical perspective. Issues of sovereignty, national and ethnic identity, immigration, migration, labor relations, popular culture, media, and transnational economics are covered. (Same as LAC 562.) Prerequisite: ANTH 108 or ANTH 308 or ANTH 160 or ANTH 360 or LAC 100.

ANTH 564. The Peoples of Africa. 3 Credits. NW S/W
"Peoples of Africa" examines the anthropology of Sub-Saharan Africa through selected case studies of particular societies and issues that have wider comparative relevance. Normally two to four societies are selected for the semester and studied through ethnographic, historical, and literary monographs. These case studies are examined in their pre-
colonial, colonial, and postcolonial histories. Lectures, readings, and exercises emphasize three kinds of reasoning -- geographical, historical, and cultural context -- required to grasp events and issues in unfamiliar societies. The course also features major anthropological ideas that emerged in the study of African society, and tracks how anthropology has been adapted by African scholars, policy makers, and activists.

ANTH 569. Contemporary Central America and Mexico. 3 Credits. S
Mexico and Central America have formed a cultural interaction zone for thousands of years, and today share common challenges, particularly political, economic, and social ones related to the Spanish colonial legacy, U.S. involvement, and their place in the global economy. Some of the issues addressed include racism, civil war, migration, youth gangs, narco-trafficking, resource extraction, homeless children, the transition from local subsistence economies to low-income work, and struggles for indigenous rights. Prerequisite: ANTH 108 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 360 or LAC 100 or permission of instructor.

ANTH 570. Anthropology of Violence. 3 Credits. S
Introduces students to the comparative and cross-cultural study of violence. The course begins by surveying different anthropological approaches to the study of violence, with special attention paid to classical social theorists as well as ethnographic works. Topics may include (post) coloniality and identity politics, nationalism, race, religion, and political culture; geographic areas to be covered may include Africa, Europe, Latin America, the Middle East, and South Asia. (Same as GIST 570.) Prerequisite: Junior standing or above or permission of instructor.

ANTH 581. Food Systems and Sustainability. 3 Credits. S
How shall we feed ourselves? In the face of unprecedented world population growth, humanity must meet the challenge of providing minimum caloric needs while preserving the health of ecosystems for future generations. In this course, students will explore different food cultures and production strategies developed by people in societies around the world. These include foraging, horticulture, pastoralism, intensified horticulture, and industrial agriculture. We will compare the social, economic, and environmental sustainability of various food systems and technologies and their impact on larger social and ecological systems. Prerequisite: ANTH 150 or ANTH 160.

ANTH 582. Ethnobotany. 3 Credits. S
Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional peoples made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as EVRN 542 and ISP 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor.

ANTH 583. Love, Sex, and Globalization. 3 Credits. S
Escalating transnational flows of information, commodities, and people have created innumerable kinds of “intimate” contacts on a global scale, such as mail order brides, child adoption, sex tourism, commodified romance, and emotional labor. Exploring the ways that cultural artifacts of intimacy are rendered, fetishized, and reified in a free market economy, this course examines how discourses on love and sex encounter, confront, and negotiate the logics of the capitalist market, the discrepant narratives of (colonial) modernity, and the ethics of pleasure. In so doing, this course navigates the treacherous interplay among emotions-specifically love, sex, and money, seeking the potential and limits of cultural politics of emotions. (Same as WGSS 583.) Prerequisite: Any previous course in ANTH or WGSS.

ANTH 586. Visual Anthropology. 3 Credits. U
This course takes a hands-on approach to the study of theory, ethics, and methods in visual ethnographic representation. Students also read and consider historical dimensions in this subdiscipline and complete individual and team projects in photographic and videographic media. Prerequisite: An introductory course in cultural anthropology or permission of the instructor.

ANTH 587. Multidisciplinary Field School in Partnership with the Chorti Maya. 3 Credits. S
Teams of interdisciplinary students partner with the Chorti Maya of Guatemala and Honduras to share information and experiences. One third of the course consists of readings and 4-5 orientation sessions on campus, and two thirds entails two weeks in Central America. Examples of activities might include historical research, water testing and improvement, photography, art, music, tourism consultation, marketing of crafts, human rights advocacy, web design, computer training, and museum work, among others. There are no prerequisites, but students with a working knowledge of Spanish will receive preference for admission. (Same as LAC 587.)

ANTH 595. The Colonial Experience. 3 Credits. NW S/W
An anthropological and historical examination of the processes and dynamics of the colonial experience. Cross-cultural psychosocial phenomena that have profoundly affected the values and social organizations of both colonizers and colonized will be emphasized. Specific examples will be chosen from the former American, Japanese, and European colonial empires with emphasis on Asia.

ANTH 603. Shamanism Past and Present. 3 Credits. S
This course explores shamanism, broadly defined as the practice of gaining insight through the use of ecstatic techniques (dance, drumming, trance, vision quests, and the use of psychotropic substances) for the purpose of interpreting existence and healing illnesses, through a consideration of theories and evidence for its practice from Upper Paleolithic times to the present day. Examples from the ancient cultures of Asia, Europe, Africa, Australia, and the Americas are used to explore current theoretical approaches in order to identify shamans and shamanism in the past. Issues of identifying shamans and shamanism in art and archaeological contexts are discussed. The course also explores the role that shamanism plays in a wide variety of cultures. The principal goal of the course is to provide a reasoned, critical interpretation of shamanism in the context of contemporary debates about its definition and active practice. Prerequisite: ANTH 108 or ANTH 110 or ANTH 150 or ANTH 151 or ANTH 160 or ANTH 162 or ANTH 308 or ANTH 310 or ANTH 360 or permission of instructor.

ANTH 604. The First Americans. 3 Credits. S/W
This class will review the ongoing scientific debate concerning the routes and chronologies of the earliest human migrations into the Americas. It surveys the history of the dispute over the antiquity of archaeological sites in North and South America, and investigates the paleontological, genetic, geological, and archaeological records for clues to the various peopling models and processes. As a counterpoint to the scientific approach, it also explores public arguments over the issue, to assess the socio-cultural and political repercussions of archaeological discoveries. Prerequisite: ANTH 150, ANTH 310, or permission of the instructor.
ANTH 605. Mortuary Practices in the Archaeological Record. 3 Credits.
Students study theories and methods of burial practices in the archaeological record. They learn about past communities; attitudes toward death and burial and how social organization, complexity, ideology, power, gender and age roles contribute to mortuary practices. The course examines a variety of Old and New World examples from different chronological periods through class presentations, debates and written assignments. The course focuses on comparisons and evaluation of traditional and current methods and approaches. Prerequisite: ANTH 110 or ANTH 150 or ANTH 151 or ANTH 310 or permission of instructor.

ANTH 619. Field Concepts and Methods in Geoarchaeology. 3 Credits.
A field course taught during the three week summer session. Involves all-day excursions to different regions in order to introduce students to a variety of archaeological landscapes and environments. Focuses on the application of geoscientific concepts and methods in archaeological field investigations, emphasizing natural processes such as erosion, deposition, weathering, and biological and human activity that create and modify the archaeological record, and on soil-stratigraphic and geophysical approaches to landscape and site investigations.

ANTH 648. Human Osteology. 4 Credits. N LFE
This course examines the structure and function of the human skeleton from an evolutionary and biomedical perspective. Students will learn to identify bones comprising the human skeleton and how osteological information aids in reconstructing sex, age, race, stature, and health status. Major transformations of the human skeleton from hominoid precursors, and some of the biomedical consequences of these transformations, will be addressed. (Same as BIOL 548.) Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

ANTH 652. Population Dynamics. 3 Credits. N
Examination of possible interrelationships between the demographic structure of a population and the forces of evolution. Students are exposed to field methods and techniques of population studies. Prerequisite: An introductory course in anthropology, biology, or permission of instructor.

ANTH 671. The Culture of Consumption: (E.G. United States and Japan). 3 Credits.
Examines the ideologies of capitalism and consumerism as they influence social institutions and daily life. Topics for consideration grow out of instructors' interests and may include areas such as class, religion, advertising, politics, gender, medicine, environment, childhood, and education. Prerequisite: ANTH 560 or permission of instructor.

ANTH 699. Anthropology in Museums. 3 Credits.
The course reviews the history of archeological, ethnographic, physical anthropological and other types of collections. It also considers current issues facing anthropologists, such as: contested rights to collections and the stories that accompany them; representation and interpretation of cultures; art and artifact; conceptualization, design and building of exhibitions; and anthropological research and education in the museum. (Same as MUSE 699.) Prerequisite: ANTH 150 or ANTH 108 or consent of instructor.

ANTH 701. History of Anthropology. 3 Credits.
Development of the field of anthropology and its relations with intellectual history. Emphasis on method and theory in historical context. Prerequisite: Consent of instructor or graduate standing.

ANTH 702. Current Archaeology. 3 Credits.
An introduction to fundamental theoretical orientations and methodological approaches in world archaeology. Case studies illustrate data acquisition, dating methods, culture history, paleoenvironmental models, and culture processes. Prerequisite: Consent of instructor or graduate standing.

ANTH 703. Current Biological Anthropology. 3 Credits.
The fundamental issues, methods, and theories in contemporary biological anthropology. Prerequisite: Consent of instructor or graduate standing.

ANTH 704. Current Cultural Anthropology. 3 Credits.
The fundamental issues, methods, and theories in contemporary cultural anthropology and anthropological linguistics. Prerequisite: Consent of instructor or graduate standing.

ANTH 706. Current Linguistic Anthropology. 3 Credits.
The fundamental issues, methods, and theories in contemporary linguistic anthropology. (Same as LING 706.) Prerequisite: Graduate standing or consent of instructor.

ANTH 707. Responsible Research and Scholarship in Anthropology. 3 Credits.
This course examines a range of issues critical to responsible research, scholarship, and practice in anthropology. Required for all doctoral students in Anthropology. Prerequisite: Graduate standing in anthropology or consent of instructor.

ANTH 730. Linguistics in Anthropology. 3 Credits.
The study of language as it concerns anthropology. Language systems in relation to culture, language taxonomy, semantics, and linguistic analysis as an ethnographic tool. Prerequisite: Graduate standing.

ANTH 732. Discourse Analysis. 3 Credits.
This course focuses on linguistic frameworks for the analysis of discourse. Discourse is a linguistic system larger than the sentence (utterance), which connects and contextualizes speech and written text. This course focuses on current issues and theoretical frameworks in the analysis of discourse. Using oral and written data, students will examine how contexts influence and shape linguistic form. Topics covered include transcription systems, the structure and organization of different genres of language, and the performance of social actions, including stance-taking, framing, and the construction of identity. Students will also have an opportunity to perform discourse analytic research on the data of their choice. (Same as LING 732.) Prerequisite: ANTH 706 or consent of instructor.

ANTH 736. Linguistic Analysis. 3 Credits.
Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from a variety of languages of different structural types. (Same as LING 708.) Prerequisite: An introductory course in linguistics. Not open to students who have taken LING 308.

ANTH 740. Linguistic Data Processing. 3 Credits.
The tools and techniques necessary to analyze linguistic fieldwork data, including research design, recording and elicitation techniques, computational data processing and analysis, and field ethics. Techniques of research, field recording, and data analysis technology. Methods of phonetic transcription, grammatical annotation, and analysis of language context. Practice of techniques via short studies of at least one language. (Same as LING 740.) Prerequisite: LING 700 or consent of instructor.

ANTH 741. Field Methods in Linguistic Description. 3 Credits.
The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Techniques of research design, methods of phonetic transcription,
grammatical annotation, and analysis of language context. (Same as LING 741.) Prerequisite: LING 705 or consent of instructor.

**ANTH 748. Language Contact. 3 Credits.**

Theories and case studies of languages in contact. Areal and genetic linguistics, genesis of pidgins and creoles, multilingualism. Social, political, economic, and geographic factors in language change. (Same as LING 748.) Prerequisite: A course in linguistics.

**ANTH 766. Topics in Biological Anthropology: _____. 3 Credits.**

Topic for semester to be announced. Students may repeat the course for different topics. Prerequisite: Consent of instructor.

**ANTH 770. Research Methods in Physical Anthropology. 3 Credits.**

A practical course in the use of special laboratory techniques of biological anthropological research and methods of data presentation. Prerequisite: Consent of instructor.

**ANTH 775. Seminar in Cultural Anthropology: _____. 3-9 Credits.**

Intensive consideration of special problems in cultural anthropology. Topic for semester to be announced.

**ANTH 783. Doing Ethnography. 3 Credits.**

Ethnography is both process and product. The product, a representation of a culture (or selected aspects of a culture), is based on fieldwork, the common term for the ethnographic process. This course explores how ethnographers prepare for the field, do their fieldwork, then report it.

**ANTH 798. Introduction to Collections Management and Utilization. 3 Credits.**

This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as AMS 730, BIOL 798, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

**ANTH 799. Museum Internship. 1-6 Credits.**

Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, GEOL 723, and MUSE 799.)

**ANTH 801. Proseminar I in Anthropology. 3 Credits.**

This course is an introduction to graduate study in Anthropology at the University of Kansas. Students will be introduced to the history, theory, and current research in two subfields of Anthropology: archaeology and biological anthropology. Students will read foundational papers in these two fields in order to develop a framework for contextualizing more cutting-edge research by KU Anthropology faculty and other scholars. In addition, this course will provide professional development resources for graduate students with an overview of the resources available at KU to support their graduate studies, including internal and external funding sources, information about the design, ethics, and approval procedures for future research, peer review and advisor feedback on research proposals, integration into mentoring networks, and other activities focused on career and professional development. Graduate students will learn how to critically read academic papers, and begin to develop a proposal for their graduate research project.

**ANTH 802. Proseminar II in Anthropology. 3 Credits.**

This course continues graduate students' survey of the history and theory of each anthropological subfield with a focus on foundational readings in sociocultural and linguistic anthropology as well as current research by KU Anthropology faculty and scholars outside of the department. Students will continue to develop their professional skills by finishing their proposals for external funding, and presenting and critiquing each others' work. Students' finished proposals can form the foundation of their dissertation proposals, and all are encouraged to submit them for external funding.

**ANTH 849. Seminar in Archaeology: _____. 2-4 Credits.**

Subject matter of seminar to be announced for semester.

**ANTH 851. Data Analysis in Archaeology: _____. 1-6 Credits.**

A two-semester course designed to provide graduate students with basic principles in the analysis of archaeological data. Course content will include an introduction to archaeological systematics, analytical procedures, application of multivariate statistics, and computer applications. Topic for semester to be announced.

**ANTH 853. Theory and Current Problems in Archaeology. 3 Credits.**

Consideration of scientific methodology, basic assumptions of anthropological archaeology, relationship of archaeology and anthropology, and current theoretical and methodological trends in archaeology.

**ANTH 876. Advanced Medical Anthropology: _____. 3-6 Credits.**

This course provides advanced training in selected aspects of medical anthropology; the topic for a particular semester will reflect the current interests of the instructor. It is expected that the course content will alternate between theoretical and applied emphases. May be repeated for a total of six hours credit. Prerequisite: Consent of instructor.

**ANTH 889. Summer Archaeological Field Work. 1-8 Credits.**

Under the direction of a professional archaeologist, undergraduate and graduate students are taught proper procedures for the excavation and laboratory analysis of data from a prehistoric or historic archaeological site. Data gathered may be used for additional graduate research. Enrollment by application; limited to twenty students. A fee for subsistence costs will be charged.

**ANTH 895. Graduate Teaching in Anthropology. 1 Credits.**

A course covering matters relating to pedagogy in anthropology. Topics covered will include current best practices for teaching, techniques to engage learners in inclusive communities of anthropological study, and specific matters arising from graduate students' experiences in teaching every week. Does not count toward coursework requirements for a graduate degree in anthropology. Required of all graduate teaching assistants assigned to courses in anthropology. Graded on a satisfactory/unsatisfactory basis. Prerequisite: A current GTA appointment in Anthropology.

**ANTH 896. Graduate Research. 1-9 Credits.**

Individual investigation of special problems in anthropology. Limit of six hours credit for the M.A. degree.

**ANTH 897. Internship Research. 4-6 Credits.**

Experiential learning in the application of anthropology through placement in business, government, community, research, or social service organization or agency. Students design and implement an anthropological project under faculty supervision. Prerequisite: Graduate standing in Anthropology.

**ANTH 898. Internship Analysis. 1-6 Credits.**

Experiential learning in the application of anthropology through placement in business, government, community, research, or social service organization or agency. This course is a sequel to ANTH 897. Students
Anthropological Research Opportunities at KU

- Visit the KU Anthropological Genetics Research Laboratories (https://kuanthgen.org/) for more information regarding our research laboratories. Beginning with the construction of a state-of-the-art aDNA lab in 2016, our facilities now include a contemporary DNA laboratory, and multiple teaching laboratories for molecular methods and traditional osteological and paleoanthropological classes. Our research foci are on human and non-human population histories and paleoecological reconstruction from sedimentary DNA. We prioritize ethical principles and cultural sensitivity in working in close collaboration with all partners.
- Visit the Archaeological Research Center for more information regarding the research center. Located in historic Spooner Hall on the main campus, the archaeology laboratory offers research space and support to Anthropology faculty and graduate students, Archaeology staff, Museum Studies interns, affiliate curators and research associates and visiting scholars.
- Field Schools: Anthropology faculty offer field schools in archaeology, biological anthropology, and cultural anthropology. Undergraduates and graduate students have conducted independent and collaborative research in the United States, including Alaska; Mexico, Central, and South America; sub-Saharan Africa; and Asia.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Requirements for the B.A. or B.G.S. Major in Anthropology
To declare a major or minor in Anthropology, students work with the Anthropology academic advisor in the College of Liberal Arts & Sciences. Students will be assigned a faculty mentor at the time of declaration for guidance on concentrations, course selection, and careers in anthropology. Anthropology majors may pursue a degree

Bachelor of Arts and Bachelor of General Studies in Anthropology

The Anthropology Department at the University of Kansas

Anthropologists are concerned with the origin, history, and future of the human species. Our mission is to further our understanding of past and present human societies in their cultural, biological, and environmental contexts. As flows of people, ideas, money, and goods are crossing borders at unprecedented speeds, we are encountering human diversity now, more than ever before. The discipline provides students the knowledge and skills they will need to navigate these complex, multicultural, and rapidly changing worlds. Because we study what it is to be human, the field is one of the most wide-ranging of the academic disciplines.

There are four main subdisciplines of anthropology: Archaeology is concerned with studying the human past based on the material culture left behind. Biological or physical anthropology is concerned with human evolution and variation. Linguistic anthropology focuses on the relationship between language and culture, as well as the documentation of the history and evolution of languages over time and across space. Cultural anthropology is concerned with the many ways humans organize themselves to live together, questioning past and present patterns of meaning and power relationships on local and global scales. Anthropologists across all of the subdisciplines apply holistic, comparative, and evolutionary perspectives and a range of methodologies in their research. We are committed to fieldwork and the application of this knowledge to helping people better understand one another.

Why Study Anthropology?

Students have many reasons for wanting to major in anthropology. Some are curious about the origins of the human species. Others are fascinated by the diversity of human experiences in ancient and modern periods. Some students intend to pursue international careers, where they will use languages and work in cultural contexts very different from those in which they were raised. Others plan to work in museums collecting and curating human cultural resources. Some wish to pursue graduate training in one of the field’s subdisciplines, while others seek to use their anthropological training as preparation for professional schools, including law, medicine, public health, journalism, business, and engineering. There are many professions where the broad scientific, humanistic, and multicultural knowledge available through the study of anthropology can be useful—in education, healthcare, law, social work, business, human resources, public affairs, cultural resource management, or laboratory research.
that concentrates in General Anthropology, which allows the widest selection of courses. Anthropology majors may also select a concentration in Archaeology, Biological Anthropology, and Sociocultural Anthropology, which provide in-depth knowledge in the discipline’s subfields. Students considering graduate studies in anthropology should choose a concentration in Archaeology, Biological Anthropology, or Sociocultural Anthropology. To complete a B.A. or B.G.S. Major in Anthropology, students must complete a minimum of 30 hours in the discipline, with a 2.0 grade-point average required in anthropology courses numbered 300 and above. Up to 6 hours may be taken outside the Anthropology department with approval of a faculty mentor.

A. Concentration in General Anthropology

Students who choose the General Anthropology Concentration seek a broad, integrative Anthropology major. They may select a fundamentals course and a methods course from Archaeology, Biological Anthropology, or Sociocultural Anthropology, and may choose electives from any anthropological subfield. The Concentration in General Anthropology also allows students to design a cross-disciplinary major that does not neatly fit under a single subfield (e.g., biocultural anthropology or bioarchaeology). Students will select courses for their degree in consultation with their faculty mentor.

1. Three Required Courses for Anthropology Majors concentrating in General Anthropology (9 hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 150</td>
<td>Becoming Human</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 151</td>
<td>Becoming Human, Honors</td>
<td></td>
</tr>
<tr>
<td>ANTH 160</td>
<td>The Varieties of Human Experience</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 162</td>
<td>The Varieties of Human Experience, Honors</td>
<td></td>
</tr>
<tr>
<td>ANTH 401</td>
<td>Integrating Anthropology</td>
<td>3</td>
</tr>
</tbody>
</table>

2. One Required Fundamentals Course for Anthropology Majors concentrating in General Anthropology (3 hours). May be satisfied by at least one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 308</td>
<td>Fundamentals of Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 310</td>
<td>Fundamentals of Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 304</td>
<td>Fundamentals of Biological Anthropology</td>
<td>3</td>
</tr>
</tbody>
</table>

3. One Required Research Methods Course for Anthropology Majors concentrating in General Anthropology (3 hours). May be satisfied by at least one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 406</td>
<td>Archaeological Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 449</td>
<td>Laboratory/Field Work in Human Biology</td>
<td>1-3</td>
</tr>
<tr>
<td>ANTH 462</td>
<td>Field Methods in Cultural Anthropology</td>
<td>3</td>
</tr>
</tbody>
</table>

4. Five Anthropology Electives (15 hours):

All anthropology courses count toward the required 15 hours of Anthropology major electives. Nine of the 15 hours of electives must be numbered 300 or higher. Students concentrating in General Anthropology should consult with their faculty mentor to select appropriate courses.

B. Concentration in Archaeology

The Archaeology Concentration allows students to focus their degree on the ways past and present societies are reconstructed through investigations of human, biological, and material remains. Students select a fundamentals and methods course in archaeology and choose electives that provide them an in-depth focus on local or global contexts, concepts, theories, and methods, as well as applications of archaeological approaches and methodological tools. In consultation with their faculty mentor, they may also choose electives from other anthropological subfields that complement their interests.

1. Five required courses for Anthropology Majors concentrating in Archaeology (15 hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 150</td>
<td>Becoming Human</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 151</td>
<td>Becoming Human, Honors</td>
<td></td>
</tr>
<tr>
<td>ANTH 160</td>
<td>The Varieties of Human Experience</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 162</td>
<td>The Varieties of Human Experience, Honors</td>
<td></td>
</tr>
<tr>
<td>ANTH 310</td>
<td>Fundamentals of Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 401</td>
<td>Integrating Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 406</td>
<td>Archaeological Research Methods</td>
<td>3</td>
</tr>
</tbody>
</table>

2. Five Anthropology Electives (15 hours):

All anthropology courses may be counted toward the required 15 hours of Anthropology major electives. Nine of the 15 hours of electives must be numbered 300 or higher. Students concentrating
in Archaeology may consult with an archaeology faculty mentor to select appropriate courses. Please refer to the archeological topic subfield for archaeology course (https://anthropology.ku.edu/anth-course-electives/) options.

C. Concentration in Biological Anthropology

The Biological Anthropology Concentration allows students to focus their degree on the origin, maintenance, patterning, and significance of human biological variation, the nature of heredity, and human evolution. Students select a fundamentals and methods course in biological anthropology and choose electives that provide them an in-depth focus on local or global contexts, concepts, theories, and methods, as well as applications of biological anthropology’s approaches and methodological tools. In consultation with their faculty mentor, they may also choose electives from other anthropological subfields that complement their interests.

1. Five required courses for Anthropology Majors concentrating in Sociocultural Anthropology (15 hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 150</td>
<td>Becoming Human</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 151</td>
<td>Becoming Human, Honors</td>
<td></td>
</tr>
<tr>
<td>ANTH 160</td>
<td>The Varieties of Human Experience</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 162</td>
<td>The Varieties of Human Experience, Honors</td>
<td></td>
</tr>
<tr>
<td>ANTH 401</td>
<td>Integrating Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 404</td>
<td>Fundamentals of Biological Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 449</td>
<td>Laboratory/Field Work in Human Biology</td>
<td>1-3</td>
</tr>
</tbody>
</table>

2. Five Anthropology Electives (15 hours):

All anthropology courses may be counted toward the required 15 hours of Anthropology major electives. Nine of the 15 hours of electives must be numbered 300 or higher. Students concentrating in Sociocultural Anthropology may consult with a cultural anthropology faculty mentor to select appropriate courses. Please refer to courses within the sociocultural topic subfield for cultural course (https://anthropology.ku.edu/anth-course-electives/) options.

A sample 4-year plan for the BA degree in Anthropology can be found here: Anthropology (p. 1103), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Anthropology can be found here: Anthropology (p. 1104), or by using the left-side navigation.

Departmental Honors

To qualify for honors, an undergraduate must achieve an in-residence and combined minimum grade-point average of 3.25 overall and 3.5 in anthropology. Students must file a declaration of intent form with the instructor with whom they choose to work. In addition to the required hours, the student must enroll in 3 to 6 hours of ANTH 499 Senior Honors Research and complete a senior thesis based on this work. It is recommended that all candidates make an oral presentation of their research results. One copy of the thesis must be bound and placed in the departmental thesis library.

BA in Anthropology

Below is a sample 4-year plan for students pursuing the BA in Anthropology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 15**

### Second Area of Study/Elective/Degree/Junior-Senior Hours 2

**Total Hours 14**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Refer to the Anthropology degree requirements page of the catalog for a list of courses to fulfill this requirement.
4. Students considering graduate school should take at least 2 courses beyond major requirements. These courses should be chosen in consultation with a faculty advisor.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.

This plan accounts for a student’s options with the general concentration in Anthropology. If interested in Archaeology, Biological, or Sociocultural concentrations specifically see catalog for course options.

Students considering graduate school should take at least 2 courses beyond major requirements. These courses should be chosen in consultation with a faculty advisor.

### BGS in Anthropology

Below is a sample 4-year plan for students pursuing the BGS in Anthropology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Minor in Anthropology

#### The Anthropology Department at the University of Kansas

Anthropologists are concerned with the origin, history, and future of the human species. Our mission is to further our understanding of past and present human societies in their cultural, biological, and environmental contexts. As flows of people, ideas, money, and goods are crossing borders at unprecedented speeds, we are encountering human diversity now, more than ever before. The discipline provides students the knowledge and skills they will need to navigate these complex, multicultural, and rapidly changing worlds. Because we study what it is to be human, the field is one of the most wide-ranging of the academic disciplines.

There are four main subdisciplines of anthropology: Archaeology is concerned with studying the human past based on the material culture left behind. Biological or physical anthropology is concerned with human evolution and variation. Linguistic anthropology focuses on the relationship between language and culture, as well as the documentation of the history and evolution of languages over time and across space. Cultural anthropology is concerned with the many ways humans organize themselves to live together, questioning past and present patterns of meaning and power relationships on local and global scales. Anthropologists across all of the subdisciplines apply holistic, comparative, and evolutionary perspectives and a range of methodologies in their research. We are committed to fieldwork and the application of this knowledge to helping people better understand one another.
Why Study Anthropology?

Students have many reasons for wanting to major in anthropology. Some are curious about the origins of the human species. Others are fascinated by the diversity of human experiences in ancient and modern periods. Some students intend to pursue international careers, where they will use languages and work in cultural contexts very different from those in which they were raised. Others plan to work in museums collecting and curating human cultural resources. Some wish to pursue graduate training in one of the field’s subdisciplines, while others seek to use their anthropological training as preparation for professional schools, including law, medicine, public health, journalism, business, and engineering. There are many professions where the broad scientific, humanistic, and multicultural knowledge available through the study of anthropology can be useful—in education, healthcare, law, social work, business, human resources, public affairs, cultural resource management, or laboratory research.

Anthropological Research Opportunities at KU

- **KU Anthropological Genetics Research Laboratories**: (https://kuanthgen.org): (http://www2.ku.edu/~lba/) Beginning with the construction of a state-of-the-art aDNA lab in 2016, our facilities now include a contemporary DNA laboratory, and multiple teaching laboratories for molecular methods and traditional osteological and paleoanthropological classes. Our research foci are on human and non-human population histories and paleoecological reconstruction from sedimentary DNA. We prioritize ethical principles and cultural sensitivity in working in close collaboration with all partners.

- **Archaeological Research Center**: Located in historic Spooner Hall on the main campus, the archaeology laboratory offers research space and support to Anthropology faculty and graduate students. Archaeology staff, Museum Studies interns, affiliate curators and research associates and visiting scholars.

- **Field Schools**: Anthropology faculty offer field schools in archaeology, biological anthropology, and cultural anthropology. Undergraduates and graduate students have conducted independent and collaborative research in the United States, including Alaska; Mexico, Central, and South America; sub-Saharan Africa; and Asia.

Requirements for the Minor in Anthropology

A minimum of 18 hours and a 2.0 grade-point average in KU Anthropology are required. To declare a minor in Anthropology, students will work with an Academic Advisor in the College of Liberal Arts & Sciences and will seek guidance from Anthropology faculty members in course selection.

1. One Required Introductory Course (3 hours). May be satisfied by at least one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 150</td>
<td>Becoming Human</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 151</td>
<td>Becoming Human, Honors</td>
<td></td>
</tr>
<tr>
<td>ANTH 160</td>
<td>The Varieties of Human Experience</td>
<td>3</td>
</tr>
<tr>
<td>or ANTH 162</td>
<td>The Varieties of Human Experience, Honors</td>
<td></td>
</tr>
</tbody>
</table>

2. One Required Anthropology Fundamentals Course (3 hours). May be satisfied by at least one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 308</td>
<td>Fundamentals of Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 310</td>
<td>Fundamentals of Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 340</td>
<td>Human Variation and Evolution</td>
<td>3</td>
</tr>
</tbody>
</table>

3. Anthropology Electives (12 hours):

All anthropology courses may be counted toward the required 12 hours of Anthropology minor electives. Nine of the 12 hours of electives must be numbered 300 or higher.

Master of Arts in Anthropology

What is Anthropology?

Anthropologists are concerned with the origin, history, and future of the human species. Our mission is to further our understanding of past and present human societies in their cultural, biological, and environmental contexts. The discipline provides students the knowledge and skills they will need to navigate these complex, multicultural, and rapidly changing worlds. Because we study what it is to be human, the field is one of the most wide-ranging of the academic disciplines.

There are four main subdisciplines of anthropology. Three are currently taught in our department: Archaeology is concerned with studying the human past based on the material culture left behind. Biological anthropology is concerned with human evolution and variation. Sociocultural anthropology is concerned with the many ways humans organize themselves and create, reproduce, and reject meaningful patterns of life in changing local and global circumstances. Anthropologists across all of the subdisciplines apply holistic, comparative, and evolutionary perspectives and a range of methodologies in their research. We are committed to fieldwork and the application of this knowledge to helping people better understand one another.

Why study Anthropology at KU?

Students have many reasons for pursing graduate degrees in anthropology. Some are curious about the origins of the human species. Others are fascinated the diversity of human experiences in ancient and modern periods. Some students intend to pursue international careers, where they will use languages and work in cultural contexts very different from those in which they were raised. Others plan to work in museums collecting and curating human cultural resources. Some wish to pursue graduate training in one of the field’s subdisciplines, while others seek
to use their anthropological training as preparation for professional schools, including law, medicine, public health, journalism, business, and engineering. There are many professions where the broad scientific, humanistic, and multicultural knowledge available through the study of anthropology can be useful—in education, healthcare, law, social work, business, human resources, public affairs, cultural resource management, or laboratory research.

The Anthropology Department at the University of Kansas maintains a holistic and integrative approach to studying human beings. Our world-class program has particular strengths in the Americas in all three subdisciplines, and is committed to engaged research with community partners.

Funding is available for MA students admitted into the Anthropology program.

For specific questions about our program, please contact us:

The University of Kansas
Department of Anthropology

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission to the Anthropology Program

The anthropology graduate program begins at an advanced level. Preparation for the program through completion of an undergraduate major in anthropology is encouraged but not required. Some undergraduate preparation in fields closely related to anthropology, such as biology, sociology, psychology, linguistics, economics, geography, or geology is strongly recommended. Undergraduate courses in such subjects as biology, philosophy, genetics, computer science, and history are of considerable value to the graduate student in anthropology.

Proficiency in a modern foreign language and in statistics is of special importance to candidates for graduate work in anthropology and will optimally have been acquired during the undergraduate years.

Submit your graduate application online (https://gradapply.ku.edu/apply/). Other required application materials are:

- A resume or curriculum vitae (CV)
- A writing sample of your best academic work
- A personal statement describing your academic objectives and professional goals that clearly indicates the disciplinary track of interest (i.e., archaeology, biological anthropology, or sociocultural anthropology)

- Applicants who wish to be considered for departmental financial support (GTA or GRA positions, fellowships, etc.) should clearly state this in the personal statement
- Transcripts of all undergraduate and graduate study completed
- Three letters of recommendation from faculty members or others with whom you have worked and who know your work well
- Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/) set by KU Graduate Studies

Most application materials can be uploaded to the online application. GRE scores are not required.

Applicants who are interested in working with a particular faculty member are encouraged to reach out to them directly via email.

More information on application requirements and deadlines is available on the department’s website (https://anthropology.ku.edu/graduate-admission/).

Students who are interested in enrolling in graduate level coursework in the Department of Anthropology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s website (https://anthropology.ku.edu/non-degree-seeking/) for further details.

M.A. Degree Requirements

The M.A. program is a general curriculum for students who wish to earn an M.A. en route to the Ph.D. program in anthropology or who plan to pursue graduate studies only to the M.A. level.

Coursework

Completion of 30 credit hours of graduate work in anthropology and related disciplines is required. At least 50% of coursework for the master’s degree must be at the 700 level or above. No more than 6 hours of independent research or thesis credits (ANTH 896, ANTH 897, ANTH 898, ANTH 899, ANTH 996) may count toward the 30 hour total.

</table>

In addition to the two required Proseminar courses, students must demonstrate competency in a set of Core Topics, including:

1. Professionalism
2. History/Theory in the Four Fields of Anthropology
3. Knowledge in the Area of Specialization
4. Stewardship/Engaged Research
5. Research Methods

All courses must be selected in consultation with the student’s faculty advisor.

Core Competencies may be fulfilled in two ways: through completion of relevant courses (with a grade of “B” or better in each), or the submission of research papers deemed satisfactory by their committees. The research paper option could include research papers written outside of regular coursework such as papers written for publication, papers written as a GRA, papers written while a graduate student at an outside
Subdisciplines have specific ways from demonstrating Core Competencies, see the Graduate Handbook (http://anthropology.ku.edu/) for details.

**Master's Final Exam**

The M.A. degree will be awarded upon the successful completion of a Master's Final Exam. The Anthropology program offers three options for this exam, including a thesis, project defense, and a research paper. All defense options may result in a grade of Satisfactory, Honors, or Unsatisfactory. In cases of an unsatisfactory grade, the student may repeat the exam only with the approval of the Anthropology Graduate Committee. In no cases may an exam be taken three times.

A. Thesis Option. Students completing the thesis defense option must complete at least one and no more than six hours of ANTH 899 Thesis. The MA thesis proposal should be developed in consultation with the student’s principal advisor. A completed thesis should be submitted and defended no later than the sixth semester of enrollment. Conditional on approval by the student’s M.A. committee, students must schedule and successfully complete a defense open to the University community and pass an oral defense of the thesis. The oral defense will consist of a presentation of research, open to the public, followed by a period of examination by the committee in closed session. This option is particularly recommended for students that do not intend to complete a Ph.D.

B. Research Paper Option. Students must complete at least one and no more than six independent research hours of Graduate Research (ANTH 896), Internship Research (ANTH 897), Internship Analysis (ANTH 898). Students may produce or be the primary contributor (e.g. first author) to an appropriate paper publishable by a peer-reviewed journal. The M.A. project proposal must be developed in consultation with the student’s principal advisor. The paper should be defended no later than the sixth semester of enrollment. Co-authorship is permitted if the student has primary responsibility for: 1) conceiving the project; 2) collecting new data or analyzing previously collected data; and 3) completing the finished project. Conditional on approval by the M.A. committee, students must schedule and successfully complete a defense open to the University community. The oral defense will consist of a presentation of the research paper, open to the public, followed by a period of examination by the committee in closed session.

C. Other Research Project. Students must complete at least one and no more than six independent research hours of Graduate Research (ANTH 896), Internship Research (ANTH 897), or Internship Analysis (ANTH 898). A project proposal should be developed in consultation with the student’s principal advisor. A completed project such as an edited book or monograph, or other scholarly product, such as an online resource, documentary film, or museum exhibition, should be submitted and defended no later than the sixth semester of enrollment. Conditional on approval by the M.A. committee, students must schedule and successfully complete a defense open to the University community. The oral defense will consist of a presentation of the project, open to the public, followed by a period of examination by the committee in closed session.

**Continuation to the Ph.D.**

Students who wish to continue in the doctoral program must complete a Qualifying Exam. The Qualifying Exam can be taken at the same time as their Master's Final Exam or on a separate occasion (see Ph.D. in Anthropology (https://catalog.ku.edu/liberal-arts-sciences/anthropology/phd/#requirementstext) section of the catalog under the Qualifying Exam heading for additional details). Following deliberation of the student's qualifications, the master's committee will notify the student and Director of Graduate Studies of their recommendation regarding the student's continuation in Ph.D. level study.

**Handbook for Graduate Students**

Detailed information, application deadlines, and general information may be found in the Graduate Student Handbook.

**University Policies & Requirements**

A list of all polices of the Office of Graduate Studies is available in the Policy Library (https://policy.ku.edu/office/Graduate-Studies/).

**Doctor of Philosophy in Anthropology**

**What is Anthropology?**

Anthropologists are concerned with the origin, history, and future of the human species. Our mission is to further our understanding of past and present human societies in their cultural, biological, and environmental contexts. The discipline provides students the knowledge and skills they will need to navigate these complex, multicultural, and rapidly changing worlds. Because we study what it is to be human, the field is one of the most wide-ranging of the academic disciplines.

There are four main subdisciplines of anthropology. Three are currently taught in our department: Archaeology is concerned with studying the human past based on the material culture left behind. Biological anthropology is concerned with human evolution and variation. Sociocultural anthropology is concerned with the many ways humans organize themselves and create, reproduce, and reject meaningful patterns of life in changing local and global circumstances. Anthropologists across all of the subdisciplines apply holistic, comparative, and evolutionary perspectives and a range of methodologies in their research. We are committed to fieldwork and the application of this knowledge to helping people better understand one another.

**Why Study Anthropology?**

Students have many reasons for pursuing graduate degrees in anthropology. Some are curious about the origins of the human species. Others are fascinated the diversity of human experiences in ancient and modern periods. Some students intend to pursue international careers, where they will use languages and work in cultural contexts very different from those in which they were raised. Others plan to work in museums collecting and curating human cultural resources. Some wish to pursue graduate training in one of the field’s subdisciplines, while others seek to use their anthropological training as preparation for professional schools, including law, medicine, public health, journalism, business, and engineering. There are many professions where the broad scientific, humanistic, and multicultural knowledge available through the study of anthropology can be useful, such as education, healthcare, law, social work, business, human resources, public affairs, cultural resource management, or laboratory research.

The Anthropology Department at the University of Kansas maintains a holistic and integrative approach to studying human beings. Our world-class program has particular strengths in the Americas in all three
subdisciplines, and is committed to engaged research with community partners.

We are committed to fully funding all PhD students for at least four years.

**Anthropological Research Opportunities at KU**

**KU Anthropological Genetics**
The KU Anthropological Genetics group maintains three laboratories and computing resources for graduate and undergraduate students wishing to incorporate genetics into their research.

- The **Anthropological Genetics Research Facility** has laboratory spaces for contemporary genomic analyses, as well as post-PCR and NGS library purification.
- The **Ancient DNA Laboratory** consists of cleanroom facilities and equipment for working with ancient DNA.
- **Laboratory of Biological Anthropology (LBA)**: Founded in 1975, the LBA was established as a research center of the University of Kansas. The LBA currently houses DNA samples and training facilities for undergraduates.

**KU Archaeology**
The Archaeology program at KU has a number of resources for graduate students.

- **Field Schools**: Anthropology faculty offer field schools in archaeology, biological anthropology, and cultural anthropology. Undergraduates and graduate students have conducted independent and collaborative research in the United States, including Alaska; Mexico, Central, and South America; sub-Saharan Africa; and Asia.
- **Archaeological Research Center**: Located in historic Spooner Hall on the main campus, the archaeology laboratory offers research space and support to Anthropology faculty and graduate students.
- **KU Lab for Applied Archaeological Science (KLAAS)**. Located in Malott Hall, KLAAS applies experimental and interdisciplinary approaches to traditional questions in archaeology.
- **The ODYSSEY Archaeological Research Program** is run through the Kansas Geological Survey (KGS). ODYSSEY supports field-and laboratory-based research on the archaeology of the late Pleistocene and early Holocene in the Central Great Plains. ODYSSEY has supported numerous graduate and undergraduate students from the Department of Anthropology.

For specific questions about our program, please contact us:
The University of Kansas
Department of Anthropology
Corinne Butler
Graduate Program Coordinator
E-mail: cebutler@ku.edu (cleg@ku.edu)

**Admission to Graduate Studies**
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission to the Anthropology Program**
The anthropology graduate program begins at an advanced level. Preparation for the program through completion of an undergraduate major in anthropology is encouraged but not required. Some undergraduate preparation in fields closely related to anthropology, such as biology, sociology, psychology, linguistics, economics, geography, or geology, is strongly recommended. Undergraduate courses in such subjects as biology, philosophy, genetics, computer science, and history are of considerable value to the graduate student in anthropology.

Proficiency in a modern foreign language and in statistics is of special importance to candidates for graduate work in anthropology and will optimally have been acquired during the undergraduate years.

Submit your graduate application online (https://gradapply.ku.edu/apply/). Other required application materials are:

- A resume or curriculum vitae (CV)
- A writing sample of your best academic work
- A personal statement describing your academic objectives and professional goals that clearly indicates the disciplinary track of interest (i.e., archaeology, biological anthropology, or sociocultural anthropology), and a description of your planned research
- Applicants who wish to be considered for departmental financial support (GTA or GRA positions, fellowships, etc.) should clearly state this in the personal statement
- Transcripts of all undergraduate and graduate study completed
- Three letters of recommendation from faculty members or others with whom you have worked and who know your work well
- Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/) set by KU Graduate Studies

Most application materials can be uploaded to the online application. GRE scores are not required.

Applicants who are interested in working with a particular faculty member are encouraged to reach out to them directly via email.

More information about departmental admissions and deadlines are available on the department website (https://anthropology.ku.edu/graduate-admission/).

Students who are interested in enrolling in graduate level coursework in the Department of Anthropology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s website (https://anthropology.ku.edu/non-degree-seeking/) for further details.

**Ph.D. Degree Requirements**
The Ph.D. in anthropology is awarded to candidates who have demonstrated specialized competence in one or more of the general fields...
and who have contributed to the body of knowledge and theory in the specialized field through independent, original research.

Coursework

Ph.D. students in Anthropology must complete 30 credit hours prior to completion of the Ph.D. qualifying exam. No more than 6 hours of independent research or thesis credits (ANTH 896, ANTH 897, ANTH 898, ANTH 899, ANTH 996) may count toward the 30 hour total.

In addition to the required courses above, all students must also demonstrate competency in a set of Core Topics, including:

1. Professionalism
2. History/Theory in the Four Fields of Anthropology
3. Knowledge in one's Area of Specialization
4. Stewardship/Engaged Research
5. Research Methods

All courses must be selected in consultation with the student's faculty advisor.

Core competencies may be fulfilled two ways: through completion of relevant courses (with a grade of "B" or better in each), or the submission of research papers deemed satisfactory by their committees. The research paper option could include research papers written outside of regular coursework such as papers for publication, papers written as a GRA, papers written while a graduate student at an outside institution, etc. The papers, collected in a written portfolio, will be evaluated as part of the Qualifying Exam.

Subdisciplines have specific ways for demonstrating Core Competencies, see the Graduate Handbook (http://anthropology.ku.edu/) for details.

Students who complete an M.A. in Anthropology must fulfill their Core Competencies prior to the Ph.D. Qualifying Exam.

Research Skills & Responsible Scholarship Requirement (RSRS)

The University requires that every doctoral student have training in responsible scholarship pertinent to the field of research and obtain research skills pertinent to the doctoral level of research in their field(s). This requirement is satisfied by completion of ANTH 707.

Qualifying Exam

All students seeking a Ph.D. must undergo a Qualifying Exam upon completion of their coursework, ideally in the second semester of their second year of study. The Qualifying Exam is a holistic evaluation of the student's suitability for the Ph.D. program, taking into account the student's overall capacity and preparation for graduate study leading to the Ph.D., the student's intellectual ability, self-application, creativity, portfolio of work, and prior performance in the program.

Students have the option of undergoing the Qualifying Exam in conjunction with or shortly following their M.A. exam. Students who elect not to receive the M.A. will have a standalone oral Qualifying Exam, with exam questions drawn from topics related to the student's written portfolio, administered in a closed session. If the students fails the exam, they may attempt the exam once more in written form.

Following completion of the Qualifying Exam, students complete 18 additional graduate credit hours. Of these 18 hours, no more than 9 may be in independent study (ANTH 896, ANTH 897, ANTH 898, or ANTH 996). Dissertation hours may not count toward this requirement.

Dissertation Proposal

From the beginning of doctoral study, the student should plan to conduct a doctoral dissertation project. This is an independent piece of research, usually requiring fieldwork, and leading to a dissertation that contributes to anthropological knowledge. The student's doctoral committee determines the exact form of the dissertation proposal; it may vary by subdiscipline. In the proposal, the student is expected to review the state of knowledge pertinent to the topic, describe the research problem, and explain the methods to be employed in the investigation.

Doctoral Candidacy

All Ph.D. students must pass an Oral Comprehensive Examination by their fourth semester of post-M.A. enrollment (or completion of the Qualifying Exam). This exam will be based in part upon a dissertation proposal, which must be approved by the doctoral committee at least three weeks before the Oral Comprehensive Examination is scheduled. The exam is administered by the doctoral committee and is closed to the public (see the Graduate Handbook for more details). It may result in a grade of Honors, Satisfactory, or Unsatisfactory. Upon passing the exam, students are advanced to candidacy. In the case of a grade of Unsatisfactory, a student may repeat the exam a second time only with the approval of the student's Doctoral Committee and the Anthropology Graduate Committee. A third try is not permitted.

Following completion of the Oral Comprehensive Exam, students must continue to enroll in accordance with the Office of Graduate Studies Post-comprehensive Enrollment Policy (https://policy.ku.edu/graduate-studies/doctoral-candidacy/) until all Ph.D. requirements are met.

Defense of the Dissertation

When the dissertation is accepted by the doctoral committee, a final oral examination is held. The final oral examination is open to the public. The exam may be graded Honors, Satisfactory, or Unsatisfactory. In the case of an unsatisfactory grade, a student may repeat the exam a second time only with the approval of the student's Doctoral Committee and the Anthropology Graduate Committee. A third try is not permitted.

Handbook for Graduate Students

Detailed information, application deadlines, and general information may be found in the Graduate Student Handbook.

University Policies and Requirements

A list of all policies of the Office of Graduate Studies is available online in the in the Policy Library (https://policy.ku.edu/office/Graduate-Studies/).
Department of Applied Behavioral Science

Why study applied behavioral science?

The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention.

Affiliated Research and Training Programs

For information about the Schiefelbusch Institute for Life Span Studies, Juniper Gardens Children’s Project, the Research and Training Center for Independent Living, the Center for Community Health and Development, Cofrin Logan Center for Addiction Research and Treatment, and the Kansas Intellectual and Developmental Disabilities Research Center, visit the KU Life Span Institute (http://www.lsi.ku.edu/). For information about Clinical Child Psychology, visit the program’s website (https://cdc.ku.edu/).

For information about the Center for Applied Behavioral Economics, Edna A. Hill Child Development Center, and the Performance Management Laboratory, visit the ABS department website (http://absc.ku.edu/).

Undergraduate Programs

The department teaches undergraduates to understand behavior and solve societal problems through evidence-based practice and critical thinking in applied behavioral science. Areas of application include early childhood education and intervention, developmental disabilities, substance use, behavioral economics, health promotion and community development, organizational behavior management, basic research, and conceptual foundations.

Introductory and core courses provide a sequence of instruction in

1. The basic principles of behavior;
2. Applications of these principles for solving problems of individual and societal importance;
3. Rules of evidence for data-based decision-making in solving these problems; and
4. The conceptual, comparative, and historical foundations of modern behavioral science.

Specialty area courses instruct students further about the contexts of application at the individual, family, and community levels. Recommended courses in other departments and schools (e.g., biology, psychology, sociology, political science, social welfare, special education) provide students with an even broader appreciation for the diversity of society’s problems and an interdisciplinary perspective on their solutions. A capstone practicum integrates course work with supervised, hands-on training and opportunities for research experience.

All 100-level ABSC courses are open to nonmajors. Each fulfills a College principal course distribution requirement in the social sciences for either individual behavior or public affairs; ABSC 310/ABSC 311 also fulfills the public affairs requirement. Courses numbered from 200 to 674 are open to nonmajors who have the prerequisites. Practicum courses numbered ABSC 675 and higher are restricted to majors unless students have the instructor’s permission.

Graduate Programs

The department’s graduate programs train scientist-practitioners and researchers in the discovery and production, translation and application, and communication of knowledge in the behavioral sciences for understanding and solving problems of individual and social importance, locally and globally. For this, the department offers a Master of Arts degree in applied behavioral science and a Doctor of Philosophy degree in behavioral psychology. In both degree programs, the department requires a sequence of courses that integrates the basic principles of behavior, experimental methods and research design, and conceptual foundations with training in basic, applied and intervention, and prevention research. Among the areas of application are adolescence, autism, community health and development, developmental disabilities, early childhood, family enhancement, organizational behavior management, and independent living. Other areas are described in the graduate application materials available from the department and on the website (http://www.absc.ku.edu/).

Founded in 1964, the department has played a leading role in developing and advancing applications of behavioral science. In 1968, it founded the Journal of Applied Behavior Analysis. In 2000, it received the award for Enduring Programmatic Contributions to Behavior Analysis from the Society for the Advancement of Behavior Analysis. Our graduate programs are accredited by the Association for Behavior Analysis International, and our graduate curriculum is approved by the Behavior Analysis Certification Board (http://www.bacb.com/)

Courses

ABSC 100. Introduction to Applied Behavioral Science. 3 Credits. SI S
An introduction to the principles of behavioral science and their application to problems facing contemporary societies (e.g., autism, public health, education, juvenile delinquency, substance abuse). Students will learn how behavioral scientists analyze human behavior and how these analyses are used to inform interventions. Students will also learn about careers in the behavioral sciences and how to pursue them. Course may be offered in lecture or online format.

ABSC 101. Introduction to Applied Behavioral Science, Honors. 3 Credits. SI S
This course introduces students to the principles of scientific inquiry in applied behavioral science: objectivity, definitions, observation, reliability, validity, correlation and its limitations, causation, experimental design and analysis, and the interpretation of data. These principles are presented in the context of solving individual and societal problems across the lifespan, for example, in early childhood education, public health, developmental disabilities (e.g., autism), delinquency, independent living for people with disabilities, educational systems, and gerontology. Open only to students in the University Honors Program.

ABSC 110. Applied Behavior Analysis for Practitioners. 3 Credits.

Behavior analysis is the study of human and non-human behavior from a natural science perspective. More specifically, behavior analysis takes an observation-based approach to understanding behavior. This approach has yielded several technologies of behavior that offer hope for a variety of populations including individuals with disabilities, families, organizations, and communities. The services of qualified, nationally board-certified behavior analysts are in great demand. This course is
based on the Registered Behavior Technician Task List, but is offered independent of the Behavior Analyst Certification Board (BACB). This course is designed to meet the 40-hour training requirement for the RBT credential and also includes additional material.

**ABSC 150. Community Leadership. 3 Credits. SF S**
An introduction to analysis, intervention, evaluation, and leadership in contemporary problems facing local communities. Readings, lectures, and service-learning activities enable students to understand community problems and how citizens and professionals can address them.

**ABSC 151. Community Leadership, Honors. 3 Credits. SF S**
An introduction to analysis, intervention, evaluation, and leadership in contemporary problems facing local communities. Readings, lectures, and service-learning activities enable students to understand community problems and how citizens and professionals can address them. Open only to students in the University Honors Program.

**ABSC 160. Introduction to Child Behavior and Development. 3 Credits. SI S**
An introduction to child behavior and development with an emphasis on the normal developmental range of growth, intelligence, cognition, emotion, language, and social skills from birth to adolescence.

**ABSC 177. First Year Seminar: ______. 3 Credits. U**
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Applied Behavioral Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**ABSC 250. Human Development. 3 Credits. S**
This course examines the psychological, social, and physical development of humans across the lifespan from conception through infancy, childhood, adolescence, adulthood and death. The course will explore the broad array of factors that contribute to development including cognitive, emotional, social, neurological, physical, genetic, and environmental influences. (Same as PSYC 250.) Prerequisite: PSYC 104 or PSYC 105.

**ABSC 279. Study Abroad Topics in: ______. 1-5 Credits. S**
A course designed to enhance international experience in topic areas related to applied behavioral science at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if the content differs. Prerequisite: Department permission.

**ABSC 302. Behavioral Assessment. 3 Credits.**
The strategies, methods, and ethics of conducting behavioral assessment are presented to support the identification and selection of socially significant behavior change goals. The types of behavioral assessment including indirect, descriptive, and functional assessment approaches are reviewed to determine the appropriate conditions and context for assessment-based interventions. The selection and use of other assessment methods common in Applied Behavior Analysis including preference assessments is introduced. The collection, review and interpretation of assessment data are discussed within the context of identifying behavior change goals and behavior-analytic services. Prerequisite: ABSC 100 or ABSC 101 with a grade of C or better.

**ABSC 304. Principles and Procedures of Behavioral Interventions. 3 Credits. S**
An examination of the application of the principles and procedures of behavior analysis in interventions used to address problems in adolescent and family life, adult behavioral issues including addictions, childhood autism, community health, early childhood education, intellectual and developmental disabilities, language development, organizational behavior management, and physical disabilities. The course focuses on fundamental elements of behavior change and specific behavior-change procedures to increase and maintain appropriate behaviors and reduce inappropriate behaviors. Issues in design, implementation, measurement, and evaluation of the effects of behavioral interventions and the ethical implications of the use of these interventions are examined. Prerequisite: ABSC 100 or ABSC 101 with a grade of C or better.

**ABSC 308. Research Methods and Application. 4 Credits. S**
Examines research methods used to identify, describe, understand, and intervene on socially important problems occurring across the life span (e.g., early childhood, adolescence, elders) and in varied settings (homes, classrooms, group-care facilities, and communities). Discusses research methods and concepts (e.g., prediction, experimental control, reliability, validity) within scientific, psychological, and behavior-analytic frameworks. Presents strategies and tactics regarding descriptive and experimental methods, direct and indirect measurement, graphical and statistical analysis, and single-subject and group experimental designs. Examines ethics and social responsibility in research. Provides opportunities to read primary and secondary sources, develop research questions, write and present research proposals, and assist in the conduct of research projects. Prerequisite: ABSC 100 or ABSC 101 and ABSC 304 with a grade of C or better in each course.

**ABSC 309. Child Life: Introduction to Theory and Practice. 3 Credits.**
Overview of theory and practice issues related to the Child Life Specialty, including history of the profession and its development, foundations of family centered care, scope of practice of a child life specialist, regulatory issues within the profession (e.g., ethical code, competencies, standards of practice), and historic and current perspectives on preparation of children for healthcare encounters and life-changing events.

**ABSC 310. Building Healthy Communities. 3 Credits. SF S**
This course teaches knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation. In a service-learning component, students apply these skills to issues that matter to them and to the communities they serve.

**ABSC 311. Building Healthy Communities, Honors. 3 Credits. SF S**
This course teaches knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation. In a service-learning component, students apply these skills to issues that matter to them and to the communities they serve. Prerequisite: Open only to students in the University Honors Program.

**ABSC 342. Adult Development and Aging. 3 Credits. S**
An overview of environmental, cultural, and biological influences of adult development and aging. Course material is organized in terms of topics, rather than presenting a chronological account. Prerequisite: ABSC 100 or ABSC 101, ABSC 150 or ABSC 151, or ABSC 160.

**ABSC 349. Therapeutic Benefits of Play. 3 Credits. S**
Overview of therapeutic play activities for children and adolescents with a range of health issues and needs, with particular attention to classical and contemporary theories on play, play as an essential element for children's growth, development, and learning, and the influence of the environment on children's play. Special emphasis will be placed on the design and
implementation of therapeutic play activities in the healthcare setting. Prerequisite: ABSC 160 or PSYC 333.

**ABSC 350. The Behavioral Treatment of Children with Autism. 3 Credits.**
Students learn about methods of teaching children with autism and about evaluating those methods. Topics include: basic methods of teaching as applied to imitation, productive and receptive language, self-help skills, and engagement in community activities, as well as observation and measurement of behavior in community settings and evaluating consumer satisfaction. The course consists of classroom lectures, discussions, demonstrations, examinations, and completion of laboratory and observation assignments. Enrollment priority is given to majors who intend to do practicum work with children with autism. Prerequisite: ABSC 304 or instructor permission.

**ABSC 359. Family Systems. 3 Credits.**
This class is designed to provide students with an overview of the theoretical, behavioral, and psychological perspectives of family systems and family dynamics. Specific topics include the historical and contemporary theories related to family structure and functions, family relationships and the dynamics of family life, adaptations in family structure and interaction patterns during times of transition, adult-child interactions and family roles, broader societal perspectives of diversity and cultural variance, and exploration of current research and theory as it applies to family systems. Prerequisite: ABSC 160 or PSYC 333.

**ABSC 360. Drugs, Addiction, and Behavior. 3 Credits.**
This course offers an overview of the basic and applied research in behavioral pharmacology and addictions, as well as interventions. Among the topics it covers are a history of drugs, addiction, and behavior; basic principles of drug action (e.g., pharmacodynamics); behavioral pharmacology testing paradigms (e.g., self-administration); drug action and effects (e.g., alcohol, nicotine, designer drugs, anti-depressants); behavioral deficits associated with addictions (e.g., memory); addiction treatment and recovery (e.g., maturing out, contingency management); and drugs and society. Prerequisite: ABSC 100. PSYC 104 is also recommended.

**ABSC 410. Behavioral Approaches in Working with Adolescents. 3 Credits.**
Addresses some of the basic behavioral techniques used with juveniles who have problems in school, at home, or in the community: readings and role-playing sessions covering assessment of problems, relationship development, observing and defining behavior, teaching and contracting techniques, and counseling. Prerequisite: ABSC 304 highly recommended.

**ABSC 425. Teaching Apprenticeship in Applied Behavioral Science. 3 Credits.**
Students read new materials, become more fluent with ABSC 100 content, and acquire tutoring skills. Course may not be repeated. Prerequisite: ABSC 100 and consent of the instructor and department chair.

**ABSC 437. Independent Living and People with Disabilities. 3 Credits.**
A multi-disciplinary seminar exploring theory, method, research, and practice in independent living. The course reviews personal and environmental factors as they relate to everyday problems affecting people with varying disabilities. It also contains service-learning activities in which students apply skills and knowledge gained in the classroom. Prerequisite: An introductory course in social sciences or consent of the instructor.

**ABSC 441. Ethical, Legal and Professional Issues in Applied Behavioral Science. 3 Credits.**
The course covers ethical and legal issues in the responsible conduct of basic, applied, intervention and prevention research (e.g., informed consent and assent with typical and atypical populations); inclusion of underrepresented groups, participatory action research; bias, fraud, and plagiarism, conflict of interest; reporting misconduct; authorship conflict). It also covers professional issues in behavioral consultation and training, review of the Behavior Analysis Certification Board task list on basic behavior-analytic skills, client-centered responsibilities, and foundational knowledge. This course satisfies the Behavior Analysis Certification Board requirement for 15 classroom contact hours of coursework related to Ethical Considerations in Behavior Analysis needed to take the BACB examination. This course is taught at the 400 and 800 levels, with additional assignments at the 800-level. Prerequisite ABSC 308.

**ABSC 444. Curriculum Development for Young Children. 3 Credits.**
A survey of educational materials and activities appropriate for young children. Students explore several components of effective curriculum development (e.g., objectives, methods of activity presentation, teaching strategies) and learn to integrate them to construct curricula for a range of content and skill areas. By focusing on functional components of a curriculum, students learn to construct, critically evaluate, and modify curricula for typically and atypically developing children. Prerequisite: ABSC 304 or instructor permission.

**ABSC 446. Special Topics in: _____. 1-3 Credits.**
A course designed for the study of special topics in applied behavioral science. Course content addresses major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

**ABSC 470. Organizational Behavior Management. 3 Credits.**
This course offers detailed discussion of the organizational behavior management (OBM) literature including performance management, behavioral systems analysis, and behavior-based safety. This course also addresses empirically supported staff training procedures and research in implementation science. Prerequisite: ABSC 100.

**ABSC 486. Issues in Parenting. 3 Credits.**
Theoretical approaches to the study of parenting and parent-child relationships, techniques for analyzing common parenting problems, designing appropriate interventions, fostering effective communication skills, understanding issues of diversity, and promoting parent education programs. Professional collaboration and support of families and children are emphasized throughout. Students develop analytical skills through reading, discussion, and application of theoretical and empirical concepts. Prerequisite: ABSC 160 or equivalent knowledge of child development or child psychology.

**ABSC 489. Directed Readings in: _____. 1-3 Credits.**
A course designed for directed readings in applied behavioral science. Readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

**ABSC 499. Directed Research in: _____. 1-3 Credits.**
Basic and applied research experience. The course provides training in research methods, measures, and designs, and the conduct of research, in the behavioral sciences. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

**ABSC 509. Contemporary Behavioral Science: Historical, Conceptual, and Comparative Foundations. 3 Credits.**
This course provides a survey of modern behavioral science and its applications. It reviews the field's history; integrates its sub-disciplines; situates it within the natural sciences, social sciences, and humanities; and compares and contrasts it with other perspectives. It covers recent advances in research, their implications for understanding human behavior, and their application to solving societal problems. And, it addresses the ethical implications of applied behavioral science. Prerequisite: ABSC 100 or ABSC 101 and ABSC 304 with a grade of C or better in each course.

**ABSC 519. Psychological Aspects of Death and Dying. 3 Credits.**
Students will be exposed to the historical and current cultural, psychological, spiritual/religious, and practical/legal perspectives of death and dying, with particular attention to how mental health professionals interface with systems of care to address loss across multiple developmental levels. Additional topics include ambiguous loss, suicide, transitions, palliative care, self-awareness, and professional self-care. Prerequisite: Junior or Senior standing.

**ABSC 529. Pediatric Health and Health Promotion. 3 Credits.**
An undergraduate seminar on the application of psychological theory and practice to pediatric illness and health promotion. Students will be exposed to key issues related to the health and health care of children and adolescents (and their families), with particular attention to how applied psychology interfaces with medicine and allied health to promote children's health and health care. Prerequisite: Junior or Senior standing.

**ABSC 535. Developmental Psychopathology. 3 Credits. S**
A review of contemporary psychological and developmental disorders of children and youth. Course presents current models of psychopathology, classification systems, assessment methods, and treatment approaches designed for the individual, the family, and the community. Specific attention is given to age, gender, and cultural differences and similarities. Topics include: anxiety disorders, oppositional behavior disorders, physical/sexual abuse, learning disabilities, depression, chronic physical illness, and autism. (Same as PSYC 535.) Prerequisite: ABSC 160 or PSYC 333, or instructor permission.

**ABSC 560. The Juvenile Justice System: A Behavioral and Legal Perspective. 3 Credits. S**
An overview of the juvenile justice system, including the history, development, and current controversy over children's rights in the legal system examined in light of relevant principles of behavioral science and behavioral systems of rehabilitation. Topics include delinquency, misconduct, status offenses, dependent-neglected children, child abuse, and juvenile court procedures and personnel (e.g., probation officers), and rehabilitative programs. Prerequisite: ABSC 100.

**ABSC 562. Behavioral Community Approaches to Addressing Social Issues. 3 Credits. S**
A seminar that provides an overview of the history and origin of behavioral community approaches to address social issues through the integration of applied behavioral analysis with other disciplines including community psychology, prevention science, and public health. A multidisciplinary perspective is presented that provides a review of empirically-based behavioral interventions applied in community settings. The course is offered at the 500 and 800 levels with additional assignments required at the 800-level. Not open to students with credit in ABSC 862. Prerequisite: ABSC 100, or ABSC 150, or ABSC 310, or instructor permission.

**ABSC 599. Honors and Thesis in Applied Behavioral Science. 1-5 Credits. S**
A two-semester course combining small group discussions of selected, advanced topics in applied behavioral science with honors thesis supervision on a project of the student's own design. Students normally enroll for one or two hours in fall semester and three to five hours in spring semester. Prerequisite: ABSC 304, ABSC 308, and instructor permission.

**ABSC 606. Special Projects in the Community. 1-10 Credits. S**
Structured opportunities to develop and apply knowledge and skills (e.g., analyzing problems, strategic planning, intervention, evaluation) in a project that addresses a community problem or goal. Prerequisite: Instructor permission.

**ABSC 626. Adolescent Behavior and Development. 3 Credits. S**
Impact of factors of social environment and physical growth upon psychological development from puberty to young adulthood. (Same as PSYC 626.) Prerequisite: PSYC 104, PSYC 333, or ABSC 160.

**ABSC 632. Advanced Child Behavior and Development. 3 Credits. S**
An advanced course in child development that includes a survey of the field's principles and theoretical approaches, and current issues in research and practice. Topics will include: prenatal development, cognition and language, social-emotional development, socialization influences in childhood, development psychopathology, and social policies. (Same as PSYC 632.) Prerequisite: ABSC 160, PSYC 333, or instructor permission, and senior or graduate status.

**ABSC 675. Practicum in Infant-Toddler Care and Early Intervention I. 3-5 Credits. S**
Experience in a classroom-based early intervention and child-care program serving children younger than 3 years. Students gain practical experience with care-giving and teaching practices appropriate for typically and atypically developing children. Students learn to develop and implement individualized curricula based on assessments of children's skills. Prerequisite: ABSC 444 (or concurrent enrollment) and instructor permission.

**ABSC 676. Practicum in Infant-Toddler Care and Early Intervention II. 3-5 Credits. S**
An advanced practicum providing experience in classroom-based early-intervention and child-care program serving children younger than 3 years. Students gain practical experience with care-giving and teaching practices appropriate for typically and atypically developing children. Students learn to develop and implement individualized curricula based on assessments of children's skills. Prerequisite: ABSC 444, ABSC 675, and instructor permission.

**ABSC 677. Practicum in Preschool Education and Intervention I. 3-5 Credits. S**
A one-semester practicum providing opportunities for students to assume responsibility for the education and guidance of young children in an early childhood program. Regularly scheduled individual and staff conferences enable students to evaluate personal growth and progress as teachers of young children. Prerequisite: ABSC 444 (or concurrent enrollment) and instructor permission. Must also meet special state requirements for child care employees and volunteers.

**ABSC 678. Practicum in Preschool Education and Intervention II. 3-5 Credits. S**
A one-semester advanced practicum providing opportunities for students to assume responsibility for the education and guidance of young children in an early childhood program. Regularly scheduled individual and staff conferences enable students to evaluate personal growth and progress as teachers of young children. Prerequisite: ABSC 444, ABSC 677, and instructor permission. Must also meet special state requirements for child care employees and volunteers.

**ABSC 679. Practicum in Behavior Analysis Research in Early Childhood Education. 1-6 Credits. S**
A two-semester practicum providing opportunities for supervised training in one of several ongoing research projects in the field of behavior analysis, either basic or applied. Students assist in conducting research and participate in individual and group meetings to discuss and evaluate research and related methodological issues. Prerequisite: ABSC 308 and instructor permission.

ABSC 680. Practicum in Advanced Laboratory in the Development of Behavioral Treatments for Children with Autism. 1-6 Credits. S
Students participate in an intensive behavioral treatment program teaching language, social skills, self-help skills, and academic skills to young children with autism. Students learn: to develop and implement treatment programs; design and use of a system of data collection and analysis; and apply the principles and philosophy of community and school mainstreaming. Prerequisite: ABSC 350 and instructor permission.

ABSC 682. Organizational Behavior Management Practicum. 1-5 Credits. S
This practicum course is designed to provide training and support practice in addressing socially significant problems and goals of community-based organizations using behavior analysis to guide assessment and intervention. Additionally, this course promotes community-university partnerships to support change and improvement in organizations through service learning. All practicum students are required to have previously completed ABSC 100 and selected applied behavioral science as a major or minor.

ABSC 683. Practicum in Child Life Specialty. 3 Credits.
This practicum is designed to provide training and support in the practice of Child Life Specialty (CLS) in a hospital/health care environment. Students will receive supervised experience under the supervision of certified Child Life Specialists, didactic instruction in professional issues related to CLS, and individual advising. Students will create a clinical portfolio to document their development of specific clinical/professional competencies over the course of the semester. Individual advising focuses on development of the students' resume/cover letter and individualized study plans for preparing for the CLS certification exam. This course may be repeated once for credit. Prerequisite: ABSC 309 and instructor permission. Must also meet special state and/or hospital requirements for child care employees and volunteers (e.g., criminal background check).

ABSC 685. Practicum in Community-based Residential or Day Treatment Programs for Disabled Adults. 3-6 Credits. S
A one or two-semester practicum in which students are provided with the opportunity to work directly with developmentally disabled adults in either community-based residential or day treatment programs. Students are required to read relevant literature, carry out treatment programs, and participate in weekly meetings to discuss treatment goals and progress. Prerequisite: ABSC 304, ABSC 410, and instructor permission.

ABSC 690. Practicum in Community Health and Development. 1-6 Credits. U
A two-semester practicum in which students engage in structured opportunities to practice core competencies related to the work of promoting community health and development (e.g., strategic planning, intervention, evaluation). In weekly group meetings, students prepare for their individual working field settings (e.g., health and human service agencies, research and advocacy organizations, community organizations). Prerequisite: ABSC 150, ABSC 310, and instructor permission.

ABSC 691. Practicum in Community Health and Development, Honors. 1-6 Credits. U
A two-semester practicum in which students engage in structured opportunities to practice core competencies related to the work of promoting community health and development (e.g., strategic planning, intervention, evaluation). In weekly group meetings, students prepare for their individual working field settings (e.g., health and human service agencies, research and advocacy organizations, community organizations). Prerequisite: Open only to students in the University Honors Program; ABSC 151, ABSC 311 and instructor permission.

ABSC 692. Practicum in Basic Research. 3 Credits. S
Practical supervised training in the laboratory study of human and/or animal behavior. Students assist in conducting basic research, read and discuss research articles, attend lab meetings, and acquire data analysis and presentation skills. Prerequisite: ABSC 308 (or concurrent enrollment) and permission of the instructor.

ABSC 693. Practicum in Historical and Conceptual Foundations. 3-6 Credits. S
Practical supervised training in the historical and conceptual foundations of applied behavioral science (e.g., behavior analysis). Students research and read primary source literatures and write papers that advance our understanding of the field's foundations (e.g., empirical, theoretical). Prerequisite: ABSC 100/101, ABSC 304, ABSC 308, and ABSC 509 (or concurrent enrollment), and permission of instructor.

ABSC 694. Practicum in Juvenile Problems. 3-6 Credits. S
A one-semester practicum providing opportunities for students to aid professionals in the development and implementation of behavioral treatment plans with adolescents. Regularly scheduled individual and group meetings enable the evaluation of the practicum students' progress while working in the rehabilitative process for juveniles who have problems that can bring them into contact with the juvenile justice system. Prerequisite: ABSC 410, and instructor permission.

ABSC 695. Special Practicum in: _______. 3-6 Credits. S
A one or two-semester practicum providing opportunities for supervised, hands-on training outside the existing specialty areas or their options. This practicum must be arranged with the prior approval of a faculty advisor and the department's Undergraduate Curriculum Committee. Students should see an advisor about this practicum early in their junior year. Prerequisite: Instructor permission.

ABSC 696. Special Practicum in, Honors: _______. 3-6 Credits. S
A one or two-semester practicum providing opportunities for supervised, hands-on training outside the existing specialty areas or their options. This practicum must be arranged with the prior approval of a faculty advisor and the department's Undergraduate Curriculum Committee. Students should see an advisor about this practicum early in their junior year. Prerequisite: Open only to students in the University Honors Program and instructor permission.

ABSC 698. Special Research Practicum in: _______. 3-6 Credits. S
A one or two-semester research practicum providing opportunities for supervised, hands-on research training outside the existing specialty areas or their options. This practicum must be arranged with the prior approval of a faculty advisor and the department's Undergraduate Curriculum Committee. Students should see an advisor about this practicum early in their junior year. Prerequisite: Instructor permission.

ABSC 699. Special Research Practicum in, Honors: _______. 3-6 Credits. S
A one or two-semester research practicum providing opportunities for supervised, hands-on research training outside the existing specialty areas or their options. This practicum must be arranged with the prior approval of a faculty advisor and the department's Undergraduate Curriculum Committee. Students should see an advisor early in their junior year about the practicum and its prerequisites and requirements.
Prerequisite: Open only to students in the University Honors Program and instructor permission.

ABSC 702. Curriculum Development for Young Children. 3 Credits.

A survey of educational materials and activities that are appropriate for young children (birth to age 8). Students explore several components of effective curriculum (e.g., objectives, effective methods of activity presentation, teaching strategies) and learn to combine them to construct curriculums for a range of content and skill areas. By focusing on the functional components of curriculums, students learn to construct, critically evaluate, and modify them for both typically developing children and children with special needs.

ABSC 704. Research Practicum in Clinical Child Psychology. 3 Credits.

This course provides students in the Clinical Child Psychology Program with the opportunity to enhance and consolidate their research activities by fulfilling one of the elective cluster course requirements. This practicum involves a contract with a research advisor and the program director. The contract includes definable products and dates for completion to prepare research for submission for publication, develop a grant proposal, or conduct additional research project independent of other requirements in the program. The course is not to be taken as an overload, but is to be part of a full-time course schedule. May be repeated. (Same as PSYC 704.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 705. Pediatric Psychology. 3 Credits.

Discussion of behavior problems commonly encountered in the pediatric population, including reviews of data-based methodologies for remediation. Topics include general child rearing skills, bedtime problems, enuresis, encopresis, toilet training, self-injurious behavior, temper tantrums, behavior in community settings, child abuse, psychotropic drugs for children, adolescent behavior problems and selection of children's play materials. Prerequisite: ABSC 160 or ABSC 632.

ABSC 706. Special Topics in Clinical Child Psychology: _____ 3 Credits.

A course offering detailed discussion of the literature and research methods of a special topic within clinical child and pediatric psychology. Topic and instructor may change by semester and will be announced in the Schedule of Classes. May be repeated. (Same as PSYC 706.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 710. Community Health and Development. 3 Credits.

This course extends knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation, and then apply these skills to issues that matter to them and the communities they serve. (Same as ISP 871.)

ABSC 716. Experimental Problems in Community Settings. 1-5 Credits.

Research in the experimental design and analysis of community settings. No more than 10 hours total. Prerequisite: Instructor permission.

ABSC 717. Experimental Field Work in Community Settings. 1-5 Credits.

Instruction in the methods and techniques of the experimental design and analysis of community settings through supervised participation in established research programs. Emphasizes the techniques of gathering original experimental data. No more than 10 hours total. Prerequisite: Instructor permission.

ABSC 725. Research Methods and Application. 3 Credits.

Surveys research methods used to identify, describe, understand, and intervene on socially important problems occurring across the life span (e.g., early childhood, adolescence, elders) and in varied settings (homes, classrooms, group-care facilities, and communities). Discusses research methods and concepts (e.g., prediction, control, reliability, validity) within scientific, psychological, and behavior-analytic frameworks. Presents strategies and tactics regarding descriptive and experimental methods, and direct and indirect measurement, graphic and statistical analysis, and single-subject and group experimental designs. Examines ethics and social responsibility in research. Provides opportunities to read secondary and primary sources, develop research questions, write and present research proposals. Prerequisite: Instructor permission.

ABSC 735. Within Subjects Research Methodology and Direct Observation. 3 Credits.

A graduate level introduction to the logic of experimentation, direct observation strategies, and research conducted using individual (e.g., single subject) and time series experimental designs. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 746. Introduction to Behavioral Science. 3 Credits.

This introductory course promotes knowledge and skill in analyzing behavioral problems across a range of societal issues. Special consideration is given to designing interventions, implementing, managing, and supervising applied projects. Topics include the identification and selection of problems and target populations, analysis of problems and goals, designing measurement systems, developing interventions, and disseminating products from applied behavioral research.

ABSC 755. Evaluating and Disseminating Scientific Material I. 1-3 Credits.

Intensive training in the evaluation and production of scientific critiques and reviews of current issues in the analysis of behavior, as disseminated through the media. May be repeated. Prerequisite: Instructor permission.

ABSC 770. Within Subjects Research Methodology and Direct Observation. 3 Credits.

A graduate level introduction to the logic of experimentation, direct observation strategies, and research conducted using individual (e.g., single subject) and time series experimental designs. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 771. Introduction to Applied Behavioral Science. 3 Credits.

This introductory course promotes knowledge and skill in analyzing behavioral problems across a range of societal issues. Special consideration is given to designing interventions, implementing, managing, and supervising applied projects. Topics include the identification and selection of problems and target populations, analysis of problems and goals, designing measurement systems, developing interventions, and disseminating products from applied behavioral research. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 772. Conceptual Foundations of Behavior Analysis. 3 Credits.

An advanced Master's seminar on the theoretical, philosophical, and conceptual foundations of behavior analysis. It covers the field's history and purview (e.g., natural science, historical science, applied science); its philosophy of science (e.g., empiricism, pragmatism); the nature of its science (e.g., inductive, experimental, field-theoretic); the products
of its science (e.g., principles, concepts, theories); its ethical systems (e.g., humanism, naturalized ethics, personal responsibility); its relations with other fields (e.g., biology, psychology, anthropology); its contrasts with folk philosophy and folk psychology (e.g., mentalism, free will); and its comparisons with like-minded philosophies, psychologies, and cultural practices (e.g., embodied cognition, secular humanism, communitarianism.) Prerequisite: ABSC 854 or instructor permission.

**ABSC 773. Applied Behavior Analysis in Complex Organizations.** 3 Credits.
An examination of the theory, principles, and methods of behavior analysis and their applications to problems of human behavior in complex organizations such as businesses, industries, human service organizations, and governments. Prerequisite: Graduate standing or instructor permission.

**ABSC 787. Multidisciplinary Perspectives on Gerontology and Aging.** 3 Credits.
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as AMS 767, COMS 787, PSYC 787, and SOC 767.)

**ABSC 788. Designing Early Education Environments.** 3 Credits.
This course reviews empirically-supported strategies for designing effective and socially valid care and education environments for young children with and without disabilities. Topics will include: early educational theory, individualized curricula and goal selection strategies, various instructional typologies (e.g., direct instruction, embedded teaching), specific teaching tactics (e.g., prompting, time delay, differential reinforcement), preventive and assessment-based behavioral management strategies, current best practice recommendations for design of the social and physical environment, and methods for assessing children's, caregivers', and teachers' programmatic preferences. Prerequisite: ABSC 796.

**ABSC 797. Proseminar in Child Language.** 2 Credits.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as CLDP 799, LING 799, PSYC 799 and SPLH 799.)

**ABSC 799. Experimental Analysis of Behavior.** 3 Credits.
This course provides an in-depth description of the basic principles of operant and respondent conditioning in the context of basic non-human and human subjects research. Students will learn various theoretical approaches to understanding effects of reinforcement and punishment. Special attention will be provided to the role of verbal processes in the learning of verbally competent individuals. Students will gain substantive experience with identifying laboratory derived principles present in the literature that are relevant to application through assigned projects.

**ABSC 800. Conceptual Foundations of Applied Behavioral Science.** 3 Credits.
A master's-level graduate seminar on the field's conceptual foundations, with special emphasis on behavior analysis and its application - applied behavior analysis. The course addresses the field's history, philosophy of science, and disciplinary purview; its advanced behavioral principles and processes; its analyses of various content domains in the behavioral, social, and cognitive sciences (e.g., emotion, language, cognition, culture); and its relation to other disciplines (e.g., biology, psychology, anthropology). It also considers professional issues in, for example, the ethical conduct of research and practice. Prerequisite: ABSC 799.

**ABSC 801. Design and Analysis of Community Development Methods.** 1-6 Credits.
An examination of principles and practices of community development and evaluation of methods used to promote community improvement. May be repeated if the content differs. Prerequisite: Instructor permission.

**ABSC 802. Behavior Analysis in Developmental Disabilities.** 3 Credits.
A graduate seminar that includes an overview of the behavioral characteristics of various developmental disabilities and examination of empirically-supported behavioral approaches to the study and treatment of developmental disabilities. Topics will include classification and etiology, motivation, methods for developing appropriate skills, assessment and treatment of behavior disorders, staff training, and legal and ethical issues related to treatment. Prerequisite: Instructor permission.

**ABSC 803. Fundamentals of Psychological Assessment and Intervention with Children.** 3 Credits.
Lecture and supervised experience covering the theoretical and empirical literature on assessment and intervention methods for children, adolescents, and families. Students will learn and demonstrate evidence-based clinical interviewing skills, behavioral observation techniques, risk assessment techniques, therapeutic communication approaches, strategies for providing assessment feedback to families, and ethical principles related to the provision of assessment and psychotherapy (including client file and resource management.) The course requires interaction with clinical populations and communication with referral sources. (Same as PSYC 803.) Prerequisite: Graduate student in clinical child psychology program.

**ABSC 804. Research in Community Health Promotion.** 1-6 Credits.
Supervised, original investigations of problems relevant to community health, such as the prevention of substance abuse or promotion of child outcomes. As appropriate, the course is focused on any combination of: literature research, research planning, and preparation conducting research, analyzing data, writing research reports, or preparing oral reports of completed research. Prerequisite: Instructor permission.

**ABSC 805. Functional Behavioral Assessment.** 3 Credits.
The strategies, tactics, and ethics of functional assessment are presented in the larger context of behavioral assessment (e.g., nomothetic and idiographic approaches). Research articles relevant to indirect, descriptive, and experimental functional assessment approaches and assessment-based interventions are carefully reviewed to determine the appropriate conditions for each type of assessment and intervention. Prerequisite: Instructor permission.

**ABSC 806. Functional Behavioral Assessment Practicum.** 1-6 Credits.
This course provides supervised experience in the use of functional behavioral assessment in home, clinic, or educational environments with young children presenting problem behaviors. Prerequisite: ABSC 805 and instructor permission.

**ABSC 807. Design and Evaluation of Community Health Promotion Methods.** 1-6 Credits.
An examination of the methods used to develop and evaluate community health promotion programs. The course addresses topics of interest to participants, such as substance abuse, adolescent pregnancy, or child outcomes. May be repeated for credit if the content differs. Prerequisite: Instructor permission.
ABSC 809. Professional Issues: Clinical Child Psychology. 1 Credit.
Consideration of special problems confronting the child and family oriented scientist-practitioner, and in the development of a professional identity. Topics include critical issues, including ethical, legal, cultural, empirical, and clinical aspects of research and practice. May be repeated. (Same as PSYC 809.) Prerequisite: Graduate standing in clinical child psychology.

ABSC 810. Introduction to Developmental Assessment. 3 Credits.
A course covering the general principles of developmental assessment from birth through adulthood, with special emphasis on the history and nature of assessment instruments and the criteria for acceptance, reliability, and stability of results. Selected assessment techniques for infants, preschool children, elementary school children, adolescents, and adults are reviewed and evaluated for their utility, limitations, and applications. A critical analysis of assessment in general and particular assessment tools is made.

ABSC 811. Achievement and Intellectual Assessment in Clinical Child Psychology. 3 Credits.
Course covers the basic theory, research, administration, and reporting of psychological assessment of development, intelligence, and achievement for children, adolescents, and adults within cultural and developmental contexts. The range of psychological instruments examined includes, for example, WIAT, K-ABC, W-J, S-B, WISC, WAIS, and WPPSI. (Same as PSYC 811.) Prerequisite: Graduate student in clinical child psychology.

ABSC 812. Behavioral and Personality Assessment of Children. 3 Credits.
Lecture, laboratory, field work, and supervision. Theory and applications in the psychological evaluation of children with standardized assessment techniques. The administration, scoring, interpretation, and reporting of behavioral and personality functioning in children. (Same as PSYC 812.) Prerequisite: Graduate standing in clinical child psychology.

ABSC 813. Behavioral Science Research Proseminar. 1-3 Credits.
A master’s level professional seminar in which faculty and students present research proposals; offer formal presentations of completed empirical research, reviews of the literature, and other areas of scholarship; and engage discussion about contemporary empirical, conceptual, and professional issues in applied behavioral science. May be repeated for a total of six credits. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 825. Social Development. 3 Credits.
A lecture and discussion course in social development. It includes such topics as theoretical approaches to the study of social development, as well as the literature on family processes, peer relations, aggression and prosocial behavior, child abuse and neglect, family violence, child care, and the media. (Same as PSYC 825.) Prerequisite: A course in child psychology or development.

ABSC 828. Research in Early Intervention with Children. 3 Credits.
A seminar on current issues in assessment and intervention for young children who are at risk for or who have special needs. Provides foundation for evaluating and understanding research in early intervention. Includes historical, conceptual and legislative underpinnings of early intervention, risk factors affecting development, methodological issues in early intervention research, best practice standards, and applications to social, language, and pre-academic domains.

ABSC 834. Directed Readings in Community Health Promotion. 1-5 Credits.
Supervised readings in topical areas of community health promotion, such as the prevention of substance abuse and promotion of child outcomes. A program of study, conferences, and reports is developed by the instructor and student.

ABSC 840. Theoretical Concepts of Human Development and Child Care Practice. 3 Credits.
Basic introduction to treatment concepts and procedures related to child development and child-care programs. The major goal is to provide a theoretical framework that is effective in dealing with various types of child deviancy. Prerequisite: Graduate standing or instructor permission.

ABSC 841. Ethical, Legal, and Professional Issues in Applied Behavioral Science. 3 Credits.
The course covers ethical and legal issues in (a) the responsible conduct of basic, applied, and intervention research (e.g., informed consent and assent with typical and atypical populations; inclusion of underrepresented groups; bias, fraud, and plagiarism in data collection and reporting; conflict of interest; reporting misconduct; authorship) and (b) professional issues in teaching, research, and service (e.g., written and presented scientific communication; grant preparation; the journal review process; cultural competence; teaching; vita preparation). The course will also include instruction in the preparation of editorial reviews for manuscripts submitted for publication to in peer-reviewed journals, in partial fulfillment of the department’s doctoral requirement for preparing editorial reviews. Prerequisite: Graduate standing in applied behavioral science.

ABSC 846. Practicum in Clinical Child Psychology I. 1-3 Credits.
Introductory practicum experience for the Clinical Child Psychology Program. Orientation to psychological evaluation and treatment of children, adolescents, and their families and initial development of professional self-assessment skills. Students acquire specific clinical competencies through shadowing cases, assisting with interpretation of test of intelligence and academic achievement, conducting behavioral observations in field settings, and performing co-therapy of cases presenting to the KU Child and Family Services Clinic. May be taken in more than one semester. (Same as PSYC 846.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 847. Practicum in Clinical Child Psychology II. 1-3 Credits.
Intermediate practicum experience for the Clinical Child Psychology Program. Development of specific competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire specific clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic. Students develop ability to identify specific treatment goals and select therapeutic interventions that are conceptually congruent with clients’ presenting problems and are based on sound empirical evidence. Students also develop the ability to integrate and synthesize test results, interview material, and behavioral observations into coherent case conceptualizations. May be taken in more than one semester. (Same as PSYC 847.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

ABSC 850. Principles of Behavior Analysis. 3 Credits.
An advanced graduate course on the basic principles of behavior, and related procedures for producing behavioral change, with both human and nonhuman subjects. The principles and procedures are presented as fundamental elements of behavior change. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.
ABSC 851. Ethical, Legal, and Professional Issues in Applied Behavioral Science. 3 Credits.
The course covers ethical and legal issues in (a) the responsible conduct of basic, applied, and intervention research (e.g., informed consent and assent with typical and atypical populations; inclusion of underrepresented groups; bias, fraud, and plagiarism in data collection and reporting; conflict of interest; reporting misconduct; authorship) and (b) professional issues in teaching, research, and service (e.g., written and presented scientific communication; grant preparation; the journal review process; cultural competence; teaching; vita preparation). The course will also include instruction in the preparation of editorial reviews for manuscripts submitted for publication in peer-reviewed journals, in partial fulfillment of the department's doctoral requirement for preparing editorial reviews. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 852. Behavior Analysis in Developmental Disabilities. 3 Credits.
A graduate seminar that includes an overview of the behavioral characteristics of various developmental disabilities and examination of empirically-supported behavioral approaches to the study and treatment of developmental disabilities. Topics will include classification and etiology, motivation, methods for developing appropriate skills, assessment and treatment of behavior disorders, staff training, and legal and ethical issues related to treatment. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 853. Behavioral Assessment. 3 Credits.
The strategies, tactics, and ethics of functional assessment are presented in the larger context of behavioral assessment (e.g., nomothetic and idiographic approaches). Research articles relevant to indirect, descriptive, and experimental functional assessment approaches and assessment-based interventions are carefully reviewed to determine the appropriate conditions for each type of assessment and intervention. Prerequisite: This course is reserved for students in our online program. If there are questions, please contact thecollegeonline@ku.edu.

ABSC 854. Experimental Analysis of Behavior. 3 Credits.
This course provides an in-depth description of the basic principles of operant and respondent conditioning in the context of basic non-human and human subjects research. Students will learn various theoretical approaches to understanding effects of reinforcement and punishment. Special attention will be provided to the role of verbal processes in the learning of verbally competent individuals. Students will gain substantive experience with identifying laboratory derived principles present in the literature that are relevant to application through assigned projects.

ABSC 855. An Interdisciplinary Approach to Intervention with the Handicapped. 3 Credits.
This course surveys knowledge from various disciplines that address developmental disabilities across the life span. Its focus is on designing strategies for individual intervention and treatment programs by an interdisciplinary team. Designed for students in social work, speech pathology, psychology, nutrition, audiology, special education, physical therapy, nursing, child development, behavior analysis, and related fields. Prerequisite: A basic course in child development or instructor permission.

ABSC 857. Biological Bases of Behavior. 3 Credits.
This course will examine research and theory on the biological bases of normal and abnormal behavior, including central and peripheral nervous system mechanisms of behavioral and psychological functions, and the roles of genetic and epigenetic processes in regulating behavior. The course covers biological systems that support sensory processing, motor behavior, emotion, cognition and social behavior through analysis of animal model, healthy development and patient studies. The diverse methods used to assess these biological systems also will be surveyed, including behavioral testing of animal models, neuropsychological assessment, biosample analyses, and in vivo imaging approaches. Research on altered behavioral and psychological processes will be integrated with the aim of better understanding the potential of linking knowledge of the biological mechanisms of psychiatric disorders to current clinical practice, as well as critical limitations of current methods and knowledge. Prerequisite: Instructor permission.

ABSC 859. Principles of Behavior Analysis. 3 Credits.
An advanced graduate course on the basic principles of behavior, and related procedures for producing behavioral change, with both human and nonhuman subjects. The principles and procedures are presented as fundamental elements of behavior change.

ABSC 862. Behavioral Community Approaches to Addressing Social Issues. 3 Credits.
A seminar that provides an overview of the history and origin of behavioral community approaches to address social issues through the integration of applied behavior analysis with other disciplines including community psychology, prevention science, and public health. A multidisciplinary perspective is presented that provides a review of empirically-based behavioral interventions applied in community settings. The course is offered at the 500 and 800 levels with additional assignments required at the 800-level. Not open to students with credit in ABSC 562. Prerequisite: Graduate standing or instructor permission.

ABSC 865. Applied Behavior Analysis in Complex Organizations. 3 Credits.
An examination of the theory, principles, and methods of behavior analysis and their applications to problems of human behavior in complex organizations such as businesses, industries, human service organizations, and governments. Prerequisite: Graduate standing or instructor permission.

ABSC 870. Practicum I in Behavioral Psychology. 1-6 Credits.
Instruction and supervised laboratory or field work for master's students. Practica are offered by different instructors on different topics; may be repeated for credit if the content differs. Topics and instructors are announced in the Schedule of Classes. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 871. Practicum I in Behavior Analysis: _____. 1-6 Credits.
Instruction and supervised laboratory or field work for master's students. Practica are offered by different faculty members on different topics; may be repeated for credit if the content differs. Topics and instructors are announced in the Schedule of Classes. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 872. Practicum I in: _____. 1-6 Credits.
Instruction and supervised laboratory or field work for master's students. Practica are offered by different faculty members on different topics; may be repeated for credit if the content is different. Topics and instructors are announced in the Schedule of Classes. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 873. Practicum in Educational Psychological/Rehabilitative Services: _____. 3-6 Credits.
This course is for students who wish to complete practicum experiences in services related to persons with retardation, autism, or physical disabilities in programs in various settings, such as the Ann Sullivan Center in Lima, Peru and the Algeria School in Paraguay. The course is designed to give interested students opportunities to work with professionals in these programs on a semester or summer basis. The course consists of participation in professional activities associated with the practicum
program and a report of these activities to the instructor. Prerequisite: Instructor permission.

ABSC 875. Practicum in Community Health Promotion. 1-6 Credits.

A practicum course designed to provide students with knowledge, background, and practical experience in the implementation of community health promotion projects and their evaluation. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

ABSC 876. Practicum in Community Development. 1-6 Credits.

A practicum course designed to provide students with knowledge, background, and practical experience in the implementation of community improvement projects and their evaluation. May be repeated for credit if the content differs. Prerequisite: Instructor permission.

ABSC 880. Early Childhood Practicum for Allied Professionals. 1-6 Credits.

Professionals in fields such as journalism, social welfare, and psychology may have career interests that include work with or on behalf of young children. This practicum provides students with individualized opportunities to work with young children in a group setting in order to extend their professional skills. Prerequisite: Instructor permission.

ABSC 881. Early Childhood Care and Intervention Practicum I. 1-6 Credits.

A course covering the specification of learning goals and the implementation and evaluation of curriculum design management of groups of young children. May be repeated for no more than a total of six credit hours. Prerequisite: Instructor permission.

ABSC 882. Early Childhood Care and Intervention Practicum II. 1-6 Credits.

A course to assess and teach skills in diagnosis and evaluation of particular problems in the developmental process of young children (1-5 years of age), and to design and implement interventions. May be repeated for no more than a total of six credit hours. Prerequisite: ABSC 791 and instructor permission.

ABSC 883. Early Childhood Administration Practicum. 1-6 Credits.

Experiences in understanding and developing parent satisfaction with care arrangements for their child(ren), providing services to personnel responsible for care and development of young children, and/or maximizing use of available services for young children on their behalf. May be repeated for no more than a total of six credit hours. Prerequisite: ABSC 791 and instructor permission.

ABSC 884. Early Childhood Early Intervention Practicum. 1-6 Credits.

Laboratory teaching in an early childhood classroom that includes children who are developmentally delayed, demonstrate behavioral or learning difficulties, or have other developmental disabilities. Experience includes individualized programming for children with special needs, as well as group management and group curriculum planning. May be repeated for no more than a total of six credit hours. Prerequisite: ABSC 791 and instructor permission.

ABSC 885. Early Childhood Teacher Training Practicum. 1-6 Credits.

Experience in supervising staff who work in programs for young children. Supervision includes orienting, monitoring, and evaluating staff performance; opportunities for interaction with other professionals; experience in facilitating staff communication; and consulting on research projects. Prerequisite: ABSC 791 and instructor permission.

ABSC 886. Developmental Assessment Practicum: ____. 1-6 Credits.

This course provides direct experience in the developmental assessment of a selected age group, such as infants, preschool and elementary children, adolescents, or adults. It may be repeated providing the age group specification is not repeated. Prerequisite: ABSC 810 or an equivalent course.

ABSC 887. Clinical Practicum in Pediatric Psychology. 1-6 Credits.

Supervised experience with pediatric patients referred for behavior problems, including, for example, temper tantrums, enuresis, encopresis, and hyperactivity. Also includes evaluation and treatment of children with commonly encountered behavior problems. In addition, students observe pediatric staff performing appropriate physical exams and observe the interaction between the medical staff and the pediatric psychologist. Prerequisite: ABSC 705 and instructor permission.

ABSC 888. Diversity Issues in Clinical Psychology. 3 Credits.

Review of individual differences pertaining to culture, ethnicity, race, gender, sexual orientation, age, etc., as these have an impact upon theory, research, assessment, and treatment issues in clinical psychology. (Same as PSYC 888.) Prerequisite: Graduate status in clinical psychology, or consent of instructor.

ABSC 890. Seminar in: ______. 1-3 Credits.

A seminar for master's level students. It examines basic and applied research literatures in specialized fields of applied behavioral science. May be repeated for credit if the content differs. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 891. Research in: ______. 1-6 Credits.

Supervised research investigations in basic or applied behavioral science for master's students. The course introduces observational measurement, research methods and designs, and the conduct of research in the behavioral sciences. May be repeated for credit if the content is different. Prerequisite: Graduate standing or instructor permission.

ABSC 892. Readings in: ______. 1-3 Credits.

An individual, supervised study of recent research and scholarship for master's students. The course emphasizes current scholarship in selected areas of basic and applied behavioral science and its conceptual foundations. Designed for students whose needs cannot be met in other courses. May be repeated for credit if the content differs. Prerequisite: Graduate standing or instructor permission.

ABSC 893. Special Topics in: ______. 1-3 Credits.

A research and readings course for master's students. It allows them to concentrate their studies on selected basic and applied problems in behavioral science and carry out independent research. May be repeated for credit if the content differs. Prerequisite: Graduate standing or instructor permission.

ABSC 894. Study Abroad Topics in: ______. 1-3 Credits.

A course designed to enhance international experience in topic areas related to behavioral science for master's students. May be repeated for credit if the content differs. Prerequisite: Graduate standing or instructor permission.

ABSC 897. Master's Thesis in Clinical Child Psychology. 1-10 Credits.

Supervised research experience completing thesis leading to master's degree. (Same as PSYC 897.)

Supervised research experience for the thesis leading to a master's degree in applied behavioral science. May be repeated. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

**ABSC 901. Analysis of Everyday Human Behavior. 3 Credits.**
An advanced graduate seminar on the analysis of everyday human behavior, grounded in behavior-analytic principles, concepts, and theory. It covers the processes and products of, for example, biological and behavioral development; sensation and perception; motivation and emotion; personality and social behavior; language, cognition, and creativity; attitudes and beliefs, consciousness and unconsciousness, and purpose, will, and values. Prerequisite: ABSC 800 or instructor permission.

**ABSC 905. Psychopathology in Children. 3 Credits.**
Diagnosis and treatment of psychological problems in childhood and adolescence. Preference given to graduate students in child clinical psychology, school psychology, and counseling psychology. (Same as PSYC 905.) Prerequisite: Fifteen hours of graduate credit in psychology or consent of instructor.

**ABSC 913. Behavioral Science Research Proseminar. 1-3 Credits.**
A doctoral level professional seminar in which faculty and students present research proposals; offer formal presentations of completed empirical research, reviews of the literature, and other areas of scholarship; and engage discussion about contemporary empirical, conceptual, and professional issues in applied behavioral science. May be repeated for a total of eight credits. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

**ABSC 931. The Analysis of Verbal Behavior. 3 Credits.**
An advanced graduate seminar on verbal behavior, grounded in behavior-analytic principles, concepts, and theory. Although focused on the verbal behavior of the proficient speaker, it also covers verbal behavior's evolutionary and biological bases, the development and structure of verbal behavior, the training and remediation of verbal behavior, and critiques and rebuttals to the analysis (e.g., Chomsky's.) Prerequisite: ABSC 800, advanced coursework in psycholinguistics or linguistics, or instructor permission.

**ABSC 934. Directed Readings in Clinical Child Psychology. 3-5 Credits.**
Designed to meet the needs of advanced students whose study in clinical child psychology cannot be met with present courses or for whom advanced work is desired in a specialized area of study. Prerequisite: Graduate standing in clinical child psychology and instructor permission.

**ABSC 936. Quantitative Analysis of Behavior. 3 Credits.**
Advanced experimental course (doctoral-level) that demonstrates the operations of principles of behavior, and the quantitative models that describe them, in the context of basic research. Specific review of the methods to obtain the data necessary to permit a quantitative analysis of behavior. along with the quantitative analyses themselves, will be discussed. Students will learn the advantages and disadvantages of quantitative analyses in the behavioral sciences, along with a behavioral perspective on quantitative models of behavior. Students will obtain hands-on experience selecting data for a quantitative analysis, reviewing whether the data and proposed model meet the requisite assumptions of EAB research on quantitative models, and analyzing behavioral data using quantitative models. Prerequisite: ABSC 799.

**ABSC 941. Teaching and Conference. 3-6 Credits.**
This course is used by graduate students fulfilling the doctoral program teaching requirement. Students assist in class preparation and organization, teaching, grading, and office hours or serve as discussion section leaders or laboratory course supervisors. They meet regularly with the faculty members they are assisting. Students enroll for 3 hours for the equivalent of a 25% assistantship and 6 hours for a 50% equivalent. Prerequisite: Instructor permission.

**ABSC 943. Advanced Practicum in Clinical Child Psychology III. 1-3 Credits.**
Development of advanced competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., formal case presentation), and modeling of clinical competencies for junior students. Students will demonstrate the ability to implement empirically derived therapeutic interventions in consideration of individual differences, cultural values, and individual preferences. Students in external practicum sites will demonstrate an understanding of evidence-based models of consultation and provision of consultation to care providers in professional contexts. May be taken in more than one semester. (Same as PSYC 943.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

**ABSC 944. Advanced Practicum in Clinical Child Psychology IV. 1-3 Credits.**
Demonstration of advanced competencies in assessment, intervention, and consultation with children, adolescents, and their families through didactics, field experience, and supervision in the semester(s) prior to required clinical internship. Students demonstrate advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., integrated case presentation), and modeling of clinical competencies for junior students. Course requirements include the development of portfolios for demonstration of clinical competencies and application to clinical internships. May be taken in more than one semester. (Same as PSYC 944.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

**ABSC 947. Advanced Practicum in Clinical Child Psychology V. 1-5 Credits.**
Specialized practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies related to supervision and consultation in clinical psychology. With faculty supervision, students will develop and demonstrate the ability to provide effective supervision to less advanced students in the program in selected cases appropriate to the service setting. Further development of advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum, and modeling of clinical competencies for junior students. May be taken in more than one semester. (Same as PSYC 947.) Prerequisite: Graduate standing in clinical child psychology and instructor permission.

**ABSC 961. Advanced Seminar in Applied Behavior Analysis: ______. 3 Credits.**
An advanced seminar examining the literature and research methods in specialized areas of applied behavior analysis (e.g., developmental disabilities, community health, organizational development). May be repeated for credit if the content differs.

**ABSC 963. Clinical Child Psychology Internship. 1 Credits.**
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by qualified clinical child psychology faculty and field staff clinicians. Required of all clinical child psychology program students. An intensive guided experience in application of clinical child psychology theory, methods, and practices. Integrates scientific and clinical aspects of field. (Same as PSYC 963.) Prerequisite: Completion of Ph.D. comprehensive examinations, graduate standing in clinical child psychology, and permission of clinical child psychology faculty.

ABSC 965. Evaluating and Disseminating Scientific Material II. 1-3 Credits.
Intensive training in the evaluation and production of scientific critiques and reviews on current issues in the analysis of behavior, as disseminated through the media. May be repeated. Prerequisite: Instructor permission.

ABSC 970. Practicum II in Behavioral Psychology. 1-6 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 870. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 971. Practicum II in Behavior Analysis: ____. 1-6 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 871. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 972. Practicum II in: _____. 1-6 Credits.
Advanced instruction and supervised laboratory or field work for doctoral students beyond ABSC 872. May be repeated for credit if the content differs. Topic and instructor are announced in the Schedule of Classes. Prerequisite: Graduate standing in applied behavioral science or instructor permission.

ABSC 976. Therapeutic Interventions with Children. 3 Credits.
Clinical approaches to the therapeutic treatment of children with special emphasis on research findings and laboratory (practicum) experience. A survey of relationship therapies, operant strategies, system approaches, parent education and play therapy by the right therapist for a specific child with a particular problem. (Same as PSYC 976.) Prerequisite: Instructor permission.

ABSC 981. History of Behavior Analysis. 3 Credits.
An advanced graduate seminar on the history of behavior analysis from Greek naturalism to the 21st century. It covers the history and philosophy of science and psychology (e.g., evolution vs. revolutions, ontology, epistemology); the long past, short history, and recent origins of behavior analysis in cultural context (e.g., Social Progressivism); historical and conceptual relations between behavior analysis and other systems (e.g., behaviorism, psychoanalysis, phenomenailsm, cognitivism); and historiographic issues and methods (e.g., great person vs. Zeitgeist history, presentism vs. historicism.) Prerequisite: ABSC 800 or instructor permission.

ABSC 989. Methods of Obtaining External Research Funding. 1-3 Credits.
The objective of this course is to demystify this process and prepare participants to submit their first independent research grant application. Participants learn about the characteristics of different funding mechanisms and agencies, the characteristics of successful and unsuccessful application strategies, how to turn an initial research idea into a competitive application, ethical issues that influence each stage of the development and submission process, and the nuts and bolts of grant development and management. Specific activities include critiquing an actual NIH grant application, participating in a mock review panel, and developing an actual grant application.

ABSC 990. Advanced Seminar in: _____. 3 Credits.
An advanced seminar for doctoral students. It examines basic and applied research literatures in specialized fields of applied behavioral science. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 991. Advanced Research in: ______. 1-9 Credits.
Advanced, supervised research in basic or applied behavioral science for doctoral students. The course may focus on any combination of a literature review, research planning and preparation, conducting research, analyzing data, writing research reports, and preparing oral reports of completed research. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 992. Advanced Readings in: ______. 1-6 Credits.
An advanced individual, supervised study of recent research and scholarship for doctoral students. The course emphasizes current scholarship in selected areas of basic and applied behavioral science and its conceptual foundations. Designed for students whose needs cannot be met in other courses. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 993. Advanced Special Topics in: ______. 1-3 Credits.
An advanced research and readings course for doctoral students. It allows them to concentrate their studies on selected basic and applied problems in behavioral science and carry out independent research. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 994. Advanced Study Abroad Topics in: ______. 1-6 Credits.
An advanced course designed to enhance international experience in topic areas related to behavioral science for doctoral level students. May be repeated for credit if the content differs. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

ABSC 998. Doctoral Dissertation in Clinical Child Psychology. 1-10 Credits.
Research experience making original contribution to literature in clinical child psychology. (Same as PSYC 998.)

ABSC 999. Doctoral Dissertation in Behavioral Psychology. 1-9 Credits.
Advanced supervised research that makes an original, empirical contribution to the literature in applied behavioral science leading to a doctoral degree in behavioral psychology. May be repeated. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing in behavioral psychology or instructor permission.

Bachelor of Arts and Bachelor of General Studies in Applied Behavioral Science

Career Opportunities

The department prepares students for careers in their specialties, as well as for graduate school and professional training. Careers include work in such fields and settings as early childhood education; early childhood intervention programs; community programs for children, youth, and adults with developmental disabilities; public health and health care;
community-based and nongovernmental organizations; and behavioral consulting, management, human services, and business. Students enter graduate and professional schools in such areas as applied behavior analysis, applied developmental psychology, behavior analysis, clinical and counseling psychology, community development, gerontology, law, medicine, organizational behavior management, public health, social welfare, and special education.

**Preparation and Advising**

To graduate with the major in 4 years, prospective majors should enroll in Introduction to Applied Behavioral Science (ABSC 100 or ABSC 101) and Principles and Procedures of Behavior Modification and Therapy (ABSC 304) during the first 2 years. The content of these 2 courses will give students a basic understanding of the field of Applied Behavioral Science and help students decide whether they would like to apply to be admitted to the major. By the end of the second year, they should have consulted with a faculty advisor about degree requirements, specialty areas, and career opportunities. By the end of the third year, they should have taken the requisite courses for the fourth-year practicum. This information may also be found in the department’s Undergraduate Handbook. By the beginning of the junior year, majors should complete the College’s Major Declaration form. They should list either ABSC-BA or ABSCA-BGS as the major code for a Bachelor of Arts or Bachelor of General Studies degree, respectively.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the credittransfer.ku.edu/ website.

**Requirements for the B.A. or B.G.S. Major**

A student must complete ABSC 100 or ABSC 101 with a C or better to enroll in ABSC 304. A student must complete ABSC 304 with a C or better to enroll in ABSC 306 or ABSC 509.

All majors must complete the introductory and core course work as well choose from 1 of the following concentration area options.

**Concentration Area Electives**

Satisfied by completing 11 hours of any junior/senior-level courses approved by the advisor. The following are recommended:

- ABSC 302 Behavioral Assessment 5
- ABSC 350 The Behavioral Treatment of Children with Autism 5
- ABSC 444 Curriculum Development for Young Children 5
- ABSC 486 Issues in Parenting 5
- ABSC 535 Developmental Psychopathology 5
- ABSC 871 Practicum I in Behavior Analysis: _____ 5

**Child Life Concentration**

This option is for students interested in pursuing careers as Child Life Specialists (CLS)—professionals who address the developmental impact of illness, injury, and major life transitions on children and families. Students who choose this option are required to take a two semester-long practicum that provides students with direct experiences working with Certified Child Life Specialists in hospital settings.

behavioral analysis, special education, and psychology. Many students also pursue graduate studies in applied and vocational and pre-vocational teaching programs for people with disabilities. Graduates of this concentration are excellent candidates for positions in residential treatment programs, community human service agencies, or day treatment program for adults with developmental disabilities.

### Adults with Disabilities Concentration

This option is for students interested in working with people with developmental disabilities and in the development of supportive teaching programs in the community for people with developmental disabilities. The courses teach observing and defining behavior, increasing appropriate and decreasing inappropriate behavior, developing relationships, counseling, legal and ethical issues, and experimental design. The course sequence culminates in practical work in a community-based residential service agency or day treatment program for adults with developmental disabilities.

Graduates of this concentration are excellent candidates for positions in residential treatment programs, community human service agencies, and vocational and pre-vocational teaching programs for people with disabilities. Many students also pursue graduate studies in applied behavioral analysis, special education, and psychology.

### Practicum

This practicum requires a two-semester commitment (three credit hours each semester); three of which must be ABSC 683. Space may be limited and enrollment may depend on the date of indication of interest.

- ABSC 683 Practicum in Child Life Specialty
- ABSC 675 Practicum in Infant-Toddler Care and Early Intervention I

### Concentration Area Electives

Satisfied by completing 6 hours of any junior/senior-level courses, except those already required as introductory, core knowledge, and required concentration area courses, including ABSC 100, ABSC 304, ABSC 308, ABSC 350. Additionally, at least 9 hours of coursework must be at the junior/senior level. Practicum courses (ABSC 675-ABSC 699) do not count toward concentration area elective hours. Please see concentration area advisors for more specific recommendations.

### Community Health & Development Concentration

This option is for students interested in building healthy and well-functioning communities. They may do so through public service (e.g., AmeriCorps, Peace Corps) or in a career following graduate study in an appropriate field such as public health, public policy, law, rehabilitation, psychology, social welfare, or medicine. It provides opportunities to better understand and make a difference with important community problems and goals (e.g., substance abuse, violence, education, child and youth development, independent living of people with disabilities, well-being of older adults).

Course work and practicum experiences focus on (a) intervention methods used to address community problems and goals (e.g., strategic planning, intervention, advocacy) and (b) research methods used to study the effects of community initiatives for health and development (e.g., community assessment, evaluation). The course sequence culminates in a 2-semester practicum arranged with faculty members and representatives of community organizations or governmental agencies (e.g., in public health, child advocacy, independent living, youth development, community development).

### Concentration Area Electives

Satisfied by completing any junior/senior-level ABSC courses, except those already required as introductory, core knowledge, and required concentration courses (including ABSC 304, ABSC 308, ABSC 310/311, and ABSC 509). Additionally, practicum courses (ABSC 675-ABSC 699) do not count as concentration area electives. Please see concentration area advisors for recommendations. (at least 8 hours)

| Practicum
| Two semesters of practicum (ABSC 690/ABSC 691) are required (3 hours in both fall and spring semesters). Note: ABSC 310/ABSC 311 must be taken prior to, or concurrently with, enrollment in the above practicum courses.
| ABSC 690 Practicum in Community Health and Development
| or ABSC 691 Practicum in Community Health and Development, Honors

### Basic Research Concentration

Students pursuing the basic research concentration learn about behavioral processes and research methods, and acquire skills in the experimental analysis of behavior. Students completing this option complete a 2-semester hands-on practicum in which they...
assist in the conduct of research on human or nonhuman behavioral processes. Students are involved in all aspects of the research endeavor, from conceptualization of problems to data collection, analysis, and presentation. Students pursuing this option are required to complete an introductory course in statistics.

### Concentration Area Electives

Satisfied by completing any junior/senior-level ABSC courses, except those already required as introductory and core knowledge courses (ABSC 304, ABSC 308, and ABSC 509). Additionally, practicum courses (ABSC 675-ABSC 699) do not count toward concentration area elective hours. Please see a concentration area advisor for recommendations.

<td></td>
</tr>
</tbody>
</table>

### Practicum

Two semesters of practicum (ABSC 692) are required. Practicum courses are offered for 3-6 credit hours during the fall and spring semesters, and 3 hours during the summer session. However, no more than 6 hours total apply to the major. The prerequisite is the permission of the supervisor, as space permits.

- ABSC 692 Practicum in Basic Research 3

### Conceptual Foundations Concentration

Students pursuing the conceptual foundations concentration learn about the field’s theoretical, philosophical, conceptual, and historical foundations and acquire skills in critical thinking. Students electing this option are required to complete ABSC 509. Students who complete this option complete a 2-semester practicum in which they read and research a relevant literature and write a paper that advances their understanding of the field.

### Required Concentration Area Course

- ABSC 509 Contemporary Behavioral Science: Historical, Conceptual, and Comparative Foundations 3

### Concentration Area Electives

Satisfied by completing any junior/senior-level ABSC courses, except those already required as introductory and core knowledge courses (including ABSC 304, ABSC 308, ABSC 470, and ABSC 509). Additionally, practicum courses (ABSC 675-ABSC 699) do not count toward concentration area elective hours. Please see concentration area advisor for recommendations.

#### Practicum

- ABSC 682 Organizational Behavior Management Practicum 6-10

This practicum requires a 2-semester commitment (enrollment in ABSC 682), beginning in the fall semester and continuing in the spring semester. Space may be limited and enrollment may depend on the date of indication of interest. No more than 6 hours of practicum apply to the major.

### Applied Behavioral Science Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

#### Major Hours

Satisfied by a minimum of 33 hours of major courses.

#### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior (300+) Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior (300+) Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Double Majors

The department encourages double majors and minors in other departments. Double majors are especially appropriate for students planning to attend graduate school or enter professional programs (e.g., psychology, law, medicine). Any of the College’s other majors may be appropriate, but among the more common are psychology, human biology, sociology, political science, and speech-language-hearing.
Sample 4-year plans for the BA degree in Applied Behavioral Science with the following concentrations can be found here: Adults with Disabilities (p. 1127), Basic Research (p. 1128), Child Life (p. 1129), Community Health & Development (p. 1130), Conceptual Foundations (p. 1131), Early Childhood Autism Intervention (p. 1132), Early Childhood Education & Intervention (p. 1133), Early Childhood Research (p. 1134), Organizational Behavior Management & Research Practice (p. 1135), or by using the left-side navigation.

Sample 4-year plans for the BGS degree in Applied Behavioral Science can be found here: Adults with Disabilities (p. 1136), Basic Research (p. 1137), Child Life (p. 1138), Community Health & Development (p. 1139), Conceptual Foundations (p. 1143), Early Childhood Autism Intervention (p. 1140), Early Childhood Education & Intervention (p. 1141), Early Childhood Research (p. 1142), Organizational Behavior Management & Research Practice (p. 1143), or by using the left-side navigation.

**Departmental Honors**

The department’s honors program is suited for undergraduates planning to attend graduate school. Students are expected to enroll in two semesters of ABSC 599 for a total of 4 to 8 credit hours. The course combines small-group discussions on advanced topics in applied behavioral science, along with honors thesis supervision of a project of the student’s design. Honors students are invited to attend the ABS graduate proseminar or department colloquium series. Students should meet with the department’s honors advisor by the middle of the junior year to identify a faculty member with whom to complete the project. Prerequisite: Completion of at least 60 hours in the College with a grade-point average of 3.5 in the department.

**Study Abroad**

The department offers students opportunities to obtain international experience in a program offered jointly with the Office of Study Abroad (http://www.studyabroad.ku.edu/) (ABSC 279) and research experience with faculty members who teach research courses or a research practicum:

<table>

behavioral science with concentration in basic research

Below is a sample 4-year plan for students pursuing the BA in Applied Behavioral Science with a concentration in Basic Research. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
Goal 4.2 Global Awareness 3 Second Area of Study/ Elective/Degree/Junior-Senior Hours 3
Second Area of Study/ Elective/Degree/Junior-Senior Hours 5
Second Area of Study/ Elective/Degree/Junior-Senior Hours 5
Second Area of Study/ Elective/Degree/Junior-Senior Hours 5

Total Hours 120

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3 Satisfied by completing any junior/senior-level ABSC courses, except those already required as introductory and core knowledge courses (ABSC 304 (http://catalog.ku.edu/search/?P=ABSC%20304), ABSC 308 (http://catalog.ku.edu/search/?P=ABSC%20308), ABSC 509 (http://catalog.ku.edu/search/?P=ABSC%20509)). Additionally, practicum courses (ABSC 675 (http://catalog.ku.edu/search/?P=ABSC%20675)-ABSC 699 (http://catalog.ku.edu/search/?P=ABSC%20699)) do not count toward specialty area elective hours. Please see a specialty area advisor for recommendations.
4 Two semesters of practicum (ABSC 692 (http://catalog.ku.edu/search/?P=ABSC%20692)) are required. Practicum courses are offered for 3-6 credit hours during the fall and spring semesters, and 3 hours during the summer session. However, no more than 6 hours total apply to the major. The prerequisite is the permission of the supervisor, as space permits.
5 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6 For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Total Hours 120-126**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Satisfied by completing any junior/senior-level ABSC courses, except those already required as introductory and core knowledge courses (including ABSC 304, ABSC 308, ABSC 509, ABSC 800). Additionally, practicum courses (ABSC 675-ABSC 699) do not count toward specialty area elective hours. Please see a specialty area advisor for more specific recommendations. (at least 8 hours)
4. ABSC 693 Practicum in Historical and Conceptual Foundations (Practicum courses are offered for 3-6 credit hours during the fall and spring semesters, and 3 hours during the summer session.)
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

### Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BA in Applied Behavioral Science with concentration in Early Childhood Autism Intervention**

Below is a sample 4-year plan for students pursuing the BA in Applied Behavioral Science with a concentration in Early Childhood Autism Intervention. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Second Area of Study/ Elective/Degree/Junior-Senior Hours1 & 3 Second Area of Study/ Elective/Degree/Junior-Senior Hours1 & 3  
Second Area of Study/ Elective/Degree/Junior-Senior Hours1 & 3  

Total Hours 120  
1 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.  
2 11 hours of ABSC Specialty Area elective courses are required.  
3 6-10 hours of ABSC 685 Practicum is required, taken across two semesters, for a minimum of 6 credit hours. ABSC 685 is offered for 5 credit hours in Spring and Fall semesters, while it is offered for 3 hours in Summer.

Please note:  
All students in the College of Liberal Arts & Sciences are required to complete 120 hours of which 45 hours must be at the Jr/Sr (300+) level.  
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BGS in Applied Behavioral Science with concentration in Basic Research

Below is a sample 4-year plan for students pursuing the BGS in Applied Behavioral Science with a concentration in Basic Research. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Total Hours 120-122

1 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

2 6 hours of ABSC Specialty Area elective courses are required

3 6 hours of practicum courses are required taken across two semesters.

These hours must include three hours (minimum) of ABSC 683; the remaining three hours may include ABSC 683, ABSC 675, and ABSC 677.

Please note:

All students in the College of Liberal Arts & Sciences are required to complete 120 hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Students who wish to sit for the Child Life Specialty Certification Exam administered by the Association for Child Life Professionals (ACLP) are encouraged to consult the ACLP’s eligibility requirements (https://www.childlife.org/certification/becoming-certified/requirements-after-2019/) webpage, and plan their electives to meet these requirements. Students may elect to take other courses (instead of those required by ACLP) to complete the concentration/major. However, doing so may render the student ineligible to sit for the Certification Exam. In addition, the ACLP requires a 600-hour internship supervised by a Certified Child Life Specialist. The student must arrange for this internship outside of the degree requirements.

**Total Hours 120-124**

1. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

2. 11 hours of ABSC Specialty Area elective courses at the 300+ level are required. Visit the degree requirements tab for a list of approved courses.

3. Two semesters of ABSC 679 practicum are required. For the second practicum, students could also take ABSC 675, ABSC 677, or ABSC 680 with special permission. The courses are offered for 3-5 credit hours during the fall and spring semesters, and for 3 hours during the summer term.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
### BGS in Applied Behavioral Science with concentration in Conceptual Foundations

Below is a sample 4-year plan for students pursuing the BGS in Applied Behavioral Science with a concentration in Conceptual Foundations. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

## Minor in Applied Behavioral Science

### Why study applied behavioral science?

The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention.

### Requirements for the Minor

Students selecting a minor in Applied Behavioral Science are required to complete ABSC 100 and at least 15 credit hours of coursework in ABS, 12 of which must be at the junior/senior level (courses numbered 300 or above). No more than 3 credit hours in practicum courses and no more than 3 credit hours in research, special topics, and study abroad courses may count toward the general ABS minor.

We recommend that students who are interested in an ABS minor see an ABS advisor and consider completing a course sequence that focus on one of the following specialty areas:

- Early Childhood Education and Intervention
- Early Childhood Autism Intervention
- Early Childhood Research
- Youth Development and Juvenile Justice
- Adults with Disabilities
- Community Health and Development
- Basic Research in Behavioral Science
- Organizational Behavior Management Research

Applied Behavioral Science Minor Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the Minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Master of Arts in Applied Behavioral Science

The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention. The department’s master’s program in applied behavioral science satisfies coursework requirements for Board Certification in Behavior Analysis and, in most states, licensure as a behavior analyst.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Admission to the M.A. Program

For admission in the fall semester, please view the application deadline and all required application materials on the Graduate Admission (https://absc.ku.edu/graduate-admission/) page of our departmental website (https://absc.ku.edu/). Students may be admitted for the spring semester, but there is no filing deadline.

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to graduate status in the program, a student must hold a bachelor’s degree. Non-native speakers of English must meet English proficiency requirements. (https://gradapply.ku.edu/english-requirements/)

For admission with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department’s application materials is a list of department faculty members. Please review the faculty members (http://absc.ku.edu/faculty/) and descriptions of their research, scholarly, and professional interests on the department's website. Applicants should select any faculty members within the application whose research interests match their own. These faculty members review the applicant’s materials. An applicant is accepted when one of the faculty members consents to admit the student. This faculty member becomes the advisor of record.

Admission to the Online M.A. Program

For admission in the fall semester, please view the application deadline and all required application materials on the Graduate Admission (https://absc.ku.edu/graduate-admission/) page of our departmental website (https://absc.ku.edu/). Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to graduate status in the program, a student must hold a bachelor’s degree.

For admission with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department’s application materials is a list of department faculty members. Please review the faculty members (http://absc.ku.edu/faculty/) and descriptions of their research, scholarly, and professional interests on the department's website. Applicants should select any faculty members within the application whose research interests match their own. These faculty members review the applicant’s materials. An applicant is accepted when one of the faculty members consents to admit the student. This faculty member becomes the advisor of record.

A full list of the required application materials can be found on the Graduate Admission (http://absc.ku.edu/graduate-admission/) page of our departmental website (http://absc.ku.edu/). Non-native speakers of English must meet English proficiency requirements. (https://gradapply.ku.edu/english-requirements/)

M.A. in Applied Behavioral Science

Degree Requirements

The master’s program trains highly competent scientist-practitioners in applied behavioral science. It requires course work on the basic principles and conceptual foundations of behavioral science and its research methods but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

The master’s program follows a junior-colleague model. Students work closely with their advisors and join them in many aspects of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with one advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor’s interests change, students are free to change advisors.

The M.A. degree requires 30 credit hours: 18 hours in an practicum, and research and elective courses. Students also must conduct, write up, and orally defend an empirically based thesis. The following 6 courses are required:

1. Ethical, Legal, and Professional Issues (3). Instruction in ethical principles in the conduct of research (e.g., informed consent, data analysis), legal issues in professional conduct (e.g., plagiarism, copyright), and professional skills (e.g., journal reviewing, professional communication). ABSC 841
2. Principles of Behavior I (3). The science of behavior (e.g., observation, experimentation), laboratory methods, basic behavioral principles (e.g., reinforcement, stimulus control), and their applications (e.g., early childhood, disabilities). ABSC 861
3. Research Methods I (3). Strategies and tactics of scientific research (e.g., objectivity, empiricism), the logic of experimentation (e.g., validity, reliability), measurement and direct observation, and experimental designs for single-subject and time-series analyses. ABSC 735
4. Conceptual Foundations I (3). The history and philosophy of behavioral science, contemporary advances in basic research for application, the analysis of everyday behavior (e.g., cognition, emotion), and current issues in the discipline and the profession (e.g., relations between basic and applied research). ABSC 800
5. Applied Behavior Analysis I (3). The characteristics of applied behavioral research (assessment, analysis, intervention, evaluation), intervention research (clinical, community), applied procedures and programs, social validity, and ethical issues. ABSC 746
6. Experimental Analysis of Behavior (3) ABSC 799
7. Research or Intervention Practicum (3). A supervised practicum course in either basic or applied research or behavioral interventions.

This course work also satisfies 6 of the course requirements and the thesis requirement in the doctoral program.

Thesis Defense:

For the M.A. degree, students are required to propose, complete, write up, and orally defend an empirically based Master's thesis. While working on the thesis, students will enroll in ABSC 899 Master's Thesis in Applied Behavioral Science with their faculty advisor. Students must write and defend the thesis in front of a three member faculty thesis committee.

M.A. in Applied Behavioral Science

Degree Requirements

The online master's program trains highly competent scientist-practitioners in applied behavioral science. It requires course work on the basic principles and conceptual foundations of behavioral science and its research methods but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

The online master’s program follows a junior-colleague model. Students work closely with their advisors and join them in many aspects of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with one advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor's interests change, students are free to change advisors.

The online M.A. degree requires a minimum of 30 credit hours: 18 hours in 6 content areas (required courses), 3 hours in a practicum, and research and elective courses. Students also must conduct, write up, and orally defend an empirically based thesis. The following courses are required:

1. ABSC 850 Principles of Behavior Analysis (3). The science of behavior (e.g., observation, experimentation), laboratory methods, basic behavioral principles (e.g., reinforcement, stimulus control), and their applications (e.g., early childhood, disabilities).
2. ABSC 851 Ethical, Legal, and Professional Issues in Applied Behavioral Science (3). Instruction in ethical principles in the conduct of research (e.g., informed consent, data analysis), legal issues in professional conduct (e.g., plagiarism, copyright), and professional skills (e.g., journal reviewing, professional communication).
3. ABSC 854 Experimental Analysis of Behavior (3). The basic principles of operant and respondent conditioning in the context of basic non-human and human subjects research.
4. ABSC 770 Within Subjects Research Methodology and Direct Observation (3). Strategies and tactics of scientific research (e.g., objectivity, empiricism), the logic of experimentation (e.g., validity, reliability), measurement and direct observation, and experimental designs for single-subject and time-series analyses.
5. ABSC 771 Introduction to Applied Behavioral Science (3). The characteristics of applied behavioral research (assessment, analysis, intervention, evaluation), intervention research (clinical, community), applied procedures and programs, social validity, and ethical issues.
6. ABSC 772 Conceptual Foundations of Behavior Analysis (3). The history and philosophy of behavioral science, contemporary advances in basic research for application, the analysis of everyday behavior (e.g., cognition, emotion), and current issues in the discipline and the profession (e.g., relations between basic and applied research).
7. ABSC 871 or ABSC 872 Research or Intervention Practicum (3). A supervised practicum course in either basic or applied research or behavioral interventions.

Thesis Defense:

For the M.A. degree, students are required to propose, complete, write up, and orally defend an empirically based Master's thesis. While working on the thesis, students will enroll in ABSC 899 Master's Thesis in Applied Behavioral Science with their faculty advisor. Students must write and defend the thesis to a three member faculty thesis committee.

Doctor of Philosophy in Behavioral Psychology

The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention. The department’s doctoral program in behavioral psychology satisfies coursework requirements for Board Certification in Behavior Analysis and, in most states, licensure as a behavior analyst. It does not satisfy requirements for licensure in psychology.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Ph.D. Program

For admission in the fall semester, please view the application deadline and all required application materials on the Graduate Admission (https://absc.ku.edu/graduate-admission/) page of our departmental website (https://absc.ku.edu/). Students may be admitted for the spring semester, but there is no filing deadline.

Eligibility criteria for admission to the Ph.D. program follow Graduate Studies’ admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to graduate status in the program, a student must hold a bachelor's degree. Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

For admission with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology,
education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department’s application materials is a list of departmental faculty members. Students should review faculty members (http://abs.ku.edu/faculty/) on the department’s website and descriptions of their research, scholarly, and professional interests. Applicants should select any faculty members whose research interests match their own. These faculty members review the applicants’ materials. An applicant is accepted when one of the faculty members consent to admit the student. This faculty member becomes the advisor of record.

**Ph.D. in Behavioral Psychology Degree Requirements**

The doctoral program trains highly competent researchers in applied behavioral science (e.g., applied behavior analysis, applied psychology). Students are taught to discover and produce, translate and apply, and communicate knowledge in the behavioral sciences for understanding and solving problems of individual and societal importance, both local and global. The curriculum requires a sequence of instruction that integrates courses in the basic principles of behavior, experimental methods and research design, and conceptual foundations, but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to discover and advance empirically based solutions to problems of individual and societal importance, both local and global.

The doctoral program follows a junior-colleague model. Students work closely with their advisors and join them in every aspect of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, preparing editorial reviews of manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with 1 advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor’s interests change, students are free to change advisors.

**Course Requirements**

The doctoral degree program requires students to take 1 course in 10 areas, along with 2 practicum courses. The areas and the practicum courses are:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Research Methods II (Choose 1)**

**Electives**

Any course that provides students the opportunity to develop competence in specialized areas of behavioral investigation. Students should consult their advisors for elective options.

**Research Skill**

The Office of Graduate Studies requires students to have training in responsible scholarship and research skills pertinent to the field of research. This will be met by:

- Satisfactory completion of either ABSC 735 OR ABSC 770
- Satisfactory completion of either ABSC 841 OR ABSC 851

One of the following:

- At least one submission of a first-author manuscript for publication in a peer-reviewed journal, OR
- At least two scholarly presentations at regional, state, or national professional meetings.

- Satisfactory completion of either ABSC 735 OR ABSC 770
- Satisfactory completion of either ABSC 841 OR ABSC 851

One of the following:

- At least one submission of a first-author manuscript for publication in a peer-reviewed journal, OR
- At least two scholarly presentations at regional, state, or national professional meetings.
• The work for these must have been entirely completed at KU
• No more than one may be a poster
• At least one must have been presented by the time of the comprehensive examination; if the other has not yet been presented by the time of the comprehensive examination, it must be accepted for presentation at an upcoming meeting
• At least one must list the student as either first or presenting author

Teaching Requirement
Graduate students receive training in the teaching and supervision of undergraduates. The requirement may be met in 1 of 2 ways. In the first, students serve as a paid half-time teaching assistant for 1 semester or as a quarter-time assistant for 2 semesters, assuming proportionate responsibility for class organization, lecturing, grading, and office hours under a faculty member’s supervision. In the second, students take LA&S 792 or ABSC 941, attend 3 brown bag lectures at the Center for Teaching Excellence, and present a guest lecture to the department. In both cases, students must also write a statement of teaching philosophy and obtain numeric evaluations of their teaching in their guest lectures.

Professional Seminar Requirement
Graduate students are expected to attend pro-seminar sessions when they are scheduled throughout the Fall and Spring semesters. These are usually scheduled for Friday afternoons at 3:30. Pro-seminars are typically presentations given by graduate students (see next paragraph), faculty members, and visiting scholars.

Doctoral students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance.

Editorial Critiques
Students write 3 editorial reviews of published or unpublished journal articles, all of them empirical. The articles cover a range of topics and experimental designs. All 3 are graded pass-fail by the student’s advisor. Students may use editorial reviews from course assignments so long as the instructor and advisor approve doing so.

Comprehensive Examination
Students must complete the comprehensive examination by the end of the third year if entering the PhD program with a completed Master's obtained at another university, or within a year of defending their Master's in the Applied Behavioral Science MA program at KU. The examination has 2 components:

1. Program of Study Written Document. Students will generate a program of study document, developed in concert with their mentor, that includes:
   • A list of all graduate lecture/discussion courses completed in behavioral science and how the coursework fulfills ABAI accreditation standards
   • Up to 10 representative readings from each completed graduate lecture/discussion course
   • Research interest statement (2-3 pages)
   • Career plans statement (2-3 pages)
   • Up-to-date CV

   In preparation for the oral examination, students provide their program of study document to the comprehensive examination committee. The examination committee will have the right to request additions/modifications to the reading list. The student will have a minimum of 2 weeks to prepare for the oral examination upon finalization of the program of study with the examination committee.

2. Oral Examination. The program of study will be used by the comprehensive examination committee to generate relevant and individualized questions to ask during the oral examinations. Questions will span all coursework and student-indicated research domains (those of personal interest to the student and relevant to their career trajectory). These questions will be posed during the oral examination. The oral examination will last two hours and is not open to the public. The defense is successful if a majority of the committee members vote to pass it.

Dissertation Proposal
In preparation for the dissertation, students will complete a departmental required written dissertation proposal and an oral discussion of the proposal. The proposal will include a) a thorough literature review and b) a research proposal. Students should follow specific instructions for these components as dictated in the student handbook. The dissertation proposal discussion will entail a one hour meeting with the dissertation committee and will be open to the public.

Dissertation
In consultation with their advisors, students conduct an empirically based dissertation, typically based on the comprehensive examination proposal, and pass an oral examination on it. The defense is successful if a majority of the committee members vote to pass it. If students do not pass the dissertation defense, they may not defend it again for a period of at least 90 days. If the oral defense is failed twice, students have 30 days to petition the department for a third attempt. Failure to petition, or a rejected petition, will result in students’ dismissal from the program. The dissertation defense will be open to the public.

Dual Degree: Ph.D. in Behavioral Psychology and Master of Public Health

The department offers a dual Ph.D./M.P.H. degree in collaboration with the Master of Public Health (p. 2121) program in the Department of Preventive Medicine and Public Health at KU Medical Center. The degree incorporates efficiencies in the elective and research requirements of both departments. This is the first degree in the nation to combine an M.P.H. with the strengths of advanced study in applied behavioral science. Faculty and student research teams address issues in community health and development, child and youth health and development, disabilities and independent living, and healthy aging. Separate admission is required to both the Ph.D. program of the Department of Applied Behavioral Science (https://absc.ku.edu/) and M.P.H. program of the Department of Preventive Medicine and Public Health (http://ph.kumc.edu/).

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.
Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Dual Degree: Ph.D. in Behavioral Psychology and Master of Public Health

For admission in the fall semester, please view the application deadline and all required application materials on the Graduate Admission (https://absc.ku.edu/graduate-admission) page of our departmental website (https://absc.ku.edu/). Students may be admitted for the spring semester, but there is no filing deadline.

Note: Although students may be applying for the Ph.D. track, students must also submit a separate application for the MPH. Each program (the MPH and Ph.D.) will review the corresponding application separately and will notify students of their admission decision individually. It is possible to be accepted into one program without acceptance in the other.

Eligibility criteria for admission to the Ph.D./M.P.H. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to graduate status in the program, a student must hold a bachelor’s degree. Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

For admission to the Ph.D. program with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department’s application materials is a list of department faculty members. Please review faculty members (http://absc.ku.edu/faculty/) on the department’s website and the descriptions of their research, scholarly, and professional interests. Applicants should select any faculty members whose research interests in an area of public health match their own. These faculty members review the applicant’s materials. An applicant is accepted when one of the faculty members consents to admit the student. This faculty member becomes the advisor of record.

Dual Ph.D. M.P.H. Degree

Department of Applied Behavioral Science and Department of Preventive Medicine

Offered by the Department of Applied Behavioral Science (Lawrence) and the Department of Preventive Medicine and Public Health (KU Medical Center, Kansas City and Wichita). This dual program is the first in the nation to combine the strengths of advanced study in applied behavioral science with a Master of Public Health (M.P.H.) degree. It results from a unique collaboration between two units: the Department of Applied Behavioral Science, offering a Ph.D. in Behavioral Psychology; and the Department of Preventive Medicine and Public Health, with its M.P.H. program.

Course Requirements Checklist for Dual MPH/Ph.D. Program:

Please note, listed below are the minimum course requirements for the dual degree. Those obtaining a Ph.D. degree in the Applied Behavioral Science program complete M.A. coursework and degree requirements. It is possible to enter the Ph.D. with an M.A. from another university. If that is the case, students will work with the program to waive M.A. equivalent coursework and the M.A. Thesis requirement at the departmental level.

Students in the dual MPH/PhD program are required to complete a total of 42 credit hours before earning their MPH. Some courses have been approved to fulfill requirements in both the MPH and PhD programs.

Research and/or Intervention Practicum
Master’s Thesis
Students complete an empirically based master’s thesis and pass an oral examination on it. With their advisor’s approval, empirically based theses from other programs may meet this requirement.

Research Skill
The Office of Graduate Studies requires students to have training in responsible scholarship and research skills pertinent to the field of research. This will be met by:

- Satisfactory completion of either ABSC 735 OR ABSC 770
- Satisfactory completion of either ABSC 841 OR ABSC 851

One of the following:

- At least one submission of a first-author manuscript for publication in a peer-reviewed journal, OR
- At least two scholarly presentations at regional, state, or national professional meetings.
  - The work for these must have been entirely completed at KU
  - No more than one may be a poster
  - At least one must have been presented by the time of the comprehensive examination; if the other has not yet been presented by the time of the comprehensive examination, it must be accepted for presentation at an upcoming meeting
  - At least one must list the student as either first or presenting author

Teaching Requirement
Graduate students receive training in the teaching and supervision of undergraduates. The requirement may be met in 1 of 2 ways. In the first, students serve as a paid half-time teaching assistant for 1 semester or as a quarter-time assistant for 2 semesters, assuming proportionate responsibility for class organization, lecturing, grading, and office hours under a faculty member’s supervision. In the second, students take LA&S 792 or ABSC 941, attend 3 brown bag lectures at the Center for Teaching Excellence, and present a guest lecture to the department. In both cases, students must also write a statement of teaching philosophy and obtain numeric evaluations of their teaching in their guest lectures.

Professional Seminar Requirement
Graduate students are expected to attend pro-seminar sessions when they are scheduled throughout the Fall and Spring semesters. These are usually scheduled for Friday afternoons at 3:30. Pro-seminars are typically presentations given by graduate students (see next paragraph), faculty members, and visiting scholars.

Doctoral students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance.

Editorial Critiques
Students write 3 editorial reviews of published or unpublished journal articles, all of them empirical. The articles cover a range of topics and experimental designs. All 3 are graded pass-fail by the student’s advisor. Students may use editorial reviews from course assignments so long as the instructor and advisor approve doing so.

Comprehensive Examination
Students must complete the comprehensive examination by the end of the third year if entering the PhD program with a completed Master’s obtained at another university, or within a year of defending their Master’s in the Applied Behavioral Science MA program at KU. The examination has 2 components:

1. Program of Study Written Document. Students will generate a program of study document, developed in concert with their mentor, that includes:
   - A list of all graduate lecture/discussion courses completed in behavioral science and how the coursework fulfills ABAI accreditation standards
   - Up to 10 representative readings from each completed graduate lecture/discussion course
   - Research interest statement (2-3 pages)
   - Career plans statement (2-3 pages)
   - Up-to-date CV

In preparation for the oral examination, students provide their program of study document to the comprehensive examination committee. The examination committee will have the right to request additions/modifications to the reading list. The student will have a minimum of 2 weeks to prepare for the oral examination upon finalization of the program of study with the examination committee.

2. Oral Examination. The program of study will be used by the comprehensive examination committee to generate relevant and individualized questions to ask during the oral examinations. Questions will span all coursework and student-indicated research domains (those of personal interest to the student and relevant to their career trajectory). These questions will be posed during the oral examination. The oral examination will last two hours and is not open to the public. The defense is successful if a majority of the committee members vote to pass it.

Dissertation Proposal
In preparation for the dissertation, students will complete a departmental required written dissertation proposal and an oral discussion of the proposal. The proposal will include a) a thorough literature review and b) a research proposal. Students should follow specific instructions for these components as dictated in the student handbook. The dissertation proposal discussion will entail a one hour meeting with the dissertation committee and will be open to the public.

Dissertation
In consultation with their advisors, students conduct an empirically based dissertation, typically based on the comprehensive examination proposal, and pass an oral examination on it. The defense is successful if a majority of the committee members vote to pass it. If students do not pass the dissertation defense, they may not defend it again for a period of at least 90 days. If the oral defense is failed twice, students have 30 days to petition the department for a third attempt. Failure to petition, or a rejected petition, will result in students’ dismissal from the program. The dissertation defense will be open to the public.
Graduate Certificate in Applied Behavior Analysis

The online certificate in Applied Behavior Analysis (https://edwards-campus.ku.edu/ma-applied-behavioral-science/certificate/) provides students with the necessary coursework preparation for certification as a Board Certified Behavior Analyst. It requires coursework on the basic principles of behavioral science and its research methods but emphasizes course work and training in application (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Applicants to the program must have either a Master's degree (or higher) or be currently enrolled in a masters or doctoral program at KU or another 4 year institution.

To be eligible to take the Behavior Analyst Certification Board exam, students must have supervised experience working with client populations. It is strongly recommended that incoming students who have not already completed supervised experience as part of their master's degree requirements do so while completing the Certificate coursework. However, this supervised experience is not part of the Certificate curriculum.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). A full list of the required application materials can be found on the certificate page (https://edwards-campus.ku.edu/ma-applied-behavioral-science/certificate/) of our website. Applications may be submitted through Graduate Admissions (https://gradapply.ku.edu/apply/).

Certificate students must complete the following courses for a total of 24 graduate credit hours:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

Graduate Certificate in Community Health and Development

The Department of Applied Behavioral Science offers a graduate certificate in community health and development through which students learn how to examine and address problems of social importance in communities. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Application materials and admission requirements can be found on the Graduate Certificate in Community Health and Development (https://absc.ku.edu/ma-cert-chd/) page of our departmental website (http://absc.ku.edu/).

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted through Graduate Admissions. (https://gradapply.ku.edu/apply/)

Certificate Program in Community Health and Development

The Department of Applied Behavioral Science has established a 1-year certificate program in Community Health and Development. The program offers advanced training and university-based certification in building healthy communities. The focus is on training in core aspects of community work: community assessment, strategic planning, intervention, evaluation, and sustainability. Students admitted to the certificate program must be either regular KU graduate students or admitted as certificate-only students.

Students will enroll in 3 3-credit hour courses for a total of 9 credit hours.

ABSC 710 Community Health and Development
ABSC 875 Practicum in Community Health Promotion
ABSC 876 Practicum in Community Development

Biology Undergraduate Program

The Department of Ecology & Evolutionary Biology (https://eeb.ku.edu/), the Department of Molecular Biosciences (http://
molecularbiosciences.ku.edu/), and the Undergraduate Biology Program (http://kuub.ku.edu/) work together to offer the following undergraduate majors and degrees.

Biochemistry—B.A. & B.S.

Biochemistry is the study of life at the level of individual molecules. Biochemistry lies at the intersection of cell biology, physiology, organic chemistry, and physical chemistry. The B.A. Biochemistry major includes one year of biochemistry, as well as upper-division courses in cellular mechanisms and biological physical chemistry. The B.S. Biochemistry major includes two semesters of calculus, one year of biochemistry, analytical chemistry, biological physical chemistry, and upper-division courses in cellular mechanisms and related elective courses.

Biology—B.A.

Biology is the study of living systems and is the broadest biological sciences major available at KU. The B.A. Biology degree provides students with much flexibility in their major course choices and can include ecology, microbiology, organismal physiology, and biochemistry.

Ecology, Evolution, and Organismal Biology—B.A. & B.S.

This set of majors focuses on the integration of biological systems at the whole organism level, and on how living organisms exist in populations, species, and communities within their environment. Core classes such as genetics, physiology, ecology, and evolutionary biology are combined with courses such as biochemistry, statistics, systematics, and organismal diversity to provide a strong foundation in biology. Students choose electives from a diverse set of classes that allow them to focus on areas of interest.

Human Biology—B.A.

This interdisciplinary major permits students to understand humans from a variety of academic viewpoints: anthropology, applied behavioral science, biology, psychology, and speech-language-hearing. Each human biology concentration offers major-level courses in topical categories that allow students to focus on areas that interest them most while retaining the interdisciplinary manner of the major. The broad nature of this major can prepare students for a variety of post-undergraduate opportunities.

Microbiology—B.A. & B.S.

Microbiology is the study of bacteria, viruses, the immune system, and their roles in human health, the environment and beyond. Job prospects for microbiologists with a bachelor’s or higher degree continue to be strong. Upper-division courses in immunology, bacterial infectious diseases, virology, and microbial genetics couple laboratory courses with lecture courses to provide students with hands-on practical experience. The B.A. Microbiology major includes a choice of three upper-division lecture and laboratory course pairs, while the B.S. Microbiology major includes all four of the upper-division lecture and laboratory course pairs.

Molecular, Cellular, and Developmental Biology—B.A. & B.S.

This set of majors emphasizes study of the fundamental systems of living organisms and leads to an integrated program of study in the biomedical sciences. Core classes in genetics, cell and developmental biology, and neurobiology are combined with critically important courses in subjects such as organic chemistry, evolutionary biology, and statistics. Additionally, students can choose from a diverse set of elective courses. The molecular, cellular, and developmental biology major provides education and training in a range of scientific areas vital to understanding human health and disease.

Undergraduate Majors and Degrees

The Department of Ecology & Evolutionary Biology, the Department of Molecular Biosciences, and the Undergraduate Biology Program offer the following undergraduate majors and degrees.

- B.A. and B.S. in biochemistry,
- B.A. in biology,
- B.A. and B.S. in ecology, evolution, and organismal biology,
- B.A. in human biology (concentrations in anthropology, applied behavioral science, biology, psychology, and speech-language-hearing science),
- B.A. and B.S. in microbiology, and
- B.A. and B.S. in molecular, cellular, and developmental biology

Advising and Career Counseling

Undergraduate majors are encouraged to consult their academic advisor as soon as possible for academic advising and career advising (http://kuub.ku.edu/advising/). Faculty advisors are also available to discuss career planning.

Courses for Nonmajors

BIOL 100 Principles of Biology, and BIOL 116 Introduction to Evolutionary Biology offer undergraduate nonmajors an introduction to biology and biological facts or concepts. A laboratory, BIOL 102, supplements BIOL 100. Honors section (BIOL 101) is offered for students with superior academic records. Except when specifically listed in the major requirements, these courses do not count toward a biology major.

Double Majors

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

Undergraduate Research Opportunities

The Undergraduate Biology Program encourages independent study and participation in faculty research programs. Consult an advisor or the UBP website (https://kuub.ku.edu/undergraduate-research/) to find a faculty sponsor for research or independent study. After receiving permission, the student may enroll in that faculty member’s section of BIOL 424 Independent Study for the number of hours specified by the faculty member. Depending upon the specific major, three to five independent study hours can be applied to elective requirements in the major. Independent study is required for graduation with departmental honors. By special arrangement with a faculty member, students may earn independent study credit by participating in research programs offered by other units (e.g., faculty members in the School of Medicine).

Student Organizations

Biology clubs (http://www.kuub.ku.edu/) allow students to interact with faculty and students while expanding their interest in biology. The biology majors advisory committee (BMAC) advises the Undergraduate Biology
Program on all undergraduate issues and provides a forum for concerns and suggestions.

**Biology Courses by Topics**

For a list of biology courses by topics, see Courses (http://kuub.ku.edu/courses/).

**Ecology and Evolutionary Biology**

The Department of Ecology and Evolutionary Biology (http://www2.ku.edu/~eeb/) offers M.A. and Ph.D. degrees in ecology and evolutionary biology, botany, and entomology.

**Molecular Biosciences**

The Department of Molecular Biosciences (http://www.molecularbiosciences.ku.edu/) offers Ph.D. degrees in biochemistry and biophysics; microbiology; and molecular, cellular, and developmental biology.

**Courses**

**BIOL 100. Principles of Biology. 3 Credits. NB N**

Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended.

**BIOL 101. Principles of Biology, Honors. 3 Credits. NB N**

Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 is recommended. BIOL 101 and BIOL 102 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor.

**BIOL 102. Principles of Biology Laboratory. 1 Credits. U LFE**

Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). Prerequisite: Concurrent enrollment in BIOL 100 is recommended.

**BIOL 105. Biology Orientation Seminar. 1 Credits. N**

Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about degree requirements, academic advising, research opportunities, and career options, as well as how to align academic and professional goals. Graded on a satisfactory/unsatisfactory basis.

**BIOL 116. Introduction to Evolutionary Biology. 3 Credits. N LFE**

An account of evolutionary thinking from classical to contemporary time. The emphasis is on mainstream developments (Darwinism, Mendelism, the Modern Synthesis, Cultural Ecology), but certain social issues will be examined (social Darwinism, creationism).

**BIOL 120. Insects in Your World. 3 Credits. NB N**

Students will learn about the global impact of insects on human concerns, both positive (pollination and decomposition) and negative (competition with humans for food, fiber, and shelter, and disease transmission) while developing an appreciation for the ways in which scientists work with real problems involving insects. The course will cover the overwhelming abundance and diversity of insects, and their life history, ecology, behavior, and physiology. This course is intended for both nonbiology and biology majors. Format: two lectures and one discussion section per week.

**BIOL 150. Principles of Molecular and Cellular Biology. 3 Credits. NB N LFE**

A course for biology majors and students planning to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. An honors section (BIOL 151) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 151. Principles of Molecular and Cellular Biology, Honors. 3 Credits. NB N LFE**

A course for biology majors and students who plan to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. An honors section (BIOL 153) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 152. Principles of Organismal Biology. 3 Credits. NB N LFE**

A course for biology majors and students who plan to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. An honors section (BIOL 153) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 153. Principles of Organismal Biology, Honors. 3 Credits. NB N LFE**

A course for students with superior academic records who are biology majors or planning to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. An honors section (BIOL 151) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor.

**BIOL 154. Introductory Biology Lab for STEM Majors. 2 Credits. N LFE**

A hybrid laboratory course for majors in science, technology, engineering, and math fields. This course will use online modules (~ 3 hours per week) to introduce students to key core competencies (e.g., critical thinking, quantitative reasoning, scientific communication, collaboration, etc.) that are applicable to all STEM fields. Three hours of face-to-face instruction will provide students hands-on opportunities to apply these core competencies and skills to research questions in the biological sciences. Students will apply research skills and engage in an authentic research activity during the second half of the course and will present the results to their peers in an oral format.

**BIOL 155. Principle Lab in: _____. 1-3 Credits. U LFE**

This introductory laboratory exposes the students to basic principles in biology and modern experimental techniques through an open-ended authentic research experience directed by a faculty member. Prerequisite: Consent of instructor.

**BIOL 177. First Year Seminar: ____. 3 Credits. NB**

For a list of biology courses by topics, see Courses (http://kuub.ku.edu/courses/).
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in biology. Does not contribute to major requirements in biology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status.

BIOL 200. Basic Microbiology. 3 Credits. NB N
Introduction to bacteria and viruses. Topics include historical development of microbiology, bacterial structure and growth, enzymes and energy production, disinfection, antibacterial drugs, gene transfer, viral replication, infection and immunity, with emphasis on infectious diseases. Can be substituted for BIOL 201 as a prerequisite for other microbiology courses by consent of department. Not open to those with credit in BIOL 400, or BIOL 401. Prerequisite: A course in high school biology and a course in high school chemistry. This course is not recommended for first semester freshmen.

BIOL 203. Introductory Microbiology Laboratory. 2 Credits. U LFE
Laboratory exercises to complement BIOL 200. Prerequisite: BIOL 200. May be taken concurrently.

BIOL 210. Introduction to Clinical Laboratory Sciences. 1 Credits. U
An introductory overview of the professions of Clinical Laboratory Sciences including types of analyses performed, specialties, interrelationships in the health care system and a visit to a clinical laboratory. This course will enable those considering a major in the Clinical Laboratory Sciences to have a clear definition of the professions. (Same as CLS 210.)

BIOL 225. Evolution and the History of Life. 3 Credits. N
This introductory course for non-majors focuses on the significance of the history of life and the fossil record for our understanding of evolution. Key events in the history of life are considered, including the origins of life, the eukaryotic cell, and humans, and also various mass extinctions. The focus is on general scientific and evolutionary principles and mechanisms that can be extracted from the study of the fossil record. It also uses the lessons of the fossil record to consider the prospects for our own species.

BIOL 240. Fundamentals of Human Anatomy. 3 Credits. N
Introduction to the gross anatomy of the human body. Covers the spatial arrangement and appearance of structures throughout the body, including visual identification of these structures. Musculoskeletal relationships, and the anatomy of major organ systems, are emphasized. Not intended for biology majors. Prerequisite: BIOL 100, or equivalent.

BIOL 241. Human Anatomy Observation Laboratory. 2 Credits. U LFE
One of the two laboratories in gross anatomy designed to complement BIOL 240. Emphasizes the three-dimensional appearance and spatial relationships of anatomical structures through supervised observations of pre-dissected human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy observation laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is required.

BIOL 246. Principles of Human Physiology. 3 Credits. N
An introduction to the physiological and biochemical processes and general physiological principles necessary to sustain life. Organ and organ system processes are emphasized. Intended for students majoring in allied health or sports related curricula who require a course in human physiology. Not intended for biology majors. Prerequisite: BIOL 100 or equivalent.

BIOL 247. Principles of Human Physiology Laboratory. 2 Credits. U LFE
Designed to complement BIOL 246. Uses experiments and simulations to demonstrate laboratory techniques and representative processes in areas of human physiology. Concurrent or prior enrollment in BIOL 246 required.

BIOL 350. Principles of Genetics. 4 Credits. N
Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian genetics and mapping; control of gene expression; cytogenetics; epigenetics and non-Mendelian genetics; and population and quantitative genetics. Examples are taken from a wide variety of organisms, including viruses, bacteria, plants, fungi, insects, and humans. Not open to students with credit in BSCI 350. Prerequisite: BIOL 150 or 151 with a grade of C- or higher and concurrent enrollment or prior completion of BIOL 152 or BIOL 153; or consent of instructor.

BIOL 360. Principles of Genetics, Honors. 4 Credits. N
The science of genetics aims to explain why individuals differ from one another and how these differences are inherited. Honors Genetics covers all core topics in fundamental genetics: Mendelian inheritance, meiosis and recombination, mutation, molecular genetics, population genetics, quantitative genetics and genomics. Special attention given to the practice of genetics and the complex relationship between genotype, phenotype and environment. A broader goal of Honors Genetics is to provide students a framework for understanding recent advances in medical genetics and the modern era of personal genomics. Not open to students with credit in BSCI 350. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher and membership in the University Honors Program; or consent of the instructor.

BIOL 370. Introduction to Biostatistics. 4 Credits. N
This course introduces key statistical concepts and how they are used to solve biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, and analysis of variance. Formerly known as BIOL 570. Not open to students with credit in BIOL 570. Prerequisite: MATH 101 or MATH 104 and BIOL 150 or BIOL 151 or BIOL 152 or BIOL 153.

BIOL 400. Fundamentals of Microbiology. 3 Credits. NB N
Fundamental principles of microbiology with emphasis on physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics, pathogenesis and immunity, industrially important microorganisms. Not open to students with credit in BSCI 400. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher and two semesters of college chemistry with a grade of C- or higher, or consent of the instructor.

BIOL 401. Fundamentals of Microbiology, Honors. 4 Credits. N
Honors section of BIOL 400 and BIOL 612. by application and invitation. Not open to students with credit in BSCI 401. Prerequisite: BIOL 150 or BIOL 151, two semesters of college chemistry, and membership in the University Honors Program, or consent of the instructor.

BIOL 402. Fundamentals of Microbiology Laboratory. 2 Credits. U LFE
Laboratory exercises designed to complement BIOL 400 or BIOL 700. Not open to students with credit in BSCI 401. Prerequisite: BIOL 400 or BIOL 612, or BIOL 400 or BIOL 612 concurrently.

BIOL 405. Laboratory in Genetics. 3 Credits. U LFE
A laboratory course that provides hands-on experience with classical genetics and modern molecular genetics. Experiments involve Mendelian genetics (dominance/recessivity, complementation, segregation, independent assortment) in eukaryotic organisms; recombinant DNA; basic bacterial genetics; polymerase chain reaction; DNA sequencing; computational genetics; and genome editing. Not open to students with credit in BSCI 351. Prerequisite: Concurrent or prior enrollment in BIOL 350.

BIOL 412. Evolutionary Biology. 4 Credits. N
Introduction to the patterns and processes of organic evolution. Considered are the history of evolutionary thought, molecular evolution, genetics and microevolution, selection and adaptation, and speciation and macroevolution. Emphasis will be placed on how scientists study and document change over time in natural populations, methods for testing hypotheses about events in evolutionary history, and how discovering evolutionary mechanisms at one level of organization can help to explicate general processes in the natural world. Prerequisite: BIOL 152 and BIOL 350, or consent of the instructor.

BIOL 413. The Tree of Life. 4 Credits. N
A tour of the tree of life that introduces the major groups of organisms on Earth, their important traits, phylogenetic relationships, life histories, roles in global ecosystems, and interactions with humanity. Our primary guide to this tour is the "Tree of Life," a branching diagram (phylogenetic tree) that illustrates how life evolved over the few billion years. Learning to read and interpret phylogenetic trees is central to the course, with lessons addressing general tree literacy, as well as advanced topics like mapping traits onto trees and reconstructing their evolution, interpreting fossils and time trees, and biogeography. Weekly in-person and virtual lab offers opportunities for students to interact directly with physical specimens while also gaining practical experience with simple algorithms and software applications that can be used to reconstruct and interpret how major groups of organisms evolved over time. Two of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 414. Principles of Ecology. 3 Credits. N
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as EVRN 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor.

BIOL 415. Field and Laboratory Methods in Ecology. 2 Credits. N
This course complements BIOL 414 with field trips and laboratory exercises that illustrate the basic concepts of ecology. Topics covered include methodologies for quantitative sampling of terrestrial and aquatic systems, design of field studies, computer simulation and digital data analysis techniques, and scientific writing. Prerequisite: Concurrent or prior enrollment in BIOL 414. A statistics course is recommended.

BIOL 416. Cell Structure and Function. 3 Credits. N
Lecture survey of molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Not open to students with credit in BSCI 416. Prerequisite: BIOL 150 or BIOL 151; BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; or consent of the instructor.

BIOL 417. Biology of Development. 3 Credits. N
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Not open to students with credit in BSCI 417. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

BIOL 418. Laboratory in: ______. 1-3 Credits. U LFE
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor.

BIOL 419. Topics in: ______. 1-3 Credits. N LFE
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs.

BIOL 420. Seminar: ______. 1-3 Credits. N
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor.

BIOL 423. Non-laboratory Independent Study. 1-9 Credits. N
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 424. Independent Study. 1-9 Credits. N
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor.

BIOL 425. Teaching Apprenticeship in Biology. 1-9 Credits. N
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology.

BIOL 426. Laboratory in Cell Biology. 3 Credits. U LFE
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; concurrent or prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended.

BIOL 428. Introduction to Systematics. 3 Credits. N
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systematics background.

BIOL 430. Laboratory in Molecular Biology. 3 Credits. U LFE
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology.
BIOL 435. Introduction to Neurobiology. 3 Credits. N
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Not open to students with credit in BSCI 435. Prerequisite: BIOL 350 or BIOL 360 and BIOL 416 or consent of the instructor.

BIOL 442. Human Anatomy Dissection Laboratory. 3 Credits. U
Laboratory in gross anatomy designed to build on content from BIOL 240 and BIOL 241. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial dissection experience. Students perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Prerequisite: BIOL 240 and BIOL 241, and consent of the instructor.

BIOL 446. Biology of Sleep. 3 Credits. N
The course integrates the impact of sleep across all of biology including physiology, endocrinology, health, neurobiology, learning and memory, evolution, and behavior. Students are expected to apply concepts from previous courses to understanding the role of sleep in well-being. Prerequisite: BIOL 150 or BIOL 151, or BIOL 152 or BIOL 153, and one BIOL course 300-level or above.

BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Credits. N LFE
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor.

BIOL 451. Ecosystems Stewardship. 3 Credits.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 451 and GEOG 451.)

BIOL 454. Brain Diseases and Neurological Disorders. 3 Credits. N
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 416 or BIOL 435 or BIOL 546, or consent of instructor.

BIOL 477. Ecology and Global Change. 3 Credits. N
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor.

BIOL 480. Medical Parasitology. 3 Credits. N
Introductory lecture course focused on parasites (protozoans and metazoans) causing disease in humans, including zoonotic diseases (diseases or infections that are naturally transmissible to humans from non-human vertebrates). Provides basic knowledge about the morphology, epidemiology, evolution, and ecology of parasites infecting humans globally (e.g., malaria, amoebas, hookworms, tapeworms). Emphasis is placed on life-cycles, course of infection, modes of reproduction, diagnosis, and pathology of human parasites; relevant parasites of veterinary importance are also discussed. Prerequisite: BIOL 152 or BIOL 153, or permission of instructor.

BIOL 481. Medical Parasitology Laboratory. 1 Credits. U LFE
Laboratory course in the study of parasites causing disease in humans, including zoonotic diseases (diseases or infections that are naturally transmissible to humans from non-human vertebrates), emphasizing their morphology and identification. One three-hour laboratory each week. Prerequisite: Concurrent or prior enrollment in BIOL 480.

BIOL 490. Internship and Practical Applications. 1-6 Credits. N
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor.

BIOL 499. Introduction to Honors Research. 2 Credits. N
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level natural sciences coursework or consent of instructor.

BIOL 500. Biology of Insects. 3 Credits. N
Lectures and demonstrations providing an introduction to the study of insects, including general classification, structure, phylogeny, identification, development, physiology, behavior, ecology, and relations to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

BIOL 501. Physiological Adaptations of Plants to Extreme Environments. 3 Credits. N
Exploration of physiological adaptations of plants to bright sunlight & deep shade, drought & flooding, excess heat & subfreezing, excess elements and too few elements. Examples of adaptations include: red leaves, blue leaves, succulence, root "knees", moving leaves, frozen leaves, heavy metal plants, carnivorous plants, parasitic plants, epiphytes. Prerequisite: BIOL 150 or BIOL 152 or consent of instructor.
BIOL 502. Laboratory in Insect Biology and Diversity. 2 Credits. U LFE
Laboratory and field studies of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent.

BIOL 503. Immunology. 3 Credits. N
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness, hypersensitivity; specific immunologic tolerance. Not open to students with credit in BSCI 503. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. BIOL 416 is recommended but not required.

BIOL 504. Immunology Laboratory. 2 Credits. U LFE
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently.

BIOL 506. Bacterial Infectious Diseases. 3 Credits. N
Explores bacterial infectious diseases from the perspective of how disease is established and the mechanisms that underlie disease, as well as how to treat and prevent infectious disease. Not open to freshmen or sophomores. Not open to students with credit in BSCI 506. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor.

BIOL 507. Bacterial Infectious Diseases Laboratory. 3 Credits. U LFE
Laboratory to complement BIOL 506. Cultivation of pathogenic microorganisms, diagnostic procedures, and experiments to demonstrate various aspects of microbial pathogenicity and host responses. Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or consent of instructor.

BIOL 509. Biology of Spiders. 3 Credits. N
An introduction to the evolution, anatomy, physiology, behavior, and ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship and mating; predation; social behavior; and the role of spiders in natural and agricultural ecosystems. Concurrent enrollment in BIOL 511 is encouraged. Prerequisite: BIOL 152 ; BIOL 153 or permission of instructor.

BIOL 511. Biology of Spiders Laboratory. 1 Credits. U LFE
Topics will include comparative biology of arachnid orders (spiders, scorpions, harvestmen, mites, and others), external and internal anatomy of spiders, identification of common spider families and genera, and spider behavior. Students will be required to make a small collection (collect, preserve, and identify specimens). Prerequisite: BIOL 509; concurrent enrollment is preferred.

BIOL 512. General Virology. 3 Credits. N
Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host-cell-viral interactions; mode of replication of DNA and RNA viruses, tumor viruses. Not open to students with credit in BSCI 512. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor. BIOL 416 is recommended but not required.

BIOL 513. Virology Laboratory. 2 Credits. U LFE
Experiments involving cultivation, quantitation, and identification of animal viruses, continuous cell culture and primary chicken embryo culture techniques. Molecular biology techniques are used to demonstrate the steps in virus replication. The value of viruses as tools to understand normal cellular processes is emphasized in experiments which demonstrate the relative simplicity of viruses and the relative complexity of eukaryotic cells. Demonstrations include transformation of cells by tumor viruses and electron microscopy of virus particles. Prerequisite: BIOL 402 and BIOL 512, or consent of instructor.

BIOL 518. Bacterial Genetics. 3 Credits. N
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular biology of gene expression. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher or consent of instructor.

BIOL 519. Bacterial Genetics Laboratory. 2 Credits. U LFE
A laboratory course on the genetic analysis of bacteria. Includes mutagenesis, cloning, agarose and polyacrylamide gel electrophoresis, PCR, regulation of gene expression, and computational analysis of DNA sequences and protein structures. Prerequisite: BIOL 350 or BIOL 360.

BIOL 520. Marine Biology. 3 Credits. N
This introductory course covers biological, physical, and chemical ocean sciences, with an emphasis on ecological aspects. In addition to this Lawrence campus course, students may enroll for a supplementary 1 credit field trip class to a Caribbean coral reef island offered in December or January. Prerequisite: BIOL 414 or permission of the instructor.

BIOL 524. Mammalian Paleontology. 3 Credits.
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as GEOL 524.) Prerequisite: One of the following: BIOL 225, BIOL 412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor.

BIOL 527. Primate Evolution and the Fossil Record. 3 Credits. N
This course exposes students to fundamental concepts of paleontology and evolutionary biology using the mammalian order Primates as a high-profile case study. Primates are interesting partly because humans are primates. Hence, scientific understanding of human origins and human evolution must be grounded in knowledge of our nearest relatives. This course places human origins within the broader framework of how primates have evolved over the course of the Cenozoic Era, often in response to radical changes in the Earth's physical environment. Prerequisite: BIOL 412 or BIOL 413, or consent of the instructor.

BIOL 530. Biodiversity Discovery and Assessment. 2 Credits. N
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as EVRN 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor.

BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Credits. U
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as EVRN 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged.

BIOL 533. Biology of Fungi. 4 Credits. N LFE
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153.

BIOL 536. Cell Structure and Function (Honors). 3 Credits. N
This is an honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Not open to students with credit in BSCI 416. Prerequisite: BIOL 350 or BIOL 360 or consent of instructor.

BIOL 540. General Invertebrate Zoology. 4 Credits. N LFE
This course will cover the diversity and evolution of freshwater and marine invertebrate animals. The class includes an overview of phylogenetic relationships, focusing on understanding patterns of key evolutionary innovations in the history of life. Throughout this course, students will have the opportunity to examine living and preserved specimens and identify unique and convergent features across non-terrestrial invertebrates. Students will gain an appreciation of the remarkable diversity of invertebrate morphologies, function and life cycles. Two of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153.

BIOL 541. Biology of Freshwater Invertebrates. 3 Credits. N
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 and/or BIOL 540.

BIOL 544. Comparative Animal Physiology. 3 Credits. N
An intermediate physiology course with lectures and discussions of the structures, functions, mechanisms, and interactions of vertebrate and invertebrate organ systems with a focus on the different ways in which animals adapt to their environments. Topics include digestion and nutrition, metabolism, gas exchange, circulation, excretion, neurophysiology, endocrinology, and muscle physiology. Prerequisite: BIOL 152 or BIOL 153, concurrent or prior enrollment in CHEM 330 or CHEM 380, or consent of instructor. A college physics course is recommended but not required.

BIOL 545. Evolution of Development. 4 Credits. N
An advanced course designed to expose students to evolutionary change in the developmental pattern of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent.

BIOL 546. Mammalian Physiology. 3 Credits. N
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Not open to students with credit in BSCI 546. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and concurrent or prior enrollment in CHEM 330 or CHEM 380, or consent of instructor.

BIOL 547. Mammalian Physiology Laboratory. 2 Credits. U LFE
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 546. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 546 or BIOL 646.

BIOL 548. Human Osteology. 4 Credits. N LFE
This course examines the structure and function of the human skeleton from an evolutionary and biomedical perspective. Students will learn to identify bones comprising the human skeleton and how osteological information aids in reconstructing sex, age, race, stature, and health status. Major transformations of the human skeleton from hominoid precursors, and some of the biomedical consequences of these transformations, will be addressed. (Same as ANTH 648.) Prerequisite: An introductory course in physical anthropology, biology, or permission of instructor.

BIOL 555. General Plant Physiology. 3 Credits. N
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: Consent of instructor.

BIOL 560. Histology. 3 Credits. N
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153.

BIOL 582. Principles of Biogeography. 3 Credits. N
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macroevolutionary trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor.

BIOL 583. Herpetology. 4 Credits. N
Herpetology introduces students to the global diversity of amphibians and reptiles. Students will learn about the major groups of frogs, salamanders, snakes, lizards, crocodiles and turtles through classroom lectures and hands-on laboratories built around the world-class specimen collections housed in the KU Biodiversity Institute. We will also cover a broad range of other important topics through a herpetological lens, including systematics, evolution, ecology, conservation, life histories, biogeography, communication, locomotion, physiology, diet, behavior, and reproduction. One of the four credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors.

BIOL 592. Ichthyology. 4 Credits. N LFE
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 152 and/or BIOL 413.

BIOL 593. Ornithology. 3 Credits. N LFE
A lecture and laboratory course on the biology, evolution, and diversity of birds. One of the three credit hours from this course will apply towards BIOL lab elective requirements numbered 400 or higher for biology majors. Prerequisite: BIOL 152 or BIOL 153 and BIOL 154, or permission of instructor.

BIOL 594. Forest Ecosystems. 3 Credits.
Students learn basic concepts of forest productivity, forest water relations, forest hydrology, nutrient cycling, through soils and vegetation, nutrient uptake, carbon cycling, decomposition, linkages to aquatic ecosystems, and agents of disturbance to these cycles. The class spends a significant part of the semester exploring forest soil profiles and the challenges they present to different forest ecosystems. We discuss the function of forested ecosystems in a global context and identify and understand smaller-scale processes that drive forest function. Prerequisite: CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; and BIOL 414.

BIOL 595. Human Genetics. 3 Credits. N
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350 or BIOL 360.

BIOL 598. Research Methods. 3 Credits. N LFE
An introduction to the foundational concepts that underpin scientific inquiry and problem solving. Coursework is built around three student-designed inquiries, and topics considered within that context include experimental variables, basic principles of statistics, safety and ethics of investigation, professional communication techniques, and appropriate literature review. Enrollment priority will be given to students currently admitted to the UKanTeach program.

BIOL 599. Senior Seminar: ______. 1 Credits. N
A synthesis and discussion of current trends in a discipline or disciplines related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline’s state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences.

BIOL 600. Introductory Biochemistry, Lectures. 3 Credits. N
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Not open to students with credit in BSCI 600. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry.

BIOL 601. Principles of Biochemistry Laboratory. 2 Credits.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite: Corequisite: BIOL 600; or consent of instructor.

BIOL 602. Plant Ecology. 3 Credits. N
Introduction to basic concepts, focused at community and species level. Architectural ecomorphology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession as an interaction among species differing in ecomorphology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemic defenses; geneecology; paleoecology. Prerequisite: BIOL 414 or consent of instructor.

BIOL 603. Systematic Botany. 3 Credits. N LFE
A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenetically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent.

BIOL 606. Ecological Plant Physiology. 3 Credits. N
Physiological responses of higher plants to environmental factors are discussed. Major topics are: water relations, heat transfer, resistance to water and temperature stress, dormancy, photoperiodism, photosynthesis and respiration under natural conditions, and effects of environmental pollution. Prerequisite: Consent of instructor.

BIOL 612. Fundamentals of Microbiology. 3 Credits. NB N
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Not open to students with credit in BSCI 612. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor.

BIOL 616. Medical Entomology. 3 Credits. N
A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor.

BIOL 622. Paleontology. 3 Credits. N
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as GEOL 521.) Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEOL 105, or GEOL 304.

BIOL 623. Paleontology Laboratory. 1 Credits. U LFE
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.)

BIOL 625. Behavioral Ecology and Sociobiology. 3 Credits. N
The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 152; either BIOL 350, BIOL 412 or BIOL 414 recommended; or consent of instructor.

BIOL 630. Conservation and Wildlife Biology. 3 Credits. N
Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended.

BIOL 636. Biochemistry I. 4 Credits. N
First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules.
and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor.

**BIOL 637. Introductory Biochemistry Laboratory. 2 Credits. ULFE**

The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce the student to cell constituents and biochemical reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment.

**BIOL 638. Biochemistry II. 4 Credits. N**

Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: CHEM 335 with a grade of C or higher and BIOL 636 with a grade of C or higher, or consent of instructor.

**BIOL 639. Advanced Biochemistry Laboratory. 3 Credits. ULFE**

The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art methodology. Prerequisite: BIOL 637 and BIOL 638 (BIOL 638 may be taken concurrently).

**BIOL 640. The Biology and Evolution of Fossil Plants. 3 Credits. N**

A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. Prerequisite: BIOL 413, or permission of instructor.

**BIOL 642. Biochemistry III: Machines on Genes. 4 Credits. N**

This one-semester lecture course for biochemistry majors is designed to complement the topics covered in BIOL 636 and BIOL 638. Emphasis will be placed on the various molecular machines involved in the transmission and utilization of genetic information, providing a biochemical perspective of replication, transcription, and translation. Prerequisite: BIOL 636 and BIOL 638 with a grade of C or higher.

**BIOL 648. Systematics and Macroevolution. 3 Credits. N**

An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent.

**BIOL 650. Advanced Neurobiology. 3 Credits. N**

The course builds upon the student's knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor.

**BIOL 652. Comparative Animal Behavior. 3 Credits. N**

A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite.

**BIOL 655. Behavioral Genetics. 3 Credits. N**

A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor.

**BIOL 660. Summer Field Ecology. 3 Credits. N**

An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as EVRN 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N).

**BIOL 661. Ecology of Rivers and Lakes. 3 Credits. N**

Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended.

**BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Credits. N**

The course focuses on the role of chemical information molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor.

**BIOL 668. Evolutionary Ecology. 3 Credits. N**

Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor.

**BIOL 672. Gene Expression. 3 Credits. N**

The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in BIOL 772. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. A course in biochemistry is recommended.

**BIOL 680. Genomics. 3 Credits. N**

Genomics is the study of the structure, function and evolution of the genome. High-throughput technologies have given us the ability to easily and quickly sequence genomes, and measure genomewide patterns of gene expression. These tools, and the vast amounts of genome-scale data they provide, have transformed biology and medicine. This course will cover the key technological and computational methods by which genomic DNA is sequenced, genomes are assembled, and how RNA and epigenetic patterns are measured. Subsequently, we will emphasize how these genomics tools and techniques have deepened our understanding of biology, covering questions from diverse fields to illustrate the impact of genomics on evolutionary biology, molecular and developmental genetics, human medical genetics and personalized, precision medicine. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor.
BIOL 688. The Molecular Biology of Cancer. 3 Credits. N
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor.

BIOL 699. Biology Honors Research Colloquium. 1 Credits. U
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor.

BIOL 700. Conservation Principles and Practices. 3 Credits. This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

BIOL 701. Topics in: ____. 1-3 Credits.
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests.

BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Credits.
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences.

BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Credits.
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry.

BIOL 706. Natural Sciences Curation and Collections Management. 3 Credits.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloging, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum's paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art's ethnographic collections. Student projects will involve one of the museum's collections with the opportunity for hands-on experience. (Same as MUSE 710.)

BIOL 712. Evolutionary Biology - Graduate. 3 Credits.
A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent or consent of instructor.

BIOL 714. Graduate Ecology. 3 Credits.
A thorough survey of the discipline of ecology. Topics include elements in physiological, population, community and ecosystem ecology. Overarching themes are 1) pattern and process, 2) ecology and evolution, 3) hierarchical nature of ecology, 4) variation in space and time, and 5) human dimensions of ecology. Prerequisite: Graduate standing or consent of instructor.

BIOL 720. Scientific Illustration. 3 Credits.
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.)

BIOL 735. Scientific Communication. 3 Credits.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.)
Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor.

**BIOL 755. Mechanisms of Development. 3 Credits.**
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor.

**BIOL 757. Carcinogenesis and Cancer Biology. 3 Credits.**
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor.

**BIOL 759. Ecosystems Stewardship. 3 Credits.**
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.)

**BIOL 772. Gene Expression. 4 Credits.**
The molecular biology of gene expression in eukaryotes: A study of the structure of genes and the molecular mechanisms used by cells to control and regulate gene expression. Emphasis on enzymatic mechanisms related to transcription, translation, post-transcriptional and post-translational modifications, and epigenetics. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in BIOL 672. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. A course in biochemistry is recommended.

**BIOL 782. Principles of Biogeography. 3 Credits.**
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended.

**BIOL 784. Introduction to Museum Public Education. 3 Credits.**
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEO 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 785. Museum Management. 3 Credits.**
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, GEO 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 786. Fundamentals of Tropical Biology. 1-8 Credits.**
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year. February-March, July-August.

**BIOL 787. Introduction to Museum Exhibits. 3 Credits.**
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEO 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor.

**BIOL 794. Mammalogy. 3 Credits.**
A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413.

**BIOL 798. Introduction to Collections Management and Utilization. 3 Credits.**
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, GEO 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor.

**BIOL 801. Topics in: _______. 1-3 Credits.**
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests.

**BIOL 805. Scientific Integrity in Ecology and Evolutionary Biology. 1 Credits.**
This course covers the responsible conduct of research to help students initiate research projects ethically. Topics covered include expectations of federal granting agencies and the university, best practices for data management and publishing, and professional development as a graduate student. Prerequisite: Admission to the graduate program in Ecology and Evolutionary Biology, or consent of instructor.

**BIOL 807. Graduate Molecular Biosciences. 3 Credits.**
An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, genetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

**BIOL 809. Graduate Molecular Biosciences for Medicinal Chemists. 4 Credits.**
An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor.

**BIOL 811. Advanced Molecular and Cellular Immunology. 2 Credits.**

Covers recent advances in immunochemistry and immunobiology. Topics include structure and function of antibodies, hybridoma systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoreactivity, and cancer. Prerequisite: BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor.

**BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Credits.**

Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesins, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in immunology, or consent of instructor.

**BIOL 814. Advanced Molecular Virology. 2 Credits.**

The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics and a course in virology, or consent of instructor.

**BIOL 815. Advanced Molecular Genetics. 2 Credits.**

A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor.

**BIOL 816. Careers in the Biomedical Sciences. 1 Credits.**

Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor.

**BIOL 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.**

This course addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as CHEM 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student.

**BIOL 841. Biometry I. 5 Credits.**

The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra.

**BIOL 848. Phylogenetic Methods. 4 Credits.**

A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor.

**BIOL 860. Principles and Practice of Chemical Biology. 3 Credits.**

A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor.

**BIOL 895. Human Genetics. 3 Credits.**

A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics.

**BIOL 899. Master's Thesis. 1-10 Credits.**

Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory progress/limited progress/no progress basis.

**BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Credits.**

Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission.

**BIOL 902. Advanced Molecular Cellular Biology Seminar. 1 Credits.**

Seminar presentation and discussion opportunity for advanced Molecular, Cellular, and Developmental Biology graduate students. Graded on a satisfactory/unsatisfactory basis.

**BIOL 905. Advanced Molecular Genetics. 1-3 Credits.**

A review of current literature in molecular genetics.

**BIOL 918. Modern Biochemical and Biophysical Methods. 4 Credits.**

This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 817, or permission of instructor.

**BIOL 925. Research Grant Proposal Preparation. 3 Credits.**

This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor.

**BIOL 943. Multivariate Data Analysis. 3 Credits.**

Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical
Correlation Analysis. Prerequisite: Knowledge of elementary matrix algebra.

**BIOL 952. Introduction to Molecular Modeling. 3 Credits.**
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. Prerequisite: Graduate standing or consent of instructor.

**BIOL 985. Advanced Study. 1-10 Credits.**
Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis.

**BIOL 999. Doctoral Dissertation. 1-12 Credits.**
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory progress/limited progress/no progress basis.

---

**Bachelor of Arts in Biochemistry**

**Biochemistry**

Biochemistry is the study of life at the level of individual molecules. Biochemistry lies at the intersection of cell biology, physiology, organic chemistry, and physical chemistry. The B.A. Biochemistry major includes one year of biochemistry, as well as upper-division courses in cellular mechanisms and biological physical chemistry.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) website for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Please note that students completing a B.A. in Biochemistry may not earn a minor in Chemistry.

---

**Requirements for the B.A. Major in Biochemistry**

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

**Major Course Requirements**

Biochemistry Electives
Satisfied by completing at least 6 hours of biology courses numbered 400 or higher. These courses must be selected in consultation with a biochemistry advisor. No more than 3 hours of BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) can be applied towards the elective requirement.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 37 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.A. in Biochemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

Please note that students completing a B.A. in Biochemistry may not also earn a minor in Chemistry. Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

they fulfill the following requirements: opportunities to explore other majors and/or minors.

However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more

The same course cannot be used to fulfill more than one KU Core Goal.

Total Hours 120-122

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. CHEM 170/CHED 130 and BIOL 150 require a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course.

3. Concurrent or prior enrollment in CHEM 170/CHED 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.

4. CHEM 335 and BIOL 638 and BIOL 639 are offered only in spring; BIOL 636, and BIOL 637 and CHEM 510 are only in fall.

5. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.

6. 6 hours of BIOL 400+ electives required.

7. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning Requirement.

8. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Arts in Biology

Biology

Biology is the study of living systems and is the broadest biological sciences major available at KU. The B.A. Biology degree provides students with much flexibility in their major course choices and can include ecology, microbiology, organismal physiology, and biochemistry.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Majors and Concentrations

Bachelor’s degree requirements in biology are modified as necessary. Current requirements are available in the UBP office and online (http://www.kuub.ku.edu/). Major programs are offered in biochemistry, biology, ecology, evolution, and organismal biology, human biology, microbiology, and molecular, cellular, and developmental biology. Students may choose to concentrate in a range of specialties in the biological sciences,
such as botany, cellular biology, developmental biology, environmental biology, ecology, entomology, genetics, marine biology, molecular biology, neurobiology, paleontology, physiology, systematics, or zoology (invertebrate or vertebrate).

  - **BIOL 600** Introductory Biochemistry, Lectures

### Electives and Laboratory Requirements

- Satisfied by completing 10 hours of BIOL courses numbered 400 or higher which include at least 4 hours of laboratory credit and a BIOL Goal 6 course. Courses listed above which have not been used to fulfill the above requirements may be used as electives. No more than 3 hours of BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) can be applied towards the elective requirement with no more than 2 hours of BIOL 424 being applied towards the laboratory requirement.

- **Biology Laboratory Electives**
  - Satisfied by completing at least 4 hours of biology lab courses numbered 400 or higher. No more than 2 hours of BIOL 424 may be applied towards the laboratory requirement.

- **Biology Capstone Requirement**
  - Satisfied by completing a BIOL Goal 6 course.

- **Biology Electives**
  - Satisfied by completing additional biology courses numbered 400 or higher.

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**
  - Satisfied by 35 hours of major courses.

- **Major Hours in Residence**
  - Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Junior/Senior Hours**
  - Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

- **Major Junior/Senior Graduation GPA**
  - Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
Below is a sample 4-year plan for students pursuing the BA in Biology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

</tbody>
</table>

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Requires a Math ACT Score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 to fulfill the math requirement.
3. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
4. BIOL 412 is offered only in the spring.
5. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335 and CHEM 336 sequence.
6. Biology major electives: choose from BIOL 413, BIOL 414, and BIOL 428 AND choose two from BIOL 400, BIOL 416, BIOL 417, BIOL 544 or BIOL 546, BIOL 555 or BIOL 606, and BIOL 600. BIOL 413, BIOL 414, and BIOL 544 are only offered in the fall. BIOL 428, BIOL 417, and BIOL 546 are only offered in the spring. 10 credit hours of BIOL 400+ level courses, including at least 4 hours of lab credit and a BIOL Goal 6 course. No more than 3 hours of BIOL 423 and/or BIOL 424 may be applied towards the elective requirement, with no more than 2 hours of BIOL 424 applied towards the laboratory requirement.
7. BIOL 599 is approved to fulfill Goal 6. This goal can also be fulfilled by completion of an approved educational experience, or an approved integration of courses and/or experiences. See your advisor for more information.
8. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
9. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
10. BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by
meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

**Bachelor of Arts in Ecology, Evolution, and Organismal Biology**

**Ecology, Evolution, and Organismal Biology**

The B.A. focuses on the integration of biological systems at the whole organism level, and on how living organisms exist in populations, species, and communities within their environment. Core classes such as genetics, physiology, ecology, and evolutionary biology are combined with courses such as statistics, systematics, and organismal diversity to provide a strong foundation in biology. Students choose electives from a diverse set of classes that allow them to focus on areas of interest.

### Undergraduate Admission

#### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

#### First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Undergraduate majors are eligible to graduate with honors in biology if they meet the requirements of both degree programs and take at least 7 biology courses, or in a biological science and an area outside biology.

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.

Total Hours 120

1. Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 + MATH 116 to fulfill the math requirement.
2. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
3. BIOL 412, BIOL 417, and BIOL 428 are offered only in the spring.
4. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.
5. BIOL 370, BIOL 413, and BIOL 414 are only offered in the fall.
6. Satisfied by an additional biology course or a comparable course in another science. Credit is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Arts in Human Biology

Human Biology

This interdisciplinary major permits students to understand humans from a variety of academic viewpoints: anthropology, applied behavioral science, biology, psychology, and speech-language-hearing. Each human biology concentration offers major-level courses in topical categories that allow students to focus on areas that interest them most while retaining the interdisciplinary manner of the major. The broad nature of this major can prepare students for a variety of post-undergraduate opportunities.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.
Majors and Concentrations

Bachelor’s degree requirements in biology are modified as necessary. Current requirements are available in the UBP office and online (http://www.kuub.ku.edu/). Major programs are offered in biochemistry, biology, human biology, and microbiology. Students may choose to concentrate in a range of specialties in the biological sciences, such as botany, cellular biology, developmental biology, environmental biology, ecology, entomology, genetics, marine biology, molecular biology, neurobiology, paleontology, physiology, systematics, or zoology (invertebrate or vertebrate).

Requirements for the B.A. Major in Human Biology

The curriculum builds from a broad background of general science courses and adds depth in a set of 5 specialized disciplines. Courses in the disciplines emphasize topics related to humans and provide a solid understanding of each field of knowledge.

For general requirements for the B.A. degree, see CLAS General Education Degree Requirements (p. 747) on the College of Liberal Arts and Sciences Degree Requirements page.

Students must choose 1 concentration from the 5 areas:

- Anthropology
- Applied behavioral science
- Biology
- Psychology
- Speech-language-hearing

Anthropology Concentration Categories

Satisfied by completing 2 of the following 4 categories (18-21 hours 18-21 required):

- Category 1: Human Anatomy and Physiology
  - Biology of Development. Satisfied by:
    - BIOL 417 Biology of Development

- Anatomy and Physiology. Satisfied by completing 9 hours from the following:
  - ANTH 648 Human Osteology
  - BIOL 240 Fundamentals of Human Anatomy
  - BIOL 241 Human Anatomy Observation Laboratory
  - BIOL 426 Laboratory in Cell Biology
  - BIOL 600 Introductory Biochemistry, Lectures
BIOL 637  Introductory Biochemistry Laboratory
BIOL 546  Mammalian Physiology
BIOL 547  Mammalian Physiology Laboratory

Category 2: Human Population Biology
Satisfied by completing 9 hours from the following:
ANTH 340  Human Variation and Evolution
ANTH 442  Anthropological Genetics
ANTH 544  Origins of Native Americans
ANTH 545  Contemporary Health Issues in Africa
ANTH 652  Population Dynamics

Category 3: Human Adaptation and Evolution
Satisfied by completing 9 hours from the following:
ANTH 352  Controversies on the Living and the Dead
ANTH 503  Topics in Biological Anthropology: _____
BIOL 412  Evolutionary Biology

Category 4: Human Biology and Behavior
Satisfied by completing 9 hours from the following:
ANTH 359  Anthropology of Sex
BIOL 652  Comparative Animal Behavior
BIOL 655  Behavioral Genetics
PSYC 370  Behavioral Neuroscience

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 31 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Research Methods & Application. Satisfied by:
ABSC 308  Research Methods and Application 4
Senior Seminar in Human Biology. Satisfied by:
BIOL 599  Senior Seminar: _____ (Must be taken in senior year.) 1

Applied Behavioral Science Concentration Categories
Satisfied by completing 2 of the following 4 categories (18-19 hours 18-19 required):

Category 1: Applied Behavioral Science
Principles and Procedures of Behavior Modification and Therapy. Satisfied by:
ABSC 304  Principles and Procedures of Behavioral Interventions

Applied Behavioral Science. Satisfied by completing 6 hours selected from the following courses:
ABSC 150  Community Leadership
ABSC 310  Building Healthy Communities
or ABSC 311  Building Healthy Communities, Honors
ABSC 350  The Behavioral Treatment of Children with Autism
ABSC 410  Behavioral Approaches in Working with Adolescents
ABSC 437  Independent Living and People with Disabilities

Category 2: Development: Typical and Atypical
Child Behavior and Development. Satisfied by:
ABSC 632  Advanced Child Behavior and Development
Development: Typical and Atypical. Satisfied by completing 6 hours selected from the following:
ABSC 535  Developmental Psychopathology
BIOL 416  Cell Structure and Function
BIOL 417  Biology of Development

Category 3: Biology of Behavior

Satisfied by completing 2 of the following 4 categories (18-19 hours required).

**Category 1: Development and Genetics**
- Biology of Development. Satisfied by:
  - BIOL 417 Biology of Development
- Development and Genetics. Satisfied by completing 6 hours selected from the following:
  - BIOL 405 Laboratory in Genetics
  - BIOL 416 Cell Structure and Function
  - or BIOL 536 Cell Structure and Function (Honors)
  - BIOL 595 Human Genetics
  - BIOL 655 Behavioral Genetics
  - PSYC 333 Child Development
  - PSYC 430 Cognitive Development
  - SPLH 464 Undergraduate Seminar in: _____
  - or SPLH 764 Seminar in: _____
  - SPLH 466 Language Science
  - SPLH 566 Language Development

**Category 2: Anatomy and Physiology**
- Mammalian Physiology. Satisfied by:
  - BIOL 546 Mammalian Physiology
- Anatomy and Physiology. Satisfied by completing 6 hours selected from the following:
  - BIOL 240 Fundamentals of Human Anatomy
  - BIOL 241 Human Anatomy Observation Laboratory
  - BIOL 547 Mammalian Physiology Laboratory
  - SPLH 462 Principles of Speech Science
  - SPLH 463 Principles of Hearing Science

**Category 3: Neuroscience**
- Physiology of Organisms. Satisfied by:
  - BIOL 544 Comparative Animal Physiology
- Neuroscience. Satisfied by completing 6 hours selected from the following:
  - BIOL 416 Cell Structure and Function
  - BIOL 435 Introduction to Neurobiology
  - PSYC 370 Behavioral Neuroscience
  - PSYC 375 Cognitive Neuroscience
  - PSYC 380 Clinical Neuroscience
  - SPLH 464 Undergraduate Seminar in: _____ (Neural Bases of Speech & Voice)
  - SPLH 464 Undergraduate Seminar in: _____ (Speech Motor Control)

**Category 4: Research Practicum**
- Satisfied by completing 9 hours selected from the following courses:
  - SPLH 464 Undergraduate Seminar in: _____ (Circuit Theory & Bioinstrumentation)
  - SPLH 449 Laboratory/Field Work in Human Biology (various topics)
  - SPLH 499 Directed Study in Speech-Language-Hearing

---

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
- Satisfied by 30 hours of major courses.

**Major Hours in Residence**
- Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
- Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
- Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Human Biology with concentrations in the following can be found here: Anthropology (p. 1179), Applied Behavioral Science (p. 1180), Biology (p. 1181), Psychology (p. 1182), and Speech-Language-Hearing (p. 1183), or by using the left-side navigation.

**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.
BA in Human Biology with concentration in Anthropology

Below is a sample 4-year plan for students pursuing the BA in Human Biology with a concentration in Anthropology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

**Total Hours 120-121**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Requires a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 to fulfill the Math requirement.
3. Concurrent or prior enrollment in CHEM 130 is required.
4. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
5. BIOL 370 is only offered in the fall semesters.
6. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence and PHSX 114/PHSX 211 & PHSX 216 and PHSX 115/PHSX 212 & PHSX 236
7. Refer to the degree requirements in the catalog, the Degree Progress Report (DPR), or your advisor for a list of applicable courses. Completion of 2 of 4 major categories is required.
8. BIOL 599 is approved to fulfill Goal 6. This goal can also be fulfilled by completion of an approved educational experience, or an approved integration of courses and/or experiences. See your advisor for more information.
9. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
10. ANTH 304, ANTH 309, ANTH 340, or BIOL 412 (offered in spring only) can fulfill this requirement. Only one course is required. Hour requirements (incl. 45 hr/yr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
11. BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.
Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BA in Human Biology with concentration in Applied Behavioral Science**

Below is a sample 4-year plan for students pursuing the BA in Human Biology with a concentration in Applied Behavioral Science. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BA in Human Biology with concentration in Speech-Language-Hearing**

Below is a sample 4-year plan for students pursuing the BA in Human Biology with a concentration in Speech-Language-Hearing. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by...
Bachelor of Arts in Microbiology

Microbiology

Microbiology is the study of bacteria, viruses, the immune system, and their roles in human health, the environment and beyond. Job prospects for microbiologists with a bachelor's or higher degree continue to be strong. Upper-division courses in immunology, bacterial infectious diseases, virology, and microbial genetics couple laboratory courses with lecture courses to provide students with hands-on practical experience. The B.A. Microbiology major includes a choice of three upper-division lecture and laboratory course pairs.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.
First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Requirements for the B.A. Major in Microbiology

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 24-25 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
Below is a sample 4-year plan for students pursuing the BA in Microbiology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

**Total Hours 120-121**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Requires a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 may be taken instead of MATH 115 to fulfill the Math requirement.
3. MATH 115 eligibility is required for enrollment.
4. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
5. BIOL 506, BIOL 507, BIOL 512, and BIOL 513 are offered only in the spring.
6. BIOL 401, BIOL 402, BIOL 404, BIOL 370, BIOL 518, and BIOL 519 are offered only in the fall.
7. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.
8. 10 hours of Microbiology courses, including 2 lecture-lab pairings, selected from BIOL 503, BIOL 504, BIOL 512, BIOL 513, BIOL 518, and BIOL 519.
9. 3 hours of BIOL course(s) numbered 400 or above.
10. BIOL 800 (3 hours) or BIOL 636 and BIOL 638 (8 hours) required. BIOL 636 is offered only in the fall semester, BIOL 638 is offered only in the spring semester, and BIOL 600 is offered in both the fall and spring semesters.
11. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
12. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
13. See your advisor for Goal 6 Integration & Creativity course options.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

**Please note:**
Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

**Bachelor of Arts in Molecular, Cellular, and Developmental Biology**

**Molecular, Cellular, and Developmental Biology**

The Molecular, Cellular, and Developmental Biology B.S. and B.A. degrees provide students with a broad understanding of biological systems at the molecular, cellular, and organismal levels. The MCDB degree includes study of genetics, cell biology, developmental biology, cancer biology, and neurobiology. Students have the option of elective courses in these areas for an advanced, in-depth learning experience.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

they fulfill the following requirements:

1. Undergraduate majors are eligible to graduate with honors in biology if
   Departmental Honors
   15 hours of courses unique to each major.
   by meeting the requirements of both degree programs and taking at least
   biological sciences, or in a biological science and an area outside biology
   Please note: Students may earn degrees in more than one major within
   many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

2. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is
   the honors equivalent of BIOL 150 and is offered in the fall semesters.
   BIOL 153 is the honors equivalent of BIOL 152 and is offered in the
   spring semesters.

3. BIOL 412, BIOL 417, BIOL 426, and BIOL 672 are offered only in the
   fall.

4. Most medical schools require the full CHEM 330, CHEM 331,
   CHEM 335, and CHEM 336 sequence.

5. BIOL 405, BIOL 435, BIOL 370 and BIOL 688 are offered only in the
   fall.

6. Choose BIOL 405 or BIOL 426. BIOL 405 is offered only in the fall,
   and BIOL 426 is offered only in the spring.

7. 6 credit hours of BIOL courses at 400+ level, with no more than 3
   hours of BIOL 423 and/or BIOL 424 (combined) applied toward the
   elective requirement.

8. Choose BIOL 435, BIOL 672, or BIOL 688. BIOL 435 and BIOL 688
   are offered only in the fall, and BIOL 672 is offered only in the spring.

9. BIOL 105 Biology Orientation Seminar (1 hour online course) is
   required for the major. It can be taken the summer prior to your
   freshman year.

10. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU
    core, degree, major, second area of study and/or elective hours.
    Students completing the BGS with a major must choose a secondary
    area of study. Individual degree mapping is done in partnership with
    your advisor.

11. See your advisor for Goal 6 Integration & Creativity BIOL course
    options.

Please note: Students may earn degrees in more than one major within
biological sciences, or in a biological science and an area outside biology
by meeting the requirements of both degree programs and taking at least
15 hours of courses unique to each major.

**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if
they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in
   biology.

2. Achieve a minimum grade-point average of 3.5 in the major.

3. Complete BIOL 499 Introduction to Honors Research with a grade of
   B or higher.

4. Complete BIOL 699 Biology Honors Research Colloquium with a
   grade of B or higher.

5. Complete an independent research project under the supervision of a
   faculty member in an area appropriate to the degree sought.

6. Submit an honors thesis to the honors committee once the research
   is complete and present the results of the completed research at the
   honors research symposium.

Students majoring in Human Biology with Anthropology, Applied
Behavioral Science, Psychology, or Speech-Language-Hearing
concentrations will follow the honors requirements for their respective
concentration department.

Specific guidelines and intent forms are available in the Undergraduate
Biology Program office and online (http://www.kuub.ku.edu/). Candidates
must declare their intent to graduate with honors at least 2 semesters
before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad.
Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108
Lippincott Hall, for information about study in one of the many countries
(e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

**Bachelor of Science in Biochemistry**

**Biochemistry**

Biochemistry is the study of life at the level of individual molecules.
Biochemistry lies at the intersection of cell biology, physiology, organic
chemistry, and physical chemistry. The B.S. Biochemistry major includes
two semesters of calculus, one year of biochemistry, analytical chemistry,
biological physical chemistry, and upper-division courses in cellular
mechanisms and related elective courses.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college
transcripts to the Office of Admissions. Prospective first-year students
should be aware that KU has qualified admission requirements that all
new first-year students must meet to be admitted. Consult the Office
of Admissions (http://admissions.ku.edu/) for application deadlines and
specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for
information about international admissions.

Students considering transferring to KU may see how their college-
level course work will transfer on the Office of Admissions (http://
credittransfer.ku.edu/) website.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students
should begin meeting major requirements in the first year. It is particularly
important to take CHEM 130 and CHEM 135 in the first year and,
for several majors, to take CHEM 330, CHEM 331, CHEM 335, and
CHEM 336 in the second year. Ideally, most majors should also take
BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Students completing a B.S. in Biochemistry may not complete a minor in
Chemistry.

**Requirements for the B.S. Degree in Biochemistry**

In addition to degree and major requirements for all plans and subplans,
all students must complete the KU Core.

### BIOL Elective 400+ (Major Requirement) | 3 | 3 | 3 | 3 |

### BIOL Elective 400+ (Major Requirement) | 3 | 3 | 3 | 3 |

### Second Area of Study/ Elective/Degree/Junior-Senior Hours | 3 | 3 | 3 | 3 |

### Total Hours 120

1. BIOL 105: Biology Orientation Seminar (1 hour online course) can be taken the summer prior to your freshman year.
2. Concurrent or prior enrollment in CHEM 170/CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
3. Requires a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course.
4. BIOL 636, BIOL 637, CHEM 400, CHEM 401, CHEM 510, and CHEM 530 are Fall only courses. CHEM 335, CHEM 336, BIOL 638, and BIOL 639 are Spring only courses.
5. Satisfied by completing 12 hours of BIOL courses numbered 400 or higher.
6. Hour requirements (incl. 45 j/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad
Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Science in Ecology, Evolution, and Organismal Biology

Ecology, Evolution, and Organismal Biology

The B.S. focuses on the integration of biological systems at the whole organism level, and on how living organisms exist in populations, species, and communities within their environment. Core classes such as genetics, ecology, and evolutionary biology are combined with courses such as statistics, biochemistry, systems, and organismal diversity to provide a strong foundation in biology. Students choose electives from a diverse set of classes that allow them to focus on areas of interest.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Ecology, Evolution, and Organismal Biology Elective Hours 24

Satisfied by completing a total of 24 hours in the following, with no more than 5 credit hours in BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined):

Biology Laboratory Electives
Satisfied by completing at least 4 hours of lab credit in biology courses numbered 400 or higher, CHEM 331 or CHEM 336. No more than 2 credit hours in BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) may be applied.

Biology Capstone Requirement
Satisfied by completing a BIOL Goal 6 course.

Biology Electives
Satisfied by completing additional biology courses numbered 400 or higher, CHEM 331, CHEM 335, CHEM 336, MATH 116, PHSX 115 or PHSX 212 & PHSX 236.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 48 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 41 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the BS in Ecology, Evolution, and Organismal Biology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (https://kucore.ku.edu).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to the freshman year, fall semester.

**Freshman**

**Total Hours 120**

1. Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course.
2. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
3. BIOL 412, BIOL 417, BIOL 428, and BIOL 546 are offered only in the spring.
4. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.
5. BIOL 370, BIOL 413, BIOL 414, and BIOL 544 are offered only in the fall.
6 Satisfied by a total of 24 credit hours. This includes at least 4 hours of lab credit in BIOL courses numbered 400 or higher, CHEM 331, or CHEM 336, and a BIOL Goal 6 course. The additional hours are satisfied by of BIOL lecture or lab courses numbered 400 or higher or CHEM 335, MATH 116, PHSX 115 (or PHSX 212 & PHSX 236). No more than 5 hours of BIOL 423 and/or BIOL 424 can be applied towards elective requirement, with no more than 2 hours of BIOL 424 applied towards the lab requirement.

BIOL 105 Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Hour requirements (incl. 45 j/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

MATH 125 may be taken instead of MATH 115 to fulfill the calculus requirement.

PHSX 211 & PHSX 216 together may be taken instead of PHSX 114 to fulfill this requirement.

Please note: Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

---

**Bachelor of Science in Microbiology**

**Microbiology**

Microbiology is the study of bacteria, viruses, the immune system, and their roles in human health, the environment and beyond. Job prospects for microbiologists with a bachelor's or higher degree continue to be strong. Upper-division courses in immunology, bacterial infectious diseases, virology, and microbial genetics couple laboratory courses with lecture courses to provide students with hands-on practical experience. The B.S. Microbiology major includes all four of the upper-division lecture and laboratory course pairs.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

**Requirements for the B.S. Degree in Microbiology**

In addition to degree and major requirements, all students must complete the KU Core.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 35-36 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Microbiology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

**Total Hours 120-121**

1. Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 to fulfill the BS Microbiology math requirement.

2. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.

3. BIOL 512, BIOL 513, BIOL 506, BIOL 507, and CHEM 335 are offered only in the spring.

4. BIOL 401, BIOL 402, BIOL 504, BIOL 518, BIOL 519, BIOL 370 and BIOL 636 are offered only in the fall.

5. 6 hrs of Biol courses numbered 400-level or above.

6. BIOL 600 (3 hours) or BIOL 636 and BIOL 638 (8 hours) required. BIOL 636 is offered only in the fall semester, BIOL 638 is offered only in the spring semester, and BIOL 600 is offered in both the fall and spring semesters.

7. BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

8. BIOL 416 is recommended prior to BIOL 512 and BIOL 503.

9. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.

2. Achieve a minimum grade-point average of 3.5 in the major.

3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.

4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.

5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.

6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing
concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad
Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Science in Molecular, Cellular, and Developmental Biology

Molecular, Cellular, and Developmental Biology

The Molecular, Cellular, and Developmental Biology B.S. and B.A. degrees provide students with a broad understanding of biological systems at the molecular, cellular, and organismal levels. The MCDB degree includes study of genetics, cell biology, developmental biology, cancer biology, and neurobiology. Students have the option of elective courses in these areas for an advanced, in-depth learning experience.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

### Molecular, Cellular, and Developmental Biology Electives

Any Biology courses numbered 400 or higher. No more than 3 hours of BIOL 423: Non-Lab Independent Study and/or BIOL 424: Independent Study (combined) may be used to fulfill the elective requirement.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 46 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 38 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Molecular, Cellular, and Developmental Biology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

1. Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 to fulfill the math requirement.
2. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and is offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and is offered in the spring semesters.
3. BIOL 412, BIOL 417, BIOL 426, BIOL 650, BIOL 672 and CHEM 335 are offered only in the spring.
4. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence. BIOL 405, BIOL 435, BIOL 370, and BIOL 668 are offered only in the fall.
5. BIOL 405 or BIOL 426. BIOL 405 is offered only in the fall, and BIOL 426 is offered only in the spring.
6. 12 credit hours of BIOL courses at 400+ level, with no more than 3 hours of BIOL 423 and/or BIOL 424 (combined) applied toward the elective requirement.
7. Choose BIOL 405 or BIOL 426. BIOL 405 is offered only in the fall, and BIOL 426 is offered only in the spring.
8. Choose BIOL 650, BIOL 672, or BIOL 688. BIOL 650 and BIOL 672 are offered only in the spring. BIOL 688 is offered only in the fall.
9. BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.
10. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
the west campus. The number of graduate students continues to increase.

Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Department of Chemistry

At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry. As a worldwide leader in training and research in chemistry, the Department of Chemistry at KU is highly interdisciplinary in nature, spanning research in: Organometallic, Materials, Environmental, Surface, Bioinorganic, Bioorganic, Biophysical, Bioanalytical, Computational & Theoretical, Synthetic, Combinatorial, and "Green" Chemistry as well as Photochemistry, NMR, Laser Spectroscopy, and Polymers.

Our highly recognized faculty consist of twenty-nine (29) active faculty including five distinguished professors (https://chem.ku.edu/faculty/). The faculty occupy two different buildings; Integrated Science Building (ISB) (http://isb.ku.edu/) and the Multidisciplinary Research Building (MRB) on the west campus. The number of graduate students continues to increase with current enrollment at 105 and 220 undergraduates; the department usually has about 45 postdoctoral students. Many other students pursue graduate degrees in related areas of medicinal chemistry, pharmaceutical chemistry, chemical engineering, biochemistry, and geochemistry, making a community of more than 350 chemistry-oriented research students.

Always striving to provide the best possible opportunities for our students, new facilities and equipment are being acquired at an amazing pace and our faculty and staff focus on providing a most rewarding and educational environment to help students achieve their goals. Research support facilities include the: Biochemical Research Service Laboratory, Instrumentation Design Laboratory, Mass Spectrometry Laboratory, Molecular Graphics and Modeling Laboratory, Nuclear Magnetic Resonance Laboratory, X-ray Crystallography Laboratory, Glassblowing, and Instrument Shops. Anschutz Library contains more than 300,000 books and periodicals spanning the fields of chemistry, biochemistry, physics, geology, and pharmacy.

Undergraduate Program

The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a Minor in chemistry for those seeking a secondary area of study.

Graduate Program

For a student wishing to earn a Doctor of Philosophy (Ph.D.) degree or a Master of Science (M.S.) degree in chemistry, the selection of a graduate school is one of the most important career decisions you will make. Your choice will not only determine where you will be during the next several years, but will lay the foundation for your future.

The KU Chemistry Graduate Program provides exceptional and diverse opportunities for the student interested in a career in cutting-edge research, higher education or any one of a number of chemically related positions requiring an advanced degree. We have a department of outstanding faculty, each of whom is dedicated to providing mentoring to graduate students and guiding them during their journey from undergraduate to professional.

Undergraduate Programs

Chemistry course work educates undergraduates to become professional chemists or to do graduate work in chemistry. It also provides the basic chemistry background for students entering such fields as biochemistry, biological sciences, dentistry, engineering, environmental science, geology, medicine, pharmacy, physics, and secondary-level science education. Courses in chemistry provide general knowledge and appreciation of chemistry and its impact on society.
Advanced Placement

Students who have taken the Advanced Placement Examination in chemistry should have the results forwarded to the Office of Admissions (http://admissions.ku.edu/). Students who score 5 need not take CHEM 130 and CHEM 135 and receive 10 hours of credit. With departmental permission, those who score 3 or 4 receive credit for CHEM 130. Credit for CHEM 135 also may be given to those who pass a special examination. Students who score at least 50 on the College Level Examination Program general chemistry examination receive 5 hours of credit in CHEM 130.

Courses for Non-majors

Undergraduates taking chemistry as preparatory study for another field should consult the courses listed for that field in this catalog. CHEM 110 is an introductory course for the non-science major who wants to study the general principles, methods, role, and significance of chemistry in the modern world, for pre-nursing students, and for students who plan to take no additional courses in chemistry. Pre-medical students and chemistry or other science majors should not take CHEM 110. CHEM 110 includes a laboratory. Engineering students who need only one semester of chemistry should take CHEM 150. CHEM 130 is an introductory course for students who plan to take more than one year of college chemistry, including chemical engineering, pre-medical, pre-pharmacy, and pre-dental students and students in biological sciences who must take organic chemistry. Students should continue with CHEM 135 in the same academic year that they take CHEM 130.

Graduate Programs

The department’s graduate program, its Ph.D. program in particular, produces graduates with the basic knowledge, skills, and experimental training necessary to enter productive careers in academic, industrial, and government positions. Faculty and graduate students work collegially, not only in the search for new knowledge at the frontiers of chemistry, but also toward the solution of problems of fundamental societal concern.

Although the department believes it is essential to provide graduate students with a knowledge base spanning the traditional areas of analytical, inorganic, organic, and physical chemistry, it nurtures its particular strengths in several important research areas at the interface of chemistry and the biological/medical sciences. The Department of Chemistry at KU is a worldwide leader in graduate training and research in bioanalytical chemistry, and its additional interactions with the pharmaceutical and biological sciences have led to strong graduate research programs in diverse areas such as bio-inorganic, bio-organic, and biophysical chemistry.

The department also recognizes its central science role by maintaining strong research and Ph.D. programs in areas that interface closely with molecular biosciences, physics, chemical engineering, mathematics, and computer science, for example, in drug discovery, theoretical chemistry, materials, molecular modeling, and laser spectroscopy. The entering Ph.D. student can be assured of finding vigorous programs spanning a full range of chemical studies, and the graduating Ph.D. student can be equally confident that his or her training and skills are marketable commodities.

The department’s M.S. program is a traditional companion to the Ph.D. program and shares the same goals. It is encouraged for students who prefer a program with less depth and a research (thesis) project that is manageable in 2 to 4 semesters. Although most entering graduate students choose the Ph.D.—the most desirable degree for those who wish to work as independent scientists in academic, industrial, or institutional settings—the M.S. serves a useful and essential role for students with other ambitions.

Research support facilities include the Instrumentation Design Laboratory, Mass Spectrometry Laboratory, Molecular Graphics and Modeling Laboratory, Nuclear Magnetic Resonance Laboratory, and X-ray Crystallography Laboratory. Anschutz Library contains more than 300,000 books and periodicals spanning the fields of chemistry, biochemistry, physics, geology, and pharmacy.

Non-Degree Seeking

Students who are interested in enrolling in graduate level coursework in the Department of Chemistry without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s degrees (https://chem.ku.edu/degrees/) webpage for further details.

Courses

CHEM 110. Introductory Chemistry. 5 Credits. NP N LFE
This integrated lecture and laboratory course provides an introduction to basic concepts related to general, organic, and biological chemistry. Suitable for students seeking an introductory course and for students who are majoring in health and allied health fields. Students whose majors require more than one semester of chemistry should enroll in CHEM 130, CHEM 170, or CHEM 190. CHEM 110 and CHEM 150 cannot both be taken for credit.

CHEM 130. General Chemistry I. 5 Credits. NP N LFE
This course seeks to develop a working knowledge of the conceptual foundation and the quantitative chemical relationships on which subsequent chemistry courses are built. Atomic structure, chemical bonding, reaction stoichiometry, thermochemistry, and periodic trends are emphasized in this integrated lecture and laboratory course. Students pursuing or considering a major in one of the chemical sciences should strongly consider taking CHEM 170 or CHEM 190. Students with credit in CHEM 110 will have two hours added on to their total number of hours required for graduation. Prerequisite: Must be eligible for MATH 115.

CHEM 135. General Chemistry II. 5 Credits. N LFE
This course, which is a continuation of CHEM 130, focuses on chemical kinetics, chemical equilibrium, acid-base chemistry, and thermodynamics. Additional topics, such as environmental chemistry, electrochemistry, coordination chemistry, nuclear chemistry, organic chemistry, and/or polymers, may also be introduced in this integrated lecture and laboratory course. Students pursuing or considering a major in one of the chemical sciences should strongly consider taking CHEM 175 or CHEM 195. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 with a grade of C- or higher.

CHEM 149. Chemistry for Engineers Supplement. 2 Credits. N
This course is intended for students in the School of Engineering who have credit for CHEM 130 but still need selected elements of second-semester general chemistry. Students will learn to describe phases of matter and quantify changes among them, and to analyze chemical equations and equilibria in the context of acid-base and redox chemistry. Prerequisite: Student in the School of Engineering and CHEM 130 or equivalent (or have Departmental consent). Credit in CHEM 135, CHEM 150, CHEM 175, or CHEM 195 precludes enrollment in and credit for CHEM 149.

CHEM 150. Chemistry for Engineers. 5 Credits. N LFE
This one semester course is designed for students in the School of Engineering who are not required to take additional chemistry courses...
at the college level. In this integrated lecture and laboratory course, students will learn to predict properties of substances based on their molecular structure, to describe phases of matter and quantify changes among them, and to analyze chemical equations and equilibria in the context of acid-base and redox chemistry. Technical communication and experimental design are also emphasized. Prerequisite: Must have completed a course in high school chemistry and be eligible for MATH 115 (or have Departmental consent). Students not admitted to the School of Engineering must receive permission from instructor. CHEM 110 and CHEM 150 cannot both be taken for credit.

CHEM 170. Chemistry for the Chemical Sciences I. 5 Credits. NP N LFE
The first course in a two-course sequence focused on the principles and applications of modern chemistry. This integrated lecture and laboratory course is designed for students pursuing or considering a major in one of the chemical sciences (such as chemistry, biochemistry, chemical engineering or petroleum engineering). The CHEM 170/CHEM 175 course sequence covers the same general topics as CHEM 130/ CHEM 135, but with an increased emphasis on modern applications of chemistry. Students with credit in CHEM 110 will have two hours added on to their total number of hours required for graduation. Prerequisite: Eligibility for MATH 115.

CHEM 175. Chemistry for the Chemical Sciences II. 5 Credits. N LFE
An integrated lecture and laboratory course which is a continuation of CHEM 170. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 with a grade of C- or higher.

CHEM 177. First Year Seminar: ______. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Chemistry. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

CHEM 180. Seminar I. 0.5 Credits. U
Special topics for chemistry majors such as using the chemical literature, educational and professional perspectives, scientific ethics, and undergraduate research opportunities. It is recommended that students take this half-semester course in their freshman or sophomore year. Prerequisite: A declared major in chemistry or consent of instructor.

CHEM 190. Foundations of Chemistry I, Honors. 3 Credits. NP N LFE
CHEM 190, together with corequisite laboratory course CHEM 191, provides an integrated treatment of theoretical and experimental aspects of chemistry for qualified and highly motivated students. It is anticipated that students in CHEM 190 and CHEM 191 plan to take more than one year of chemistry at the college level. Students with credit in CHEM 110 will have two hours added on to their total number of hours required for graduation. Prerequisite: High school chemistry and calculus; at least one of the following: (a) acceptance into the KU Honors Program, (b) an AP exam score in chemistry of 3 or higher, (c) a mathematics ACT score of 30 or higher; or permission of instructor. Corequisite: CHEM 191.

CHEM 191. Foundations of Chemistry I Laboratory, Honors. 2 Credits. NP N LFE
Laboratory course for students enrolled in CHEM 190. Prerequisite: Corequisite: CHEM 190.

CHEM 195. Foundations of Chemistry II, Honors. 3 Credits. NP N LFE
CHEM 195 and corequisite laboratory course CHEM 196 continue the integrated theoretical and experimental exploration of chemistry topics for qualified and highly motivated students. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 and CHEM 191 with a grade of C- or better, and permission of the instructor. Corequisite: CHEM 196.

CHEM 196. Foundations of Chemistry II Laboratory, Honors. 2 Credits. NP N LFE
Laboratory course for students enrolled in CHEM 195. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 and CHEM 191 with a grade of C- or better, and permission of the instructor. Corequisite: CHEM 195.

CHEM 201. Laboratory Safety in the Chemical Sciences. 1 Credits. U
A course for undergraduate students focusing on chemical safety in modern laboratories. The course will feature practical instruction in lab safety, an introduction to safety resources, and group discussions centered around case studies. Required for all B.S. majors, and for all B.A. majors participating in undergraduate research. Students with credit in CHEM 201 may not take CHEM 701 for credit. Prerequisite: CHEM 135, CHEM 175, or CHEM 195.

CHEM 250. Mathematical Methods for the Chemical Sciences. 3 Credits. NM
A one-semester course covering advanced mathematical methods necessary for upper-level physical and analytical chemistry courses. Topics include complex numbers and functions, ordinary and partial differential equations, linear algebra and probability and statistics with special emphasis on applications to problems in the chemical sciences. Prerequisite: Corequisite: MATH 127.

CHEM 330. Organic Chemistry I. 3 Credits. N
A study of the structure and reactivity of selected classes of organic compounds. CHEM 330 is the first course of a two-semester sequence. Prerequisite: CHEM 135, CHEM 175, or CHEM 195 with a grade of C- or higher.

CHEM 331. Organic Chemistry I Laboratory. 2 Credits. U LFE
Emphasis on basic techniques for the preparation, separation, and purification of organic compounds. Required for a major in chemistry and by those departments and programs specifying a complete undergraduate organic chemistry course. Prerequisite: CHEM 330 or CHEM 380 with a grade of C- or higher or concurrent enrollment in CHEM 330 or CHEM 380.

CHEM 335. Organic Chemistry II. 3 Credits. N
A continuation of CHEM 330, intended for students who want further training in organic chemistry. Prerequisite: CHEM 330 or CHEM 380 with a grade of C- or higher.

CHEM 336. Organic Chemistry II Laboratory. 2 Credits. U LFE
More advanced organic laboratory techniques with emphasis on modern spectroscopic methods for determining the structure and purity of organic compounds. Prerequisite: CHEM 331 and CHEM 335 or CHEM 385 with a grade of C- or higher or concurrent enrollment in CHEM 335 or CHEM 385.

CHEM 380. Organic Chemistry I, Honors. 3 Credits. N
This is the first half of a two-semester sequence in organic chemistry for students with strong records in previous chemistry courses. Recommended for members of the University Honors Program and students majoring in chemistry or related fields. Prerequisite: CHEM 135, CHEM 175, or CHEM 195 with a grade of C- or higher and permission of the instructor.

CHEM 385. Organic Chemistry II, Honors. 3 Credits. N
This is the second course in a two-semester sequence in organic chemistry for students with strong records in previous chemistry courses. Recommended for members of the University Honors Program and
students majoring in chemistry or related fields. Prerequisite: CHEM 330 or CHEM 380 with a grade of C- or higher, and permission of the instructor.

CHEM 390. Topics in Chemistry, Honors: _____ 1-5 Credits. N
A course on special topics in chemistry, given as the need arises. Course content applies and expands upon general chemistry concepts, such as chemical thermodynamics, kinetics, and bonding. In this course, students gain knowledge in a topic of contemporary interest in chemistry, are challenged to examine the experimental and theoretical basis of this knowledge, and consider the broader impacts of this knowledge outside the discipline. Course may be repeated for different topics. Prerequisite: CHEM 135, CHEM 175 or CHEM 195 and membership in the University Honors Program; or permission of instructor. Each section may have additional prerequisites to be determined by the instructor.

CHEM 400. Analytical Chemistry. 3 Credits. N
Principles of analytical chemistry with emphasis on the fundamental methods used for chemical analysis. Topics include experimental error, statistical analysis, method development, sampling, calibration methods, spectrophotometry, chromatography, mass spectrometry, and electrochemistry. Prerequisite: One semester of organic chemistry and one semester of organic chemistry laboratory, or permission of instructor. Corequisite: CHEM 401.

CHEM 401. Analytical Chemistry Laboratory. 2 Credits. U
Experiments illustrate fundamental principles of chemical analysis methods. The course serves as an introduction to advanced instrumental methods of analysis. Prerequisite: One semester of organic chemistry and one semester of organic chemistry lab, or permission of instructor. Corequisite: CHEM 400.

CHEM 450. Directed Readings/Laboratory in Chemistry. 1-3 Credits. N
Individual and supervised study or laboratory work on special topics or problems in chemistry. Prerequisite: Ten hours of chemistry and a minimum overall grade-point average of 2.0 or consent of department.

CHEM 498. Undergraduate Research. 1-2 Credits. N
A research course for Chemistry majors, consisting of experimental or theoretical work in chemistry or a closely related field. A final report must be submitted to the instructor at the end of the semester. Prerequisite: CHEM 201, or CHEM 201 concurrently, or documentation of appropriate laboratory safety training.

CHEM 510. Biological Physical Chemistry. 3 Credits. N
A one-semester course that explores the fundamentals of physical chemistry with specific application to biological systems. The basic principles of thermodynamics, chemical kinetics, quantum mechanics and spectroscopy will be introduced, and their application to aqueous solutions and biochemical systems will be emphasized. This class consists of lecture only. Students requiring laboratory experience should enroll in CHEM 520. Prerequisite: One semester of organic chemistry, two semesters of calculus, and two semesters of physics.

CHEM 520. Biological Physical Chemistry with Laboratory. 5 Credits. N
A one-semester integrated lecture and laboratory course that explores the fundamentals of physical chemistry with specific application to biological systems. The basic principles of thermodynamics, chemical kinetics, quantum mechanics and spectroscopy will be introduced, and their applications to aqueous solutions and biochemical systems will be emphasized. Students who do not wish to take the laboratory component should enroll in CHEM 510. Prerequisite: One semester of organic chemistry, two semesters of calculus and two semesters of physics.

CHEM 525. Physical Chemistry for Engineers. 4 Credits. N
An introduction to the basic principles of quantum mechanics, atomic and molecular structure, molecular rotations and vibrations, statistical mechanics, statistical thermodynamics and reaction dynamics. Prerequisite: Two semesters of general chemistry; PHSX 212; MATH 127, MATH 220 or MATH 320 and MATH 290 or consent of instructor.

CHEM 530. Physical Chemistry I. 4 Credits. N
An introduction to the basic principles of quantum mechanics, atomic and molecular structure, molecular rotations and vibrations, group theory, spectroscopy, and statistical mechanics. Prerequisite: Two semesters of general chemistry; PHSX 212; MATH 127; and CHEM 250 or MATH 220 or MATH 320 and completion of, or concurrent enrollment in MATH 290) or consent of instructor.

CHEM 535. Physical Chemistry II. 3 Credits. N
Emphasizes the thermodynamics of molecular systems with application to the structure and properties of gases, liquids, solids, materials, statistical thermodynamics, chemical kinetics, and reaction dynamics. Prerequisite: CHEM 530 or consent of instructor.

CHEM 537. Physical Chemistry Laboratory. 3 Credits. U LFE
Experiments in physical chemistry, with emphasis on the fundamental principles of quantum mechanics, spectroscopy, thermodynamics and kinetics as applied to chemical systems. Prerequisite: CHEM 401 and CHEM 530 and concurrent enrollment in CHEM 535.

CHEM 560. Introduction to Chemical Biology. 3 Credits. N
A course for students with an interest in the application of chemical principals and methods to address problems in biology at the molecular level. The fundamentals of biomolecules (nucleic acids, proteins, lipids, and carbohydrates) and techniques of chemical biology research will be discussed. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHEM 760. Prerequisite: CHEM 335 and CHEM 336 with grades of C- or higher and completion of, or concurrent enrollment in BIOL 600 or BIOL 636, or consent of instructor.

CHEM 598. Research Methods. 3 Credits. N LFE
An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling, laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UKanTeach program. (Same as PHSX 598.) Prerequisite: At least one course at the 100 level or above in CHEM, MATH, or PHSX.

CHEM 635. Instrumental Methods of Analysis. 2 Credits. U
Theory and application of instrumental methods to modern analytical problems. Topics covered include atomic and molecular spectroscopy, electrochemistry, mass spectrometry, and separations. Prerequisite: CHEM 400 and CHEM 401 and one semester of physical chemistry laboratory, or permission of instructor.

CHEM 636. Instrumental Methods of Analysis Laboratory. 3 Credits. U LFE
Theory and application of instrumental methods to modern analysis problems. Experiments covered in this capstone laboratory course include atomic and molecular spectroscopy, electrochemistry, and separation methods. Prerequisite: CHEM 400 and CHEM 401, and one semester of physical chemistry laboratory; or permission of instructor. Prerequisite or Corequisite: CHEM 635.

CHEM 660. Systematic Inorganic Chemistry. 3 Credits. N
A systematic study of the elements and their compounds, emphasizing the relationship between properties of substances and their atomic and
molecular structures and the positions of the elements in the periodic systems. Prerequisite: CHEM 510, CHEM 520, or CHEM 530.

CHEM 661. Advanced Inorganic Laboratory. 2 Credits. U LFE
Experiments concerning the synthesis and characterization of inorganic compounds. Prerequisite: CHEM 660 or concurrent enrollment in CHEM 660.

CHEM 680. Topics in Chemistry: ____. 1-5 Credits. N
Courses on special topics in chemistry, given as the need arises. Course may be repeated for different topics. Prerequisite: 20 hours of Chemistry. Each section may have additional prerequisites to be determined by the instructor.

CHEM 695. Seminar II. 0.5 Credits. U
Special topics and presentations by students and faculty in areas of current interest such as recent advancements in chemistry, professional development, societal issues facing chemists, and reports of ongoing research. This half-semester course is recommended for seniors. Prerequisite: CHEM 180.

CHEM 698. Undergraduate Capstone Research. 1-2 Credits. N
An undergraduate capstone research experience in chemistry or a closely related field, consisting of experimental or theoretical work on a topic developed in consultation with the faculty research advisor. A total of 3 credit hours must be accumulated for the course to count toward KU Core Goal 6. Students will submit a final report to the Chemistry Department during the semester in which the third credit hour is completed, and also present their results in a public forum. Prerequisite: CHEM 201, or CHEM 201 concurrently (or documentation of appropriate laboratory safety training), CHEM 335 (or CHEM 385) and CHEM 336 with grades of C or higher, and permission of the Chemistry Department.

CHEM 699. Undergraduate Honors Research. 1-2 Credits. N
An undergraduate research experience in chemistry or a closely related field for students in the Chemistry Department Honors Program, consisting of experimental or theoretical work on a topic developed in consultation with the faculty research advisor. A minimum of 4 credit hours must be accumulated to satisfy Chemistry Department Honors requirements, and 3 of those credit hours will satisfy KU Core Goal 6. At the completion of the research, a written thesis, and an oral defense of the thesis, will be required. Prerequisite: Acceptance to the Chemistry Department Honors Program; CHEM 201, or CHEM 201 concurrently, or documentation of appropriate laboratory safety training.

CHEM 700. Responsible Scholarship in the Chemical Sciences. 1 Credits.
A course for beginning graduate students with particular emphasis on scholarship issues relevant to the chemical sciences. Topics will include scientific ethics, codes of conduct, record keeping, authorship, and the responsibilities of a scientist. Group discussions, particularly centered around case studies, will be a significant component of the course.

CHEM 701. Laboratory Safety in the Chemical Sciences. 1 Credits.
A course for beginning graduate students focusing on chemical safety in modern laboratories. The course will feature practical instruction in lab safety, an introduction to safety resources, and group discussions centered around case studies.

CHEM 718. Mathematical Methods in Physical Sciences. 3 Credits.
Review of all complex variable theory; introduction to the partial differential equations of physics; Fourier analysis; and special functions of mathematical physics. (Same as PHSX 718.) Prerequisite: Two semesters of junior-senior mathematics.

CHEM 720. Fundamentals and Methods of Analytical Chemistry. 3 Credits.
An introductory graduate level course in analytical chemistry, in which the principles of electrochemistry, spectroscopy, and separation science are utilized to solve analytical problems in inorganic, organic and biochemical chemistry. Prerequisite: An undergraduate course in analytical chemistry, a year of organic chemistry, and a year of physical chemistry.

CHEM 730. Coordination and Organometallic Chemistry. 3 Credits.
An examination of the basic foundations of coordination chemistry and organometallic chemistry including symmetry methods, bonding, magnetism, and reaction mechanisms. Prerequisite: Two semesters of organic chemistry and one semester of physical chemistry in which quantum chemistry is introduced. The latter course may be taken concurrently with CHEM 730.

CHEM 740. Principles of Organic Reactions. 3 Credits.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include acid and base properties of functional groups; qualitative aspects of strain, steric, inductive, resonance, and solvent effects on reactivity; stereo-chemistry and conformations; an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of some important classes of mechanisms. Prerequisite: Two semesters of undergraduate organic and one semester of physical chemistry or concurrent enrollment.

CHEM 742. Spectroscopic Identification of Organic Compounds. 3 Credits.
The use of techniques such as infrared, nuclear magnetic resonance, and ultraviolet spectroscopy, and mass spectrometry for elucidating the structure of organic molecules. A lecture and workshop course. Prerequisite: CHEM 626 and CHEM 627.

CHEM 750. Introduction to Quantum Mechanics. 3 Credits.
An introduction to the basic principles of quantum theory relevant to atomic and molecular systems. Topics include operators and operator algebra, matrix theory, eigenvalue problems, postulates of quantum mechanics, the Schrodinger equation, angular momentum, electronic structure, molecular vibrations, approximation methods, group theory, and the foundations of spectroscopy. Prerequisite: Two semesters of physical chemistry.

CHEM 760. Introduction to Chemistry in Biology. 3 Credits.
A comprehensive introduction to the application of chemistry to address problems in biology at the molecular level. The fundamentals of biomolecules (nucleic acids, proteins, lipids and carbohydrates) and techniques of chemical biology research will be discussed. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHEM 560.

CHEM 800. Research. 1-10 Credits.
Original investigation on the graduate level.

CHEM 810. Colloquium: _____. 1 Credits.
Colloquia on various topics of current interest are presented by students, faculty, and visiting scientists.

CHEM 816. Careers in the Biomedical Sciences. 1 Credits.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Graded on a satisfactory/unsatisfactory basis. (Same as BIOL 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor.
CHEM 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Credits.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student.

CHEM 820. Analytical Separations. 3 Credits.
An advanced treatment of analytical separations techniques. The theory of separation science will be augmented with discussion of practical aspects of instrumentation and experiment design. Prerequisite: CHEM 720.

CHEM 822. Electrochemical Analysis. 3 Credits.
An advanced treatment of selected electroanalytical techniques and methodology. Prerequisite: CHEM 720.

CHEM 824. Spectrochemical Methods of Analysis. 3 Credits.
General concepts of encoding chemical information as electromagnetic radiation; major instrumental systems for decoding, interpretation, and presentation of the radiation signals; atomic emission, absorption, and fluorescence; ultraviolet, visible, infrared, and microwave absorption; molecular luminescence; scattering methods; mass spectrometry; magnetic resonance; automated spectrometric systems. Prerequisite: CHEM 720.

CHEM 826. Mass Spectrometry. 3 Credits.
An introduction to mass spectrometry. The various ionization techniques and mass analyzers will be discussed, and many examples of different mass spectrometric applications will be introduced. Prerequisite: CHEM 720.

CHEM 828. Bioanalysis. 3 Credits.
A course covering important aspects in modern chemical measurement with particular emphasis placed on bioanalysis. This course will survey the modern analytical challenges associated with the ongoing efforts in genomics and proteomics and discuss future trends in methods in instrumentation. Prerequisite: CHEM 720.

CHEM 830. Structure, Bonding and Spectroscopic Methods in Inorganic Chemistry. 3 Credits.
An introduction of quantum and group theories in relation to bonding and physicochemical properties of inorganic substances. Topics include vibrational and electronic spectroscopies, magnetism, and inorganic photochemistry. Prerequisite: CHEM 730.

CHEM 832. Inorganic Reaction Mechanisms and Catalysis. 3 Credits.
Mechanistic aspects of transition metal chemistry including substitution reactions, electron transfer reactions, rearrangement reactions, ligand reactions and inorganic photochemistry. Principles and applications of heterogeneous and homogeneous catalytic processes emphasizing catalysis at transition metal centers. Prerequisite: CHEM 730.

CHEM 840. Physical Organic Chemistry. 3 Credits.
An examination of the methods used to probe the mechanisms of organic reactions and of the chemistry of some important reactive intermediates. Topics will include isotope effects, kinetics, linear free energy relationships, solvent effects, a continuing discussion of orbital symmetry, rearrangements, carbocations, carbanions, carbenes, radicals, excited states, and strained molecules. Prerequisite: CHEM 740.

CHEM 842. Organic Synthesis I. 3 Credits.
A discussion of fundamental reactions for the formation of carbon-carbon bonds, oxidation, reduction, and functional group interchange. Prerequisite: CHEM 740.

CHEM 844. Problem Solving in Organic Chemistry. 1 Credits.
A course designed to develop a student's ability to apply fundamental concepts of mechanistic organic and organometallic chemistry, physical organic chemistry, bioorganic chemistry, synthetic organic reactions and techniques for structure elucidation. Students will propose solutions to practice problems mimicking challenges that arise in contemporary research in organic chemistry. The format includes interactive problem-solving discussions led by faculty and peers and monthly written examinations. May be repeated up to three times until the student has passed at least four of the written exams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: CHEM 740 or permission of instructor.

CHEM 850. Advanced Quantum Mechanics. 3 Credits.
The advanced mathematical and physical principles of quantum mechanics relevant to atomic and molecular systems. Topics may include abstract vector spaces and representations, time-dependent quantum dynamics, electronic structure theory, density matrices, second-quantization, advanced group theory, path integrals, and scattering theory. Prerequisite: CHEM 750 or its equivalent.

CHEM 852. Statistical Thermodynamics. 3 Credits.
Thermodynamics and introduction to equilibrium statistical mechanics with emphasis on problems of chemical interest. The course consists of two roughly equal parts: 1) An advanced overview of the laws and concepts of thermodynamics with application to specific problems in phase and chemical equilibria and 2) An introduction to equilibrium statistical mechanics for both classical and quantum systems. Prerequisite: CHEM 750 or its equivalent.

CHEM 854. Chemical Kinetics and Dynamics. 3 Credits.
A study of the rates, mechanisms, and dynamics of chemical reactions in gases and liquids. Topics include an advanced overview of classical kinetics, reaction rate theories (classical collision theory, transition-state theory and introductory scattering theory), potential energy surfaces, molecular beam reactions, photochemistry, Marcus electron transfer theory and other areas of current interest. Prerequisite: CHEM 750 or its equivalent.

CHEM 856. Molecular Spectroscopy. 3 Credits.
Quantitative molecular spectroscopy and its chemical applications. The basic principles of the molecular energy levels, selection rules and spectral transition intensities will be discussed and applied to rotational, vibrational, electronic, and nuclear magnetic spectroscopy. Linear and nonlinear spectroscopies will be addressed. Prerequisite: CHEM 750 or its equivalent.

CHEM 860. Principles and Practice of Chemical Biology. 3 Credits.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomes, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor.

CHEM 899. Master's Thesis. 1-10 Credits.
Research work (either experimental or theoretical) in chemistry for students working toward the M.S. degree. Graded on a satisfactory progress/limited progress/no progress basis.

CHEM 900. Advanced Research. 1-10 Credits.
Original investigation in chemistry at the graduate level. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Advancement to doctoral candidacy.

CHEM 914. Computational Methods in Physical Sciences. 3 Credits.
Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document computer programs to solve physical problems. (Same as ASTR 815 and PHSX 815.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above.

CHEM 930. Bioinorganic Chemistry. 3 Credits.
A survey of metalloproteins and metalloenzymes, their structures and functions, including recent advances in biomimetic modeling, small molecule activation in biological systems, and related physical methods. Prerequisite: CHEM 832.

CHEM 942. Organic Synthesis II. 3 Credits.
A survey of important techniques in organic chemistry with respect to scope, limitations, mechanism, and stereochemistry. Emphasis will be placed on new synthetic methods and application of such methods to the synthesis of structurally interesting compounds, particularly natural products. Prerequisite: CHEM 842.

CHEM 950. Advanced Statistical Mechanics. 3 Credits.
Advanced equilibrium statistical mechanics and introduction to nonequilibrium statistical mechanics. Topics include: the theory of liquids, critical phenomena linear response theory and time correlation functions, Langevin dynamics, and molecular hydrodynamics. (Same as PHSX 971.) Prerequisite: CHEM 909 or equivalent.

CHEM 980. Advanced Topics in Chemistry: ____. 2-3 Credits.
A course covering special advanced topics in chemistry not included in other graduate courses. One or more topics will be covered in a given semester and an announcement of the course content and prerequisites will be made at the end of the previous semester. This course may be taken more than once when the topic varies.

CHEM 999. Doctoral Dissertation. 1-10 Credits.
Research work (either experimental or theoretical) in chemistry for students working toward the Ph.D. degree. Graded on a satisfactory progress/limited progress/no progress basis.

Bachelor of Arts in Chemistry

Why study chemistry?
At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry, including emerging fields of microfluidics, precision medicine and sustainable catalysis.

Undergraduate Program
The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Chemistry Programs
The B.A. degree is for the student who wants to understand the fundamental principles of chemistry and to study a number of other fields. The B.S. degree prepares students for graduate school and professional careers. Both are based on a high school background that includes at least 1½ years of algebra and 1 year of geometry. High school courses in chemistry and physics are desirable but are not required. Many chemistry majors are preparing for medical school or for graduate study in chemistry and related fields. For graduate school, the common body of knowledge in the B.A. program is the minimum prerequisite. For premedical students, much of the knowledge will be important in their careers. Even more important, however, is the training in logical thinking, drawing conclusions from experimental observations, and digesting and understanding scientific information.

First- and Second-Year Preparation
Because study in chemistry requires preparation in mathematics and physics as well as a structured series of courses in chemistry, students should begin meeting major requirements in the first year. Students planning to major in chemistry should consult a chemistry department major advisor during their first semester to develop a 4-year plan for degree completion. It is particularly important to take CHEM 170 (or CHEM 130 or CHEM 190 and CHEM 191) and CHEM 175 (or CHEM 135 or CHEM 195 and CHEM 196) in the first year and CHEM 330 or (CHEM 380) and CHEM 331 in the second year. For those seeking a B.A. degree, it is also important to complete two semesters of calculus and two semesters of physics during the first two years. Minimum
requirements in these subject areas for the B.A. degree are MATH 115, MATH 116, PHSX 114 and PHSX 115.

**Requirements for the B.A. Major**

In addition to the common College requirements for the B.A., a minimum of 29 hours in chemistry (including 5 hours each of analytical, organic, and physical chemistry lecture and laboratory) and one year each of calculus and physics (prerequisites for physical chemistry) are required. These courses fulfill the requirements:

Courses that fulfill KU Core Goal 6 are CHEM 636 Instrumental Methods of Analysis Laboratory or 3 credits of CHEM 698 or CHEM 699. Students choosing CHEM 636 will be required to take CHEM 635 as the pre or co-requisite.

**Biological Chemistry Option**

This option is available to students interested in the biological applications of chemistry. The curriculum is compatible with many pre-health-professions programs and prepares the student for graduate study or career opportunities.

In addition to all of the requirements for the regular B.A. major, the following courses are required:

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**
  Satisfied by 35-40 hours of major courses.

- **Major Hours in Residence**
  Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Junior/Senior Hours**
  Satisfied by a minimum of 23.5 hours from junior/senior courses (300+) in the major.

- **Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator. (http://clas.ku.edu/undergrad/tools/gpa/)

Sample 4-year plans for the BA degree with the following concentrations, can be found here: Chemistry (https://catalog.ku.edu/liberal-arts-sciences/chemistry/BA/general-chemistry/), Biological Chemistry (https://catalog.ku.edu/liberal-arts-sciences/chemistry/BA/biological-chemistry/), or by using the left-side navigation.

Sample 4-year plans for the BS degree in Chemistry can be found by using the left-side navigation.

### Departmental Honors

Undergraduates may apply for admission to the departmental honors program after completion of an analytical, organic, and physical chemistry course but no sooner than the beginning of the junior year. Highly motivated and superior B.A. and B.S. students are admitted to the honors program. Honors in chemistry are awarded to students who have been admitted to the program and who have completed the following requirements with superior performance, including a major GPA of 3.5.

1. At least 2 semesters of CHEM 699 (4-8 hours total) resulting in a written thesis.
2. Evaluation and approval of the thesis by a faculty advisory committee.
3. Oral presentation of the thesis results at a special departmental seminar or other approved forum.

For an application form and further information, consult the department office.

### BA in Chemistry

Below is a sample 4-year plan for students pursuing the standard BA in Chemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, prior to freshman year, fall semester.

#### Total Hours 120

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CHEM 170 requires eligibility for MATH 115 in order to enroll.
Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BA in Chemistry with concentration in Biological Chemistry

Below is a sample 4-year plan for students pursuing the BA in Chemistry with a Biological Chemistry option. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to freshman year, fall semester.

Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CHEM 170 requires eligibility for MATH 115 in order to enroll.
3. BIOL 150 or BIOL 151 is a pre-requisite for the elective courses needed to fulfill the Biological Chemistry concentration elective requirement.
4. Choose from a list of electives approved to count for the Biological Chemistry elective requirement. See the degree requirements (http://
The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Chemistry Programs

The B.S. degree prepares students for graduate school and professional careers. The B.A. degree is for the student who wants to understand the fundamental principles of chemistry and to study a number of other fields. Both are based on a high school background that includes at least 1½ years of algebra and 1 year of geometry. High school courses in chemistry and physics are desirable but are not required. Many chemistry majors are preparing for medical school or for graduate study in chemistry and related fields. For graduate school, the common body of knowledge in the B.A. program is the minimum prerequisite. For premedical students, much of the knowledge will be important in their careers. Even more important, however, is the training in logical thinking, drawing conclusions from experimental observations, and digesting and understanding scientific information.

First- and Second-Year Preparation

Because study in chemistry requires preparation in mathematics and physics as well as a structured series of courses in chemistry, students should begin meeting major requirements in the first year. Students planning to major in chemistry should consult a chemistry department major advisor during their first semester to develop a 4-year plan for degree completion. It is particularly important to take CHEM 170 (or CHEM 130 or CHEM 190 & CHEM 191) and CHEM 175 (or CHEM 135 or CHEM 195 & CHEM 196) in the first year and CHEM 201, CHEM 330 (or CHEM 380) and CHEM 331 in the second year. For those seeking a B.S. degree it is also important to complete CHEM 335 (or CHEM 385) and CHEM 336 in the second year as well as their mathematics preparation (MATH 125, 126, 127 and CHEM 250) and physics preparation (PHSX 211 & PHSX 216, and PHSX 212 & PHSX 236) in the first 2 years.

Requirements for the B.S. Degree

General Education Requirements

All students must complete the KU Core.
### Chemistry Prerequisite or Co-requisite Knowledge

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

### Major Hours & Major GPA

KU Core Goal 6 is satisfied by either CHEM 636 Instrumental Methods of Analysis Laboratory, or 3 credit hours of CHEM 698 or CHEM 699.

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**
  - Satisfied by 47 hours of major courses.

- **Major Hours in Residence**
  - Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Junior/Senior Hours**
  - Satisfied by a minimum of 35.5 hours from junior/senior courses (300+) in the major.

- **Major Junior/Senior Graduation GPA**
  - Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator. ([http://clas.ku.edu/undergrad/tools/gpa/](http://clas.ku.edu/undergrad/tools/gpa/))

### Biological Chemistry Option

This option is available to students interested in the biological applications of chemistry. The curriculum is compatible with many pre-health professions programs and prepares the student for graduate study or career opportunities.

### General Education Requirements

All students must complete the KU Core.
**Chemistry Prerequisite or Co-requisite Knowledge**

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by one of the following:
- MATH 125 Calculus I
- MATH 145 Calculus I, Honors

Calculus II. Satisfied by one of the following:
- MATH 126 Calculus II
- MATH 146 Calculus II, Honors

Calculus III. Satisfied by one of the following:
- MATH 127 Calculus III
- MATH 147 Calculus III, Honors

Mathematical Methods for the Chemical Sciences. Satisfied by:
- CHEM 250 Mathematical Methods for the Chemical Sciences

General Physics I. Satisfied by one of the following:
- PHSX 211 General Physics I
- & PHSX 216 and General Physics I Laboratory
- PHSX 213 General Physics I Honors

General Physics II. Satisfied by one of the following:
- PHSX 212 General Physics II
- & PHSX 236 and General Physics II Laboratory
- PHSX 214 General Physics II Honors

**Chemistry Core Knowledge and Skills**

Majors must complete courses as indicated in the following areas:

Chemistry for the Chemical Sciences I. Satisfied by one of the following:
- CHEM 170 Chemistry for the Chemical Sciences I
- CHEM 130 General Chemistry I
- CHEM 190 Foundations of Chemistry I, Honors
  & CHEM 191 and Foundations of Chemistry I Laboratory, Honors

Chemistry for the Chemical Sciences II. Satisfied by one of the following:
- CHEM 175 Chemistry for the Chemical Sciences II
- CHEM 135 General Chemistry II
- CHEM 195 Foundations of Chemistry II, Honors
  & CHEM 196 and Foundations of Chemistry II Laboratory, Honors

Seminar I. Satisfied by:
- CHEM 180 Seminar I

Laboratory Safety in the Chemical Sciences. Satisfied by:
- CHEM 201 Laboratory Safety in the Chemical Sciences

Organic Chemistry I (Lecture and Lab). Satisfied by:
- CHEM 330 Organic Chemistry I
  or CHEM 38 Organic Chemistry I, Honors
- CHEM 331 Organic Chemistry I Laboratory

Organic Chemistry II (Lecture and Lab). Satisfied by:
- CHEM 335 Organic Chemistry II
  or CHEM 38 Organic Chemistry II, Honors

Chemical Analysis (Lecture and Lab). Satisfied by:
- CHEM 336 Organic Chemistry II Laboratory

Analytical Chemistry (Lecture and Lab). Satisfied by:
- CHEM 400 Analytical Chemistry & CHEM 401 and Analytical Chemistry Laboratory

**Biological Chemistry Core Knowledge and Skills**

Biochemistry. Satisfied by:
- BIOL 636 Biochemistry I
- BIOL 638 Biochemistry II

Biochemistry Laboratory. Satisfied by:
- BIOL 637 Introductory Biochemistry Laboratory

**Biological Chemistry Required Electives**

Majors choosing this option should select 1 elective (3 hours) from the following:
- BIOL 350 Principles of Genetics
- BIOL 400 Fundamentals of Microbiology
- BIOL 416 Cell Structure and Function

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 47 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 35.5 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
Chemical Physics Option

This option allows students to focus on the theoretical basis of chemistry. Students are prepared for graduate programs or employment.

General Education Requirements

All students must complete the KU Core.

<table>

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by one of the following:

- MATH 125 Calculus I
- or MATH 141: Calculus I, Honors

Calculus II. Satisfied by one of the following:

- MATH 126 Calculus II
- or MATH 141: Calculus II, Honors

Calculus III. Satisfied by one of the following:

- MATH 127 Calculus III
- or MATH 141: Calculus III, Honors

Differential Equations. Satisfied by one of the following:

- MATH 220 Applied Differential Equations
- MATH 320 Elementary Differential Equations

Elementary Linear Algebra. Satisfied by:

- MATH 290 Elementary Linear Algebra

General Physics I. Satisfied by one of the following:

- PHSX 211 General Physics I
- & PHSX 216 and General Physics I Laboratory
- PHSX 213 General Physics I Honors

General Physics II. Satisfied by one of the following:

- PHSX 212 General Physics II
- & PHSX 236 and General Physics II Laboratory
- PHSX 214 General Physics II Honors

Biochemistry. Satisfied by one of the following:

- BIOL 600 Introductory Biochemistry, Lectures
- BIOL 636 Biochemistry I

Chemistry Core Knowledge and Skills

Majors must complete courses as indicated in the following areas:

Chemistry for the Chemical Sciences I. Satisfied by one of the following:

- CHEM 170 Chemistry for the Chemical Sciences I
- CHEM 130 General Chemistry I
- CHEM 190 Foundations of Chemistry I, Honors
- & CHEM 191 and Foundations of Chemistry I Laboratory, Honors

Chemistry for the Chemical Sciences II. Satisfied by one of the following:

- CHEM 175 Chemistry for the Chemical Sciences II
- CHEM 135 General Chemistry II
- CHEM 195 Foundations of Chemistry II, Honors
- & CHEM 196 and Foundations of Chemistry II Laboratory, Honors

Seminar I. Satisfied by:

- CHEM 180 Seminar I
- Laboratory Safety in the Chemical Sciences. Satisfied by:
- CHEM 201 Laboratory Safety in the Chemical Sciences
- Organic Chemistry I (Lecture and Lab). Satisfied by:
- CHEM 330 Organic Chemistry I
- or CHEM 381 Organic Chemistry I, Honors
- CHEM 331 Organic Chemistry I Laboratory
- Organic Chemistry II (Lecture and Lab). Satisfied by:
- CHEM 335 Organic Chemistry II
- or CHEM 382 Organic Chemistry II, Honors
- CHEM 336 Organic Chemistry II Laboratory
- Analytical Chemistry (Lecture and Lab). Satisfied by:
- CHEM 400 Analytical Chemistry
- & CHEM 401 and Analytical Chemistry Laboratory
- Physical Chemistry I. Satisfied by:
- CHEM 530 Physical Chemistry I
- Physical Chemistry II. Satisfied by:
- CHEM 535 Physical Chemistry II
- Physical Chemistry Laboratory. Satisfied by:
- CHEM 537 Physical Chemistry Laboratory
- Instrumental Methods of Analysis. Satisfied by:
- CHEM 635 Instrumental Methods of Analysis
- Systematic Inorganic Chemistry. Satisfied by:
- CHEM 660 Systematic Inorganic Chemistry
- Advanced Inorganic Laboratory. Satisfied by:
- CHEM 661 Advanced Inorganic Laboratory
- Seminar II. Satisfied by:
- CHEM 695 Seminar II
- Capstone Experience (Fulfills KU Core Goal 6). Satisfied by one of the following:
- CHEM 636 Instrumental Methods of Analysis Laboratory
- or CHEM 698 Undergraduate Capstone Research
- or CHEM 699 Undergraduate Honors Research

Chemical Physics Core Knowledge and Skills

Majors must complete 2 courses from each of the following groups:

Group I

- PHSX 313 General Physics III
- & PHSX 316 and Intermediate Physics Laboratory I (PHSX 313 and PHSX 316 should be taken concurrently)
- PHSX 518 Mathematical Physics
- PHSX 521 Mechanics I
- PHSX 615 Numerical and Computational Methods in Physics
- PHSX 655 Optics
- PHSX 681 Introduction to Solid State Physics

Group II

- PHSX 531 Electricity and Magnetism
- PHSX 621 Mechanics II
- MATH 646 Complex Variable and Applications
- MATH 647 Applied Partial Differential Equations
- CHEM 698 Undergraduate Capstone Research
- CHEM 750 Introduction to Quantum Mechanics
**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**
  - Satisfied by 47 hours of major courses.

- **Major Hours in Residence**
  - Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Junior/Senior Hours**
  - Satisfied by a minimum of 35.5 hours from junior/senior courses (300+) in the major.

- **Major Junior/Senior Graduation GPA**
  - Satisfied by 47 hours of major courses.

**Departmental Honors**

Undergraduates may apply for admission to the departmental honors program after completion of an analytical, organic, and physical chemistry course but no sooner than the beginning of the junior year. Highly motivated and superior B.A. and B.S. students are admitted to the honors program. Honors in chemistry are awarded to students who have been admitted to the program and who have completed the following requirements with superior performance, including a major GPA of 3.5.

1. At least 2 semesters of CHEM 699 (4-8 hours total) resulting in a written thesis.
2. Evaluation and approval of the thesis by a faculty advisory committee.
3. Oral presentation of the thesis results at a special departmental seminar or other approved forum.

For an application form and further information, consult the department office.

**BS in Chemistry**

Below is a sample 4-year plan for the American Chemical Society Certified BS degree in Chemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 103 or MATH 104 prior to freshman year, fall semester.

**Total Hours 120**

1. CHEM 170 requires eligibility for MATH 115 in order to enroll.
This degree plan assumes students will have the equivalent of KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/). Students who elect to take CHEM 636 must also take the co-requisite course CHEM 635 Instrumental Methods of Analysis.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

BS in Chemistry with concentration in Biological Chemistry

Below is a sample 4-year plan for students pursuing the BS in Chemistry with a concentration in Biological Chemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 103 or MATH 104 prior to freshman year, fall semester.

Total Hours 120

1 CHEM 170 requires eligibility for MATH 115 in order to enroll.
2 Refer to the Course Frequency Chart (https://chem.ku.edu/course-frequency-chart/) to see which semesters Chemistry courses are offered (Honors and upper division courses tend to only be offered once per academic year).
3 Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
4 A Goal 6 course is required to fulfill the KU Core. Students can elect to enroll in CHEM 636 Instrumental Methods of Analysis Laboratory or 3 hours of undergraduate research (CHEM 698 or CHEM 699).
Students who elect to take CHEM 636 must also take the co-requisite course CHEM 635 Instrumental Methods of Analysis.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BS in Chemistry with concentration in Chemical Physics**

Below is a sample 4-year plan for students pursuing the BS in Chemistry with a concentration in Chemical Physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 103 or MATH 104 prior to freshman year, fall semester.

**Total Hours 120**

1. CHEM 170 requires eligibility for MATH 115 in order to enroll.
2. Refer to the Course Frequency Chart (https://chem.ku.edu/course-frequency-chart/) to see which semesters Chemistry courses are offered (Honors and upper division courses tend to only be offered once per academic year).
3. A list of courses that fulfill Group I and Group II can be found on the degree requirements tab of the catalog.
4. Hour requirements (incl. 45 Jr/Sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
5. A Goal 6 course is required to fulfill the KU Core. Students can elect to enroll in CHEM 636 Instrumental Methods of Analysis Laboratory or 3 hours of undergraduate research (CHEM 698 or CHEM 699). Students who elect to take CHEM 636 must also take the co-requisite course CHEM 635 Instrumental Methods of Analysis.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors

### Minor in Chemistry

#### Why study chemistry?

At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry, including emerging fields of microfluidics, precision medicine and sustainable catalysis.

#### Undergraduate Program

The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics and physics, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

#### Requirements for the Minor

The minor allows many non-chemistry majors to obtain a strong, distributed background in the discipline. It is particularly useful for students in STEM fields or pre-professional programs that require at least one year of chemistry coursework but whose career plans would be enhanced by a deeper understanding of the molecular sciences. Due to extensive overlap in required chemistry coursework, the Chemistry minor is not available to students majoring in Biochemistry and Chemical Engineering.

**Code**  **Title**  **Hours**

Chemistry Minor Course Requirements

Students selecting this minor must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td><strong>Mathematics and Physics</strong></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Mathematics: (choose one of the following (MATH 115 &amp; MATH 116 advanced recommended))</td>
<td></td>
</tr>
<tr>
<td>MATH 115 &amp; MATH 116</td>
<td>Calculus I &amp; II</td>
<td>6-12</td>
</tr>
<tr>
<td>MATH 125 &amp; MATH 126 &amp; MATH 127</td>
<td>Calculus I &amp; II &amp; III</td>
<td>6</td>
</tr>
</tbody>
</table>

**Physics:**

(Choose one of the following (PHSX 114 & PHSX 115 recommended))

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHSX 114 &amp; PHSX 115</td>
<td>College Physics I &amp; II</td>
<td>15</td>

<tr>
<td>CHEM 130</td>
<td>General Chemistry I</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 190 &amp; CHEM 191</td>
<td>Foundations of Chemistry I, Honors &amp; Foundations of Chemistry I Laboratory, Honors</td>
<td>10</td>
</tr>
</tbody>
</table>

Chemistry II. Satisfied by one of the following (CHEM 175 recommended):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 175</td>
<td>Chemistry for the Chemical Sciences II</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 135</td>
<td>General Chemistry II</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 195 &amp; CHEM 196</td>
<td>Foundations of Chemistry II, Honors &amp; Foundations of Chemistry II Laboratory, Honors</td>
<td>10</td>
</tr>
</tbody>
</table>

Organic Chemistry I. Satisfied by one of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 330</td>
<td>Organic Chemistry I</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 380</td>
<td>Organic Chemistry I, Honors</td>
<td>5</td>
</tr>
</tbody>
</table>

Organic Chemistry Lab I. Satisfied by:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 331</td>
<td>Organic Chemistry I Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

**Chemistry Required Elective Group I**

Students selecting this minor must complete one of the following:

Analytical Chemistry Lecture and Laboratory. Satisfied by:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 400</td>
<td>Analytical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 401</td>
<td>Analytical Chemistry Laboratory</td>
<td>3</td>
</tr>
</tbody>
</table>

Physical Chemistry Lecture and Lab. Satisfied by one of the following (CHEM 520 recommended):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 520</td>
<td>Biological Physical Chemistry with Laboratory</td>
<td>5</td>
</tr>
<tr>
<td>CHEM 530 &amp; CHEM 535</td>
<td>Physical Chemistry I &amp; Physical Chemistry II</td>
<td>10</td>
</tr>
<tr>
<td>CHEM 537</td>
<td>Physical Chemistry Laboratory</td>
<td>5</td>
</tr>
</tbody>
</table>

**Chemistry Required Elective Group II**

Students selecting this minor must complete one of the following:

Physical Chemistry Lecture. Satisfied by one of the following (CHEM 510 Recommended):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 510</td>
<td>Biological Physical Chemistry or CHEM 53/Physical Chemistry I</td>
<td>5</td>
</tr>
</tbody>
</table>

Systematic Inorganic Chemistry. Satisfied by:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 660</td>
<td>Systematic Inorganic Chemistry</td>
<td>5</td>
</tr>
</tbody>
</table>

*Students who select this option for Elective Group I cannot take CHEM 510 or CHEM 530 from Elective Group II.

#### Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 23-24 hours of minor courses.
from undergraduate to colleague. Mentoring to graduate students and guiding them during their journey.

We have a department of outstanding faculty, each of whom is dedicated to providing chemically related positions requiring an advanced degree. We have a variety of opportunities for the student interested in a career in chemistry. At the University of Kansas, we feel that our program provides exceptional learning of scientific concepts.

Understanding of human activity impact the quality and diversity of life, and the selection of agents and analyze the results of clinical trials. Chemists at KU still make new materials and find new and exciting applications for these compounds, and study how chemical reactions occur. We apply this knowledge to developing compounds that fight disease, to creating cleaner and more efficient chemical processes for industry and to applying chemistry in other manners that benefit society. Striving for a Ph.D. or M.S. degree is about creating and completing an independent, original research project in the chemical sciences. For KU students, this experience becomes the foundation for their future careers in the increasingly diverse scientific enterprise.

Research in Chemistry graduate programs used to take place exclusively in the laboratory. At KU, students apply a broader definition of the term laboratory to include many other types of research environments:

- Medical facilities where researchers study the efficacy of therapeutic agents and analyze the results of clinical trials,
- Computer laboratories where the modeling of molecular structure, chemical reactions and phase changes are contributing enormously to our understanding of the complex systems around us,
- Fields and streams where environmental chemists strive to understand how chemicals derived from natural processes and human activity impact the quality and diversity of life, and
- Classrooms where individuals study strategies for improving student learning of scientific concepts.

Graduate Program

For a student wishing to earn a Doctor of Philosophy (Ph.D.) degree or a Master’s of Science (M.S.) degree in chemistry, the selection of a graduate school is one of the most important career decisions you will make. Your choice will not only determine where you will be during the next several years, but will lay the foundation for your future.

At the University of Kansas, we feel that our program provides exceptional and diverse opportunities for the student interested in a career in cutting-edge research, higher education or any one of a number of chemically related positions requiring an advanced degree. We have a department of outstanding faculty, each of whom is dedicated to providing mentoring to graduate students and guiding them during their journey from undergraduate to colleague.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section (p. 2449) of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Prerequisites

Before beginning graduate work, students should have completed a bachelor’s degree in chemistry or a related field.

Application

Applications for admission are accepted online through the Office of Graduate Studies. Applications must include academic transcripts from all post-secondary schools attended, as well as recommendation letters from 3 individuals familiar with the applicant’s academic background and abilities. Additional materials that are strongly recommended include Graduate Record Examination scores (GRE), a resume/CV and a personal statement describing the applicant’s qualifications and reasons for pursuing a graduate degree in chemistry. Please refer to the Department of Chemistry graduate admissions webpage (https://chem.ku.edu/graduate-admissions/) for more information on our department's graduate admissions.

Non-native speakers of English must meet the English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

Although the preferred submission deadline is December 15, applications must be received by April 15 to be considered for admission in the fall semester.

To apply, complete the online graduate application (https://gradapply.ku.edu/apply/) and upload all requested documents.

Procedure

Completed applications are reviewed by a committee of faculty members from the Department of Chemistry. Offers of admission depend on favorable evaluation of the application materials and an expectation that the student will attain an undergraduate grade-point average of B higher in chemistry and all other natural science and mathematics courses. Admission to the graduate program is contingent upon completion of a bachelor’s degree in chemistry (or a related field) and all other general admission requirements.

M.S. Degree Requirements

Each M.S. candidate must complete the following course requirements:

1. Distribution Requirement: Each student must complete (with a B or higher) a distribution requirement consisting of two courses selected from the following list of introductory courses in the 5 major areas of study:
2. Complete CHEM 700 (Responsible Scholarship in the Chemical Sciences) and CHEM 701 (Laboratory Safety in the Chemical Sciences) with a B or higher.

3. Complete with a B or higher 4 courses at the 700 level or above in chemistry or a related area. The list of courses to be completed must be agreed upon by the student and the student’s research advisor and approved by the Graduate Affairs Committee before the beginning of the student’s second semester in the program. (Changes to the list can only be made with the approval of the student, the research advisor, and the Graduate Affairs Committee.) Note: these 4 courses represent a minimal set and do not preclude the student, with consultation of the research advisor, from taking additional courses in support of the research effort.

The minimum total credit hours required for the master’s degree is 30.

The candidate for the master’s degree must complete a thesis that does not exceed one-third of the credit hours and demands the solution of some research problem in chemistry. The remaining work may consist of additional specialized courses in chemistry or in related fields such as physics, mathematics, microbiology, biochemistry, or chemical engineering. Students completing a master’s thesis in chemical education must take EPSY 715 Understanding Research in Education and EPSY 710 Introduction to Statistical Analysis. Courses from outside the department cannot be from more than 2 departments.

At the time of the completion of the thesis, a candidate for the master’s degree must pass an oral thesis defense (examination) administered by a committee of three members of the department’s Graduate Faculty.

Doctor of Philosophy in Chemistry

Graduate studies in Chemistry at KU are intended to prepare graduate students for any of the multitude of career pathways available to individuals who hold a doctorate in the Chemical Sciences. Graduate studies differ from the undergraduate experience in that each activity and requirement of the graduate program is designed to prepare students to become independent, creative practitioners of Chemistry.

Chemists at KU still make new materials and find new and exciting applications for these compounds, and study how chemical reactions occur. We apply this knowledge to developing compounds that fight disease, to creating cleaner and more efficient chemical processes for industry and to applying chemistry in other manners that benefit society. Striving for a Ph.D. or M.S. degree is about creating and completing an independent, original research project in the chemical sciences. For KU students, this experience becomes the foundation for their future careers in the increasingly diverse scientific enterprise.

Research in Chemistry graduate programs used to take place exclusively in the laboratory. At KU, students apply a broader definition of the term laboratory to include many other types of research environments:

• Medical facilities where researchers study the efficacy of therapeutic agents and analyze the results of clinical trials,
• Computer laboratories where the modeling of molecular structure, chemical reactions and phase changes are contributing enormously to our understanding of the complex systems around us,
• Fields and streams where environmental chemists strive to understand how chemicals derived from natural processes and human activity impact the quality and diversity of life, and
• Classrooms where individuals study strategies for improving student learning of scientific concepts.

Graduate Program

For a student wishing to earn a Doctor of Philosophy (Ph.D.) degree or a Master’s of Science (M.S.) degree in chemistry, the selection of a graduate school is one of the most important career decisions you will make. Your choice will not only determine where you will be during the next several years, but will lay the foundation for your future.

At the University of Kansas, we feel that our program provides exceptional and diverse opportunities for the student interested in a career in cutting-edge research, higher education or any one of a number of chemically related positions requiring an advanced degree. We have a department of outstanding faculty, each of whom is dedicated to providing mentoring to graduate students and guiding them during their journey from undergraduate to colleague.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Prerequisites

Before beginning graduate work, students should have completed a bachelor's degree in chemistry or a related field.

Application

Applications for admission are accepted online through the Office of Graduate Studies. Applications must include academic transcripts from all post-secondary schools attended, as well as recommendation letters from three individuals familiar with the applicant’s academic background and abilities. Additional materials that are strongly recommended include Graduate Record Examination (GRE) scores, and a resume/ CV and personal statement describing the applicant's qualifications and reasons for pursuing a graduate degree in chemistry. Please refer to the Department of Chemistry graduate admissions webpage for more information on our department's graduate admissions.

Non-native speakers of English must meet the English proficiency requirements. (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/)
Although the preferred submission deadline is December 15, applications must be received by April 15 to be considered for admission in the fall semester.

To apply, complete the online graduate application form (https://gradapply.ku.edu/apply/) and upload all requested documents.

Procedure

Completed applications are reviewed by a committee of faculty members from the Department of Chemistry. Offers of admission depend on favorable evaluation of the application materials and an expectation that the student will attain an undergraduate grade-point average of B or higher in chemistry and all other natural science and mathematics courses. Admission to the graduate program is contingent upon completion of a bachelor’s degree in chemistry (or a related field) and all other general admissions requirements.

Ph.D. Degree Requirements

Each Ph.D. aspirant must complete the following course requirements:

1. Distribution Requirement:
   Each student must complete (with a B or higher) a distribution requirement consisting of two courses selected from the following list of introductory courses in the 5 major areas of study:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 720</td>
<td>Fundamentals and Methods of Analytical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 730</td>
<td>Coordination and Organometallic Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 740</td>
<td>Principles of Organic Reactions</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 750</td>
<td>Introduction to Quantum Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 760</td>
<td>Introduction to Chemistry in Biology</td>
<td>3</td>
</tr>
</tbody>
</table>

2. Complete with a B or higher 4 courses at the 700 level or above in chemistry or a related area. The list of courses to be completed must be agreed upon by the student and the student’s research advisor and approved by the Graduate Affairs Committee before the beginning of the student’s second semester in the program. (Changes to the list can only be made with the approval of the student, the research advisor, and the Graduate Affairs Committee.) Note: these 4 courses represent a minimal set and do not preclude the student, with consultation of the research advisor, from taking additional courses in support of the research effort.

3. Complete CHEM 700 (Responsible Scholarship in the Chemical Sciences) and CHEM 701 (Laboratory Safety in the Chemical Sciences) with a B or higher. CHEM 700 satisfies the university’s Responsible Scholarship requirement for the chemistry Ph.D.

   These courses must be satisfactorily completed before a student takes the comprehensive oral examination.

   The aspirant also must fulfill the following requirements:

   1. A comprehensive oral examination must be completed. The student must prepare a written, original research proposal before the examination is scheduled. The proposal must be presented and defended orally at the examination; however, the examination is comprehensive in nature. The student must be prepared for questions on a range of topics in the discipline. It should be noted that requirements (1) and (2) must be completed before the comprehensive oral examination can be taken. Failure to pass the oral examination before the beginning of the fourth year of graduate study leads to ineligibility for support by departmental or research funds.
   2. A dissertation based on original work of high quality in one of the principal fields of chemistry must be completed.
   3. A final oral examination and defense of the dissertation must be completed.

   For further details, see Doctoral Degree Requirements, Doctor of Philosophy (p. 2450) in the Graduate Studies section of the online catalog.

Child Language Doctoral Program

Child Language Doctoral Program

The doctoral program in Child Language offers a specialized degree in this interesting area of study. The program crosses traditional academic boundaries to give students the theoretical, empirical, and methodological competence necessary to study basic and applied issues in language acquisition. This multidisciplinary program is a cooperative endeavor of faculty members from the Departments of Applied Behavioral Science, Clinical Child Psychology, Linguistics, Molecular Biosciences, Psychology, and Speech-Language-Hearing: Sciences and Disorders. In addition, the Child Language Doctoral Program has faculty specializing in genetics of language and speech, and in quantitative methods.

Students study 4 areas:

1. Core theoretical and experimental work on language acquisition,
2. Relevant methods and theories in linguistics and psycholinguistics,
3. Theoretical perspectives on developmental psychology, and
4. The nature of disordered language development and methods and techniques for language intervention.

In addition, new areas of study are offered in genetics of language acquisition and impairments, as well as quantitative methods.

Each student is advised by a support committee of 3 faculty members. Enrollment in a proseminar in language acquisition is required of all students in addition to participation in research activities. Opportunities for individual research projects include the projects of participating faculty members and the research teams of the Schiefelbusch Institute for Life Span Studies, the Speech-Language-Hearing Clinic, and the clinical/research facilities of KU Medical Center.

Graduates are candidates for teaching and research positions, clinical positions providing support to communicatively disabled persons, and research work in business and governmental sectors.

Faculty

We are a cross-disciplinary program and our faculty is involved in research spanning many diverse fields of study. Our portfolios are dynamic and growing, so you will be directed to our most recent information.

An internationally recognized scholar leads the program activities: Mabel L. Rice (https://merrill.ku.edu/people/mabel-l-rice/) is the Director and Graduate Advisor.

Courses

CLDP 709. First Language Acquisition I. 3 Credits.
An introductory course in the acquisition of child language. The course will examine the fundamental claims of modern first language acquisition theories and evaluate these theories by discussing core findings in domains of children's acquisition of speech sounds, words, syntax, semantics, and pragmatics. The course will also cover relevant issues including bilingual first language acquisition, cross-linguistic research, child language processing, language and cognition in child development, methods in child language research, and atypical language development. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students who have taken LING 425. (Same as LING 709.) Prerequisite: Graduate standing or consent of instructor.

CLDP 739. First Language Acquisition II. 3 Credits.
A second semester course in child language which explores the acquisition of morphology, syntax and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. (Same as LING 739.) Prerequisite: LING 709 or consent of instructor.

CLDP 782. Research Methods in Child Language. 3 Credits.
A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as LING 782 and PSYC 782.)

CLDP 799, Proseminar in Child Language. 2 Credits.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, LING 799, PSYC 799 and SPLH 799.)

CLDP 822. Seminar in First Language Acquisition. 3 Credits.
Critical examination of recent theoretical issues and empirical findings in the study of first language acquisition. (Same as LING 822.) Prerequisite: LING 709 or consent of instructor.

CLDP 852. Concepts in Human Molecular Genetics. 3 Credits.
This is a lecture course providing concepts in human genetics, fundamentals of gene pathways, Mendelian and non-Mendelian transmission of genetic diseases, gene regulation and expression, genotype/phenotype correlation, characteristics of human genome, Microarray and DNA cloning. The major goal is to introduce a breadth of genetic concepts to students and at the same time provide recent developments in human genetic research. Students are expected to actively participate in discussion of readings from text books, review articles and research papers. There will be at least 3 lab days to demonstrate methodological like DNA purification from saliva, polymerase chain reaction and DNA electrophoresis. Prerequisite: Consent of instructor.

CLDP 854. Principles for the Study of Genetic Disorders. 3 Credits.
This course explores the fundamentals of disease gene identification methods and tools that are effective to explore the genetic components of inherited disorders. Fundamentals of pedigree based genetic analyses will be covered, along with Mendelian and non-Mendelian inheritance patterns, gene mapping methods, population allele frequencies, heterogeneity, microarray expression, DNA sequencing, recent development in disease gene identification, online human genomic databases, genetic variations, pathogenicity and bioinformatic tools. Recent topics like gene editing, personalized medicine, and pharmacogenetics will be discussed. There will be at least 3 lab days to demonstrate DNA quantification, polymorphism, Sanger sequencing and bioinformatic tools like oligo design, prediction of pathogenicity of protein coding SNPs, and browsing human genome databases. Prerequisite: Consent of instructor.

CLDP 856. Epigenetics of Behavioral and Developmental Disorders. 3 Credits.
This course will include discussion of the epigenetic mechanisms involved in behavioral and developmental disorders. The topics reviewed will be DNA methylation, histone modification, genomic imprinting, neurogenesis, epigenetic control of gene expression, non-coding RNAs, prions, microbiota and epigenetics, influence of environment, life style, diet and exercise on gene regulation and cellular pathways. The topics of pharmacopeigenetics, personalized epigenetics and future perspectives of epigenetics in human health will be covered. Recent development in epigenetic research will be discussed. Prerequisite: Consent of instructor.

CLDP 874. Research Practicum. 1-3 Credits.
A master's level. Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting an experimental investigation on topics related to child language acquisition and disorders, including quantitative methods. May be repeated for up to a maximum of 3 credits. Prerequisite: SPLH 660 or equivalent research methods course.

CLDP 876. Independent Study in Problems of Child Language. 1-6 Credits.
Investigation of special topics by individual master's level students. Paper required. Prerequisite: Consent of instructor.

CLDP 880. Seminar in Child Language: Research Methods. 1-3 Credits.
A seminar devoted to factors affecting children's language acquisition and language impairments, with some attention to theoretical formulations, causal pathways and mechanisms of change. Topics may vary. Prerequisite: Consent of instructor.

CLDP 898. Independent Study in Problems of Child Language: Research Practicum. 1-3 Credits.
Directed research and experimentation for M.A. students in some phase of child language acquisition/disorders. Prerequisite: Consent of instructor.

CLDP 899. Master's Thesis. 1-6 Credits.
Development of Master's Thesis in the area of child language acquisition and/or disorders. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Consent of instructor.

CLDP 944. Multilevel Models for Longitudinal and Repeated Measures Data. 3 Credits.
Applications of the multilevel model (hierarchical linear model, general linear mixed model) for analyzing longitudinal and repeated measures data, including analysis of growth curves, within-person fluctuation, repeated measures research designs with crossed random effects, and simultaneous prediction of multiple sources of variation. Prerequisite: Instructor permission

CLDP 945. Advanced Multilevel Models. 3 Credits.
Advanced applications of the multilevel model (hierarchical linear model, general linear mixed model) for examining multiple sources of variation, models for crossed sources of nesting, three levels of nesting, heterogeneous variances, multivariate outcomes, and non-linear outcomes. Prerequisite: Instructor permission.

CLDP 948. Latent Trait Measurement and Structural Equation Models. 3 Credits.
Contemporary measurement theory and latent variable models for scale construction and evaluation, including confirmatory factor analysis, item response modeling, diagnostic classification models, and structural
equation modeling. (Same as EPSY 906.) Prerequisite: EPSY 905 and instructor permission.

CLDP 964. Seminar in Child Language. 1-3 Credits.
A seminar that considers advanced research problems in investigations of child language and language impairment, diagnosis, longitudinal development, change over time, and causal factors. Paper is required. Prerequisite: Consent of instructor.

CLDP 974. Research Practicum. 3 Credits.
Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting a study related to child language acquisition or impairments, and analyzing outcomes. Prerequisite: Consent of instructor.

CLDP 975. Directed Teaching: Child Language. 1-3 Credits.
Provides experiences in classroom and laboratory instruction under supervision of graduate faculty. Variable credit to reflect amount of instructional responsibility assumed. Prerequisite: Consent of instructor.

CLDP 982. Issues in Scientific Conduct. 3 Credits.
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as PSYC 982 and SPLH 982.)

CLDP 998. Investigation and Conference. 1-8 Credits.
Directed research, experimentation, and/or quantitative analysis for Ph.D. students in topics related to child language acquisition, language impairment, diagnosis, causation, or treatment. Prerequisite: Consent of instructor.

CLDP 999. Doctoral Dissertation. 1-12 Credits.
Doctoral Dissertation in topics related to child language acquisition, language impairment, diagnosis, causation, or treatment. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor.

Master of Arts in Child Language

Child Language Doctoral Program

The doctoral program in Child Language offers a specialized degree in this interesting area of study. The program crosses traditional academic boundaries to give students the theoretical, empirical, and methodological competence necessary to study basic and applied issues in language acquisition. This multidisciplinary program is a cooperative endeavor of faculty members from the Departments of Applied Behavioral Science, Clinical Child Psychology, Linguistics, Molecular Biosciences, Psychology, and Speech-Language-Hearing: Sciences and Disorders. In addition, the Child Language Doctoral Program has faculty specializing in genetics of language and speech, and in quantitative methods.

Students study 4 areas:

1. Core theoretical and experimental work on language acquisition,
2. Relevant methods and theories in linguistics and psycholinguistics,
3. Theoretical perspectives on developmental psychology, and
4. The nature of disordered language development and methods and techniques for language intervention.

In addition, new areas of study are offered in genetics of language acquisition and impairments, as well as quantitative methods.

Each student is advised by a support committee of 3 faculty members. Enrollment in a proseminar in language acquisition is required of all students in addition to participation in research activities. Opportunities for individual research projects include the projects of participating faculty members and the research teams of the Schiefelbusch Institute for Life Span Studies, the Speech-Language-Hearing Clinic, and the clinical/research facilities of KU Medical Center.

Graduates are candidates for teaching and research positions, clinical positions providing service to communicatively disabled persons, and research work in business and governmental sectors.

Faculty

We are a cross-disciplinary program and our faculty is involved in research spanning many diverse fields of study. Our portfolios are dynamic and growing, so you will be directed to our most recent information.

An internationally recognized scholar leads program activities: Mabel L. Rice is the Director and the Graduate Advisor.

Please see the PhD section of the catalog for admission information.

M.A. Degree Requirements

Doctoral students entering the program without the master’s degree must fulfill the following requirements to earn the M.A.:

A minimum of 30 credit hours, including:

• At least 8 credit hours of core courses in language acquisition;
• 10 hours of supplemental courses in linguistics, psycholinguistics, developmental psychology, language intervention, or genetics of language and speech;
• 6 hours of statistics;
• 6 hours of thesis; and
• Continuous enrollment in the child language proseminar.

Students must prepare a master’s thesis and pass a final general examination and oral defense of the thesis.

Students normally complete the master’s requirements within 3 years.

Doctor of Philosophy in Child Language

Child Language Doctoral Program

The doctoral program in Child Language offers a specialized degree in this interesting area of study. The program crosses traditional academic boundaries to give students the theoretical, empirical, and methodological competence necessary to study basic and applied issues in language acquisition. This multidisciplinary program is a cooperative endeavor of faculty members from the Departments of Applied Behavioral Science, Clinical Child Psychology, Linguistics, Molecular Biosciences, Psychology, and Speech-Language-Hearing: Sciences and Disorders. In addition, the Child Language Doctoral Program has faculty specializing in genetics of language and speech, and in quantitative methods.
Students study 4 areas:

1. Core theoretical and experimental work on language acquisition,
2. Relevant methods and theories in linguistics and psycholinguistics,
3. Theoretical perspectives on developmental psychology, and
4. The nature of disordered language development and methods and techniques for language intervention.

In addition, new areas of study are offered in genetics of language acquisition and impairments, as well as quantitative methods.

Each student is advised by a support committee of 3 faculty members. Enrollment in a proseminar in language acquisition is required of all students in addition to participation in research activities. Opportunities for individual research projects include the projects of participating faculty members and the research teams of the Schiefelbusch Institute for Life Span Studies, the Speech-Language-Hearing Clinic, and the clinical/research facilities of KU Medical Center.

Graduates are candidates for teaching and research positions, clinical positions providing service to communicatively disabled persons, and research work in business and governmental sectors.

Faculty

We are a cross-disciplinary program and our faculty is involved in research spanning many diverse fields of study. Our portfolios are dynamic and growing, so you will be directed to our most recent information.

An internationally recognized scholar leads program activities: Mabel L. Rice is the Director and the Graduate Advisor.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Students are admitted to the doctoral program for the fall semester. Rolling admissions with applications accepted throughout the year. Review of applications for fall admissions begins January 15th, the preferred deadline. Applicants must submit a curriculum vita (C.V.) or resume, a personal statement describing professional goals and interest in program, Graduate Record Examination scores (GRE), 3 letters of recommendation, and a list of all courses taken in relevant areas such as child development, linguistics, psychology, special education, speech and hearing sciences, genetics, and statistics. Non-native speakers of English must meet English proficiency requirements (https://policy.ku.edu/english-proficiency-requirements-admission-graduate-study/). No one is admitted for a terminal M.A. degree.

Applicants should have earned bachelor’s degrees that include course work in linguistics, psychology, speech pathology, genetics, and/or statistics with minimum grade-point averages of B. Preference is given to those with master’s degrees in linguistics, psychology, education, special education, speech and hearing sciences, molecular biosciences, genetics, or to applicants with relevant post-baccalaureate work experience. Admission materials are reviewed by a subcommittee of the CLDP faculty. The admissions committee supervises the admission process and recommends applicants for admission.

Submit your graduate application online (https://gradapply.ku.edu/apply/). Send all other requested application materials to the program:

The University of Kansas
Child Language Doctoral Program
Dole Human Development Center
1000 Sunnyside Ave., Room 3031
Lawrence, KS 66045

Students who are interested in enrolling in graduate level coursework in the Child Language Doctoral Program without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the admission details above.

Ph.D. Degree Requirements

For the Ph.D. degree, the student must complete all general requirements. These include residence, research skills, comprehensive oral examination, preparation of a dissertation, and the final oral examination and defense of the dissertation. 2 options for fulfilling the research skills requirement are available:

1. Proficiency in a language other than English or reading knowledge of 2 languages other than English can be demonstrated.
2. A record of professional research experience or publication may be used to demonstrate research skills.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

For students entering without the master’s degree, the requirements for the M.A. may be found on the M.A. degree requirements page.

Ph.D. post-master’s requirements include a minimum of 36 additional graduate credit hours. These should include at least 8 hours of additional core courses, 13 hours of additional supplemental courses, 9 hours of additional statistical and methodological courses, and a minimum of 6 hours of dissertation. Continuous enrollment in the proseminal is required.

After completing the research skills requirement and the major portion of the course work, the doctoral student must pass a written preliminary examination and a comprehensive oral examination. The written examination covers 4 areas:

1. Language acquisition,
2. Psycholinguistics,
3. Developmental psychology,
4. Disordered language development or language intervention.

The comprehensive oral examination covers the major field, taking one of 5 forms:

1. A defense of the written preliminary examinations,
2. A defense of a completed research project,
3. A prospectus for a future research project,
4. A discussion of a major review paper, or
5. A review of a research grant proposal and a simulated site visit
defense of the proposal.

All doctoral students are expected to complete a dissertation and complete a successful defense of the dissertation.

All students are expected to be engaged continuously in research on child language. Research involvement is documented with appropriate enrollment in research, thesis, and dissertation credit hours, and in the proseminar in child language.

Courses
See course listings for the Child Language Doctoral Program and cooperating departments.

Department of Classics

Why study classics?
Because knowledge of Greek and Roman antiquity is fundamental to understanding the ancient and modern world.

What is classics?
Classics is the integrated study of ancient Greek and Roman civilization through its languages, its literature, and its artistic and archaeological remains. This broad field includes the study of the great texts of classical antiquity, such as Vergil's Aeneid, Homer's Iliad and Odyssey, Plato's Symposium, Sophocles' Antigone, and the love poems of Sappho and Catullus, but also encompasses research into everyday life in the societies that produced those great works.

In addition to training in the classical languages (Greek and Latin), the department introduces students to a range of work in literary criticism and cultural studies. Topics include archaeology and ancient art, ancient theatre, mythology, women's history, Greek and Roman humor, cultural exchange across the Mediterranean, the translation of Greek and Latin poetry, and the history of slavery, sexuality, and ethnicity in ancient society.

A commitment to teaching and learning
Our curriculum is diverse, innovative, and responsive to students' needs. We offer a variety of topics as mentioned above, and an array of course structures and formats, including small in-person language courses, hybrid ancient Greek and Latin that combines face-to-face instruction with online exercises, mid-sized discussion courses on archaeological or literary themes, online offerings during the summer and the academic year, and one large energetic lecture course.

Our faculty members have won nearly all KU's teaching awards, including the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other university-level teaching and advising awards. The department as a whole received the first ever Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

Beyond KU:
In addition to the rich and interdisciplinary content, the Classics degree teaches strong and widely useful critical skills such as clear writing, effective interpretation and use of evidence, and evaluation of sources.
Classics graduates bring all these to bear in a variety of careers. Our students have gone on to careers in law, business, library science, journalism, medicine, museum studies, education, writing and publishing, and technology.

Innovative scholarship:
KU Classics Faculty members conduct research on a variety of ancient topics, from Greek tragedy to Roman architecture. Their research engages some of the world’s most enduring questions, such as: How did the Greek and Roman societies envision happiness? How does knowledge of the past affect one’s choices and identities? How do modern theories about gender and sexuality intersect with ancient concepts? How are cultural values encoded into art, architecture, literature, language, law, religion, and politics? And, who “owns” the classical past?

Classics students can work with faculty as research assistants or can develop their own research projects, and many Classics courses count toward KU’s Research Experience Program. Our undergraduate students have received Undergraduate Research Awards and McNair Scholarships, and many write undergraduate honors theses.

Study Abroad
The Classics Department offers a variety of study opportunities for its students to study in Greece or Italy, the UK, and elsewhere in Europe. We offer scholarships to students who participate in overseas programs that focus on the ancient world.

Undergraduate Programs
Classics is the integrated study of Greek and Roman civilization through its languages, its literature, and its artistic and archaeological remains. The Department of Classics offers 2 majors. Both provide students of diverse career goals a broad humane education and afford a solid foundation for those who wish to pursue graduate work in classics. The Classical Antiquity major provides inclusive, interdisciplinary training in ancient Greek and Roman cultures and prepares you for graduate study in Greek and Roman archaeology, art history, or history. The Classical Languages major trains you to read the great authors of classical antiquity (e.g., Homer, Plato, Vergil, Sappho, Saint Augustine) in the original language and prepares you for graduate study in classics and for teaching in some private schools. You might also combine your classical language interest with a degree in the School of Education. A degree in education with a Latin major allows you to teach Latin in public high schools.

Language Proficiency
The CLAS language requirement may be fulfilled by taking either Latin or Greek. To meet the language requirement in Latin, a student should complete LAT 104, LAT 108, and LAT 112 followed by a course at the LAT 300 level (or their equivalents). To meet the language requirement in Greek, a student should complete GRK 104, GRK 108 or their equivalents, and 2 more courses (6 hours) at the GRK 300 level. The number of hours required may be reduced if a student has high school or transfer hours.
Placement in Latin

Students who wish to enroll in Latin after studying Latin in high school or elsewhere should seek advice from the classics faculty about appropriate placement in Latin courses at KU. Whenever possible, make an advising appointment in advance by calling the Department of Classics at 785-864-3153 or by contacting an advisor.

Retroactive Credit in Latin

In cooperation with the University Registrar, the Department of Classics awards retroactive university credit for work in Latin at the high school level. To qualify for retroactive credit, the student's initial university-level enrollment in Latin must be in a KU course. The student qualifies for retroactive credit only after completing the KU Latin course with a grade of C or higher.

After completing such a course with a qualifying grade, the student must bring his or her high school transcript to the Department of Classics office for verification. The department then notifies the Office of the University Registrar of the number of credit hours to be awarded. The student's transcript shows the number of hours awarded but no letter grade. The hours count toward graduation. Guidelines are as follows:

- A student who initially enrolls at KU in LAT 108 or LAT 109 and receives a grade of C or higher will receive 3 hours of retroactive credit.
- A student who initially enrolls in LAT 112 or LAT 113 and receives a grade of C or higher will receive 6 hours of retroactive credit.
- A student who initially enrolls in any LAT 300-level course (e.g., LAT 301, LAT 302, LAT 303, LAT 304, LAT 305, LAT 310) and receives a grade of C or higher will receive 9 hours of retroactive credit.

Courses for Nonmajors

The department offers a range of courses in ancient art, archaeology, literature, and language, including 4 years of Latin and 3½ years of ancient Greek. No knowledge of Latin or Greek is needed for courses labeled CLSX, such as the principal course CLSX 148 Greek and Roman Mythology.

Undergraduate Scholarships and Awards

The department offers several scholarships and awards, such as the Mildred Lord Greef award for best paper or essay, the Albert O. Greef award for literary translation, the Tenney Frank scholarships for undergraduate study, and the Tenney Frank awards for foreign study of the classics. For information, contact the department (http://classics.ku.edu/).

All graduate students who wish to be considered for KU scholarships and financial aid must complete applications with Financial Aid and Scholarships.

KU Financial Aid

All undergraduates who wish to be considered for KU scholarships and financial aid must complete applications with Financial Aid and Scholarships (https://financialaid.ku.edu/).

Graduate Programs

The Department of Classics offers advanced course work in the ancient civilizations of Greece and Rome. Students are expected to study the classical languages (Greek and Latin) and literatures as well as the art and archaeological remains of the Greek and Roman worlds.

Graduate Teaching Assistantships

Financial support is available in the form of teaching assistantships in Latin, Greek, or mythology. Contact the department (http://classics.ku.edu/) for information.

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

Graduate Non-Degree Seeking Status

Students who are interested in enrolling in graduate-level coursework in the Department of Classics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department's webpage (https://classics.ku.edu/) for further details.

Courses

CLSX 105. Introduction to Ancient Near Eastern and Greek History. 3 Credits. NW H/W
A general survey of the political, social, and economic developments of Mesopotamia, Egypt, Asia Minor, and Greece from Paleolithic times to 323 B.C. (Same as HIST 105.)

CLSX 106. Introduction to Roman History. 3 Credits. H/W
A general survey of the political, social, and economic developments of ancient Rome from 753 B.C. to 475 A.D. (Same as HIST 106.)

CLSX 148. Greek and Roman Mythology. 3 Credits. HL H/W
A systematic examination of the traditional cycles of Greek myth and their survival and metamorphosis in Latin literature. Some attention is given to the problems of comparative mythology and the related areas of archaeology and history. Slides and other illustrated materials. No knowledge of Latin or Greek is required.

CLSX 149. Greek and Roman Mythology Honors. 3 Credits. HL H/W
The study of Greek and Roman mythology through extensive readings in primary classical texts and secondary authors. Prerequisite: Admission to the Honors Program or consent of instructor.

CLSX 151. Introduction to Greek and Roman Archaeology. 3 Credits. HT H/W
An introduction to the history, methods, and excavation techniques of archaeology, with special emphasis on ancient Greece and Rome. Topics include stratigraphy, chronology, artifact analysis, the role of archaeology in our understanding of Greek and Roman society, and the treatment of archaeology in popular culture. Illustrated throughout with presentations of important archaeological sites of the ancient Mediterranean such as Athens and Pompeii, from the earliest times through late antiquity.

CLSX 168. Ancient Epic Tales. 3 Credits. HL H
This course provides a survey of ancient epic poetry, focusing on literature from the Greek, Roman, and Mediterranean world. All readings will be in English; no knowledge of any ancient languages is required. The works selected will be ancient epic tales primarily from Greece, Rome and the Mediterranean world (e.g. Epic of Gilgamesh, Homer, Apollonius, Vergil, Ovid, Status) though some ancient epics from other cultures may be used for comparative purposes (e.g. Beowulf,
This course explores the theory and practice of ancient Greek rhetoric, with the aim of developing student's own rhetorical skills and habits. All readings are in translation; no knowledge of ancient Greek is required. Students study rhetoric in such authors as Homer, Demosthenes, Plato, and Lysias and discuss such topics as the role of public speaking in maintaining Greek democracy, the difference between rhetorical skill as a means and an end, the relationship between rhetorical style and civic identity, and the adaptability of rhetoric to various circumstances and audiences. Students practice delivery with ancient speeches; write and deliver speeches tailored to a variety of situations; and listen to and critique the speeches of their peers and others.

**CLSX 316. Ancient Magic and Witches. 3 Credits. H**

This course provides a survey of magic and witchcraft in ancient Greece and Rome and interprets these practices through anthropological theories of magic and witchcraft. Emphasized topics may include magicians, witches, ghosts, spirits, demons, divination, and spells. This course considers issues such as how magic works, how people engage with the divine, the marginalization of magical practitioners, and the difference between magic, witchcraft and religion. All readings will be in English; no knowledge of any ancient languages is required. (Same as REL 316.)

**CLSX 320. Roman Oratory in Theory and Practice. 3 Credits. H**

This course explores the theory and practice of ancient Roman rhetoric, with the aim of developing student's own rhetorical skills and habits. All readings are in translation; no knowledge of Latin is required. Students will study rhetoric in such authors as Cicero, Quintilian, Caesar, and Seneca and discuss such topics as the role of rhetorical theory in Roman education; oratory as a hallmark of public service during the Republic, and its transition to a pastime in the Imperial age; the ways the Romans connected oratorical style with humor, the body, and gender identity; and the leeway given to speakers in constructing an argument. Students practice delivery with ancient speeches; write and deliver speeches tailored to a variety of situations; and listen to and critique the speeches of their peers and others.

**CLSX 322. Alexander the Great: Man and Myth. 3 Credits. HT H**

This course explores the life, times, and legacy of Alexander the Great (356-323 BCE). It covers the historical context of ancient Greece and Macedon from which Alexander emerged; his engagement with ancient Greek, Egyptian, and Persian cultures; his military campaigns; his aims in creating an empire; and the immediate aftermath of his conquests. In addition, the course considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Alexander has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the use of the memory of Alexander by later Greeks and Romans; the medieval Alexander tradition; responses to Alexander in Middle Eastern and Indian thought and literature; the legacy of Alexander’s conquests in the age of empires; his transformation in Hollywood; and his contested place in the modern political dispute between Greece and North Macedonia. (Same as HIST 387.)

**CLSX 323. Julius Caesar: Man and Myth. 3 Credits. HT H**

This course explores the life, times, and legacy of Julius Caesar (c. 100-44 BCE). It covers Caesar’s early political career, his military campaigns, and his rise to power through civil war, with special attention paid to his aims, political reforms, and the institutions that enabled his rise to power. In addition, it considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Caesar has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the impact of Julius Caesar in Rome with the creation of an empire ruled by “Caesars”; Medieval responses to Caesar as tyrant, king, and emperor; Caesar as...
a paradigm of populist tyranny from the Renaissance to the present; the legacy of his literary output and the Romantic image of Caesar as a genius; his impact on the modern age of empires; and re-imaginings of Caesar in film, TV, and video games. (Same as HIST 388.)

**CLSX 325. Aegean Archaeology and Art. 3 Credits. H/W**
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaeans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lectures with slides and discussion. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 525 or HA 525. No knowledge of Greek or Latin is required. (Same as HA 325.)

**CLSX 326. Greek Archaeology and Art. 3 Credits. H/W**
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 526 or HA 526. No knowledge of Greek or Latin is required. (Same as HA 326.)

**CLSX 327. Roman Archaeology and Art. 3 Credits. H/W**
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c. B.C.E. - 4th c. C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 527 or HA 527. No knowledge of Greek or Latin is required. (Same as HA 327.)

**CLSX 330. Greek Culture and Civilization, Honors. 3 Credits. H/W**
Honors version of CLSX 230. This course introduces the world of the ancient Greeks, with a focus on Greek cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; athletics and competition; oral performance; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including major literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. No knowledge of Greek is required; all readings will be in English. Prerequisite: Membership in the University Honors Program or consent of instructor.

**CLSX 332. Medical Terminology: Greek and Latin Roots. 3 Credits. HL H**
A comprehensive study of the Greek and Latin elements in medical terminology. Students will learn word roots and how to combine them, as well as become acquainted with their relationship to mythology and the influence of ancient ideas about health and the body on modern healthcare. This class is useful for anyone going into the health field including management, clinical areas, insurance, and technical fields. No knowledge of Greek or Latin is required.

**CLSX 340. Roman Culture and Civilization, Honors. 3 Credits. HL H**
Honors version of CLSX 240. This course introduces the world of ancient Rome, with a focus on Roman cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; politics and empire; games and gladiators; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. All readings will be in English; no knowledge of any ancient languages is required. Prerequisite: Membership in the University Honors Program or consent of instructor.

**CLSX 350. Modern Themes, Ancient Models: _____. 3 Credits. H**
The study of the evolution of a cultural or literary tradition from the Graeco-Roman world into modern times. The theme of the course will normally vary from semester to semester; topics such as these may be examined: the analysis of a literary genre (e.g. drama, satire, lyric), the transformation of the ancient mythical heritage, the reception of ancient astronomy. Students should consult the Schedule of Classes for the theme of the course in a given semester. With departmental permission, may be repeated for credit as topic varies. (Same as HUM 380.)

**CLSX 351. Introduction to Greek and Roman Archaeology, Honors. 3 Credits. HT H/W**
Honors version of CLSX 151, with the focus towards critical approaches and research. Special attention is paid to recent methodological, theoretical, and ethical debates within the profession of Classical archaeology. Assignments and activities may include position papers on contentious issues of the day, research assignments, and/or field trips to museums and related institutions. Prerequisite: Admission to the Honors Program or consent of instructor.

**CLSX 355. Ancient Greece and Rome in Film. 3 Credits. H**
This course explores the reception of the cultures of ancient Greece and Rome in film. Students in this course learn about the cultures of ancient Greece and Rome through primary sources, and analyze several films from the 20th and 21st centuries for which these sources are relevant. The course considers the relationship between historical accuracy and artistic license in the films selected for the course, how each film reflects the concerns of the modern cultural context in which it was made, the common visual and thematic elements that link films set in ancient Greece or Rome, and the reuse of elements from Greek and Roman mythology and history in films set in the modern world. No knowledge of Latin or Greek required.

**CLSX 360. Ancient Roots of Modern Politics. 3 Credits. S**
This course examines the political thought and practice of Ancient Greece and Rome, and the enduring impact of these cultures upon contemporary political institutions. Students will consider topics such as origins of democracy in Ancient Athens; the Roman Republic as a model for the constitution of the United States; and the causes and results of Rome’s transition from Republic to monarchy. The course will also introduce students to key perspectives in the analysis of ancient and modern politics, for example constitutional theory, political psychology, and source criticism. All readings will be in English; no knowledge of any ancient languages is required. (Same as POLS 360.)

**CLSX 365. Ancient Rome, Monuments, and Memory. 3 Credits. H**
This course explores the monuments and historical topography of the city of Rome, Italy across the Ancient, Medieval, Renaissance, Baroque, and Modern periods. Focusing on a series of case studies, monuments, and urban spaces such as the Pantheon, the Colosseum, and the imperial forums, this course explores how public spaces change in their usage and meaning over time. The course emphasizes Rome’s illustrious architects and artists, such as Michelangelo and Bernini, who attempted to modernize the “eternal city” by drawing on its ancient origins with such endeavors as New St. Peter’s Basilica. Throughout the course, students are challenged to compare the city of Rome to modern urban environments, and even to Lawrence, Kansas. All readings are in English; no prerequisites required.
CLSX 371. Archaeology of Ancient Israel. 3 Credits. H
Archaeology and art, sites and monuments of ancient Israel from the Neolithic period to Late Roman. Special topics will include the peoples of the region, nomadism and urbanization, the kingdoms of Israel, Second Temple Period, Qumran, Roman Jerusalem, and the creation and development of the synagogue. (Same as JWSH 371.)

CLSX 375. Studies in: ______. 1-3 Credits. H/W
Selected readings in Greek and Roman antiquity and the classical tradition for students who desire special work on a flexible basis. No knowledge of Greek or Latin is required. May be repeated for credit, the maximum being twelve hours. Prerequisite: Consent of instructor.

CLSX 378. Food and Drink in the Ancient Mediterranean. 3 Credits. H
This course examines the means of production and preparation, as well as the social role, of food and drink in Greek and Roman antiquity. The course will introduce students to different methodologies from anthropology and sociology of food for studying patterns of production and consumption, and class discussions and assignments will ask students to consider how the attitudes to and experience of food and drink in the ancient world differed from our own. All readings will be in English; no knowledge of any ancient languages is required.

CLSX 380. Ancient Greek Athletics and the Olympic Games. 3 Credits. H/W
This course studies ancient Greek athletics and the Olympic games. Students use historical, literary, and archaeological approaches to study how the Greeks celebrated and memorialized their athletes; how athletic prowess was connected to moral and civic virtue; the technologies by which the Greeks measured athletic performance; and the ways fans and spectators responded to competitions. Special emphasis will be given to the development of the Olympic games and their social, political, and religious function in Greek society and in their modern instantiation. All readings are in English; no knowledge of Greek is required.

CLSX 381. Ancient Roman Gladiators and Spectacle. 3 Credits. W
This course studies ancient Roman gladiators and spectacle—the public entertainment that included staged beast hunts, mock naval battles, chariot races, and the punishment of criminals. Students use historical, literary, and archaeological approaches to study the development of gladiatorial combat and its reception in later periods. Emphasized topics may include: slavery in ancient Rome, the relationship between politics and spectacle, the architecture and engineering of the Colosseum, the representation of gladiators in modern film and video games, and the intersection of violence and entertainment in ancient Roman and modern American culture. All readings are in English; no knowledge of Latin is required.

CLSX 382. Jerusalem Through the Ages. 3 Credits. H
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as HIST 382, JWSH 382 and REL 382.)

CLSX 384. Ethics in Greek Tragedy. 3 Credits. HL H
This course provides an introductory survey of theories of morality and uses Greek tragedy as case studies for understanding ethical problems. Students will read passages from ethical theorists alongside plays by Aeschylus, Sophocles, and Euripides, giving particular attention to identifying the ethical dilemmas the characters face, the criteria by which these characters make their decisions, ethical assessment of their decisions by their own standards and by those of ethical theories, and the role of cultural context in understanding the ethical dimensions of the plays. No knowledge of Greek is required.

CLSX 402. War and Society in Greece and Rome. 3 Credits. H/W
This course explores the military history of the ancient world, with a focus on the connections between warfare and political, social, and cultural developments. Through extensive reading, analysis, and discussion of a wide variety of ancient sources (literary, epigraphic, archaeological) and contemporary scholarship, this class will survey both the major developments in warfare in Greece and Rome, while at the same time investigating the relationship of military institutions, technologies, tactics, and strategies to the key political and economic changes, social structures, and value systems of antiquity. Beyond exploring famous and influential campaigns and battles (Persian Wars; Peloponnesian War; rise of Macedonia; Punic Wars; Roman civil wars; barbarian invasions), topics will include: hoplite warfare and the emergence of Sparta and Athens; sea-power, democracy, and imperialism; citizen militia and professionalization in Rome; trauma, triumph, and memorialization; gender roles and ethnic identity. (Same as HIST 402.)

CLSX 480. Classical Museum in Context. 3 Credits. H
This seminar is about the Wilcox Classical Museum, KU's first and oldest museum collection, founded in 1888. It introduces collecting and curation practices of universities during the nineteenth and early twentieth centuries, explores the culture of the reception of classical antiquity in KU's early history from the period of 1880-1910, and provides hands-on experience with objects in the Wilcox Collection. Emphasized topics include: the diversity of approaches in the study and interpretation of ancient artifacts, the controversial history of the usage of plaster casts of Greek and Roman sculptures in museum displays, and the future of the Wilcox Classical Museum. Students learn visual literacy skills, conduct original research on objects in the museum's collection, and become familiar with digital methods in the documentation, cataloguing, and display of museum objects. Prepares students for upper-level classes and graduate work in Greek and Roman Archaeology, Art History, and Museum Studies.

CLSX 496. Honors Essay in Classical Antiquity. 3 Credits. H/W
Individual directed research and preparation of an essay on a topic in Classical literature, culture, or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor.

CLSX 502. The Age of Heroes: Early Greece. 3 Credits. H/W
This course explores the Greek Bronze and Dark Ages and in particular the relationship of the Iliad and the Odyssey to early Greek history. The course is organized around current methods, problems, and debates in the fields of Greek history, archaeology, and Classics. Topics include the rise and fall of the Minoan and Mycenaean worlds, the historicity of the Trojan War, and social, religious, and political institutions of the Dark Ages. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 502.) Prerequisite: Any CLSX or HIST course.

CLSX 504. Rise of Athens and Sparta. 3 Credits. H/W
This course explores the history of Archaic and Classical Greece, focusing on the rise and fall of the rival states of Sparta and Athens. The course is organized around current methods, problems, and debates in the fields of Greek history and Classics. Topics include the emergence of the Greek polis; Greek colonization; developments in political, religious, and social institutions, including the Spartan constitution and the rise of Athenian democracy; the changing definitions of personal, cultural, and
national identities; cultural, political, and economic tensions between rival Greek city-states and neighboring cultures, especially Persia and Macedonia. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 504.) Prerequisite: Any CLSX or HIST course.

CLSX 505. Roman Republic. 3 Credits. H
This course investigates the origins, development, and eventual crisis of the Roman Republic, from its foundation in the eighth century BC to Civil War in the first century BC. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include the contexts and causes for the rise of Rome, the growth, development, and eventual collapse of the Roman republican constitution, and the impact of empire on Roman society, culture, religion, economy, and identity. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 506.) Prerequisite: Any CLSX or HIST course.

CLSX 507. Early Roman Empire. 3 Credits. H
This course investigates the establishment and development of the Roman Empire, from the rise of Augustus to the peak of Roman power and prosperity in the second century AD. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include the creation of the imperial system; developments in the role of the emperor and the Roman government; continuity and transformation in society, culture, religion, economy, and identity with the shift from republic to empire; daily life across the empire and in the army. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 507.) Prerequisite: Any CLSX or HIST course.

CLSX 508. Late Roman Empire (284-527). 3 Credits. H
This course investigates the history of the later Roman Empire, from the height of its power in the second century AD to the fall of the Western Roman Empire in the fifth century AD. The course is organized around current methods, problems, and debates in the fields of Roman history and Classics. Topics include continuity and change in Roman culture, identity, and institutions; the Christianization of the empire; contact and conflict between Romans and the "barbarians"; political decline and daily life across the empire. These topics will be studied through extensive analysis and discussion of literary, documentary, and archaeological sources, and close engagement with perspectives from works of contemporary scholarship. No knowledge of the ancient languages is required. (Same as HIST 508.) Prerequisite: Any CLSX or HIST course.

CLSX 510. Love, Lust, and Laughter in Ancient Literature. 3 Credits. H
This course moves beyond ancient epic and tragedy to introduce students to less familiar genres from Greek and Roman literature. Texts studied may include the romantic novels of Heliodorus and Apuleius; the erotic poetry of Sappho and Catullus; the comedies of Aristophanes and Plautus; the proto-science fiction of Lucian; or the satires of Horace and Persius. Attention will be given to theories, approaches, and questions in contemporary criticism of ancient literature, and assessment will include a final paper or creative project that integrates these perspectives. All readings will be in English; no knowledge of any ancient languages is required. Prerequisite: Any CLSX course.

CLSX 515. Gender and Sexuality in Greek Culture. 3 Credits. H
This course explores various approaches to the study of gender and sexuality in Greek antiquity. Contents may vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as WGSS 515.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

CLSX 516. Gender and Sexuality in Roman Culture. 3 Credits. HL H
This course explores various approaches to the study of gender and sexuality in Roman antiquity. Contents may vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as WGSS 516.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor.

CLSX 525. Aegean Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaeans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 325 or HA 325. No knowledge of Greek or Latin is required. (Same as HA 525.)

CLSX 526. Greek Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 326 or HA 326. No knowledge of Greek or Latin is required. (Same as HA 526.)

CLSX 527. Roman Archaeology and Art. 3 Credits. H/W
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities; and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 327 or HA 327. No knowledge of Greek or Latin is required. (Same as HA 537.)

CLSX 529. Archaeology and Art of the Ancient Near East. 3 Credits. H
A cross-cultural survey of the material remains of the major civilizations of the ancient Near East, including Anatolia, Mesopotamia, the Levant, and Egypt from Neolithic period to the rise of the Roman empire (ca. 6000 B.C.E. - 30 B.C.E.). Includes lectures with slides and discussion.
For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as HA 529.)

**GRK 108.** Elementary Ancient Greek. 5 Credits. U F1
The essentials of ancient Greek grammar, with readings.

**GRK 109.** Ancient Greek Readings and Grammar, Honors. 5 Credits. U F2
A continuation of GRK 104, with extensive readings from one or more classical authors. Prerequisite: GRK 104 or GRK 105.

**GRK 177.** First Year Seminar: ____. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Greek. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

**GRK 301.** Philosophy and Oratory. 3 Credits. H/W F3
Systematic grammar review in conjunction with readings selected from Plato, Aristotle and the Attic orators, with attention to issues of interpretation and social and cultural history. Prerequisite: GRK 108 or GRK 109.

**GRK 496.** Honors Essay in Greek. 3 Credits. H/W F3
Individual directed research and preparation of an essay on a topic in Greek literature or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor.
GRK 508. Early Greek Philosophy. 3 Credits. H/W FP
A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers with some attention paid to the Sophists and the Hippocratic Corpus. (Same as PHIL 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor.

GRK 701. Archaic Poetry. 3 Credits.
Close reading of texts from Homer, Hesiod, Pindar, the lyric poets.

GRK 702. Drama. 3 Credits.
Close reading of texts from Aeschylus, Sophocles, Euripides, Aristophanes.

GRK 703. History and Oratory. 3 Credits.
Close reading of texts from Herodotus, Thucydides, Xenophon, Attic orators.

GRK 704. Philosophy. 3 Credits.
Close reading of texts from Plato, Aristotle, the Pre-Socratics.

GRK 705. Readings in Classical Greek. 3 Credits.
Extensive reading in a variety of Greek authors.

GRK 790. Practicum in the Teaching of Greek. 0.5 Credits.
Required of all assistant instructors and teaching assistants in the teaching of Greek. May be repeated up to three semester hours credit in total.

GRK 798. Studies in: ___. 1-3 Credits.
Selected readings for qualified students who desire special work on a flexible basis. May be repeated for credit, the maximum being twelve hours. Prerequisite: Undergraduate proficiency in Greek or equivalent.

GRK 899. Thesis. 1-6 Credits.
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis.

Courses

LAT 104. Elementary Latin I. 5 Credits. U F1
An introduction to the Latin language.

LAT 105. Elementary Latin I, Honors. 5 Credits. U F1
Integrates study of elementary Latin with study of Roman culture. Prerequisite: Admission to Honors Program or permission of department.

LAT 108. Elementary Latin II. 5 Credits. U F2
Latin grammar concluded with selected readings. Prerequisite: LAT 104 or LAT 105, or permission of department.

LAT 109. Elementary Latin II, Honors. 5 Credits. U F2
Latin grammar concluded with selected readings, integrated with study of Roman culture. Prerequisite: LAT 105 or permission of department.

LAT 112. Readings in Latin Literature. 3 Credits. U F3
Systematic grammar review in conjunction with selected prose authors, such as Cicero or Caesar, with additional readings in Roman poetry. Attention to literary history and historical context. Prerequisite: LAT 108 or LAT 109, or permission of department.

LAT 113. Readings in Latin Literature, Honors. 3 Credits. U F3
Systematic grammar review in conjunction with selected prose authors, such as Cicero or Caesar, with additional readings in Roman poetry. Exercises in literary analysis and/or prose composition. Prerequisite: LAT 109 or permission of department.

LAT 177. First Year Seminar: ___. 3 Credits. U
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Latin. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status.

LAT 300. Intermediate Latin Composition. 3 Credits. H/W FP
Composition in Latin prose, stressing the basic principles of Latin syntax and style. Recommended for majors and minors. Prerequisite: LAT 112 or LAT 113 or permission of the department.

LAT 301. Prose Fiction and Epistolography. 3 Credits. H/W FP
Selected readings from such authors as Cicero, Seneca, Petronius, Pliny, and Apuleius, with attention to literary interpretation and historical context. Prerequisite: LAT 112 or LAT 113, or permission of department.

LAT 302. Hexameter Poetry. 3 Credits. H/W FP
Selected readings from such authors as Lucretius, Vergil, Ovid, and the satirists, with attention to literary interpretation and historical context. Prerequisite: LAT 112 or LAT 113, or permission of department.

LAT 303. Roman Historians. 3 Credits. H/W FP
Selected readings from such authors as Caesar, Livy, and Tacitus, with attention to issues in Roman history and historiography. Prerequisite: LAT 112 or LAT 113, or permission of department.

LAT 304. Lyric and Elegiac Poetry. 3 Credits. H/W FP
Selected readings from such authors as Catullus, Horace, Tibullus, Propertius, Sulpicia, Ovid, and Martial, with attention to literary interpretation and historical context. Prerequisite: LAT 112 or LAT 113, or permission of department.

LAT 305. Roman Drama. 3 Credits. H/W FP
Selected readings from such authors as Plautus, Terence, and Seneca, with attention to literary interpretation, theater history, and performance. Prerequisite: LAT 112 or LAT 113, or permission of department.

LAT 310. Vergil's Aeneid. 3 Credits. H/W FP
In this course students read selections from Vergil's Aeneid through various interpretive lenses such as literary history (including its relationship to epic and tragedy), socio-cultural and political context, and reception. Attention will be paid throughout to Vergil's poetic style, syntax, and lexicon. Prerequisite: LAT 112 or LAT 113 or permission of department.

LAT 375. Readings in: ___. 1-3 Credits. H/W FP
Readings in Latin literature, selected in consultation with the instructor. May be repeated for up to twelve hours. Prerequisite: LAT 112 or LAT 113, or consent of instructor.

LAT 496. Honors Essay in Latin. 3 Credits. H/W FP
Individual directed research and preparation of an essay on a topic in Latin literature or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor.

LAT 701. Hexameter Poetry. 3 Credits.
Close reading of texts from authors such as Lucretius, Vergil, Ovid, Statius. Prerequisite: Consent of instructor.

LAT 702. Lyric and Elegy Poetry. 3 Credits.
Close reading of texts from authors such as Catullus, Horace, Propertius, Tibullus, Sulpicia, Ovid, Martial. Prerequisite: Consent of instructor.

LAT 703. History, Oratory, Philosophy. 3 Credits.
Close reading of texts from authors such as Cicero, Livy, Seneca, Tacitus, Augustine. Prerequisite: Consent of instructor.

LAT 704. Drama, Satire, and Novel. 3 Credits.
Close reading of texts from Plautus, Terence, Horace, Petronius, Seneca, Juvenal, Apuleius.

LAT 705. Readings in Classical Latin. 3 Credits.
Extensive reading in a variety of Latin authors.
LAT 790. Practicum in the Teaching of Latin. 0.5 Credits.
Required of all assistant instructors and teaching assistants in the
teaching of Latin. May be repeated up to three semester hours credit in
total.

LAT 798. Studies in: ____. 1-3 Credits.
Selected readings for qualified students who desire special work on a
flexible basis. May be repeated for credit, the maximum being twelve
hours. Prerequisite: Undergraduate proficiency in Latin or equivalent.

LAT 899. Thesis. 1-6 Credits.
Thesis credit. Graded on a satisfactory progress/limited progress/no
progress basis.

Bachelor of Arts and Bachelor of
General Studies in Classics

Why classics?
Because knowledge of Greek and Roman antiquity is fundamental to
understanding the ancient and modern world.

What is classics?
Classics is the integrated study of ancient Greek and Roman civilization
through its languages, its literature, and its artistic and archaeological
remains. This broad field includes the study of the great texts of
classical antiquity, such as Vergil’s Aeneid, Homer’s Iliad and Odyssey,
Plato’s Symposium, Sophocles’ Antigone, and the love poems of Sappho
and Catullus, but also encompasses research into everyday life in the
societies that produced those great works.

In addition to training in the classical languages (Greek and Latin), the
department introduces students to a range of work in literary criticism
and cultural studies. Topics include archaeology and ancient art, ancient
theatre, mythology, women’s history, Greek and Roman humor, cultural
exchange across the Mediterranean, the translation of Greek and Latin
poetry, and the history of slavery, sexuality, and ethnicity in ancient
society.

A commitment to teaching and
learning:

Our curriculum is diverse, innovative, and responsive to students’ needs.
We offer a variety of topics as mentioned above, and an array of course
structures and formats, including small in-person language courses,
hybrid ancient Greek and Latin that combines face-to-face instruction
with online exercises, mid-sized discussion courses on archaeological
or literary themes, online offerings during the summer and the academic
year, and one large energetic lecture course.

Our faculty members have won nearly all KU’s teaching awards, including
the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other
university-level teaching and advising awards. The department as a
whole received the first ever Center of Teaching Excellence (CTE) award
for Department Excellence in Teaching at the University of Kansas.

Beyond KU:

In addition to the rich and interdisciplinary content, the Classics degree
teaches strong and widely useful critical skills such as clear writing,
effective interpretation and use of evidence, and evaluation of sources.
Classics graduates bring all these to bear in a variety of careers. Our
students have gone on to careers in law, business, library science,
journalism, medicine, museum studies, education, writing and publishing,
and technology.

Innovative scholarship:

KU Classics Faculty members conduct research on a variety of ancient
topics, from Greek tragedy to Roman architecture. Their research
engages some of the world’s most enduring questions, such as: How
did the Greek and Roman societies envision happiness? How does
knowledge of the past affect one’s choices and identities? How do modern
theories about gender and sexuality intersect with ancient concepts? How
are cultural values encoded into art, architecture, literature, language, law,
religion, and politics? And, who “owns” the classical past?

Classics students can work with faculty as research assistants or
can develop their own research projects, and many Classics courses
count toward KU’s Research Experience Program. Our undergraduate
students have received Undergraduate Research Awards and McNair
Scholarships, and many write undergraduate honors theses.

Study Abroad

The Classics Department offers a variety of study opportunities for its
students to study in Greece or Italy, the UK, and elsewhere in Europe.
We offer scholarships to students who participate in overseas programs
that focus on the ancient world.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college
transcripts to the Office of Admissions. Prospective first-year students
should be aware that KU has qualified admission requirements that all
new first-year students must meet to be admitted. Consult the Office
of Admissions (http://admissions.ku.edu/) for application deadlines and
specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for
information about international admissions.

Students considering transferring to KU may see how their college-
level course work will transfer on the Office of Admissions (http://
credittransfer.ku.edu/) website.

First- and Second-Year
Preparation

All CLSX/LAT/GRK courses at the 100 or 200 level provide important
cultural and historical background for the advanced work in the major.
As soon as you decide that you are interested in the Classics major, we
suggest that you talk to an undergraduate advisor in Classics, who can
help you plan your program of study. Each concentration has different
requirements. For concentrations that focus on ancient Greek or Latin, we
recommend that students take GRK 104 or LAT 104 as soon as possible,
so that they can achieve the language proficiency needed for upper-level
courses in the major. For concentrations that focus on archaeology and
art or humanities, we recommend that students take introductory courses
on archaeology (CLSX 151), literature and culture (CLSX 148, CLSX 168, CLSX 171, CLSX 230, CLSX 240) or history (CLSX 105, CLSX 106).

**Classical Languages Concentration**

The Classical Languages concentration is designed for students who wish to concentrate on the languages and literatures of ancient Greece and Rome, while allowing the flexibility to take a wide range of courses about all aspects of the ancient world. This concentration provides students with proficiency in the Greek and Latin languages; allows students to read, analyze, and respond to a variety of important texts from the ancient Greek and Roman worlds in their original language; and offers the opportunity to take complementary courses in the history, archaeology, and culture of the ancient world. The Classical Languages concentration provides the linguistic training necessary for further study in Classics and related disciplines (e.g., Biblical Studies, Comparative Literature) and fosters analytical and writing skills that are essential for careers such as law, government, and business.

Students interested in teaching might consider combining our Classical Languages concentration with a degree in the School of Education and Human Sciences. A teacher preparation program followed by educator licensure (also called teacher "certification"), along with a Classics major in the Latin concentration, will allow you to teach Latin in public high schools.

**Latin Concentration**

The Latin concentration is designed for students who wish to concentrate on the language and literature of ancient Rome, while allowing the flexibility to take a wide range of courses about all aspects of the ancient world. This concentration provides students with proficiency in the Latin language; allows students to read, analyze, and respond to a variety of important texts from the ancient Roman world in their original language; and offers the opportunity to take complementary courses in the history, archaeology, and culture, as well as the other major languages, of the ancient world. The Latin concentration provides the linguistic training necessary for further study in Latin and related disciplines (e.g., Medieval Studies, Theology, Early Modern Science, Renaissance History, Comparative Literature); prepares students for teaching Latin at the secondary school level; and fosters analytical and writing skills that are essential for careers such as law, government, and business.

Students interested in teaching might want to consider combining our Latin concentration with a degree in the School of Education and Human Sciences. A teacher preparation program followed by educator licensure (also called teacher "certification"), along with a Classics major in the Latin concentration, will allow you to teach Latin in public high schools.

### Archaeology and Art Concentration

The Archaeology and Art concentration is designed for students who wish to concentrate on the material cultures of ancient Greece and Rome, while allowing the flexibility to take a wide range of courses about all aspects of the ancient world. This concentration provides students with knowledge about the traditions, methods, and theories of Classical Archaeology and Art History; allows students to engage in contemporary debates on the protection of cultural heritage and collecting practices of modern museums; and promotes visual literacy through participatory experiences with the collection of the Wilcox Classical Museum. The Archaeology and Art concentration prepares students for further study in Classical Archaeology, Art History, Museum Studies, and related fields.

To ensure flexibility for students, there is no language requirement as part of the Archaeology and Art concentration. It is, however, often helpful to take either Greek or Latin, as they count towards the B.A. language requirement and allow you a deeper insight into the ancient world. Any courses taken in Greek and Latin can be counted towards the major as electives.

### Classical Humanities Concentration

The Classical Humanities concentration is designed for students who wish to concentrate on the literature, history, and culture of ancient Greece and Rome, while allowing the flexibility to take a wide range of courses about all aspects of the ancient world. This concentration is ideal for students who are fascinated by the ancient world and who want the experience of a liberal arts degree before pursuing careers beyond Classics, such as medicine, law, teaching, business, and the creative industries. Students who are interested in further study in Classics or Classical Archaeology are strongly advised to talk to an advisor about taking one of the other concentrations (i.e., Classical Languages or Archaeology and Art) to ensure that they have adequate preparation for entry into graduate programs.

To ensure flexibility for students, there is no language requirement as part of the Classical Humanities concentration. It is, however, often helpful to take either Greek or Latin, as they count towards the B.A. language requirement and allow you a deeper insight into the ancient world. Any courses taken in Greek and Latin can be counted towards the major as electives.

### Classics Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

#### Major Hours
Satisfied by a minimum of 24-30 hours of major courses.

#### Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior (300+) Hours
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

- **200-499**
  - HIST 201 (Recommended. 1st Semester Language (BA Language))
  - HIST 202 (Recommended. 2nd Semester Language (BA Language))

- **500**
  - Classics Major Hours & Major GPA
  - The Age of Heroes: Early Greece
  - Rise of Athens and Sparta
  - Roman Republic
  - Early Roman Empire
  - Late Roman Empire (284-527)
  - Love, Lust, and Laughter in Ancient Literature
  - Gender and Sexuality in Greek Culture
  - Gender and Sexuality in Roman Culture
  - Study Abroad Topics in Greek and Roman Culture

- **515**
  - Medieval Manuscripts and Early Printed Books
  - From Goddesses to Witches: Women in Premodern Europe
  - History of Jewish Women
  - Ancient Philosophy
  - Early Greek Philosophy
  - The Philosophy of Plato
  - The Philosophy of Aristotle
  - Hellenistic Philosophy
  - The Jewish World of Jesus
  - Jews and Christians

- **525**
  - Additional courses in Classics or related subjects. This can include any course in the Classics department (course codes LAT, GRK, or CLSX). Related courses from other departments may be substituted but require written permission from the Chair or the Director of Undergraduate Studies.

#### Total Hours
- **30**

### Departmental Honors

Departmental honors are awarded to undergraduates who demonstrate exceptional academic achievement in the major. To receive departmental honors, students must have a major GPA of at least 3.50 and must complete either CLSX 496, GRK 496, or LAT 496 with a grade of B or higher. Students interested in departmental honors should discuss this option with the Classics department honors coordinator as early as they can, preferably in their junior year.

### Classics Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

#### Major Hours
Satisfied by a minimum of 24-30 hours of major courses.

#### Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior (300+) Hours
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA in Classics with the following concentrations can be found here: Archaeology and Art (p. 1234), Classical Humanities (p. 1235), Classical Languages (p. 1237), Greek (p. 1238), Latin (p. 1239), or by using the left-side navigation.

A sample 4-year plan for the BGS in Classics with the following concentrations can be found here: Archaeology and Art (p. 1240), Classical Humanities (p. 1241), Classical Languages (p. 1242), Greek (p. 1243), Latin (p. 1244), or by using the left-side navigation.

### Departmental Honors

A candidate for honors must meet all the general requirements for graduation with honors established by the College. The independent research requirement is met by successful completion of Honors Essay: CLSX 496, GRK 496, or LAT 496. This is normally in the spring semester of the senior year. This enrollment substitutes for one of the optional major courses, whether central or peripheral.

### Study Abroad

The department offers study abroad opportunities in Greece and Italy. All students may apply to attend these summer programs, and classics majors are especially encouraged to enroll. Courses offered vary from year to year; consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) or advisors in the Department of Classics.

For scholarships, students should apply to Study Abroad as well as to the department. The department also offers advice to students interested in non-KU programs or in summer internships at archaeological sites.

### BA in Classics with concentration in Archaeology and Art

Below is a sample 4-year plan for students pursuing the BA in Classics with a concentration in Archaeology and Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total: 14
Below is a sample 4-year plan for students pursuing the BA in Classics in Classical Humanities.

### KU Core Options within the department

- **Goal 1.1 Critical Thinking:** CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 168, CLSX 500, or approved to fulfill KU Core Goal 3H.
- **Goal 2.2 Oral Communication:** CLSX 310, CLSX 320
- **Goal 3 Arts & Humanities:** CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 168, or approved to fulfill KU Core Goal 3H.
- **Goal 4.2 Global Awareness:** CLSX 148, CLSX 149, CLSX 168, CLSX 316, CLSX 378, CLSX 515, or approved to fulfill KU Core Goal 3H.
- **Goal 5 Social Responsibility and Ethics:** CLSX 171, CLSX 384
- **Goal 6 Integration & Creativity:** CLSX 496, CLSX 502, CLSX 504, CLSX 505, CLSX 507, CLSX 508, or approved to fulfill KU Core Goal 3H.

### Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CLSX 305 fulfills KU Core Goal 3H.
3. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
4. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
5. Additional courses in Classics or related subjects. This can include any course in the Classics department (course codes LAT, GRK, or CLSX). Related courses from other departments may be substituted but require written permission from the Chair or the Director of Undergraduate Studies.
6. It is possible to overlap your KU Core Courses with Classics major requirements; see below for all options. Your advisor can help you create a degree plan that maximizes your choices.

Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. It is possible to overlap your KU Core Courses with Classics major requirements; see below for all options. Your advisor can help you create a degree plan that maximizes your choices.
3. See the degree requirements tab for a list of Classical Humanities courses.
4. Additional courses in Classics or related subjects. This can include any course in the Classics department (course prefix codes - LAT, GRK, or CLSX). Related courses from other departments may be substituted but require written permission from the Chair or the Director of Undergraduate Studies. At a minimum students must have 15 Junior/Senior courses (300+) in the major.
5. Hour requirements (incl. 45 j/hr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. For students completing the language requirement via the 3+1 language option, note that many first semester languages are 5 credit hours.

**KU Core Options within the department**

- Goal 1.1 Critical Thinking: CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 168, CLSX 176
- Goal 2.2 Oral Communication: CLSX 310, CLSX 320
- Goal 3 Arts & Humanities: CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 168, CLSX 176
- Goal 3 Social Science: CLSX 316, CLSX 378
- Goal 4.2 Global Awareness: CLSX 148, CLSX 149, CLSX 168, CLSX 316, CLSX 378, CLSX 515
- Goal 5 Social Responsibility and Ethics: CLSX 171, CLSX 384
- Goal 6 Integration & Creativity: CLSX 496, CLSX 502, CLSX 504, CLSX 505, CLSX 507, CLSX 508, CLSX 509

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
# BA in Classics with concentration in Classical Languages

Below is a sample 4-year plan for students pursuing the BA in Classics with a concentration in Classical Languages. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. If you have previous training in Greek or Latin, please speak to an undergraduate advisor in Classics as soon as possible, so that you can be placed in the correct language class and explore options for receiving retroactive credit for your previous study of the language.
3. It is possible to overlap your KU Core Courses with Classics major requirements; see below for all options. Your advisor can help you create a degree plan that maximizes your choices.
4. 15 hours of Greek or Latin Language and/or literature courses (course code GRK or LAT) at the 300-level or above required.
5. Additional courses in Classics or related subjects. This can include any course in the Classics department (course prefix codes - LAT, GRK, or CLSX). Related courses from other departments may be substituted but require written permission from the may be substituted but require written permission from the Chair or the Director of Undergraduate Studies.
6. Hour requirements (incl. 45 hr/sr hrs) are typically met through KU core, degree, major, second area of study and/or elective hours. Students planning the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
7. Students planning to take 300-level Latin courses will need to complete LAT 112 or equivalent. LAT 112 will not count as a 300+ Language/Literature course so students may need to adjust graduation plan to meet overall requirements. Please consult with an academic advisor.

### KU Core Options within the department

- Goal 1.1 Critical Thinking: CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 168, CLSX 195, CLSX 202
- Goal 2.2 Oral Communication: CLSX 310, CLSX 320
- Goal 3 Arts & Humanities: CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 168
- Goal 3 Social Science: CLSX 316, CLSX 378
Below is a sample 4-year plan for students pursuing the BA in Classics in Greek BA in Classics with concentration opportunities to explore other majors and/or minors.

The same course cannot be used to fulfill more than one KU Core Goal. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Total Hours 120**
The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

If you have previous training in Latin, please speak to an undergraduate advisor in Classics as soon as possible, so that you can be placed in the correct language class.

It is possible to overlap your KU Core Courses with Classics major requirements; see below for all options. Your advisor can help you create a degree plan that maximizes your choices.

15 hours of Latin Language and/or literature (prefix course code - LAT) courses at the 300-level or above required

12 hours of additional courses in Classics or related subjects required.

This can include any course in the Classics department (course prefix codes - LAT, GRK, or CLSX). Related courses from other departments may be substituted but require written permission from the Chair or the Director of Undergraduate Studies.

Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, critical thinking, logic and ethics (consider CLSX course), reasoning, communication, critical thinking, and awareness.

It is possible to overlap your KU Core Courses with Classics major and/or degree-specific requirements.

BGS in Classics with concentration in Archaeology and Art

Below is a sample 4-year plan for students pursuing the BGS in Classics with a concentration in Archaeology and Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

KU Core Options within the department

- Goal 1.1 Critical Thinking: CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 159, CLSX 177, CLSX 305, CLSX 306, CLSX 322, CLSX 323, CLSX 351
- Goal 2.2 Oral Communication: CLSX 310, CLSX 320
- Goal 3 Arts & Humanities: CLSX 105, CLSX 106, CLSX 148, CLSX 149, CLSX 151, CLSX 159, CLSX 177, CLSX 305, CLSX 306, CLSX 322, CLSX 323, CLSX 351
- Goal 3 Social Science: CLSX 316, CLSX 378
- Goal 4.2 Global Awareness: CLSX 148, CLSX 149, CLSX 168, CLSX 316, CLSX 376, CLSX 378
- Goal 5 Social Responsibility and Ethics: CLSX 171, CLSX 384
- Goal 6 Integration & Creativity: CLSX 496, CLSX 502, CLSX 504, CLSX 505, CLSX 507, CLSX 510, 515, 516

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Total Hours 120**

1. If you have previous training in Greek or Latin, please speak to an undergraduate advisor in Classics as soon as possible, so that you can be placed in the correct language class and explore options for receiving retroactive credit for your previous study of the language.
2. 15 hours or Greek or Latin Language and/or literature courses (course code GRK or LAT) at the 300-level or above required.
3. 9 hours of additional courses in Classics or related subjects required. This can include any course in the Classics department (course prefix codes - LAT, GRK, or CLSX). Related courses from other departments may be substituted but require written permission from the Chair or the Director of Undergraduate Studies.
4. Students planning to take 300-level Latin courses will need to complete LAT 112 or equivalent. LAT 112 will not count as a 300+ Language/Literature course so students may need to adjust graduation plan to meet overall requirements, please consult with academic advisor.
5. Hour requirements (incl. 45 jr/sr hrs) are typically met through KU Core, degree, major, second area of study and/or elective hours. Students completing the BGS with a major must choose a secondary area of study. Individual degree mapping is done in partnership with your advisor.
6. It is possible to overlap your KU Core Courses with Classics major requirements; see below for all options. Your advisor can help you create a degree plan that maximizes your choices.

5 hours of additional courses in Classics or related subjects required. It is possible to overlap your KU Core Courses with Classics major.

15 hours of Latin Language and/or literature (prefix course code - LAT) If you have previous training in Latin, please speak to an undergraduate advisor.

Hour requirements (incl. 45 jr/sr hrs) are typically met through KU core, All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Minor in Classical Antiquity

#### Why classics?

Because knowledge of Greek and Roman antiquity is fundamental to understanding the ancient and modern world.

#### What is classics?

Classics is the integrated study of ancient Greek and Roman civilization through its languages, its literature, and its artistic and archaeological remains. This broad field includes the study of the great texts of classical antiquity, such as Vergil’s Aeneid, Homer’s Iliad and Odyssey, Plato’s Symposium, Sophocles’ Antigone, and the love poems of Sappho and Catullus, but also encompasses research into everyday life in the societies that produced those great works.

In addition to training in the classical languages (Greek and Latin), the department introduces students to a range of work in literary criticism and cultural studies. Topics include archaeology and ancient art, ancient theatre, mythology, women’s history, Greek and Roman humor, cultural exchange across the Mediterranean, the translation of Greek and Latin poetry, and the history of slavery, sexuality, and ethnicity in ancient society.

#### A commitment to teaching and learning:

Our curriculum is diverse, innovative, and responsive to students’ needs. We offer a variety of topics as mentioned above, and an array of course structures and formats, including small in-person language courses, hybrid ancient Greek and Latin that combines face-to-face instruction with online exercises, mid-sized discussion courses on archaeological or literary themes, online offerings during the summer and the academic year, and one large energetic lecture course.

Our faculty members have won nearly all KU’s teaching awards, including the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other university-level teaching and advising awards. The department as a...
Beyond KU:

In addition to the rich and interdisciplinary content, the Classics degree teaches strong and widely useful critical skills such as clear writing, effective interpretation and use of evidence, and evaluation of sources. Classics graduates bring all these to bear in a variety of careers. Our students have gone on to careers in law, business, library science, journalism, medicine, museum studies, education, writing and publishing, and technology.

Innovative scholarship:

KU Classics Faculty members conduct research on a variety of ancient topics, from Greek tragedy to Roman architecture. Their research engages some of the world’s most enduring questions, such as: How did the Greek and Roman societies envision happiness? How does knowledge of the past affect one’s choices and identities? How do modern theories about gender and sexuality intersect with ancient concepts? How are cultural values encoded into art, architecture, literature, language, law, religion, and politics? And, who “owns” the classical past?

Classics students can work with faculty as research assistants or can develop their own research projects, and many Classics courses count toward KU’s Research Experience Program. Our undergraduate students have received Undergraduate Research Awards and McNair Scholarships, and many write undergraduate honors theses.

Study Abroad

The Classics Department offers a variety of study opportunities for its students to study in Greece or Italy, the UK, and elsewhere in Europe. We offer scholarships to students who participate in overseas programs that focus on the ancient world.

Related courses from other departments may be substituted with written permission from the Chair or Director of Undergraduate Studies.

This minor cannot be combined with the Classics major: Archaeology or Humanities concentrations.

Classical Antiquity Minor Hours & GPA

While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of 2.0 GPA in all departmental courses in the Minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Minor in Classical Languages

Why classics?

Because knowledge of Greek and Roman antiquity is fundamental to understanding the ancient and modern world.

What is classics?

Classics is the integrated study of ancient Greek and Roman civilization through its languages, its literature, and its artistic and archaeological remains. This broad field includes the study of the great texts of classical antiquity, such as Vergil’s Aeneid, Homer’s Iliad and Odyssey, Plato’s Symposium, Sophocles’ Antigone, and the love poems of Sappho and Catullus, but also encompasses research into everyday life in the societies that produced those great works.

In addition to training in the classical languages (Greek and Latin), the department introduces students to a range of work in literary criticism and cultural studies. Topics include archaeology and ancient art, ancient theatre, mythology, women’s history, Greek and Roman humor, cultural exchange across the Mediterranean, the translation of Greek and Latin poetry, and the history of slavery, sexuality, and ethnicity in ancient society.

A commitment to teaching and learning:

Our curriculum is diverse, innovative, and responsive to students’ needs. We offer a variety of topics as mentioned above, and an array of course structures and formats, including small in-person language courses, hybrid ancient Greek and Latin that combines face-to-face instruction with online exercises, mid-sized discussion courses on archaeological or literary themes, online offerings during the summer and the academic year, and one large energetic lecture course.

Our faculty members have won nearly all KU’s teaching awards, including the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other university-level teaching and advising awards. The department as a whole received the first ever Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

Beyond KU:

In addition to the rich and interdisciplinary content, the Classics degree teaches strong and widely useful critical skills such as clear writing, effective interpretation and use of evidence, and evaluation of sources. Classics graduates bring all these to bear in a variety of careers. Our students have gone on to careers in law, business, library science, journalism, medicine, museum studies, education, writing and publishing, and technology.
Innovative scholarship:

KU Classics Faculty members conduct research on a variety of ancient topics, from Greek tragedy to Roman architecture. Their research engages some of the world’s most enduring questions, such as: How did the Greek and Roman societies envision happiness? Master of Arts in Classics

Why study classics?

Knowledge of ancient Greek and Roman culture is fundamental to understanding both history and the modern world. The Department of Classics offers advanced course work and research in the ancient civilizations of Greece and Rome. Students study the classical languages (ancient Greek and Latin) and literatures, as well as the art and archaeology of the Greek and Roman worlds. A Master’s degree serves as preparation for a doctorate in classics and related fields, such as ancient history and archaeology. The degree also offers valuable training for students pursuing teaching careers at the secondary level.

Graduate Teaching Assistantships

Financial support is available in the form of teaching assistantships in Latin, Greek, or courses on ancient Greek and Roman culture taught in translation. Contact the department (http://classics.ku.edu/) for information.

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (https://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The B.A. in classics or another field in the humanities is required. For admission to the graduate program, the entering student should have 15 junior/senior hours in Latin and/or Greek. Well-qualified candidates with fewer hours in ancient languages are considered for admission and may be offered positions as graduate teaching assistants in non-language courses. Financial support is available in the form of teaching assistantships in Latin, Greek, or courses on ancient Greek and Roman culture taught in translation. The Graduate Record Examination is not required but is necessary if the applicant wishes to be considered for university-level scholarships.

Submit your graduate application online (https://gradapply.ku.edu/apply/).

Scholarships and Awards

The department offers several scholarships and awards. For information, please see our website (https://classics.ku.edu/scholarships-awards-prizes/) or contact the department.
All graduate students who wish to be considered for KU scholarships and financial aid must complete applications with Financial Aid and Scholarships.

**M.A. Degree Requirements**

**Course Requirements**

1. The degree program consists of 30 hours, whether one chooses the thesis or coursework option.
   a. At least 50% of coursework must be taken at the 700 level or above.

2. The student must stress either Latin or Greek or a combination of both. Students who take only one of the ancient languages at the graduate level must present at least 10 hours of elementary course work in the other; this requirement may also be satisfied by passing a departmental examination.

3. Students may select their 30 hours from graduate courses in Greek, Latin, classics, and certain courses in philosophy, history, history of art, and linguistics. A maximum of 12 hours may be taken in non-language courses.

4. Students who elect to write an M.A. thesis must complete at least 24 hours on the graduate level, in addition to 6 hours of Thesis (LAT 899 or GRK 899 or CLSX 899). In consultation with the graduate advisor, each student selects a thesis committee of 3 members.

5. The student selecting the coursework option must complete 30 hours of courses on the graduate level. In 2 of these courses, students must prepare research papers that meet the approval of the appropriate instructors and the graduate advisor. These papers are placed on file in the department office.

Elective courses should be chosen in consultation with a student's faculty advisor. More information on our course offerings can be found on the department's website (https://classics.ku.edu/our-courses/).

**Language Requirements**

Incoming graduate students take a diagnostic reading examination in Greek or Latin or both if they plan to take graduate-level courses in both languages. Students who take only one of the ancient languages at the graduate level must demonstrate a basic knowledge of the other. By the end of graduate study, the student must also demonstrate a reading knowledge of German, Italian, or French as specified in the Research Skills section of the Department of Classics Graduate Handbook (https://classics.ku.edu/graduate-handbook/).

**Examinations**

(a) Upon the recommendation of the Admissions Committee, incoming graduate students may be required to complete a diagnostic reading examination in Greek and/or Latin. Students planning to take graduate-level courses in both languages may be tested in both languages. Students with no undergraduate preparation in Greek and/or Roman history may take a diagnostic exam in whichever area(s) they are deficient. Alternatively, students will have the option of either completing appropriate coursework at the graduate or undergraduate level, or passing an examination prepared by a member of the Classics Department.

(b) All students must write a final translation examination prepared by a committee of three members of the graduate faculty, at least two of whom, including the committee chair, must be members of the Classics Department. The members of the examination committee will be selected by the student, with the approval of the graduate faculty of the Department, and the examination will be prepared by the committee in consultation with the student.

One portion of this examination will be drawn from material read in graduate classes and/or as selected by the candidate. The student will present a reading list of no less than 400 pages, according to pagination in the Oxford Classical Text or its equivalent. This will consist of 50-150 pages from at least four of the eight major areas of Greek and Latin literature that form the four-semester cycle of courses. The list must be approved by the candidate's chair and by the Director of Graduate Studies at least five weeks before the date scheduled for the examination. The first three sections of the exam will consist of material drawn from this list, while the fourth section will contain a sight passage from one of the remaining major genres of Greek or Latin literature selected by the student. Students are allowed three hours to complete a written translation; there is no oral component.

The exam is normally taken in the second year of enrollment in the program, and is administered either in the week before classes begin, or in approximately the tenth week, of the fall and winter terms. Unsuccessful exams may be re-taken once, in whole or in part, as determined by the student's committee in consultation with the Director of Graduate Studies.

**Accelerated Master of Arts in Classics**

The combined B.A. / M.A. degree allows high-achieving undergraduate majors in Classical Languages at the University of Kansas to move directly into the Master's degree program in Classics, completing it within one year of completing the B.A. Students take the same courses (and the same number of courses) as those required for the two degrees under the normal sequence, but in a more flexible configuration. All requirements for the M.A. are the same as for other tracks: the principal focus remains ancient Greek and/or Latin (concluding with a comprehensive exam in both languages), and there remains a thesis and non-thesis option and required reading knowledge of a modern research language.

Students normally apply for the program in the junior year, and not later than their seventh semester at KU. Admission standards depend not only on academic record but also on the demonstrated ability to continue with accelerated work, as determined by the department's admissions committee (to include the Chair, Director of Graduate Studies, and Undergraduate Director).

Application to the program requires:

- A brief statement of purpose
- A writing sample
- Three letters of recommendation (two of which must be from KU Classics faculty)
- One official transcript
- A 3.5 GPA in the major (slightly lower would be acceptable with especially strong letters of recommendation).

Candidacy will be reviewed in the seventh semester. If the committee decides at that time that the candidate is not suited to continue with the accelerated program, or if the student no longer wishes to pursue the MA, the student will be eligible to earn the BA as soon as those requirements have been met. Should the student not be able to complete the MA in the
fifth year, provided he/she is in good standing the student may continue into a sixth year.

**Combined B.A./M.A. in Classics**

This track allows high-achieving undergraduate majors in Classical Languages at the University of Kansas to move directly into the Master's degree in Classics, completing it within one year of completing the B.A.

Students take the same courses (and the same number of courses) as those required for the two degrees under the normal sequence, but in a more flexible configuration. For especially well prepared students with superior grade-point averages, the M.A. requires 24 graduate hours rather than 30. Students enroll as an undergraduate in six hours of 500-700 level courses that count toward the B.A. but are beyond those required for the Classical Languages major. All other requirements for the M.A. are the same as for other tracks: the principal focus remains ancient Greek and/or Latin (concluding with a comprehensive exam in both languages), and there remains a thesis and coursework option and required reading knowledge of a modern research language. **At least 50% of coursework must be taken at the 700 level or above.** See department website ([http://classics.ku.edu/overview-0/](http://classics.ku.edu/overview-0/)) for details and more information about our course offerings ([https://classics.ku.edu/our-courses/](https://classics.ku.edu/our-courses/)).

Students enroll as an undergraduate in six hours of 500-700 level courses that count toward the B.A. but are beyond those required for the Classical Languages major. All other requirements for the M.A. are the same as for other tracks: the principal focus remains ancient Greek and/or Latin (concluding with a comprehensive translation exam), and there remains a thesis and non-thesis option and required reading knowledge of a modern research language.

The shift of 6 credit hours from the M.A. to pre-requisites for the B.A. allows students greater flexibility and will ease the burden on their final year of study. More precisely, the flexibility allows faculty to advise students on a course of study that distributes courses across the 5 years of study in the most optimal way for language development.

In summary, students will successfully complete the M.A. in Classics from the University of Kansas if the following credit hour and Enroll & Pay career conditions are met:

1. A minimum of 24 hours at the 500+ level on the graduate program line.
2. A minimum of 6 hours at the 500+ level on the undergraduate program line beyond what is required of the Classics undergraduate major.

Students may be eligible to co-enroll in their final semester of undergraduate study. This should be discussed and planned during the junior year of undergraduate study.

The requirement that students in the program write an undergraduate honors thesis also provides preparation toward the M.A. thesis. Students who choose the non-thesis option are not required to write an undergraduate thesis.

**Examinations**

All students must write a final translation examination prepared by a committee of three members of the graduate faculty, at least two of whom, including the committee chair, must be members of the Classics Department. The members of the examination committee will be selected by the student, with the approval of the graduate faculty of the Department, and the examination will be prepared by the committee in consultation with the student.

One section of this examination will be drawn from material read in graduate classes. The student will present a reading list of no less than 400 pages, according to pagination in the Oxford Classical Text or its equivalent. This will consist of 50-150 pages from at least four of the eight major areas of Greek and Latin literature that form the four-semester cycle of courses (see below). A second section will be a sibject passage from one of the major genres of Greek or Latin literature selected by the student.

**Four-Semester Cycle of Courses**

Headings indicate areas from which instructors may draw material for author or genre courses. Author listings are representative, not exclusive.

**Greek**

- Epic and Lyric Poetry: From Homer to the Hellenistic poets
- Drama: Aeschylus, Sophocles, Euripides, Aristophanes
- History and Oratory: Herodotus, Thucydides, Xenophon, Attic Orators
- Philosophy: Pre-Socratics, Plato, Xenophon, Aristotle

**Latin**

- Epic Poetry: Lucretius, Ovid, Vergil, post-Augustan epic poets
- Lyric and Elegy: Catullus, Horace, Tibullus, Propertius, Ovid
- History, Oratory, Philosophy: Caesar, Sallust, Cicero, Livy, Seneca, Tacitus, Augustine, Boethius
- Drama, Satire, and Novel: Plautus, Terence, Horace, Petronius, Seneca, Juvenal, Apuleius

The Classical Languages major requires 15 hours of advanced language study beyond GRK 108 and LAT 108, beginning with LAT 112 or GRK 301. The student must complete at least 3 semesters in LAT or GRK, and one semester in the other in order to fulfill the B.A. Language requirement.

LAT course 700+ 3
GRK course 700+ 3
LAT 899 or GRK 899 3

12 12

Total Hours 144-147

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3 The Classical Languages major requires 15 hours of advanced language study beyond GRK 108 and LAT 108, beginning with LAT 112 or GRK 301. The student must complete at least 3 semesters in LAT or GRK, and one semester in the other in order to fulfill the B.A. Language Requirement.

4 Majors must complete 2 courses (6 hours) of electives. Elective courses may include any Classics, Greek, or Latin courses (but not used to satisfy other major requirements), and PHIL 384, PHIL 508, PHIL 605, PHIL 607, PHIL 608, HUM 380, ENGL 308 or other courses in allied fields as approved by the department chair.

5 Typically KU Core Goal 6 is fulfilled by a major course. If an approved Classical Languages course is not available to fulfill Goal 6, another course will need to be chosen. A free elective may need to be used to meet Goal 6 course pre-requisites.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

In Spring of the Senior Year, the student needs to take 6 hours at the 500-700 level beyond what is required for the major (this could be in CLSX, GRK, or LAT). These credit hours are applied to the M.A. once the student begins Year 5.

In the Spring of the Senior Year, it is strongly encouraged for the student to write an Honors Essay (CLSX 496/LAT 496/GRK 496).

During Year 5 (the M.A. year), the student will also take the M.A. comprehensive exam. Additionally, unless the student has taken 2 years of a modern language or GERM 100/GERM 101 as a B.A. student, the modern language requirement will need to be satisfied during the M.A. year.

Clinical Child Psychology Program

Clinical Child Psychology Graduate Program

The Clinical Child Psychology Program (CCPP) at the University of Kansas is a graduate program leading to the doctoral degree (Ph.D.) in Clinical Child Psychology. The CCPP is accredited by the American Psychological Association’s Commission on Accreditation as a clinical psychology doctoral training program with a special emphasis on children, adolescents, and families. The Program is affiliated with the Departments of Psychology and Applied Behavioral Science, and has strong ties with Department of Pediatrics at the University of Kansas School of Medicine (KUMC) and with Children’s Mercy Hospital. The program does not offer a terminal Masters degree. However, students admitted to the Doctoral program without a Masters degree will obtain a MA in Clinical Child Psychology en route to the Ph.D.

The mission of the CCPP is to develop leaders in the research, dissemination, and practice of clinical science for children, youths, and their families. As such, doctoral training in the CCPP develops clinical scientists capable of conducting innovative research and developing and delivering interventions for a range of human problems, particularly those involving children and families. In service of its mission, the CCPP is designed to promote profession-wide competencies in nine specific domain areas (e.g., Research, Assessment, Intervention, Individual and Cultural Diversity, Ethics and Legal issues), as well as program specific competencies in two domains (Administration/Management, and Professional Leadership and Communications). This is accomplished through broad and general training across the substantive areas of the science of psychology (i.e., behavioral, social, cognitive, affective, and biological bases of psychology), specialized training in research methodology and statistical analytic methods, and specialized clinical
training through basic and advanced practica. Subdomains of the professional competency and substantive knowledge areas are detailed in the CCPP Training Manual. A particular strength of the program is the developmental perspective that pervades all core courses.

The field of psychological science is changing rapidly, with advances in our understanding, assessment, diagnosis, prevention, and treatment of a range of conditions. Our goal is to train the professionals who are at the forefront of these advances in research, dissemination, education, and service. The program’s didactic and practical experiences prepare graduates for the many roles open to clinical child psychologists. Graduates hold research/teaching positions in universities, medical schools, colleges, and internship programs, and direct service delivery positions in mental health centers, hospitals, and schools.

In its fulfillment of the training model of clinical psychology known as the “scientist-practitioner model,” the CCPP utilizes guidance from the report of the National Conference on Scientist-Practitioner Education and Training for the Professional Practice of Psychology. This conference defined the model as “an integrative approach to science and practice wherein each must continually inform the other” in which the scientific research base is related to clinical practice, and practice elements are inherently interrelated to research. The CCPP places an extremely high priority on the development of research skills and competencies.

Students can complete course work, practicum requirements, and research requirements for the doctoral degree in 4 years of full-time study followed by a 1-year doctoral clinical internship at an approved site, although some students take longer. Students are expected to, and indeed want to, participate maximally in research and clinical experiences to ensure the breadth of their training. An empirically-based master’s thesis (if not obtained prior to admission), qualifying examination, and doctoral dissertation are formal milestones of research progress in addition to regular evaluation in courses, clinical practica, and annual faculty reviews.

The Director of the Program serves as the official Academic Advisor for all students in the program. As such, the Director bears responsibility for assisting the student in course selection, articulating career goals, assisting with program requirements (e.g., internship applications), and designing experiences consonant with career goals. Each student in the Clinical Child Psychology Program also selects a Research Advisor who provides individualized guidance with regard to course selection, developing and articulating career goals, and designing experiences consonant with career goals.

Master of Arts in Clinical Child Psychology

Clinical Child Psychology Graduate Program

The Clinical Child Psychology Program (CCPP) at the University of Kansas is a graduate program leading to the doctoral degree (Ph.D.) in Clinical Child Psychology. The CCPP is accredited by the American Psychological Association’s Commission on Accreditation as a clinical psychology doctoral training program with a special emphasis on children, adolescents, and families. To learn more about this doctoral program, please visit the PhD section of the catalog.

Please see the PhD section of the catalog for admission information.

Master's Degree Requirements

The master’s degree may be awarded to students pursing the doctoral degree who have met the following requirements:

- A minimum of 30 hours of course work, selected in consultation with an advisor (24 of which must be nonthesis credit hours)
- A minimum of 6 credit hours in ABSC 897/PSYC 897 Master’s Thesis in Clinical Child Psychology.
- A thesis consisting of empirical research, and an oral defense of the thesis.

Doctor of Philosophy in Clinical Child Psychology

Clinical Child Psychology Graduate Program

The Mission of the CCPP is to develop leaders in the research, dissemination, and practice of clinical science for children, youths, and their families. As such, doctoral training in the CCPP develops clinical scientists capable of conducting innovative research and developing and delivering interventions for a range of human problems, particularly those involving children and families. In service of its mission, the CCPP is designed to promote profession-wide competencies in nine specific domain areas (e.g., Research, Assessment, Intervention, Individual and Cultural Diversity, Ethics and Legal issues), as well as program specific competencies in two domains (Administration/Management, and Professional Leadership and Communications). This is accomplished through broad and general training across the substantive areas of the science of psychology (i.e., behavioral, social, cognitive, affective, and biological bases of psychology), specialized training in research methodology and statistical analytic methods, and specialized clinical training through basic and advanced practica. Subdomains of the professional competency and substantive knowledge areas are detailed in the CCPP Training Manual (http://ccpp.ku.edu/resources/). A particular strength of the program is the developmental perspective that pervades all core courses.

The field of psychological science is changing rapidly, with advances in our understanding, assessment, diagnosis, prevention, and treatment of a range of conditions. Our goal is to train the professionals who are at the forefront of these advances in research, dissemination, education,
and service. The program’s didactic and practical experiences prepare graduates for the many roles open to clinical child psychologists. Graduates hold research/teaching positions in universities, medical schools, colleges, and internship programs, and direct service delivery positions in mental health centers, hospitals, and schools.

In its fulfillment of the training model of clinical psychology known as the “scientist-practitioner model,” the CCPP utilizes guidance from the report of the National Conference on Scientist-Practitioner Education and Training for the Professional Practice of Psychology. This conference defined the model as “an integrative approach to science and practice wherein each must continually inform the other” in which the scientific research base is related to clinical practice, and practice elements are inherently interrelated to research. The CCPP places an extremely high priority on the development of research skills and competencies.

Students can complete course work, practicum requirements, and research requirements for the doctoral degree in 4 years of full-time study followed by a 1-year doctoral clinical internship at an approved site, although some students take longer. An empirically-based master’s thesis (if not obtained prior to admission), qualifying examination, and doctoral dissertation are formal milestones of research progress in addition to regular evaluation in courses, clinical practica, and annual faculty reviews.

The Director of the Program serves as the official Academic Advisor for all students in the program. As such, the Director bears responsibility for assisting the student in course selection, articulating career goals, assisting with program requirements (e.g., internship applications), and designing experiences consonant with career goals. Each student in the Clinical Child Psychology Program also selects a Research Advisor who provides individualized guidance with regard to course selection, developing and articulating career goals, and designing experiences consonant with career goals.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2449) section of the online catalog.

Please consult the Departments & Programs (p. 747) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Admission to the CCPP is highly competitive. All completed applications and incoming students are selected by an admissions committee chaired by the Program Director and comprising core CCPP faculty members and student representatives. Essential requirements for admission include (a) a Bachelor’s degree (BA, BS) from an accredited institution, (b) a record of scholarly achievement that shows strong promise of success in course work, research, and clinical work, and (c) at least 15 credit hours in psychology coursework, including statistics and research methodology. Preferred qualifications for admission include a strong record of research experience and evidence of research productivity (e.g., presentations, posters, honors theses). Non-native speakers of English must meet English proficiency requirements (https://gradapply.ku.edu/english-requirements/).

The Admissions committee will use the following when determining suitability for admission: The applicant’s transcripts and grade point averages (GPAs) from previous educational institutions; a written statement of interests/goals provided by the candidate; the candidate’s résumé or CV; 3 letters of recommendation from professionals who can address the candidate’s potential in a doctoral training program; and a statement (max. 500 words) describing (a) your views on diversity, equity, and inclusion (DEI) in clinical child psychology, (b) evidence of your contribution to DEI to date, and/or (c) your commitment to DEI in your future career. Applicants may also submit a writing sample that demonstrates their technical/professional writing skills. Highly rated applicants will be invited to interview with CCPP faculty and students prior to admissions decisions. Financial aid is available. Please visit the program’s website (https://ccpp.ku.edu/admissions/) for information regarding student admissions, outcomes, and other data.

Submit your graduate application online (https://gradapply.ku.edu/apply/) (College of Liberal Arts and Sciences, Psychology — Clinical Child Psychology Program) as well as all supplemental materials.

**Clinical Child Psychology Curriculum**

The Doctor of Philosophy in Clinical Child Psychology requires the completion of 95 credit hours. The following curriculum meets criteria for APA accreditation and KU general requirements.

Research Skills and Responsible Scholarship

Responsible Scholarship Requirement

Responsible Scholarship in the CCPP involves pertinent areas of protection of human subjects, collaborative research, conflicts of interest, authorship, publication, plagiarism, copyright, data management, professional practices, mentor/student responsibilities, maintenance of confidentiality, approach research conduct and research misconduct, HIPAA, and ethics of publishing clinical case material, among other related topics. This requirement must be met before taking the Comprehensive Oral Examination.

Students in the CCPP fulfill the Responsible Scholarship Requirement through

- Courses in the curriculum:

<table>
<thead>
<tr>
<th>Code/Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC/ABSC 809 Professional Issues: Clinical Child Psychology</td>
<td>1</td>
</tr>
<tr>
<td>or EPSY 880 Ethical and Legal Issues in Psychology and Counseling</td>
<td>3</td>
</tr>
</tbody>
</table>

- The Collaborative Institutional Training Initiative (CITI) Human Subjects Protection and HIPAA online tutorial

Research Skills Training Requirement in CCPP

The additional Research Skill requirement is fulfilled by 1 additional course above the 2 required courses in statistical or data analysis (quantitative, applied behavior analysis, qualitative). No course is specified, but must be approved by the student’s research advisor and the program director.

Professional Competencies

Students in the program must demonstrate profession-wide competencies and program-specific competencies before being approved to apply for the required Doctoral Internship. The competency assessment process includes evaluation of the student’s professional artifacts (i.e., work products) as well as the student’s self-evaluation of how the artifacts collectively demonstrate the professional competencies.

Master’s Degree and Thesis

Requirements for completion of the master’s degree may be found on the M.A. Degree Requirements catalog page.
Ph.D. Preliminary Examination: The Task

The program uses the Task system for its preliminary examination in research methodology, teaching, or applied clinical area. Details are available in the Clinical Child Psychology Program Training Manual, available on the program’s website (https://ccpp.ku.edu/Student-Resources/).

Ph.D. Oral Comprehensive Examination

Upon completion of all course requirements for the Ph.D. and of the Task, except for dissertation and internship, the student must pass the oral comprehensive examination. This examination normally should be taken prior to the completion of four calendar years in the case of students entering with the bachelor’s degree and three years for students entering with a master’s degree.

All students, regardless of date of entry to the program, must successfully complete the oral comprehensive examination (Dissertation Proposal) before Stop Day of the Spring semester in the calendar year in which they intend to apply for internship. If a student does not pass by this date, the CCPP Faculty will not approve them for internship readiness in that year.

Additional details are available in the Clinical Child Psychology Program Training Manual, available on the program’s website (https://ccpp.ku.edu/Student-Resources/).

Doctoral Dissertation

The Ph.D. dissertation must be based on an original, empirical investigation. A minimum of 12 hours in dissertation in clinical child psychology (ABSC 998/PSYC 998) is required.

Given that students must complete a doctoral internship, timing of the dissertation defense should be carefully considered. We strongly encourage students to defend their dissertation prior to leaving for internship. However, it may be necessary for students to defend their dissertation during the internship year in some cases. If a student does not defend the dissertation before the end of their internship year, they must return for the semester following completion of the internship and must remain in residence until the dissertation is successfully defended and the dissertation document has been approved.

Additional details are available in the Clinical Child Psychology Program Training Manual, available on the program’s website (https://ccpp.ku.edu/Student-Resources/).

Doctoral Internship

An 11-month clinical internship at a setting accredited by the American Psychological Association is required. Students apply to accredited Internship Centers (https://ccpp.ku.edu/Student-Resources/).

Electives/Independent Study

In order to complete the 95 credit hours required for the doctoral degree (Ph.D.) in Clinical Child Psychology, the student will take additional courses chosen with approval of the student’s academic advisor and research advisor.

Department of Communication Studies

Why study communication studies?

The Communication Studies undergraduate major equips students with a diversity of skill sets by investigating communication in various cultural contexts, including relational, organizational, intercultural, political, and more.

In an increasingly globalized world, competent communication is crucial for career advancement, interpersonal relationships, and public democratic participation. Here’s what we know: humans rely on communication, and the creation and translation of symbols, language, and messages are integral to daily interactions. In other words, communication connects us.

The major expands on fundamental speaking principles from the introductory course through emphasizing theories, methods, performances that apply to everyday communication practices.

Undergraduate Programs

In our complex, mediated, global, and pluralistic world, we are awash in messages. Others seek to influence our ideas and our actions, and we seek to influence theirs. Studying human communication in its many forms and contexts enables students to be engaged civic participants, reflective audience analysts, effective communicators at work and in relationships, and reflective consumers of messages. Examining communication through historical and contemporary lenses demonstrates its power to move individuals, to enable the development of groups ranging from families to nations, and to inspire events. The communication studies curriculum prepares students to engage with the world they enter as thoughtful, critical communicators and as agents of community building in a global world.

Graduate Programs

The Department of Communication Studies offers a Graduate Certificate, Master of Arts, and Doctorate of Philosophy. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in COMS.

Graduate Certificate Program

The 4-course, 12-hour Professional Workplace Communication certificate is intended to increase communication competencies for effective
decision-making, team-building, problem-solving, and crisis-resolution practices with various professional stakeholders.

**Lawrence campus M.A. Program**

The M.A. program is designed as a 30-hour, 2-year degree program in either Relationships & Social Interaction or Rhetoric & Political Communication. Students will complete a thesis or non-thesis plan of study. The primary mission of the Master of Arts in COMS is to introduce graduate students to the process of conducting original research in human communication. The majority of our MA students go on to pursue a PhD in communication or a related field. Others use the MA as preparation for careers in business, legal consulting, politics, social work, or other related areas of employment.

**Ph.D. Program**

The doctoral program in COMS is designed as an intensive, 4-year program with content in experimental, qualitative, quantitative, and rhetorical methods. Students may specialize in either Relationships & Social Interaction or Rhetoric & Political Communication. The primary mission of the Doctor of Philosophy in COMS is to train students in the process of conducting original research in human communication. With few exceptions, KU PhD graduates pursue careers doing research and teaching in higher educations.

**Courses**

**COMS 104. Introduction to Communication Studies. 3 Credits. H**
Survey of the major areas of the Communication Studies field. Provides an overview of communication theory and research methods, and introduces key topics, approaches, and applications in core areas such as rhetoric, organizational communication, interpersonal communication, intercultural communication, and communication technology.

**COMS 130. Speaker-Audience Communication. 3 Credits. U**
Study of rhetorical theory and its application to the preparation, presentation, and criticism of oral discourse in audience situations. Special consideration of listening behavior and of the ethical conduct of speech in a free society. This course fulfills the College argument and reason requirement.

**COMS 131. Speaker-Audience Communication, Honors. 3 Credits. U**
The study of rhetorical theory and its application to the preparation, presentation, and criticism of oral discourse in audience situations. Special consideration of listening behavior and of the ethical conduct of speech in a free society. This course fulfills the College argument and reason requirement. This is an honors section of COMS 130 open only to students in the Honors Program.

**COMS 132. Speaker-Audience Communication for the Professional Schools. 3 Credits. H**
This course focuses on the study of oral communication: the application, preparation, presentation and criticism of messages appropriate in the business or organizational setting. Special consideration is given to speaker confidence, working in teams, listening behaviors and application of communication theories to the audience and rhetorical situation. Prerequisite: Open only to students in the professional schools.

**COMS 133. Speaker-Audience Communication for the Professional Schools, Honors. 3 Credits. H**
This course focuses on the study of oral communication the application, preparation, presentation and criticism of messages appropriate in the business or organizational setting. Special consideration is given to speaker confidence, working in teams, listening behaviors and application of communication theories to the audience and rhetorical situation. Prerequisite: Open only to students in the professional schools who are members of the University Honors Program.

**COMS 177. First Year Seminar: _____. 3 Credits. U**
A limited-enrollment, seminar course for freshmen, addressing current issues in Communication Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the office of Academic Programs and Experiential Learning. Prerequisite: Open to Freshmen only (less than 30 hours).

**COMS 207. Introduction to Political Communication. 3 Credits. S**
This class addresses the different ways in which the three main players in political communication processes (leaders, the media and citizens) affect the political behavior, attitudes or cognitions of individuals; or have outcomes that influence public policy at different levels. The contents of the course are organized into three areas: Foundations of political communication, central questions and theories in political communication, and political campaigning and advertising. Prerequisite: Concurrent or prior enrollment in COMS 130.

**COMS 210. Introduction to Organizational and Professional Communication. 3 Credits. S**
Introduces foundational concepts in organizational communication, focusing on topics such as superior-subordinate relationships, information- and feedback-seeking, relationships with stakeholders, and dealing with organizational change. The course emphasizes individual communication practices and responsibilities that contribute to organizational outcomes and personal success in organizations. Prerequisite: Concurrent or prior enrollment in COMS 130.

**COMS 230. Fundamentals of Debate. 3 Credits. U**
Introduction to the principles of debating. Emphasis on debating techniques, analysis of the question, methods of using evidence, refutation, and brief making. This course fulfills the College argument and reason requirement.

**COMS 231. Practicum in Forensics. 1 Credits. U**
For students selected by faculty supervisor for work on university debate squad. Students to enroll at time of their selection. Recurring enrollments permitted.

**COMS 232. Introduction to Rhetoric. 3 Credits. HR H**
Historical survey of theories of communication and persuasion, the people who produced them, and the philosophical assumptions upon which they rest. Beginning with the Greeks, especially Plato and Aristotle, and ending with selections from Kenneth Burke and other contemporary figures, the course focuses on changing concepts of rhetoric throughout a time span of some 2000 years. Prerequisite: Concurrent or prior enrollment in COMS 130.

**COMS 238. Cases in Persuasion. 3 Credits. H**
An exploration of basic principles that explain the effect and effectiveness of the arts of persuasion currently practiced in American society. Class discussions of incidents leading to the discovery of principles and theories that explain them. Continuing emphasis on issues concerning the ethical character of persuasion in contemporary life. Prerequisite: COMS 130 or COMS 230.

**COMS 244. Introduction to Interpersonal Communication Theory. 3 Credits. SI S**
Examines basic theoretical perspectives and research on verbal and nonverbal communication elements affecting communication between individuals in a variety of contexts. Topics include communication competence, developmental aspects of interpersonal communication, and
interpersonal influence. Prerequisite: Concurrent or prior enrollment in COMS 130.

COMS 246. Introduction to Intercultural Communication. 3 Credits. S
This course attempts to provide an understanding of communication as it affects culture and as it is affected by culture. Special emphasis will be placed on the principle of similarity and differences as it relates to the roles of verbal and non-verbal symbols, codes, and cues, stereotypes, prejudices and value and thought patterning systems between and among cultures. Prerequisite: Concurrent or prior enrollment in COMS 130.

COMS 310. Advanced Organizational and Professional Communication. 3 Credits. SC S
This course provides a foundation for the study of communication in organizational contexts. It introduces students to various organization theories including classical, human relations, systems, and cultural approaches and examines the role of communication in each. Information flow, communication climate, communication networks, work relationships and managerial communication are discussed as well as organizational symbolism, conflict resolution, rituals and ethics. The course is designed to heighten students' awareness of the role of communication in the organizing process and to develop their abilities to diagnose and prevent communication-related problems. Prerequisite: COMS 130.

COMS 320. Communication on the Internet. 3 Credits. S
This course introduces social and communication issues in the context of online interaction. Surveys a range of social internet technologies (e.g., newsgroups, chat, MUDs, etc.). Focus is on the interpersonal topics, including the establishment and maintenance of individual and cultural identities, personal relationships, the emergence of online communities, power and conflict in online groups, language use in online contexts, and how online groups are used to enhance or alter civic and global cultures.

COMS 322. Audience Centered Public Speaking in the Workplace. 3 Credits. S
In this course, students develop and present their ideas by applying communication theories to organizational audiences in various presentation situations. Specifically, this course focuses on presentation development, preparation, presentation and critique of messages appropriate in the business or organization setting. Special attention is given to speaking with confidence, presenting and working effectively in teams, reflecting and improving on presentations skills, and listening and speaking ethically in an increasingly diverse work world. Prerequisite: Not intended for Communication Studies Majors. Does not count toward Communication Studies Major or Minor requirements. Must have completed at least 15 credit hours at KU to enroll.

COMS 330. Effective Business Communication. 3 Credits. S
The purpose of this course is to develop the student's written, spoken and electronically mediated business communication skills to prepare to enter a career field. Focus is placed on job search preparation including the development of cover letters, resumes, online applications, and interviewing skills. Students are also engaged with business communication by expanding their current writing skills to meet the needs of a business, exposure to common business writing situations, and developing professional presentations. Prerequisite: COMS 130 or COMS 230.

COMS 331. Persuasive Speaking. 3 Credits. H
Guided experiences in the preparation and presentation of discourse intended to influence outcomes of human interactions in various speaker-audience situations, including television. Special emphasis on speech styles in influencing thought, attitudes, and behavior. Prerequisite: COMS 130 or COMS 230.

COMS 335. Mass Media and Politics. 3 Credits. H
The primary goal of this course is to critically examine the role of mass media in U.S. politics. Students learn how information makes it into news coverage, as well as how media content affects individuals, political campaigns, and governing decisions. The course covers media effects theories, news bias and polarization, political entertainment, and other topics. Although the primary focus of the course is politics, students interested in public relations and strategic communication also benefit from learning about U.S. journalism. By the end of the semester, students will be able to critically evaluate political and media systems in the U.S. (Same as POLS 521.) Prerequisite: COMS 130.

COMS 342. Problem-Solving in Teams and Groups. 3 Credits. S
This course introduces basic concepts important to leading and/or participating in problem-solving work teams. Problem identification and analysis and leadership are emphasized and practiced. Teamwork variables are discussed and promoted. Lecture, demonstrations, exercises in class are structure for students to analyze groups outside of class. Prerequisite: COMS 130 or COMS 230.

COMS 345. Propaganda and Persuasion. 3 Credits.
This course is an examination of the history and theory of propaganda and mass persuasion. In this course students will develop a more precise understanding of the term “propaganda” and of the techniques of mass persuasion. Emphasis is placed on developing the critical skills necessary to analyze and evaluate propaganda artifacts and campaigns in varied historical and contemporary contexts, including: politics, war, social movements, advertising, entertainment, commemoration, and popular culture. Prerequisite: COMS 130 or COMS 230.

COMS 350. Communication in a Diverse World. 3 Credits. S
In a diverse world, communication plays a central role in both creating and sustaining cultural norms, values, and beliefs. However, diversity is not universally valued, and difference leads to unequal institutions, systems, and policies, including discrimination, oppression, and ethnocentrism. In this course, students will reflect on current cultural diversity topics and critically interrogate communication's role in structuring identities and difference across socio-cultural contexts.

COMS 355. Introduction to Rhetoric and Social Influence. 3 Credits. HL H
This course examines in detail the texts of speeches and essays on controversial issues in order to illustrate the varied forms of rhetorical action and the diverse modes of analysis and evaluation that can be applied to them. Examples are drawn from the rhetorical literature of contemporary U.S. speakers and prose writers. Formerly known as COMS 235. Not open to students with credit in COMS 235. Prerequisite: COMS 130 or COMS 230.

COMS 356. Introduction to Behavioral Research Methods in Communication. 3 Credits. S
