4. Intellectual-Conceptual, Integrative, and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.
5. Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review, the provisions for reasonable accommodation will be determined.

For further information, contact The Department of Pharmacology, Toxicology and Therapeutics, University of Kansas School of Medicine, MS 1018, 3901 Rainbow Blvd., Kansas City, Kansas 66160; Phone: (913) 588-0028 E-mail: bhagenbuchi@kumc.edu or (913) 588-7519 kmccarso@kumc.edu

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for admission to academic programs at the University of Kansas Medical Center. In such cases, the determination of eligibility for admission will be made on an individual basis in consultation with the applicant’s physician; the decision will take a number of factors into consideration, including the legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

Department of Population Health

The Department of Population Health was formed on July 1, 2019, upon the merger of the Department of Preventive Medicine and Public Health and the Department of Health Policy and Management. Our department, with faculty on all three campuses of the Kansas University Medical Center (Kansas City, Wichita and Salina), is focused on improving health and reducing health inequities for all people in Kansas. We think that the health of our communities is best served by integrating our efforts to improve public health with efforts to improve health systems, health policies, and health care delivery. We seek to understand the complex interplay of behavioral health and social determinants of health and identify the way these underlying determinants influence the delivery of health care services. We try to find ways in which health systems and

TECHNICAL STANDARDS AND REQUIREMENTS FOR GRADUATE STUDIES IN THE DEPARTMENT OF PHARMACOLOGY, TOXICOLOGY AND THERAPEUTICS

The Ph.D. degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. As a consequence, graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory.

Therefore, all students admitted for graduate studies in Pharmacology and Toxicology must meet the following abilities and expectations.

1. Observation: The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.
2. Communication: A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.
3. Motor: Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to perform laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.
4. Intellectual-Conceptual, Integrative, and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.
5. Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review, the provisions for reasonable accommodation will be determined.

For further information, contact The Department of Pharmacology, Toxicology and Therapeutics, University of Kansas School of Medicine, MS 1018, 3901 Rainbow Blvd., Kansas City, Kansas 66160; Phone: (913) 588-0028 E-mail: bhagenbuchi@kumc.edu or (913) 588-7519 kmccarso@kumc.edu

STUDENT POLICY ON INFECTIOUS DISEASE

Department of Population Health

The Department of Population Health was formed on July 1, 2019, upon the merger of the Department of Preventive Medicine and Public Health and the Department of Health Policy and Management. Our department, with faculty on all three campuses of the Kansas University Medical Center (Kansas City, Wichita and Salina), is focused on improving health and reducing health inequities for all people in Kansas. We think that the health of our communities is best served by integrating our efforts to improve public health with efforts to improve health systems, health policies, and health care delivery. We seek to understand the complex interplay of behavioral health and social determinants of health and identify the way these underlying determinants influence the delivery of health care services. We try to find ways in which health systems and
health policies can better respond to the needs of the communities they serve.

TEACHING
Faculty and staff in the Department of Population Health are dedicated to offering degree programs to future public health practitioners, health service leaders and clinical researchers. The department provides the following degree programs:

- Master of Health Services Administration (http://www.kumc.edu/school-of-medicine/population-health/education/master-of-health-services-administration-(mhsa).html)
- Ph.D. in Health Policy Management (http://www.kumc.edu/school-of-medicine/population-health/education/phd-in-health-policy-and-management.html)
- Community Health Center Executive Fellowship (http://www.chcexecfellow.com/)

RESEARCH
Department of Population Health faculty reflect the multidisciplinary scope of health practices and represent a variety of academic disciplines. Current research includes:

- Tobacco Control
- Cancer Screening and Prevention
- Obesity
- Health Services Research
- Epidemiology

SERVICE
Through strong partnerships with community organizations, government agencies, health care systems and other stakeholders, our more than 90 faculty and staff seek to address some of the most critical threats to the health of our communities, including tobacco, obesity, cancer, and diabetes. Our diverse faculty bring expertise in psychology, sociology, epidemiology, economics, statistics, demography, anthropology, implementation science, public health, and health care delivery, allowing us to apply a multi-disciplinary approach to tackling health concerns, particularly those concerns that disproportionately affect rural, incarcerated, Native American, African American, and Latino communities. Learn more (http://www.kumc.edu/school-of-medicine/population-health/faculty-and-staff/faculty.html).

Courses

HP&M 610. The Health Care System. 4 Hours.
This course introduces students to the health care system of the United States. The course stresses the system's historical development, distinguishing features, financing, management, resources, and politics. Requirements include position papers, class discussions, examinations, and site visits to health care facilities LEC.

HP&M 620. Women and Health Care. 3 Hours.
A gender analysis of the organization of health care in the United States, using sociohistorical and sociological perspectives. Considers the health status and health care problems of women in relation to cultural aspects of medicine and health care; the roles of both informal and professional health care providers; the political economy of health care systems; and the relationship between gender and the state. (Same as SOC 617.) Prerequisite: HPM 601 or permission of instructor. LEC.

HP&M 810. The Health Care System. 3 Hours.
The structure and function of the components of the U.S. healthcare system are introduced in the context of the history, values and social forces that influenced its development and evolution. Students gain exposure to the concepts and vocabulary associated with aspects of the system, including delivery (providers, institutions, services), resources (finance, payment, insurance), population and public health, and outcomes (cost, access, quality). Healthcare outcomes from consumer, clinical, and societal perspectives are explored. LEC LEC.

HP&M 819. Research for Health Care Leaders. 3 Hours.
Introduces epidemiology, survey research, and evaluation research. Examines quantitative and qualitative methods. Focuses on role of research in health policy and health management. Incorporates lecture, discussion, papers and presentations. LEC.

HP&M 822. Health Care Economics. 3 Hours.
This course introduces the core concepts from economics to healthcare with a focus on helping healthcare managers use economic tools in making sound decisions. The demand for healthcare products, the structure of insurance, and the supply of healthcare products are examined. Students will apply a variety of economic analyses to health policy and health system issues. LEC LEC.

HP&M 825. Financial Concepts in Healthcare Management. 3 Hours.
Introduces the financial and managerial accounting concepts used in health care. This includes financial statement analysis; cost accounting; budgeting; and capital project analysis. LEC LEC.

HP&M 827. Financial Applications in Healthcare Management. 3 Hours.
Applies economic and financial concepts to health care management, integrating operational, strategic, and financial planning. Students will analyze financial statement ratios; forecast revenue and expense; develop budgets; credit worthiness determination; break-even analysis and working capital management in a variety of healthcare settings including long-term care and public health. LEC Prerequisite: HPM 825, Financial Concepts in Healthcare Management or permission of instructor. LEC.

HP&M 830. Health Care Management. 3 Hours.
This course introduces key concepts and skills for health care managers. Emphasizing self-discovery and professional development, the course examines how to become an informed employee, an effective team member, and a successful manager. Course topics include interpersonal skills, delegation, leadership, performance management, and organizational change. Learning methods include lectures, case analyses, experiential exercises, and discussion. Prerequisite: HPM 810 or permission of instructor. LEC.

HP&M 831. Reimbursement and Fiscal Policy. 2 Hours.
Reimbursement and fiscal policy practices impact the success and the economic well-being of healthcare institutions, payers and patients. This course develops the student's understanding of complex reimbursement methodologies from the perspective of providers and payers. Students will explore the strengths and weaknesses of the major methods of third party reimbursement, the types of managed care organizations and the payment methodologies employed. Students are also prepared to approach reimbursement policy issues both from the payer and the provider viewpoint. LEC LEC.
HP&M 832. Governance and Health Law. 2 Hours.
A survey course of the law as it affects governance, health care administration and health care generally. This course will develop the student's understanding of health law and its impact on many aspects of health care governance and administration. The student should be able to identify and understand various legal issues they may encounter and when to engage legal counsel's advice. Prerequisite: HPM 810. LEC.

HP&M 833. Ethics. 2 Hours.
An introduction to the principles and concepts in the ethics of health services administration. The course will help students further develop their skills to recognize and analyze ethical dilemmas, and to explain, justify and evaluate the decisions they make in response to such dilemmas. LEC.

HP&M 837. Health Policy. 3 Hours.
This course examines the development, implementation, and evaluation of federal, state, and local health policy in the United States. Particular attention will be given to (1) the development of public institutions and policy goals; and (2) current policy problems such as cost controls, reimbursement, health services utilization, program assessment and evaluation, public health, and public/private investment and resource planning. Students will be expected to synthesize and integrate knowledge to apply theory and principles in ways consistent with professional practice as a health policy analyst. LEC LEC.

HP&M 838. Rural Health Care. 3 Hours.
Provides students with (a) an understanding of major issues in rural health and the rural environment in which health care providers and administrators provide service; (b) an understanding of the demographics, economics, services and challenges associated with the health care delivery systems in rural America and (c) an overview of federal and state health policy and its effect on rural health systems. Special emphasis will be placed on identifying, understanding, and addressing rural health challenges from administrative and policy perspectives. Prerequisite: None. LEC.

HP&M 840. Organizational Foundations for Leading Change. 3 Hours.
Self-discovery as a foundation for professional development while exploring the concepts of leader, manager, and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical, and other issues that constrain and destabilize organizations and strategies to restore equilibrium are explored. (Same as NRSG 880). LEC LEC.

HP&M 842. Roles, Functions and Care Models. 2 Hours.
This course examines the nature and characteristics of the healthcare workforce needed to deliver direct, indirect, and support services. Healthcare worker roles are analyzed through the lens of key organizational functions and care delivery modalities. Common care delivery models, such as primary, team, and patient-centered care approaches to organizing care delivery are explored in various clinical settings, including acute and long-term care and community and public health entities. Administrative challenges and opportunities for managing a diverse workforce are presented. LEC. LEC.

HP&M 844. Communication for the Healthcare Executive. 2 Hours.
This course focuses on attaining proficient communication skills to deliver high impact messages to stakeholders ranging from board members, to diverse communities of interest, to policymakers and regulators. Verbal and written skill development addresses executive presence to perform communication functions such as conducting an 'ask' from a policymaker or potential benefactor, using storytelling and data to shape critical messages to the media, and communicating value-driven memoranda to internal audiences. The use of emerging technologies to aid in communication effectiveness will also be presented. LEC. LEC.

HP&M 846. Health Information Technology Management. 3 Hours.
This course covers fundamental concepts of health information technologies including information management, health care delivery and remote monitoring systems of interest to administrators in health services organizations. Types of systems, alignment with organizational strategy, selection and adoption, return on investment, security and privacy, and uses of healthcare information for clinical and strategic analysis and decision support will be covered. The course will also cover current U.S. health technology infrastructure, policy, organizations and issues regarding the latest technology applications. An introduction to health care analytics is also provided. LEC.

HP&M 847. Business Intelligence in Healthcare. 2 Hours.
An introduction into the data sources, technologies and processes leveraged by healthcare organizations to make more timely, informed and actionable business decisions. Students will learn fundamental terms and practices of data analytics and analysis, study real world examples of how data can inform decision making in healthcare and participate in case studies and in class presentations. Prerequisite: Permission of instructor. LEC.

HP&M 848. Designing Health Care Organizations. 2 Hours.
This class examines how design affects a broad range of health care organizations. It considers designs for jobs, processes, equipment, buildings, and organizations, and explores implications for safety, customer satisfaction, worker satisfaction, productivity, effectiveness, and profitability. Students analyze varied cases that approach design as a management decision-making process. LEC.

HP&M 850. Introduction to Operations. 3 Hours.
Examines performance of health care organizations, sources of variation, methods of measurement, and strategies for improving performance. Considers several approaches to performance improvement and examines tools widely used in operations management. Incorporates lecture, discussion, and fieldwork. (Same as NRSG 882.) LEC.

HP&M 852. Strategic Marketing. 2 Hours.
Provides students with a framework for executive-level, strategic market planning and analysis. Topics covered include: the strategic marketing organization; the impact of organizational culture on strategy development; environmental assignments and competitor analysis; market research; and the impact of the marketing fours (price, positioning, promotion, and product) in health care. LEC.

HP&M 853. Strategic Management. 2 Hours.
Explores internal and external analysis for health care organizations. Examines development, analysis, execution, and monitoring of strategies. Application of critical thinking skills to strategy. Lecture and discussion. Prerequisite: Completion of HPM Level I courses or permission of instructor. LEC.

HP&M 854. Human Resources and Workforce Development. 3 Hours.
The focus of this course is to understand the leadership functions of human resource management in organizations to create a competitive edge through employee empowerment. Core human resource concepts are introduced and applied to optimize human capital within a variety of healthcare settings, including compensation and benefits, employee recognition, and employee/labor relations. National, regional and local strategies and workforce trends are discussed related to best practices for the selection, retention, and management as a healthcare employer of choice. (Same as NRSG 891). LEC LEC.
HP&M 857. Evaluating Outcomes of Healthcare. 3 Hours.
This course will trace the development of the outcomes research movement and provide examples of methodologies, assessment instruments and issues that guide outcomes research. It will also review the methods for linking research findings with clinical practice (i.e., clinical practice guidelines). Obstacles to acceptance of practice guidelines will be discussed. Finally, the translation of outcomes research methodology into programs to improve health quality will be presented. Prerequisite: Permission of instructor. LEC.

HP&M 858. Organizational Behavior in Healthcare. 3 Hours.
Healthcare as a cultural and socio-behavioral system is presented. Using research and theory, students explore alternative perspectives on the nature of medicine and healing within comparative health systems, both U.S. and abroad. Students examine at an advanced level how healthcare organizational structures contribute to patient health outcomes and influence employee behaviors. The course reinforces the nature and characteristics of the health professions, particularly medicine and nursing perceptions, and the complex behavioral dynamics of health professionals with organizational leaders. LEC LEC.

HP&M 859. Professional Development. 2 Hours.
Prepares students for an initial professional job search, long term career planning and professional development. Explores personal assessment, professional networking, mentoring, resume construction, job searches and interviewing. Reviews professional communication and other professionalism domains. Introduces foundational concepts of leadership and leadership development. Lectures, papers, interactive activities and discussion. Prerequisite: Permission of instructor. LEC.

HP&M 860. Graduate Internship in Healthcare Services Administration. 1-3 Hours.
Novice and experienced health services administrators function in applied settings. The internship is designed to meet the needs of individual students to advance their career functioning and set in motion a professional development plan. The inexperienced administrator will use the internship as a mid-curriculum opportunity to apply and synthesize in the practice setting knowledge, skills, and abilities. Students who come to the program with mid-level to advanced experience use the practicum to advance their career through exposure to additional experiences that extend their knowledge, skills, and abilities and demonstrates synthesis of program competencies. FLD FLD.

HP&M 861. Capstone Seminar. 2 Hours.
The knowledge, skills, and abilities learned throughout the program are validated in capstone experience. A case study approach will be used to synthesize and apply principles including, but not limited to, change theory and quality improvement, research and information technologies, strategy and communication tools, human resource management, financial and economic analysis, and advanced decision-making and management of organizational behavior. Students will present their cases to peers, faculty, and external reviewers for dialogue, critique, and a plan for professional skills development. IND. RSH.

HP&M 862. Research Practicum in Health Services Administration. 1-3 Hours.
A course to conduct a research project related to health services delivery, management or policy and to explore topics related to the research project. RSH Prerequisite: HPM 819. RSH.

HP&M 863. Independent Study. 1-3 Hours.
This course is designed to meet the needs of students who have a special interest that cannot be met by existing courses. IND IND.

HP&M 870. Research Inquiry I: Defining and Supporting the Research Problem. 1 Hour.
Students select a problem area, critically review and analyze the research literature related to it and develop a research question(s) and working hypotheses. The analysis of the problem integrates field experiences with relevant literature, and translates ideas from the practice and/or policy setting into the context of scholarly inquiry. Prerequisite: Permission of the instructor. FLD.

HP&M 871. Research Inquiry II: Research Design and Analysis. 1 Hour.
Students build on a problem area of interest with potential benefit to the health care field and examine methodologies that would support a hypothesis or significant research question. The course guides students in translating their questions into a research design, using specific data sources, including overall strategy, measurement, study population and/or sample and analysis plan. Focus will be placed on critical analysis of design trade-offs and limitations. Prerequisite: HPM 870 or permission of the instructor. SEM.

HP&M 872. Statistical Applications Using Large Data Bases. 3 Hours.
The management of large data sets is a critical analytic skill for health policy and management research. This course exposes students to the various types and configurations of large data sets and provides hand-on analytic experience using an array of statistical techniques and procedures. Attention is placed on the criteria for designing and evaluating, including the trade-offs in selecting one plan over another. Students actually carry out an analysis plan for a variety of data types. Prerequisite: HPM 819, or permission of the instructor. LEC.

HP&M 873. Statistical Applications Using Large Data Bases. 3 Hours.
The management of large data sets is a critical analytic skill for health policy and management research. This course exposes students to the various types and configurations of large data sets and provides hand-on analytic experience using an array of statistical techniques and procedures. Attention is placed on the criteria for designing and evaluating, including the trade-offs in selecting one plan over another. Students actually carry out an analysis plan for a variety of data types. Prerequisite: HPM 819, or permission of the instructor. LEC.

HP&M 874. Statistics for Decision Making. 3 Hours.
Elementary statistical techniques to include descriptive statistics, probability, sampling, and statistical inference of means and proportions; advanced statistical techniques include multivariate analysis of qualitative and quantitative variables using multiple linear and logistic regression. LEC.

HP&M 875. Modeling in Health Services Research. 3 Hours.
Provides an opportunity for students to use a number of common analysis models in health services research. Emphasizes a conceptual understanding of appropriate modeling techniques and use of statistical software packages. The course focuses on application of methods to health services research questions, with emphasis on regression design and interpretation. Prerequisite: HPM 874 or permission of the instructor. LEC.

HP&M 876. Medicare and Medicaid. 3 Hours.
Provides students with an in-depth understanding of the three publicly financed health programs that impact virtually all aspects of the American healthcare system - Medicare, Medicaid and Children's Health Insurance Programs (CHIP). Explores history and evolution of each program, plus specific operational issues such as eligibility, financing, management reporting, state/federal coordination, quality of care and outcomes management and influence of recent legislation. Prerequisite: Permission of the instructor. LEC.

HP&M 877. Women and Healthcare. 3 Hours.
A gender analysis of the organization of healthcare in the United States, using sociohistorical and sociological perspectives. Considers the health status and healthcare problems of women in relation to cultural aspects of medicine and healthcare; the roles of both informal and professional healthcare providers; the political economy of healthcare systems; and the relationship between gender and state. Prerequisite: HPM 810, or permission of instructor. LEC.
HP&M 878. Grant Writing. 3 Hours.
The course is designed to take the principles and mechanics learned in introductory epidemiology and biostatistics and apply them in the design of epidemiologic studies. The strategy and data collection for studies will be emphasized rather than the methods of statistical analysis. The student will learn how to develop a proposal/grant that addresses the entire array of concerns regarding such studies and propose a realistic, scientifically justified study. (Same as ANAT 869 and NRSG 889.) Prerequisite: HPM 819 or HPM 821, and NRSG 886. LEC.

HP&M 879. Comparative Healthcare Systems. 3 Hours.
Critical examination of the structure and function of healthcare systems in major, advanced, capitalist countries (e.g., Canada, Japan, United Kingdom, France, Germany, and Sweden) in comparison to each other and to the healthcare system of the United States. Patterns in control and financing will be studied in relation to issues of cost, quality, access, and in relation to cultural values. Special attention will be placed on comparative analysis of reform efforts. Prerequisite: HPM 810 or permission of instructor. LEC.

HP&M 880. Health Care and Social Policies in Sweden. 3 Hours.
Sweden leads the world in major health outcomes despite spending significantly less than the U.S. This course provides students the opportunity to visit Sweden and see the operation of its health care and social welfare system firsthand. Learn about Swedish history and culture as you re-examine many commonly held assumptions about both the U.S. and Sweden. An intensive schedule of site visits and lectures in the Stockholm-Uppsala area, assigned readings, and a major paper. LEC.

HP&M 882. Health Services Research Using Public Payer Data. 3 Hours.
Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States’ Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare Medicaid Services (CMS) have streamlined researchers’ access to national Medicare and Medicaid populations for health services and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to our state’s employees, Medicaid beneficiaries, and private health insurance claims data for enterprising researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer claims data. LEC.

HP&M 883. Cost-Effectiveness and Decision Analysis. 3 Hours.
This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins with a review of probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes, stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost effectiveness analysis, and cost benefit analysis. (SAME as PRVM 878). LEC.

HP&M 884. Clinical and Administrative Data Analysis. 3 Hours.
This course presents advanced techniques in statistical analysis and information management to help understand, process, and use health services data. The three broad areas of health services data will be used: clinical, program, and population-based. Ways in which these data can be used as both management and research tools will be discussed. Implications for improving patient care and delivery of health services will be emphasized. Labs will stress the use of both manipulative techniques such as merging, matching, sorting, and file construction, as well as focus on analysis, using univariate, bivariate, and multivariate techniques. Recent methodology related to outcomes, case-mix, and performance assessment will be presented, and their application to health services administration demonstrated. LEC.

HP&M 885. Instructional Methods in Health Services Education. 1 Hour.
An overview of pedagogical approaches and learning strategies for higher education courses in health policy and management. Content will include course organization, syllabus design, techniques for teaching in the classroom and online, learning styles, strategies for classroom management, and evaluation/grading methods. Prerequisite: HPM 868 or permission of the instructor. LEC.

HP&M 886. Applied Health Services Research. 3 Hours.
Students in this course apply the full spectrum of the research process to a specific hypothesis or research question, drawn from practical health systems observations and/or supported by critical analysis of the health services research literature. Moving step by step through the research process, students work to develop a complete research plan and proposal suitable to investigate their chosen question. Group discussion and guest researchers provide elaboration for each stage of research plan development. Prerequisite: HPM 872 and HPM 873 or permission of the instructor. RSC.

HP&M 887. Practicum in Health Services Education. 2 Hours.
Application of the approaches and methods described in HPM 885. Students will serve as a teaching assistant for one semester, working with a teaching mentor. In addition to assisting with the class, students will meet regularly with the mentor to critique and analyze content and classroom processes, plan and develop teaching activities, and evaluate learning and performance in the classroom. Prerequisite: HPM 868 or permission of the instructor. HPM 887 may be taken concurrently with HPM 885. LEC.

HP&M 890. Topics in Health Policy and Management. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Consent of the instructor. IND LEC.

HP&M 901. Doctoral Seminar in Health Policy. 3 Hours.
Students will investigate, review, and critically analyze major concepts, theoretical and methodological approaches and sub-areas in the field of health policy research. The course will cover comparative health policy analyses as well as both micro and macro system perspectives. Prerequisite: Permission of the instructor. SEM.

HP&M 903. Doctoral Seminar in Quality and Safety. 3 Hours.
Students will critically review selected publications that address quality and safety in health care. Identification of major research questions and approaches to them will be stressed, and students will develop an interesting and tractable research question. Prerequisite: Admission to the PhD Program or permission of the instructor. SEM.

HP&M 904. Doctoral Seminar in Health Care Occupations and Culture. 3 Hours.
Examines the social, historical, and cultural forces shaping the organization and delivery of health care. Students will critically analyze concepts surrounding health, illness and wellness, healing, professional authority, and interprofessional and intraprofessional relationships. Explores the impact of organizational cultures on the health care system.
Prerequisite: Admission to the PhD Program or permission of instructor. SEM.

HP&M 905. Doctoral Seminar in Social Determinants of Health. 3 Hours.
An advanced survey of theory and research in social determinants of health, giving primary attention to health differences by education, income, race/ethnicity, gender, and sexual orientation. Demographic, cross-cultural, social-psychological, and physiological aspects of physical and mental health will be considered. Prerequisite: Admission to PhD program or permission of instructor. SEM.

HP&M 906. Doctoral Seminar in Comparative Health Systems. 3 Hours.
Critical examination of the structure and function of health care systems in major, advanced, capitalist countries (e.g., Canada, United Kingdom, France, Germany, Netherlands, Sweden) in comparison to each other and to the health care system of the United States. Patterns in control and financing will be studied in relation to issues of cost, quality, access, and in relation to cultural values. Special attention will be placed on comparative analysis of strategies for reform and the results of recent reform efforts in the focal countries. Prerequisite: Admission to PhD program or permission of instructor. SEM.

HP&M 910. Health Services Research Methods. 3 Hours.
Examines the research process and the primary methodologies used in health services research. Explores basic methods in survey research, epidemiology, and evaluation. Focuses on quantitative methods and introduces qualitative methods. Lecture Prerequisite: Graduate level statistics; Acceptance to the PhD program or permission of instructor. LEC.

HP&M 912. Qualitative Health Research. 3 Hours.
Examines qualitative approaches to research, specifically in health care settings. Content includes qualitative research methodologies, including ethnography, interviews, focus groups, and content analysis through examples in the literature and hands-on exercises. Discusses when qualitative methods are appropriate to use, and how they can complement other research methods. Prerequisite: Permission of Instructor. LEC.

HP&M 990. Advanced Topics in Health Policy and Management. 1-3 Hours.
This course allows exploration of special topics that are not routinely a part of the curriculum. Prerequisite: Admission to a PhD program and consent of the instructor. IND. LEC.

HP&M 991. Individual Doctoral Readings. 1-3 Hours.
Individual study of special topics or problems by students working on a doctorate. Prerequisite: Admission to a PHD program and consent of the instructor. LEC.

HP&M 999. Dissertation. 1-12 Hours.
THE.

Courses

PRVM 429. Interdisciplinary Approaches to Neurodevelopmental Disabilities, Including Autism Spectrum Disorders. 3 Hours.
Topics in this course include an introduction to the Maternal and Child Health Bureau and related organizations, the history of neurodevelopmental disabilities (NDD), the genetics, identification, and prevention of developmental disabilities. Trainees obtain information about and participate in experiences related to neurodevelopmental and related disabilities and conditions individuals experience across the life course. The Life Course Perspective is defined by MCHB as the multidisciplinary approach to understanding the mental, physical, and social health of individuals, incorporating both life span and life stage concepts that determine an individual’s health trajectory. Significant emphasis is on autism and related issues. Participants learn the different roles of interdisciplinary team members, their unique contributions, and the team process in screening, evaluation and planning intervention. Prerequisite: Permission of Instructor. LEC.

PRVM 431. Interdisc Leadership Approaches to Systems & Services for Indv with Autism, Neuro & Dev Disabilities. 3 Hours.
Topics in this course include information about the history and development of service systems in the United States including Maternal and Child Health and Title V programs. An overview of program administration, business planning, budget development and various grant sources provides participants with an understanding of service systems operations and funding streams. Program oversight, standards of care and evaluation, including needs assessment and government mandates for outcomes (GPRA), provide participants with information that enables them to explore agency director perspectives about barriers to providing effective services as well as systems barriers presented from a parent point of view. Discussions include how to make systems changes through consultation and technical assistance and information about adult learning styles and consumer empowerment. Other topics include the scientist/practitioner models of research, empirical validation of practices and community participatory action research. As an adjunct to the core course there are other didactic experiences required of all trainees including Center and community committee work, campus interdisciplinary forums, family immersion experiences and research presentations. These didactic experiences give faculty and trainees an opportunity to meet as a group, hear presentations, and discuss a variety of topics, including ethics, standards of care, and empirically validated practices. Prerequisite: Permission of Instructor. LEC.

PRVM 800. Principles of Epidemiology. 3 Hours.
Basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations. Considerations are centered on physical, biological, environmental, psycho-social and cultural factors in relation to infectious and non-infectious diseases; interactions between agent, host, and environmental factors as determinants of health and disease; the application of epidemiological approaches to health services; retrospective and prospective analysis of morbidity and mortality data. LEC.

PRVM 803. Introduction to Clinical Research. 3 Hours.
The course will provide a basic and broad overview to clinical research, as well as support tailored to each student’s specific project. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations; the recruitment of study participants; regulatory issues; defining measures and instruments; data collection, management, and analysis; and reporting of results via abstract, presentation, and/or manuscript. It is required that students have a research idea and mentor before enrolling. Faculty support and collaboration will be available up to 6 months after completion of the course for ongoing efforts to complete the project. Prerequisite: Consent of Instructor. No prior coursework is required. Students must have, or plan to begin, a quality improvement or retrospective research project. LEC.

PRVM 804. Community Health Assessment, Intervention, and Advocacy. 3 Hours.
To impact community health, students must be able to: define the problem(s) experienced by specific populations, identify stakeholders and building partnerships, co-design an intervention to address the problem(s), incorporate cultural values of the affected stakeholders in the intervention, and advocate for various programs and policies to
improve health. This course guides students through each element of the community health interventions process - from defining the problem to advocating for policy. LEC.

PRVM 805. Public Health Seminar. 1 Hour.
This course will focus on public health practice. Guest lectures from national, state, and local public health agencies will present problems and how these problems are being addressed. Topics are expected to vary somewhat from year to year, depending on the priorities of the agencies. However, topics might include such issues as smoking prevention, automobile accidents, foodborne outbreaks, cryptosporidium outbreaks, lead poisoning in children, asthma in children, sexually transmitted diseases, diabetes, cancer control, nutrition, cardiovascular diseases, bioterrorism, legal issues and administration of public health. This course is the same as Public Health Grand Rounds. LEC.

PRVM 806. Special Topics.: 1-4 Hours.
In-depth, individualized investigation of special problems in community health. Designed especially for students with limited background in community health. Prerequisite: Permission of instructor. RSH.

PRVM 808. Clinical and Translational Research Seminar. 1 Hour.
This seminar will present locally and nationally recognized clinicians and researchers to discuss various areas of clinical research. The course is designed to expose students to a variety of ongoing research and features speakers from a variety of disciplines including physicians, epidemiologists, biostatisticians behavioral scientists, nursing faculty, nursing students, medical students, allied health faculty and others. Prerequisite: Permission of instructor. LEC.

PRVM 809. Introduction to Public Health. 3 Hours.
This course provides an introduction to the basic principles of public health practice, including an overview of the history, philosophy, and scope of public health in the United States and globally. It will provide an overview of the primary disciplines within public health: biostatistics, demography, environmental health sciences, epidemiology, global health, health policy and management, social and behavioral health, and the analytical tools employed to measure public health indicators. Prerequisite: None. LEC.

PRVM 810. Cardiovascular Disease Epidemiology. 3 Hours.
This will be a study of Cardiovascular Disease risk factors, expression, treatment, and prevention from a population-based standpoint. Participants will gain knowledge of cardiovascular disease prevalence, incidence, risk factors, outcomes, and prevention strategies. The goal of this course is to understand major aspects of cardiovascular epidemiology and current strategies for primary and secondary prevention of major cardiovascular diseases. Attention will be given to physiologic mechanisms leading to atherosclerosis; traditional and novel coronary heart disease risk factors; prevention methodologies for cardiovascular disease, and the role of lifestyle, dietary, and genetic factors in the development of cardiac and vascular diseases. The course will be evidence- and outcomes-based, with reference to landmark studies and major publications. Relevant historical breakthroughs and current controversies in CVD will be discussed using recent publications from the lay press and peer-reviewed journals. Emphasis will be placed on coronary artery disease and its clinical manifestations. Participants will learn to critically assess public health measures undertaken to recognize, manage, and treat atherosclerotic disease processes. LEC.

PRVM 811. Intro to Pharmaceutical Outcomes Research. 3 Hours.
Medications are involved in the treatment of nearly every chronic and acute disease. Pharmaceutical outcomes research is a broad field of research that strives to inform policies and interventions that optimize the safety, effectiveness, accessibility, and utilization of medications to improve patient outcomes. Pharmaceutical outcomes research spans pharmacoepidemiology, pharmacovigilance, pharmaceutical policy evaluation, pharmacoconomics, and other medication-focused health services research disciplines. This course provides an overview of pharmaceutical outcomes research applications, with an emphasis on measuring medication use and outcomes; designing pharmaceutical outcomes research studies; and interpreting the pharmaceutical outcomes research literature. Prerequisite: PRVM 805 or permission of instructor. LEC.

PRVM 813. Chronic Disease Epidemiology. 3 Hours.
This course is required for students on the epidemiology concentration, but is open to other MPH students as well. It extends the methods and concepts of basic epidemiology to the prevention and control of major chronic diseases, as well as evaluating epidemiologic study designs and results from individual and multiple studies. Topics will include surveillance, risk factors, high risk populations, pathophysiology, and consequences. Students will also gain experience developing a proposal to conduct a screening, etiologic, or prevention study of selected chronic diseases. Prerequisite: PRVM 800 Principles of Epidemiology. LEC.

PRVM 814. Health Literacy. 3 Hours.
This is a graduate-level course designed to teach students about literacy and its implications on public health practice and research in the United States, with a focus on health literacy. Students will be introduced to the different types of literacy, including health, prose, quantitative, document, and computer, and how to evaluate them. In addition, students will learn how to lower literacy levels of health education materials for practical application. Cultural competency in literacy will also be discussed, with a focus on culturally competent health communication and education. LEC.

PRVM 815. Infectious Disease Epidemiology. 3 Hours.
This course emphasizes the underlying concepts of the epidemiologic approach as it relates to infectious diseases. Students will be introduced to principles and methods of disease surveillance and outbreak investigations using case studies. Essential concepts relating to vaccine efficacy and effectiveness in preventing infectious diseases, barriers to achieving adequate vaccine coverage, and how ongoing vaccine controversies relate to the scientific literature base will be covered. The evolving public health concerns of bioterrorism, antibiotic resistance, as well as new emerging pandemics such as a novel coronavirus (COVID-19) will also be addressed. Characteristics of the agent, host, and environment that influence disease transmission will be examined in the context of control strategy identification. Instruction is primarily by online learning tools, with limited short lectures. Prerequisite: PRVM 800 Principles of Epidemiology. LEC.

PRVM 816. International Health. 3 Hours.
This course is divided into seven sections: 1) Global health introduction, 2) Health inequalities and the socio-economic context of disease, 3) Maternal and child health, the health of special populations, 4) The spread of infectious diseases, and HIV/AIDS, malaria, TB, 5) Globalizations and emerging infectious diseases, and nutrition, 6) Environmental health, and the health of effects of environmental change, 7) Global health payers and players, and global health priorities. Prerequisite: PRVM 800 Principles of Epidemiology or permission of the department/instructor. LEC.

PRVM 818. Social and Behavioral Aspects of Public Health. 3 Hours.
The course provides an overview of social and behavioral aspects of public health including the relevance of psychological and social factors for health, the principles of health behavior change, the application of these principles in various health domains, and an introduction to health behavior and health promotion interventions. The course begins with the rationale for studying social and behavioral aspects of health and examines select social and behavioral factors (e.g., gender, socioeconomic status, race/ethnicity) as they relate to physical well-being.
The course also focuses on well-established theories of health behavior and examines the role of psychological and social factors in specific health topics (e.g., obesity, cancer, cardiovascular disease, smoking). Prerequisite: None. LEC.

PRVM 819. An Introduction to Geographic Information Systems (GIS) for Health. 2 Hours.
This course will provide students with an overview of Geographical Information Systems (GIS) applied in the context of health (public health, allied health and health care). Students will be introduced to GIS and health applications used locally, nationally and internationally. They will learn about pertinent data, how to visualize the data, how to design maps that represent the data, how to use spatial data, how to geocode data, and how to prepare and analyze data. Real-life examples will be used throughout the course and students will gain hands-on experience using a GIS application. Students will also be kept abreast of any new GIS resources and trends or developments in GIS as relates to health. Prerequisite: Basic computer skills. LEC.

PRVM 821. Research Methods in Public Health. 3 Hours.
This is an introductory behavioral research methods, course. Students will learn about research designs, hypothesis formation, measurement, sampling, ethical issues in research, and pragmatic and research issues with evaluating behavioral interventions. Students will also learn how to critically evaluate and develop behavioral randomized clinical trials. Prerequisite: None. Social and Behavioral Aspects of Health and an Introductory statistics course are recommended but not required. LEC.

PRVM 825. Child and Family Health. 3 Hours.
Family, maternal, and child health problems will be addressed. Topics will include prenatal care (maternal health and habits); fetal growth factors; well baby care (immunizations, nutrition, growth, development, behavior); developmental disabilities; adoption; adolescence; child abuse; family as a support system; long-term medical and social outcomes of chronic illness/disability in children. Subjects are covered through lecture, discussion and field visits under the supervision of a pediatrician. Prerequisite: Permission of instructor. LEC.

PRVM 826. Epidemiology for Advanced Nursing Practice. 3 Hours.
Epidemiology for Advanced Nursing Practice is a graduate level course designed to synthesize basic epidemiology with clinical nursing concepts. The course is a core course required for the Doctor of Nursing Practice degree in which basic concepts of epidemiology and methods for identification of factors influencing health and disease in human populations are discussed. Considerations are centered on: 1) Physical, biological psychosocial and cultural factors in relation to infectious and non-infectious diseases; 2) Interactions between agent, host, and environmental factors as determinants of health and disease; 3) Application of the epidemiologic approach to clinical nursing; and 4) Measures of disease occurrence and risk. Prerequisite: None. LEC.

PRVM 827. Public Health Administration. 3 Hours.
This course provides students with an overview of the core functions of public health: assessment, policy development, and assurance together with an introduction to the leadership and management skills necessary to provide leadership in public health. It uses both theoretical and practical material to develop basic administrative competencies necessary for practice in community and public health. Assignments are designed to provide practice in applying course materials. LEC.

PRVM 828. Designing Public Health Interventions. 3 Hours.
Framed within the context of the core public health functions, assessment, policy development, and assurance, this course provides students with an overview of the planning process within a community setting. This course will use both theoretical and practical material to develop basic competencies in planning, implementing, and evaluating health programs; however, the predominant focus will involve the planning process and operations of a public health program. Assignments are designed to provide practice in applying course materials. LEC.

PRVM 829. Interdisciplinary Approaches to Neurodevelopmental Disabilities, Including Autism Spectrum Disorders. 3 Hours.
Topics in this course include an introduction to the Maternal and Child Health Bureau and related organizations, the history of neurodevelopmental disabilities (NDD), the genetics, identification, and prevention of developmental disabilities. Trainees obtain information about and participate in experiences related to neurodevelopmental and related disabilities and conditions individuals experience across the life course. The Life Course Perspective is defined by MCHB as the multidisciplinary approach to understanding the mental, physical, and social health of individuals, incorporating both life span and life stage concepts that determine an individual’s health trajectory. Significant emphasis is on autism and related issues. Participants learn the different roles of interdisciplinary team members, their unique contributions, and the team process in screening, evaluation and planning intervention. Prerequisite: Permission of instructor. LEC.

PRVM 830. Environmental Health. 3 Hours.
This course will include discussion of some exposures and health effects of environmental contaminants and principles of prevention. Topics include outdoor and indoor air pollution, water and wastewater pollution, solid waste disposal, insect and rodent control, food protection, chemical and physical carcinogens, ionizing radiation, injury prevention, environmental epidemiology, active transportation, disasters, and occupational safety and health. A number of guest lecturers and field trips will be utilized. LEC.

PRVM 831. Interdisc Leadership Approaches to Systems & Services for Indv with Autism, Neuro & Dev Disabilities. 3 Hours.
Topics in this course include information about the history and development of service systems in the United States including Maternal and Child Health and Title V programs. An overview of program administration, business planning, budget development and various grant sources provides participants with an understanding of service systems operations and funding streams. Program oversight, standards of care and evaluation, including needs assessment and government mandates for outcomes (GPRA), provide participants with information that enables them to explore agency director perspectives about barriers to providing effective services as well as systems barriers presented from a parent point of view. Discussions include how to make systems changes through consultation and technical assistance and information about adult learning styles and consumer empowerment. Other topics include the scientist/practitioner models of research, empirical validation of practices and community participatory action research. As an adjunct to the core course there are other didactic experiences required of all trainees including Center and community committee work, campus interdisciplinary forums, family immersion experiences and research presentations. These didactic experiences give faculty and trainees an opportunity to meet as a group, hear presentations, and discuss a variety of topics, including ethics, standards of care, and empirically validated practices. Prerequisite: Permission of Instructor. LEC.

PRVM 835. Evaluation Methods in Public Health. 3 Hours.
Principles and procedures to evaluate health promotion and disease prevention programs. Includes data collection methods, instrument scale development, measurement, and evaluation designs. Case studies of disease prevention literature on evaluation will be analyzed. Prerequisite: Permission of instructor. LEC.
PRVM 836. Epidemiology in Aging. 3 Hours.
An overview of the aging process, review of current knowledge of epidemiology of selected diseases, such as dementia and osteoporosis, and falls that primarily affect aging individuals. Emphasis on epidemiologic designs, methods, and issues (e.g., low response rate and measurements) that are pertinent to research on aging individuals. Prerequisite: PRVM 800, BMTR 811/PRVM 804, or permission of instructor. LEC.

PRVM 841. Advanced Epidemiology I: Methods in Cross-Sectional and Case-Control Studies. 3 Hours.
This course will concentrate on concepts and application of various statistical techniques in the analysis of epidemiological data. Students will be oriented toward application of SAS in data analysis and interpretation of data from cross-sectional and case-control studies. Prerequisite: Principles of Epidemiology (PRVM 800), Fundamentals of Biostatistics I (BIOS 714), and Management of Public Health Data (PRVM 875) or BIOS 715 Introduction to Data Management using RedCap and SAS. LEC.

PRVM 842. Advanced Epidemiology II: Methods in Longitudinal Studies. 3 Hours.
This course will concentrate on concepts and application of various statistical techniques in the analysis of epidemiological data. Students will be oriented toward application of SAS in data analysis and interpretation of data from longitudinal studies and controlled clinical trials. Prerequisite: Principles of Epidemiology (PRVM 800), Fundamentals of Biostatistics I (BIOS 714), Advanced Epidemiology (PRVM 841), and Management of Public Health Data (PRVM 875) or Introduction to Data Management using RedCap and SAS (BIOS 715). LEC.

PRVM 845. Health, Society, and Culture. 3 Hours.
This three-credit graduate course will help prepare students to work effectively with diverse populations, enhance cross-cultural competence, and identify and use social and culturally-competent strategies in public health research and practice. Students in this course will become competent and versed in how culture intersects with health, social determinants of health, patient education and communication, and society. Key models for understanding how health, society, and culture relate will be discussed and linked to health communication and public health practice. In addition, social issues that include racism, classism, gender discrimination, and poverty will be an integral part of the course. LEC.

PRVM 847. Seminar in American Indian Health Disparities. 1 Hour.
This is a graduate-level course designed to teach students about current research being done around the country to address health disparities faced by American Indian communities. Students will attend a weekly one-hour seminar on-line and will be given readings to accompany each lecture. Lectures will be conducted by faculty at various universities, as well as members of community organizations and/or tribes who are conducting research. Students may take the course multiple times; each seminar will be unique in terms of topics and accompanying readings, as well as lecturers. Some seminars may focus on a particular health topic for the full semester, e.g., cancer or diabetes. This course is designed to be a seminar series that changes each time it is taught. Prerequisite: Permission of instructor. SEM.

PRVM 849. Qualitative Methods in Public Health. 3 Hours.
Qualitative research has diverged from its anthropology roots to become commonplace in marketing, business, clinical and public health settings. This course is designed to teach the basics of rigorous qualitative methodology as applied to research in public health, health services research, and health behavior. The course will equip students with a foundational understanding of theoretical underpinnings of qualitative research as well as hands-on experience with skills in study design, several methods of data collection, data analysis, and presenting results. LEC.

PRVM 851. Public Health Policy and Law. 3 Hours.
Public Health Policy and Law is about the legal and social justice framework for urgent public health issues. This course is designed to prepare public health leaders to live and work in a world of laws, and to play an active and effective role in policy making and analysis. Students will understand the source of national, state, and local statutes and regulations and understand the role of common law. Students will understand the policy process at the national, state, and local level, and develop skills analyzing legislation and influencing policy decisions. Students will understand the rule making process at the national and state level. LEC.

PRVM 853. Responsible Conduct of Research. 1 Hour.
The purpose of this course is to engage research trainees in reading about, considering, and discussing the responsible conduct of science. The course is designed as an option for meeting current federal regulations, which require that all NIH training grants provide training in the responsible conduct of research. This course provides a concise overview of key subject areas in the responsible conduct of research. It is designed to make students aware of relevant guidelines, policies and codes relating to ethical research, as well as to provide the skills for identifying and resolving ethical conflicts that may arise in research. LEC.

PRVM 855. Seminar in Women’s Health. 3 Hours.
Seminar in Women’s Health is a 3 credit elective, graduate level course focusing on gender issues that are relevant in treatment approaches to various health issues, the differing health status of minority women, the evolution of women’s health to include the entire life span and areas other than reproduction, the changing implications of health care and policy and men in women’s health. No prerequisite. LEC.

PRVM 856. Community-Based Participatory Research. 3 Hours.
This is a graduate-level course designed to teach students the basic methods of conducting and evaluating community-based participatory research (CBPR). Students will be introduced to the five phases of CBPR, including partnership formation and maintenance, community assessment and diagnosis, defining the issue, documentation and evaluation of partnerships, and feedback, interpretation, and evaluation of partnerships. In addition, students will learn how to find funding mechanisms and journals that are appropriate for CBPR, as well as some of the key factors in writing about CBPR. Students will be introduced to a variety of examples of well-done CBPR and will learn what makes it different from other types of research done in community settings. Prerequisite: Social and Behavioral Aspects of Public Health or permission of instructor. LEC.

PRVM 859. Tobacco and Public Health. 3 Hours.
This course will provide an overview of tobacco as a public health problem and tobacco politics. Students will learn about the pharmacology of nicotine, the mechanisms leading to tobacco addiction and biologic factors that affect pharmacology and tobacco use such as the menstrual cycle and comorbid illnesses such as depression and others. Public health approaches to preventing tobacco use initiation will be studied, including which initiatives are most effective. State-of-the-art methods to assist smokers to quit will be reviewed, including pharmacologic interventions, counseling by health professionals and education/motivation support. Barriers to obtaining services will be explored, such as educational needs among various types of health professionals, and access to care in rural areas or among clients with certain types of health insurance. LEC.

PRVM 861. Leadership in Public Health. 3 Hours.
This course is designed to enhance and develop leadership knowledge and skills vital to reading students for public health 3.0 and the role of chief health strategist for their organization, community, region, or
state. Competency in principles of leadership, governance, management, collaboration, decision making, and negotiation will be achieved through leadership assessments, journal entries, case studies, and writing of a leadership self-reflection and action plan. LEC.

PRVM 862. Terrorism, Emergency Preparedness and Response. 3 Hours.
Through lectures, tabletop exercises, and invited speakers, the course content will include the following topics: terminology and core competencies, public health infrastructure, collaboration and communication, roles and responsibilities, psychological effects of terrorism, agricultural and zoonotic bioterrorism, law enforcements and public health, epidemiology of BT diseases (including agent specific lectures), burn injuries, risk communication, Strategic National Stockpile (SNS), National Incident Management System (NIMS), public health law as related to bioterrorism, and public health laboratory response related to bioterrorism. LEC.

PRVM 863. Health Disparities in Public Health. 3 Hours.
This course is designed to enhance students’ understanding of the biopsychosocial factors that contribute to disparities in health and health care. This course will also review strategies developed to reduce health disparities. Prerequisite: PRVM 818 Social and Behavioral Aspects of Public Health is recommended. LEC.

PRVM 864. Global Public Health Impact of HIV/AIDS. 3 Hours.
Historically reviews the HIV pandemic to evaluate lessons learned in prevention and treatment of the disease and successes and failures of public policies to reduce the impact of HIV in various countries. Critically analyzes HIV prevention interventions (voluntary counseling and testing, prevention of mother-to-child transmission, promotion of safer sex practices, clean needle exchange, methadone or buprenorphine programs, treatment with antiretroviral therapy, pre- and post-exposure prophylaxis, vaccine and microbiode development) and challenges with their implementation. LEC.

PRVM 865. Ethical Issues in Public Health. 3 Hours.
Lectures and small group discussions explore public health ethics, social justice and autonomy as they relate to public health practice and health policy. Current issues in health policy are discussed including: the right to health and health care, bioterrorism, and health inequalities, poverty and power. Weekly small group discussions include cases on MCHP, obesity and “fat taxes,” resource allocation, and disparities in infant mortality. Student evaluation is based on class participation, a small group project, and a final paper based upon a case study addressing ethical issues relevant to the student's area of public health specialization. LEC.

PRVM 866. Biomedical Informatics Driven Clinical Research. 3 Hours.
This course introduces students to biomedical informatics, clinical and administrative information systems and workflows, data warehousing and hypothesis generation using HERON and the i2b2 web client, programming using Structured Query Language (SQL), and developing a computable phenotype and research cohort for observational research or prospective trial eligibility based on secondary data sources centered on electronic health records. Students will also gain experience developing their cohort, an analytic ready database and files using SQLite and REDCap, conduct preliminary analysis, and prepare an abstract for submission to a clinical or informatics forum/conference. Prerequisite: PRVM 800 Principles of Epidemiology or BIOS 714 Fundamentals of Biostatistics I. LEC.

PRVM 872. Grant Writing, 3 Hours.
This course combines instruction and practical exercises to move the participant step-by-step through all stages of planning research, identifying funding sources, and writing grant applications primarily to the National Institutes of Health (NIH). Upon completion of the course, the student will have developed a quality proposal and be able to demonstrate skills in preparing applications. These will include: developing fundable research ideas, identifying appropriate funding opportunities from the NIH, finding information on the Internet regarding applying for funds, developing application sections and crafting a quality grant application, complying with certification and assurances required on NIH applications, providing feedback to other class participants in small groups to act as internal grant reviewers, responding to reviewers, and building a budget. LEC.

PRVM 873. Scientific Writing. 2 Hours.
Includes the mechanics of how to write clearly, focusing on mechanics, structure, and style. Students will practice specific strategies for writing effectively, with in depth attention paid to how ideas are distributed through well written sentences and paragraphs. Also includes editing and revision of writing for publication and grant submission. LEC.

PRVM 875. Management of Public Health Data. 3 Hours.
A 3 credit hour graduate level course concerning basic computing skills necessary for any advanced epidemiologic or quantitative methods. This course covers basics of variable and dataset creation, building, maintenance and basic descriptive (not interpretive) analysis. The course is designed to be of use to students entering a variety of research, administrative and public health settings in public health, clinical and other fields. Software covered will include SAS, SPSS, Epi Info, REDCap, Microsoft-EXCEL and ACCESS. The course can stand alone, or prepare students for Biostatistics and Epidemiology courses. Public data presentations will be stressed to prepare students to communicate about data with the lay public. LEC.

PRVM 876. Health Services Research Using Public Payer Data. 3 Hours.
Several contemporary health reforms have rendered analyses of public payer data more feasible and valuable for population health, health services research, and quality improvement. The addition of an outpatient drug benefit to standard inpatient and outpatient service coverage for Medicare, for example, has stimulated a growth industry in comparative effectiveness research and expanded policy research across the health care system. Pending expansion of States’ Medicaid programs under the Affordable Care Act will undoubtedly create the largest public health care insurance program in the United States. The Centers for Medicare Medicaid Services (CMS) have streamlined researchers’ access to national Medicare and Medicaid populations for health srevices and quality improvement projects through contracts with the Research Data Center at the University of Minnesota and the Chronic Condition Warehouse. In addition, Kansas Medicaid has invested in a Data Analytic Interface that offers ready access to our state’s employees, Medicaid beneficiaries, and private health insurance claims data for enterprising researchers including tremendous opportunities for state of the art, contemporary policy analyses. This is indeed an exciting and opportune time for students embarking on careers in health services, policy, and population health research. This course is designed to prepare students for real world analyses using standard public payer claims data. LEC.

PRVM 877. Health Communication. 3 Hours.
This course is focused on health education and promotion, especially designing and evaluating health communication programs for populations with shared risks, exposures or behaviors. Health communication theories and principles will be applied to selecting appropriate communication strategies and developing health communication plans. Students will develop an appreciation of the role of cultural context in designing health communication. Emphasis will be placed on written communication and oral presentation. LEC.
PRVM 878. Cost-effectiveness and Decision Analysis. 3 Hours.
This course examines techniques that are used in making clinical and management decisions when outcomes are uncertain. The course begins with a review of probabilistic decision making, then explores methods of analyzing choices with uncertain outcomes. Stressing the use of decision trees and sensitivity analysis. The course examines cost minimization analysis, cost effectiveness analysis, and cost benefit analysis. (Same as HPM 872) LEC.

PRVM 879. Budgeting and Human Resource Management. 3 Hours.
This graduate-level course covers principles and skills for budgeting and human resource management within public health organizations. It focuses on non-profit and public settings. Budgeting topics include the principles and purposes of accounting, concepts related to finance, and financial strategic planning. Human resource management topics include job design and hiring, performance management, retention, compensation/benefits, legal issues, and termination. The focus of the course is twofold: 1) understanding the concepts behind budgeting and in gaining skills in interpreting and using financial information; 2) gaining skills in human resources management and resource development. The course is designed for people who are interested in public health administration, but should be useful to anyone with an interest in public health leadership in any setting. LEC.

PRVM 880. Seminar in American Indian Health. 3 Hours.
This is a graduate-level course designed to teach students about current issues in American Indian health, as well as provide a basic historic context for understanding these issues. Students will read current literature from the academic journals and will be exposed to research being done today in American Indian communities, some of which has not yet been published. In addition, students will gain an understanding of what health disparities exist in American Indian communities and some of the reasons why they exist, including access issues and other barriers to care, from both Western and Native points of view. Students will be exposed to some of the difficulties in conducting health research in Native communities and some of the more successful techniques to overcome barriers. Prerequisite: None. LEC.

PRVM 891. Public Health Internship. 1-3 Hours.
Students will complete a 192 hour internship in a community setting (12 hours/week for the 16 week semester) during PRVM 891 Public Health Internship. The internship is a service-learning experience for which students should consider the contribution their activities will make to the internship setting as well as activities that will be undertaken to meet the student's learning objectives. Prerequisite: Students may enroll in PRVM 891 Public Health Internship if they are within 2 semesters of graduation and have the permission of the KU-MPH program. LEC.

PRVM 893. Public Health Capstone. 1-3 Hours.
The public health capstone is a 192 hour (12 hours/week for the 16 week semester) culminating experience that requires students to synthesize and integrate knowledge and/or apply theories and principles learned to an area of public health. The capstone is meant to be taken at the end of the student's degree program, and is designed to give the student an opportunity to apply their skills to a variety of problems or issues in public health. The capstone should be primarily focused on addressing concentration specific competencies. While the exact activities and outcomes of the capstone will differ across concentrations all capstones, regardless of concentration, must include a written report and an oral defense. Prerequisite: PRVM 891 Public Health Internship; previous attendance at two MPH capstone defenses; last semester of enrollment and be within 12 credits of graduation; must be in good academic standing. LEC.

PRVM 899. Thesis. 1-3 Hours.
Preparation of a formal thesis based on the research conducted on a community health problem. After the thesis has been completed, the student will be given an oral examination on the research methods and content. Prerequisite: All MS-CR core and required courses completed or in progress in the student's final semester. THE.

Master of Health Services Administration

The Master of Health Services Administration (MHSA) degree prepares students for leadership roles in the health care sector, including positions in hospitals, health care systems, long-term care facilities, clinics, insurance firms, health departments, and government agencies. The MHSA offers a systematic examination of the health care system, exposure to the impact of health policy and the policy process, a mastery of analytic methods, and a broad exposure to the practice of health care management. Classes are taught on the KUMC campus and offered in the late afternoon and evening.

The mission of the MHSA Program is to improve lives and communities in Kansas and beyond by preparing students to be outstanding health administration professionals and future leaders in the health care sector. To accomplish this mission, the program:

• recruits students with diverse backgrounds and perspectives, along with the ability to succeed;
• hires, values and respects faculty with varied backgrounds, who are committed to excellence in teaching, scholarship and service;
• designs and develops a competency-based curriculum that stresses lifelong learning;
• emphasizes interprofessional education through collaboration with learners and practitioners from multiple disciplines;
• stresses the practical application of knowledge; and
• enables graduates to be competitive in the marketplace.

The application is an on-line process. Detailed instructions on how to apply and application deadlines are posted on the MHSA website (http://www.kumc.edu/school-of-medicine/population-health/education/master-of-health-services-administration-(mhsa).html). Students are admitted for the fall semester only.

Admission requirements:

• Bachelor’s degree from a regionally accredited institution, documented by submission of official transcript(s). The bachelor's degree must be attained prior to entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
• A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
• Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Prof%202016-Oct.pdf).
• A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%202016-Oct.pdf) is required during
the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score not more than approximately five (5) years old sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895. An alternative graduate level examination score may be substituted on a case-by-case basis.
- A statement of goals/purpose. This brief essay should outline the applicant's reasons for wanting to pursue graduate education in health administration and career objectives.
- Three letters of recommendation.
- Applicants must also have completed a prerequisite three (3) credit hour course in statistics.
- A personal interview is also required of all applicants who meet the minimum admissions standards. If travel to the area is impossible, a telephone or on-line interview may be substituted.

Applicants will be assessed based on these requirements. After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. To verify admissions requirements for past years, use the catalog of the year student entered the program. Other years' catalogs (http://catalog.ku.edu/archives/). Other years' catalogs

The MHSA program is a 56 credit-hour graduate professional degree program and is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). (http://www.cahme.org/)

**Degree requirements:**

- Degree requirements are normally completed within two (2) years of admission to the program although a maximum of seven (7) years is allowed. Part-time students normally complete requirements within four to five (4-5) years of admission to the program.
- Cumulative grade-point average (GPA) of at least a 3.0 for all program coursework.
- Completion of a minimum of 56 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of the following required courses (or equivalents):

**Total Hours 56**

- Students are required to participate in the individualized competency review process.
- Students are required to participate in the campus-wide activities of the Center for Interprofessional Education (http://www.kumc.edu/center-for-interprofessional-education-and-simulation.html). Specific activities are determined on an annual basis by the MHSA Program Director.

Although students complete an internship or practicum as part of the program, all students are encouraged to seek a post-graduation residency/fellowship.

Degree requirements and course descriptions are subject to change. Any courses taken as equivalents must be approved by the Program Director and the Office of Graduate Studies. In most cases, use the catalog of the year the student entered the program to determine requirements. Other years' catalogs

**Dual /Joint degree Programs**

The Department of Population Health offers 4 dual degrees and 1 joint degree in conjunction with the School of Medicine MD program and the Schools of Law, Nursing, and Health Professions. Please contact
the MHSA Program Manager or the respective schools for complete information.

**MD/MHSA**

The dual MD/MHSA program prepares students to enter careers as physician executives or to provide administrative support for their medical practice. As the health care environment becomes more complex and competitive, administrative skills can be extremely important to individuals starting careers in medicine or those seeking to enhance their current careers. The MHSA portion of the curriculum combines social science and business content in the context of health care and prepares students for management and executive positions in health care organizations. Students complete all requirements for the MD degree as specified by the School of Medicine. The MD program is described in the School of Medicine Catalog (p. 227). The MD/MHSA can be completed in 5 years. Students must be admitted to each program to pursue the dual degree.

Students accepted into the dual MD/MHSA program complete the course of study described here (http://catalog.ku.edu/medicine/population-health/mhsa/JDMHSA_dual_degree_curriculumDec2020.pdf).

**JD/MHSA**

The dual JD/MHSA program combines into 4 years of full-time study the Juris Doctor (p. 795) (JD) degree offered by the School of Law (http://www.law.ku.edu/) and the Master of Health Services Administration (MHSA) degree offered by the Department of Population Health within the School of Medicine. The program offers students who plan to practice health law or health services management a thorough academic grounding in both disciplines. Students must be admitted to each program to pursue the dual degree.

Students accepted into the dual JD/MHSA program complete the course of study described here (http://catalog.ku.edu/medicine/population-health/mhsa/JDMHSA_dual_degree_curriculumDec2020.pdf).

**MS in Nursing (Organizational Leadership)/MHSA**

The dual Master of Science in Nursing (Organizational Leadership)/MHSA degree program combines the MHSA degree offered by the Department of Population Health within the School of Medicine and the School of Nursing’s Master of Science (p. 2410) degree with the specialization in Organizational Leadership. This program provides students the opportunity to acquire training in the convergent fields of nursing and health services administration. The program combines course work, allowing the two degrees to be completed in 8 semesters. Students must be admitted to each program to pursue the dual degree.

**DPT/MHSA**

The dual Doctor of Physical Therapy (DPT) and Master of Health Services Administration (MHSA) degree is offered through the School of Medicine’s Department of Population Health and the School of Health Professions’ Department of Physical Therapy. As the health care environment becomes more complex and competitive, administrative skills will be extremely important to individuals starting clinical careers in health care. By participating in this program, students can achieve both degrees in four years. Students must be admitted to each program to pursue the dual degree.

- Cumulative grade-point average (GPA) of at least a 3.0 for in both programs.
- Completion of the DPT degree prior to or at the same time as the awarding of the MHSA degree.

**Notes:**

- Completion of a minimum of 39 MHSA credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of 31 hours of the following MHSA courses:

**MSHIM/MHSA**

The joint Bachelor of Science in Health Information Management (p. 698) (MSHIM) and Master of Health Services Administration (MHSA) degree is offered through the School of Medicine’s Department of Population Health in association with the School of Health Professions’ Department of Health Information Management. By participating in this intensive, full-time bridge program, students can achieve both degrees in five years. Students pursuing the BSHIM/MHSA will be prepared to assume management and executive positions in health-related organizations and to bring their expertise in health information management to these positions.

Students accepted into the BSHIM/MHSA program complete the course of study described here (http://catalog.ku.edu/medicine/population-health/mhsa/Bridge_Curriculum_Revision_11-2020-final.docx).

The Graduate Certificate in Health Administration provides an introduction to the field of health administration. Students will obtain a basic understanding of the U.S. healthcare system and how it operates. This certificate is designed for those aspiring to leadership positions in
healthcare, to those newly in healthcare leadership positions, and to those considering a Master of Health Services Administration (MHSA) degree (Master of Health Services Administration, KU School of Medicine Department of Population Health (kumc.edu) (https://www.kumc.edu/school-of-medicine/population-health/education/master-of-health-services-administration-(mhsa).html)). If a student is subsequently admitted to the MHSA program, credits from a completed certificate may upon approval be used towards fulfillment of MHSA degree requirements. All certificate classes are accessible to distance learners.

The certificate will be comprised of four courses taken in the following order:

**Summer**

**HP&M 810: The Healthcare System (3 credits, online)**
The structure and function of the components of the U.S. healthcare system are introduced in the context of the history, values and social forces that influenced its development and evolution. Students gain exposure to the concepts and vocabulary associated with aspects of the system, including delivery (providers, institutions, services), resources (finance, payment, insurance), population and public health, and outcomes (cost, access, quality). Healthcare outcomes from consumer, clinical and societal perspectives are explored.

**Fall**

**HP&M 825: Financial Concepts in Healthcare Management (3 credits, hybrid)**
Introduces the financial and managerial accounting concepts used in healthcare. This includes financial statement analysis; cost accounting; budgeting; and capital project analysis.

**Fall HP&M 858: Health and Social Behavior (3 credits, hybrid)**
Healthcare as a cultural and socio-behavioral system is presented. Using research and theory, students explore alternative perspectives on the nature of medicine and healing within comparative health systems, both U.S. and abroad. Students examine at an advanced level how healthcare organizational structures contribute to patient health outcomes and influence employee behaviors. The course reinforces the nature and characteristics of the health professions, particularly medicine and nursing perceptions, and the complex behavioral dynamics of health professionals with organizational leaders.

**Spring**

**HP&M 822: Healthcare Economics (3 credits, online)**
This course introduces the core concepts from economics to healthcare with a focus on helping health care managers use economic tools in making sound decisions. The demand for healthcare products, the structure of insurance, and the supply of healthcare products are examined. Students will apply a variety of economic analyses to health policy and health system issues.

### ADMISSIONS REQUIREMENTS:

- A completed application
- An undergraduate GPA of 3.0 (on a 4-point scale) from an accredited institution
- A letter of reference from a professional colleague or professor
- A personal statement about why the applicant wants to pursue the certificate
- Interview with an MHSA faculty member

**Contact for More Information:**

Nichole Evans, MHSA Program Manager

Department of Population Health

University of Kansas Medical Center

5001 Student Center– Mail Stop 3044

Kansas City, KS 66160

Because the MHSA degree signifies that the holder is prepared for entry into the practice of health services administration, it follows that graduates must have the knowledge and skills necessary to function in a broad range of management and leadership situations. Therefore, the following abilities and expectations must be met by all students with or without accommodations admitted to the MHSA program.

1. **Observation:** A student must be able to observe class demonstrations and field experiences relevant to the field of health services administration. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication:** A student must be able to communicate effectively in oral and written form with other students, faculty, staff and preceptors. Effective communication includes the ability to understand assigned readings and lectures, the ability to analyze information, and the ability to present results of such analyses verbally and in writing.

3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, and make public presentations. Class requirements may also include field work in a variety of health services organizations.

4. **Intellectual, conceptual, integrative and quantitative abilities:**
   A student must possess the ability to understand and work with measurements, carry out calculations, and engage in reasoning, analysis and synthesis. A student must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of a manager’s responsibilities. Integrity, reliability, self-direction, motivation, and ability to
work with diverse groups are qualities necessary for effective practice in this field.

**Master of Public Health**

The University of Kansas Master of Public Health program (KU-MPH) is a fully accredited, 42 credit hour graduate program with concentrations in Epidemiology and Public Health Practice. The program has been accredited by the Council on (http://ceph.org/) Education for Public Health (CEPH) since 1998 and is offered through the Department of Population Health at the University of Kansas Medical Center in Kansas City and the University of Kansas School of Medicine-Wichita in Wichita. KU-MPH is also the only fully accredited MPH program in the state to become member of the Association of Schools and Programs of Public Health (ASPPH).

Our program vision is: Healthy Communities

Our program mission is: To improve public health in Kansas, the Heartland, and the nation through excellence in education, discovery, and community engagement.

KU-MPH graduates serve in a wide variety of public health fields, including clinical medicine, research, health education.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Public Health (http://www.kumc.edu/school-of-medicine/mph/admissions.html) website. Admission to the M.P.H. program is competitive. Students may apply in either Kansas City or Wichita and indicate their preference of campus choice as well as their choice for concentration on the application itself.

**Admission requirements:**

- A bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Prof%202016-Oct.pdf).
- A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf) is required during the admission process; it may affect the student’s eligibility to enter the program.
- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. GRE or other test scores can be waived for U.S. citizens with doctoral degrees, applicants who have completed another master’s degree or for applicants with extensive public health experience.
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or experience that indicates adequate preparation for the M.P.H. curriculum is preferred.
- A personal written statement that describes the applicant's career goals and motivation for seeking post-graduate training in public health.
- Responses to three short-answer questions that are part of the online application itself.
- One semester of college algebra or calculus is required to enter the Public Health Practice concentration.
- Completion of one semester of calculus is required to enter the Epidemiology concentration.

After an applicant has been admitted, the program may defer an applicant’s admission for one semester after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. *Other years' catalogs*.

The Master of Public Health program consists of at least 42 credit hours. Students complete credit hours in specified core courses in epidemiology, community health assessment and advocacy, environmental health, public health administration, leadership, management of public health data, and health communication. Additional degree requirements vary by the choice of concentration. The two concentrations are epidemiology or public health practice. All students complete a public health internship and capstone project as described below.

**Degree Requirements:**

- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed.
- Part-time students normally complete requirements within 4 years of admission to the program.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Completion of a minimum of 42 hours.
- Successful completion of the following core courses (21 credit hours) regardless of concentration:

<table>
<thead>

**Year 1 Total Hours 9**

### Dual M.D.-M.P.H. Program

This is a five year program in which the medical student completes the requirements for the M.P.H. degree in one year. This can be accomplished either between the second and third, or between the third and fourth years of medical school. Students must complete all degree requirements for both the M.D. and the M.P.H. programs. They complete the M.P.H. concentration in Public Health Practice in three semesters, beginning in the summer (June), and proceeding through fall (August) and spring (January), and finishing by the end of May. Please contact the respective academic units offering the degree for more information. The M.D. degree (p. 2271) is offered by the School of Medicine.

### Joint Ph.D. in Behavioral Psychology-M.P.H. Program

The Department of Applied Behavioral Science on the Lawrence campus offers a 72-credit-hour doctoral program in behavioral psychology (p. 1235). Students learn about an array of content areas and theoretical perspectives and achieve proficiency in behavioral analysis, developmental studies, or behavioral intervention. Both the departments of Applied Behavioral Science (http://www.absc.ku.edu/) and Population Health (http://www.kumc.edu/school-of-medicine/population-health.html) promote community/public health and development through collaborative research, teaching, and service.

The joint Ph.D./M.P.H. is ideal for students interested in prevention through community and public health. Students must apply for admission to the M.P.H. and Ph.D. programs separately. Applications are reviewed by the admissions committees of both programs. Students admitted to the joint program complete the 42-hour M.P.H. requirements as listed in the chart below in addition to the Ph.D. requirements. See the Doctor of Philosophy in Behavioral Psychology (p. 1235) section of this catalog for the Ph.D. degree requirements. Completion of ABSC 710, ABSC 875, and ABSC 876 also qualifies a student for a Graduate Certificate in Community Health and Development (p. 1238) offered by the Department of Applied Behavioral Science. Additional details about the certificate...
The following abilities and expectations must be met by all students admitted to the Master of Public Health program:

**OBSERVATION:**

A student must be able to observe and analyze class demonstrations and field experiences relevant to the disciplines of public health. These disciplines include but are not limited to epidemiology, biometry, environmental health, health program management, and behavior science. Observation necessitates the functional use of the senses of vision and hearing.

**COMMUNICATION:**

A student must be able to communicate effectively in oral and written forms with other students, faculty, and preceptors. Use of computers and other technology is imperative to this communication. Effective communication includes the ability to understand assigned readings and lectures, the ability to analyze information, and the ability to present results of such analyses verbally and in writing.

**MOTOR:**

A student must have sufficient motor function to attend classes, prepare assignments, give public presentations, and participate in field experiences. Some field experiences in environmental health, for example, include activities at sites (e.g. waste treatment plants, water treatment facilities).

**INTELLECTUAL-CONCEPTUAL, INTEGRATIVE, AND ANALYTIC ABILITIES:**

Applicants must be able to read and understand documents written in English. A student must possess the ability to understand and work with measurements, carry out calculations, and engage in reasoning, analysis, and synthesis. Problem solving, the critical skill of public health, demands all of these intellectual abilities. In addition, a student should be able to comprehend three-dimensional relationships and understand spatial relationships of structures.

**BEHAVIORAL AND SOCIAL ATTRIBUTES:**

A student must possess the emotional maturity and stability required for full utilization of his/her intellectual abilities, the exercise of sound judgment, and the prompt completion of all responsibilities attendant upon responsible activity in the broad field of public health. Integrity, motivation, reliability, self-direction, and the ability to work in diverse groups are personal qualities, which are required for effective practice in the field. As a component of public health education, a student must demonstrate ethical behavior.

Individuals with disabilities are encouraged to apply to the program. Candidates who indicate that they cannot meet one or more of the expectations will be reviewed further with applicant and faculty input to determine what reasonable accommodations might be possible to facilitate successful completion of the MPH curriculum.

**Master of Science in Clinical Research**

The University of Kansas Master of Science in Clinical Research program (MS-CR) is a 33 credit hour graduate program with the student’s thesis serving as their culminating project. The program is offered through the Department of Population Health at the University of Kansas Medical Center in Kansas City and the University of Kansas School of Medicine-Wichita in Wichita.

The MS-CR program provides students with formal training in clinical research, biostatistics, and epidemiology that will allow clinical scholars to enhance their current research skills. Graduates from the Master of Science in Clinical Research (MS-CR) program serve in a wide variety of fields, including clinical medicine, research, education, disease surveillance and academic settings. The University of Kansas MS-CR degree is designed to provide clinical scholars with a strong foundation in patient-oriented research principles and methods.

Admission and degree requirements are detailed in this section of the catalog. Other program information and application details may be found at our website.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Clinical Research program (http://www.kumc.edu/school-of-medicine/preventive-medicine-and-public-health/education-and-training/ms-cr/admission-requirements.html) website. Admission to the M.S. in Clinical Research degree program is competitive. Students may apply in either Kansas City or Wichita and should indicate their preference of campus on the application itself.

**Admission requirements:**

- A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree
has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. are required to submit an evaluation of their academic credentials performed by one of the established companies providing this service for a fee. The MS-CR program will accept evaluations from the World Education Service (http://www.wes.org/) (WES) or Educational Credential Evaluators (http://www.ece.org/) (ECE) and other companies on a case by case basis. The evaluation must be course by course and include degree equivalency and grade point average. The evaluation should be sent directly from the company to the MS-CR program.

- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Prof%202016-Oct.pdf). The Educational Commission for Foreign Medical Graduates (ECFMG) certificate is accepted in lieu of a TOEFL/IELTS score for applicants with a Medical Degree applying to this program.
- A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%202016-Oct.pdf) is required during the admission process; it may affect the student’s eligibility to enter the program.
- Submission of official scores on the Graduate Record Examination (GRE) or other professional test scores (such as the Graduate Management Admission Test, Medical College Admission Test, Law School Aptitude Test) that are not more than five years old. Official copy of scores should be sent from the Educational Testing Service (ETS) to the University of Kansas Medical Center - ETS institutional code 6895. Applicants who have earned a doctoral degree in the United States are exempt from this requirement.
- Completion of at least one semester of calculus is required.
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A résumé or curriculum vitae. Demonstration of one or more years of responsible work experience in the health field or a degree in a recognized health profession or other evidence of training or experience that indicates adequate preparation for the M.S. in Clinical Research curriculum is preferred.
- A personal written statement that describes the applicant’s career goals and motivation for seeking post-graduate training in clinical research.

Applicants not meeting the above requirements may be eligible for provisional admission. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years’ catalogs ».

The M.S. in Clinical Research program consists of 33 credit hours. Students are required to complete eight core courses: epidemiology, two fundamentals of biostatistics courses, statistical computing (or data management), advanced epidemiologic methods, grant writing, responsible conduct of research, and clinical trials for a total of 22 credit hours of core courses; 8 additional credit hours consist of electives. The final three credit hours are devoted to the student’s thesis.

### Degree requirements:
- Degree requirements are normally completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 5 years of admission to the program.
- Completion of a minimum of 33 credit hours.
- Cumulative grade-point average (GPA) of at least 3.0 for all KU graduate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Enrollment in PRVM 899 Thesis the semester the student defends their thesis.
- Successful completion of the following core courses (22 credit hours):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

INTELLECTUAL-CONCEPTUAL, INTEGRATIVE, AND ANALYTIC ABILITIES:

Applicants must be able to read and understand documents written in English. A student must possess the ability to understand and work with measurements, carry out calculations, and engage in reasoning, analysis, and synthesis. A student must be able to draw on all these abilities to be an effective problem solver. In addition, a student should be able to comprehend three-dimensional relationships and understand spatial relationships of structures.

BEHAVIORAL AND SOCIAL ATTRIBUTES:

A student must possess the emotional maturity and stability required for full utilization of his/her intellectual abilities, the exercise of sound judgment, and the prompt completion of all responsibilities attendant upon responsible activity in the broad field of public health. Integrity, motivation, reliability, self-direction, and the ability to work in diverse groups are personal qualities, which are required for effective practice in this field. As a component of clinical research education, a student must demonstrate ethical behavior.

Individuals with disabilities are encouraged to apply to the program. Candidates who indicate that they cannot meet one or more of the expectations will be reviewed further with applicant and faculty input to determine what reasonable accommodations might be possible to facilitate successful completion of the MS-CR curriculum.

Doctor of Philosophy in Health Policy and Management

Our PhD in Health Policy and Management prepares high-level health services researchers for careers in academic settings or in public and private organizations where advanced research, leadership and analytic skills are required.

Health services research is a multidisciplinary field that examines the uses, costs, quality, accessibility, delivery, organization, financing and health outcomes of healthcare systems in the U.S. and elsewhere. Health Services researchers investigate, compare and interpret the complexities of healthcare systems, including how social factors, financing systems, organizational structures and processes, health technologies, and individual and group behaviors affect access, cost and quality of care. Coursework is offered on the University of Kansas Medical Center campus and continuous, full-time enrollment in the program is preferred.

The application process is done online. Detailed instructions on how to apply and the application deadlines are posted on the Health Policy and Management website (http://www.kumc.edu/school-of-medicine/hpm/phd-in-health-policy-and-management/phd-admissions-criteria-process-and-timeline.html).

Admission requirements:

• A master’s degree in health services administration or a related field (e.g. public health, public administration, business, social sciences, biological sciences, nursing) from a regionally accredited institution and documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from all other institutions attended post-baccalaureate are also required.
• A cumulative grade-point average (GPA) of at least a 3.5 on a 4.0 scale for all post-baccalaureate course work.
Students with degrees from outside the U.S. may be subject to transcript evaluation to determine that the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.

- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Pro%2016-Oct.pdf) and additionally for this specific program, a minimum score of 50 on the TSE or SPEAK tests, a minimum iBT speaking score of 24, or a minimum IELTS speaking score of 8.

- A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf) is required during the admission process; it may affect the student's eligibility to enter the program.

- An official copy of the Graduate Record Examination (GRE) score not more than approximately 5 years old sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional 6895.

- Successful completion of a graduate level statistics course. The need for additional foundational coursework (health delivery systems, health economics, health behavior/organizations, health policy) will be evaluated on an individualized basis during the admissions process.

- Three letters of recommendation from individuals who can assess your academic background and potential for success in a doctoral program.

- A personal statement regarding your career objectives and purpose.

- A current resume or curriculum vitae.

- A copy of the applicant’s master’s thesis, graduate-level research paper or other example of the applicant’s scholarly research writing.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, students should refer to the catalog content of the year they entered the program. Other years’ catalogs».

The doctoral program is a post-master’s, competency-based program in health services research consisting of 3 stages. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D. The program, including dissertation, is designed to be completed in a minimum of 4-5 academic years (see Degree Plan tab.) Students are expected to maintain continuous, full-time enrollment.

Stage 1 consists of basic courses in health policy, health systems, culture, occupations, health care management, and quantitative and qualitative research methods. A notable feature of this stage is that students begin to participate in the research process immediately upon beginning the program through a series of 1-credit-hour immersion courses, taken within the first 2 semesters along with other basic courses.

Stage 2 involves specialization in a specific substantive area of either policy or management-related research or a combination, as well as advanced statistical analysis and research methods. Students also complete a teaching seminar and practicum.

Stage 3 consists of the doctoral dissertation demonstrating the development, execution, and results of original research. Students work primarily with their dissertation advisor and doctoral committee at this stage in order to prepare and defend their dissertation proposal and to carry out and complete their dissertation research project. There are two options for the written dissertation, the traditional book format or a three publishable articles format. The written dissertation is formatted and published according to university guidelines.

**Degree requirements:**

- Degree requirements are normally completed within 4-5 years of admission to the program although a maximum of 8 years is allowed.

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.

- Successful completion of the University’s Research Skills and Responsible Scholarship (http://www.kumc.edu/Documents/graduate%20studies/Res%20Skills%20and%20Responsible%20Scholar%20Doctoral%2016-Oct.pdf) requirement prior to the semester the Oral Comprehensive Examination is scheduled.

- Successful completion of the required sequence of health services research methods courses HP&M 870, HP&M 871, HP&M 873, HP&M 875, HP&M 886, and HP&M 910 meets the Research Skills requirement.

- Successful completion of the research ethics modules within HP&M 870, HP&M 871, HP&M 886, and HP&M 910 meets the Responsible Scholarship requirement.

- Successful completion of the KUMC Human Subjects Project training module during the first semester of enrollment and maintenance of certification throughout tenure in the PhD Program.

- Successful completion of preliminary examinations in quantitative analysis, general health policy and management research, and a specialization area.

- Successful completion of the Residence Requirement (http://www.kumc.edu/Documents/graduate%20studies/Residence%20Requirement%20PhD%2016-Oct.pdf) by enrollment in full-time status a minimum of two semesters prior to the semester the Oral Comprehensive Examination is scheduled.

- Successful completion of the Oral Comprehensive Examination (http://www.kumc.edu/Documents/graduate%20studies/Comprehensive%20Oral%20Exam%20PhD%2016-Oct.pdf). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

- Successful completion of the Post-Comprehensive Enrollment (http://www.kumc.edu/Documents/graduate%20studies/Post-Comp%20Enrollment%20PhD%2016-Oct.pdf) requirement.

- Enrollment in a minimum of one (1) credit of HP&M 999 the semester the student will defend dissertation and graduate.

- Successful completion of the following Health Policy and Management core courses:

Total Hours 49-53

Because the PhD in Health Policy and Management degree signifies that the holder is prepared for entry into the practice of health services research, it follows that graduates must have the knowledge and skills necessary to function in a broad range of academic and research situations. The Technical Standards include those physical, cognitive and behavioral standards that are required for the satisfactory completion of all aspects of the curriculum and the development of professional attributes required by all students at graduation. Therefore, the following
abilities and expectations must be met by all students with or without accommodations admitted to the PhD program.

1. Observation: A student must be able to observe class demonstrations and field experiences relevant to the field of health services research. A student must be able to read and comprehend text, numbers, tables and graphs, both in print and displayed electronically. Observation necessitates the function use of the senses of vision and hearing.

2. Communication: A student must be able to communicate effectively in oral, written and electronic form with other students, faculty, staff, researchers, health providers, preceptors and the public. Effective communication includes: the ability to understand assigned readings, lectures, and technical and professional materials; the ability to analyze information; the ability to present results of such analyses verbally and in writing; the ability to independently prepare papers and presentations; and the ability to follow verbal and written instructions.

3. Motor: A student must have sufficient motor function to attend classes, prepare assignments, use electronic media, deliver lectures and make public presentations. Class requirements may also include field work in a variety of health services organizations.

4. Intellectual, conceptual, integrative and quantitative abilities: A student must possess the ability to understand and work with measurements and calculations, and to engage in reasoning, analysis, synthesis and critical thinking. A student must be able to exercise sufficient judgment to recognize and correct performance deviations, and be able to draw on all the above mentioned abilities to be an effective problem solver, researcher and teacher.

5. Behavioral and social attributes: A student must have the emotional health required for the full use of his or her intellectual ability. A student must be able to exercise sound judgment, and to act ethically and with integrity. A student must be self-motivated, reliable and responsible to complete assigned tasks in a timely manner with no supervision. Students must be able to give attention to detail and have the flexibility to function in a research setting, including adapting to changes in time, place and structure of academic and research settings. The student must have the ability to work with diverse groups.

**Interdisciplinary Graduate Program in Biomedical Sciences**

Graduate research at the University of Kansas Medical Center covers a rich and diverse range of topics in both basic and translational research. Basic research is geared toward understanding the basic biological systems that control life. By understanding these systems, rational treatments to treat disease can be devised. The discovery and refinement of these rational treatments is translational research. With such a range of research topics, it is often difficult to choose the best lab. The interdisciplinary program allows the student to make an informed choice of labs to enter. IGPBS students hear from every researcher who is able to take a new student into their lab during the Faculty Research Series. The student then selects 3 research rotations. At the end of the 3 rotations the student will choose the lab that is the best fit for their research goals. Once a lab is chosen, the student enters the chosen mentor’s department to complete the Ph.D.

The interdisciplinary program covers the first 2 semesters of graduate study. Students take a core group of courses that cover all aspects of cell biology, biochemistry, and cell signaling. Courses are both lecture based and discussion based. Students receive introductions to critical research techniques, work on problem sets, and critically evaluate our current knowledge base. In addition, students take courses in scientific ethics and scientific communication. Scientific communication covers graphic presentation of data and both written and oral communication.

At the end of the first year, students have built a considerable knowledge base and have skills in scientific communication, critical thinking, and problem solving. Students expand their knowledge base and skills by taking advanced courses in their chosen departments or programs. Our graduate program prepares students for successful careers in research.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website [http://www.kumc.edu/igpbs/how-to-apply.html](http://www.kumc.edu/igpbs/how-to-apply.html).

**Admission requirements:**

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the [Minimum English Proficiency Requirement](http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Prof%2016-Oct.pdf).
- A background check ([http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf](http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf)) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the [Graduate Record Examination (GRE) score](http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf) sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895.
- GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- **Prerequisite coursework:**
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
  - Research experience (beyond labs associated with lecture courses) is strongly suggested.
  - Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. [Other years' catalogs](http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf).

**1. Observation:** The candidate must be able to observe demonstrations and experiences in the basic sciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

**2. Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

**3. Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

**4. Intellectual-Conceptual, Integrative, and Quantitative Abilities:** The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

**5. Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disability individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review the provisions for reasonable accommodation will be determined.

For further information, contact Interdisciplinary Graduate Program in Biomedical Sciences, University of Kansas School of Medicine, 1005 Dykes, 3901 Rainbow Blvd., Kansas City, Kansas 66160-7400 (Phone: (913) 588-2719 Fax: (913) 588-5242 E-mail: IGPBS@kumc.edu)

**STUDENT POLICY ON INFECTIOUS DISEASE**

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

**DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS**

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.
Master of Science in Health Informatics

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health informatics, special skills will be acquired in organizational change, project management and impact evaluation.

This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html), which is sponsored by the School of Nursing. The master's degree is conferred by Medical Center Interdisciplinary Programs. The program is designed for health professionals who want a specialty focus in applied health informatics.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Science in Health Informatics (http://nursing.kumc.edu/academics/master-in-health-informatics.html) website.

Admission requirements:

- A bachelor's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Engl%20Prof%2016-Oct.pdf).
- A current resume or curriculum vitae.
- A personal essay outlining the applicant's reasons for wanting to pursue graduate education in health informatics, career objectives, and any other information that would help the admissions committee get to know the applicant.
- Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant's academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%2016-Oct.pdf) is required during the admission process; it may affect the student's eligibility to enter the program.
- A graduate level statistics course (may be completed prior to admission or during the first semester of enrollment.)

After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

International Students

Due to the number of required online courses for this degree, the Health Informatics Program at KUMC does not meet the U.S. student visa requirements at this time. Therefore, we are unable to accept individuals who are on student visas. If you received your university education outside of the U.S. or are in the U.S. on another type of visa, please contact HealthInformatics@kumc.edu for additional application requirements.

Admission requirements are subject to change. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

The Master's in Health Informatics curriculum is divided into three cores: informatics, leadership, and research along with a discipline-specific emphasis track. The student and advisor will work closely together to develop a plan of study that meets the career goals of the student.

Degree requirements:

- Degree requirements can be completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 4 years of admission to the program.
- Completion of a minimum of 40 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a general examination (http://www.kumc.edu/Documents/graduate%20studies/Masters%20Exam-Defense%2016-Oct.pdf) the semester the student will graduate.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.
- Successful completion of the Health Informatics Core (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.

Dual Degree: Doctor of Pharmacy & Master of Science in Health Informatics

The dual PharmD/MS in health informatics (MSHI) degree program is designed particularly for those students intending to pursue opportunities in pharmacy informatics. The dual PharmD/MSHI students will concurrently enroll in both programs during years 2-4 of the PharmD program. During the last semester, the HI practicum will satisfy 1 of 9 required advanced pharmacy practice experiences (APPEs). A Health Informatics comprehensive oral examination occurs during the last semester of enrollment in the Dual Degree (P4 Year, Spring semester). Admission to this program is restricted to students currently in the PharmD program at KU.

Total Hours 40
have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students with or without accommodations admitted to the program.

1. **Observation:** Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication:** Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff, and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.

3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include field work in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem-solving abilities:** An applicant must be able to understand and learn factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University's Office for Academic Accommodations.

---

**Neurosciences Program**

The KU-L/KUMC bicampus Neuroscience Graduate Program (http://www.neuroscience.ku.edu/) is designed to prepare the student for a research and/or teaching career with concentrations in neuroscience. The program emphasizes research and the skills and knowledge required to perform and communicate the results of research. Modern neuroscience researchers/educators must be versed in a number of areas of neural research, spanning from molecular neuroscience to systems neuroscience. As such, the course of study in the program is broadly based; you are encouraged to enroll in courses offered by other programs or departments. The research opportunities in the program are widely varied and will accommodate many interests.

Nearly all Ph.D. students in the Neuroscience Graduate Program at the KU School of Medicine are admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences (IGPBS). After the initial year of course work, students choose a neuroscience research mentor and then join the laboratory of the mentor. Coursework for the Neuroscience Graduate Program is offered at the KU Medical Center campus in Kansas City, Kansas as well as the University of Kansas in Lawrence. Several courses are taught on both campuses via videoconferencing. Comprehensive Exams for all students must be completed by the fall of the 3rd year in Graduate School. The program on the KUMC campus is directed by the KUMC Neuroscience Graduate Studies Committee consisting of the following faculty:

**KUMC Graduate Studies Committee Members:**

- Douglas Wright, PhD
- Dianne Durham, PhD
- John Stanford, PhD

Applications may be made online at: Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) (http://www.kumc.edu/ipbs.html).
Inquires related to the KUMC portion of the program may be directed to the Program Director:

Douglas Wright, Ph.D.
Professor
Director, Neuroscience Graduate Program, KUMC Campus
Department of Anatomy & Cell Biology
University of Kansas Medical Center
Kansas City, KS 66160
913-588-2713 (office)

dwright@kumc.edu

Courses

NEUS 799. Neuroscience Seminar Series. 2 Hours.
Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. (Same as NURO 799) Prerequisite: Graduate standing in the Neuroscience program. LEC.

NEUS 844. Neurophysiology. 3 Hours.
Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NURO 844 and PHSL 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor. LEC.

NEUS 845. Graduate Histology. 3 Hours.
This course will bridge student knowledge of systems/organs with cellular histology and is designed as an accelerated introduction to histological techniques, microscopy/optics, and histology of normal and diseased tissues. Classes meet once a week and the format includes a 1 hour lecture on individual tissues within related organ systems followed by 1 hour of microscopic observation. Prerequisite: Completion of the IGPBS core curriculum or consent of instructor. LEC.

NEUS 846. Advanced Neuroscience. 5 Hours.
Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, and PHSL 846.) Prerequisite: Permission of the course director. LEC.

NEUS 847. Developmental Neurobiology. 2 Hours.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847 and PHSL 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

NEUS 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer’s, Parkinson’s, Huntington’s, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down’s syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, and PHSL 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor.

NEUS 850. Sensory Biology. 3 Hours.
A variety of topics associated with sensory biology, including olfaction, vision, audition, equilibrium, and the visceral and somatic senses will be discussed relative to basic functions and in disease settings. Faculty will provide lectures throughout the semester and research article discussions will be woven into the content throughout the course. Prerequisite: Student must be admitted to the IGPBS program or equivalent. LEC.

NEUS 899. Neuroscience Master’s Thesis. 1-11 Hours.
Hours and credit for this course to be arranged with the mentor. Independent investigation of a research problem in neuroscience, but of limited scope. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor. THE.

NEUS 900. Scientific Papers in Neuroscience. 1 Hour.
Neuroscience research articles are analyzed by the student with the guidance of an instructor in terms of quality of scientific content and mechanics of the presentation. One or more articles are discussed in each tutorial session. The research topics and the instructor are chosen in accordance with the research interest of the students. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. LEC.

NEUS 990. Research in Neuroscience. 1-9 Hours.
Original and independent investigation, approved by and conducted under the supervision of the students’ advisor and advisory committee, in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of advisor. LEC.

Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. THE.

Master of Science in Neurosciences

The Neuroscience Master's program is a bi-campus graduate program that incorporates neuroscience faculty at the KU main campus in Lawrence and the KU Medical Center (KUMC). Neuroscience graduate students that matriculate at KUMC participate in the integrated IGPBS graduate program their first year and have the option of taking selected courses on the main campus after their first year. Students on the Lawrence campus take neuroscience courses on the Lawrence campus, but also participate in courses offered on the KUMC campus. Students and faculty from both campuses participate regularly via the Neuroscience Seminar series, which is conducted by video conference.

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2258) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.
Admission requirements:
- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required.
- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale for the bachelor’s degree.
- Successful completion of the following Neuroscience courses:
  - Three letters of recommendation.
  - Prerequisite coursework:
    - One year of general chemistry
    - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
    - One year of biological sciences
    - One semester of calculus
    - One semester of physics
  - Research experience (beyond labs associated with lecture courses) is strongly suggested.
  - Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs».

Degree Requirements:
- Degree requirements are normally completed within 3 years of admission to the program although a maximum of 7 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Completion of a minimum of 30 credit hours.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Successful completion of either a thesis defense or general examination (http://www.kumc.edu/Documents/graduate%20studies/Masters%20Exam-Defense%2016-Oct.pdf) the semester the student will graduate.
- If thesis option is chosen, then enrollment in a minimum of one (1) credit hour of NEUS 899 Neuroscience Master's Thesis and successful thesis submission and publication (http://www.kumc.edu/

Documents/graduate%20studies/Thesis%20Submit%20and%20Publish%2016-Oct.pdf) (according to Office of Graduate Studies policy.)

### TECHNICAL STANDARDS AND REQUIREMENTS FOR THE MASTER OF SCIENCE IN NEUROSCIENCE

The MS degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore, all students admitted for graduate study must meet the following abilities and expectations:

- **Observation:** The candidate must be able to observe demonstrations and experiences in neurosciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

- **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

- **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

- **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

- **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review the provisions for reasonable accommodation will be determined.

For further information, contact the Neuroscience Graduate Program, University of Kansas School of Medicine, 3901 Rainbow Blvd., Kansas City, Kansas 66160 (Phone: (913) 588-2713 Fax: (913) 588-2710 E-mail: dwright@kumc.edu)

### STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

### DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

### Doctor of Philosophy in Neurosciences

The KU-L/KUMC bicampus Neuroscience Graduate Program (http://www.neuroscience.ku.edu/) is designed to prepare the student for a research and/or teaching career with concentrations in neuroscience. The program emphasizes research and the skills and knowledge required to perform and communicate the results of research. Modern neuroscience researchers/educators must be versed in a number of areas of neural research, spanning from molecular neuroscience to systems neuroscience. As such, the course of study in the program is broadly
Based; you are encouraged to enroll in courses offered by other programs or departments. The research opportunities in the program are widely varied and will accommodate many interests.

Nearly all Ph.D. students in the Neuroscience Graduate Program at the KU School of Medicine are admitted into the Interdisciplinary Graduate Program in the Biomedical Sciences (IGPBS). After the initial year of coursework, students choose a neuroscience research mentor and then join the laboratory of the mentor. Coursework for the Neuroscience Graduate Program is offered at the KU Medical Center campus in Kansas City, Kansas as well as the University of Kansas in Lawrence.

Several courses are taught on both campuses via videoconferencing. Comprehensive Exams for all students must be completed by the fall of the 3rd year in Graduate School. The program on the KUMC campus is directed by the KUMC Neuroscience Graduate Studies Committee consisting of the following faculty:

KUMC Graduate Studies Committee Members:

- Douglas Wright, PhD
- Dianne Durham, PhD
- John Stanford, PhD

Applications may be made online at: Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS) (http://www.kumc.edu/igpbs.html). Inquiries related to the KUMC portion of the program may be directed to the Program Director:

Douglas Wright, Ph.D.
Professor
Director, Neuroscience Graduate Program, KUMC Campus
Department of Anatomy & Cell Biology
University of Kansas Medical Center
Kansas City, KS 66160
913-588-2713 (office)
913-588-2710 (fax)
dwright@kumc.edu

The application process is an online process. Application to this graduate program is facilitated through the Interdisciplinary Graduate Program in Biomedical Sciences (IGPBS). (p. 2258) Detailed instructions on how to apply and the application deadlines are posted on the Interdisciplinary Graduate Program in Biomedical Sciences website http://www.kumc.edu/igpbs/how-to-apply.html.

Admission requirements:

- Bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least 3.0 on a 4.0 scale for the bachelor’s degree.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Eng%20Prof%202016-Oct.pdf).
- A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%202016-Oct.pdf) is required during the admission process; it may affect the student’s eligibility to enter the program.
- An official copy of the Graduate Record Examination (GRE) score sent from Educational Testing Service (ETS) to University of Kansas Medical Center - ETS institutional code 6895 - GRE Scores NOT APPLICABLE TO THE IGPBS.
- Three letters of recommendation.
- Prerequisite coursework:
  - One year of general chemistry
  - One year of organic chemistry or one semester of organic chemistry and one semester of biochemistry
  - One year of biological sciences
  - One semester of calculus
  - One semester of physics
- Research experience (beyond labs associated with lecture courses) is strongly suggested.
- Interview - the most qualified applicants will receive an invitation for an interview.

Applicants will be assessed based on a combination of GPA, research experience, and interview. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission requirements are subject to change. In most cases, use the catalog of the year student entered the program. Other years' catalogs.

The program consists of coursework, research experience, and the successful completion of a doctoral dissertation. Dissertation research culminates in a final dissertation examination consisting of an oral presentation by the candidate and an examination by the faculty. Relevant prior graduate work is taken into consideration in setting up individual programs of study leading to the Ph.D.

Degree Requirements:

- Degree requirements normally are completed within 5 years of admission to the program although a maximum of 8 years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of the University’s Research Skills and Responsible Scholarship (http://www.kumc.edu/Documents/graduate%20studies/Res%20Skills%20and%20Responsible%20Scholar%20Doctoral%202016-Oct.pdf) requirement prior to the semester the Oral Comprehensive Examination is scheduled.
- Successful completion of GSMC 857 Biographies, GSMC 852 Introduction to Biomedical Research I and GSMC 855 Introduction to Biomedical Research II (or equivalent) meets the Research Skills requirement.
- Successful completion of GSMC 856 Introduction to Research Ethics (or equivalent) meets the Responsible Scholarship requirement.
- Successful completion of the Residence Requirement (http://www.kumc.edu/Documents/graduate%20studies/Residence%20Requirement%20PhD%202016-Oct.pdf) prior to the semester the
Oral Comprehensive Examination is scheduled. The requirement is met by enrollment in full-time status a minimum of two semesters.

- Successful completion of the Oral Comprehensive Examination (http://www.kumc.edu/Documents/graduate%20studies/Comprehensive%20Exam%20PhD%2016-Oct.pdf). Students are recognized as formal doctoral candidates after they have passed the comprehensive examination.

- Successful completion of Post-Comprehensive Enrollment (http://www.kumc.edu/Documents/graduate%20studies/Post-Comp%20Enrollment%20PhD%2016-Oct.pdf) requirement.

- Enrollment in a minimum of one (1) credit hour of dissertation (NEUS 999 Neuroscience Doctoral Dissertation) the semester the student will defend dissertation and graduate.

- Successful completion of the following Interdisciplinary Graduate Program in Biomedical Science (IGPBS (p. 2258)) courses (or their equivalent):

TECHNICAL STANDARDS AND REQUIREMENTS FOR THE DOCTOR OF PHILOSOPHY IN NEUROSCIENCE

The PhD degree signifies that the holder is prepared for entry into research and/or teaching in postgraduate training and faculty positions. It follows that graduates must have the knowledge and skills to function in a broad variety of academic situations in the classroom and laboratory. Therefore, all students admitted for graduate study must meet the following abilities and expectations:

- **Observation:** The candidate must be able to observe demonstrations and experiences in neurosciences, including but not limited to biology demonstrations in animals, cultures, and microscopic studies of tissues in normal and pathologic states. A candidate must be able to observe and analyze experimental detail. Observation necessitates the functional use of the sense of vision and somatic sensation.

- **Communication:** A candidate should be able to communicate, to understand, and to observe lectures and laboratory instruction. A candidate must be able to communicate effectively in order to present and analyze research data. Communication includes not only speech, but also reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with students, staff, and faculty.

- **Motor:** Candidates should have sufficient motor function to carry out lab techniques. A candidate should be physically able to do laboratory procedures and analyze data. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

- **Intellectual-Conceptual, Integrative, and Quantitative Abilities:** The abilities include measurement, calculation, reasoning, analysis, and synthesis. Problem solving, the critical skill demanded of scientists, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

- **Behavioral and Social Attributes:** A candidate must possess the emotional health required for full utilization of his/her intellectual abilities, the exercise of good judgment and the prompt completion of all responsibilities attendant to the completion of research and teaching responsibilities. Integrity and motivation are personal qualities, which are required for success in science.

Disabled individuals are encouraged to apply. Applicants whose response indicates that they cannot meet the expectations will be reviewed by the Graduate Committee and Technical Support staff of KUMC to assess the extent of the student’s difficulties. At this review the provisions for reasonable accommodation will be determined.

For further information, contact the Neuroscience Graduate Program, University of Kansas School of Medicine, 3901 Rainbow Blvd., Kansas City, Kansas 66160 (Phone: (913) 588-2713

Fax: (913) 588-2710 E-mail: dwright@kumc.edu

STUDENT POLICY ON INFECTIOUS DISEASE

Due to the need to assure the health and safety of students, faculty, and staff, the fact that an applicant for admission has an infectious disease or is the carrier of an infectious disease may be a factor in determining eligibility for academic program admission at the University of Kansas Medical Center. Determination of eligibility for admission in such cases will be made on an individual basis in consultation with the applicant’s physician, taking into consideration (among other factors), legal requirements and the current best medical information available to determine whether the applicant could complete the normal course of study with reasonable accommodation and without risk to him/herself or to others. Therefore, applicants having an infectious disease or who are carriers of an infectious disease must advise the Graduate Committee of this fact and may be required to provide medical records for review by the Student Health Physician in order to determine eligibility for admission.

DRUG FREE WORKPLACE POLICY OF THE UNIVERSITY OF KANSAS

It is the policy of the University of Kansas that unlawful manufacture, distribution, dispensing, possession, or use of controlled substances or alcohol is prohibited in buildings, facilities, or grounds controlled by the University. Any student found to be illegally manufacturing, distributing, dispensing, possessing, or using controlled substances or alcohol at the University or any of its affiliated educational sites, shall be subject to disciplinary action in accordance with applicable policies as outlined in the Graduate Student Handbook. Students are reminded that illegal manufacture, distribution, dispensing, possession, or use of controlled substances may also subject individuals to criminal prosecution.

M.D.-Ph.D. Physician Scientist Training Program

The purpose of the MD-PhD dual degree program is to prepare highly qualified and motivated post-baccalaureate students for careers as physician scientists in academic medicine and biomedical research. To promote a close-knit group of students, MD-PhD training at the University of Kansas Medical Center includes small group interactions with the program directors and monthly interactions with fellow students at all phases of their training. A peer-mentoring program allows students to advise and guide each other on issues related to research and clinical training, personal life-work balance, and professional development. The program is conducted under the auspices of the Dean of Graduate Studies and the Executive Dean of the School of Medicine, with guidance from a MD-PhD Advisory Committee. On average, students spend about 7-8 years in the program; the variable period usually depends on the time needed to complete their research and dissertation.

Application for admission is through the MD-PhD Dual Degree Admissions Committee. The Program seeks highly motivated students with outstanding academic credentials and potential, a strong interest in research, and demonstrated research experience. There are no Kansas residency requirements for admission to the MD-PhD program and students with exceptional potential as physician scientists are recruited from around the country.
Applicants need to submit the following credentials: (Deadline October 15th for application through AMCAS, all needed items due October 30th)

- Standard AMCAS medical application with “MD-PhD Combined-Degree Program” selected. Designate The University of Kansas School of Medicine as a recipient. Prepare an addendum and submit it to the Program address (email if possible) only if you wish to make additional or clarifying comments to those already expressed in the three essays in your AMCAS application: [1] Personal Statement. [2] Why are you interested in an MD-PhD Program? [3] Describe your research experience(s) to date, including location and time frame for each, and your research mentor(s).
- MCAT scores will be included in your AMCAS application, otherwise have official copy sent to the MD-PhD Program. Submit GRE scores if taken (not a requirement). Contact the Program if you have any questions.
- Download and complete Information for MD/PhD Physician Scientist Program at University of Kansas Medical Center form (http://www.kumc.edu/Documents/md-phd/MD-PhD%20Information%20Form.pdf) using the link provided. Please submit the form via email if at all possible to jfletcher@kumc.edu.
- At least three (3) Letters of Recommendation (Please download through AMCAS):
  a. One must be written by the applicant’s mentor from the prior research experience(s) and give some indication about the applicant’s potential for research.
  b. One must be written by a faculty member, other than the research mentor with whom the applicant studied in a science course.
  c. A letter from any other person selected by the applicant.
- The application fee for our program comes directly to us. Please make out your check for $50.00 to: KUMC MD-PhD Program and send it to the Program address. You will not be required to pay the medical application fee that is listed on the MD only information.
- Email your current CV to jfletcher@kumc.edu.

Interviews

- Selected applicants will be invited for interviews in Kansas City. The interviews are usually held mid January. During the interview, applicants meet with members of the MD-PhD Admissions Committee, MD-PhD and Graduate Program Directors, students currently in the program, and research faculty.
- The Program will cover each selected applicant’s basic travel expenses for interviews; details will be provided at the time of the invitation to interview. A student invited to interview but with exceptional circumstances and unable to participate on those dates may be given an alternative date and considered for admission by the Admissions Committee on an individual case basis.

For additional information please see: http://www.kumc.edu/md-phd-program/application-and-admission.html for details on the application and admission processes.

If Accepted Into the Program:

Students accepted into the MD-PhD Dual Degree program are admitted into the M.D. Program in the School of Medicine and as a Ph.D. student in one of the graduate programs offered through Graduate Studies. The student must provide an official transcript indicating receipt of a Baccalaureate degree from a fully accredited institution by the time of matriculation into the program (and if applicable, transcripts for any post-baccalaureate studies/degrees).

Admission requirements are subject to change. In most cases, use the catalog of the year the student entered the program. Other years’ catalogs:

- MD-PhD students must meet the MD degree requirements of the School of Medicine as outlined in their section of this online catalog and the PhD degree requirements as outlined by their PhD department and minimum Graduate Studies requirements also outlined in their respective sections (p. 2163) of this online catalog.
- For MD-PhD students, the first two years of the MD curriculum are considered the equivalent of the Interdisciplinary Graduate Program in Biomedical Science (IGPBS) (p. 2258) curriculum. Successful completion of the IGPBS curriculum (or its equivalent) is a degree requirement for each of the basic science Ph.D. programs.
- PAON 920 Molecular Medicine: Approaches & Ethics (meets once/week the fall and spring semester of the first year of the medical phase)
- Principles of Statistics in Public Health (online course offered in the summer between the first and second years of the medical phase)
- Grant preparation seminar (meets once/week the spring semester of the second year of the medical phase)
- Research skills and responsible conduct of research will be met prior to taking the oral qualifying exam by the following coursework:
  - Research skills: 1) Biostatistics learning activities (first year of medical phase) and 2) PAON 920 Molecular Medicine: Approaches & Ethics (fall semester, first year of medical phase)
  - Responsible conduct of research can be met via one of the following courses: 1) GSMC 856 Introduction to Research Ethics (fall semester, first year of graduate phase), 2) Sower's Research Integrity Course (spring semester, first year of graduate phase), or 3) an institutional-approved Department-sponsored responsible conduct of research course (fall or spring semester of first year of graduate phase) with permission of the Program Director.
- BIOS 799 Introduction to Statistical Genomics (or a comparable course with permission of the Program Director): taken during the first or second year of the graduate phase
- Research skills and responsible conduct of research training will also be required in the final year of the graduate phase, in consultation with the Program Director.

At any time throughout the course of study, if a student is not meeting the requirements of the MD-PhD program, or of the specific degrees – their tenure in the program will be reviewed by appropriate personnel and action may be taken. Continued advancement in the program is dependent on a student successfully meeting the requirements of the MD-PhD program and those of their current phase (MD or graduate) of study.

Degree requirements and course descriptions are subject to change. In most cases, use the catalog of the year the student entered the program. Other years’ catalogs:

Matriculation in this program begins with two years of a basic medical science curriculum (p. 2272). Students are assigned a clinical preceptor, who meets with the assigned student on a regular basis throughout the first two years of medical school. Students also take a required course PAON 920 Molecular Medicine: Approaches & Ethics offered by the MD-PhD program during the fall and spring semesters of the first year of medical courses. This course is designed to introduce students to cutting
edge scientific concepts and research directly related to topics covered in the medical school curriculum.

Introductory laboratory research rotations are typically performed in the summer before and the summer after the first year of medical courses. In addition, the summer after the first year of medical courses, students will be enrolled in an online course, Principles of Statistics in Public Health. During the second year of medical courses, the student devotes time to selecting a research mentor (if not already done so by this time) and begins to develop ideas for the dissertation research problem. During the spring semester of the second year of medical courses - the MD-PhD program offers a required grant preparation seminar (1h/week) that will familiarize the students with NIH pre-doctoral fellowship application components as well as the submission processes. Students complete the second year by taking Step 1 of the United States Medical Licensing Examination (USMLE).

Years three through five (or six) of the MD-PhD Program focus primarily on the research problem and the selected graduate curriculum. The number of years in this phase are dependent on individual progress with the required research.

During the first year in the graduate phase (year 3 of the program) the student fulfills the responsible research and ethics requirement for the PhD degree. Once completed, the student will be eligible to take the Oral Comprehensive Examination. For more details, refer to the degree requirements section in this catalog for the PhD programs available in the School of Medicine (p. 2163) or KU Lawrence Bioengineering (p. 478).

During the first or second year in the graduate phase (years 3 or 4 of the program) the student takes BIOS 799 Introduction to Statistical Genomics, or a comparable course with permission of the Program Director.

During years two through four of the graduate phase, the student will complete any remaining Program specific requirements, including responsible conduct of research the year the student plans to defend, and the student will conduct research for their dissertation culminated by the defense of their dissertation. During this phase, students have several opportunities for clinical training experiences. For example, the student-run JayDoc free clinic provides an excellent opportunity to both practice clinical skills and serve the community. Students complete Basic Life Saving training/ certification approximately every 2 years to stay current in those clinical skills. Students may also elect to participate in supplemental instruction opportunities – in which they help teach and review concepts to help their peers prepare for the USMLE Step 1 exam.

After the dissertation defense and successful completion of the requirements of the graduate phase, students enter a transitional introduction to medical clerkships prior to completing their elective clinical rotations (p. 2272). After the third year of medical school, the USMLE Step 2 is taken.

In addition to the course of study outlined above, the Program also sponsors a number of other functions designed to develop professional skills relevant to a career in academic medicine. All of the students meet once a month with the program directors and their peers for one hour to discuss program-related activities, issues and events – including planning service and social activities. These meetings conclude with a formal presentation of a research project or a clinical case presentation.

Another important element of the Program is the annual retreat. Each annual summer event focuses on one of three aspects of MD-PhD training: research, clinical practice, and professional development/leadership. The retreat fosters discussion and learning about the many and varied elements in a physician-scientist’s training and career.

Below is the typical plan of study that includes 4 years in the MD phase and 3-4 years in the PhD phase. For numbering, M is for medical phase, G is for PhD phase and P is for total years in program.
In the first or second year of the graduate phase students will enroll in BIOS 799 Introduction to Statistical Genomics, or a comparable course with permission of Program Director.

### Year 2

**PhD Phase (G2, P4)**

- Follow the PhD curriculum for your chosen program.
- In the first or second year of the graduate phase students will enroll in BIOS 799 Introduction to Statistical Genomics, or a comparable course with permission of Program Director.

### Year 3

**PhD Phase (G3, P5)**

- Follow the PhD curriculum for your chosen program.
- Take RCR course in consultation with Program Director if defending in Year 3 of the graduate phase.
- Defend dissertation Spring semester of year 3 or 4 of PhD phase.
- Graduate with PhD in May (Spring semester) year 3 or 4 of PhD phase.

### Year 4

**PhD Phase (G4, P6)**

- Follow the PhD curriculum for your chosen program.
- Take RCR course in consultation with Program Directors.
- Defend dissertation Spring semester of year 3 or 4 of PhD phase.
- Graduate with PhD in May (Spring semester) year 3 or 4 of PhD phase.

### Total Hours 0

- PhD Phase (G2, P4)
- PhD Phase (G3, P5)
- PhD Phase (G4, P6)

### Year 3

**MD Phase (M3, P6 or 7)**

- See MD Curriculum in MD section of catalog for clerkships, electives and hours.
- Graduate with MD in May (Spring semester) year 4 MD phase.

### Total Hours 0

- MD Phase (M3, P6 or 7)

---

**Doctor of Medicine (M.D.)**

At the University of Kansas School of Medicine, the physicians of tomorrow are welcomed into a culture of community, forming bonds with peers and mentors by learning together. Through this support system, students reach common goals of serving their community and excelling in the knowledge of medicine and delivery of health care.

In the fall of 2017, the KU School of Medicine launched its innovative new curriculum: Active -> Competency-Based -> Excellence-Driven (ACE). The ACE curriculum’s block structure systematically introduces topics with progressive complexity of foundational and clinical content through the four years. The curriculum focuses on active learning, in which students develop skills in assessing their own learning needs and developing strategies to meet those needs.

**Top rankings**

Providing students with an outstanding medical education remains at the heart of the School of Medicine’s mission.

- U.S. News & World Report ranks the School of Medicine among the top programs for training primary care physicians.

**Three diverse academic environments**

The School of Medicine has campuses at three locations in Kansas and has gained a national reputation, particularly for educating family, primary care and rural physicians.

- At the Kansas City campus, students train at a large academic medical center, which has attracted innovative and accomplished educators and researchers from around the world. In the summer of 2017, a new $75 million, 171,000-square-foot Health Education Building opened. The new building enables the School of Medicine to train students in the technologically advanced environment required by a modern health care curriculum.

- The Wichita campus provides a community-based medical education environment, in which students learn through direct patient care inside three partner hospitals as well as in physician offices across the state. Students may also elect to train in community-based and rural settings. The instructional space on this campus was expanded and updated in 2010 to facilitate small group learning and team based...
experiences in anticipation of the new teaching method integral to the ACE curriculum.

• The Salina campus is designed for students with a strong interest in rural medicine and those wishing to work with a smaller group of peers on a rural regional campus with opportunities for early clinical experiences. Students are trained in a new state-of-the-art medical education building. Inter-professional activities and education occur in advanced simulated settings.

School of Medicine students in Kansas City and Wichita are also able to volunteer at the JayDoc Free Clinics, which are student-run clinics providing non-emergency urgent and preventive care to the uninsured and underinsured populations of Kansas City and Wichita. Salina students have the opportunity to assist with the medical care at Ashby House, a facility for a vulnerable population.

On the left you will find links for more information about the KU School of Medicine including administration, programs offered, campuses, and the course catalog for the School of Medicine.

Curriculum

CLASSES ENTERING AFTER 2017

ACE Curriculum Diagram (http://www.kumc.edu/school-of-medicine/education/ace-curriculum/the-curriculum.html)

Year One (35)
ACED 800 Introduction to Doctoring - 3
ACED 805 Molecular and Cellular Medicine - 8
ACED 810 Infection, Blood and Immunity - 8
ACED 815 Respiration and Circulation - 8
ACED 820 Gastrointestinal and Renal - 8

Year Two (32)
ACED 825 Muscles and Movement – 8
ACED 830 Brain, Mind and Behavior – 8
ACED 835 Reproduction, Development and Sexuality - 8
ACED 840 Medicine Capstone - 8

Year Three (48)
FAPR 955/ FCMD 950 Family Medicine Clerkship – 8
GYNO 900/ OBGN 975 Obstetrics/Gynecology Clerkship - 8
MED 900/ INMD 975 Internal Medicine Clerkship - 8
NEUR 900/ NROL 950 Neurology Clerkship - 4
PED 900/ PDRC 975 Pediatrics Clerkship – 8
PYCH 955/ PSCR 950 Psychiatry Clerkship - 4
SURG 900/ SGRY 975 Surgery Clerkship - 8
ICM 900/ ICM 975 Issues in Clinical Medicine - 0

Year Four (32)
FAPR 900 / RLMD 976 / RLMD 977 / RLMD 978, Rural Preceptorship - 4
Critical Care Selective - 4
Subinternship Selective - 4
Electives (at least 12 hours must be clinical) - 20

CLASS ENTERING 2016

Year One (36)
CORE 800 Foundations of Medicine - 8
CORE 805 Genetics and Neoplasia - 4
CORE 810 Inflammation and Immunity - 4
Year One (36)
CORE 800  Foundations of Medicine - 8
CORE 805  Genetics and Neoplasia - 4
CORE 810  Inflammation and Immunity - 4
CORE 815  Cardiopulmonary - 8
CORE 820  Gastrointestinal System and Nutrition - 4
CORE 825  Renal and Endocrine System - 4
CORE 830  Reproduction and Sexuality - 4

Year Two (30)
CORE 835  Musculoskeletal and Soft Tissue Systems – 4
CORE 840  Brain and Behavior – 8
CORE 845  Blood and Lymphoid System – 4
CORE 850  Infectious Diseases – 6
CORE 860  Integration and Consolidation – 8

Year Three (48)
FAPR 955/ FCMD 950 Family Medicine Clerkship – 8
GERO 900/ GERI 950 Geriatric Medicine Clerkship -4
GYNO 900/ OBGN 975 Obstetrics/Gynecology Clerkship - 6
MED 900/ INMD 975 Internal Medicine Clerkship - 8
NEUR 900/ NROL 950 Neurology Clerkship - 4
PED 900/ PDRC 975 Pediatrics Clerkship – 6
PYCH 955/ PSCR 950 Psychiatry Clerkship - 4
SURG 900/ SGRY 975 Junior Surgery Clerkship - 8
ICM 900/ ICM 975 Issues in Clinical Medicine - 0

Year Four (32)
FAPR 900/ RLMD 976/RLMD 977/RLMD 978, Rural Preceptorship - 4
Critical Care Selective - 4
PMED 960/ PVMD 975, Population Health in Practice - 4
Subinternship Selective - 4
Electives (at least 12 hours must be clinical) - 16

Core SOM Preclinical Phase
First Year
ACED 800. Introduction to Doctoring. 0-3 Hours.
Introduction to Doctoring is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. This course will provide students with the knowledge and skills to obtain a medical history in combination with a head-to-toe physical examination, basic life support and an introduction to the electronic medical record. In addition, students will be introduced to key topics in population health and social sciences. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Medical School admission requirements. LEC.

ACED 805. Molecular and Cellular Medicine. 0-8 Hours.
Molecular and Cellular Medicine is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The focus of the course is the molecular and cellular mechanisms underlying health and disease. This course integrates...
content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Introduction to Doctoring or permission of Associate Dean for Student Affairs. LEC.

**ACED 810. Infection, Blood and Immunity. 0-8 Hours.**

Infection, Blood and Immunity is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to microbial infection, as well as normal and abnormal activity of the immune system and blood, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Molecular and Cellular Medicine or permission of Associate Dean for Student Affairs. LEC.

**ACED 815. Respiration and Circulation. 0-8 Hours.**

Respiration and Circulation is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the cardiovascular, pulmonary and allied systems, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Infection, Blood and Immunity or permission of Associate Dean for Student Affairs. LEC.

**ACED 820. Gastrointestinal and Renal. 0-8 Hours.**

Gastrointestinal and Renal is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the gastrointestinal, renal and allied systems, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Respiration and Circulation or permission of Associate Dean for Student Affairs. LEC.

**ACED 825. Muscles and Movement. 8 Hours.**

Muscles and Movement is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the musculoskeletal, soft tissue and allied systems, including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Gastrointestinal and Renal and the end-of-year clinical skills assessment following the Gastrointestinal and Renal block or permission of Associate Dean for Student Affairs. LEC.

**ACED 830. Brain, Mind and Behavior. 8 Hours.**

Brain, Mind and Behavior is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of the central and peripheral nervous systems and mental health including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Muscles and Movement or permission of Associate Dean for Student Affairs. LEC.

**ACED 835. Reproduction, Development and Sexuality. 0-8 Hours.**

Reproduction, Development and Sexuality is a case-based, multidisciplinary course, taught by faculty members from foundational science and clinical departments. The course integrates critical principles related to the normal and abnormal functioning of human reproductive systems, human development and human sexuality including content from the foundational, social, and clinical sciences. It includes clinical skills instruction in medical history and physical examination. Students participate in large and small group activities, including lectures, case-based collaborative learning, problem-based learning, clinical skills lab and simulations. Students will work collaboratively to master general principles, evaluate clinical literature, and develop tools for life-long learning. Students are assessed by multiple-choice examinations, small group and clinical skills performance, and professional development. Prerequisite: Successful completion of Brain, Mind and Behavior or permission of Associate Dean for Student Affairs. LEC.

**ACED 840. Medicine Capstone. 8 Hours.**

Medicine Capstone is an 8-week, case-based, multidisciplinary course which aims to consolidate concepts and learning objectives presented throughout the basic science curriculum. Large group sessions are taught by faculty members from foundational science and clinical departments. The course will serve as the capstone for the preceding courses while preparing students for the transition to clinical duties. Clinical skills lab activities will integrate content across systems and disciplines and provide an opportunity to refine clinical skills prior to the clerkship year. Large group session material will include examples of case presentations by clinical faculty. Problem-based learning sessions will continue through this course as in all of the ACE courses. Prerequisite: Successful completion
of Reproduction, Development and Sexuality or permission of Associate
Dean for Student Affairs. LEC.

Course credit hours are indicated after the course title.

Kansas City Clinical Required
Course Descriptions

Third Year Requirements

FAPR 955. Family Medicine Clerkship. 0-8 Hours.
The Family Medicine (FM) clerkship will introduce 3rd year medical students to the principles and practice of family medicine and community health. Students will receive instruction on a diverse array of FM topics through simulation, case-based learning, hands-on workshops, interactive presentations, and through patient care. Two options for the patient care portion of the FM clerkship are available. First, the student may spend time immersed in a rural community and under the close tutelage of a rural family physician. Students who choose the rural option will have opportunities to learn in various settings, likely including outpatient clinic, hospital, ED, and community. Second, the student may elect to stay in Kansas City during their rotation and experience the KU Interprofessional Teaching Clinic, the University Hospital setting, and spend time in the outpatient setting with either KU faculty and residents, or with a community physician. Student evaluation is based on assessment by clinical supervisors, the NBME Family Medicine Subject Exam, an OSCE, completion of a written assignment, and through participation in all required clerkship activities. Prerequisite: Completion of Phase I (Years 1 and 2). CLN.

ICM 900. Issues in Clinical Medicine. 0 Hours.
This course enables students to apply the theoretical framework developed in ICM 801/802 and 850/851 to the patient care activities in which they participate during third-year clerkships. Through lectures and small group discussions students examine the ethical, legal and social aspects of medical practice and application of key principles to clinical practice. Students also explore career opportunities in medicine and factors to be considered in choosing a medical specialty. Students are evaluated through written assignments and participation in course activities. LEC.

GYNO 900. Obstetrics/Gynecology Clerkship. 0-8 Hours.
During this clerkship the student develops understanding of disease in women through history, physical examination, and laboratory studies. The clerkship includes study of biochemical, anatomical, and physiological changes of normal pregnancy and the effect of disease in altering the course of reproduction. Prerequisite: Medical Basic Sciences. FLD.

MED 900. Internal Medicine Clerkship. 0-8 Hours.
General medicine orientation. Students will be assigned to Kansas University Medical Center and Kansas City Veterans Administration Hospitals. FLD.

NEUR 900. Neurology Clerkship. 4 Hours.
The required four-week Neurology Clerkship is intended to familiarize students with the diagnosis and treatment of major neurological disorders. Effective interviewing and diagnostic skills, and competent performance of the neurological examination are emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Students will be assigned to Kansas University Medical Center and Kansas City Veterans Administration Hospitals. Prerequisite: Completion of Phase I (Years 1 and 2). CLN.

PED 900. Pediatrics Clerkship. 0-8 Hours.
The student’s activities will include rotations on the pediatric inpatient wards (taking histories, examining children, and making daily ward rounds with staff physicians) and the outpatient clinics and newborn nursery. Student evaluations are based primarily upon clinical performance, assessment of problem-solving skills and performance on a written multiple-choice examination given at the end of the clerkship. Prerequisite: Medical Basic Sciences. FLD.

PYCH 955. Psychiatry Clerkship. 4 Hours.
The required four-week basic Psychiatry Clerkship is intended to familiarize students with the diagnosis and treatment of major psychiatric disorders. Effective interviewing and diagnostic skills, and competent performance of the mental status examination is emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Students will be assigned to Kansas University Medical Center and Kansas City Veterans Administration Hospitals. Prerequisite: Completion of Phase I (Years 1 and 2). CLN.

SURG 900. Surgery Clerkship. 0-8 Hours.
Surgical problems and diseases are studied utilizing lectures, skills laboratory experiences, study questions, clinical problem discussion and live patients. This course prepares the student to meet the pertinent aspects of the summative competencies of the University of Kansas School of Medicine during the third year of Medical School. A particularly useful goal of this course is to teach the student to identify life-threatening conditions that require urgent intervention. Although the skills of this course are necessary for an ambulatory practice, the skills that are taught in this course are most frequently seen and performed in the hospital setting. The student is expected to have a basic understanding of normal and abnormal body function. Prerequisite: first and second year medical years. LEC.

Fourth Year Requirements

FAPR 900. Rural Preceptorship. 4 Hours.
Since 1951 all medical students have completed, as a requirement of graduation, a rural preceptorship of at least four weeks with a practicing physician in the state of Kansas. The emphasis of the preceptorship is rural primary care (family medicine, general internal medicine and general pediatrics). Rural placements are made by the Course Administrator. The preceptor or site will provide housing while the student is on this rotation. The preceptor will expect the student to participate in all phases of professional life as a rural physician. Most sites have the student work in ambulatory clinic, hospital care, ER, nursing home, house calls, and night call. Students also are expected to participate in the civic, administrative and social activities of their preceptor. The preceptor will evaluate student performance based on school of medicine criteria. At the completion of the course the student will have: a working knowledge of the rural health care system, an understanding of the function of a physician in the context of community and an appreciation for the support systems needed for practice in rural Kansas. Offered in Modules I-XII. Prerequisite: Completion of year 3 clinical clerkships. IND.

Subinternships (4)
The four-week subinternship gives medical students an opportunity to become more proficient in a specific area of medicine. They provide a more comprehensive course than that of the third-year required course. Students select one of the following options to fulfill the requirement.
FAPR 901. Subinternship in Family Medicine. 4 Hours.
This clerkship is designed to prepare students for the responsibilities encountered as a first-year resident. Students will assume the role of an intern and will learn the family medicine approach to the care of patients with emphasis on caring for patients in the context of their family environment, addressing psychosocial, cultural and financial issues and providing longitudinal care for patients with chronic issues. Students will be required to perform the following: 1) actively participate in the management of a panel of inpatients on the Family Medicine Service, 2) participate in the care of outpatients in the Family Medicine Clinic, and 3) prepare a topic of discussion while on inpatient service. It is expected that students will be present one weekend day per week as part of their inpatient portion of the rotation. The skill of documenting admission HPs and discharge summaries efficiently and accurately is also emphasized, with mentorship from faculty. LEC.

GYNO 901. Subinternship in Obstetrics and Gynecology. 4 Hours.
The objective of this clerkship is to provide students with advanced experience in obstetrics and gynecology. Students will be assigned to the Obstetrics and Gynecology Service at KUMC. Students will participate in the management of common obstetrical and gynecologic conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

MED 908. Subinternship in Internal Medicine. 4 Hours.
The objective of this clerkship is to provide students with advanced experience in the management of acutely ill medical patients. Students will be assigned to Kansas University Medical Center and Kansas City Veterans Administration Hospital. Students will participate in the diagnosis and treatment of common medical conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

OTOR 901. Subinternship in Otolaryngology. 4 Hours.
The objective of this clerkship is to provide students with advanced experience in otolaryngology. Students will be assigned to the Otolaryngology Service at KUMC. Students will participate in the management of common ENT conditions in a role similar to that of a resident. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Subinternship Selective requirement. LEC.

PED 910. Subinternship in Pediatrics. 4 Hours.
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care under close supervision of the faculty. Students will learn skills in patient care by active participation in the daily activities of the pediatric outpatient clinic. This selective is entirely clinical. Students will learn skills in patient management by active participation in the daily activities expected of a first year resident. This selective is entirely clinical. The student will work on the Pediatric Inpatient Unit at the University of Kansas Health System. Student performance will be evaluated by the faculty based on factual knowledge, practical skills, problem-solving abilities, and personal behavior and values. On the first day of the rotation, students will report to the inpatient attending assigned to the pediatric floor. Prerequisite: PED 900 or equivalent. LEC.

PED 914. Philmont Adolescent Medicine. 4-8 Hours.
The Philmont Adolescent Medicine experience is in the high altitude environment at Philmont Scout Ranch in New Mexico. Students learn health screening, care of sports injuries, and diagnosis and management of pediatric, medical, surgical, gynecologic problems, primarily of teenagers, but also of children and adults. Supervision of students consists of faculty members from Medicine Pediatrics, Surgery, Neurology, Family Practice, Gynecology, and Physical Medicine in an effort to give well rounded educational guidance to the students. National Board, Part 1, must be passed in order to receive clinical elective credit. One four week experience only counts toward clinical electives requirements. Permission of Instructor. Prerequisite: Physical Diagnosis, Pathology and Pharmacology. FLD.

PED 918. Pediatric Subinternship Selective - Outpatient. 4 Hours.
This selective is an extension of the basic pediatric clerkship. It is designed to permit senior medical students to take increasing responsibility of patient care under close supervision of the faculty. Students will learn skills in patient care by active participation in the daily activities of the pediatric outpatient clinic. This selective is entirely clinical. The student will work in the Pediatric Outpatient Clinic at KUMC in a variety of clinics. The specific clinics will be assigned by the Chief of the Ambulatory Pediatric Service after consultation with the student. Student performance will be evaluated by the faculty based on factual knowledge, practical skills, problem-solving abilities, and personal behavior and values. This course can still be taken for elective credit even if a student already has met the subinternship selective requirement. Prerequisite: PED 900 or equivalent. CLN.

PYCH 901. Subinternship in Psychiatry. 4 Hours.
The student will function as an intern on the Adult and Child Psychiatric Services at the University of Kansas Medical Center and Kansas City VA Hospital. Each student will work closely with faculty and residents and will have an important role in the team care of hospital patients. The course is designed to provide a transitional experience between the predoctoral and residency stage of medical education allowing the student the opportunity to take more responsibility for patients with support and active teaching provided by faculty and residents. LEC.

SURG 901. Subinternship - Plastic Surgery. 4 Hours.
This course is designed to provide advanced experience to medical students the diagnosis and management of plastic surgery patients. Additionally, concepts taught during surgery 900 are reemphasized in greater detail. Ward rounds, clinical conference seminars and case studies supplement the clinical experience. An optional laboratory experience providing in-depth introduction to microvascular surgery can be arranged. Emphasis is placed on an understanding of the principles and surgical anatomy of areas of plastic surgery including congenital, trauma, tumor and cosmetic. Students are expected to participate with the surgical team in the diagnosis and management of plastic surgery patients. It is expected that the student will participate, when possible, at a resident level of responsibility. The student participates directly in patient care on the wards, in the outpatient clinics and in the operation room. Prerequisite: SURG 900, MED 900. LEC.

SURG 902. Subinternship in Surgery. 4 Hours.
The student will be expected to participate with surgical team in the diagnosis, operation, and management of surgical patients. It is expected that the student will participate, as possible, at a resident level of responsibility. Ward rounds, clinical conference, seminars, and case studies supplement clinical experience. The student participates directly in patient care on the ward, in the out-patient department, and in the operating room. Emphasis is placed on an understanding of alterations in physiology secondary to pathology, management of fluids and electrolytes, basic elements of pre- and post-operative care, and diseases amenable to surgical treatment. In addition, concepts taught during Surgery 900 are reemphasized and considered in more detail. We can accommodate 6 students in Modules I-XII. Prerequisite: SURG 900 and MED 900. LEC.

SURG 909. Surgery Subinternship-Neurosurgery. 4 Hours.
This course is designed to provide advanced experience to the student in the management of neurosurgical problems. The student is assigned
to the neurosurgical service at the University hospital for four weeks. Students will participate with the surgical team in daily rounds, diagnosis, out-patient experience, operative experience and post-operative management of neurosurgical patients. Emphasis is placed on an understanding of neurologic disease with special emphasis in physical exam and dia gnosis, management of basic neurosurgical emergencies and management of common neurosurgical problems. Accommodates three students in Modules I-XII. Prerequisite: SURG 900 and MED 900. LEC.

SURG 910. Surgery Subinternship-Urology. 4 Hours. This course is designed to provide advanced experience to the student in the diagnosis and management of genitourinary disease. The student is assigned to the Urology Service at KUMC or the VA Hospital for 4 weeks. Students are expected to participate with the urologic patients. It is expected that the student will participate, as possible, at a resident level of responsibility. Ward rounds, clinical conference, seminars and case studies supplement clinical experience. The student participates directly in patient care on the ward, in the out-patient department, and in the operating room. Emphasis is placed on an understanding of alterations in physiology, secondary to pathology of the genitourinary tract, and diseases amenable to surgical or medical treatment. The student is expected to become familiar with the diagnostic procedures and techniques used in evaluating patients with acute and chronic genitourinary problems (i.e. cystoscopy). The out-patient experience is particularly emphasized. By the end of the clerkship, the student should be able to describe risk factors, epidemiology, etiology, diagnosis, management strategy, prognosis, including sequelae, and preventive measures for common urologic problems. We can accommodate two students at KUMC and two students at VAH. This will be offered in Modules I-XII. Prerequisite: SURG 900 and MED 900. FLD.

SURG 915. Subinternship-Orthopaedic Surgery. 4 Hours. This subinternship is designed to allow the student to participate in orthopedic clinical care. The student is assigned to the orthopedic surgical service at KUMC for four weeks. The student participates with the orthopedic surgery team in the diagnosis, surgical treatment and postoperative management of orthopedic patients. The student will participate directly in care of patients in the emergency department, operating room, intensive care unit and orthopedic ward. Emphasis is placed on the understanding of pre-op, intra-op and postop care of the orthopedic patient. There is a limit of 4 students per rotation. Prerequisite: Successful completion of basic clinical clerkships. CLN.

Critical Care (4)
The four-week critical care selective presents the knowledge, skills, and attitudes required to care for very ill hospitalized patients. This allows the student to focus on an interest in a particular specialty and ensures that all students have basic knowledge and skills in critical care. Students select one of the following options to fulfill the requirement.

ANES 911. Critical Care: Post-Anesthesia Unit. 4 Hours. The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Post-Anesthesia Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

ERMD 920. Critical Care: Emergency Room. 4 Hours. The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the Emergency Room. Clinical work will be supplemented by conferences and other educational activities. This course is only offered on the Salina campus. CLN.

MED 905. Critical Care: Coronary Care Unit. 4 Hours. The objective of this clerkship is to provide students with experience in the management of critically ill patients with cardiovascular disorders. Students will participate in the diagnosis and treatment of patients at the KUMC or Kansas City Veterans Administration Hospital Coronary Care Unit. Clinical work will be supplemented by conferences, formal and informal lectures and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

MED 912. Critical Care: Medical Intensive Care Unit. 4 Hours. The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC or Kansas City Veterans Administration Medical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

PED 926. Critical Care: Neonatology. 4 Hours. The student will be actively involved in the care and management of the high-risk and acutely ill neonate. Through a clinical participation, tutorial sessions and assigned reading emphasis will be placed on modern neonatal intensive care techniques and developmental physiology and biochemistry. Students may elect additional consecutive four-week periods to pursue aspects of neonatology in more detail, engage in investigative projects or acquire first-hand experience in the operation of a regionalized program for care of high-risk or acutely ill neonates in the state. Students wishing this additional four weeks should contact the Pediatric Department. CLN.

PED 930. Critical Care: Pediatric Intensive Care Unit. 4 Hours. Principles of ongoing assessment and management of critically ill children with single and multiple organ failure will be presented. The teaching format will be formal and informal rounds at the bedside in the KUMC Pediatric ICU by faculty members of the Pediatric Critical Care Division. Integration of history-taking, physical examination skills, and laboratory and radiological assessment with pathophysiology will be emphasized. CLN.

SURG 927. Critical Care: Burn Center. 4 Hours. The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Burn Center. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

SURG 928. Critical Care: Neurosurgical Intensive Care Unit. 4 Hours. The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Neurosurgical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

SURG 929. Critical Care: Surgical Intensive Care Unit. 4 Hours. The objective of this clerkship is to provide students with experience in the management of critically ill patients. Students will participate in the diagnosis and treatment of patients in the KUMC Surgical Intensive Care Unit. Clinical work will be supplemented by conferences and other educational activities. This clerkship fulfills the Critical Care Selective requirement. LEC.

Wichita Clinical Required Courses

Third Year Requirements

FCMD 950. Family Medicine Clerkship. 0-8 Hours.
Students are introduced to the principles and practice of family medicine. They spend the majority of their time participating in the practice of a private family physician where they evaluate patients under direct supervision and recommend management. This practice experience is enhanced by case-based seminars and skills-based workshops with faculty and hospital call with family medicine residents. Evaluation is based on assessment by clinical supervisors, projects, a departmental exam, and the NBME Family Medicine Subject Exam. Prerequisite: Basic Sciences. CLN.

ICM 975. Issues in Clinical Medicine. 0 Hours.
This course is designed to promote the development of professional responsibility and medical ethics. Incorporated into the topics are medical ethical theory, skills of ethical decision making and recognizing personal and professional responsibilities and value identification. The one-hour sessions are held twice a month. All third year medical students are required to attend. Prerequisite: Medical Basic Sciences. LEC.

INMD 975. Internal Medicine Clerkship. 0-8 Hours.
Students are assigned two four-week blocks on university general medicine services. Students are expected to acquire basic clinical skills in medicine: interview and examine patients, complete databases and clinical problem assessments, write progress notes and give bedside presentations on daily rounds, and demonstrate accountability for ward duties and patient data. Rounds with visiting professors, KUSM-W Grand Rounds, and medicine case conferences supplement regularly scheduled tutorial sessions and daily ward rounds. Students receive instruction in basic skills, i.e., ECG, chest X-ray, blood count, body chemistry interpretation. Grades are based on ward work, critical case summaries, and bedside practical exam (both pass/fail), and National Board subject examination scores. Prerequisite: Medical Basic Sciences. CLN.

NROL 950. Neurology Clerkship. 4 Hours.
The required four-week Neurology clerkship is intended to familiarize students with the diagnosis and treatment of major neurological disorders. Effective interviewing and diagnostic skills, and competent performance of the neurological examination are emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. CLN.

OBGN 975. Obstetrics/Gynecology. 0-8 Hours.
During the clinical clerkship the student develops understanding of disease in women through history, physical examination, and laboratory studies. The clerkship includes study of biochemical, anatomical, and physiological changes of normal pregnancy, and the effect of disease in altering the course of reproduction. Prerequisite: Medical Basic Sciences. CLN.

PDRC 975. Pediatrics Clerkship. 0-8 Hours.
The student will spend approximately 60 percent of the time on pediatric wards taking pediatric medical histories, physical examination of children and infants and making ward rounds with attendings and house staff. Approximately 40 percent of the student's time will be spent in ambulatory pediatrics in general specialty clinics and in the offices of practicing pediatricians. Time will be spent in the newborn nursery. Prerequisite: Medical Basic Sciences. CLN.

PSCR 950. Psychiatry Clerkship. 4 Hours.
The required four-week basic Psychiatry Clerkship is intended to familiarize students with the diagnosis and treatment of major psychiatric disorders. Effective interviewing and diagnostic skills, and competent performance of the mental status examination is emphasized. Students have an active closely supervised role in the diagnosis and treatment of both hospitalized and ambulatory patients. Clinical experience is accompanied by a didactic schedule of lectures, seminars, and practical-interactive learning sessions. Prerequisite: Basic Sciences. CLN.

SGRY 975. Surgery Clerkship. 0-8 Hours.
This course offers the student an introduction to the surgical management of disease. Students are assigned to one of the several surgical services, where they participate fully in diagnosis, operation, and management
of patients with a wide range of surgical diseases. Clinical conferences, seminars, ward rounds, and case studies supplement the clinical experience. Students participate directly in patient care on the ward, as well as in the outpatient department and operating room. Emphasis is placed on the understanding of alterations in physiology secondary to trauma, management of fluids and electrolytes, basic elements of pre- and post-operative care, and understanding diseases amenable to surgical treatment. Prerequisite: Medical Basic Sciences. CLN.

Fourth Year Requirements

Rural Preceptorship (4)

A preceptorship of four weeks with a practicing physician in the state of Kansas is required for graduation. Students select one of the following options to fulfill the requirement.

RLMD 976. Rural Preceptorship: Family Medicine. 4 Hours.
The student participates in the practice of a family physician in the state of Kansas. In addition, the student is asked to participate in the life of the rural community and explore the various roles a physician plays in the community. At the end of the Rural Preceptorship, the student will be able to describe the challenges and rewards of rural practice. Evaluation consists of clinical performance as assessed by the rural preceptor, and completion of a small project during the Rural Preceptorship. CLN.

RLMD 977. Rural Medicine in Internal Medicine. 4 Hours.
Rural Medicine in Internal Medicine is a four week clinical rotation during which each student works with a practicing Internal Medicine physician in the state of Kansas. Student will experience a one-to-one teaching/learning relationship in a private office (i.e., non-institutional) setting and will be exposed to both professional and non-professional aspects of the preceptor's family and social life in a non-tertiary care community environment. The student will perform a history and physical examination on each patient and will be responsible for writing daily progress notes on each assigned patient. The student will write orders after reviewing plans with attending physician. The student will also see patients in the emergency room and present them to the attending physician. The student will be involved in all procedures, such as endoscopy and flexible sigmoidoscopy on all assigned patients and other patients if appropriate. The student will be expected to write orders, perform indicated procedures under supervision, and dictate discharge summaries on assigned pediatric care load. The student will write orders, perform indicated procedures under supervision, and dictate discharge summaries on each patient and will be responsible for writing daily progress notes on each assigned patient. The student will formulate diagnostic treatment and educational plans on each patient. The student will write orders after reviewing plans with attending physician. The student will also see patients in the emergency room and present them to the attending physician. The student will be involved in all procedures, such as endoscopy and flexible sigmoidoscopy on all assigned patients and other patients if appropriate. The student will be required to complete a pass/fail reflective assignment questionnaire which must be turned in to the department and reviewed by the course director. Prerequisite: Senior standing and INMD 975. CLN.

RLMD 978. Rural Preceptorship - Pediatrics. 4 Hours.
Rural Medicine in Pediatrics is a four-week clinical rotation during which each student works with a practicing pediatrician in the State of Kansas. Student will experience a one-to-one teaching/learning relationship in a private practice (i.e., non-institutional) setting and will be exposed to both professional and non-professional aspects of the preceptor's family and social life in a community environment. Initially the student will see patients and take calls with the pediatrician. Later in the month, the student will be given some independence seeing patients. The student may write progress notes and learn to dictate discharge summaries. The student will also participate in a number of procedures such as lumbar punctures, umbilical artery catheter insertion, etc. Students may also assist in ambulance transfers from smaller communities. Prerequisite: Senior standing and PDRC 975. CLN.

Subinternships (4)
The four-week subinternship gives medical students an opportunity to become more proficient in a specific area of medicine. They provide a more comprehensive course than that of the third-year required course. Students select one of the following options to fulfill the requirement.

FCMD 998. Subinternship in Family Medicine. 4 Hours.
The student will function as a subintern at one of the three KUSM-W sponsored family medicine residency programs - Via Christi or Wesley in Wichita or Smoky Hill in Salina. Experiences include evaluation of outpatients and inpatients and performance of procedures under direct supervision of residents and faculty. Assignments include in-hospital call and case presentations as directed by the individual residency. Evaluation is based on assessment of clinical performance and case presentations. Prerequisite: FCMD 950. CLN.

INMD 998. Subinternship in Internal Medicine. 4 Hours.
This course is designed to give the student practical experience in the hospital care of general medicine patients and patient care at the intern or R1 level. Students will perform and dictate the initial history and physical, write orders, perform indicated procedures under the supervision of a senior resident and faculty attending, and dictate discharge summaries on patients. Students will take hospital call with the senior resident, attend scheduled rounds and conferences, and function as a member of the patient care team. Prerequisite: Medical Basic Sciences and INMD 975. CLN.

OBGN 998. Subinternship in Obstetrics and Gynecology. 4 Hours.
The student will function as a subintern in multiple clinical environments with supervised but advancing clinical responsibilities that will assist in preparation for internship. Two weeks will be spent the obstetrics units which will include one week of night call. That portion of the rotation includes coverage of emergency / unscheduled cesarean sections and Emergency Department coverage. One week includes surgical experience and floor rounds with the Gynecologic Oncology team. One week is spent in private practice clinic with the program director, chairman or additional faculty members as determined by the department. The student will be evaluated through faculty judgment for general information, and degree of attainment of skills necessary for matriculation into the intern year in Obstetrics and Gynecology residency. It is anticipated the subintern should have achieved competency in the ACGME Level 1 milestones for Obstetrics and Gynecology by the completion of this rotation. Prerequisite: Medical Basic Sciences and OBGN 975. CLN.

PDRC 998. Pediatric Subinternship. 4 Hours.
The student will participate in pediatric case management in a greater comprehensive manner than that of the general pediatric student curriculum. The student will be assigned to a pediatric resident and will participate in the clinical case load of the assigned resident. He/she will be expected to gather and analyze data as pertaining to the assigned pediatric care load. The student will perform physicals and dictate histories on assigned patients where permitted. Case load will be 1-3 patients per day. The student will formulate plan of management with written orders to be reviewed and countersigned by resident and faculty, perform indicated procedures under supervision, and dictate discharge summary of assigned patients where permitted. He/she will take call and attend scheduled rounds, pediatric clinics, and conferences with supervising resident. Evaluation will conform to the clinical assessment utilized for pediatric resident. Assessment of performance will be done jointly by supervising resident and faculty member. Prerequisite: PDRC 975 and senior standing. CLN.
PSCR 998. Subinternship in Psychiatry. 4 Hours.
This course is designed to expand the student’s experience in general psychiatry by having them assume supervised, clinical responsibility equivalent to that of an intern or PGY-1 resident. Students will perform and dictate history and physical examinations, formulate diagnoses and treatment plans, write orders to be reviewed and countersigned, dictate discharge summaries, participate in the evaluation and intervention of psychiatric emergencies, attend scheduled rounds, conferences, and PGY-1 didactics. Prerequisite: PSCR 950, INMD 975, SGRY 975, senior standing. CLN.

SGRY 998. Subinternship in Surgery. 4 Hours.
The student will learn to work up patients with elective surgery, acute surgical abdomen, or GI bleeding, perform fundamental diagnostic and therapeutic procedures, and assist in certain endoscopies. The student will present a patient’s clinical problems in a clear and concise manner. The student will be a part of a surgical team consisting of the attending surgeon and the senior and junior surgical residents. He/she will work up patients with the junior surgical resident and be reviewed by the attending surgeon and senior surgical resident. He/she will make daily rounds with the surgical team, scrub on all surgical procedures on his/her patients, and attend all conferences required of surgical residents (consultant rounds, surgical grand rounds, etc.). He/she will assist in the operation, attend clinics and minor surgery clinics. The student will work up approximately one new patient per day. Evaluation will be based on patient workups, technical skills, rapport with patient, paramedical personnel, and surgical team. Prerequisite: SGRY 975, INMD 975, and senior standing. CLN.

Critical Care (4)
The four-week critical care selective presents the knowledge, skills, and attitudes required to care for very ill hospitalized patients. This allows the student to focus on an interest in a particular specialty and ensures that all students have basic knowledge and skills in critical care. Students select one of the following options to fulfill the requirement.

CCSL 977. Critical Care Selective in Neonatology. 4 Hours.
This course is an overview of neonatal medicine. The student will develop skills and conceptual knowledge of newborns and premature infants. The student will also attend x-ray conferences weekly, literature review, service rounds twice daily, pediatric grand rounds weekly, and neonatal mortality review, as well as care for infants with special emphasis on NIVU, NSCU and Continuing Care Nurseries. Prerequisite: Senior standing. CLN.

CCSL 978. Critical Care Selective in Pulmonary. 4 Hours.
The student will learn the essentials of a comprehensive history, physical exam and interpretation of chest x-rays for the patient with pulmonary disease. The student will also learn the use and basic interpretation of pulmonary function testing, cardiopulmonary exercise testing, plus other laboratory information important to pulmonary disease (sputum assessment, ABG, scanning, pulmonary artery catheterization data, etc.). Emphasis will be focused toward the patient in respiratory failure for diagnosis and ventilator management. Prerequisite: Senior standing. CLN.

CCSL 979. Critical Care Selective in Pediatrics. 4 Hours.
This elective experience has been designed as a one-month rotation in the pediatric intensive care unit at Wesley Medical Center. Care will be provided to critically ill patients from the neonatal period through adolescence. During this rotation the student will receive exposure to many pediatric critical care subjects and will be expected to convey an understanding of those processes during bedside rounds, in lectures, and during actual patient care. The student will participate in the educational endeavors of the critical care service, including lectures to other students and allied critical care staff such as nurses and respiratory therapists. The student will be expected to give brief presentations on topics that are identified during patient care. Prerequisite: Senior standing. CLN.

CCSL 980. Critical Care Selective in Burn. 4 Hours.
Student will be provided hands-on experience in burn management and critical care. Student will make daily rounds, assist in surgery, and participate in pre-operative and post-operative care of patients admitted to the burn unit. Student will be supervised by faculty and residents. Prerequisite: Senior standing. CLN.

CCSL 981. Critical Care Selective in Internal Medicine. 4 Hours.
The critical care rotation will aim to provide educational opportunities to acquire knowledge of and to develop clinical competence in the field of critical care medicine. The student will learn interpretation of CXR’s, EKG’s, Lab/Hemodynamic data and ventilator management. The student will participate in daily morning and evening rounds, and observe and be involved in ICU procedures. The student will be exposed to the many ethical issues of critical care illness. Emphasis will be on formulation of differential diagnosis and therapeutic plan. Prerequisite: Senior standing. CLN.

CCSL 983. Critical Care Selective in Trauma. 4 Hours.
The student will learn the care of surgical patients who have experienced blunt and penetrating traumas. Student will be assigned to the trauma service and work with a critical care resident. Student will develop trauma evaluation skills by participating in trauma patient work-ups in the emergency room. Student will assist in surgery and participate in hospital rounds for trauma patients in the Surgical Intensive Care Unit. Student will also develop diagnostic skills in the ambulatory care setting and attend surgical conferences. Prerequisite: Senior standing. CLN.

Postgraduate Training Programs
The KU School of Medicine provides two distinct residency and fellowship programs. Both programs are comprehensive in their training. One
program is at the KU School of Medicine and Medical Center in Kansas City. The second program is at the KU School of Medicine — Wichita.

Kansas City Postgraduate Training Programs (http://www.kumc.edu/school-of-medicine/gme.html)
Wichita Postgraduate Training Programs (http://wichita.kumc.edu/education/graduate-medical-education.html)
Continuing Medical Education (http://kumcce.ku.edu/)
Institute for Community Engagement (http://www.kumc.edu/community-engagement.html)
Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor for details). Other years' catalogs (http://catalog.ku.edu/archives/) are granted with majors in bassoon, double bass, euphonium, flute, French horn, harp, jazz, musicology, music therapy, oboe, organ and church music, percussion, piano, saxophone, theory, composition, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

Bachelor of Arts in Fine Arts in Music (p. 2325)
Bachelor of Fine Arts in Theatre-Voice Program (p. 2327)

Graduate Certificate in Music Performance (p. 2384)

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in the Swarthout Recital Hall (remodeled in 2015), Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Degrees

Undergraduate Degree Programs

The degree of Bachelor of Music is granted with majors in bassoon, clarinet, double bass, euphonium, flute, French horn, harp, jazz, musicology, music therapy, oboe, organ and church music, percussion, piano, saxophone, theory, composition, trombone, trumpet, tuba, viola, violin, violoncello, and voice.

The degree of Bachelor of Arts in Fine Arts is granted with concentrations in applied music (on an instrumental or voice), jazz studies, musicology, and music theory.

The degree of Bachelor of Fine Arts is granted with a major in theatre and voice.
The degree of Bachelor of Music Education is granted with a major in music education.

Requirements for Graduation

Degrees from the School of Music are conferred on candidates who have satisfactorily completed a minimum of 120 credit hours for the B.A., B.M., B.F.A., and B.M.E. degrees, including required subjects. 45 credit hours must be in junior/senior-level courses, numbered 300 and above. A minimum 2.0 grade-point average, both cumulative and in KU courses, is required for graduation. Four (4) hours of the total in each case, except the Music Therapy B.M. and the Music Education B.M.E. degrees, may be in physical education activity courses.

Remedial Courses

Remedial courses listed in the catalog and Schedule of Classes (https://classes.ku.edu/Classes/ExternalDisplay.action) are numbered below 100. Such courses include, but are not limited to, MATH 2. Remedial courses do not count toward graduation in the School of Music and may not be counted as distribution courses or electives.

Graduate Degree Programs

The School of Music offers these degree programs:

Master of Music

- Composition
- Conducting
- Musicology
- Music theory
- Performance

Master of Music Education

- Music education
- Music therapy

Doctor of Musical Arts

- Composition
- Conducting
- Performance

Doctor of Philosophy

- Music with an emphasis in musicology or music theory
- Music Education with a concentration in music education or music therapy

The Kansas Board of Regents (http://www.kansasregents.org) has designated KU as the sole institution in the Regents system authorized to grant doctoral degrees in music.

Contact the school (http://music.ku.edu/) for specific admission requirements. See also Admission in the Graduate Studies section of the online catalog.

View the list of School of Music academic programs (p. 2282).

Facilities

Murphy Hall

Murphy Hall, named for former KU Chancellor Franklin D. Murphy, houses the School of Music (http://music.ku.edu/). It is a 5-level facility with offices for faculty members in applied music, music theory and composition, musicology, opera, music education, music therapy, and ensembles. Designed for music and theater, it contains 4 performance areas.

- Crafton-Preyer Theater provides a venue for plays, operas, musical theater shows, and concerts. It is a fully equipped, 1,188-seat proscenium stage facility.
- William Inge Memorial Theater is an intimate black-box facility with seating for up to 125, suitable for plays and small opera productions.
- Swarthout Recital Hall, a 340-seat facility with exceptional acoustics, is dedicated to faculty and student solo and chamber music presentations and occasional opera productions. Swarthout Recital Hall has been fully remodeled and re-opens to public performances in April, 2015.
- The Baustian Theater, a black-box facility for opera and musical theater productions, seats 125 and has a dressing room and wardrobe area, set construction and storage area, and office and performance control areas.

Murphy Hall also houses classrooms, practice rooms, rehearsal halls, and storage facilities for instruments and sheet music. The Electronic Music Studio contains a digital workstation for the recording and production of electronic music and video.

The Kansas Center for Music Technology in Murphy Hall promotes the development and application of current technologies in music instruction, research, and creative projects. Its Computer Center contains 32 fully networked multimedia workstations. KCMT has a library of commercially available software for evaluation, experimentation, and integration into existing courses. The lab also contains 3 high-end workstations for professional-quality digital audio, digital video, and DVD authoring. The library includes basic productivity and Internet software; music notation and sequencing, ear-training, CD-ROMs, and drill design software; and digital editing software for audio, video, multimedia, and Web authoring. Through workshops and music technology courses, KCMT helps faculty members and students develop innovative new software.

The Thomas Gorton Music and Dance Library in Murphy Hall houses more than 111,000 books, scores, sound recordings, videos, microforms, and serials, and has the leading music collection in the Great Plains. It features digital workstations; study carrels; comfortable seating; and public display of new acquisitions, current periodicals, and special exhibitions. Students can make full use of music and dance information resources. The Joe and Joyce Hale Media System allows remote listening and viewing from 30 locations in the library, including 328 media carrels, the seminar room, and the group study room. Media carrels have remote controls, MIDI music keyboards, mini-disk recorders, computers, and video monitors.

The Music Education and Music Therapy Complex in Murphy Hall contains a model music education classroom, a general music instruction classroom, large and small music therapy clinical spaces, three research spaces (Human Learning Lab, Music Behavior Observation Lab, and Perception & Cognition Lab), faculty offices, and the MMT Computer Lab. In addition, the complex houses a Vocology Laboratory, which affords excellent resources for research-based understanding of singing voice phenomena. The stationary lab facilitates acquisition and analysis of voice data in a controlled environment. It also provides mobile configurations of resources for field-based research and pedagogy in voice studios, choir rehearsal areas, classrooms, and music therapy clinics. Interactive distance delivery of specific music education and music...
therapy graduate courses are taught on campus and anywhere in the world.

**Lied Center**

The Lied Center of Kansas (http://www.lied.ku.edu/) is a 2,020-seat performing arts hall. On KU’s west campus at Irving Hill Road and Constant Avenue, it is the venue for the Lied Center Series. It also presents School of Music (http://music.ku.edu/) productions, Student Union Activities (https://rockchalkcentral.ku.edu/?ql=Student_9347) shows, and university and community events. The performing arts hall offers excellent acoustic quality and technical production capabilities. The stage features a 56-foot-wide prosenium opening, resilient wood floor, counterweighted rigging system, and ample wing space. There is a full complement of backstage support areas including seven dressing rooms, dance rehearsal studio, two warm-up rooms, a Greenroom, and a production office.

The Dane and Polly Bales Organ Recital Hall is acoustically designed for the teaching and performance of organ music. It has seating for 200 and is attached to the Lied Center main lobbies at two levels. It houses a 45-stop mechanical key-action (electric stop-action) organ built by Hellmuth Wolff et Associés, one of the finest builders of organs in the world. The hall is available to organ students for practice, lessons, and recitals. Its aesthetics are enhanced by three magnificent stained glass windows designed by Peter Thompson, former dean of Fine Arts.

**Undergraduate Programs**

The school acquaints undergraduates with music as an important field of a liberal culture, either as members of a discriminating public or as trained practitioners. It prepares students for careers in music and promotes scholarship and research. It offers curricula for teachers of music in public schools and institutions of higher education and special degree curricula for training music therapists.

View the list of School of Music academic programs (p. 2282).

**Applied Music Lessons**

All majors and nonmajors (as space permits) who wish to take lessons must first pass an audition. All music majors enroll in 121-level applied music courses until they have accumulated 4 credits (6 credits for performance majors) at which time they may enroll in the 221 level. Music majors who are not performance majors must accumulate 8 applied music credits before enrolling in the 321 level and 12 applied music credits before enrolling in the 421 level (or 422 level for the B.M.E.). Performance majors must accumulate 12 credits at the 121 and 221 levels before they enroll in 622 level.

Music majors pursuing the performance degrees, B.M. and B.F.A., are required to enroll in 3 credits of lessons to receive 50-minutes per week of studio instruction. Music majors pursuing the Music Education B.M.E., Music B.A. degree and the following B.M. degrees: Music Composition, Music Theory, Musicology and Music Therapy are required to enroll in 2 credits of lessons to receive 50-minutes per week of studio instruction. Music minors, non-music majors and students in music with a secondary area may enroll in 1 credit of lessons to receive 30-minutes per week of studio instruction. See degrees listed on the Programs page for specific credit-hour and recital requirements. The summer session limit on all music major lessons is 1 to 3 credit hours.

Students may state their preferences as to teachers for private lessons, but final authority rests with the director of the division. The minimum acceptable grade to remain in applied music lessons is a B-. A grade of B- or higher must be earned in each semester of lessons.

**Courses for Nonmajors and Music minors**

Students in other KU schools may enroll in music courses for credit, subject to the availability of instructional time and as space permits. The Business of Music (MUS 586), most musicology courses and all ensembles are open to all KU students.

Students in the College of Liberal Arts and Sciences not majoring in music may elect an appropriate introductory course (MUS 586, MUSC 298, MUSC 305, MUSC 308, MUSC 309, MUSC 310, MUSC 312, MUSC 313, MUSC 336, MUSC 560 or MUSC 650). Minors in music are offered for students in other disciplines. Most degree programs accept up to 6 hours of electives in music ensembles and performance.

Junior/senior credit in applied music involves a prerequisite of 4 hours of university credit in sequence in the field concerned.

**University Honors Program**

The school encourages qualified students to participate in the University Honors Program (http://www.honors.ku.edu/).

**Ensembles**

The Symphony Orchestra performs works from the standard symphonic repertoire on campus and occasionally on tours. It combines with choral ensembles to present oratorios or other large works and assists in musical theatre productions and opera. In addition, the orchestra reads new orchestral works submitted by KU composers for the George Lawner Prize, an annual adjudicated competition co-sponsored by Music Theory and Composition and the KU Symphony Orchestra.

The Wind Ensemble presents 4 or more concerts annually and tours nationally and internationally. The Symphonic and University Bands perform 2 concerts each semester. The KU Jazz program includes 3 jazz ensembles, 2 jazz choirs, and several combos.

The Marching Jayhawks are part of the pageantry at football games. The Basketball Bands (Men’s and Women’s) and pep bands also perform for sports events.

The Bales Chorale, Chamber Choir, Concert Choir, KU Glee Club, University Singers, and Treble Chorale perform concerts on campus, tour, and participate in combined choral and orchestral presentations such as the annual Holiday Vespers. All KU students are eligible through audition for placement in a choir.

The Collegium Musicum specializes in early music, both vocal and instrumental, using KU’s collection of replicas of early instruments. Helianthus is the performing arm of KU’s New Music Ensemble. Each semester it performs the finest available contemporary chamber music.

Recitals of music by KU student composers are presented each semester by the KU Composers Guild, a student organization. The Kansas Brass Quintet, Kansas Woodwinds, and Kansas String Quartet are faculty groups that present numerous concerts.
Visit the School of Music (http://music.ku.edu/) for current information about recitals, concerts, and performances.

**Graduate Programs**

The School of Music offers Master of Music programs in composition, conducting, musicology, music theory, and areas of performance and Master of Music Education programs in music education or music therapy.

The Doctor of Musical Arts degree is offered in composition, conducting, and areas of performance. We offer the Doctor of Philosophy degree in music education with a concentration in music education or music therapy and the Doctor of Philosophy degree in music with an emphasis in musicology or music theory.

View the list of School of Music academic programs (p. 2282).

The Kansas Board of Regents (http://www.kansasregents.org/) has designated KU as the sole institution in the Regents system authorized to grant doctoral degrees in music.

**Graduate Credit for Nonmajors**

**Performance**

Permission to enroll for graduate credit in applied music is determined by audition. This audition should be scheduled with the major division faculty at the beginning of each semester.

**Music Education or Music Therapy**

Permission to enroll for graduate credit in music education or music therapy is determined by the information in the MEMT Graduate Application Procedure (http://music.ku.edu/programs/memt/prospective/graduate/admissions.shtml) document.

**Ensembles**

The *Symphony Orchestra* performs works from the standard symphonic repertoire on campus. It combines with choral ensembles to present oratorios or other large works and assists in musical theater and opera productions. In addition, the orchestra reads new orchestral works submitted by KU composers for the George Lawner Prize, an annual adjudicated competition co-sponsored by Music Theory and Composition and the KU Symphony Orchestra.

The *Wind Ensemble* presents 4 or more concerts annually and tours nationally and internationally. The *Symphonic* and *University Bands* perform 2 concerts each semester. The award-winning KU *Jazz* program includes 3 jazz ensembles, and several combos.

The *Marching Jayhawks* are part of the pageantry at football games. The *Basketball Bands* (*Men's* and *Women's*) and pep bands also perform for sports events.

The *Bales Chorale*, *Chamber Choir*, *Concert Choir*, *Men's Glee Club*, *University Singers* and *Women's Chorale* perform concerts on campus,

tour, and participate in combined choral and orchestral presentations. All KU students are eligible through audition for placement in a choir.

The *Collegium Musicum* specializes in early music, both vocal and instrumental, using KU’s collection of early instrument replicas. *Helianthus* is the performing arm of KU’s *New Music Ensemble*. Each semester it performs the finest available contemporary chamber music.

Recitals of music by KU student composers are presented each semester by the KU Composers Guild, a student organization. The *Kansas Brass Quintet*, *Kansas Woodwinds*, and *Kansas String Quartet* are faculty groups that present numerous concerts.

Visit the School of Music (http://music.ku.edu/) for current information about recitals, concerts, and performances.

**Undergraduate Advising**

Music students are advised by music faculty members from their major area of study as well as from the School of Music Student Services office. Students in Music Education and Music Therapy are each assigned a specific faculty advisor.

Each entering first-year student is encouraged to attend KU’s summer First-Year Experience Orientation. At the summer orientation program, students are advised on course selection for the fall semester and given the opportunity to enroll.

Each semester before enrollment, students see their advisors to plan schedules and discuss academic and career interests. Students are encouraged to call on their advisors any time during the school year if they wish to change their schedules or discuss other matters. Consultation with an advisor is recommended before making schedule changes.

Music students should direct questions to the School of Music (http://music.ku.edu/) Office of Student Services.

**Graduate Advising**

Graduate advising is handled by the student’s major professor.

**Undergraduate Scholarships**

*Academic Scholarships*, as well as grants, loans, and need-based financial aid, are available through Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/).

*Merit Scholarships in Music* are also available. Audition application and information is available on the school’s website (http://music.ku.edu/applyaudition/).

**Tuition and Fees**

Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu/). Tuition and fees are set by the Board of Regents and are subject to change.

**Graduate Fellowships and Assistantships**

For information about graduate assistantships, contact the School of Music.

Visit the Graduate Studies website for information about funding opportunities for graduate students at KU.
Financial Aid and Scholarships (http://financialaid.ku.edu/) administers grants, loans, and need-based financial aid.

**Tuition and Fees**

Information about KU tuition and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu/). Tuition and fees are set by the Board of Regents and are subject to change.

**Undergraduate University Regulations**

For information about all university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/). A few examples specific to the School of Music are shown below.

**Absences**

The school defines excessive absence as absence in excess of the number of credit hours in the course. A student with excessive absences may be withdrawn from the course by the dean.

**Change of School**

To change from one school to another, the student must submit a Change of School form in the dean's office of the school the student plans to enter. Deadlines are provided on the form.

Admission is competitive. Students must have minimum cumulative grade-point averages of 2.75 on a 4.0 scale from all colleges or universities including KU. Music admission is contingent upon a successful audition. Change-of-school applicants must meet the same requirements as transfer applicants.

**Credit/No Credit**

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (http://policy.ku.edu/).

**Warning:** Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

**Graduation with Distinction and Highest Distinction**

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

**Honor Roll**

Students with grade-point averages of 3.6 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean's list in fall and spring. An Honor Roll notation appears on the transcript.

**Incompletes**

The letter I should not be used when a definite grade can be assigned for the work done. It is not given for the work of a student in any course except to indicate that some part of the work has, for reasons beyond the student's control, not been done, while the rest has been satisfactorily completed. At the time an I is reported on the electronic roster, the character and amount of work needed, as well as the date required for completion and lapse grade if further work is not completed by this date, should be indicated.

If the instructor specifies that repetition of a portion of the classroom work is required, the student may attend classes but should not officially enroll in that course again.

A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student's record.

Extensions to the time limit may be granted by the dean's representative upon submission of a petition from the student containing the endorsement of the course instructor who assigned the I grade, or the department chairperson if the instructor is unavailable. After the I grade is converted to a grade of F or U, the grade may only be changed in accordance with USRR Article II, Section 3 (http://policy.ku.edu/governance/USRR/).

**Maximum and Minimum Semester Enrollment**

The normal maximum enrollment is 20 hours during fall or spring semesters or 9 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean.

**Probation**

Students may be dismissed at any time by the dean for excessive absences or for failure to make satisfactory progress in their studies.

A student not on probation who fails to earn a grade-point average of at least 2.0 in any semester is placed on probation for the following semester.

At the end of the semester in which the student has been on probation, he or she is removed from probation if the grade-point average for the semester is at least 2.0, with a minimum course load of 12 hours and a cumulative grade-point average of 2.0. A student whose course load is fewer than 12 hours or whose cumulative grade-point average is below 2.0 continues on probation even if the semester grade-point average is 2.0 or above.

At the end of the semester in which the student has been on probation, he or she is dismissed for poor scholarship if the grade-point average for the semester is below 2.0.

A student who has been dismissed for poor scholarship is not eligible to enroll again at any time, except with the special permission of the dean. A reinstated student is placed on final probation. If the student fails to achieve a minimum grade-point average of 2.0 for the semester, he or she is dismissed, and readmission is not granted.
Students who take courses at other institutions during the suspension may receive credit for such work only if it meets the approval of the dean.

**Required Work in Residence**

6 of the final 30 hours may be taken for nonresident credit, with advance permission. Nonresident credit may fill only elective requirements not in the major field of study.

**Transfer of Credit**

CredTran (http://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU. Only grades of C or higher are accepted as transfer credit toward degrees.

**Graduate University Regulations**

For information about all university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/). A few examples specific to the School of Music are shown below.

**Absences**

A leave of absence may be granted on request. View the Graduate Studies policy on leaves of absence (http://graduate.ku.edu/policies/).

**Credit/No Credit**

The Credit/No Credit option is authorized, as of spring 2012, for graduate students (USRR Article II, 2.2.7). The full explanation can be found in the KU Policy Library under University Senate Rules and Regulations (http://policy.ku.edu/governance/USRR/).

**Incompletes**

The letters W and I may be given. The letter I indicates incomplete work that may be completed without re-enrollment in the course. The letter W indicates withdrawal for which no credit or grade point is assigned. For more information, see USRR Article II, Section 3 (http://policy.ku.edu/governance/USRR/).

**Maximum and Minimum Semester Enrollment**

The normal maximum enrollment is 16 hours during fall or spring semesters or 6 hours during the summer session. Students may exceed the normal maximum enrollment only with the permission of the dean. International students must comply with the credit requirements for their visa status.

**Probation and Dismissal**

Upon falling below a cumulative graduate grade-point average of B (3.0), computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the Graduate Division of the school or college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If the student's overall graduate average has been raised to B by the end of the next semester of enrollment after being placed on probation, the student may be returned to regular status. If not, the student is not permitted to re-enroll unless the Graduate Division acts favorably on a departmental recommendation for the student to continue study.

For more information regarding Probation and Dismissal, see the Graduate Studies Policy library (http://www.graduate.ku.edu/policies-processes/).

**Required Work in Residence**

For information about the doctoral residence requirement, see the Graduate Studies (p. 2540) section of the online catalog.

**Transfer of Credit**

View the Graduate Studies policy on graduate credit, including transfer credit, in the Graduate Studies section of the online catalog or the KU Policy Library (http://catalog.dept.ku.edu/201314/schools/gs/regulations/#12).

**Courses**

**ACMP 527. Accompanying. 1-4 Hours.**

Individual instruction in vocal and/or instrumental accompanying. Open to junior, senior, and graduate pianists with permission of instructor. IND.

**ACMP 529. Performance Class in Accompanying. 1 Hour.**

A class in the performance of vocal and instrumental accompaniment. Prerequisite: Completion of ACMP 527 or permission of instructor. IND.

**ACMP 727. Accompanying. 1-4 Hours.**

Individual instruction in vocal and/or instrumental accompanying. Prerequisite: Consent of instructor. IND.

**ACMP 811. Advanced Accompanying. 2-4 Hours.**

For graduate students majoring in accompanying. May be repeated for credit. Summer session limit one to three hours. IND.

**ACMP 822. The Accompanist's Literature. 3 Hours.**

A course in which major vocal and instrumental works are studied with vocal or instrumental participants. LEC.

**Courses**

**BAND 202. Wind Ensemble. 0-1 Hours.**

Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

**BAND 204. Symphonic Band. 0-1 Hours.**

For freshmen and sophomores. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

**BAND 206. University Band. 0-1 Hours.**

For freshmen and sophomores. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

**BAND 209. Basketball Band. 0-1 Hours.**

Men's and Women's Basketball Bands. Placement by audition. Prerequisite: Participation/enrollment in the Marching Jayhawks, BAND 210/410. ACT.
BAND 210. University Marching Band. 0-1 Hours.
For freshmen and sophomores. Open to all qualified University students, regardless of major. Public performances include presentation of maneuvers and pageantry at all home football games as well as several trips each season. Three two-hour rehearsals per week. Offered fall semester only. Membership by audition. May be repeated for credit. ACT.

BAND 301. Workshop in:_____. 0-3 Hours.
May be repeated for credit. IND.

BAND 402. Wind Ensemble. 0-1 Hours.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

BAND 404. Symphonic Band. 0-1 Hours.
For undergraduate students. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 406. University Band. 0-1 Hours.
For undergraduate students. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard concert band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 409. Basketball Band. 0-1 Hours.
Men's and Women's Basketball Band. Placement by audition. Prerequisite: Participation/enrollment in the Marching Jayhawks, BAND 210/410. ACT.

BAND 410. University Marching Band. 0-1 Hours.
For undergraduate students. Open to all qualified University students regardless of major. Public performances include presentation of marching maneuvers and pageantry at all home football games as well as several trips each season. Membership by audition. May be repeated for credit. ACT.

BAND 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion instruments will be stressed as these resources relate to the arranging of music for marching and pep bands at the secondary level. (Same as MTHC 459.) Prerequisite: MTHC 214. LEC.

BAND 466. Directed Study:_____. 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. IND.

BAND 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large percussion sections, and analysis of wind colors and instrumental combinations found in music of Holst, Vaughan Williams, Grainger, Stravinsky, Hindemith, and C. Williams. (Same as MTHC 559.) Prerequisite: MTHC 214 and MTHC 459. IND.

BAND 602. Wind Ensemble. 0-1 Hours.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

BAND 604. Symphonic Band. 0-1 Hours.
For graduate students. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. LEC.

BAND 630. Band Repertoire. 2 Hours.
A survey of selected band works from the standard repertoire. The works are to be analyzed in terms of style and form, and in terms of the rehearsal and performance problems inherent in the work. Also a study of the standard band repertoire from an educational viewpoint as well as from a programming viewpoint. LEC.

BAND 701. Workshop in:_____. 1-3 Hours.
May be repeated for credit. LEC.

BAND 702. Wind Ensemble. 0-1 Hours.
Study and performance of literature written for wind ensembles using an instrumentation somewhat smaller than the traditional concert band. Literature ranges from early wind and band music to contemporary avant-garde wind ensemble literature. May be repeated for credit. Prerequisite: Audition and permission of instructor. LAB.

BAND 704. Symphonic Band. 0-1 Hours.
For graduate students. Performances include concerts on campus and tours throughout the area. Literature includes wind music, transcriptions, and other standard concert band literature. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 706. University Band. 0-1 Hours.
For Graduate students. This concert organization performs on campus as well as in other area concerts. The band studies and performs music from the standard concert band repertoire. May be repeated for credit. Prerequisite: Permission of director. ACT.

BAND 710. University Marching Band. 0-1 Hours.
Open to all qualified University graduate students regardless of major. Public performances include presentation of marching maneuvers and pageantry at all home football games as well as several trips each season. Membership by audition. May be repeated for credit. ACT.

BAND 803. Interpretation of Band Music. 1 Hour.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced band music. In addition to the regular course work, students must participate in one of the university concerts bands, attend all rehearsals each week and play in concerts. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

BAND 866. Directed Study in:_____. 1-3 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. LEC.

Courses

BASN 100. Bassoon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

BASN 101. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to freshmen and sophomores. May be repeated for credit. LAB.

BASN 121. Bassoon. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

BASN 221. Bassoon. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.
BASN 300. Bassoon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

BASN 301. Bassoon Reed Making. 0-1 Hours.
The principles of bassoon reed making, including profiling and shaping of bassoon cane and scraping of bassoon reeds. Open only to juniors and seniors. May be repeated for credit. LAB.

BASN 321. Bassoon. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

BASN 421. Bassoon. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

BASN 622. Bassoon. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

BASN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: BASN 622. LEC.

BASN 711. Bassoon. 1-3 Hours.
For graduate students not majoring in bassoon. Audition required. May be repeated for credit. IND.

BASN 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

BASN 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in BASN 811. IND.

BASN 811. Bassoon. 3-4 Hours.
For graduate students majoring in bassoon. May be repeated for credit. Summer session limit three hours. IND.

BASN 899. Master's Recital. 1 Hour.
Master's Degree Recital. The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: BASN 811. THE.

BASN 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the bassoon during the seventeenth and eighteenth centuries. LEC.

BASN 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

BASN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in bassoon. May be repeated for credit. Summer session limit three hours. IND.

BASN 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

BASN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

BRSS 252. Brass Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 652. Brass Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of large brass ensemble literature. May be repeated for credit. IND.

BRSS 921. Seminar in Performance and Pedagogy: _____. 3 Hours.
Repertoire, performance practice, pedagogical, and stylistic concerns relating to the music for brass instruments throughout their history. Topics will include the physical development of the instruments, their usage as solo, chamber, and large ensemble instruments in both sacred and secular literature, and a survey of historical and modern bibliographic materials. May be repeated for credit when topics vary. IND.

CARI 100. Carillon. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CARI 300. Carillon. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CARI 621. Carillon. 1-4 Hours.
Carillon performance. May be repeated for credit. IND.

CARI 711. Carillon. 1-3 Hours.
For graduate students not majoring in carillon. Audition required. May be repeated for credit. IND.

CARI 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

CARI 804. History of Carillon Literature and Design. 3 Hours.
A survey of carillon literature and design. Prerequisite: Permission of instructor. LEC.

CARI 820. Studio Class in Carillon. 0 Hours.
Studio performance of repertoire for students enrolled in carillon. May be repeated . Prerequisite: Permission of instructor. IND.

CARI 899. Master's Recital. 1 Hour.
Master's Degree Recital. The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: CARI 811. THE.
Courses

CHAM 215. University Camerata. 0-1 Hours.
For freshmen and sophomores. Rehearsal and performance of string chamber music repertoire. May be repeated for credit. Prerequisite: Permission of instructor. LEC.

CHAM 216. Chamber Music. 0-1 Hours.
For freshmen and sophomores. The study of works for various combinations of instruments. May be repeated for credit. LAB.

CHAM 220. Baroque Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit. LAB.

CHAM 254. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 320. Baroque Ensemble. 0-1 Hours.
For juniors and seniors. Study and performance of seventeenth and eighteenth century chamber music using replicas of period instruments. May be repeated for credit. LAB.

CHAM 336. Chamber Music. 0-2 Hours.
For juniors and seniors. The study of standard chamber music literature with or without piano. May be repeated for credit. LAB.

CHAM 454. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 615. University Camerata. 0-1 Hours.
For juniors, seniors, and graduate students. Rehearsal and performance of string chamber music repertoire. May be repeated for credit. Prerequisite: Permission of instructor. LEC.

CHAM 654. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 754. New Music Ensemble. 0-2 Hours.
The performance of music in the most recent styles as well as masterworks of the 20th century. May be repeated for credit. Prerequisite: Permission of the instructor. ACT.

CHAM 820. Baroque Ensemble. 0-2 Hours.
Study and performance of seventeenth and eighteenth century chamber music, using replicas of period instruments. Primarily for woodwinds, strings, and keyboards. May be repeated for credit. IND.

CHAM 829. Advanced Chamber Music. 0-2 Hours.
A special study of chamber music works, with or without piano, with emphasis on problems of style and interpretation. May be repeated for credit. IND.

CHAM 929. Advanced Chamber Music. 0-2 Hours.
May be repeated for credit. IND.

Courses

CHOR 214. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 216. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 218. KU Glee Club. 0-1 Hours.
A choral ensemble for tenors and basses. The group will study, rehearse, and perform traditional and contemporary choral music for tenors and basses. A formal audition is not required. May be repeated for credit. ACT.

CHOR 220. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 226. KU Treble Choir. 0-1 Hours.
A choral ensemble for treble voices. The group will study, rehearse, and perform traditional and contemporary choral music for treble chorus. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 228. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.

CHOR 242. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For freshmen and sophomores. May be repeated for credit. LAB.

CHOR 254. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 254.) Prerequisite: Permission of instructor. ACT.

CHOR 410. Choral Practicum. 1 Hour.
A choral ensemble directed by student conductors under the supervision of the choral faculty. May be repeated for credit. ACT.

CHOR 414. University Singers. 0-1 Hours.
Open through placement audition. Study and performance of significant choral music from the major periods of music history. For undergraduate students. May be repeated for credit. LAB.

CHOR 416. Concert Choir. 0-1 Hours.
Open through placement audition. Study and public performance of significant choral music from the major periods of music history. For undergraduate students. May be repeated for credit. LAB.

CHOR 418. KU Glee Club. 0-1 Hours.
A choral ensemble for tenors and basses. The group will study, rehearse, and perform traditional and contemporary choral music for tenors and basses. A formal audition is not required. May be repeated for credit. ACT.

CHOR 424. Opera Chorus. 1 Hour.
A chorus for opera or musical theatre productions. Open by audition in conjunction with the theatre department. May be repeated for credit. LAB.

CHOR 442. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For undergraduate students. May be repeated for credit. LAB.

CHOR 446. KU Treble Choir. 0-1 Hours.
A choral ensemble for treble voices. The group will study, rehearse, and perform traditional and contemporary choral music for treble chorus. For undergraduate students. May be repeated for credit. LAB.
CHOR 620. Oread Consort. 0-1 Hours.
A select choral ensemble of 16-20 singers specializing in challenging music of all periods. Open by audition to experienced sight readers and ensemble singers. Concurrent membership in another choir encouraged. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 628. Summer Chorus. 0-1 Hours.
A choral ensemble that meets during the summer term. May be repeated for credit. ACT.

CHOR 630. Choral Repertoire. 2 Hours.
A survey of selected choral repertoire available for the high school choral conductor. Both sacred and secular choral literature from the major periods of music history will be studied and analyzed in terms of the problems therein which may be encountered by high school choral conductors. Fall semester and summer only. May be repeated for credit. Prerequisite: MEMT 246, MEMT 330, MEMT 700, and/or consent of instructor. LEC.

CHOR 642. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. LAB.

CHOR 654. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as MUSC 654.) Prerequisite: Permission of instructor. ACT.

CHOR 701. Workshop in: ____, 0.5-3 Hours.
May be repeated for credit. LEC.

CHOR 714. University Singers. 0-1 Hours.
Open through audition. Study and performance of significant choral music from the major periods of music history. For graduate students. May be repeated for credit. LAB.

CHOR 716. Concert Choir. 0-1 Hours.
Open through audition. Study and public performance of significant choral music from the major periods of music history. For graduate students. May be repeated for credit. LAB.

CHOR 718. KU Glee Club. 0-1 Hours.
A choral ensemble for tenors and basses. The group will study, rehearse, and perform traditional and contemporary choral music for tenors and basses. A formal audition is not required. For Graduate students. May be repeated for credit. ACT.

CHOR 742. Chamber Choir. 0-1 Hours.
Intensive study and public performance of significant choral literature. Membership by audition. For graduate students. May be repeated for credit. LAB.

CHOR 746. KU Treble Choir. 0-1 Hours.
A choral ensemble for treble voices. The group will study, rehearse, and perform traditional and contemporary choral music for treble chorus. For graduate students. May be repeated for credit. LAB.

CHOR 805. Interpretation of Choral Music. 1 Hour.
A study of the essential factors necessary for the understanding and subsequent interpretation of various compositions of advanced choral music. Offered in the summer session only. LEC.

CHOR 820. Orchestral Bowing Techniques for Choral Conductors. 1 Hour.
Stylistic, expressive, and technical considerations essential for making effective bowing decisions. Prerequisite: A course in conducting. LAB.

CHOR 825. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as MERM 825.) LEC.

CHOR 826. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as MERM 826.) LEC.

CHOR 827. Children's Voices. 3 Hours.
Scientific approaches to understanding and working with unchanged children's voices. (Same as MERM 827.) LEC.

CHOR 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as MERM 828.) Prerequisite: Permission of instructor. LEC.

CHOR 830. Sacred Choral Repertoire. 2 Hours.
A study of anthems for Lectionary years A, B, and C. For church choir directors and church music majors. May be repeated for credit. Prerequisite: Consent of instructor. LAB.

CHOR 850. Choral Arranging. 2 Hours.
Techniques of arranging for large and small choral groups, with and without accompaniment. Prerequisite: MTHC 253 or consent of instructor. LEC.

CHOR 910. Research Methodologies in Choral Music. 3 Hours.
This course will provide the student with an overview of historical, analytical, qualitative, and quantitative approaches used in the research of choral music and issues related to teaching and conducting in the choral field. LEC.

Courses

CHUR 222. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 320. Church Music Practicum. 0 Hours.
Methods and materials of church music. May be repeated. LAB.

CHUR 422. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 622. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. May be repeated for credit. ACT.

CHUR 722. Bales Chorale. 0-1 Hours.
A choral ensemble directed by student conductors in the Division of Organ and Church Music under the supervision of faculty. For graduate students. May be repeated for credit. ACT.

CHUR 801. Church Music Seminar I. 3 Hours.
History of Jewish music; history of church music and the thought about church music through the Middle Ages. LEC.
CHUR 802. Church Music Seminar II. 3 Hours.
History of church music and the thought about church music from the period of the Renaissance/Reformations through the Baroque era with special emphasis on hymnology, and anthem literature. LEC.

CHUR 803. Church Music Seminar III. 3 Hours.
History of church music and the thought about church music from the 19th century to the present with special emphasis on hymnology, and anthem literature. LEC.

CHUR 804. Church Music Seminar IV. 3 Hours.
A survey of sacred choral literature focusing on the development of the motet, the mass, and the cantata. Prerequisite: Permission of instructor. LEC.

CHUR 805. Selected Topics in Church Music: ______. 1-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

CHUR 806. Service Playing and Improvisation I. 3 Hours.
Hymn playing, service playing techniques, anthem accompaniment, conducting from the console and improvisation. Prerequisite: Permission of instructor. LEC.

CHUR 807. Service Playing and Improvisation II. 3 Hours.
Continuation of CHUR 806. Prerequisite: Permission of instructor. LEC.

CHUR 808. History of Liturgy. 3 Hours.
The history of liturgy in Jewish and Christian traditions as well as historical criticism and interpretation of liturgy. LEC.

CHUR 809. The Judeo-Christian Tradition and the Arts. 3 Hours.
Readings, discussion and projects concerning architecture, visual art, literature, drama, poetry, dance, and film as they have developed in the Judeo-Christian tradition. LEC.

CHUR 810. Religion and the Arts. 3 Hours.
Issues in the relationship between religion and the arts. LEC.

CHUR 821. Church Music Colloquium I: Anthem Literature. 1 Hour.
A survey of significant anthem literature. Prerequisite: Permission of instructor. LEC.

CHUR 822. Church Music Colloquium II: Handbells. 1 Hour.
Handbell history, literature, performance, and rehearsal techniques. Prerequisite: Permission of instructor. LEC.

CHUR 823. Church Music Colloquium III: Children’s Choirs. 1 Hour.
A study of the history and literature of children’s choirs, vocal characteristics of children, and rehearsal procedures with the children’s choir. Prerequisite: Permission of instructor. LEC.

CHUR 824. Church Music Colloquium IV: Hymnody. 1 Hour.
A study of the historical development of hymnody. Prerequisite: Permission of instructor. LEC.

CHUR 962. Improvisation. 2 Hours.
Applied study in improvisation at the organ. Prerequisite: Permission of instructor. LEC.

Courses

CLAR 100. Clarinet. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

CLAR 121. Clarinet. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

CLAR 221. Clarinet. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

CLAR 300. Clarinet. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

CLAR 321. Clarinet. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

CLAR 421. Clarinet. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

CLAR 622. Clarinet. 2-4 Hours AE61.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: Corequisite: CHUR 622. LEC.

CLAR 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

CLAR 802. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor in Music). Must be taken in the semester the senior recital is being performed and as required by the degree program. May be repeated for credit. Prerequisite: Corequisite: CHUR 802. LEC.

CLAR 805. Elective Master’s Recital. 1 Hour.
For graduate students not majoring in clarinet. Audition required. May be repeated for credit. IND.

CLAR 806. Clarinet. 1-4 Hours.
May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 12 credits (8 for performance majors). IND.

CLAR 807. Master’s Recital. 1 Hour.
The Master’s recital is the culminating event for the Master of Music degree and must be given before the Master’s Final Oral Exam. Prerequisite: Corequisite: CLAR 806. THE.

CLAR 921. Seminar. 3 Hours.
A study of clarinet repertoire and performance techniques in the 18th and 19th centuries. LEC.

CLAR 922. Seminar. 3 Hours.
A study of clarinet repertoire and performance techniques from 1900 to the present. LEC.

CLAR 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in clarinet. May be repeated for credit. Summer session limit three hours. IND.
CLAR 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

CLAR 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

CLAR 972. D.M.A. Document. 1-4 Hours.
A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

Courses

COND 245. Conducting I. 2 Hours.
An introduction to the principles of conducting through exercises and musical examples designed to develop a specific technical skill. A study of the basic conducting patterns and their application. IND.

COND 345. Conducting II. 2 Hours.
A continuation of COND 245. Prerequisite: COND 245. IND.

COND 711. Choral Conducting I. 1-3 Hours.
Conducting technique, choral musicianship, and choral methods. Prerequisite: MEMT 246, MEMT 330, and/or consent of instructor. RSH.

COND 712. Choral Conducting II. 1-3 Hours.
Continuation of COND 711. RSH.

COND 745. Instrumental Conducting. 2 Hours.
A study of conducting techniques and problems in rehearsal and performance. Score analysis and repertoire development. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 791. Score Reading. 2 Hours.
Development of skills in the reading of all clefs and the most common transpositions. Simultaneous reading of multiple lines and their practical rendition at the piano. May be repeated for credit. RSH.

COND 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

COND 811. Advanced Choral Conducting. 2-4 Hours.
A study of conducting techniques as they pertain to developing an expressive and precise choral ensemble. Participating in rehearsals under the supervision of the instructor. May involve conducting in public performance. May be repeated for credit. Summer session limit one to three hours. Prerequisite: Four hours of conducting and/or consent of instructor. IND.

COND 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicianship. (Same as MEMT 820.) LAB.

COND 821. Advanced Score Reading. 2 Hours.
Development of fluency in reading full scores at the piano. May be repeated for credit. Prerequisite: Two semesters of COND 791 or consent of instructor. RSH.

COND 822. Choral Literature - Late Baroque Era to Classical Era. 3 Hours.
LEC.

COND 823. Choral Literature - Romantic Era. 3 Hours.
LEC.

COND 824. Choral Literature - Contemporary Era. 3 Hours.
LEC.

COND 825. Choral Literature-Renaissance. 3 Hours.
The study of literature from the Renaissance to the Early Baroque period. LEC.

COND 845. Advanced Instrumental Conducting. 3 Hours.
A study of techniques needed to project the conductor's concept in rehearsal and performance. Participating in rehearsals under the supervision of the instructor. May involve conducting in public performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

COND 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: COND 811. THE.

COND 921. Seminar. 3 Hours.
Choral literature from 1450 to 1650. LEC.

COND 931. Seminar. 3 Hours.
Symphonic repertoire. LEC.

COND 932. Seminar. 3 Hours.
Operatic repertoire. LEC.

COND 933. Seminar. 3 Hours.
Solo repertoire with orchestra. LEC.

COND 941. Seminar: Band Literature _____. 3 Hours.
A study of literature for wind band including original works and transcriptions. May be repeated for credit when topic varies. LEC.

COND 961. Directed Performance. 3-4 Hours.
Open only to students who have been admitted to the D.M.A. program in conducting. May be repeated for credit. Summer session limit three hours. IND.

COND 965. Doctoral Recitals. 1 Hour.
Maximum credit, four hours. May be repeated for credit. THE.

COND 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

DBBS 100. Double Bass. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

DBBS 120. Double Bass Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin, and violoncello study. May be repeated. LEC.

DBBS 121. Double Bass. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

DBBS 221. Double Bass. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.
Courses

**EUPH 100. Euphonium. 1-2 Hours.**
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

**EUPH 121. Euphonium. 1-4 Hours.**
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

**EUPH 221. Euphonium. 1-4 Hours.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

**EUPH 300. Euphonium. 1-2 Hours.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

**EUPH 321. Euphonium. 1-2 Hours.**
Applied music lessons for juniors and seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**EUPH 421. Euphonium. 1-2 Hours.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**EUPH 622. Euphonium. 2-4 Hours AE61.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**EUPH 710. Euphonium. 1-3 Hours.**
Applied music lessons for graduate students not majoring in double bass. Audition required. May be repeated for credit. IND.

**EUPH 720. Double Bass Performance Class. 0-1 Hours.**
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

**EUPH 799. Artist Certificate Recital. 1 Hour.**
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

**EUPH 820. Elective Master's Recital. 1 Hour.**
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in EUPH 811. IND.

**EUPH 889. Master's Recital. 1 Hour.**
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: EUPH 811. THE.
Courses

FLUT 100. Flute. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

FLUT 121. Flute. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

FLUT 131. Baroque Flute. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be repeated for credit. IND.

FLUT 221. Flute. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

FLUT 300. Flute. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

FLUT 321. Flute. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

FLUT 331. Baroque Flute. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

FLUT 421. Flute. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

FLUT 422. Flute. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FLUT 622. Flute. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

FLUT 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: FLUT 622. LEC.

FLUT 711. Flute. 1-3 Hours.
For graduate students not majoring in flute. Audition required. May be repeated for credit. IND.

FLUT 731. Baroque Flute. 1-4 Hours.
May be repeated for credit. IND.

FLUT 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

FLUT 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in FLUT 811. IND.

FLUT 811. Flute. 3-4 Hours.
For graduate students majoring in flute. May be repeated for credit. Summer session limit three credits. IND.

FLUT 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: FLUT 811. THE.

FLUT 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque flute and recorder during the seventeenth and eighteenth centuries. LEC.

FLUT 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

FLUT 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in flute. May be repeated for credit. Summer session limit three hours. IND.

FLUT 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

FLUT 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor: RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.
FRHN 422. French Horn. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

FRHN 622. French Horn. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

FRHN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: FRHN 622. LEC.

FRHN 652. Horn Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the horn. May be repeated for credit. IND.

FRHN 711. French Horn. 1-3 Hours.
For graduate students not majoring in French horn. Audition required. May be repeated for credit. IND.

FRHN 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

FRHN 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in FRHN 811. IND.

FRHN 811. French Horn. 3-4 Hours.
For graduate students majoring in French horn. May be repeated for credit. Summer session limit three credits. IND.

FRHN 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: FRHN 811: THE.

FRHN 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in French Horn. May be repeated for credit. Summer session limit three hours. IND.

FRHN 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

FRHN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

GUIT 100. Beginning Group Guitar I. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

GUIT 102. Beginning Group Guitar II. 1 Hour.
A continuation of GUIT 100 or for beginning students with considerable music experience. Emphasis on guitar basics, using easy exercises, etudes, chord structure and scales, sight reading, including lead sheets. IND.

GUIT 120. Intermediate Group Guitar. 2 Hours.
A pedagogical approach to guitar literature of medium difficulty. A survey of standard methods, etudes, and literature through group performance and individual assignments. IND.

GUIT 121. Guitar. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

GUIT 122. Advanced Group Guitar. 2 Hours.
A survey of intermediate and advanced etudes as they apply to the representative and corresponding literature. Advanced technical studies. IND.

GUIT 221. Guitar. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

GUIT 300. Guitar. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

GUIT 321. Guitar. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

GUIT 421. Guitar. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

GUIT 422. Guitar. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performing majors. IND.

GUIT 622. Guitar. 1-4 Hours.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 16 credits at the 121/221 levels. IND.

Courses

HARP 100. Harp. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HARP 120. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 121. Harp. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

HARP 221. Harp. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

HARP 300. Harp. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.
HARP 320. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin (viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 321. Harp. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

HARP 421. Harp. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

HARP 622. Harp. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

HARP 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: HARP 622. LEC.

HARP 711. Harp. 1-4 Hours.
For graduate students not majoring in harp. Audition required. May be repeated for credit. Summer session limit one to three hours. IND.

HARP 720. Harp Performance Class. 1 Hour.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in violin ( viola, etc.) study. For freshman and sophomores (120); juniors and seniors (320); graduate student (720) (as appropriate). May be repeated for credit. LEC.

HARP 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

HARP 811. Harp. 2-4 Hours.
For graduate students majoring in harp. May be repeated for credit. Summer session limit one to three hours. IND.

Courses

HPCD 100. Harpsichord. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

HPCD 300. Harpsichord. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

HPCD 621. Harpsichord. 1-4 Hours.
One or two lessons per week. For graduate students. May be repeated for credit. IND.

HPCD 711. Harpsichord. 1-3 Hours.
For graduate students not majoring in harpsichord. Audition required. May be repeated for credit. IND.

JAZZ 105. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 208. Jazz Ensemble. 0-1 Hours.
For freshmen and sophomores. A performance laboratory specializing in the preparation and presentation of jazz compositions and arrangements. Designed to provide today’s student musician with the background and skills necessary to function successfully as a professional studio musician, or as a teacher of popular jazz music. May be repeated for credit. Prerequisite: Consent of director. ACT.

JAZZ 209. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 212. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. May be repeated for credit. ACT.

JAZZ 224. Jazz Improvisation I. 2 Hours.
Study of techniques involved in jazz improvisation, including application of chord/chord relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 225. Jazz Improvisation II. 2 Hours.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

JAZZ 230. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 305. Jazz Theory. 2 Hours.
An introduction to jazz harmony: Scales, modes, chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines. Prerequisite: MTHC 105 or consent of instructor. ACT.

JAZZ 405. Jazz Theory and Performance I. 3 Hours.
First of four classes covering concepts in jazz improvisation, theory, and performance. Focuses on the basics of melodic line creation, harmonic and melodic dictation (jazz ear training), an introduction to diatonic harmony (up to but not including secondary dominants) and basic major scale analysis (modes and chords.) Prerequisite: MTHC 105 and MTHC 106. ACT.

JAZZ 406. Jazz Theory and Performance II. 3 Hours.
Second of four classes covering intermediate concepts in jazz improvisation, theory, and performance. Focuses on original and traditional melodic line creation, melodic and harmonic embellishment, harmonic and melodic dictation (jazz ear training), and diatonic harmony including secondary dominant, tri-tone substitution and modulation as well.
JAZZ 407. Jazz Theory and Performance III. 3 Hours.
Third of four classes covering concepts in jazz improvisation, theory, and performance. Deals with chord scale theory, synthetic scales (creation, analysis and harmonization), advanced poly-rhythm, transcription (analysis, deconstruction performance and utilization), Coltrane matrix (tritone), and singing/ear training over chord progressions and standards. Prerequisite: JAZZ 406. ACT.

JAZZ 408. Jazz Ensemble. 0-1 Hours.
For undergraduate students. May be repeated for credit. ACT.

JAZZ 409. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 410. Jazz Theory and Performance IV. 3 Hours.
Last of four classes covering advanced concepts in jazz improvisation, theory, and performance. Focuses on the synthesis and integration of materials from the other classes while also dealing with the use of melodic and rhythmic motives, use of space and pacing, group interaction, performance preparation and success, and dealing with performance anxiety. Prerequisite: JAZZ 407. ACT.

JAZZ 412. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For undergraduate students. May be repeated for credit. ACT.

JAZZ 430. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 435. Jazz Pedagogy. 2 Hours.
Information and techniques necessary to teach a full jazz studies curriculum in any settings, including the college level. Special emphasis is placed on the teaching of jazz improvisation/theory. LEC.

JAZZ 459. Jazz Arranging. 2 Hours.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

JAZZ 505. Jazz Theory and Performance I. 3 Hours.
First of four classes covering concepts in jazz improvisation, theory, and performance. Focuses on the basics of melodic line creation, harmonic and melodic dictation (jazz ear training), an introduction to diatonic harmony (up to but not including secondary dominants) and basic major scale analysis (modes and chords.) Prerequisite: MTHC 105. ACT.

JAZZ 506. Jazz Theory and Performance II. 3 Hours.
Second of four classes covering intermediate concepts in jazz improvisation, theory, and performance. Focuses on original and traditional melodic line creation, melodic and harmonic embellishment, harmonic and melodic dictation (jazz ear training), and diatonic harmony including secondary dominant, tri-tone substitution and modulation as well as an in-depth study of the 7 modes of melodic minor. Prerequisite: JAZZ 505. ACT.

JAZZ 605. Jazz Theory and Performance III. 3 Hours.
Third of four classes covering concepts in jazz improvisation, theory, and performance. Deals with chord scale theory, synthetic scales (creation, analysis and harmonization), advanced poly-rhythm, transcription (analysis, deconstruction performance and utilization), Coltrane matrix (tritone), and singing/ear training over chord progressions and standards. Prerequisite: JAZZ 506. ACT.

JAZZ 606. Jazz Theory and Performance IV. 3 Hours.
Last of four classes covering advanced concepts in jazz improvisation, theory, and performance. Focuses on the synthesis and integration of materials from the other classes while also dealing with the use of melodic and rhythmic motives, use of space and pacing, group interaction, performance preparation and success, and dealing with performance anxiety. Prerequisite: JAZZ 605. ACT.

JAZZ 608. Jazz Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. May be repeated for credit. ACT.

JAZZ 609. Jazz Combo. 0-1 Hours.
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

JAZZ 612. Vocal Jazz Ensemble. 0-1 Hours.
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For juniors, seniors, and graduate students. May be repeated for credit. ACT.

JAZZ 622. Studio Instruction. 2-4 Hours.
Studio instruction in jazz with emphasis placed on study and performance in jazz improvisation for juniors and seniors majoring in Jazz Studies BM. May be repeated for credit. Prerequisite: Majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

JAZZ 623. Senior Recital. 1 Hour.
Senior recital in Jazz for undergraduate performance majors pursuing the BM in Jazz Studies. Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: JAZZ 622. IND.

JAZZ 624. Jazz Improvisation I. 2 Hours.
Study of techniques involved in jazz improvisation, including application of chord-scale relationships to basic blues and II-V-I chord progressions; transcriptions of recorded jazz solos; and memorization of jazz standards and patterns. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. LAB.

JAZZ 625. Jazz Improvisation II. 2 Hours.
Study of advanced techniques in jazz improvisation, including third relationships, Coltrane changes, advanced reharmonization and altered pentatonic patterns and scales. Continuation of solo transcriptions, patterns and jazz standard memorization from Jazz Improvisation I. Prerequisite: JAZZ 224 or JAZZ 624 or permission of instructor. ACT.

JAZZ 630. Introduction to Jazz Piano. 2 Hours.
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: JAZZ 105 or JAZZ 305 or permission of instructor. ACT.

JAZZ 635. Jazz Pedagogy. 2 Hours.
Information and techniques necessary to teach a full jazz studies curriculum in any settings, including the college level. Special emphasis is placed on the teaching of jazz improvisation/theory. LEC.

JAZZ 659. Jazz Arranging. 2 Hours.
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections.
Prerequisite: JAZZ 105 or JAZZ 305 and JAZZ 230 or permission of instructor. ACT.

**JAZZ 705. Jazz Theory and Performance I. 3 Hours.**
First of four classes covering concepts in jazz improvisation, theory, and performance. Focuses on the basics of melodic line creation, harmonic and melodic dictation (jazz ear training), an introduction to diatonic harmony (up to but not including secondary dominants) and basic major scale analysis (modes and chords.) ACT.

**JAZZ 706. Jazz Theory and Performance II. 3 Hours.**
Second of four classes covering intermediate concepts in jazz improvisation, theory, and performance. Focuses on original and traditional melodic line creation, melodic and harmonic embellishment, harmonic and melodic dictation (jazz ear training), and diatonic harmony including secondary dominant, tri-tone substitution and modulation as well as an in-depth study of the 7 modes of melodic minor. Prerequisite: JAZZ 705. ACT.

**JAZZ 707. Jazz Theory and Performance III. 3 Hours.**
Third of four classes covering advanced concepts in jazz improvisation, theory, and performance. Deals with chord scale theory, synthetic scales (creation, analysis and harmonization), advanced poly-rhythm, transcription (analysis, deconstruction performance and utilization), Coltrane matrix (tritonic), and singing/ear training over chord progressions and standards. Prerequisite: JAZZ 706. ACT.

**JAZZ 708. Jazz Ensemble. 0-1 Hours.**
For graduate students. May be repeated for credit. ACT.

**JAZZ 709. Jazz Combo. 0-1 Hours.**
Study and performance of music designed for the small jazz combo. Emphasis placed on jazz improvisation, and a survey of a wide variety of styles for this medium. May be repeated for credit. Prerequisite: Permission of director. ACT.

**JAZZ 710. Jazz Theory and Performance IV. 3 Hours.**
Last of four classes covering advanced concepts in jazz improvisation, theory, and performance. Focuses on the synthesis and integration of materials from the other classes while also dealing with the use of melodic and rhythmic motives, use of space and pacing, group interaction, performance preparation and success, and dealing with performance anxiety. Prerequisite: JAZZ 707. ACT.

**JAZZ 712. Vocal Jazz Ensemble. 0-1 Hours.**
Study and performance of vocal jazz compositions and arrangements with emphasis on vocal jazz improvisation. Membership by audition. For graduate students. May be repeated for credit. ACT.

**JAZZ 730. Introduction to Jazz Piano. 2 Hours.**
Study of common jazz piano chord voicings, including two hand block chordal voicings and left hand-only voicings. Prerequisite: Permission of instructor. ACT.

**JAZZ 735. Jazz Pedagogy. 2 Hours.**
Information and techniques necessary to teach a full jazz studies curriculum in any settings, including the college level. Special emphasis is placed on the teaching of jazz improvisation/theory. LEC.

**JAZZ 759. Jazz Arranging. 2 Hours.**
Study of techniques and practices involved in arranging for the contemporary jazz ensemble (big band) and jazz combo, including voicings, counterpoint, nomenclature and writing for jazz rhythm sections. Prerequisite: Permission of instructor. ACT.

---

## Courses

**MEMT 111. Class Guitar for Nonmajors. 2 Hours.**
Common chords, major and minor triads and major-minor sevenths, and fundamentals of music notation for guitar. Strumming and rudimentary finger picking. Performance of simple melodies on all six strings from standard notation. May be repeated for credit. IND.

**MEMT 112. Performance Media: ____. 0.5-1 Hours.**
Laboratory class lessons in pedagogy and performance. May be repeated for credit in different specific media. LAB.

**MEMT 113. Performance Media: Brass. 1 Hour.**
Knowledge and skills needed to teach brass instruments in music education settings. LAB.

**MEMT 114. Performance Media: Woodwinds I. 1 Hour.**
Knowledge and skills needed to teach flute and clarinet in music education settings. LAB.

**MEMT 115. Performance Media: Percussion. 1 Hour.**
Knowledge and skills needed to teach and use percussion instruments in music education settings. LAB.

**MEMT 116. Performance Media: Computers, Synthesizers, and Electronics. 1 Hour.**
Knowledge and skills needed to teach and use computers, synthesizers, and electronics. LAB.

**MEMT 117. Performance Media: Voice. 1 Hour.**
Knowledge and skills needed to teach and use voice functionally in music therapy settings. LAB.

**MEMT 118. Performance Media: Strings. 1 Hour.**
Knowledge and skills needed to teach string instruments in music education settings. LAB.

**MEMT 119. Performance Media: Guitar. 1 Hour.**
Knowledge and skills needed to teach and use guitar functionally in music education and music therapy settings. LAB.

**MEMT 120. Vocal Performance in English. 0-1 Hours.**
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language. IND.

**MEMT 150. Introduction to Music Therapy. 3 Hours.**
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

**MEMT 160. Principles of Music Education. 1 Hour.**
An overview of the music education field. History, philosophy, curricula, necessary skills and competencies for music educators, and alternative careers in music. LEC.

**MEMT 196. Group Leadership Skills in Music Therapy. 2 Hours.**
Music therapy group leadership skills; leading group singing, playing accompanying instruments, and developing effective delivery skills. Prerequisite: MEMT 150 Introduction to Music Therapy/MEMT 760 Principles of Music Therapy. LEC.

**MEMT 229. Performance Clinic: ____. 1 Hour.**
Designed to provide students with opportunities to sing and play instruments other than their principal instrument in ensembles. Materials chosen for suitability for secondary school ensembles. Techniques for care and maintenance of the voice and instruments. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

**MEMT 230. Performance Clinic: Band. 1 Hour.**
Continued development of the knowledge and skills needed to teach band in music education settings. Prerequisite: MEMT 113 and MEMT 114, or
MEMT 113 and MEMT 115, or MEMT 114 and MEMT 115, or permission of the instructor. LAB.

MEMT 231. Performance Clinic: Choral. 1 Hour.
Continued development of the knowledge and skills needed to teach and use the singing voice in music education and music therapy settings. LAB.

MEMT 232. Performance Clinic: Orchestra. 1 Hour.
Continued development of the knowledge and skills needed to teach string instruments in music education settings. Prerequisite: MEMT 118 or permission of the instructor. LAB.

MEMT 246. Fundamentals of Conducting. 1 Hour.
This course deals with the techniques of the baton, with gestures, signs, and cues as generally used in conducting choral and instrumental organizations. It includes the essentials of conducting techniques in both the choral and instrumental types of ensemble performance. LAB.

MEMT 250. Human Musical Learning and Development. 2 Hours.
Music learning and development from infancy through adulthood. Development of musical perception, cognition, performance skills, attitudes, and affective/aesthetic responses. Use of theoretical, knowledge-based rationale for building music instruction systems. LEC.

MEMT 251. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. Prerequisite: MEMT 250. Corequisite: SPED 326. LEC.

MEMT 296. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring/evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 311. Intermediate Class Guitar. 2 Hours.
Instruction in playing barre chords, blues and Latin strums, major and minor scales, position studies, and special effects such as the Travis pick, hammer on, and slurring techniques. Prerequisite: MEMT 116-Guitar; or MEMT 111; or permission of instructor. IND.

MEMT 314. Performance Media: Woodwinds II. 1 Hour.
Knowledge and skills needed to teach saxophone and double reed instruments in music education settings. Prerequisite: MEMT 114 Performance Media: Woodwinds I. LAB.

MEMT 329. Rehearsal/Conducting Clinic: ______. 1 Hour.
Rehearsing and conducting ensembles appropriate for music education and music therapy. May be repeated for credit. Prerequisite: Permission of instructor. LAB.

MEMT 330. Rehearsal/Conducting Clinic: Band. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct band ensembles. Prerequisite: MEMT 230 and MEMT 246 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 331. Rehearsal/Conducting Clinic: Choral. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct choral ensembles. Prerequisite: MEMT 231 and MEMT 246 for Music Education majors or MEMT 231. Corequisite: MEMT 246 for Music Therapy majors or permission of the instructor. LAB.

MEMT 332. Rehearsal/Conducting Clinic: Orchestra. 1 Hour GE22.
Knowledge and skills needed to rehearse and conduct orchestral ensembles. Prerequisite: MEMT 232 and MEMT 246, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 338. Rehearsal/Conducting Clinic: Non-traditional Ensemble. 1 Hour.
Rehearsing and conducting non-traditional/ORFF ensemble appropriate for music education and music therapy. Prerequisite: Admission to the MEMT Professional Sequence or permission of the instructor. LAB.

MEMT 341. Instructional Strategies in Music for Elementary Classroom Teachers. 2 Hours.
Child growth and development in music. Materials as they relate to a sequential music education curriculum in the elementary school. Prerequisite: Admission to the School of Education or the education division of the graduate school. LEC.

MEMT 349. Advanced Rehearsal/Conducting Clinic: ______. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct ensembles, including attention to more difficult literature with ensembles exhibiting increasing sophistication. May be repeated for credit. Prerequisite: Admission into Music Education Professional Sequence and with permission of the MEMT division. LAB.

MEMT 350. Advanced Rehearsal/Conducting Clinic: Band. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct band ensembles, including attention to more difficult concert band literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 330 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 351. Advanced Rehearsal/Conducting Clinic: Choral. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct choral ensembles, including attention to more difficult choral literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 331 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 352. Advanced Rehearsal/Conducting Clinic: Orchestra. 1 Hour.
Advanced knowledge and skills needed to rehearse and conduct string orchestra ensembles, including attention to more difficult string orchestra literature with ensembles exhibiting increasing sophistication. Prerequisite: MEMT 332 and admission into Music Education Professional Sequence; or with permission of the MEMT division. LAB.

MEMT 366. Introduction to Research in Music Therapy and Music Education. 2 Hours.
Investigative techniques in music therapy and music education with emphasis on small group and case study design and analysis. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

Theories and techniques for managing the music classroom and clinic setting for best professional practice. Understanding the self and environment as management factors. Field practice of management techniques. Prerequisite: MEMT 250 and admission into the Music Education Professional Sequence or Music Therapy Professional Sequence; or with permission from the MEMT Division. LEC.

MEMT 396. Clinical Practicum. 1-3 Hours.
Supervised clinical practice in on-campus or other approved setting. May be repeated for credit. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. FLD.

MEMT 407. The Exceptional Child in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of exceptional children and youth into music classroom settings. Prerequisite: MEMT 367, SPED 326, and admission into the
Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 408. Vocal Pedagogy. 1 Hour.
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as VOIC 408.) Prerequisite: MEMT 160, MEMT 231, MEMT 331 and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission from the MEMT division. LEC.

MEMT 419. PreK-12 Music Curriculum. 1 Hour.
The design of PreK-12 general music curriculum that includes a statement of philosophy, a scope and sequence, music literature, a variety of methodologies, and technology integration for use in public school teaching. Prerequisite: MEMT 367 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 420. Teaching Elementary and Secondary General Music. 3 Hours.
Methods and materials for teaching music through singing, playing instruments, moving, listening, and creative activities to students in early childhood through adulthood, including those with disabilities. The course will also deal with music in diverse cultures and integrating music into the general curriculum. Prerequisite: MEMT 367 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 421. Advanced General Music Teaching. 1 Hour.
Enhanced methodology and pedagogy course for the general music classroom; advanced instruction in teaching children to improvise, sing, play classroom instruments, listen, move, and create music based on specific pedagogies; advanced instruction in assessment strategies. This course is for undergraduate music majors in their senior year. Prerequisite: MEMT 420 and admission to the Music Education Professional Sequence. LEC.

MEMT 431. Choral Diction for Music Educators. 1 Hour.
Knowledge and skills needed to teach choral diction in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 432. Approaches to String Pedagogy. 1 Hour.
An examination of the concepts and skills associated with the most influential past and current pedagogical approaches to string education. Prerequisite: Admission to the Music Education Professional Sequence. LEC.

MEMT 433. Jazz Techniques. 0-1 Hours.
Knowledge and skills needed to teach jazz techniques in music education settings. Prerequisite: Admission into the Music Education Professional Sequence. LEC.

MEMT 435. Marching Band Techniques. 1 Hour.
Knowledge and skills needed to teach and administer marching bands in music education settings. Prerequisite: Admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 450. Teaching Choral Music. 2 Hours.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for choral music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 331, MEMT 420, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 451. Teaching Instrumental Music. 2 Hours.
Application of research-based skills for curriculum development, content selection, and development of teaching strategies for instrumental music programs to students in early childhood through adulthood including those with disabilities. Prerequisite: MEMT 330, MEMT 420, and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 454. Psychological Foundations of Musical Behavior II. 2 Hours.
Laboratory and field research in psychology of music. Prerequisite: MEMT 453 or concurrent enrollment. LEC.

MEMT 455. Psychology of Music. 3 Hours.
Psychological bases of music and human musical behavior. Study of musical sound perception, cognition, response, reproduction, and creation. Room Acoustics are studied. Research projects required. Prerequisite: MEMT 367, MEMT 420 (music education majors); and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 463. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division. LEC.

MEMT 464. Music in Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division. LEC.

MEMT 472. Music Education and Music Therapy Research Project. 1-3 Hours.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, and permission of instructor. IND.

MEMT 473. Psychology of Music. 2 Hours.
Laboratory and field research in psychology of music. Prerequisite: MEMT 367, MEMT 420 (music education majors); and admission into the Music Education Professional Sequence or the Music Therapy Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 474. Music Education and Music Therapy Research Project. 1-3 Hours.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, and permission of instructor. IND.

MEMT 475. Research Methods in Music Education. 3 Hours.
Research design and evaluation, ethics, and standards of clinical practice. Prerequisite: Recommendation of advisor and consent of instructor. IND.

MEMT 496. Clinical, Laboratory, Field, or Historical Research in Music Education. 1-3 Hours.
A supervised research experience leading to the completion of the Music Education Professional Sequence or the Music Therapy Professional Sequence. May be repeated for credit. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission of the MEMT division. IND.

MEMT 499. Internship in Teaching Music. 4-8 Hours AE61.
A supervised internship experience leading to initial music teacher certification. The student assumes the total professional role as a teacher
of music in an approved school setting with level and subject area to be the remaining area not experienced in MEMT 498. This experience is a minimum of eleven weeks full time experience. Prerequisite: Admission into the Music Education Professional Sequence and either completion of or concurrent enrollment with MEMT 498. INT.

MEMT 500. Student Teaching in: ____. 1-6 Hours.
A supervised teaching experience in an approved school setting, with level and subject area to be selected according to the teaching field. May be repeated for credit. Prerequisite: Admission to the Student Teaching Program. INT.

MEMT 586. Seminar in Music Therapy Professional Development I. 1 Hour.
This seminar style course will focus on Internship Placement, Board Certification, and Professional Advocacy. Undergraduate Prerequisite: MEMT 463 and MEMT 464. Graduate Corequisite: MEMT 763 and MEMT 764. LEC.

MEMT 587. Seminar in Music Therapy Professional Development II. 1 Hour.
This seminar style course will focus on supervision, Ethics, and Professional Involvement in AMTA. Prerequisite: MEMT 586. LEC.

Successful completion of six months of full-time clinical experience (minimum of 1,040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level. INT.

MEMT 597. Individual Study in: _____. 1-15 Hours.
Successful completion of six months of full time clinical experience (minimum of 1040 hours) as a music therapy intern in an approved setting. May be repeated for credit. Prerequisite: Completion of senior year in music therapy or its equivalent at the graduate level. INT.

MEMT 598. Special Course: ____. 1-5 Hours.
A special course of study to meet current needs of education students -- primarily for undergraduates. May be repeated for credit. LEC.

MEMT 616. Advanced Pedagogy and Materials: ____. 1 Hour.
(FS) Techniques and materials appropriate for instruction in musical media. May be repeated for credit in different specific media. LEC.

MEMT 651. Sociocultural Influences on Musical Behavior. 3 Hours.
Cultural and social determinants of musical behavior. Musical value systems in contemporary cultures. Prerequisite: MTHC 214 or MEMT 341 or permission of instructor. LEC.

MEMT 670. Acoustics of Music. 3 Hours.
Study of physical aspects of sound, stressing the production, reproduction, transmission, and reception of musical sounds. Acoustics of musical instruments and auditoria, systems of tuning, wave phenomena in musical environments, behavior of the ear, and electrical analysis, synthesis, and recording are included. Laboratory. LEC.

MEMT 695. Developing Theoretical Framework for Evidence-Based Practice. 3 Hours.
The purpose of this course is to provide music therapy majors with the tools to read, evaluate, understand, and facilitate research in order to develop a theoretical framework for decision making in evidence based clinical practice. Prerequisite: MEMT 464 Music in Therapy or MEMT 764 Music in Therapy and admission to the Music Therapy Professional Sequence. LEC.

MEMT 707. Mainstreaming/Inclusion in Music Education. 2 Hours.
Skills and knowledge needed to facilitate appropriate and productive integration of children and youth with disabilities into music classroom settings. Designed specifically for graduate students enrolled in the Graduate Licensure Program, or for those not already in possession of PK-12 Music Teacher Licensure. Prerequisite: SPED 326 and admission into the Music Education Professional Sequence; or with permission of the MEMT division. LEC.

MEMT 710. Professional Development. 1 Hour.
Participation in approved professional development conferences. Requires documentation of attendance, an annotated time log of activities, and a short paper. May be repeated for up to 3 credit hours. FLD.

MEMT 711. Emerging Technologies for Choral Teaching and Learning. 2-3 Hours.
Applications of current digital and electronic technologies to choral ensemble teaching and learning. LEC.

MEMT 713. Advanced Brass Techniques. 1.5 Hour.
Advanced instruction of brass-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 714. Advanced Woodwind Techniques. 1.5 Hour.
Advanced instruction of woodwind-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 715. Advanced Percussion Techniques. 1.5 Hour.
Advanced instruction of percussion-specific methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 717. Advanced Low-String Techniques. 1.5 Hour.
Offers advanced methodologies, strategies, approaches, and materials specific to cello and bass instruction for the music education practitioner teaching in instrumental settings or clinical environments. LEC.

MEMT 718. Advanced High-String Techniques. 1.5 Hour.
Offers advanced methodologies, strategies, approaches, and materials specific to violin and viola instruction for the music education practitioner teaching in instrumental settings or clinical environments. LEC.

MEMT 735. Marching Band Technique. 1.5 Hour.
Offers advanced instruction of the methodologies, strategies, approaches, and materials to music education practitioners teaching in instrumental settings or clinical environments. LEC.

MEMT 750. Measurement in Music Education Professional Practice. 3 Hours.
Skills and knowledge needed by professional music educators to assess and evaluate students, learning, instruction, curriculum, and programs. Measurement and evaluation techniques for cognitive, affective, and psychomotor learning in music. Criterion and norm reference measures in formative and summative evaluation. Use of evaluation data for improving instruction, curriculum, and program. Standardized tests. Reporting and interpreting evaluation results. LEC.

MEMT 753. Psychology of Music. 3 Hours.
Psychological bases of music and human musical behavior. Study of musical sound perception, cognition, response, reproduction and creation. Room acoustics are studied. Research projects required. LEC.

MEMT 755. Psychology of Music for the Music Education Practitioner. 3 Hours.
Examines psychological aspects of music and human musical behavior as they pertain to music instruction. Study of musical development, motivation, practice, performance anxiety, and the acquisition of musical skill. LEC.
MEMT 760. Principles of Music Therapy. 3 Hours.
An overview of the music therapy profession including, but not limited to, history, philosophy, areas of clinical practice, necessary skills and competencies, and career opportunities. LEC.

MEMT 761. Clinical Techniques for Children. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for children in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 762. Clinical Techniques for Adults. 3 Hours.
Music therapy treatment techniques (setting goals, selecting/applying treatment, monitoring, evaluating results) for adults in a variety of settings. Clinical observation and application of techniques will be course components. FLD.

MEMT 763. The Influence of Music on Behavior I. 3 Hours.
A study of the various effects of music. The place of functional music in music education. Investigation of effective media and musical patterns. The relation of music to health. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 764. Music in Therapy. 3 Hours.
Issues examined include music therapy concepts in the development of program applications, professional marketing, and job proposals. These applications are based on theoretical constructs concerning the physiological, psychological, and social responses of persons to music. In addition, this course includes current trends in the field along with regulatory guidelines concerning practice design, implementation, and evaluation, ethics, and standards of clinical practice. Prerequisite: Admission to the professional sequence in music education or music therapy or with permission from the MEMT division. LEC.

MEMT 772. Music Education and Music Therapy Research Project. 1-3 Hours.
Clinical, laboratory, field, or historical research in music education or music therapy. May be repeated for credit. Prerequisite: MEMT 366 or equivalent, permission of instructor. IND.

MEMT 780. Internship in Teaching Music: _____ 1-15 Hours.
A supervised internship experience leading to initial music teacher certification. The student assumes the total professional role as a teacher of music in an approved school setting. INT.

MEMT 791. Music Education/Music Therapy Techniques: _____. 1-3 Hours.
Specific methodologies, strategies, approaches, and materials for music education/music therapy for specific populations, musical media, instructional settings, or clinical environments. May be repeated for credit. LEC.

MEMT 798. Special Course: _____. 1-5 Hours.
A special course of study to meet current needs of education professionals -- primarily for graduate students. May be repeated for credit. LEC.

MEMT 812. Research in Music Education and Music Therapy. 3 Hours.
Study of research in music education and music therapy. Required of all candidates for graduate degrees. Enrollment must precede or be concurrent with enrollment in thesis. LEC.

MEMT 813. History and Philosophy of Music Education. 3 Hours.
A study of music education with reference to its historical development and to educational psychology. Consideration of recent trends and the place of music in the school curriculum. Criteria for the evaluation of activities, courses, materials, and methods in a well-balanced program of music. LEC.

MEMT 814. Sociology of Music. 3 Hours.
A study of societal influence on musical thought and practice, both in historical perspective and in comparative study of contemporary societies. The relations between school and community music. The role of musical organizations, institutions, and agencies in American life. LEC.

MEMT 815. Musical Values and Aesthetics. 3 Hours.
Examination of musical values in the context of music's functions and uses. Diverse viewpoints are considered, with attention to philosophical and psychological aesthetics. Implications and applications of values systems for music education, music therapy, and other fields. LEC.

MEMT 816. Current Trends in Music Education. 3 Hours.
A comprehensive study of the elements that contribute to current practice and successful music programs (many of all of these may be anticipated dependent upon the class participants' needs): curriculum, standards, assessment, classroom management, pedagogy, leadership, organizational structure, budget and finance, scheduling, federal mandates, and administrative practices. LEC.

MEMT 817. Methodologies in Music Education. 3 Hours.
A survey of music methodologies (general, vocal, instrumental) used by teachers at the pre-school, elementary, middle/junior high, and high school levels. LEC.

MEMT 818. Behavior Management in Music. 3 Hours.
A study of behavioral theories and techniques as applied to classroom and clinical settings for music professionals. Emphasis on a conceptual framework for human behavior and the ameliorative aspects of music. LEC.

MEMT 819. Music in Early Childhood. 2 Hours.
Child development as related to musical development, including implications for participation in music from birth through age seven. Current trends in goals, objectives, materials, equipment, facilities, training and evaluation will be discussed. LEC.

MEMT 820. Advanced Choral Conducting and Rehearsal Techniques. 3 Hours.
Refinement of conducting and teaching skills in a choral setting. Focus on relationships between gesture and choral sound, rehearsal structure and optimal learning, and age-appropriate choral literature and development of musicality. (Same as COND 820.) LAB.

MEMT 821. 20th Century School Band & Orchestra. 3 Hours.
Examines instrumental music in the public school as a uniquely American phenomenon. A period-by-period approach to its development is taken, beginning with various precursors. LEC.

MEMT 822. Seminar in: _____. 1-3 Hours.
May be repeated for credit. LEC.

MEMT 823. Choral Diction. 3 Hours.
Study of methods to teach and learn diction in choral music contexts. Attention to International Phonetic Alphabet, acoustic implications of particular phonemes, and contributions of emerging technologies. Application of various languages, including English, Latin, Italian, French, German, and Spanish. (Same as CHOR 825.) LEC.

MEMT 824. Adolescent Changing Voices. 3 Hours.
Scientific approaches to the pedagogy of adolescent male and female voices during voice change. (Same as CHOR 826.) LEC.

MEMT 825. Children's Voices. 3 Hours.
Scientific approaches to understanding and working with unchanged children's voices. (Same as CHOR 827.) LEC.
MEMT 828. Science-based Voice Education. 3-6 Hours.
Comprehensive examination of vocal anatomy, respiration, phonation, resonance, articulation, and voice development, with particular attention to research-based vocal/choral pedagogies for working with child through senior adult voices. (Same as CHOR 828.) Prerequisite: Permission of instructor. LEC.

MEMT 830. Leadership and Program Development in Music Education. 2-3 Hours.
A comprehensive study of the elements of management, leadership, organizational structure, budget and finance, federal mandates, and administrative practices. LEC.

MEMT 835. Practical Applications of Advanced Methodology in the Music Classroom. 2-3 Hours.
A comprehensive study and application of the elements that contribute to current practice in methodology and pedagogy in the music classroom, encompassing elementary general, choral, orchestral, and band music. LEC.

MEMT 838. Orff Applications in Music Education and Music Therapy. 2 Hours.
The use of the Orff-Shulwerk approach in music education and music therapy. Course includes historical background, philosophical approach and practical application of the process. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 840. Development and Application of Improvisation Skills. 2-3 Hours.
Development of individual and group improvisation skills and their applications in professional practice. LEC.

MEMT 845. Curriculum Development in Music Education. 3 Hours.
Developing a practical and useful music curriculum that aligns theoretical/philosophical position, program goals, course objectives, instructional materials, learning activities, and assessments. LEC.

MEMT 850. Measurement of Musical Behavior. 3 Hours.
Measurement theory applied to the development and administration of measures of musical ability, achievement, attitude, and performance for the use in individual and program evaluation. Classical and innovative methods for establishing reliability and validity. Each student will develop and evaluate a measure of some type of musical behavior appropriate for an educational or therapeutic setting. LEC.

MEMT 854. Music Therapy in Pediatrics. 2 Hours.
The use of music therapy in individual and group pediatric settings. Course includes an overview of childhood illnesses, associated medical terminology, and therapy techniques used as contextual and procedural support. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 855. Music Therapy in Hospice and Bereavement. 2 Hours.
The use of music therapy for hospice patients and their families, as well as clients who are grieving due to death of a loved one. Course includes historical, theoretical and practical perspectives. Prerequisite: Admission to professional sequence or permission from MEMT division. LEC.

MEMT 856. Neurologic Music Therapy. 2 Hours.
The scientific basis for the neurological influence of music on behaviors in physical functioning and cognitive functioning will be explored in rehabilitation and learning models. Clinical experience will be included. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.

MEMT 857. Music Therapy in Gerontology. 2 Hours.
The theories and clinical applications of music therapy across the life span of older adults, including the young old, the middle old, and the old old. Special considerations will be given to persons with debilitating conditions including dementia, and to older persons' professional and family caregivers. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.

MEMT 858. Music Therapy in Medical Care and Wellness of Adult Persons. 2 Hours.
The theories and practice of music therapy as enhancement to health and wellness and to medical interventions for adults will include applications within the medical setting and in the home setting. Interventions will include, among others, approaches for stress management, medical procedural support, pre-operative and post-operative support, follow-up care in catastrophic illness, interventions in post-traumatic stress disorder, and others. Prerequisite: Admission to the graduate program in music therapy or permission of the instructor. FLD.

MEMT 860. Assessment in Music Therapy Professional Practice. 2 Hours.
Skills and knowledge needed to assess and evaluate clients, goals, treatments and their effectiveness, program outcomes, program quality, and quality of care. LEC.

MEMT 861. Current Trends in Music Therapy. 2 Hours.
A comprehensive study of the elements that contribute to current practice in music therapy, but not limited to, professional competencies, code of ethics, assessment and implementation of interventions, leadership, organizational structure, budget and finance, scheduling and management of contracts, grant writing, and other administrative practices. FLD.

MEMT 863. The Influence of Music on Behavior II. 2 Hours.
A laboratory and research course to accompany or follow MEMT 763. LAB.

MEMT 864. Philosophy and Theory of Music Therapy. 3 Hours.
Concentrated, interdisciplinary study of conceptual foundations for music therapy. LEC.

MEMT 890. Practicum in Music Therapy. 1-16 Hours.
Advanced music therapy practice including clinical work with a population of the student's choice which incorporates music therapy program design, implementation, and evaluation. The student will work in consultation with qualified Music Therapy staff. May be repeated for credit. FLD.

MEMT 891. Advanced Clinical Techniques. 3 Hours.
The student will articulate, test and refine music therapy clinical practice protocol(s) with a clientele(s) of choice. Students will work in consultation with qualified Music Therapy staff. FLD.

MEMT 892. Supervision in Music Therapy I. 3 Hours.
Study and application of theoretical models and supervisory roles applicable to music therapy clinical supervision. Students will review developmental levels for supervisors and practicum students. Supervision of music therapy clinical practicum students will be required. LEC.

MEMT 893. Supervision in Music Therapy II. 3 Hours.
A model of practicum supervision will be applied in music therapy clinical practicum supervision. Video and/or tape recordings of supervision conferences with practicum students will be reviewed in consultation with qualified music therapy staff. LEC.

MEMT 895. Master's Project. 1-3 Hours.
May be repeated for credit. RSH.

MEMT 897. Independent Study: ____. 1-4 Hours.
May be repeated for credit. Prerequisite: Consent of advisor and instructor. RSH.
MEMT 898. Comprehensive Examination. 1 Hour.
An independent course in preparation for the non-thesis M.M.E. degree final examination. Prerequisite: Permission of the instructor. IND.

MEMT 899. Master's Thesis. 1-6 Hours.
May be repeated for credit. THE.

MEMT 900. Learning Theories and Music Education. 3 Hours.
(V) A broad survey of formal learning theories and other approaches to the teaching-learning situation, accenting implications for, applications to, and research needs in music education. LEC.

MEMT 912. Administration of Music Education Programs. 3 Hours.
A study of the administration of music education programs at all school levels; topics will include personnel, finance, curriculum, supervision, and articulation of the music program with other segments of the school and community. LEC.

MEMT 915. Teaching Music in Higher Education. 3 Hours.
Knowledge, skills, and dispositions for graduate students in music who are preparing to teach at the college level. This course is directed toward the end of developing competencies and understandings that will contribute to one's becoming an effective college/university teacher. LEC.

MEMT 920. Doctoral Seminar in Music Education and Music Therapy. 0-1 Hours.
This course will emphasize strategies and skills for successful completion of the doctoral program, as well as strategies and skills to prepare doctoral students to contribute to the profession as college teachers, researchers, master teachers, and arts administrators. Course may be repeated for zero credit. LEC.

MEMT 923. Seminar in _____. 1-3 Hours.
May be repeated for credit. LEC.

MEMT 953. Advanced Acoustical and Psychological Aspects of Musical Behavior. 3 Hours.
Study and experimental investigation of acoustical, psychoacoustical, and psychological phenomena as they influence music. Attention will be given to physical parameters; estimation of pitch, loudness, and timbre; magnitude estimation; theories of consonance; experimental aesthetics; and measurement and prediction of musical ability. Each student will be expected to complete an experiment or quasi-experiment related to human musical behavior. (Same as PSYC 853.) Prerequisite: MEMT 453 or equivalent, or permission of instructor. LEC.

MEMT 965. Advanced Methods in Experimental and Descriptive Research in Music. 3 Hours.
An advanced study of experimental and descriptive research techniques with careful investigation of research design, experimental control, analysis and manuscript composition. Consideration of recent trends in research methods and their place in the scholarly schemata will be reviewed. Prerequisite: MEMT 812 or permission of instructor. LEC.

MEMT 972. Research in Music Education. 2-5 Hours.
For students who are sufficiently qualified to conduct original investigations in this field. Consent of instructor necessary. May be repeated for credit. IND.

MEMT 980. Advanced Topics: _____. 1-3 Hours.
A special course of study to meet current needs of education professionals -- primarily for post-master's level students. May be repeated for credit. IND.

MEMT 995. Field Experience in: _____. 1-5 Hours.
Supervised and directed experiences in selected educational settings. The advisor will schedule regular observations of the field experience and conferences with the student. Written summaries and evaluations of the field experiences will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Open only to advanced students. Field experience credit in any one semester may not exceed five hours, and total credit may not exceed eight hours. May be repeated for credit. FLD.

MEMT 996. Practicum in College Teaching. 1-3 Hours.
College teaching experience, guided by a major professor in the department. Open only to doctoral aspirants or candidates. FLD.

MEMT 997. Individual Study: _____. 1-4 Hours.
May be repeated for credit. Prerequisite: Prior graduate course work in the area of study and consent of Instructor. IND.

MEMT 998. Seminar in: _____. 1-4 Hours.
May be repeated for credit. LEC.

MEMT 999. Doctoral Dissertation. 1-15 Hours.
May be repeated for credit. THE.

Courses

MTHC 99. Fundamentals of Music. 1 Hour.
Tutoring for music majors as required based on fundamentals exam given in MTHC 105, Theory I. LEC.

MTHC 105. Theory I. 3 Hours.
The first semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music. Must be taken concurrently with MTHC 106. Prerequisite: Music major or consent of instructor. LEC.

MTHC 106. Aural Skills I. 1 Hour.
The first semester of a one-year aural skills course that trains students to hear and sing the melodies, rhythms, and harmonies associated with common-practice tonal music. Must be taken concurrently with MTHC 105. LEC.

MTHC 115. Theory II. 3 Hours GE11.
The second semester of an integrated two-year theory sequence that examines the harmonic, rhythmic, and formal organization of music. MTHC 115 and must be taken concurrently with MTHC 116. Satisfies: Goal 1 Outcome 1 (GE11). Prerequisite: MTHC 105. LEC.

MTHC 116. Aural Skills II. 1 Hour.
The second semester of a one-year aural skills course that trains students to hear and sing the melodies, rhythms, and harmonies associated with common-practice tonal music. Must be taken concurrently with MTHC 115. Prerequisite: MTHC 106. LEC.

MTHC 150. Introduction to Music Theory: Reading, Listening, Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art and vernacular styles of music. Students will participate in and interact with various parameters of music through the acquisition of basic musical skills. For freshmen and sophomores. LEC.

MTHC 205. Theory III. 4 Hours GE11.
The third semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Prerequisite: MTHC 115 and MTHC 116. LEC.

MTHC 252. Introduction to Composition. 2 Hours.
Fundamentals of musical composition, including melody, rhythm, harmony, notation, and instrumentation. Students will create new works for performance. Prerequisite: MTHC 115 and MTHC 116 or permission of instructor. LEC.
MTHC 253. Composition. 2 Hours.
For music theory and composition majors. Creative writing using basic concepts in harmony, melody, and form. May be repeated for credit. Prerequisite: MTHC 115 and MTHC 116 and MTHC 252 or permission of instructor. IND.

MTHC 301. Music Videos. 3 Hours GE3H.
The analysis of music videos from 1981-present. LEC.

MTHC 302. How to Make Music. 3 Hours.
An introduction to techniques for composing Western music in various styles. Designed for students with little or no prior training in music. May not contribute to major requirements for School of Music students. LEC.

MTHC 315. Theory IV. 4 Hours.
The fourth semester of an integrated two-year theory sequence that examines the harmonic, melodic, rhythmic, and formal organization of music while developing critical listening and keyboard skills. Includes study of musical forms from the common practice period and analytical techniques for post-tonal music. Prerequisite: MTHC 205. LEC.

MTHC 316. Tonal Form and Post-Tonal Techniques. 4 Hours.
A study of musical forms from the common practice period through the present day and analytical techniques for post-tonal music. The class is designed for music education and music therapy majors. Prerequisite: MTHC 205, music education, or music therapy major. LEC.

MTHC 350. Introduction to Music Theory: Reading, Listening, Composing. 3 Hours.
An introductory course for non-music majors, emphasizing western art and vernacular styles of music. Students will participate in and interact with various parameters of music through the acquisition of basic musical skills. For juniors and seniors. LEC.

MTHC 355. Readings in Music Theory: ______. 1-4 Hours.
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: Consent of instructor. LEC.

MTHC 400. Graduate Review: Written Theory. 1 Hour.
A review of basic harmonic and voice-leading principles relevant to the common-practice period. For graduate students deficient in undergraduate harmonic theory. LEC.

MTHC 402. Graduate Review: Aural Skills. 1 Hour.
A review of aural and sight-reading skills relevant to the common-practice period. For graduate students deficient in undergraduate aural theory. LEC.

MTHC 404. Graduate Review: Form. 1 Hour.
A review of basic forms relevant to the common-practice period. For graduate students deficient in undergraduate form. LEC.

MTHC 406. Graduate Review: Post-Tonal Music. 1 Hour.
A review of basic theories and techniques relevant for understanding post-tonal music. For graduate students deficient in undergraduate post-tonal theory. LEC.

MTHC 410. Form and Analysis. 3 Hours.
Analysis of the formal designs of movement-length forms from the Baroque to the present day with an emphasis on performance and interpretation. Prerequisite: MTHC 315. LEC.

MTHC 432. Introduction to the Analysis Contemporary Music. 3 Hours.
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315. LEC.

MTHC 433. Advanced Analysis of Contemporary Music. 3 Hours.
Analysis seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 432. LEC.

MTHC 442. Sixteenth-Century Counterpoint. 3 Hours.
A study of sixteenth-century style with analysis and original work. Prerequisite: MTHC 205. LEC.

MTHC 455. Readings in Music Theory: ______. 1-4 Hours.
Investigation of a subject by means of directed readings of primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. IND.

MTHC 459. Scoring for Field Band. 2 Hours.
Primary voicings and textural possibilities for wind and percussion instruments will be stressed as these resources relate to the arranging of music for marching and pep bands at the secondary level. (Same as BAND 459.) Prerequisite: MTHC 205. LEC.

MTHC 463. Survey in Jazz Composition and Arranging. 3 Hours.
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the "Big Band Era") and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required. LEC.

MTHC 470. Seminar in New Art Song. 3 Hours.
Collaborative workshop for composers, singers, and collaborative pianists. Collaborative performance and analysis of recent art song. Collaborative composition and performance of new art song. Prerequisite: Consent of instructor. LEC.

MTHC 471. Eighteenth-Century Counterpoint. 3 Hours.
A study of eighteenth century style with analysis and original work. Prerequisite: MTHC 205. LEC.

MTHC 474. Orchestration I. 3 Hours.
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. Prerequisite: MTHC 205. LEC.

MTHC 476. Orchestration II. 3 Hours.
A continuation of MTHC 474. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 474. LEC.

MTHC 477. Electro-Acoustic Composition I. 3 Hours.
Survey of concepts and practices of electronic sound synthesis. Required of music theory and composition majors, and open to other music majors by consent of department. Prerequisite: MTHC 315. LEC.

MTHC 480. Electro-Acoustic Composition II. 3 Hours.
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 477. LEC.

MTHC 485. Composing and Arranging for Educational Ensembles. 2 Hours.
For music majors interested in learning to write for primary and secondary educational performing groups. Emphasizes conventional tonal practices and idiomatic, accessible writing for young players. Prerequisite: MTHC 205, MTHC 484, and MTHC 459. IND.

MTHC 498. Undergraduate Recital. 1 Hour AE61.
Composition recital for undergraduate music composition majors. Prerequisite: Permission of instructor. IND.
MTHC 499. Senior Research Project. 1-4 Hours AE61.
For seniors majoring in music theory who will normally enroll for two credits in each of the last two semesters. Students will write a scholarly paper on an approved topic. May be repeated for credit. IND.

MTHC 541. Eighteenth-Century Counterpoint. 3 Hours.
A study of eighteenth century style with analysis and original work. Prerequisite: MTHC 205. LEC.

MTHC 542. Sixteenth-Century Counterpoint. 3 Hours.
A study of sixteenth-century style with analysis and original work. Prerequisite: MTHC 205. LEC.

MTHC 559. Scoring for Concert Band. 2 Hours.
Curriculum includes idiomatic writing, tonal balance, scoring for large percussion sections, and analysis of wind colors and instrumental combinations found in music of Holst, Vaughan Williams, Grainger, Stravinsky, Hindemith, and C. Williams. (Same as BAND 559.) Prerequisite: MTHC 205 and MTHC 459. IND.

MTHC 563. Survey in Jazz Composition and Arranging. 3 Hours.
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the "Big Band Era") and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required. LEC.

MTHC 583. Composition. 2 Hours.
Advanced composition including larger forms in a variety of media. Composition majors will present a public recital of original works during the fourth semester of enrollment. May be repeated for credit. Prerequisite: MTHC 253 or consent of instructor. IND.

MTHC 610. Tonal Forms. 3 Hours.
Phrase structure and formal design in common-practice tonal music. Structural analysis of binary, ternary, rondo, sonata, variations and contrapuntal, multi-movement forms. LEC.

MTHC 643. Contemporary Repertoire. 3 Hours.
Comprehensive overview of major composers and works of the past beginning in the mid 20th Century, but focusing on music written in the last 40 years, major contemporary ensembles and granting organizations. Prerequisite: Graduate standing in MTHC or permission of instructor. LEC.

MTHC 655. Readings in Music Theory: _____ 1-4 Hours.
Investigation of a subject by means of directed readings of primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. IND.

MTHC 670. Seminar in New Art Song. 3 Hours.
Collaborative workshop for composers, singers, and collaborative pianists. Collaborative performance and analysis of recent art song. Collaborative composition and performance of new art song. Prerequisite: Consent of instructor. LEC.

MTHC 674. Orchestration I. 3 Hours.
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. Prerequisite: MTHC 205. LEC.

MTHC 676. Orchestration II. 3 Hours.
A continuation of MTHC 674. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 674. LEC.

MTHC 678. Electro-Acoustic Composition I. 3 Hours.
Survey of concepts and practices of electronic sound synthesis. Required of music theory and composition majors, and open to other music majors by consent of department. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 680. Electro-Acoustic Composition II. 3 Hours.
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 678 and consent of division. LEC.

MTHC 701. Music Videos. 3 Hours.
The analysis of music videos from 1981-present. LEC.

MTHC 732. Introduction to the Analysis of Contemporary Music. 3 Hours.
Introductory course in the sequence, presenting the basic tools of post-tonal and 20th century composition, including, serial techniques, set theory, extended tertian harmony, minimalist techniques, contemporary tonality and other trends. Exploration of form and complex rhythmic structures as well as aural skills appropriate to the subject matter. Prerequisite: MTHC 315 or MTHC 316. LEC.

MTHC 733. Advanced Analysis of Contemporary Music. 3 Hours.
Analytical seminar, emphasizing intense study of larger contemporary works, using techniques learned in the first course (MTHC 732). Further content will vary according to the instructor. Includes aural skills work appropriate to the subject matter. Prerequisite: MTHC 732. LEC.

MTHC 741. Canon and Fugue. 3 Hours.
A study of strict imitation and fugal writing. Practical work in two, three, and four parts in various media. Prerequisite: MTHC 541. LEC.

MTHC 742. Sixteenth-Century Counterpoint. 3 Hours.
A study of sixteenth-century style with analysis and original work. LEC.

MTHC 743. Contemporary Repertoire. 3 Hours.
Comprehensive overview of major composers and works of the past beginning in the mid 20th Century, but focusing on music written in the last 40 years, major contemporary ensembles and granting organizations. Prerequisite: Graduate standing in MTHC or permission of instructor. LEC.

MTHC 755. Readings in Music Theory: _____ 1-4 Hours.
Investigation of a subject by means of directed readings of primary scholarly sources. For Graduate students. May be repeated for credit. Prerequisite: Consent of instructor. IND.

MTHC 763. Survey in Jazz Composition and Arranging. 3 Hours.
Analysis of jazz composition and orchestration, beginning with early procedures (Louis Armstrong through the "Big Band Era") and culminating with analysis of scores by Gil Evans and Bob Brookmeyer. Prerequisite: Permission of instructor required. LEC.

MTHC 770. Seminar in New Art Song. 3 Hours.
Collaborative workshop for composers, singers, and collaborative pianists. Collaborative performance and analysis of recent art song. Collaborative composition and performance of new art song. Prerequisite: Consent of instructor. LEC.

MTHC 771. Eighteenth-Century Counterpoint. 3 Hours.
A study of eighteenth century style with analysis and original work. LEC.

MTHC 774. Orchestration I. 3 Hours.
A study of the four families of orchestral instruments (woodwinds, brass, percussion, and strings) concentrating on ranges, transpositions, timbres, and techniques of the various instruments. Scoring projects concentrate on voicing and balance within the individual choirs of the orchestra. LEC.
MTHC 776. Orchestration II. 3 Hours.
A continuation of MTHC 774. Emphasis on scoring for full symphony orchestra and the large wind ensemble. Prerequisite: MTHC 774. LEC.

MTHC 777. Electro-Acoustic Composition I. 3 Hours.
Survey of concepts and practices of electronic sound synthesis. For music theory and composition majors, open to other music majors by consent of department. LEC.

MTHC 778. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. (Same as MUSC 778.) LEC.

MTHC 780. Electro-Acoustic Composition II. 3 Hours.
Basic concepts and techniques of electronic composition. For majors in music theory and composition. Prerequisite: MTHC 777 and consent of division. LEC.

MTHC 789. Seminar on Selected Topics: ______. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MTHC 801. Advanced Analysis I. 3 Hours.
A bibliographic survey intended to explore aspects of both structure (rhythm, texture and timbre) and methodology (semiotics, gesture and cognition) that variously complement the pitch-based approaches to musical interpretation associated with Schenkerian tonal analysis and pitch-class theory. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.

MTHC 802. Advanced Analysis II. 3 Hours.
A bibliographic survey intended to explore in depth the pitch grammars developed by composers of Western Art Music since circa 1910, and the various methodologies assembled to codify them. Prerequisite: MTHC 732 Introduction to the Analysis of Contemporary Music or permission of instructor. LEC.

MTHC 810. Advanced Form. 3 Hours.
An investigation of formal types, processes and functions in the music of the seventeenth through the twentieth centuries, focusing on instrumental genres. Prerequisite: Permission of instructor. LEC.

MTHC 820. Seminar in Schenkerian Analysis. 3 Hours.
A study of the theories and analytical methodologies developed by the Austrian theorist Heinrich Schenker. Prerequisite: MTHC 410 or permission of the instructor. LEC.

MTHC 825. Computers in Music and Music Research. 3 Hours.
A seminar designed to develop and explore the use and programming of microcomputers as an aid in research and the production of music. Topics will include composition and production tools for music, structured program design, data representation, and basic computer-assisted instruction models. Prerequisite: EECS 138 or equivalent or permission of the instructor. LEC.

MTHC 830. Pedagogy of Music Theory. 1-3 Hours.
Procedures for teaching theoretical concepts and skills. Survey of available texts and related materials. Three credits when offered during a full academic term; one-two credits when offered as a short-term institute. Prerequisite: MTHC 315 or MTHC 316 or permission of instructor. LEC.

MTHC 840. Pedagogy of Music Composition. 3 Hours.
This course provides an overview of pedagogical philosophies in music composition and is designed to prepare students for a teaching position in higher education. The course emphasizes broad critical understanding of historic, aesthetic, and theoretical perspectives pertinent to the field of composition pedagogy. Teaching methodologies are explored for one-on-one studio instruction, group lesson instruction, masterclass, and classroom instruction. Prerequisite: Consent of instructor. LEC.

MTHC 853. Advanced Composition. 1-6 Hours.
Essentially for theory and composition majors on the master's level. May be repeated for credit. Summer session limit one to three hours. RSH.

MTHC 887. Advanced Orchestration. 3 Hours.
Prerequisite: MTHC 676, or consent of department. May be repeated for credit. LEC.

MTHC 889. Seminar on Selected Topics: ______. 0.5-3 Hours.
Topics vary by semester. May be repeated for credit. LEC.

MTHC 898. Recital. 1 Hour.
Recorded grade for MM Composition recital. LEC.

MTHC 899. Thesis. 1-12 Hours.
May be repeated for credit. THE.

MTHC 953. Advanced Composition. 1-6 Hours.
Essentially for theory and composition majors on the doctoral level. May be repeated for credit. Summer session limit one to three hours. RSH.

MTHC 965. Doctoral Composition Recital. 2 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

MTHC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

MTHC 999. Dissertation. 1-12 Hours.
May be repeated for credit. THE.

Courses

MUS 100. Directed Study: ______. 1-4 Hours.
This is an all-purpose fill in the blank course for freshmen and sophomores. It can be used when need arises. May be repeated for credit. IND.

MUS 140. Encounter with Music and Musicians. 3 Hours H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

MUS 177. First Year Seminar: ______. 3 Hours GE11.
A limited-enrollment seminar course for first-time freshmen, organized around current issues in music. May not contribute to major requirements for School of Music students. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students' performance is the ultimate
goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 300. Directed Studies: ______. 1-4 Hours.
This is an all-purpose fill in the blank course for juniors and seniors. It can be used when need arises. May be repeated for credit. IND.

MUS 340. Encounter with Music and Musicians. 3 Hours H.
A study of concert and recital music as it relates to the performer and listener. Students will have interaction with professional musicians through live performances and discussions with the performers. Music performed on the concert and chamber music series and on concerts of music department faculty will be carefully examined. Baroque through modern music, jazz, and music of other cultures are the basic units in the course. Written research projects and reviews of performances are required. LEC.

MUS 388. Curriculum and Pedagogy in:______. 1 Hour.
Independent study. Prerequisite: Permission of instructor. IND.

A team-taught, performance-based survey for wind and string students of musical styles from the Baroque to present. Students will examine music from their perspective literature from several different perspectives including: historical, theoretical, technical, and expressive. The integration of these perspectives into the students’ performance is the ultimate goal of the course. May be repeated for credit. Prerequisite: Approval of applied instrumental instructor. IND.

MUS 586. The Business of Music. 3 Hours.
A course covering commercial aspects of the music business, including publishing, copyright law, recording, live performance, the motion picture and radio business, composition, teaching, and music merchandising. Prerequisite: Consent of the instructor. LEC.

MUS 587. Entrepreneurship and Outreach. 3 Hours.
An expansion of knowledge of current entrepreneurship trends and approaches to arts management. Prerequisite: MUS 586. Open only to junior, senior, and graduate students. LEC.

MUS 588. Arts Management. 3 Hours.
A comprehensive overview of the arts management field. Prerequisite: MUS 586. Open only to junior, senior, and graduate students. LEC.

MUS 686. Arts Administration: Presenting the Performing Arts. 3 Hours.
Considerations involved in booking, scheduling, and presenting music, theatre, and dance events. Locating and selecting artists, reading and negotiating contracts, fund raising, grant writing, working with support groups, marketing techniques, publicity, personnel, and finance management. LEC.

MUS 732. Twentieth Century Techniques before 1945. 3 Hours.
A study and analysis of music from the turn of the century to World War II. For non-music majors. Prerequisite: Permission of instructor. LEC.

MUS 733. Twentieth Century Techniques after 1945. 3 Hours.
A study and analysis of music from World War II to the present. For non-music majors. Prerequisite: Permission of instructor. LEC.

MUS 800. Directed Study:______. 1-4 Hours.
This is an all-purpose fill in the blank course for graduate students. It can be used when need arises. May be repeated for credit. LEC.

MUS 888. Curriculum and Pedagogy in:______. 1 Hour.
Independent study. Prerequisite: Permission of instructor. LEC.

Courses

MUSC 135. Masterworks of Music. 3 Hours.
Honors version of MUSC 136/MUSC 336. Open only to students in the University Honors Program or by permission of instructor. Designed to aid non-music majors in developing skills needed for listening to music. Emphasis on masterworks of Western music. A student may receive credit for only one of the four courses numbers: MUSC 135, MUSC 335, MUSC 136, MUSC 336. LEC.

MUSC 136. Masterworks of Music. 3 Hours HT GE3H / H.
Designed to aid non-music majors in developing the skills needed for listening to music. Emphasis on masterworks of Western music. Open only to freshman and sophomore non-music majors. A student may receive credit in either MUSC 136 or MUSC 336, but not both. LEC.

MUSC 139. Introduction to Music in World Cultures. 3 Hours NW AE42.
Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do music the way they do. LEC.

MUSC 254. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 254.) Prerequisite: Permission of instructor. ACT.

MUSC 256. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 298. Introduction to Jazz. 3 Hours HT AE41 / H/W.
A survey of the history of jazz from its beginnings in the early twentieth century to the present. Open to music and non-music majors. LEC.

MUSC 299. American Popular Song. 3 Hours H.
A survey of the American popular song in the twentieth century, with an emphasis on the composer’s lyricists, and performers who made them popular. LEC.

MUSC 300. Jazz Styles, 1920-1980. 3 Hours H.
A detailed study of the major styles of jazz that developed between 1920 and 1980, with an emphasis on aural recognition of their characteristics. LEC.

MUSC 301. Great Innovators of Jazz. 3 Hours H.
A detailed study of the most innovative and influential figures in the history of jazz. LEC.

MUSC 302. The Broadway Musical. 3 Hours AE41/GE3H / H.
A survey of the Broadway Musical from the early twentieth century to the present. LEC.

MUSC 303. The Film Musical. 3 Hours.
A survey of the film musical from the 1920s through the 1980s. LEC.

MUSC 305. Music of Latin America. 3 Hours AE42 / H.
Designed for non-music majors, the course surveys the geographical and ethnographical sources of the many forms of music in Latin America. The various forms of music will be examined from historical, cultural, and stylistic perspectives. LEC.

MUSC 306. Introduction to Contemporary Music. 3 Hours H.
A survey of concert music in Europe and the United States in the twentieth century. Not open to music majors. LEC.
MUSC 307. Music of Africa and the Middle East. 3 Hours.
Survey of the many musical traditions of Black Africa and the Middle East, emphasizing their cultural and social context. Open to both majors and non-majors. LEC.

MUSC 308. Music in East Asia. 3 Hours AE42.
Study of musical cultures in China, Korea, and Mongolia, with a special focus on court music, musical theater, popular music, and the influence of East Asian music on the Western art music and vice-versa. (Same as EALC 308.) LEC.

MUSC 309. History of Rock and Roll. 3 Hours GE3H / H.
Survey of the history of rock and roll, starting with its origins in rhythm and blues and continuing to the present day. Open to both majors and non-majors. LEC.

MUSC 310. History of Film Music. 3 Hours HT GE3H.
A survey course for non-majors on the history of film music from silent films to the present. Students will use written texts, website materials such as streaming video and audio, and regular screening in an auditorium setting for assignments and papers. LEC.

MUSC 311. History of African American Music. 3 Hours.
This course examines the richness and diversity of African American music and its influence on the entire American musical landscape. Beginning with African retentions in African American music, the course will trace the history and development of both written and oral traditions from 1700 to the present day. LEC.

MUSC 312. Music in the Andes. 3 Hours AE42.
This course examines the history, culture, and musical traditions of the Andean region: Peru, Ecuador, Bolivia, Chile, Columbia, and Venezuela. It focuses on a selection of indigenous rituals and popular music of mestizo and African American origin. By the end of the semester students will be acquainted with particular genres, instruments, and the social contexts with which they are associated. LEC.

MUSC 313. Music in Mexico and the Caribbean. 3 Hours AE42.
This course examines the history, culture, and musical traditions of Mexico and the Caribbean. It focuses on a selection of rituals and traditional and popular music of the region. By the end of the semester students will be acquainted with various musical genres, instruments, and the social contexts with which they are associated. LEC.

MUSC 315. History of Country Music. 3 Hours GE3H.
Study of country music in the U.S. from the early 1920’s to the present, including performers, styles, historical context, and technology. LEC.

MUSC 318. Drumming Cultures of the World. 3 Hours AE42/GE3S.
Survey of drumming styles and its influence on culture, history, aesthetics, and beliefs from around the world (West Africa, the Caribbean, South America, East Asia, South Asia, the Middle East, Europe and North America). Includes evolution of the drum set and the global hip hop phenomenon. The main goal of this course is to learn about how these varied musical styles are interconnected. Open to all majors. LEC.

MUSC 320. Music History I. 3 Hours AE42.
An introduction to music as an academic discipline, the fields of musicology and ethnomusicology, and a survey of representative world music cultures. Prerequisite: One year of music theory. LEC.

MUSC 335. Masterworks of Music - Study Abroad. 3 Hours AE42/GE3H.
A study abroad class in which students will develop skills in listening to music and placing that music into its cultural context with examples drawn from the Western repertories associated with the places to where the class will travel during the winter interterm, returning just before the spring semester begins. Not open to students with credit in: MUSC 135, MUSC 136, or MUSC 336. LEC.

MUSC 336. Masterworks of Music. 3 Hours HT GE3H / H.
Designed to aid non-music majors in developing the skills needed for listening to music. Emphasis on masterworks of Western music and writing about music. Open only to junior and senior non-music majors. A student may receive credit for either MUSC 336 or MUSC 336, but not both. LEC.

MUSC 337. Selected Topic in Music: _____. 1-3 Hours HT / H.
A selected topic in music or an interdisciplinary topic in the fine arts. The course may be repeated for credit when topic varies. Open only to non-music majors. LEC.

MUSC 338. Selected Topic in Music: _____. 1-3 Hours.
The course may be repeated for credit when topic varies. Open only to music majors. Prerequisite: MUSC 320 or permission of instructor. LEC.

MUSC 339. Introduction to Music in World Cultures. 3 Hours NW AE42.
Addresses music as a social and cultural phenomenon shaping broader patterns of human activity. It examines the ideas, behaviors and beliefs people have about their music based on selected case studies of traditional and popular music from North America, Africa, Asia, and Latin America. The main goal of this course is to understand why people from different parts of the world do music the way they do. LEC.

MUSC 340. Music History II. 3 Hours GE3H.
A survey of major developments in Western music and its social, cultural, and political contexts from Antiquity to 1750. Prerequisite: MUSC 320. LEC.

MUSC 349. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study of primary sources. Prerequisite: A grade of "A" or "B" in MUSC 298, or equivalent, and permission of instructor. IND.

MUSC 436. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 440. Music History III. 3 Hours GE3H.
A survey of major developments in Western music and its social, cultural, and political contexts from 1750 to the present. Prerequisite: MUSC 340. LEC.

MUSC 450. Selected Topics in Music: _____. 0.5-3 Hours.
Varies based on the topic. Prerequisite: MUSC 320, MUSC 340, MUSC 440, and MUSC 480 or permission of instructor. LEC.

MUSC 470. Music in World Cultures. 3 Hours NW AE42 / W.
An introduction to music as part of the cultural experience in India, Southeast Asia, the Orient, and Africa, with comparisons to Western traditions and influences on contemporary music. LEC.

MUSC 474. Graduate Review: Medieval. 1 Hour.
A review of the practice of Western art music composed between c. 437 and 1420. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 475. Graduate Review: Renaissance. 1 Hour.
A review of the practice of Western art music composed between c. 1420 and 1600. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music
history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 476. Graduate Review: Baroque. 1 Hour.
A review of the practice of Western art music composed between c. 1600 and 1750. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 477. Graduate Review: Classic. 1 Hour.
A review of the practice of Western art music composed between c. 1750 and 1815. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 478. Graduate Review: Romantic. 1 Hour.
A review of the practice of Western art music composed between c. 1815 and 1900. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 479. Graduate Review: 20th-21st Centuries. 1 Hour.
A review of the practice of Western art music composed between c. 1900 and the present day. It examines the genres, forms, styles, and performance practice of representative works by a variety of composers. This is a 6-week online course offered online as a review class to remediate music history deficiencies as determined by the graduate diagnostic exam. Open only to School of Music graduate students. LEC.

MUSC 480. Music History IV. 3 Hours AE41.
A survey of music in the United States from the colonial period to the present, including classical and vernacular styles. Prerequisite: MUSC 440. LEC.

MUSC 481. Music of the Middle Ages. 3 Hours.
A concentrated survey of Western music from about 500 to 1400. Prerequisite: MUSC 320. LEC.

MUSC 482. Music of the Renaissance. 3 Hours.
A concentrated survey of Western music from about 1400 to 1600. Prerequisite: MUSC 340. LEC.

MUSC 483. Music of the Baroque Era. 3 Hours.
A concentrated survey of Western music from about 1600 to 1750. Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 484. Music of the Classical Era. 3 Hours.
A concentrated survey of Western music from about 1750 to 1815. Prerequisite: MUSC 440. LEC.

MUSC 485. Music of the Romantic Era. 3 Hours.
A concentrated survey of Western music from about 1815 to 1900. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 486. Music of the Twentieth Century. 3 Hours.
A concentrated survey of Western music during the twentieth century. Prerequisite: MUSC 480. LEC.

MUSC 487. Music in America. 3 Hours.
A concentrated survey of music in the United States. Prerequisite: One course in the field of musicology or permission of the instructor. LEC.

MUSC 488. History of Opera. 3 Hours.
A concentrated survey of the history of opera. Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 489. History of Chamber Music. 3 Hours.
A concentrated survey of the history of chamber music. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 490. History of the Concerto. 3 Hours.
A concentrated survey of the history of the concerto. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 491. History of the Symphony. 3 Hours.
A concentrated survey of the history of the symphony. Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 492. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble and its music, using standard musical works from each historical period. Prerequisite: MUSC 440 and MUSC 480 or permission of the instructor. LEC.

MUSC 493. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from the ancient Greeks to the late twentieth century. Prerequisite: MUSC 240, MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 494. Readings in Musicology: ______. 1-3 Hours.
May be repeated for credit. Prerequisite: Minimum average of B in MUSC 320, MUSC 340, MUSC 440, MUSC 480 or equivalent, and permission of instructor. IND.

MUSC 499. Senior Thesis. 2 Hours AE61.
An original research project that will result in a scholarly paper of moderate size. May be repeated once for credit. IND.

MUSC 560. Music in World Cultures. 3 Hours NW AE42 / W.
An introduction to music as part of the cultural experience in India, Southeast Asia, the Orient, and Africa, with comparisons to Western traditions and influences on contemporary music. LEC.

MUSC 650. Selected Topics in Music: ______. 0.5-3 Hours.
Prerequisite: MUSC 320, MUSC 340, MUSC 440, and MUSC 480 or permission of instructor. LEC.

MUSC 654. Collegium Musicum, Vocal. 0-1 Hours.
May be repeated for credit. (Same as CHOR 654.) Prerequisite: Permission of instructor. ACT.

MUSC 655. Readings in Music Theory: ______. 1-4 Hours.
Investigation of a subject by means of directed readings using primary scholarly sources. May be repeated for credit. Prerequisite: MTHC 410 and consent of instructor. LEC.

MUSC 656. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 736. Collegium Musicum, Instrumental. 0-1 Hours.
May be repeated for credit. Prerequisite: Permission of instructor. ACT.

MUSC 744. Readings in Jazz and American Popular Music. 1-3 Hours.
Investigation of a subject by means of directed study of primary resources. Prerequisite: Permission of instructor. IND.

MUSC 750. Selected Topics in Music: ______. 0.5-3 Hours.
May be repeated for credit. Prerequisite: Graduate standing or permission of instructor. LEC.

MUSC 752. Music of the Middle Ages. 3 Hours.
Prerequisite: MUSC 320. LEC.
MUSC 753. Music of the Renaissance. 3 Hours.
Prerequisite: MUSC 340. LEC.

MUSC 754. Music of the Baroque Era. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440. LEC.

MUSC 755. Music of the Classical Era. 3 Hours.
Prerequisite: MUSC 440. LEC.

MUSC 756. Music of the Romantic Era. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480. LEC.

MUSC 757. Music of the Twentieth Century. 3 Hours.
Prerequisite: MUSC 480. LEC.

MUSC 758. History of Musical Instruments. 3 Hours.
Prerequisite: MUSC 340 or MUSC 440 or permission of instructor. LEC.

MUSC 759. Music in America. 3 Hours.
A survey of historical developments from the Pilgrims to the present.
(Same as AMS 737.) Prerequisite: One course in the field of music history
or permission of the instructor. LEC.

MUSC 760. History of Opera. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 761. History of the Mass. 3 Hours.
Prerequisite: MUSC 340 and MUSC 440, or permission of instructor. LEC.

MUSC 765. History of Chamber Music. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 766. History of the Concerto. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 767. History of the Symphony. 3 Hours.
Prerequisite: MUSC 440 and MUSC 480, or permission of instructor. LEC.

MUSC 768. History of Wind Band Music. 3 Hours.
A chronological survey of the development of the wind band/ensemble
and its music, using standard musical works from each historical period.
Prerequisite: MUSC 440, MUSC 480, or permission of instructor. LEC.

MUSC 770. Music in World Cultures. 3 Hours.
An introduction to music as part of the cultural experience in India,
Southeast Asia, the Orient, and Africa, with comparisons to Western
traditions and influences on contemporary music. LEC.

MUSC 775. History of Keyboard Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 777. History of Solo Vocal Music. 3 Hours.
Prerequisite: MUSC 340, MUSC 440, and MUSC 480. LEC.

MUSC 778. History of Music Theory. 3 Hours.
A historical survey of music theory, both practical and speculative, from
the ancient Greeks to the late twentieth century. (Same as MTHC 778.)
LEC.

MUSC 794. Readings in Musicology: ______. 1-3 Hours.
Investigation of a subject by means of directed reading of primary literary
sources. May be repeated for credit. Prerequisite: A grade average of
"B" in two musicology courses numbered 500 or above and consent of
instructor. IND.

MUSC 801. Music Bibliography and Research. 3 Hours.
Bibliography, research methods, and scholarly writing in music for
entering graduate students. Prerequisite: Permission of instructor. LEC.

MUSC 802. Advanced Music Bibliography and Research. 3 Hours.
Advanced bibliography and writing of research papers. Prerequisite:
MUSC 801. LEC.

MUSC 809. Thesis. 1-6 Hours.
May be repeated for credit. THE.

MUSC 902. Seminar in Musicology. 3 Hours.
A research course designed primarily for doctoral students in musicology.
Prerequisite: MUSC 801, or its equivalent. LEC.

MUSC 903. Seminar in Performance Practices. 3 Hours.
Primary and secondary sources in performance practices dealing mainly
with the seventeenth through nineteenth centuries, with implications
applicable to student's performance medium. LEC.

MUSC 940. Seminar on Selected Topics in Musicology: ______. 3
Hours.
Each semester a topic (to be inserted in the blank) will be the basis for
discussion, reports, and a research paper. May be repeated for credit
provided no course duplication takes place. LEC.

MUSC 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's
major field. Open only to candidates for the D.M.A. in performance. May
be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open
only to candidates for the D.M.A. in performance and conducting. May
be repeated for credit. Prerequisite: Consent of instructor. RSH.

MUSC 999. Dissertation. 1-12 Hours.
May be repeated for credit. THE.

Courses

OBOE 100. Oboe. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in
music. May be repeated for credit. IND.

OBOE 101. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-
gouging, gouging, shaping, tying and scraping reeds. Knife sharpening
and tool maintenance will also be covered. Open only to freshmen and
sophomores. May be repeated for credit. LAB.

OBOE 121. Oboe. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated
for credit. IND.

OBOE 131. Baroque Oboe. 1-4 Hours.
One or two lessons per week. For freshmen and sophomores. May be
repeated for credit. IND.

OBOE 221. Oboe. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be
repeated for credit. Prerequisite: 121-level until the music major has
accumulated 4 credits (8 for performance majors). IND.

OBOE 300. Oboe. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May
be repeated for credit. IND.

OBOE 301. Oboe Reed Making. 0-1 Hours.
The principles of oboe reed making, including tube cane selection, pre-
gouging, gouging, shaping, tying and scraping reeds. Knife sharpening
and tool maintenance will also be covered. Open only to juniors and
seniors. May be repeated for credit. LAB.

OBOE 321. Oboe. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance
majors. May be repeated for credit. Prerequisite: 221-level until the music
major has accumulated 8 credits. IND.
OBOE 331. Baroque Oboe. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

OBOE 421. Oboe. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

OBOE 422. Oboe. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

OBOE 622. Oboe. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

OBOE 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: OBOE 622. LEC.

OBOE 711. Oboe. 1-3 Hours.
For graduate students not majoring in oboe. Audition required. May be repeated for credit. IND.

OBOE 731. Baroque Oboe. 1-4 Hours.
May be repeated for credit. IND.

OBOE 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

OBOE 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in OBOE 811. IND.

OBOE 811. Oboe. 3-4 Hours.
For graduate students majoring in oboe. May be repeated for credit. Summer session limit three hours. IND.

OBOE 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: OBOE 811. THE.

OBOE 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance practice relating to the baroque oboe during the seventeenth and eighteenth centuries. LEC.

OBOE 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques of the twentieth century. LEC.

OBOE 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in oboe. May be repeated for credit. Summer session limit three hours. IND.

OBOE 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

OBOE 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Summer session limit one to three credits. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

ORCH 200. University Symphony Orchestra. 0-1 Hours.
For freshmen and sophomores. Four hours full rehearsal and one hour sectional (string only) rehearsal each week throughout the school year. An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester and numerous out-of-town concerts, radio broadcasts, and local vesper performances. Acceptance for membership and playing positions is determined by tryout. May be repeated for credit. LAB.

ORCH 201. University Chamber Orchestra. 1 Hour.
Two hours of rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 210. Repertory Orchestra. 1 Hour.
A reading orchestra, emphasizing standard orchestral works from Baroque through modern periods. Open to string, wind, and percussion instrument players of the community and university. (Does not count toward ensemble requirement for students with stringed instruments emphasis.) May be repeated for credit. LAB.

ORCH 400. Symphony Orchestra. 0-1 Hours.
An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester as well as out-of-town concerts, radio broadcasts, and local vesper performances. Acceptance for membership and playing positions is determined by audition. May be repeated for credit. LAB.

ORCH 406. University Orchestra. 0-1 Hours.
For undergraduate students. Open to all students without audition. This chamber organization performs on campus as well as locally. The orchestra studies and performs music from the standard orchestral repertoire, along with lighter, popular works. May be repeated for credit. LAB.

ORCH 600. University Symphony Orchestra. 0-1 Hours.
For juniors, seniors, and graduate students. May be repeated for credit. LAB.

ORCH 601. University Chamber Orchestra. 1 Hour.
Two hours rehearsal per week. May be repeated for credit. Audition required. LAB.

ORCH 700. Symphony Orchestra. 0-1 Hours.
An intensive study of the symphonic repertoire, instrumental and vocal accompaniments, and complete major opera. Two public concerts each semester as well as out-of-town concerts, radio broadcasts, and local vesper performances. Acceptance for membership and playing positions is determined by audition. For graduate students. May be repeated for credit. LAB.

ORCH 701. Workshop in: _____. 0.5-3 Hours.
May be repeated for credit. LEC.

ORCH 706. University Orchestra. 0-1 Hours.
For graduate students. This chamber organization performs on campus as well as locally. The orchestra studies and performs music from the standard orchestral repertoire, along with lighter, popular works. May be repeated for credits. LAB.
Courses

ORGN 100. Organ. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

ORGN 121. Organ. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

ORGN 221. Organ. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

ORGN 300. Organ. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

ORGN 320. Studio Class in Organ - Lab. 0 Hours.
Studio performance of works prepared under individual instruction. May be repeated. LAB.

ORGN 321. Organ. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

ORGN 402. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 421. Organ. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

ORGN 502. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 603. Institute for Organ and Church Music. 1-2 Hours.
A one-week intensive study program in performance, practice, and literature, advanced pedagogy, and church music. Normally offered during the summer session. May be repeated for credit. Graded S (satisfactory) or U (unsatisfactory). IND.

ORGN 608. Organ Pedagogy. 2 Hours.
For seniors and graduate students majoring in organ or by permission of instructor. May be repeated for credit. Materials and methods of pedagogy. Lectures, discussion, demonstration teaching, planning, and evaluation. One beginning or lower level organ student assigned to each class member with teaching done under supervision of class instructor. LEC.

ORGN 622. Organ. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

ORGN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: ORGN 622. LEC.

ORGN 702. Master Class in Organ - Lab. 0 Hours.
A class in the performance of advanced organ repertoire. For organ majors only or by consent of instructor. May be repeated. LAB.

ORGN 711. Organ. 1-3 Hours.
For graduate students not majoring in organ. Audition required. May be repeated for credit. IND.

ORGN 720. Studio Class in Organ-Lab. 0 Hours.
Studio performance of works prepared under individual instruction. May be repeated for credit. IND.

ORGN 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

ORGN 800. Organ Building and Design. 3 Hours.
Acoustics; design, construction, and maintenance of organs; organ consulting, examination of organs. LEC.

ORGN 801. History of Organ Literature and Organ Design I. 3 Hours.
Organ literature and organ design from the Middle Ages, the Renaissance, and the Spanish, Italian, and English Baroque. LEC.

ORGN 802. History of Organ Literature and Organ Design II. 3 Hours.
Organ literature and organ design in the Dutch and German Baroque with special emphasis on J.S. Bach. Prerequisite: Permission of instructor. LEC.

ORGN 803. History of Organ Literature and Organ Design III. 3 Hours.
French organ literature and organ design from the 17th century to the present. LEC.

ORGN 804. History of Organ Literature and Organ Design IV. 3 Hours.
German, North American, British, Scandinavian and Eastern European organ literature and organ design from the Classic era to the present. Prerequisite: Permission of instructor. LEC.

ORGN 805. Selected Topics in Organ. 1-3 Hours.
An exploration of selected topics in organ design and literature. Topics change by semester. May be repeated for credit. LEC.

ORGN 806. Organ Pedagogy. 3 Hours.
Philosophy, methods, and materials of organ pedagogy. Prerequisite: Permission of instructor. LEC.

ORGN 807. Organ Study Tour. 1-3 Hours.
Study of European or North American organs through reading and site visits to instruments. LEC.

ORGN 811. Organ. 3-4 Hours.
For graduate students majoring in organ. May be repeated for credit. Summer session limit three hours. IND.

ORGN 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: ORGN 811. THE.

ORGN 921. Seminar in Performance: _____. 3 Hours.
A detailed study of organ repertoire, performance practice, the history of organ building as it affects the performance of a particular body of literature, liturgical or other extra-musical contexts, and other influences on musical style. May be repeated for credit when topics vary. LEC.
orgn 961. directed performance. 3-4 hours.
individual instruction. open only to students who have been admitted to the d.m.a. program in organ. may be repeated for credit. summer session limit three hours. ind.
orgn 965. doctoral recitals. 0-1 hours.
maximum credit, seven hours. may be repeated for credit. the.
orgn 970. d.m.a. lecture-recital. 1-4 hours.
a lecture-recital and scholarly paper on a subject pertinent to the student's major field. open only to candidates for the d.m.a. in performance. may be repeated for credit. prerequisite: consent of instructor.lesh.
orgn 972. d.m.a. document. 1-4 hours.
a scholarly paper on a subject pertinent to the student's major field. open only to candidates for the d.m.a. in performance and conducting. may be repeated for credit. prerequisite: consent of instructor. the.

Courses

pcus 100. percussion. 1-2 hours.
Applies music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. ind.

PCUS 120. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For freshmen and sophomores. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. ind.

PCUS 121. Percussion. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. ind.

PCUS 221. Percussion. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). ind.

PCUS 300. Percussion. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. ind.

PCUS 320. Drum Set Technique. 1 Hour.
One lesson per week. Small group instruction. For juniors and seniors. A course designed to develop drum set technique, with emphasis placed on understanding the various styles of music to perform on the set: swing, jazz, rock, ethnic, Broadway shows. May be repeated for credit. ind.

PCUS 321. Percussion. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. ind.

PCUS 421. Percussion. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. ind.

PCUS 422. Percussion. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. ind.

PCUS 622. Percussion. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. ind.

pcus 623. senior recital. 1 hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: PCUS 622. LEC.

PCUS 711. Percussion. 1-3 Hours.
For graduate students not majoring in percussion. Audition required. May be repeated for credit. ind.

PCUS 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. lab.

PCUS 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in PCUS 811. ind.

PCUS 811. Percussion. 3-4 Hours.
For graduate students majoring in percussion. May be repeated for credit. Summer session limit three credits. ind.

PCUS 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Consent: PCUS 811. the.

PCUS 921. Seminar in Performance and Pedagogy. 3 Hours.
A study of the interpretive problems encountered in percussion music from the various historical periods, and a study of the performance practices in orchestral, band, chamber ensemble, and solo literature. LEC.

PCUS 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in percussion. May be repeated for credit. Summer session limit three hours. ind.

PCUS 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. the.

PCUS 970. D.M.A. Lecture-Recital. 1-4 Hours.
a lecture-recital and scholarly paper on a subject pertinent to the student's major field. open only to candidates for the D.M.A. in performance. may be repeated for credit. prerequisite: consent of instructor.lesh.

PCUS 972. D.M.A. Document. 1-4 Hours.
a scholarly paper on a subject pertinent to the student's major field. open only to candidates for the D.M.A. in performance and conducting. may be repeated for credit. prerequisite: consent of instructor. the.

Courses

pens 252. percussion ensemble. 0-1 Hours.
for freshmen and sophomores. Study and performance of works for various percussion instrument combinations. May be repeated for credit. lab.

PENS 652. Percussion Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of works for various percussion instrument combinations. May be repeated for credit. lab.

Courses

Pian 100. Piano. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring music. May be repeated for credit. ind.

Pian 111. elementary keyboard musicianship. 2 Hours.
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open
to all students not majoring in music who have little or no music training. IND.

**PIAN 121. Piano. 1-4 Hours.**
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

**PIAN 125. Piano. 1-4 Hours.**
Small group instruction for the development of performance abilities encouraging exploration of creative potentials and self-directed study. For freshmen and sophomores. May be repeated for credit. Prerequisite: Permission of instructor. IND.

**PIAN 144. Elementary Keyboard Skills I. 1 Hour.**
The development of keyboard skills in sightreading, transposition, harmonization, improvisation, score reading, and playing by ear. Open to all music majors with little or no piano background. IND.

**PIAN 148. Elementary Keyboard Skills II. 1 Hour.**
A continuation of PIAN 144. IND.

**PIAN 216. Chamber Music for Pianists. 1-2 Hours.**
For freshmen and sophomores majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

**PIAN 221. Piano. 1-4 Hours.**
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

**PIAN 227. Two-Piano and Four-Hand Literature. 2 Hours.**
Instruction in two-piano and duet repertoire for performance and sight-reading by advanced keyboard performers. IND.

**PIAN 229. Performance Class in Accompanying. 1 Hour.**
A class in the performance of vocal and instrumental accompaniment. Prerequisite: May be repeated for credit. IND.

**PIAN 230. Creative Jazz Piano I. 1 Hour.**
Group instruction in techniques of playing jazz. Prerequisite: Permission of instructor. IND.

**PIAN 237. Accompanying for Dance. 1-3 Hours.**
Instruction in dance accompanying. Open to freshman and sophomore pianists with permission of instructor. IND.

**PIAN 284. Intermediate Keyboard Skills I. 2 Hours.**
Continuation of PIAN 148. Prerequisite: Permission of instructor. IND.

**PIAN 288. Intermediate Keyboard Skills II. 2 Hours.**
Continuation of PIAN 284. Prerequisite: Permission of instructor. IND.

**PIAN 300. Piano. 1-2 Hours.**
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

**PIAN 310. Advanced Keyboard Skills. 2 Hours.**
The development of functional keyboard skills in sight reading, transposition, harmonization, improvisation, score reading, and playing by ear. Prerequisite: MTHC 115 or permission of instructor. IND.

**PIAN 320. Piano Performance Class. 1 Hour.**
Performances, lectures, and discussions of all aspects of performance. May be repeated for credit. Prerequisite: Consent of instructor. LAB.

**PIAN 321. Piano. 1-2 Hours.**
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

**PIAN 325. Piano. 1-4 Hours.**
For juniors and seniors. Small group instruction for the development of performance abilities, encouraging exploration of creative potentials, and self-directed study. May be repeated for credit. Prerequisite: Permission of instructor. IND.

**PIAN 336. Chamber Music for Pianists. 1-2 Hours.**
For juniors and seniors majoring in piano. The study of chamber music literature for piano and various instrumental combinations. Development of rehearsal conducting techniques and leadership skills through collaboration with other musicians. May be repeated for credit. LEC.

**PIAN 402. Master Class. 1 Hour.**
A class in the performance of advanced piano repertoire. Enrollment by permission of the department. IND.

**PIAN 421. Piano. 1-2 Hours.**
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

**PIAN 422. Piano. 1-2 Hours.**
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

**PIAN 429. Performance Class Accompanying. 1 Hour.**
A class in the performance of vocal and instrumental accompaniment. May be repeated for credit. LEC.

**PIAN 430. Creative Jazz Piano II. 1 Hour.**
Group instruction in advanced techniques of jazz improvisation with emphasis on various styles and interpretation of leading jazz performers. Prerequisite: Permission of instructor. IND.

**PIAN 437. Accompanying for Dance. 1-3 Hours.**
Instruction in dance accompanying. Open to junior and senior pianists with permission of instructor. IND.

**PIAN 443. Piano Repertoire I. 3 Hours.**
Study and analysis of keyboard repertoire from its beginning through the Classical period. LEC.

**PIAN 444. Piano Repertoire 2. 3 Hours.**
Study and analysis of keyboard repertoire of the Romantic and Modern periods. LEC.

**PIAN 447. Contemporary Piano Literature. 3 Hours.**
The study of piano literature focusing on music of mid-century modernists through the present day. Prerequisite: PIAN 443 and PIAN 444 or instructor permission. LEC.

**PIAN 448. The Contemporary Pianist. 3 Hours.**
Discover and perfect all of the tools required to become a successful pianist in the 21st Century by learning from the examples of the great pianists of yesterday and today. Prerequisite: PIAN 443 and PIAN 444 or instructor permission. LEC.

**PIAN 522. Piano Technology I. 1 Hour.**
An introduction to the principles of design, theory of operation, maintenance, and tuning of the piano. Lecture and laboratory. Open to junior, senior, and graduate students. LEC.

**PIAN 523. Piano Technology II. 1 Hour.**
A continuation of PIAN 522, Piano Technology I. Application of principles of design, theory of operation, maintenance, and tuning of the piano. Prerequisite: PIAN 522. LEC.

**PIAN 540. Piano Pedagogy I. 2-3 Hours.**
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional
topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: Permission of instructor. LEC.

PIAN 546. Piano Pedagogy II. 2-3 Hours.
Observation and research of the techniques and materials relevant to piano instruction at the elementary to intermediate levels. Additional topics pertinent to music education to include child development, learning, communication, and group dynamics. Prerequisite: PIAN 540 or permission of instructor. LEC.

PIAN 622. Piano. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

PIAN 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: PIAN 622. LEC.

PIAN 624. Piano Workshop. 1-3 Hours.
A short term course covering a piano-related topic. May be repeated for credit. LEC.

PIAN 640. Piano Pedagogy III. 2 Hours.
Practicum in piano instruction at the elementary to intermediate levels. Students enrolled for this course are expected to participate in the Children’s Piano Laboratory Program or the Campus Community Program. Prerequisite: PIAN 546 or permission of instructor. FLD.

PIAN 643. Piano Repertoire I. 3 Hours.
Study and analysis of keyboard repertoire from its beginning through the Classical period. LEC.

PIAN 644. Piano Repertoire 2. 3 Hours.
Study and analysis of keyboard repertoire of the Romantic and Modern periods. LEC.

PIAN 646. Piano Pedagogy IV. 1-2 Hours.
Practicum in piano instruction at the elementary to intermediate levels. Prerequisite: PIAN 640 or permission of instructor. FLD.

PIAN 647. Contemporary Piano Literature. 3 Hours.
The study of piano literature focusing on music of mid-century modernists through the present day. Prerequisite: PIAN 643 and PIAN 644 or instructor permission. LEC.

PIAN 648. The Contemporary Pianist. 3 Hours.
Discover and perfect all of the tools required to become a successful pianist in the 21st Century by learning from the examples of the great pianists of yesterday and today. Prerequisite: PIAN 743 and PIAN 744 or instructor permission. LEC.

PIAN 744. Piano Repertoire 2. 3 Hours.
Study and analysis of keyboard repertoire of the Romantic and Modern periods. LEC.

PIAN 747. Contemporary Piano Literature. 3 Hours.
The study of piano literature focusing on music of mid-century modernists through the present day. Prerequisite: PIAN 743 and PIAN 744 or instructor permission. LEC.

PIAN 748. The Contemporary Pianist. 3 Hours.
Discover and perfect all of the tools required to become a successful pianist in the 21st Century by learning from the examples of the great pianists of yesterday and today. Prerequisite: PIAN 743 and PIAN 744 or instructor permission. LEC.

PIAN 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.
Courses

REC 100. Laboratory in Music Performance. 0 Hours.
This course deals with the performance of music. The goal is to increase the understanding of music and music performance through exposure to a wide variety of repertory and performance styles, mediums, techniques, and related issues. May be repeated. LAB.

Courses

RECO 119. Recorder. 1-4 Hours.
For freshmen and sophomores. Group instruction at the beginning level, two hours per week. Thirty minutes per day practice expected. May not be repeated for credit. Prerequisite: Student must read music and own an alto recorder. IND.

RECO 319. Recorder. 1-4 Hours.
For juniors and seniors. Group instruction at the beginning level, two hours per week. Thirty minutes per day practice expected. May not be repeated for credit. Prerequisite: Student must read music and own an alto recorder. IND.

Courses

SAXO 100. Saxophone. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

SAXO 121. Saxophone. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

SAXO 221. Saxophone. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

SAXO 300. Saxophone. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

SAXO 321. Saxophone. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

SAXO 421. Saxophone. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

SAXO 422. Saxophone. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

SAXO 622. Saxophone. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

SAXO 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: SAXO 622. LEC.

SAXO 711. Saxophone. 1-3 Hours.
For graduate students not majoring in saxophone. Audition required. May be repeated for credit. IND.

SAXO 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

SAXO 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in SAXO 811. IND.

SAXO 811. Saxophone. 3-4 Hours.
For graduate students majoring in saxophone. May be repeated for credit. Summer session limit three hours. IND.

SAXO 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master's Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: SAXO 811. THE.

SAXO 921. Seminar in Performance. 3 Hours.
A study of repertoire and performance techniques from the saxophone's inception to 1950. LEC.

SAXO 922. Seminar in Performance. 3 Hours.
A study of repertoire and extended performance techniques from 1950 to the present. LEC.

SAXO 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in saxophone. May be repeated for credit. Summer session limit three hours. IND.

SAXO 965. Doctoral Recitals. 1-3 Hours.
Maximum seven hours credit. May be repeated for credit. THE.

SAXO 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to the candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

STRG 424. String Pedagogy: ____. 1 Hour.
Lectures, demonstrations, and discussions of such topics as physiological factors, style and interpretation, music editing, teaching materials and repertoire, planning, and evaluation. May be repeated for credit as instrument varies. IND.

STRG 701. String Pedagogy Workshop. 0.5-3 Hours.
A short-term intensive course in string pedagogy intended for school orchestra directors, private teachers, and advanced students. Normally offered during the summer session. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. IND.

STRG 921. Seminar in Performance and Pedagogy. 3 Hours.
Repertoire, performance practice, and pedagogical and stylistic problems relating to stringed instrument music before 1800. LEC.

STRG 922. Seminar in Performance and Pedagogy. 3 Hours.
Stringed instrument repertoire from 1800 to 1875. LEC.

STRG 923. Seminar in Performance and Pedagogy. 3 Hours.
Stringed instrument repertoire from 1875 to present. LEC.
STRG 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TROM 100. Trombone. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TROM 121. Trombone. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

TROM 221. Trombone. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TROM 252. Trombone Choir. 0-1 Hours.
For freshmen and sophomores. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 300. Trombone. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TROM 321. Trombone. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TROM 421. Trombone. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

TROM 422. Trombone. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

TROM 622. Trombone. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

TROM 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: TROM 622. LEC.

TROM 652. Trombone Choir. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trombone. May be repeated for credit. IND.

TROM 711. Trombone. 1-3 Hours.
For graduate students not majoring in trombone. Audition required. May be repeated for credit. IND.

TROM 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

TROM 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in TROM 811. IND.

TROM 811. Trombone. 3-4 Hours.
For graduate students majoring in trombone. May be repeated for credit. Summer session limit three hours. IND.

TROM 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's Recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: TROM 811. THE.

TROM 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trombone. May be repeated for credit. Summer session limit three hours. IND.

TROM 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit. THE.

TROM 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.
TRUM 422. Trumpet. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

TRUM 622. Trumpet. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

TRUM 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: TRUM 622. LEC.

TRUM 652. Trumpet Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of ensemble literature for the trumpet. May be repeated for credit. IND.

TRUM 711. Trumpet. 1-3 Hours.
For graduate students not majoring in trumpet. Audition required. May be repeated for credit. IND.

TRUM 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

TRUM 810. Elective Master's Recital. 1 Hour.
Non-degree elective recital for Master's students. Prerequisite: Concurrent enrollment in TRUM 811. IND.

TRUM 811. Trumpet. 3-4 Hours.
For graduate students majoring in trumpet. May be repeated for credit. Summer session limit three hours. IND.

TRUM 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: TRUM 811. THE.

TRUM 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in trumpet. May be repeated for credit. Summer session limit three hours. IND.

TRUM 965. Doctoral Recitals. 1-3 Hours.
Maximum credit, seven hours. May be repeated for credit. THE.

TRUM 970. D.M.A. Lecture-Recital. 1-4 Hours.
A lecture-recital and scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance. May be repeated for credit. Prerequisite: Consent of instructor. RSH.

A scholarly paper on a subject pertinent to the student's major field. Open only to candidates for the D.M.A. in performance and conducting. May be repeated for credit. Prerequisite: Consent of instructor. THE.

Courses

TUBA 100. Tuba. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

TUBA 121. Tuba. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

TUBA 221. Tuba. 1-4 Hours.
Applied music lessons for sophomores majoring music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

TUBA 300. Tuba. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

TUBA 321. Tuba. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

TUBA 421. Tuba. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.
VION 622. Violin. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.
VION 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.
Courses

VNCL 100. Violoncello. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VNCL 120. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 121. Violoncello. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VNCL 221. Violoncello. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (8 for performance majors). IND.

VNCL 300. Violoncello. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VNCL 320. Cello Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 321. Violoncello. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VNCL 421. Violoncello. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

VNCL 422. Violoncello. 1-2 Hours AE61.
Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VNCL 622. Violoncello. 2-4 Hours AE61.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VNCL 622. LEC.

VNCL 700. Violin. 1-2 Hours.
Applied music lessons for alumni majoring in violin. Audition required. May be repeated for credit. IND.

VNCL 720. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VNCL 800. Violin. 1-2 Hours.
Applied music lessons for seniors majoring in violin. Audition required. May be repeated for credit. IND.

VNCL 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VNCL 811. THE.

VNCL 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violin. May be repeated for credit. Summer session limit three hours. IND.

VNCL 965. Doctoral Recitals. 1-3 Hours.
Maximum of seven hours credit. May be repeated for credit. THE.

VION 331. Baroque Violin. 1-4 Hours.
One or two lessons per week. For juniors and seniors. May be repeated for credit. IND.

VION 421. Violin. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VION 511. Workshop in Stringed Instrument Care and Repair. 2 Hours.
Students will perform repairs such as gluing cracks, applying tailpiece gut, setting and adjusting sound posts, and rehairing bows. Proper care and maintenance of the instrument will be stressed. Prerequisite: Junior standing with a background of stringed instrument study meriting departmental approval. LAB.

VION 622. Violin. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits (3 each semester for 4 semesters) at the 121/221 levels. IND.

VION 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VION 622. LEC.

VION 711. Violin. 1-3 Hours.
For graduate students not majoring in violin. Audition required. May be repeated for credit. IND.

VION 720. Violin Performance Class. 0-1 Hours.
Studio performance of solo, ensemble, and orchestral audition repertoire for students concurrently enrolled in double bass, viola, violin and violoncello study. May be repeated. LEC.

VION 731. Baroque Violin. 1-4 Hours.
May be repeated for credit. IND.

VION 799. Artist Certificate Recital. 1 Hour.
This course is the culminating event and is required for the completion of the Graduate Certificate in Music Performance. LAB.

VION 811. Violin. 1-2 Hours.
For graduate students majoring in violin. May be repeated for credit. Summer session limit three hours. IND.

VION 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VION 811. THE.

VION 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violin. May be repeated for credit. Summer session limit three hours. IND.

VION 965. Doctoral Recitals. 1-3 Hours.
Maximum of seven hours credit. May be repeated for credit. THE.
VNCL 811. Violoncello. 3-4 Hours.
For graduate students majoring in violoncello. May be repeated for credit. Summer session limit three hours. IND.

VNCL 899. Master's Recital. 1 Hour.
Master's Degree Recital: The Master's recital is the culminating event for the Master of Music degree and must be given before the Master's Final Oral Exam. Prerequisite: Corequisite: VNCL 811. THE.

VNCL 961. Directed Performance. 3-4 Hours.
Individual instruction. Open only to students who have been admitted to the D.M.A. curriculum in violoncello. May be repeated for credit. Summer session limit three hours. IND.

VNCL 965. Doctoral Recitals. 1-3 Hours.
May be repeated for credit to a maximum of seven hours. THE.

Courses

VOIC 100. Voice. 1-2 Hours.
Applied music lessons for freshmen and sophomores not majoring in music. May be repeated for credit. IND.

VOIC 104. Class Voice. 1 Hour.
A study of the fundamentals of singing; performance of songs; an approach to voice instruction in a group situation. May be repeated for credit. IND.

VOIC 120. Vocal Performance in English. 1 Hour.
Fundamentals of solo vocal performance with an emphasis on English diction and communicating the English language. IND.

VOIC 121. Voice. 1-4 Hours.
Applied music lessons for freshmen majoring in music. May be repeated for credit. IND.

VOIC 221. Voice. 1-4 Hours.
Applied music lessons for sophomores majoring in music. May be repeated for credit. Prerequisite: 121-level until the music major has accumulated 4 credits (6 for performance majors). IND.

VOIC 270. Lyric Diction for Singers: ____, 1 Hour.
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

VOIC 300. Voice. 1-2 Hours.
Applied music lessons for juniors and seniors not majoring in music. May be repeated for credit. IND.

VOIC 302. Repertoire for the High School Singer. 1 Hour.
Designed for future educators of young voices. Vocal literature and issues related to students aged thirteen to eighteen. May substitute for one semester of the studio voice requirements for Music Education majors with vocal/choral emphasis. Prerequisite: Four semesters of private voice. LEC.

VOIC 320. Vocal Performance Class II. 1 Hour.
Solo vocal performance in a class situation with emphasis including the preparation, planning of repertoire, and interpretive skills appropriate to a recital. Designed for junior/senior voice and theatre/voice majors. Prerequisite: Permission of instructor. Eligibility for VOIC 622. IND.

VOIC 321. Voice. 1-2 Hours.
Applied music lessons for juniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 221-level until the music major has accumulated 8 credits. IND.

VOIC 405. Vocal Literature I. 2 Hours.
A survey of English song. LEC.

VOIC 406. Vocal Literature II. 2 Hours.
A survey of German song. LEC.

VOIC 408. Vocal Pedagogy. 1 Hour.
Knowledge and skills needed to teach voice, with particular attention to lifespan voice anatomy, physiology, and acoustics, diagnosis and correction of vocal inefficiencies, teaching styles, repertoire choice, professional development, and acquaintance with current research in voice science and vocal pedagogy. Includes a voice teaching practicum. (Same as MEMT 408.) LEC.

VOIC 412. Vocal Pedagogy and Advanced Repertoire II. 1 Hour.
Continuation of VOIC 408. LEC.

VOIC 421. Voice. 1-2 Hours.
Applied music lessons for seniors majoring in music. Not for performance majors. May be repeated for credit. Prerequisite: 321-level until the music major has accumulated 12 credits. IND.

Applied music lessons. Must be taken in the semester a recital is being performed and as required by the degree program. Not for performance majors. IND.

VOIC 440. Vocal Performance. 1 Hour.
A class in the performance of vocal repertoire. IND.

VOIC 470. Lyric Diction for Singers: ______, 1 Hour.
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to voice and theatre/voice majors, and to others with approval of instructor. May be repeated for credit as language varies. LEC.

VOIC 490. Opera Workshop. 0-4 Hours.
The study of various aspects of opera, such as character development, aria, chorus, and opera scene study, staging, body movement, and audition techniques. May be repeated for credit. ACT.

VOIC 492. Opera Production. 1-4 Hours.
The preparation and performance of an opera role. May be repeated for credit. ACT.

VOIC 500. Directed Study in: ______. 1-3 Hours.
Investigation of a special topic or project. May be repeated for credit. Prerequisite: Consent of instructor. IND.

VOIC 520. Vocal Coaching. 1 Hour.
In-depth investigation of elements of vocal performance such as language, musical style, tradition, and dramatic content and the communication thereof in preparation for the senior recital. Open to undergraduates majoring in voice and theatre/voice in the senior year, with consent of instructor. May be repeated for credit. IND.

VOIC 622. Voice. 2-4 Hours AE61.
Applied music lessons for juniors and seniors majoring in performance. May be repeated for credit. Prerequisite: Performance majors must accumulate 12 credits at the 121/221 levels. IND.

VOIC 623. Senior Recital. 1 Hour.
Applied music lessons for undergraduate performance majors (Bachelor of Music). Must be taken in semester the senior recital is being performed and as required by the degree program. Prerequisite: Corequisite: VOIC 622. LEC.

VOIC 670. Advanced Lyric Diction for Singers: ______. 1 Hour.
Pronunciation in a specific language to be chosen from Italian, French, English, German, or other languages pertinent to the singer. Open to graduate students in voice and opera performance, and to others with
approval of instructor. May be repeated for credit as language varies.
LEC.

**VOIC 704. Vocal Repertoire: _____. 2 Hours.**
A survey of selected topics in vocal repertoire to be chosen from
categories such as: Italian, German, French, and English songs, oratorio
literature, and art songs by women composers. The course may be
repeated for credit when topic varies. LEC.

**VOIC 705. Advanced Vocal Literature I. 3 Hours.**
An investigation of the development of French melodie. The course will
include directed readings, writing, and performance. LEC.

**VOIC 706. Advanced Vocal Literature II. 3 Hours.**
An investigation of the development of German lieder. The course will
include directed readings, writing, and performance. LEC.

**VOIC 707. Advanced Vocal Literature III. 3 Hours.**
An investigation of the development of songs in English. The course will
include directed readings, writing, and performance. LEC.

**VOIC 711. Voice. 1-3 Hours.**
For graduate students not majoring in voice. Audition required. May be
repeated for credit. IND.

**VOIC 720. Vocal Performance Class II. 1 Hour.**
Solo vocal performance in a class situation with emphasis including the
preparation, planning of repertoire, and interpretive skills appropriate to
a recital. Advanced repertoire and appropriate level of vocal and musical
comprehension shall be expected from the graduate student. Prerequisite:
Consent of instructor. IND.

**VOIC 740. Vocal Performance. 1 Hour.**
A class in the performance of vocal repertoire. IND.

**VOIC 770. Special Studies in Voice: English Lyric Diction for the**
Choral Singer and Soloist. 1 Hour.
A graduate level course designed for the choral director, public school
music teacher and voice teacher. Techniques for achieving a distinct,
unlabored English pronunciation will be studied. The International
Phonetic Alphabet will be employed. IND.

**VOIC 799. Artist Certificate Recital. 1 Hour.**
This course is the culminating event and is required for the completion of
the Graduate Certificate in Music Performance. LAB.

**VOIC 808. Vocal Pedagogy. 1 Hour.**
A course offering performers and beginning teachers of classical singing
a basic overview of vocal production. The class will explore the empirical
and scientific principles of breathing, resonance, timbre, and other
vocal features. Discussions of repertoire choices, vocal health, teaching
styles, career development and other topics pertaining to the training of
singers will be included. Added emphasis will be placed on historical and
contemporary pedagogues through original research. LEC.

**VOIC 811. Voice. 3-4 Hours.**
For graduate students majoring in voice. May be repeated for credit.
Summer session limit three hours. IND.

**VOIC 820. Vocal Coaching. 1-4 Hours.**
In-depth investigation of elements of vocal performance such as:
language, musical style, tradition, dramatic content and the
communication thereof. Open to graduate voice majors with consent of
instructor. May be repeated for credit. IND.

**VOIC 890. Opera Workshop. 0-4 Hours.**
The study of various aspects of opera, such as character development,
aria, chorus, and opera scene study, staging, body movement, and
audition techniques. May be repeated for credit. ACT.

**VOIC 892. Opera Production. 1-4 Hours.**
The preparation and performance of an opera role. May be repeated for
credit. ACT.

**VOIC 899. Master's Recital. 1 Hour.**
Master's Degree Recital: The Master's recital is the culminating event for
the Master of Music degree and must be given before the Master's Final
Oral Exam. Prerequisite: Corequisite: VOIC 811. THE.

**VOIC 900. Directed Study in: _____. 1-3 Hours.**
Investigation of a special topic or project. May be repeated for credit.
Prerequisite: Consent of instructor. LEC.

**VOIC 921. Seminar in Performance: _____. 3 Hours.**
A detailed study of vocal repertoire, performance practice, and stylistic
problems on a selected topic from areas such as oratorio, cantata, song
cycles, vocal chamber music, song, or opera of specific composers (i.e.,
Verdi, Wagner, Mozart, Debussy, Poulenc, Wolf, Strauss), or twentieth
century song. May be repeated for credit. LEC.

**VOIC 960. Vocal Pedagogy. 2 Hours.**
A study of the problems encountered in the teaching of vocal technique,
such as breathing, resonance, tone color, dynamic control, and diction,
and including sessions of supervised teaching. LEC.

**VOIC 961. Directed Performance. 3-4 Hours.**
Individual instruction. Open only to students who have been admitted
to the D.M.A. curriculum in voice. May be repeated for credit. Summer
session limit three hours. IND.

**VOIC 965. Doctoral Recitals. 1-3 Hours.**
Maximum seven hours credit. May be repeated for credit. THE.

**VOIC 970. D.M.A. Lecture-Recital. 1-4 Hours.**
A lecture-recital and scholarly paper on a subject pertinent to the student's
major field. Open only to candidates for the D.M.A. in performance. May
be repeated for credit. Prerequisite: Consent of instructor. RSH.

**VOIC 972. D.M.A. Document. 1-4 Hours.**
A scholarly paper on a subject pertinent to the student's major field. Open
only to candidates for the D.M.A. in performance and conducting. May be
repeated for credit. Prerequisite: Consent of instructor. THE.

**Courses**

**W&P 125. Wind and Percussion Pedagogy. 1 Hour.**
For freshmen and sophomores. Materials and concepts for teaching
beginning and intermediate instrumental students; instrument repair,
adjustments and modification; reed making and adjustment where
appropriate; solo and ensemble repertoire. May be repeated for credit.
Prerequisite: Corequisite: Applied instruction for the appropriate
instrument. (e.g. FRHN 121, PCUS 221). IND.

**W&P 130. Orchestral Repertoire. 1 Hour.**
For freshmen and sophomores. Weekly reading sessions for wind,
percussion and harp students with the objective of acquainting the student
with important orchestral passages for his or her particular instrument.
May be repeated for credit. Enrollment controlled by the instructor in
charge. IND.

**W&P 325. Wind and Percussion Pedagogy. 1 Hour.**
For juniors and seniors. Continuation of WP 125. May be repeated for
credit. Prerequisite: Corequisite: Applied instruction for the appropriate
instrument. (e.g. FRHN 321, PCUS 622). IND.

**W&P 630. Orchestral Repertoire. 1 Hour.**
The study of orchestral literature for wind and percussion instruments.
May be repeated for credit. Permission of instructor. IND.
W&P 655. Independent Study in: _____. 1-4 Hours.
May be repeated for credit. Prerequisite: Consent of advisor and instructor. IND.

W&P 702. Special Studies in Woodwind Instrument Pedagogy. 1-3 Hours.
Physiological factors of woodwind playing, teaching materials and techniques, practice methods, solo and chamber music repertoire, mouthpieces and reeds, discography, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

W&P 704. Special Studies in Brass Instrumental Pedagogy. 1 Hour.
Physiological factors of brass playing, teaching materials and techniques, practice methods, solo and chamber music repertoire, mouthpieces, discography, techniques of tone production, articulation, embouchure, and intonation. May be repeated for credit to a maximum of five hours. LEC.

W&P 706. Advanced Pedagogy Workshops in Orchestral Instruments. 0.5 Hours.
Methods and materials of teaching fundamentals of the instruments. Lecture, class performance, class discussion, teaching demonstration, and library research. Summer session only. Prerequisite: Teaching experience or undergraduate instruction in the instrument, or permission of the instructor. LEC.

The study of percussion pedagogy of Membrane Percussion; Keyboard Percussion; and Jazz/Rock/Commercial Drum Set, Marching and World Percussion. Study will include but not limited to such areas as teaching materials and techniques, repertoire, performance practice, and discography. Course may concentrate on one of the three areas listed above, or be taught as a survey course covering all three topics. May be repeated for credit to a maximum of five hours. LEC.

Courses

WENS 252. Wind Ensemble. 0-1 Hours.
For freshmen and sophomores. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.

WENS 652. Wind Ensemble. 0-1 Hours.
For juniors, seniors, and graduate students. Study and performance of original works for various wind instrument combinations. May be repeated for credit. LAB.

Bachelor of Arts in Fine Arts in Music

B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in Music is offered for students with interests in any area of music: Jazz, Musicology, Music composition, Music theory, Piano/organ/orchestral instruments, or Voice who also wants to consider pursuing a second degree or minor not in the School of Music.

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will gain knowledge in a variety of areas while pursuing the B.A. and may include any approved KU major or minor without adding extra credit hours to their degree program. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities, as well as a senior performance recital.

With this degree, students will be well-rounded prospects for nearly any employer upon graduation. Students can also go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor's, master's, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency.
in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

B.A. in Fine Arts in Music Degree Requirements

The B.A. in Fine Arts in music is offered with a concentration in

- Jazz studies (http://catalog.ku.edu/music/ba/jazz_studies/),
- Musicology (http://catalog.ku.edu/music/ba/musicology/),
- Music theory, (http://catalog.ku.edu/music/ba/music_theory/)
- Piano/organ/orchestral instruments (http://catalog.ku.edu/music/ba/piano_organ_orchestral/), or
- Voice (http://catalog.ku.edu/music/ba/voice/).

A total of 120 credit hours is required. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work. Click a concentration above to be taken to that degree plan.

Bachelor of Fine Arts in Theatre-Voice Program

The Division of Voice offers 2 programs (Bachelor of Fine Arts and Bachelor of Music (p. 2343)) for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

The Bachelor of Fine Arts (B.F.A.) in Theatre and Voice degree requires 124 credits. Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the in-depth exploration of music as well as performing a junior recital and a senior recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for theatre/musical productions, or create their own path in music or music-related endeavors.

The School of Music

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer courses unless they are being transferred for credit. In such cases, only courses with grades of C or better may be accepted. Students must have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition.

There is a limit of two times a prospective student may request an audition for entrance into one of the School's
undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Music Theory Placement**

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website ([http://music.ku.edu/placement-exams/](http://music.ku.edu/placement-exams/)) each semester.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

**Bachelor of Music in Jazz**

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience on their major instrument.

To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

**Undergraduate Admission to the School of Music**

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Transfer Students**

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/apply/) for information about international admissions.
music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. ### Bachelor of Music in Musicology

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience in musicology. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice.

With this degree, students can go on to pursue graduate studies in music, or create their own paths in music or music-related endeavors.

### Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1. KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

### Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted...
contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Transfer Students**

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

**Music Theory Placement**

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

**B.M. Degree Requirements for Musicology Majors**

To graduate, the student must attain a minimum grade-point average of 3.0 in 12 credit hours chosen from MUSC 320, MUSC 340, MUSC 440, MUSC 480 and MUSC courses numbered 602-778. A minimum of 120 hours is required, distributed as follows:

| Total Hours | 124-126 |

Bachelor of Music in Music Theory and Composition

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience in music theory or music composition. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice.

With this degree, students can go on to pursue graduate studies in music, or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble 1 each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

Music Theory and Composition

To graduate, the student must maintain a minimum grade-point average of 3.0 in music theory and composition courses on both the first- and second-year and the junior/senior levels.

Students majoring in music theory (B.A. or B.M.) or music composition (B.M.) must complete MTHC 105, MTHC 115, and MTHC 205 before preparing a portfolio of their work for application to the professional
sequence. The earliest a student may submit a portfolio is the fourth semester. Transfer students must be in residence for at least 1 semester before they can submit a portfolio.

This portfolio must include recent work (scholarly papers for music theory and musical compositions for composers), 2 letters of recommendation (1 from the student's major instrument instructor and 1 from a MTHC professor who has had the student in a class), and a minimum grade-point average of 3.0 in MTHC courses. The student may be asked to provide a demonstration of musicality on his or her major instrument.

Portfolios are accepted once each semester for admission to the professional sequence the following semester. The portfolio is assessed by the MTHC faculty with one of 3 recommendations: admit, revise and resubmit next semester, or deny. Students in music theory are not allowed to enroll in composition are not allowed to enroll in MEMT 246 from the faculty.

B.M. Degree Requirements for the Music Theory Major

A minimum of 120 hours is required for the degree in Music Theory, distributed as follows:

**Basic Courses**

<table>
<thead>
<tr>
<th>Code</th>

</table>

**Total Hours**: 120-121

**B.M. Degree Requirements for the Composition Major**

A total of 120 hours is required for the degree. Courses should be distributed as described for the major in music theory with the following exceptions:

- Students with a major in composition must offer in partial fulfillment of the degree requirements a recital of approximately 45 minutes duration consisting of original works in various media. This is MTHC 498, listed below.
- Pianists and organists take 16 credits of lessons and do not take the additional 8 credits of piano, organ and/or harpsichord lessons while all other instrumentalists or vocalists take only 8 credits of lessons and the additional 8 credits of piano, organ and/or harpsichord lessons.
- MTHC 499 is not required.

**Bachelor of Music in Music Therapy**

**Music Therapy**

The program helps students develop competence for entry into the music therapy profession. The interdisciplinary curriculum emphasizes understanding of human behavior, musical and otherwise. It includes extensive work in music, behavioral science, biological science, and liberal arts, in addition to specific academic, clinical, and research studies in music therapy.

**Music Therapy Program**

The undergraduate music therapy program provides full preparation for entry into the profession. It culminates in the degree of Bachelor of Music with a major in music therapy. Graduates are prepared for general music therapy practice in a variety of settings, which may include, but are not limited to hospitals, schools, community health programs, wellness centers, and private and group settings across the age span. The KU music therapy program is approved by the American Music Therapy Association. Individuals who complete the program are eligible to take the national music therapy board certification examination. The music therapy major does not lead to licensure to teach music in public schools.

**Advising**

Students admitted to music therapy will be assigned an appropriate faculty advisor to work with the student throughout his or her academic career. The undergraduate handbook is available online (http://music.ku.edu/BM/requirements/) and from the MEMT office, 448 Murphy Hall, and provides detailed procedures, suggestions, and specifications.

Regardless of applied performance medium, each entering student should be able to sing independently, in tune, and with acceptable tone quality. Functional keyboard skills (accompanying, playing by ear, improvising, and transposing) are helpful. Experience working with others is helpful. Well-developed interpersonal skills are an asset.

**Admission**

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M. in music therapy as the major on the KU application for admission. Music therapy majors are in plan MTPPS-BM in the School of Music.

Students pursuing the B.M. in music therapy degree should apply for admission to the professional sequence upon completion of the second semester of the sophomore year with 50 or more KU hours. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the director of music therapy. Music therapy majors who have been admitted to the professional sequence are in plan MTPPS-BM in the School of Music.

</tbody>
</table>

Well-developed interpersonal skills are an asset.
Students must be admitted to the music therapy professional sequence to enroll in upper-division music therapy courses. See the Music Therapy Undergraduate Program Handbook online (http://music.ku.edu/requirements/) for details.

Candidates are reviewed for admission periodically. No student may be admitted to the professional sequence for a semester during which he or she will be on academic probation. Application forms for music therapy professional sequence admission are available online (http://music.ku.edu/memt/documents/#undergrad).

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School’s undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

Requirements for the B.M. with a Major in Music Therapy

The degree requires a minimum of 120 semester hours of credit appropriately distributed among general studies, the major, and supporting music areas and behavioral sciences. With careful planning, the program can be completed in about 4½ years. Four academic years of study and clinical work on campus are followed by a full-time, 6-month internship in an approved clinical institution.

The degree requires at least a 3.00 cumulative grade-point average in all course work and a minimum of 3.00 in all MENT courses. All music therapy majors must demonstrate proficiency in the major applied performance medium and in other performance areas.

All students must demonstrate functional vocal skills and ability to perform accompaniments on a portable chordal instrument, such as accordion, autoharp, guitar, or electric piano. These skills are assessed periodically throughout the program.

Professional Sequence

Professional Sequence Admission Requirements

Students should apply for admission to the Professional Sequence as early as possible and must be admitted before beginning the first semester of the junior year. Admission requirements:

1. Cumulative grade-point average of 3.00 or higher.
2. Grade-point average of 3.00 or higher in MEMT courses.
3. A grade of C or higher in each of the following courses:
   - MEMT 150: Introduction to Music Therapy 3
   - MEMT 196: Group Leadership Skills in Music Therapy 2
   - MEMT 250: Human Musical Learning and Development 2
   - MEMT 251: Clinical Techniques for Children 3
   - MEMT 296: Clinical Techniques for Adults 3
4. At least 50 hours of college credit.
5. A signed applied music recommendation form verifying successful completion of the first semester of sophomore-level lessons.
6. Successful completion of the application form.

- Students must successfully complete Clinical Practicum Musicianship Assessment before entering their Clinical Practicum. This assessment is addressed across MEMT 251 and 296.

1. Students must achieve admission to the music therapy professional sequence prior to enrolling in these courses.

- All MEMT professional courses as noted on the undergraduate music therapy degree requirement check sheet must be completed with a C or higher prior to beginning internship.

- Students must pass all Clinical Musicianship and Internship Assessments and Musicianship Portfolio.

- Students must request a graduation check from the School of Music Student Services Office approximately 1 year before the estimated internship date. Graduation checks before that time should occur with the student’s MEMT advisor.

- Upon acceptance to an internship site students must complete and turn in the Music Therapy Internship Information sheet to the MEMT office.

- Students must do the following in the final semester before leaving for internship:
  - review degree requirement check sheet to see that they have met all graduation requirements
  - submit an application for graduation online through Enroll and Pay
• successfully complete the major applied instrument (422 Senior Project Lesson) including the senior 1/2 recital

¹ Students must achieve admission to the music therapy professional sequence prior to enrolling in these courses.

Bachelor of Music in Music Performance: Piano

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience of piano. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.

Bachelor of Music in Music Performance: Strings and Harp

A total of 120 credit hours is required and is designed to further the student's knowledge, practice, and experience on their major instrument in strings. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Ensemble Policy

In order to remain enrolled in studio instruction (lessons), all undergraduate (B.A. & B.M.) and M.M. students who enroll in any level of studio instruction (including nonmajor levels) in band and orchestral instruments must audition for and perform as assigned in a major instrumental ensemble 1 each semester in which they are enrolled. For music majors, 1 ensemble taken for credit each semester is required for graduation. Exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. Electives: 12 credits minimum must be in nonmusic courses 18
Violin majors must take 2 credits of viola lessons (VIOA 300) towards the 18 electives
Total Hours 120

Bachelor of Music in Music Performance: Voice

The Division of Voice offers 2 programs (Bachelor of Music and Bachelor of Fine Arts) for singers interested in art song, opera, oratorio, concert, other classical pieces or vocal teaching. Students receive training in vocal technique, languages and diction, vocal repertoire, acting and the theatrical arts. Performance opportunities range from workshops to fully staged productions, allowing students to develop their talents at the most beneficial pace.

A total of 125 credit hours is required and is designed to further the student's knowledge, practice, and experience in voice. To graduate, a student must earn a minimum grade-point average of 3.0 in all major courses and a minimum average of 2.0 in all course work.

Students will be studying with faculty members who are nationally and internationally recognized. Courses in music theory and musicology are part of the exploration of music as are private instruction, ensemble and chamber music opportunities. All students pursuing the B.M. degree will perform a senior recital on their primary instrument/voice. In addition, performance majors will also complete a junior recital and music composition majors will also give a music composition recital.

With this degree, students can go on to pursue graduate studies in music, establish private studios, audition for music ensembles, or create their own paths in music or music-related endeavors.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://

#### Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program to another.

#### Music Theory Placement

The music theory placement examination is required of all undergraduate transfer students who have not completed a 4-semester theory sequence with an accredited NASM school. It is administered as announced on the School of Music website (http://music.ku.edu/placement-exams/) each semester.
exceptions to this policy are allowed on a case-by-case basis and only by the ensemble conductor in consultation with the faculty member in the studio area or the faculty advisor in music therapy as appropriate.

1 KU Symphony Orchestra, Wind Ensemble, Symphonic Band, Marching Band, or Jazz Ensemble I.

Undergraduate Admission to the School of Music

First-year students should enter the school directly. Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale) and are eligible to return to the college or university last attended in addition to completing a successful audition. Other students can be admitted only with the permission of the dean. Send applications to the Office of Admissions (http://admissions.ku.edu/). Visit the Office of International Recruitment and Undergraduate Admissions (https://world.ku.edu/apply/) for information about international admissions.

Students who wish to major in music must audition. All music students academically approved for admission to the School of Music are admitted contingent upon demonstration by audition of satisfactory level proficiency in their areas of applied music. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

Transfer Students

Students may transfer to the school from other institutions or from other KU schools if they have at least a 2.75 GPA (on a 4.0 scale), are eligible to return to the college or university last attended, and complete a successful audition. Only grades of C or higher are accepted in transfer credit toward degrees offered by the School of Music. Students who wish to transfer performance credit from another institution toward any music degree at KU must validate this credit by audition. Music audition information and application forms are available online (http://music.ku.edu/applyaudition/). There is a limit of two times a prospective student may request an audition for entrance into one of the School's undergraduate degree programs. The second request must be within 12 months of the first and may be as early as 1 month following the first audition. The limitation also applies to students within the School auditioning from one program into another.

### Music Education B.M.E. Program

**Music Education**

The program helps students develop specific skills in planning and delivering instruction in all types of music education classrooms. The curriculum emphasizes both the theoretical and practical elements of human behavior, musical and otherwise, and integrates with this core a variety of learning experiences that prepare the pre-service teacher for the classroom medium. Among these is a broad spectrum of learning experiences both at KU and in area classrooms. These include planning and delivering instruction, classroom management, conducting, assessment, and curriculum design. Within the curriculum, individual emphases are reflected in the choice of major performance medium and...
performance ensembles. The goal of the music education curriculum is to prepare the student for success in the profession.

Advising

Students admitted to music education will be assigned an appropriate academic faculty advisor to work with the student throughout his or her academic career. The undergraduate handbook is available online (http://music.ku.edu/BME/requirements/) and from the MEMT office, 448 Murphy Hall and provides detailed procedures, suggestions, and specifications.

Regardless of applied performance medium, each entering student should be able to sing independently, in tune, and with acceptable tone quality. Functional keyboard skills (accompanying, playing by ear, improvising, and transposing) are helpful. Experience working with others is also beneficial as well. Well-developed interpersonal skills are an asset.

Music Education Program

This program provides full preparation for entry into the profession. It leads to the Bachelor of Music Education and eligibility for licensure to teach vocal, instrumental, and general music in grades pre-K through 12 in the state of Kansas. The program typically requires eight semesters of full-time work, which includes a semester of student teaching and internship in the public schools.

Music Teacher Licensure Program

Teacher licensure in Kansas is a function of the Kansas State Board of Education. Individuals who complete an approved music teacher licensure program are recommended to the state for licensure in music for grades pre-K through 12. Students must meet additional state requirements, such as passing specified standardized tests, before licenses are granted. Contact the licensure officer, 211 J.R. Pearson Hall, 785-864-9602, for information.

Admission

Students must meet or exceed the School of Music academic admission requirements and successfully complete a major performance medium audition to be admitted. Students should declare the B.M.E. in music education as the major on the KU application for admission. Music education majors are in plan ME-BME in the School of Music.

Students pursuing the music education B.M.E. must apply for admission to the professional sequence by the first Monday in February of the sophomore year. Transfer students with more than 45 hours of transfer credit must complete this application the first semester of classes at KU. Students may not enroll in courses in the professional sequence before formal approval by the director of music education. Music education majors who have been admitted to the professional sequence are in plan MEPS-BME in the School of Music.

Students must be admitted to the music education professional sequence to enroll in upper-division music education courses. See the Music Education Undergraduate Program Handbook online (http://music.ku.edu/BME/requirements/) for details.

No student may be admitted to the music education professional sequence for a semester during which he or she is on academic probation. The application form for music education professional sequence admission is available on the MEMT website (http://music.ku.edu/memt/documents/+).
Music Education B.M.E. Program

The Music Education Teacher Licensure Curriculum

The B.M.E. degree requires a minimum of 120 semester credit hours distributed among general studies, the major, professional education class work, and student teaching and internship. The degree requires at least a 3.00 cumulative grade-point average in all course work. Each student must participate in appropriate performing ensembles and demonstrate proficiency in a major applied performance medium and in other performance areas.

Ensemble (7 semesters, 7 hours)

7 hours of credit representing 7 semesters of participation, including experience in small ensembles. Wind and Percussion: 1 semester/1 credit marching band required. Vocal: 6 semesters/6 credits major ensemble and 1 semester/1 credit small ensemble required.

Piano Skills

An audition is required. If skills are insufficient, remedial course work (PIAN 144) is necessary. Students with a major performance medium of piano or organ take only PIAN 310.

Music Education 4 Year Plan

Music Education majors are strongly encouraged to adhere to this sequence of courses.

Students with no prior piano experience should take the keyboard skills sequence (PIAN 144-PIAN 288). Demonstration of skills is needed to pass or test out of PIAN 144-PIAN 288. Students whose major performance medium is piano or organ should take PIAN 310 after completing 2 semesters of music theory (this course is only taken once in the fall term of the sophomore year).

- F = Fall only
- S = Spring only
- B = Both semesters

¹ Courses must be completed before admission to the music education professional sequence.

² Music Theory I and II and Aural Skills I & II should be taken before Music History I or higher.

• Students must apply for admission to the music education professional sequence upon completion of the first semester of their sophomore year.

Professional Sequence

Professional Sequence Admission Requirements

1. Cumulative grade-point average of 3.00 or higher.
2. Grades of C or higher in MATH 101 and 6 hours of English as listed on the application.
3. Satisfactory completion of "Criteria for Admission" courses as shown in the Application for Music Education Professional Sequence Admission.
4. The student must write and attach a one-page essay (12-point font, double-spaced) to the application form that answers the following question: As a music educator in your first year of teaching, reflect on how your music program could impact the community-at-large.
5. A fully completed application form and associated documents must be submitted to the MEMT office in 448 Murphy Hall.

• Transfer students with more than 45 hours of transfer credit must complete the professional sequence application during the first semester of classes at KU.
### Minor in Music

**The School of Music**

The School of Music at the University of Kansas ranks among the finest in America, offering comprehensive programs at the bachelor’s, master’s, and doctoral levels.

The school nurtures and advances the art of music through creation, performance, scholarly inquiry, entrepreneurship, and enhancement of the artistic skills and experiences of the university and regional cultural communities.

The school is a major contributor to the arts community through the student, faculty, and professional performances in Swarthout Recital Hall, Bales Organ Recital Hall, the Robert Baustian Theatre, and the Lied Center of Kansas.

The School of Music is an accredited institutional member of the National Association of Schools of Music (http://nasm.arts-accredit.org/). The entrance and graduation requirements in this catalog conform to the published guidelines of that organization.

### Requirements for the Minor in Music

#### Open to All KU Students

Students must first audition to be accepted as music minors, then may earn a minor in music by taking 24 hours in the courses listed below. At least 12 hours must be junior/senior-level courses, numbered 300 and above (300+). A minimum grade-point average of 2.0 in the minor is required.

</tbody>
</table>

Nine junior/senior music credits numbered 300 and above to be chosen from:
Lessons on same instrument or voice at 300 level, ensembles, and/or music classes (MUS 586, Business of Music, and most MUSC - music history - courses are open to all KU students)

Undergraduate Certificate in Music Enterprise

The Music Enterprise Certificate is a program enhancement option for undergraduate and graduate music major students designed to provide foundational understanding and experiences in establishing, managing, promotion, and otherwise successfully operating business enterprises in the music industry. The intent of the certificate is not to provide comprehensive training in all non-performance aspects of the music business, but rather, to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to function creatively in the music industry today, while also preparing to be adaptable for the changing landscape of music production and consumption in the future. Non-music major students may pursue the Music Enterprise Certificate by permission of the director of the program.

Music Majors: Undergraduate students who have completed a minimum of 60 credit hours, with a cumulative GPA of 3.0 or higher, may declare the Music Enterprise Certificate by completing the declaration in the School of Music Student Services office.

Non-music Majors: Undergraduate non-music majors must have completed a minimum of 60 credit hours, with a cumulative GPA of 3.0 or higher and interview with the director of the program who will determine whether the student has the necessary background.

12 credits required for completion of the certificate.

- Master of Music in Conducting (p. 2351)
- Master of Music in Musicology (p. 2352)
- Master of Music in Music Theory or Composition (p. 2353)
- Master of Music in Music Performance: Brass and Percussion (p. 2354)
- Master of Music in Music Performance: Organ, Church Music, and Carillon (p. 2356)
- Master of Music in Music Performance: Piano (p. 2357)
- Master of Music in Music Performance: Strings (p. 2358)

- Master of Music in Music Performance: Voice and Opera (p. 2360)
- Master of Music in Music Performance: Woodwinds (p. 2361)

Master of Music in Conducting

Master of Music in Conducting Degree Programs

The KU School of Music offers M.M. degree programs in the following areas:

- Choral conducting;
- Orchestral conducting; and
- Wind conducting.

M.M. in Conducting Admission

Applicants are expected to have educational backgrounds equivalent to the B.M. or B.M.E. degree from KU. They should have one or two years of experience in conducting. Such experience may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing ability on an instrument or in voice. Applicants must complete audition-interviews successfully before the divisional faculty and should provide a résumé of their conducting experience, including programs of public appearances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the
A student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

**M.M. in Conducting Degree Requirements**

**Diagnostic Examinations**

All entering graduate students, except those in the MM-Opera program, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

**Master’s Recital**

The conducting degree candidate must present a final concert-length recital consisting of a public choral or instrumental program. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than three weeks before the recital date. The Master’s recital must be given before the final oral exam can occur.

**Final Oral Exam**

Master’s degree students must schedule and pass a final oral examination. The student’s 3-member Graduate Advisory Committee consists of the student’s major professor, one member from the student’s major division and one musicology or music theory professor. This committee administers the final oral exam.

A program of study in band and orchestral conducting (minimum of 30 hours) is as follows:

<table>

**Master of Music in Musicology**

**Master of Music in Musicology Degree Program**

The Master of Music (M.M.) degree in musicology requires a minimum of 30 credits and is designed to further the student’s knowledge and in-depth exploration of musicology (music history) at the post-baccalaureate level.

**M.M. in Musicology Admission**

Applicants are expected to have educational backgrounds equivalent to the B.A. or B.M. from KU or another accredited university. Applicants are expected to have a reading knowledge of German, French, Italian, Spanish, or any other foreign language approved by the department. A language deficiency may be satisfied after entrance into the program. Proficiency at the piano is encouraged. Applicants must submit samples of original scholarly writing. In addition to the required course work, students are encouraged to continue study of performance or composition.

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/
music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Musicology Degree Requirements

Final Oral Exam
Master’s degree students must schedule and pass a final oral exam. For the Master’s degree in musicology, the final oral exam is a defense of the student’s thesis.

The musicology student’s 3-member Graduate Advisory Committee consists of the student’s major professor, one member from the student’s major division and one music theory professor. This committee administers the final oral exam.

The course work for the M.M. degree in musicology (minimum of 30 credits) is as follows:

Master of Music in Music Theory or Composition

Master of Music in Music Theory or Composition Degree Programs
The Master of Music (M.M.) degrees in theory or composition require a minimum of 30 credits and are designed to further the student’s knowledge and in-depth exploration of music theory or composition at the post-baccalaureate level.

M.M. in Music Theory or Composition Admission
Applicants are expected to have educational backgrounds equivalent to the B.A., the B.M. in music theory, or the B.M. in composition from KU. Composition applicants should submit scores and recordings (if available) of original compositions; theory applicants should submit research papers in music theory. Applicants are expected to have a reading knowledge of German, French, Italian, or Spanish. A language deficiency may be satisfied after entrance into the program. In addition to the required course work, students are encouraged to continue study of performance and participate in ensembles on their major instruments.

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/apply/audition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. The master’s thesis in composition shall consist of either a 20-minute work for large ensemble or a 30-minute chamber work, either of which may include electronic media. All thesis proposals must be approved by the MTHC faculty before the student begins work on the thesis.

**Master of Music in Music Performance: Brass and Percussion**

**Master of Music in Performance Degree Programs**

M.M. degree programs in music performance:

- Accompanying
- Bassoon
- Carillon
- Cello
- Church Music
- Clarinet
- Double Bass
- Euphonium
- Flute
- French Horn
- Harp
- Oboe
- Opera Performance
- Organ
- Percussion
- Piano
- Saxophone
- Trumpet
- Trombone
- Tuba
- Viola
- Violin
- Voice

**M.M. in Performance Admission**

The applicant must perform an audition before the faculty of the major performance division. In some cases, an audio recording may be submitted in lieu of a live performance. A complete list of repertoire studied should be submitted with the graduate application. A prescreening audition is required for voice and piano applicants. View School of Music audition requirements and procedures ([https://music.ku.edu/grad-audition-music/](https://music.ku.edu/grad-audition-music/)).
Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Performance Degree Requirements

Diagnostic Examinations

All incoming graduate students are required to take diagnostic exams in musicology and music theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master’s Recital

A final solo recital is required for all master’s degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed in the School of Music archives.

Final Oral Examination

All Master’s students in Music must schedule a Final Oral Exam during the semester the student plans to graduate. The Master’s Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student’s 3-member advisory committee. The committee is comprised of two faculty members from the student’s major division and a Musicology or Music Theory faculty member.

Students in the Master of Music program who play band or orchestral instruments must enroll in a major ensemble for a minimum of 2 semesters.

- Viola
- Violin
- Voice

M.M. in Performance Admission

The applicant must perform an audition before at least two members of the faculty of the major performance division. In some cases, a video recording may be submitted in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Students in opera performance must take a minimum of 1 year each in French, German, and Italian before entering graduate studies or before completing the M.M. degree. For the master’s degree program in voice, the language requirement is 1 year of 2 of the following: French, German, or Italian. Both programs have prerequisites in French, German, and Italian diction. Students found deficient in a particular area of diction must enroll in the specific course in which they are deficient and pass it with a minimum grade of C or demonstrate proficiency by passing a diction diagnostic examination. A student whose transcript shows she or he has passed a particular language diction course normally is considered proficient in the diction of that language.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the
start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M. in Performance Degree Requirements

Diagnostic Examinations

All incoming graduate students, except those in the MM-Opera program, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Master’s Recital

A final solo recital is required for all master’s degrees in performance. A recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve recital content well in advance but no less than 3 weeks before the recital date. The candidate must file a copy of the final recital program with the School of Music before the final oral examination is scheduled. The audio recording of the recital will be placed the School of Music archives.

Final Oral Examination

All Master’s students in Music must schedule and pass a Final Oral Exam during the semester the student plans to graduate. The Master’s Recital must be performed before the Final Oral Exam can be taken. The Oral Exam is administered by the student’s 3-member advisory committee. The committee is comprised of the student’s major professor, one member from the student’s major division, and one Musicology or Music Theory faculty member.

Language and Diction Requirements

Students in opera performance must take a minimum of 1 year each in French, German, and Italian before entering graduate studies or before completing the M.M. degree. For the master’s degree program in voice, the language requirement is 1 year of 2 of the following: French, German, or Italian. Both programs have prerequisites in French, German, and Italian diction. Students found deficient in a particular area of diction must enroll in the specific course in which they are deficient and pass it with a minimum grade of C or demonstrate proficiency by passing a diction diagnostic examination. A student whose transcript shows she or he has passed a particular language diction course normally is considered proficient in the diction of that language.

A program of study in opera performance (minimum of 30 credits) is as follows:

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please
visit the School of Music Admissions webpage (http://music.ku.edu/
applyaudition/#graduate) for current information.
Graduate programs in the School of Music are open to students with
acceptable baccalaureate degrees, as specified by the admitting areas,
whose academic records indicate that they can do successful work at
the graduate level. Regular admission requires a bachelor's degree and
a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or
from another regionally accredited institution or foreign university with
substantially equivalent bachelor's degree requirements.
Programs of study leading to the Master of Music (M.M.), Master of
Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor
of Philosophy (Ph.D.) are offered through the School of Music. Specific
admission procedures and degree requirements for the M.M. and M.M.E.
programs are described under division headings. Specific admission
procedures and degree requirements for the D.M.A., Ph.D. (musicology/
music theory), and Ph.D. (music education/music therapy) are listed in the
appropriate sections.
Program Areas
Graduate study in the School of Music is organized into program areas
within 2 units:

- Music includes programs in composition, conducting, musicology,
music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in
music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is
required for all course work counted toward any graduate degree in the
School of Music. If the overall grade-point average falls below 3.0, the
student is placed on probation for one semester; if the cumulative average
is not 3.0 or higher after the next semester, the student is dismissed
from the program. Students must also achieve at least a grade of B in
thesis, lecture-recital, document or dissertation, and on each recital for
satisfactory completion of degree requirements.
Diagnostic Examinations
All entering graduate students (except music education, music therapy,
and opera performance majors) must take written diagnostic examinations
in musicology and music theory. These are given the week before the
start of classes in the Fall and Spring semesters to determine whether a
need exists for remedial work in those areas prior to enrolling in graduate
coursework. Students who show the need for remediation must complete
the prescribed review courses or show mastery of the material by re-
examination. Graduate students entering programs in piano must take
additional tests in piano literature given before the start of classes. A
student is exempt from all diagnostic exams if he or she received a
bachelor's or master's degree in music from the University of Kansas
within the previous 4 years.

M.M. in Performance Degree Requirements
Diagnostic Examinations
All incoming graduate students, except those in MM-Opera, are required
to take diagnostic exams in Musicology and Music Theory. The exams
are given during the week before the Fall and Spring semesters begin.
Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-
taking the exam the next time it is given (one re-take only) or 2) enrolling
in the appropriate review course and receiving at least a grade of "C."
The student must satisfy all diagnostic deficiencies by the end of the third
semester of enrollment.

Master's Recital
A final solo recital is required for all master's degrees in performance.
A recital preview is left to the discretion of the faculty members of each
division. In divisions with no preview requirement, the option to have a
preview is still available to students and faculty members. Divisions must
approve recital content well in advance but no less than 3 weeks before
the recital date. The candidate must file a copy of the final recital program
with the School of Music before the final oral examination is scheduled.
The audio recording of the recital will be placed the School of Music
archives.

Final Oral Examination
All Master's students in Music must schedule and pass a Final Oral Exam
during the semester the student plans to graduate. The Master's Recital
must be performed before the Final Oral Exam can be taken. The Oral
Exam is administered by the student's 3-member advisory committee. The
committee is comprised of the student's major professor, one member
from the student's major division, and one Musicology or Music Theory
faculty member.

Students in the Master of Music program who play band or orchestral
instruments must enroll in a major ensemble for a minimum of 2
semesters.

A program of study for students in bassoon,
clarinet, flute, oboe, and saxophone (minimum of
30 credits) is as follows:

<table>

Admission requirements are as follows:

Music Therapy Admission

Music Education M.M.E. Program

Master of Music Education

With a Major in Music Education or Music Therapy

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master's Handbook available in the division office and online (http://music.ku.edu/MME/requirements/).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission

Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate licensure program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Three (3) letters of recommendation regarding applicant’s qualifications for graduate study in their selected program.
4. Submission of a video recording appropriate to degree of application.
5. Submission of resume.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

• Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
• Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M.E. with a Major in Music Education

Course and Proficiency Requirements

The degree requires a minimum of 30 hours of graduate credit. At least one-half of the required credit hours must be in courses open only to
graduate students. At least 20 of the hours must be in regularly scheduled classes excluding directed study, research, and thesis or comprehensive examination (as applicable). The work must be distributed as indicated in the categories shown on the appropriate Master’s Degree Program Plan (http://music.ku.edu/MME/requirements/).

Course Distribution

- At least 17 hours in MEMT including MEMT 812 Research in Music Education and Music Therapy (3 hours), MEMT 899 Master’s Thesis (3-5 hours if thesis option) or MEMT 898 Comprehensive Examination (1 hour if nonthesis option), and additional hours to reach the minimum elected from 700- and 800-level MEMT courses, subject to the advisor’s approval. At least 2 courses must be at the 800 level.
- At least 10 graduate hours outside of MEMT, including
  - at least 2 hours of applied music or conducting;
  - at least 3 hours in musicology, theory, or composition;
  - at least 3 hours in a supportive elective area; and
  - additional non-MEMT hours necessary to reach the minimum.

All of these selections are subject to the advisor’s approval.

Final Master’s Examination (Thesis)
The student must be enrolled at the time the final master’s exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final thesis copy to each committee member 2 weeks in advance of the scheduled exam date.

The candidate will begin by giving a twenty-minute oral presentation on his or her thesis, but the exam is not confined to that topic. Thereafter, the candidate will address questions posed by the committee arising from the candidate’s presentation and the thesis document.

Final Master’s Examination (Non-Thesis)
The non-thesis option typically functions as a terminal degree and the work must be distributed as indicated in the categories shown on the appropriate Degree Program Plan. This option culminates with enrollment in a 1-credit hour comprehensive final examination (MEMT 898 Comprehensive Examination) and the subsequent portfolio and presentation.

The student must be enrolled at the time the final non-thesis master’s exam is held. The non-thesis master’s exam includes presenting a portfolio and will be scheduled for a period of 1 hour. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (http://music.ku.edu/MME/requirements/) in the MEMT Graduate Handbook.

Plan of Study

The Master of Music Education with a major in music education program plan is available online (http://music.ku.edu/MME/requirements/).

Music Therapy M.M.E. Program

Master of Music Education

With a Major in Music Therapy

The division’s graduate programs include advanced professional and scholarly study for music educators and music therapists, licensure/certification programs for those with baccalaureate degrees in other fields who plan to enter the music education or music therapy professions (these initial licensure/certification programs typically also require collateral undergraduate study), and advanced study for individuals in related disciplines. Areas of emphasis, curricula, examinations, and regulations and procedures are described in the MEMT Master’s Graduate Handbook available in the division office and online (http://music.ku.edu/MME/requirements/).

M.M.E. in Music Education or M.M.E. in Music Therapy Admission

Admission requirements are as follows:

1. Undergraduate grade-point average of 3.0 or higher on a 4.0 scale.
2. An appropriate baccalaureate degree to support the individual’s goals for master’s study. Students seeking entrance into the graduate licensure program in music education or the graduate equivalency program in music therapy should have substantial backgrounds in music regardless of undergraduate major.
3. Three (3) letters of recommendation regarding applicant’s qualifications for graduate study in their selected program.
4. Submission of a video recording appropriate to degree of application.
5. Submission of resume.
6. Other supporting materials are required.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.
Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

M.M.E. with a Major in Music Therapy
Course and Proficiency Requirements
The degree requires a minimum of 30 hours of graduate credit. At least one half of the required credit hours must be in courses open only to graduate students. At least 20 of the hours must be in regularly scheduled classes excluding directed study, research, and thesis or comprehensive examination (as applicable).

Course Distribution
- The program must include at least 17 hours of graduate work in the division, including MEMT 812 Research in Music Education and Music Therapy (3 hours), MEMT 864 Philosophy and Theory of Music Therapy (3 hours), MEMT 890 Practicum in Music Therapy (2 hours), MEMT 899 Master’s Thesis (3 hours if thesis option) or MEMT 898 Comprehensive Examination (1 hour if nonthesis option), and additional hours to reach the minimum elected from 700- and 800-level MEMT courses, subject to the advisor’s approval. At least 2 courses must be at the 800 level. At least 9 of these hours must be in regularly scheduled courses.
- At least 10 hours in supportive studies outside MEMT.
- Proficiency as a performing musician must be demonstrated before the degree may be awarded.

The work is distributed as indicated in the categories on the appropriate Degree Program Plan found online (http://music.ku.edu/MME/requirements/). All of these selections are subject to the advisor’s approval.

The M.M.E. with a major in music therapy may be earned only by individuals eligible to sit for the national examination offered by the Certification Board for Music Therapists (CBMT).

Final Master’s Examination (Thesis)
The student must be enrolled at the time the final master’s exam is held. The exam will be scheduled for a period of 2 hours. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final thesis copy to each committee member 2 weeks in advance of the scheduled exam date.

The candidate will begin by giving a twenty-minute oral presentation on his or her thesis, but the exam is not confined to that topic. Thereafter, the candidate will address questions posed by the committee arising from the candidate’s presentation and the thesis document.

Final Master’s Examination (Non-Thesis)
The non-thesis option typically functions as a terminal degree and the work must be distributed as indicated in the categories shown on the appropriate Degree Program Plan. This option culminates with enrollment in a 1-credit hour comprehensive final examination (MEMT 898 Comprehensive Examination) and the subsequent portfolio and presentation.

The student must be enrolled at the time the final non-thesis master’s exam is held. The non-thesis master’s exam includes presenting a portfolio and will be scheduled for a period of 1 hour. The examination committee shall be comprised of the student’s major advisor and 2 other graduate faculty members jointly selected by the student and major advisor. It is the student’s responsibility to present the final portfolio to each committee member 2 weeks in advance of the scheduled examination date.

More information about the thesis or non-thesis option is available online (http://music.ku.edu/MME/requirements/) in the MEMT Graduate Handbook.

Plan of Study
The Master of Music Education with a major in music therapy program plan is available online (http://music.ku.edu/MME/requirements/).

Doctor of Musical Arts
Programs

Doctor of Musical Arts in Composition

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Composition

Applicants should submit at least 3 scores of original works (including master’s thesis), recordings if available, and lists of past performances.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student selects a faculty advisory committee, in consultation with the major advisor, subject to the consent of the faculty members involved, and approved by the associate dean. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations.
Recitals
Composition students must present a public program of original compositions with approximately 45 minutes of music and participate in at least one work as either a performer or conductor.

All recitals and public appearances are graded by the student’s graduate advisory committee chair. The student must achieve at least a grade of B on each recital for satisfactory completion of degree requirements.

Written and Oral Comprehensive Examinations
Composition doctoral students must take written qualifying examinations in composition, music theory and musicology when most of the course work has been completed and the research skills/responsible scholarship requirements have been fulfilled. All diagnostic deficiencies must be satisfied before taking the written qualifying and oral comprehensive exams. After successful completion of the written qualifying examinations, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee.

Dissertation in Composition
Candidates in composition must submit to the student’s graduate advisory committee a proposal for a large-scale composition at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. The composition proposal should outline a large-scale work in a medium chosen in consultation with the committee director, reflecting the student’s primary focus within the profession of composition, and should include a preliminary analysis.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination. For students in composition, the examination is primarily a defense of the large-scale composition.

The student must receive at least a grade of B on the composition for satisfactory completion of degree requirements.

Examinations
At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

(A work for large ensemble, a major concerto, a work for chorus and orchestra or an opera, or a major work involving live performers and electronic media. A written analysis of the work must be included after the title page in the full score.)

Composition majors must present a public program of original compositions approximately 45 minutes in duration before being admitted to the comprehensive examination.

Doctor of Musical Arts in Conducting

Doctor of Musical Arts
The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission
The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Conducting
Applicants are expected to have had experience in conducting that spans a period of not less than 2 years. This may include work in public school, college, or with other amateur or professional ensembles. Applicants normally are expected to have a high level of performing ability on an instrument or in voice. Applicants are expected to submit preliminary audition materials that include a DVD recording of the applicant conducting in performance and in rehearsal, a CD recording of an ensemble trained and conducted by the applicant, and a prescribed formal analysis project. Details can be found at the band, choral, and orchestral links on the School of Music’s website (http://music.ku.edu/). An entrance interview-audition is required for admission. The audition is heard by a committee composed of the Graduate Faculty of the conducting divisions. Approval by a majority of the committee is required for acceptance into the program. The audition may include

1. Harmonic and melodic dictation and/or sight-singing;
2. Score identification;
3. Score reading at the keyboard; and
4. Conducting from a band, choral, or orchestral score to be selected by the examiners.

International students may submit a DVD. The Graduate Faculty in the conducting divisions will review this recording.

Students applying to the D.M.A. program in choral conducting must display a working knowledge of 2 of the following 4 languages: French,
German, Spanish, and Italian. A working knowledge normally implies at least 2 semesters of undergraduate study.

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applications/graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another nationally or regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Master of Music (M.M.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music therapy), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.

**D.M.A. Degree Requirements**

**Research Skills and Residency**

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

**Diagnostic Exams**

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

**Advisory Committee**

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members; at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

**Program of Study**

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and in choral, orchestral, and wind conducting must perform a total of 3 doctoral recitals. This number does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Doctoral conducting students are expected to perform 3 public, concert-length recitals. Up to 2 recitals may consist of the combination of works conducted with various official university ensembles over the course of several semesters. The third recital must be a single program with a major ensemble assigned as part of course work or teaching duties and presented as a regular program in that ensemble's performance schedule. The third recital may include a complete performance of an opera, ballet/dance, or musical. A student who wishes to use an ensemble other than
an official university ensemble must obtain permission to do so from the directors of ensembles.

For the first 2 required recitals in the D.M.A. program in performance and conducting, a recital preview is left to the discretion of the faculty members of each division. In divisions with no preview requirement, the option to have a preview is still available to students and faculty members. Divisions must approve the recital content well in advance but no less than 3 weeks before the recital date. Normally, there is no recital preview for the final recital.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Examinations
At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Brass and Percussion

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

• Church music (organ or choral conducting emphasis),
• Composition,
• Conducting (choral, orchestral, or wind), and
• Areas of performance.

D.M.A. Admission
The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Performance
The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another nationally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

• Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
• Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency
Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations
All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. The student must pass all diagnostic exams before being allowed to enroll in courses in those subjects. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee
Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study
A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of
the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals
All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student will remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. students and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 3 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student’s advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Organ and Church Music

Doctor of Musical Arts
The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:
- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission
The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Performance
The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant
also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#/graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

**D.M.A. Degree Requirements**

**Research Skills and Residency**

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

**Diagnostic Exams**

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of “C.” The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

**Language Requirement**

All organ and church music doctoral students must demonstrate competence in one foreign language. Approved languages include French and German for organ majors and French, German, or Latin for Church Music majors. Students may petition the organ faculty for approval of a language other than those stated.

**Advisory Committee**

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

**Program of Study**

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral
program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

**Church Music with Choral Conducting emphasis** must present 2 choral recitals and 1 organ or voice recital. **Church Music with Organ emphasis** must present 2 organ recitals and 1 choral recital.

**Written and Oral Comprehensive Examinations**
Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

**Document or Lecture-Recital**
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website. Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

**Examinations**
At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

**Cognate**
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Piano

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master’s degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master’s recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except those in MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course. The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.
Advisory Committee

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Strings

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform a 40-minute recital program including the repertoire requirements listed by instrument on the Graduate Audition page: https://music.ku.edu/grad-audition-music (https://music.ku.edu/grad-audition-music/). The applicant must perform an audition before at least two members of the faculty of the major performance division. In some cases, a video recording may be submitted
in lieu of a live performance. A complete list of repertoire studied, including past recital programs, should be included with the graduate application. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

**Graduate Admission to the School of Music**

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

**Program Areas**

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

**Diagnostic Examinations**

All entering graduate students (except MM-Opera) are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

**Advisory Committee**

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

**Program of Study**

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

**Written and Oral Comprehensive Examinations**

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills

**D.M.A. Degree Requirements**

**Research Skills and Residency**

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801 Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credits hours are considered full time.

**Advisory Committee**

Each doctoral student must form a Graduate Advisory Committee. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from Musicology or Music Theory (at least 1 from Musicology for D.M.A. composition), and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

**Program of Study**

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

**Recitals**

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the three doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

**Written and Oral Comprehensive Examinations**

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills
requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital
Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations
At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.

Cognate
Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee. Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Voice

Doctor of Musical Arts
The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission
The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Performance
The applicant must be prepared to perform the equivalent of a full master's recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music
Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas
Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.
At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given during the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Exams

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Students who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student’s graduate advisory committee.

Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Language and Diction

Students in the D.M.A. program in voice must take or have taken a minimum of 1 year each of French, German, and Italian, and courses in English, French, Italian, and German diction before completing the D.M.A. program. If deficient in any language or diction coursework, as determined either through transcript evaluations or during the audition when selections from each language have been performed, the student must enroll in the specific course for that deficiency and pass with a grade of C or better. All deficiencies must be satisfied before the oral comprehensive exam can be scheduled.

Examinations

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination/defense for candidates for the D.M.A. degree.
Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee.

Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Musical Arts in Music Performance: Woodwinds

Doctor of Musical Arts

The Doctor of Musical Arts (DMA) degree is a professional degree program that recognizes exceptional student academic and music qualifications in preparation for professional careers, including teaching at the university level. The DMA student has the opportunity to collaborate with music scholars, theorists, and other performers to attain a broad and well-rounded foundation for advanced careers in music. The degree of Doctor of Musical Arts is offered in:

- Church music (organ or choral conducting emphasis),
- Composition,
- Conducting (choral, orchestral, or wind), and
- Areas of performance.

D.M.A. Admission

The applicant is expected to have a master's degree, or its demonstrated equivalent, in the proposed field. In addition to official transcripts and letters of recommendation, all applicants should submit résumés of their training and experience in teaching and performing.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog. Further admission requirements are listed below.

Performance

The applicant must be prepared to perform the equivalent of a full master's recital as deemed appropriate by the major performance division. The audition is heard by at least two members of the major division Graduate Faculty. The applicant should consult the major performance division for specific memory and repertoire requirements. The applicant also should submit with the application a comprehensive repertoire list indicating work studied, memorized, performed in public, or ready for immediate performance. In the case of international students, acceptance may be achieved by submitting a video tape (DVD) to be reviewed by the Graduate Faculty in the major division. A pre-screening audition is required for voice and piano applicants. View School of Music audition requirements and procedures (https://music.ku.edu/grad-audition-music/).

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/apply/graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor's or master's degree in music from the University of Kansas within the previous 4 years.
D.M.A. Degree Requirements

Research Skills and Residency

Before scheduling the oral comprehensive exam, doctoral students must satisfy the residency, basic research skills, and responsible scholarship requirements. MUSC 801: Music Bibliography and Research (or its equivalent as determined by the Musicology division) will satisfy the research skills and responsible scholarship requirements.

Two semesters, which may include one summer term, must be spent in full time resident study. Full time is defined as 9 credit hours in the Fall and Spring Semesters and 3 credit hours in the summer. For those with Graduate Teaching Assistantships, 6 credit hours are considered full time.

Diagnostic Examinations

All incoming graduate students, except MM-Opera, are required to take diagnostic exams in Musicology and Music Theory. The exams are given during the week before the Fall and Spring semesters begin. Diagnostic deficiencies can only be satisfied in one of two ways: 1) re-taking the exam the next time it is given (one re-take only) or 2) enrolling in the appropriate review course and receiving at least a grade of "C." The student must satisfy all diagnostic deficiencies by the end of the third semester of enrollment.

Advisory Committee

Each graduate student, in consultation with the major advisor, selects a Graduate Advisory Committee subject to the consent of the faculty members involved, and approval of the School of Music Graduate office. The committee consists of 5 faculty members: at least 2 faculty members from the major division, 1 from musicology or music theory (at least 1 from musicology for D.M.A. composition), 1 from the School of Music at large and 1 from outside the MUSIC department. This committee administers the comprehensive and final oral examinations. Performance members of the advisory committee grade the required degree recitals.

Program of Study

A Program of Study approved by the major advisor must be submitted for the approval of the Associate Dean for Academic Affairs by the end of the second term of admission. Student who do not submit a Program of Study by the end of the second semester shall not be permitted to enroll in third semester courses.

Recitals

All students in performance and conducting must perform a total of 3 public recitals. This does not include the D.M.A. lecture-recital if the student selects a lecture-recital as a final project. At least two of the three degree recitals must be performed before the oral comprehensive examination.

The first of the doctoral recitals is considered to be a qualifying recital for determining whether the student can remain in the doctoral program. It must be given within the first two semesters of enrollment unless a petition is submitted for an extension.

Written and Oral Comprehensive Examinations

Performance D.M.A. students must take written qualifying examinations in Musicology, Music Theory, and the major area. Composition D.M.A. and Ph.D. students in Musicology and Music Theory take written qualifying exams in Music Theory and Musicology. After successful completion of the written examinations and the residency and research skills requirements, the student is eligible to schedule the oral comprehensive examination administered by the student's graduate advisory committee. Majors in performance and conducting must have presented 2 of the 3 required recitals before taking the oral examinations.

Document or Lecture-Recital

Candidates in performance, conducting, and composition must submit to the graduate advisory committee a proposal for a D.M.A. lecture-recital document, or a longer D.M.A. document only, at the Oral Comprehensive Exam or at least 12 weeks prior to the scheduled defense. Guidelines for proposals can be found on the School of Music website.

Upon satisfactory completion of all other degree requirements, candidates must schedule a final oral examination (defense). The student must receive at least a grade of B on the document, lecture-recital, or composition for satisfactory completion of degree requirements.

Examinations

At least 1 month must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination for candidates for the D.M.A. degree.

Cognate

Each D.M.A. student (not including Composition) may choose a defined cognate area of 12 credits with the approval of the student's advisory committee.

Hours taken to fulfill the Musicology, Music Theory and elective requirements may be used to meet the optional 12 credit Cognate.

Doctor of Philosophy

View requirements for:

- Doctor of Philosophy in Music (p. 2380)
- Doctor of Philosophy in Music Education (p. 2382)

Doctor of Philosophy in Music

Ph.D. in Music

The Ph.D. in Music is offered in Musicology or Music Theory.
Ph.D. in Music Admission

The Doctor of Philosophy degree in music is offered in musicology and music theory. The applicant is expected to hold a Master of Music degree with emphasis in musicology or music theory from KU or an equivalent master’s degree from another accredited institution. In addition to the required transcripts and letters of recommendation, the applicant for admission to the Ph.D. program should submit a resume or CV of professional training and experience and samples of original scholarly writing.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor’s degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:

- Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
- Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations

All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

Doctor of Philosophy in Music Degree Requirements

Foreign Language Requirements

Aspirants to the Ph.D. degree in music theory and musicology are expected to demonstrate reading knowledge of German and a Romance language chosen from French, Italian, Portuguese, Spanish, or another foreign language approved by the department. Reading proficiency must be demonstrated before scheduling the oral comprehensive examination. The student also may be advised to develop reading proficiency in another language or languages in order to pursue research for the dissertation.

Course of Study

Specific course work for each student is arranged individually in consultation with the student’s advisor. The Ph.D. program normally requires 4 years of full-time study beyond the master’s degree, with the first 2 years devoted to course work. A minimum of 18 credit hours is devoted to the dissertation, an original contribution to knowledge in the student’s research area.

Students in musicology must complete 2 semesters of MUSC 940 Seminar on Selected Topics in Musicology. Students in music theory must complete 2 semesters of MTHC 789 Seminar on Special Topics in Music Theory. In addition, students must complete at least 3 more 3-credit-hour courses in advanced musicology and at least 3 more 3-credit-hour courses in advanced music theory.

Although the Ph.D. program does not include a minor area, students are encouraged to continue their study of performance and/or composition, and may be advised to take non-music courses that are directly applicable to their fields of research for the dissertation.

For general information on academic requirements, residence, tenure, and enrollment, see the Graduate Studies (p. 2540) section of the online catalog.

Research Skills and Responsible Scholarship

Doctoral students are required to have training in both responsible scholarship and research skills pertinent to the doctoral level of research in their field of study.

To satisfy both components, Ph.D. students in Musicology or Music Theory must complete MUSC 801 Music Bibliography and Research (or its equivalent) and, if available, participate in advanced performance seminars.

Scholarly Presentation

Each candidate for the Ph.D. degree in musicology and music theory must make a public presentation of no less than 20 minutes on a scholarly topic. This requirement may be fulfilled by reading a paper at a national or regional meeting of a society in the student’s discipline or in a colloquium at KU.
Written and Oral Comprehensive Examinations

Students must take written examinations in music theory and musicology when most of the course work has been completed and research skills/responsible scholarship requirements have been fulfilled. Some major divisions also may require a written examination in the major area. Upon successful completion of all written examinations, the student is eligible to schedule the oral comprehensive examination administered by the graduate advisory committee. With the satisfactory completion of both written and oral comprehensive examinations the aspirant is admitted to candidacy for the degree of Doctor of Philosophy.

Dissertation Proposal

No later than the end of the semester after successful completion of the written and oral comprehensive examinations, the candidate, in consultation with the faculty dissertation committee, must submit a dissertation proposal of several pages with a preliminary bibliography, outline, and description of the project and research plan.

Final Oral Examination

Following completion of the dissertation, a final oral examination is scheduled in which the candidate presents and defends the results of dissertation research and is expected to respond to questions from the faculty committee. A grade of at least B must be achieved on the dissertation for satisfactory completion of the degree requirements.

Doctor of Philosophy in Music Education

Ph.D. in Music Education

The Doctor of Philosophy with an emphasis in either music education or music therapy focuses on research and scholarship. It is often sought by those who aspire to careers in research and graduate-level teaching. The requirements help the student develop broad and profound understanding of musical behavior, sophisticated skill and extensive experience in pursuing new knowledge of such behavior, and a rational system for evaluating the relationships between the specialty and other areas of human understanding. The program culminates with completion of a substantial piece of original research.

Detailed information about admission processes in Music Education and Music Therapy can be found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

Ph.D. in Music Education Admission

Requirements for Regular Admission

1. Master's grade point average of at least 3.5 on a 4.0 scale.
2. Appropriate baccalaureate and master’s degrees to support the individual’s goals for doctoral study.
3. Three (3) letters of recommendation estimating the applicant’s potential for success in doctoral study.
4. Documentation of at least 3 years successful full time experience, or its equivalent, as a professional music educator if seeking a concentration in music education, or at least 5 years successful full-time experience as a professional music therapist, or its equivalent, if seeking a concentration in music therapy.
5. Submission of a video recording appropriate to the degree emphasis.
6. A reasoned statement of professional goals and research interests.
7. An interview with the appropriate faculty for area of emphasis.
8. Final official degree conferred transcripts(s) must be sent directly from all previous colleges or universities.
10. Other supporting materials may be required.

Additional detailed admission requirements and information are found online (http://music.ku.edu/memt/documents/#graduate) in the MEMT Graduate Application Procedure document.

Graduate Admission to the School of Music

Application procedures and program requirements can change. Please visit the School of Music Admissions webpage (http://music.ku.edu/applyaudition/#graduate) for current information.

Graduate programs in the School of Music are open to students with acceptable baccalaureate degrees, as specified by the admitting areas, whose academic records indicate that they can do successful work at the graduate level. Regular admission requires a bachelor's degree and a grade-point average of at least a B (3.0 on a 4.0 scale), from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor's degree requirements.

Programs of study leading to the Master of Music (M.M.), Master of Music Education (M.M.E.), Doctor of Musical Arts (D.M.A.), and Doctor of Philosophy (Ph.D.) are offered through the School of Music. Specific admission procedures and degree requirements for the M.M. and M.M.E. programs are described under division headings. Specific admission procedures and degree requirements for the D.M.A., Ph.D. (musicology/music theory), and Ph.D. (music education/music therapy) are listed in the appropriate sections.

Program Areas

Graduate study in the School of Music is organized into program areas within 2 units:
• Music includes programs in composition, conducting, musicology, music theory, and areas of performance.
• Music Education and Music Therapy (MEMT) includes programs in music education or music therapy.

At least a 3.0 grade-point average, overall and in the major area, is required for all course work counted toward any graduate degree in the School of Music. If the overall grade-point average falls below 3.0, the student is placed on probation for one semester; if the cumulative average is not 3.0 or higher after the next semester, the student is dismissed from the program. Students must also achieve at least a grade of B in thesis, lecture-recital, document or dissertation, and on each recital for satisfactory completion of degree requirements.

Diagnostic Examinations
All entering graduate students (except music education, music therapy, and opera performance majors) must take written diagnostic examinations in musicology and music theory. These are given the week before the start of classes in the Fall and Spring semesters to determine whether a need exists for remedial work in those areas prior to enrolling in graduate coursework. Students who show the need for remediation must complete the prescribed review courses or show mastery of the material by re-examination. Graduate students entering programs in piano must take additional tests in piano literature given before the start of classes. A student is exempt from all diagnostic exams if he or she received a bachelor’s or master’s degree in music from the University of Kansas within the previous 4 years.

Ph.D. in Music Education Degree Requirements

Research Skills
Doctoral students in music education and music therapy at KU must demonstrate research skills by completing 3 research projects suitable for publication. These may be developed and completed independently or in consultation with appropriate doctoral faculty members. There must be a project for three different types of research methodologies, usually representing methods of descriptive, experimental, and historical (including the history and logic of ideas) research. If those methods are chosen the descriptive and experimental research articles should be presented in APA style. The historical research article may be presented in Turabian, MLA, or APA style. The student may propose other divergent methodologies if those fit his/her program of study more adequately. It is up to the doctoral program planning committee to approve the methodologies each student utilizes.

Each completed project is reviewed by the student’s doctoral planning committee, which rules in the majority whether the project is of sufficient quality for publication in a national, refereed research journal in music education or music therapy. The committee chair will determine if the projects will be reviewed by additional faculty not a part of the program planning committee. Single-author studies that have been published or accepted for publication in such journals may be used to demonstrate these skills.

Completion of each of the 3 research projects must be certified by the student’s mentor/advisor in music education or music therapy on the MEMT Doctoral Check list in the student’s file in the MEMT office. The mentor/advisor must submit an appropriate MEMT Do-All form after the completion of each project.

Responsible scholarship requirements are met by satisfactory completion of courses MEMT 812 Research in Music Education and Music Therapy and MEMT 920 Doctoral Seminar in Music Education and Music Therapy.

Preliminary and Comprehensive Examinations
The student must pass a series of examinations, culminating with the comprehensive oral examination.

The music education and music therapy Ph.D. handbook is available online (http://music.ku.edu/PHD/requirements/) and in the MEMT office, and includes information about patterns of course work, the Ph.D. minor, examinations, and the dissertation.

Plan of Study
Course requirements for the doctoral degree are flexible. The Ph.D. program requires a minor. Each student’s program is planned specifically in light of his or her background and to meet the needs of the anticipated academic and professional career. However, each student is expected to achieve a broad understanding of human musical behavior and to become skilled in research. Professional competence, not hours of credit per se, is the underlying requisite for conferring the degree.

The student works with her or his faculty advisor to complete a Degree Requirement Program Plan. The advisor submits the completed program plan with the MEMT Do-All form.

Graduate Certificate in Music Enterprise

The Music Enterprise Certificate is a program enhancement option for undergraduate and graduate music major students designed to provide foundational understanding and experiences in establishing, managing, promoting, and otherwise successfully operating business enterprises in the music industry. The intent of the certificate is not to provide comprehensive training in all non-performance aspects of the music business, but rather, to allow students to explore how to combine their own musical interests and priorities with the tools and concepts necessary to function creatively in the music industry of today, while also preparing to be adaptable for the changing landscape of music production and consumption in the future. Non-music major students may pursue the Music Enterprise Certificate by permission of the Associate Dean for Academic Affairs in Music.

Music Majors: Graduate students in good standing (non-probationary) may declare for the Music Enterprise Certificate at any time during their course of study. There are no admission requirements for music majors.

Non-Music Majors: Non-music graduate students in good standing (non-probationary) who wish to be admitted to the Certificate program must interview with the Director of the Program who will determine whether the student has the necessary background.

12 credits are required to complete the certificate.

ENTR 703 Marketing Your Own Business 3

MUS 586 is a prerequisite for MUS 587 and MUS 588.

Graduate Certificate in Music Performance

The Graduate Certificate in Music Performance offers a one-year program providing an intensive period of post-baccalaureate study in music performance or conducting. It is intended for exceptionally gifted and accomplished performers and conductors seeking professional performing careers, but not wishing to engage in academic studies required for a graduate degree. Study is available in woodwinds, brass, percussion, strings, piano, voice, organ, church music, jazz, carillon and conducting (band, orchestra and choir).

Admission to Graduate Performer’s Certificate Program

Candidates for admission to the Graduate Certificate in Music Performance must provide proof of a bachelor’s degree in keeping with the Admission to Graduate Study policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applicants whose native language is not English must have a minimum TOEFL total score of 65 (Internet-based) to be considered for acceptance into the Graduate Certificate in Music Performance program.

Twelve (12) credit hours must be completed during one year of study to obtain the Graduate Certificate in Music Performance. An additional twelve (12) credit hours in music performance must be completed if continuing for a second year of study.*

Courses are in the following categories (credit hours are per year):
- Applied Studio Instruction (6)
- Large Ensemble (2)
- Chamber music/Jazz Combo/Accompanying/Coaching (2)
- Recital (1)
- Community Outreach Performance Project (1) or Elective (1)

*International Graduate Students

Federal regulations require F-1 international graduate students to maintain an enrollment of 9 credit hours per semester until their final semester of enrollment. Elective courses in the School of Music or courses in the AEC may be taken to reach this enrollment. Students enrolling in a combination of AEC and music courses will be issued a “pathway” I-20 instead of a Certificate I-20.

Applied Studio Instruction Courses

Students are required to enroll in 3 credit hours each semester in applied studio instruction with the appropriate faculty member.

Large Ensemble

Students are required to enroll in 1 credit hour each semester in a large ensemble specific to their area of instruction.

Chamber music/Jazz Combo/Accompanying/Coaching

Students are required to enroll in 1 credit hour each semester in a course specific to their area of instruction.

Recital

Students are required to enroll in 1 credit hour of recital in the final semester of their course load.

MUS 799 Artist Certificate Recital

Community Outreach Performance Project

Students may enroll in 1 credit hour to satisfy the outreach project. All projects are overseen by the Associate Dean for Performance Activities. Students for whom this course is not appropriate will take an elective course (see Elective Courses).

MUS 800 Directed Study: Music Engagement and Outreach

Elective Courses

Students are strongly advised to consult with their primary professor to choose an elective course(s) that is consistent with their primary course of study. International Graduate Students who have a TOEFL score between 65 and 80 (Internet-based) must take a minimum of 3 credits through the Applied English Center (AEC) during their first semester of enrollment.
Nursing

The School of Nursing is one of three schools at the University of Kansas Medical Center (http://www.kumc.edu/) (KUMC) in Kansas City, Kansas. Academic programs at KU Medical Center are offered through the Schools of Health Professions, Medicine, and Nursing. In addition to the Kansas City campus location, the School of Nursing also has a campus location in Salina, Kansas. The Office of Graduate Studies at KUMC (http://www.kumc.edu/academic-affairs/graduate-studies.html) handles matters related to graduate programs in Health Professions, Medicine, and Nursing.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (CCNE) (https://www.aacnnursing.org/CCNE/). (https://www.aacnnursing.org/CCNE/ 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.kbsn.org/). The Nurse-Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (ACME) (https://www.midwife.org/acme/) of the American College of Nurse-Midwives, 8403 Colesville Road, Suite 1550, Silver Spring, MD, 20910, (240) 485-1800.

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, students use the catalog of the year they entered KU, see the catalog archives (http://catalog.ku.edu/archives/) and advisor (http://www.advising.ku.edu/) for details.

School of Nursing Degree Programs

Degrees (p. 2385)

Bachelor of Science in Nursing (p. 2404)
Master of Science in Nursing (p. 2410)
Doctor of Philosophy in Nursing (p. 2413)
Doctor of Nursing Practice (p. 2415)

Certificates (p. 2385)

Post-Master's Certificate Programs in Nursing (p. 2419)
Graduate Certificate - Adult-Gerontology Acute Care Nurse Practitioner (p. 2420)
Graduate Certificate - Adult-Gerontology Primary Care Nurse Practitioner (p. 2421)
Graduate Certificate - Family Nurse Practitioner (p. 2423)
Graduate Certificate - Health Professions Educator (p. 2427)
Graduate Certificate - Health Informatics (p. 2160)
Graduate Certificate - Nurse Midwifery (p. 2428)
Graduate Certificate - Psychiatric/Mental Health Nurse Practitioner (p. 2430)

Undergraduate Programs

The Bachelor of Science in Nursing (BSN) (p. 2404) program prepares baccalaureate generalist nurses for professional nursing practice. The American Association of Colleges of Nursing's (AACN) Essentials of Baccalaureate Education for Professional Nursing Practice provide the framework for this first step in professional nursing education (AACN, 2008). The roles of the baccalaureate generalist include: provider of care, designer/manager/coordinator of care, and member of a profession. Baccalaureate generalist education provides the foundation for all graduate nursing education. This traditional BSN program is a full-time program, requiring on-campus attendance. The traditional BSN program is offered through both the Kansas City and Salina campus locations.

The online RN to BSN (https://catalog.ku.edu/nursing/bs/#admissiontext) program provides registered nurses (RN) a flexible format to complete the baccalaureate degrees and expand career options. The program is fully online, accessible 24 hours a day, and can be completed in one calendar year of full-time study or up to five years of part-time study. Students can enter the program at any semester, i.e., spring, summer or fall. In the KU School of Nursing’s RN to BSN program, students will refresh skills and learn new ones, with a curriculum that will broaden abilities in many areas, including leadership and critical thinking.

The Community College Nursing Partnership (CCNP) (https://catalog.ku.edu/nursing/bs/#admissiontext) offers the convenience of staying at a community college while pursuing both the Associate Degree in Nursing (ADN) and Bachelor of Science in Nursing (BSN). The program bypasses the traditional prelicensure associate degree nursing step. Instead, the curriculum makes it possible for students to complete the ADN and BSN simultaneously, through on-campus courses at the community college and online courses through KU School of Nursing. After completing the CCNP program, eligible students are awarded both an ADN and a BSN and are eligible to take the National Council Licensing Exam (NCLEX) for registered nurses.

High School Preparation

High school students planning to enter the baccalaureate program in nursing are encouraged to follow a general college preparatory course of study. Such a course usually emphasizes basic preparation in English, a foreign language, mathematics, natural science, and social sciences.

Graduate Programs

Basic admission requirements are listed in the Graduate Studies (p. 2540) section of the online catalog. Individual graduate programs may have additional specific requirements including prerequisite undergraduate courses. These are listed or referenced in program descriptions. Combined degree options are available.

The School of Nursing offers the following graduate programs:

- Master of Science (p. 2410)
- Doctor of Philosophy (p. 2413)
- Doctor of Nursing Practice (p. 2415)
- Nursing Certificate Programs (p. 2419)
- Interprofessional Certificate Programs (p. 2419)

For online information about graduate programs, visit the School of Nursing website (http://nursing.kumc.edu/).
Undergraduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Forgiveness

Academic forgiveness does not apply in the School of Nursing.

Application

BSN program admission is competitive and occurs each fall semester. Applications are due October 15 the year prior to admission.

Credit/No Credit

Undergraduate students may choose to select a Credit/No Credit option for one course enrollment per semester. This option is not available for courses required of the student's major or minor program of study. For more information, visit the KU Policy Library (http://policy.ku.edu/). Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Grading

Courses in which grades of D and F are earned do not count toward graduation.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent of their graduating class may graduate with distinction. The upper third of those awarded distinction may graduate with highest distinction. The list is compiled each spring and includes August, December, and May graduates.

Honor Roll

Students with grade-point averages of 3.5 who have completed at least 12 hours are recognized on the honor roll or dean's list in fall and spring. An Honor Roll notation appears on the transcript.

Honors Graduates

For students who complete the School’s Honors Program, designation of Departmental Honors appears on the transcript.

Independent Study Through KU Continuing Education

Students may complete up to 31 hours of Independent Study through KU Continuing Education, credit-by-examination, and/or extension courses.

Probation

Students whose cumulative grade-point average (GPA) falls below 2.0 are placed on probation. The associate dean of Student Affairs and

Enrollment Management notifies the student by letter. It is the student’s responsibility to seek a conference with the student affairs advisor. The student and the student affairs advisor assess the situation jointly and make appropriate recommendations.

A student is removed from probation when, upon completion of the next 12 credit hours of enrollment, he student's cumulative GPA is equal to or greater than 2.0. Only courses required for the nursing major (junior/senior course work) apply toward the required GPA average for removal from probation. No student may graduate with a nursing and overall grade-point average less than 2.0.

If a student on probation does not attain a cumulative GPA equal to or greater than 2.0 at the end of the probationary semester, the student is dismissed for academic reasons. One nursing course may be repeated one time only if necessary to earn the minimum grade of C or S. Failure to achieve a minimum grade of C or S in two nursing courses or one repeated nursing course results in the student’s dismissal from the program.

Repetition of Courses

For admission to the school, grades in all courses taken and retaken are included in the grade-point average. All grades are considered for calculation of honors and awards.

Transfer of Credit

CredTran (http://credittransfer.ku.edu/) is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU. Only transfer grades of C or higher apply toward graduation at KU.

Graduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/). For Graduate Studies regulations, see Office of Graduate Studies, Medical Center Campus (p. 2573) section of this catalog.

Academic Forgiveness

Academic forgiveness does not apply in the School of Nursing.

Credit/No Credit

Graduate students may select the Credit/No Credit option for courses that do not fulfill a degree requirement, but this option may be limited in certain programs. Students should follow the policy outlined in the University Senate Rules and Regulations, Section 2, article 2.27, and contact the department or program for more information.

Nursing (Graduate) Courses

IPHI 820. Program, Project, and Communication Planning. 2 Hours. Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed. The use of evolving information technologies to improve program, project and communication planning is emphasized. Prerequisites: Corequisite: NRSG 880, or consent of instructor. LEC.
IPHI 850. Introduction to Health Informatics. 2 Hours.
This course provides a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. LEC.

IPHI 851. Transforming Health Care through Use of Information Systems and Technology. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will be explored for their impact on patient care and safety. The role of legal, regulatory, ethical and security issues will be discussed as they apply to clinical and consumer information technologies. Prerequisite: Consent of Instructor. LEC.

IPHI 852. Health Data: Theory and Practice. 3-4 Hours.
Includes 2 credit hour lecture and 1-2 credit hour practicum. Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. Prerequisite: None. LEC.

IPHI 853. Abstraction and Modeling of Healthcare Information. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified health care information requirements. Object-oriented techniques will be introduced, including Unified Modeling Language and Unified Modeling Methodology, to facilitate process analysis and design proposal development. Prerequisite: NRSG 820 and consent of instructor. LEC.

IPHI 854. Knowledge Management in Healthcare. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. Knowledge management is the creation, communication, and leveraging of a healthcare organization's knowledge assets. Defining knowledge, describing the knowledge creation cycle, and the identification of the knowledge worker and his/her impact on the organization are discussed. Information technology and communities of practice are presented in a balanced approach supporting a systematic viewpoint of the knowledge management process. Knowledge management theory is enhanced with the performance of a knowledge audit and the development of knowledge management tools. (Same as NRSG 854.) Prerequisite: NRSG 820 and consent of instructor. LEC.

IPHI 855. Health Informatics Practicum. 1-3 Hours.
In collaboration with healthcare information faculty, preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. This course is only open to students enrolled in the dual PharmD and MS in Health Informatics degree. Prerequisite: All leadership core courses, IPHI 852, IPHI 853. Prerequisite or Co-requisite: IPHI 851, IPHI 854, IPHI 860, or consent of instructor. PRA.

IPHI 860. Research Project. 2 Hours.
Students will conduct a health informatics research project. A research report, designed artifact, or other appropriate deliverable will be developed. Prerequisite: A research course and two informatics core courses, or consent of instructor. The research project must meet research guidelines for the MS Informatics program. LEC.

IPHI 957. Health Informatics, Human Factors, and Ergonomics as Applied to Patient Safety. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The use of information systems including medical devices is paramount in achieving patient safety. Students will attain an inclusive understanding of how human factors and ergonomic principles can be used to improve patient safety in the design, implementation, and evaluation of information systems and medical devices. Additionally, health care professionals will acquire skills to appropriately apply error reduction strategies developed in high reliability organizations. Prerequisite: Consent of instructor. LEC.

IPHI 958. Knowledge Representation and Interoperability. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The need to exchange clinical information consistently between health care providers, care settings, researchers and other requires syntactic and semantic interoperability. Requirements and approaches to meet interoperability will be explored. Standards for messaging, terminology, and knowledge representation will be investigated. Prerequisite: Consent of instructor. LEC.

Nursing (Graduate) Courses

NRSG 700. Analysis of Variance for Nursing Research. 2 Hours.
In this course, students will learn appropriate analytic approaches for experimental and quasi-experimental research designs. Basic statistical foundations such as distributional assumptions and hypothesis testing will be reviewed. Essential statistical concepts, including effect size, power and sample size, and error rates will be discussed in the context of experimental designs. The core focus of the course will be a general linear model approach to analysis of variance (ANOVA) methods including one-way ANOVA, contrasts and post hoc tests, factorial designs, analysis of covariance (ANCOVA), and repeated measures ANOVA. Applications of methods for nursing and healthcare research will be examined. Prerequisite: Graduate level introductory statistics course or consent of instructor. LEC.

NRSG 722. Scholarly Writing for the Health Professional. 3 Hours.
Development of scholarly writing skills is emphasized to promote professional communication and to enhance professional image. Students enrolled in this interdisciplinary course analyze their own and others' writing to improve their written communications. Writing skills are practiced and developed by critiquing published articles, and by preparing written memos, letters, abstracts, and a manuscript. Legal and ethical issues related to the publication process are explored. Prerequisite: Admission to the graduate program, or consent of instructor. LEC.

NRSG 748. Theories for Practice and Research. 3 Hours.
Theory development and analysis techniques provide the framework for the study of concepts and theories from nursing and related disciplines. Particular emphasis will be placed on the relationship of theory and
research in the development of nursing knowledge to support evidence-based practice. This course will enhance the decision-making skills for choosing and using concepts and theories that guide practice. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 754. Health Care Research. 3 Hours.
This course will enable the student to synthesize nursing knowledge and make recommendations to translate research findings into practice within diverse health care settings. Research methods, processes and findings for use in practice will be critically evaluated. Emphasis will be placed on formulating relevant research questions from theory and practice. Prerequisite: Admission to the graduate nursing program, Graduate Statistics, or consent of instructor. LEC.

NRSG 755. Professionalism in Advanced Nursing Practice. 3 Hours.
An analysis of economic, political, legal, ethical, professional, societal and cultural issues is conducted within the context of advanced nursing practice. Application of concepts essential to understanding, influencing and leading change in health care delivery specific to advanced nursing practice is emphasized. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 801. Advanced Health Assessment and Clinical Reasoning. 3 Hours.
The purpose of this course is to develop knowledge and skills for advanced clinical nursing practice, including comprehensive history and physical exam across lifespan. Content on special populations, communication with patients and care teams, cultural considerations, health promotion and prevention, and use of electronic health records will be discussed with opportunity for application. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 803. Introduction to Clinical Research. 1 Hour.
This course will provide a comprehensive overview to clinical research. The student will gain an understanding of how to develop clinical research questions including protocol design and the factors that should be considered in initiating a clinical research study. This will include biostatistical considerations, the recruitment of study participants, regulatory issues, and data management, and defining measures and instruments. Students will gain knowledge of how to define clinical research among the various institutional entities involved with clinical research at the University of Kansas Medical Center such as the Research Institute (RI), General Clinical Research Center (GCRC) and the Human Subjects Committee (HSC). Additionally, one component of the course will focus on how to apply for funding (grantsmanship), critical appraisal of research studies, and how to present research data. Prerequisite: Consent of instructor. LEC.

NRSG 804. Interpreting Research for Applied Science. 3 Hours.
Research relevant to therapeutic intervention comes from a variety of disciplines involving varied research designs and analysis strategies. Students in this course will examine selected research studies and gain skill in analyzing methods and results as well as in applying research findings to practical problems. Students also will design their own research project reflecting their area of interest. Prerequisite: Corequisite: NRSG 748, 754, and 755 or consent of instructor. LEC.

NRSG 805. Understanding Disability through Mass Media. 2 Hours.
This class is an overview of how mass media frames disability for the public. This course will focus on issues related to disability and the mass media representation including journalism, TV, film, advertising and the internet. Topics discussed will be the various models of media representation of disability, the impact of stigma in mass media imagery, the impact of cultural and media representations on the experiences of people with disabilities, content created by and for people with disabilities, news about disability rights in the US society, and “hidden” disabilities. Also considered will be the healthcare response to these images and to people with disabilities. The course will be offered online in a synchronous format. Prerequisite: Consent of instructor. LEC.

NRSG 806. Advanced Physiology. 3 Hours.
A course designed to lead to an advanced comprehension of the physiology of organ systems in the human in both cellular and organ processes. Physiology subject matter relevant to clinical health sciences include membrane transport, muscle, cardiovascular, respiratory, renal, gastrointestinal, neurological, and endocrine function. Cellular mechanisms include the structure and function of ion channels and pumps, mechanisms of calcium regulation, excitation-coupling processes. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NRSG 807. Genetics in Primary Care. 2 Hours.
This course is designed to give the primary care nurse practitioner and other graduate nursing students a foundation in medical genetics. The basics of genetics, common genetic disorders and genetic testing are discussed. The application of this knowledge to counsel individuals at risk for genetic disorders is emphasized through the use of case studies. Ethical, legal and clinical practice issues and perspectives of primary care counseling in genetics are addressed. Prerequisite: Admission to the Graduate Nursing Program or Consent of Instructor. LEC.

NRSG 808. The Social Context for Health Care Policy. 2 Hours.
Using a local/single clinical issue students examine ways to abstract this issue into a social policy context. Local exemplars are used throughout the course to demonstrate the leadership and structural systems required to affect change in policy. Strategies to identify constituencies and build coalitions are studied. Prerequisite: NRSG 755, or consent of instructor. LEC.

NRSG 809. Health Promotion and Complementary Therapeutics. 3 Hours.
Current trends in health promotion and clinical preventive care across the lifespan are examined. Specific guidelines for assisting clients to maintain/improve health and/or prevent illness are reviewed. Attention is given to the roles of the health care provider and care recipient in screening, communication, and counseling. The use of complementary (non-pharmacological) therapeutics in assisting clients to achieve goals of health promotion is examined. The recommendation and use of non-pharmacological interventions will be evaluated based on research findings related to selection of therapeutics and measurement of expected outcomes following use of a particular intervention. Prerequisite: Admission to the graduate nursing program, or consent of instructor. LEC.

NRSG 812. Advanced Pathophysiology. 3 Hours.
Course focus is the in-depth scientific knowledge base relevant to selected pathophysiological states confronted in advanced nursing practice. This information provides a foundation for clinical assessment and the formulation of decisions related to clinical diagnosis and the management of therapeutic regimens. Age specific and developmental alterations are correlated with clinical diagnosis and management. Application is made through age appropriate examples. Prerequisite: Admission to the graduate nursing program or consent of instructor. LEC.

NRSG 813. Advanced Pharmacology. 3 Hours.
The clinical application of specific categories of drugs, commonly encountered in primary care settings is discussed. The use of protocols, prescription writing, and the ethical/legal, and economic issues surrounding the advanced nurses' role in prescribing and monitoring pharmacologic therapies in the ambulatory setting are explained. Factors such as age-appropriate content related to pharmacokinetics, dosages,
expected outcomes, and side effects of the drugs are discussed. First line versus second line drugs, alternate drugs, drug interactions, adjusting drug dosages, patient education, and compliance issues related to drug therapy are addressed. The nurse’s role and responsibility related to data collection, problem identification, and consultation with the physician is explored. Application is made through age-appropriate case studies. Prerequisite: NRSG 812 Advanced Pathophysiology or consent of instructor. LEC.

NRSG 820. Program, Project, and Communication Planning. 2 Hours. Strategies to promote program, project, and communication planning are presented and applied by the student. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed. The use of evolving information technologies to improve program, project and communication planning is emphasized. Prerequisites: Corequisite: NRSG 880, or consent of instructor. LEC.

NRSG 821. Clinical Dynamics and Interventions in Diabetology. 3 Hours. A complexity science framework is used to discuss current and innovative concepts and trends in the care of person with diabetes. The disease process of diabetes, preventive measures, complications, pharmacologic, technologic, lifestyle interventions and self-management techniques based on current evidence are presented and analyzed in relations to care of persons with diabetes across age groups and in different settings. Consideration is given the complexity of the co-morbidities that accompany diabetes as well as the special approaches to age appropriate treatment and cultural diversity factors that influence care. External barriers that contribute to decrease in quality outcomes are analyzed and innovative solutions are proposed. Prerequisite: NRSG 801, NRSG 813, or Consent of Instructor. SEM.

NRSG 826. Global Perspective and Diversity in Healthcare. 2 Hours. Cultural receptivity is integrated into the collaboration, development, and implementation of health programs at the local, national, and international level. Frameworks that emphasize the meanings of health and healthcare; prevention and management; and related ethical, economic, and social justice concerns are introduced. Students partner with a community of interest to understand their health and illness beliefs, identify barriers to healthcare access, integrate the historical, social, political and economic forces that impact healthcare. Together they plan and implement appropriate strategies to influence positive community outcomes. Prerequisite: NRSG 880, or consent of instructor. LEC.

NRSG 827. Advanced Concepts in Public Health Nursing. 2 Hours. Public health is addressed in terms of common values and interests as well as particular client populations (vulnerable and at risk groups) across the lifespan. Health promotion and disease prevention for whole communities and selected vulnerable and at risk aggregates are emphasized. Ethical and social justice concerns as well as public policy and legislative issues in population-focused health care are discussed. Selected models, concepts, theories, and research in public health provide the framework for identifying, exploring, prioritizing and planning interventions for public health concerns. Ultimately, a grant proposal is developed to support the action plan. Prerequisite: Prerequisites: NRSG 754, NRSG 755, NRSG 809, NRSG 880, NRSG 885, IPHI 820, PRVM 830. Corequisites: NRSG 828 or consent of instructor. LEC.

NRSG 828. Public Health Nursing: Practicum I. 3 Hours. Students are provided with an opportunity to explore advanced practice roles within the context of public health needs. Based on each student’s goals and interests, health related needs of an identified population are assessed, analyzed, and synthesized; and a plan of action proposed. Prerequisite: Corequisite: NRSG 827, or consent of instructor. LEC.

NRSG 829. Public Health Practicum. 3 Hours. Students will complete an intensive practicum in a community/public health setting. Prerequisite: NRSG 827, NRSG 828 or Consent of Instructor. LEC.

NRSG 839. Global Perspectives and Diversity in Healthcare: Practicum. 2 Hours. Students will have the opportunity to integrate concepts and theories of global health and diversity by direct program planning, delivery, and evaluation of care activities with a vulnerable population. Students will partner with a community of interest to provide directed advanced nursing care and or leadership activities via individual/population/organizational assessment, intervention, and evaluation. Emphasis will be placed on building cultural competence with an understanding of the historical, social, political, and economic forces of health within a specific community setting or geographic area. The worldview of the individual/population/organization will be respected and integrated into all aspects of health care delivery. Prerequisite: NRSG 826 or consent of instructor. LEC.

NRSG 841. Reproductive Endocrinology. 2 Hours. In-depth examination of the anatomy and physiologic processes of reproduction are studied, and will include normal growth and development, as well as clinical genetics. Essential information will be focused on understanding of the reproductive hormones and regulation of the menstrual cycle. With a complete understanding of menstrual hormone regulation, students will be better prepared to apply concepts to alterations that are encountered with maturation/development, puberty, pregnancy, lactation, menopause, and management of common gynecological needs (such as contraception). Prerequisite: NRSG 812 or Consent of Instructor. LEC.

NRSG 842. Topics in Mental Health Nursing. 1-5 Hours. Investigation of issues and psychiatric mental health problems relevant to a selected population in mental health nursing. Prerequisite: Consent of instructor. LEC.

NRSG 844. Advanced Psychiatric Assessment. 3 Hours. Advanced psychiatric assessment of children, adults and the elderly will be covered, including conducting patient-centered, culturally competent interviews in simulated situations. Epidemiology of psychiatric disorder is addressed. Assessment for psychiatric diagnoses of substance abuse, mood and anxiety disturbances, psychosis, dementia and disorders arising in childhood and adolescence are emphasized. Assessment of dangerous behaviors and crisis intervention is covered. Prerequisite: Corequisite: NRSG 801, or consent of instructor. LEC.

NRSG 850. Mental Health Assessment of Infants, Children and Adolescents. 3 Hours. This is an advanced course in infant, child and adolescent mental health assessment development for those individuals who desire to gain greater knowledge and understanding of complex mental health issues in children, adolescents and their families. The course focus is to identify deviations between normal and abnormal development. Identification of environmental and social determinates will be examined. Recognition of pre-birth risk factors affecting children and protective measure that promote positive growth and development will be discussed. Assessment tools and strategies for effective assessment will be reviewed. Emphasis on the legal and ethical issues regarding safety and well-being of children and families will be addressed. Prerequisite: NRSG 748, or consent of instructor. LEC.

NRSG 851. Psychopharmacology for Advanced Nursing Practice. 3 Hours. Understanding of the neuron, neurotransmitter and receptor functioning as the basis for psychopharmacotherapy is emphasized in developing the knowledge for prescribing and monitoring psychotropic medications
NRSG 853. Abstraction and Modeling of Healthcare Information. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The information system development life cycle process is presented with emphasis on determination and analysis of information system requirements and system design that meet the identified health care information requirements. Object-oriented techniques will be introduced, including Unified Modeling Language and Unified Modeling Methodology, to facilitate process analysis and design proposal development. Prerequisite: NRSG 820 or Consent of Instructor. LEC.

NRSG 854. Knowledge Management in Healthcare. 3 Hours.
In collaboration with healthcare information faculty and preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: All Common Core, Leadership Core, NRSG 853, NRSG 858. Prerequisite/Corequisite: NRSG 854, NRSG 855, NRSG 898, or consent of instructor. LEC.

NRSG 855. Health Informatics Practicum. 1-3 Hours.
In collaboration with healthcare information faculty and preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: All Common Core, Leadership Core, NRSG 853, NRSG 858. Prerequisite/Corequisite: NRSG 854, NRSG 855, NRSG 898, or consent of instructor. LEC.

NRSG 856. Health Informatics Practicum. 1-3 Hours.
In collaboration with healthcare information faculty and preceptors, students design an experience to facilitate application of theories and research related to health care informatics. Emphasis is on the application of the information system development life cycle. Students analyze the leadership and technical behaviors of various informatics roles and negotiate an informatics project to be completed within the practicum. Prerequisite: All Common Core, Leadership Core, NRSG 853, NRSG 858. Prerequisite/Corequisite: NRSG 854, NRSG 855, NRSG 898, or consent of instructor. LEC.

NRSG 857. Transforming Health Care through Use of Information Systems and Technology. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The application of the information system development life cycle in the design, selection, and implementation of health information technology applications will be examined. Human computer interactions and emerging technologies will be explored for their impact on patient care and safety. The role of legal, regulatory, ethical and security issues will be discussed as they apply to clinical and consumer information technologies. Prerequisite: Consent of Instructor. LEC.

NRSG 858. Health Data: Theory and Practice. 3-4 Hours.
Includes 2 credit hour lecture and 1-2 credit hour practicum. Principles of database theory, modeling, design and manipulation will be introduced. Students will have experience using a relational database management system. Database manipulation will be explored using structured query language (SQL) to compose and execute query statements and critically evaluate the results. Prerequisite: None. LEC.

NRSG 859. Introduction to Health Informatics. 2-3 Hours.
This course provides a broad survey of health informatics focused on five themes: health informatics foundations; clinical decision support; human factors/organization factors; public health informatics and current issues in health informatics including best practices. Students may register for either 2 credit hours or 3 credit hours. Students enrolled for 3 credit hours will develop and demonstrate a practical, innovative small-group health informatics project from one of a set of faculty recommended projects or from a student-proposed idea, in addition to course requirements expected with a 2 credit hour enrollment. Prerequisite: Consent of Instructor. LEC.

NRSG 870. Designing a Student Learning Environment. 3 Hours.
The roles of both the educator and student in designing a learning environment provide the framework for analyzing pedagogical philosophies, theories, ethical/legal issues, and research related to teaching strategies and education. The interprofessional focus is on best practices and research-based strategies to promote various learning styles and create an active learning environment that increases student retention and learning success for diverse, multicultural student populations. Attention will be given to the relationship between the setting, methodologies of clinical teaching, and the assessment of competencies. Prerequisite: NRSG 748, NRSG 754, or consent of instructor. LEC.

NRSG 871. Curriculum/Program Planning and Evaluation. 3 Hours.
Philosophies, methods, and processes of curriculum and instruction in health professions' education provide the framework for discussing curricular and program planning theories/models, resources for decision making, research, and evaluation methods that create a learner-centered environment. Attention is given to frameworks for program evaluation, methods of data collection, and the ethics and standards of evaluation practice. The influence of societal trends, and current health professions issues relevant to curriculum planning are addressed. Emphasis is on strategies for anticipating future societal needs and developing educational curriculum to meet those needs. Matters of diversity, inclusion, interprofessional practice, workforce development, and ethics/legal issues in curriculum planning and education also are included. Prerequisite: NRSG 748, NRSG 754, or consent of instructor. LEC.

NRSG 872. Topics in Nursing Education. 1-5 Hours.
Investigation of special issues or problems relevant to appropriate client systems (client, family, and student or health care professional) in Nursing Education. Prerequisite: Consent of instructor. LEC.

NRSG 873. Teaching with Technologies. 3 Hours.
Theories and trends that support the use of merging and emerging technologies for the enhancement of teaching and learning in the health professions are explored. The focus is on assisting educators to gain skills in choosing appropriate instructional technologies to enhance learning. Learning variables, including the environment context, interprofessional education, finance, policy, and the influence of those variables on technologies are examined. The evaluation and impact of current technology on the delivery of education are examined along with strategies for considering/anticipating future technologies to meet educational needs. Prerequisite: NRSG 748, NRSG 754 or Consent of Instructor. LEC.

NRSG 874. Health Professions Educator Preceptorship. 3 Hours.
The role components of the health professions educator are implemented with a preceptor in selected educational settings. Opportunities are provided to utilize teaching and learning strategies, research findings, and evaluation methods with diverse students. Professional issues, educational trends, changing role of the educator, and self-assessment are incorporated in accompanying modules. Prerequisite: NRSG 870, NRSG 871, NRSG 873. LEC.

NRSG 877. Foundations in Education and Learning. 3 Hours.
Foundations and applications of education and evaluation strategies for teaching and learning in academic, clinical, research, and organizational
settings are explored. Scholarly evidence from a variety of sources is used to develop educational processes, products, and evaluation strategies. Students acquire knowledge to support professional development and employ research skills as educators in diverse teaching environments with diverse learners. Prerequisite: Admission to the Doctoral Program, or Consent of Instructor. LEC.

NRSG 878. Clinical Radiology for the Advanced Practice Nurse. 2 Hours.
A complexity science framework is used to present the basic and advanced technical aspects of radiological tests used in the care of adult and pediatric patients in the diagnostic work up of the etiology of the health problem. The science that forms the basis for all plain (cathode) films as well as computerized scanning and magnetic resonance imaging tests is covered in the course. The emphasis is on the appropriate choice of radiological tests in the work-up of the patient's health problem. Also, advanced practice nurses will learn a framework for evaluating the findings of the radiological test, and the clinical implications of the findings. Prerequisite: Corequisite: NRSG 818, or NRSG 868, or NRSG 889, or NRSG 849, or NRSG 840, or consent of instructor. LEC.

NRSG 880. Organizational Foundations for Leading Change. 3 Hours.
Self-discovery as a foundation for professional development while exploring the concepts of leader, manager and follower is emphasized. Analysis and prediction of an organization's stages of development and its capacity for linear and social change are introduced through the lens of complexity science. Political, legal, ethical and other issues that constrain and destabilize organizations and strategies to restore equilibrium are explored. (Same as HPM 840.) Prerequisite: NRSG 748, or consent of instructor. Prerequisite/Corequisite: NRSG 755. LEC.

NRSG 881. Applied Budgeting and Finance. 3 Hours.
Leaders apply basic principles associated with program, project and service-line fiscal management, price setting, budget preparation, cost-benefit/break-even analysis, managed-care contracting, and interpreting financial ratios while concurrently acquiring a financial vocabulary to communicate with various stakeholders. Financial reports such as balance sheets, budget forms and expense reports are studied and formulated related to government agencies, small clinical operations, grant-funded projects, and start-up programs. Staffing models and the staffing-quality equation are analyzed for the purpose of projecting human resource requirements. Prerequisite: NRSG 880, HPM 822, or Consent of Instructor. LEC.

NRSG 882. Introduction to Operations. 3 Hours.
Examines performance of health care organizations, sources of variation, methods of measurement, and strategies for improving performance. Considers several approaches to performance improvement and examines tools widely used in operations management. Incorporates lecture, discussion, and fieldwork. (Same as HPM 850.) Prerequisite: NRSG 754 or NRSG 880 or equivalent course; or consent of instructor. LEC.

NRSG 883. Complexity Science Approaches to Improve Organizational Effectiveness. 3 Hours.
This course introduces complexity science principles with the aim of improving the quality and effectiveness of healthcare organizations. Traditional approaches to quality improvement will be contrasted with tools and metrics that can be applied in complex organizations. Principles that relate to embeddedness, diversity, distributed control, co-existence of order and disorder, nonlinearity, inability to predict, emergence, and functioning at the edge of chaos will be introduced. Prerequisite: NRSG 880, or consent of instructor. LEC.

NRSG 884. Topics in Organizational Leadership. 3 Hours.
Investigation of current and futuristic issues and trends relevant to organizational leadership. LEC.

NRSG 885. Evaluation and Analysis for Healthcare Effectiveness. 2 Hours.
Systematic approaches for analyzing and evaluation processes of care delivery and their impact on client populations, organizational processes, and communities are considered. Research concepts and methods are used in a systems context. Program evaluation, performance improvement, and other methods of measuring outcomes are examined for their utility within the health care setting. Linkages between program evaluation and regulatory policy are studied. Prerequisite: NRSG 754. Prerequisite/Corequisite: NRSG 880 or Consent of Instructor. LEC.

NRSG 886. Organizational Leadership Practicum. 1-3 Hours.
The knowledge, skills, and abilities learned throughout the course of study are integrated in this practicum experience designed to develop further specialized knowledge. The faculty and preceptor provide support and guidance to help interpret experiences, and gain a broader world-view within organizational leadership. Students design an experience to facilitate application of theories and research related to organizational leadership. Emphasis is on expanding the capacity of the emerging leader in leading change, facilitating advanced communication skills, and demonstrating one or more areas of leadership expertise. Students negotiate a leadership project to be completed within the practicum. Prerequisite: Corequisite: NRSG: 808, 820, 826, 881, 882 or 883, 885, 891 HPM 822, or consent of instructor. CLN.

NRSG 888. Clinical Specialty Practicum for Nurse Educators. 1-3 Hours.
The Master of Science, Nursing Education Specialty prepares educators with direct care expertise in a specific clinical area of practice. Students will identify a practice area and complete a practicum with sustained clinical experiences designed to strengthen patient care delivery skills at the master's level. Direct care is defined as nursing care provided to individuals or families that is intended to achieve specific health goals or health outcomes. The course is collaboratively designed by the student and a faculty facilitator who has expertise in the clinical practice area desired by the student. The practicum may be completed in a wide range of settings such as acute and critical care, long term care, home health, community-based settings, etc. and prepares the student for advanced nursing practice care. Prerequisite: NRSG 755, NRSG 801, NRSG 812, NRSG 813, NRSG 870, and NRSG 880 or consent of instructor. PRA.

NRSG 889. Grant Writing. 3 Hours.
All aspects of preparing grant applications are covered. This includes writing an actual grant application containing all the usual elements of grants--budgets, biosketches, resources, and scientific text. In addition, different funding agencies, building research teams, the review process, responding to reviewers, and resubmitting grants will be covered. Prerequisite: Appropriate research methods and statistics courses in student's current graduate program (at least 2 statistics courses, one including content of multiple regression), and permission of instructor. For students in the Outcomes Management and Research Concentration: prerequisites: HPM 821 or PRVM 800. Same as ANAT 869 and HPM 788. LEC.

NRSG 890. Independent Study in Nursing. 1-5 Hours.
Intensive study in an area of interest with experiences selected according to the student's written purposes, conceptual framework, objectives and evaluation (1-5 credit hours). Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed. LEC.
NRSG 891. Human Resources and Workforce Development. 3 Hours.
The focus of this course is to understand the leadership functions of
human resource management in organizations to create a competitive
dge through employee empowerment. Core human resource concepts
are introduced and applied to optimize human capital within a variety
of healthcare settings, including compensation and benefits, employee
recognition, and employee/labor relations. National, regional and local
strategies and workforce trends are discussed related to best practices
for the selection, retention, and management as a healthcare employer
of choice. Prerequisite: All Leadership Core Courses, or consent of
instructor. Same as HPM 854, LEC.

NRSG 892. Independent Study in Nursing Practicum. 1-5 Hours.
Intensive practicum in a specified area of interest with experiences
selected according to aims that are mutually agreed upon by faculty and
student. Prerequisite: None IND.

NRSG 893. Preparing for Healthcare Practice in Rural Communities. 2 Hours.
Establishing and maintaining healthy rural communities is dependent on
preparation of the rural healthcare workforce. This includes professionals
living and working in rural communities as well as distant providers who
contribute services and/or support through telehealth. Students will
explore broad patterns of health and illness in rural communities, evaluate
resources and develop advanced strategies to meet the diverse needs of
rural communities. Prerequisite: Prerequisites: NRSG 748, NRSG 754,
NRSG 809, or Consent of Instructor. LEC.

NRSG 895. Grant Writing for Nursing Science. 1 Hour.
All aspects of preparing grant applications are reviewed including
developing the purpose, aims, approach, methods, budget, biosketch,
resources and facilities. In addition, the importance of building a
research team and identifying suitable funding agencies will be covered.
Prerequisite: Prerequisite: None. Corequisite: NRSG 896. LEC.

NRSG 896. Grant Writing Application. 2 Hours.
The student will work with their faculty research mentor to develop a
federal level grant application (NIH, HRSA, AHRQ, or foundation) in
preparation for submission. The funding proposal will be developed in
conjunction with the NRSG 895 Grant Writing for Nursing Science course
that provides information related to grant application structure and key
issues. The mentor will provide content expertise and will work with the
student to develop the specific content for a grant application. The final
product will be a grant proposal suitable for submission. Prerequisite:
Prerequisites: Current enrollment in the PhD in Nursing program or
Consent of Instructor. Corequisites: NRSG 895. LEC.

NRSG 898. Scholarly Project in Nursing. 2 Hours.
The scholarly project course is designed for students to apply knowledge
from their research/evidence-based practice coursework into practice.
Emphasis is placed on experiential learning on the conducts of research,
quality improvement, or evidence-based practice scholarship. Students
will work with a faculty mentor on components of a research, quality
improvement, or evidence-based practice project. Prerequisite: NRSG
754 plus one leadership specialty track course, or consent of instructor.
LEC.

NRSG 899. Thesis. 1-6 Hours.
Prerequisite: NRSG 754, and one core track course. THE.

NRSG 901. Primary Care I: Adult-Gerontology Health. 3 Hours.
The first of two core specialty courses using a systems approach that
emphasizes a multi-dimensional and interprofessional approach to
assessment, differential diagnosis and treatment formulation for the
health care needs of adults across the life span in multiple care settings.
Common health conditions are explored in relation to health promotion,
health maintenance, assessment, diagnosis and management of common
episodic, chronic, and complex conditions affecting health. Students
develop skills in critical thinking, analysis and synthesis of data from
a variety of sources, and use of evidence-based practice guidelines
in diagnosing and managing health care needs. In addition to cultural
spiritual diversity, students learn how patient preferences in health care
decision making are incorporated in a focus on person-centered care.
Prerequisite: NRSG 801, NRSG 812, and NRSG 813. LEC.

NRSG 902. Primary Care II: Adult-Gerontology Health. 3 Hours.
The second of two core specialty courses using a systems approach
that emphasizes a multi-dimensional and interprofessional approach
to assessment, differential diagnosis and treatment formulation for the
health care needs of adults across the life span in multiple care settings.
Common health conditions are explored in relation to health promotion,
health maintenance, assessment, diagnosis and management of common
episodic, chronic, and complex conditions affecting health. Students
develop skills in critical thinking, analysis and synthesis of data from
a variety of sources, and use of evidence-based practice guidelines
in diagnosing and managing health care needs. In addition to cultural
spiritual diversity, students learn how patient preferences in health care
decision making are incorporated in a focus on person-centered care.
Prerequisite: NRSG 901 or consent of instructor. LEC.

NRSG 903. Primary Care Practicum I: Adult/Gerontology - Nurse Practitioner. 2 Hours.
This is the first practicum course in a series of three practicum courses
that prepares the student for entry into practice as a primary care
provider. This course is designed to prepare the adult-gerontology primary
care nurse practitioner as a provider of direct health care services. The
patient population of the adult-gerontology provider includes young
adults (including late adolescents and emancipated minors), adults, and
older adults (including young-old, old, and old-old adults). Within this
role, the adult-gerontology primary care nurse practitioner student will
synthesize theoretical, scientific, and contemporary clinical knowledge
for the assessment and management of both health and illness states.
Advanced practice competencies incorporate the health promotion, health
protection, disease prevention, and management focus of the adult-
gerontology primary care nurse practitioner practice. Prerequisite: NRSG
902, or Consent of Instructor. PRA.

NRSG 904. Primary Care Practicum II: Adult/Gerontology - Nurse Practitioner. 4 Hours.
This is the second practicum course in a series of three practicum courses
that prepares the student for entry into practice as a primary care
provider. This course is designed to prepare the adult-gerontology primary
care nurse practitioner as a provider of direct health care services. The
patient population of the adult-gerontology provider includes young
adults (including late adolescents and emancipated minors), adults, and
older adults (including young-old, old, and old-old adults). Within this
role, the adult-gerontology primary care nurse practitioner student will
synthesize theoretical, scientific, and contemporary clinical knowledge
for the assessment and management of both health and illness states.
Advanced practice competencies incorporate the health promotion, health
protection, disease prevention, and management focus of the adult-
gerontology primary care nurse practitioner practice. Prerequisite: NRSG
903 or Consent of Instructor. PRA.

NRSG 905. Primary Care Practicum III: Adult/Gerontology - Nurse Practitioner. 4 Hours.
This is the final practicum course in a series of three practicum courses
that prepares the student for entry into practice as a primary care
provider. This course is designed to prepare the adult-gerontology primary
care nurse practitioner as a provider of direct health care services. The
patient population of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Within this role, the adult-gerontology primary care nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: NRSG 904 or Consent of Instructor. PRA.

NRSG 906. Primary Care Practicum I: Adult/Gerontology - Clinical Nurse Specialist. 2 Hours.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a clinical nurse specialist. The focus of this course is an introduction to the CNS role that includes the competencies of direct care, consultation, systems leadership, collaboration, coaching, research, and ethical decision-making related to patients, families, and patient populations. The patient population of the adult-gerontology CNS learner includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Clinical activities include designing, implementing and evaluating evidence-based advanced nursing practice interventions along with measurement of outcomes; promoting and facilitating change and innovation in practice; project management; and program evaluation. Clinical practice will include comprehensive interprofessional coordination of the acute and chronic health care needs for culturally diverse populations of adults from adolescence through elder adulthood with specific systems dysfunctions. Prerequisite: NRSG 906 or Consent of Instructor. PRA.

NRSG 907. Primary Care Practicum II: Adult/Gerontology - Clinical Nurse Specialist. 4 Hours.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as a clinical nurse specialist. The focus of this course is ongoing acquisition of CNS competencies: direct care, consultation, systems leadership, collaboration, coaching, research, and ethical decision-making related to patients, families, and patient populations. The patient population of the adult-gerontology CNS learner includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Clinical activities include designing, implementing and evaluating evidence-based advanced nursing practice interventions along with measurement of outcomes; promoting and facilitating change and innovation in practice; project management; and program evaluation. Clinical practice will include comprehensive interprofessional coordination of the acute and chronic health care needs for culturally diverse populations of adults from adolescence through elder adulthood with specific systems dysfunctions. Prerequisite: NRSG 907 or Consent of Instructor. PRA.

NRSG 908. Primary Care Practicum III: Adult/Gerontology - Clinical Nurse Specialist. 4 Hours.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as a clinical nurse specialist. The focus of this course is maximizing acquisition of CNS competencies: direct care, consultation, systems leadership, collaboration, coaching, research, and ethical decision-making related to patients, families, and patient populations. The patient population of the adult-gerontology CNS learner includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, old, and old-old adults). Clinical activities include designing, implementing and evaluating evidence-based advanced nursing practice interventions along with measurement of outcomes; promoting and facilitating change and innovation in practice; project management; and program evaluation. Clinical practice will include comprehensive interprofessional coordination of the acute and chronic health care needs for culturally diverse populations of adults from adolescence through elder adulthood with specific systems dysfunctions. Prerequisite: NRSG 904 or Consent of Instructor. PRA.

NRSG 911. Tools for Practice Doctorate Scholarship. 3 Hours.
Foundations and applications of tools and methods to develop advanced practice project proposals across diverse settings are explored. Scholarly evidence from a variety of sources is used to develop project proposals that enhance patient care, staff development, and organizational leadership. Relevant practice theories such as quality improvement and evaluation models serve as project proposal guides. Students acquire knowledge and skills to support professional development, to write advanced practice project proposals, and to advance doctoral scholarship. Prerequisite: NRSG 904, or consent of instructor. LEC.

NRSG 913. Business Strategies for Healthcare Leaders. 3 Hours.
The learner will develop advanced leadership skills focusing on business strategies in a variety of healthcare and industry settings in the private and public sector. Through application, analysis, synthesis and evaluation methods, using a variety of approaches to modern day business challenges, the learner is positioned to gain a high-level, mind-raising attitude about how to think differently in addressing organizational and business problems, and supporting organizational success. Prerequisite: NRSG 804, or consent of instructor. LEC.

NRSG 914. Primary Care I: Family Health. 3 Hours.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional interprofessional approach to assessment, differential diagnosis and treatment formulation for the primary care needs of individuals and families across the lifespan. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis, and management of common episodic, chronic, and complex conditions affecting health. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing primary care needs. In addition to cultural and spiritual diversity, students learn patient preferences in health care decision making with a focus on person centered care. Prerequisite: NRSG 801, NRSG 812, and NRSG 813. LEC.

NRSG 915. Primary Care II: Family Health. 3 Hours.
The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional interprofessional approach to assessment, differential diagnosis and treatment formulation for the primary care needs of individuals and families across the lifespan. Common health conditions are explored in relation to health promotion, health maintenance, assessment, diagnosis, and management of common episodic, chronic, and complex conditions affecting health.
Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing primary care needs. In addition to cultural and spiritual diversity, students learn patient preferences in health care decision making with a focus on person centered care. Prerequisite: NRSG 914 or consent of instructor. LEC.

NRSG 916. Primary Care Practicum I: Family Nurse Practitioner. 2-4 Hours.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 915 or Consent of Instructor. LEC.

NRSG 917. Primary Care Practicum II: Family Nurse Practitioner. 4 Hours.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 916 or Consent of Instructor. LEC.

NRSG 918. Primary Care Practicum III: Family Nurse Practitioner. 2-4 Hours.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as a primary care provider. This course is designed to prepare the family nurse practitioner student as a provider of direct health care services. The patient population of the family provider includes individuals and families across the lifespan. Within this role, the family nurse practitioner student will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisite: NRSG 917, or consent of instructor. LEC.

NRSG 919. Foundations for Leading and Communicating in Organizations. 3 Hours.
Theoretical foundations in organizational decision making and communication will enhance students' development of expertise in assessing organizations, identifying systems issues, and facilitating organization- and system-wide improvements in healthcare. Traditional approaches to organizing and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures and populations. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to accurately assess, design and lead high performing healthcare organizations in a dynamic world. Prerequisite: NRSG 829 or 833 or 856 or 886 (Practicum respective to specialty) and NRSG 941, or consent of instructor. LEC.

NRSG 920. Microsystems in Health Care Operations. 3 Hours.
Competencies necessary for studying clinical microsystems and examining their influence on patient safety, satisfaction, and other clinical outcomes are developed in this course. Microsystems will be determined, deconstructed, analyzed for best practice, and re-constituted for the purpose of improved organizational performance. The roots of quality improvement are traced and quality improvement application within a microsystem environment is explored. Key topics include: assessment tools and models, continuous quality improvement theory, evidence-based practice, performance improvement methods (measurement, statistics, problem identification and analysis, control charts) and the development of team-based problem solving and resolution. Students examine productivity and cost indicators, strategic and operational planning, healthcare finance, relationship-building, collaboration techniques, and leadership principles. Prerequisite: Completion of graduate program in organization leadership or nursing administration, or consent of instructor. LEC.

NRSG 921. Primary Care of Women Across the Lifespan. 2 Hours.
The knowledge and skills necessary to promote health, prevent illness, and manage the primary care needs of women across the lifespan will be provided. Theory- and research-based therapeutic management of acute, episodic and chronic conditions that occur in women across the lifespan will be explored. Professional values including standards of practice, cultural, legal and ethical issues and professional roles will be addressed. The health care delivery system will be analyzed for cost effectiveness and sensitivity to women. Prerequisite: NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 841, or Consent of Instructor. LEC.

NRSG 922. Care of Women in the Antepartal Period. 3 Hours.
Care during the antepartal period in healthy pregnant women is presented and analyzed. Strategies focusing on risk reduction and early identification of deviation from normal during pregnancy are examined. Biopsychosocial and cultural aspects of pregnancy within the family structure are presented. Concepts of research, ethics, legal and political issues, nutrition, genetics, pharmacotherapeutics, health promotion, and selected deviations from normal are included. Prerequisite: NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 921, or consent of instructor. LEC.

NRSG 923. Nurse Midwifery in the Postpartum and Newborn Period. 2 Hours.
Synthesis of the nurse-midwifery philosophy for postpartum and newborn periods is conceptualized. Health maintenance for mothers and infants is explored. Research, ethics, legal and political issues, nutrition, pharmacotherapeutics, health promotion, and selected deviations from normal are included. The nurse-midwifery role in consultation, collaboration, and referral are addressed. Prerequisite: NRSG 922, or Consent of Instructor. Corequisite: NRSG 924. LEC.

NRSG 924. Nurse Midwifery in the Intrapartum Period. 3 Hours.
Nurse-midwifery care of uncomplicated women in the intrapartum period is presented and analyzed. Intrapartum and immediate postpartum complications and emergency events are addressed. Concepts of research, ethics, legal and political issues, nutrition, pharmacotherapeutics, health promotion, and selected deviations from normal are included. Prerequisite: NRSG 922 or Consent of Instructor. Corequisite: NRSG 923. LEC.

NRSG 925. Care of Women in The Antepartal Period Practicum. 2 Hours.
This clinical practicum focuses on competencies for management of pregnant women in various health care environments. Health promotion
and risk reduction in pregnant women are emphasized. Management experiences in the advanced practice role include antepartal risk-assessment, consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 841, NRSG 922 or Consent of Instructor. Corequisite: NRSG 926 or Consent of Instructor. PRA.

NRSG 926. Primary Care of Women Across the Lifespan Practicum. 2 Hours.
This practicum focuses on clinical competencies for the advanced practice nurse providing primary care and gynecologic management of women throughout the lifespan. Health promotion, complementary therapies, and evidence-based models of health care delivery are incorporated in the care of women. Clinical management experiences in the advanced practice role include but are not limited to: family planning, gynecologic health, and primary care for women from adolescence through menopause. Clinical experiences will include consultation, collaboration, and/or referral when medically necessary. Prerequisite: NRSG 841, NRSG 921 or Consent of Instructor. Corequisite: NRSG 925 or Consent of Instructor. PRA.

NRSG 927. Childbearing Family Practicum: Intrapartum, Postpartum, and Newborn. 3 Hours.
Competencies for nurse-midwifery management according to national standards of practice for the care of healthy women during labor, birth, and postpartum are demonstrated; additionally, competencies for nurse-midwifery management according to national standards of practice for the care of newborns are demonstrated. The development of a skill base for intrapartum, postpartum, and newborn emergencies is addressed. Nurse-midwifery management practice provides experience in the role of care provider during normal labor, delivery, postpartum, and newborn periods. This care may include consultation, collaboration, and referral when medically necessary. Prerequisite: NRSG 923, NRSG 924. Completion of Intermediate or Advanced Fetal Heart Monitoring Course within past 3 years. Up-to-date Neonatal Resuscitation Program (NRP) certification. PRA.

NRSG 928. Nurse-Midwifery Integration Practicum. 4 Hours.
The theoretical, clinical and role components of care as delivered by the advanced nurse-midwifery student are implemented through an intensive supervised clinical practicum. Advanced professional clinical skills and evidence-based practice in the assessment, management and care of women and newborns are applied. Emphasis is on increased independence and decision-making embracing the function, scope and practice of nurse-midwifery practice. Prerequisite: NRSG 925, NRSG 926. NRSG 927 or Consent of Instructor. PRA.

NRSG 929. Psychotherapeutic Interventions I: Psychiatric Mental Health Nurse Practitioner. 3 Hours.
Focus is placed on assessing vulnerabilities, social determinants and resilience as they relate to health promotion, disease prevention, symptom management, and behavior change. Mental health and common psychiatric disorders such as depression and anxiety throughout the life span are discussed. Evidence-based brief psychotherapeutic intervention frameworks including psychotherapy are applied to individuals, groups and families across the life span. Professional issues that commonly occur in implementing the advanced practice role in psychiatric and mental health care are emphasized. Prerequisite: NRSG 748, NRSG 754, NRSG 755, NRSG 801, NRSG 809, NRSG 812, NRSG 813, NRSG 844, NRSG 850, or Consent of Instructor. Prerequisite/Corequisite: NRSG 851. LEC.

NRSG 930. Psychotherapeutic Interventions II: Psychiatric Mental Health Nurse Practitioner. 3 Hours.
This theory course focuses on recovery-oriented, person-centered approaches for individuals, families, and populations with complex and persistent alterations in mental health functioning. Factors that affect mental health functioning will be explored with a focus on interventions that facilitate recovery including psychopharmacology. In addition, policies and socioeconomic factors that influence the delivery of mental health services will be analyzed. Emphasis is placed on identifying the unique role of the psychiatric mental health nurse practitioner (PMHNP) within an integrated, client-centered delivery system. Prerequisite: NRSG 929 or consent of instructor. LEC.

NRSG 931. Psychotherapeutics Practicum I: Psychiatric Mental Health Nurse Practitioner. 2 Hours.
This course is the first of three practicum courses. The focus of this clinical course is to apply theories and evidence-based findings in a clinical setting serving culturally diverse individuals, groups, and families. Students will have opportunities to conduct comprehensive psychiatric assessments, formulate diagnoses, and conduct therapy in conjunction with an interdisciplinary team. Prerequisite: NRSG 930, or Consent of Instructor. PRA.

NRSG 932. Psychotherapeutics Practicum II: Psychiatric Mental Health Nurse Practitioner. 4 Hours.
In this second of three practicum courses, students will apply recovery oriented, evidence-based frameworks such as biobehavioral, pharmacologic and psychoeducational to individuals and groups across the lifespan with complex alterations in functioning. The psychiatric mental health nurse practitioner in collaboration with interdisciplinary team members and families coordinates person-centered culturally sensitive care. Ethical principles and legal issues are identified and integrated into care. Prerequisite: NRSG 931 or Consent of Instructor. PRA.

NRSG 933. Psychotherapeutics Practicum III: Psychiatric Mental Health Nurse Practitioner. 3-4 Hours.
In this third of three clinical practicum courses, students will demonstrate integration of knowledge from previous courses in implementing the psychiatric mental health nurse practitioner role. This includes using diagnostic reasoning, evidence-based therapy, biobehavioral, and psychoeducational interventions with culturally diverse clients from different age groups. Students will implement care within interdisciplinary teams using consultation and referral as needed to deliver person-centered culturally sensitive care. Students will work with age groups needed to meet the role of psychiatric nurse practitioner across the lifespan. Prerequisite: NRSG 932, or Consent of Instructor. PRA.

NRSG 934. Foundations of Data Science. 3 Hours.
The course is designed to provide students with foundational knowledge about data science and big data. Students will learn the skills to participate on and lead interprofessional teams analyzing health and other related data to build knowledge and apply findings to practice. Topics to be examined will include diverse types and sources of data, data management techniques, exploratory data analysis approaches, and data visualization. Prerequisite: Admission to the SON PhD program, Graduate level research course (NRSG 754 or equivalent), or Consent of Instructor. LEC.

NRSG 935. Professionalism and Scholarship Workshop. 2 Hours.
Building a foundation for advanced study is explored in the context of professionalism and scholarship. Strategies for promoting professional development while preparing for future roles as nurse scholars and nurse scientists are examined. Students are introduced to a model of scholarship that includes discovery, integration, application, and teaching. Issues associated with scientific integrity in academics, research and services are identified and examined. Students are introduced to methods for conducting and synthesizing literature that is essential to the doctoral level student. Prerequisite: Admission to the Doctoral Program or Consent of Instructor. LEC.
NRSG 936. Philosophy of Nursing Science. 2 Hours.
This course examines the origins and development of western philosophy and science. Students will explore nursing knowledge from diverse philosophical perspectives as well as the natural and human sciences. Different conceptions of broad topics such as knowledge, personhood, the body, and technology will be examined for the investigation of nursing phenomena. Prerequisite: Admission to the PhD program, graduate level nursing theory course, or Consent of Instructor. LEC.

NRSG 937. Innovative Theories and Models for Nursing Science. 3 Hours.
This course explores innovative models and theories to guide nursing science. Historical foundations of theory are traced to current trends and future possibilities in theory development, application, and evaluation. Strategies for using existing theoretical knowledge for nursing science and to foster new knowledge are also examined. Prerequisite: NRSG 936 or Consent of Instructor. LEC.

NRSG 938. Informatics and Technology Applications. 2 Hours.
The field of nursing informatics and the role of the nurse to support research and evidence-based practice inquiry in a variety of organizational settings is introduced. The current state of the science in naming nursing phenomena and how these phenomena are represented in information systems is explored. The use of technology as an adjunct to doctoral-level inquiry and how it supports clinical and professional decision-making is explained and demonstrated. Prerequisite: Corequisite: NRSG 935, or consent of instructor. LEC.

NRSG 939. Precision Health. 3 Hours.
This course focuses on precision health as an emerging approach for health promotion, disease prevention and treatment that considers individual variability in genes, environment, and lifestyle (also known as the determinants of health). Students will learn to more accurately predict prevention and treatment strategies for various populations. This course will assist students in understanding the National Institute of Nursing Research (NINR) pathway to precision science that focuses on personalized strategies to prevent and manage symptoms across diverse populations and settings. Students will also learn about the vision reflected in the Precision Medicine Initiative to accelerate discoveries that can provide nurse scientists with new tools, knowledge, and therapies for individuals and populations. Prerequisite: Admission to a School of Nursing Doctoral Program or consent of instructor. LEC.

NRSG 941. Preparing for Doctoral Leadership. 3 Hours.
Skills in leading, managing, and following as the doctoral graduate assumes critical roles within academia, the healthcare system, or other business entities are developed and strengthened. Through developmental exercises, theoretical and practical explorations of organizational structures and settings, and career trajectory planning, the student is poised to optimize the doctoral experience to influence social change. Prerequisite: Admission to a School of Nursing Doctoral Program or consent of instructor. LEC.

NRSG 945. Synthesis Workshop I. 1 Hour.
Leadership development and technologic applications are integrated with theoretical, statistical, and research methods. Doctoral leadership skills are refined and tested through case study simulations of theory and research applications in diverse practice settings. A qualifying examination concludes the Workshop consisting of a written and oral case study simulation. Prerequisite: BIOS 730 and BIOS 740 or equivalent, NRSG 941, NRSG 942, NRSG 946, or Consent of Instructor. Prerequisite/Corequisite: NRSG 877. LEC.

NRSG 946. Measurement Principles and Practice. 3 Hours.
Classical measurement theory and related measurement concepts are the focus of this course. Various approaches to instrumentation are examined. Students use existing data to evaluate selected measures, with emphasis on reliability and validity. They also critically analyze published reports of instrumentation for research. Basic knowledge of concept analysis is expected prior to enrollment. Prerequisite: NRSG 940, or consent of instructor. LEC.

NRSG 948. Methods for Assessing Organizational and Clinical Practice Outcomes. 2 Hours.
This course will provide a broad overview of concepts in design and measurement strategies that are applicable to doctoral projects. A variety of approaches will be used to evaluate organizational, sociotechnical, population health, or clinical issues. Different methods, measures, and data sources relevant to these issues will be explored. Prerequisite: NRSG 754 or consent of instructor. LEC.

NRSG 949. Synthesis Workshop II. 1 Hour.
Content from the full range of doctoral courses including theory, research, statistics and professional development is integrated and synthesized. Strategies for using these content areas to meet program objectives and students' professional objectives are explored. A qualifying examination, consisting of a written and oral case study simulation, concludes the Workshop. Prerequisites: Completion of all doctoral course work. Prerequisite: Corequisite: NRSG 948, NRSG 970. LEC.

NRSG 950. Symptom Science in Nursing. 3 Hours.
In this course, students will determine personalized strategies to identify, prevent, and treat the adverse symptoms of acute and chronic illness across diverse populations and settings. Biological and behavioral dynamics of symptoms (e.g., dyspnea, fatigue, impaired sleep/insomnia, pain, depression) that can change the trajectory of chronic illnesses, and how the dynamics can be optimized and maintained to prevent symptom relapse, will be discussed. Various innovative care delivery models (e.g., interdisciplinary, family-based), research methods (e.g., community engaged research, pragmatic trials) and technologies (e.g., eHealth) will be reviewed that can be used to improve symptom management and change the chronic illness trajectory especially among individuals who experience disparate health outcomes. Prerequisite: Admission to Doctoral Program or consent of instructor. LEC.

NRSG 951. Biomarkers. 3 Hours.
This course builds a foundation for doctoral students to understand how biomarkers can be used as targets for therapeutic and clinical interventions. Students will describe potential biomarkers for measures of normal biological processes, pathogenic processes, or pharmacologic responses. Biological elements ("biomarkers") associated with symptoms and symptom experiences across populations and conditions will be explored. Students are introduced to direct and indirect biomarkers and the various methods for sampling. Issues associated with sensitivity and specificity of particular biomarkers are examined. Prerequisite: Admission to Doctoral Program or consent of instructor. LEC.

NRSG 952. Qualitative Research Methods and Application. 4 Hours.
Qualitative methodologies, such as ethnography, phenomenology/ hermeneutics, grounded theory, and their epistemological origins are explored. Emphasis is placed on the appropriateness of each approach in diverse settings. Students are guided in formulating qualitative research questions and developing component parts of a qualitative research proposal. Students complete simulated qualitative research activities to gain experience in data collection and analysis. Prerequisite: NRSG 754 Health Care Research, or admission to the doctoral program. LEC.

NRSG 953. Quantitative Research Methods and Application. 4 Hours.
The course is designed to provide students with knowledge and research application experience in quantitative research methods. Students will learn how research questions lead to different study designs, data collection procedures, and analyses in nursing and health care. The
course focuses on content on methodological techniques and issues involved in generating research questions and hypotheses, designing and implementing quantitative studies, and analyzing and interpreting results. The course includes a qualitative research application experience provided through the exercise in planning, conducting, and interpreting analyses with existing data. Prerequisite: NRSG 946 Measurement Principles and Practice, NRSG 934 Foundations of Data Science, BIOS 730 Applied Linear Regression, or consent of instructor. LEC.

NRSG 954. DNP Synthesis Workshop. 1 Hour.
Students will have the opportunity to demonstrate synthesis, integration, and translation of knowledge and skills acquired throughout the first half of the DNP program and during this course. Sessions and activities will focus on doctoral leadership and role transition, scientific inquiry and research application, applications of theory, and specific practice/program related competencies. A qualifying examination concludes the course. Prerequisite: NRSG 748, NRSG 755, NRSG 804, NRSG 808; for Advanced Practice major, completion of NRSG 801, NRSG 812, and NRSG 813, and one specialty course; for Leadership major, completion of IPHI 820; NRSG 826, NRSG 880, NRSG 885, NRSG 948 or Consent of Instructor. LEC.

NRSG 957. Health Informatics, Human Factors, and Ergonomics as Applied to Patient Safety. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The use of information systems including medical devices is paramount in achieving patient safety. Students will attain an inclusive understanding of how human factors and ergonomic principles can be used to improve patient safety in the design, implementation, and evaluation of information systems and medical devices. Additionally, health care professionals will acquire skills to appropriately apply error reduction strategies developed in high reliability organizations. Prerequisite: Admission to a doctoral program in nursing, NRSG 857 or consent of instructor. LEC.

NRSG 958. Knowledge Representation and Interoperability. 3 Hours.
Includes 2 credit hour lecture and 1 credit hour practicum. The need to exchange clinical information consistently between health care providers, care settings, researchers and other requires syntactic and semantic interoperability. Requirements and approaches to meet interoperability will be explored. Standards for messaging, terminology, and knowledge representation will be investigated. Prerequisite: Admission to a doctoral program in nursing, NRSG 857 or consent of instructor. LEC.

NRSG 959. Research Experience. 1-4 Hours.
This practicum is an intensive research experience with a specific faculty mentor. It involves working on part of the faculty mentor's current research or on a subject closely related to the mentor's work. The student submits a proposal for this research experience to the faculty mentor. After approval by the faculty mentor, the proposal undergoes necessary review and approval processes (e.g. Human Subjects Committee - IRB approval with departmental administrative review). The outcome of this experience is a paper prepared in publishable form on the research conducted or other scholarly dissemination as agreed upon (e.g. conference presentation). Prerequisite: Consent of instructor. LEC.

NRSG 963. Advanced Leadership Residency. 1-9 Hours.
The advanced leadership residency is designed to expand the DNP student's breadth and depth of leadership knowledge and skills in an area of practice at the aggregate/systems/organization level. Students will have the opportunity to enhance their existing advanced leadership skills in one or more of the following areas: organizational and systems leadership for enhancing healthcare outcomes; quality improvement strategies to support decision-making; prediction and evaluation of practice outcomes; patient safety initiatives; health care policy; creating and sustaining change at organizational and policy levels; or ethics related to healthcare systems; information technology; knowledge management; or population health. Prerequisite: Corequisite: NRSG 919 and NRSG 941, or consent of instructor. PRA.

NRSG 964. Advanced Clinical Residency. 1-9 Hours.
The advanced clinical residency is designed to expand the DNP student's breadth and/or depth of clinical knowledge and skills in an area of practice. The focus can be either on the delivery of sub-specialty care services or full spectrum primary care services. Students will have the opportunity to enhance their existing advanced practice skills in one or more of the following areas: the diagnosis and management of ambulatory patients with complex diagnoses and comorbid conditions in the context of family, community and culture; the diagnosis and management of patients with complex diagnoses and/or comorbid conditions who present with acute changes in health status requiring interventions available only in an acute care setting; and the diagnosis and management of patients who are unable to function independently due to age related alteration in mental and physical status, developmental, perceptual and physical disability and chronic, degenerative illness. Students will synthesize clinical knowledge and use evidence-based decision making to construct symptom-based assessments, advanced differential diagnoses, independent therapeutic interventions, and outcome evaluation of the care of clients. Prerequisites: Post-BSN students: final practicum course or consent of instructor. Post-Master's students: A minimum of 1000 clinical hours in your current or previous work following graduation from an accredited Master's in Nursing program; National certification in your area of expertise (e.g. family, adult, psych, pediatric, CNM, etc.). CLN.

NRSG 970. Synthesis of Emphasis Area of Study. 2 Hours.
This course provides an opportunity for the PhD student to synthesize work in their selected emphasis area. After completion of emphasis area coursework, students will focus on synthesizing content across these emphasis area courses. The synthesis experience culminates in a written synthesis paper in the emphasis area to assure the student's competency in the emphasis area of study. Typically, the emphasis area coursework and the emphasis area synthesis paper provide directly to the student's dissertation. Prerequisite: Completion of emphasis area coursework (at least 9 credit hours) and NRSG 945, or consent of instructor. LEC.

NRSG 971. Special Considerations for the Acute Care Nurse Practitioner. 1 Hour.
This course will focus on the preparation and scope of practice of the adult-gerontology acute care nurse practitioner. Concepts of the advanced practice role, primary vs. acute care, transitions of care, and age-related considerations of the adult-gerontology patient will be reviewed. Prerequisite: Consent of Instructor. LEC.

NRSG 972. Advanced Pharmacology for the Acute Care Setting. 2 Hours.
This course for acute care settings is complementary to any advanced pharmacology course for advanced practice nursing. The clinical application of specific categories of drugs commonly encountered in acute care settings is discussed. First line versus second line drugs, alternate drugs, drug interactions, adjusting drug dosages, patient education, and compliance issues related to drug therapy are addressed. The nurse's role and responsibility related to data collection, problem identification, and consultation with the physician is explored. Application is made through age appropriate studies. Prerequisite: NRSG 801, NRSG 812, NRSG 813 or Consent of Instructor. LEC.

NRSG 973. Acute Care I: Adult-Gero NP. 3 Hours.
The first of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis, and treatment formulation for the care needs of the chronically, acutely, or critically ill or those who
are experiencing an acute exacerbation of a chronic health problem. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 971, NRSG 972, or Consent of Instructor. LEC.

NRSG 974. Acute Care II: Adult-Gero NP. 3 Hours.
The second of two core specialty courses using a systems approach that emphasizes a multi-dimensional and interprofessional approach to assessment, differential diagnosis, and treatment formulation for the care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 973 or Consent of Instructor. LEC.

NRSG 975. Acute Care Practicum I: Adult-Gero NP. 4 Hours.
This is the first practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: Pre or Co-Req: NRSG 973 or Consent of Instructor. PRA.

NRSG 976. Acute Care Practicum II: Adult-Gero NP. 2-4 Hours.
This is the second practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 975 or Consent of Instructor. Co-Req: NRSG 974 Acute Care II: Adult-Gero NP. PRA.

NRSG 977. Acute Care Practicum III: Adult-Gero NP. 2-4 Hours.
This is the final practicum course in a series of three practicum courses that prepares the student for entry into practice as an acute care provider. This course is designed to prepare the adult-gerontology acute care nurse practitioner as a provider of direct health care services. The patient populations of the adult-gerontology provider includes young adults (including late adolescents and emancipated minors), adults, and older adults (including young-old, and old-old adults). Within this role, the adult-gerontology acute care nurse practitioner will synthesize theoretical, scientific, and contemporary clinical knowledge for the assessment and management of both health and illness states, including care needs of the chronically, acutely, or critically ill or those who are experiencing an acute exacerbation of a chronic health problem. The competencies of this course incorporate health promotion, disease prevention, and management focus of the adult-gerontology acute care nurse practitioner practice. Students will develop skills in critical thinking and the use of evidence-based practice guidelines in developing the rationale for diagnosing and managing care needs across the acute, critical, and complex care continuum in order to return the individual to their optimal level of health. Prerequisite: NRSG 976 Acute Care Practicum II: Adult-Gero NP or Consent of Instructor. PRA.

NRSG 980. Doctor of Nursing Practice Project. 1-6 Hours.
The Doctor of Nursing Practice (DNP) project is an amalgamation of the student's field of inquiry in his/her doctoral course of study. As such, the DNP project requires that a practice-focused problem be identified and examined in depth. For most students the DNP project will include application of an evidence-based intervention suitable to their area of focus (e.g. organizational leadership, clinical practice, education, etc.) that involves the appropriate metric (or sets of metrics) evaluation, and dissemination of the project findings to a targeted audience. The DNP project must meet DNP Project guidelines for the DNP program. Prerequisite: NRSG 911 and completion of 2 doctoral level specialty courses, or consent of instructor. FLD.

NRSG 990. Doctoral Research. 1-12 Hours.
Original and independent investigation approved by and conducted under the supervision of the student's adviser or advisory committee and in partial fulfillment of the requirements for the Ph.D. degree. Prerequisite: Consent of Advisor. RSH.

NRSG 997. Independent Study. 1-4 Hours.
Having chosen an appropriate mentor, the student selects an area of advanced study. Specific objectives and credit hours are jointly determined by the student and selected faculty member. Prerequisite: Prior graduate course work in the area of study and consent of instructor. IND.

NRSG 999. Dissertation. 1-12 Hours.
Preparation of the dissertation based upon original research and in partial fulfillment of the requirements for the Ph.D. degree. Credit is given only after the dissertation proposal has been accepted by the student’s dissertation committee. Prerequisite: Consent of Instructor. THE.

Nursing Courses

NURS 320. Pathophysiology for the Practicing Nurse. 3 Hours.
This course is designed to provide students with a basic understanding of pathophysiological changes that occur within the internal environment of the individual. Understanding these alterations is basic to providing quality nursing care. System variations across the lifespan are addressed. Prerequisites: Admission to the School of Nursing and RN to BSN program or consent of instructor. LEC.
NURS 326. Pharmacology for the Practicing Nurse. 3 Hours. Pharmacodynamics and pharmacokinetics of drug therapy are discussed in order to provide a basic understanding of the client's reaction to a drug, both therapeutically and adversely, and to predict potential drug interactions. Internal and external environmental factors affecting drug therapy are assessed in order to provide a comprehensive database for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, side effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and client system education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 327. Communicating and Managing Healthcare Information. 3 Hours. Basic theories of interpersonal communication, information technologies, and information management are explored. Use of these skills and technologies to develop therapeutic relationships with patients and the interdisciplinary healthcare team is emphasized. Legal and ethical issues related to health information technology and health information exchanges will be examined. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 331, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 328. Professional Development I: Introduction to the Profession. 2 Hours. Students are introduced to the evolution of the profession of nursing. Concepts of caring, professional identity and scholarship are examined. Students will have opportunities to investigate personal and professional boundaries, examine their own beliefs and values, and explore the value of scholarship on nursing practice. Students will examine how their lived experience will impact their professional practice. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 329, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 329. Alterations in Physiological Functioning I. 2 Hours. Basic mechanisms underlying illness and disease are stressed as a basis for the understanding of health promotion and disease prevention in this first of two sequential courses. Pathophysiological changes that occur within the environments of individuals in the presence of dysfunction or disease of selected systems are presented as a rationale for nursing diagnoses and therapeutic interventions. System variations across the life span (fetuses, children, pregnant women, adults, and older adults) are addressed. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 329, NURS 330, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 330. Pharmacology I. 2 Hours. Pharmacodynamics and pharmacokinetics of drug therapy across the lifespan are discussed in order to provide a basic understanding of the patient's reaction to a drug both therapeutically and adversely, and to predict potential drug interactions. Personal, genetic, and environmental factors affecting drug therapy are assessed in order to provide a comprehensive data base for therapeutic nursing interventions. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drug effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 331, NURS 328, NURS 329, NURS 332, NURS 333 or consent of instructor. LEC.

NURS 331. Basic Assessment and Clinical Skills. 3 Hours. Skills necessary to perform basic patient assessment and clinical skills are discussed and demonstrated. Opportunities are provided in a laboratory setting for students to demonstrate cognitive and psychomotor competencies of therapeutic interventions and assessment of the individual patient across the life span. The emphasis is on interviewing techniques, physical examination, and psychomotor skills. Developmental factors and risk factors, including genetic and environmental, that affect the patient's health will be explored. Prerequisite: Admission to the School of Nursing or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330 or consent of instructor. LEC.

NURS 332. Health and Illness: Foundations of Nursing. 3 Hours. Concepts basic to the art and science of nursing are introduced as a foundation for safe, quality patient care. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Evidence-based principles of nursing and health promotion are integrated to prepare the student to meet the health-related needs of a patient. The nurse's role as a member of the interdisciplinary team will be examined. Prerequisite: Corequisite: NURS 331, NURS 327, NURS 328, NURS 329, NURS 330, NURS 333, or consent of instructor. LEC.

NURS 333. Health and Illness: Foundations of Nursing Practicum. 1 Hour. Evidence-based clinical reasoning is applied in the care of individual patients with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 331, or consent of instructor. Corequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, or consent of instructor. LEC.

NURS 334. Professional Development II: Image, Roles, and Ethics. 3 Hours. Ethical principles are applied to care of persons in diverse settings. Team building and group process skills are explored to facilitate students working within teams. The role of the nurse as a member of the interprofessional team is examined using concepts of ethics, advocacy, group process, and team building. The professional responsibilities and role of the advocate will be explored. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 335. Quality Improvement. 2 Hours. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. LEC.

NURS 336. Alterations in Physiological Functioning II. 3 Hours. Building on NURS 321, this course expands knowledge of pathophysiological changes that occur within the environments of the individual in the presence of dysfunction or disease. The most common alterations in selected physiological systems are presented as a framework for clinical reasoning. Relevant risk factors, epidemiology, pathophysiologic mechanisms, and clinical manifestations across the life span (fetuses, children, pregnant women, adults, and older adults) are
discussed. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 337, NURS 338, or consent of instructor. LEC.

NURS 337. Pharmacology II. 2 Hours.
In this second sequential course, students continue their study of pharmacology across the lifespan. Specific prototypes of selected drug classifications provide the framework for understanding the action, use, adverse effects and nursing implications of drugs. The nurse's role in drug administration, assessment of drugs' effects, and patient education are emphasized. Legal and ethical responsibilities for administering drugs are considered. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, or consent of instructor. Corequisite: NURS 335, NURS 336, NURS 337, NURS 338, or consent of instructor. LEC.

NURS 338. Health and Illness: Nursing Across the Lifespan. 3 Hours.
A greater sophistication of clinical reasoning is developed to achieve safe and quality outcomes using multiple ways of knowing including nursing knowledge. Emphasis is placed on managing the care of patients experiencing acute and chronic illnesses and promoting health across the lifespan. Strategies to empower and engage patients/designees in all aspects of the health care process are examined. Evidenced-based therapeutic nursing interventions that meet a patient's holistic health needs will be expanded. Perspectives of other health care members will be recognized in order to collaborate and work effectively as a team to provide interdisciplinary care. Technology and communication skills are integrated as methods to support safe processes of care. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 327, NURS 328, NURS 329, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, or consent of instructor. LEC.

NURS 339. Health and Illness: Nursing Across the Lifespan Practicum. 3 Hours.
Students engage patients in active partnerships to manage acute and chronic illness and promote health across the lifespan. Multiple sources of evidence are incorporated into the planning, implementation and evaluation of nursing care including nurse sensitive quality indicators. Coordination, integration and continuity of care for multiple patients will be applied in the healthcare microenvironment. Emphasis is placed on interdisciplinary collaboration to ensure safe and quality outcomes. Technology and information management tools are utilized to support safe processes of care. Prerequisite: NURS 331, NURS 332, NURS 333, NURS 327, NURS 328, NURS 329, or consent of instructor. Corequisite: NURS 334, NURS 335, NURS 336, NURS 337, or consent of instructor. LEC.

NURS 345. Nursing of Children: Practicum. 2 Hours.
Evidenced based clinical reasoning is applied in the care of children with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor. LEC.

NURS 346. Nursing of Adults: Practicum. 2 Hours.
Evidenced based clinical reasoning is applied in the care of adults with acute and chronic illness to ensure safe and quality outcomes. Emphasis is placed on the patient and/or designee as the source of control and full partner in providing compassionate and coordinated care. Tools of communication and technology are utilized in the delivery and documentation of care. The role of the nurse within the interdisciplinary team is demonstrated. Prerequisite: NURS 333, NURS 339, or consent of instructor. CLN.

NURS 347. Introduction to Healthcare Practices in Rural Communities. 2 Hours.
This course offers a broad overview of the unique challenges that are encountered in rural healthcare. Introduction to the role of the nurse within the rural healthcare setting and community is provided. Students will explore patterns of health, illness, and resources that meet the diverse needs of rural communities. Students will examine the influence of the rural community culture on health care practice. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339. LEC.

NURS 352. Client Assessment for the Practicing Nurse. 3 Hours.
Opportunities are provided, in a laboratory setting and with simulations, to demonstrate competencies in assessment of the individual client system across the life span. Historical data collection and psychological and physical assessment are reviewed. Interviewing techniques and the four basic methods of physical examination (inspection, percussion, palpation, and auscultation) are presented. Critical thinking is emphasized to cluster data to select and support nursing diagnoses. Prerequisite: Admission to the School of Nursing and RN licensure, or consent of instructor. LEC.

NURS 356. Using Technology and Informatics to Improve Patient Safety. 3 Hours.
Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Admission to the School of Nursing or consent of instructor. Satisfactory completion of a statistics course. LEC.

NURS 357. Introduction to the Baccalaureate Nurse Role. 3 Hours.
Contemporary issues confronting the nursing profession are discussed. Personal accountability, professional boundaries, and group process skills are explored to facilitate students working within interprofessional health care teams. Students will examine their own beliefs and values, establish personal and professional boundaries, and develop their personal philosophy of nursing. Students will explore how their lived experience will impact their professional practice. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

NURS 382. Honors Seminar. 1 Hour.
This seminar provides the Honors nursing student the opportunity to explore topics of interest and begin reviewing the current research literature on a given topic. Emphasis is placed on interaction with active nurse researchers to enable the student to identify available research opportunities in ongoing studies. Students are introduced to the application of various methods used to address nursing questions. Prerequisite: Admission to the Nursing Honors Program. LEC.

NURS 401. Basic Spanish for Nurses. 2 Hours.
This is an entry level Medical Spanish course for students with minimal or no Spanish language education. Students will develop working language skills, learning techniques for optimal communication, phonetics, morphology, grammar, understanding sentence structure, conjugation and cultural aspects applicable to the current health care environment. The goal is to achieve proficiency and confidence when using the Spanish
language with Hispanic patients. Prerequisite: None or Consent of Instructor. LEC.

**NURS 402. Health Care of the Older Adult. 2-3 Hours.**
Students will explore concepts and theories to increase their knowledge base of the complex challenges that face older adults and their families. Emphasis will be on promotion, maintenance and restoration of health and wellness, and the prevention of disease. Internal and external environmental factors will be assessed including biophysical, psychological, behavioral, sociocultural, economic and political. Students will utilize case examples and discussion to practice integrating communication and clinical skills into the role of the nurse as a client advocate and professional health team member. A clinical experience option for one-credit hour is offered for students to provide direct care to older adults in a variety of settings. Prerequisite: NURS 360, NURS 420, NURS 434 or consent of instructor. LEC.

**NURS 408. Spirituality in Healthcare. 2 Hours.**
The focus of this elective is to explore the relationship between spirituality and a person's health. A non-religious approach with a focus on global spiritual traditions and needs will be explored. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

**NURS 410. Primary Women's Health Care Across the Lifespan. 3 Hours.**
Psychological, sociological, and physiological issues of health and human functioning of the female client systems across the life span are explored. Theory and research-based therapeutic management of acute, episodic, and chronic conditions that occur in community based women and their families will be planned. Professional values including standards of practice, certification, cultural, legal and ethical issues, and professional roles will be addressed. The health care delivery system will be analyzed for cost effectiveness and sensitivity to women. Prerequisite: Corequisite: RN-BSN student or consent of instructor. LEC.

**NURS 411. Population-Based Nursing. 3 Hours.**
Concepts and theories related to providing health care to complex systems and aggregates in the community, state, nation and world are explored. Emphasis is placed on the promotion, maintenance and restoration of health and wellness, and the prevention of disease. Environmental components including historical, political, social, cultural, and economic factors are presented. The role of the health care provider in identifying, prioritizing and meeting the health and life participation needs of populations is discussed. Prerequisite: Admission to the School of Nursing. LEC.

**NURS 412. Nursing in Healthcare Microsystems. 3 Hours.**
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet. This environment is where the nurse participates in a broad mixture of direct and indirect patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

**NURS 413. Ethics, Advocacy, and Collaboration in Nursing Practice. 3 Hours.**
Ethical principles of patient care are applied. Team building and group process skills are explored to facilitate working within the interprofessional healthcare team. The role of the nurse as a member of the healthcare team is examined using concepts and theories of communication, group process, team building, and advocacy. Skills to continue professional growth and support excellence in nursing practice are investigated. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

**NURS 414. Organizational Influences on Nursing Practice. 3 Hours.**
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and political environmental factors is examined. Prerequisite: Admission to the School of Nursing or consent of instructor. LEC.

**NURS 415. Improving Healthcare Quality. 3 Hours.**
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the School of Nursing or consent of instructor, Satisfactory completion of a statistics course. LEC.

**NURS 416. Evidence-Based Nursing Practice. 3 Hours.**
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse's clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the School of Nursing or consent of instructor, Satisfactory completion of a Statistics course. LEC.

**NURS 417. Influences of the Healthcare Macro-System on Nursing Practice. 3 Hours.**
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association's interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the School of Nursing. LEC.

**NURS 418. Senior Nursing Project. 3 Hours.**
Synthesis of knowledge for professional practice will guide development of a small test of change project to meet an identified need in an area of interest. The student will select an area associated with a patient safety initiative, patient education need or agency educational need for project implementation. Prerequisite: NURS 353, NURS 354, NURS 355, NURS 356, NURS 357, NURS 411, NURS 412, NURS 413, NURS 414, NURS 415, NURS 416, NURS 417, or consent of instructor. LEC.

**NURS 441. Evidence Based Practice in Nursing. 3 Hours.**
Searching, critiquing and synthesizing sources of evidence as it applies to the nurse's clinical practice will be emphasized. Fundamental principles of the research process and models for applying evidence to clinical practice will be explored. Strategies for implementation of evidence into clinical practice will be discussed. Prerequisite: Admission to the RN to BSN program, course in statistics, or consent of instructor. LEC.

**NURS 443. Developing the Baccalaureate Nurse Role. 3 Hours.**
Contemporary issues confronting the nursing profession are discussed and methods to advocate for patients and the profession are investigated. Communication, clinical leadership, and evidence-based practice skills that enhance the student's ability to perform in a complex organizational system are emphasized. Personal accountability, professional boundaries,
team building, and group process skills are explored to facilitate students working within interprofessional health care teams. Students will examine their own beliefs and values and develop their personal philosophy of nursing. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 444. Using Technology to Enhance Client Safety. 3 Hours.
Beginning theory and practical applications of various uses and results of computer technologies, including electronic health records, are explored in order to provide the basic skills and current infrastructure for information management in healthcare delivery. These concepts and skills are essential for curriculum related activities, as well as for providing therapeutic nursing interventions and communications with faculty, client systems, and other healthcare participants. Built-in safeguards, and legal and ethical issues related to electronic communications and health records are emphasized using 21st century tools of communication and collaboration. Knowledge and skills presented in this course will be expanded in future nursing courses related to the baccalaureate completion program. Prerequisite: Admission to the RN to BSN program. LEC.

This course is designed to enlighten students to new cultures, provide the opportunity to see how these cultures deal with health care, and assess the clients' internal and external environment that impact health care. Various roles and responsibilities of nurses participating in international health are examined. A short term immersion experience provides an opportunity to incorporate the nursing process in clinic and community settings and to function as members of a health care team. Prerequisite: NURS 333, NURS 339, or consent of instructor. LEC.

NURS 446. Population Based Health Care for the Practicing Nurse. 3 Hours.
Concepts and theories important to providing health care to aggregates, communities, and populations are explored. Health promotion and prevention of disease and injury as essential elements of baccalaureate nursing practice are emphasized. Determinants of health are identified to allow students to construct methodologies that address health care disparities. The role of individuals within the interprofessional healthcare team is examined to determine the contributions of each to the achievement of healthy populations. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 447. Nursing Practice within the Clinical Health Care Micro System. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in micro-environments of health care delivery. The microsystem is the structural unit responsible for delivering care to specific patient populations or the frontline places where patients, families, and care teams meet (2008 AACN Essentials, p. 38). This environment is where the nurse participates in a broad mixture of direct and indirect care patient care delivery. Findings of current research related to nursing leadership are discussed. Professional, organizational, historical, and social factors that affect health care delivery within a clinical micro system are considered. Prerequisite: Admission to the RN to BSN program. LEC.

NURS 448. Scholarly Inquiry for Quality Improvement. 3 Hours.
Skills of inquiry and information literacy are developed to locate and evaluate information to improve healthcare quality. Continuous quality improvement is introduced as a foundation for quality care and patient safety. Data to monitor the processes and outcomes of care are discussed. Methods to design and test changes to continuously improve the quality and safety of healthcare systems are explored. Prerequisite: Admission to the RN to BSN program LEC.

NURS 449. Nursing Practice within the Healthcare Organization. 3 Hours.
The impact that nursing departments and organizational decision making has on the achievement of quality patient outcomes will be explored. Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the meso-environment of health care delivery. The role of the nurse as leader in achieving organizational goals addressing socio-cultural, economic, legal, and political environmental factors is examined. Prerequisite: Admission to the RN to BSN program LEC.

NURS 451. Navigating the Influences of the Health Care Macro-Environment. 3 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges in the macro-environment of health care delivery. The role of the nurse as a provider of direct and indirect care is expanded to include local, state, national and international regulatory, legal, and professional association interactions that impact the ability of the nurse to deliver patient care. Prerequisite: Admission to the RN to BSN program LEC.

NURS 452. Laboratory Data and Diagnostic Procedures: Clinical Applications. 2 Hours.
Understanding and interpreting common laboratory tests and diagnostic procedures to identify potential or actual needs of individuals is the primary purpose of this course. Alterations in laboratory data and diagnostic testing procedures due to common pathological states of individuals across the life span will be explored. The focus will be on using this knowledge to identify nursing concepts, diagnoses, and appropriate interventions. LEC.

NURS 453. Independent Study in Nursing. 1-5 Hours.
Intensive study in an area of interest with experiences selected according to the student's written purposes, conceptual framework, objectives and evaluation. Appropriate prerequisite courses, as determined by the Independent Study faculty advisor, must be completed. IND.

NURS 471. Development of a Microsystem Leader. 3 Hours.
Development of a microsystem leader supports the student's understanding of nursing leadership opportunities at all levels of nursing practice. Emphasis will be placed on building and growing teams, modeling a culture of safety and resource utilization, allocation and financial management. Students will be given the opportunity to demonstrate effective decision making and clinical judgement while exploring their role in the healthcare microsystem. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 or consent of instructor. Corequisite: NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 472. Evidence-Based Practice: Translating Research to Practice. 2 Hours.
Concepts of evidence-based practice (EBP) and healthcare research are explored. Methods to critically appraise healthcare research will be applied. Critical appraisal of evidence will be employed to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 473. Professional Development III: Transition to Practice. 2 Hours.
Contemporary issues confronting the nursing profession are discussed and methods to advocate for the profession are investigated. Professional skills, such as job interviewing, portfolio development, and examination of
advanced roles in nursing will be emphasized. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or Consent of Instructor. Corequisite: NURS 471, NURS 472, NURS 474, NURS 475, or Consent of Instructor. LEC.

NURS 474. Health and Illness: Nursing with Diverse Populations. 4 Hours.
Comprehensive and focused evidence-based care of patients in diverse populations with complex health conditions will be examined. The nurse’s role in assuring coordination, integration, and continuity of care is investigated. Integration of the physical, behavioral, psychological, spiritual, socioeconomic and environmental factors that influence patient centered care is explored. Collaboration with other health care team members to provide safe and quality care for diverse patients in a variety of complex settings is analyzed. Information management tools to monitor outcomes of care are evaluated. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 472, NURS 473, NURS 475, or consent of instructor. LEC.

NURS 475. Health and Illness: Nursing with Diverse Populations Practicum. 3 Hours.
Coordination, integration, and continuity of care for diverse patients with multiple/complex problems will be applied in the dynamic microenvironments such as: maternity, pediatrics, mental health, and critical care. Patients/designees are engaged in active partnerships that promote health, safety, well-being, and self-care management. Synthesis of evidence and collaboration with other members of the health care team are used to plan, implement, and evaluate safe and quality care for patients. Technologies that support clinical decision-making, error prevention, and care coordination are emphasized. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, or consent of instructor. Corequisite: NURS 471, NURS 472, NURS 473, NURS 474, or consent of instructor. LEC.

NURS 476. Nursing in an Evolving Healthcare System. 4 Hours.
Nursing practice in an evolving health care system is addressed with emphasis on the unique challenges presented to the nurse. The role of the nurse as provider of direct and indirect patient care is expanded to include the external influences of the health care organization, the regulatory environment, and the professional association. The development of the nurse as a member of a profession is expected. Inherent is a developing knowledge and appreciation for the diversity of opinions and organizations that exist to provide assistance in the delivery of direct patient care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 477, NURS 478, NURS 479, NURS 480, or consent of instructor. LEC.

NURS 477. Capstone. 3 Hours.
A preceptor model of learning professional nursing practice provides opportunities to synthesize and integrate previous learning experiences. Emphasis is placed on the roles of the nurse as provider of indirect and direct care; designer, manager and coordinator of care; and member of the profession. The focus is on individual transition to the professional nursing role, recognizing the organizational, social, political, economic, ethical, and legal context in which interdiscipliary health care is delivered in a selected clinical setting. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 478, NURS 479, NURS 480, or consent of instructor. LEC.

NURS 478. Integration of Concepts and Clinical Competencies. 1 Hour.
Students integrate concepts discussed in the classroom with competencies learned in the clinical setting. Using small group guided discussion, students begin building a skill set that shows knowledge of and appreciation for the roles of direct care provider, designer, manager and coordinator of care; and member of profession. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 477, NURS 480, NURS 486, or consent of instructor. LEC.

NURS 480. Practicum IV: Leadership in a Population Health Setting. 2 Hours.
Concepts and theories from leadership and population health are applied to the health care of: individuals, groups, communities and populations. There is a concentrated focus on leadership in health promotion that provides safe, effective, and efficient care. Leadership concepts such as systems theory, quality improvement, economics, and evidence are applied. Students are provided opportunities for inter-professional collaboration in the planning of health care and promotion of quality outcomes for diverse populations. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 476, NURS 478, NURS 485, or consent of instructor. LEC.

NURS 481. Honors Evidence-Based Practice: Translating Research to Practice. 2 Hours.
Concepts of evidence-based practice (EBP) and health care research are explored to inform the delivery of safe and quality nursing care. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. Corequisite: NURS 471, NURS 473, NURS 474, NURS 475, or consent of instructor. This course is for Honors students only. LEC.

NURS 482. Honors Practicum I. 2 Hours.
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conduction research. LEC.

NURS 483. Honors Practicum II. 2 Hours.
Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team. Students apply principles of research learned in NURS 460 to design and critique their own research project while providing feedback to peers. Through seminar activities they critically analyze the issues, rewards, and challenges of conduction research. LEC.

NURS 485. Population Health, From Local to Global. 2 Hours.
Population based health and multi-sectoral systems influencing health, locally and globally, are explored. Students build upon clinical reasoning skills from an individual level of care to a global context of care. Focus is on risk reduction, protective and predictive factors, and the systems influencing the health of individuals, families, and communities. Multiple determinants of health and basic data patterns are applied to assess the health and illness beliefs, assets and barriers to health and to explore
historical, social, political and economic forces impacting the health of communities. Prerequisite: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 332, NURS 333, NURS 334, NURS 335, NURS 336, NURS 337, NURS 338, NURS 339 Corequisites: NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, or consent of instructor. LEC.

NURS 486. Global Health II. 2 Hours. Community theories, models and frameworks are explored to guide a community health improvement project. Community engagement and collaboration, health coaching and behavior change, and chronic disease management are used to create a community health improvement plan. Quality indicators and sustainable health outcomes are explored to address local, state, and global health issues impacting communities. Prerequisite: Prerequisites: NURS 327, NURS 328, NURS 329, NURS 330, NURS 331, NURS 336, NURS 337, NURS 338, NURS 339, NURS 471, NURS 472, NURS 473, NURS 474, NURS 475, NURS 485. Corequisites: NURS 476, NURS 477, NURS 478, NURS 480. LEC.

NURS 492. Senior Project. 2-3 Hours. Synthesis of knowledge for professional practice will guide development of a project to meet an identified need in an area of interest. The student will select one of three areas (management, clinical practice, education for patients and families, staff, or agency personnel) for project implementation. Prerequisite: NURS 320, NURS 352, NURS 433, NURS 434, NURS 435, and NURS 437. Corequisite: NURS 326, NURS 439, and NURS 441. LEC.

Bachelor of Science in Nursing

The School of Nursing offers three undergraduate nursing programs: Pre-Licensure BSN, RN to BSN (p. 2404), and Community College Nursing Partnership (CCNP) (p. 2404).

With a Bachelor of Science in Nursing (BSN) from the University of Kansas School of Nursing, graduates are prepared for success in any health care setting. KU graduates are ready to work in hospitals, community health agencies, industrial or long-term care facilities, as travel nurses, flight nurses, as well as in other clinical settings.

Graduates of the KU School of Nursing baccalaureate program, begun in 1929, go on to become charge nurses and move into other leadership positions in Kansas and across the country. They are well-prepared for continuing their education through master's and doctoral programs in nursing.

School of Nursing alumni are hired by hospitals of great renown, including Johns Hopkins and Mayo Clinic and excellent hospital systems closer to home at The University of Kansas Health System and Children's Mercy Hospitals and Clinics.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/) (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksonline.org/). The Nurse Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (ACME) (https://www.midwife.org/acme/) of the American College of Nurse-Midwives (http://www.midwife.org/), 8403 Colesville Rd., Suite 1550, Silver Spring, MD 20910, (240) 485-1800.

Undergraduate Admission to the School of Nursing

Pre-Licensure BSN Program

Students enter the Pre-Licensure BSN program after taking 58 semester credit hours of prerequisite work in an accredited college or university. Admission to the school is competitive. A minimum grade-point average of 2.5 is required to apply.

Pre-Nursing Advising

A pre-nursing advisor is available by appointment during the fall and spring semesters in the Undergraduate Advising Center (http://advising.ku.edu/), Summerfield Hall, on the Lawrence campus and year-round on the Kansas University Medical Center campus in Kansas City. The advisor provides students with information about the nursing profession, help with course selection in preparation for nursing application, and guidance in the admission process. For an appointment, current Lawrence campus students can call (785) 864-2834. All other students can call (913) 588-1619 for an appointment in Kansas City.

Admission Procedure

Applications for the pre-licensure BSN program are accepted from July 1st to October 1st for admission the following fall semester. Applications are accepted through the KU Medical Center online application (https://www.applyweb.com/kumc/) site.

Admission Criteria

The school is meeting the changing needs of society by selecting applicants who, in the judgment of the Student Admission and Progression Committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected based on college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university's programs and activities.

Locations

The School of Nursing has two campuses: one on the University of Kansas Medical Center campus in Kansas City, KS, about one hour east of the Lawrence Campus, and one on the University of Kansas Medical Center campus in Salina, KS, about two hours west of the Lawrence campus.

Course Requirements

Within the 58 hours required for admission to the basic BSN program, the following must be included:

Humanities and Social Sciences

Courses in English composition and literature, public speech, general sociology, general psychology, theories of child or human development, global awareness, and humanities are required. Students who complete these general education requirements through the Lawrence Campus meet these requirements by taking the following courses:
Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 4 performance-based credit hours can be accepted in the 58 credit hours required for admission. These 4 credit hours may be in physical education courses, and technique courses in art, music, and dance.

**RN to BSN Program**

Through the RN to BSN program, licensed registered nurses (RN) with associate degrees in nursing can complete their Bachelor of Science (BSN) degrees online.

**Admission Procedure**

The application for the RN to BSN program always is open, with the following deadline dates: **January 15th** for mid-spring semester, **April 1st** for summer semester, **July 1st** for fall semester, **August 1st** for mid-fall semester, and **November 1st** for spring semester. Applications are accepted through the KU Medical Center online application (https://www.applyweb.com/kumc/) site.

**Admission Criteria**

Eligible applicants must have current United States RN licensure, an associate degree in nursing from an ACEN-accredited college, and completion of 60 prerequisite credit hours with a cumulative GPA of at least 2.50.

The school is meeting the changing needs of society by selecting applicants who, in the judgment of the student admission and progression committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected based on college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university's programs and activities.

**Course Requirements**

Within the 60 prerequisite credit hours required for admission to the RN to BSN program, the following must be included:

**Humanities and Social Sciences**

Courses in English composition and literature, speech or interpersonal communication, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

**Electives**

Electives can be chosen according to the student’s interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, physics, mathematics, political science, western civilization, biological sciences, economics, etc.
hours of BSN courses online through KU Medical Center. Students first complete 59-62 credit hours of prerequisite liberal arts and science courses, and then simultaneously complete the Associate Degree in Nursing (A.D.N./A.S.N.) at a partner community college and 30 credit hours of BSN courses online through KU Medical Center.

**Admission Procedure**

Students should apply for admission to the CCNP immediately upon notification of admission to their selected A.D.N./A.S.N. program, but no later than the following dates: **July 1st** for fall semester and **December 1st** for spring semester. Applications are accepted through the KU Medical Center online application (https://www.applyweb.com/kumc/) site.

**Admission Criteria**

Eligible applicants must be admitted to a participating community college's Associate Degree in Nursing (A.D.N./A.S.N.) program and complete 59-62 credit hours of community college specific prerequisite credit hours with a cumulative GPA of at least 2.50. The school is meeting the changing needs of society by selecting applicants who, in the judgment of the student admission and progression committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for the successful study and practice of nursing, and who will best meet the needs of the citizenry. Students are selected on the basis of college scholastic achievement, interest in and commitment to nursing, letters of reference, extracurricular activities, personal characteristics, and health-related work and volunteer experience. The University of Kansas prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, status as a veteran, sexual orientation, marital status, parental status, gender identity, gender expression, and genetic information in the university's programs and activities.

**Course Requirements**

Within the 59-62 hours required for admission to the CCNP program, the following must be included:

**Humanities and Social Sciences**

Courses in English composition and literature, speech or interpersonal communication, general sociology, general psychology, theories of child or human development, global perspectives, and humanities are required. Students who complete these general education requirements through the KU College of Liberal Arts and Sciences meet these requirements by taking the following courses:

**Natural Sciences and Mathematics**

Courses in general chemistry, microbiology, and human anatomy are required. These courses must include laboratory experience. Courses in college algebra, statistics, physiology, and nutrition are also required but do not require a laboratory experience. Students who complete these general education requirements through the Lawrence Campus meet these requirements by taking the following courses:

**Electives**

Electives can be chosen according to the student’s interests or needs. Examples of such elective areas of study are foreign language, philosophy, literature, creative writing, history, oral communication, physics, mathematics, political science, western civilization, biological sciences, economics, etc. A maximum of 8 performance-based credit hours can be accepted in the 60 credit hours required for admission. These 8 credit hours may be in physical education courses, and technique courses in art, music, and dance.

**Community College Nursing Partnership Program (CCNP)**

Students first complete 59-62 credit hours of prerequisite liberal arts and science courses, and then simultaneously complete the Associate Degree in Nursing (A.D.N./A.S.N.) at a partner community college and 30 credit hours of BSN courses online through KU Medical Center.
The Pre-Licensure BSN Program can be completed in 2 academic years of full-time study.

The professional portion of the BSN program can be completed in 2 academic years of full-time study.

The RN to BSN program provides registered nurses a way to complete the baccalaureate degree in a flexible online format. The program can be completed in as little as one calendar year of full-time study or up to five years of part-time study. A total of 120 semester credit hours is required for the degree, comprised of 60 credit hours of liberal arts prerequisite courses and 60 credit hours of nursing courses and evidence of RN licensure. NURS 326 and NURS 352 are eligible for credit by portfolio or transfer from approved associate degree programs. The last 30 hours completed for the degree must be taken at KU.

University Honors Program

The School of Nursing encourages all qualified on-campus BSN undergraduates to participate in the University Honors Program (http://www.honors.ku.edu/).

Departmental Honors Program

The School of Nursing’s Departmental Honors Program offers enhanced educational opportunities for the most academically talented, promising,
and motivated baccalaureate students while providing a foundation for leadership development and articulation into graduate education.

Students in the School of Nursing Honors Program develop and complete a research project under the guidance of a faculty research mentor. Students must make formal application and be admitted to the Honors Program to take honors courses. Once admitted to the program, students may use departmental honors courses to help meet the requirements of the University Honors Program.

Selection criteria for the Nursing Honors Program are as follows:

- Enrollment in the Pre-Licensure BSN program
- Full-time status
- Completion of Nursing Honors Program application - available during the first semester of nursing school
- Overall grade-point average of 3.25 or higher and contingent upon earning a nursing grade-point average of 3.5 or higher at the end of the fall semester (exceptions are considered on an individual basis)

Academic progression through the honors curriculum is evaluated on an individual basis. However, to graduate with departmental honors from the School of Nursing, the student must attain an overall grade-point average of 3.25 with a nursing grade-point average of 3.5 and satisfactory grades in all clinical practicum courses, complete all required courses in the Nursing Honors Program, and have their oral and written reports of research findings certified.

The honors curriculum comprises the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>NURS 382</td>
<td>Honors Seminar (spring of junior year)</td>

<td>Honors Evidence-Based Practice: Translating Research to Practice (summer between junior and senior year)</td>
<td>2</td>
</tr>
<tr>
<td>NURS 482</td>
<td>Honors Practicum I (fall of senior year)</td>
<td>2</td>
</tr>
<tr>
<td>NURS 483</td>
<td>Honors Practicum II (spring of senior year)</td>
<td>2</td>
</tr>
</tbody>
</table>

Students who successfully complete the Nursing Honors Program are recognized in the following ways:

- The notation of Departmental Honors on the official university transcript
- An official certificate indicating graduation with BSN Honors
- Listing in the School of Nursing Recognition Ceremony program
- Formal recognition at the School of Nursing Recognition Ceremony
- Listing in the University of Kansas Commencement Program
- Formal recognition at the Cording Ceremony on the Lawrence campus for students also completing the University Honors Program

For more information, contact the School of Nursing Office of Student Affairs and Enrollment Management.

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/ evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client's history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to
function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University's Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Nursing and Interprofessional Master of Science Degrees

The Nursing Master of Science degree program enlarges the focus of nursing, using as its foundation the basic baccalaureate nursing program. The master's program curriculum includes the following components: Common Core, Leadership Core, Research Core, and Specialty Core. Leadership specializations include nursing education, organizational leadership, and public health nursing. The health informatics specialty is offered as an Interprofessional degree program.

The Interprofessional Health Informatics Master of Science (https://catalog.ku.edu/nursing/ms-health-informatics/#text) degree program prepares graduates for entry and mid-level positions in a variety of health care organizations. In addition to a foundation in applied health informatics, the curriculum focuses on special skills in organizational change, project management, and impact evaluation.

The KU School of Nursing’s baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE/) (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/).

Applications to the Nursing Master of Science and Interprofessional Health Informatics Master of Science (p. 2410) degree programs are accepted twice a year. April 1st and September 1st are the respective deadlines for fall and spring semesters.

Nursing application eligibility requirements FOR THE NURSING MASTER OF SCIENCE are:

1. Bachelor of Science in Nursing (BSN) from a nationally accredited program (NLNAC or CCNE)
2. Current registered nurse licensure in at least one state in the United States
3. Minimum of one year of clinical work experience as a registered nurse is recommended
4. Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
5. Potential for leadership and application of scholarship in nursing
6. Potential to provide expert service and leadership in functional area
7. Completion of a graduate-level statistics course either prior to admission or during first semester of graduate study
8. Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

Interprofessional Health Informatics Master of Science application eligibility are located in the program's Admissions requirements (https://catalog.ku.edu/nursing/ms-health-informatics/#admissiontext).

English Language Requirements

All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

Nursing Master of Science Degree

Nursing Education (NE) Specialty (minimum 39 credit hours) - prepares nurses for the educator role in academic and clinical settings to deliver didactic and clinical instruction through a variety of teaching, learning and evaluative methods.

Interprofessional Health Informatics Master of Science

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the
skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health informatics, special skills will be acquired in organizational change, project management and impact evaluation.

DUAL Degree Program

Students who wish to earn master's degrees in both Nursing (organizational leadership specialty) and Health Services Administration may elect the dual degree option. By combining some course work, the two degrees may be completed in a shorter time frame. Students in the MS/MHSA dual degree program must complete a total of 62 graduate credit hours: 29 credit hours in the School of Nursing and 33 credit hours in Health Policy & Management. If completed separately, the MS in nursing requires 37 credit hours, and the MHSA degree requires 52-54 credit hours.

Master of Science (Organizational Leadership, specialty) (MS) (p. 2410)
Master of Health Services Administration (MHSA) (p. 2246)

TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills
laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

**Doctor of Philosophy in Nursing**

The Doctor of Philosophy in Nursing (PhD) program prepares graduates to function in faculty positions in college and university settings; conduct independent research and scholarly endeavors in nursing; generate and expand the theoretical, empirical, and philosophical bases for nursing practice; provide leadership to the profession; and interpret nursing to society. Students have opportunities to expand their theoretical knowledge and research skills in one of three emphasis areas (Health Systems, Symptom Science, or Education); develop expertise in nursing theory development; expand research skills; and gain a historical and philosophical perspective that broadens their professional orientation and provides a basis for understanding changing social expectations, cultural perspectives, and economic and political trends. The PhD prepares nurse scientists for the future with coursework in Precision Health, Data Science, and Grant Writing.

Nurses engaged in doctoral study are adult learners with unique perspectives gained from personal, professional, and educational experiences. These individuals tend to be self-directed, goal-oriented, highly motivated and capable of abstract, original thinking. Individual interests are explored through study in the selected emphasis area. Learning is achieved through independent study and research, as well as instructed courses.

**PhD Program Objectives**

1. Develop expertise in the application of theoretical and conceptual frameworks to nursing.
2. Conduct and communicate research that advances the body of scientific nursing knowledge.
3. Analyze, develop, and evaluate concepts and theories that contribute to the science of nursing.
4. Evaluate the impact of the expanded knowledge base in nursing and external forces on the provision of health care to society and on the development of health care policy.
5. Examine the ways in which nursing knowledge and practice are influenced by historical developments, philosophical thought, and cultural diversity.

**Admission Criteria**

New students are accepted to the PhD degree program once a year, for instruction that begins in June during the summer semester. The application deadline is December 1st for admission the following summer. Prospective students can apply using the KU Medical Center online application (https://www.applyweb.com/apply/kumc/).

1. Completion of a Bachelor of Science in Nursing (BSN), Master of Science in nursing, or Doctor of Nursing Practice (DNP) degree from a nationally accredited program (NLNAC or CCNE)
2. Current registered nurse licensure in at least one state in the United States. This requirement may be waived for international students who will not engage in patient care while in the program
3. Preference is given to applicants with a 3.5 GPA in a BSN program or 3.25 GPA in a master's or DNP program
4. Potential for leadership and scholarship in nursing
5. Prerequisite preparation must include a graduate-level statistical methods course and an Analysis of Variance (ANOVA) course
6. Satisfactory criminal background check (completed once an offer of admission has been extended to applicant); it may affect the student's eligibility to enter the program

**English Language Requirements**

All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

**Program Options**

Students may apply to the research doctoral program after completing a DNP, master's degree in nursing or a baccalaureate degree with a major in nursing. The post-baccalaureate entry option is for exceptionally well-qualified BSN graduates whose career goals are research-oriented and who wish to progress as rapidly as possible toward the research doctorate in nursing.

**Course Requirements**

The PhD degree requires 67 credit hours; 52 coursework credit hours and at least 15 dissertation credit hours for Post-MS students. Post-BSN students complete an additional 6 credit hours from the graduate nursing core. The PhD program is offered through a combination of formats, including:

- Three on-campus, one-week summer intensives at the University of Kansas Medical Center in Kansas City, Kansas
- Online coursework throughout the year, including synchronous and asynchronous web-based conferencing on a regular basis
- On-campus and e-mentoring by faculty for research and career advisement and scholar development

Coursework includes curriculum components: core (41 credit hours for Post-MS), an Emphasis Area (11 credit hours), and Dissertation (at least 15 credit hours).

Emphasis Area

Emphasis Area Course #1* 3
Emphasis Area Course #2* 3
Emphasis Area Course #3* 3
NRSG 970 Synthesis of Emphasis Area of Study 2

Dissertation

NRSG 999 Dissertation (up to 6 credit hours in one semester) 15

*Courses will be selected in consultation with advisor.

Emphasis Area

The emphasis area includes 11 coursework credit hours in the student's area of choice from among three options: Health Systems, Symptom Science, or Education. Emphasis area courses must support the student's research interest area. Two of the 11 emphasis area credit hours are taken through enrollment in NRSG 970: Synthesis of Emphasis Area of Study, which is taken after completion of the emphasis area coursework. That course requires completion of a scholarly paper synthesizing content taken throughout the emphasis area course sequence.

Dissertation

Each PhD student must complete a study that shows the planning, conduct, and results of original research. See Doctoral Degree Requirements, Ph.D., in the Graduate Studies section of the online catalog. The minimum number of post-comprehensive dissertation credit hours is 15. The program also requires satisfactory completion of the University's research skills and responsible scholarhip requirement, two qualifying examinations, a comprehensive oral exam, (i.e., the dissertation proposal defense), and a final oral examination, (i.e., the final dissertation defense).

TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology, which may be an essential part of the selected research topic.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication
skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University's Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Doctor of Nursing Practice (DNP) to Doctor of Philosophy in Nursing (PhD) Program

The University of Kansas School of Nursing PhD program prepares graduates to function in faculty positions in college and university settings; conduct independent research and scholarly endeavors in nursing; generate and expand the theoretical, empirical, and philosophical bases for nursing practice; provide leadership to the profession; and interpret nursing to society. The DNP to PhD in Nursing program prepares graduates for these purposes for those who previously earned a DNP. The advanced practice or leadership cognate area from the DNP program serves as the “emphasis area” for the DNP to PhD program. Additional content provided in the PhD program is focused on statistics, theory, data science or precision health, research methods grant writing, and conduct of research, i.e., skills essential to the research doctorate. The DNP to PhD program focuses on preparing the graduate for conducting independent and collaborative research for nursing science.

Eligibility and Requirements

1. Completion of a Doctor of Nursing Practice degree from a nationally accredited program (NLNAC or CCNE).
2. Current registered nurse licensure in at least one state in the U.S.
3. Minimum cumulative graduate grade point average (GPA) of 3.0 on a 4.0 scale. Preference is given to applicants with a 3.25 GPA in the DNP program.
4. Potential for leadership and scholarship in nursing.
5. Prerequisite preparation must include a graduate-level statistical methods course and analysis of variance (ANOVA) course.
6. Satisfactory criminal background check (completed once an offer of admission has been extended to applicant).

Doctor of Nursing Practice

The Doctor of Nursing Practice (DNP) degree prepares graduates for nursing practice at the highest level. The DNP offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic and demanding health care field. Skills in collaboration, innovation, and evaluation — complemented by advanced nursing practice skills — prepare nurses to shape the future of health care. Graduates of the DNP program provide patient-centered care that is evidence-based, contribute to the development of evidence-based practice, and pursue leadership roles in a variety of health care and educational settings. All DNP graduates must have completed at least 1,000 hours of supervised, post-baccalaureate, practice experiences.

The KU School of Nursing's baccalaureate, master's, and doctor of nursing practice (DNP) programs are accredited by the Commission on Collegiate Nursing Education (https://www.aacnnursing.org/CCNE) (CCNE), 655 K Street NW, Suite 750, Washington, DC, 20001, (202) 887-6791. CCNE is a nationally recognized professional accrediting body for collegiate nursing programs. The baccalaureate, master's, and DNP programs also are approved by the Kansas State Board of Nursing (http://www.ksbn.org/). The Nurse Midwifery Program is fully accredited by the Accreditation Commission for Midwifery Education (http://www.midwife.org/Program-Accreditation/) (ACME), 8403 Colesville Rd., Suite 1550, Silver Spring, MD, 20910, (240) 485-1800.

DNP Admission

New students are accepted to the DNP degree program once a year, for study that begins during the summer semester. The application deadline is December 1st for admission the following summer (June). Prospective students can apply using the KU Medical Center online application (https://www.applyweb.com/apply/kumc/).

DNP Program Admission Criteria

1. Completion of a Bachelor of Science in Nursing (BSN) degree (for BSN to DNP), or completion of a nursing Master of Science (MS) degree (for post-master's DNP) from a nationally accredited program (NLNAC or CCNE)
2. Minimum cumulative undergraduate GPA of 3.0 for BSN-DNP application; for post-master's DNP, preference is given to applicants with a 3.25 graduate GPA in the master's program
3. Potential for leadership and application of scholarship in nursing
4. Potential to provide expert advanced clinical care or expert service in functional areas
5. New BSN graduates must obtain RN licensure prior to the first fall semester of enrollment
6. Minimum of one year of clinical work experience as a registered nurse is recommended
7. National certification in specialty area, where applicable (e.g., post-master's Advanced Practice DNP)
8. A graduate-level statistics course (may be completed prior to admission or during first semester of enrollment)
9. A background check and drug screen are required during the admission process and may affect the student’s eligibility to enter the program

**English Language Requirements:** All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the IELTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

**Post-Baccalaureate DNP Degree Requirements**

The post-baccalaureate DNP curriculum is designed for registered nurses who have completed a Bachelor of Science in Nursing (BSN) degree. The program for these students is divided into two components. The first consists of courses focusing on initial preparation for advanced practice in clinically-focused or leadership-focused roles. The second component includes courses for doctoral level preparation for advanced practice in clinically-focused or leadership-focused roles.

**Advanced-Practice Major**
The advanced-practice nursing major prepares nurses for nurse practitioner or nurse-midwife specialty areas.

- The nurse practitioner specialization prepares nurses to provide primary or acute (depending on specialization) health care to clients and families across the life span. Adult/gerontology acute care nurse practitioner, adult/gerontology primary care nurse practitioner, family nurse practitioner, and psychiatric/mental health nurse practitioner options are available. The nurse practitioner is prepared to provide health care in a variety of settings. (75-79 credit hours)
- The nurse-midwife specialization focuses on the support and management of well-women’s primary and reproductive health care needs through the life span. (76 credit hours)

**Leadership Major**
The leadership major prepares nurses for leadership roles in health informatics (73 credit hours), organizational leadership (74 credit hours), or public health nursing (75 credit hours).

**Curriculum**
The post-baccalaureate DNP program requires the following:

- 30 credit hours of post-baccalaureate Common Core and DNP core courses, which includes 1 credit hour DNP Synthesis Workshop course
- A minimum of 6 credit hours of doctoral practice project
- 12-17 credit hours of Advanced-Practice or Leadership core
- 12-24 credit hours of specialization courses
- 2-8 credit hours of specialty area support and practicum courses
- Satisfactory completion of the DNP oral comprehensive exam
- Satisfactory completion of the University’s research skills and responsible scholarship requirement

Total required DNP program credit hours vary from 73 to 79, depending on the specialization. Although curricular changes may occur, examples of core courses include:

Post-Master’s DNP Degree Requirements

The post-master’s DNP curriculum is designed for nurses who have already earned a nursing Master of Science degree. The DNP degree allows nurses to serve at a higher level as an advanced practice nurse or leader in their specialty. Two majors are offered in the post-master’s DNP program: 1) Advanced-Practice and 2) Leadership. A minimum of 32 credit hours is required for the post-master’s DNP. Depending on curricular background, some specialty specific courses are required, e.g., IPHI 957 and IPHI 958 are required for students with a specialty background in informatics.

- 19 credit hours of post-master’s DNP core courses. Although curricular changes may occur, examples of core courses include:

  - **Advanced-Practice**

    | Code    | Title                                                      | Hours |

    | IPHI 958 | Knowledge Representation and Interoperability               | 3     |
    | PRVM 826 | Epidemiology for Advanced Nursing Practice (or NRSG        | 3     |
          | equivalent)                                                |       |

- A minimum of 6 credit hours of doctoral project
- Specialty courses determined by program
- Satisfactory completion of the University’s Research Skills and Responsible Scholarship requirement

For further information, visit the Doctor of Nursing Practice section of the School of Nursing’s website (http://nursing.kumc.edu/academics/doctor-of-nursing-practice.html).

**TECHNICAL STANDARDS FOR ADMISSION**

University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual: Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.
E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Please see Doctor of Philosophy (PhD) in Nursing (https://catalog.ku.edu/nursing/phd/#text) for comprehensive details on the DNP-PhD Program.

Nursing and Interprofessional Certificate Programs

The School of Nursing offers several Post-Master’s Nursing Certificate programs in Advanced Practice. In addition, two interprofessional graduate certificates are offered: Health Informatics and Health Professions Educator. Select the program link below for detailed information on admission and certificate requirements.

Advanced Practice Post-Master’s Certificate Programs

The advanced practice clinical certificate programs require that applicants have completed an advanced practice registered nurse (APRN) educational program from a nationally accredited school of nursing. Applicants must also have completed the following advanced practice prerequisite courses, either as part of their previous graduate degree or as post-graduate study through an accredited university: advanced health assessment, advanced pathophysiology, advanced pharmacology, and health promotion.

The Adult/Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate (19 credit hours) is designed to provide APRNs who have a baseline preparation in primary care with an opportunity for additional training in acute care, as part of an interprofessional healthcare team. The curriculum includes core concepts of the advanced practice nursing role in acute care settings, expanded models of acute care, care transitions, and age-related considerations of the adult/gerontology patient in acute care. The role of the AGACNP may include episodic management of a patient in a clinical specialty unit, following a caseload of patients during a hospitalization, or caring for patients across the acute care continuum.

Required didactic courses are offered online. Practicum courses NRSG 975, NRSG 976, and NRSG 977 use on-campus, face-to-face clinical learning experiences, with clinical placement opportunities in diverse acute care environments, which may include the University of Kansas Health System. Simulation spaces on the KU Medical Center campus are used for skills training. Application deadline is April 1 for Summer semester.

The Adult/Gerontology Primary Care Nurse Practitioner (AGPCNP) Certificate (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary health care to a diverse population of adults. The Adult/Gerontology Primary Care Nurse Practitioner focuses on assessment and management of common acute and chronic health care problems of adult and older adult patients in primary care setting. A variety of practice settings are used: primary care or internal medicine clinics; occupational health clinics; home based care; long-term, assisted living or post-acute care; rural health clinics; and other sites serving adults and older adults.

Required didactic courses are offered online. Practicum courses NRSG 903, NRSG 904, and NRSG 905 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. Application deadline is June 1 for Fall semester.

The Family Nurse Practitioner (FNP) Certificate (16 credit hours) focuses on the knowledge and skills required to educate advanced practice nurses to provide primary health care to clients and families across the lifespan. Family Nurse Practitioners provide comprehensive health promotion services to ambulatory clients; evaluate presenting problems at the client’s initial contact with the primary care system; and continuing care to clients with acute and stable chronic illnesses.

Required didactic courses are offered online. Practicum courses NRSG 916, NRSG 917 and NRSG 918 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams. Application deadline is June 1 for Fall semester.
The Psychiatric/Mental Health Nurse Practitioner (PMHNP) Certificate (24 credit hours) prepares advanced practice nurses to diagnose and treat common mental health conditions in general medical settings and to deliver effective psychiatric care in mental health settings. Students are prepared to apply knowledge and skills in interpersonal, psychotherapeutic, and psychopharmacologic interventions for individuals, groups, and families with psychiatric disorders. All courses are online and offered in sequence every other year. Spring 2022 starts the next available course sequence. Application deadline is June 1 for Fall semester.

The Nurse-Midwife Certificate (23 credit hours) prepares advanced practice nurses to focus on the care and management of well women's primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus. The next available sequence begins Fall 2022. The application deadline is June 1, 2022.

Interprofessional Certificate Programs

The Health Informatics Certificate (19 credit hours) is an interprofessional program designed to prepare clinicians and health care professionals with skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. The graduate will be prepared for entry and mid-level positions within informatics departments, and as consultants and/or staff in organizations specializing in electronic health systems and knowledge management. Health care experience is preferred, but not required. All classes are offered online.

The Health Professions Educator Certificate (12 credit hours) is an interprofessional program that affords broad opportunities and necessary skills to develop healthcare education expertise in various roles within academic and clinical settings. Students complete applied teaching projects in each educator course, including a final student teaching capstone. Students may complete the Health Professions Educator Certificate as a post-baccalaureate student with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All required courses are online.

Adult/Gerontology Acute Care Nurse Practitioner Certificate

The Adult/Gerontology Acute Care Nurse Practitioner (AGACNP) Certificate (19 credit hours) is designed to provide APRNs who have a baseline preparation in primary care with an opportunity for additional training in acute care, as part of an interprofessional healthcare team. The curriculum includes core concepts of the advanced practice nursing role in acute care settings, expanded models of acute care, care transitions, and age-related considerations of the adult-gerontology patient in acute care. The role of the AGACNP may include episodic management of a patient in a clinical specialty unit, following a caseload of patients during a hospitalization, or caring for patients across the acute care continuum.

Required didactic courses are offered online. Practicum courses NRSG 975, NRSG 976, and NRSG 977 use on-campus, face-to-face clinical learning experiences, with clinical placement opportunities within the University of Kansas Health System. Simulation spaces on the KU Medical Center campus are used for skills training. Application deadline is April 1 for Summer semester.

Application for the Adult/Gerontology Acute Care Nurse Practitioner Graduate Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). The courses are offered in sequence beginning with the Summer semester. Application deadline: April 1 for Summer semester.

Admission requirements:

- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Official transcripts from all course work taken at any institution are required
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

The Adult/Gerontology Acute Care Nurse Practitioner Certificate requires completion of at least 19 credit hours of required coursework, earning at least a 3.0 (i.e., B equivalent) on a 4.0 GPA scale.

Certificate requirements:

- Certificate requirements are normally completed within two years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively
- Successful completion of the following courses:

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Adult/Gerontology Primary Care Nurse Practitioner Certificate

The Adult/Gerontology Primary Care Nurse Practitioner (AGPCNP) Certificate develops the knowledge and skills required for advanced practice nurses to provide primary health care to a culturally diverse population of adults. The Adult/Gerontology Primary Care nurse practitioner focuses upon assessment and management of common acute and chronic health care problems of adult and older adult patients in the...
primary care setting. A variety of practice settings are utilized: primary care or internal medicine clinics; occupational health clinics; home based care; long-term, assisted living or post-acute care; rural health clinics; and other adult and geriatric sites.

Required didactic courses are offered online. Practicum courses NRSG 903, NRSG 904, and NRSG 905 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams.

The Adult/Gerontology Primary Care Nurse Practitioner Certificate program requires that students have completed an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited school of nursing. Three separate, comprehensive graduate-level courses in advanced pathophysiology, advanced assessment, and advanced pharmacology are required.

The annual application deadline is June 1 for the Fall semester.

Admission requirements:

- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Official transcripts from all course work taken at any institution are required
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

Certificate requirements:

- Certificate requirements are normally completed within two years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively

Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require
coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Family Nurse Practitioner Certificate

The program prepares advanced practice nurses to add expertise in the role of Family Nurse Practitioner (FNP), a clinician who provides primary care in collaboration with other professionals to support health care for individuals, families, and communities. Students acquire knowledge, skills, and competencies for FNP practice, to manage primary health care needs of clients and families throughout the life span. The certificate courses include primary care theory courses, practice-focused clinical courses, and an intensive preceptorship experience. Courses are offered online and on the KU Medical Center campus, with precepted experiences in various community-based settings.

Required didactic courses are offered online. Practicum courses NRSG 916, NRSG 917, and NRSG 918 require visits to the KU Medical Center campus several times during each semester for Clinical Intensive workshops and Standardized Patient exams.

The Family Nurse Practitioner Certificate program requires that students have completed an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited school of nursing. Three separate, comprehensive graduate-level courses in advanced pathophysiology, advanced assessment, and advanced pharmacology are required.

The annual application deadline is June 1 for the Fall semester.

Admission requirements:

• Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing

• Official transcripts from all course work taken at any institution are required

• Current registered nurse licensure in at least one state in the United States

• Minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale

• Potential to provide expert service and leadership in functional area

• Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable
persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Health Informatics Certificate

Emerging technologies are fundamentally changing the way we manage and apply knowledge. In addition, healthcare organizations must meet the challenges of the HITECH Act and HIPAA, as well as regulatory influences. As a result, the need for trained healthcare informaticians has increased dramatically over the last few years. In order to appropriately select and use technology to improve healthcare and to meet the requirements of regulating bodies, health informatics professionals need training in the use of informatics concepts and methodologies.

The Health Informatics Certificate program meets this need by preparing students to:

1. Apply health informatics using theoretical, conceptual, and experiential knowledge base
2. Articulate a vision of health informatics in an organization in the context of interprofessional practice and complex healthcare delivery systems
3. Implement and evaluate information systems that support multi-professional clinical/administrative practice
4. Facilitate the delivery of evidence-based practice at point of care
5. Sit for national Nursing, MD or graduate level certification exams, such as nursing or MD, as appropriate

The advantage of this certificate program is that it offers an interprofessional learning experience and is open to graduates in all fields. This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html), which is sponsored by the School of Nursing.

Approved as a Stackable Program: To encourage career and academic progression, students who have completed the Health Informatics Certificate may apply the courses towards the degree requirements for the Master of Science in Health Informatics.

The application process for the Health Informatics Certificate program is an online process. Detailed instructions on how to apply are posted on the Center for Health Informatics (https://www.kumc.edu/health-informatics.html) website. Students are admitted for the fall and spring semesters only. Applications for the fall semester must be received by April 1st and by September 1st for the spring semester.

Admission Requirements:

- A bachelor's or master's degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended are required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants, who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (https://www.kumc.edu/office-of-international-programs/inbound-programs/academic-english-requirements.html).
- A background check (https://www.kumc.edu/health-informatics/ms-in-health-informatics/prospective-students/background-checks.html) is required during the admission process; it may affect the student's eligibility to enter the program.
- Three letters of recommendation from individuals who can assess your academic and professional background and potential for success in a graduate-level certificate program.
- A personal statement regarding applicant's career objectives and purpose.
- A current resume or curriculum vitae.
- A satisfactory phone or in-person interview.

Applicants will be assessed on the above criteria and selected applicants will in the judgment of the admissions committee, demonstrate the academic achievement, maturity, integrity, and motivation necessary for successful advancement. In addition, the committee looks for applicants who will contribute academic, nonacademic, and socioeconomic diversity to the class. The committee is interested in evidence of capacity for mature and independent scholarship.

After an applicant has been admitted, the program may defer an applicant's admission for one year after which time the applicant must submit a new application. Admission requirements are subject to change. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

Certificate Program Information: (p. 2585)

Certificates are not granted retroactively. An individual who is not currently a degree-seeking graduate student at KU must apply and may be admitted directly to a certificate program.

The certificate program is not a means of entry into a graduate degree program. If students admitted to a certificate program are later admitted to a graduate degree program as degree-seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the department and within general guidelines, be approved by the Office of Graduate Studies to be counted toward the degree.

While the courses comprising a certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral.

Graduate credit from another institution may not be transferred to a certificate program.

The graduate certificate program focuses on the theory and application of informatics, computer technology, knowledge management, and evidence-based practice that supports healthcare informatics and clinical decision-making. The program culminates with a mentored practicum experience and project.

Health Informatics Certificate

Certificate requirements:

- Certificate requirements are normally completed within one (1) year of admission to the program although a maximum of 4 years is allowed.
Certificate requirements:

- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate certificate coursework.
- Enrollment in a minimum of one (1) credit hour the semester the program is completed. Graduate certificates may not be granted retroactively.
- Successful completion of a minimum of 19 credit hours.
- Successful completion of the following courses:

<table>

Total Hours: 19

Graduate credit from another institution may not be transferred to a graduate certificate program.

Certificate requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

Healthcare Informatics Certificate

Effective Fall 2019, the Healthcare Informatics Certificate will no longer be accepting applications. Please apply to the Health Informatics Certificate program listed above.

Certificate requirements:

- Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed.
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework.
- Enrollment in a minimum of one credit hour the semester program is completed.
- Graduate certificates may not be granted retroactively.
- Successful completion of the following online courses:

Total Hours 19

Typical Plan of Study

The Health Informatics Certificate program consists of 19 credit hours. The 3-credit hour practicum (IPHI 856) requires a total of 200 clock hours and may be taken only after the majority of coursework is complete. This practicum may be taken over 1-3 consecutive semesters and must include the last semester in the program.

TECHNICAL STANDARDS FOR ADMISSION

University of Kansas School of Nursing

The Master of Science in Health Informatics degree and the graduate Health Informatics Certificate signify that the holder is prepared for entry into the practice of applied health informatics. Therefore, it follows that graduates must have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students with or without accommodations admitted to the program.

1. Observation: Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.

2. Communication: Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.
3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include field work in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem-solving abilities:** An applicant must be able to understand and learn factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

**NOTE:** Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University's Office for Academic Accommodations.

**Health Professions Educator Certificate**

The Health Professions Educator Graduate Certificate (12 credit hours) is an interprofessional program that affords broad opportunities and necessary skills to develop healthcare education expertise in various roles within academic and clinical settings. Students complete applied teaching projects in each educator course, including a final student teaching capstone.

Students may complete the Health Professions Educator Certificate as a post-baccalaureate student with a health-related degree, as a post-graduate certificate, or concurrently with a graduate program in nursing or other health-related discipline. All required courses are online.

**Approved as a Stackable Program:** To encourage career and academic progression, students who have completed the Health Professions Educator Certificate may apply the four certificate courses (NRSG 870, NRSG 871, NRSG 873, NRSG 874) towards degree requirements for the Master of Science in Nursing, Nursing Education specialty area.

Application for the Health Professions Educator Graduate Certificate is an online process. Detailed instructions on how to apply are posted on the School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). Application deadlines: June 1 for Fall semester; April 1 for Summer semester; November 1 for Spring semester.

**Admission requirements:**
- Baccalaureate degree or higher in nursing or other health related discipline.
- Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

**English Language Requirements:** All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

**Certificate requirements:**
- Certificate requirements are normally completed within one to two years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively
- Successful completion of the following online courses:

**TECHNICAL STANDARDS FOR ADMISSION**

University of Kansas School of Nursing

I. **Introduction**

All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be
met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes.

The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Nurse-Midwifery Certificate

The Nurse-Midwifery Graduate Certificate program (23 credit hours) prepares advanced practice nurses to focus on the care and management of well women’s primary and reproductive health care needs throughout the life span. The program content is family-centered, respectful of individual and cultural variations, and promotes health through individual choice and participation. Courses are offered online and on the KU Medical Center campus.

The next available sequence begins Fall 2022. The application deadline is June 1, 2022.

The application for the Nurse-Midwifery Graduate Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html). The courses are offered online in sequence beginning with the Fall semester. Application deadline: June 1 for Fall semester.

Admission requirements:
- Completion of an advanced practice registered nurse educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Current registered nurse licensure in at least one state in the United States
- Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
• Official transcripts from all course work taken at any institution are required
• Potential to provide expert service and leadership in functional area
• Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

Certificate requirements:

• Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed
• Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
• Enrollment in a minimum of one credit hour the semester program is completed
• Graduate certificates may not be granted retroactively
• Successful completion of the following courses:

TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction
All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients.
Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation

Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Psychiatric/Mental Health Nurse Practitioner Certificate

The Psychiatric/Mental Health Nurse Practitioner Graduate Certificate program (24 credit hours) prepares advanced practice nurses to diagnose and treat common mental health conditions in general medical settings and to deliver effective psychiatric care in mental health settings. Students are prepared to apply knowledge and skills in interpersonal, psychotherapeutic, and psychopharmacologic interventions for individuals, groups, and families with psychiatric disorders. All courses are online and offered in sequence every other year. Spring 2022 starts the next available course sequence. Application deadline is June 1 for Fall semester.

Cost information for this certificate is available through Title IV-Federal Student Financial Aid.

Application for the Adult Psychiatric/Mental Health Nurse Practitioner Certificate is an online process. This program is one of several certificate programs offered in the Advanced Practice (AP) area by the School of Nursing. Detailed instructions on how to apply are posted on School of Nursing website (http://nursing.kumc.edu/academics/certificate-programs/how-to-apply.html).

Admission requirements:
- Completion of an advanced practice registered nurse (APRN) graduate educational program from a nationally accredited (NLNAC or CCNE) school of nursing
- Current registered nurse licensure in at least one state in the United States
- Official transcripts from all course work taken at any institution are required
- Minimum cumulative undergraduate grade point average (GPA) of 3.0 on a 4.0 scale
- Potential to provide expert service and leadership in functional area
- Satisfactory criminal background check (completed once an offer of admission has been extended to applicant)

English Language Requirements: All applicants for study at the University of Kansas Medical Center (KUMC) whose native language is not English must demonstrate an established level of English language proficiency through either the TOEFL (Test of English as a Foreign Language) or the academic format of the EILTS (International English Language Testing System). The test must have been taken within two years of the first semester of enrollment.

Applicants will be assessed based on these requirements. After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

See also Admissions (p. 2573) in the Graduate Studies section of the online catalog.

Certificate requirements:
- Certificate requirements are normally completed within two to three years of admission to the program although a maximum of four years is allowed
- Cumulative grade-point average (GPA) of at least a 3.0 for all graduate certificate coursework
- Enrollment in a minimum of one credit hour the semester program is completed
- Graduate certificates may not be granted retroactively
- Successful completion of the following courses:

<table>

Total Hours 24
TECHNICAL STANDARDS FOR ADMISSION
University of Kansas School of Nursing

I. Introduction
All individuals admitted to the University of Kansas School of Nursing will be asked to verify that they can meet the following Technical Standards, with or without accommodation(s). In courses or programs without clinical components, or involving no direct client care, the Technical Standards may be modified by the Student Admission and Progression Committee (SAPC). After acceptance, but before admission to the School of Nursing, students in all programs must be able to document current certification/evidence of completion of a course in cardiopulmonary resuscitation for healthcare providers. This requires being able to successfully complete both the written and practical test for certification. In addition, with or without accommodation, the following abilities and expectations must be met by all students, undergraduate and graduate, admitted to the School of Nursing.

II. Standards

A. Observation/Sensory-motor: Applicants must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, physiology and pharmacology, microbiology and pathophysiology laboratory situations. Applicants must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

B. Communication: Communications include not only speech but also reading, writing, and computer usage, including handheld digital access. Applicants must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

C. Psychomotor: Applicants should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Applicants should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Applicants should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Examples of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation, administration of intravenous medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

D. Intellectual-Conceptual, Integrative, and Quantitative: Applicants must be able to comprehend and interpret documents written in English. Applicants should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client’s history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the applicant should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

E. Behavioral and Social Attributes: Applicants must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Applicants must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the admissions and education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing and student honor codes. The honor code at the KU School of Nursing is the Professional Integrity System (PROFITS). KU PROFITS is a peer-oriented integrity system to promote an environment where academic honesty is valued and expected.

III. Reasonable Accommodation
Applicants who disclose a disability are considered for admission if they are otherwise qualified so long as such accommodation does not significantly alter the essential requirements of the curriculum and the educational program, or significantly affect the safety of patient care or others. When applicants or students disclose a disability, the provision of reasonable accommodations will be considered in an attempt to assist these individuals in meeting these required technical standards. Applicants whose response indicates that they cannot meet one or more of the expectations will be reviewed further by the University’s Office for Academic Accommodations, with applicant and faculty input, to determine if any reasonable accommodations are possible to facilitate successful completion of the nursing curriculum and preparation for the national registry examination.

It is important to give persons interested in enrolling in nursing a realistic view of the vigorous demands of the School of Nursing’s theoretical and practicum curriculum while at the same time investigating reasonable accommodations. Whether or not a requested accommodation is reasonable will be determined on a case by case basis. Interested individuals may schedule an orientation visit to the nursing skills laboratory and actual sites of the University of Kansas Hospital and/or University of Kansas Medical Center. These orientation visits enable persons to assess their interest and ability to function in the actual clinical areas and in learning and demonstrating manual skills.

Master of Science in Health Informatics

Professionals in applied Health Informatics have skills in analysis, design, implementation, and evaluation of information systems that support a full range of clinical and patient care functions. Graduates will be prepared for entry and mid-level positions with hospital or clinic informatics departments, electronic health record (EHR) vendors, public health organizations, and as consultants and/or staff in organizations that specialize in knowledge management. Graduates also have the skills to enter the growing field of health information exchange, which includes regional health information organizations and the emerging personal health records. In addition to a foundation in applied health
informatics, special skills will be acquired in organizational change, project management and impact evaluation.

This is an interprofessional program administered by the Center for Health Informatics (http://www.kumc.edu/health-informatics.html), which is sponsored by the School of Nursing. The master’s degree is conferred by Medical Center Interdisciplinary Programs. The program is designed for health professionals who want a specialty focus in applied health informatics.

The application process is an online process. Detailed instructions on how to apply and the application deadlines are posted on the Master of Science in Health Informatics (http://nursing.kumc.edu/academics/master-in-health-informatics.html) website.

**Admission requirements:**

- A bachelor’s degree from a regionally accredited institution documented by submission of official transcript indicating the degree has been conferred before entering the program. Official transcripts from institutions attended post-baccalaureate are also required. Students with degrees from outside the U.S. may be subject to transcript evaluation indicating the degree is equivalent to a U.S. degree and meets the minimum cumulative GPA requirements.
- A cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale.
- Applicants who are not native speakers of English, whether domestic or international, must demonstrate they meet the Minimum English Proficiency Requirement (http://www.kumc.edu/Documents/graduate%20studies/Min%20Engl%20Prof%202016-Oct.pdf).
- A current resume or curriculum vitae.
- A personal essay outlining the applicant’s reasons for wanting to pursue graduate education in health informatics, career objectives, and any other information that would help the admissions committee get to know the applicant.
- Three letters of recommendation preferably from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A background check (http://www.kumc.edu/Documents/graduate%20studies/Background%20Check%202016-Oct.pdf) is required during the admission process; it may affect the student’s eligibility to enter the program.
- A graduate level statistics course (may be completed prior to application).
- Three letters of recommendation from employers, instructors, or other persons who can assess the applicant’s academic and professional potential. Letters are submitted per instructions provided for the online application process.
- A current resume or curriculum vitae.

After an applicant has been admitted, a program may defer an applicant’s admission for one year after which time the applicant must submit a new application.

**International Students**

Due to the number of required online courses for this degree, the Health Informatics Program at KUMC does not meet the U.S. student visa requirements at this time. Therefore, we are unable to accept individuals who are on student visas. If you received your university education outside of the U.S. or are in the U.S. on another type of visa, please contact HealthInformatics@kumc.edu for additional application requirements.

Admission requirements are subject to change. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.

The Master's in Health Informatics curriculum is divided into three cores: informatics, leadership, and research along with a discipline-specific emphasis track. The student and advisor will work closely together to develop a plan of study that meets the career goals of the student.

**Degree requirements:**

- Degree requirements can be completed within 2 years of admission to the program although a maximum of 7 years is allowed. Part-time students normally complete requirements within 4 years of admission to the program.
- Completion of a minimum of 40 credit hours.
- Cumulative grade-point average (GPA) of at least a 3.0 for all KU graduate coursework.
- Successful completion of a general examination (http://www.kumc.edu/Documents/graduate%20studies/Masters%20Exam-Defense%2016-Oct.pdf) the semester the student will graduate.
- Enrollment in a minimum of one (1) credit hour the semester the student will graduate.
- Degree requirements and course descriptions are subject to change. Any courses taken as an equivalent must be approved by the Graduate Director and the Office of Graduate Studies. In most cases, use the catalog (http://catalog.ku.edu/archives/) of the year student entered the program.
- Successful completion of the Health Informatics Core (minimum 17 credit hours.) These courses provide the core knowledge and skills essential to the practice of health informatics.

### Dual Degree: Doctor of Pharmacy & Master of Science in Health Informatics

The dual PharmD/MS in health informatics (MSHI) degree program is designed particularly for those students intending to pursue opportunities in pharmacy informatics. The dual PharmD/MSHI students will concurrently enroll in both programs during years 2-4 of the PharmD program. During the last semester, the HI practicum will satisfy 1 of 9 required advanced pharmacy practice experiences (APPEs). A Health Informatics comprehensive oral examination occurs during the last semester of enrollment in the Dual Degree (P4 Year, Spring semester). Admission to this program is restricted to students currently in the PharmD program at KU.

**TECHNICAL STANDARDS FOR ADMISSION**

University of Kansas School of Nursing

The Master of Science in Health Informatics degree and Graduate Certificate signify that the holder is prepared for entry into the practice of applied health informatics. Therefore, it follows that graduates must have the knowledge and skills necessary to function in a broad range of situations. The following abilities and expectations must be met by all students with or without accommodations admitted to the program.

1. **Observation:** Students must be able to observe: lectures, demonstrations, online written and recorded audio/visual material, online meetings, and research and practice situations. Observation necessitates the functional use of the senses of vision and hearing.

2. **Communication:** Applicants also must be able to communicate effectively and efficiently in English with other students, faculty, staff and mentors/preceptors. Communication includes not only speech, but also listening, reading, and writing. Effective communication includes the ability to comprehend conversation, presentations, assigned readings, and the ability to present information verbally and in writing.

3. **Motor:** A student must have sufficient motor function to attend classes, prepare assignments, use a computer keyboard, and make public presentations if required. Course requirements will also include field work in a variety of health organizations.

4. **Intellectual, conceptual, integrative, quantitative, and problem-solving abilities:** An applicant must be able to understand and learn factual information from readings and didactic presentations, gather information independently, analyze and synthesize learned material, and apply that information. In addition, an applicant must possess the ability to understand and work with measurements, carry out calculations and engage in reasoning, analysis and synthesis based on the calculations. An applicant must be able to draw on all these abilities to be an effective problem solver.

5. **Behavioral and social attributes:** Integrity, reliability, self-direction, motivation, and the ability to work with diverse groups are qualities necessary for effective preparation for and practice in this field. A student must have the emotional health required for the full use of his or her intellectual ability, exercise of sound judgment, and timely completion of all responsibilities attendant to the completion of academic responsibilities.

NOTE: Reasonable accommodations will be considered and may be made to qualified students who disclose a disability, so long as such accommodation does not significantly alter the essential requirements of the curriculum and the training program, or significantly affect the safety of patient care. Students who disclose that they have a disability are considered for the program if they are otherwise qualified. Qualified students with a disability who wish to request accommodations should provide the appropriate documentation of disability and submit a request for accommodation to the University’s Office for Academic Accommodations.
Pharmacy

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details). Other years’ catalogs (http://www.ku.edu/academics/catalogs/)

Doctor of Pharmacy (p. 2435) Doctor of Pharmacy (p. 2454)
PharmD Research Certificate Program (p. 2457)

Medicinal Chemistry (p. 2457) Master of Science in Medicinal Chemistry (p. 2460)
Doctor of Philosophy in Medicinal Chemistry (p. 2460)

Neurosciences (p. 2461) Master of Science in Neurosciences (p. 2461)
Doctor of Philosophy in Neurosciences (p. 2462)

Pharmaceutical Chemistry (p. 2463) Master of Science in Pharmaceutical Chemistry (p. 2468)
Doctor of Philosophy in Pharmaceutical Chemistry (p. 2469)

Pharmacology and Toxicology (p. 2470) Master of Science in Pharmacology and Toxicology (p. 2474)
Doctor of Philosophy in Pharmacology and Toxicology (p. 2474)

Pharmacy Practice (p. 2475) Master of Science in Pharmacy Practice (p. 2481)

The School of Pharmacy

Since its founding in 1885, the University of Kansas School of Pharmacy (http://pharmacy.ku.edu/) has been a leader in pharmacy education. Since 1996, the school has only offered the Doctor of Pharmacy degree as the entry-level practice degree. The curriculum gives the student the knowledge, skills, and ability required of the pharmacy practitioner; it is comprehensive and produces a highly competent general practitioner.

Approximately 65 full-time faculty members teach in the undergraduate professional Doctor of Pharmacy and graduate programs. Three departments (Pharmacology and Toxicology, Medicinal Chemistry, and Pharmaceutical Chemistry) offer Master of Science and Doctor of Philosophy degrees. The Department of Pharmacy Practice offers the master’s degree.

Both the undergraduate and graduate divisions have outstanding national and international reputations based on the excellence and productivity of the faculty. KU is consistently ranked in the top 5 among colleges/schools of pharmacy that receive National Institutes of Health research funding. KU’s School of Pharmacy was awarded more than $11 million in research grants and contracts from the NIH in fiscal year 2017.

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (https://www.acpe-accredit.org/), 190 S. LaSalle St, Suite 2850, Chicago, IL 60603-4810, (312) 664-3575, info@acpe-accredit.org, the official accrediting body for American schools of pharmacy.

Professional Program

The School of Pharmacy offers a 6-year Doctor of Pharmacy (p. 2454) program. The 2-year pre-pharmacy portion of the program may be taken at any accredited 2- or 4-year college.

After acceptance into the School of Pharmacy students complete the first 2 years of the Doctor of Pharmacy professional degree program (3rd and 4th year of college) are then awarded a Bachelor of Science in Pharmaceutical Studies (BSPS). Students must then go on to complete the remaining 5th and 6th professional years to be awarded the Doctor of Pharmacy (Pharm.D.) degree, which makes them eligible to sit for licensure examinations (NAPLEX and MPJE). These degree programs are available to students on both the Lawrence and Wichita campuses.

University Honors Program

The school encourages qualified students entering KU as freshman to participate in the University Honors Program (http://www.honors.ku.edu/).

Graduate Programs

The School of Pharmacy offers graduate programs through the departments of

• Medicinal Chemistry (p. 2457),
• Pharmaceutical Chemistry (p. 2463),
• Pharmacology and Toxicology (p. 2470), and
• Pharmacy Practice (p. 2475).

The Department of Pharmacy Practice offers the Master of Science degree. The other 3 departments offer both the M.S. and the Ph.D. with majors in their respective disciplines. Programs in Neurosciences (p. 2461) are offered in cooperation with KU Medical Center.

Requirements for admission and baccalaureate preparation vary with each department and are discussed separately. Address inquiries and correspondence about graduate studies to the program or department of interest.

Undergraduate Scholarships and Financial Aid

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/), located at the KU Visitor Center at 1502 Iowa St, Lawrence, KS 66045-7518, 785-864-4700, financialaid@ku.edu, administers grants, loans, and other need-based financial aid. In recent years, about $29 million has been processed annually through the office, including about $2 million annually in short-term loans. Prospective students should contact Financial Aid and Scholarships. Some financial aid programs have application deadlines as early as January 15. The earlier an application is received and the student’s file is completed, the better the chance of obtaining financial aid.

For information about scholarships from KU and various outside agencies based on academic merit, diversity, major, and residence, visit Scholarship Information for KU Students (http://affordability.ku.edu/cs/index.shtml/).
School of Pharmacy Financial Aid

The School of Pharmacy, in cooperation with Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/), offers financial assistance to pharmacy students. Applications are received in the dean’s office according to an announced schedule each year. Awards are based on merit and need. Assistance is available for both entering and continuing students.

Graduate Fellowships and Assistantships

For information about graduate assistantships, contact the School of Pharmacy (http://pharmacy.ku.edu/). Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU. Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

Undergraduate University Regulations

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Misconduct

Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct/) and Faculty Senate Rules and Regulations (http://policy.ku.edu/governance/USRR/).

Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor’s department, or if necessary, an associate dean. The chair or dean brings the matter to the instructor’s attention, preserving the student’s anonymity, if so requested.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. You may enroll in one pre-pharmacy course a semester under the option, if the course is not in your major or minor. For more information, visit the KU Policy Library (http://www.policy.ku.edu/). All professional coursework is graded. Warning: Undesirable consequences regarding admission may result from exercising the option. Some schools, scholarship committees, and honor society do not accept this grading system and convert grades of No Credit to F when computing grade-point averages.

Exemptions and Petitions

A student may gain an exemption or academic credit from introductory pre-pharmacy courses by successfully completing the Advanced Placement or College Level Examination Program examinations or by other recognized means. A total of 208 credit hours of college-level course work is still required for the PharmD degree. In meritorious cases, the department offering a specific course may waive course prerequisites. Students whose educational goals would be better served by courses other than those prescribed in the normal curriculum may petition the admissions and/or curriculum committee(s) for permission to make appropriate course substitutions.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.

Health Insurance and Immunizations

The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

Honor Roll

Students with grade-point averages of 3.5 who have completed at least 12 professional hours are recognized on the honor roll or dean’s list in fall and spring. An Honor Roll notation appears on the transcript.

Maximum Community College Credit Allowed

The School of Pharmacy allows a maximum of 68 credit hours from any accredited college or university toward completion of the PharmD degree prerequisites. All professional coursework must be completed at a college or school of pharmacy that is accredited by ACPE. To graduate from KU School of Pharmacy, all P3 and P4 coursework and rotations (APPEs) must be completed at KU.

Prerequisites and Corequisites

In meritorious cases, course prerequisites may be waived by the department offering the course. Waiver is not granted if the prerequisite course was taken and failed.

Probation

Probation

A student will be placed on academic probation if they:

1. fail to attain a 2.5 grade point average of professional coursework in any semester, or whose overall professional course grade-point average falls below 2.5.
   a. A student falling below the minimum grade point average of 2.5 will be required to develop and submit an individualized remediation plan to their Academic Faculty Advisor and the Chair of the Academic Standings committee.
2. fail an introductory or advanced pharmacy practice experience.
   a. A student failing either an IPPE or APPE will be required to develop an individualized remediation plan with the Assistant Dean for Experiential Education and the Associate Deans for Administration and Academic Affairs.
3. fails two or more milestone exams within the six-semester pharmacy skills laboratory curriculum.
4. fails to comply with programmatic requirements in a timely manner (see the pharmacy student handbook (http://policy.ku.edu/pharmacy/student-handbook/)).
Suspension
A student who fails or does not make timely progress in a course or courses while a student in the School of Pharmacy may be placed on suspension. Additionally, a student who fails to comply with the School conduct policy, or academic and/or programmatic requirements may be placed on suspension.

Dismissal
Students will be dismissed from school if they:
1. fail to attain a 2.5 grade-point-average in all courses or in professional courses for any semester while on probation.
2. receive a grade of "F" in 40 percent or more of the credit hours taken during any semester (including semesters in which they are enrolled in only one course).
3. fail an individual course twice.
4. fail two advanced pharmacy practice experiences (APPEs).
5. they fail a milestone exam within the six-semester pharmacy skills laboratory curriculum while on probation as a result of prior milestone failure or academic poor performance (i.e. professional GPA <2.5)
6. are placed on probation or suspended for a second academic semester for failure to comply with programmatic requirements.

Petitions
Students dismissed for poor scholarship may file a written petition with the academic standing committee for reinstatement. The committee’s decision is final. The committee normally takes one of the following actions:
1. The student is allowed to enroll, often with specific recommendations regarding strategies for restoring good academic standing.
2. The committee may deny the petition.

Courses Taken Outside the School
Students on probation or in nondegree-student status may take courses outside the School of Pharmacy, or at other institutions, to improve the grade-point average. Prior approval is required, and in general, only courses that count toward graduation are honored. All professional coursework must be completed at a college or school of pharmacy that is accredited by ACPE.

Return to Good Standing
Students will return to good standing when the overall pharmacy grade point average reaches 2.5. Students are required to be in good standing (i.e. GPA of 2.5 or higher) to be eligible to enroll and participate in advanced pharmacy practice experiences. If a student who was placed on academic probation due to milestone exam failure passes all the milestone exams during the subsequent semester they will be removed from probation (only if their professional GPA is also at or above 2.5).
1. Students with professional GPAs at or above 2.5 who are on academic probation due to milestone failure(s) at the end of their P3 spring will be required to complete a remediation rotation with a faculty member, preferably in a practice setting similar to the milestone failure. These students will need to pass the remediation rotation in order to start in their required 9 APPE rotations.
2. Courses taken outside the School: Only courses completed within an ACPE accredited institution may be used to increase a student’s professional GPA. Authorization to complete or use non-KU School of Pharmacy professional coursework requires prior Curriculum Committee approval. Credit for coursework completed as part of a dual degree (e.g. MBA, MSCR, etc), academic minors (e.g. business, etc), or other coursework outside the School of Pharmacy are not included in GPA calculations to determine a student’s academic standing or eligibility for progression to the P4 year.

Required Work in Residence
To be eligible for the Doctor of Pharmacy degree, all P3 and P4 coursework and rotations (APPEs) must be completed in residence at the KU School of Pharmacy

Terminal-Year Courses
A student cannot enroll in the principal terminal-year pharmacy practice experiential rotations unless he or she has a grade-point average in professional courses of at least 2.5 and has completed all didactic coursework required for the degree and expected programmatic requirements as outlined in the student handbook.

Graduate University Regulations
For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Academic Forgiveness
The school does not participate in academic forgiveness.

Academic Misconduct
Students experiencing difficulties or problems with a particular course or having complaints or grievances about a particular instructor are urged to discuss the problem in a timely fashion with the instructor. If the student feels awkward or uncomfortable doing this, he or she should see the chair of the instructor’s department, or if necessary, the dean. The chair or dean brings the matter to the instructor’s attention, preserving the student’s anonymity, if so requested.

Instructors detecting academic misconduct must act in accordance with the School of Pharmacy (http://policy.ku.edu/pharmacy/academic-professional-scholarly-conduct/) and Faculty Senate Rules and Regulations (http://www.policy.ku.edu/).

Credit/No Credit
The Credit/No Credit option is not authorized for graduate students’ enrollments, including, but not limited to, courses taken to fulfill the research skills requirements, undergraduate deficiencies, etc.

Graduation with Distinction and Highest Distinction
Students who rank in the upper 10 percent of their graduating class graduate with distinction. The upper third of those awarded distinction graduate with highest distinction. Grade-point averages are determined on the basis of credit hours taken while enrolled in the School of Pharmacy. The list is compiled each spring and includes July, December, and May graduates.
Health Insurance and Immunizations

The School of Pharmacy requires students to provide proof of health insurance and professional insurance coverage and immunizations for MMR, hepatitis B, varicella, and tetanus, and a current TB skin test.

Requirements to Practice Pharmacy in Kansas

A license is required to practice pharmacy. State boards of pharmacy grant licenses to students who successfully pass board examinations. In all states, eligibility to take board examinations requires graduation from an accredited school of pharmacy and completion of required experiential training. The Kansas State Board of Pharmacy (http://www.kansas.gov/pharmacy/) requires graduates of schools of pharmacy to indicate any current, pending, or previous convictions, fines, violations, or disciplinary action that may affect their eligibility to take the licensing examination. Pharmacists generally may transfer their licenses from a state in which they completed the entire examination to another state, provided the 2 states had similar practical experience requirements at the time the pharmacist was licensed by examination. Most pharmacists find it useful to maintain a license in the state where they were licensed by examination. By doing so, they can preserve their eligibility to transfer to another state.

Pharmacists in Kansas must renew their licenses biennially by paying the required fee and providing proof that they have completed the required 30 clock hours of continuing education.

The Kansas Board of Pharmacy requires completion of an appropriate degree from an accredited school of pharmacy plus 1,500 hours of practical experience in pharmacy. At the conclusion of the program, students are certified to the Kansas State Board of Pharmacy as having completed the entire externship requirement (1,500 hours) and are therefore eligible to take the Kansas licensure examination. Students must register as interns with the board at matriculation in the School of Pharmacy. Students desiring to compile an official record of pharmacy experience obtained on their own initiative may do so by submitting this information to the Kansas State Board of Pharmacy. Practical experience above and beyond the 1,500 required hours may be gained by working as a licensed pharmacy student intern in Kansas, then transferring the hours to another state.

Medicinal Chemistry Courses

MDCM 601. Medicinal Biochemistry I. 3 Hours. A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. LEC.

MDCM 603. Medicinal Biochemistry II. 3 Hours. A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601. LEC.

MDCM 606. Phytomedicinal Agents. 1 Hour. This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytomedicines and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 601 to enroll in this course. LEC.

MDCM 607. Clinical Pharmacognosy. 1 Hour. The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601. LEC.

MDCM 625. Medicinal Chemistry I: Neuroeffector and Cardiovascular Agents. 4 Hours. A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the cardiovascular and central nervous systems. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 603 to enroll in this course. LEC.

MDCM 626. Medicinal Chemistry II: Homeostatic Agents. 4 Hours. A continuation of MDCM 625 with special emphasis on anticancer, antiviral, antibacterial, antifungal, antidiabetic, anticholesterol, and steroid drugs. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 625. LEC.

MDCM 690. Undergraduate Research. 1-5 Hours. Research in medicinal chemistry. Students will be assigned to a laboratory research problem. Prerequisite: Consent of instructor. IND.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Hours. This course encompasses original work on a laboratory problem of limited scope, honors reading assignments from medicinal chemistry literature, or in-depth discussions of assigned topics. Prerequisite: Consent of instructor. IND.

MDCM 701. Advanced Medicinal Biochemistry I. 3 Hours. A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 703. Advanced Medicinal Biochemistry II. 3 Hours. A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 710. Chemistry of Drug Action I. 4 Hours. This course provides an overview of topics central to the understanding and practice of contemporary medicinal chemistry. It illustrates the interplay of anatomy and physiology with the organic-, bio- and analytical chemistry of drugs in the body. Topics covered include physiological mechanisms and disease processes; cell structure and function; basic intermediary metabolism; basic principles underlying drug action including the physicochemical properties of drugs and how these affect the interaction of drugs with living systems; chemical and biological manipulation of the absorption, distribution, metabolism and excretion of drugs and produgs; kinetics and inhibition of enzymes and transporters; quantitation and molecular modeling of drug binding to
targets. Prerequisite: One year of organic chemistry, one semester of biochemistry, and one college-level course in biology. LEC.

MDCM 775. Chemistry of the Nervous System. 3 Hours. A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: Consent of instructor. LEC.

MDCM 785. Natural Products of Medicinal Significance. 2 Hours. A discussion of bioassay-directed screening, the isolation, structure determination, biosynthesis, partial synthesis and total chemical synthesis of organic natural products of medicinal significance. Examples of the classes of compounds to be considered include steroid hormones, cardiac glycosides, alkaloids, antibiotics, terpenes, and the like. Prerequisite: Graduate standing or consent of instructor. LEC.

MDCM 790. Chemistry of Drug Action II. 3 Hours. A discussion of the principles of contemporary drug design with specific examples chosen from the original literature. This course covers the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action. Prerequisite: Graduate standing or completion of MDCM 625 and MDCM 626. LEC.

MDCM 798. Master’s Literature Seminar in Medicinal Chemistry. 1 Hour. Literature seminar for graduate students in Spring of their 2nd year. Prerequisite: Graduate students in 2nd year of program. LEC.

MDCM 799. Research Seminar in Medicinal Chemistry. 1 Hour. Reports by research students and discussions of developments in the field not covered in formal courses. LEC.

MDCM 801. Issues in Scientific Integrity. 1 Hour. Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801, PHCH 801 and PHCH 802.) LEC.

MDCM 816. Careers in the Biomedical Sciences. 1 Hour. Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816, and PHCH 816.) Prerequisite: Permission of instructor. SEM.

MDCM 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Hours. This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/ CHEM 817/ PHCH 817.) Prerequisite: Graduate student. SEM.

MDCM 860. Principles and Practice of Chemical Biology. 3 Hours. A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

MDCM 895. Research in Medicinal Chemistry. 1-12 Hours. Hours and credit to be arranged. RSH.

MDCM 899. Master’s Thesis. 1-12 Hours. Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Consent of instructor. THE.

MDCM 950. Advanced Topics in Medicinal Chemistry: ______. 1-3 Hours. An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor. LEC.

MDCM 980. Proposal Preparation. 3 Hours. Presentation of a literature seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor. LEC.

MDCM 999. Doctoral Dissertation. 1-12 Hours. Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities. THE.

Neuroscience Courses

NURO 710. Advanced Neurobiology. 3 Hours. The course will build an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics will include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

NURO 775. Chemistry of the Nervous System. 3 Hours. A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

NURO 799. Neuroscience Seminar Series. 2 Hours. Presentations of research papers by faculty, post-doctoral research associates, and graduate students. All graduate students in the Neuroscience program participate in this seminar series throughout their period of training. Each student has to present a seminar once every semester. Presentations by students are evaluated by other graduate students and faculty at the end of each seminar. (Same as NEUS 799.) Prerequisite: Graduate standing in the Neuroscience program. LEC.
NURO 800. Neuroscience Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in Neuroscience. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with faculty whom he or she is assisting in preparation of presentation materials and tests. Each student will be evaluated by the faculty mentor and by the students in the class taught. Prerequisite: Graduate standing in Neuroscience. LEC.

NURO 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, PTX 801, PHCH 801 and PHCH 802.) Prerequisite: Graduate standing in the Neuroscience program. LEC.

NURO 825. Research in Neuroscience. 1-10 Hours.
Original investigations at an advanced level in the areas of neuroscience. The research by each student will be performed in the laboratory of one of the faculty mentors of the graduate program in Neuroscience. Prerequisite: Graduate standing in the Neuroscience program. LEC.

NURO 844. Neurophysiology. 3 Hours.
Somatosensory, motor and cognitive function of the brain will be discussed using a combination of lecture and student presentation formats. Current issues and evidence underlying accepted concepts and mechanisms will be emphasized. (Same as NEUS 844 and PHSL 844.) Prerequisite: PHSL 846 or equivalent and consent of instructor. LEC.

NURO 846. Advanced Neuroscience. 5 Hours.
Team-taught, in-depth neuroscience course focusing on normal and diseased brain function at the molecular, cellular and systems levels. Lectures and discussions will emphasize current issues in neuroscience research. (Same as ANAT 846, PHCL 846, PHSL 846 and NEUS 846.) Prerequisite: Permission of the course director. LEC.

NURO 847. Developmental Neurobiology. 2 Hours.
Development of the nervous system from early induction to the development of learning and memory. Topics include: Induction; Cellular Differentiation; Axon Growth and Guidance; Target Selection; Cell Survival and Growth; Synapse Formation; Synapse Elimination; and Development of Behavior. (Same as ANAT 847, PHSL 847, and NEUS 847.) Prerequisite: Advanced Neuroscience (ANAT 846; NURO 846; PHSL 846) or consent of instructor. LEC.

NURO 848. Molecular Mechanisms of Neurological Disorders. 3 Hours.
An in-depth coverage of pathogenic mechanisms in neurological diseases; cellular and molecular responses to brain injury and disease, neuroinflammatory diseases (e.g., multiple sclerosis), neurodegenerative diseases (e.g., Alzheimer's, Parkinson's, Huntington's, amyotrophic lateral sclerosis, and prion diseases), neurogenetic diseases (e.g., lysosomal and peroxisomal disorders, Down's syndrome and fragile X), trauma, stroke, and viral diseases (e.g., HIV encephalitis). (Same as ANAT 848, PHCL 848, PHSL 848, and NEUS 848.) Prerequisite: Advanced Neuroscience (ANAT 846, PHCL 846 or PHSL 846) or an equivalent course and consent of instructor. LEC.

Hours and credit for this course to be arranged with the mentor. Independent investigation of a research problem in neuroscience, but of limited scope. Prerequisite: Graduate standing in the Neuroscience program and consent of mentor/instructor. THE.

Hours and credit for this course to be arranged with the mentor. Conduct of original investigation in neurosciences. Prerequisite: Graduate standing in the Neuroscience program post-oral comprehensive examination and consent of mentor/instructor. THE.

Pharmacology and Toxicology Courses

P&TX 630. Pharmacology I. 4 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in PTX 630 include, general principles of pharmacokinetics and pharmacodynamics, molecular biology, pharmacogenomics, and pharmacology of the nervous system. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed BIOL 646. LEC.

P&TX 631. Pharmacology II. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed PTX 630. LEC.

P&TX 632. Pharmacology III. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PTX 630 and PTX 631. LEC.

P&TX 633. Pharmacology IV. 3 Hours.
The pharmacology series covers the basic principles of the immunology, inflammation, and targeted drugs used to regulate the immune response. In addition, basic concepts of infectious diseases and their therapeutics are discussed. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed PTX 630, PTX 631 and PTX 632. LEC.

P&TX 640. Toxicology. 2 Hours.
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PTX 630, PTX 631, PTX 632 and PTX 633. LEC.

P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Hour.
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of diabetes and obesity, prepare a 30 min presentation and deliver it to the class for discussion. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PTX 630 to enroll in this course. LEC.
P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Hour.
Neurodegenerative diseases, such as Alzheimer's and Parkinson's diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: Students must be admitted to the School of Pharmacy and have successfully completed PTX 630 to enroll in this course. LEC.

P&TX 644. Adverse Drug Events. 1 Hour.
The objective of this course is to alerts students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy. LEC.

P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmacological & Treatment Concepts. 1 Hour.
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments for these addictions will be reviewed. The role of pharmacotherapies will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of PTX 632 or special permission from faculty. LEC.

P&TX 646. Current Concepts of Psychotropic Medication. 1 Hour.
This course provides information regarding commonly used psychotropic medications, or any drug that affects brain activities associated with mental processes and behavior. This includes, but are not limited to, the categories of antipsychotics, mood stabilizers, anti-anxiety (anxiolytics), antidepressants, and stimulants. The range of topics from basic biology to drug-drug interactions will be explored in the course. Groups of three students will identify a topic of interest to them in the field of psychotropic drugs and affect, mood, or behavior, prepare a 30 min presentation, and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

P&TX 689. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Hours.
Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor. IND.

P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Hours.
Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: PTX 635 and consent of instructor. IND.

P&TX 700. Professional Issues in the Biomedical Sciences. 2 Hours.
A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vita/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in pharmacology and toxicology. LEC.

P&TX 705. Current Concepts in Biochemical Pharmacology and Toxicology. 3 Hours.
A detailed study of the foundational concepts and leading-edge discoveries in biochemistry and molecular biology that underlie the actions and effects of drugs and toxicants with particular relevance to human disease and new therapeutic strategies. The interconnectedness and integration of seemingly disparate pathways and regulatory mechanisms will be emphasized. The technologies and experimental approaches used in biochemical pharmacology and toxicology will be illustrated. Topics may vary from year to year depending on recent advances in the field. The course will involve a combination of lectures and discussions with an emphasis on critically reading and analyzing primary research papers. Students will be evaluated on the basis of oral presentations and take-home problem sets. Prerequisite: Graduate standing in Pharmacology and Toxicology. Two semesters of undergraduate biochemistry with molecular biology. LEC.

P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Hours.
A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamentals of cardiovascular system, renal system and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Hours.
A detailed study of the fundamentals of immunology and inflammation and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Hours.
A detailed study of the fundamentals of endocrinology and associated pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 740. Advanced Biotechnology. 3 Hours.
An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Students will attend lectures in PTX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology. LAB.
P&TX 741. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: PTX graduate student status in good academic standing. LEC.

P&TX 742. Experimental Pharmacology. 4 Hours.
Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. Historically important experiments will be discussed along with experiments which are currently used to define drug mechanisms. Topics will include: dose-response, drug receptors, drug metabolism, chemotherapy as well as autonomic CNS, cardiovascular and renal pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 747. Molecular Toxicology. 2 Hours.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. The student will attend PTX 640 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 750. Pharmacology I- Introduction to Pharmacology and Biotechnology. 3 Hours.
An introduction to the basic principles of biochemistry and molecular biology as well as pharmacokinetics and pharmacodynamics of drug action. Additional lectures will introduce students to principles of genomics, transgenic technologies and microscopy. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 751. Pharmacology II - Endocrine Pharmacology. 2 Hours.
A detailed study of the fundamental concepts of endocrinology with an emphasis on the pathophysiologic details of diabetes and the pharmacology of treatment. Brief discussions on hypothalamic/pituitary, reproductive, thyroid and adrenal endocrinology and pharmacology will be presented. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750 and PTX 785. LEC.

P&TX 752. Pharmacology III- Central Nervous System and Autonomic Nervous System. 3 Hours.
A detailed study of the fundamental concepts of the autonomic nervous system, central nervous system, and select diseases of the CNS and their pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 753. Pharmacology IV- Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamental principles of the cardiovascular system, renal system and their associated pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785, PTX 751 and PTX 752. LEC.

P&TX 754. Pharmacology V - Immunopharmacology, Infectious Diseases and Gastrointestinal Pharmacology. 2 Hours.
This course is a detailed study of the fundamental concepts of immunology, inflammatory-related diseases and immunopharmacology, infectious diseases and gastrointestinal pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 755. Molecular Toxicology. 2 Hours.
A detailed study of the fundamentals of the toxicology, drug transformations and the mode of toxicity of various drug classes. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 757. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 758. Pharmacogenomics. 2 Hours.
A detailed study of fundamental concepts of pharmacogenomics - how genes and genetic variation determine interindividual differences in drug response - experimental approaches, select gene-drug examples, translation from research to clinical use, and ethical, legal and social implications. Prerequisites: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

P&TX 785. Research Proposal. 2 Hours.
To satisfy the research requirement for the on-line distance M.S. program in Pharmacology and Toxicology, the aspiring student must define a research project and prepare a written proposal describing the nature and goals of the project. It is suggested that the student in conjunction with their distance research mentor collaborate in the selection of and the definition of the proposed research. The proposal should be 4 pages (0.5 in margins, 11-12 point Arial, Times Roman or Calibri font) that states the overall goal of the project, the hypothesis to be tested, 2-3 specific aims, a statement of significance and impact of the research and research approach. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750. RSH.

P&TX 799. Pharmacology and Toxicology Seminar. 1-2 Hours.
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PTX. LEC.

P&TX 800. Pharmacology and Toxicology Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student
P&TX 801. Issues in Scientific Integrity. 1-3 Hours.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PHCH 801 and PHCH 802.) LEC.

P&TX 803. Pharmacology Literature Review I. 1 Hour.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 805. Pharmacology Literature Review II. 1 Hour.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 825. Research in Pharmacology and Toxicology. 1-10 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor. RSH.

P&TX 826. Online Research in Pharmacology and Toxicology. 8 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and consent of KU Pharmacology and Toxicology Faculty Mentor. RSH.

P&TX 885. Distance Master's Research in Pharmacology and Toxicology. 1-12 Hours.
Original investigations at an advanced level in areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of PTX 785. RSH.

P&TX 889. Distance Master's Thesis. 2 Hours.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of 12 credits in PTX 885. RSH.

P&TX 890. Distance M.S. Thesis. 2 Hours.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. THE.

P&TX 898. Online Master's Thesis. 1-2 Hours.
Independent investigation of a research problem of limited scope leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. THE.

Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Graduate standing in PTX and consent of instructor. THE.

P&TX 990. Postdoctoral Research. 1-11 Hours.
Advanced level research in collaboration with a faculty member in the department. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Doctoral degree or equivalent in an appropriate related area, and consent of instructor. RSH.

P&TX 999. Doctoral Dissertation. 1-11 Hours.
Hours and credit to be arranged. Original investigation in pharmacology and toxicology. Prerequisite: Consent of instructor. THE.

Pharmacy Courses

PHAR 500. Introduction to Pharmacy. 1 Hour.
This course is designed to introduce pharmacy students to the profession of pharmacy, potential career pathways, and available academic and post-doctoral educational opportunities. Additionally, topics such as professionalism, leadership, professional advocacy, empathy, cultural competency, self-directed learning, interprofessional education, and professional communication will be discussed. Students will receive instruction and fulfill the prerequisites for their Introductory Pharmacy Practice Experiences (IPPE) occurring in the summer semesters of the PharmD program. LEC.

PHAR 509. History of Pharmacy Elective. 1 Hour.
This course is comprised of a survey of historical highlights of the development of Pharmacy as a discipline. The course will cover early antecedents of pharmacy, development of the discipline in Europe and the United States, the development of professional organizations, standards, education, and literature, economic development, and the pharmacists' contributions to community service, science, and the industry. There will be a mix of some lectures, discussion, assigned readings, and short papers. Prerequisite: Students must have first, second or third year professional standing in the School of Pharmacy. LEC.

PHAR 510. Pharmacy Skills I-A. 1 Hour.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have first year professional standing in the School of Pharmacy. LAB.
PHAR 512. Pharmacy Skills I-B. 1 Hour.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have first year professional standing in the School of Pharmacy. LAB.

PHAR 514. Scientific Writing for the Health Professional. 2 Hours.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback with guidance on writing will be provided by the instructor. Graded on a satisfactory/fail basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must be in their third professional year (P3). LEC.

PHAR 515. Pharmacy Skills II-A. 1 Hour.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 510 and PHAR 512; and current enrollment or successful completion of PHAR 515 and PHPR 661. LAB.

PHAR 517. Pharmacy Skills II-B. 1 Hour.
The Professional Activities Lab curriculum is a team-taught, 6-semester, 10-credit hour laboratory sequence designed to prepare students to perform Entrustable Professional Activities (EPAs) for pharmacy practice prior to milestone examinations and experiential rotations. Lab activities will focus on students' exposure to, hands-on-practice of, and competency of a variety of pharmacy-specific skills. The P1 year will focus on community pharmacy related skills and activities, the P2 year will focus on institutional pharmacy skills, and the P3 year will focus on advanced pharmacy practice skills across multiple settings. As students progress through the 6-semester sequence, they will be expected to increasingly combine physical assessment, communication, patient counseling, and drug information skills, along with applying pharmacotherapy knowledge towards patient-care related activities. A variety of teaching and assessment modalities will be used including but not limited to podcasts, online quizzes, active-learning games, role playing, standardized patients, high-fidelity simulator mannequins, online modules, and traditional exams. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 510 and PHAR 512; and current enrollment or successful completion of PHAR 515 and PHPR 661. LAB.

PHAR 520. Pharmacy Skills III. 1 Hour.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 661 and PHAR 515 and PHAR 517 and have successfully completed or be concurrently enrolled in PHPR 662 to enroll in this course. LAB.

PHAR 525. Pharmacy Skills IV. 1 Hour AE61.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must have second year professional standing in the School of Pharmacy and successfully completed PHPR 662, PHAR 520 and current enrollment or successful completion of PHPR 663. LAB.

PHAR 530. Pharmacy Skills V. 1 Hour.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 663 and PHAR 525 and have successfully completed or be concurrently enrolled in PHPR 664 to enroll in this course. LAB.

PHAR 535. Pharmacy Skills VI. 1 Hour.
Exercises that reinforce the concepts taught in pharmacy practice, pharmaceutical chemistry, medicinal chemistry, and pharmacology courses. Includes exercises in compounding, dispensing, and patient counseling. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664; and current enrollment or successful completion of PHAR 537. LAB.
PHAR 537. Pharmacy Skills VIB. 1 Hour.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmacotherapy knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet between 1:00 to 5:00PM on either Monday, Tuesday, or Wednesdays. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664; and current enrollment or successful completion of PHAR 535. LAB.

PHAR 550. Introductory Pharmacy Practice Experience - Community. 4 Hours AE52.
A required four credit hour experiential course involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in either an independent community or chain pharmacy in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this course. Students must have successfully completed PHAR 500. FLD.

PHAR 560. Introductory Pharmacy Practice Experience - Institutional. 4 Hours.
A required four credit hour experiential course years involving 160 hours of on-site experiential education. The course is designed to provide the student pharmacist with exposure to the practice of pharmacy in an institutional health-system (hospital) environment in either a rural or urban setting within the state of Kansas. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. FLD.

PHAR 599. Advanced Infectious Disease - Translational Case Studies. 2 Hours.
This course is an interdepartmental elective focusing on advanced clinical decision-making within the field of infectious diseases. Utilizing clinical infectious disease cases based off of real-life patients, students will assess and make therapeutic recommendations via team-based active-learning exercises. These activities aim prepare students for advanced pharmacy practice and residency experiences in acute care settings with complicated and challenging patients, by providing students hands-on instruction in reading and assessing patient data including laboratory values and radiology reports, following patient progress over multiple days and adjusting patent care plans based on new unforeseen data, writing infectious diseases-specific SOAP notes, orally presenting patients using presentation styles expected for 4th year APPE rotations and residency rotations, and using basic scientific principles when determining appropriate courses of patient care. Additional professional preparation in "soft skills" will be provided. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must be in their third professional year (P3). LEC.

PHAR 600. Hospital and Health-System Pharmacy. 1 Hour.
Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program. LEC.

Pharmaceutical Chemistry Courses

This elective class will explore emerging areas of research currently impacting the pharmaceutical industry. Potential topics include: biologics as therapeutics, drug targeting, prodrugs, nanotechnology, biological barriers, gene therapy, transporters, vaccines, intracellular drug trafficking, controlled release drug delivery, cancer therapy, analytical biotechnology and many others. The class will be team taught by PHCH faculty and guest speakers. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 512. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real-world perspectives including case studies. This is two-hour class that meets 8 times during the semester. Prerequisite: 1st, 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHCH 514. Scientific Writing for the Health Professional. 2 Hours.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will be provided by the instructor. Graded on a satisfactory/fail. Prerequisite: 3rd professional (P3) year students who plan to complete post-doctoral residency training. LEC.

PHCH 515. Oral Presentations for the Health Professional. 1 Hour.
Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: PHCH 514. LEC.

PHCH 517. Pharmacy Calculations. 2 Hours.
An introduction to the mathematics involved in filling prescriptions and in manufacturing pharmaceuticals. Includes an introduction to standard prescription notation and familiarization with pharmacological weights and measures. LEC.

PHCH 518. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Students must have first year professional standing in the
School of Pharmacy. Students must have successfully completed PHCH 517. LEC.

PHCH 605. Vaccines. 1 Hour.
Vaccines are currently the most powerful therapeutic approach available for infectious disease and promise to become of increasing importance for a wide variety of other pathologies including cancer. This course discusses the immunological basis of vaccinology, types of vaccines currently available and in development and the process by which vaccines are made from the basic research stage through their pharmaceutical development and marketing. Ethical aspects of vaccine use will also be considered. Prerequisite: Students must have first, second or third year professional standing in the School of Pharmacy. LEC.

PHCH 625. Pharmacokinetics. 3 Hours.
A discussion of the basic concepts, and some clinical applications, of pharmacokinetics, clearance concepts, extravascular dosing, and the use of pharmacokinetics in dosage regimen design and adjustment. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PHCH 517 and PHCH 518. LEC.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Hours.
A study of biological barriers to drug delivery, conventional dosage forms, and new and future drug delivery strategies. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed PHCH 517, PHCH 518, and PHCH 625. LEC.

PHCH 667. Introduction to Clinical Chemistry. 2 Hours.
A lecture-discussion course concerned with identification of the contents of physiological fluids, changes in physiological fluid content induced by disease and drugs, and therapeutic drug monitoring: case studies are presented. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry. 1-5 Hours.
Student will be assigned a suitable research project in the area of pharmaceutical analysis or pharmaceutics. Prerequisite: Consent of instructor. IND.

PHCH 693. Clinical Pharmacokinetics. 2 Hours.
This course presents discussions on physiological and disease state variables in pharmacokinetics for selected drugs and drug classes, and instructs students in the use of physiological and disease state pharmacokinetic information to develop individualized therapeutic regimens. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PHCH 625 and PHCH 626. LEC.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Hours.
A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor. IND.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Hours.
Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor. LEC.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 706. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: This course is only open to distance education students. LEC.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant. LEC.

PHCH 715. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry, Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed). LEC.

PHCH 716. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: This course is only open to distance education students. LEC.

PHCH 717. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative
understanding of drug delivery practice and theory is the goal. This course is only open to external non-degree seeking students. Offered in spring semesters. Prerequisite: PHCH 732. LEC.

**PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.**
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetic, colligative properties, isonitocity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing. LEC.

**PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.**
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetic, colligative properties, isonitocity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing. LEC.

**PHCH 720. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.**
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetic, colligative properties, isonitocity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to external non-degree seeking students. Offered in spring semesters. LEC.

**PHCH 721. Cellular and Molecular Pharmaceutics. 3 Hours.**
The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and ultimately of either adverse or therapeutic benefit. (Same as CPE 725.) Prerequisite: Graduate standing or consent of instructor. LEC.

**PHCH 726. Cellular and Molecular Pharmaceutics. 3 Hours.**
The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and ultimately of either adverse or therapeutic benefit. Prerequisite: Graduate standing or consent of instructor. LEC.

**PHCH 730. Biopharmaceutics and Pharmacokinetics. 3 Hours.**
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. LEC.

**PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Hours.**
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to distance education students. LEC.

**PHCH 732. Biopharmaceutics and Pharmacokinetics. 3 Hours.**
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to external non-degree seeking students. Offered in fall semesters. LEC.

**PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Hours.**
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Prerequisite: CHEM 624 and CHEM 626. LEC.

**PHCH 775. Chemistry of the Nervous System. 3 Hours.**
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as PTX 775, BIOL 775, CHEM 775, MDCM 775 and NURO 775.) Prerequisite: BIOL 600 or equivalent. LEC.

**PHCH 801. Issues in Scientific Integrity. 1 Hour.**
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801 and PHCH 802.) LEC.

**PHCH 802. Issues in Scientific Integrity. 1 Hour.**
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. This course is open only to distance education students. (Same as PHCH 801, MDCM 801, NURO 801, and PTX 801.) LEC.

**PHCH 816. Careers in the Biomedical Sciences. 1 Hour.**
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor. SEM.

**PHCH 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Hours.**
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others.
The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/CHEM 817/MDCM 817.) Prerequisite: Graduate student. SEM.

PHCH 826. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. This course is only open to distance education students. LEC.

PHCH 850. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 851. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in Pharmaceutical Chemistry or consent of the instructor. LEC.

PHCH 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, biocatalysis and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor. LEC.

PHCH 862. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. LEC.

PHCH 863. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students. LEC.

PHCH 864. Pharmaceutical Analysis. 4 Hours.
This course is intended to be a comprehensive treatment of contemporary techniques used to validate analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684. LEC.

PHCH 865. Pharmaceutical Analysis. 4 Hours.
Advanced course on pharmaceutical analysis. This course is only open to distance education students. LEC.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Hours.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master's or a doctoral degree. RSH.

PHCH 898. Master's Thesis. 1-10 Hours.
Master's Thesis. This course is open only to distance education students. THE.

PHCH 899. Master's Thesis. 1-11 Hours.
Graded on a Satisfactory/Fail basis. THE.

PHCH 920. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. LEC.

PHCH 921. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students. LEC.

PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. LEC.

PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students. LEC.

PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Hours.
Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactory/unsatisfactory basis. LEC.
PHCH 978. Pharmaceutical Chemistry Seminar. 1 Hour.
A seminar on the chemistry of pharmaceutical systems. LEC.

This course is open only to distance education students. THE.

THE.

Pharmacy Practice Courses

PHPR 506. Precision Medicine. 1 Hour.
This course will address the role of precision medicine in pharmacy practice and is designed to extend the students' understanding of the basis for interindividual variation in drug response and the evolving role of the pharmacist. The course will include required readings, lectures, cases and in-class discussions that focus on the evidence and practicality of precision medicine in pharmacy practice. Using selected examples, students will learn about patient factors that drive variability in drug response and how these factors drive drug selection and dosing. With the current focus on the use of genomic data to drive individualized therapy, students will learn about current pharmagenomic-based practice guidelines and clinical practice references. Students will prepare a 2-page writing assignment and an in-class presentation on the impact of precision medicine on pharmacy practice. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

PHPR 507. Advanced Community Practice. 1 Hour.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice. Prerequisite: 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 508. Hematology/Oncology Pharmacy. 1 Hour.
This course explores many cancer-related topics, including non-pharmacologic treatment modalities, complications of cancer and its treatment, supportive care issues, and precision medicine. It also reviews current cancer screening and prevention guidelines and cancer research. Various cancers are discussed, such as myeloma, pediatric cancers, and cancers of the bladder, kidneys, ovaries, and testes. Prerequisite: Students must have third year professional standing in the School of Pharmacy and have successfully completed MDCM 626. LEC.

PHPR 509. Medicare Part D. 1 Hour.
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Must be a 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 510. Medical Terminology Elective. 1 Hour.
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define and utilize medical terminology and abbreviations used in patient care. LEC.

PHPR 511. Service-Learning Elective. 1 Hour.
Students will work at a health-related community center and participate in structured learning exercises. The objectives are to: 1) enable students to learn appropriate strategies to communicate and provide services to people with varying languages, cultures, social, and economic backgrounds, disabilities, illnesses, or impairments, 2) increase social interaction and citizenship, 3) heighten social awareness and understanding of ethical issues, and 4) acknowledge social responsibility and realize personal values. FLD.

PHPR 512. Nuclear Pharmacy. 1 Hour.
This course is designed for students interested in learning about nuclear pharmacy practice as a specialty practice in pharmacy. Students will learn about the application of radiopharmaceuticals used in the diagnosis of various diseases or identifying patient therapeutic issues. The course will cover principles of radiation, radiation safety, preparation of and handling of radiopharmaceuticals, their appropriate use, and the training requirements for a nuclear pharmacist. At the conclusion of the course the student will have an insight into this specialty practice in nuclear pharmacy as a potential career. Prerequisite: Students must be admitted to the School of Pharmacy. LEC.

PHPR 513. Chemical Dependency Elective. 1 Hour.
This elective course will enhance the pharmacy student's knowledge and understanding of the current theories behind the addiction process, frequently abused drugs and/or chemicals and the treatment and recovery process. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHPR 514. Communication and Counseling. 1 Hour.
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500. LEC.

PHPR 515. The Aging Patient. 1 Hour.
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring generational perceptions, learning how the aging process can impact patient care, and identifying the role of the pharmacist in enhancing this care. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. LEC.

PHPR 516. Pharmacy in Public Health. 1 Hour.
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHPR 517. Medication Safety and Error Prevention. 1 Hour.
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. LEC.

PHPR 518. Cultural Competency in Pharmacy Practice. 1 Hour.
The United States becomes more culturally diverse every year. This course is designed to help student pharmacists excel in today's multicultural environment by improving their cultural competency skills. Students will explore their own culture and those belonging to other
diverse cultures. Students are expected to learn the beliefs, needs and tendencies of those with cultures much different than themselves. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

PHPR 519. Business Planning for Pharmacy. 1 Hour.
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal business plan. When finished students will be expected to have created a written business plan and will present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the school of Pharmacy. LEC.

PHPR 520. Specialty Pharmacy. 1 Hour.
This course will review a variety of diseases including: multiple sclerosis, hepatitis C and autoimmune conditions (psoriasis, ulcerative colitis, etc) and the specialty medications used to treat these conditions. Specialty pharmacy accreditation standards as well as topic discussions reviewing many issues facing the specialty pharmacy industry will be discussed. Guest speakers from different specialty pharmacies in the greater Kansas City area will also present information on their career experiences. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. LEC.

PHPR 521. Practical Pediatrics. 1 Hour.
This course will expose students to conditions frequently encountered in pediatric care. Students will further develop knowledge and skills necessary to provide appropriate pediatric care in institutional, ambulatory, and community practice settings. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

PHPR 522. Pharmacy-Based Travel Health Services. 1 Hour.
This course reviews pertinent problems traveling entails and services pharmacists can provide for traveling patients. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Following the completion of this course, students should be able to recognize the need to establish travel health services, the role of pharmacists in these services, identify the commonly encountered disease states and problems for travelers, and what components comprise travel health by utilizing comprehensive knowledge, skills and resources necessary to establish and deliver successful travel health service. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 2nd or 3rd professional year. Students must have successfully completed the APHA Pharmacy-Based Immunization Delivery program. LEC.

PHPR 523. Critical Care Problem-Based Learning. 1 Hour.
This is an elective course focusing on advanced clinical decision making within the field of critical care. Using clinical critical care cases, students will work as a team to assess and make therapeutic recommendations through problem-based learning exercises. These activities aim to prepare students for advanced pharmacy practice and residency experiences in acute care settings by providing instruction in application of primary literature to patient cases, following patient progress through emergency department and intensive care settings, and oral presentation of evidence-based patients cases. Additionally, students will participate in an acute care interprofessional simulation. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

PHPR 524. Medication-Related Issues and the Social Determinants of Health for Underserved Patients. 1 Hour.
This course will review a variety of topics related to the social determinants of health with a focus on barriers and solutions around pharmacy and medication-related issues. A focus of the course will be on the under-served patient population of Wyandotte County in Kansas City, KS which is the county with the worst health outcomes and statistics in the state. The main teaching method used in the course will be experiential learning. Students will complete two half-days (approximately 4 hours/session) at Riverview Health Services in Kansas City, KS. During the two half-days students will actively observe medication intake/reconciliation appointments to enroll patients in medication assistance programs to obtain their medications for free. Students will be incorporated and play an active role in the workflow during the second session. Finally, students will present a 15-minute presentation to Riverview staff about a medication related topic for their professional development. Additionally, the entire class will meet during 4 sessions in Lawrence where students enrolled in the elective will meet to review pertinent topics (a few guest speakers), work on and peer-review upcoming presentations and debrief their experiences. This is a unique and immersive learning opportunity to expose you to issues of caring for under-served patient populations and sharpen your verbal presentation skills for a professional audience. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Limited to P2 students in the PharmD program. LEC.

PHPR 525. Ambulatory Care. 1 Hour.
This elective course will explore many of the clinical and practical considerations employed when caring for patients in the ambulatory care setting. The course will expose the learner to a variety of topics that impact the pharmacist’s role in this practice setting, including collaborative practice agreements, patient case evaluations, communication skill development, and practice evaluation. The course will be facilitated by the ambulatory care practice group at The University of Kansas Health System and will prepare the student for advanced pharmacy practice and residency experiences in the ambulatory care setting. Prerequisite: P3 standing in the School of Pharmacy or by special permission from instructor. LEC.

PHPR 526. Introduction to Pharmacy Residencies. 1 Hour.
This course is team-taught by KU clinical faculty with the support of pharmacy residency program directors, residency preceptors, and pharmacy residents. This course is designed to increase knowledge, interest, and confidence amongst students about residency training; identify and develop the skills necessary to apply to residency programs; and increase the number of students obtaining residency positions upon graduation. Prerequisite: Third year professional standing in the School of Pharmacy and instructor consent. LEC.

PHPR 541. Foundations of Interprofessional Collaboration I. 0 Hours.
This TeamSTEPPS Level 1 experience will introduce interprofessional students to the basic concepts of interprofessional collaboration including values and ethics, roles and responsibilities of healthcare team members, and interprofessional communication tools using the evidence-based national curriculum of TeamSTEPPS. Upon completion of this training experience students will be able to 1) demonstrate a work ethic with individuals of other professions to maintain a climate of mutual respect and shared values; 2) define the role of health professions (including your own) within the healthcare system; 3) identify opportunities to seek expertise of health professionals to improve communication and healthcare; and 4) acquire basic TeamSTEPPS communication tools to effectively use with healthcare teams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the
school of Pharmacy to enroll in this course. Student must have P1 standing in the School of Pharmacy. LEC.

**PHPR 542. Foundations of Interprofessional Collaboration II. 0 Hours.**

This TeamSTEPPS Level 2 experience will provide interprofessional students opportunities to apply key knowledge and skills gained in FIPC I and II, through role-play and case-based learning. Students will apply their knowledge of roles and responsibilities of healthcare team members and interprofessional communication tools and continue learning with, from, and about students from other professions. Upon completion of this training experience students will be able to: 1) engage diverse healthcare professionals who complement one's own professional expertise, as well as associated resources, to develop strategies to meet specific patient care needs; 2) choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance team function; and 3) engage other health professionals appropriate to the specific care situation—in shared patient-centered problem-solving. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have P2 standing in the School of Pharmacy and successfully completed PHPR 661. LEC.

**PHPR 543. Foundations of Interprofessional Collaboration III. 0 Hours.**

This TeamSTEPPS Level 3 experience will provide interprofessional students opportunities to demonstrate key knowledge and skills gained in FIPC I and II, through simulation. Students will demonstrate their interprofessional communication skills, including specific opportunities to utilize TeamSTEPPS tools. Students will also demonstrate their teamwork abilities by working with interprofessional students during the simulation. Upon completion of this training experience students will be able to: 1) demonstrate communicating effectively with other health professionals about a patient case; 2) exhibit teamwork skills with an interprofessional healthcare team; and 3) utilize key TeamSTEPPS tools with an interprofessional healthcare team. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHPR 663. LEC.

**PHPR 599. Clinical Application of Basic Science. 1 Hour.**

This course is an inter-departmental, team-based, technology-centric elective course. Concomitantly, instructors from the basic and clinical science departments within the school of pharmacy will promote deeper student understanding of the path a drug takes from discovery, development and ultimately clinical use. Instructors will collaborate in course content development to integrate basic and clinical science concepts. The course will utilize a blended learning method, incorporating out of class podcasts, online group collaborative projects, and readiness quizzes and exams. Prerequisite: 4th or 5th professional year standing (P2/P3) in the school of pharmacy and concomitant enrollment in either PTX 599, MDCM 599, or PHCH 599 is required. LEC.

**PHPR 601. Advanced Pharmacy Practice Experience 1. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 602. Advanced Pharmacy Practice Experience 2. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

**PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Hours.**

The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional.
The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

**PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

**PHPR 607. Advanced Pharmacy Practice Experience 7. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

**PHPR 608. Advanced Pharmacy Practice Experience 8. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

**PHPR 609. Advanced Pharmacy Practice Experience 9. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

**PHPR 610. Advanced Pharmacy Practice Experience 10. 4 Hours.**
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

**PHPR 613. Pharmacoconomics and Health Outcomes. 2 Hours.**
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals, managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmacoeconomic evaluations, critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must have third year professional standing in the School of Pharmacy. FLD.

**PHPR 614. Pharmacy Management. 3 Hours.**
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoconomics, and human resource management. LEC.

**PHPR 615. Nuclear Pharmacy Practice. 2 Hours.**
This introductory course in nuclear pharmacy practice provides a basic understanding of radiation, radiation dosimetry, radiopharmaceuticals, and clinical application of radiopharmaceuticals in diagnosis and treatment. The course includes both didactic material as well as laboratory experience. LEC.

**PHPR 618. Hospital and Health-System Pharmacy. 1 Hour.**
Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program. LEC.

**PHPR 619. Health Care Systems and Informatics. 3 Hours.**
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of
their practice sites. Enrollment limited to pharmacy majors. Prerequisite: Students must have first year professional standing in the School of Pharmacy. LEC.

PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care. 2 Hours.
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing. LEC.

PHPR 621. Pharmacy Law. 2 Hours.
A course developed to increase students’ knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must be in their third professional year standing in the School of Pharmacy and eligible for APPE rotations at the conclusion of the semester. LEC.

PHPR 624. Pharmacoepidemiology and Public Health. 2 Hours.
Pharmacy profession has a unique and critical opportunity and responsibility to contribute to the improvement of population health. Public health is a broader discipline that encompasses population health with a variety of other areas, including but not limited to epidemiology, cultural competence, health promotion, disease prevention, and drug safety. Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects. Considerations are centered on providing beneficial or adverse effects of medication use in large populations and making relevant inferences from essential analytical research designs used in public health. Using population-based-care approach, students will adopt and fulfill public health roles and activities. This course provides a broad introduction to the principles of pharmacoepidemiology and public health with a focus on applications in the field of pharmacy. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have P3 standing in the School of Pharmacy. LEC.

PHPR 629. Research Design and Biostatistics. 2 Hours.
This course reviews study designs and statistical methods commonly used in primary medical literature. In collaboration with other courses in the curriculum, this course prepares students to interpret and apply primary literature during patient care, collect and analyze data, and maintain clinical competency throughout their professional career in pharmacy. Following completion of this course, students should be able to identify or select appropriate research methods and study designs; collect, summarize, and interpret research data; understand basic statistical concepts; identify or select appropriate statistical tests for hypothesis testing; conduct and interpret the results of statistical tests; and evaluate the validity and reliability of published research studies. LEC.

PHPR 630. Drug Information and Literature Evaluation. 1 Hour.
This course will review the fundamental tools used to identify drug information in primary, secondary and tertiary resources. In addition, students will learn to assess published literature, utilize electronic resources, and learn to formulate a response to drug information questions. Following completion of this course, students will be able to understand the strengths and weaknesses of the drug information resources and to apply drug information skills to clinical practice relevant to patient care. Prerequisite: Successful completion of PHPR 629 and Fifth year standing (P3 student). LEC.

PHPR 635. Problems in Pharmacy Practice. 1-5 Hours.
A course designed for the study of special topics in pharmacy practice. A research paper will be required. Prerequisite: Consent of instructor. IND.

PHPR 661. Pharmacotherapy I. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Drug interactions and patient counseling techniques will be covered. Over-the-counter medications and herbs will also be a significant portion of the course. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have first year professional standing in the School of Pharmacy and successfully completed PHAR 510, PHAR 512 and concurrent enrollment or successfully completed PHAR 515 and PHAR 517. LEC.

PHPR 662. Pharmacotherapy II. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 661 and PHAR 515 and PHAR 517 to enroll in this course. LEC.

PHPR 663. Pharmacotherapy III. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have second year professional standing in the School of Pharmacy and successfully completed PHPR 662 and PHAR 520. LEC.

PHPR 664. Pharmacotherapy IV. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 663 and PHAR 525 to enroll in this course. LEC.

PHPR 665. Pharmacotherapy V. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664. LEC.

PHPR 670. Clinical Assessment. 2 Hours.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmacotherapy knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet between 1:00 to 5:00 PM on either Monday, Tuesday, or Wednesdays. In addition, there is a required Thursday discussion section. A detailed schedule of lab meeting dates and times will be provided in the syllabus. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. Students must pass PHPR 664 to be eligible to complete PHPR 670. LAB.

PHPR 690. Research in Pharmacy Practice. 1-5 Hours.
Students will conduct original research in a laboratory, educational, or clinical research setting under the supervision of department faculty. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. RSH.
PHPR 845. Professional Communications and Leadership. 2 Hours.
A course designed to give the graduate student a practical experience in areas of professional communications such as administrative proposals, grants, letters, memos, poster presentations, and written papers. The course focuses on the different kinds of communications required to relate to other health care professionals. Prerequisite: Consent of instructor. LEC.

PHPR 850. Introduction to Pharmacoepidemiology. 3 Hours.
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects on health. Evaluating a drug's effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles of pharmacoepidemiology with a focus on applications in the medical literature. LEC.

PHPR 855. Economic Evaluation of Health Care Programs and Services. 3 Hours.
The course will provide students with an overview and appraisal of the "state-of-the-art" in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses. LEC.

PHPR 860. Seminar in Pharmacy Practice. 1 Hour.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor. LEC.

PHPR 865. Advanced Institutional Pharmacy Services I. 1.5 Hour.
Advanced Institutional Pharmacy Services (I) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: business management, pharmacy financial management and operations management. Prerequisite: Consent of instructor. LEC.

PHPR 866. Advanced Institutional Pharmacy Services II. 1.5 Hour.
Advanced Institutional Pharmacy Services (II) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: human resource management, clinical services management, specialty pharmacy services and technology management. Prerequisite: Consent of Instructor. LEC.

PHPR 875. Health Care Delivery Systems. 3 Hours.
A continuation of PHPR 865 dealing with the current status of health care delivery systems and the impact of changes in this area on pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 885. Human Resource Management in Institutional Pharmacy Practice. 3 Hours.
A course dealing with recruitment, training, motivation, monitoring of performance, and disciplining of personnel. Seminars, case studies, and role playing are used to apply the information to specific human resource management situations in institutional pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 899. Research in Pharmacy Practice. 1-6 Hours.
Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor. RSH.

Doctor of Pharmacy

The School of Pharmacy

Since its founding in 1885, the University of Kansas School of Pharmacy (http://pharmacy.ku.edu/) has been a leader in pharmacy education. Since 1996, the school has offered only the Doctor of Pharmacy degree as the entry-level practice degree. The curriculum gives the student the knowledge, skills, and ability required of the pharmacy practitioner; it is comprehensive and produces a highly competent general practitioner.

About 60 full-time faculty members teach in the professional Doctor of Pharmacy program and in the graduate programs. 3 departments (Pharmacology and Toxicology, Medicinal Chemistry, and Pharmaceutical Chemistry) offer Master of Science and Doctor of Philosophy degrees. Pharmacy Practice offers the master's degree.

Both the undergraduate and graduate divisions have outstanding national and international reputations based on the excellence and productivity of the faculty. KU is consistently ranked in the top 5 among colleges/schools of pharmacy that receive National Institutes of Health research funding.

The School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (https://www.acpe-accredit.org/), 190 S. LaSalle St, Suite 2850, Chicago, IL 60603-4810, (312) 664-3575, info@acpe-accredit.org, the official accrediting body for American schools of pharmacy.

Advising

On admission to the school, students are assigned faculty members as advisors. The advisor serves continuously during the student’s tenure in the school. Students are expected to meet with their advisors at least once each semester and are encouraged to meet more often to discuss academic issues and career and professional development.

Pre-pharmacy students are advised by the Undergraduate Advising Center, and/or by faculty members from the College of Liberal Arts and Sciences, while they complete pre-pharmacy coursework. All pre-pharmacy students are strongly encouraged to make appointments in the Deans office of the School of Pharmacy, 2010 Becker Drive, Room 2050, for co-advising services and when they have questions concerning pharmacy course requirements or appropriate electives or any other concerns about their preparation for pharmacy admission.

Pre-pharmacy students are also encouraged to participate in the pre-pharmacy club. Email pharmacy@ku.edu to request to be added to the club's e-mail distribution list.
Undergraduate Admission to KU

Prospective students must be eligible for admission to the University of Kansas as an undergraduate student. See the Office of Admissions (http://admissions.ku.edu/), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911, adm@ku.edu for information regarding requirements. Prospective pharmacy students should declare prepharmacy as the major field of study. Visit the Office of International Support Services (http://iss.ku.edu/) for information about international admissions.

Undergraduate Admission to the School of Pharmacy

Students should apply via PharmCAS to the School of Pharmacy during the application period (late July through February 1). When they apply, they should have completed or be on pace to complete the 68 credit hours of required pre-pharmacy courses by August of the following fall. The required pre-pharmacy curriculum may be completed at accredited schools other than KU. Students not yet at KU should submit an undergraduate application for transfer admission. International students should apply for undergraduate admission via International Admissions.

Requirements

Applying students should meet the following requirements:

- Complete the required pre-pharmacy courses (http://pharmacy.ku.edu/academics/) and document the credit with official transcript(s) sent to KU Admissions.
- Maintain a grade-point average (GPA) of 2.50 or higher, overall and in the sciences. This is the minimum GPA acceptable for admission; the average GPA is generally much higher: approximately 3.50.
- Complete the PharmCAS application at www.PharmCAS.org (http://www.pharmcas.org/). To complete the PharmCAS application, one will need:
  - Official transcripts sent directly to PharmCAS from each postsecondary institution attended.
  - Contact information for individuals who will provide letters of recommendation (evaluations) directly to PharmCAS.
  - Submit application payment directly to PharmCAS.
  - PCAT scores are not required; only considered supplemental.
  - Supplemental application: transfer students and international students not already attending KU must also submit the corresponding KU undergraduate admission application.
- An interview is scheduled with select applicants.

Procedures

The School of Pharmacy admissions committee, consisting of at least 2 faculty members from each department and representation from the Deans office, determines admissions. A record documenting the required materials is created by each applicant through PharmCAS. Consideration is given to a student’s overall GPA, science GPA, and GPA within the pre-pharmacy curriculum. The average GPA of past admits is approximately 3.50. Good scholarship is considered a predictor of success in the pharmacy curriculum. However, good communication skills, emotional maturity, leadership ability, professional attitude, an understanding of the pharmacy profession, work experience in a pharmacy, and interest in service to the community are also important. These additional skills may outweigh very high grades or choice of pre-pharmacy courses. Admission is competitive and depends on the number of applications received and the qualifications of the applicants.

Applications are considered and admissions are determined on a rolling basis during the PharmCAS application period. Our preferred application deadline is February 1, however the school may consider later applications. Most admission decisions are made by March. As a condition of matriculation into the KU School of Pharmacy, all admitted students must successfully clear an investigative criminal background check and successfully obtain pharmacy intern status with the Kansas Board of Pharmacy. Successful clearance of the background check and attainment of pharmacy intern status with the Board of Pharmacy is required to enroll in the School of Pharmacy and to participate in curricular and extracurricular curricular activities including interacting with patients. Instructions for completing the background check are provided with the letter of acceptance.

Doctor of Pharmacy Degree Requirements

Prepharmacy Requirements

The Doctor of Pharmacy degree requires completion of all of the required pre-pharmacy and professional courses and a total of 207 credit hours with an overall and professional grade-point average of at least 2.5.

The pre-pharmacy requirements of 67 credit hours include a year each of English, general chemistry, and organic chemistry. Other required courses include calculus, interpersonal communication, molecular and cellular biology, microbiology, human anatomy, physiology, statistics, physics; and 12 credit hours of general studies that satisfy the following KU Core Curriculum requirements: goal 3 humanities; goal 3 social science; goal 4 outcome 1; and goal 4 outcome 2. The KU Core Curriculum goals 1 through 4 must be satisfied during the completion of the pre-pharmacy curriculum requirements. KU Core goals 5 and 6 are satisfied during the professional curriculum.

Students are expected to have or to develop basic competence with personal computers, including word processing and spreadsheet software. All students are required to personally own electronic devices that are capable of running software to complete some class assignments, assessments, as well as for professional work assignments. Information regarding this technology requirement will be provided to matriculating students.

Courses in other professional schools (e.g., engineering, education) may not be counted toward the degree unless the student can show that such courses are directly relevant to pharmacy. For example, a course in business law taken in the business school may count (consult with the office of the dean in the school of pharmacy).

Total Hours 67

Select a course that satisfies KU Core Curriculum requirements: goal 3 humanities; goal 3 social science; goal 4 outcome 1; or goal 4 outcome 2. All of the above need completed.

Professional Requirements

The Doctor of Pharmacy degree requires completion of all the required prepharmacy and professional courses and a total of 207 credit hours with an overall and professional grade-point averages of 2.5.

The curriculum includes instruction in the 3 basic sciences: medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology. It also includes courses in the various aspects of pharmacy practice, including the health care system, law, and emerging roles for pharmacy practitioners. The curriculum integrates course material among departments. Assignments within the curriculum foster development of independent learning, communication skills, problem solving, and professional motivation. The professional curriculum includes a requirement that each student must complete a minimum of 4 elective credit hours within School of Pharmacy. One credit hour must be completed from the pharmacy practice department, 1 credit hour must be completed from a basic science department (either medicinal chemistry, pharmaceutical chemistry, and pharmacology and toxicology) and the remaining two credit hours are left to the students discretion.

Students enroll in introductory pharmacy practice experiences during the summer following the first and second years. These experiences are located throughout the state of Kansas and vary in the type of professional setting.

The final year of the curriculum consists of nine 4-week advanced pharmacy practice experiences with preceptors at pharmacy practice sites throughout Kansas. Students must have their own transportation to reach their assigned sites. Housing at these sites is also the student’s responsibility.
PharmD Research Certificate Program

The Pharm.D. Research Certificate Program (PRCP) is designed for Pharm.D. students who excel in their Pharm.D. courses and have a strong desire and commitment to gain extensive experience and training in research. In the past, students and faculty found each other for research projects through informal methods. The PRCP aims to facilitate this interaction by pairing interested students with interested faculty in a more formal arrangement. Students accepted into the PRCP will receive intensive research training in a laboratory or clinical setting, and will complete research-related curricular requirements. Upon satisfactory completion of the program requirements, students will receive a KU Undergraduate Research Experience Program Certificate on their BSPS transcript and a Pharm.D. Research Certificate on their Pharm.D. transcript, and these certificates are expected to enhance their applications to post-graduate programs.

Admissions

The Pharm.D. Research Certificate Program (PRCP) will be introduced to all P1 students in the fall during one of the student seminars. To apply for the PRCP, students are required to have a minimal GPA of 3.0 (School of Pharmacy GPA). Students interested in the program should prepare their application package that includes cover letter, CV, description of research interests, list of 3 potential research mentors and brief description of their research. Application package should be sent to Dr. Judy Wu (judywu@ku.edu) before December 31.

At the start of the P1 spring semester, students selected to participate in the program will be matched to a faculty research mentor. The mentor and student will draft and sign a program contract that outlines the academic and research plans and workload expectations. This contract will be provided to the program coordinator. During the remaining time in the PharmD program student will satisfy KU’s Undergraduate Research Certificate (prior to being awarded the BS in Pharmaceutical Studies degree) and complete 15 credit hours of research credit (MDCM 690 or 692, P&TX 694 or 698, PHCH 690 or 694, or PHPR 635 or 690 which represents ~ 900 clock hours of effort that may be spread across seven semesters). Four of the 15 research credit hours will be used to satisfy the PharmD elective coursework. Students will complete the following courses and activities:

P1 Spring:
- Conduct research as outlined in their program contract for academic credit
- Attend KU’s Undergraduate Research Symposium

P1 Summer:
- Conduct research as outlined in their program contract. If a student is paid a summer stipend, academic credit may not be awarded.

P2 Fall:
- Conduct research as outlined in their program contract for academic credit

P2 Spring:
- Conduct research as outlined in their program contract for academic credit
- Present research at KU’s Undergraduate Research Symposium
- Complete KU’s Undergraduate Research Certificate requirements (to be noted on BSPS transcript)

P2 Summer:
- Conduct research as outlined in their program contract. If a student is paid a summer stipend, academic credit may not be awarded.

P3 Fall:
- PHAR 514 Scientific Writing for the Healthcare Professional (2 credits)
- Conduct research as outlined in their program contract for academic credit

P3 Spring:
- PHAR 516 Scientific Presentations for the Healthcare Professional (1 credit)
- Attend Mossberg Honors Research Symposium
- Conduct research as outlined in their program contract for academic credit

P4 Year:
- Enroll in two Advanced Pharmacy Practice Experiences (PHPR 601-609) involving research (8 credits in total)
- Present (poster or oral) at the Mossberg Honors Research Symposium
- PharmD Research Certificate completion noted on PharmD transcript

Department of Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-
related problems through application of fundamental principles of organic chemistry, biochemistry, natural product chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 8 full-time faculty members, 15 - 20 graduate students on an average, about 10-15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and generally, our graduates pursue successful careers in the pharmaceutical industry and in academia.

Facilities
The department is well equipped for both chemical and biochemical research and has research facilities for about 50 graduate students, postdoctoral associates, and research technicians. Laboratory space in the department provides research laboratories for chemical synthesis and biochemical research. Faculty are housed in modern research buildings on west campus (Shankel Structural Biology Center) and main campus (Integrated Science Building). The department has an excellent complement of modern spectroscopic, biochemical, and chromatographic instrumentation, and other specialized research instrumentation is available through cooperative arrangements with other departments and core laboratories.

Advanced instrumentation and facilities are available through KU’s Molecular Structures Group (https://msg.ku.edu) (MSG). MSG laboratories include the Biochemical Research Service Laboratory (BRSL), the Mass Spectrometry Laboratory, the Nuclear Magnetic Resonance Laboratory, the Molecular Graphics and Modeling Laboratory, the X-ray Crystallography Laboratory, and the Protein Structure Laboratory (dedicated to macromolecular X-ray crystallography) with more than $10 million in instrumentation.

The Shankel Structural Biology Center (SBC) offers new research opportunities for medicinal chemists interested in protein and nucleic acid structure and combinatorial synthesis; it also houses a 800-MHz NMR. The Analytical Proteomics Laboratory, which combines activities of the Mass Spectrometry Lab and BRSL to create a collaborative environment for protein handling, protein mass spectrometry, and bioinformatics, is in SBC. In the same building, the High Throughput Screening Laboratory (http://www.hts.ku.edu) has integrated and automated robotics equipment for carrying out biochemical and cell-based assays and a chemical library of more than 100,000 compounds with diverse structures and drug-like properties for biological screening. The service laboratories have professional staff that provides training in specialized research techniques in addition to their service functions.

Courses

MDCM 601. Medicinal Biochemistry I. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. LEC.

MDCM 603. Medicinal Biochemistry II. 3 Hours.
A study of the biochemical principles of macromolecular structure and function, biosynthesis, molecular communication, and the metabolism of nutrients and xenobiotics as applied to problems of medicinal and pharmacological significance. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601. LEC.

MDCM 606. Phytomedicinal Agents. 1 Hour.
This course will acquaint the pharmacy students with the current status of botanical use in the United States. A basic foundation will be provided so that the pharmacist can properly assess the appropriateness and usefulness of various phytomedicines and combinations in managing certain ailments with regard to efficacy, safety, potential toxicity, and potential herb-drug interactions. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 601 to enroll in this course. LEC.

MDCM 607. Clinical Pharmacognosy. 1 Hour.
The course will provide a technical background for understanding the scientific basis underlying the use of herbal medicines. This will be followed by practical information about the pharmacological and chemical properties as well as clinical uses of herbal medicines. Active student participation in discussing the properties of these non-prescription medicinals is expected. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 601. LEC.

MDCM 625. Medicinal Chemistry I: Neuroeffector and Cardiovascular Agents. 4 Hours.
A study, from the molecular viewpoint, of the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure-activity relationships, metabolism and mechanisms of action; this course emphasizes drugs affecting the cardiovascular and central nervous systems. Prerequisite: Students must be admitted to the school or division of Pharmacy and have successfully completed MDCM 603 to enroll in this course. LEC.

MDCM 626. Medicinal Chemistry II: Homeostatic Agents. 4 Hours.
A study of MDCM 625 with special emphasis on anticancer, antiviral, antibacterial, antifungal, anti-diabetic, anticoagulant, and steroidoidal drugs. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed MDCM 625. LEC.

MDCM 690. Undergraduate Research. 1-5 Hours.
Research in medicinal chemistry. Students will be assigned to a laboratory research problem. Prerequisite: Consent of instructor. IND.

MDCM 692. Problems in Medicinal Chemistry. 1-5 Hours.
This course encompasses original work on a laboratory problem of limited scope, honors reading assignments from medicinal chemistry literature,
or in-depth discussions of assigned topics. Prerequisite: Consent of instructor. IND.

MDCM 701. Advanced Medicinal Biochemistry I. 3 Hours.
A study of the principles of macromolecular structure and function, biosignaling, bioenergetics and metabolism, with an emphasis on the relationship between biochemistry and medicine. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 703. Advanced Medicinal Biochemistry II. 3 Hours.
A study of the principles of basic enzymology, including chemical reactions, biosynthesis, and metabolism. In addition, the course will cover lipids, hormones, vitamins, and minerals. Prerequisite: Graduate standing or permission of instructor. LEC.

MDCM 710. Chemistry of Drug Action I. 4 Hours.
This course provides an overview of topics central to the understanding and practice of contemporary medicinal chemistry. It illustrates the interplay of anatomy and physiology with the organic-, bio- and analytical chemistry of drugs in the body. Topics covered include physiological mechanisms and disease processes; cell structure and function; basic intermediary metabolism; basic principles underlying drug action including the physicochemical properties of drugs and how these affect the interaction of drugs with living systems; chemical and biological manipulation of the absorption, distribution, metabolism and excretion of drugs and prodrugs; kinetics and inhibition of enzymes and transporters; quantitation and molecular modeling of drug binding to targets. Prerequisite: One year of organic chemistry, one semester of biochemistry, and one college-level course in biology. LEC.

MDCM 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: Consent of instructor. LEC.

MDCM 785. Natural Products of Medicinal Significance. 2 Hours.
A discussion of bioassay-directed screening, the isolation, structure determination, biosynthesis, partial synthesis and total chemical synthesis of organic natural products of medicinal significance. Examples of the classes of compounds to be considered include steroid hormones, cardiac glycosides, alkaloids, antibiotics, terpenes, and the like. Prerequisite: Graduate standing or consent of instructor. LEC.

MDCM 790. Chemistry of Drug Action II. 3 Hours.
A discussion of the principles of contemporary drug design with specific examples chosen from the original literature. This course covers the organic substances used as medicinal agents, including consideration of their origins, chemical properties, structure/activity relationships, metabolism and mechanisms of action. Prerequisite: Graduate standing or completion of MDCM 625 and MDCM 626. LEC.

MDCM 795. Master's Literature Seminar in Medicinal Chemistry. 1 Hour.
Literature seminar for graduate students in Spring of their 2nd year. Prerequisite: Graduate students in 2nd year of program. LEC.

MDCM 799. Research Seminar in Medicinal Chemistry. 1 Hour.
Reports by research students and discussions of developments in the field not covered in formal courses. LEC.

MDCM 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801, PHCH 801 and PHCH 802.) LEC.

MDCM 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816, and PHCH 816.) Prerequisite: Permission of instructor. SEM.

MDCM 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Hours.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/CHEM 817/PHCH 817.) Prerequisite: Graduate student. SEM.

MDCM 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

MDCM 895. Research in Medicinal Chemistry. 1-12 Hours.
Hours and credit to be arranged. RSH.

MDCM 899. Master's Thesis. 1-12 Hours.
Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Consent of instructor. THE.

MDCM 950. Advanced Topics in Medicinal Chemistry: _____. 1-3 Hours.
An in-depth discussion of topics of current interest to medicinal chemists. Prerequisite: Consent of instructor. LEC.

MDCM 980. Proposal Preparation. 3 Hours.
Presentation of a literature seminar and writing an original NIH-style research proposal concerning contemporary problems in medicinal chemistry. Prerequisite: Consent of instructor. LEC.

MDCM 999. Doctoral Dissertation. 1-12 Hours.
Hours and credit to be arranged. Original chemical research in the synthesis and development of medicinal agents, elucidation of the chemical mechanisms of drug action, drug metabolism, and drug toxicities. THE.
Master of Science in Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, medicinal chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 8 full-time faculty members, about 15-20 graduate students on an average, about 10-15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and generally, our graduates pursue successful careers in the pharmaceutical industry and in academia.

Graduate Admission

Graduate students are primarily admitted to the department to pursue the Ph.D. degree. The M.S. degree and postdoctoral training are also available. An applicant wishing to enter the graduate program must have earned a bachelor’s or master’s degree in pharmacy, medicinal chemistry, chemistry, biochemistry, or a closely related field, and must have completed 1 year of organic chemistry with laboratory (equivalent to CHEM 330, CHEM 331, CHEM 335, and CHEM 336). In all cases, general admission requirements must be met.

Applications are evaluated by the graduate selection committee. Applications must be supported by 1 copy of official transcripts of all previous college and university work, both undergraduate and graduate. In addition, a resume, a statement of purpose, and 3 letters of recommendation from current or former teachers, advisors, or employers must be submitted. Students from non-English-speaking countries also must furnish proof of proficiency in English. Graduate Record Examination (GRE) general test scores are required, and applicants are strongly encouraged to take the subject test in chemistry as well.

The graduate selection committee makes admission decisions based on grade-point averages for previous college work (particularly in the relevant science areas), letters of recommendation, previous research or employment experience relevant to the graduate training being sought, GRE scores, etc. The number of applicants who can be admitted at any time varies, depending on the availability of laboratory space, research facilities, and financial support for research activities, but generally averages between 5-10 a year.

Graduate applications (http://www.graduate.ku.edu/) and all other requested application materials (transcripts, résumé, statement of purpose, recommendation letters, etc.) must be submitted online:

The University of Kansas
Department of Medicinal Chemistry
Del Shankel Structural Biology Center (SBC)
2034 Becker Drive, Room 1089
Lawrence, KS 66047

M.S. Degree Requirements

Candidates for this degree must satisfy general requirements as well as those of 1 of the following options:

- Students who are proceeding toward the Ph.D. degree at KU receive the master’s degree after satisfactorily completing the course work requirement for the Ph.D. and passing a comprehensive oral examination.
- Students who wish to earn only the M.S. degree must complete a prescribed subset of the course work requirements for the Ph.D. degree and a thesis representing at least 10 credit hours of research and pass a thesis defense.

Doctor of Philosophy in Medicinal Chemistry

Medicinal Chemistry Graduate Programs

Medicinal chemistry is an interdisciplinary field at the interface of chemistry and biology. It approaches important biological and health-related problems through application of fundamental principles of organic chemistry, biochemistry, medicinal chemistry, and molecular pharmacology. Graduates are expected to be thoroughly familiar with the chemistry of organic compounds, including their synthesis and biosynthesis, their reactivity, and their interactions with and alteration by living systems. Research is at the heart of the program, and the department’s research activities encompass many areas of modern medicinal chemistry.

Currently, the department has 8 full-time faculty members, 10-15 graduate students on an average, about 10-15 postdoctoral associates, numerous undergraduate researchers, and an outstanding technical staff. The department is recognized nationally and internationally, and generally, our graduates pursue successful careers in the pharmaceutical industry and in academia.

Graduate Admission

Graduate students are primarily admitted to the department to pursue the Ph.D. degree. The M.S. degree and postdoctoral training are also available. An applicant wishing to enter the graduate program must have earned a bachelor’s or master’s degree in pharmacy, medicinal chemistry, chemistry, biochemistry, or a closely related field, and must have completed 1 year of organic chemistry with laboratory (equivalent to CHEM 330, CHEM 331, CHEM 335, and CHEM 336). In all cases, general admission requirements must be met.

Applications are evaluated by the graduate selection committee. Applications must be supported by 1 copy of official transcripts of all previous college and university work, both undergraduate and graduate. In addition, a resume, a statement of purpose, and 3 letters of recommendation from current or former teachers, advisors, or employers must be submitted. Students from non-English-speaking countries also must furnish proof of proficiency in English. Graduate Record Examination (GRE) general test scores are required, and applicants are strongly encouraged to take the subject test in chemistry as well.

The graduate selection committee makes admission decisions based on grade-point averages for previous college work (particularly in the relevant science areas), letters of recommendation, previous research or employment experience relevant to the graduate training being sought,
GRE scores, etc. The number of applicants who can be admitted at any time varies, depending on the availability of laboratory space, research facilities, and financial support for research activities, but generally averages between 5-10 a year.

Graduate applications (http://www.graduate.ku.edu/) and all other requested application materials (transcripts, résumé, statement of purpose, recommendation letters, etc.) must be submitted online:

The University of Kansas
Department of Medicinal Chemistry
Del Shankan Structural Biology Center (SBC)
2034 Becker Drive, Room 1089
Lawrence, KS 66047

Ph.D. Degree Requirements

If credit has not already been obtained in the courses below or their equivalents, students must complete the following courses as early as is practical in the graduate program: 1 semester of Physical Chemistry, and Biochemistry. Satisfactory completion of qualifying American Chemical Society (ACS) examinations in organic chemistry and biochemistry also is required.

A comprehensive written examination is used to assess students' knowledge of medicinal chemistry, organic chemistry, and biochemistry. This examination is administered immediately at the end of year 1 in the summer. After completing the comprehensive examination, the major part of the course work, and other requirements, the student takes an oral comprehensive examination. After completing this examination, the student prepares an original research proposal for presentation to the faculty. The final requirement for the Ph.D. is the preparation and defense of a dissertation based on original laboratory research conducted by the candidate.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

General requirements, such as those related to the comprehensive oral examination, the dissertation, and the dissertation defense, are listed in the Graduate Studies (p. 2540) section of the online catalog.

Neurosciences Programs

Neurosciences Graduate Programs

The graduate program in neurosciences at the University of Kansas is a degree-granting program. Students are admitted directly into the program. The program is coordinated by the Lawrence campus of the university - with strengths in the behavioral, biological, chemical, and pharmaceutical sciences - and the Medical Center campus in Kansas City - with strengths in all the biomedical and clinical sciences. Each student is asked to indicate the campus on which he or she would like to be considered for admission. Students in this program should expect to be admitted to and receive a Ph.D. degree in neurosciences.

The program appeals to students who wish to work out individual programs spanning a great breadth from molecular neurobiology, and cognitive neuroscience. Students take advantage of the many research and training opportunities available at two campuses of a major research university. Our students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. If this type of program fits your professional training expectations, we invite you to join us.

dwright@kumc.edu

M.S. Degree Requirements

The M.S. is offered in rare cases where attainment of the Ph.D. is inappropriate. A student may earn the M.S. by completing these minimum requirements:

• The courses in the curriculum of the first year of the Ph.D. training program.
• The course in advanced neuroscience.
• A thesis based on either original research or library research.
• The total credit hours of graduate-level courses required for the M.S. degree.

**Doctor of Philosophy in Neurosciences**

**Neurosciences Graduate Programs**

The graduate program in neurosciences at the University of Kansas is a degree-granting program. Students are admitted directly into the program. The program is coordinated by the Lawrence campus of the university - with strengths in the behavioral, biological, chemical, and pharmaceutical sciences - and the Medical Center campus in Kansas City - with strengths in all the biomedical and clinical sciences. Each student is asked to indicate the campus on which he or she would like to be considered for admission. Students in this program should expect to be admitted to and receive a Ph.D. degree in neurosciences.

The program appeals to students who want to teach and/or do research in a university or do research in a pharmaceutical/biotechnology company or government laboratory. Students who are interested in this field wish to work out individual programs spanning a great breadth from molecular and cellular neurobiology to organism-based neurophysiology, behavioral neurobiology, and cognitive neuroscience. Students take advantage of the many research and training opportunities available at two campuses of a major research university. Our students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. If this type of program fits your professional training expectations, we invite you to join us.

**Applications and Program Administration**

The administrative offices for the interdisciplinary neuroscience program are in School of Pharmacy in Lawrence and at the Hemenway Life Sciences Innovation Center in Kansas City.

All application materials are reviewed by faculty committees on the Lawrence and Kansas City campuses. Students should have B.A. or B.S. degrees in one of the following fields: anthropology, behavioral sciences (psychology, human development), biology, chemistry, engineering, neuroscience, or pharmacology. Preference is given to students who have completed courses in introductory biology and at least one course in advanced biology topics such as biochemistry, physiology, microbiology, molecular biology, and courses in introductory and organic chemistry or in calculus and physics. The graduate curriculum requires background knowledge in these fields. Students who do not have sufficient training will be asked to complete the appropriate courses before being admitted. The program requires submission of the standard GRE scores with all applications, three letters of recommendation, and an essay by the applicant about his or her career goals, i.e. why he or she wishes to become a neuroscientist. Selection of graduate students is based on grade-point average, Graduate Record Examination scores, letters of recommendation, and evidence of previous experience in research. The minimum standard acceptable for admission to the graduate program is a grade-point average of 3.0. Inquiries and applications are welcome at any time. Most students enter the program in August. Full consideration for August admission can be assured for all applications received by the 2nd Friday of January.

The University of Kansas accepts only on-line applications. The fees are:
- Domestic student on-line application fee: $65
- International student on-line application fee: $85

The **deadline for receipt of application materials** to the Neuroscience Graduate Program is the **2nd Friday of January** in consideration for admission to the Fall semester. **Institution Code: 6871 / Neuroscience Program Code: 0213**

**Ph.D. Degree Requirements**

The neuroscience curriculum is subdivided into core courses that all students must complete and electives representing the 2 major specializations,

- Cell and Molecular Neuroscience and
- Cognitive and Systems Neuroscience.

There is considerable flexibility in the curriculum to accommodate specific interests of the students and course availability. Course choices should be done by consulting your mentor and the Director of the Neuroscience Program prior to establishing a graduate committee. A 5-member faculty advisory committee including at least 3 members of the neuroscience program should be in place at the beginning of the second year of study to help the student choose electives if needed but more so to provide guidance on the research progress. Students should meet with the committee in the Fall of their second year of study and present their research progress to the committee and an outline of their thoughts for preparing a 6 page proposal for their oral defense in the spring/summer of the second year

Continued enrollment in the neuroscience seminar is required and students are expected to present a yearly seminar. This can constitute a literature review for first year students and subsequent presentations are typically on research progress.
Students also receive training in the responsible conduct of research and teaching in the neurosciences. For the Ph.D., the student completes the core curriculum as well as research skills training, comprehensive oral examination, preparation of a dissertation, and final oral examination and defense of the dissertation.

All students must complete a research skill. Commonly used areas are radiation biology and radiation safety, cell culture methodology, techniques of electron and confocal microscopy, molecular biology laboratory training, computer science training, statistics, and training in electronics and instrumentation.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current Lawrence and Edwards Campus policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

An example of a standard progression through the curriculum is provided below.

**Department of Pharmaceutical Chemistry**

**Pharmaceutical Chemistry Graduate Programs**

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Students in the program will become familiar with aspects of physical, organic and analytical chemistry, chemical kinetics, biopharmaceutics and pharmacokinetics, and biotechnology including vaccines. To address these needs, the department offers a series of eight (8) core courses designed to hone the student’s skills in these topical areas,
which are considered essential in understanding problems of biological, biophysical and chemical processes at the molecular level. Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the links Coursework Research Overview and Department Graduate Student Handbook for details. Every student entering the program is expected to complete the core courses during the first three semesters of graduate study. Students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests. The department places emphasis on excellence in research making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion.

Currently, the department has 16 faculty members, about 35 graduate students, and a similar number of postdoctoral fellows and research scientists. The department is recognized nationally and internationally, with most graduates and researchers going on to successful careers in the pharmaceutical industry, government positions and academia. The department serves as the home department for the long-standing NIH training grant in pharmaceutical biotechnology.

Facilities

The department is located on KU’s west campus in the Simons Biosciences Research Laboratories and the Multidisciplinary Research Building (MRB). Recently renovated and expanded, Simons is a modern, well-equipped research facility. MRB houses researchers from the pharmaceutical chemistry and a variety of other disciplines, thus encouraging interdisciplinary interaction and collaboration. The department is well equipped for biochemical, biophysical and chemical research, having state-of-the-art spectroscopic, physical characterization, chromatographic and mass spectrometry instrumentation. Within the department there are facilities for cell culture, several advanced fluorescence microscopes, and numerous components and software for proteomic analysis. Furthermore, the faculty has established the Macromolecule and Vaccine Stabilization Center (MVSC) and Kansas Vaccine Institute (KVI), which contain an extensive array of instrumentation for the characterization of both small and macromolecules. Examples of analytical instrumentation include circular dichroism spectrophotometers, FTIR, capillary LCQ-Tof mass spectrometry, and particulate analysis. Additionally the university offers state of the art equipment and service facilities to assist with many aspects of research. For example, the Molecular Structures Group (MSG) is a campus-wide facility encompassing NMR, MS, X-ray Crystallography, Protein Production, Fragment-based Drug Discovery, and Molecular Graphics and Modeling Laboratories available to all campus members for a nominal fee. Near the Simons building, the structural biology wing of the MSG houses an 800-mHz NMR along with many other instruments and services.

Courses

PHCH 510. Emerging Trends in Pharmaceutical Chemistry I. 1 Hour. This elective class will explore emerging areas of research currently impacting the pharmaceutical industry. Potential topics include; biologicals as therapeutics, drug targeting, prodrugs, nanotechnology, biological barriers, gene therapy, transporters, vaccines, intracellular drug trafficking, controlled release drug delivery, cancer therapy, analytical biotechnology and many others. The class will be team taught by PHCH faculty and guest speakers. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 512. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour. This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: 1st, 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHCH 514. Scientific Writing for the Health Professional. 2 Hours. Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and successful communication depends on clarity of thought and careful use of language. This course is intended for 3rd professional (P3) year students who are seeking residency and will need to write research proposals and abstracts, as well as prepare effective posters and presentations. It is an intensive course with multiple writing assignments. Students are expected to participate fully, and individual feedback and guidance on writing will be provided by the instructor. Graded on a satisfactory/fail. Prerequisite: 3rd professional (P3) year students who plan to complete post-doctoral residency training. LEC.

PHCH 515. Oral Presentations for the Health Professional. 1 Hour. Communicating research plans and experimental findings is a critical skill for health care professionals working in a research environment, and a successful oral presentation depends on clear thinking and careful slide design to tell a story. This course is intended for 3rd year professional (P3) pharmacy students who are seeking residency and will need to prepare effective presentations. It is an intensive course with successive slide drafts and presentations. Students are expected to participate fully, and individual feedback and guidance on presentations will be provided by the other students and by the instructor. Graded on a satisfactory/fail basis. Prerequisite: PHCH 514. LEC.

PHCH 517. Pharmacy Calculations. 2 Hours. An introduction to the mathematics involved in filling prescriptions and in manufacturing pharmaceuticals. Includes an introduction to standard prescription notation and familiarization with pharmaceutical weights and measures. LEC.
PHCH 518. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Students must have completed PHCH 517. LEC.

PHCH 605. Vaccines. 1 Hour.
Vaccines are currently the most powerful therapeutic approach available for infectious disease and promise to become of increasing importance for a wide variety of other pathologies including cancer. This course discusses the immunological basis of vaccinology, types of vaccines currently available and in development and the process by which vaccines are made from the basic research stage through their pharmaceutical development and marketing. Ethical aspects of vaccine use will also be considered. Prerequisite: Students must have first, second or third year professional standing in the School of Pharmacy. LEC.

PHCH 625. Pharmacokinetics. 3 Hours.
A discussion of the basic concepts, and some clinical applications, of pharmacokinetics, clearance concepts, extravascular dosing, and the use of pharmacokinetics in dosage regimen design and adjustment. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have successfully completed PHCH 517 and PHCH 518. LEC.

PHCH 626. Biopharmaceutics and Drug Delivery. 3 Hours.
A study of biological barriers to drug delivery, conventional dosage forms, and new and future drug delivery strategies. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed PHCH 517, PHCH 518, and PHCH 625. LEC.

PHCH 667. Introduction to Clinical Chemistry. 2 Hours.
A lecture-discussion course concerned with identification of the contents of physiological fluids, changes in physiological fluid content induced by disease and drugs, and therapeutic drug monitoring: case studies are presented. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHCH 690. Undergraduate Research in Pharmaceutical Chemistry. 1-5 Hours.
Student will be assigned a suitable research project in the area of pharmaceutical analysis or pharmaceutics. Prerequisite: Consent of instructor. IND.

PHCH 693. Clinical Pharmacokinetics. 2 Hours.
This course presents discussions on physiological and disease state variables in pharmacokinetics for selected drugs and drug classes, and instructs students in the use of physiological and disease state pharmacokinetic information to develop individualized therapeutic regimens. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this course. Students must have successfully completed PHCH 625 and PHCH 626. LEC.

PHCH 694. Problems in Pharmaceutical Chemistry. 1-5 Hours.
A student will be assigned a suitable research project in an area of pharmaceutical analysis or pharmaceutics. This course is offered regularly by the Department of Pharmaceutical Chemistry to meet the special needs of selected students, usually for one of the following two situations: (1) This course may be taken when a student has a special interest in a problem or area of limited scope and desires to pursue that study in depth under supervision of a member of the faculty. (2) This course is sometimes used as a remedial class to provide a mechanism of intensive review and study in an area of weakness. Prerequisite: Consent of instructor. IND.

PHCH 700. Experimental Methods in Pharmaceutical Chemistry. 1-5 Hours.
Discussions, lectures, and laboratory work designed to acquaint and provide hands on experiences to advanced undergraduate and graduate students with experimental design, methods, and approaches relevant to modern research in pharmaceutical chemistry. Prerequisite: Consent of instructor. LEC.

PHCH 705. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 706. Writing and Communicating Science for Graduate Students. 3 Hours.
Communicating research proposals and experimental findings is a critical skill for scientists. Successful communication depends on clarity of thought and careful use of language. This course will use class discussions with examples and homework assignments to help prepare the graduate student to successfully communicate in both academia and industry settings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: This course is only open to distance education students. LEC.

PHCH 712. Road Map to the Development and Regulatory Approval of a New Drug. 1 Hour.
This special topics course will cover key steps in developing and bringing a new drug through pharmaceutical development and regulatory approval and into commercial use. Development of both traditional small-molecule chemical drugs and biotechnology-based protein drugs will be discussed. Example topics include: (1) how does a drug candidate move from its discovery at the lab bench into clinical trials? (2) what are the key hurdles in developing a new medicine that can be produced at large-scale in a manufacturing facility? (3) why are patents and venture capital so important in drug development? Guest lecturers will provide real world perspectives including case studies. This is a two-hour class that meets 8 times during the semester. Prerequisite: Graduate standing in Pharmaceutical Chemistry or a trainee of the NIH Biotech Training Grant. LEC.

PHCH 715. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. Prerequisite: Master's or PhD candidate in Engineering, Chemistry, Medicinal Chemistry, or Pharmaceutical Chemistry (by appointment for seniors or graduate students in departments not listed). LEC.

PHCH 716. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal.
PHCH 717. Drug Delivery. 3 Hours.
The course will survey the latest technology for delivering pharmaceuticals and biologicals to reduce side effects and enhance drug efficacy. The course will survey the latest research in this area and examine more classical delivery methods. A qualitative and quantitative understanding of drug delivery practice and theory is the goal. This course is only open to external non-degree seeking students. Offered in spring semesters. Prerequisite: PHCH 732. LEC.

PHCH 718. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. Prerequisite: Graduate standing. LEC.

PHCH 719. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to distance education students. Prerequisite: Graduate standing. LEC.

PHCH 721. Physical-Chemical Principles of Solution Dosage Forms. 3 Hours.
Physical properties of pharmaceutical solutions and their physiological compatibility will be discussed (intermolecular interactions, energetics, colligative properties, isotonicity, pH, buffers and drug solubility). Kinetics and mechanisms of drug degradation in solution will also be introduced. This course is only open to external non-degree seeking students. Offered in spring semesters. LEC.

PHCH 725. Cellular and Molecular Pharmaceutics. 3 Hours.
The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and ultimately of either adverse or therapeutic benefit. (Same as CPE 725.) Prerequisite: Graduate standing or consent of instructor. LEC.

PHCH 726. Cellular and Molecular Pharmaceutics. 3 Hours.
The pharmaceutical relevance of fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell and tissue functions, homeostasis in health and disease will be presented. Current analytical methods for examining cells and tissues, and molecular components important in understanding drug and protein biodistribution and metabolism will be discussed. Discussion topics will include the chemical and physical properties of small molecules, proteins, nucleic acids and lipids and their impact on cellular and subcellular structures and ultimately of either adverse or therapeutic benefit. Prerequisite: Graduate standing or consent of instructor. LEC.

PHCH 730. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. LEC.

PHCH 731. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course open only to distance education students. LEC.

PHCH 732. Biopharmaceutics and Pharmacokinetics. 3 Hours.
A quantitative treatment of the processes involved with drug absorption, distribution, metabolism, and excretion in living systems. This course is only open to external non-degree seeking students. Offered in fall semesters. LEC.

PHCH 744. Organic Chemistry for Pharmaceutical Scientists. 3 Hours.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include functional group chemistry: electronic structure, acid/base properties: molecular structure and properties (dipole, strain, and steric effects, inductive and resonance effects); dynamics of reactions (the major organic reaction mechanism, kinetics, energy profiles, isotope effects, linear free energy relationships), solvent effects, stereochemistry and conformation, an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of important classes of mechanisms. This course is only open to distance education students. Prerequisite: CHEM 624 and CHEM 626. LEC.

PHCH 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as PTX 775, BIOL 775, CHEM 775, MDCM 775 and NURO 775.) Prerequisite: BIOL 600 or equivalent. LEC.

PHCH 801. Issues in Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientists in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PTX 801 and PHCH 802.) LEC.

PHCH 802. Issues of Scientific Integrity. 1 Hour.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, as author, grantee, reviewer, employer/employee, teacher/student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. This course is open only to distance education students. (Same as PHCH 801, MDCM 801, NURO 801, and PTX 801.) LEC.

PHCH 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, CHEM 816 and MDCM 816.) Prerequisite: Permission of instructor. SEM.
PHCH 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Hours.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/ CHEM 817/ MDCM 817.) Prerequisite: Graduate student. SEM.

PHCH 826. Molecular Cell Biology. 3 Hours.
Fundamental and advanced concepts in cell biology and the molecular interactions responsible for cell function, homeostasis and disease will be presented. Current analytical methods for examining cells and their molecular components will be discussed. Emphasis will be placed on the chemical and physical properties of individual proteins, nucleic acids and lipids and their assembly into cellular and subcellular structures. This course is only open to distance education students. LEC.

PHCH 850. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. Prerequisite: Graduate standing in PHCH or consent of the instructor. LEC.

PHCH 851. Solid State Stability and Formulation. 2 Hours.
This course is designed to provide an understanding of the formulation and stability of small and large drug candidates in the solid state. The first two-thirds of the course will focus on small molecules, with the last third being devoted to proteins. This course is open only to distance education students. Prerequisite: Graduate standing in Pharmaceutical Chemistry or consent of the instructor. LEC.

PHCH 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, CHEM 860 and MDCM 860.) Prerequisite: Permission of instructor. LEC.

PHCH 862. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students. LEC.

PHCH 863. Physical Chemistry of Solutions, Solids and Surfaces. 3 Hours.
A course on equilibria in aqueous and non-aqueous systems with emphasis on solutions of interest to pharmaceutical technology. Included are association-dissociation equilibria, complexation, protein binding calculation of species concentrations, estimation of solubility and ionization constants. Methods for the determination of chemical potential in solution are presented. This course is open only to distance education students. LEC.

PHCH 864. Pharmaceutical Analysis. 4 Hours.
This course is intended to be a comprehensive treatment of contemporary techniques used to validate analytical methods for the determination of drugs in the bulk form, pharmaceutical formulations, biological samples and other relevant media. The emphasis will be on chromatographic techniques reflecting the preeminent position that those techniques occupy in the field of pharmaceutical and biomedical analysis. Prerequisite: Previous or concurrent enrollment in PHCH 684. LEC.

PHCH 865. Pharmaceutical Analysis. 4 Hours.
Advanced course on pharmaceutical analysis. This course is only open to distance education students. LEC.

PHCH 870. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 871. Advanced Pharmaceutical Biotechnology. 4 Hours.
A course designed to emphasize the important facets of recombinant proteins and vaccines as pharmaceutical agents. Basics of protein structure and analysis will be introduced, and methods for production, isolation, and purification of recombinant proteins will be described. Potential chemical and physical degradation processes and strategies for circumventing these difficulties will be discussed. This course is only open to distance education students. An overview of the development and formulation of vaccines and their immunological basis will be presented. Prerequisite: BIOL 600 or consent of instructor. LEC.

PHCH 895. Research in Pharmaceutical Chemistry. 1-11 Hours.
Advanced level research in collaboration with a faculty member in pharmaceutical chemistry or related areas. This course is limited to students who are doing research, but not necessarily working toward either a master’s or a doctoral degree. RSH.

PHCH 898. Master’s Thesis. 1-10 Hours.
Master’s Thesis. This course is open only to distance education students. THE.

PHCH 899. Master’s Thesis. 1-11 Hours.
Graded on a Satisfactory/Fail basis. THE.

PHCH 920. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. LEC.

PHCH 921. Chemical Kinetics. 2 Hours.
This course provides the principles of kinetic data analysis as applied to problems in pharmaceutical chemistry. Topics include the setup and solution of rate equations related to chemical reactions; simplifications and approximations in complex equation systems; isotope, solvent and salt rate effects; and diffusion and activation controlled reactions. This course is only open to distance education students. LEC.

PHCH 972. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. LEC.
PHCH 973. Mechanisms of Drug Deterioration and Stabilization. 3 Hours.
A course dealing with mechanisms and chemical kinetics of drug deterioration and stabilization. This course is only open to distance education students. LEC.

PHCH 974. Advanced Special Topics in Pharmaceutical Chemistry. 1-3 Hours.
Various topics pertinent to the area of pharmaceutical chemistry will be explored. Graded on a satisfactory/unsatisfactory basis. LEC.

PHCH 978. Pharmaceutical Chemistry Seminar. 1 Hour.
A seminar on the chemistry of pharmaceutical systems. LEC.

This course is open only to distance education students. THE.

THE.

Master of Science in Pharmaceutical Chemistry

Pharmaceutical Chemistry Graduate Programs

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Students in the program will become familiar with aspects of physical, organic and analytical chemistry, chemical kinetics, biopharmaceutics and pharmacokinetics, and biotechnology including vaccines. To address these needs, the department offers a series of eight (8) core courses designed to hone the student’s skills in these topical areas, which are considered essential in understanding problems of biological, biophysical and chemical processes at the molecular level. Every student entering the program is expected to complete the core courses during the first three semesters of graduate study. Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the links Coursework Research Overview and Department Graduate Student Handbook for details. Students can choose from a variety of elective courses that allow them to gain knowledge and skills in areas specific to individual research project interests. The department places emphasis on excellence in research making every effort to ensure that students can maximize efforts on their research projects toward earning the Ph.D. degree in a timely fashion.

Students are primarily admitted to the department to pursue the Ph.D. degree, however students may opt to terminate graduate studies with the M.S. degree. For external students seeking an advanced degree, the department offers the distance M.S. and Ph.D. degrees. To be eligible for the distance programs, the students must be employed in the private or government sectors, meeting the same requirements as on-site students, have access to laboratory facilities and the availability of an appropriately trained scientific advisor at the remote site. The distance Ph.D. program is only available to students who have completed the distance M.S. degree with a highly meritorious performance.

Graduate Admission

Students with a bachelor level degree or a master’s degree in chemistry, pharmacy, the biological sciences, material sciences, chemical engineering or related disciplines are encouraged to seek admission to our program. Except under unusual circumstances, we review and accept candidates for admission into the fall semester only. All information must be delivered to us before we can begin to consider your application. Entering students are expected to be competent in basic principles of organic chemistry, physical chemistry and two semesters of calculus equivalent to KU MATH 121/122.

Refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the links Admissions and Requirements, then the sub-link Admissions Requirements for details. Although the department does not have a formal application deadline, the faculty begins evaluations of applications around January 15 each year. To ensure full consideration, it is highly recommended that complete applications be in the department far in advance of January 15.

Admitted students receive a competitive stipend, tuition, and basic health insurance. Students also can be selected to participate in the Takeru Higuchi and Nigel Manning Ph.D. Interssearch Program, allowing them to conduct a portion of their research at the Victorian College of Pharmacy (http://www.vcp.monash.edu.au) at Monash University in Melbourne, Australia. In addition, students are encouraged to participate in other industrial and/or academic internship programs the department offers.

A number of fellowship awards are offered to recognize academic superiority and to assist meritorious students in the timely completion of their degree programs. The number of fellowships awarded each year depends upon available funds. For a description of funding opportunities for KU graduate students, visit the Graduate Studies website (https://graduate.ku.edu/funding). Students with particularly outstanding undergraduate records may be eligible for special awards. The Department of Pharmaceutical Chemistry is a Madison and Lila Self Graduate Fellowship Program (http://selfgraduate.ku.edu) partner at KU. The program provides a generous stipend and tuition to outstanding students for 4 years of graduate study. At the department level, the Higuchi, Lindenbaum, Rytting, Stella, and Waugh Fellowships are awarded each year to incoming graduate students with high promise.

Any materials sent directly to the department should be directed to:

The University of Kansas
Department of Pharmaceutical Chemistry
Attn: Michelle Huslig
Simons Labs
2095 Constant Ave., Room 182
Lawrence, KS 66047
Telephone: 785-864-4822, fax: 785-864-5736, mrhuslig@ku.edu

M.S. Degree Requirements

Except under unusual circumstances, the Department of Pharmaceutical Chemistry does not recruit students seeking the M.S. degree; however after admission to the Ph.D. program, the student may select to terminate with the M.S. degree. For this option, the student must have satisfactorily completed most of the core courses and sufficient research to support an M.S. thesis and oral defense. Alternatively, provision may be made
for the preparation of an extensive research report based on laboratory investigations, which is presented in an oral examination.

**Distance Master’s Degree Program**

The department also offers a distance master’s program. See the website (http://pharmchem.ku.edu/admissions-requirements-ms) for details. To be eligible for the M.S. distance program, the student must be employed in the private or government sectors, meeting the same requirements as on-site students, have access to laboratory facilities and the availability of an appropriately trained scientific advisor at the remote site. This program features the same high-quality lectures and courses offered in the on-campus M.S./Ph.D. program but allow students to complete the degree while working at a remote location. Students typically take 1 course a semester. All courses offered by the department can be taken this way. For questions, contact the director of the distance master’s program, John Stobaugh, 785-864-3996, stobaugh@ku.edu.

**Doctor of Philosophy in Pharmaceutical Chemistry**

**Pharmaceutical Chemistry Graduate Programs**

Pharmaceutical Chemistry is a broad discipline that integrates diverse areas of science ranging from biological to chemical sciences. Lawrence, KS 66047
Telephone: 785-864-4822, fax: 785-864-5736, mhuslig@ku.edu

**Ph.D. Degree Requirements**

**Entering Background**

Students entering the program are expected to be competent in basic principles of physical/organic chemistry and mathematics. These requirements are typically satisfied by most degrees in the basic or pharmaceutical sciences. One year of organic chemistry for majors, a physical chemistry course that includes classical thermodynamics, and two semesters of calculus equivalent to KU MATH 121/122.

**Core Courses and Foundation Exam**

All students participating in the Pharmaceutical Chemistry Ph.D. program are required to take eight (8) core courses, which are designed to ensure
that graduates maintain the department’s long-standing reputation for strength in the physical-chemical sciences as they relate to modern research in Pharmaceutical Chemistry (Pharmaceutics). After satisfactory completion of the eight (8) core courses the student is eligible to take the Foundation Exam.

Research Skills (RS2) and Elective Requirements

Graduate students must take one elective course in addition to core courses. This may be from the courses offered by the Department of Pharmaceutical Chemistry or from other science and engineering departments on campus with prior approval from the graduate director. This requirement must be completed prior to undertaking the comprehensive examination at the end of year 2.

Comprehensive Examination for Ph.D. Students

The student will be eligible for the comprehensive examination subsequent a satisfactory performance on the Foundation Exam and the completion of RS2 requirements. The exam will be based on a series of oral questions based upon an oral presentation of a research proposal focused on their research. For addition details refer to the website (http://pharmchem.ku.edu/academics-overview) then consult the link Department Graduate Student Handbook. Upon passing the comprehensive examination, students continuing on to the Ph.D. degree will receive a non-thesis M.S. degree.

Dissertation

Each Ph.D. candidate must submit and defend a dissertation resulting from research of sufficient originality and quality for publication in peer-reviewed scientific journals. The research is conducted under the supervision and guidance of the student’s advisor, with input from the dissertation committee as needed. The median time for students to complete the Ph.D. degree is 5.3 years.

Distance Ph.D. Degree Program

The department also offers a distance Ph.D. program. Admittance is offered to a limited number of highly qualified students who excelled while completing the Distance M.S. degree program. Interested students should inquire with their M.S. advisor, onsite advisor and the graduate director for details. This program features the same didactic coursework and research requirements as in the onsite Ph.D. program but allows students to complete the degree while working at a remote location. For questions, contact the graduate director, John Stobaugh, 785-864-3996, stobaugh@ku.edu.

Department of Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology especially in neurodegeneration, psychiatric disorders, and addiction and the effects of diabetes on the nervous system. The research program is founded on strong Ph.D. and M.S. graduate programs.

Doctoral students are prepared to teach and do research in a university, pharmaceutical, biotechnology, or government laboratory setting.

New Ph.D. students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. The department recruits 4 to 5 Ph.D. students each year and offers stipends and tuition coverage.

The major aim of the MS degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuro-pharmacology and toxicology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience.

The Distance Master of Science degree in Pharmacology and Toxicology is a program designed to train individuals in molecular, cellular and organ systems pharmacology and toxicology. The program provides advanced scientific knowledge in pharmacology and toxicology and is designed for individuals who are seeking additional academic qualifications that will facilitate their advancement at their place of employment, or will increase their competitiveness for admission to other graduate or professional degree programs.

The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

Facilities

Research facilities offer a range of modern instrumentation and many research support services. Major instruments include tissue culture rooms, ultracentrifuges, scintillation counters, high-pressure liquid chromatography systems, a patch-clamp electrophysiology system with Nikon fluorescent microscope, microprocessor-controlled spectrophotometers and fluorometers including a dual excitation wavelength instrument for intracellular measurements and a time-resolved luminescence and fluorescence microplate reader with dual dispensing capabilities, a Seahorse Extracellular Flux Analyzer for measuring cell metabolism and major energy-producing pathways of the cell, a dark room with a film processor, and real-time PCR equipment.

University research support facilities also contribute to the high quality of research and training for graduate students. These facilities are fully staffed by professionals and include the Electron Microscopy Lab with transmission and scanning scopes; the Biochemical Research Services Lab for Illumina RNAseq, protein and DNA sequencing, amino acid analysis, and oligonucleotide and peptide syntheses; a High Throughput Laboratory for screening compounds as potential tools and drug development, and the Molecular Graphics and Modeling Lab with VAX computers, extensive databases for protein structures, and multiple molecular modeling programs an NMR facility; an X-ray Crystallography Laboratory; a Mass Spectrometry Laboratory; and an Instrumentation Design Laboratory. All labs have current computer technology, including hardware and extensive software for imaging, data analysis, data reduction, protein and gene analysis, and statistical tests.

Courses

P&TX 630. Pharmacology I. 4 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Topics in PTX 630 include, general principles of pharmacokinetics and pharmacodynamics, molecular biology, pharmacogenomics, and pharmacology of the nervous system. Prerequisite: Students must have first year professional standing in the School of Pharmacy. Students must have successfully completed PTX 630. LEC.

P&TX 631. Pharmacology II. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must have second year professional standing in the School of Pharmacy. Students must have successfully completed PTX 630. LEC.

P&TX 632. Pharmacology III. 3 Hours.
The pharmacology series covers the mechanisms by which drugs interact with living organisms. An integrative emphasis will be placed on understanding the molecular basis of drug action with respect to modifying the pathophysiology of specific disease states. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this course. Students must have successfully completed PTX 630 and PTX 631. LEC.

P&TX 633. Pharmacology IV. 3 Hours.
The pharmacology series covers the basic principles of the immunology, inflammation, and targeted drugs used to regulate the immune response. In addition, basic concepts of infectious diseases and their therapeutics are discussed. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PTX 630, PTX 631 and PTX 632. LEC.

P&TX 640. Toxicology. 2 Hours.
General principles of toxicology, treatment, and management of accidental poisoning, and current topics of interest. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PTX 630, PTX 631, PTX 632 and PTX 633. LEC.

P&TX 642. Obesity, Diabetes, and Metabolic Syndrome: Current Concepts. 1 Hour.
The objective of this course is to provide students with an opportunity to read, examine, and report on a broad array of topics relevant to diabetes and obesity. Students will be given broad latitude to propose topics of interest to them within the area of diabetes and obesity. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them in the field of diabetes and obesity, prepare a 30 min presentation and deliver it to the class for discussion. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PTX 630 to enroll in this course. LEC.

P&TX 643. Current Concepts of Neurodegenerative Disease. 1 Hour.
Neurodegenerative diseases, such as Alzheimer’s and Parkinson’s diseases, are associated with older age and/or enhanced oxidative stress. The possible causes for the development and progression of these diseases with relation to current research in the field will be discussed. Additionally, a summary of available and suggested future treatments will be given. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PTX 630 to enroll in this course. LEC.

P&TX 644. Adverse Drug Events. 1 Hour.
The objective of this course is to alert students to common and preventable adverse drug events. This course will provide students with an opportunity to read, examine, and report on a broad array of topics relevant to adverse drug events. Students will be given broad latitude to propose topics of interest to them within the area of adverse drug events. In addition students can report on common and preventable food-drug, herb-drug, and disease-drug interactions. The format of the course will be group presentations. Groups of 3 students will identify a topic of interest to them among a list of provided topics, prepare a 30 minute presentation and deliver it to the class for discussion. Prerequisite: 3rd, 4th, or 5th professional year standing in the School of Pharmacy. LEC.

P&TX 645. Neurobiological Basis of Addiction: Physiological, Biochemical, Pharmacological & Treatment Concepts. 1 Hour.
Several addictions will be discussed including addictions to alcohol, cocaine, methamphetamine, gambling, and others as time permits. The physiology, biochemistry, pharmacology and available treatments for these addictions will be reviewed. The role of pharmacotherapies will be discussed, particularly as they relate to the molecular basis of addiction. Behavioral and psychological approaches also will be examined. Prerequisite: Completion of PTX 632 or special permission from faculty. LEC.

P&TX 646. Current Concepts of Psychotropic Medication. 1 Hour.
This course provides information regarding commonly used psychotropic medications, or any drug that affects brain activities associated with mental processes and behavior. This includes, but are not limited to, the categories of antipsychotics, mood stabilizers, anti-anxiety (anxiolytics), antidepressants, and stimulants. The range of topics from basic biology to drug-drug interactions will be explored in the course. Groups of three students will identify a topic of interest to them in the field of psychotropic drugs and affect, mood, or behavior, prepare a 30 min presentation, and deliver it to the class for discussion. Prerequisite: PTX 630. LEC.

P&TX 684. Undergraduate Laboratory: Research in Pharmacology and Toxicology. 1-5 Hours.
Original research on a laboratory problem of limited scope. This course cannot count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: Consent of instructor. IND.

P&TX 698. Library Problems in Pharmacology and Toxicology. 1-5 Hours.
Original library review of a limited special topic in pharmacology and toxicology. The student will write a review in his or her report. This course may count toward pharmacology and toxicology requirements in the School of Pharmacy. Prerequisite: PTX 635 and consent of instructor. IND.

P&TX 700. Professional Issues in the Biomedical Sciences. 2 Hours.
A course designed to assist doctoral students in the biomedical sciences in their professional development by providing presentations, discussions, and practical experiences related to career planning. Topics include diverse career opportunities and expectations of each, preparation of vitae/resumes and other elements of a successful job search, writing scientific papers and dealing with editors, developing programmatic research programs, balancing professional obligations, advancing through promotions, and related topics. Prerequisite: Graduate standing in pharmacology and toxicology. LEC.
P&TX 705. Current Concepts in Biochemical Pharmacology and Toxicology. 3 Hours.
A detailed study of the foundational concepts and leading-edge discoveries in biochemistry and molecular biology that underlie the actions and effects of drugs and toxicants with particular relevance to human disease and new therapeutic strategies. The interconnectedness and integration of seemingly disparate pathways and regulatory mechanisms will be emphasized. The technologies and experimental approaches used in biochemical pharmacology and toxicology will be illustrated. Topics may vary from year to year depending on recent advances in the field. The course will involve a combination of lectures and discussions with an emphasis on critically reading and analyzing primary research papers. Students will be evaluated on the basis of oral presentations and take-home problem sets. Prerequisite: Graduate standing in Pharmacology and Toxicology. Two semesters of undergraduate biochemistry with molecular biology. LEC.

P&TX 730. Advanced Pharmacology I - CNS and ANS. 2 Hours.
A detailed study of the fundamentals of autonomic nervous system, central nervous system, and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 731. Advanced Pharmacology II - Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamentals of cardiovascular system, renal system and their pharmacology. The student will attend PTX 632 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 732. Advanced Pharmacology III - Immunology and Inflammatory Diseases. 2 Hours.
A detailed study of the fundamentals of immunology and inflammation and their pharmacology. The student will attend PTX 633 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 733. Advanced Pharmacology IV - Endocrinology. 2 Hours.
A detailed study of the fundamentals of endocrinology and associated pharmacology. The student will attend PTX 633 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 740. Advanced Biotechnology. 3 Hours.
An examination of basic principles of molecular biology, immunology, and protein chemistry as they apply to the identification, production, stability, delivery, and monitoring of new therapeutic agents provided by the expanding biotechnology industry. Students will attend lectures in PTX 633 and meet separately with faculty for additional discussions of more advanced material on these topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology. LAB.

P&TX 741. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: PTX graduate student status in good academic standing. LEC.

P&TX 742. Experimental Pharmacology. 4 Hours.
Experimental approaches to understanding mechanism of drug action. Use of drugs as tools to understand functioning of biological systems will also be stressed. Historically important experiments will be discussed along with experiments which are currently used to define drug mechanisms. Topics will include: dose-response, drug receptors, drug metabolism, chemotherapy as well as autonomic CNS, cardiovascular and renal pharmacology. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 747. Molecular Toxicology. 2 Hours.
A detailed study of the fundamentals of the experimental methods used in a modern toxicology laboratory. The student will attend PTX 640 lectures and meet separately with the faculty for additional discussions of advanced material on the topics. The students will be examined on the advanced material. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 750. Pharmacology I- Introduction to Pharmacology and Biotechnology. 3 Hours.
An introduction to the basic principles of biochemistry and molecular biology as well as pharmacokinetics and pharmacodynamics of drug action. Additional lectures will introduce students to principles of genomics, transgenic technologies and microscopy. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 751. Pharmacology II - Endocrine Pharmacology. 2 Hours.
A detailed study of the fundamental concepts of endocrinology with an emphasis on the pathophysiologic details of diabetes and the pharmacology of treatment. Brief discussions on hypothalamic/pituitary, reproductive, thyroid and adrenal endocrinology and pharmacology will be presented. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750 and PTX 785. LEC.

P&TX 752. Pharmacology III- Central Nervous System and Autonomic Nervous System. 3 Hours.
A detailed study of the fundamental concepts of the autonomic nervous system, central nervous system, and select diseases of the CNS and their pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 753. Pharmacology IV- Cardiovascular and Renal System. 2 Hours.
A detailed study of the fundamental principles of the cardiovascular system, renal system and their associated pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785, PTX 751 and PTX 752. LEC.

P&TX 754. Pharmacology V - Immunopharmacology, Infectious Diseases and Gastrointestinal Pharmacology. 2 Hours.
This course is a detailed study of the fundamental concepts of immunology, inflammatory-related diseases and immunopharmacology, infectious diseases and gastrointestinal pharmacology. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.
P&TX 755. Molecular Toxicology. 2 Hours.
A detailed study of the fundamentals of toxicology, drug transformations and the mode of toxicity of various drug classes. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750, PTX 785 and PTX 751. LEC.

P&TX 757. Biomedical Statistics. 3 Hours.
This course is primarily intended for students concerned with the analysis of experimental and observational data, with an emphasis on biomedical and pharmacological applications. The topics covered by the course include the design of experimental studies, data collection, probability theory, descriptive statistics, probability distribution, hypothesis testing, T-test, analyses of variance for factorial designs, linear and multiple regression, analysis of covariance and non-parametric methods. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 758. Pharmacogenomics. 2 Hours.
A detailed study of fundamental concepts of pharmacogenomics - how genes and genetic variation determine interindividual differences in drug response - experimental approaches, select gene-drug examples, translation from research to clinical use, and ethical, legal and social implications. Prerequisites: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology. LEC.

P&TX 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis, and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as BIOL 775, CHEM 775, MDCM 775, NURO 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent. LEC.

P&TX 785. Research Proposal. 2 Hours.
To satisfy the research requirement for the on-line distance M.S. program in Pharmacology and Toxicology, the aspiring student must define a research project and prepare a written proposal describing the nature and goals of the project. It is suggested that the student in conjunction with their distance research mentor collaborate in the selection of and the definition of the proposed research. The proposal should be 4 pages (0.5 in margins, 11-12 point Arial, Times Roman or Calibri font) that states the overall goal of the project, the hypothesis to be tested, 2-3 specific aims, a statement of significance and impact of the research and research approach. Prerequisite: Graduate standing in the Distance M.S. Program in Pharmacology and Toxicology, and completion of PTX 750. RSH.

P&TX 799. Pharmacology and Toxicology Seminar. 1-2 Hours.
A review of current literature and research in pharmacology and toxicology. Required of all graduate students in the department every fall and spring semester. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Graduate standing in PTX. LEC.

P&TX 800. Pharmacology and Toxicology Teaching Principles. 2 Hours.
This course is to be used by graduate students fulfilling the teaching requirements for the Ph.D. in pharmacology and toxicology. The student will function as a discussion leader and lecturer in a limited number of class sessions. Each student will meet with the faculty whom he or she is assisting. Prerequisite: Graduate standing in pharmacology and toxicology program. RSH.

P&TX 801. Issues in Scientific Integrity. 1-3 Hours.
Lectures and discussion on ethical issues in the conduct of a scientific career, with emphasis on practical topics of special importance in molecular-level research in the chemical, biological, and pharmaceutical sciences. Topics will include the nature of ethics, the scientist in the laboratory, the scientist as author, grantee, reviewer, employer/employee, teacher, student, and citizen. Discussions will focus on case histories. Graded on a satisfactory/unsatisfactory basis. (Same as MDCM 801, NURO 801, PHCH 801 and PHCH 802.) LEC.

P&TX 803. Pharmacology Literature Review I. 1 Hour.
This course is designed for graduate students and will fulfill the first written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a six page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 805. Pharmacology Literature Review II. 1 Hour.
This course is designed for graduate students and will fulfill the second written exam requirement for the Ph.D. in pharmacology and Toxicology. The student will research and write a twelve page literature review by choosing a topic provided by the faculty. Prerequisite: Graduate standing in Pharmacology and Toxicology Program. LEC.

P&TX 825. Research in Pharmacology and Toxicology. 1-10 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration with a faculty member. Prerequisite: Graduate standing and consent of instructor. RSH.

P&TX 826. Online Research in Pharmacology and Toxicology. 8 Hours.
Original investigations at an advanced level in the areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and consent of KU Pharmacology and Toxicology Faculty Mentor. RSH.

P&TX 885. Distance Master's Research in Pharmacology and Toxicology. 1-12 Hours.
Original investigations at an advanced level in areas of pharmacology or toxicology or related fields. This research will be performed by graduate students in collaboration at their place of off-site mentoring in collaboration with the faculty mentor. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of PTX 785. RSH.

P&TX 889. Online Master's Thesis. 2 Hours.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology and completion of 12 credits in PTX 885. RSH.

P&TX 890. Distance M.S. Thesis. 2 Hours.
Independent investigation of a research problem of limited scope, leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the On-line M.S. Program in Pharmacology and Toxicology. THE.

P&TX 898. Online Master's Thesis. 1-2 Hours.
Independent investigation of a research problem of limited scope leading to the preparation of a written Master's Degree thesis. Prerequisite: Graduate standing in the Online M.S. Program in Pharmacology and Toxicology. THE.

Hours and credit to be arranged. Independent investigation of a research problem of limited scope. Prerequisite: Graduate standing in PTX and consent of instructor. THE.
P&TX 990. Postdoctoral Research. 1-11 Hours. 
Advanced level research in collaboration with a faculty member in the department. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Doctoral degree or equivalent in an appropriate related area, and consent of instructor. RSH.

P&TX 999. Doctoral Dissertation. 1-11 Hours. 
Hours and credit to be arranged. Original investigation in pharmacology and toxicology. Prerequisite: Consent of instructor. THE.

Master of Science in Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, mood disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on a strong graduate program. The major aim of this Master of Science (MS) degree program is to provide qualified graduates to institutions in academia, industry, and government. The Master of Science in Pharmacology and Toxicology program emphasizes student’s research skills in molecular and neuropharmacology. In addition to the didactic component of our training, we view hands-on training in laboratory research critical to the master’s thesis experience. The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

Distance Master’s Degree Program

The department also offers a distance master’s program. Please see the website (http://pharmtox.ku.edu/online-master-science-degree-pharmacology-and-toxicology/) for details. The program features the same high-quality lectures and courses offered in the Ph.D. program. The program allows the industrial scientist or student to remain at their respective institutions and earn the M.S. degree under a collaborative academic environment. Students will typically take 1 course a semester and the program is designed for individuals who are seeking additional academic qualifications that will facilitate their professional advancement or increase their competitiveness for admission to other advanced degree programs. For questions, contact our Administrative Assistant Ms. Sarah Hoadley, 785-864-4001, pharmtox@ku.edu or the Director of the Distance Master’s Program, Rick T. Dobrowsky, Ph.D., 785-864-3531, dobrowsky@ku.edu

Graduate Admission

Admission is based on the student’s undergraduate record in a relevant field, Graduate Record Examination scores, and 3 letters of recommendation. A minimum grade-point average of 3.0 on a 4.0 scale is required. Applications from non-English-speaking countries must include a copy of the Test of English as a Foreign Language score. Acceptance depends on the availability of space and faculty commitment.

Students are expected to have bachelor’s degrees in pharmacy, chemistry, biology, pharmacology, toxicology, or other physical science related disciplines. Submit your graduate application online (http://www.graduate.ku.edu/). Send transcripts of all completed college and university course work and all other requested application materials to the department:

The University of Kansas

Department of Pharmacology and Toxicology
Malott Hall
1251 Wescoe Hall Drive, Room 5064
Lawrence, KS 66045

M.S. Degree Requirements

Course Work

Students must earn 18 credit hours in the following courses or their equivalents:

<table>

Research Skills Requirement

Each MS degree student is required to take credit hours of Research in Pharmacology and Toxicology (P&TX 825) and Masters Thesis (P&TX 899). Enrollment in either course must continue until a total of 12 credit hours are earned, such that when taken together with didactic coursework, research, and thesis, totals 30 hours of graduate coursework.

Students need to maintain continuous enrollment in the program until completion. It is expected that students usually will complete the requirements and graduate in two years.

Each MS degree student is required to submit and defend a thesis resulting from research of sufficient originality and quality for publication in peer reviewed scientific journals. The research is conducted under the supervision and guidance from the student’s advisor, with input from the thesis committee as needed.

Top graduates, if interested, may transfer into a Ph.D. program in Pharmacology and Toxicology offered in the department.

Doctor of Philosophy in Pharmacology and Toxicology

Pharmacology and Toxicology Graduate Programs

The Department of Pharmacology and Toxicology has research strengths in neuropharmacology — especially in neurodegeneration, mood disorders, and addiction — and the effects of diabetes on the nervous system. The research program is founded on a strong Ph.D. graduate program. Doctoral students are prepared to teach and do research in
a university, pharmaceutical, biotechnology, or government laboratory setting.

New Ph.D. students can look forward to personal development in an atmosphere that fosters strong collaborative activities as well as independent scholarship. The department recruits about 4 Ph.D. students each year and offers stipends and tuition coverage. The department’s research programs and faculty place it at the leading edge of research in the pharmacological and toxicological neurosciences.

**Graduate Admission**

Admission is based on the student’s undergraduate record in a relevant field, Graduate Record Examination scores, and 3 letters of recommendation. A minimum grade-point average of 3.0 on a 4.0 scale is required. Applications from non-English-speaking countries must include a copy of the Test of English as a Foreign Language score. Acceptance depends on the availability of space and faculty commitment.

Students are expected to have bachelor’s degrees in pharmacy, chemistry, biology, pharmacology, toxicology, or other physical science related disciplines. Submit your graduate application online (http://www.graduate.ku.edu/). **Ph.D. Degree Requirements**

**Course Work**

Incoming students should have completed 4 semesters of Chemistry and 4 semesters of Biology, including a course in Cell Biology and one in Biochemistry. Prerequisites can be completed during the first year. The core courses in Pharmacology and Toxicology that all students are required to take are listed below. Prerequisite for all courses is graduate standing in the Pharmacology and Toxicology Program.

Research Advisory Committee members for Ph. D degree aspirants should be identified by the end of the second year in the program. The committee is composed of at least three members, and the research director serves as chairman. The final Dissertation Defense Committee should consist of the original Advisory Committee (3 members) plus two (2) other members of the Graduate Faculty. At least one member of the final Dissertation Committee must be from outside the Department.

**Comprehensive Exam Requirements for Ph. D. Students**

The comprehensive examination is composed of 3 parts:

1. **Written Comprehensive Examination:** Each student must complete two written examinations to complete P&TX 803 and P&TX 805.

2. **Preparation of an NIH-style research proposal:** After successful completion of the second written comprehensive exam, the student should begin working on their NIH grant proposal. These serve as the basis for the Oral Comprehensive Exam.

3. **Oral Comprehensive Examination:** After approval of the research proposal by the student’s advisory committee, each student, in consultation with the advisor, takes an oral examination covering the student’s major field.

**Dissertation Research**

The student, with the advisor’s assistance, develops a dissertation project. After the oral comprehensive examination, the student presents the dissertation research project to the advisory committee and receives periodic advice from this committee throughout the project. Upon acceptance of the dissertation by the advisory committee, the candidate must pass a final oral examination, including a defense of the dissertation before the dissertation committee and any other interested members of the Graduate Faculty.

**Department of Pharmacy Practice**

**Pharmacy Practice Graduate Program**

The Department of Pharmacy practice further the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.

Courses

PHPR 506. Precision Medicine. 1 Hour.
This course will address the role of precision medicine in pharmacy practice and is designed to extend the students’ understanding of the basis for interindividual variation in drug response and the evolving role of the pharmacist. The course will include required readings, lectures, cases and in-class discussions that focus on the evidence and practicality of precision medicine in pharmacy practice. Using selected examples, students will learn about patient factors that drive variability in drug response and how these factors drive drug selection and dosing. With the current focus on the use of genomic data to drive individualized therapy, students will learn about current pharmacogenomic-based practice guidelines and clinical practice references. Students will prepare a 2-page writing assignment and an in-class presentation on the impact of precision medicine on pharmacy practice. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

PHPR 507. Advanced Community Practice. 1 Hour.
The objective of this course is to prepare pharmacy students to practice as advanced pharmacists in a community setting. The course will cover patient care as well as the business and insurance aspects surrounding community pharmacy practice. We will cover a variety of topics including reimbursement, legal issues, Medication Therapy Management (MTM), communication, ethics, and the future of Community Pharmacy practice. Prerequisite: 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 508. Hematology/Oncology Pharmacy. 1 Hour.
This course explores many cancer-related topics, including non-pharmacologic treatment modalities, complications of cancer and its treatment, supportive care issues, and precision medicine. It also reviews current cancer screening and prevention guidelines and cancer research. Various cancers are discussed, such as myeloma, pediatric cancers, and cancers of the bladder, kidneys, ovaries, and testes. Prerequisite: Students must have third year professional standing in the School of Pharmacy and have successfully completed MDCM 626. LEC.

PHPR 509. Medicare Part D. 1 Hour.
This elective course will focus on the understanding and active enrollment of patients into Medicare prescription drug benefit (Part D). Students will mainly focus on the understanding of Medicare eligibility, benefits, formulary requirements, and the administration of benefits. Students will also participate in community outreach which may focus on underserved patients. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Must be a 2nd or 3rd professional year standing in the School of Pharmacy. LEC.

PHPR 510. Medical Terminology Elective. 1 Hour.
This course provides the fundamentals for developing a medical vocabulary. The student will develop the ability to understand, define and utilize medical terminology and abbreviations used in patient care. LEC.

PHPR 511. Service-Learning Elective. 1 Hour.
Students will work at a health-related community center and participate in structured learning exercises. The objectives are to: 1) enable students to learn appropriate strategies to communicate and provide services to people with varying languages, cultures, social, and economic backgrounds, disabilities, illnesses, or impairments, 2) increase social interaction and citizenship, 3) heighten social awareness and understanding of ethical issues, and 4) acknowledge social responsibility and realize personal values. FLD.

PHPR 512. Nuclear Pharmacy. 1 Hour.
This course is designed for students interested in learning about nuclear pharmacy practice as a specialty practice in pharmacy. Students will learn about the application of radiopharmaceuticals used in the diagnosis of various diseases or identifying patient therapeutic issues. The course will cover principles of radiation, radiation safety, preparation of and handling of radiopharmaceuticals, their appropriate use, and the training requirements for a nuclear pharmacist. At the conclusion of the course the student will have an insight into this specialty practice in nuclear pharmacy as a potential career. Prerequisite: Students must be admitted to the School of Pharmacy. LEC.

PHPR 513. Chemical Dependency Elective. 1 Hour.
This elective course will enhance the pharmacy student's knowledge and understanding of the current theories behind the addiction process, frequently abused drugs and/or chemicals and the treatment and recovery process. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHPR 514. Communication and Counseling. 1 Hour.
An elective course designed to help students improve professional communication skills. Prerequisite: PHAR 500. LEC.

PHPR 515. The Aging Patient. 1 Hour.
This elective course is designed for the learner to explore many of the clinical considerations employed when caring for the aging patient within our health care system. The course will be devoted to exploring generational perceptions, learning how the aging process can impact
patient care, and identifying the role of the pharmacist in enhancing this care. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. LEC.

PHPR 516. Pharmacy in Public Health. 1 Hour.
Public health is more than providing treatment for an illness; it is a concern for the health of an entire population. The ideal is to ensure the health of all. This course will focus on providing students with a solid foundational understanding of what public health is and how pharmacists play a role as a public health provider. The course will cover the concepts and tools used in public health including issues such as: determining health, cultural competence, health promotion, disease prevention, epidemiology and disease, describing populations and community health. Lastly, the course will provide students with specific pharmacist models of public health. Successful models include tobacco cessation programs, community vaccination programs, obesity prevention, tuberculosis monitoring, emergency preparedness and domestic violence. Prerequisite: Must be accepted to the Pharmacy Program. LEC.

PHPR 517. Medication Safety and Error Prevention. 1 Hour.
This course introduces the student to medication safety and the technology as well as the tools used in error prevention. The student will also learn about adverse drug events including both medication errors and adverse drug reactions in hospital and retail pharmacy settings. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. LEC.

PHPR 518. Cultural Competency in Pharmacy Practice. 1 Hour.
The United States becomes more culturally diverse every year. This course is designed to help student pharmacists excel in today's multicultural environment by improving their cultural competency skills. Students will explore their own culture and those belonging to other diverse cultures. Students are expected to learn of the beliefs, needs and tendencies of those with cultures much different than themselves. Prerequisite: Must be admitted to the School of Pharmacy. LEC.

PHPR 519. Business Planning for Pharmacy. 1 Hour.
This course is designed for students interested in developing a business plan. Most pharmacists will have an opportunity to develop a new service, product line or even start a new business venture in their careers. Students need to know how to create a formal business plan and how to present the plan to decision makers. The course will cover the basic components and rationale of creating a formal a business plan. When finished students will be expected to have created a written business plan and will present their creation to the class. In this manner, students will gain experience in developing an idea into a plan. Prerequisite: Students must be admitted to the school of Pharmacy. LEC.

PHPR 520. Specialty Pharmacy. 1 Hour.
This course will review a variety of topics including: multiple sclerosis, hepatitis C and autoimmune conditions (psoriasis, ulcerative colitis, etc) and the specialty medications used to treat these conditions. Specialty pharmacy accreditation standards as well as topic discussions reviewing many issues facing the specialty pharmacy industry will be discussed. Guest speakers from different specialty pharmacies in the greater Kansas City area will also present information on their career experiences. Prerequisite: Students must have second or third year professional standing in the School of Pharmacy. LEC.

PHPR 521. Practical Pediatrics. 1 Hour.
This course will expose students to conditions frequently encountered in pediatric care. Students will further develop knowledge and skills necessary to provide appropriate pediatric care in institutional, ambulatory, and community practice settings. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

PHPR 522. Pharmacy-Based Travel Health Services. 1 Hour.
This course reviews pertinent problems traveling entails and services pharmacists can provide for traveling patients. The course will involve interactive lectures followed by case-based learning to promote student application of knowledge to relevant clinical situations. Following the completion of this course, students should be able to recognize the need to establish travel health services, the role of pharmacists in these services, identify the commonly encountered disease states and problems for travelers, and what components comprise travel health by utilizing comprehensive knowledge, skills and resources necessary to establish and deliver successful travel health service. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 2nd or 3rd professional year. Students must have successfully completed the APhA Pharmacy-Based Immunization Delivery program. LEC.

PHPR 523. Critical Care Problem-Based Learning. 1 Hour.
This is an elective course focusing on advanced clinical decision making within the field of critical care. Using clinical critical care cases, student will work as a team to assess and make therapeutic recommendations through problem-based learning exercises. These activities aim to prepare students for advanced pharmacy practice and residency experiences in acute care settings by providing instruction in application of primary literature to patient cases, following patient progress through emergency department and intensive care settings, and oral presentation of evidence-based patients cases. Additionally, students will participate in an acute care interprofessional simulation. Prerequisite: Students must be admitted to the School of Pharmacy and must be in their 3rd professional year. LEC.

PHPR 524. Medication-Related Issues and the Social Determinants of Health for Underserved Patients. 1 Hour.
This course will review a variety of topics related to the social determinants of health with a focus on barriers and solutions around pharmacy and medication-related issues. A focus of the course will be on the under-served patient population of Wyandotte County in Kansas City, KS which is the county with the worst health outcomes and statistics in the state. The main teaching method used in the course will be experiential learning. Students will complete two half-days (approximately 4 hours/session) at Riverview Health Services in Kansas City, KS. During the two half-days students will actively observe medication intake/reconciliation appointments to enroll patients in medication assistance programs to obtain their medications for free. Students will be incorporated and play an active role in the workflow during the second session. Finally, students will present a 15-minute presentation to Riverview staff about a medication related topic for their professional development. Additionally, the entire class will meet during 4 sessions in Lawrence where students enrolled in the elective will meet to review pertinent topics (a few guest speakers), work on and peer-review upcoming presentations and debrief their experiences. This is a unique and immersive learning opportunity to expose you to issues of caring for under-served patient populations and sharpen your verbal presentation skills for a professional audience. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Limited to P2 students in the PharmD program. LEC.

PHPR 525. Ambulatory Care. 1 Hour.
This elective course will explore many of the clinical and practical considerations employed when caring for patients in the ambulatory care setting. The course will expose the learner to a variety of topics that impact the pharmacist’s role in this practice setting, including collaborative practice agreements, patient case evaluations, communication skill
development, and practice evaluation. The course will be facilitated by the ambulatory care practice group at The University of Kansas Health System and will prepare the student for advanced pharmacy practice and residency experiences in the ambulatory care setting. Prerequisite: P3 standing in the School of Pharmacy or by special permission from instructor. LEC.

PHPR 526. Introduction to Pharmacy Residencies. 1 Hour.
This course is team-taught by KU clinical faculty with the support of pharmacy residency program directors, residency preceptors, and pharmacy residents. This course is designed to increase knowledge, interest, and confidence amongst students about residency training; identify and develop the skills necessary to apply to residency programs; and increase the number of students obtaining residency positions upon graduation. Prerequisite: Third year professional standing in the School of Pharmacy and instructor consent. LEC.

PHPR 541. Foundations of Interprofessional Collaboration I. 0 Hours.
This TeamSTEPPS Level 1 experience will introduce interprofessional students to the basic concepts of interprofessional collaboration including values and ethics, roles and responsibilities of healthcare team members, and interprofessional communication tools using the evidence-based national curriculum of TeamSTEPPS. Upon completion of this training experience students will be able to 1) demonstrate a work ethic with individuals of other professions to maintain a climate of mutual respect and shared values; 2) define the role of health professions (including your own) within the healthcare system; 3) identity opportunities to seek expertise of health professionals to improve communication and healthcare; and 4) acquire basic TeamSTEPPS communication tools to effectively use with healthcare teams. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have P1 standing in the School of Pharmacy. LEC.

PHPR 542. Foundations of Interprofessional Collaboration II. 0 Hours.
This TeamSTEPPS Level 2 experience will provide interprofessional students opportunities to apply key knowledge and skills gained in FIPC I, through role-play and case-based learning. Students will apply their knowledge of roles and responsibilities of healthcare team members and interprofessional communication tools and continue learning with, from, and about students from other professions. Upon completion of this training experience students will be able to: 1) engage diverse healthcare professionals who complement one's own professional expertise, as well as associated resources, to develop strategies to meet specific patient care needs; 2) choose effective communication tools and techniques, including information systems and communication technologies, to facilitate discussions and interactions that enhance team function; and 3) engage other health professionals appropriate to the specific care situation—in shared patient-centered problem-solving. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have P2 standing in the School of Pharmacy and successfully completed PHPR 661. LEC.

PHPR 543. Foundations of Interprofessional Collaboration III. 0 Hours.
This TeamSTEPPS Level 3 experience will provide interprofessional students opportunities to demonstrate key knowledge and skills gained in FIPC I and II, through simulation. Students will demonstrate their interprofessional communication skills, including specific opportunities to utilize TeamSTEPPS tools. Students will also demonstrate their teamwork abilities by working with interprofessional students during the simulation. Upon completion of this training experience students will be able to: 1) demonstrate communicating effectively with other health professionals about a patient case; 2) exhibit teamwork skills with an interprofessional healthcare team; and 3) utilize key TeamSTEPPS tools with an interprofessional healthcare team. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHPR 663. LEC.

PHPR 599. Clinical Application of Basic Science. 1 Hour.
This course is an inter-departmental, team-based, technology-centric elective course. Concomitantly, instructors from the basic and clinical science departments within the school of pharmacy will promote deeper student understanding of the path a drug takes from discovery, development and ultimately clinical use. Instructors will collaborate in course content development to integrate basic and clinical science concepts. The course will utilize a blended learning method, incorporating out of class podcasts, online group collaborative projects, and readiness quizzes and exams. Prerequisite: 4th or 5th professional year standing (P2/P3) in the school of pharmacy and concomitant enrollment in either PTX 599, MDCM 599, or PHCH 599 is required. LEC.

PHPR 601. Advanced Pharmacy Practice Experience 1. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 602. Advanced Pharmacy Practice Experience 2. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. FLD.

PHPR 603. Advanced Pharmacy Practice Experience 3. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage
PHPR 604. Advanced Pharmacy Practice Experience 4. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

PHPR 605. Advanced Pharmacy Practice Experience 5. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

PHPR 606. Advanced Pharmacy Practice Experience 6. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

PHPR 607. Advanced Pharmacy Practice Experience 7. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

PHPR 608. Advanced Pharmacy Practice Experience 8. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

PHPR 609. Advanced Pharmacy Practice Experience 9. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in pharmacy practice experience rotations. These consist of nine, one-month rotations, in various health care settings. Such practice settings may include a variety of acute care, ambulatory care, managed care, hospital and community practice sites. Each rotation provides an academically structured environment that enables the student to gain practical experience under the guidance of a practicing health care professional. The purpose of providing pharmacy students with a pharmacist role model is to foster the development of both professional confidence as well as competence. These practice-based experience settings encourage the student to apply their didactic education to clinical problem solving. Both clinical and distributive pharmacy services will be integrated in these experiences for optimal learning. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

PHPR 610. Advanced Pharmacy Practice Experience 10. 4 Hours.
The final year of the Doctor of Pharmacy program is spent participating in nine pharmacy practice experience rotations (PHPR 601-609). PHPR 610 is reserved for students requiring a remedial experiential rotation. This course is graded using an “Excellent”, “Satisfactory”, or “Unsatisfactory” grading basis. Prerequisite: Students must have fourth year professional standing in the School of Pharmacy. FLD.

PHPR 613. Pharmacoeconomics and Health Outcomes. 2 Hours.
A course to foster an understanding of economic, financial and outcome principles that drive the demand and supply of medical care in the US. Economic logic behind decisions made by patients, physicians, hospitals, managed care organizations, and governments will be covered. Students completing this course should be able to identify the drivers of the health economy, identify different types of pharmacoeconomic evaluations,
critically analyze pharmacoeconomic and outcome literature, and apply economic principles to pharmaceutical care. Prerequisite: Students must have third year professional standing in the School of Pharmacy. LEC.

PHPR 614. Pharmacy Management. 3 Hours.
A course designed to provide knowledge and skills to effect efficient and effective pharmacy management. This will include foundations in financial management, inventory control, purchasing, cost-effective drug utilization, quality management, pharmacoconomics, and human resource management. LEC.

PHPR 615. Nuclear Pharmacy Practice. 2 Hours.
This introductory course in nuclear pharmacy practice provides a basic understanding of radiation, radiation dosimetry, radiopharmaceuticals, and clinical application of radiopharmaceuticals in diagnosis and treatment. The course includes both didactic material as well as laboratory experience. LEC.

PHPR 618. Hospital and Health-System Pharmacy. 1 Hour.
Introduction to pharmacy services within health-system pharmacies with an emphasis on medication distribution systems, parenteral and sterile products, clinical pharmacy practice and other services. Prerequisite: Must be accepted to the Pharmacy program. LEC.

PHPR 619. Health Care Systems and Informatics. 3 Hours.
This course is an introduction to the organization, financing, and delivery of health care services with a focus on the U.S. health care system. Course content addresses the following questions: how do we evaluate the health care sector, where is health care provided, how is health care financed, what are the characteristics of health care providers (individuals and institutions), what influences the performance of the health care sector, and what lies in the future for health care delivery. The purpose of the course is to prepare pharmacy students for non-clinical aspects of their practice sites. Enrollment limited to pharmacy majors. Prerequisite: Students must have first year professional standing in the School of Pharmacy. LEC.

PHPR 620. Ethical, Legal, and Cultural Issues in Patient Care. 2 Hours.
This course provides an introduction to the fundamentals of law and ethics as they apply to the practice of pharmacy. Course sessions will focus on ethical expectations of the profession, principles and issues in medical and pharmacy ethics, and laws that govern medication dispensing. LEC.

PHPR 621. Pharmacy Law. 2 Hours.
A course developed to increase students' knowledge and understanding of laws that regulate the pharmacy profession. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must be in their third professional year standing in the School of Pharmacy and eligible for APPE rotations at the conclusion of the semester. LEC.

PHPR 624. Pharmacoepidemiology and Public Health. 2 Hours.
Pharmacy profession has a unique and critical opportunity and responsibility to contribute to the improvement of population health. Public health is a broader discipline that encompasses population health with a variety of other areas, including but not limited to epidemiology, cultural competence, health promotion, disease prevention, and drug safety. Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects. Considerations are centered on providing beneficial or adverse effects of medication use in large populations and making relevant inferences from essential analytical research designs used in public health. Using population-based-care approach, students will adopt and fulfill public health roles and activities. This course provides a broad introduction to the principles of pharmacoepidemiology and public health with a focus on applications in the field of pharmacy. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Students must have P3 standing in the School of Pharmacy. LEC.

PHPR 629. Research Design and Biostatistics. 2 Hours.
This course reviews study designs and statistical methods commonly used in primary medical literature. In collaboration with other courses in the curriculum, this course prepares students to interpret and apply primary literature during patient care, collect and analyze data, and maintain clinical competency throughout their professional career in pharmacy. Following completion of this course, students should be able to identify or select appropriate research methods and study designs; collect, summarize and interpret research data; understand basic statistical concepts; identify or select appropriate statistical tests for hypothesis testing; conduct and interpret the results of statistical tests; and evaluate the validity and reliability of published research studies. LEC.

PHPR 630. Drug Information and Literature Evaluation. 1 Hour.
This course will review the fundamental tools used to identify drug information in primary, secondary and tertiary resources. In addition, students will learn to assess published literature, utilize electronic resources, and learn to formulate a response to drug information questions. Following completion of this course, students will be able to understand the strengths and weaknesses of the drug information resources and to apply drug information skills to clinical practice relevant to patient care. Prerequisite: Successful completion of PHPR 629 and Fifth year standing (P3 student). LEC.

PHPR 635. Problems in Pharmacy Practice. 1-5 Hours.
A course designed for the study of special topics in pharmacy practice. A research paper will be required. Prerequisite: Consent of instructor. IND.

PHPR 661. Pharmacotherapy I. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Drug interactions and patient counseling techniques will be covered. Over-the-counter medications and herbal will also be a significant portion of the course. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have first year professional standing in the School of Pharmacy and successfully completed PHAR 510, PHAR 512 and concurrent enrollment or successfully completed PHAR 515 and PHAR 517. LEC.

PHPR 662. Pharmacotherapy II. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 661 and PHAR 515 and PHAR 517 to enroll in this course. LEC.

PHPR 663. Pharmacotherapy III. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy to enroll in this course. Student must have second year professional standing in the School of Pharmacy and successfully completed PHPR 662 and PHAR 520. LEC.

PHPR 664. Pharmacotherapy IV. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must be admitted to the school of Pharmacy and have successfully completed PHPR 663 and PHAR 525 to enroll in this course. LEC.
PHPR 665. Pharmacotherapy V. 4 Hours.
A course dealing with the clinical applications of drug knowledge to patient care. Disease and drug knowledge will be applied to the design and monitoring of therapeutic treatment plans for patients. Prerequisite: Students must have third year professional standing in the School of Pharmacy. Students must have successfully completed PHAR 530 and PHPR 664. LEC.

PHPR 670. Clinical Assessment. 2 Hours.
This laboratory course will allow students to develop clinical assessment skills necessary in the provision of pharmaceutical care to patients with a variety of disease states. Students will combine physical assessment skills, patient counseling skills, and pharmacotherapy knowledge and apply this information to patient care related activities in various clinical settings. Students will apply their skills using various practice models that include medication therapy management, collaborative drug therapy management, and interprofessional healthcare teams. The lab component will require students to meet between 1:00 to 5:00 PM on either Monday, Tuesday, or Wednesdays. In addition, there is a required Thursday discussion section. A detailed schedule of lab meeting dates and times will be provided in the syllabus. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. Students must pass PHPR 664 to be eligible to complete PHPR 670. LAB.

PHPR 690. Research in Pharmacy Practice. 1-5 Hours.
Students will conduct original research in a laboratory, educational, or clinical research setting under the supervision of department faculty. Prerequisite: Students must be admitted to the School of Pharmacy to enroll in this class. RSH.

PHPR 845. Professional Communications and Leadership. 2 Hours.
A course designed to give the graduate student a practical experience in areas of professional communications such as administrative proposals, grants, letters, memos, poster presentations, and written papers. The course focuses on the different kinds of communications required to relate to other health care professionals. Prerequisite: Consent of instructor. LEC.

PHPR 850. Introduction to Pharmacoepidemiology. 3 Hours.
Pharmacoepidemiology is the application of the principles of epidemiology to the study of medications and their effects on health. Evaluating a drug's effects commences when a chemical entity becomes a drug candidate, intensifies through clinical trials, and continues after products reach the market. These studies are critical for supporting the proper use of medications in terms of efficacy, effectiveness, and cost-effectiveness. This course provides a broad introduction to the principles of pharmacoepidemiology with a focus on applications in the medical literature. LEC.

PHPR 855. Economic Evaluation of Health Care Programs and Services. 3 Hours.
The course will provide students with an overview and appraisal of the "state-of-the-art" in the evaluation of health care programs and services (with a special emphasis on pharmaceutical programs, services, and products). The purpose of the course is to provide the student with the tools to conduct economic rather than general evaluation of health care programs and services. There will be some discussion of theoretical concepts, but the major emphasis will be on practical methodological issues in economic evaluation of pharmaceutical programs. The course integrates the perspectives of pharmaceutical and health care technology assessment, managed care, outcomes research, and public health. The main topics covered in the course include: cost, cost-minimization, cost-effectiveness, cost-utility, and cost-benefit analyses. LEC.

PHPR 860. Seminar in Pharmacy Practice. 1 Hour.
Research reports, reviews, and/or presentations on the current status of various aspects of pharmacy practice. Prerequisite: Consent of instructor. LEC.

PHPR 865. Advanced Institutional Pharmacy Services I. 1.5 Hour.
Advanced Institutional Pharmacy Services (I) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: business management, pharmacy financial management and operations management. Prerequisite: Consent of instructor. LEC.

PHPR 866. Advanced Institutional Pharmacy Services II. 1.5 Hour.
Advanced Institutional Pharmacy Services (II) includes activities involving administrative and behavioral science techniques to manage 'the business of pharmacy practice'. Topics and information will be borrowed from the disciplines of business management, accounting, economics, finance, marketing, operations research and applied to the practice of pharmacy. Upon completion of the course, students should be able to explain, understand and apply pharmacy practice management techniques in the following general areas: human resource management, clinical services management, specialty pharmacy services and technology management. Prerequisite: Consent of instructor. LEC.

PHPR 875. Health Care Delivery Systems. 3 Hours.
A continuation of PHPR 865 dealing with the current status of health care delivery systems and the impact of changes in this area on pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 885. Human Resource Management in Institutional Pharmacy Practice. 3 Hours.
A course dealing with recruitment, training, motivation, monitoring of performance, and disciplining of personnel. Seminars, case studies, and role playing are used to apply the information to specific human resource management situations in institutional pharmacy practice. Prerequisite: PHPR 865 and consent of instructor. LEC.

PHPR 889. Research in Pharmacy Practice. 1-6 Hours.
Original investigation in the area of pharmacy practice. Prerequisite: Consent of instructor. RSH.

Master of Science in Pharmacy Practice
Pharmacy Practice Graduate Program

The Department of Pharmacy practice furthers the mission of the School of Pharmacy by striving for excellence in teaching, research, scholarly activity, service, and patient care.

The faculty provide professional educational opportunities for undergraduate, graduate, and postgraduate students and practitioners to enable them to practice pharmaceutical care, adapt to changing professional roles, use new technologies, assume leadership roles in a dynamic health-care environment, and contribute new knowledge to the profession.
Graduate Admission

In addition to meeting the general requirements for admission to graduate studies (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=), applicants are considered for admission if they are graduates of a school of pharmacy accredited by the Accreditation Council for Pharmaceutical Education (ACPE) (https://www.acpe-accredit.org/) and are eligible for licensure as registered pharmacists by the Kansas State Board of Pharmacy (http://pharmacy.ks.gov/). A Bachelor of Science degree or a Doctor of Pharmacy (Pharm.D.) degree with a major in pharmacy is required.

Submit your graduate application online (http://www.graduate.ku.edu/). Send transcripts of all completed college and university course work and all other requested application materials to the department:

The University of Kansas
Department of Pharmacy Practice
2010 Becker Drive, Room 2001
Lawrence, KS 66047

M.S. Degree Requirements

A minimum of 30 credit hours, with a majority of hours in pharmacy, is required for the degree. These courses may be selected from related fields after approval by the department. Examples are health-system pharmacy, clinical pharmacy, nuclear pharmacy, computer science, business administration, health policy and management, and related fields. An approved project, representing 6 to 9 credit hours of original research, is required. It may be in pharmaceutical sciences, clinical pharmacy, pharmacy practice, pharmacotherapy, or health-system pharmacy.

An accredited PGY1/PGY2 residency in Health-Systems Pharmacy Administration in an approved hospital is required of each student. Requirements for the residency program include eligibility for licensure as a pharmacist in Kansas. The student must complete the residency concurrently with the academic portion of the program. Upon satisfactory completion of the residency, the student receives a certificate of residency from the cooperating hospital. The length of the program is 2 years. For students who have previously completed a residency accredited by the American Society of Health-System Pharmacists (http://www.ashp.org/), this part of the program may be waived on approval of the department.
Professional Studies

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your academic success coach (https://edwardscampus.ku.edu/program-advisors/) for details). Other years’ catalogs

Bachelor of Applied Science in Biotechnology (p. 2502)
Bachelor of Arts and Bachelor of General Studies in American Sign Language and Deaf Studies (p. 2504)
Bachelor of Health Sciences (p. 2506)
Bachelor of Science in Information Technology (p. 2507)
Undergraduate Certificate in Advanced American Sign Language (p. 2510)
Undergraduate Certificate in ASL/English Interpreting (p. 2510)
Undergraduate Certificate in Biotechnology (p. 2511)
Undergraduate Certificate in Deaf Studies and Social Justice (p. 2511)
Undergraduate Certificate in Nutrition (p. 2511)
Undergraduate Certificate in Public and Population Health (p. 2512)
Post-Baccalaureate Certificate in Health Sciences (p. 2512)
Graduate Certificate in Advanced American Sign Language (p. 2513)
Graduate Certificate in ASL/English Interpreting (p. 2513)

Minor in Nutrition (p. 2519)
Minor in Public and Population Health (p. 2520)

Introduction

The KUEC School of Professional Studies provide high-quality academic programs, research activities, and engaged learning initiatives that meet workforce, economic, and student needs. Our work is guided by our shared commitment to the values of collaboration, innovation, and social equity as we serve our students and the community.

The School of Professional Studies is a University of Kansas academic unit designed and charged with serving the needs of non-traditional and transfer students in the Kansas City metro area and nationally. The undergraduate programs in the School of Professional Studies are interdisciplinary degree completion programs aimed at preparing students for high demand workforce needs.

In partnership with their academic success coach, it is the students’ responsibility to become thoroughly acquainted with all requirements for the degree programs in which they plan to participate. These include all university requirements, as well as the requirements of the School of Professional Studies outlined in this section of the catalog. Students are also responsible for understanding the requirements that are unique to individual programs. By taking an active role in their undergraduate education, students maximize the value of their KU experience.

The school offers undergraduate programs in:

- American Sign Language and Deaf Studies
- Biotechnology
- Health Sciences
- Information Technology
- Nutrition
- Public and Population Health

View additional undergraduate programs offered at the KU Edwards Campus (https://edwardscampus.ku.edu/academic-programs/#undergraduate).

Advising

Information on undergraduate admission standards and requirements, as well as application procedures and deadlines, is found on the School of Professional Studies Programs pages. Visit the Office of Admissions (http://admissions.ku.edu/) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions. Students interested in pursuing a degree in the School of Professional Studies should meet with an academic success coach to learn more.

Transfer Communities

Transfer Communities (https://edwardscampus.ku.edu/student-services/communities/) at the KU Edwards Campus are an integrated program designed to help you transition seamlessly to KUEC while you’re achieving your Associate’s Degree from your community college. These program-specific experiences will connect you to events, career conversations, faculty, staff and peers with similar goals and interests to create a true community while you pursue your degree.

University Honors Program

The School encourages qualified students to participate in the Edwards Honors Program (https://edwardscampus.ku.edu/honors/). The KU Edwards Campus Honors Program is here to help you get the most out of your college experience, whether you’re transferring from a community college honors program, or just getting started on your honors journey.

The School of Professional Studies is a University of Kansas academic unit that serves the needs of professionals in the Kansas City metro area and nationally. The graduate programs in the School of Professional Studies are interdisciplinary terminal degree programs aimed at preparing students for high demand workforce needs.

The school offers graduate programs in:

- Advanced American Sign Language
- ASL/English Interpreting
- Deaf Studies and Social Justice
- Engineering Management
• Project Management
• Professional Workplace Communication
• Science Management

View additional graduate programs offered at the KU Edwards Campus (https://edwardscampus.ku.edu/academic-programs/#graduate).

Degree Requirements

Requirements for the completion of master’s degrees in the School of Professional Studies are governed by department- or program-specific policy, School policies and procedures, Graduate Studies policies, and the University Senate Rules and Regulations.

Information on degree requirements presented in this section is limited to the most frequently consulted policies and key milestones in the graduate career. Students will find additional information under the KU Policy Library (http://policy.ku.edu/), the Graduate Studies (https://catalog.ku.edu/graduate-studies/) and College’s graduate regulations sections of the online catalog, the academic unit’s handbook, and the University of Kansas Rules and Regulations (https://catalog.ku.edu/regulations/).

Admission

Information on graduate admission standards and requirements, as well as application procedures and deadlines, is found on the School of Professional Studies Programs pages. Visit Graduate Studies Admission (https://graduate.ku.edu/prospective-students/) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions. Students interested in pursuing a degree in the School of Professional Studies should meet with an academic success coach to learn more.

Advising

To ensure student success, all students in the School of Professional Studies will work with an academic success coach (https://edwardscampus.ku.edu/student-services/program-info/) through their time at KU. Coaches work with students from the admissions process through graduation. For advising information, contact 913-897-8539 or visit https://edwardscampus.ku.edu/student-services/program-info#coach (https://edwardscampus.ku.edu/student-services/program-info/#coach).

To ensure student success, all students in the School of Professional Studies will work with an academic success coach (https://edwardscampus.ku.edu/student-services/program-info/) through their time at KU. Coaches work with students from the admissions process through graduation. For advising information, contact 913-897-8539 or visit https://edwardscampus.ku.edu/student-services/program-info#coach (https://edwardscampus.ku.edu/student-services/program-info/#coach).

Undergraduate & Graduate Scholarships and Financial Aid

The School of Professional Studies seeks to make the KU experience affordable to all students and encourages all students to explore the affordability (https://edwardscampus.ku.edu/edwards-campus-tuition-fees/) options available through KU Edwards. Additional scholarship resources can be found through the KU Edwards Financial Aid and Scholarship (https://edwardscampus.ku.edu/financial-aid-scholarships/) and Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/).

Metro KC Tuition Rate

The KU Edwards Campus Metro KC Rate (https://edwardscampus.ku.edu/metrokc-tuition-rate/) offers tuition equivalent to in-state rates for Missouri residents who meet the qualifications below. No credit hour limit applies. To receive this special rate, please fill out the Metro KC Rate (http://edwardscampus.ku.edu/edwards-campus-metrokc-application/).

To receive a need-based scholarships, the student must have submitted the FAFSA form (http://www.fafsa.ed.gov/) and been determined to be eligible. Merit-based scholarships also are offered. Additional funds may be available from the University of Kansas Financial Aid & Scholarships (http://affordability.ku.edu/).

Graduate Fellowships and Assistantships

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

For information about University regulations, see Regulations (https://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

Undergraduate Regulations

Absences

A student with excessive absences may be withdrawn from the course by the Dean. Instructors may require a certain level of attendance for passing a course and may drop a student for lack of attendance without the student’s consent.

Change of School

Students with a KU cumulative GPA of 2.00 or higher (or in their first semester) can fill out a Change of School form requesting to be admitted to the School of Professional Studies, from a different KU school, through the last day of class for the current semester. Requests made after that will be for admission in the upcoming semester. This process is for active KU students. Students not admitted to KU follow the University’s admission policy.

Credit/No Credit

A Credit/No Credit option is available to all degree-seeking undergraduates. Students may enroll in one course a semester under the option if the course is not in your major or minor. For more information, visit the KU Policy Library (http://policy.ku.edu/).

Warning: Certain undesirable consequences may result from exercising the option. Some schools, scholarship committees, and honorary societies do not accept this grading system and convert grades of No Credit to F when computing grade-point averages. Always check with your advisor before electing C/NC as policies vary from program to program.

Graduation with Distinction and Highest Distinction

Students who rank in the upper 10 percent (KU cumulative GPA) of their graduating class graduate with distinction. The upper third of those
awarded distinction graduate with highest distinction. The list is compiled each spring and includes July, December, and May graduates.

**Honor Roll (Dean’s List)**

Students with grade-point averages of 3.75 who have completed at least 12 hours with letter grades are recognized on the honor roll or dean’s list in fall and spring. Credit/No Credit grades are not accepted. S grades are accepted. An honor roll notation appears on the transcript.

**Maximum and Minimum Semester Enrollment**

No student may enroll in more than 20 hours a semester, or more than 9 hours in a summer session without permission from an undergraduate advisor.

**Nonresidence Study Before the Last 30 Hours**

Before the last 30 hours required for the degree, students may, under certain conditions, take courses at other institutions and transfer the credit to KU. Before enrolling in a nonresidence course, check on how your courses will transfer to KU (https://admissions.ku.edu/transfer-requirements-deadlines/transfer-college-credits/) or complete KU’s standard form, Request for Tentative Evaluation of Transfer Credit, in your dean’s office or student services office. After completing the coursework, you must request that an official transcript be sent to the Office of Admissions (http://admissions.ku.edu/whyku/index.shtml/), KU Visitor Center, 1502 Iowa St., Lawrence, KS 66044-7576, 785-864-3911. For transcripts to be official, they must be mailed from the college or university directly to KU. Faxed transcripts are not accepted for posting of transfer credit. Nonresidence credit includes all credits from another college or university taken after initial enrollment at KU, military service courses, and other undergraduate course work not formally offered in the Schedule of Classes (https://catalog.ku.edu/). Majors must submit the Request for Tentative Evaluation of Transfer Credit form before they enroll.

**Prerequisites and Corequisites**

Students are advised to enroll according to prerequisites and corequisites noted in individual course descriptions. Prerequisite waivers are used at the discretion of the Associate Dean of the School of Professional Studies and the appropriate academic program director.

**Probation**

**Good Standing**

Students with a KU cumulative GPA of 2.0 or higher are in good academic standing.

**Placed on Probation**

A student whose KU cumulative grade-point average falls below a 2.0 is placed on probation for the following semester.

**Continued on Probation**

A student on probation is continued on probation for one more semester if the KU semester grade-point average is not yet a 2.0 but progress is being made as determined by a faculty committee.

**Returned to Good Standing**

A student on probation is returned to good standing if the KU cumulative grade-point-average is at least 2.0.

**Dismissal**

A student on probation is dismissed for failure to earn a KU cumulative grade-point average of at least 2.0 in the next semester of enrollment after two consecutive semesters on probation. Students who are dismissed are dropped from any courses enrolled in for future semesters. Students who are dismissed may appeal the dismissal through the School of Professional Studies faculty committee. A student reinstated is continued on probation and has one semester to return to good standing. Students dismissed by the School may apply to another KU school or the College by completing a Change of School form.

**Reinstatement after Dismissal**

Students who have been dismissed may apply for readmission through the regular admissions process. Students applying for readmission after dismissal must have successfully completed any requirements set by the School of Professional Studies for readmission, if any.

**Repetition of Courses**

The School of Professional Studies follows the University’s course repeat and grade replacement policy.

**Required Work in Residence**

To earn a bachelor's degree from KU, you must complete the last 30 hours of credit for the degree by resident study. Students may petition the dean for a waiver. Up to 6 hours of work completed at another institution may be accepted as part of the last 30 hours, if the hours are not in required courses in the major. If a student completes more than 6 of the last 30 hours at another college, they must complete additional KU course work to graduate. Transfer courses must be completed with a C or higher. Always check with you advisor concerning enrollment as part of the last 30 hours of your degree.

**Transfer of Credit**

CredTran (http://credittransfer.ku.edu/) is an undergraduate transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If a student’s school or course is not listed, the evaluation will be completed when the student is admitted to KU.

Courses completed at other institutions are accepted to fulfill graduation requirements (e.g., in place of specifically prescribed courses) only if they are substantially equivalent as indicated by course description, hours of credit, and prerequisites. For courses not listed on CredTran (http://credittransfer.ku.edu/), the student must submit a petition along with a course syllabus to the School of Professional Studies. Petition forms are available by contacting a School of Professional Studies academic success coach (https://edwards-campus.ku.edu/program-advisors/).

Only transfer grades of C- or higher apply toward graduation from the School of Professional Studies.

**Graduate Regulations**

It is the students’ responsibility to comply with all requirements for the degree programs in which they plan to participate. These include the university requirements for graduate study at KU outlined in the Graduate Studies sections of the KU Policy Library (http://www.policy.ku.edu/), the University Senate Rules and Regulations (https://catalog.ku.edu/regulations/), the Graduate Studies (https://catalog.ku.edu/graduate-studies/) sections of the online catalog, as well
as the requirements of the School of Professional Studies outlined in this catalog section. Additionally, students are responsible for understanding the requirements that are unique to individual graduate programs listed herein.

To ensure student support navigating these processes, all students in the School of Professional Studies will work with an academic success coach (https://edwardscampus.ku.edu/student-services/program-info/) through their time at KU. Coaches work with students from the admissions process through graduation. To connect with your coach, contact 913-897-8539 or visit https://edwardscampus.ku.edu/student-services/program-info/#coach.

**Admission**

Graduate Studies defines the eligibility and admission criteria (https://catalog.ku.edu/graduate-studies/#admissioncontext) for different categories of admission to graduate study at the University of Kansas. Further details of program specific admission, provisional admission, and readmission information can be found at https://edwardscampus.ku.edu/school-professional-studies (https://edwardscampus.ku.edu/school-professional-studies/).

**Enrollment**

**Full-time, Half-Time and Part-Time Enrollment**

Please see the Full-time Enrollment policy in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for the definitions of full-time, half-time, and part-time enrollment.

Maximum enrollment for graduate students in the School of Professional Studies is 16 hours in Fall or Spring semester and 9 hours in the Summer session. Students may appeal to their program for exceptions.

At a minimum, all graduate students must be continuously enrolled in the Fall and Spring semesters while completing the requirements for fulfillment of their degree. Please consult the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for other enrollment regulations.

**Probation and Dismissal Guidelines**

To be in good standing, a student must maintain a 3.0 cumulative grade-point average and be making satisfactory progress toward the degree, as determined by Graduate Studies’ Good Academic Standing policy and the department or program’s internal guidelines. The Good Academic Standing policy may be found in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library. (http://policy.ku.edu/)

**Probation Due to GPA**

In any semester, a student whose cumulative GPA has fallen below a 3.0 is automatically placed on academic probation for the following semester (Fall or Spring). Students are notified by the School of Professional Studies of their probationary status. Students are removed from probation once the 3.0 CUM GPA is regained. Once a student is on probation they must maintain at least a 3.0 semester (Fall, Spring, Summer) GPA to maintain progress towards removal from probation. Failure to do so will result in a review that could result in dismissal.

**Dismissal**

It is the academic unit’s responsibility to ensure that students who are not demonstrating academic achievement sufficient to meet the requirements of a School of Professional Studies graduate degree are dismissed from their programs. This typically occurs when a student fails to meet the terms of the probationary period. Academic dismissal should occur immediately following a student’s failure to meet the terms of the probationary period. The School will notify the student in writing of the reasons for their dismissal.

A student who has been dismissed from a graduate program at KU is not eligible for readmission to graduate study in any department or program at the University of Kansas. A student may petition for an exception. The petition must be approved by the department to which the student intends to apply, the graduate division of the College, and the Dean of Graduate Studies. Such petitions are rarely approved.

**University Regulations on Grading**

Article II of the University Senate Rules and Regulations provides detailed information on regulations governing the grading of graduate coursework. Students should also consult the Graduate Studies (https://catalog.ku.edu/graduate-studies/) section of the online catalog and the KU Policy Library (http://policy.ku.edu/) for more information on the Grading Policy.

**Time Limits**

The University has established time limits governing various stages of the graduate student career.

**Maximum Time to Count Required Course Work**

Courses completed at the University of Kansas, or transfer credits from another university, are valid for a period of 10 years. With the endorsement of their graduate programs, students may petition the School to accept out-of-date course work to fulfill the requirements for their graduate degrees, provided they are able to justify why this course work meets the current standards of scholarship in the discipline.

**Maximum Time to Complete the Degree**

Graduate Studies has established time limits on master’s and doctoral degree completion. Please see Graduate Studies policies on Doctoral Program Time Constraints and Master’s Program Time Constraints in the Graduate Studies (https://catalog.ku.edu/graduate-studies/) sections of the online catalog and in the KU Policy Library (http://policy.ku.edu/) for full details. Master’s degree students have a total of seven calendar years, excluding any periods of absence due to an approved leave of absence or voluntary discontinuation from a program, in which to complete the work for a master’s degree.

A time limit extension may be granted by the School. All extension petitions require the department to prepare and submit a Graduate Degree Completion Agreement, which must then be approved by the School of Professional Studies Academic Council. Per Graduate Studies policy, extensions may be granted for up to 1 year. However, additional time may be requested in the Completion Agreement.
Completion Agreement with a timeline greater than one year is approved, the department must submit a renewal petition annually after the first year until the Completion Agreement has ended. Renewal petitions must indicate the student's progress on the Completion Agreement and will receive expedited review.

Academic units may set their own, more rigorous time limits. Consult with your advisor and review your academic unit’s handbook and the relevant Departments and Programs section of the online catalog for program-specific information, requirements, and restrictions.

Academic and Research Integrity

The School of Professional Studies strictly enforces KU and School policies on academic and scholarly misconduct. Academic integrity requires honest performance of academic and research responsibilities by students. These include, but are not limited to, ethical preparation of assignments, reports, and research papers; completion of examinations; ethical treatment of human and animal subjects; execution of administrative requirements; and a sincere and conscientious effort by students to abide by the policies set forth by instructors and research advisors. See the School of Professional Studies website (https://edwardscampus.ku.edu/school-professional-studies/) for procedures for misconduct and grievances.

Graduation

All graduate students must be enrolled the semester they complete all degree requirements.

Graduate Studies establishes an early deadline for degree completion for each semester and summer session, usually occurring at the end of the first 2 weeks of a semester or the end of the first week of summer session. If the student was enrolled the previous semester and meets all degree requirements including the submission of all required documentation by the early deadline, they are not required to enroll for that semester.

The final Graduate Application for Graduation deadline is set by the Registrar for each semester. Please consult the official Academic Calendar (https://registrar.ku.edu/calendar/) for specific dates. To be eligible for graduation, an application for degree must be submitted and all degree requirements met by this deadline. This includes the submission of all required documentation to the School of Professional Studies.

The School of Professional Studies and KU Edwards Campus (https://edwardscampus.ku.edu/student-services/career-skills/) is committed to helping you accomplish your career goals, and offers resources to help you find career solutions on how to navigate the career change process, career mobility, and/or develop strategies for that first career conversation.

University Career Center

The University Career Center (https://career.ku.edu/), Summerfield Hall, Room 206, (785-864-3624), provides career counseling and services for all KU students, including students in the School of Professional Studies, both in person as well as online through Jayhawk Ready (https://jayhawkready.tuapath.com/).

Courses

ASLD 311. Introduction to Deaf Studies. 3 Hours AE41.
Students in the course will learn about the world of the deaf in America, deaf culture, the education of deaf children, useful technology, and the integration of deaf people into the American society. This introductory course is for students interested in fields, such as audiology; speech-language pathology; medicine; education; school, rehabilitation and mental health counseling; psychology; interpreting; ASL and deaf studies; and for anyone with a deaf person in his or her life. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 611. LEC.

ASLD 312. Intersectionality and Deaf Communities. 3 Hours.
This course brings students to the next level of understanding of the impact and role of various identities within the Deaf communities on the international and national levels, following the framework of intersectionality. Intersectionality conceptualizes the various identities, ethnicities, linguistic uses and experiences of persons, groups of people, or social problems in the world of deaf. Intersectionality looks at deaf people’s overlapping identities and experiences in order to understand the complexity of prejudices they face due to their deaf, race, class, gender, sexual orientation, religion, and other identity markers. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 612. LEC.

ASLD 313. Social Justice and Allyship with Deaf Communities. 3 Hours.
Students are introduced to the concept of allyship as one of the tenets of social justice and the process of allyship and social justice in the Deaf communities. Allyship involves support and empowerment of individuals or people experiencing oppression. Within the Deaf communities, there are varieties of Deaf individuals or peoples, such as Deaf Blacks, Deaf Native Americans, and LGBTQI. Students will learn what it means to be an ally, a process of social justice. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 613. Prerequisite: ASLD 311 or instructor permission. LEC.

ASLD 414. Historical Foundations of Deaf Education. 3 Hours.
This course engages in the study of the development of deaf educational policy, practice, and theory in relation to changes in social institutions and thought regarding language, education and cultural and medical models in the education of and for the deaf. It focuses on the analysis of contemporary deaf educational problems in the light of historical perspectives. This course is offered at the 400 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 614. LEC.

ASLD 428. Special Topics in Deaf Studies: _____. 3 Hours.
Students will gain an in depth understanding of the social life of deaf people by choosing an area of focus. Since this is a special topics course, students, interested in gaining knowledge through research about deaf social life, will choose a timely area of study in a field, such as anthropology, economics, geography, history, political science, psychology, and sociology. An example of a timely area of study in Deaf Studies is Deaf gain. Through an individualized course design, students may choose the approach of immersion in Deaf community, defined literature review, or other activity to gain an in depth understanding. This course is offered at the 400 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 628 if topic is the same. LEC.
ASLD 501. Introduction to the ASL/English Interpreting Profession. 3 Hours.
This course provides an introduction to interpreting as an occupation. Students will come to understand the history of interpreting along with the importance of interpersonal communication skills, professional ethics, parameters of responsibilities, community resources and legal ramifications as they relate to the interpreter. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 701. Prerequisite: ASL IV or Instructor permission. LEC.

ASLD 502. Theories of Interpreting: Co-Constructions of Meaning. 3 Hours.
This course provides an introduction to current theories in the processes of translation and interpreting through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply several theoretical constructs as they perform intra- and interlingual exercises. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 702. Prerequisite: ASLD 501 or ASLD 701 and ASLD 521 or 721 with a minimum of a C; B recommended or Instructor Approval. LEC.

ASLD 505. American Sign Language V (ASL V). 3 Hours.
This course is the expanded study of ASL IV with emphasis on increased conversation skills, vocabulary, storytelling, knowledge of Deaf culture and the Deaf community. Vocabulary is enhanced through the introduction of various content areas dealing with current events, world affairs, literature, the arts and abstract ideas. Students participate in-group discussions, speculate, make analogies, give instructions, and express feelings and intentions. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 705. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 506. American Sign Language VI (ASL VI). 3 Hours.
This course is continuing from ASLD 505 ASL V. Students focus on discourse, variation in sign language use, and understanding how the Deaf community is part of a linguistic and cultural minority. Topics that will be covered include perspectives on Deafhood, attitudes toward Deaf people and signed languages, technology and communication. Students will expand on vocabulary by working on areas of advanced subject matter, application of non-manual markers, use of classifiers, and proper pronominalization. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 706. Prerequisite: ASLD 505 or ASLD 705 or instructor approval. LEC.

ASLD 520. American Sign Language Linguistics. 3 Hours.
In this course, students take an analytical approach to language and the field of linguistics as it applies to American Sign Language. ASL phonology, morphology, syntax, semantics, bilingualism, language use and usage will be examined and discussed. Language samples will be viewed and analyzed for evidence of different language structures and forms. Students will also read and critique research articles pertaining to ASL and other signed languages. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 720. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 521. Discourse Analysis of ASL. 3 Hours.
This course focuses on analysis of ASL Discourse structure and features, such as use of space for cohesion, depiction, discourse markers, and use of classifiers. The course also focuses on the use of ASL discourse in formal and informal settings. Students study the genres of dialogues, public speaking, artistic expression, debate, persuasive and narrative styles in ASL. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 721. Prerequisite: ASL V with a minimum grade of C; B recommended or instructor approval. LEC.

ASLD 523. ASL Pragmatics and Syntax. 3 Hours.
This course will focus on the study of syntactic structure and its interaction with meaning. Word order, lexical categories, sentence types, clause structure, topicalization and sentences with transitive, intransitive and agreement verbs are studied. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 723. Prerequisite: ASLD 520 or ASLD 720. LEC.

ASLD 524. Visual-Gestural Communication. 3 Hours.
Students will develop capabilities in non-verbal communication and visual gestural communication utilizing the study of gestures as a form of communication and basis for visual language. Emphasis is on learning to think visually in pictures and building production and comprehension communication skills. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 724. Prerequisite: ASLD 520 or ASLD 720. LEC.

ASLD 530. American Sign Language Literature. 3 Hours.
This course will provide basic introduction, discussion, and demonstration of literature in American Sign Language (ASL). Such literature involves ASL Poetry, ASL Storytelling/ Narratives, Deaf Humor, Deaf Folklore and other genres that have been passed on from one generation to another by culturally Deaf people. Students will receive, analyze and retell a variety of ASL literature. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 730. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 588. Internship in American Sign Language and Deaf Studies. 1-3 Hours.
This course provides opportunities for students to have direct interaction with Deaf, Hard of Hearing, DeafBlind community members in order to apply cultural, linguistic and power/privilege concepts learned in the classroom. Students must complete 50 hours per credit hour. Schedule will be determined by student and instructor. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 788. Prerequisite: Instructor approval. INT.

ASLD 589. Research Experience in American Sign Language and Deaf Studies. 3 Hours.
This course guides the students in reading, understanding and evaluating current research in ASL, Deaf Studies, ASL/English interpreting and related fields. Students will learn how to publish a paper and present a poster on a chosen topic of their interest. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 789. Prerequisite: Instructor approval. INT.
course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 804. Prerequisite: ASLD 501 or ASLD 701, ASLD 502 or ASLD 702 and ASL proficiency or instructor approval. LEC.

ASLD 605. Interpreting: English to ASL. 3 Hours.
This course provides an introduction to real-time interpreting with an emphasis on English source materials through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 805. Prerequisite: ASLD 501 or ASLD 701, ASLD 502 or ASLD 702 and ASL proficiency. LEC.

ASLD 606. Interpreting: Diverse Communities. 3 Hours.
This course examines language, culture and identity and the implications when interpreting among diverse populations. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 806. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

ASLD 607. Ethics and Professionalization for Interpreters. 3 Hours.
This course examines ethics as it relates to the work of interpreting through study of ethical codes of conduct, models of decision-making and elements of becoming an ethical professional. Students will come to understand the complexities of ethical decision-making and the importance of self-awareness, reflective practice and responsibility as they consider implications on micro and macro levels. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 807. Prerequisite: ASLD 603 or ASLD 803 or instructor approval. LEC.

ASLD 608. ASL/English Interpreting Observation Practicum. 1-6 Hours.
This practicum requires a minimum of 50 hours of observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and in-service training) in authentic settings where interpreters are employed. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Prerequisite: ASLD 603 or ASLD 803 with a minimum grade of a B or instructor approval. FLD.

ASLD 609. Practicum in American Sign Language Interpreting. 1-6 Hours.
This practicum requires 250 hours of field experience which may include observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and in-service training) in authentic settings where interpreters are employed. A minimum of 90 hours will be direct provision of interpreting under the supervision of a certified interpreter. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Students will consult with their advisor prior to enrolling in the course. Students are required to complete a minimum of 3 credit hours to complete the ASLD 609 requirements. This 250 hour practicum may be completed in one semester by enrolling in 3 credit hours, or can be completed over multiple semesters. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 809. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805, ASLD 608 or ASLD 808 with a minimum grade of a B, and completion of an interpreting proficiency exam or instructor approval. FLD.

ASLD 610. Psychological Effects of Interpreting. 3 Hours.
This course examines both affective and cognitive psychological effects on interpreting practitioners. The importance of self-care, reflective practice, case-conferencing; as well as vicarious trauma, compassion fatigue, role-space, power and privilege are among topics discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 810. Prerequisite: ASLD 603 or ASLD 803 or instructor approval. LEC.

ASLD 611. Introduction to Deaf Studies. 3 Hours.
Students in the course will learn about the world of the deaf in America, deaf culture, the education of deaf children, useful technology, and the integration of deaf people into the American society. This introductory course is for students interested in fields, such as audiology; speech-language pathology; medicine; education; school, rehabilitation and mental health counseling; psychology; interpreting; ASL and deaf studies; and for anyone with a deaf person in his or her life. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 311. Prerequisite: Graduate standing or Instructor permission. LEC.

ASLD 612. Intersectionality and Deaf Communities. 3 Hours.
This course brings students to the next level of understanding of the impact and role of various identities within the Deaf communities on the international and national levels, following the framework of intersectionality. Intersectionality conceptualizes the various identities, ethnicities, linguistic uses and experiences of persons, groups of people, or social problems in the world of deaf. Intersectionality looks at deaf people’s overlapping identities and experiences in order to understand the complexity of prejudices they face due to their deaf, race, class, gender, sexual orientation, religion, and other identity markers. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 312. Prerequisite: Graduate standing or Instructor permission. LEC.

ASLD 613. Social Justice and Allyship with Deaf Communities. 3 Hours.
Students are introduced to the concept of allyship as one of the tenets of social justice and the process of allyship and social justice in the Deaf communities. Allyship involves support and empowerment of individuals or people experiencing oppression. Within the Deaf communities, there are varieties of Deaf individuals or peoples, such as Deaf Blacks, Deaf Native Americans, and LGBTQI. Students will learn what it means to be an ally, a process of social justice. This course is offered at the 300 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 313. Prerequisite: ASLD 311, ASLD 611 or Instructor permission. LEC.

ASLD 614. Historical Foundations of Deaf Education. 3 Hours.
This course engages in the study of the development of deaf educational policy, practice, and theory in relation to changes in social institutions and thought regarding language, education and cultural and medical models in the education of and for the deaf. It focuses on the analysis of contemporary deaf educational problems in the light of historical perspectives. This course is offered at the 400 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 414. Prerequisite: Graduate standing or Instructor permission. LEC.

ASLD 615. Business Practices for Interpreters. 3 Hours.
This course will provide students an introduction to business practices for interpreters. Concepts explored will include resume development, interview skills, invoicing, record keeping for tax purposes, certification maintenance and licensure renewal, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to
students with credit in ASLD 815. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

ASLD 616. Interpreting: Dynamic Paralinguistic Demands. 3 Hours. This course examines a variety of paralinguistic demands in the context of interpreting. Types of demands will include emotional communication, accents, regional dialects, physical and mental factors (Cerebral Palsy, injuries, etc.), fast paced communication, etc. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 816. Prerequisite: ASLD 603 or ASLD 803. ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

ASLD 626. Topics in ASL Vocabulary and Discourse: _____. 3 Hours. This course will expand the interpreter training students’ vocabulary related to specialized fields and technical contexts. Students will enhance terminology in medical, mental health, education, religion, sex, drugs/alcohol and strong language/culturally rich ASL. Students’ development of comprehension and production skills in common formal and informal settings will be emphasized. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 826 if topic is the same. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 628. Special Topics in Deaf Studies: _____. 3 Hours. Students will gain an in-depth understanding of the social life of deaf people by choosing an area of focus. Since this is a special topics course, students, interested in gaining knowledge through research about deaf social life, will choose a timely area of study in a field, such as anthropology, economics, geography, history, political science, psychology, and sociology. Through an individualized course design, students may choose the approach of immersion in Deaf community, defined literature review, or other activity to gain an in depth understanding. This course is offered at the 400 and 600 level with additional assignments at the 600 Level. Not open to students with credit in ASLD 428 if topic is the same. Prerequisite: Graduate standing or instructor permission. LEC.

ASLD 631. Advanced American Sign Language Literature. 3 Hours. This course analyzes and compares the various genres of American Sign Language literature. ASL poetry, narrative, humor, as well as written work by Deaf individuals and other language devices will be examined and discussed. Students will create and evaluate original work illustrating the similarities and uniqueness of ASL. Students will become familiar with well-known contributors such as: Clayton Valli, Patrick Graybill, Ella Mae Lentz, and the like. Research articles pertaining to ASL or Deaf Literature will be critiqued and discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 831. Prerequisite: ASLD 530 or ASLD 730. LEC.

ASLD 638. Topics in Interpreting: _____. 3 Hours. This course provides the opportunity for experimentation with innovative course content and learning strategies in accordance with guidelines established by faculty. Topics include interpreting in specialized settings, current trends, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 838 if topic is the same. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

ASLD 701. Introduction to the ASL/English Interpreting Profession. 3 Hours. This course provides an introduction to interpreting as an occupation. Students will come to understand the history of interpreting along with the importance of interpersonal communication skills, professional ethics, parameters of responsibilities, community resources and legal ramifications as they relate to the interpreter. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 501. Prerequisite: ASL IV or Instructor permission. LEC.

ASLD 702. Theories of Interpreting: Co-Constructions of Meaning. 3 Hours. This course provides an introduction to current theories in the processes of translation and interpreting through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply several theoretical constructs as they perform intra- and interlingual exercises. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 502. Prerequisite: ASLD 501 or ASLD 701 and ASLD 521 or 721 with a minimum of a C; B recommended or Instructor Approval. LEC.

ASLD 705. American Sign Language V (ASL V). 3 Hours. This course is the expanded study of ASL IV with emphasis on increased conversation skills, vocabulary, storytelling, knowledge of Deaf culture and the Deaf community. Vocabulary is enhanced through the introduction of various content areas dealing with current events, world affairs, literature, the arts and abstract ideas. Students participate in group discussions, speculate, make analogies, give instructions, and express feelings and intentions. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 505. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 706. American Sign Language VI (ASL VI). 3 Hours. This course is continuing from ASLD 705 ASL V. Students focus on discourse, variation in sign language use, and understanding how the Deaf community is part of a linguistic and cultural minority. Topics that will be covered include perspectives on Deafhood, attitudes toward Deaf people and signed languages, technology and communication. Students will expand on vocabulary by working on areas of advanced subject matter, application of non-manual markers, use of classifiers, and proper pronounization. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 506. Prerequisite: ASLD 505 or ASLD 705 or instructor approval. LEC.

ASLD 720. American Sign Language Linguistics. 3 Hours. In this course, students take an analytical approach to language and the field of linguistics as it applies to American Sign Language. ASL phonology, morphology, syntax, semantics, bilingualism, language use and usage will be examined and discussed. Language samples will be viewed and analyzed for evidence of different language structures and forms. Students will also read and critique research articles pertaining to ASL and other signed languages. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 520. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 721. Discourse Analysis of ASL. 3 Hours. This course focuses on analysis of ASL discourse structure and features, such as use of space for cohesion, depiction, discourse markers, and use of classifiers. The course also focuses on the use of ASL discourse in formal and informal settings. Students study the genres of dialogues, public speaking, artistic expression, debate, persuasive and narrative styles in ASL. This course is offered at the 500 and 700 level with
additional assignments at the 700 Level. Not open to students with credit in ASLD 521. Prerequisite: ASL V with a minimum grade of B or instructor approval. LEC.

ASLD 723. ASL Pragmatics and Syntax. 3 Hours.
This course will focus on the study of syntactic structure and its interaction with meaning. Word order, lexical categories, sentence types, clause structure, topicalization and sentences with transitive, intransitive and agreement verbs are studied. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 523. Prerequisite: ASLD 520 or ASLD 720. LEC.

ASLD 724. Visual-Gestural Communication. 3 Hours.
Students will develop capabilities in non-verbal communication and visual gestural communication utilizing the study of gestures as a form of communication and basis for visual language. Emphasis is on learning to think visually in pictures and building production and comprehension communication skills. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 524. Prerequisite: Graduate standing or Instructor permission. LEC.

ASLD 730. American Sign Language Literature. 3 Hours.
This course will provide basic introduction, discussion, and demonstration of literature in American Sign Language (ASL). Such literature involves ASL Poetry, ASL Storytelling/ Narratives, Deaf Humor, Deaf Folklore and other genres that have been passed on from one generation to another by culturally Deaf people. Students will receive, analyze and retell a variety of ASL literature. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 530. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 788. Internship in American Sign Language and Deaf Studies. 1-3 Hours.
This course provides opportunities for students to have direct interaction with Deaf, Hard of Hearing, Deaf Blind community members in order to apply cultural, linguistic and power/privilege concepts learned in the classroom. Students must complete a minimum of 50 hours per credit hour. Schedule will be determined by student and instructor. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 588. Prerequisite: Instructor approval. INT.

ASLD 789. Research Experience in American Sign Language and Deaf Studies. 3 Hours.
This course guides the students in reading, understanding and evaluating current research in ASL, Deaf Studies, ASL/English interpreting and related fields. Students will learn how to publish a paper and present a poster on a chosen topic of their interest. This course is offered at the 500 and 700 level with additional assignments at the 700 Level. Not open to students with credit in ASLD 589. Prerequisite: Instructor approval. RSH.

ASLD 803. Interpreting: Mediated Interactions in Communications. 3 Hours.
This course provides an introduction to real-time interpreting in mediated interaction contexts through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories, decision-making and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 603. Prerequisite: ASLD 501 or ASLD 701, ASLD 502 or ASLD 702 and a minimum grade of B or instructor approval. LEC.

ASLD 804. Interpreting: ASL to English. 3 Hours.
This course provides an introduction to real-time interpreting with an emphasis on ASL source materials through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 604. Prerequisite: ASLD 501 or ASLD 701, ASLD 502 or ASLD 702 and ASL proficiency or instructor approval. LEC.

ASLD 805. Interpreting: English to ASL. 3 Hours.
This course provides an introduction to real-time interpreting with an emphasis on English source materials through a lens of meaning-based analysis and co-construction of meaning. Students will come to understand and apply theories and engage in reflective practice. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 605. Prerequisite: ASLD 501 or ASLD 701, ASLD 502 or ASLD 702 and ASL proficiency. LEC.

ASLD 806. Interpreting: Diverse Communities. 3 Hours.
This course examines language, culture and identity and the implications when interpreting among diverse populations. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 606. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

ASLD 807. Ethics and Professionalization for Interpreters. 3 Hours.
This course examines ethics as it relates to the work of interpreting through study of ethical codes of conduct, models of decision-making and elements of becoming an ethical professional. Students will come to understand the complexities of ethical decision-making and the importance of self-awareness, reflective practice and responsibility as they consider implications on micro and macro levels. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 607. Prerequisite: ASLD 603 or ASLD 803 or instructor approval. LEC.

ASLD 808. ASL/English Interpreting Observation Practicum. 1-6 Hours.
This practicum requires a minimum of 50 hours of observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and in-service training) in authentic settings where interpreters are employed. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Students will consult with their advisor prior to enrolling in the course. Each credit hour requires at least 50 hours of field experience. Prerequisite: ASLD 603 or ASLD 803 with a minimum grade of a B or instructor approval. FLD.

ASLD 809. Practicum in American Sign Language Interpreting. 1-6 Hours.
This practicum requires 250 hours of field experience which may include observation, shadowing, teaming, professional responsibilities, duties, and/or activities (e.g., scheduling, preparation, invoicing, meetings, and in-service training) in authentic settings where interpreters are employed. A minimum of 90 hours will be direct provision of interpreting under the supervision of a certified interpreter. Discussion and analysis will occur with instructor and peers on-line and in-person throughout the semester. Students will consult with their advisor prior to enrolling in the course. Students are required to complete a minimum of 3 credit hours to complete the ASLD 809 requirements. This 250 hour practicum may be completed in one semester by enrolling in 3 credit hours, or can be completed over multiple semesters. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to
students with credit in ASLD 609. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805, ASLD 608 or ASLD 808 with a minimum grade of a B, and completion of an interpreting proficiency exam or instructor approval. FLD.

ASLD 810. Psychological Effects of Interpreting. 3 Hours.
This course examines both affective and cognitive psychological effects on interpreting practitioners. The importance of self-care, reflective practice, case-conferencing; as well as vicarious trauma, compassion fatigue, role-space, power and privilege are among topics discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 610. Prerequisite: ASLD 603 or ASLD 803 or instructor approval. LEC.

ASLD 815. Business Practices for Interpreters. 3 Hours.
This course will provide students an introduction to business practices for interpreters. Concepts explored will include resume development, interview skills, invoicing, record keeping for tax purposes, certification maintenance and licensure renewal, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 615. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

ASLD 816. Interpreting: Dynamic Paralinguistic Demands. 3 Hours.
This course examines a variety of paralinguistic demands in the context of interpreting. Types of demands will include emotional communication, accents, regional dialects, physical and mental factors (Cerebral Palsy, Injuries, etc.), fast paced communication, etc. Students will apply interpreting theories, decision-making and reflective practice to both monologue and dialogic materials in both ASL and English. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 616. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

ASLD 826. Topics in ASL Vocabulary and Discourse: _____ 3 Hours.
This course will expand the interpreter training students’ vocabulary related to specialized fields and technical contexts. Students will enhance terminology in medical, mental health, education, religion, sex, drugs/alcohol and strong language/culturally rich ASL. Students’ development of comprehension and production skills in common formal and informal settings will be emphasized. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 626 if topic is the same. Prerequisite: ASL IV or instructor approval. LEC.

ASLD 831. Advanced American Sign Language Literature. 3 Hours.
This course analyzes and compares the various genres of American Sign Language literature. ASL poetry, narrative, humor, as well as written work by Deaf individuals and other language devices will be examined and discussed. Students will create and evaluate original work illustrating the similarities and uniqueness of ASL. Students will become familiar with well-known contributors such as Clayton Valli, Patrick Graybill, Ella Mae Lentz, and the like. Research articles pertaining to ASL or Deaf Literature will be critiqued and discussed. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 631. Prerequisite: ASL 530 or ASLD 730. LEC.

ASLD 838. Topics in Interpreting: _____ 3 Hours.
This course provides the opportunity for experimentation with innovative course content and learning strategies in accordance with guidelines established by faculty. Topics include interpreting in specialized settings, current trends, etc. This course is offered at the 600 and 800 level with additional assignments at the 800 Level. Not open to students with credit in ASLD 638 if topic is the same. Prerequisite: ASLD 603 or ASLD 803, ASLD 604 or ASLD 804, ASLD 605 or ASLD 805 or instructor approval. LEC.

Courses

BTEC 300. Research Methods in Biotechnology. 3 Hours N.
An integrated lecture and laboratory course exploring the science and basic laboratory skills used in food science, agricultural science, pharmaceutical science, clinical medicine, animal health, and environmental science. Survey of career opportunities in biotechnology. Guest lectures from field-experts in biotechnology. Prerequisite: BIOL 152; concurrent or prior enrollment in CHEM 330; or consent of instructor. LEC.

BTEC 305. Molecular and Microbiological Techniques. 4 Hours N.
An integrated lecture and laboratory course exploring the science and tools used in microbiology-based fields. A strong focus is placed on developing functional scientific skills required to run an RD or Production Lab. Students will survey the diversity of microbial life while becoming proficient in the tools that are used extensively in the laboratory. We emphasize hands-on experience with lab techniques applicable to addressing a variety of scientific problems. Specifically, this course will challenge students to apply their knowledge and skills to construct and express recombinant proteins in mammalian cells, purify, and quantitate their products. Prerequisite: Concurrent or prior enrollment in BIOL 350 and BTEC 300; or consent of instructor. LEC.

BTEC 310. Scientific Communications. 3 Hours N.
Theory and practicum exploring communications relevant to careers in science. This course will explore the fundamentals of clear, effective communications in written and oral formats. Students will gain experience communicating in a variety of real-world situations with technical and lay audiences. Particular emphasis will be placed on the communications occurring within the work place setting. Students will also be challenged to build a network with the biotech industries through external events. Prerequisite: ENGL 102; or consent of instructor. Students must be in their junior or senior year of a science-related degree. LEC.

BTEC 341. Principles of Bioprocessing Laboratory I. 1 Hour N.
Laboratory sessions involve use of microbial expression vectors, fermentation systems, and large-scale purification of recombinant protein. Includes bacterial cell culture techniques, principles of bioreactor/fermentation operations and purification techniques, and calibration. Primary goal of this course is to provide students with an advanced background in bacterial upstream and downstream biotechnology. Prerequisite: BTEC 300; BTEC 340 or concurrent enrollment in BTEC 340. LAB.

BTEC 400. Applied Immunology. 3 Hours N.
An integrated lecture and laboratory course exploring the fundamentals of immunology. The course focuses on developing a conceptual knowledge of the constituents and processes of the immune system. Students will develop a functional understanding of how to operate and apply current immunology-based techniques. Laboratory activities will explore the use of immunological tools for research, discovery, and analysis of processes and experimental compounds. Prerequisite: BTEC 300; BTEC 305; or consent of instructor. LEC.

BTEC 424. Independent Study in Biotechnology. 1-3 Hours N.
Independent project at a related bioscience industry partner or faculty in selected topics of current translational research interest. May be undertaken only with the consent of the major advisor who will guide the research after determining objectives with the interested industry partner or faculty. Prerequisite: Consent of instructor. IND.
BTEC 441. Principles of Bioprocessing Laboratory II. 1 Hour N.
Mammalian cell culture techniques, principles of bioreactor operations and purification techniques, and calibration. The primary goal of this course is to provide students with an advanced background in mammalian upstream and downstream biotechnology. Prerequisite: BTEC 341; BTEC 440 or concurrent enrollment in BTEC 440. LAB.

BTEC 460. Introduction to Quality Control/Quality Assurance in Biotechnology. 3 Hours N.
Quality control techniques, assurance issues, and management methods. Quality in design and planning, in the constructed project, and in production of goods and services. Prerequisite: BTEC 330. LEC.

BTEC 475. Applied Separation Science and Quantitative Analysis. 6 Hours N.
An integrated lecture and laboratory course exploring the fundamentals of separation science and quantitative analysis of small molecules, peptides, and proteins. Students will be challenged to develop a functional understanding of the theory and application of sample preparation, separation technologies, and methods for quantification. Prerequisite: BTEC 300; or consent of instructor. LEC.

BTEC 494. Selected Topics in Biotechnology: ______. 1-3 Hours N.
A synthesis and discussion of current trends related to biotechnology. Emphasis is placed on providing students with an awareness of advances on the leading edge of discovery, critically analyzing data, and developing skills for success in the next stage of a career in biotechnology. This course can be repeated for up to 2 credit hours. Prerequisite: Concurrent or prior enrollment in BTEC 300; or consent of instructor. Students must be in their junior or senior year of a biology-related degree. LEC.

BTEC 501. Biotechnology Ethics and Responsible Conduct of Research. 3 Hours AE51 / N.
Student investigations and discussions of current controversial issues in biotechnology. This course emphasizes thinking about new technologies in a rational and thoughtful way. Prerequisite: BTEC 300. LEC.

BTEC 540. Biotechnology Capstone I. 3 Hours N.
A project-based course that challenges students to develop, plan, execute, and communicate the results of a biotech-related project. Students will be guided through the initial stages of project design, project management, logistics, and technical training necessary to complete their project. This course is the first of a two semester series (BTEC 540 BTEC 640.) Prerequisite: BTEC 305; BTEC 475; concurrent or prior enrollment in BIOL 600; or consent of instructor. LAB.

BTEC 541. Gene Expression Analysis: Microarrays. 2 Hours N.
This course reviews current theory, techniques, instrumentation, troubleshooting, analysis tools, and advanced protocols for microarray analysis. Students have the opportunity to utilize skills learned during lecture in a laboratory environment. At the conclusion of this course, students understand microarray experimental design, its tools, and analysis of generated data. Prerequisite: BTEC 300. LAB.

BTEC 542. Protein Expression in Insect Cells. 2 Hours N.
Introduction to the insect cells expression system, and its advantages and disadvantages. Introduction to expression of recombinant proteins with baculovirus. Outline of antibody and antibody fragments as well as other complex proteins. Basic techniques used for growth and maintenance of insect cell cultures. The lab portion of the course provides students with practical experience in protein expression techniques in the insect cells expression system. Prerequisite: BTEC 300. LAB.

BTEC 545. RNA Interference and Model Organisms. 2 Hours N.
Introduction and history of RNA interference technology. Principles, mechanism, and applications of RNA interference in model organisms. Laboratory sessions include RNA interference-mediated silencing of genes in plants, C. elegans, and mammalian cell culture. Prerequisite: BTEC 300. LAB.

BTEC 547. Bioanalytical Lab. 2 Hours N.
Analytical methods used for testing biotherapeutics are examined. Emphasis is placed on assessing protein concentration, purity, identity and activity. The importance of sample processing, throughput and level of validation are explored as samples from upstream processing, downstream processing and final bulk are interrogated. Students also learn key concepts used to validate the performance of analytical methods. Prerequisite: BTEC 300. LAB.

BTEC 550. Applied Bioinformatics. 2 Hours N.
Overview of the fields of bioinformatics and genomics. Topics, tools, issues and current trends in these and related fields are discussed. Principles and practical application of bioinformatics tools in molecular biology, genetics, and electronic medical records are evaluated. The haploid human genome occupies a total of just over 3 billion DNA base pairs. The medical records of a population contain clues concerning better identification and treatment of disease. This information is not contained in books, but stored in electronic databases. This course is designed for life scientists from all fields to introduce them to the power of bioinformatics and enable them to access and utilize biological information in databases for their own research. Prerequisite: BTEC 300; BIOL 570 or MATH 365 (preferred); consent of instructor. LEC.

BTEC 599. Biotechnology Internship. 1-6 Hours N.
Supervised internship at a biotech company; or an independent thesis; or honors thesis with Honors Program. This course can be repeated for up to a total of 6 credit hours. Prerequisite: BTEC 305; BTEC 475; and consent of instructor. FLD.

BTEC 630. Biotechnology, Regulation, Quality Control, and Quality Assurance. 3 Hours N.
An integrated lecture and laboratory course exploring quality control, quality assurance, and regulatory considerations. Hands-on experimentation will develop a functional understanding of protocol design and a practical knowledge of GXP-guided processes. This course will focus on issues relevant to manufacturing, packaging, labeling, testing, and control of pharmaceutical products. Guest lectures from field-experts in the biotechnology industry. Prerequisite: Concurrent or prior enrollment in BTEC 599; or consent of instructor. LEC.

BTEC 640. Biotechnology Capstone II. 3 Hours AE61 / N.
A project-based course that challenges students to develop, plan, execute, and communicate the results of a biotech-related project. Students will be guided through the execution of their proposed plan with particular emphasis placed on managing scientists, gathering and analyzing data, and instituting quality controls/quality assurance protocols. Students will communicate the results of their project through a combination of an oral presentation and poster. This course is the second of a two semester series (BTEC 540 BTEC 640.) Prerequisite: BTEC 540; or consent of instructor. LAB.

Courses

EMGT 608. Principles of Engineering Management. 3 Hours.
Principles used by the engineer in managing technology-based organizations, focusing on core management functions. Prerequisite: Senior or graduate standing in an engineering curriculum or consent of the instructor. LEC.

EMGT 800. Special Topics in Engineering Management. 1-4 Hours.
Advanced study of a specialized nature representing unique or changing engineering management knowledge. RSH.
EMGT 801. Management Theory and Practice for Engineering Managers. 3 Hours.
Foundation for managing in technology-based organizations. Topics include essential management functions, schools of management thought, motivation, and management style. LEC.

Production of required statistical analyses and predictions for engineering and management systems. Content from probability through regression and analysis of variance. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 803. Technological Forecasting and Assessment. 3 Hours.
Methods of technology assessment and forecasting. Topics include scenario analysis, cross-impact analysis, judgmental mental forecasting methods such as Delphi, and foundational time series forecasting methods such as trend projection and auto-aggressive moving averages. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 804. Business Development and Marketing of Professional Services. 3 Hours.
A broad review of the major components of marketing and integration of these components, culminating in students developing marketing plans for services. Theories, principles, and practices of business development and marketing applied to consulting oriented professional engineering and architectural firms. LEC.

EMGT 805. Management of Innovation. 3 Hours.
Preparation for managing technological change involving innovation. Topics include essential management functions, innovation types, impact of organizational structure and climate, and change management. LEC.

EMGT 806. Finance for Engineers. 3 Hours.
An introduction to finance in technology-based organizations. Topics include financial statements analysis, valuation of future cash flows, capital budgeting, risk and return, capital structure, and working capital management. LEC.

EMGT 807. Labor and Employee Relations for the Engineering Manager. 3 Hours.
Foundation for negotiation and administration of labor agreements. Topics include labor relations; human resources management; employment practices in unionized and non-union organizations; and historical, legal, and structural environments influencing collective bargaining processes. LEC.

EMGT 808. Quality Management. 3 Hours.
Practical application of total quality management (TQM) concepts from planning through customer acceptance in technology-based organizations, focusing on understanding the concepts of the total supply chain, managerial aspects of quality, and improvement methodologies throughout. LEC.

EMGT 809. Personal Development for the Engineering Manager. 4 Hours.
Objectives, theories, and tests of engineering and management ethics and the relationship to personal values, and communications strategies. Development of career and life plans, and personal brand. Strong emphasis on the creation of both written papers and oral presentations. LEC.

EMGT 810. Applications of Quantitative Analysis in Decision Making. 3 Hours.
Practitioner-oriented presentation of managing and implementing optimization methods for improving design and decision making. Focus on methods of mathematical programming (linear, integer, and non-linear), queuing analysis, and decision analysis. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 811. Engineering Systems Simulation. 3 Hours.
Practitioner-oriented presentation of developing and using discrete-event simulation to improve engineering analysis and design, and management decision making processes, including instruction in a chosen simulation language. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 812. Law and the Design Professional. 3 Hours.
Legal doctrines relating to owners, design professionals, and contractors; contracts, including formation, rights and duties, interpretation, performance problems, disputes, and claims, standards of care and the management of construction claims, duties and obligation of the design professional, the owner, and the contractor; surety bonds and insurance; and sources of law, forms of association, and agency. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 813. Design Project Management in Professional Practice. 3 Hours.
Managing design projects, integrating perspectives of profitability and cost control, client satisfaction, and project team relations. Topics include explanation of a project manager's job via an augmented model of the Blake-Mouton grid. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 814. Leadership Techniques and Methods for the Engineering Manager. 3 Hours.
Formulating and communicating a compelling vision, convincing others to pursue that vision, and marshaling resources and talents. Coaching and public speaking. Improving decision making and communications, earning trust and building momentum, and inspiring and enabling others to excel. LEC.

EMGT 815. Business Relationships and Selling Skills. 3 Hours.
Fundamentals of business relationships and professional selling for any technical professional who would like to be more effective in "getting their message across" to external or internal customers. Relationship management, including ethical issues in business relationships. Experimental exercises on conducting and evaluating dialogues/presentations with customers, internal audiences, and upper management. LEC.

EMGT 816. Energy Management. 3 Hours.
Latest strategies for improving lighting, combustion processes, steam generation and distribution, and industrial waste re-utilization. Topics include distributed generation, energy auditing, rate structures, economic evaluation techniques, control systems, and maintenance. LEC.

EMGT 817. Mathematics for the Engineering Manager. 3 Hours.
Comprehensive math course addressing engineering managers' need for a greater understanding of mathematical concepts. LEC.

EMGT 818. Advanced Mathematics for the Engineering Manager. 2 Hours.
Supplements Engineering Management students' mathematical skills and knowledge as relevant to career needs. LEC.

EMGT 820. Developing the Engineering Manager. 3 Hours.
Integrating essential concepts and effective practices in communication, management, and leadership with the application of key organizational resources for enhanced management performance. Emphases on working with and through others, on useful human resources-oriented knowledge and skills, and on working with human resources professionals. Prerequisite: PFS 802 or equivalent, as determined by the department, or instructor consent. LEC.
EMGT 821. Strategic Analysis of Technology Projects. 3 Hours.
Strategic assessment of developmental projects, focusing on the proposed product or service, the organization, project details, and the environment. Topics include application of financial figures of merit, feasibility of competing projects, decisions under uncertainty, risk vs. return, and forecasting. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 823. Management of Internal Engineering Projects. 3 Hours.
Managing organizations’ technology-oriented projects, both as inside staff and outside consultant. Covers the entire project life cycle as reflected in the Project Management Book of Knowledge. Practical considerations addressed include material procurement, work with contractors and consultants, selecting software, and managing the project team. LEC.

EMGT 824. Product Marketing for Engineering Managers. 3 Hours.
A broad review of the major components of marketing and integration of these components, culminating in students developing marketing plans for new or existing products. Theories, principles, and practices of marketing applied to engineering managers in production or manufacturing. Prerequisite: Admission to the EMGT program or instructor consent. LEC.

EMGT 830. Case Studies in Engineering Management. 2-3 Hours.
A capstone course for the program, integrating the material presented in other courses through analysis of several engineering management case studies. Note: Research paper and presentation are part of the 3 credit hours option. Prerequisite: Must have completed of 21 credit hours in the Engineering Management program, including EMGT 810 and EMGT 821. LEC.

EMGT 835. Field Project (M.S.). 1-3 Hours.
Research on a problem in engineering management, the satisfactory completion of which satisfies the project requirement for the degree of Master of Science in Engineering Management. Prerequisite: Must have completed of 21 credit hours in the Engineering Management program, including EMGT 810 and EMGT 821. THE.

EMGT 840. Systems Approach to Engineering. 3 Hours.
Formal methods and processes in bringing complex systems into being, and improving existing systems. Topics include formal specification methods, definition of customer needs, systems life cycles, value-to-value analysis, and management of the systems engineering process. LEC.

EMGT 844. Managing Software Development Projects. 3 Hours.
Managing software development, optimizing business considerations and project demands satisfaction. Topics include project planning, cost and schedule estimation, risk measurement and control, uncertainty in specifications, cost and delivery requirements, and technology risks. Techniques presented are applicable to managing projects in other industries. LEC.

EMGT 845. Service Management for the Engineering Manager. 3 Hours.
Managing service-oriented organizations. Covers a wide array of industries, addressing service management from four primary perspectives: the basics of service science, the customer encounter, managing service operations, and the exceptional customer experience. LEC.

EMGT 848. Information Technology for Management. 3 Hours.
Developments in the field of information technology (IT), divided into two realms. First, current hardware, software, and networking technologies, involving relational databases, object-oriented design and programming, client-server technologies, and emerging communications technologies. Second, approaches to evaluating and implementing available information technology alternatives, including software development, management, and development, information integrity and security; and the effects of IT on people and organizations. LEC.

EMGT 850. Environmental Issues for Engineering Managers. 3 Hours.
Survey of environmental problems and their solution, and environmental regulations. Topics include the quantity and quality of various types of pollutants emitted to various media, and the risks posed by these pollutants; the regulatory process; and historical perspective, including pollution generation (sources), transportation, fate and effects. LEC.

EMGT 854. Management of Business Intelligence and Security for Strategic Planning. 3 Hours.
Management of competitive intelligence and security in business strategic planning is a first course at the graduate level that introduces the formal methods, concepts, and processes of competitive intelligence and security which are vital to both strategic business planning and day-to-day business operations. This course provides access to the tools used to identify what is happening in the business environment including legislation, economics, regulatory changes, competition, customers, etc. that affect a business’ strategy and operations. Further, these tools are applied to determining what will likely happen in the future and how to use those forecasts to optimize strategic and operational plans. LEC.

EMGT 860. Special Problems in Engineering Management. 1-4 Hours.
Original independent research on engineering management problems or subjects of immediate interest. May be repeated for credit to a maximum of four hours. Prerequisite: Approval of instructor. RSH.

EMGT 862. Manufacturing Systems Integration. 3 Hours.
Engineering and management-specific aspects of manufacturing and information systems integration. Engineering topics include agile, flexible, intelligent, and advanced manufacturing sub-systems; material handling and identification; vendor-specific automation; communication linkage between sub-systems; network and protocol alternatives; and hardware platform alternatives. Management topics include implementation approaches, quality management systems, long-range planning, support systems, and integration project management. LEC.

EMGT 867. Advanced Operations Management. 3 Hours.
Strategic issues and practical application of modern and advanced methods for designing and analyzing manufacturing processes and systems. Topics include: forecasting, product and service design, capacity planning, quality management, inventory management, scheduling, supply chain management, project management and simulation of manufacturing processes, and just-in-time, lean, synchronous, and agile systems. LEC.

Courses

HSCI 320. Principles of Nutrition. 3 Hours.
Applied study of the relationship of normal food and nutrition principles to health promotion in select stages of the lifecycle. Not open to those with credit in HSES 330. LEC.

HSCI 340. Introduction to Public Health. 3 Hours.
This course is an introductory course that examines public health issues in the United States and is designed to provide an overview of major health issues that impact the public’s health. The course emphasizes the essential services of public health, challenges and strategies for working with communities, and provides an overview of the United States public health system. LEC.
HSCI 420. Nutrition Through the Life Cycle. 3 Hours.
The influence of normal physiological changes on nutritional needs throughout the life span. Prerequisite: HSCI 320 or HSES 330 or instructor consent. LEC.

HSCI 421. Public Health Nutrition. 3 Hours.
The public health and nutrition concerns and services to maintain and improve the health of people living in the US. LEC.

HSCI 422. Nutrition Assessment. 3 Hours.
Methods and tools to screen and assess the nutritional status of individuals. Prerequisite: HSCI 320 or HSES 330 or instructor consent. LEC.

HSCI 425. Nutrition Education. 3 Hours.
Principles and practices used for teaching and reaching individuals and groups about nutrition to promote healthy living. Prerequisite: HSCI 320 or HSES 330 or instructor consent. LEC.

HSCI 440. Introduction to Epidemiology. 3 Hours.
This course will present the fundamentals of epidemiology including study designs, measures of morbidity and risk, types of research biases and specific epidemiology disciplines. These concepts will be illustrated with various examples of epidemiologic research and through lab exercises. LEC.

HSCI 441. Population Health. 3 Hours.
This is an introductory course that provides a population perspective on social determinants of health as well as the distribution of risk factors and disease across populations. It explores population-based approaches to explore how behavioral, social, and environmental factors influence health and methods to reduce these health disparities. LEC.

HSCI 445. Introduction to Environmental Health. 3 Hours.
This course is designed to provide a foundation for understanding how the natural and built environment affect human health in industrialized and developing countries by examining the impact of physical, chemical, and biological factors external to humans. Students will gain an understanding of the interaction of individuals and communities with the environment, the potential impact on health of environmental agents, and specific applications of concepts of environmental health. (Same as EVRN 445.) LEC.

HSCI 498. Pathways in Health Science Careers. 1 Hour.
This course provides an integrated approach through individual pre-health coaching and peer group reflection. Students will explore exercises that identify their individual strengths and align them with career goals. Through creating actionable plans, students will focus on broadening professional experiences and improving underdeveloped aspects of their application for professional programs in the health sciences. By the end of the course, students will have detailed an inventory of their professional experiences and a resume that clearly reflects them. Students will practice articulating their strengths through written materials and designing an entrance exam study plan. Through informational interviews, students will gain a clearer understanding of interprofessional teams and opportunities for alternative pathways in health careers. LEC.

HSCI 499. Topics in Health Sciences. 1-3 Hours.
This course emphasizes the practical application of student goals created in HSCI 498 through experiential learning. Students will have the opportunity to gain academic credit for shadowing, volunteering, and current employment in health-related fields. Coursework will focus on building a comprehensive application, communicating personal qualities for chosen health career, writing an engaging personal comments essay, asking for evaluation letters, and preparing for interviews. Prerequisite: HSCI 498. LEC.
intrusion prevention (firewalls), operating systems security, database security, software security, host hardening, incident and disaster response. Prerequisite: EECS 210, EECS 268 and PHSX 114 or consent of instructor. LEC.

ITEC 342. Information Security Management. 3 Hours.
The objective of this course is to present topics related to the administration and management of information security. Topics to be covered include: security fundamentals, operational issues, cost-benefit analysis, asset management, security risk management, security policies and enforcement, risk avoidance, risk prevention, risk transfer, security services, security forensics, contingency planning, security auditing. A laboratory component will provide hands-on experience with security management and administration. Prerequisite: ITEC 340 or consent of instructor. LEC.

ITEC 380. Managing IT Projects. 3 Hours.
The objectives of this course are to cover the fundamental concepts in managing IT projects. Topics include planning, executing, monitoring, controlling, and closing a project, designing a comprehensive project management plan, developing strategies in managing complexity in large projects, and understanding agility in project management. Project management concepts such as planning, scheduling, cost and effort estimation, risk analysis and mitigation, human resources management, communication management, and stakeholder management will be presented in detail. Prerequisite: EECS 210, EECS 268 and PHSX 114 or consent of instructor. LEC.

ITEC 399. Directed Reading in ITEC. 1-4 Hours.
Reading under the supervision of an instructor on a topic in Information Technology. The topic, expected outcome, evaluation criteria, and the number of credit hours must be mutually agreed on by the student and the instructor. Course may not be used to fulfill major elective requirements. Consent of the department required for enrollment. Prerequisite: Instructor permission required. LEC.

ITEC 410. Software Engineering and Management. 3 Hours.
This course introduces the software development life cycle and key concepts related to software engineering. Topics include software process models, software project management, software requirements engineering, formal and informal modeling, software architecture, software design, coding and implementation, software testing and quality assurance, software deployment, and software evolution. Additional topics such as software metrics and measures, application domains, software engineering standards, and software configuration management will also be presented. This is a project-driven course. Prerequisite: ITEC 380. LEC.

ITEC 411. Database Design. 3 Hours.
The objective of this course is to present key concepts related to database design and implementation. Topics to be discussed include: database architecture, relational data model, SQL, database design life cycle, conceptual data modeling, relational database normalization, query processing, transaction processing, database security, and database administration. This is a project-driven course. Prerequisite: ITEC 330. LEC.

ITEC 416. System Integration and Architecture. 3 Hours.
This course introduces system integration and architecture. Key concepts to be presented include: system architecture, system requirements, organizational context, acquisition and sourcing, system and component integration, middleware platforms, design patterns, integrative coding, scripting coding, testing and quality assurance, system deployment. Prerequisite: ITEC 410. LEC.

ITEC 420. Operating Systems. 3 Hours.
This course introduces operating systems principles and associated key concepts. Topics to be discussed include: processes and threads, concurrency, scheduling and dispatch, memory management, processor management, device management, security and protection, file system, disk scheduling, real-time and embedded systems, fault tolerance, scripting, and an introduction to virtualization. Prerequisite: ITEC 320. LEC.

ITEC 422. Computer Networks. 3 Hours.
Foundations of computer networking with practical applications and network administration, with emphasis on the Internet and wireless public switched telephone network. Topics to be covered include routing and switching, routing algorithms, physical layer, data link layer, network layer, network security, network management, and application areas. Prerequisite: ITEC 320. LEC.

ITEC 424. Network Security. 3 Hours.
This course covers the fundamental concepts, principles, and mechanisms in network and distributed system security. The topics that will be covered include: network security primitives, distributed authentication, key management, secure communication protocols, firewalls, intrusion detection, traffic monitoring and analysis, email and Web security, etc. Prerequisite: ITEC 340 and ITEC 422. LEC.

ITEC 430. Human-Computer Interaction. 3 Hours.
This course introduces principles of human-computer interaction. Important topics to be presented include: human factors, human-centered design and evaluation, graphical user interfaces, multimedia system integration, interactive systems development, computer-supported cooperative work, human cognitive skills, accessibility, alternative input/output media, and emerging technologies. Prerequisite: Completion of nine credits of ITEC 300-level coursework or consent of the instructor. LEC.

ITEC 440. Cloud Computing. 3 Hours.
This course introduces principles of cloud computing and the business and computing technology trends that enable and necessitate its use. Cloud computing and its engineering and delivery models, Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS), will be covered. Cloud-based and RESTful web services for developing new applications and offering new services will be discussed. Topics related to cloud computing security, identity, auditing, and authorization management will be presented. The course will be project based and an existing cloud computing platform (e.g., Amazon AWS) will be used for projects. Prerequisite: ITEC 320 or consent of the instructor. LEC.

ITEC 450. Social and Professional Issues. 3 Hours AE51.
This course will provide an overview of the history of computing and presents key concepts related to the social and professional aspects of IT. Topics to be covered include: pervasive themes in IT, social context of computing, intellectual property, legal issues in computing, professional and ethical issues and responsibilities, privacy and civil liberties. Prerequisite: Completion of nine credits of ITEC 300-level coursework or consent of the instructor. LEC.

ITEC 452. Special Topics in ITEC: ______. 3 Hours.
This course introduces a special topic of current interest in information technology, offered as the need arises. May be repeated for additional credit. Prerequisite: Upper-level ITEC eligibility and consent of instructor. LEC.

ITEC 490. ITEC Capstone I. 3 Hours AE61.
Capstone is a senior level course designed to allow a student to review, analyze, integrate, and apply technical knowledge in a meaningful and
practical manner. The student will be expected to complete an approved academic project in IT that may be in collaboration with an industrial partner. Prerequisite: Corequisite: ITEC 410. LEC.

ITEC 492. ITEC Capstone II. 3 Hours.
ITEC Capstone II is a continuation of ITEC Capstone, is a senior level course designed to allow a student to review, analyze, integrate, and apply technical knowledge in a meaningful and practical manner. The student will be expected to complete an approved academic project in IT that may be in collaboration with an industrial partner. Prerequisite: ITEC 490. LEC.

Courses

PFS 730. Writing and Speaking for Decision Makers. 3 Hours.
This course is an advanced level communication skills course focused on developing and refining managerial-level business writing and presentation skills. Course assignments and activities provide practice and expert feedback on these core professional skills. Course content offers research-based insights to develop one’s ability to assess various stakeholders’ needs, motivations and values, while also addressing critical situational needs and relational concerns in a variety of workplace communication scenarios. Participants learn to craft communication that is thoughtful, strategic, research-backed, and designed to signal their readiness for additional career development opportunities. LEC.

PFS 801. Interpersonal and Persuasive Communication Skills for Managers. 3 Hours.
This course examines how communication practices and patterns influence employee engagement, team productivity, organizational cultures, and individual career development. In short, this course centers communication as the primary way people organize, build relationships and get things done in organizations. Factors influencing what makes communication “effective” in various contexts and relationships will be identified, providing you a toolkit for enhancing team effectiveness and business outcomes, as well as facilitating your individual career advancement. Course activities and assignments are designed to build self-awareness and global workplace communication competencies, with a focus on situational awareness and personal adaptability. The course is designed to differentiate KU graduates by providing a powerful set of research-based communication concepts and frameworks for use in diagnosing and meaningfully addressing the most common work and career-related challenges facing mid-career professionals in today’s increasingly complex, diverse and ever-changing organizations. LEC.

PFS 802. Managing Teams and Leading People. 3 Hours.
This course examines the foundational body of knowledge relating to effective organizational management and leadership. Beginning with an exploration of the essential differences between management and leadership, the course then addresses such topics as leading with emotional intelligence, change management, organizational culture, individual and team performance coaching and management, innovation theories, stakeholder analysis, and personal brand development. LEC.

PFS 803. Financial Management for Professional Success. 3 Hours.
This course introduces the concepts and applications of financial planning and management for professional managers working in diverse professional environments. Topics include time value of money, asset valuation, capital structures and budgeting, financial analysis and cash flow, and project and operations decision-making. This “finance for non-financial managers” course equips managers with the fundamental knowledge and skills to operate a unit in collaboration with their organization’s financial professionals. LEC.

PFS 804. Project Management for Professionals. 3 Hours.
This course introduces the project management body of knowledge with a focus on developing project management plans for use in diverse professional environments. The project life cycle is covered from inception to closeout with an emphasis on project scope, budget, schedule, and risk; and practical application of stakeholder, procurement, resource, quality, and communication management. The course will be valuable to managers of units, teams and organizations either to directly manage projects of various types or have a strong understanding of what to expect from formal project managers. LEC.

PFS 810. Organizational Communication Strategies. 3 Hours.
This course addresses key communication processes in organizations, including developing effective workplace relationships and nurturing organizational cultures and team work in increasingly complex, global organizations. Topics include change management communication strategies, how organizational hierarchies and other structures influence communication flows, the role of different social group identities in shaping individual's experiences within organizations, and managing virtual teams. Students will be able to identify the influence of organizational culture, power dynamics, and communication ethics on workplace communication patterns and outcomes, and will craft communication strategies to enhance workplace cultures, project outcomes and personal leadership communication skills. SEM.

PFS 821. Employee Onboarding and Role Development. 3 Hours.
This course explores the communication dynamics that facilitate employee onboarding and integration for new hires and newly promoted supervisors, managers and leaders. Content and activities will explore the challenges and opportunities embedded in the socialization process for individuals and organizations, including the hidden communication complexities of role transitions, including navigating expectations of colleagues, understanding the dynamics of the personal identity shift one must navigate during transition, and balancing the desire to affect change with the pressure to assimilate into organizational expectations. Participants will design an onboarding and communication plan for a workplace socialization need of their choice. LEC.

PFS 823. Organizational Change and Communication. 3 Hours.
This course explores communication processes embedded in organizational change, with a specific focus on identifying the needs, expectations and values of various stakeholders who will be participating in and/or affected by an organizational change. Course focuses on understanding change as an inherently communicative process (rather than only a business strategy). Participants will learn to identify a full range of internal and external stakeholders, recognize the root causes of stakeholder concerns, and understand common sources of “resistance” to change at every level of an organization. Participants will develop a comprehensive communication plan and sample communication documents to engage the full range of stakeholders in change planning, implementation and long-term integration into organizational culture and structures related to a change of their choice. LEC.

PFS 825. Communication Practices for Inclusive Organizations. 3 Hours.
This course examines the challenges and opportunities facing individuals in organizations. Weekly discussion and assignments will examine the challenges and opportunities employees/members face based on navigating organizational structures, workplace cultures and leadership actions. Participants will develop strategies to build inclusive workplace around race, gender, age, sexuality, (dis)ability, socioeconomic status, and other social identities. Challenges and opportunities related to intersectional identities will be explored as well. The class has an applied, practical focus featuring weekly guest speakers and focus on becoming
more aware of forms of personal privilege and becoming advocates for meaningful change within organizations. LEC.

PFS 827. Communication Ethics for Managers and Leaders. 3 Hours. This course examines current leadership communication and workplace culture issues through a lens of communication ethics. The course uses several frameworks for identifying ethical issues in the communication used to organize people and ideas within organizations and communities. Communication ethics and related power dynamics shaping communication processes and outcomes will be explored related to employee engagement campaigns, corporate communication tactics, leadership and management communication practices, conflict resolution practices within organizations, and communicating organizational change. Participants will gain skills and confidence to recognize and actively engage with the communication ethics concerns embedded in today’s daily workplace interactions, leadership and management communication, decision-making processes, organizational policy creation, and corporate communication initiatives. LEC.

PFS 829. Communicating Across Workplace Generations. 3 Hours. This course explores the dimensions of the popular “generations” framing of age-related diversity in the modern workplace. This course will unpack and challenge the concept of “generations” and its implications for workplace cultures, policies, leadership and career development practices. Course will explore different types of generations that emerge within organizations related to factors like workplace cohort, team dynamics and individual lifestyle. Organizational communication assumptions, patterns and practices will be centered as a factor in shaping the individual experiences of these generational members, with the goal of identifying new strategies for stimulating meaningful, productive cross-generational working relationships, mentoring and collaboration across organizations. LEC.

PFS 831. Case Studies in Organizational Communication. 3 Hours. This course explores the ways we organize ourselves through communication, both within and beyond traditionally-structured organizations. We'll examine traditional, new and emerging messages, practices and structures used to organize people across traditional boundaries. The course will explore “hidden” forms of organization that shape our personal experiences and public discourse, ranging our informal professional networks to a variety of online “dark web” groups organizing followers around non-traditional belief systems. Discussion will explore the role of loss of trust in formal institutions, technology and social media, and groups seeking to intentionally disrupt and dismantle traditional forms of organization. Participants will recognize the full range of ways communication can be used to (dis)organize groups, create new organizations and social movements, and influence public discourse and organizations. LEC.

PFS 833. Communication and Team Development. 3 Hours. This course will explore team development through the lens of communication, exploring requisite individual teaming skills, team-level processes and organizational-level norms and structures. The course will provide research-based insights to help team managers and leaders facilitate more effective team onboarding, decision-making and conflict management processes across organizational structures, while recognizing individual difference and utilizing inclusive communication practices that fuel rewarding teamwork, positive project outcomes and career development for all. Course content will discuss necessary forms of organizational-level sponsorship, structures, technology access, and training necessary to support team communication and development. This course will be especially helpful for those serving in (or seeking to advance into) team management and leadership roles. LEC.

PFS 835. Interpersonal Communication Skills at Work. 3 Hours. This course provides research-based interpersonal communication insights for developing personal effectiveness across increasingly global, complex and resource-constrained organizations. Course content and activities will help professionals work on personal skill development related to building effective working relationships, initiating difficult conversations, navigating conflict, building internal and external networks, effectively advocating for self and others, and demonstrating a commitment to personal communication ethics. Insights and skill practice will focus on developing a personal communication skillset for working effectively across various situations, cultural contexts and stakeholder groups. Content will be helpful for both individuals and leaders recognizing the need to further develop their interpersonal skills in various workplace settings. LEC.

PFS 837. Communication Strategies for a Virtual Workforce. 3 Hours. This course explores the communication challenges and opportunities presented by remote work in geographically dispersed organizations. Course content and activities will explore how leaders, managers and front-line staff can utilize communication-based relationship-building skills, as well as project planning, meeting facilitation and technological tools to build productive working relationships, stronger teams and optimal productivity across multiple workplace structures, cultures, project teams, time zones and geographies. Participants will gain valuable insights about the human needs embedded in virtual work as well as gain practical skills needed for leading successfully in a virtual work environment. LEC.

PFS 839. Conflict Dynamics in Organizations. 3 Hours. This course explores the multiple sources and levels of conflict in organizations. Course content will help participants recognize and address the historical and cultural roots of conflict in organizations. Course activities will help develop the individual insights and communication skills necessary to initiate meaningful change to conflict management processes within teams and organizations, with the goal of facilitating more equitable, fair and trusting work relationships, communication flows, and positive outcomes for all. This course will be especially helpful for those looking to advance into management and leadership positions. LEC.

PFS 841. Intercultural Communication in Organizations. 3 Hours. This course explores the intercultural communication dynamics that influence individual work satisfaction, workplace relationships, team effectiveness and project outcomes across an increasingly global workforce. Course content and activities will focus on understanding how national and regional cultural differences influence group and team dynamics. Special focus will be on de-centering one’s own cultural norms and personal preferences and adapting to engage in communication that signals respect for cultural difference at work. Topics will include developing personal awareness, appreciation and skills required to respectfully and effectively engage difference related (but not limited) to language, time, gender, family status, religion, and the role of organizational hierarchies in shaping colleagues’ communication at work. Course will focus on how to adapt to these areas of difference and using strategies for integrating flexibility while collaborating with diverse colleagues to achieve shared organizational goals. LEC.

PFS 850. Interview-Based Research in Organizations. 3 Hours. The course provides hands-on practice designing an interview or focus-group based research project. Activities build skills related to project design, managing sponsor and stakeholder pressures, interview questions crafting, managing interview dynamics, ensuring confidentiality and research ethics, conducting data analysis, crafting findings, report writing, delivering a final presentation to stakeholders. Major course activity
involves working with sample data and crafting a future research proposal for an organization selected by the participant. LEC.

**PFS 860. Exploring Communication Theory. 3 Hours.**
This course involves exploring the theories that provide deeper insight into underlying individual, group, organizational and societal level factors influencing communication patterns, practices and policies in organizations. This course provides a solid understanding of the unique value of the communication studies lens for examining common workplace communication issues at the individual, team and organizational levels. Participants will leave the course with a toolkit of organizational communication concepts and theories for better understanding “what’s really going on here,” providing a powerful set of insights for identifying, unpacking and addressing common issues related to coworker relationships and conflict, managerial and leadership communication, diversity and inclusion, and workplace culture, to name just a few. LEC.

**PFS 895. Independent Study in Organizational Communication. 1-3 Hours.**
This course is reserved for students working independently with faculty supervision to study a topic of interest. The specific topic and related readings, assignments and meeting schedule will be worked out between the faculty member and individual student(s) and pre-approved by the faculty member leading the independent study. A permission code is required to register for PFS 895 course hours. LEC.

**PFS 898. Capstone Project in Organizational Communication. 3 Hours.**
This course is reserved for students working on the capstone project required to complete the degree in organizational communication. The specific topic, research method, organizational sponsor, and meeting schedule will be worked out between the supervising faculty member and individual student(s). The capstone project must be pre-approved by the faculty member supervising the capstone project. Prerequisite: Consent of department or instructor. LEC.

**Courses**

**PMGT 800. Special Topics: ______. 3 Hours.**
Advanced or experimental work of specialized nature representing unique or changing needs and resources in project management. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 802. Innovation and Change Management Process. 3 Hours.**
This course will examine innovation models and change management process utilized by successful organizations. The course will emphasize how these concepts relate to project management within an organization and the management of technical operations. The course will address the following topics: -Key models for innovation and how they impact planned change processes -Key organizational factors that impact planning for change -Strategies for change within project work -Resistance to change within planned change process -Ethical considerations relating to change management LEC.

**PMGT 806. Finance for Project Manager. 3 Hours.**
A study of finance including financial planning and management in technological based organizations. Topics covered include financial statement analysis, present value of financial markets, capital budgeting, taxes, investment decisions, replacement decisions, cash flow budgets and sources of capital. LEC.

**PMGT 808. Lean Six Sigma. 3 Hours.**
This course is an introduction to the principles of implementing the Lean Six Sigma philosophy and methodology. Lean Six Sigma is a total enterprise philosophy. Topics follow the DMAIC process and include tools and methods such as process flow diagrams, cause and effect diagrams, failure mode and effects analysis, capability studies, and design of experiments. The use of various concepts to reduce waste and improve system performance such as process flow, standardized work, value streams, workplace organization, and visual controls are covered. Course Objectives: -Understand and apply the Six Sigma DMAIC model for improvement activities. -Utilize Six Sigma knowledge and skills to lead successful improvement projects that deliver meaningful results. -Facilitate the use of improvement tools and techniques in improvement projects. LEC.

**PMGT 809. Personal Development for Project Managers. 4 Hours.**
Concepts and skills development in the primary areas of communication methods, ethical behavior, conflict resolution, workforce diversity, and continuous learning, and secondary areas of basic project and project team contexts and related interpersonal relations. Career development is emphasized. LEC.

**PMGT 810. Financial Management. 3 Hours.**
A study of the concepts and applications of financial planning and management for project and operational managers. Topics include time value of money, asset valuation, capital structures and budgeting, financial analysis and cash flow, and project and operational investment decision-making. Course Objectives: -Knowledge and understanding the principles of financial planning and management. -Knowledge and skills with corporate structures, financial institutions, and investments. -Knowledge and skills with financial reports including balance sheets, income statements and financial ratios. -Ability to apply time valuations, cash flows, and taxation in project and operational environments. -Ability to apply capital structures and budgeting in project and operational decisions. LEC.

**PMGT 811. Project Contracts and Procurement. 3 Hours.**
An advanced study of the project procurement and contract administration bodies of knowledge and their applications. The project procurement's place in a supply chain life cycle is covered from needs identification to contract closeout with emphasis on requirements definition, vendor selection, contract negotiation and award, service delivery, and performance monitoring. Course Objectives: -Knowledge and understanding of the theories, principles, and benefits of the project procurement life cycle. -Knowledge and application of procurement planning and contract administration best practices, processes, and tools. -Practical application of the project management body of knowledge specific to project procurement management. -Practical application of the supply chain and commercial business body of knowledge specific to contract award, execution, and closeout. LEC.

**PMGT 816. Project Management Fundamentals I. 3 Hours.**
Managerial concepts and skills development in relation to the project-oriented business environment, project lifecycle, integrated project management, project selection, and project initiation. Focus is on management of a single project. LEC.

**PMGT 817. Project Management Fundamentals II. 3 Hours.**
Planning concepts and skills development in relation to developing needed information on project scope, time, cost, and risk, and making direct use of such information to develop key documentation such as the project schedule and budget. Examples of specific topics considered include project work content and change, documentation, and resource requirements. Planning content is complementary to that of PMGT 818. Prerequisite: PMGT 816. LEC.

**PMGT 818. Project Management Fundamentals III. 3 Hours.**
Concepts and skills development in relation to planning for management of communications, human resource aspects of project team formation
and development, procurement, and quality. Examples of specific topics considered include information handling, reporting, and stakeholder relationships. Planning content is complementary to that of PMGT 817. Prerequisite: PMGT 816. LEC.

**PMGT 819. Project Management Fundamentals IV. 3 Hours.**

Concepts and skills development in relation to project execution, including processes monitoring and controlling, and project closure. Examples of specific topics considered include handling change requests, procurement, teamwork and team development, and cost management. Course content represents systematic treatment of all aspects of project management beyond planning-but is, in project execution and closing phrases. Prerequisite: PMGT 816. LEC.

**PMGT 820. Management of New Product Development Projects. 3 Hours.**

This course discusses how to properly manage new product development processes using project management tools and techniques. New products are not projects until they are analyzed, planned, scheduled, budgeted, managed, and controlled by managers. It is not typically technical process issues that result in failed new product introductions, but rather a failure in their management and marketing. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, PMP Certified. LEC.

**PMGT 821. Management of Consulting Projects. 3 Hours.**

Application area course exposing students to specialized knowledge, standard, and regulations involved in managing consulting projects. Attention is directed to unique characteristics of consulting project environments, major project phases-from selection to closing-and related management processes. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 822. Management of Governmental Projects. 3 Hours.**

Application area course exposing students to specialized knowledge, standards, and regulations involved in managing projects for governmental entities. Attention is directed to unique characteristics of the governmental project environments, major project phases-from selection to closing-and related management processes. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 823. Risk Management for Project Managers. 3 Hours.**

Advanced study of risk management theory and practice as applied in managing projects. Basic concepts and methods of risk management are reviewed-such as qualitative and quantitative risk assessment-and details then examined. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 824. Project Cost Estimation, Analysis, and Control. 3 Hours.**

Advanced study of cost estimation methodology, cost engineering, and cost control applicable in project management. Includes review of commonly used supportive software. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 825. Portfolio Analysis and Program Management. 3 Hours.**

Review practices and processes to achieve organizational objectives by utilizing portfolio analysis and program management. Project evaluation and selection, funding, and performance tracking processes will be examined as well as the facilitation of these efforts across multi-tiered organizations. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 827. Project Team Management and Development. 3 Hours.**

Concepts and methods of team and team member development, achieving higher-performance teams while satisfying organizational expectations. Specific topics include management concepts and practices, team dynamics, and interpersonal skills in negotiation and conflict resolution. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 828. Management of Global Projects. 3 Hours.**

Survey of management challenges in conducting international projects, emphasizing cross-culture issues. Differences across world regions and selected key countries in relation to communication and interpersonal norms, business conventions, and legal systems will receive particular attention. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 829. Management of Distributed Project Teams. 3 Hours.**

Concepts and methods of conducting high-performance, multi-site team operations, focusing on intra-team communication, coordination, and control. Incorporates review of practical technologies with emphasis on web-enabled approaches. Prerequisite: PMGT 816, Project Management-Master of Engineering plan code, or PMP Certified. LEC.

**PMGT 830. Case Studies in Project Management. 1-3 Hours.**

Reinforcement and demonstration of developing project management skills through case analysis and discussion. Goal is integration of learning across all core courses, and also drawing on content from general management, applications area, and advanced project management elective courses taken. Emphasis is on integrated project management. The students will document their project in a written report and present their project during the final oral examination to the Project Management faculty and student’s employer or representative if practical. Prerequisite: Must have completed 21 PMGT credit hours and have completed PMGT 816, PMGT 817, and PMGT 818. LEC.

**PMGT 833. Management of Internal Projects for Scientists and Technical Professionals. 3 Hours.**

The purpose of this course is to introduce the student to all aspects of managing a project within a company or organization. The entire project life cycle will be covered from inception to close-out, and many practical considerations will be discussed including material procurement, working with contractors and consultants, selecting software, and managing the project team. The course will focus on how to manage project scope, schedule budget, and resources using personal computer software. A semester project is required presenting an example of project management or investigating some aspect of project management in detail. LEC.

**PMGT 835. Project Management Capstone. 1-3 Hours.**

The capstone serves as a culminating experience for this degree. Students will develop an applied workforce project or benefit to in the student’s place of employment for full time students. The students will document their project in a written report and present their project during the final oral examination to the Project Management facility and student’s employer or representative if practical. This course can be taken up to three times for a maximum of three credits. Prerequisite: Must have completed 21 PMGT credit hours and have completed PMGT 816, PMGT 817, and PMGT 818. LEC.

**PMGT 860. Project Management Independent Study. 1-4 Hours.**

Graduate-level independent study of problems or subjects of immediate interest to a student or faculty member. Project topic to be agreed upon in advance with supervising faculty member. May be repeated for credit up to a maximum of four hours in the degree program. Prerequisite: Consent of instructor. IND.
Bachelor of Applied Science in Biotechnology

Biotechnology Program

Grounded in biological sciences, chemistry and advanced technology, biotechnology employs biological systems to solve scientific challenges that impact society. Through this program, you will be equipped for diverse career options in fields such as:

- Medical education or professions
- Food science
- Environmental and agricultural sciences
- Animal health
- Pharmaceuticals

In this unique program, you will not be assessed based on your ability to memorize an array of facts but by your ability to reference facts, formulate an approach and integrate data to solve problems.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Biotechnology

KU Edwards Campus

The undergraduate program in biotechnology is offered in its entirety only at the KU Edwards Campus (http://edwardscampus.ku.edu/), 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate’s degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor’s degree.

B.A.S. in Biotechnology

Biotechnology is grounded in biological sciences, chemistry and advanced technology. Biotech scientists employ biological systems to solve scientific challenges and positively impact our society. The medical, food, environmental and agricultural sciences, as well as the animal health and pharmaceutical industry, are all considered part of the biotechnology field. Contact the your academic success coach (https://edwardscampus.ku.edu/program-advisors/) for more information.

Requirements for the Bachelor of Applied Science Degree in Biotechnology

General Education Requirements

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

### Major Hours
Satisfied by 47 hours of major courses.

### Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

### Major Junior/Senior Hours
Satisfied by a minimum of 45 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator ([http://clas.ku.edu/undergrad/tools/gpa/](http://clas.ku.edu/undergrad/tools/gpa/)).

Below is a sample 4-year plan for students pursuing the BAS in Biotechnology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website ([http://kucore.ku.edu/courses/](http://kucore.ku.edu/courses/)).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to the freshman year, fall semester.

### Total Hours 120-121

1. Concurrent or prior enrollment in CHEM 130 is required.
2. CHEM 135 is offered at the Lawrence campus in Fall, Spring and Summer semesters. BIOL 350 is a Fall only course offered at the Edwards campus. BIOL 350 is a Fall only course offered at the Edwards campus.
3. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.
4. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

Please note:
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Arts and Bachelor of General Studies in American Sign Language and Deaf Studies

Culture and language intertwine in the Bachelor of Arts (BA) and Bachelor of General Studies (BGS) in American Sign Language (ASL) and Deaf Studies. Gain an understanding of Deaf studies and social justice, advanced ASL and interpreting. This degree consists of tracks designed for those who have completed a minimum of ASL I-IV, Deaf and heritage language users, working interpreters and graduates of Interpreter Education Programs.

Coursework and skill development provides a strong foundation in language and cultural education for those interested in fields such as social work, education, legal, medical, ASL/English interpretation and more. In addition, Deaf or hearing, heritage ASL users gain a deeper understanding of their home language and culture while earning a valuable professional credential.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

The major requires as total of at least 30 credit hours (completed through 10 courses at three credit hours each). Students are recommended to consult with their academic success coach prior to enrolling in course work to ensure that all pre-requisites are met.

</table>
The major requires a total of 30 credit hours (completed through 10 courses at three credit hours each).

2 Elective courses can be ASL courses or topics from other disciplines. Students are encouraged to utilize elective options to pursue a minor or certificate program.

3 The University of Kansas Edwards Campus only teaches classes at the Junior and Senior level. Students are recommended to meet with their Academic Success Coach/Advisor each semester to ensure that the degree requirements are met. This is a suggested semester-by-semester degree completion plan based on the transfer pathway from JCCC’s Associates of Arts program with the ASL Certificate. Students may follow the course sequencing above, but are not required to complete the course work in this order.

**Bachelor of Health Sciences**

KU’s online Bachelor of Health Sciences is a degree completion program that provides students hoping to enter health science professions the opportunity to strengthen their background in content related to their anticipated healthcare profession. The program also lets students explore elective courses that help them concentrate their knowledge in areas including nutrition, public and population health, and health management and policy. Students should be sure to discuss their longterm plans with their academic success coach for help selecting the best courses for their desired educational pathway and career.

The field of health sciences covers a variety of in-demand professions, including public health, health care, nutrition and more. Someone with a bachelor’s degree in health sciences might apply their knowledge in the following ways:

- Continuing to graduate school in a variety of specialized areas in health care or medicine
- Entering healthcare administration or continuing to graduate school in healthcare administration
- Researching and implementing public health initiatives
- Advising local or state governments regarding elements of healthcare or public health policies

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

The Bachelor of Health Science (BHS) degree will be a JCERT funded 100% online completion degree for students transferring from community colleges or KU Lawrence. Elective courses will afford students the ability to concentrate in the following areas focus; Nutrition, Public and Population Health, and Health Management and Policy. BHS degrees will prepare students to directly enter the workforce or continue on to pursue graduate education in Public Health, Hospital Administration, Nutrition and Dietetics, among other Health related management graduate degrees.

The proposed Bachelor of Health Sciences program is unique because it draws upon coursework from multiple programs and disciplines. The flexible curriculum of this science program allows students to create an academic experience consistent with their health care career goals.

The proposed Bachelor of Health Sciences degree is comprised of six parts:

**Total Hours 120**

1. Concurrent or prior enrollment in CHEM 130 is required.
2. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

### Please note:

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Bachelor of Science in Information Technology

### Bachelor of Science in Information Technology Program

Graduates who have earned a bachelor's degree in information technology will combine technical expertise with modern problem-solving and communication skills to plan, configure, implement, integrate, and maintain computing and information technology solutions for an organization's computing infrastructure.

The undergraduate program in Information Technology is offered in its entirety only at the KU Edwards Campus, 12600 Quivira Rd., Overland Park, KS 66213. Students considering this degree option should contact the Information Technology academic success coach on the Edwards Campus, bst@ku.edu, or 913-897-8623 for advising.

This program is funded by the Education and Research Triangle (http://edwardscampus.ku.edu/johnson-county-education-research-triangle/) initiative.
The successful completion of the following requirements is needed for admission into the B.S. in Information Technology program:

### Code | Title | Hours
--- | --- | ---
Satisfy GE 2.1 (Typically completed with ENGL 101 and ENGL 102.) (Recommended) | 6
Satisfy GE 2.2 (Typically completed with COMS 130, COMS 322, or JOUR 150.) (Recommended) | 3
Satisfy KU Core Goal GE3N (Recommended) | 4-5
Satisfy KU Core Goal GE3S (Recommended) | 3
Satisfy KU Core Goal GE3H (Recommended) | 3
Satisfy KU Core Goal AE4.1 or AE 4.2 (Recommended) | 3
MATH 101 College Algebra: _____ | 3
or MATH 103 Trigonometry | 3
or MATH 104 Precalculus Mathematics | 3
or MATH 115 Calculus I | 3
or MATH 125 Calculus I | 3
or MATH 290 Elementary Linear Algebra | 3
PHSX 114 College Physics I (Meets KU Core goal GE 1.1) | 4
or PHSX 210 General Physics I for Engineers | 4
& PHSX 216 and General Physics I Laboratory | 4
or PHSX 211 General Physics I | 4
Discrete Structures I | 2
Discrete Structures II | 2
Programming Fundamentals | 2
EECS 168 Programming I | 4
EECS 268 Programming II | 4
UNIX Scripting and Utilities | 3
Database Management | 3
ITEC 310 Computer Organization and Platform Technologies | 3
ITEC 320 System and Network Administration | 3
ITEC 330 Web Systems and Technologies | 3
ITEC 340 Computer and Information Security | 3
ITEC 342 Information Security Management | 3
ITEC 410 Software Engineering and Management | 3
ITEC 416 System Integration and Architecture | 3
ITEC 420 Operating Systems | 3
ITEC 422 Computer Networks | 3
ITEC 430 Human-Computer Interaction | 3
ITEC 450 Social and Professional Issues (Satisfies AE 5.1) | 3
ITEC Capstone I (AE 6.1) | 3
ITEC Capstone II | 3

### Bachelor of Science in Information Technology Degree Requirements

#### The KU Core

This is the university-wide curriculum that all incoming undergraduate students will complete as part of their degree requirements. It comprises three general education goals and three advanced education goals. Associated with each goal is one or more learning outcomes:

- GE 1.1, Goal 1/Outcome 1, Critical Thinking;
- GE 1.2, Goal 1/Outcome 2, Quantitative Literacy;
- GE 2.1, Goal 2/Outcome 1, Written Communication;
- GE 2.2, Goal 2/Outcome 2, Oral Communication;
- GE 3H, Goal 3/Outcome 1, Arts & Humanities;
- GE 3N Goal 3/Outcome 2, Natural Sciences;
- GE 3S Goal 3 /Outcome 3, Social Sciences;
- AE 4.1, Goal 4/Outcome 1, Diversity;
- AE 4.2 Goal 4/Outcome 2 Culture;
- AE 5.1, Goal 5/Outcome 1, Social Responsibility & Ethics (course);
- AE 5.2, Goal 5/Outcome 2, Social Responsibility & Ethics (practice);
- AE 6.1, Goal 6/Outcome 1/2, Integration & Creativity.

Details of the KU Core can be found at kucore.ku.edu. Some required courses in the IT curricula satisfy a KU Core goal and/or outcome. For these courses, the goal/outcome code is given in parentheses after the course on the pages below. Where required courses do NOT specifically satisfy KU Core goals (Goals 2, 3, and 4) students must choose from a list of several means to satisfy the required goals.

A minimum of 120 credit hours is required for the B.S. in Information Technology, as follows:

### Code | Title | Hours
--- | --- | ---
Programming Fundamentals | 2
EECS 168 Programming I | 4
EECS 268 Programming II | 4
UNIX Scripting and Utilities | 3
Database Management | 3
ITEC 310 Computer Organization and Platform Technologies | 3
ITEC 320 System and Network Administration | 3
ITEC 330 Web Systems and Technologies | 3
ITEC 340 Computer and Information Security | 3
ITEC 342 Information Security Management | 3
ITEC 410 Software Engineering and Management | 3
ITEC 416 System Integration and Architecture | 3
ITEC 420 Operating Systems | 3
ITEC 422 Computer Networks | 3
ITEC 430 Human-Computer Interaction | 3
ITEC 450 Social and Professional Issues (Satisfies AE 5.1) | 3
ITEC Capstone I (AE 6.1) | 3
ITEC Capstone II | 3

### Mathematics

- Discrete Structures I
- Discrete Structures II
- Programming Fundamentals
- EECS 168 Programming I
- EECS 268 Programming II
- UNIX Scripting and Utilities
- Database Management

1. Means of satisfying KU Core Goals are chosen from a variety of options (see kucore.ku.edu). Hours listed are assuming the goals are satisfied with course work.
2. This specific course is not offered at KU, however an equivalent course from KU may be substituted. Consult your advisor.
3. No equivalent course is offered at KU; it must be transferred from a different college or university. Consult your advisor.
Information Technology 4-Year Graduation Plan

The undergraduate program in Information Technology is offered in its entirety only at the KU Edwards Campus in Overland Park, 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate's degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor's degree.

Students planning to attain the degree will need to transfer key credits from other academic institutions as not all required courses are available through KU.

Students considering this degree option should contact the Information Technology advisor on the KU Edwards Campus, bsit@ku.edu, or 913-897-8623 for advising on the first two years of study.

12-14 credit hours of elective coursework is typically needed to meet the 120 credit hour requirement.

1 Means of satisfying KU Core Goals are chosen from a variety of options (see kucore.ku.edu (http://kucore.ku.edu)). Hours listed are assuming the goals are satisfied with course work.

2 This specific course is not offered at KU, however an equivalent course from KU may be substituted. Consult your advisor.

3 No equivalent course is offered at KU; it must be transferred from a different college or university. Consult your advisor.

4 Two required courses in the ITEC curricula are currently under review to satisfy GE 1.1 and AE 5.1. Please check with an advisor for current information on completing these KU Core goals.
Undergraduate Certificate in Advanced American Sign Language

The Advanced American Sign Language certificate is designed for students who are looking to enter ASL and/or ASL interpreting fields. Alternatively, this certificate could serve students who are sufficiently proficient and fluent in both American Sign Language and English to pass a language proficiency entrance exam. These individuals in this latter category may be Deaf or hearing heritage ASL users. This certificate may also benefit working interpreters or educators working with the Deaf community, who have basic knowledge of ASL, but would like to improve their skills.

The Advanced ASL Undergraduate Certificate is a 15 credit hour certificate that allows students to select one of the two tracks:

**Professional ASL/English Interpreting Track**

**Professional ASL/English Interpreting Track**

**Introduction to ASL/English Interpreting Certificate**

The ASL/English Interpreting Undergraduate Certificate is a 15 credit hour certificate that allows students to select one of the two tracks: the **Professional ASL/English Interpreting Track** or the **Introduction to ASL/English Interpreting Certificate**.

The **Professional ASL/English Interpreting Track** requires students to sit for the NIC and BEI national certification exams so they are eligible for state credentialing in KS and MO. Students in KS who pass the performance certification exam are eligible to register in KS as an interpreter. The website [http://www.dcf.ks.gov/services/RS/Pages/KCDHH/KQAS.aspx](http://www.dcf.ks.gov/services/RS/Pages/KCDHH/KQAS.aspx) provides information about KS interpreter registration. Students in MO who pass the MO certification exam are eligible to seek licensure in MO as an interpreter. The website [https://mcdhh.mo.gov/interpreters/](https://mcdhh.mo.gov/interpreters/) provides information about MO interpreter certification and licensing. If you plan to obtain a license or certification in a state other than Kansas or a US territory after completion of your program, it is highly recommended you first seek guidance from the appropriate licensing agency BEFORE beginning the academic program to ensure you can obtain a license or certification in your home state or territory. The website [https://rid.org/advocacy-overview/state-information-and-advocacy/](https://rid.org/advocacy-overview/state-information-and-advocacy/) provides information about KS interpreter certification and licensing boards outside of Kansas. The Undergraduate and Graduate Certificates in ASL/English Interpreting does not guarantee that students will pass the certification exams, but covers the necessary materials to prepare students to sit for the exam.

The **Introduction to ASL/English Interpreting Certificate** is a 15 credit hour certificate that allows students to select one of the two tracks:

**Introduction to ASL/English Interpreting Track**

**Required:**

ASLD 501 Introduction to the ASL/English Interpreting Profession

ASLD 502 Theories of Interpreting: Co-Constructions of Meaning

ASLD 607 Ethics and Professionalization for Interpreters

Selected three of the following electives or other departmentally approved courses:

ASLD 602 Mediated Interactions in Communications

ASLD 603 Ethics and Professionalization for Interpreters

ASLD 604 ASL/English Interpreting Observation Practicum

ASLD 610 Psychological Effects of Interpreting

Professional ASL/English Interpreting Track

**Required:**

ASLD 607 Ethics and Professionalization for Interpreters
ASLD 610 Psychological Effects of Interpreting
ASLD 609 Practicum in American Sign Language Interpreting

Select two of the following electives or other departmentally approved electives:

ASLD 502 Theories of Interpreting: Co-Constructions of Meaning
ASLD 603 Interpreting: Mediated Interactions in Communications
ASLD 604 Interpreting: ASL to English
ASLD 605 Interpreting: English to ASL
ASLD 606 Interpreting: Diverse Communities
ASLD 615 Business Practices for Interpreters
ASLD 616 Interpreting: Dynamic Paralinguistic Demands
ASLD 638 Topics in Interpreting: _____

LING 343 Bilingualism

Undergraduate Certificate in Biotechnology

Certificate in Biotechnology

Grounded in biological sciences, chemistry and advanced technology, biotechnology employs biological systems to solve scientific challenges that impact society. Through this certificate, you will diversify your education and become better equipped for careers in:

- Research and Development
- Human Health
- Animal Health
- Pharmaceuticals

In this unique certificate, you will be challenged to apply your scientific knowledge and solve problems. You will routinely formulate and execute experimental approaches, analyze data, and communicate results. Through this experience you will work to master:

- Spectroscopy (Abs, Fluorescence, Luminescence)
- Quantitative Analysis
- Separation Science (HPLC)
- DNA Manipulation (Primer Design, PCR, DNA Gels)
- Expression of proteins in microbial systems
- Cell-based Analysis (Flow cytometry)
- Tools used in Bioinformatics

Undergraduate Certificate in Nutrition

With a curriculum focused on the role of nutrition in a wide range of areas, KU’s undergraduate certificate provides a useful area of focus for your degree or professional background, helping you become more marketable in a growing career field. Pursue an undergraduate certificate to earn a valuable credential and help start or refocus your work in a nutrition-related field. Alternatively, a certificate in nutrition can supplement your undergraduate studies to prepare you for a successful career in health, nutrition, wellness, fitness and beyond. The courses and credential from the nutrition program may make you more successful in continuing your education in graduate school.

The Undergraduate Certificate in Nutrition regards 12 credits hours:

HSCI 320: Principles of Nutrition (3 credit hours)
HSCI 420: Nutrition through the Life Cycle (3 credit hours)
HSCI 421: Public Health Nutrition (3 credit hours)
HSCI 422: Nutrition Assessment (3 credit hours)
Undergraduate Certificate in Public and Population Health

KU’s undergraduate programs in public and population health provide a broad exposure to the key concepts of public and population health, as well as an understanding of the connections between public health and the community. KU’s programs focus on understanding the network of behavioral and social factors of health and how they’re intertwined with the community. Students gain knowledge in understanding core concepts in epidemiology and biostatistics, disease prevention, population health and health disparities.

Coursework required for the certificate is designed to provide a broad exposure to the key concepts of public and population health as well as an understanding of the connections between public health and other disciplines.

Post-Baccalaureate Certificate in Health Sciences

KU’s Post-Baccalaureate Certificate in Health Sciences helps traditional and non-traditional students complete upper-level undergraduate biology and biotechnology courses. The curriculum allows students who hold a bachelor’s degree to grow in areas where academic strengthening is needed, develop clinical reasoning skills, and acquire additional training to begin or advance a career in health sciences or biotechnology.

The Post-Baccalaureate Certificate in Health Sciences focuses on developing health science, biotechnology and research science knowledge and skills, which apply toward admission to medical school, as well as a wide variety of health or biotechnology-related careers, depending on the academic track chosen.

Admission to KU

Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level coursework will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admissions criteria:

The Post-Baccalaureate Certificate in Health Sciences is available to students who already hold a bachelor’s degree with a 2.7 GPA or better and passed the following prerequisite courses: General Biology I with a lab and General Chemistry I and II with a lab (Physics I with a lab and General Biology II are recommended).

Admissions Requirements:

The Post-Baccalaureate Certificate in Health Sciences is available to students who already hold a bachelor’s degree with a 2.7 GPA or better and passed the following prerequisite courses: General Biology I with a lab and General Chemistry I and II with a lab (Physics I with a lab and General Biology II are recommended).

Total Credit Hours: 29-30
Graduate Certificate in Advanced American Sign Language

The Advanced American Sign Language certificate is designed for students who are looking to enter ASL and/or ASL interpreting fields. Alternatively, this certificate could serve students who are sufficiently proficient and fluent in both American Sign Language and English to pass a language proficiency entrance exam. These individuals in this latter category may be Deaf or hearing heritage ASL users. This certificate moves students from basic ASL to ASL proficiency. This certificate may also benefit working interpreters or educators working with the Deaf community, who have basic knowledge of ASL, but would like to improve their skills.

Admission to Graduate Studies

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application. Students must complete an American Sign Language proficiency exam prior to admissions into the program. The Advanced ASL Graduate Certificate is a 15 credit hour certificate that requires the following:

<table>

Graduate Certificate in ASL/English Interpreting

The ASL/English Interpreting certificate is designed for students wishing to pursue ASL/English interpreting at either the introductory or professional level. This certificate could serve students who are sufficiently proficient and fluent in both American Sign Language and English to pass a language proficiency entrance exam. These individuals in this latter category may be Deaf or hearing heritage ASL users. This certificate is designed for students who have completed course work toward a BA with ASL proficiency IV. It is also open to students who are heritage language signers, or have completed ASL I-IV. It is highly recommended that students complete the Advanced ASL certificate before the ASL/English Interpreting track due to the level of proficiency required. Students that enter the program with proficiency beyond ASL VI are eligible to pursue the ASL/English interpreting certificate without completion of the Advanced ASL certificate, with instructor permission. There is an ASL proficiency test required to begin the ASL/English Interpreting certificate.

The Undergraduate and Graduate Certificates in ASL/English Interpreting aim to prepare students to sit for the NIC and BEI national certification exams so they are eligible for state credentialing in KS and MO. Students in KS who pass the performance certification exam are eligible to register in KS as an interpreter. The website http://www.dcf.ks.gov/services/RS/Pages/KCDHH-KQAS.aspx (https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.dcf.ks.gov%2Fservices%2FERS%2FPages%2FKCDHH-KQAS.aspx&data=02%7C01%7Csstrome%40ku.edu%7Cdf562cbbe4beaf7e97708db860bffe52%7Cetc1765386efe643fb96636eabbe3c1%7C0%7C7637657236701852328sdata=0wgrCUWdXRk5KqGzGD7bA%3D%&reserved=0) provides information about KS interpreter registration. Students in MO who pass the MO certification exam are eligible to seek licensure in MO as an interpreter. The website https://mcdhh.mo.gov/interpreters/ provides information about MO interpreter certification and licensing. If you plan to obtain a license or certification in a state other than Kansas or a US territory after completion of your program, it is highly recommended you first seek guidance from the appropriate licensing agency BEFORE beginning the academic program to ensure you can obtain a license or certification in your home state or territory. The website https://rid.org/advocacy-overview/state-information-and-advocacy/ (https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Frid.org%2Fadvocacy-overview%2Fstate-information-and-advocacy%2Fdata=02%7C01%7Csstrome%40ku.edu%7Cdf562cbbe4beaf7e97708db860bffe52%7Cetc1765386efe643fb96636eabbe3c1%7C0%7C7637657236701852328sdata=0wgrCUWdXRk5KqGzGD7bA%3D%&reserved=0) provides resources for licensure and certification boards outside of Kansas. The Undergraduate and Graduate Certificates in ASL/English Interpreting does not guarantee that students will pass the certification exams, but covers the necessary materials to prepare students to sit for the exam.

Admission to Graduate Studies

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application. Students must complete an American Sign Language proficiency exam prior to admissions into the program. The ASL/English Interpreting Graduate Certificate is a 15 credit hour certificate that allows students to pursue one of the following tracks.

Introduction to ASL/English Interpreting Track
Graduate Certificate in Deaf Studies and Social Justice

The Deaf Studies and Social Justice certificate is designed for students interested in learning more about the world of the deaf in America, deaf culture, the education of deaf children, useful technology, and the integration of deaf people into the American society. Students from other disciplines are welcome pursue this certificate program. ASL proficiency is not required, but some course may be taught in ASL with an English interpreter.

Admission to Graduate Studies

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

Graduate Certificate in Foundations of Engineering Management

The Graduate Certificate in Engineering Management is a 12 credit graduate-level certificate designed to provide content and skills for the professionally minded student. This graduate certificate serves as an introduction to the Engineering Management degree by offering a curriculum in management and technical systems with an emphasis on organizing and managing resources to successfully lead engineering or technical personnel and projects. This program is for individuals who have a minimum of 2 years professional engineering management experience.

Admission to Graduate Studies

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

The Graduate Certificate in Engineering Management requires the completion of three core courses and one elective for a total of 12 credit hours.

Foundations of Engineering Management (12 credits)
Graduate Certificate in Foundations of Project Management

The Graduate Certificate in Project Management is a 12 credit graduate-level certificate designed to provide industry content and skills for the professionally minded student. This graduate certificate serves as an introduction to the fundamental aspects of Project Management, with an emphasis on planning, organizing, and managing resources to bring about the successful completion of specific project goals. The program is for individuals who have at least 2 years of professional experience in project management or management systems.

Application process

Current KU graduate students and other non-KU students may apply for the graduate certificate. Please check the departmental website for the most updated certificate application requirements (https://edwardscampus.ku.edu/admissions-masters-communication-studies/).

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application/.

10. **EMGT 814** Leadership Techniques and Methods for the Engineering Manager
11. **EMGT 815** Business Relationships and Selling Skills
12. **EMGT 824** Product Marketing for Engineers Managers
13. **EMGT 830** Case Studies in Engineering Management
14. **EMGT 835** Field Project (M.S.)
15. **EMGT 840** Systems Approach to Engineering
16. **EMGT 850** Environmental Issues for Engineering Managers
17. **EMGT 860** Special Problems in Engineering Management
18. **EMGT 862** Manufacturing Systems Integration
19. **EMGT 867** Advanced Operations Management

Elective Course (1 PMGT elective course, 3 credit hours required)

*Please note, elective course MUST be designated PMGT

Professional and Workplace Communication Certificate

The 4-course, 12 credit hour Professional Workplace Communication Certificate (https://edwardscampus.ku.edu/certificates-masters-communication-studies/) takes you beyond the numbers to understand what really makes organizations tick – the everyday communication practices we too often take for granted. Beyond emails, meetings and those informal hallway discussions, workplace communication is the hidden element within every organization that brings people and ideas together. It’s the dimension of any workplace that explores the human side of organizations – and helps facilitate your career success. You’ll learn how to craft messages, share information and build relationships in ways that create greater understanding—both internally and externally. Skills taught apply to communicating with internal peers, teams, managers, and leaders – as well as external stakeholders such as customers, vendors, partners, regulators, and media.

These workplace communication competencies are at the core of effective decision-making, team-building, problem-solving, and crisis-resolution practices. The certificate program teaches how and when to ask the bigger-picture questions that improve communication within your organization – and help advance your career.

All courses for KU’s Professional Workplace Communication Certificate are taught through the KU Edwards Campus in Overland Park, Kansas. All courses can be completed online. Visit the program web page (https://edwardscampus.ku.edu/communication/) to learn more.

Application process

Current KU graduate students and other non-KU students may apply for the graduate certificate. Please check the departmental website for the most updated certificate application requirements (https://edwardscampus.ku.edu/admissions-masters-communication-studies/).

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/). Applications
may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

For additional questions regarding the program requirements or application process, please visit our website (https://edwardscampus.ku.edu/communication/) or contact your academic success coach (https://edwardscampus.ku.edu/program-advisors/).

**Certificate Requirements**

The Professional Workplace Communication graduate certificate requires completion of 12 credit hours, including 2 required courses and 2 elective options.

**Graduate Certificate in Science Management**

Scientists and technologists have been trained to focus on specific disciplines where the majority of their team members or coworkers have similar technical backgrounds and "speak" the same language. As a scientist or technologist progresses in their career at a company or agency, they increasingly begin to supervise and manage people and projects - tasks they have generally never been trained for. When a technical individual crosses over to a program lead or manager role, he or she must acquire a new suite of skills in leadership, planning, and collaboration with other (often non-science) units within an organization. We seek, by means of the science management program, to give scientists and technologists those skills.

This graduate certificate is aimed at two primary cohorts of students: First, graduate students in the biological, physical and earth/environmental sciences, or technology fields who foresee a career in a science-oriented private company or governmental entity, and, anticipating the need as they progress in their careers, wish to add these skills to their portfolios; and second, science or technology professionals who already possess graduate degrees in their field and need to attain these professional skills, but neither desire nor need another graduate degree yet wish to have the recognition that a graduate certificate from KU provides.

**Graduate Admission**

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (http://graduate.ku.edu/). application-process/) for admission into the certificate program and submit an application fee along with the following materials:

- A Statement of Interest in the Science Manager certificate program. This 1-2 page narrative should summarize your education, employment history, your long-term career goals, and how this certificate will help you achieve these goals.
- Official undergraduate transcript.
- A letter of recommendation from someone familiar with your academic work or qualified to offer judgment on your ability to undertake graduate-level work (former professor or instructor, workplace supervisor).

Current KU graduate students wishing to enroll in the Graduate Certificate in Science Management program will apply through the Office of Graduate Studies. A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Office of Graduate Studies. Completion of the certificate will appear on the graduate transcript. KU graduate students should submit the following materials:

- A Statement of Interest in the Science Manager certificate program and its relationship to your graduate course of study.
- An unofficial copy of your KU transcript.
- A letter of support from your graduate degree program (your advisor or graduate director).

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

**Project Management (M.E. & M.S.)**

**Project Management Graduate Program**

**Master of Engineering (M.E.) or Master of Science (M.S.)**

**KU Edwards Campus**

Project Management (http://www.pmgt.ku.edu/) is driven by globalization, the internet, and the rapid advancement for work processes. Organizations must implement projects faster than ever before. These organizations are looking for technically oriented and highly skilled
project managers. Our Project Management degree addresses workforce needs by providing individuals from multiple disciplines with the skills, confidence, and competence to manage a variety of projects, as well as bridge the fields of engineering, technology, people, and business. Individuals may opt for a Master of Engineering (http://www.pmgt.ku.edu/me-pm/) (M.E.) in Project Management or a Master of Science (http://www.pmgt.ku.edu/ms-pm/) (M.S.) in Project Management depending on their undergraduate discipline.

The Project Management (PMGT) fundamental courses will strengthen knowledge and ability to apply the theories and concepts of Project Management in the real world. Electives will be offered on a rotational basis and will remain current with Project Management trends, demands, and the interests of our students.

Courses can be completed in Overland Park on the KU Edwards Campus (http://edwardscampus.ku.edu/) on weekday evenings and are also available by e-learning with permission from the instructor. Classes are taught by Graduate Faculty members of the School of Professional Studies and members of the professional community.

Graduate Admission Requirements

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

For admission to KU’s Master of Engineering in Project Management, applicants must have:
1. An undergraduate degree in engineering or related science from an accredited institution.
2. A 3.0 or higher undergraduate grade point average (on a 4.0 scale).
3. Two years full-time, post-undergraduate work experience in a technological environment.
4. International students must also meet the English requirement by taking either the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or have a degree from an English speaking institution. Financial support requirements must also be met.

All applications are completed online. A complete application includes the application fee, application form, résumé, 1 original transcript showing degree conferred, and 3 recommendation forms. Course schedules, faculty biographical information, and other program information may be requested from the PMGT office or downloaded from the Project Management website.

International students and students who indicated English as a second language, are required to show proof of English proficiency for admission purposes and must check-in at the Applied English Center (http://www.aec.ku.edu/) (AEC) upon arrival on campus for orientation. This process serves to confirm each student's level of English proficiency and determine whether English courses will be included as a requirement of the student's academic program. Note: Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed in the policy (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/) are not required to check in at the AEC (see eligibility requirements on the Graduate Studies website (https://graduate.ku.edu/english-proficiency-requirements/)).

The University of Kansas Edwards Campus

Overland Park, KS 66213

Degree Requirements

The Masters in Project Management requires a total of 33 semester hours of graduate work. A total of 12 hours will be completed in Project Management (PMGT) fundamentals for both the Master of Engineering and Master of Science, while the remaining 21 hours will be completed in varying required course work and electives depending on the degree program. Please refer to the Plan of Study below for the corresponding degree program. Students will work with their faculty advisor and the program coordinator to finalize course selections to meet department and university requirements for degree completion and complete their Plan of Study.

Graduate Admission Requirements

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at http://graduate.ku.edu/ku-graduate-application (http://graduate.ku.edu/ku-graduate-application/).

For admission to KU’s Master of Science in Engineering Management program, applicants must have:

1. Bachelor of Science undergraduate degree in engineering or related science from an accredited institution. Non-Bachelor of Science degrees or Technology degrees are considered only with a very high (e.g. 3.8) GPA and substantial experience (8-10 years).
2. A 3.0 or higher undergraduate grade point average (on a 4.0 scale). Admission may be granted on a provisional basis if an applicant’s GPA is between 2.50 and 2.99.
3. Two years full-time, post-undergraduate work experience in a technological environment.
4. International students must also meet the English requirement by taking either the Test of English as a Foreign Language (TOEFL), the International English Language Testing System (IELTS) or have a degree from an English speaking institution. Financial support requirements must also be met.

Engineering Management (EMGT) does not require the GRE or GMAT.

A completed application includes the application fee, application form, résumé, 1 original transcript, and 3 recommendation forms. International students must also meet English and financial requirements. Course schedules, faculty biographical information, and other program information may be requested from the EMGT office or downloaded from the program’s website.

International students and students who indicated English as a second language, are required to show proof of English proficiency for admission purposes and must check-in at the Applied English Center (http://www.aec.ku.edu/) (AEC) upon arrival on campus for orientation. This process serves to confirm each student’s level of English proficiency and determine whether English courses will be included as a requirement of the student’s academic program. Note: Students who demonstrate English proficiency at the waiver level or who have earned a degree from one of the specified English-speaking countries listed in the policy (http://policy.ku.edu/graduate-studies/english-proficiency-international-students/) are not required to check in at the AEC (see eligibility requirements on the Graduate Studies website (https://graduate.ku.edu/english-proficiency-requirements/)).

Master of Science in Engineering Management

Engineering Management Graduate Program

KU Edwards Campus

The Engineering Management M.S. program provides superior graduate education for technical managers from engineering, science, mathematics, and computer science. EMGT graduates are more effective managers in technology-based organizations and are better able to promote entrepreneurial activities for new businesses.

The EMGT program integrates management with technology by focusing on 3 dimensions:

1. Technical: an understanding of and proficiency in engineering and science.
2. Human: the ability to build a collaborative effort within a group.
3. Conceptual: the ability to apply analytical thought to the management process and to the enterprise as a total system.

The EMGT program offers these emphasis areas: consulting engineering services, manufacturing/process engineering and systems and information technology.

Courses are taught on weekday evenings or Saturdays on the KU Edwards Campus (http://edwardscampus.ku.edu/) by Graduate Faculty members of the School of Professional Studies. All courses are available by e-learning.

Graduate Admission Requirements

An applicant seeking to pursue graduate study may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Minor in Biotechnology

Minor in Biotechnology

Grounded in biological sciences, chemistry and advanced technology, biotechnology employs biological systems to solve scientific challenges that impact society. Through this minor, you will diversify your education and become better equipped for careers in:

- Human and animal health
- Environmental and agricultural sciences
- Pharmaceuticals

In this unique minor, you will be challenged to apply your scientific knowledge and solve problems. You will routinely formulate and execute experimental approaches, analyze data, and communicate results.

Requirements for the Minor

Students selecting this minor must complete each of the following courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

Biotechnology Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

- **Minor Hours**: Satisfied by 18 hours of minor courses.
- **Minor Hours in Residence**: Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.
- **Minor Junior/Senior (300+) Hours**: Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.
- **Minor Graduation GPA**: Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Minor in Nutrition

With a curriculum focused on the role of nutrition in a wide range of areas, KU’s minor in nutrition provides a useful area of focus for your degree or professional background, helping you become more marketable in a
Growing career field. Pursue a minor to earn a valuable credential and help start or refocus your work in a nutrition-related field. Alternately, a minor in nutrition can supplement your undergraduate studies to prepare you for a successful career in health, nutrition, wellness, fitness and beyond. The courses and credential from the nutrition program may make you more successful in continuing your education in graduate school.

Undergraduate Minor in Nutrition (18 credit hours)

Complete the courses for 12 credit hours listed above and choose 2 more courses from the list below:

Required Courses:

- HSCI 320 Principles of Nutrition or HSES 330 Principles of Nutrition and Health 3
- HSCI 420 Nutrition Through the Life Cycle 3
- HSCI 421 Public Health Nutrition 3
- HSCI 422 Nutrition Assessment 3

Select two of the following:

- HSES 331 Sport and Exercise Nutrition 3
- HSCI 521 Advanced Nutrition 3
- HSCI 522 Advanced Sports Nutrition 3
- HSCI 425 Nutrition Education 3

Minor in Public and Population Health

KU’s minor in public and population health provide a broad exposure to the key concepts of public and population health, as well as an understanding of the connections between public health and the community. KU’s programs focus on understanding the network of behavioral and social factors of health and how they’re intertwined with the community. Students gain knowledge in understanding core concepts in epidemiology and biostatistics, disease prevention, population health and health disparities.

Degree Requirements

Coursework required for the minor is designed to provide a broad exposure to the key concepts of public health as well as an understanding of the connections between public health and other disciplines.

Required:

- HSCI 340: Introduction to Public Health (new course) (3.0)
- HSCI 440: Introduction to Epidemiology (new course) (3.0)
- HSCI 441: Population Health (new course) (3.0)
- HSCI 445: Introduction to Environmental Health (3.0) (same as EVRN 445, Intro to Env. Health)(3.0)

Elective at 300-level or above (3.0):

(Potential electives may include HSES 308 Drugs and Diseases in Society; HSES 418 Health Aspects of Aging; HSES 467 Community Health and Health Education; SOC 424. Sociology of Health and Medicine; SOC 425. Sociology of Global Health; Health Communication; or other course determined by student and advisor).

Statistics course: HSES 310 Research and Data Analysis in Health, Sport, and Exercise Science OR BIOS 704: Princ. of Stats in Public Health (3) or other statistics course determined by student and advisor).

Total 18 credit hours
Social Welfare

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor [http://www.advising.ku.edu/] for details). Other years’ catalogs [http://catalog.ku.edu/archives/] are available.

Bachelor of Social Work (p. 2531)  
Master of Social Work (p. 2534)  
Doctor of Philosophy in Social Work (p. 2537)

The School of Social Welfare

The University of Kansas School of Social Welfare is the oldest school of social welfare in the state and the only one to offer degree preparation from undergraduate through doctoral degrees.

- Bachelor of Social Work (p. 2531)  
- Master of Social Work (p. 2534)  
- Doctor of Philosophy in Social Work (p. 2537)

Vision, Mission, and Guiding Principles & Values

Vision Statement

All individuals, families, & communities utilize their power to achieve justice, equity, & well-being.

Mission

The University of Kansas School of Social Welfare, rooted in the Strengths Perspective, aims to transform lives and social contexts and promote social, economic, and environmental justice in Kansas, the nation and the world. We do so by educating students to practice with integrity and competence; advancing the science and knowledge base of social work through scholarship and research; and participating in community-engaged service.

Guiding Principles and Values

The work of the KU School of Social Welfare is guided and driven by a set of principles and values that inform our teaching, research endeavors, and service to community at various levels. These include:

Relationship Building: We engage in relationship building that fosters creativity, collaboration, and mutual learning. Relationship building is essential across practice, scholarship, education and service. We take a strengths approach as we serve our local, state, national, and global communities.

Diversity, Equity and Inclusion: We embrace the inherent worth of all people. By taking the position of cultural humility and applying the lens of intersectionality, we seek to develop and promote modes of anti-oppressive social work and dismantle structures of exclusion.

Practice with Integrity: We demonstrate our integrity and trustworthiness as scholars, educators, practitioners, and community members by promoting social work values, ethical practice, and the process of critical reflection.

Multisystem Competency: We recognize that social, economic, and environmental injustices are the root causes of inequities and multiple strategies are necessary to address these. Our work integrates micro/ macro social work and builds collaboration across systems and disciplines to create multi-level change.

Critical Perspective: We engage in deliberate and continuing examination of social conditions and solutions. We use critical inquiry to analyze and challenge existing structures and systems in order to advance the field and promote social, economic, and environmental justice.

Empirically Informed Social Work: We rigorously advance empirical research that impacts the social work knowledge base. By translating and applying evidence, we continually transform practice and policy across multiple systems.

Goals

1. To prepare BSW, MSW and Ph.D. students to practice with integrity and attain multi-level competency while working to promote well-being and build community.
2. To conduct, disseminate, and translate theoretical and empirically informed scholarship and research that impacts the social work knowledge base and transforms practice and policy.
3. To promote social, economic, and environmental justice through service at local, state, national, and international levels.

The Programs

The curriculum brings students from the introductory level through advanced study in clinical social work practice or social work macro practice. Under the umbrella of a practice orientation, the programs are structured to support the guiding principles and values of the School.

Classroom work is one component of professional preparation; field practicum placements comprise the other. Placements in social service agencies provide students the opportunity to apply and further develop skills learned in the classroom. Bachelor of Social Work and Mater of Social Work students spend time in practicum settings throughout the region.

The goal of the doctoral program in social welfare is to prepare students to become leaders nationally and internationally in advancing social work practice and policy through research, teaching, and scholarship. Our students graduate from the program with the critical knowledge and skills they need to become innovative stewards of the discipline who generate and disseminate knowledge as researcher, scholars, and educators.

Learn more about the School of Social Welfare programs [http://socwel.ku.edu/degrees/]. ([https://socwel.ku.edu/academics/degrees_landing/])

Student Handbook

The student handbook [http://socwel.ku.edu/resources/forstudents/academic-handbooks/] contains full descriptions of policies and other details for degree programs and field practicum.

The Profession

The mission of the social work profession is rooted in a set of core values. These core values, embraced by social workers throughout the
profession’s history, are the foundation of social work’s unique purpose and perspective:

- Service
- Social justice
- Dignity and worth of the person
- Importance of human relationships
- Integrity
- Competence

**NASW Code of Ethics**

As a guide to professional conduct, the Code of Ethics of the National Association of Social Workers (http://www.socialworkers.org/) represents the fundamental values of the profession. The National Association of Social Workers is the largest organization of professional social workers in the world, with a membership of 130,000.

View the entire Code of Ethics (https://www.socialworkers.org/About/Ethics/Code-of-Ethics/) or request a copy.

**Resources**

**Faculty**

The faculty’s scholarly interests, as reflected in teaching, research, and publications, span a wide range, including health, mental health, child welfare, adult and juvenile justice, gerontology, multiculturalism, women’s issues, history of social work, public policy analysis, homelessness, gender equity, poverty reduction and asset building, and macro social work including community practice and social work administration.

School of Social Welfare faculty members hold doctoral degrees in social work, social welfare, and other fields. In addition, outstanding social work practitioners serve as part-time classroom instructors, and 280 social work practitioners serve as practicum instructors.

Faculty members serve the public interest and the profession of social work as consultants and board members in professional and citizens’ organizations.

**Research Office**

The School supports research and scholarship designed to impact social service delivery and policy at the local, national and international levels. Grounded in the Strengths Perspective and with strong ties to the Grand Challenges for Social Work, we design and conduct applied research and scholarship that advances the science and knowledge base of social work through collaboration, curriculum, scholarship and research. Learn more at https://socwel.ku.edu/research-home (https://socwel.ku.edu/research-home/).

**Undergraduate Programs**

The undergraduate program (https://socwel.ku.edu/academics/degrees_landing/) prepares graduates for generalist social work practice. The program defines generalist practice as maintaining focus on practice and advocacy based on ethical principles, scientific inquiry, and best practices at the interface between and among systems (i.e., individual, family, groups, organizations, and communities). The program is offered on both the Lawrence and Edwards campus.

**University Honors Program**

The school encourages qualified undergraduates to participate in the University Honors Program (https://honors.ku.edu/).

**Graduate Programs**

The Master of Social Work program (http://socwel.ku.edu/academics/degrees/msw/regular/overview/), established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1948. KU’s MSW program is consistently ranked among U.S. national public universities.

The doctoral program (http://socwel.ku.edu/academics/degrees/phd/landing/) admitted its first students in 1981. It prepares students to be leaders of the profession through advanced research, scholarship, and teaching.

**Financial Aid**

To be eligible for financial aid, applicants should complete the Free Application for Federal Student Aid (FAFSA) by March 1, even before receiving information about acceptance. FAFSA materials can be obtained from all college or university financial aid offices or submitted online (http://www.fafsa.ed.gov/). The School of Social Welfare uses the FAFSA need determination level in making awards. For more information regarding financial aid visit the KU Office of Financial Aid & Scholarship (http://affordability.ku.edu/). (http://affordability.ku.edu/)

For Ph.D. students (http://socwel.ku.edu/academics/degrees/phd/financialsupport/), financial assistance, including tuition and significant salary, is available from the school through teaching and research assistantships in research and training areas such as adult and children’s mental health, aging, child welfare, corrections, social policy, spiritual diversity, or other areas of faculty grants and interests.

**Scholarships and Awards**

The School of Social Welfare has several sources of financial assistance available to students who meet the various criteria. Awards are made on an annual basis and are applied directly towards tuition and fees in most instances. All students interested in applying are required to submit a Free Application for Federal Student Aid by March 1. All recipients are expected to maintain a minimum grade point average of 3.0. Students must renew their applications each year they wish to be considered.

**Undergraduate University Regulations**

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

For information about school regulations refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).

**Graduate University Regulations**

For information about university regulations, see Regulations (http://catalog.ku.edu/regulations/) or visit the University of Kansas Policy Library (http://www.policy.ku.edu/).

For information about school regulations refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).
Undergraduate Graduation with Distinction

The top 10 percent of the graduates of the BSW program each year receive degrees with distinction.

Undergraduate Honor Roll (Dean’s List)

Students who have been accepted into the BSW program, enrolled in a minimum of 9 credit hours during the semester, and earned a semester grade-point average in the top 20 percent of their class qualify for the KU School of Social Welfare BSW Dean’s List.

Undergraduate Required Work in Residence

No baccalaureate degree is granted to an undergraduate who has not completed at least 30 semester credit hours of residence courses at KU. No exceptions are granted. To earn a bachelor’s degree from KU, you must complete the last 30 hours of credit for the degree by resident study. You may petition the BSW program director for a waiver. Up to 6 hours of work taken at another institution may be accepted as part of the last 30 hours, if the hours are not in required social work courses.

Undergraduate Student Advancement Policy

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

Undergraduate Advising

Once a student is admitted to the School of Social Welfare, an academic adviser will be assigned to assist students in the enrollment process and with other academic program requirements. Students consult with their academic adviser before enrollment each semester and have their advising hold removed. In addition, a member of the School’s faculty is assigned as a professional/career adviser. Current students can view their advisers in Jayhawk GPS or the Kyou portal (https://my.ku.edu/uPortal/f/u56210l1s4/normal/render.uP). (https://my.ku.edu/uPortal/f/u56210l1s4/normal/render.uP)

Transfer of Credit/Credit Waiver

BSW Program

The CredTran tool is a transfer course equivalency system that lists more than 2,200 colleges and universities from which KU has accepted transfer courses in the past. If your school or course is not listed, your evaluation will be completed when you are admitted to KU.

Transfer of credit allows specific course work from other accredited colleges or universities to count toward the BSW degree. Decisions to accept prior credits are made by KU’s transcript evaluator during the admission process. Exceptions must be petitioned through the BSW Director. Petitions must be accompanied by a catalog description and a syllabus of the course and submitted at the time of application. Community college equivalents to KU courses are available from the school or through community college counselors. A maximum of 64 credit hours from a community college may be transferred toward the BSW degree.

MSW Program

Students who request transfer from other programs accredited by the Council of Social Work Education must first go through the admission process and provide transcripts, a syllabus for each course for which credit is being requested, descriptions of field practicum content, written evaluations of field practicum performance, and the number of practicum clock hours. Course syllabi must include readings, assignments, and weekly topics covered in that class. Students requesting credit waivers must include these materials by February 15th. Waiver credit will not be offered for courses taken prior to admission for students accepted in the Advanced Standing Program. Courses submitted for waiver credit won’t be considered if a student earned a grade of less than a B.

Credits for continuing education institutes and workshops or programs conducted by nonaccredited or nondegree-granting organizations are not accepted. Additionally, courses taken in an MSW program as a non-degree seeking student will not receive waiver credit. Students may not receive waiver credit for advanced level coursework taken prior to completion of foundation level coursework in another MSW program. Students can request to enroll as nondegree seeking students and take generalist level classes. However, it is contingent upon admission as a nondegree seeking student and classroom availability after all current degree seeking students are enrolled. Up to six hours of credit as a nondegree seeking student can be applied toward the MSW degree should a nondegree seeking student later apply to admission into the MSW program. Any such credit will be given only for coursework in which the student earned a B or greater.

Prior Work Experience

In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements for undergraduate or graduate programs.

Undergraduate/Graduate Leave of Absence and Withdrawal

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

Undergraduate/Graduate Guidelines for Conduct

Refer to the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/) for specific information.

Employment Opportunities

Some employment opportunities (http://socwel.ku.edu/academics/degrees/bsw/bsw/careerspotlight/) for social workers include:

- Practice in health care systems and settings.
- Child protection, foster care, and adoption services.
- Service in community centers, juvenile courts, and residential treatment centers.
- Women’s counseling and shelter facilities.
- Family services, substance abuse, illness, and unemployment services.
- Community services for people with mental illness.
- Services for the elderly in home care, nursing homes, and senior centers.
- Community practice and social change.
- Services for offenders and their families in community corrections programs.
- Leadership in human service organizations and policy settings.
University Career Center

The University Career Center (https://career.ku.edu/), Summerfield Hall, Room 206, (ph:785-864-3624), provides career counseling and services for all KU students, including students in the School of Social Welfare.

Courses

SW 177. First Year Seminar: ______. 3 Hours GE11.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in social work. Course is designed to meet the critical thinking learning outcome of the KU Core. Prerequisite: First-time freshman status. LEC.

SW 210. Contemporary Social Topics: ______. 1-3 Hours.
This course provides the opportunity for experimentation with innovative course content and unique learning strategies in accordance with guidelines established by faculty. Subjects offered as topics include Training for Diversity, Organizing in Undererved Communities, etc. LEC.

SW 220. Intro to Social Work, Social Welfare and U.S. Society. 3 Hours SF GE3S / S.
This course serves as an introduction to the profession of social work and the institution within which it operates: the social welfare system. This course is not a skills-based course; rather, its purpose is to make clear the influences and constraints that shape the profession—historical, social, cultural, political, and legal—and give it its uniqueness. Specifically, the course introduces students to how social workers apply generalist knowledge, values, and skills in a variety of settings and with a variety of client populations. Emphasis will be placed on a social work’s use of the strengths perspective, commitment to the empowerment, respect for individual difference across a range of intersecting social identities; and, relatedly, our obligation to work for a more socially, economically, and environmentally just, humane society. LEC.

SW 303. Human Sexuality. 3 Hours GE3S.
This introductory course approaches human sexuality from a social work perspective to provide students with an in-depth understanding of their own and others sexuality and gender through a social justice-informed lens. Students will explore topics such as sexuality and sexual development across the life course; privilege and oppression and it relates to sexuality and gender; attitudes, beliefs, and values pertaining to human sexuality; gender-based violence; sexual health practices; and LGBTQIA+ identities. The course utilizes a range of learning methods including lecture, discussion, group discussion, audio-visual materials, and critical self-reflection. LEC.

SW 310. Dealing with Stress and Supporting Wellbeing. 3 Hours.
This course is designed to assist students with developing skills for managing the transition to a university setting, and its associated social and emotional challenges. Students will learn techniques designed to enhance mindfulness, distress tolerance, emotion regulation, and interpersonal effectiveness skills. This course is designed to empower students by providing a range of experiences and techniques that will give students new insights and choices about their own behaviors, as well as skills that will help them in their interactions with others. Skills will be practiced through hands-on experience in the classroom, as well as weekly goal-setting to investigate the impact of developing these skills on our personal wellbeing. LEC.

SW 410. Professional Writing Skills in Social Work. 3 Hours.
Students learn the principles of organizing, developing, writing and revising documentation for different professional social work settings. Student will master basic writing skills and become proficient in several types of social work writing styles. LEC.

SW 420. Social Work in Urban Settings. 3 Hours.
Students gain knowledge about the historical and current relationships between the definition of social problems, the development of social welfare policies, and the delivery of social services in urban settings. Students will learn to access current policies and practices as they impact local communities in the Kansas City area. LEC.

SW 455. Topics in Social Welfare: ______. 1-3 Hours.
This course covers a variety of topics on a rotating basis and provides the opportunity for experimentation with innovated course content in accordance with guidelines established by faculty. These topics may include, but are not limited to, globalization and poverty, special topics in child welfare, mental health, juvenile justice, etc. LEC.

SW 490. Directed Readings. 1-3 Hours.
Individual and supervised readings in selected areas of social welfare. Prerequisite: Consent of instructor and approval by dean’s office. IND.

SW 510. Introduction to Social Work Practice: Interviewing Skills. 1.5 Hour.
This skills-focused course is designed to assist students with developing and practicing concrete interviewing strategies in preparation for field placements. These strategies will be revisited in the context of engagement and assessment during senior year fall semester courses. Students will learn interviewing strategies used in common social work practice approaches, such as motivational interviewing, solution-focused interviewing, and non-directive listening skills. This course is designed to provide students with baseline interviewing skills and provide them with practice before working with clients in their practicums. We will practice cultivating these skills through hands-on experience in the classroom. Prerequisite: MATH 101; Grade of B or better in SW 220; SW 530; SW 540; SW 555. LEC.

SW 512. Skills-Based Policy Advocacy. 1.5 Hour.
In this course, students learn policy-informed practice skills for effective advocacy in policy change strategies, grounded in core social work topics. These policy-informed practice skills include grassroots policy advocacy, such as developing policy agendas, social media campaigns, community organizing with constituents, and direct policy advocacy including giving testimony in legislative contexts, using policy briefs and other communication aids, and drafting new legislation. Emphasis on using social work values and ethics to work collaboratively with individuals and organizations will be central to the course. The course underscores social welfare policy as the foundation for social work practice and prepares students for policy advocacy as part of their effective and ethical social work practice. Prerequisite: MATH 101; Grade of B or better in SW 220; SW 530; SW 540; SW 555. LEC.

SW 530. Introduction to Theory for Multi-level Social Work. 3 Hours AE61.
A study of human behavior theories and their application to social work practice. Theories discussed include, but are not limited to empowerment, systems, psychodynamic, critical, life span and family life course, cognitive and moral development, psychodynamic, white and racial identity development; and are applied to individuals, families, groups, communities, society, and in international contexts. Prerequisite: MATH 101, Grade of B or better in SW 220. LEC.

SW 552. Community and Organizational Dynamics and Human Behavior. 3 Hours AE61.
An analysis of community and organizational life with emphasis on human behavior dynamics. Systems operation and change are considered and related to social functioning, especially as it impinges on social welfare objectives. Junior social work classification required. Prerequisite: MATH 101, Grade of B or better in SW 220, SW 530, SW 540, SW 555. LEC.
SW 534. Introduction to Social Policy and Advocacy. 3 Hours.
This generalist policy analysis and advocacy course provides students with essential policy knowledge and policy practice skills. The course examines existing social policies through the lens of social work values—particularly our profession's commitment to social, economic, racial, and environmental justice—and equips students to engage in policy change in pursuit of societal equity and human well-being. In this course, students learn policy analysis knowledge and skills, with an emphasis on understanding how social welfare policy design, funding, and implementation affect people's lives and influence the delivery of social work services. Policies designed to reduce poverty, address racial inequities, improve health, and increase social justice serve as exemplars for developing conceptual abilities in this course. Through critical examination of policies in the major domains of social work practice (physical and mental health, children and families, aging, housing, economic security), students prepare for policy-informed practice and for effective engagement in policy change strategies. Continuing students' preparation for professional practice, the course emphasizes social welfare policy as the foundation for social work practice and positions policy analysis and intervention as integral to effective and ethical social work. Prerequisite: MATH 101; Grade of B or better in SW 220; SW 530; SW 540; SW 555. LEC.

SW 540. Introduction to Social Work Research. 3 Hours AE61.
This course provides students with the basic concepts of research processes and methods utilized in addressing social work problems. It will cover quantitative, qualitative, and mixed methods research but emphasize quantitative methods. Students will learn various aspects of research including reviewing the literature, formulating a research problem and research question, conceptualizing the research, constructing measurement instruments, understanding measurement reliability and validity, sampling, and various research designs such as survey and experimental (pre-, pure-, and quasi-) designs. Students will become familiar with social work research ethics and will recognize the importance of sensitivity to diversity, oppression, and marginalization through each of the research processes. After understanding the basic concepts and processes of research, students will be able to read and critically analyze empirical research articles with an eye towards evidence-based social work practice. Prerequisite: MATH 101; Grade of B or better in SW 220. LEC.

SW 541. Social Work Research Seminar. 3 Hours AE61.
Focus is on applying material learned in SW 540 to the critique of empirical work in the social work arena and to the development of a proposal for a practice-based research project. Emphasis on assessing relevance of research to special populations. Content on the interpretation of graphs, tables, and statistical measures provided. Prerequisite: MATH 101, Grade of B or better in SW 220, SW 540, SW 530, SW 555. LEC.

SW 555. Diversity, Equity and Inclusion in Social Work Practice. 3 Hours AE41.
This course provides students with a foundational knowledge of diversity, equity, and inclusion within multi-level social work practice. Students will examine theoretical, conceptual, and policy-based knowledge of systems of oppression, both historical and contemporary, and the ways in which power and privilege are manifested within them. Through ongoing and critical self-reflection, students will examine their own social identities (e.g. race/ethnicity, gender, sexual identity, age, social class, ability status, religion, national origin, etc.), as well as their beliefs, values, and ethics through a justice and equity framework. Critical self-reflection is an essential skill to develop toward ethical and effective social work practice. This course will help prepare social work students to understand and resist systematic and interpersonal dynamics related to oppression and advocate for justice within a myriad contexts and across a range of policies and practices that inform social work practice. As a social work diversity course, this course takes an explicitly anti-racist, anti-sexist, anti-colonialist, and anti-oppressive stance. Prerequisite: MATH 101; Grade of B or better in SW 220. LEC.

SW 560. Study Abroad Topics: ______. 3 Hours.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, and Italy. LEC.

SW 570. Centering on Decolonization in Social Work. 1.5 Hour.
This course introduces theories and concepts of colonization and decolonization, centering on Indigenous people in America. Emphasis will be on students' examination of the frameworks, policies, and concept-based knowledge in which colonization and decolonization develops, expands, and impacts these populations. Social work values and ethics will be used to unpack colonization historically and contemporarily particularly with social work practice. In addition, students will analyze efforts to examine decolonization in the field of social work and apply that to their development of multi-level practice skills. Prerequisite: Math 101; Grade of B or better in SW 220; SW 530; SW 540; SW 555. LEC.

SW 571. Responding to Suicide and Self-Harm. 1.5 Hour.
This course is designed to assist students with developing assessment and intervention skills for responding to suicide and self-harm across the life course. We will examine the etiology, function, and presentation of self-injurious thoughts and behaviors, with particular emphasis on the development of these behaviors in childhood and adolescence and their progression into adulthood. Students will learn techniques for responding to suicide and self-harm, including the use of generalist social work practice skills (e.g., crisis intervention, advocacy, brokering, behavior management), developing effective treatment plans, and providing psychoeducation to individuals impacted by suicide and self-harm. Prerequisite: Math 101; Grade of B or better in SW 220; SW 530; SW 540; SW 555. LEC.

SW 572. Substance Use and Misuse. 1.5 Hour.
This course introduces students to the issues and challenges that face people affected by psychoactive substances in addition to the range of services developed to address these challenges. Substance-related harms are commonly observed across all social work settings, and substance misuse often directly or indirectly affect clients and their communities served by generalist practitioners. BSW students will gain essential knowledge that will assist them in working with these clients, such as substance-specific effects on individual functioning; why we think people misuse psychoactive substances; relationship to other existing health and mental health conditions; impact of substance misuse on an individual's family and community; and the system of care developed to prevent, address, and sustain recovery from addictive behaviors. Prerequisite: Math 101; Grade of B or better in SW 220; SW 530; SW 540; SW 555. LEC.

SW 573. Intergenerational and Historical Trauma. 1.5 Hour.
This course introduces students to the impact of historic and intergenerational trauma. The foundational context for the course is the impact of historic and intergenerational trauma on Native American and Black Americans, within the context of colonization and slavery dating to the 1600s at the founding of the United States. The course will examine the literature related to the history of multiple traumas endured by communities, which can result in cumulative emotional and mental health wounds that carry across generations. Students will understand and be aware of the many factors surrounding intergenerational trauma and a look in to inherited behaviors and epigenetics. Prerequisite: Math 101; Grade of B or better in SW 220; SW 530; SW 540; SW 555. LEC.
SW 600. Field Preparation and Field Seminar. 1 Hour.
Field Practicum Prep and Seminar is a two-semester course designed to bridge Social Work coursework and the field education experience by engaging in discussion and critical examination of theory, practice, and practicum. The first five weeks of the course are Field Prep, which prepares students for the rigor of field education and reduces related anxiety. With an emphasis on engagement exercises, students learn essential practice knowledge skills prior to the field experience. In the Seminar portion of the course, students explore the role of field practicum in their learning and how to maximize the experience by integrating coursework through group processing facilitated by the Seminar Instructor/Field Liaison. Concurrent enrollment is required in SW 601. SEM.

SW 601. Field Practicum. 5 Hours AE61.
Students complete 416 clock hours of field practicum during the fall and spring semesters. They are in one continuous field placement for 16 hours per week for 26 weeks. The practicum is a generalist experience covering direct practice and community practice as well as research and policy practice. Typical agency settings for BSW students include community mental health centers, child welfare offices, long term care facilities, and juvenile justice and/or corrections settings. This course is taken for two semesters (fall-spring), with credit given only after completion of the second semester. Enrollment in this course must be concurrent with enrollment in SW 600; SW 610 and SW 612. FLD.

SW 610. Social Work Practice Seminar I. 3 Hours.
Focuses on learning and implementing the problem-solving and interaction models of practice to be applied to individuals, families, and small groups. Concurrent with SW 601, practicum; students bring issues with clients to class for discussion. Open only to BSW seniors. Prerequisite: SW 510. LEC.

SW 612. Social Work Practice Seminar II. 3 Hours.
Second of two-course sequence extends the work begun in SW 610. Examines interventive strategies applicable to practice with larger systems. Models of community organization and community development are presented. Concurrent with SW 601, practicum; students work on individualized, agency-related projects. Prerequisite: SW 610. LEC.

SW 620. Social Policies and Program Analysis. 3 Hours.
Conceptual models for the analysis of social welfare problems and policies are developed. The frameworks are applied to the problem of poverty and major policies and programs developed to cope with that problem. In addition the model is used to examine social welfare problems/needs being addressed in the students’ practicum agencies. The focus throughout is on the understanding and application of analytic framework. Open only to BSW seniors. LEC.

SW 621. Social Policy Analysis and Advocacy. 3 Hours.
The course builds on SW 620 using the conceptual models to examine a range of social welfare problems/needs, policies and programs. Emphasis is on advancing student's understanding and skills for using the analytic framework and building policy advocacy skills. Attention given to the role of social workers in the legislative process for shaping social welfare frameworks. Open only to BSW seniors. LEC.

SW 623. Seminar in Professional Issues. 3 Hours AE51.
Seminar in the philosophy, values, and issues in contemporary social work and social welfare. Seminar will address areas such as conception of professional and professionalism, ethics and values, standards, licensing, and professional regulation, accountability and professional responsibility. Senior social work classification is required. LEC.

SW 630. Topics in Social Work Practice: Antisocial, Aggressive Behavior in Childhood and Early Adolescence. 1.5 Hour.
This course explores the theories and methods related to practice with children whose behavior is disruptive, oppositional, aggressive, or otherwise antisocial. Emphasis is placed on using protective and risk factors to design appropriate interventions. Open only to BSW seniors. LEC.

SW 631. Topics in Social Work Practice: Intimate Partner Violence. 1.5 Hour.
This course provides students with a beginning understanding of intimate partner violence including definitions, prevalence, theoretical frameworks, dynamics, and consequences for the individual, the family, the community and society. Students will develop skills required to assess, intervene, and prevent domestic violence cases. Open only to BSW seniors. LEC.

SW 632. Topics in Social Work Practice: Substance Abuse and Social Work Practice. 1.5 Hour.
This course will offer BSW students a very basic understanding of concepts associated with social work practice with people who confront challenges with alcohol and other drugs. Students will learn about substance abuse problems currently prevalent, recognize behavior related to substance abuse disorders and applicability of generalist social work practice models in developing interventions. Open only to BSW seniors LEC.

SW 633. Topics in Social Work Practice: Crisis Intervention. 1.5 Hour.
This course will provide undergraduate social work students with a basic introduction to crisis intervention, including theoretical models, the evolution and use of crisis theory and the design of interventions across a broad range of crisis situations. Open only to BSW seniors. LEC.

SW 634. Topics in Social Work Practice: Child Welfare - Protecting Children, Strengthening Families. 1.5 Hour.
This course will introduce undergraduate students to child welfare covering services to support the safety, permanency and well-being of children and their families. Students will learn about prevention, therapeutic intervention, family support and preservation, foster care, independent living, adoption, and post-adoption. LEC.

SW 690. Professional Education Topics in Social Welfare: _____ 0.5-3 Hours.
Current topics supplementing general social work knowledge of professionals in the field. Subjects offered as topics include: Addictions and Professional Enabling, Dynamics of Change, Computer Skills for Social Services Budgeting, Short Term Social Work Interaction. LEC.

SW 700. Field Preparation and Field Seminar. 1 Hour.
Field Practicum Prep and Seminar is a two-semester course designed to bridge Social Work coursework and the field education experience by engaging in discussion and critical examination of theory, practice, and practicum. The first five weeks of the course are Field Prep, which prepares students for the rigor of field education and reduces related anxiety. With an emphasis on engagement exercises, students learn essential practice knowledge skills prior to the field experience. In the Seminar portion of the course, students explore the role of field practicum in their learning and how to maximize the experience by integrating coursework through group processing facilitated by the Seminar Instructor/Field Liaison. Concurrent enrollment with SW 701 is required. SEM.

SW 701. Basic Field Practicum. 5 Hours.
Students complete 416 clock hours of practicum during the fall and spring semesters. Practicum placements require 16 hours of field education per week for 26 continuous weeks in one setting. The practicum is a
generalist experience covering direct practice and community practice as well as research and policy practice. Typical agency settings for generalist students include community mental health centers, child welfare offices, long-term care facilities, and juvenile justice and/or corrections. Students take this course for two semesters (fall-spring), with credit given only after completion of the second semester. Open only to generalist level MSW students. Concurrent enrollment is required in SW 700 and encouraged in SW 710 and SW 711. FLD.

SW 708. Human Rights and Social, Economic, and Environmental Justice. 2 Hours.
This generalist course lays a human rights-centered foundation for students’ graduate social work education, elevating the pursuit of social, economic, and environmental justice as a core dimension of social work practice. The course familiarizes students with the global human rights framework, exposes them to key human rights challenges in the current landscape, and engages them incountering these challenges. Students critically examine the state of human rights in the United States and expand their lens to consider social work as a global enterprise, where lessons are learned and contributions made in diverse transnational contexts. While emphasizing human well-being as a core aim of the profession, the course emphasizes the importance of restoring and protecting the natural world, as an end in itself and an essential preconditions for human thriving. In this course, students develop human rights literacy, learning the history of human rights governance, the mechanisms for protecting individual and group rights—and the limitations of these tools. They demonstrate empathy with those experiencing threats to their human rights, drawing on their commitment to diversity, equity, and inclusion. Students learn to practice as members of a global community committed to the dignity and worth of every person. Equipped with this complement of knowledge, skills, and values, students are prepared for generalist practice from a rights-based perspective. LEC.

SW 710. Multi-Level Engagement and Assessment: Individuals, Families, Groups, Organizations and Communities. 3 Hours.
This course prepares students for generalist social work practice with individuals, families, groups, organizations, and communities. Focusing on the beginning phases of the helping process, students will develop knowledge and skills to build rapport with individuals and families, connect with and leverage group dynamics, navigate and influence organizational cultures, and assess the strengths and needs of communities. In addition, students will learn how generalist skills can help to address population needs across levels of practice. This course will ask students to apply evidence- and theory-driven approaches for engagement and assessment, and students will critically consider how to support goal development, intervention planning, and collaborative assessment in diverse contexts. Concurrent enrollment in SW 701 (Field Practicum) is encouraged. LEC.

SW 711. Social Work Practice II. 3 Hours.
Second of two-course sequence and extends the work begun in SW 710. Focus in the second course is on mastery of the basics of helping relationships and the development of intervention skills for the middle and ending phases of intervention. Content is structured to prepare students to enter the advanced level of the M.S.W. program. Course taken concurrent with SW 701 and SW 702. Prerequisite: SW 710. LEC.

SW 712. Social Work Advanced Standing Seminar. 3 Hours.
Introduces advanced standing students to the mission, values, and principles of the School. Special emphasis is on strengths perspectives, multi-level social work, cultural humility, and developing critical and reflective skills in thinking about one’s own practice. Advanced standing plan of study required. LEC.

SW 713. Community and Organizational Practice. 3 Hours.
Social workers provide the leadership necessary to facilitate and coordinate community improvement and organizational effectiveness. This course introduces students to community and organizational knowledge and skills for social work practice. An advocacy perspective will act as the course’s unifying theme with client and community well-being acting as the driving force behind social work practice in community and organizational settings. LEC.

SW 720. Social Policy, Analysis, and Advocacy in Social Work. 3 Hours.
This generalist policy analysis and advocacy course provides students with essential policy knowledge and policy practice skills. The course examines existing social policies through the lens of social work values — particularly our profession’s commitment to social, economic, racial, and environmental justice — and equips students to engage in policy change in pursuit of human well-being and societal equity. In this course, students learn policy analysis knowledge and skills, with an emphasis on understanding how social welfare policy design, funding, and implementation affect people’s lives and influence the delivery of social work services. Policies designed to reduce poverty, address racial inequities, improve health, and increase social justice serve as exemplars for developing conceptual abilities in this course. Through critical examination of policies in the major domains of social work practice (physical and mental health, children and families, aging, housing, economic security), students prepare for policy-informed practice and for effective engagement in policy change strategies. Continuing students’ preparation for professional practice, the course emphasizes social welfare policy as the foundation for social work practice and positions policy analysis and intervention as integral to effective and ethical social work. LEC.

SW 730. Theory, Values and Ethics in Multi-Level Social Work. 3 Hours.
Students in this course learn theories developed to help explain human behavior in social environments and apply those theories to social work with individuals, families, groups, organizations, and communities. In applying theory to practice, students learn about social work values and ethics, using the School’s mission and values as a starting place and then moving on to a deep exploration of the professional Code of Ethics. Theories discussed include, but are not limited to, empowerment, systems, psychodynamic, critical, life span and family life course, cognitive and moral development, psychodynamic, white and racial identity development, and intersectionality in Critical Race Theory. Students also have an opportunity in this course to practice applying theories, values, and ethics to common social work settings and situations in the US and other countries. LEC.

SW 740. Social Work Research. 3 Hours.
Social work practice is guided by research. Developing best practices for helping clients and communities depends on studies designed to build a deep and nuanced understanding and/or test cause and effect relationships. This course covers the nature of science, scientific inquiry, theories for research, research methods and designs. Students learn to analyze the rigor of both qualitative and quantitative studies, and are introduced to quantitative and qualitative data analysis. LEC.

SW 755. Diversity, Equity and Inclusion in Social Work. 3 Hours.
This course provides students with a foundational knowledge of diversity, equity, and inclusion within multi-level social work. Students will examine theoretical, conceptual, and policy-based knowledge of systems of oppression, both historical and contemporary, and the ways in which power and privilege are embedded in them. Through ongoing and critical self-reflection, students will examine their own social identities (e.g. race/
in order to produce a variety of positive client outcomes in a range of contexts and across a range of institutions and policies that contextualize social work in the contemporary US. In keeping with social work values, this course takes an explicitly anti-racist, anti-sexist, anti-colonialist, and anti-oppressive stance. Prerequisite: Student must be admitted to MSW Program. LEC.

SW 760. Studies: ______. 1-3 Hours.
This course provides the opportunity for experimentation with innovative course content in accordance with guidelines established by faculty. LEC.

SW 801. Advanced Field Practicum-Clinical Practice. 7 Hours.
Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Enrollment must be concurrent with SW 810 and SW 811. Prerequisite: Completion of all foundation requirements. FLD.

SW 803. Advanced Field Practicum-Clinical Practice. 2-6 Hours.
Students are assigned to social service agencies that provide opportunities for advanced level clinical social work practice. All students work under the supervision of a qualified field instructor where they have the opportunity to integrate theory and practice and develop beginning competence in clinical social work practice. This course is generally taken for three semesters, with credit being given only after completion of the third semester. Open only to Advanced-level M.S.W. students with an approved modified practicum plan. Enrollment must be concurrent with SW 810 or SW 811. Prerequisite: Completion of all foundation requirements. FLD.

SW 804. Advanced Field Practicum-Macro Practice. 7 Hours.
Students are assigned to social service agencies that provide practice opportunities in community practice, advocacy and/or social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in macro social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students. Prerequisite: Completion of all foundation requirements. FLD.

SW 806. Advanced Field Practicum-Macro Practice. 2-6 Hours.
Students are assigned to social service agencies that provide practice opportunities in community practice, advocacy and/or social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in macro social work practice. This course is generally taken for three semesters, with credit being given only after completion of the third semester. Open only to Advanced-level M.S.W. students with an approved modified practicum plan. Prerequisite: Completion of all foundation requirements. FLD.

SW 810. Clinical Social Work Practice. 3 Hours.
Clinical social work practice occurs in a variety of settings, from large public and private agencies and institutions through many types of individual and group private practice situations. This course is designed to teach advanced knowledge and skills that transcend contextual factors in order to produce a variety of positive client outcomes in a range of practice situations. In addition, this course focuses on the commitment of social work practitioners to provide services to those groups who, by reason of class, race, sex, or other characteristics, are not ordinarily well served by the many institutions in this society. Course taken concurrently with SW 801 and SW 802 or SW 803 which provides an opportunity to integrate theory and practice in work with clients. Prerequisite: Completion of all foundation requirements. LEC.

SW 811. Topics in Advanced Clinical Social Work: ______. 3 Hours.
The organizing theme of the advanced clinical selective emphasizes application of advanced theoretical and practice principles to client systems. This advanced selective provides students with the opportunity to critically consider the themes of the school as they relate to the need for assessment, diagnostic, and process evaluations with a variety of client systems. Every student will engage in activities designed to solidify their professional identity as clinical practitioners as they enter the workforce. Topics offered may include solution-focused brief therapy; family therapy, and cognitive behavioral therapy. Course is taken concurrently with SW 801 and SW 802 or SW 803. Prerequisite: Completion of SW 810. LEC.

SW 830. Social Work in Child and Family Settings. 3 Hours.
An in-depth examination of social work in child and family settings. Students demonstrate the capacity to integrate research, policy, direct practice, and human behavior in considering the issues central to this area of practice. Students will also be able to explain how diversity issues manifest themselves at both the policy and direct practice levels. Prerequisite: Completion of all foundation requirements. LEC.

SW 832. Social Work in Health Care and Mental Health Settings. 3 Hours.
Content as in SW 830 focused on health care and mental health. LEC.

SW 833. Interdisciplinary Aging Practice. 3 Hours.
An in-depth examination of social work in aging settings. Students demonstrate the capacity to integrate research, policy, direct practice, and human behavior in considering the issues central to this area of practice. Students will also be able to explain how issues manifest themselves at both the policy and direct practice levels. Prerequisite: Completion of all foundation requirements. LEC.

SW 834. Social Work in Schools. 3 Hours.
Content as in SW 830 focused on schools. LEC.

SW 840. Program Design and Grant Writing. 3 Hours.
In this course, advanced social work students learn to design social services, and social work administration. All students work under the supervision of a qualified field instructor where they have the opportunity to develop beginning competence in macro social work practice. This course is generally taken for two semesters, with credit being given only after completion of the second semester. Open only to Advanced-level M.S.W. students with an approved modified practicum plan. Prerequisite: Completion of all foundation requirements. FLD.

SW 841. Advanced Policy and Programs. 3 Hours.
The focus is on the development of skills to stay abreast of and knowledgeable about critical federal and state policies, regulations, and funding structures and streams in students' chosen field of practice. Students will also learn how to research the literature on best practice and effective programs. All of these skills and consequential knowledge will be used to inform program design, resource acquisition, financial management, personnel management, outcome management, and other administrative functions. Prerequisite: Completion of all foundation requirements. LEC.

SW 842. Assessing and Managing Outcomes. 3 Hours.
How do social work administrators know if their agencies and programs are making a positive difference in the lives of clients and communities? This course focuses student learning on how to gather and use
information to improve human service program performance, and client and community outcomes by extension. Prerequisite: Completion of all foundation requirements. LEC.

SW 843. Program Management and Supervision. 3 Hours.
Social workers who help direct human service and community practice settings must be able to stay abreast of new knowledge and build new skills in managing programs and supervising people. This course focuses on the tasks, roles, and functions of managers including effective employee supervision and human resource management as well as the development of a diverse workforce. Prerequisite: Completion of all foundation requirements. LEC.

SW 846. Advanced Community and Advocacy Practice. 3 Hours.
This course is designed to build on the content of the foundation course on community and organizational practice by further developing the theories, methods, and skills of community and advocacy practice. The course will help students build advanced analytical and empirical skills needed to effectively manage and advocate with and on behalf of different human service communities. Prerequisite: Completion of all foundation requirements. LEC.

SW 849. Managing Financial Resources. 3 Hours.
Budgeting and financial management are critical to social workers who lead social service organizations. Focus is on budgeting techniques and their application; use of budgets for decision making, allocation and reallocation of resources to best meet client and community needs. Prerequisite: Completion of all foundation requirements. LEC.

SW 852. Social Work with Groups. 3 Hours.
Theory and practice of social work in the wide range of groups in which social workers participate as workers and co-workers. Focus on the social worker's tasks and behaviors in establishing group services and in facilitating work in the group from the time of its formation to its termination as a service entity. Prerequisite: Completion of foundation requirements. LEC.

SW 855. Study Abroad Topics: _____ , 3 Hours.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy and South Korea. LEC.

SW 860. Loss and Grief. 3 Hours.
Examines the multiple faces of loss and grief throughout the human life cycle. Examines personal and societal attitudes toward death and dying and the processes of dying and grieving. Course includes exploration of assessment and interventions that enable individuals and their families to cope with loss. Prerequisite: Completion of all foundation requirements. LEC.

SW 861. Intimate Partner Violence. 1.5 Hour.
This advanced practice course addresses the seriousness and extent of the problem, contributing factors, consequences for the individual, the family, the community, and society. Prevention and intervention practice models will be discussed within a clinical and strengths framework with a focus on developing skills for assessment, intervention, and prevention of violence with individuals and families. Concurrent enrollment in SW 862. LEC.

SW 862. Intrafamilial Sexual Abuse. 1.5 Hour.
This course will focus on sexual misuse that occurs within the family system. Students will obtain a comprehensive understanding of sexual misuse that occurs within the family system and develop assessment and helping skills needed when working with abusive families. Theoretical, assessment, and helping aspects of intrafamilial sexual abuse will be examined. Concurrent enrollment in SW 861. Prerequisite: Completion of all foundation requirements. LEC.

SW 863. Mental Health and Psychopathology: A Biopsychosocial Approach. 3 Hours.
Students in this course will learn the language of and ways to conceptualize the areas of biopsychosocial assessment, diagnosis, and taxonomy. In addition, the course will teach students how to understand mental health issues across the life course and present symptomatology. Taught from the perspective of social work as a professional discipline, the course emphasizes the complex and continuous interactions between people and their environments (biological, psychological, social, spiritual, and ecological). Students learn about multiple influences on mental health and explore related human rights, social justice, and critical perspectives. The Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5) provides an organizing framework for this course; however, alternative taxonomies, as well the adequacy and appropriateness of the DSM-5 in social work practice will be addressed throughout the course. Students will consider social work ethical directives, as well as the impact of poverty, race, class, heteronormativity, stress, social support, and various forms of bias in the course. This course will emphasize those diagnoses commonly encountered in social work as well as the relationship between social work assessment and the diagnostic process. A biopsychosocial approach to the course highlights the role of holistic diagnosis and treatment options, as well as current evidence on overlapping health and mental health issues medication-assisted interventions. Prerequisite: Completion of all generalist level requirements. LEC.

SW 866. Social Work Practice with Children and Adolescents. 3 Hours.
Developmental norms and processes in childhood and adolescence and related implications for assessment and intervention methods in work with children and adolescents. Topics include countertransference issues in work with children, working with parents and children, intervention tools, stress in childhood, special issues, and concerns in adolescence, sexual abuse of children. Prerequisite: Completion of all foundation requirements. LEC.

SW 868. Crisis Intervention and Suicide Risk Reduction. 3 Hours.
Principles of planned short term intervention generally and of crisis intervention specifically are addressed. The use of and application of crisis theory, crisis intervention, and suicide risk reduction are examined. Evidence based practices regarding the effects of crises including disasters on individual, family, and community well-being are considered. Prerequisite: Completion of all foundation requirements. LEC.

SW 869. Social Work with Clients with Alcohol and Drug-Related Problems. 3 Hours.
Focus is on developing value consciousness and multidimensional understandings in relation to drug use and abuse. Patterns of drug use, sociocultural attitudes toward drug use and definitional issues in the drug field will be examined. Explanatory theories and contemporary interventions, including the applicability of generalist social work practice models are presented and critically assessed. Prerequisite: Completion of all foundation requirements. LEC.

SW 870. Spiritual Diversity in Social Work Practice. 3 Hours.
This course provides a framework of knowledge, values, and skills for spiritually-sensitive social work practice. In order to prepare students to respond competently and ethically to diverse spiritual perspectives, a comparative, critically reflective approach to content is employed. The role of religion and spirituality in supporting or impeding individual strengths and social justice is considered. Prerequisite: Completion of all foundation requirements. LEC.
SW 872. Cultural Diversity in Social Work Practice. 3 Hours.
Provides students with a framework of knowledge, values, and practice methodology for culturally competent social work practice. Emphasizes themes of oppression and empowerment, culture-specific strengths and resources, and multicultural/transcultural perspectives. Prerequisite: Completion of all foundation requirements. LEC.

SW 873. Sexuality and Gender Diversity. 3 Hours.
The purpose of this course is to enhance clinical skills for practice pertaining to sexuality and gender with a primary focus on working with people with marginalized sexualities and genders (e.g., lesbian, gay, bisexual, transgender, queer, questioning, intersex, asexual, pansexual, etc.). Utilizing a social justice and equity framework, students examine their own identities, experiences, and larger systems of oppression to engage in effective and ethical practice with people who have marginalized sexualities and genders. The course integrates history, theory, research, policy, and practice and is centered within social work tenets, ethics, and values while also creating space for students to engage with practice across multiple disciplines and enhance transdisciplinary practice skills. Prerequisite: Completion of all foundation requirements. LEC.

SW 874. Social Work Practice with Women. 3 Hours.
Expands knowledge and practice skills in working with women in diverse social work practice settings. Critical examination of traditional and feminist practice approaches to problems that frequently confront women. Prerequisite: Completion of foundation requirements. LEC.

SW 875. Readings and Investigations: _____ 1-3 Hours.
Opportunity for scholarly investigation in an area of special interest. Students pursue independent study in an area of social work practice through the guidance of a selected faculty member. RSH.

SW 878. Social Work with African American Families. 3 Hours.
The purpose of this course is to introduce students to the basic knowledge, values, and skills needed to work effectively with African American clients and their families. Critical examination of issues such as racism, oppression, and the historical context and their impact on African American families. Prerequisite: Completion of all foundation requirements. LEC.

SW 890. Current Issues in Professional Social Work Education: _____ 0.5-3 Hours.
Course provides opportunity for innovative course content designed for the social work professional. Subjects offered include: Psychopathology: A Biopsychosocial Approach, Ethics and the Social Worker, Mediation, Solution Focused Practice, Strengths-based Management, Outcome-based Measurement of Practice. LEC.

SW 911. PhD Seminar I. 1 Hour.
Students will discuss critical issues related to both substantive and professional issues related to doctoral education, the education of social workers, research and methodological procedures and practices, transitioning from student to academic scholar, and social work ethics in all realms of scholarship. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Student must be admitted to the School of Social Welfare PhD program. LEC.

SW 912. PhD Seminar II. 1 Hour.
Building on the first year of the doctoral program and SW 911 - PhD Seminar I, students will continue to discuss critical issues related to both substantive and professional issues related to doctoral education, the education of social workers, research and methodological procedures and practices, transitioning from student to academic scholar, and social work ethics in all realms of scholarship. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Student must be admitted to the School of Social Welfare PhD program. LEC.

SW 955. Study Abroad Topics: _____ 3 Hours.
This course provides the opportunity for Study Abroad in developed and developing countries such as Costa Rica, India, Ireland, Italy, and South Korea. LEC.

SW 975. Racial Equity and Social Justice in Research and Implementation Science. 3 Hours.
This course explores racial equity and social, economic, and environmental justice as it relates to research and implementation science. These two major components are explored and integrated throughout the semester. First, through a historical equity lens, students identify the ways in which research has contributed toward oppression and marginalization. They situate their own research in an anti-oppressive framework and critical lens to understand and identify research methods that promote equity and justice both in the research process and potential impacts. Second, students develop an understanding and application of implementation science principles and frameworks. Students gain knowledge and skills for identifying and using implementation science strategies that support the translation of research into real world practice. Implementation is examined from an equity lens to consider how implementation processes can promote racial equity and social, economic, and environmental justice. LEC.

SW 978. Research Design and Methods. 3 Hours.
This class is an in-depth introduction to the process of conducting research. This introduction provides the essential context for the qualitative, quantitative, and mixed methods research courses. LEC.

SW 979. Methods of Qualitative Inquiry I. 3 Hours.
This course is the first in a sequence of two courses on qualitative inquiry required for students in the social work Ph.D. program. It provides a detailed overview of knowledge and skills for designing qualitative inquiry. It examines issues in the philosophy of science, paradigms for qualitative inquiry in social work, and a diverse range of methods that flow from these paradigms. It emphasizes principles and procedures for qualitative inquiry design, including an introduction to data collection, analysis, and criteria for establishing methodological rigor (i.e. trustworthiness). LEC.

SW 980. History and Philosophy of Social Work. 3 Hours.
This course is designed to provide students with opportunities to examine the underlying conceptual frameworks of social work practice—their history and present manifestations. This course rests on the definition of social work practice that includes the interaction of knowledge, value, and skill around professional purpose and in the context of professional sanction. LEC.

SW 981. Advanced Quantitative Research Methods I. 3 Hours.
This course, which includes a lab, focuses on quantitative research methodology and related inferential statistics, emphasizing mastery of specific methodological and statistical knowledge and skills. The course will address the following topics: the framing of research questions; the selection of appropriate research methods and designs; the selection of appropriate statistics for data analysis; the principles of analysis; interpretation of findings; and the presentation of results. LEC.

SW 982. Social Welfare Policy. 3 Hours.
This seminar helps doctoral students learn to analyze social welfare policies and programs. After comparing and contrasting various policy analysis frameworks, students learn to analyze the ways in which social conditions, values, and ideologies shape the definitions of social problems as well as the development, implementation, and evaluation of social welfare policies that impact those problems. LEC.
SW 983. Advanced Quantitative Research Methods II. 3 Hours.
The purpose of this advanced research methods course is to help equip professionals to design and carry out research with direct implications for social work practice and social welfare policy. Building on the experience in SW 978 and SW 981, this course will focus on more advanced topics in research design and both experimental and correlational statistical analyses. LEC.

SW 984. Social Work Practice: Identifying and Improving "Best Practices. 3 Hours.
The main focus of this seminar is on developing skills for conduction multi-dimensional, value critical inquiry about "best practices" relevant to social work practice, and applying the results of that inquiry toward extending and improving current "best practices". LEC.

SW 985. Theory for Research: ______ 3 Hours.
This course provides an introduction to interdisciplinary theory for applied social research, focusing on: (1) the roles and uses of theory in social inquiry (2) theory building and theory testing (3) induction and deduction (4) the articulation of common or related theoretical traditions in various social science disciplines. LEC.

SW 987. Teaching Social Work: Philosophy and Methods. 3 Hours.
The purpose of the course is to prepare doctoral students for effective teaching of Social Work courses at all levels of higher education. Doctoral students need practical skills, a theoretical base, experience, and confidence in order to improve their teaching performance. LEC.

SW 988. Mixed Methods in Social Science Research. 3 Hours.
The purpose of this course is to provide an overview of mixed methods research, consisting of the history and philosophy of mixed methods research, the emerging literature on it, purposes and characteristics of mixed methods research, types of research problems addressed, the specification of mixed methods purpose statements and research questions, types of major mixed methods designs, data collection and analysis strategies, and reporting and evaluating results. LEC.

SW 989. Methods of Qualitative Inquiry II. 3 Hours.
This course is the second in a sequence of two courses on qualitative inquiry required for students in the social work Ph.D. program. It provides in-depth methodological knowledge and skills for implementing qualitative inquiry and writing research reports. It examines implementation issues related to a diverse range of methods that flow from the paradigms addressed in SW 979. It provides guidance for implementation of research designs for projects developed in SW 979, including application of methods for data collection, analysis, supporting criteria for methodological rigor (i.e. trustworthiness), and writing up findings and implications. Prerequisite: SW 979. LEC.

SW 990. Graduate Research. 1-9 Hours.
Individual research preparatory to defense of dissertation prospectus. (By arrangement with doctoral chair.) Graded on a satisfactory progress/limited progress/no progress basis. RSH.

SW 998. Doctoral Applied Research and Education Studies. 1 Hour.
This course provides the opportunity for doctoral students to learn about research or teaching through direct application of research or teaching skills under the mentorship of faculty. RSH.

SW 999. Dissertation. 1-12 Hours.
Graded on a satisfactory progress/limited progress/no progress basis. THE.

Courses
SWWD 101. Home Visiting I. 1 Hour.
This course provides the foundational knowledge for Family Support professionals on home visiting and developing relationships with families that are informed by the multiple, intersectional issues that families face. Topics will include: Prenatal Basics, Child Development, and Child Abuse and Neglect. Prerequisite: Must be admitted as undergraduate Social Welfare non-degree seeking (SOCWN) students. LEC.

SWWD 102. Home Visiting II. 1 Hour.
Building on foundational skills, this course will provide extended knowledge in the areas of Breastfeeding, risks of substance use, and confidentiality. Family Support Professionals will gain the knowledge necessary to support families beyond basic needs to essential life skills. Prerequisite: Must be admitted as undergraduate Social Welfare non-degree seeking (SOCWN) students. LEC.

SWWD 110. Supervision for Family Support Professionals. 1 Hour.
This course focuses on skills for supporting Family Support Professionals in the practice of early intervention services. Supervisors will gain knowledge in the areas of cultural diversity, ethics, and professional development. Prerequisite: Must be admitted as undergraduate Social Welfare non-degree seeking (SOCWN) students. LEC.

Bachelor of Social Work
Bachelor of Social Work Program
The School of Social Welfare provides the education and experience necessary for a career in social work. By helping shape students’ capacity for caring, the School prepares social workers to carry out the unique purposes of the profession — to develop human potential, to promote individual well-being, and to bring about a more just society.

Social work is a major professional discipline in the Social Sciences. The term social welfare denotes organized public or private social services pertaining to human needs: adequate nutrition and safe housing, health and mental health, education, economic security, social participation, dignity, and civil and political rights for disadvantaged people.

The undergraduate program prepares graduates for generalist social work practice. The program defines generalist practice as maintaining focus on practice and advocacy, based on ethical principles, scientific inquiry, and best practices at the interface between systems (i.e., individual, family, groups, organizations, and communities), with particular emphasis on:

• The strengths inherent in these systems.
• The need to understand the role of gender, age, race/ethnicity, class, religious beliefs, sexual orientation, disability, and culture in all phases of the social work process.
• The promotion of human rights and social, economic, and environmental justice for those disenfranchised on the basis of the attributes listed above.
• The assumption of a critical perspective regarding different ways of knowing.

Beginning generalist practice uses multilevel prevention and interventions methods, depending on the needs of the client system, and incorporates a knowledge, value, and skill base that is transferable between and among diverse contexts and locations.

The BSW program is offered on the Lawrence and Edwards campuses.
Advising

Once a student is admitted to the School of Social Welfare, an academic adviser will be assigned to assist students in the enrollment process and with other academic program requirements. Students consult with their academic adviser before enrollment each semester and have their advising hold removed. In addition, a member of the School’s faculty is assigned as a professional/career adviser. Current students can view their advisers on Jayhawk GPS.

For more information on BSW advising, review the student handbook (http://socwel.ku.edu/resources/forstudents/academic-handbooks/).

Transfer Students

For undergraduates who plan to transfer to KU but currently attend another college, advising is available by phone or email. The school works closely with counselors from all Kansas colleges.

Degree Progress Report

The Degree Progress Report (DPR) is a computerized advising and degree-audit system, used to assist students and advisers in tracking progress toward completion of general education degree and major requirements. Students should review their DPR each semester and be prepared to review and discuss information contained in the DPR at all advising appointments. The DPR can be accessed through the student’s account in the myKU portal (https://my.ku.edu/uPortal/f/welcome/normal/render.up) under the Advising tab. Although the DPR provides a list of courses taken and grades earned, it is not an official transcript and can be used only for internal advising.

Certificate Programs

Certificate in Child Welfare

The School of Social Welfare’s Certificate in Child Welfare (http://socwel.ku.edu/academics/degrees/bsw/bsw/certificateprograms/) provides seniors in the BSW program with specialized knowledge and skills to prepare them for a career in the field of child welfare. The certificate offers specialized training in social work practice with children and families who are involved with the child welfare system and provides a child welfare practicum as part of the experience.

Undergraduate Experiential Learning Certificate Programs

The university offers several experiential learning certificate programs that work well with the undergraduate social work major. Students who complete an engaged learning certificate program receive a notation of it on their transcripts. Learn more about KU certificate programs (https://advising.ku.edu/special-programs-certificates/). (https://experience.ku.edu/)

Undergraduate Admission to KU

Students are directly admitted to the School of Social Welfare as new freshmen and transfer students. Visit the Office of Admissions (http://admissions.ku.edu/) for information about admission to KU. Visit the Office of International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Current KU students changing from another major to Social Welfare should complete a Change of School form and must meet the advancement requirements.

Undergraduate Advancement Review for the School of Social Welfare

Advancement Requirements

For students to advance into 500 and 600 level Social Welfare coursework, they must complete the BSW Advancement Review (http://socwel.ku.edu/academics/degrees/bsw/bsw/apply/) prior to beginning 500 level classes. The Advancement Review includes the following:

- 54 hours of General Education requirements or elective hours including:
  - Math 101 (College Algebra) or LA&S 108 (Personal Numeracy)
  - English 101 (Composition)
  - English 102 (Critical Reading and Writing)
  - Minimum cumulative GPA of 2.50.
  - Earned grade of B or higher in SW 220.
  - One letter of reference from a faculty member or instructor or a work or volunteer supervisor. Personal or character references are not acceptable.

*Students must complete all general education requirements including electives prior to the start of 600 level course work and practicum.

Grade-Point Average

A student must maintain a minimum cumulative grade-point average of 2.5 and a 2.5 in social work required courses. Evaluation of transcripts submitted as part of the application for admission includes computation of grade-point average for all work completed. This admission grade-point average is adjusted to include only courses that transfer to KU. Both transferable credits and all work taken at KU count in the grade-point average when advancement requirements are reviewed.

Bachelor of Social Work Degree Requirements

Primary responsibility for meeting graduation requirements rests with the student.

- A minimum of 120 credit hours of course work, including 12 credit hours of field practicum and field preparation & seminar.
- 51 Social Welfare hours including SW 220.
- 41 hours of general education requirements.
- 28 hours of electives.
- A 2.5 minimum grade-point average for all classroom work.
- A 2.5 minimum grade-point average in required social work courses.
- Successful completion of field practicums.
- Recommendation by the faculty of the school to the chancellor and the Kansas Board of Regents that the degree be granted.

Field Practicum (SW 601)

The field education office works with community agencies to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (http://socwel.ku.edu/academics/degrees/bsw/bsw-fe/fieldeducation/).

Required Hours for Field Practicum

Students with 9 or more remaining elective or general education requirement credit hours in the fall of the senior year may be required to complete these hours before beginning field placement. Students who are completing these hours may take SW 620, SW 621, and the mini-courses, but they cannot enroll in SW 610, SW 612, or SW 623.

Liberal Arts Requirements for a broad base of understanding

Undergraduate Certificate in Child Welfare

Certificate Description

The KU School of Social Welfare's Certificate in Child Welfare provides seniors in the B.S.W. Program with specialized knowledge and skills to prepare them for a career in the field of child welfare. The Certificate in Child Welfare offers specialized training in social work practice with children and families who are involved with the child welfare system and provides a child welfare practicum as part of the experience.

Requirements for the Certificate in Child Welfare are as follows:

- Field Practicum with an agency that is working with children and families as part of the child welfare system in the student's final year (SW 601) - 12 hours
- Undergraduate mini-course: SW 634 - Child Welfare: Protecting Children, Strengthening Families - 1.5 hours
- One additional mini-course: SW 630 - Antisocial, Aggressive Behavior in Childhood & Early Adolescence; SW 631 - Intimate Partner Violence; SW 632 Substance Abuse & Social Work Practice; OR SW 633 Crisis Intervention. - 1.5 hours
- SW 610 - Social Work Practice Seminar I - 3 hours
- SW 612 - Social Work Practice Seminar II - 3 hours
- Applied Behavioral Science (ABSC 160) - 3 hours
- Psychology (PSYC 104) - 3 hours

Master of Social Work

Master of Social Work

Social workers help individuals, families, groups, organizations, and communities survive and thrive. With a focus on enhancing the social, economic, and environmental wellbeing of disadvantaged, disenfranchised, and marginalized people, social workers can help children and adults resolve problems in living, increase emotional and behavioral health, enhance psychological and social wellbeing, and change policies and programs to better serve communities.

Built upon a commitment to helping identify and enhance the strengths of individuals, families and communities, the Master of Social Work program (https://socwel.ku.edu/academics/degrees_landing/) offers professional education with learning opportunities in the classroom and in the field for students who want to work to increase the quality of life for all people.

Some students have earned a BSW degree before beginning the MSW program, while other students come with different educational backgrounds and undergraduate degrees. We encourage people with all undergraduate degrees to apply to the MSW program if they are passionate about helping others by providing social services and working to achieve social justice.

Full-time students who have already earned a BSW from a CSWE-accredited program are able to complete the MSW in as little as one year (summer, fall, and spring terms) with an advanced standing plan of study. Students with an advanced standing plan of study can also earn their MSW degree on a part-time basis.

Students with undergraduate degrees in fields other than social work can complete the MSW program with a traditional plan of study in as little as two years full-time. We also allow students with traditional plans of study the opportunity to earn their MSW degree part-time in three or four years.

The first year of the traditional plan of study in the MSW program prepares students for generalist social work practice with individuals, families, groups, organizations, and communities. Generalist courses include content on human rights; social, economic, and environmental justice; policy and advocacy; applied research; professional ethics; theory for practice; and diversity, equity, and inclusion. In addition, students learn how to engage, assess, intervene, and evaluate their interventions at all levels of practice in generalist MSW courses and in their first practicum placements.

Following generalist courses and field education, MSW students advance to one of two areas of social work specialization: (1) clinical practice or (2) macro practice. The clinical practice specialization prepares students for social work with individuals, families, and groups in a counseling setting. The macro specialization prepares students for leadership positions in organizations and communities. Macro specialization courses include
advanced content in the administration of programs and agencies, as well as community practice and advocacy.

The MSW program is offered in Lawrence, at the Edwards Campus in Overland Park, and in other Kansas communities such as Pittsburg and Garden City.

Social Work & Law

Joint Degree in Social Work and Law

The Juris Doctor/Master of Social Work (http://socwel.drupal.ku.edu/academics/degrees/msw/mswjod/overview/) joint degree program combines into 4 years of study the 3-year Juris Doctor program offered by the School of Law and the 2-year MSW degree offered by the School of Social Welfare. The social work practitioner gains an understanding of the legal environment and its impact on social problems. The legal practitioner learns how social problems shape the law. Applicants must apply to and meet the criteria for admission to both schools. Contact each school for separate admission information.

Master of Social Work

Traditional MSW Program - Full-Time or Part-Time

Applicants must have undergraduate degrees from accredited universities before beginning the MSW program. Most students with a traditional plan of study do not have BSW degrees. However, some students with BSWs want a traditional plan of study in order to get up to speed after a number of years away from social work education and/or two different practicum placements to bolster their MSW field education.

Advanced-Standing Program

Advanced standing requires a bachelor’s degree from a CSWE-accredited social work program with a grade-point average of at least 3.0. We are interested in references from instructors who can speak to your academic abilities and readiness for graduate education. In addition, applicants with work experience in human services and/or social justice are encouraged to submit a letters of recommendation from supervisors who can address your competencies in the field. Current seniors who are applying for advanced standing should submit their fall semester transcript and documentation of their successful undergraduate field education experience.

For both the traditional and advanced standing plans of study, we have a holistic approach to admission decisions. We admit students based on a review of several factors including successful completion of undergraduate liberal arts courses, measures of academic achievement including undergraduate GPA, prior work experience in human services or social justice, and strong references from instructors and supervisors. All applications to the MSW program become the property of the University of Kansas.

Learn more about the MSW programs (https://socwel.ku.edu/academics/degrees_landing/).

Admission to the MSW Program

MSW Admission Requirements

- Bachelor's degree from an accredited university (Traditional MSW).
- Bachelor's of social work degree from a CSWE-accredited social work program (Advanced Standing).
- Undergraduate grade-point average of 3.0 or above preferred. The admissions committee takes into account special circumstances such as improvement of grades in upper-division or graduate courses. We look for evidence of an applicant's commitment to the well-being of people and communities; a well-developed sense of self; emotional maturity and the ability to think clearly, creatively, and independently.
- Online application including three electronic reference forms and student-issued transcripts from all previously attended schools regardless of degree status.
- All applicants who have been employed in a social work setting should submit an electronic M.S.W. reference form from at least one supervisor who can address the applicant's knowledge, skill and readiness for graduate social work education as one of the three references.
- Non-refundable application fee of $65 for domestic students and $85 for international students.
- Graduate Record Examination scores are not required. Applicants are evaluated on undergraduate grade-point average, graduate course work (if any), volunteer and work experience especially related to social work, and evidence of potential for a social work career in the application narrative and references.

Deadlines

The deadline for the Advanced-Standing Program is January 15. The deadline for applications to the Traditional MSW program (full time or part time) is February 15. Early application is encouraged.

Admission Process for All Programs

MSW degree program students are admitted for summer semester for Advanced Standing and fall semester for Traditional plans of study. Applications may be submitted anytime between Oct. 1 and January 15 (Advanced Standing MSW) or Feb. 15 (Regular MSW). All fully completed applications are reviewed upon receipt. Admission decisions are made in the spring of each year. Advanced-Standing MSW students begin in June; all other MSW students (full time and part time) begin in August.

Learn more about the application process (http://socwel.ku.edu/academics/degrees/msw/regular/admission/+).

International Students

International students from all regions of the world are encouraged to apply. For more information about international student applications and resources and regulations contact International Support Services (http://www.iss.ku.edu/) and the Applied English Center (http://www.aec.ku.edu/).

International students and students who indicated English as a second language, are required to show proof of English proficiency for admission purposes and must check-in with the Applied English Center (http://www.aec.ku.edu/) (AEC). This process serves to confirm each student's level of English proficiency and determine whether English courses will be included as a requirement of the student's academic program. Note: See English Proficiency Requirements for Admission to Graduate Study (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/+).

Note: The need to take English courses may delay your start in or extend the length of the MSW program.
If admitted to the MSW program, your admission to the School of Social Welfare is provisional. The International Conference on Social Welfare recommends that before seeking professional education for social work in the United States, a student should complete comparable study available in his or her own country and acquire a minimum of 2 years of social work experience there.

**MSW Traditional Plan of Study Degree Requirements**

The School of Social Welfare requires a total of 64 credit hours for the MSW degree, consisting of

- 38 credit hours of classroom work maintaining a grade-point average of 3.0 (B).
- 26 credit hours of field practicum with an (S) grade for satisfactory performance.
- Recommendation of the faculty of the School of Social Welfare to the University Registrar that the master's degree be granted.

**MSW Generalist Curriculum**

The following courses (http://socwel.drupal.ku.edu/academics/degrees/msw/regular/c remarkably well-rounded education in social work. The curriculum is designed to provide students with a strong foundation in social work theory, practice, and policy, as well as opportunities for practical experience through field education and elective courses. The Generalist curriculum includes a comprehensive set of courses in social work fundamentals, practice, and advanced skills. Students have the flexibility to tailor their education to their career goals, while also gaining a broad understanding of the field. This well-rounded approach prepares students for a variety of social work positions, whether in direct practice, community organizing, policy analysis, or education.

**MSW Specialization Curriculum**

Following generalist courses and field education, students advance to one of two areas of specialization: (1) clinical practice or (2) macro practice. This selection is based on their goals of working directly with individuals, families, and groups at the macro-level of practice. With the exception of study abroad courses offered by the School of Social Welfare, students may not enroll in specialization classes before completing generalist requirements.

All students completing the MSW degree are eligible to apply for licensure in the State of Kansas as Licensed Master Social Workers (LMSW). Students who anticipate working towards meeting the requirements for the Licensed Specialist Clinical Social Worker (LSCSW) examination should specialize in this area.

**Clinical Social Work Specialization**

This 32-credit-hour specialization prepares MSW students for clinical social work with individuals, families, and groups. Students specializing in clinical social work develop the knowledge and skills to help people resolve chronic and/or acute problems in living, increase emotional and behavioral health, and enhance psychological and social wellbeing. Clinical social work students learn advanced engagement and assessment practice skills, as well as a wide variety of interventions and how to evaluate the efficacy of those interventions. From a social work perspective, the clinical specialization prepares students to work in counseling and mental health settings with clients who have personal, interpersonal, and social needs requiring theoretically grounded and evidence-based therapeutic services. Students also have the opportunity to practice their clinical skills in field education settings as part of their graduate studies in social work. Students who anticipate taking the Licensed Specialist Clinical Social Work (LSCSW) examination in Kansas when they become eligible to do so should specialize in this specialization.

The following courses must be taken in the clinical specialization (32 credit hours):

(Those students interested in school social work should take SW 834 as one of their elective courses.)

Note: Earning an MSW in the clinical social work specialization requires 15 credit hours of course work which has clinical content covering issues of diagnosis and treatment. These courses include SW 810, SW 811, SW 863, integrative seminars, and clinical electives. Study Abroad courses do not contain clinical content and may be used toward the
diversity selective requirement or as an elective. If a student enrolls in Study Abroad for the diversity selective requirement, the elective course must contain clinical social work content.

**Macro Social Work Specialization**

The 32-credit-hour macro practice curriculum prepares MSW students for leadership in social work agencies and social justice organizations. Students specializing in macro practice learn advanced administrative and advocacy skills and abilities for work in both the public and private sectors. The macro specialization helps students achieve competence in designing and implementing human services, community practice, and policy practice from a social work perspective. Knowledge and skills developed in this specialization include program design, managing information and resource, human resource management, community organizing, advanced advocacy, and program evaluation. This specialization prepares MSW students to be program and agency administrators, supervisors, advocates, and evaluators in public agencies and departments (local, state, and federal) and private human services and social justice organizations. Students in the macro practice specialization are eligible to take the LMSW license examination in Kansas immediately upon graduation from the MSW program.

The following courses must be taken in the Macro specialization (32 credit hours):

<table>

**MSW Advanced Standing Plan of Study**

The Advanced-Standing plan of study requires an enrollment of 38 credit hours, as follows:

- A summer enrollment in 2 classes:
  a. SW 712, a social work practice class organized around the school's major curriculum themes. Students must earn a minimum grade of B in SW 712 to continue matriculating.
  b. An elective course selected by the student to broaden the base of knowledge.
- The specialization level of the MSW program (32 credit hours):
  a. 18 credit hours of classroom work maintaining a grade-point average of 3.0 (B)
  b. 14 credit hours of field practicum with an S grade for satisfactory performance

**Field Practicum**

The field education office works with community agencies to provide field practicum opportunities for students. Students are placed in these agencies through a collaborative process among the field education office, the student, and the agency. The field education office is responsible for ensuring that all field placements are able to provide the appropriate learning opportunities for students and that qualified field instructors will be available to the student.

Learn more about field education (http://socwel.ku.edu/academics/degrees/bsw/msw-fe/fieldeducation/).

**Prior Work Experience**

In accordance with national curriculum policy, prior employment and life experience may not be credited toward classroom course work or practicum requirements.

**School Social Work**

The Kansas Department of Education no longer certifies school social workers. However, the School of Social Welfare strongly recommends that students interested in practicing in a school setting take the following:

- A practicum experience at the advanced level in a public school setting under the direct supervision of a school social worker.
- Clinical social work concentration.
- SW 830 Social Work in Child and Family Settings.
- SW 834 Social Work in Schools as 1 clinical elective.
- SPED 725 is highly recommended as an elective choice for students planning a future in school social work.

**Doctor of Philosophy in Social Work**

**Doctor of Philosophy in Social Work**

The goal of the University of Kansas School of Social Welfare doctoral program is to prepare students to become leaders nationally and internationally in advancing social work practice and policy through research, teaching, and scholarship. Our students graduate from the program with the critical knowledge and skills they need to become innovative stewards of the discipline who generate and disseminate knowledge as researchers, scholars and educators. The school is known nationally and internationally as a prime innovator in the Strengths Perspective for social work practice. Doctoral students have played a key role in advancing this work to its 21st century applications.

**Program Highlights**

- Creative, critical thinking about social work practice, social policy, and guiding theoretical frames
- Advanced quantitative and qualitative research skills
- Opportunities for innovative scholarship and for the development of teaching skills
- Student-centered educational approach
- Financial support and mentoring for students
- Appreciation for human diversity and the development of a global perspective
- Social, economic, and environmental justice focus
- Study Abroad opportunities

Doctoral students are immersed in the excitement and creativity in the profession — how professionals come to know what they know, how they put that knowledge into practice and how it affects social justice.
Consider Our Program

The Ph.D. program offers effective options for building knowledge by initiating systematic inquiry into methods, forms, and outcomes of social work practice and social welfare policy. We are dedicated to educating scholars who desire to build knowledge for the profession through quantitative, qualitative, theoretical, or conceptual analyses, and historiographic investigations. Demand for our Ph.D. graduates is high. Our alumni are engaged in teaching, research, and administrative endeavors and are found in faculty positions at premier research universities and at smaller colleges and universities throughout the United States and abroad.

Curriculum

Doctoral courses prepare students as scholars with conceptual and methodological sophistication.

- The history and philosophy course focuses on the intellectual history, current status, and innovation of social work ideas, ideologies, and theories.
- In the research sequence, students learn both qualitative and quantitative methodologies, designs, advanced modes of analysis, theory for research, and appropriate applications.
- The policy/practice courses provide the opportunity to analyze policies of interest to the student and discover “best” practices as they affect specific populations. Students develop and apply a critical perspective when considering human problems, strengths, and strategies for change and transformation.
- Qualifying papers and electives help students develop deep understanding in areas of special interest.
- A required course as well as teaching seminars for GTAs prepare students to be effective educators.
- The dissertation involves advanced and focused research into a topic selected by the student, based on quantitative, qualitative, historical, or other methods of inquiry.

GTA & GRA - Teaching and Research Opportunities

Our Ph.D. program contributes significantly to the model of strengths and community-based research, service, and education developed by the School. Under the direction of faculty members, many Ph.D. students work on research projects and serve as teaching assistants. For example, doctoral research assistants work in such areas as aging, asset-building, child welfare, criminal justice, diversity issues, domestic violence, health and disability, child and adult mental health, poverty, social policy, and spirituality.

It is part of the School’s mission to focus on teaching, inquiry, and practice that benefit populations who have been oppressed by our systems and institutions. The School is committed to diversity, inclusion, and multicultural perspectives. Many of the faculty are involved in research and service projects which aim to achieve direct and positive impacts on Black, Indigenous and people of color as well as other oppressed groups. Doctoral students work with faculty to bring these projects to life.

Admission Criteria & Requirements

Criteria used in judging applications include the applicant’s potential for excellence in academic performance, professional practice experience, and potential for contributions to knowledge-building for social work.

Required

- Master's degree in social work or related field.
- Graduate grade-point average of 3.5 or higher.
- Personal statement of scholarly and research interests in social work practice.
- Three letters of reference.
- Completion of a basic statistics course within the past two years with a grade of B or higher. The applicant must include a written statement showing how this requirement has been met or how it will be met before entering the program, or indicate they plan to apply for a waiver of this requirement based on extensive research experience.
- Completion of the online graduate application.
- Students whose native language is not English must follow the policy for English Proficiency Requirements for Admission to Graduate Study.

Preferred

- Undergraduate grade-point average of 3.0 or higher preferred.
- MSW degree preferred. Applicants with master's degrees related to social work and affiliation with social work activities and values are considered.
- Two years of social work or related practice; two years of post-master’s professional social work experience preferred.

Application Timeline and Procedure

Applications are not reviewed until all materials are received. The deadline is January 15. Late applications are considered only on a space-available basis.

Learn more about the admission process.

International Students

International students from all regions of the world are encouraged to apply. For more information about international student applications and resources and regulations contact International Support Services and the Applied English Center.

Ph.D. Degree Requirements

The program requires a minimum of 64 credit hours, as follows:

- 31 credit hours of required coursework.
- 15 credit hours of electives.
- A qualifying paper.
- A comprehensive examination process.
- Completion of a dissertation.

In fulfilling the elective hours, students may take graduate-level courses in any substantive area or research skills necessary for successful
completion of their goals. Students can take electives in social science or other relevant graduate disciplines. They may also complete Independent Study under faculty direction and/or choose from one of the study abroad courses offered by the School.

Beyond course work, students complete one qualifying paper under the guidance of a faculty committee. This demonstrates their ability to integrate knowledge and skills across the curriculum areas in relation to a theme of inquiry developed by the student in their chosen specialization. After the qualifying paper is completed, students complete an oral comprehensive exam (dissertation proposal defense) and then undertake and complete an approved research project, and write and defend the doctoral dissertation.

Required course work (http://socwel.ku.edu/academics/degrees/phd/degerequirements-curriculum/) can be completed in 2 years. Additional time is needed to complete the qualifying papers and dissertation. The program can be completed in 4 years of focused work. Students may start on a part-time basis but eventually must spend 1 year in residence, which entails 2 semesters of full-time course work (9 hours) and may include one summer session (6 hours); or a combination of 6 hours of course work and half-time appointment as a teaching or research assistant for 2 semesters.

Office of Graduate Studies, Lawrence and Edwards Campus Students

Graduate Studies

Graduate Studies (http://www.gradle.ku.edu/) at the University of Kansas is the administrative unit responsible for graduate education for the Lawrence and Edwards Campuses.

Graduate Studies (http://www.kumc.edu/academic-affairs/graduate-studies.html) on the KU Medical Center campus (a unit of the Office of Academic Affairs) is responsible for graduate programs in the Schools of Health Professions, Medicine, and Nursing. Please see the online catalog section for the KU Medical Center (KUMC) - Office of Graduate Studies (http://catalog.ku.edu/graduate-studies/kumc/) for more information.

Graduate degrees are conferred by the professional schools and the College of Liberal Arts and Sciences with the exception of the Health Informatics master's degree, which is conferred by the KUMC Office of Graduate Studies upon recommendation by the Health Informatics Advisory Council. Appointments to the Graduate Faculty are authorized by the schools and CLAS, or by the individual academic units on the Medical Center campus, and administered by the appropriate Graduate Studies office.

KU offers the Master of Arts degree, the Master of Science degree, specific professional master's degrees, the professional degree of Specialist in Education, and the Doctor of Philosophy degree, as well as professional doctorates of Audiology, Education, Engineering, Musical Arts, and Speech-Language Pathology. KU also offers graduate certificate programs and currently enrolls more than 5,000 graduate students.

Goals of Graduate Study

The traditional goals of graduate study are independent scholarship, competence in research or other creative work, and the cultivation of skill and commitment in teaching. Having acquired a broad education as an undergraduate, the student is expected to master a specific field, to learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees find careers in higher education, the acquisition of skill in teaching and in directing research are also essential parts of graduate education.

Emerging societal interests and changing market demands continue to underscore the importance of the traditional goals of graduate study. At the same time, they emphasize the need for flexibility in programs and accommodation in career objectives. Graduates in many fields continue to pursue increasingly diverse careers and, as they do, they demonstrate the value of graduate study and research to society, government, business, industry, the diverse professions, and the arts. Nevertheless, incoming students must realize that a change in employment patterns for graduates is underway in many fields where the major, if not the sole, employment opportunity after graduation was once to be found in a teaching career.

Graduate Military Programs

The Office of Graduate Military Programs (GMP) (http://gmp.ku.edu/) facilitates collaboration between the university and the US Armed Forces for the development of academic programs and research initiatives that support the needs of the Department of Defense (DOD). GMP develops and maintains programs for select officers attending the Command and General Staff College at nearby Fort Leavenworth, instructors at the United States military academies, foreign area officers, logisticians, and other DOD personnel requiring the advanced degrees necessary to teach and conduct research at the highest level. The office assists principal investigators throughout the university to find well-matched research grant opportunities, prepare proposals, and coordinate with the appropriate DOD entities. GMP also collaborates with the Student Veteran Center and serves as a voice for all educational issues related to student veterans. GMP is committed to creating and maintaining a positive learning environment for military veterans attending our university.

Research

Research is an integral part of the university's educational mission and approach to graduate study. The National Science Foundation classifies KU as a major university receiving substantial research support. The Carnegie Classification of Institutions of Higher Education classifies KU as a doctorate-granting R1 Research University with the Highest Research Activity, and KU has been a member of the Association of American Universities since 1909. The university has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. KU is home to university research centers and institutes, affiliated centers, core service labs, the Kansas Geological Survey, and the Kansas Biological Survey. In addition, a number of research centers exist in individual departments and academic units throughout the university. For more information about research on the Lawrence campus, visit the Research (http://www.ku.edu/research/) page or the Office of Research (http://www.research.ku.edu/).

Fellowships and Scholarships

Visit the Graduate Studies website (http://graduate.ku.edu/ku-funding-0/) for information about funding opportunities for KU graduate students.

Admission to Graduate Study

Persons whose records indicate their ability to succeed in advanced work may be admitted to the University of Kansas for graduate study in one of the professional schools or in the College of Liberal Arts and Sciences. The provisions herein constitute the university minima. Departments and programs may be more selective.

Applicants can apply to be degree-seeking, non-degree-seeking, or certificate-seeking students. Applicants pursuing an identifiable degree program are degree-seeking; those applicants pursuing a certificate program are certificate-seeking; those who are not pursuing an identified degree or certificate program should be admitted under the non-degree-seeking category. No student may work toward a graduate degree without being accepted as a degree-seeking student in a specific graduate program. (View the current policies on graduate admission (http://policy.ku.edu/graduate-studies/admission-to-graduate-studies/) for more information.)

The University of Kansas sends an email notification to each applicant of the admission decision, which can be accessed through the application portal. In situations requiring a previously enrolled student to re-apply...
for graduate admission, the previous admission does not guarantee re-

English Proficiency:
In accordance with the policy on English Proficiency Requirements for
Admission to Graduate Study (http://policy.ku.edu/graduate-studies/
english-proficiency-internationalStudents/), applicants who are non-native
speakers of English must demonstrate proficiency in reading, writing, and
listening to English. Domestic applicants who indicate that English is not
their native language must demonstrate English proficiency as described
in the policy.

Degree- and Certificate-Seeking
Admission
Students who apply to a graduate degree or certificate program may
be offered admission with a status of regular or provisional. In some
circumstances, students may be offered regular admission and also be
required to complete mandatory English Language Training alongside the
academic degree program.

Degree-seeking graduate students who wish to pursue a certificate within
their own department do not need to apply separately for admission
to the certificate program unless the department requires a separate
application. Degree-seeking graduate students who wish to pursue a
certificate outside of their home department must apply to the certificate
program. Degree-seeking graduate students must be in good standing
in their degree program in order to be admitted to a certificate program,
whether in the same or a different department.

If students admitted to a graduate certificate program are later admitted
to a graduate degree program as degree-seeking students, applicable
courses taken for the graduate certificate program may be counted toward
the degree with the approval of the degree-granting program. While the
courses comprising a graduate certificate may be used as evidence in
support of a student's application for admission to a graduate degree
program, the certificate itself is not considered to be a prerequisite and
does not guarantee admission into any graduate degree program.

View the current policies on graduate admission (http://policy.ku.edu/
graduate-studies/admission-to-graduate-studies/).

Regular Admission:
Regular admission requires evidence* of a bachelor’s degree from
a regionally-accredited university or from a foreign university with
substantially equivalent bachelor’s, master’s, or doctoral degree
requirements. The bachelor’s degree is not acceptable if it contains credit
awarded for work experience that was not directly supervised by faculty
members (e.g., life experience) or if the work was not evaluated in units
that identify the academic content (e.g., if the work was graded on a P/
F or an S/U basis). In exceptional cases, persons not holding bachelor’s
degrees may be admitted if they are academically well prepared. In
these cases, the Vice Provost for Graduate Studies reviews the student’s
academic background before the student is admitted.

Except as otherwise provided herein, applicants must demonstrate
a grade-point average (GPA) of at least a 3.0 (on a 4.0 scale), in a
completed* degree program at KU, at another regionally-accredited
institution, or at a foreign university with substantially equivalent
bachelor’s, master’s, or doctoral degree requirements. For more
information about what constitutes evidence of a completed bachelor’s
degree and about procedures used to provide and evaluate transcripts, see the Graduate Admissions website (https://gradapply.ku.edu/).

*Students may be admitted based on the cumulative GPA in the last term
of an active degree program, but these students must provide evidence of
a completed bachelor’s degree (as described above) before they will be
allowed to enroll in a second term of graduate study at KU.

Provisional Admission:
Applicants who meet the minimum bachelor's degree requirement
above but who have one or more deficiencies in grade-point average,
prerequisite course work, or other areas as determined by the department
or program, but who meet all other admission standards, may be admitted
on a provisional basis. Students granted provisional admission shall
not be considered in academic good standing until the department and
graduate division recognize that the student has met the requirements for
regular admission as described below.

If an applicant is admitted provisionally, it is expected that the student's
department and the student's school or College will review the student's
progress immediately following the first semester of graduate study. This
review will determine whether the student has met the requirements for
regular admission.

If the student meets the requirements for regular admission, the
department or program in which the student is enrolled will request that
Graduate Studies move the student from provisional to regular status.
If the student does not meet the requirements for regular admission by
the time of review, the student may be continued on provisional status or
dismissed immediately.

A student with provisional status may be dismissed at the conclusion
of any semester if the student fails to earn a 3.0 GPA or to meet other
requirements for regular admission. If, after the first semester, provisional
continuation is recommended by the department or program and
approved by the graduate division, the student may remain on provisional
status until the student meets the requirements for regular admission.

Achieving good academic standing in a degree- or certificate-seeking
program at KU demonstrates evidence of preparedness for graduate
study. Therefore, a graduate student who was originally admitted
 provisionally on the basis of an undergraduate GPA below 3.0, but who
maintains good academic standing in the graduate program, may be
granted regular admission to subsequent degree or certificate programs
at the department’s discretion, even when the first graduate program
is not yet complete. Students who were originally granted provisional
admission to a KU graduate program and subsequently discontinued
their graduate program while in good academic standing may be granted
regular admission to a later degree or certificate program at the admitting
program’s discretion.

Non-Degree-Seeking Admission:
A non-degree-seeking applicant applies to a specific department,
program, professional school, or the College for admission as a non-
degree-seeking student. A non-degree-seeking applicant must fulfill
the English proficiency requirements for admission to graduate study
at KU (http://policy.ku.edu/graduate-studies/english-proficiency-
internationalStudents/) and must provide evidence* of a bachelor's
degree from a regionally-accredited university or from a foreign university
with substantially equivalent bachelor's, master's, or doctoral degree
requirements. A bachelor's degree that contains credit awarded for work
experience that was not directly supervised by faculty members (e.g.,
life experience) or work which was not evaluated in units that identify the
academic content (e.g., if the work was graded on a P/F or an S/U basis) may be acceptable for non-degree-seeking admission. In exceptional cases, persons not holding bachelor's degrees may be admitted if they are academically well prepared. In these cases, the Vice Provost for Graduate Studies reviews the student's academic background before the student is admitted.

A non-degree-seeking applicant is not required to meet the other requirements for regular admission.

Non-degree-seeking admission is not intended to bypass regular admission into a graduate certificate or degree program. However, if a non-degree-seeking student later applies for admission and is accepted as a regular degree- or certificate-seeking student, the student may transfer up to nine (9) credit hours earned as a non-degree-seeking student toward a graduate certificate or degree, or up to six (6) credit hours in the case of a nine-hour certificate. Students who withdraw from a degree program and subsequently seek admission to a certificate program are subject to these same transfer limits (i.e., nine (9) credit hours, or six (6) toward a nine-hour certificate). For more information, see the policy on Graduate Credit (https://policy.ku.edu/graduate-studies/graduate-credit/).

* Non-degree-seeking students may not be admitted without proof of a completed bachelor's degree. For more information about what constitutes a completed bachelor's degree and about procedures used to provide and evaluate transcripts, see the Graduate Admissions website (https://gradapply.ku.edu/).

**Easy Admit:**

An applicant to graduate study who wishes only to attend institutes or workshops that require graduate admitted status may be admitted under the easy admit process. This process allows any person, with evidence of a bachelor's degree from an accredited institution, to take one course per semester without needing to meet the additional requirements of provisional admission.

The easy admit process is limited to certain Lawrence-campus programs that tend to have a high volume of applicants who enroll in institutes or workshops for continuing education purposes. An applicant should verify that the easy admit option is available for the course in which the student is interested before pursuing this option.

**Offer of Admission:**

Offers of admission are valid for one year from the term of admission, as long as the admitting program approves deferral to a future term. If individuals offered admission are not in attendance at the University of Kansas after one year from the term of admission, all application materials are destroyed and the admission is rescinded. If this occurs, the prospective graduate student must submit a new application, application fee, official transcripts, and other required materials. Previous acceptance into a graduate program does not guarantee an admission offer for a future application.

**Application Fees**

Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some departments and programs require deposits from admitted students to be fully credited against required fees upon enrollment.

**English Proficiency Requirements for Admission to Graduate Study**

Graduate applicants who are non-native speakers of English must demonstrate English proficiency in the skill areas of reading, writing, and listening. All students who experience challenges doing graduate work in English after arrival are encouraged to seek assistance from the Applied English Center (AEC).

For information on the spoken English requirements for GTAs, please see the policy on Spoken English Language Competency of Faculty And Graduate Teaching Assistants (http://policy.ku.edu/KBOR/spoken-english-competency-BOR-policy/).

**PROFICIENCY BANDS**

KU recognizes three proficiency categories for graduate students:

- Full Proficiency
- Admission Proficiency
- Provisional Proficiency

Applicants may be admitted for graduate study in any of these three categories. By the time they complete their degree work, students are expected to reach Full Proficiency.

**Full Proficiency**

Students in this proficiency band do not require academic English support as provided by the AEC. Students may be categorized with Full Proficiency at the time of admission or later, after completing coursework at the AEC.

Students placed into the Full Proficiency band are fully admitted for graduate study at KU and no additional testing is required. These students will have "Proficiency Obtained" marked in their official KU academic records.

**Admission Proficiency**

Students in this band have the proficiency in reading, writing, and listening to English necessary to begin graduate study and to succeed in their classes with some academic English support as provided by the AEC.

Students placed in the Admission Proficiency band are fully admitted for graduate study at KU but they must complete testing at the AEC upon arrival at KU. Their needs for academic English support will be assessed in person and they may be placed in corresponding AEC classes or may be moved into the Full Proficiency band.
Provisional Proficiency

Students placed into this proficiency band are eligible for Provisional Admission. After arrival, these students work to clear the provisions placed on their admission with support from the AEC and, eventually, reach the level of Full Proficiency.

PROOF OF PROFICIENCY

KU recognizes several mechanisms by which applicants may demonstrate their English proficiency. The following are acceptable means of demonstrating English proficiency for purposes of graduate admission:

1. Graduation with a baccalaureate degree (or higher) earned in residence from a regionally accredited English-medium U.S. college or university or from a foreign university which conducts all instruction in English and which maintains substantially equivalent bachelor’s, master’s, or doctoral degree requirements
   - Degrees earned online may not be used to demonstrate English proficiency.
   - Demonstrates Full Proficiency: applicants are not required to complete AEC testing

2. Satisfactory completion of the entire AEC curriculum with a final university designation of "Proficiency Obtained"
   - Demonstrates Full Proficiency: no further English-language testing or coursework is required

3. Employment as an officer in the U.S. military with documentation of selection or promotion to the rank of Major or higher (or the equivalent U.S. Navy or Coast Guard rank)
   - Demonstrates Full Proficiency: applicants are not required to complete AEC testing

4. Official scores from an English proficiency standardized test (e.g. TOEFL, IELTS-Academic, or PTE), sent by the testing agency to the University of Kansas. Official scores must be less than two years old at the time that Graduate Admissions processes the application.
   - Scores demonstrate Provisional, Admission, or Full Proficiency in accordance with the table below

5. In exceptional cases, a department, with written support from the appropriate school or college, may petition the Vice Provost for Graduate studies to consider alternative documentation of English proficiency. In consultation with the Executive Council of Graduate Faculty and the Director of the AEC, the Vice Provost for Graduate Studies will determine whether the alternative documentation demonstrates English proficiency at the level expected for regular admission to graduate study at KU.
   - Demonstrates Provisional, Admission, or Full Proficiency, depending on the documentation provided

PROFICIENCY BAND CRITERIA FOR CAMPUS-BASED PROGRAMS

Applicants who complete the AEC curriculum or provide official scores from a TOEFL, IELTS-Academic, or PTE test will be placed into a proficiency band according to this chart. Applicants whose documentation falls below these standards will be denied graduate admission and advised to apply directly for full-time study at the AEC.

Applicants to online-only programs must demonstrate Full Proficiency for admission.

APPLIED ENGLISH CENTER TESTING

The Applied English Center (AEC) maintains a testing process for non-native speakers of English. This process serves to confirm each student’s level of English proficiency and determine whether English courses will be included as a requirement of the student's academic program. In order to graduate, students who are required to complete AEC courses must meet KU’s Full Proficiency standard as demonstrated by their performance in AEC coursework and/or testing.

- Students who are admitted in the Full Proficiency band are not required to complete AEC testing.
- All other non-native speakers of English who gain admission to campus-based programs are required to complete AEC testing upon arrival on campus.

View the current policy for Lawrence and Edwards Campus English Proficiency (https://policy.ku.edu/graduate-studies/english-proficiency-international-students/).

Permit to Re-enroll

A student who has been actively enrolled in a degree-, certificate-, or non-degree-seeking graduate program but who has not been enrolled for one academic year (three consecutive semesters, including the summer semester) or less, may be eligible to use the Permit to Re-Enroll form with the consent of the student's department or program.

A student who has been actively enrolled in a degree-, certificate-, or non-degree-seeking program and has not enrolled for four or more consecutive semesters (including summers) without an approved Leave of Absence (http://policy.ku.edu/graduate-studies/leave-of-absence?) is not eligible to use the Permit to Re-Enroll form and must re-apply for graduate admission.
The Permit to Re-Enroll form is not available to a student who:

- was dismissed from a program at KU;
- was voluntarily discontinued (formally withdrew) from a graduate program;
- completed the graduate degree program; or
- most recently enrolled as a general non-degree seeking graduate student without a program or school-level affiliation.

Before completing the Permit to Re-Enroll form, students should contact their graduate program directly to confirm that the program uses the permit.

Students returning from an approved Leave of Absence will be returned from leave by their department. These students are not required to use the Permit to Re-Enroll. View the current Lawrence and Edwards Campus policy on Permit to Re-Enroll (http://policy.ku.edu/graduate-studies/permit-to-reenroll/).

Transcripts

Applications must be accompanied by one copy of official transcripts from the institution where the applicant earned the bachelor's degree (or equivalent)**. This official transcript will be used to verify the completion (or intended completion) of a baccalaureate degree (or equivalent).

If the applicant has completed any graduate work, official transcripts from the graduate institution(s) must be included as well. Letters of recommendation and test scores may also be required. Applicants should check with the program(s) to which they are applying for more information.

In order to be considered official, transcripts and test scores must be sent through secure means (e.g., a sealed envelope, electronic transmission) directly from the degree-granting institution or testing service to the University of Kansas. Transcripts and test scores provided through unofficial means will not be considered to be official documents for the purpose of admission.

*Applicants with KU degrees may provide unofficial transcripts and do not need to provide copies of officials.

Degrees

Degrees are awarded three times each year, in August, December, and May. Degrees for each academic year are conferred formally at the annual commencement ceremony in May. Degree candidates are not eligible to graduate if the graduate grade-point average (GPA) is lower than 3.0 in all courses acceptable for graduate credit.

Doctoral candidates who have fulfilled all of their degree requirements by the deadline dates for graduation in August 2020, December 2020, and May 2021 are allowed to participate in the May 2021 doctoral hooding ceremony. In addition, doctoral candidates who expect to complete all of their degree requirements by the deadline date for graduation in August 2021 may elect to participate in the May 2021 doctoral hooding ceremony. Summer 2021 graduates should contact Graduate Studies early in the spring 2021 semester in order to participate in hooding.

Students who are working toward two degrees must complete the requirements for each degree. Course work may not count toward fulfilling degree requirements for more than one degree.

Graduate students may not be awarded an additional KU degree with the same name and degree code as a previously awarded degree from KU.

This applies to the completion of different degree tracks, concentrations, and sub-specialties within a given degree. This does not prohibit students from earning additional master's or doctoral degrees in another discipline.

View the current list of all master's and doctoral degrees on the Graduate Studies Academics page (http://www.graduate.ku.edu/find-graduate-program/). View the current Lawrence and Edwards Campus policy on graduate degrees (http://policy.ku.edu/graduate-studies/degrees/).

Master's Degree Programs

KU grants traditional Master of Arts and Master of Science degrees, as well as professional master's degrees that have developed out of these traditional arts and science degrees. A Master of Arts or a Master of Science degree requires at least one year of graduate work or its equivalent. Stated in terms of hours of credit, the standard master's program requires 30 hours though some degrees, especially in professional areas, may require as many as 36 or 40 or more. With permission from the department (or in the case of interdepartmental programs, permission from the joint program committee) and of the Graduate Division, it is sometimes possible to complete a 30-hour master's degree with as few as 24 hours if the student enters the program especially well prepared and maintains a superior GPA. Work for a master's degree is concentrated in the major area, with only a minimal amount of work (usually no more than 6 credit hours) that is completed at KU permitted outside the major department. Each master's program must contain a research component, represented either by a thesis (usually for 6 hours of credit) or by an equivalent enrollment in research, independent investigation, or seminars. Within these requirements and well-founded practices, departmental master's programs may be flexible enough to meet the particular needs of individual students. View the current Lawrence and Edwards Campus policy on master's degrees (http://policy.ku.edu/graduate-studies/ma-ms-degrees/).

Master of Arts and Master of Science

Historically, most of the master’s degrees granted at KU have been the Master of Arts and Master of Science degrees. This fact conforms to the traditional liberal arts background out of which most U.S. graduate schools developed.

Professional Master’s Degrees

KU grants a number of professional master’s degrees, most of which are offered through the professional schools. Students should consult the appropriate college or school section of the online catalog for detailed descriptions of professional master’s programs.

Specialist in Education

The degree of Specialist in Education (p. 324) is offered through the School of Education and Human Sciences and may be earned as a concentration on the basis of two years of graduate work (which can include an appropriate master’s degree or equivalent). Information on this degree, including the concentration in which it may be earned, can be found in the School of Education section of the online catalog.

Jointly Administered Degrees

In a few cases, a degree is offered through two schools and administered by a joint committee from the two faculties. The master of arts degree in Speech-Language Pathology and the master of arts degree in Audiology are administered by an intercampus committee drawn from the Department of Speech-Language-Hearing: Sciences and Disorders in
Lawrence and from the Department of Hearing and Speech of the School of Health Professions in Kansas City.

**Master’s Degree Requirements**

This section of the online catalog, maintained by the Office of Graduate Studies, provides general and common requirements for master's degrees at the University of Kansas. Specific requirements for each individual degree program are outlined in the catalog section maintained by the school or college offering that degree.

More detailed information on degree requirements and program time constraints can be found in the Policy Library. View full policies below:

- Master’s Enrollment Requirements (http://policy.ku.edu/graduate-studies/ma-enrollment-requirements/)
- Master’s Program Time Restraints (http://policy.ku.edu/graduate-studies/ma-program-time-constraints/)
- Master’s Final Examinations (http://policy.ku.edu/graduate-studies/masters-final-exams/)
- Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance/)
- Master’s Student Oral Exam Committee Composition (https://policy.ku.edu/graduate-studies/masters-oral-exam-committee-composition/)
- Master’s Thesis Submission and Publication (https://policy.ku.edu/graduate-studies/ma-thesis/)

**Master’s Enrollment Requirements**

All graduate students enrolled in master’s programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first two weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester.

View the current Lawrence and Edwards Campus policy on master’s enrollment requirements (http://policy.ku.edu/graduate-studies/ma-enrollment-requirements/).

**Master’s Program Time Restraints**

Normal expectations are that most master’s degrees (excluding some professional terminal degrees) should be completed in two years of full-time study. However, master’s degree students are allowed seven years for completion of all degree requirements.

In cases in which compelling reasons or circumstances recommend a one-year extension, the Graduate Division, on recommendation of the department/committee, has authority to grant the extension. In cases where more than eight years are requested, the appropriate appeals body of the school considers petitions for further extensions and, where evidence of continuous progress, currency of knowledge, and other reasons are compelling, may grant them.

Some departments may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the department in which they plan to study. View the current Lawrence and Edwards Campus policy on master’s program time restraints (http://policy.ku.edu/graduate-studies/ma-program-time-constraints/).

**Master’s Final Examinations**

A final general examination or defense of the thesis or culminating master’s project in the major subject is required of all candidates for the Master of Arts or Master of Science. The degree program and the Graduate Division should ascertain that the graduate student is in good academic standing (3.0 or higher grade-point average) before scheduling the final general examination or thesis defense.

At the option of the department, the examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged.

Master’s examinations are administered by a committee of at least three members of the Graduate Faculty. Exam attendance is governed by the Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance/) policy.

The examination is held during the semester of the student’s final enrollment in course work. The thesis defense should be held when the thesis has been substantially completed.

The department’s request to schedule the general examination must be made on or before the date set by the Graduate Division, normally a minimum of two weeks before the examination date.

Students earning a master’s thesis degree must have completed at least one hour of thesis enrollment before the master’s degree may be awarded. See the Graduate Studies website (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/) for information and requirements for submitting the thesis electronically.

View the current Lawrence and Edwards Campus policy on master’s final examinations (http://policy.ku.edu/graduate-studies/masters-final-exams/).

**Master’s Student Oral Exam Committee Composition**

Master’s student oral examinations include any culminating or comprehensive oral examination and/or thesis defense required for graduation from a master’s program.

1. Master’s committees are composed of at least three voting members.
2. All committee members must be members of the Graduate Faculty authorized to serve on master’s examinations.
3. The committee chair must also be authorized to chair master’s examinations.
4. The majority of committee members must be tenured or tenure-track faculty in the candidate’s department or program of study. Tenured and tenure-track faculty who are appointed as courtesy faculty within a program or department are considered to be faculty of that program or department, for the purposes of committee composition.
   - For approved professional master’s degree programs (listed in the Exclusions or Special Circumstances section below), any number of committee members may be professors of the practice, clinical faculty, or research faculty in the department or program.
5. As long as the majority requirement is met, additional committee members may be, but need not be, members of the candidate’s department or program.

As long as the conditions above are met, the committee may include more than three members.
While master’s committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair.

Substitutions of the committee chair (and/or co-chair) are prohibited after the committee has been approved by the Graduate Division of the school or college. If a committee chair (and/or co-chair) needs to be replaced, the revised committee must be approved by the Graduate Division of the school or college in advance of the exam.

Substitutions of the committee members are permitted as long as the new committee meets the requirements above. Additional members can be added after the committee has been approved by the Graduate Division of the school or college, but these additions must be approved by the Graduate Division of the school or college in advance of the exam.

Committee Composition for Approved Professional Degree Programs

The following master’s programs are approved to utilize professors of the practice, clinical faculty, and/or research faculty to compose committees, as outlined elsewhere in this page:

- Master of Science in Engineering Management
- Master of Arts in Speech-Language Pathology
- Master of Science in Geology
- Master of Construction Management
- Master of Civil Engineering
- Master of Science in Civil Engineering
- Master of Science in Architectural Engineering

View the current Lawrence and Edwards Campus policy on Master’s Student Oral Exam Committee Composition (https://policy.ku.edu/graduate-studies/masters-oral-exam-committee-composition/).

Master’s Thesis Submission

When the master’s candidate has passed the final oral examination and the members of the committee have signed the thesis, a title page and acceptance page with original signatures must be delivered to the Graduate Division of the school in which the student’s program resides so that completion of degree requirements may be officially certified. As a requirement of graduation, the candidate must publish the thesis electronically and pay all applicable fees, through the electronic submission and publication process found here (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/).

Theses will be made available through UMI/Proquest and KU ScholarWorks, unless there is an embargo in place or special circumstances pertain as outlined in the KU Embargo policy (http://policy.ku.edu/graduate-studies/embargo-policy/).

The student must be the author of the thesis, and every publication from it must indicate that authorship. Practices vary among disciplines — and even among scholars in a given field—as to whether the mentor’s name may appear as a co-author, and whether as senior or junior co-author, on subsequent publication of the thesis (usually revised), or on articles prepared from it. It is expected that clear understandings in individual cases will be established during the apprenticeship period, when ethical practices in publication are addressed within the professional development training of the program.

Students from the following program are permitted to request a permanent embargo of their thesis: Master of Fine Arts (MFA) in Creative Writing offered by the Department of English. View the current Lawrence and Edwards Campus policy on master’s thesis submission (http://policy.ku.edu/graduate-studies/ma-thesis/).

Doctoral Degree Programs

KU offers the following doctoral degrees:

- Doctor of Philosophy (Ph.D.),
- Doctor of Audiology (Au.D.),
- Doctor of Education (Ed.D.),
- Doctor of Engineering (D.E.), and
- Doctor of Musical Arts (D.M.A.)

The programs offering these degrees are administered by the schools and colleges through their departments and graduate divisions, from admission through final recommendation for awarding the degree.

This section of the catalog provides succinct, general descriptions of each of the five doctoral degrees in order to facilitate convenient comparison of the degrees. It also lists regulations common to the administration of all doctoral programs. The particular application, interpretation, or method of implementation of these common elements is, in certain cases, left to the faculty of each department or degree program (e.g., Research Skills). Detailed information about requirements for each degree, as it is offered in a specific discipline, should be obtained from the appropriate college, school, or department listing in the online catalog. The requirements there are in addition to the general requirements listed here.

The School of Law (p. 777) offers the Juris Doctor (J.D.) and Doctor of Juridical Science (S.J.D.) degrees.

The School of Medicine (p. 2271) offers the Doctor of Medicine (M.D.) degree. The KU Medical Center campus (p. 2576) offers additional doctoral degrees, such as the Clinical Doctorate in Speech-Language Pathology (S.L.P.D.), the Doctor of Nursing Practice (D.N.P.), the Doctor of Occupational Therapy (O.T.D.), and the Doctor of Physical Therapy (D.P.T.).

Doctor of Philosophy

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education:

- putting order into human experience;
- fostering a love of learning for its own sake;
- instilling respect for human values;
- integrating various human powers into a process of creation; and
- making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of extra-departmental courses. Because of the diversity of the fields in which
the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

View the current Lawrence and Edwards Campus policy on the Doctor of Philosophy degree. (http://policy.ku.edu/graduate-studies/doctor-of-philosophy/)

Doctor of Audiology

The Doctor of Audiology (Au.D.) degree program prepares the student to enter clinical practice as an audiologist. Offered by the KU School of Health Professions, the program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. Degree requirements are listed under Communicative Disorders: Intercampus Program (p. 636) in the online catalog.

Doctor of Education

The degree of Doctor of Education (Ed.D.) is a professional degree designed primarily for practitioners in the field of education. While many of the requirements for the degree closely parallel those for the Ph.D., the degree program—particularly the dissertation—focuses on research concerned with application of existing knowledge rather than on basic research. Specific degree requirements are listed in the School of Education and Human Sciences (p. 156) section of the online catalog.

Doctor of Engineering

The degree of Doctor of Engineering (D.E.) is directed toward the practice of engineering and includes the entire process of technology from planning to product. Candidates for the degree are intimately associated throughout their tenure with technology project teams, generally composed of master's degree candidates and undergraduates. Specific degree requirements are listed in the School of Engineering (p. 404) section of the online catalog.

Doctor of Musical Arts

The degree of Doctor of Musical Arts (D.M.A.) is intended as recognition of high professional attainment. Since only exceptionally well-qualified candidates are admitted to the program, students are expected to devote their doctoral studies primarily to developing professional qualifications for teaching at the college level. The degree of Doctor of Musical Arts is offered in the specific fields of bassoon; church music (organ or choral conducting emphasis); clarinet; composition; conducting (band, choral, or orchestral); flute; French horn; oboe; organ; percussion; piano performance, literature, and pedagogy; saxophone; strings; trombone; trumpet; tuba; and voice. Degree requirements are listed under the School of Music (p. 2282) section of the online catalog.

The current list of all master's and doctoral degrees is available on the Graduate Academics page (http://wwwgraduate.ku.edu/find-graduate-program/).

Doctoral Degree Requirements

In most programs, doctoral education is divided into two phases. Upon admission to a doctoral program, the student is known as an aspirant for the degree until successful completion of the comprehensive oral examination. After passing that examination, the student is designated a candidate for the degree until successful defense and submission of the finished dissertation.

When a department or program submits a request to its Graduate Division to schedule a comprehensive oral examination or a final oral examination for a student, it must report on the student's completion of both the general requirements and the specific requirements of the degree program, department, and school. The degree program and Graduate Division should establish that the graduate student is in good academic standing (3.0 or higher grade-point average) before scheduling a comprehensive oral examination or a final oral examination.

Doctoral students completing all their degree requirements within the first week of summer session or within the first two weeks of the fall or spring semester are not required to be enrolled for that term. View the current Lawrence and Edwards Campus policy on doctoral degree requirements (http://policy.ku.edu/graduate-studies/doctoral-degree-requirements/).

More detailed information on degree requirements and program time constraints can be found in the Policy Library. View full policies below:

- Engagement and Enrollment in Doctoral Programs (https://policy.ku.edu/graduate-studies/engagement-enrollment-doctoral-programs/)
- Research Skills and Responsible Scholarship Requirements (https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/)
- Comprehensive Oral Examinations (https://policy.ku.edu/graduate-studies/doctoral-oral-exams/)
- Doctoral Student Oral Exam Committee Composition (https://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/)
- Doctoral Comprehensive Exam Time Constraints (http://policy.ku.edu/graduate-studies/doctoral-exam-time-constraints/)
- Graduate Studies Representative on Doctoral Exam Committees (https://policy.ku.edu/graduate-studies/graduate-studies-representative-on-doctoral-exam-committees/)
- Dual-Title Doctor of Philosophy Degrees (http://policy.ku.edu/graduate-studies/dual-title-PhD-degrees/)
- M.A., M.S., and Ph.D. with a Major in Interdisciplinary Studies (http://policy.ku.edu/graduate-studies/ma-ms-phd-interdisciplinary-studies/)
- Doctoral Candidacy (Post-comp enrollment) (https://policy.ku.edu/graduate-studies/doctoral-candidacy/)
- Doctoral Dissertation (https://policy.ku.edu/graduate-studies/doctoral-dissertation/)
- Final Oral Examination (https://policy.ku.edu/graduate-studies/final-oral-exams/)

Research Skills and Responsible Scholarship

All doctoral students must meet the Research Skills requirement before proceeding to comprehensive exams. The requirement must include at least two components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.
2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).
Doctoral Candidacy

Mentorship of Candidates

Upon passing the comprehensive oral examination, the aspirant becomes a candidate for the doctorate. If it has not begun before, the traditional, close student-mentor apprenticeship relationship comes into being. The student is expected to learn by both precept and example of the mentor and, often, in collaboration. The aspirant explores the chosen field of scholarship using acquired research tools. The principles and customs of academic inquiry and the codes of ethics traditional to the various disciplines and professional fields become part of the student’s thinking and working.

When the student passes the comprehensive oral examination, the Graduate Division of the appropriate school designates the candidate’s dissertation committee based on the recommendations of the candidate’s major department. The dissertation committee must meet the standards set forth in the Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/) policy.

Post-Comprehensive Enrollment

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled each fall and spring semester in one or more hours of dissertation or programmatical-equivalent coursework (for example, document hours for DMA students) that both moves the student towards degree completion and reflects, as accurately as possible, the candidate's demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until eighteen (18) post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of six (6) hours each semester.

Post-comprehensive enrollment may include enrollment during the semester or summer session in which the comprehensive oral examination has been passed. If after eighteen (18) hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester until all degree requirements have been met. The number of hours of each enrollment must be determined by the candidate’s advisor and must reflect, as accurately as possible, the candidate’s demands on faculty time and university facilities.

View the current Lawrence and Edwards Campus policy on doctoral candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/) are listed in the KU Policy Library.

Doctoral Dissertation

The doctoral candidate must present a dissertation showing the planning, conduct, and results of original research and/or scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities and to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on an area of scholarly or scientific interest a variety of research skills and scholarly creative processes. The dissertation must show some original accomplishment, but it should also demonstrate without doubt the candidate’s potential to make future contributions to knowledge and understanding.

The dissertation is to be a coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still
accommodate several subtopics by demonstrating their relationships and interactions. If previously published material by other authors is included in the dissertation, it must be quoted and documented. Final acceptance of the dissertation is subject to the approval of the dissertation committee. It should be noted that prior publication does not guarantee acceptance of the dissertation by the dissertation committee. The dissertation—or one or more substantial portions of it, often rewritten—is expected to be publishable and, indeed, to be published.

Both the dissertation research and the dissertation itself are to be completed under the guidance and direction of the committee appointed as described in the Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/) policy. Instructions about the proper form of the dissertation may be obtained from the KU Graduate Studies website (http://www.graduate.ku.edu/formatting/), or from the Graduate Division of each school or CLAS. Candidates and faculty members are reminded that the dissertation is to be a coherent, logically-organized, scholarly document. Because the demands and practices of different disciplines are varied, the format is somewhat flexibly described, and moderate departures from the norm are allowed when justified by the nature of the work or the circumstances of presentation. Any substantial divergences must be approved in advance as prescribed by the instructions and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

View the current Lawrence and Edwards Campus policy on doctoral dissertations (http://policy.ku.edu/graduate-studies/doctoral-dissertation/).

**Final Oral Examination**

Completion of the dissertation is the final academic phase of a doctoral program, culminating in the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination. When the completed dissertation, in draft form, has been accepted by the committee and all other degree requirements have been satisfied, the chair of the committee requests that the Graduate Division schedule the final oral examination. This request must be made in advance of the desired examination by at least the period specified by the Graduate Division (normally three weeks). Upon receipt of a request to schedule a final oral examination, the Graduate Division ascertains whether all other degree requirements have been met and whether reports of any previously scheduled final oral examinations have been submitted and recorded. Upon approval of the request, the final oral examination is scheduled at the time and place designated by the Graduate Division. For every scheduled final oral examination, the department reports to the Graduate Division a grade of Honors, Satisfactory, or Unsatisfactory for the candidate’s performance. If an Unsatisfactory grade is reported, the candidate may be allowed to repeat the examination on the recommendation of the department.

View the current Lawrence and Edwards Campus policy on doctoral final oral examinations (http://policy.ku.edu/graduate-studies/final-oral-exams/).

**Dissertation Submission and Publication**

When the candidate has passed the final oral examination and the members of the dissertation committee have signed the dissertation, a title page and acceptance page with original signatures are to be delivered to the Graduate Division of the school or CLAS in which the student’s program resides so that completion of degree requirements may be officially certified. As a requirement of graduation, the candidate must arrange for electronic publication of the dissertation and payment of all applicable fees. Information about the electronic submission and publication process is found on the KU Graduate Studies website (http://www.graduate.ku.edu/formatting/).

Dissertations will be made available through UMI/ProQuest and KU ScholarWorks, unless there is an embargo in place or special circumstances pertain as outlined in the KU Embargo policy (http://policy.ku.edu/graduate-studies/embargo-policy/).

The student must be the author of the dissertation, and every publication deriving from it must indicate that authorship. Practices vary among disciplines — and even among scholars in a given field — as to whether the mentor's name may appear as a co-author, and whether as senior or junior co-author, on subsequent publication of the dissertation (usually revised), or on articles prepared from it. It is expected that clear understandings in individual cases will be established during the apprenticeship period, when ethical practices in publication are addressed within the professional development training of the program.

Students pursuing a PhD in English: Literature and Creative Writing track are allowed to request a permanent embargo of their dissertation.

View the current Lawrence and Edwards Campus policy on doctoral dissertations (http://policy.ku.edu/graduate-studies/doctoral-dissertation/).
Engagement and Enrollment in Doctoral Programs

Student enrollment should reflect accurately the amount and kind of work undertaken in the doctoral program. Doctoral degrees are granted primarily on the basis of achievement, so engagement with one’s discipline is an important part of achieving quality in a dissertation or its academic equivalent. KU maintains an enrollment requirement in order to promote a high level of intellectual and scholarly activity in all doctoral programs at the University. These requirements foster intensive, concentrated engagement with the faculty members and other graduate students in a student’s program. To earn a KU doctoral degree, students must demonstrate a minimum level of engagement with coursework at KU by completing the enrollment requirements below. KU coursework used to meet the enrollment requirement may be taken on campus or online.

Students must satisfy any credit-hour and/or enrollment requirements established by their academic programs, departments, and/or schools, which may be more stringent than those stipulated by this policy. Students should inquire about the policies and minimum expectations in effect in their home academic departments. International students must also work with International Support Services (https://iss.ku.edu/) to ensure they are meeting all immigration requirements.

Enrollment Requirement

Prior to the semester in which the comprehensive exam is held, all doctoral students must complete a minimum program engagement equivalent to two full-time semesters. This may be accomplished through either of the following:

• Two semesters (fall and/or spring) of full-time enrollment in KU coursework, as defined by University policy (http://policy.ku.edu/graduate-studies/fulltime-enrollment/)
• At least 18 hours of enrollment in KU coursework spread out over several part-time semesters

Summer enrollment is not required to maintain registration but summer enrollments may be counted toward the 18 part-time pre-comprehensive hours. The time spent in attaining the master’s degree at KU may also count toward this enrollment requirement, at the program’s discretion.

During the required enrollment outlined above, the student’s supervisor must affirm that the course work and research involvement contribute to the student’s dissertation or academically equivalent program objectives. Research must be performed under the direct supervision of the major advisor if on campus, or with adequate liaison if off campus.

Recognition of Prior Work

Transfer of credit toward a doctorate is not appropriate. However, graduate degree programs take relevant prior graduate work into consideration in setting up programs of study leading to the doctorate.

Maximum Time to Degree

Once admitted, KU doctoral students complete all degree requirements in eight (8) years. When compelling circumstances recommend a one-year (1-year) extension, the Graduate Division has authority to grant such an extension on a case-by-case basis, upon the written advice of the department and examining committee.

Students who complete the master’s degree at KU and subsequently begin doctoral studies in the same academic department have a maximum total enrolled time of ten (10) years to complete both degrees.

Normal expectations, however, are that most master’s degrees (excluding some professional terminal degrees) should be completed in two (2) years of full-time study, and both master’s and doctorate in six (6) years of full-time study.

View the current Lawrence and Edwards Campus policy on engagement and enrollment in doctoral programs (https://policy.ku.edu/graduate-studies/engagement-enrollment-doctoral-programs/).

Doctoral Comprehensive Exam Time Constraints

Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation defense, a re-evaluation of the student’s candidacy status is necessary. Re-evaluation of the student’s candidacy status can include retaking the comprehensive oral examination.

View the current Lawrence and Edwards Campus policy on doctoral comprehensive oral examinations (http://policy.ku.edu/graduate-studies/doctoral-oral-exams/).

Doctoral Examinations

Doctoral Student Oral Exam Committee Composition

Doctoral student oral examinations include the doctoral comprehensive oral exam and the doctoral final oral exam (i.e., dissertation defense) and must adhere to the following requirements:

1. Doctoral committees are composed of at least five voting members.
2. All committee members must be members of the Graduate Faculty authorized to serve on doctoral exams.
3. The committee chair must also be authorized to chair doctoral examinations.
4. Except as provided in point 4.a, the majority of committee members must be tenured or tenure-track faculty in the candidate’s department or program of study. Tenured and tenure-track faculty who are appointed as courtesy faculty within a program or department are considered to be faculty of that program or department, for the purposes of committee composition.
   a. For approved professional doctorate programs listed in the section below, the internal or departmental majority may include one individual who holds a non-tenure-track faculty appointment in the student’s department or program.
5. One member must meet the requirements for serving as the Graduate Studies Representative. A faculty member from a different department with a courtesy appointment in the student’s department may serve as the Graduate Studies Representative or in fulfillment of the committee majority requirement but cannot serve in both roles at the same time.
6. As long as the majority requirement is met, additional committee members may be, but need not be, a member of the candidate’s department or program.

As long as the conditions above are met, the committee may include more than five members.
Exam attendance is governed by the Graduate Student Oral Exam Attendance (http://policy.ku.edu/graduate-studies/oral-exam-attendance/) policy.

While committees are not required to have a co-chair, the student or the committee members may decide to select a co-chair.

Substitutions of the committee chair (and/or co-chair) are prohibited after the committee has been approved by the Graduate Division of the school or CLAS. If a committee chair (and/or co-chair) needs to be replaced, the revised committee must be approved by the Graduate Division in advance of the exam.

Substitutions of the committee members are permitted as long as the new committee meets the requirements above. Additional members can be added after the committee has been approved by the Graduate Division of the School or CLAS. Additions and substitutions must be approved by the Graduate Division in advance of the exam.

Non-Tenure-Track Faculty as Internal Majority

The following doctoral programs are approved to include one member of the non-tenure-track faculty as part of the departmental or internal majority on exam committees, as stated above. Such non-tenure-track faculty include, but are not limited to, professors of the practice, clinical faculty, and/or research faculty.

- Doctor of Education (Ed.D.) programs

View the current policy on Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/).

Graduate Studies Representative on Doctoral Exam Committees

The Graduate Studies Representative must be a member of the Graduate Faculty authorized to serve on doctoral exams by a department other than the aspirant’s major department.

A faculty member from a different department who holds a courtesy appointment in the student’s department may serve as the Graduate Studies Representative or in fulfillment of the committee majority pursuant to the Doctoral Student Oral Exam Committee Composition (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/) policy, but cannot serve in both roles at the same time.

The role of the Graduate Studies Representative is designed to assure the appropriate standard of fairness, professionalism, judgment, and skill are applied throughout the examination process for the benefit of the institution and in the best interest of the student. As an independent participant observer, this member should have no personal or professional duality or conflict of interest with other members of the committee or the student that would prevent the representative from the unbiased fulfillment of these responsibilities.

The Graduate Studies Representative is a voting member of the committee and has full rights to participate in the examination. In the case of any unsatisfactory or irregular aspects of the exam or violation of Graduate Studies policy, the Graduate Studies Representative shall provide a written report to the Vice Provost of Graduate Studies for consideration of further action.

Before the examination, the Graduate Division should provide a list of responsibilities to the Graduate Studies Representative. A list of these responsibilities is provided below:

1. The examination was conducted in compliance with the policies and by-laws of Graduate Studies and the program's Graduate Division.
2. The examination was held in a manner that was free and open to the public.
3. The representative was accorded full participatory rights in the examination.
4. The representative was accorded full voting rights as a member of the committee.
5. The examination was free from irregularities or unfairness to the student.
6. The examination was free from irregularities or unfairness among faculty members.
7. The examination, if repeated, occurred at least the appropriate minimum interval after last unsuccessful attempt, as determined by the department.

View the current policy concerning the Graduate Studies Representative on Doctoral Exam Committees (https://policy.ku.edu/graduate-studies/graduate-studies-representative-on-doctoral-exam-committees/).

Dual-Title Doctor of Philosophy Degrees

Definition:

A dual-title Ph.D. is a single degree with significant scholarship in two fields. At the completion of a dual-title degree program, the graduate will receive one diploma with two program names. Students enrolled in a dual-title degree program work concurrently in both areas of study.

Students are admitted initially into the major Ph.D. program. Upon being approved to pursue a dual-title Ph.D., students will be admitted into the dual-title Ph.D. program.

Guidelines:

Only existing programs approved to grant Doctor of Philosophy degrees may collaborate in creating a dual-title degree.

A dual-title degree is a single degree from KU. University-wide degree count reports will record a single Ph.D. in the major Ph.D. program discipline area. During the program proposal phase, doctoral programs must determine which program will be credited with the degree count. This department will also be responsible for reviewing the program during Board of Regents’ program review cycle.

All program requirements for both areas must be met as determined by the faculty in each program. The governing structure for dual-title Ph.D. programs is overseen by the Directors of Graduate Study in each participating Ph.D. program. Dual-title Ph.Ds. are conferred by the dean of the student’s major Ph.D. program.

A student applies for a dual-title degree only after being admitted and enrolled in an existing graduate doctoral program.

View the current policy concerning the Dual-Title Doctor of Philosophy Degrees (http://policy.ku.edu/graduate-studies/dual-title-PhD-degrees/).
Admissions Procedures and Plan of Study for Dual-Title Ph.D. Programs

Admissions Procedures for a Dual-Title Ph.D.

1. The student applies and is admitted to the major Ph.D. program. The student must enroll in the major Ph.D. program for at least one semester and be in good academic standing before applying to the dual-title Ph.D. program.

2. The student may then apply and be admitted to the dual-title Ph.D. program. This is an internal application procedure for students already admitted and enrolled at KU.

Plan of Study for Dual-Title Ph.D.

1. The student completes coursework in the major Ph.D. program and any additional coursework in the dual-title Ph.D. program. In many cases, the dual-title field coursework is integrated with the disciplinary field coursework. For example, PSYC 691 (Psychology of Aging) might meet the requirements for the dual-title degree in Psychology and Gerontology.

2. The two participating Ph.D. programs of the dual-title program develop sections in their graduate student handbooks that outline the nature of the dual-title degree, stipulate the array of courses typically taken, and detail other structural and practical requirements of a dual-title degree.

Each participating program oversees its own dual-title students and signs off on a curricular plan for its own program.

3. Ideally, the student’s advisor is a member of the major Ph.D. program and the dual-title program. If this is not possible, the student must have a co-chair from each of the two fields. This ensures integration of the two areas in the coursework, examinations, and the dissertation.

4. The candidacy examination committee for the dual-title degree-seeking student must be composed of faculty from the major Ph.D. program as well as at least one faculty member from the dual-title Ph.D. program. The comprehensive exam requirements of both programs must be met.

5. The dissertation topic should integrate both fields and be defended before a committee of graduate faculty from both programs.

The dean of the school for the major Ph.D. program confers the dual-title degree. The student’s diploma carries the name of both programs; for example, Doctor of Philosophy in Psychology and Gerontology. One Classification of Instructional Programs (CIP) code is assigned for the dual title degree.

View the current policy concerning the procedure for admissions and plan of study for dual-title Ph.D. programs (https://policy.ku.edu/graduate-studies/admissions-procedures-dual-title-PhD-programs/).

M.A., M.S., and Ph.D. with a Major in Interdisciplinary Studies

Only superior students admitted and enrolled in a graduate program at KU whose proposed studies require direction not available in any single department are considered for admission to an Interdisciplinary Studies program. Before seeking acceptance, an applicant must assemble a graduate faculty advisory committee headed by a faculty member authorized to direct master’s research (for M.A. or M.S. in Interdisciplinary Studies) or doctoral research and dissertations (for Ph.D. in Interdisciplinary Studies). The applicant, in conjunction with the committee, must prepare a proposal for the course of study. The proposal must provide a rationale for the particular mix of disciplines, demonstrating how each contributes to a central theme or focus. It must also show that the proposed program cannot be achieved through an established master’s or doctoral program at KU.

The student seeking to enter the Interdisciplinary Studies program must have an outstanding academic record (a grade-point average of 3.75 or higher on a 4.0 scale for graduate courses or a grade-point average of 3.5 or higher on a 4.0 scale for undergraduate courses if no graduate courses have been taken) and must be admitted to and enrolled in a graduate program at KU at the time of application. A graduate student who has failed to maintain the required grade-point average is not eligible for the Interdisciplinary Studies program. A student is not eligible for this program if the student has tried and failed to achieve candidacy in a regular graduate department or program at KU.

The student is expected to assume the initiative in determining potential eligibility through consultation with graduate advisors and, if deemed eligible, in forming an advisory committee and preparing documentation to support the application.

Pre-admission Procedures

To enter the program, a student should:

1. Determine that KU offers courses and research in the areas appropriate to the student’s interest(s).

2. Prepare a tentative study plan based on those offerings to serve as a basis for initial discussion.

3. Approach a professor whose interests are comparable to those of the student and request that the professor act as an advisor. Normally this professor is a faculty member of the program of principal interest to the student. To grant an M.A. or M.S. in Interdisciplinary Studies, it is essential that the school has the authority to grant master’s degrees. To grant a Ph.D. in Interdisciplinary Studies, it is essential that the school has the authority to grant Doctor of Philosophy degrees. The selected professor must be a full member of the graduate faculty and authorized to chair doctoral dissertation committees for Ph.D. in Interdisciplinary Studies.

4. After a professor agrees to serve as an advisor, the student should assemble an advisory committee of at least three additional professors representing the disciplines covered in the Interdisciplinary program. At least two disciplines or departments must be represented.

5. In conjunction with the advisor and the committee, the student should prepare a proposal for study, including:
   - A statement, with supporting documentation, that the proposed Interdisciplinary Studies program cannot be accomplished through established programs.
   - A statement of the interdisciplinary or transdisciplinary nature of the proposed area of study.
   - A definition of the field of study incorporating, in a consistent way, a description of how each included discipline contributes to the broader field.
   - An outline of the course of study, indicating substantive work in the fields represented. Reading courses and independent study do not substitute for regular courses.
• A description of the method for satisfying research skills and responsible scholarship requirements.
• A description of the comprehensive examination procedures for the Ph.D. (nature of the examinations and possible examining committee) or final examination for the M.A./M.S.
• A description, to the extent possible, of the nature of the field in which a dissertation or master’s thesis might be written, indicating the respective contributions of the selected disciplines to the final product.
• Attach the following: (i) complete transcripts of all previous work, (ii) a cover sheet, signed by committee members, indicating their support of the proposal, (iii) letters of recommendation and other appropriate supporting documents.

Note: The diploma indicates the degree awarded as “M.A. in Interdisciplinary Studies,” “M.S. in Interdisciplinary Studies,” or “Ph.D. in Interdisciplinary Studies,” and does not specify the area of specialization. The transcript notes the area of specialization as determined by the admissions committee.

Admission and Review Procedure
Upon completion of the above, the student must submit the application for admission into the Interdisciplinary Studies program to the Vice Provost for Graduate Studies. The Vice Provost appoints an admission committee consisting of (a) the Assistant Vice Provost and Director of Graduate Enrollment Management or the Assistant Vice Provost’s designate for the school most involved in the interdisciplinary undertaking (the school in which the major advisor resides), (b) two or more doctoral faculty members from unrelated fields, including at least one member of the Executive Council of the Graduate Faculty, and (c) the Department Chair or the Director of Graduate Studies of the department in which the student resides at time of application. The Vice Provost for Graduate Studies serves as ex officio chair of the Interdisciplinary Studies admissions committee. The committee reviews the documents and may, if necessary, interview the student and the advisor for clarification and additional information or to discuss suggested revisions to the proposal.

Approved Program Implementation
Upon acceptance of the proposal and admission to the Interdisciplinary Studies program, the student is admitted to the school of the major advisor to facilitate record keeping and to provide a central administrative office. The Associate Dean or the Director of Graduate Studies of that school must enroll the student and monitor the program. Along with the major advisor, s/he must make annual reports to Graduate Studies on the student’s progress. These reports are distributed to the directors of other involved programs along with a request to supply any additional information regarding the student’s performance. Proposals for major deviations from the approved course of study must be submitted for review by Graduate Studies and by the graduate studies office of the school in which the student resides. It is understood that no additional requirements unique to traditional graduate programs of the school(s) or departments may be imposed unless stated explicitly in the approved study plan.

View the current Lawrence and Edwards Campus policy on interdisciplinary studies (http://policy.ku.edu/graduate-studies/ma-ms-phd-interdisciplinary-studies/).

Combined Degrees
Combined degrees are granted in programs meeting the requirements of the graduate master’s or doctoral degree and the professional post-baccalaureate degree. For more information about combining degree programs, students should contact their academic department of study. View the current list of all master’s and doctoral degrees on the Graduate Studies Academics page (http://www.granduate.ku.edu/find-graduate-program/). View the current Lawrence and Edwards Campus policy on graduate degrees (http://policy.ku.edu/graduate-studies/degrees/).

Distance Education, Online, or Hybrid Graduate Programs
The University of Kansas offers online and hybrid courses and certificate and degree programs. For more information about specific online course and degree program options, students should contact their academic department of study. Similar to regular courses, the availability of online courses varies by semester and year.

View KU’s current online or hybrid programs (https://online.ku.edu/programs/) or contact the KU Center for Online and Distance Learning (http://www.independentsudy.ku.edu/index.shtml/) for more information on online and hybrid courses.

Independent Study
Independent study is a research experience or directed readings independently pursued through an academic department. Students should contact their academic department to discuss independent study opportunities to investigate a special research problem or directed readings in an area not covered by regular courses.

Eligibility Criteria
Eligibility and admission criteria for graduate certificates is governed by the policy on Admission to Graduate Study. (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=)

Graduate credit from another institution may not be transferred to a KU graduate certificate program. A current list of all certificate programs is available on the KU Academics page (http://www.ku.edu/academics/).

Policies and Processes for Graduate Certificate Programs
The graduate certificate is a focused collection of courses that, once completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines. Students may be awarded these certificates upon completion of a well-defined program of course work. The material comprised within a graduate certificate program may represent a more practice-oriented subset of an existing graduate discipline.
A graduate certificate program will comprise no less than nine (9) and generally no more than eighteen (18) credit hours of course work in a particular discipline or related disciplines of study.

All proposals for graduate certificate programs will be adopted for a seven-year time period. The certificate program will expire at the end of that period. The program may request renewal of the certificate program by sending an updated program proposal, endorsed by the department and school/College to the Executive Council of Graduate Faculty. The proposal will be evaluated for an additional seven-year period. The Office of Graduate Studies will remind the graduate certificate program about its renewal one year before the graduate certificate program is scheduled to expire. If a program expires or is discontinued, no new students may be enrolled in the program and those students currently in the program will continue until completion.

Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

View the current graduate certificate policies and processes (http://policy.ku.edu/graduate-studies/certificate-programs/).

The Graduate Faculty

The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated and appointed. Only members of the Graduate Faculty may participate on graduate exam committees. Graduate degree programs are responsible for nominating faculty to hold Graduate Faculty appointments and for ensuring compliance with all policies. (See the current policy on Graduate Faculty Appointments (http://policy.ku.edu/graduate-studies/graduate-faculty-appointments/).)

Eligibility

To hold a Graduate Faculty appointment, an individual must show evidence of an initial productive contribution to scholarship and continuing professional activity, demonstrating the ability to contribute to high-quality graduate education. Members of the Graduate Faculty will be appointed in keeping with university policies and accreditation regulations.

Productive professional activity may take different forms across disciplines. Conventional evidence of such activity includes:

- Effective teaching,
- Scholarly publication,
- Participation in professional societies, and
- Other scholarly activity.

To qualify for chairing doctoral committees, a member of the graduate faculty must also demonstrate continuing activity commensurate with being an established scholar in the faculty member's field and involvement in the graduate education program as evidenced by:

- Teaching graduate courses,
- Advising and mentoring graduate students,
- Serving on thesis and dissertation committees, and
- Maintaining an ongoing program of scholarly activity, which includes a record of scholarship, publication, and other contributions to the field.

Tenured and tenure-track faculty in Lawrence-campus departments that grant graduate degrees may be appointed to the Graduate Faculty for the duration of their employment. Employees of the university and its affiliates who do not have tenured or tenure-track faculty appointments in departments that grant graduate degrees may be appointed to the Graduate Faculty for up to five years. Such appointments are renewable.

Nomination Instructions for Degree Programs

When individuals meet the eligibility criteria listed above, it is the graduate program's responsibility to nominate individuals for Graduate Faculty appointments and to provide appropriate evidence of scholarship and involvement in the graduate education program. Graduate Faculty are nominated to serve via one or more specific privileges which are individually recorded in university systems. The five privileges of Graduate Faculty are:

- Serving on master's-level committees
- Serving on doctoral committees
- Chairing master's-level committees
- Chairing doctoral committees

Serving as the Graduate Studies Representative (GSR) on doctoral committees*, in keeping with the Graduate Studies Representative on Doctoral Exam Committees (https://policy.ku.edu/graduate-studies/representative-on-doctoral-exam-committees/policy*) "Doctoral committees" refers to both the oral comprehensive exam and the final dissertation defense.

Graduate-degree-granting departments will formally nominate all individuals who may serve on exam committees, including new members of the tenured and tenure-track faculty through the Progress to Degree system.

Chairing Committees

In order to chair committees independently, members of the Graduate Faculty must also be appointed to the regular tenured or tenure-track KU faculty in the student’s home department. Any member of the Graduate Faculty who holds committee service privileges may serve as a co-chair on committees at or below the highest level for which they are appointed. However, members of the Graduate Faculty who have had chairing privileges removed may not co-chair committees at that level.

Graduate Studies Representative

In order to serve as the Graduate Studies Representative on Lawrence-campus doctoral committees, the Graduate Faculty member must also be appointed to the regular tenured or tenure-track faculty on the Lawrence campus. Members of the KU Medical Center’s Graduate Faculty enjoy equivalent privileges on at the Lawrence campus for the purposes of committee service.

Emeritus/Emerita Status

When KU awards a faculty member Emeritus/Emerita faculty status, the Office of Graduate Studies will administratively extend the faculty member’s Graduate Faculty appointment for three years post-retirement. A department may petition to extend Emeritus/Emerita appointments beyond the initial three-year period. When such appointments are extended, the Professor Emeritus/Emerita may continue to enjoy all Graduate Faculty privileges except independently chairing doctoral committees. To extend an Emeritus/Emerita appointment, the Professor Emeritus/Emerita must demonstrate recent research activity and scholarly engagement with both the home department at KU and the wider field. Extensions may be granted for up to three years at a time. Emeritus/Emerita Graduate Faculty appointments are intended to
facilitate committee continuity for students already working with a retiring faculty member. Graduate programs are responsible for monitoring and maintaining appropriate privileges for their Emeritus/Emerita Graduate Faculty. Emeritus/Emerita Graduate Faculty may count as internal members, at the department's discretion.

Graduate Research Assistants, Graduate Teaching Assistants, and Graduate Assistants

Appointment Types

Graduate Research Assistantships (GRA)

Graduate research assistantships may be available to graduate students. For further information, applicants should write directly to the chair or graduate advisor of the major department.

Graduate Teaching Assistantships (GTA)

Graduate teaching assistantships may be available to graduate students through graduate departments. Graduate students should apply directly to the department for GTA appointments. Graduate teaching assistantships in Lawrence are governed by a Memorandum of Agreement (https://humanresources.ku.edu/document/gta-moa/) (MoA) between KU, the Kansas Board of Regents, and the American Federation of Teachers, which represents KU GTAs in Lawrence. The Memorandum of Agreement, with additional information on tuition and fee payment, appointments, wages, benefits, and other topics of interest to GTAs, is available on the Graduate Studies website (https://graduate.ku.edu/gta-ga/).

Graduate Assistantships (GA)

Graduate assistantships may be available to graduate students. For further information, applicants should write directly to the chair or graduate advisor of the major department.

Policy Statement

The following premises and eligibility requirements govern all Graduate Research Assistant (GRA), Graduate Teaching Assistant (GTA), and Graduate Assistant (GA) appointments at the University of Kansas, Lawrence:

Principles:

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University's responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.

2. When departments and schools offer GRA, GTA, or GA appointments, the assistantships must contribute to the training experience of the graduate student.

3. GRA, GTA, and GA responsibilities should be in balance with the student's responsibilities to the graduate program. For salaried appointments of 50% (0.50 FTE), the expectation is that the assigned duties will average no more than twenty (20) hours per week during the semester. For hourly appointments at 50% (0.50 FTE), assigned duties should require 20 hours per week during the semester. For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.

More detailed information on GTA, GRA, and GA policies and exceptions can be found in the Policy Library. View the full policies below:

- Appointment Limits (http://policy.ku.edu/graduate-studies/GRA-GTA-GA-guidelines-eligibility/)
- GTA, GRA, and GA Eligibility Requirements (http://policy.ku.edu/graduate-studies/GRA-GTA-GA-guidelines-eligibility/)
- Term Limits for GTA Appointments (http://policy.ku.edu/graduate-studies/appointment-limit-GTA/)
- GTA Out-Of-Field Appointments (http://policy.ku.edu/graduate-studies/out-of-field-gta-appointments-policy/)
- Benefits Available to GTAs, GRAs, and GAs (http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs/)
- Graduate Tuition Assistance Pool (TAP) (http://policy.ku.edu/graduate-studies/GRA-tuition-assistance-policy/)
- Spoken English Language Competency of Faculty and GTAs (KBOR) (http://policy.ku.edu/KBOR/spoken-english-competency-BOR-policy/)

Appointment Limits:

During the fall and spring semesters, GTA appointments shall not normally exceed 50% (0.50 FTE). GTA appointments in excess of 50% (0.50 FTE) must be approved by the Office of Graduate Studies or by the Dean's Office of the College of Liberal Arts & Sciences in advance of an appointment offer and will be approved only in extraordinary circumstances. See the Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/gta_moa_2014.pdf) between The University of Kansas and the Board of Regents and the American Federation of Teachers - Kansas (representing graduate teaching assistants at the University of Kansas, Lawrence).

Although GRA, GTA, and GA appointments in excess of 50% (0.50 FTE) have the undesirable potential to extend time towards degree, GRA appointments contribute directly to students' research agendas. Therefore, during the fall and spring semesters, GRA appointments and combined GRA/GTA or GRA/GA appointments of up to 72.5% (0.725 FTE) may be approved so long as the GTA or GA component of the appointment does not exceed 50% (0.50 FTE).

Departments are expected to monitor appointments in excess of 50% (0.50 FTE) to ensure that the graduate students' assistantship assignments enhance their academic preparation and do not interfere with progress towards degree.

During the summer term(s), GTAs, GRAs, and GAs may be appointed up to 100% effort (1.0 FTE), at the hiring unit's discretion. Hiring units should be advised of the potential legal and fiscal implications posed by appointments that exceed 72.5% (0.725 FTE), including changes to insurance eligibility under the Affordable Care Act. For more information about these implications, hiring units should consult with Human Resources Management. Departments, research centers, schools, and the College may adopt more stringent limitations as appropriate to their needs.
GRA, GTA, and GA Eligibility (Lawrence campus)

GRA Eligibility

The following eligibility requirements govern all Graduate Research Assistant (GRA) appointments at the University of Kansas, Lawrence:

Graduate Research Assistants are salaried student employees who perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic). The duties performed are under the direct supervision of faculty or research professionals. The duties do not involve classroom instruction. GRA appointments must be approved by the Office of the Vice Chancellor for Research (for all funds under Research and KUCR), the Budget Office (for the professional schools’ state- and endowment-funded GRA positions), or the College of Liberal Arts and Sciences (for state- and endowment-funded GRA positions in CLAS).

In order to be eligible for a GRA appointment, a graduate student must meet all of the following conditions:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;
2. During the fall or spring semester, the student is enrolled in no fewer than six (6) credit hours required for the student’s graduate degree. During the summer session, the GRA must be enrolled in coursework related to the student’s graduate program. The number of hours must be determined by the student’s advisor and must reflect as accurately as possible the student’s demand on faculty time and University facilities. Generally, an enrollment of three credit hours is appropriate for the summer session.

   a. Enrollment and Post Compas: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of eighteen (18) post-comprehensive credit hours, the student may enroll in one (1) or more dissertation, thesis, or equivalent credit hours as approved by the student’s department, the student’s school or College, and the Office of Graduate Studies to qualify for a graduate research assistantship appointment. [Note: Candidates for the professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. For more detailed information about post-comprehensive enrollment, see the policy on Doctoral Candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/).]
3. During the term of appointment, the GRA must be in academic good standing and be making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: Students who are admitted to a degree program on provisional status are not considered to be in academic good standing for the purpose of GRA appointments. Exceptions may be granted by the Vice Provost of Graduate Studies under extraordinary circumstances.] A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Vice Provost of Graduate Studies that the student be allowed to keep the GRA position for one (1) additional semester.
4. The person must successfully pass a background check established by the University.
5. A student who has earned a graduate degree may not continue in a GRA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

Enrollment Exceptions for GRAs

Doctoral Candidates: In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled each fall and spring semester until all requirements for the degree are completed. Each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and University facilities. Until eighteen (18) post-comprehensive hours are completed, the candidate must enroll in a minimum of 6 hours each semester. Doctoral candidates may be enrolled in fewer than six (6) post-comprehensive hours in the fall and spring semesters if all of the criteria described in 2.a. (above) are met.

In certain master’s degree programs, students who are in the final semester may be able to complete the course and hours requirements for the degree while enrolling in fewer than six (6) hours. Such students may enroll in fewer than six (6) hours and still retain eligibility to hold a position as a Graduate Research Assistant (GRA), provided that the student will not be continuing in a doctoral program at the University of Kansas. The option of enrolling in fewer than six (6) hours during the final semester is available only to master’s students with GRA appointments. It is not available to master’s students with GTA or GA appointments.

Note: Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GRAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu/) to determine student financial aid eligibility.

Enrollment Exception Process

In order to certify that a GRA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer Than Six Hours PID form (doctoral candidates – GRAs, GTAs, and GAs), or the Certification of Eligibility from for Master’s Level Graduate Research Assistants (for master’s students – GRAs only).

View the current policy on GRA appointment eligibility (http://policy.ku.edu/graduate-studies/GRA-appointment-eligibility/).

GTA Eligibility

The following eligibility requirements govern all Graduate Teaching Assistant (GTA) appointments at the University of Kansas, Lawrence:

Graduate Teaching Assistants are salaried student employees whose job duties consist primarily of direct involvement in classroom or laboratory instruction. The duties are performed under the supervision of faculty. The University also requires that a GTA’s teaching assignment be in their own field of study or one that is closely related. Out-of-field appointments require consultation with the student’s home academic unit and the explicit approval of Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences.

In accordance with the Memorandum of Agreement (MOA) between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants’ Coalition, American Federation of Teachers - Kansas (GTAC), in order to be eligible for a GTA appointment, a graduate student must meet all of the following conditions:
1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;

2. During the term of appointment, the student is enrolled in no fewer than six (6) graduate credit hours per semester or other credit hours as required for the student’s graduate degree and as approved by Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate. [Note: GTAs on summer session appointments may enroll but are not required to do so.]

   a. Enrollment and Medical Leave: Should the student be unable to enroll in 6 graduate or other approved hours for reasons of medical condition or other hardship, that person may, with supporting documentation and the approval of the department of employment (and the department of study in cases in which the two are different), petition the Office of Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate that this requirement be waived. Final approval rests with the Office of Graduate Studies or the Dean’s Office of the College of Liberal Arts and Sciences as appropriate.

   b. Enrollment and Post Comps: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of eighteen (18) post-comprehensive credit hours, the student may enroll in one (1) or more dissertation, thesis, or equivalent credit hours as approved by the student’s department, the student’s school or College, and the Office of Graduate Studies to qualify for a Graduate Teaching Assistant appointment. [Note: Candidates for professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. More detailed information about post-comprehensive enrollment, see the policy on Doctoral Candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/).]

   c. Short Course Appointments: During the term of appointment for short courses between the Fall and Spring semesters, including summer sessions, the person must be active in a graduate degree program and must have been enrolled in at least one (1) hour during the Fall semester or Spring semester.

3. During the term of appointment, the student must be in academic good standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: Students who are admitted to a degree program on probationary or provisional status are not considered to be in academic good standing for the purpose of GTA appointments. Exceptions may be granted by the Vice Provost of Graduate Studies under extraordinary circumstances. No exceptions are granted in cases where a provisionally admitted student does not meet English proficiency criteria.] A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Vice Provost of Graduate Studies or the Dean of the College of Liberal Arts and Sciences that the student be allowed to keep their GTA position for one additional semester.

4. The graduate student must satisfy any and all English proficiency criteria established by the Regents and/or the University. [Note: Prior to finalization of a GTA appointment, every prospective GTA must be interviewed and have to certify the student’s spoken English competency. The interview must be conducted by no fewer than three institutional personnel, at least one of whom should be a student. Non-native speakers of English must achieve a minimum score of fifty (50) on the SPEAK (Speaking Proficiency English Assessment Kit), a score of twenty-two (22) on the iBT (Internet-based TOEFL), or an eight (8) on the IELTS (International English Language Testing System). No exceptions are granted in cases where a student does not meet English proficiency criteria.]

5. During the term of the appointment, the student’s assigned responsibilities consist primarily of direct involvement in classroom or laboratory instruction.

6. The student has satisfactorily completed all of the components of the orientation and training as specified in section seven (7) of the MOA within the timeframes established by the University.

7. The department may require a graduate teaching assistant to be on campus to assume employment responsibilities up to five weekdays (excluding weekend days) prior to the first day of classes each semester [Note: In accordance with Article 5, Section 1, of the MOA, “individuals who are being reappointed as GTAs, regardless of whether the appointment is for an academic year or a shorter period, shall begin work on the first day of classes of each semester for which they are appointed, unless notified by the GTA’s department of earlier required assignments. Attendance at GTA orientation prior to the start of the semester is required as a condition of employment for any person who has not previously served as a GTA at the University of Kansas or for any returning GTA who has been identified as needing to attend GTA orientation.”]

8. The student must successfully pass a background check established by the University.

In addition to the conditions of appointment set forth in the MOA, the University has established the following condition:

A student who has earned a graduate degree may not continue in a GTA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

**Enrollment Exceptions for GTAs who are Doctoral Candidates**

In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled each fall and spring semester until all requirements for the degree are completed, and each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and University facilities. Until eighteen (18) post-comprehensive hours are completed, the candidate must enroll in a minimum of six (6) hours each semester. Doctoral candidates may be enrolled in fewer than six (6) post-comprehensive hours in the fall and spring semesters if all of the conditions described in 2.b (above) are met. [Note: Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GTAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu/) to determine student financial aid eligibility.]

**Enrollment Exception Process**

In order to certify that a GTA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer than Six Hours PID form for doctoral students.

View the current policy on GTA appointment eligibility (http://policy.ku.edu/graduate-studies/GTA-appointment-eligibility/).
Time Limits on Appointments of Graduate Teaching Assistants

The University of Kansas, Lawrence, has established outer limits on appointments to Graduate Teaching Assistantships (GTAs) as specified below. Summer appointments are excluded from term limit calculations. No term limits established by the university or one of its departments, programs, professional schools, or CLAS constitutes a guarantee of funding for that amount of time.

Departments, programs, professional schools, and the College may establish shorter term limits for GTAs, as appropriate. Any such limit shall be codified in writing in the program's graduate handbook, the Academic Catalog, and/or the university's Policy Library and shall take precedence over the university's maximum limit.

Maximum Duration within a Single Department:

- A student who is admitted to a graduate degree program to obtain only a master's degree is limited to six (6) semesters of GTA appointments.
- A student admitted to pursue only a doctorate or admitted to pursue more than one degree in a single department is eligible for up to a total of sixteen (16) semesters as a GTA.
- A KU student may not serve more than sixteen (16) semesters as a GTA, except as described under "Clean Slates" below.

Students who have exhausted the University maximum time to complete a degree are not considered to be making satisfactory academic progress (https://policy.ku.edu/graduate-studies/good-academic-standing/). As a result, they are not eligible to serve as GTAs, even if a time-to-degree extension is granted. In exceptional circumstances, departments may petition for eligibility to serve as a GTA during a time-to-degree extension using the petition process described below.

Clean Slates for Students Pursuing Degrees in Multiple Departments:

When a student is seeking graduate degrees in two or more departments, they may be eligible for full funding from each, in accordance with the per-department maximum durations above. (e.g., A student who works as a GTA for six (6) semesters while pursuing a master's in one department may, at the discretion of the new department, work for up to sixteen (16) additional semesters as a GTA, should they choose to pursue a degree in a different department.)

Students who return to the same department after time away (e.g., voluntary discontinuation, Leave of Absence, or break in enrollment after a completed Master's degree) will not have their eligibility reset to a clean slate.

In determining whether a person has met the limits described here, all semesters of GTA funding for a specific degree program shall be counted, regardless of which department hired the student as a GTA. When a student pursues two funded degree programs in different departments, the maximum limits will be calculated separately for each department.

Note: This policy does not apply to summer session GTA appointments. Semesters in which a student's sole appointment was as a graduate research assistant (GRA) do not count against the GTA-semester limit. All GTA appointments are made pursuant to the provisions of the MOA.

Out-Of-Field GTA Appointments

GENERAL POLICY ON GTA APPOINTMENTS, TRAINING, AND MENTORING

University policy (http://policy.ku.edu/graduate-studies/GTA-appointment-eligibility/) stipulates that the Graduate Teaching Assistantship (GTA) must be an integral part of a graduate student's academic endeavor, serving as a logical complement to the graduate student's program of study. While the GTA experience is often part of a student's preparation to assume a full-time role in a specific field in academia, the GTA experience also provides valuable training in the science and art of teaching. Accordingly, departments or schools are expected to offer quality teaching-related experiences for GTAs and to designate faculty who will work closely with GTAs to advise them and help them improve their teaching skills. Teaching-related training is integral to the GTA experience.

GUIDELINES AND CRITERIA FOR OUT-OF-FIELD APPOINTMENTS

It is assumed that the majority of GTAs have appointments within their home departments. However, undergraduate teaching needs frequently arise in departments and programs that do not have a specific and circumscribed pool of graduate students from which GTAs can be drawn. Recognizing that graduate students can make significant contributions to the undergraduate teaching mission of the University by teaching out of their field and that there is great value in this teaching experience as they learn the science and art of teaching undergraduate students, the University will allow out-of-field GTA appointments with the following stipulations:

- A request for an out-of-field appointment has to be approved by the student's home department or program as well as the department or program offering the teaching appointment.
- The out-of-field appointment has to be approved by the School or CLAS of the home department or program as well as the School or College of the department or program offering the teaching appointment.
- Because it is University policy (http://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs/) to waive some or all of the differential tuition for GTAs who are enrolled in schools that charge differential tuition, a unit wishing to extend an out-of-field GTA appointment to a graduate student who is enrolled in a school that charges differential tuition must notify the dean of the school in which the student is enrolled and obtain that dean's approval of the out-of-field appointment.
- The Schools and the College must, annually, send a list of all out-of-field appointments to Graduate Studies.
- The student's home department or program must certify, at the time of approving the out-of-field appointment, that the student is making acceptable progress toward completion of her or his terminal degree.
- Any out-of-field GTA appointments must include a pedagogical/mentoring component offered by the hiring department, with assigned faculty supervisors or mentors. When the hiring department offers courses or seminars that are required of home department GTAs, out-of-field GTAs will be required to enroll in such courses or seminars.
- Students pursuing graduate degrees that are not generally intended to prepare a student for a career that involves teaching cannot be appointed as an out-of-field GTA. These students should be appointed as lecturers if their service as teachers is desired.
PROCEDURES FOR REQUESTING OUT-OF-FIELD GTA APPOINTMENTS

Individual Schools or the College will review all requests for out-of-field GTA appointments. Units requesting the out-of-field appointment must provide documentation that the student has been admitted to Graduate Studies and is in good academic standing. No offer of an out-of-field GTA appointment, either written or verbal, may be made until the School or College has completed its review.

Procedure: A department that wishes to offer a GTA appointment to a graduate student in another academic unit must consult with the student’s home department to develop a rationale describing how the appointment is consistent with the guidelines stated here and how it will benefit the student’s educational program. The rationale should include information about the student’s background and qualifications to teach the course(s) in question and how the experience gained will contribute to the student’s graduate training. An out-of-field appointment will not be approved without the explicit endorsement of the student’s home department.

Timeline: Requests for out-of-field GTA placements normally should be submitted to the School or CLAS involved as soon as possible and at least four weeks before the department expects to make an appointment offer. The four-week requirement may be waived when a proposed appointment is related to a staffing emergency such as the late resignation of a GTA or the unanticipated illness of a faculty member who was scheduled to teach a course.

GA Eligibility

The following eligibility requirements govern all Graduate Assistant (GA) appointments at the University of Kansas, Lawrence:

Graduate Assistants are active student employees (either salaried or hourly, as determined by Human Resource Management) who hold a position that furthers the professional and/or academic development of the graduate student. The duties performed are professional in nature and under the direct supervision of faculty, academic professionals, or administrators. While the duties may involve classroom instruction or research integral to the student’s degree program or dissertation, those activities are not the primary focus of the job. The Graduate Assistant’s job duties should not include grading student work, developing course content, or taking responsibility for a course or section as Instructor of Record. Graduate Assistants who engage in classroom instruction should spend no more than 10% of their work time doing so. The Graduate Assistant’s responsibilities may include, but are not limited to, administrative and professional internships. The Vice Provost of Graduate Studies must approve GA appointments. [Note: Graduate Assistant positions are a distinct category of graduate student support. This category does not include Graduate Research Assistants, Graduate Teaching Assistants, or student-hourly positions held by graduate students.]

In order to be eligible for a GA appointment, a graduate student must meet all of the following criteria:

1. During the term of appointment, the person is admitted to and enrolled in a graduate degree program offered by the University of Kansas;
2. During the fall and/or spring semesters in which the graduate student holds a GA appointment, the student must be enrolled in no fewer than six (6) credit hours required for the student’s graduate degree. GAs on summer session appointments may enroll but are not required to do so.

a. Enrollment and Post Comps: Upon successful completion of the doctoral comprehensive examination and all other Graduate Studies and departmental requirements for candidacy to the doctoral degree and upon completion of eighteen (18) post-comprehensive credit hours, the student may enroll in one (1) or more dissertation, thesis, or equivalent credit hour(s) as approved by the student’s department, the student's school or College, and the Graduate Studies to qualify for a Graduate Assistantship appointment. [Note: Candidates for the professional doctoral degrees may enroll in dissertation-equivalent hours as approved by Graduate Studies. For more detailed information about post-comprehensive enrollment, see the policy on Doctoral Candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/)].

3. During the term of appointment, the GA must be in academic good standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. Students who are admitted to a degree program on provisional status are not considered to be in academic good standing for the purpose of GA appointments. Exceptions may be granted by the Vice Provost of Graduate Studies under extraordinary circumstances. A graduate student must maintain a cumulative grade point average (GPA) of 3.0 to remain in academic good standing. However, if a department judges that a graduate student whose GPA falls below 3.0 after the first semester at KU is nonetheless making satisfactory progress, the department may recommend to the Vice Provost of Graduate Studies that the student be allowed to keep the GA position for one (1) additional semester.

4. The person must successfully pass a background check established by the University.

5. A student who has earned a graduate degree may not continue in a GA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

ENROLLMENT EXCEPTIONS FOR GAS WHO ARE DOCTORAL CANDIDATES

In accordance with Graduate Studies requirements, after passing the comprehensive oral examination for a doctoral degree, the candidate must be continuously enrolled each fall and spring semester until all requirements for the degree are completed. Each enrollment must reflect, as accurately as possible, the candidate’s demand on faculty time and University facilities. Until eighteen (18) post-comprehensive hours are completed, the candidate must enroll in a minimum of six (6) hours each semester. Doctoral candidates may be enrolled in fewer than six (6) post-comprehensive hours in the fall and spring semesters if all of the conditions described in 2.a. (above) are met.

Note: Different enrollment criteria may be used in determining eligibility for student financial aid and student loan deferments. GAs are advised to consult with Financial Aid and Scholarships (http://affordability.ku.edu/) to determine student financial aid eligibility.

Enrollment Exception Process

In order to certify that a GA is eligible to enroll in fewer than 6 credit hours, campus departments must submit the Certification of Eligibility to Enroll in Fewer than Six Hours Pilot form for doctoral students.

View the current policy on GA appointment eligibility (http://policy.ku.edu/graduate-studies/GA-appointment-eligibility/).
GRA, GTA, and GA Benefits - Lawrence and Edwards Campuses

The University is authorized by Kansas statutes and administrative regulations to provide Graduate Research Assistants (GRAs), Graduate Teaching Assistants (GTAs), and Graduate Assistants (GAs) with certain benefits that are not available to other student employees. The Memorandum of Agreement (MOA) between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants' Coalition, American Federation of Teachers - Kansas (GTAC; representing Graduate Teaching Assistants at the University of Kansas, Lawrence), provides further information about benefits available to GTAs. This summary is provided for informational purposes only. For information about specific benefits, contact Graduate Studies.

1. Staff Rates

Graduate students with GRA, GTA, or GA appointments of 40% (0.40 FTE) or more are eligible for staff (resident) rates for tuition, as are individuals who hold concurrent GRA, GTA, and GA appointments totaling 40% (0.40 FTE) or more as stipulated in the Staff and Staff Dependent Tuition Rates policy.

2. Payment of Tuition

GRAs and GTAs are eligible to have all or some of their tuition paid, including any differential tuition assessed, according to the provisions below.

Graduate Research Assistants:

Graduate Research Assistants with an appointment of 40% (0.40 FTE) or more will have their tuition provided by the same funding source as their salary. The full cost of tuition for graduate research assistants must be included in all proposals, renewals, and contracts as part of the proposal budget when permissible by the granting agency or funding source. When not permitted by the funding source, the payment of tuition may be granted by the Graduate Tuition Assistance Pool. Further information about this program is available in the Graduate Tuition Assistance Policy.

Graduate Teaching Assistants:

Depending on the level of appointment, the University pays all or some of a GTA’s tuition, including any course fees for GTAs who are enrolled in schools or programs that charge such fees. If the student is eligible for staff rates, these will be assessed before applying the tuition waiver. Course fees include all school course fees and Edwards Campus fees. The GTA is responsible for paying the remainder of the required campus fees.

3. Payment of Required Campus Fees

For GTAs, the University pays required campus fees for 3 credit hours per semester in accordance with the table and restrictions set forth below.

<table>
<thead>
<tr>
<th>Percentage Appointment</th>
<th>Percentage of campus fees for three credit hours paid by University</th>
</tr>
</thead>
<tbody>
<tr>
<td>40% or more</td>
<td>100%</td>
</tr>
<tr>
<td>30% but less than 40%</td>
<td>75%</td>
</tr>
<tr>
<td>20% but less than 30%</td>
<td>50%</td>
</tr>
<tr>
<td>10% but less than 20%</td>
<td>25%</td>
</tr>
</tbody>
</table>

The GTA is responsible for paying the remainder of the required campus fee assessment; any applicable off-campus area service fees (e.g., Edwards Campus construction fee, Union fee, and required fee); mediated course fees; optional fees; Housing costs; and other specialized fees.

4. Tuition and Fee Assessments in Case of Resignation or Termination

If a GRA or GTA resigns or abandons the GRA/GTA position or the appointment is terminated, the GRA/GTA must pay all resident or non-resident tuition and fees for that semester, as appropriate given the GRA/GTA’s residence status as a student who does not hold a GRA/GTA appointment. The GRA/GTA will lose eligibility for staff rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

If a GA resigns or abandons the GA position or the appointment is terminated, the GA will lose eligibility for staff rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

5. Deferment of Tuition and Fees

Returning GRAs, GTAs, and GAs have the option of deferring payment for any tuition and required campus fees until September 15 (fall) and February 15 (spring). Please note that housing costs, optional campus fees, or other charges are not eligible for deferment. The fall deadline for returning graduate students to request a fee deferment is August 10; the spring deadline is January 10. Returning GTAs, GRAs, or GAs who do not request a deferment or do not pay their tuition and fees by the deadline will be assessed a late fee.

6. Payment of Tuition and Fees for Required Orientation/Training Course

In cases where a GTA is required to enroll in a for-credit orientation or training course, the University covers the full tuition and campus fee associated with one orientation/training course.

7. Health Insurance

The Kansas Board of Regents, in cooperation with the state universities, offers health insurance for students.
8. Sick Leave and Annual (Vacation) Leave
In accordance with Board of Regents policy, persons appointed to student unclassified positions (including GRA, GTA, and GA positions) do not accrue sick leave or annual leave.

9. Approved Medical Leave
The GTA MOA (Article 5, Section 10) provides that GTAs with a medical condition that necessitates an absence of more than a week from assigned responsibilities shall request unpaid leave with appropriate medical documentation. Such unpaid leave of absence shall be requested in writing from the department/school by the GTA or a representative in advance of taking the leave, unless the illness or injury precludes advance notice. The request for leave without pay must be reviewed and approved by the department, the School or CLAS, Graduate Studies, and by the Department of Human Resources and Equal Opportunity before being granted, but approval shall not be withheld if appropriate supporting medical documentation is provided. If additional documentation is needed, the GTA or authorized representative from the department/school or CLAS will be notified and given reasonable time to provide the documentation. Failure to request a leave of absence or to have a leave of absence approved according to this provision shall result in the placement of the GTA on leave without pay or the termination of the GTA’s appointment.

GRAs or GAs with a medical condition that necessitates an absence of more than a week from assigned responsibilities shall request unpaid leave with appropriate medical documentation. Such unpaid leave of absence shall be requested in writing from the department/school by the GRA/GA or a representative in advance of taking the leave, unless the illness or injury precludes advance notice. The request shall be submitted in advance of taking the leave unless the illness or injury precludes advance notice. The request for leave without pay must be reviewed and approved by the department, the School or CLAS, Graduate Studies, and by the Department of Human Resources and Equal Opportunity before being granted, but approval shall not be withheld if appropriate supporting medical documentation is provided. If additional documentation is needed, the GRA/GA, or authorized representative from the department/School or College will be notified and given reasonable time to provide the documentation. Failure to request a leave of absence or to have a leave of absence approved according to this provision shall result in the placement of the GRA/GA on leave without pay or the termination of the GRA/GA’s appointment.

Please note that the approval of a medical leave of absence from a GRA, GTA, or GA position does not affect the academic status of a graduate student. Students who wishes to reduce their enrollment level due to a medical condition must consult with the department and the appropriate School or College. Doctoral students who wish to take a leave of absence from graduate study because of a medical condition must request a leave from the department.

10. Other Benefit Programs
GRAs, GTAs, and GAs also can participate in voluntary benefit programs. Additional information is located on the Temporary & Student Employee Voluntary Benefits (https://humanresources.ku.edu/temporary-student-employee-voluntary-benefits/) page.

View current policies on GTA/GRA/GA Benefits (http://policy.ku.edu/graduate-studies/benefits-for-GTAs-GTAs-GAs/). Further information about tuition (http://affordability.ku.edu/cs/index.shtml/) and fees is available from the Office of the University Registrar (http://www.registrar.ku.edu/tuition-and-fees/).

Graduate Tuition Assistance Pool (TAP)

1. Payment of Tuition
The appointing KU unit is expected to fund the full cost of Graduate Research Assistant (GRA) tuition consistent with the Benefits for GTA/GRAP policy (https://policy.ku.edu/graduate-studies/benefits-for-GRAs-GTAs-GAs/).

The full cost of tuition for Graduate Research Assistants must be included in all proposals, renewals, and contracts as part of the budget proposal when such support is permitted by the granting agency or source of funding.

2. Eligibility for the Graduate Tuition Assistance Pool (TAP)
When not permitted by the funding source, GRA tuition support may be granted by the TAP. Eligibility for the TAP is determined by the availability of tuition support from the funding source, the source of salary support, the availability of TAP funds, enrollment requirements, and the student eligibility requirements listed below. In order to be eligible for the TAP, the GRA must meet all of the following requirements:

1. be enrolled in a doctoral degree program;
2. meets the requirements for holding a GRA appointment;
3. and have at least one of the following:
   - at least a 40% (0.40 FTE) GRA appointment;
   - a combined GTA/GRA or GA/GRA appointment of 40% (0.40 FTE) or above; or
   - an externally-funded fellowship, as defined in the external funding section of the Graduate Tuition Assistance Pool (TAP) policy.

Tuition support from the TAP may not exceed nine (9) credit hours in a given semester or six (6) credit hours in the summer term. Students are limited to a maximum of ten (10) semesters of support from the TAP. Students who have completed the required eighteen (18) credit hours of post-comprehensive enrollment, and are therefore eligible to enroll in only one (1) credit hour of “dissertation,” are limited to one (1) credit hour per semester of tuition support from the TAP.

External Funding
Externally-funded tuition support is defined as any circumstances in which the source of the salary for a GRA is from a research project funded by an agency external to the University of Kansas. External funding agencies may include, but are not limited to, the National Institutes of Health (NIH), the National Science Foundation (NSF), and the Department of Education (DOE).

It is expected that externally-funded graduate research assistantships and fellowships will provide tuition support. The source of the GRA or Fellowship salary is one determinant for TAP eligibility.

Tuition support from the TAP is available to externally-funded GRAs in the following circumstances:

- the funding agency does not provide tuition support;
- the funding agency provides only partial tuition support;
• the GRA position is funded entirely from Kansas state dollars budgeted for GRAs in the Tertiary Oil Recovery Project (TORP), the Biodiversity Institute (KUBI/BII), the Institute for Policy and Social Research (IPSR), or the Kansas Geological Survey (KGS); or
• the student is appointed as a GRA in the Center for Research Methods and Data Analysis (CRMDA), and conditions (a) or (b) apply.

If a GRA salary is supported from an externally-funded government grant that supports tuition but does not cover tuition rate increases over the duration of the grant, the TAP will cover the difference in tuition between past and current tuition rates.

For research training grants from the NIH and NSF in National Research Service Awards (NRSA), Integrative Graduate Education and Research Training (IGERT), or Graduate Stem Fellows in K-12 Education (GK-12), assistance from the TAP will be only for that amount of the tuition not covered by the training grant.

A GRA is not eligible for support from the TAP if external funding for tuition is available from the grant that is supporting the student, or permitted by the granting agency that is supporting the student’s work, and would cover tuition and campus fees up to full-time enrollment. If a GRA receives compensation from such an externally-funded grant and the student salary or tuition was not originally budgeted in the grant, the University requires that the grant be re-budgeted or that the tuition support be identified from alternative sources.

Internal KU Funding

If the GRA salary is funded entirely from a KU General Research Fund award (either a competitive or new faculty award), then the GRA is eligible for TAP support.

Students who have a salary or stipend at least equivalent to the minimum GTA salary (as determined by the GTA Memorandum of Agreement (http://humanresources.ku.edu/sites/humanresources.ku.edu/files/docs/gta_moa_2014.pdf) for a 50% (0.50 FTE) appointment) from a national or international fellowship that supports either no tuition or only partial tuition are eligible for TAP support and the KUEA funding must include the proportional amount of tuition support from the TAP.

3. Ineligibility for the TAP

The following circumstances describe when a GRA position is not eligible for tuition support from the TAP:

A. Commercial Entities
A GRA position funded by industry, business, or commercial partnerships is not eligible for TAP support and is expected to have tuition funded by the awarding entity.

B. State Dollars
A GRA position paid entirely from startup funds, release funds, shrinkage, or other departmental funds (funds originally budgeted for another purpose) is not eligible for TAP support.

C. KUEA Funds
A GRA paid entirely through KU Endowment Association (KUEA) is not eligible for TAP support and the KUEA funding must include the cost of tuition.

D. Overhead Support
A GRA position paid entirely from returned overhead funds is not eligible for TAP support.

4. Split-Funded GRA Appointments
GRAs who are paid from split funds that are both eligible and ineligible for tuition assistance are eligible to have that proportion of their tuition paid from the TAP that represents the proportion of funding support they are receiving from a TAP-eligible funding source. Graduate students who have a split appointment as a GTA/GRA are similarly eligible for a proportional amount of tuition support from the TAP.

5. KU Medical Center GRAs

Students who are enrolled in a KU Lawrence Campus (KULC) doctoral program and who are employed as a GRA on the KU Medical Center (KUMC) campus are eligible for the TAP. The student’s KULC academic department should submit the TAP request and include proof of the GRA appointment on the KUMC campus.

6. Application Deadline

Requests for graduate tuition assistance from the TAP are preferably submitted sixty (60) calendar days prior to the first day of classes for each semester/term. The final deadline for submission of TAP requests is thirty (30) calendar days after the first published class day of each semester.

GTAs Who Are Non-Native Speakers of English

The Board of Regents policy on spoken English competency requires that non-native speakers of English appointed to GTA positions demonstrate English proficiency on one of the following tests of English competency: the Test of Spoken English (TSE)*, the Speaking Proficiency English Assessment Kit (SPEAK), the Speaking portion of the Internet Based TOEFL (iBT) or the speaking portion of the International English Language Testing System (IELTS). The minimum score that must be obtained appears in the table below, separately by test. In addition, all non-native speakers of English must be interviewed by three institutional representatives, including at least one student. The interview allows the representatives to determine whether the candidate GTA possesses sufficient English proficiency.

Evaluation of English language competency before extending offer of GTA appointment:

1. Spoken English competency as measured by:

<table>
<thead>
<tr>
<th>Test</th>
<th>Min. Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>TSE, SPEAK</td>
<td>50</td>
</tr>
<tr>
<td>iBT</td>
<td>22</td>
</tr>
<tr>
<td>IELTS</td>
<td>8</td>
</tr>
</tbody>
</table>

2. Interview with three institutional representatives, including one student

View the current policy on Spoken English Language Competency of Faculty and Graduate Teaching Assistants (Kansas Board of Regents Policy (https://policy.drupal.ku.edu/provost/spoken-english-competency-BOR-policy/)).

Graduation Calendar

The Graduate Studies graduation calendar is available online (http://graduate.ku.edu/graduation/).
Course Numbering System

Generally, graduate courses are numbered according to the following scheme:

- Courses numbered 500-699 are designed for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
- Courses numbered 700-799 are designed for graduate students who have fewer than 30 hours of graduate credit, but they are also taken by some undergraduates.
- Courses numbered 800-899 are designed for graduate students who have fewer than 30 hours of graduate credit.
- Courses numbered 900-999 are designed for graduate students who have 30 or more hours of graduate credit.

Courses that contain a mixture of undergraduate and graduate students should set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Division and is taught by a person holding a current appointment to the Graduate Faculty. See the graduate credit section of the catalog (below) for more information.

Grading

General Guidelines

Grading scales are assigned on a course-by-course basis. The grading scale selected for a course must be appropriate to the course type and to the students and programs that the course serves. It is expected that designated thesis, dissertation, and their approved equivalent courses will be graded using either the A, B, C, D, F, P scale or the SP, LP, NP scale. (Use of the P grade is restricted in some divisions: please see the Exclusions and Special Circumstances of the Grading policy for more details.) Other research and non-research courses for degree- and certificate-seeking students will be graded using either the A, B, C, D, F, P scale or the SP, LP, NP scale, with or without the use of the I grade at the department's discretion. Once a grading scale for a particular course has been recommended by the department and approved by the Graduate Division, it must be applied to the entire student enrollment in the course or section. This applies to all graduate-level courses.

The individual schools and the College have the option of using or not using the +/-, according to the policy adopted by the particular school.

In courses that adopt the letter-grade scales, C- is not considered a passing grade. C-, D, and F work does not count toward fulfilling degree requirements. Overall, students must earn at least a B average (i.e., 3.0 GPA) on course work counted toward any master's, specialist, or doctoral degree at KU, and only courses graded A, B, or C (excluding C-) may be so counted. The student's graduate GPA calculation will include any degree- or certificate-seeking graduate course work completed at KU. Courses graded P, SP, LP, NP, S, U, CR, NC, or I are excluded from the computation of the GPA.

The I Grade: Incomplete Work

The I grade indicates course work that has been of passing quality but which is partially unfinished for good reason. Use of the I grade is optional in some grading scales but is not permitted by others (see below). Generally, the I grade is an appropriate option for enrollments other than thesis, dissertation, research, or the first semester of a two-semester sequence course.

As stated in the University Senate Rules and Regulations, Article II, Section 2.2.3.2 (http://policy.ku.edu/governance/USRR/#art2sect2): “A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An incomplete grade not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student's record.”

Grading Scale: Regular Courses

Grading Scale: A, B, C, D, F, (I)

The basic system is an A, B, C, D, F, (I) scale, where:

- A designates above-average graduate work;
- B designates average graduate work;
- C designates passing but not average graduate work;
- D and F designate failing graduate work.
- Inclusion of the I option is at the discretion of the department (see above).

Grading Scales: Research Courses

Departments select one of the two following scales to grade their thesis, dissertation, and approved thesis- or dissertation-equivalent courses. Other research and non-research courses for degree- and certificate-seeking students are graded using the A, B, C, D, F, P scale. The I grade is not appropriate for enrollment in thesis, dissertation, or research courses and is not allowed by these grading scales. The I grade is discussed separately above.

Grading Scale: A, B, C, D, F, P

In this grading scale the letter P indicates participation in coursework where evidence of performance may not be available. (Use of the P grade is restricted in some divisions: please see the Exclusions and Special Circumstances section of the Grading policy (http://policy.ku.edu/graduate-studies/grading/?num2.4) for more information.)

This grading scale is appropriate in two types of situation:

- In designated thesis, dissertation, approved thesis- or dissertation-equivalent, or research courses;
- In the first semester of two-semester sequence courses.

In any semester, an instructor has the option to assign a letter grade of A, B, C, D, or F, instead of P, when evidence about performance is available. Upon completion of thesis, dissertation, or research hours leading to a master’s specialist, or doctoral degree, the P remains on the final transcript in all semesters for which it was recorded.

For departments that use this scale, a letter grade (A, B, C, D, or F) must be assigned for a student's final semester of enrollment in thesis, dissertation, or research course work. The letter grade assigned characterizes the quality of the final product.

Grading Scale: SP, LP, NP

This grading scale is established in USRR 2.2.5 (http://policy.ku.edu/governance/USRR/#art2sect2). It evaluates a student’s work as demonstrating satisfactory progress (SP), limited progress (LP), or no
progress (NP). It is appropriate only in designated thesis, dissertation, and approved thesis- and dissertation-equivalent enrollments.

For departments that use this scale, a grade of SP must be assigned for a student's final semester of enrollment in thesis, dissertation, or approved thesis- or dissertation-equivalent course work. The SP indicates that the final product was of satisfactory quality to earn the degree.

Milestone Examinations
Honors, Satisfactory, Unsatisfactory
Performance on milestone examinations may be graded Honors, Satisfactory, or Unsatisfactory. These outcome grades are appropriate to the following milestone examinations:

- the general examination for the master's degree;
- the general examination for the degree of specialist;
- the comprehensive oral examination for the doctorate;
- the final examination for the doctorate.

Use of the Honors designation is at the department's discretion.

Other Grading Scales
Grading Scale: S, U, (I)
The grades of S and U designate satisfactory (S) and unsatisfactory (U) performance. This grading scale is appropriate to three types of course:

- continuing education courses;
- workshop courses;
- institute courses.

No more than 6 hours total of graduate course work graded S may count toward a degree. The S, U, (I) grading scale may be adopted at the department's discretion (see above for discussion of the I grade).

In courses numbered 800 or above, and for which specific authorization has been given, an instructor may report a grade of S for students who have satisfactorily attended the course but for whom it has not been possible to evaluate the quality of performance.

Grading Scale: CR, NC
The Credit (CR) or No Credit (NC) option is authorized for graduate students: a grade of CR will reflect work earning a C or better and the grade of NC will reflect work earning a C- or below.

As outlined in USRR 2.2.7.6 (http://policy.ku.edu/governance/USRR/#art2sect2), no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement. Please see the Research Skills and Responsible Scholarship policy (https://policy.drupal.ku.edu/graduate-studies/research-skills-responsible-scholarship/) for more information.

Graduate Credit
Three conditions must be met for a student to receive graduate credit for work satisfactorily completed at KU:

1. The student must have gained graduate admission.
2. The course must be numbered 500-level or above and have been approved for graduate credit by the appropriate professional school or the College of Liberal Arts and Sciences.
3. The instructor must be authorized to teach at the graduate level.

Non-degree-seeking students admitted to a particular program, school, or college will earn graduate credit for courses taken even though they are not working toward a credential. General non-degree-seeking students without a program or school affiliation will not earn credit for courses taken.

Counting Credits Toward Degrees and Certificates
Graduate courses taken as a degree-seeking student may count toward both a graduate degree and graduate certificate as long as the student is admitted and enrolled in the certificate program prior to completion of the last course required for the certificate.

Similarly, graduate credit earned while certificate-seeking may also be applied toward a master's program with the approval of the master's program, provided the student is enrolled as degree-seeking in the master's program prior to the last semester of coursework in the master's program.

At the discretion of the certificate-granting or degree-granting program and the Graduate Division, up to nine (9) credit hours of graduate classes taken as a non-degree-seeking student may be allowed to count toward a certificate or degree program. In the case of a 9-hour graduate certificate, a maximum of six (6) credit hours is allowed.

Grades of C- and below do not count toward fulfilling degree requirements and cannot be counted toward a degree or certificate. Course credit by examination is not accepted toward graduate degrees or certificates.

Cumulative Graduate GPA
For degree- and certificate-seeking graduate students, all graduate-level courses will be included in the calculation of the cumulative graduate GPA. Undergraduate courses, even when the student enrolls as part of their graduate career, will not count toward the cumulative graduate GPA. For students in Accelerated Master's (e.g., 4+1 or 3+3) programs, only courses taken after full admission as a graduate student will factor into the cumulative graduate GPA. Graduate courses counted as part of the undergraduate degree will not be counted in the cumulative graduate GPA.

For non-degree-seeking students, all undergraduate and graduate courses will count toward the student's cumulative graduate GPA while the student maintains their non-degree-seeking status. However, if a non-degree-seeking student applies, is admitted, and begins work on a degree- or certificate-seeking program, any undergraduate coursework taken as a non-degree-seeking graduate student will be removed from the calculation of the cumulative graduate GPA. Graduate courses taken while a non-degree-seeking student will continue to be included in the GPA calculation.

Grades of C- and below will affect the calculation of the cumulative graduate GPA. The grades of P, S, SP, LP, NP, U, and I, for which no numerical equivalents are defined, are excluded from the GPA calculation.
Transfer Credit

At the discretion of the major department and the Graduate Division, any graduate student may transfer up to nine (9) hours of graduate credit taken at a regionally-accredited graduate school and apply it to a KU master’s degree plan, as long as the credits were taken prior to the final semester of enrollment at KU. In cases where KU has an established Memorandum of Understanding (MOU) with a partner institution, students may be able to transfer more than nine (9) hours of graduate credit, in accordance with the MOU.

Only work graded B (3.0 on a 4.0 scale) or higher may be transferred. KU does not accept transfer credit for courses that have been graded B- or below. KU master’s degrees may accept transfer credit graded CR (credit), S (satisfactory), or similar in cases where a school, college, or university such grading scales in response to a natural or other disaster, as indicated by a transcript notation or other documentation.

KU does not accept graduate transfer credit for institutes, workshops, or life/work experience. Credit will not transfer for courses that were previously counted toward the completion of an undergraduate or graduate degree.

A minimum of 15 credits toward a master’s degree must be earned in KU coursework. As described in the M.A. & M.S. Degrees (http://policy.ku.edu/graduate-studies/ma-ms-degrees/) policy, a 30-hour master’s degree may be reduced to as few as 24 hours for students who are “exceptionally well prepared.” If coursework is transferred to KU, the same coursework cannot also be used to establish a student as “exceptionally well prepared.”

No graduate credit may be transferred toward a doctoral degree, but departments may take relevant prior graduate work into consideration when setting up programs of study.

Graduate credit from another institution may not be transferred to a KU graduate certificate program.

The department or program and the Graduate Division retain the discretion to deny a student’s request to have transfer credit and/or non-degree-seeking credit count toward a degree or certificate.

View the current policy on Graduate Credit (https://policy.ku.edu/graduate-studies/graduate-credit/).

Graduate Course Work Expiration Dates

Courses completed at the University of Kansas, or transfer credits from another university, cannot be used to fulfill graduate degree requirements if these courses were completed more than ten (10) years prior to the final defense for doctoral candidates or graduation for master’s students.

Faculty members retain the responsibility for determining the validity of courses that count toward the degree. Any decision to make an exception to the policy outlined above must be approved by the Graduate Division of the School or CLAS in which the student’s program resides. View the current policy on Graduate Coursework Expiration Dates (http://policy.ku.edu/graduate-studies/coursework-expiration-dates/).

Good Academic Standing

Evaluation of graduate student academic standing includes, but is not limited to, consideration of performance in and progress through a graduate program according to program expectations.

Performance

Graduate students must maintain an expected level of performance throughout their program. Criteria for evaluating satisfactory performance include, but are not limited to:

1. For degree- and certificate-seeking students, a minimum cumulative grade point average (GPA) of 3.0 or higher and, for non-degree-seeking students, a cumulative graduate GPA of 2.0 or higher.
2. Academic and scholarly integrity (for more information, see related policies on the Graduate Studies website (https://graduate.ku.edu/policies/));
3. Compliance with academic policies at the university, school, and departmental level; and
4. For degree- and certificate-seeking students, satisfactory progress toward completion of the degree or certificate, as determined by the program. Graduate programs are responsible for evaluating students at least annually to assess progress toward a degree. Progress may be determined by factors including:
   a. Completion of coursework, milestones, exams, or other program components on a specified time frame; and
   b. Official time to degree and total time in program.

Graduate programs may have additional measures of progress. Failure to maintain an expected level of performance will result in a student not being in good academic standing.

Lack of good academic standing will result in the graduate program placing the student on probation or in dismissal from the program (for more information, please see the policies on academic probation (http://policy.ku.edu/graduate-studies/academic-probation/) and dismissed enrollment (http://policy.ku.edu/graduate-studies/dismissed-enrollment/?num2.2)).

It is expected that graduate programs will evaluate students pursuing more than one degree program based on their progress in each program individually.

Academic Probation

Upon falling below a cumulative graduate grade-point average of 3.0, computed with the inclusion of grades earned at KU for all courses acceptable for graduate credit, the student is placed on probation by the graduate division of the school/college. The grades of P, S, U, and I, for which no numerical equivalents are defined, are excluded from the computation. If, by the end of the next semester of enrollment following the placement of probation, the student raises the overall graduate GPA to 3.0 and otherwise demonstrates performance in keeping with departmental standards and timelines, the department or program may request that the graduate division lift the probation and return the student to good academic standing. If not, the student is not permitted to re-enroll and will be dismissed unless the graduate division of the school/college acts favorably on a departmental recommendation for the student to continue study.

If admitted provisionally due to deficiencies in grade-point average, a student must earn an overall graduate average of at least 3.0 during the first semester of enrollment to be permitted to re-enroll, in which case the student is considered to have achieved good academic standing. A student admitted provisionally who fails to earn a 3.0 average in the first semester of enrollment may be dismissed immediately. If provisional continuation is recommended by the department or program and
approved by the Graduate Division, the student may remain on provisional status for one additional semester.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the Graduate Division that will accept the student. The petition must be approved by the Vice Provost of Graduate Studies.

View the current policy on academic probation (http://policy.ku.edu/graduate-studies/academic-probation/).

Progress to Degree Forms

The Progress to Degree forms are the official forms recognized by Graduate Studies to track and monitor graduate student progress at the University of Kansas. The forms should be used to report every aspect of academia from change in degree plans within the same department to request time limit extensions and leaves of absence, transfer credit towards a master’s degree, and report the completion of comprehensive and oral exams, certificate programs as well as FLORS requirements.

The forms are available on the Graduate Studies website and should follow the workflow indicated for the individual function required.

View the current policy on progress to degree forms (https://policy.ku.edu/graduate-studies/progress-to-degree-form/).

Academic Accommodation for New Parents

The University of Kansas acknowledges that the years spent in graduate and professional degree programs can coincide with the years in which students begin and raise families. KU wishes to assert itself as an institution that values family-friendly policies for students, faculty, and staff by adopting a graduate-student-specific policy outlining the academic accommodations available for new parents. This policy illustrates KU’s commitments to graduate-student well-being and to diversity and inclusion, which will allow the institution to recruit and retain the highest quality students.

Communication and cooperation between students, advisors, and graduate programs is crucial to successful navigation of new parenthood in graduate school. This policy should not replace that communication. Rather, it should reinforce the importance of that cooperation, offer a formal mechanism to enable appropriate accommodations, and encourage flexibility from all involved parties. Students, academic programs, and departments are expected to work with sensitivity and imagination, making good-faith efforts to articulate and meet the needs of graduate-student parents. Students are expected to be proactive in articulating specific accommodations that will enable them to remain in good standing and maintain satisfactory progress toward a degree.

Policy Statement:

The University of Kansas will grant graduate students an academic accommodation period of up to six (6) weeks due to the arrival of a new child (e.g., arrival through childbirth, adoption, or the placement of a foster child). If both parents are graduate students at KU, each may arrange for an academic accommodation period for the same child and those accommodation periods need not be taken concurrently. This is an academic accommodation only: students should be advised to consult with administrative units on campus concerning how an academic accommodation period may affect employment, financial aid, non-immigrant status, or other concerns. New parents who find they need more time away from their academic responsibilities may take a leave of absence (https://policy.ku.edu/graduate-studies/leave-of-absence/).

The specific provisions of this accommodation period will be determined through consultation between the student, advisors, and departmental officers. During this accommodation period, students will continue to be enrolled at their established academic status (i.e., full-time or part-time) and retain all benefits of such status. This is not a leave of absence because the student remains enrolled, continues to pay tuition, and is expected to return as soon as possible to academic work.

The academic accommodation period may be granted as a brief period free from academic responsibilities, a revised academic, research, or clinical schedule, or a combination of these. This policy provides academic accommodation only. It does not alter or modify the university’s employment policies concerning paid or unpaid time off. Students employed on campus should consult with their employers if they need to request time off from work.

The academic accommodation for new parents has three components which apply to all active graduate students.

1. New parents who arrange for an academic accommodation period may also request a one-semester extension of graduate program and Graduate Studies requirements, time limits, academic work, and milestones (including, but not limited to, Master's Exams and Comprehensive Exams). Students should consult with their Directors of Graduate Studies (DGSes) to determine whether this extension is necessary and to specify the date on which it begins. If a student wants this extension, the student must notify the department of the extension request no later than the date on which the student returns from the academic accommodation period. Departments will submit this extension request for approval by their School or College.

2. New parents who arrange for an academic accommodation period will be able to maintain their established enrollment level (full-time or part-time) until the end of the accommodation period or the end of the semester, whichever comes first. They will thus retain access to all KU facilities and privileges for which they are eligible (including, but not limited to, student health insurance, libraries, email, and parking), and they will continue to be students at their established level for all university matters involving financial aid (e.g., loan eligibility and deferment) and immigration (e.g., immigration requirements). However, if new parents must also take time off work, it may result in a loss of funding.

3. To arrange for an academic accommodation period, new parents should work with their advisors, principal investigators, and department officers to propose an academic accommodation that meets the student’s needs. The proposal should make arrangements for course completion and for satisfaction of research and/or clinical obligations during the academic accommodation period. Students are encouraged to discuss how the academic accommodation may affect time-sensitive research or clinical projects and the feasibility of continued participation in these same projects.

Procedures:

Students must submit the completed Academic Accommodation for New Parents Form to their department. Individual programs and departments will review their students’ requests and, along with the student and other necessary parties (e.g., advisors, instructors), determine the academic accommodations to be provided. These discussions must also detail the
type of academic engagement and progress expected from the student during the academic accommodation period.

Following departmental review:

- If a program decides to approve a student’s request the form, bearing the student’s and DGS’s signatures, and the accommodation plan must be submitted to the appropriate school or College for tracking. The plan will outline the specific accommodations being provided for the student, as well as the academic program's expectations for the student (if any). It must clearly state the dates (up to six (6) consecutive weeks) for which the accommodation is being granted.
- If a program determines that a leave of absence is more appropriate, but the student continues to prefer an academic accommodation, the student’s request and the department’s rationale for encouraging a leave of absence must be submitted in writing to the appropriate school or College and to the Office of Graduate Studies for review. The Dean of the student's school or College, in consultation with the Vice Provost of Graduate Studies, will have final decision-making authority. KU prohibits retaliation of any kind against graduate students who request or receive an academic accommodation for new parenthood.

Accommodation periods must begin within one (1) calendar year of a new child’s arrival.

View the current Lawrence and Edwards Campus policy on academic accommodation for new parents (https://policy.ku.edu/kulc-academic-accommodation-new-parents/).

Enrollment

Graduate Student Enrollment

All graduate students are expected to fit into one of the following enrollment categories at all times while completing the credits required for the fulfillment of their degrees.

- Full-time Enrollment
- Leave of Absence
- Discontinued
- Dismissed
- Post-comp Enrollment for Doctoral Candidates

Graduate students are not normally permitted to enroll for more than 16 hours each semester or more than 8 hours in the summer session.

Under some circumstances, undergraduate students may enroll in graduate courses.

- Undergraduate Enrollment in Graduate-Level Courses for Undergraduate Credit
- Co-enrollment (Seniors and Graduate Study)

View the current Lawrence and Edwards Campus policy on enrollment (http://policy.ku.edu/graduate-studies/enrollment/?num2.3).

Full-Time Enrollment for Graduate Students

This policy defines the categories of full-time and part-time enrollment. For other policies related to enrollment and employment, please see related policies on the Graduate Studies website.

FULL-TIME ENROLLMENT FOR FALL AND SPRING SEMESTERS

*Only master’s students in their last semester of study are eligible for the 3/4-time and half-time enrollment exception while holding a GRA. For more information, see the policy on Graduate Research Assistant Appointment Eligibility (http://policy.ku.edu/graduate-studies/GRA-appointment-eligibility/).

Students enrolled in fewer hours than defined by half-time enrollment are considered part-time.

All students should check with their graduate degree programs and Graduate Studies’ policies to determine whether additional enrollment requirements or summer enrollment requirements exist.

International Students

International students in F-1 and J-1 status must also comply with Federal immigration requirements by pursuing a full course of study each semester to maintain their legal status. All international students must conform to residence requirements, even though immigration regulatory requirements may be lower.
Leave of Absence

A Leave of Absence may be granted upon request to the graduate program in advance of leave. A leave of absence may be granted in extraordinary circumstances (e.g. cases of illness, emergency, financial hardship, military leave), to pursue family responsibilities, or to pursue full-time activities related to long-range professional goals.

Appropriate documentation related to these extraordinary circumstances may be requested from the student directly. Evidence of progress towards degree will also be a determining factor in the decision to grant an exception.

The time taken for a leave of absence does not count against the student's time to degree. However, if the total time for the leave extends more than five years, the student will lose the student's place in the program and must reapply for admission.

To request a leave of absence, the program must complete a Progress to Degree (PtD) form. View the current policy on Leave of Absence (http://policy.ku.edu/graduate-studies/leave-of-absence/).

Discontinued Enrollment

A student may voluntarily resign from their program of study by requesting “discontinuance”. Once this request is granted, the student resigns their place in the program and if they choose to return to their studies at a later date, they must reapply for admission. Discontinuance is requested through the Progress to Degree Form.

Dismissed Enrollment (Dismissal)

Graduate programs are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If the graduate program finds that a student has failed to resolve a probationary status or is not making satisfactory progress as determined by the Good Academic Standing policy (https://policy.ku.edu/graduate-studies/good-academic-standing/), the program may recommend to the school or CLAS that the student be dismissed from the program. Graduate programs request dismissal using the Progress to Degree form.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate division of the school or CLAS that will accept the student. The Vice Provost for Graduate Studies must review the petition to determine final action.

Academic Probation and Dismissal

When a degree- or certificate-seeking student falls below a cumulative graduate grade-point average (GPA) of 3.0, the graduate division of the school or CLAS places the student on academic probation. If the student's cumulative graduate GPA has been raised to 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to good academic standing. If not, the student is not permitted to re-enroll and will be dismissed unless the graduate division of the school or CLAS acts favorably on a departmental recommendation for the student to continue study. For more information about GPA calculation, see the Graduate Credit policy (http://policy.ku.edu/graduate-studies/graduate-credit/).

When a non-degree-seeking student admitted to a program, department, or school falls below a cumulative graduate GPA of 2.0, the graduate division of the school or College dismisses the student unless they choose to act favorably on a departmental recommendation for the student to continue study. When a general non-degree-seeking student without program or school affiliation falls below a cumulative graduate GPA of 2.0, the university dismisses the student. For more information about GPA calculation, see the Graduate Credit policy (http://policy.ku.edu/graduate-studies/graduate-credit/).

Graduate divisions within the Schools or College may have more stringent dismissal policies in place. Please check with the graduate division of the School or College for more information.

Permit to Re-Enroll

A student who has been actively enrolled in a degree-, certificate-, or non-degree-seeking graduate program, but who has not been enrolled for one academic year (three consecutive semesters, including the summer semester) or less, may be eligible to use the permit to re-enroll form with the consent of the student's department or program. A student who has been actively enrolled in a degree-, certificate-, or non-degree-seeking program, but who has not enrolled for four or more consecutive semesters without an approved leave of absence, is not eligible to use the permit to re-enroll form and must re-apply for graduate admission.

The permit to re-enroll form is not available to a student who:

- was dismissed from a program at KU;
- was voluntarily discontinued (formally withdrew) from a graduate program;
- completed the graduate program; or
- most recently enrolled as a non-degree-seeking graduate student.

Before completing the permit to re-enroll form, students should contact their graduate programs directly to confirm availability of the permit to re-enroll. Students returning from an approved leave of absence will be returned from leave by their department; such students are not required to use the permit to re-enroll form.

View the current policy on the Permit to Re-Enroll (http://policy.ku.edu/graduate-studies/permit-to-reenroll/).

Seniors and Graduate Study (Co-enrollment)

Seniors at KU who will complete the requirements for a baccalaureate degree in a given semester may be allowed to enroll in graduate course work during their final semester. These seniors must have very strong academic records (grade-point average higher than 3.0 on a 4.0 scale), must apply and be admitted provisionally as degree-seeking graduate students, and must request the permission of the appropriate Graduate Division. Seniors requesting the privilege of co-enrollment must make formal application through the graduate affairs office of the appropriate school or college.

Procedure

To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least one class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If, after the co-enrollment semester, the baccalaureate degree is not completed the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been
conferred. After one semester, students are not eligible for co-enrollment and the graduate admission will be retracted.

Students who are eligible to co-enroll receive an email from the Registrar’s Office before enrollment with instructions on how to enroll in more than one career (ex. LAW, GRDL-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during each appointment time. When enrollment is complete for each career, students must check the grading option for each course to ensure the class will be counted correctly.

View the current policy on co-enrollment ([http://policy.ku.edu/graduate-studies/seniors-and-grad-study/?num2.8](http://policy.ku.edu/graduate-studies/seniors-and-grad-study/?num2.8)).

**Undergraduate Student Enrollment in Graduate-Level Courses**

Well-qualified undergraduate students may be permitted to enroll in 800- or 900-level courses for undergraduate credit with the approval of the instructor, the student’s advisor, and the Graduate Division. The student must bring a Count towards Degree form signed by the instructor, a letter of explanation and recommendation from the advisor, and current academic record to the Graduate Division for approval. If approved, the Graduate Division signs the Count towards Degree form, which the student must present to the staff in the Student Records Center to enroll in the courses. Courses taken for undergraduate credit may not be transferred to graduate credit.

View the current policy on undergraduate student enrollment in graduate-level courses ([http://policy.ku.edu/graduate-studies/undergrad-student-enroll-grad-course/](http://policy.ku.edu/graduate-studies/undergrad-student-enroll-grad-course/)).

**Embargo of Theses and Dissertations**

When an exception to the immediate release of a thesis or dissertation is necessary, an embargo provides a temporarily, delayed public release of the work. Embargo periods may last six months, one year, or two years are available. While embargoes are not intended to be permanent, renewals of the original embargo period are permissible. Considerations that may be deemed reasonable for granting permission for an embargo include, but are not limited to:

- Patentable rights or other issues contained in the work, the disclosure of which may be detrimental to the rights or interests of the author.
- There is a need to prevent disclosure of government information about persons, institutions, technologies, etc. that is contained in the work.
- An academic or commercial press has expressed interest in acquiring the rights to publish the work as a book that may require an embargo.
- The work contains content that has already been submitted to a peer-reviewed journal that may require an embargo.
- Approval for delay has been granted by the KU Restricted Research Committee (see Restricted Research link below for more information).

Requests for an extension of the embargo should be directed to the Office of Graduate Studies and must be received at least one month prior to the expiration of the current embargo to ensure sufficient time to process the request. A request for an embargo submitted to the University of Kansas affects only the publication of the thesis or dissertation in KU ScholarWorks. It is the graduate student’s responsibility to request an extension from both the University of Kansas for the copy in KU ScholarWorks and separately through ProQuest/UMI.

While there is no limit to the number of times a student can request an embargo extension, embargoes that have been allowed to expire without a request for an extension will result in the thesis or dissertation being made publicly available.

The embargo period will be calculated beginning at the end of the semester in which the student graduates, with the specific dates being: December 31st, May 31st, August 31st.

**Steps necessary for embargoing a thesis or dissertation:**

Theses and dissertations at the University of Kansas are made available in two electronic databases: KU ScholarWorks and ProQuest/UMI Dissertations and Theses. Items in KU ScholarWorks are publicly accessible on the world-wide web and can be indexed by search engines such as Google, Bing, Yahoo, and others.

A student who does not wish to have a thesis or dissertation made public in these two venues for some limited period of time must receive permission to embargo the thesis or dissertation from the director of graduate studies in the student’s department, the committee chair, the department chair, or the dean of the pertinent school or CLAS. The student must request this permission with the Electronic Thesis and Dissertation (ETD) Release Form. The University of Kansas will accept the thesis or dissertation—thereby completing all degree requirements—only if the student signs this release form. Likewise, the University of Kansas will only entertain requests for an embargo on the publication of a thesis or dissertation through submission of this same form.

- To ensure that embargoed work is restricted, students must take two steps after receiving the appropriate signatures before graduation. First, the student must submit the Electronic Thesis and Dissertation (ETD) Release Form to the school or CLAS. If an embargo has been approved, this form will ensure that the work is temporarily restricted in KU ScholarWorks.
- Second, during the electronic submission process to ProQuest/UMI, the student must select the embargo option under the publishing restrictions section. If an embargo has been approved, this step will ensure that public view of the work is temporarily restricted in the ProQuest/UMI Dissertations and Theses database. Please view the Embargo policy for more information.

**Note:** If a student does not receive permission for an embargo and/or does not submit the required documentation requesting such an embargo to the Office of Graduate Studies prior to graduation, the work will be made publicly available through KU ScholarWorks, and search engines will find and index the work. For this reason, once a work is released publicly, it is impossible to deploy an embargo in its entirety because copies of a released work are likely to be stored on the web even if the KU ScholarWorks and ProQuest/UMI copies are retracted. Therefore, it is crucial for students who desire the embargo option to request it prior to graduation and to request extensions, if needed, prior to the work being exposed to search engines.

Dissertation defenses are open to the public. In the event that an embargo is deemed necessary for a dissertation, the committee should consider holding an additional question period for the defense that is closed to the public. Any sensitive data may be discussed in the closed session.
Graduate Student Oral Exam Attendance

Ideally, all members of the committee are physically present at graduate student oral examinations, which include the master’s final oral exam (i.e. thesis defense), the doctoral comprehensive oral exam, and the doctoral final oral exam (i.e. dissertation defense). Oral examinations which do not meet the attendance requirements below are not valid. A student's milestone outcome will not be influenced by any proceedings that take place without all members either physically present or participating by approved, mediated means. If a committee member has not arrived, the exam may not begin and if a committee member leaves, the exam may not proceed.

In all cases, it is required that the student being examined, the chair of the committee, and the Graduate Studies Representative must be physically present at the examination or defense. Mediated attendance by the student, chair, or Graduate Studies Representative is prohibited.

When a situation arises in which one or more committee members cannot be physically present, attendance via mediated means (video-conferencing) is acceptable at the discretion of the student and the committee chair. When mediated attendance is used, a majority of the committee members, including the committee chair and the Graduate Studies Representative, must be in physical attendance. All members of the examining committee must be aware of what transpires during the examination. All committee members must be able to participate fully in the discussion with the student and each other. Any material presented during the examination, orally or in writing, shall be seen and heard by all members.

In cases where the student prefers for all committee members to be physically present, the student's preference shall be honored.

In the case of technology failure during the examination, all physically-present members of the committee must concur that the examination was substantially complete in order to move to an outcome vote. If any member of the committee dissents, the examination is considered canceled and must be rescheduled. If the exam is judged complete, the committee members at remote locations must be contacted to submit their assessment before the exam results are recorded.

Graduate Studies will manage exceptions to the policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the graduate division of the governing school or college for endorsement, then submitted to the Vice Provost of Graduate Studies for consideration. When possible, petitions for exception should be submitted to the Vice Provost of Graduate Studies at least one week in advance of the exam. If exceptions are granted, Graduate Studies may request that a member of the departmental leadership (the Chair or Director of Graduate Studies) be present at the examination.

Grievance Policy for Graduate Students

Graduate students who believe themselves to be unfairly or unlawfully treated in an academic matter may present a grievance to their academic department or program chair. Each academic unit and all graduate divisions have established grievance policies and procedures. Appeal of a grievance heard at one of these levels is made to the Judicial Board. The Office of Graduate Studies has established a set of guidelines for graduate student petitions in certain categories that may not be under the jurisdiction of other hearing bodies. The Executive Council of Graduate Faculty has identified two categories as the purview of the Graduate Studies:

1. Cases involving the graduate divisions of two or more Schools and/or CLAS;
2. Cases involving the interpretation of Graduate Studies policy as it pertains to the graduate division of a School or CLAS.

For disputes involving alleged academic misconduct or alleged violations of student rights, the initial hearing is normally held at the unit level. There is an option to hold an initial hearing at the Judicial Board level if both parties agree, or if either party petitions the Judicial Board chair to hold the hearing at the Judicial Board level and the petition is granted. The petition must state why a fair hearing cannot be obtained at the unit level; the opposing party has an opportunity to respond to the petition.

Procedures for Graduate Student Grievances

Pursuant to Article XII of the University Senate Code and Articles V and VI of the University Senate Rules and Regulations of the University of Kansas, Lawrence, the Office of Graduate Studies establishes the following procedure to hear grievances arising within the Office of Graduate Studies. This procedure shall not be used to hear disputes assigned to other hearing bodies under USRR Article VI, Section 4.

For disputes involving alleged academic misconduct or alleged violations of student rights, the initial hearing normally will be at the unit level. There is an option to hold an initial hearing at the Judicial Board level if both parties agree, or either party petitions the Judicial Board chair to have the hearing at the Judicial Board level and the petition is granted. The petition must state why a fair hearing cannot be obtained at the unit level; the opposing party has an opportunity to respond to the petition (USRR 6.4.3.1).

Except as provided in USRR 6.5.4, no person shall be disciplined for using the grievance procedure or assisting another in using the grievance procedure.

The Office of Graduate Studies shall provide a copy of this procedure to anyone who requests it.

A sub-committee of the Executive Council of Graduate Faculty is charged to establish policies governing the handling of individual grievances of graduate students brought to the attention of Graduate Studies, to carry out or delegate the investigation of individual grievances presented to Graduate Studies, and to make and report final recommendations to the Vice Provost for Graduate Studies with respect to individual grievances. Since the sub-committee has the responsibility to adjudicate and hence to hear grievances, it cannot function to develop evidence on behalf of either complainant or respondent. However, it is appropriate for Graduate Studies, in its administrative capacity, to look into complaints prior to scheduling a grievance hearing, to interview parties, to secure documents, and to seek a conciliatory solution. Before pursuing formal grievance
procedures, a grievant should ordinarily attempt to resolve the matter informally through direct or indirect consultation with the other party, through discussions with supervisory personnel, or through informal mediation. If the problem is not solved in this fashion the Vice Provost shall refer the complainant to the sub-committee or, if appropriate, to another appropriate unit charged with jurisdiction to resolve the dispute. If it is referred to the sub-committee, Graduate Studies shall make available to the committee what it has learned that bears on the complaint. This shall not be construed, however, to deny the right of a student to file a complaint directly with the committee.

1. To start the grievance process, the complainant must submit a written grievance to Graduate Studies. The complaint shall contain a statement of the facts underlying the complaint and specify the provision(s) of the Faculty Code of Conduct, University Senate Code, the University Senate Rules and Regulations, the Code of Student Rights and Responsibilities, or other applicable rule, policy, regulation, or law allegedly violated. The complaint shall also indicate the witnesses or other evidence relied on by the complaining party, and copies of any documents relevant to the complaint shall be attached to the complaint.

2. At the time the complaint is submitted to Graduate Studies, the complaining party shall provide a copy of the complaint, with accompanying documents, to the respondent(s).

3. Upon receipt of the complaint, Graduate Studies shall contact the respondent to verify that the respondent has received a copy of the complaint and to provide the respondent with a copy of these procedures.

4. Pursuant to University Senate Code XII, a respondent has the privilege of remaining silent and refusing to give evidence in response to a complaint. The respondent also has the right to respond and give evidence in response to the complaint.

5. The respondent shall submit a written response to the Office of Graduate Studies within fourteen (14) calendar days of receiving the complaint. The response shall contain the respondent’s statement of the facts underlying the dispute as well as any other defenses to the allegations in the complaint. The response shall also identify the witnesses or other evidence relied on by the respondent and shall include copies of any documents relevant to the response. The respondent shall provide a complete copy of the response to the complaining party.

6. Upon receipt of the response, the Office of Graduate Studies shall contact the complaining party to verify that a copy of the response has been provided.

7. Upon receiving the complaint and response, or if the respondent fails to respond within the fourteen(14)-day time period, Graduate Studies shall appoint a committee to consider the complaint. The committee members shall be disinterested parties who have not had previous involvement in the specific situation forming the basis of the complaint.

8. Pursuant to USRR 6.8.4.2, the chair of the committee may contact other hearing bodies within the University to determine whether a grievance or complaint involving the underlying occurrence or events is currently pending before or has been decided by any other hearing body.

9. Time limits. To use this procedure, the complainant must file the written complaint with Graduate Studies within six (6) months from the action or event that forms the basis of the complaint. The six (6)-month time period shall be calculated using calendar days (including weekends and days during which classes are not in session).

10. Upon receiving the complaint, if the chair of the committee determines that any of the following grounds exist, the committee chair may recommend to the Vice Provost that the complaint be dismissed without further proceedings. The grounds for such dismissal are:
   a. the grievance or another grievance involving substantially the same underlying occurrence or events has already been, or is being, adjudicated by proper University procedures;
   b. the grievance has not been filed in a timely fashion;
   c. the Vice Provost for Graduate Studies lacks jurisdiction over the subject matter or any of the parties;
   d. the grievance fails to allege a violation of a University rule;
   e. the party filing the grievance lacks standing because the complainant has not suffered a distinct injury as a result of the challenged conduct and has not been empowered to bring the complaint on behalf of the University; or
   f. the party filing the grievance has been denied the right to file grievances pursuant to USRR 6.5.4.

11. If the chair of the committee determines that a grievance on its face properly should be heard by another body, the chair will recommend that the Vice Provost for Graduate Studies send the grievance to the appropriate hearing body without further proceedings in Graduate Studies. The Vice Provost will send a copy of the referral to the complainant(s) and any responding parties.

12. If not previously attempted, prior to scheduling a hearing, the parties shall participate in mediation of the dispute unless either party waives mediation. Mediation shall be governed by USRR 6.2.3.

13. If mediation is successful, the mediator will forward to the Vice Provost for Graduate Studies, the committee chair, and all parties a letter describing the outcome of the mediation and the terms upon which the parties have agreed to resolve the dispute. This letter shall be a recommendation to the Vice Provost. The Vice Provost will notify the mediator, the committee chair, and the parties that the recommendation has been accepted, modified, or rejected.

14. If mediation is not successful, the mediator will notify the Vice Provost for Graduate Studies, the committee chair, and the parties that mediation has terminated. If mediation is not successful, or if it is waived by either party, the grievance sub-committee will schedule a hearing no later than thirty (30) calendar days from the written submission of the complaint. The thirty (30)-day period may be extended for good cause as determined by the chair of the committee. The thirty (30)-day period shall be suspended during the mediation process. The hearing will be closed unless all parties agree that it shall be public.

15. All parties may represent themselves or be represented by an advisor or counsel of their choice.

16. Each party has the right to introduce all relevant testimony and documents if the documents have been provided with the complaint or response.

17. Each party shall be entitled to question the other party’s witnesses. The committee may question all witnesses.

18. Witnesses other than parties shall leave the hearing room when they are not testifying.

19. The chair of the committee shall have the right to place reasonable time limits on each party’s presentation.

20. The chair of the committee shall have the authority and responsibility to keep order, rule on questions of evidence and relevance, and shall possess other reasonable powers necessary for a fair and orderly hearing.
21. The hearing shall not be governed by the rules of evidence, but the chair of the committee may exclude information that the chair deems irrelevant, unnecessary, or duplicative. Statements or admissions made as part of the mediation process are not admissible.

22. The committee will make an audiotape of the hearing but not of the deliberations of the committee. The audiotape will be available to the parties, their authorized representatives, the committee and the Vice Provost for Graduate Studies. If a party desires a copy of the audiotape or a transcript of the tape, that party will pay for the cost of such copy or transcript. In the event of an appeal, the audiotape will be provided to the appellate body as part of the record of the case.

23. After the presentation of evidence and arguments, the committee will excuse the parties and deliberate. The committee’s decision will be a written recommendation to the Vice Provost for Graduate Studies. The committee shall base its recommendations solely upon the information presented at the hearing.

24. The committee will send its written recommendation to the Vice Provost and the parties as soon possible and no later than fourteen (14) calendar days after the end of the hearing.

25. Within fourteen (14) calendar days of receiving the committee recommendation, the Vice Provost for Graduate Studies will notify the parties of the acceptance, modification, or rejection of the recommendation. The Vice Provost will advise the parties of the procedure available to appeal the decision.

View the current policy on Grievance Procedure for Graduate Studies (http://policy.ku.edu/graduate-studies/grievance/).

**Student Responsibilities**

All graduate students are responsible for informing themselves of Graduate Studies’ requirements and policies. Students should visit the Graduate Studies website (http://www.graduate.ku.edu/) for the most up-to-date requirements and policies. Graduate students are also expected to be familiar with the regulations and requirements of their Graduate Divisions and of their home academic departments and programs. Members of the Graduate Faculty and staff members in the Graduate Divisions are expected to be ready to answer questions and offer counsel.

It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.
Office of Graduate Studies, Medical Center Campus Students

The Office of Graduate Studies (a unit of the Office of Academic and Student Affairs [http://www.kumc.edu/academic-affairs.html]) on the KU Medical Center campus [http://www.kumc.edu/] is the administrative unit responsible for graduate education on that campus. A variety of graduate programs are offered through the Medical Center’s Schools of Health Professions (p. 595), Medicine (p. 2163), and Nursing (p. 2385).

Graduate degrees on the Medical Center campus are conferred by the Schools of Health Professions, Medicine, and Nursing. Appointments to the Graduate Faculty are recommended by the individual academic units offering graduate programs. The appointment process is administered by the Graduate Studies office with approval for graduate appointments granted by the Dean of Graduate Studies.

Goals of Graduate Study
Independent scholarship, competence in research or other creative work, and the cultivation of teaching commitment and skill are the traditional goals of graduate study. Having acquired a broad education as an undergraduate, the student is expected to master a special field, to learn the methods of investigation employed therein, and to proceed toward making an original contribution to knowledge. Since many of those who earn advanced degrees find careers in higher education, the acquisition of skill in teaching and in directing research is also an essential part of graduate education.

These traditional goals gain renewed significance in changing times, while newly emerging societal interests and needs and new demands of the marketplace both underscore their importance and emphasize the necessity for flexibility in programs and accommodation in career objectives.

Research
Research is an integral part of the university’s educational mission. The National Science Foundation classifies KU as a major university receiving substantial research support. KU is also a Carnegie Doctoral/Research Extensive University and has been a member of the Association of American Universities since 1909. The university has a long and successful record of research collaboration through independent, multidisciplinary research centers that focus on common themes. For more information about research on the Medical Center campus, visit the University of Kansas Medical Center Research Institute [http://www.kumc.edu/kumcri.html] website page.

This catalog is not itself a source of policy and does not create a contract between the University of Kansas and its students. University policy is the binding agent in the event an inconsistency is noted between the catalog and official University policy. Whenever possible the catalog provides information from the latest policies at the time of publication.

• Admission Procedure (p. 2575)
• Application Fees (p. 2575)
• Background Check (p. 2575)
• Degree Seeking Admission (p. 2573)
• Graduate Certificate Admission (p. 2574)
• Minimum English Proficiency Requirement (p. 2574)
• Non-degree Seeking Admission (p. 2574)
• Reactivation (p. 2575)

Admission to Graduate Studies
Persons whose records indicate their ability to succeed with advanced work may be admitted for graduate study. Applicants may apply as degree seeking, non-degree seeking, or to a Graduate Certificate program. Applicants seeking an identifiable degree program are degree seeking, while those applicants who do not have an identified degree program should be admitted under the non-degree seeking category. No student may work toward a graduate degree without being accepted as a degree seeking student in a specific graduate program.

Degree Seeking Admission
Students who wish to work toward a specific graduate degree should be considered for admission under the degree seeking category.

Regular Admission
Regular admission status requires a bachelor’s degree and a cumulative grade-point average (GPA) of at least a 3.0 on a 4.0 scale, from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. The bachelor’s degree is not acceptable if it contains credit awarded for work experience that was not directly supervised by faculty members (life experience) of an accredited university or not evaluated in units that identify the academic content (e.g., P/F, S/U). Applicants who are not native speakers of English must demonstrate they meet the Minimum English Proficiency Requirements as described below.

Applicants must meet these minimum admission requirements to qualify for regular admission. Individual academic programs may have additional admission requirements that the applicant must also meet to be eligible for regular admission status to that program.

In exceptional cases, persons not holding bachelor’s degrees may be admitted if they are academically well prepared. In these cases, the Dean of Graduate Studies reviews the student’s academic background and a letter of petition from the program director and determines if the student will be admitted for graduate study.

Regular Admission, Special B
The Special B Admission category is available only to degree seeking graduate students applying to the Interdisciplinary Graduate Program in Biomedical Sciences (p. 2258) (IGPBS)
offered by the School of Medicine. A student meeting the minimum admissions requirements described under Regular Admission and the academic standards of the basic science departments is admitted to graduate study in IGPBS.

After completion of the IGPBS program, the student seeks entrance directly into a specific graduate discipline in one of the basic science departments. When the department accepts an IGPBS student, the department submits a Progress to Degree form to formally change the individual student’s academic program from IGPBS to the specific basic science doctoral program.

Non-degree Seeking Admission

A non-degree seeking applicant applies to the university for admission as a non-degree seeking student and may be processed by a specific department or program. Admission requires a bachelor’s degree from KU or from another regionally accredited institution or foreign university with substantially equivalent bachelor’s degree requirements. Applicants who are not native speakers of English must demonstrate they meet the Minimum English Proficiency Requirements as described below. The applicant is not required to meet the other admission standards of regular admission.

Non-degree seeking admission is not intended to bypass regular admission into a graduate degree program. However, if a non-degree seeking student later applies for admission as a regular degree seeking student, and is accepted by an academic program, the total transfer credits toward a graduate degree may not exceed six hours, or eight hours if the student holds a baccalaureate degree from KU (this total includes credit from other accredited graduate programs as well as non-degree credit earned at KU).

Graduate Certificate Admission

An application is required to pursue a graduate certificate. A graduate certificate program must adhere to the same minimum admission standards required for degree seeking admission as described in the section above.

No student may work toward a graduate certificate without being accepted in a specific graduate certificate program. Graduate certificates are not granted retroactively. Graduate credit from another institution may not be transferred to a KU graduate certificate program. The certificate program is not intended to serve as a default system for students in a degree program who find that they are not able to complete the degree for academic or other reasons. Should a student drop out of a degree program and seek admission to a certificate program, all certificate admission requirements must be followed for admission and conferral of the certificate.

Applicants apply directly to a graduate certificate program for admission unless the applicant is a current graduate degree seeking student. To admit a current degree seeking graduate student to a certificate program, the student must be in good standing (3.0 or higher grade-point average) with their degree program. If pursuing a graduate certificate offered by another department, the student must inform the graduate director, advisor, or coordinator in the home degree program of intent to seek the certificate. If approved by the home department, the student must then make application directly to the graduate certificate program.

The graduate certificate program is not a means of entry into a graduate degree program. If students admitted to a graduate certificate program are later admitted to a graduate degree program as degree seeking, applicable courses taken for the graduate certificate program may, upon recommendation of the program to the Office of Graduate Studies and within general guidelines, be approved by the Dean of Graduate Studies to be counted toward the degree.

While the courses comprising a graduate certificate may be used as evidence in support of a student’s application for admission to a graduate degree program, the certificate itself is not considered to be a prerequisite and does not guarantee admission into any graduate degree program.

Minimum English Proficiency Requirement for Admission to a Graduate Program

Academic programs must verify that all applicants, whether domestic or international, who are not native speakers of English, meet the minimum English proficiency requirement to be admitted for graduate study as degree seeking, non-degree seeking, or certificate program students. Verification may come in any one of the following forms:

- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) earned in residence from an accredited U.S. institution of higher education.

- Official transcript showing the applicant graduated with a baccalaureate degree (or higher) from an institution whose medium of instruction is English. This does not apply to degrees earned online. The verification may be from a catalog or program description brochure or an official letter from a department chair, dean, or other university official stipulating English as the language of instruction. Verification of English instruction from the institution must be included unless the degree is from one of the countries on the "TOEFL/IELTS Exemption List" posted on the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements.html) website. The program considering admission should also conduct a phone interview with the prospective student.

- Receipt of an official copy (not student's copy) of applicant's TOEFL or IELTS scores achieved not more than two years before the semester of admission. Below are the minimum scores required on the TOEFL or IELTS to satisfy the minimum English proficiency requirement for admission. Individual programs may opt for a more restrictive policy regarding English proficiency for the students they recommend to Graduate Studies for admission.

**TOEFL scores (paper)**
- 57 overall minimum
- 5.0 minimum on essay

**TOEFL scores (iBT)**
- 23 minimum Reading and Listening
- 19 minimum on Writing

**IELTS scores**
- The overall band score should be at least 6.5 with no component band score below 6

If a student does not meet the minimum requirement for admission, the academic program may petition the Dean of Graduate Studies for
an exception. The petition will include a justification for admitting the specific student, including a description of the interview process, and a plan for the student to achieve academic success. The petition should also describe the metrics that the program proposes for evaluating the academic success of the student and the timeline that will be followed for the plan.

**Additional Spoken English Proficiency Requirements for Graduate Teaching Assistant, Medical Center Campus**

The Kansas Board of Regents (http://www.kansasregents.org/) requires that in order to be appointed as a Graduate Teaching Assistant (GTA), students must first attain a minimum score of 50 on the TSE or SPEAK tests, a minimum iBT speaking score of 24, or a minimum IELTS speaking score of 8. The SPEAK test is administered free of charge by appointment in the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements/speak-test-faq.html). SPEAK scores from other institutions will not be accepted.

**Admission Procedure — Medical Center Campus**

The Office of Admissions (http://www.kumc.edu/student-services/office-of-admissions.html) facilitates the application process for all graduate programs through the KUMC online application (https://www.applyweb.com/apply/kumc/). To ensure adequate time for review, the applicant should check with each individual degree program for its application deadline date.

Graduate Studies requires official transcripts from the baccalaureate granting institution that show a bachelor's degree was conferred, plus any transcripts from institutions attended post-baccalaureate. International applicants must provide English proficiency test scores as described in the Minimum English Proficiency Requirement above. Programs may request transcripts for all college courses taken and other application materials. Applicants should check with the program to which they are applying for information on required, program-specific application materials.

**Background Check**

A background check is required during the admission process; it may affect the student's eligibility to enter the program. In the case of students involved in direct patient contact, additional checks maintained by various health care disciplines may be required. Prospective students should check with their individual academic programs regarding these requirements.

All domestic students, as well as any international students who have been in the United States for more than 30 days prior to admission*, must submit to at least a standard background check through Validity Screening Solutions. In the case of students involved in direct patient contact, additional checks of Employment Disqualified Listings maintained by various health care disciplines may be required by specific programs. Prospective students should check with their individual department or program to determine the process and appropriate institutional or program code number to be provided to Validity Screening Solutions for the transmittal of the background check results.

Background check results will be considered on a case-by-case basis, but in general, the following may be considered as disqualifying findings and therefore prevent admission or matriculation. Future licensing requirements can determine admission.

- Felony convictions
- Misdemeanor convictions or felony deferred adjudications involving crimes against persons (physical or sexual assault or abuse)
- Misdemeanor convictions related to moral turpitude (e.g., prostitution, public lewdness, etc.)
- Felony deferred adjudications for the sale, possession, distribution or transfer of narcotic drugs or other controlled substances
- Registered sex offender status
- Medicare, Medicaid or other healthcare fraud or misuse

Should you have any questions concerning this requirement for admission to Medical Center campus programs, please contact your specific program or department.

*International students admitted on valid visas and who have not resided in the United States for more than 30 days may be excused from this requirement due to the background checks conducted as part of their visa screening process.

**Application Fees**

Nonrefundable application fees payable to the University of Kansas are required. Rates are subject to change. Some departments and programs require deposits from admitted students to be fully credited against tuition upon enrollment.

- School of Health Professions degree or certificate seeking application: $75
- School of Health Professions non-degree seeking application: $60
- School of Medicine degree or certificate seeking application: $60
- School of Medicine non-degree seeking application: $60
- School of Nursing degree or certificate seeking application: $75
- School of Nursing non-degree seeking application: $75

**Admission Notification**

Each applicant is notified of the admission decision by email. The admission decision letter from the Dean of Graduate Studies includes the admission classification (degree-seeking, Special B, non-degree seeking or certificate-seeking). For all admission categories, enrollment in specific courses may be subject to fulfillment of program course prerequisites and/ or consent of the instructor.

After an applicant has been admitted, a program may defer an applicant's admission for one year after which time the applicant must submit a new application.

Admission to graduate studies does not imply admission to candidacy for a higher degree. Requirements for an advanced degree must be regarded as minimum requirements. Additional requirements depend on the student’s undergraduate preparation and the particular field of graduate work chosen.

**Reactivation**

Students who are not continuously enrolled should check with their academic program to see if they will be required to re-apply for admission or if they may be reactivated without re-applying. If permission is granted.
by the program to reactivate, the student completes the Reactivation Form (http://www.kumc.edu/reactivationform/) posted on the Registrar’s website. Individual programs make the determination about when a student is required to re-apply. However, after an absence of 5 years, Graduate Studies requires the student to re-apply for admission to their graduate program.

Limitations on Admission

Because of limitations of space, faculty, or general resources for research and instruction, some programs must restrict the number of applicants they admit. Questions should be directed to the program to which the prospective student wishes to apply.

- Awarding of Degrees (p. 2576)
- Combined Degrees (p. 2585)
- Dissertation Committee for Ph.D. (p. 2582)
- Dissertation Submission and Publication for Ph.D. (p. 2583)
- Doctoral Degree Programs (p. 2578)
- Doctoral Degree Requirements Clinical Doctorate (p. 2579)
- Doctoral Degree Requirements Ph.D. (p. 2579)
- Final Oral Exam (dissertation defense for Ph.D.) (p. 2582)
- Interdisciplinary Studies (p. 2584)
- Master's Degree Programs (p. 2576)
- Master's Degree Requirements (p. 2576)
- Master's General Examination, Thesis Defense or Project Defense (p. 2577)
- Oral Comprehensive Exam for Ph.D. (p. 2581)
- Post-Comprehensive Enrollment for Ph.D. (p. 2582)
- Research Skills and Responsible Scholarship for doctoral students (p. 2579)
- Thesis Submission and Publication for master's students (p. 2577)

Awarding of Degrees

Degrees are awarded three times each year, in August, December, and May. Degrees are conferred formally at the annual commencement held in May each year. Degree candidates are not eligible to graduate if the graduate cumulative grade-point average is lower than 3.0 in all courses taken for graduate credit.

Students who are working toward two degrees must complete requirements for each degree. Course work may not count toward fulfilling degree requirements for more than one degree.

Graduate students may not earn an additional KU degree with the same name and degree code as a previously awarded degree from KU. This applies to the completion of different degree tracks, concentrations, and subspecialties within a given degree. This does not prohibit students from earning additional master’s or doctoral degrees in another discipline.

Master's Degree Programs

Master of Arts (M.A.) and Master of Science (M.S.)

Historically, most of the master’s degrees granted have been the Master of Arts (M.A.) and Master of Science (M.S.). This fact conforms with the traditional liberal arts background out of which most U.S. graduate schools developed. The degree requirements for the M.A. and M.S. are generally concentrated in one area or major discipline. The KU Medical Center campus, with oversight from the Office of Graduate Studies, offers Master of Science degrees in several disciplines through the Schools of Health Professions (p. 595), Medicine (p. 2163), and Nursing (p. 2385).

Professional Master’s Degrees

In more recent years, professional master’s degree programs have been developed for entry level or advancement in specific professions. On the Medical Center campus, this includes health services administration (M.H.S.A. (http://catalog.ku.edu/medicine/health-policy-management/mhsa/)), occupational therapy (M.O.T. (p. 721)), and public health (M.P.H.). (p. 2250)

Master's Degree Requirements

This section gives the general and common requirements for all master's degree programs. The program sections of the online catalog give specific requirements for the degrees they offer.

Master’s Program Time Constraints

Normal expectations are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study. However, master’s degree students are allowed 7 years for completion of all degree requirements. In cases in which compelling reasons or circumstances recommend a 1-year extension, the Office of Graduate Studies, on recommendation of the academic program, has authority to grant the extension. In cases where more than 8 years are requested, the Office of Graduate Studies considers petitions for further extensions. These may be granted provided evidence of continuous progress, currency of knowledge, and other reasons are compelling. Some academic programs may have more stringent rulings about time restrictions. Students should ask about the policy in effect in the academic program in which they plan to study.

Master's Enrollment Requirement

All graduate students enrolled in master’s graduate programs must be enrolled the semester they complete master’s degree requirements. Master’s students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) for deadlines for specific semesters.

M.A. and M.S. Specific Degree Requirements

A Master of Arts (M.A.) or a Master of Science (M.S.) degree requires at least 1 year of graduate work or its equivalent. Stated in terms of hours of credit, the standard master’s program requires 30 hours. With permission of the academic program (or in the case of interdepartmental programs, permission of the joint program committee) and of the Office of Graduate Studies, it is sometimes possible to complete a 30-hour master’s degree as for 24
Studies approves the request to proceed. If the criteria has been met, Graduate Degree form requesting the scheduling of the general exam, thesis preceding paragraphs has been met upon receiving a Progress to examination or defense. The Progress to Degree request must be ascertain that the student is in good academic standing (3.0 or via the Progress to Degree system. The degree program should scheduling of the final general exam, thesis, or project defense program requests the Office of Graduate Studies approve the When a M.A. or M.S. student is in their final semester, the degree thesis the semester the student defends the thesis.

The examination is held during the semester of the student's final enrollment in course work. The thesis defense should be held when the thesis has been substantially completed and is held normally during the student's final semester of enrollment. If defending a thesis, the student must be enrolled in a minimum of one hour of master thesis the semester the thesis is defended.

The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate's department/program of study. The examination is held during the semester of the student's final enrollment in course work. The thesis defense should be held when the thesis has been substantially completed and is held normally during the student's final semester of enrollment. If defending a thesis, the student must be enrolled in a minimum of one hour of thesis the semester the student defends the thesis.

When a M.A. or M.S. student is in their final semester, the degree program requests the Office of Graduate Studies approve the scheduling of the final general exam, thesis, or project defense via the Progress to Degree system. The degree program should ascertain that the student is in good academic standing (3.0 or higher cumulative grade-point average) before scheduling the examination or defense. The Progress to Degree request must be submitted at least two weeks prior to the examination date. The Office of Graduate Studies verifies that criteria described in the preceding paragraphs has been met upon receiving a Progress to Degree form requesting the scheduling of the general exam, thesis defense, or project defense. If the criteria has been met, Graduate Studies approves the request to proceed.

For every scheduled examination, thesis defense or project defense, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program's discretion. If the aspirant receives a result of Unsatisfactory, it may be repeated upon the recommendation from the program/department.

Ideally, all members of the committee are physically present for the final general exam, thesis defense, or project defense. A majority of committee members must be physically present for the examination or defense to commence; for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined and the chair of the committee be physically present at the examination or defense. Mediated attendance by the student or chair is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair. In cases where the student prefers an examination in which all committee members are physically present, the student's preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

M.A. and M.S. Final General Examination, Thesis Defense or Project Defense

Completion of a final general examination, defense of a thesis, or defense of a project in the major subject, is the culminating academic phase of the M.A. and M.S. degree programs and is required of all candidates for these two degrees. At the option of the academic program, the final general examination may be oral or written, or partly oral and partly written. In some departments, passing a written examination is a necessary preliminary to taking the oral examination by which success or failure is judged. For students defending a master's thesis, the student must be enrolled in a minimum of one hour of master thesis the semester the thesis is defended.

The committee for the administration of the general exam or the defense of a thesis or project, must consist of at least 3 members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2586) section of this catalog. The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate's department/program of study.

The examination is held during the semester of the student’s final enrollment in course work. The thesis defense should be held when the thesis has been substantially completed and is held normally during the student's final semester of enrollment. If defending a thesis, the student must be enrolled in a minimum of one hour of thesis the semester the student defends the thesis.

When a M.A. or M.S. student is in their final semester, the degree program requests the Office of Graduate Studies approve the scheduling of the final general exam, thesis, or project defense via the Progress to Degree system. The degree program should ascertain that the student is in good academic standing (3.0 or higher cumulative grade-point average) before scheduling the examination or defense. The Progress to Degree request must be submitted at least two weeks prior to the examination date. The Office of Graduate Studies verifies that criteria described in the preceding paragraphs has been met upon receiving a Progress to Degree form requesting the scheduling of the general exam, thesis defense, or project defense. If the criteria has been met, Graduate Studies approves the request to proceed.

For every scheduled examination, thesis defense or project defense, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program's discretion. If the aspirant receives a result of Unsatisfactory, it may be repeated upon the recommendation from the program/department.

Ideally, all members of the committee are physically present for the final general exam, thesis defense, or project defense. A majority of committee members must be physically present for the examination or defense to commence; for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined and the chair of the committee be physically present at the examination or defense. Mediated attendance by the student or chair is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair. In cases where the student prefers an examination in which all committee members are physically present, the student's preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

M.A. and M.S. Thesis Submission

When the thesis defense has been passed and the thesis title page has been signed by the members of the committee, the title page with original signatures is delivered to the Office of Graduate Studies. When all requested changes have been made to thesis, the student arranges for the thesis committee chair to review the changes and then sign and date the acceptance page. The acceptance page with original signature is also delivered to the Office of Graduate Studies as verification the thesis is approved for publishing.

The student is then required to arrange publication of the thesis through ProQuest (https://www.proquest.com/products-services/dissertations/) and payment of all associated fees (including copyright fee if applicable), through the electronic submission process (http://www.graduated.ku.edu/electronic-thesis-and-dissertation/) detailed on the Graduate Studies website. Formatting requirements and instructions for the proper format of the thesis are included on the website. The student must be the author of the
thesis, and every publication from it must indicate that authorship. Practices vary among disciplines, and even among scholars in a given field, as to whether the mentor’s name may appear as a co-author and whether as senior or junior, on subsequent publication of the thesis (usually revised), or on articles prepared from it. Clear understandings in individual cases are expected to be established during the apprenticeship period, when the ethical practices in publication are addressed within the program’s professional development training.

A form regarding publication permissions and embargo preferences is one of the required documents that is submitted to the Office of Graduate Studies following successful defense of the thesis. Theses will be made available through ProQuest (http://www.proquest.com/products-services/dissertations/) and KU ScholarWorks (https://kuscholarworks.ku.edu/) unless there is an embargo in place or special circumstances pertain as outlined in the Embargo of Theses and Dissertations (https://catalog.ku.edu/graduate-studies/kumc/#regulationtext) policy in the Regulations section of this catalog.

Doctoral Degree Programs

KU Medical Center campus with oversight from the Office of Graduate Studies offers the Doctor of Philosophy (Ph.D.) in several specific disciplines and offers seven clinical doctorate degree programs. General descriptions for each of the doctoral degrees offered are given here in succinct form to provide convenient comparison of the degrees. Detailed information about requirements for each degree as it is offered in specific disciplines should be obtained from the appropriate academic program pages in this catalog. Note: The School of Medicine also offers the Doctor of Medicine (p. 2271) (M.D.) (p. 2271) degree which is administered by the School of Medicine.

Doctor of Philosophy (Ph.D)

The degree of Doctor of Philosophy (Ph.D.) is the highest degree offered by the university. It is awarded for mastering a field of scholarship, for learning the methods of investigation appropriate to that field, and for completing a substantial piece of original research. In addition to preparing research specialists, the process of earning a Ph.D. shares certain goals with liberal education: putting order into human experience; fostering a love of learning for its own sake; instilling respect for human values; integrating various human powers into a process of creation; and making vital, in many fields at least, a sense of history.

Although the courses and research leading to the Ph.D. are necessarily specialized, the attainment of this degree should not be an isolated event in the enterprise of learning. The Ph.D. aspirant is expected to be a well-educated person with a broad base of general knowledge, not only as preparation for more advanced work but also as a means of knowing how the chosen specialty is related to other fields of human thought.

To give depth and breadth to their doctoral programs, many departments require some work in a minor field or at least an articulated selection of courses. Because of the diversity of the fields in which the Ph.D. is offered, and the variety of needs and interests of individual students, the degree does not have a specific requirement for a minor. However, the Ph.D. aspirant is encouraged to plan an integrated program, under departmental direction, that includes courses outside the major field.

Doctor of Philosophy (Ph.D.) is offered by programs in specific disciplines by the Schools of Health Professions (p. 595), Medicine (p. 2163), and Nursing (p. 2385). Admission and degree requirements are listed under the individual programs in each school of this online catalog.

Clinical Doctorates:

Clinical Doctorate in Speech-Language Pathology (S.L.P.D.)

The Clinical Doctorate in Speech-Language Pathology (S.L.P.D.) program is intended for individuals who have completed a Master of Speech-Language Pathology degree and have entered clinical practice. The program prepares the student at the doctoral level to meet the demands of complex clinical practice. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed under Communicative Disorders: Intercampus Program (p. 636) of this online catalog.

Doctor of Audiology (Au.D.)

The Doctor of Audiology (Au.D.) program prepares the student to enter clinical practice as an audiologist. The program produces professionals skilled in providing diagnostic, rehabilitative, and related services in the fields of sound, balance, and hearing sciences. There is an emphasis on the clinical learning experience, although research is also a significant component of the program. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctorate in Clinical Laboratory Sciences (p. 663) section of this online catalog.

Doctor of Nurse Anesthesia Practice (D.N.A.P.)

The Doctor of Nurse Anesthesia Practice (D.N.A.P.) degree program prepares the registered nurse to become a nurse anesthesia practitioner with the capability to deliver competent nurse anesthesia services, engage in research, and assume leadership roles in the profession. Students receive extensive education in both the academic and clinical components of nurse anesthesia. Students learn to administer anesthesia to all patient populations in a variety of clinical settings using all current anesthesia techniques. Graduates are prepared to take the national certification examination required to become Certified Registered Nurse Anesthetists. This degree program is offered by the KU School of Health Professions. Admission
and degree requirements are listed in the Doctor of Nurse Anesthesia Practice (p. 709) section of this online catalog.

**Doctor of Nursing Practice (D.N.P.)**
The Doctor of Nursing Practice (D.N.P.) prepares advanced practice nurses at the highest level of nursing practice. The D.N.P. offers sophisticated, cutting-edge experiences that help nurses actively engage in a complex, dynamic, and demanding health care field. Skills in collaboration, innovation, and evaluation, complemented by advanced practice skills, prepare nurses to share the future of health care. Students preparing for advanced practice roles learn to provide patient-centered care that is evidence-based, and contribute to the development of the highest level of evidence-based practice. Students preparing for indirect care roles learn to provide the highest level of leadership in a variety of care and educational settings. This degree program is offered by the KU School of Nursing. Admission and degree requirements are listed in the Doctor of Nursing Practice (p. 2415) section of this online catalog.

**Doctor of Occupational Therapy (O.T.D.)**
The Doctor of Occupational Therapy (O.T.D.) program of study is intended for occupational therapists who have either a bachelor's degree or a Master of Occupational Therapy degree and wish to upgrade their knowledge and skills to the doctoral level to meet the increasing demands of complex practice issues. There are two tracks of the O.T.D., which are entry-level and post-professional. This degree program is offered by the KU School of Health Professions. Admission and degree requirements for the two tracks are listed in the Occupational Therapy (p. 713) section of this online catalog.

**Doctor of Physical Therapy (D.P.T.)**
The Doctor of Physical Therapy (D.P.T.) degree program is designed for individuals pursuing careers in physical therapy. The program prepares a physical therapy practitioner with the skills for lifelong professional development. This degree program is offered by the KU School of Health Professions. Admission and degree requirements are listed in the Doctor of Physical Therapy (p. 739) section of this online catalog.

**Clinical Doctorate Degree Requirements**
The following sections list the general and common requirements for doctoral degrees. Specific degree requirements, including requirements for the clinical doctoral degrees, set by specific departments, programs, and schools appear in the sections of the catalog devoted to those units.

**Maximum Tenure for Doctoral Programs**
After being admitted to doctoral programs at KU, students complete all degree requirements in 8 years. The Office of Graduate Studies has authority to grant a 1-year extension based on a program's written recommendation, which should include compelling circumstances for the extension. Students who complete the master's degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master's degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master's and doctorate in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy in effect in the department in which they plan to study.

**Doctoral Enrollment Requirement**
All graduate students enrolled in doctoral graduate programs must be enrolled the semester they complete doctoral degree requirements. Doctoral students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) for deadlines for specific semesters.

**Research Skills and Responsible Scholarship**
All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.
2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

**Procedure**
All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Office of Graduate Studies. Students meet this requirement as determined by the approved plan for their program. It is the responsibility of the program to report when the student completed the requirement and how the requirement was met.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

It is the purview of the department or program to determine the necessary topics in training doctoral students in the areas of responsible scholarship. Such topics may include:

- Protection of human subjects
- Welfare of laboratory animals
- Conflicts of interest
- Data management
- Mentor/student responsibilities
- Collaborative research
- Authorship, publication, plagiarism, copyright
- Peer review
- Professional practices
- Maintenance of confidentiality
- Appropriate research conduct and research misconduct
It is also the purview of the department or program to determine the research skills necessary to perform doctoral level research. Research skills may include:

- Knowledge of language(s) significant to the field
- Research methodology
- Methods of qualitative and quantitative data analysis
- Computer programming necessary for the field
- Laboratory skills and techniques necessary for the discipline

Note: These lists serve as guides; additional appropriate topics may exist.

Doctor of Philosophy (Ph.D.) Degree Requirements

This section lists KU regulations common to the administration of all doctoral Ph.D. programs. The particular application, interpretation, or method of implementation of such a common element for individual degree programs and departments is, in certain cases, left to the faculty of the department or the degree program (e.g., Research Skills and Responsible Scholarship requirement). Additional requirements specific to each degree, along with variations permitting each student to achieve particular academic goals, are listed in the section of this catalog for the school through which the degree program is offered.

1. Admission

Upon admission to a Ph.D. program, the student is known as an aspirant for the degree and remains so designated until successful completion of the comprehensive oral examination. After passing that examination, the student is designated a candidate for the degree until successful defense and submission of the finished dissertation.

2. Program Time Constraints

Minimum Tenure

The student must spend 3 full academic years, or the bona fide equivalent thereof, in resident study at this or some other approved university, including the time spent in attaining the master’s degree. Resident study at less than full time requires a correspondingly longer period, but the requirement is not measured merely in hours of enrollment. Because a minimum number of hours for the degree is not prescribed, no transfer of credit is appropriate. However, graduate degree programs take relevant prior graduate work into consideration in setting up programs of study leading to the doctorate.

Residence Requirement

Two semesters, which may include one summer session, must be spent in resident study at KU. For the two specific semesters counted towards meeting this requirement, the student must be involved full time in academic or professional pursuits, such as a GTA or GRA appointment for teaching or research if it is directed specifically toward degree objectives. Enrollment in approved distance-learning courses offered through KU cannot be used to meet the doctoral residence requirement.

Full-time enrollment for a graduate student is 9 hours for fall or spring semesters and 6 hours for the summer semester. For semesters in which a student holds a GTA or GRA appointment, full-time enrollment is 6 hours for fall or spring semesters and 3 hours for the summer semester. The residence requirement must be met prior to the semester the Comprehensive Oral Examination is scheduled. It is the responsibility of the academic program to report the two semesters that will satisfy the residency requirement via the Progress to Degree form requesting approval to schedule the Comprehensive Oral Examination.

Note: Those noted above are minimum residence requirements. Please check with the individual program for any additional requirements.

Maximum Tenure

After being admitted to doctoral programs at KU, students must complete all degree requirements in 8 years. In cases in which compelling circumstances recommend a 1-year extension, Graduate Studies has authority to grant the extension on the written advice of the department and dissertation committee. Students who complete the master’s degree at KU and subsequently begin doctoral studies have a maximum total enrolled time of 10 years to complete both degrees. Normal expectations, however, are that most master’s degrees (excluding some professional terminal degrees) should be completed in 2 years of full-time study, and both master’s and doctorate in 6 years of full-time study. Some graduate degree programs may have more stringent time restrictions. Students should inquire about the policy that is in effect in the department in which they plan to study.

A student in any of the above categories may petition the Dean of Graduate Studies through the program for a leave of absence during either the pre- or post-comprehensive period to pursue full-time professional activities related to the doctoral program and long-range professional goals. Leaves of absence also may be granted because of illness or other emergency. Ordinarily a leave of absence is granted for 1 year, with the possibility of extension upon request. After an absence of 5 years, however, a doctoral aspirant or candidate loses status as such and must apply for readmission to the program.

3. Research Skills and Responsible Scholarship

All doctoral students must meet this requirement before proceeding to comprehensive exams. The requirement must include at least 2 components:

1. Every doctoral student is required to have training in responsible scholarship pertinent to the field of research.

2. Every doctoral student is required to obtain research skills pertinent to the doctoral level of research in their field(s).

Procedure

All doctoral programs must have a research skills and responsible scholarship requirement plan approved by the Graduate Studies Office. Students meet this requirement as determined by the approved plan for their program. The
approved plan for meeting this requirement is included in the Degree Requirements section of this catalog for each Ph.D. program offered. It is the responsibility of the program to report when the student completed the requirement and how the requirement was met via the Progress to Degree form requesting approval to schedule the Comprehensive Oral Examination.

No course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement.

It is the purview of the department or program to determine the necessary topics in training doctoral students in the areas of responsible scholarship. Such topics may include:

- Protection of human subjects
- Welfare of laboratory animals
- Conflicts of interest
- Data management
- Mentor/student responsibilities
- Collaborative research
- Authorship, publication, plagiarism, copyright
- Peer review
- Professional practices
- Maintenance of confidentiality
- Appropriate research conduct and research misconduct

It is also the purview of the department or program to determine the research skills necessary to perform doctoral level research. Research skills may include:

- Knowledge of language(s) significant to the field
- Research methodology
- Methods of qualitative and quantitative data analysis
- Computer programming necessary for the field
- Laboratory skills and techniques necessary for the discipline

Note: These lists serve only as guides; additional appropriate topics may exist.

4. Comprehensive Oral Examination

The comprehensive oral examination covers the major field and any extra departmental work for which the program wishes to hold the aspirant responsible. When a doctoral aspirant has completed the major portion of the course work at a level satisfactory to the graduate degree program and met all other program and general requirements prerequisite to the comprehensive oral examination, including the residence requirement and the research skills and responsible research requirement as appropriately applied and established for the student's particular program, the degree program requests the Office of Graduate Studies approve the scheduling of the comprehensive oral examination via the Progress to Degree system. The degree program should ascertain that the student is in good academic standing (3.0 or higher grade-point average) before scheduling the examination. The examination may be scheduled provided that at least 5 months have elapsed from the time of the aspirant's first enrollment at KU and at least 90 days have elapsed since any unsuccessful attempt. The examination request must be submitted at least two weeks prior to the examination date.

The committee for the comprehensive oral examination must consist of at least five members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2586) section of this catalog. The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate's department/program of study. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status. At least one member of the committee must be from a department other than the aspirant's major department. This outside committee member represents the Office of Graduate Studies and must hold either regular or dissertation graduate faculty status in a department outside the major department to be eligible to serve in this capacity.

Before the examination, Graduate Studies provides the outside committee member a list of responsibilities as the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee, has full right to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination to the Office of Graduate Studies and its Dean.

The Office of Graduate Studies verifies that all criteria described in the preceding paragraphs has been met upon receiving a Progress to Degree form requesting the scheduling of the oral comprehensive exam. If the criteria has been met, Graduate Studies approves the request to proceed with the exam.

For every scheduled examination, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program's discretion. If the aspirant receives a result of Unsatisfactory on the comprehensive oral examination, it may be repeated on the recommendation of the program, but under no circumstances may it be taken more than 3 times. In any case, the examination may not be repeated until at least 90 days have elapsed since the last unsuccessful attempt.

Ideally, all members of the committee are physically present for the examination. A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations, the requirement is 3 of the 5 members.

In addition, it is required that the student being examined, the chair (or co-chairs) of the committee, and the outside committee member all be physically present at the examination or defense. Mediated attendance by the student or chair is prohibited. When a situation arises in which a committee member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair (or co-chairs).

In cases where the student prefers an examination in which all
committee members are physically present, the student's preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted as a petition to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

5. Candidacy

Dissertation Committee

Upon passing the comprehensive oral examination, the aspirant becomes a candidate for the doctorate. If it has not begun before, the traditional, close student-mentor apprenticeship relationship comes into being. The student is expected to learn by both precept and example of the mentor, and often in collaboration. The chosen field of scholarship is explored using acquired research tools. The principles and customs of academic inquiry and the codes of ethics traditional to the various disciplines and professional fields become part of the student’s thinking and working.

Post-Comprehensive Enrollment

Doctoral candidates are required, after passing the comprehensive oral examination, to be continuously enrolled in one or more hours that both moves the student towards degree completion and reflects, as accurately as possible, the candidate's demands on faculty time and university facilities. During this time, until all requirements for the degree are completed (including the filing of the dissertation) or until 18 post-comprehensive hours have been completed (whichever comes first), the candidate must enroll for a minimum of 6 hours a semester and 3 hours a summer session.

Post-comprehensive enrollment may include enrollment during the semester in which the comprehensive oral examination has been passed. If after 18 hours of post-comprehensive enrollment the degree is not completed, the candidate must continue to enroll each semester until all degree requirements have been met. The number of hours at this stage may be as little as one hour a semester. The number of hours of enrollment is determined by the candidate’s advisor and must reflect as accurately as possible the candidate’s demands on faculty time and university facilities.

6. Dissertation

The candidate must present a dissertation showing the planning, conduct, and results of original research and scholarly creativity. The purpose of the dissertation is to encourage and ensure the development of broad intellectual capabilities as well as to demonstrate an intensive focus on a problem or research area. The dissertation itself should be an evident product of the candidate’s growth and attainment of the ability to identify significant problems; organize, analyze, and communicate scholarly results; and bring to bear on a useful area of interest a variety of research skills and scholarly or creative processes. It must show some original accomplishment, but it should also demonstrate without doubt the candidate’s potential to make future contributions to knowledge and understanding.

The dissertation is to be a coherent scholarly work, not a collage of separate, distinct pieces. Its unity of theme and treatment may still accommodate several subtopics by demonstrating their relationships and interactions. If previously published material by other authors is included in the dissertation, it must be quoted and documented appropriately. It should be noted that prior publication does not guarantee acceptance of the dissertation by the dissertation committee. Final acceptance of the dissertation is subject to the approval of the dissertation committee. The dissertation—or one or more substantial portions of it, often rewritten—is expected to be publishable and indeed to be published (see the Dissertation Submission and Publication section).

Both the dissertation research and the dissertation itself are to be completed under the guidance and direction of the dissertation committee. Formatting requirements and instructions (http://graduate.ku.edu/etd-formatting-and-working-multimedia-files/) for the proper format of the dissertation are available on the Graduate Studies website. Candidates and faculty members are reminded that the dissertation is to be a coherent, logically organized scholarly document. Because the demands and practices of different disciplines are varied, the format is somewhat flexibly described, and moderate departures from the norm are allowed when justified by the nature of the work or the circumstances of presentation. Any substantial divergences must be approved in advance as prescribed by the instructions, and candidates and faculty members are urged to seek early approval to avoid last-minute disappointments over unacceptable format or reproduction.

7. Final Oral Examination (dissertation defense)

Completion of the dissertation is the culminating academic phase of a doctoral program. This phase is comprised of the final oral examination and defense of the dissertation. In all but the rarest cases, tentative approval of the dissertation is followed promptly by the final oral examination (dissertation defense). When the completed dissertation has been accepted by the committee in final draft form, and all other degree requirements have been satisfied as outlined in the program’s degree requirements section of this catalog, the candidate's program requests that Graduate Studies approve the scheduling of the final oral examination via the Progress to Degree form. This request must be made at least 3 weeks prior to the desired examination to allow sufficient time to publicize the examination so that interested members of the university community may attend.
At least 5 months must elapse between the successful completion of the comprehensive oral examination and the date of the final oral examination. Under normal circumstances, the doctoral candidacy period between passage of the oral comprehensive examination and the final dissertation defense must last no longer than 5 years. If a student took the oral comprehensive examination more than 5 years prior to the dissertation defense, a re-evaluation of the student’s candidacy status is necessary. Re-evaluation of the student’s candidacy status could include retaking the comprehensive oral examination.

The committee for the final oral examination must consist of at least five members, all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2586) section of this catalog. In most cases, the majority of committee members serving on a graduate student oral examination committee are in the candidate’s department/program of study. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status. At least one member of the committee must be from a department other than the aspirant’s major department. This outside committee member represents the Office of Graduate Studies and must hold either regular or dissertation graduate faculty status in a department outside the major department to be eligible to serve in this capacity. Before the examination, Graduate Studies provides the outside committee member a list of responsibilities as the Graduate Studies representative. The Graduate Studies representative is a voting member of the committee, has full right to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination to the Dean of Graduate Studies.

The dissertation defense should be held when the dissertation has been substantially completed and is held normally during the student’s final semester of enrollment. The student must be enrolled in a minimum of 1 hour of dissertation the semester the student defends the dissertation. Doctoral students who complete degree requirements during the first week of summer session or within the first 2 weeks of the fall or spring semester are not required to be enrolled for that term unless they were not enrolled during the previous semester. See the current Graduate Studies Calendar (http://www.kumc.edu/academic-affairs/graduate-studies/calendars.html) for deadlines for specific semesters.

The Office of Graduate Studies verifies that all criteria described in the preceding paragraphs has been met upon receiving a Progress to Degree form requesting the scheduling of the final oral examination. If the criteria has been met, Graduate Studies approves the request to proceed with the exam.

For every scheduled examination, the degree program reports on the Progress to Degree form an examination result of Honors, Satisfactory, or Unsatisfactory. Use of the Honors designation is at the program’s discretion. If an Unsatisfactory result is reported, the candidate may be allowed to repeat the examination on the recommendation of the program department.

Ideally, all members of the committee are physically present for the examination. A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations the requirement is 3 of the 5 members.

In addition, it is required that the student being examined, the chair (or co-chairs) of the committee, and the outside committee member all be physically present at the examination or defense. Mediated attendance by the student or chair (or co-chairs) is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair (or co-chairs). In cases where the student prefers an examination in which all committee members are physically present, the student’s preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the exam policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

8. Dissertation Submission and Publication

When the student passes the final oral examination and the dissertation title page has been signed by the members of the committee, the title page with original signatures is delivered to the Office of Graduate Studies. When all requested changes have been made to the dissertation, the student arranges for the dissertation committee chair (or co-chairs) to review changes, then sign and date the acceptance page, verifying the dissertation is approved for publishing. The acceptance page with original signature(s) is also delivered to the Office of Graduate Studies.

The student is then required to arrange publication with ProQuest (https://www.proquest.com/products-services/dissertations/) of the dissertation and payment of all associated fees (including copyright fee, if applicable), through the electronic submission process (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/) detailed on the Graduate Studies website. The student must be the author of the dissertation, and every publication from it naturally must indicate that authorship. However, practices vary among disciplines, and even among scholars in a given field, as to whether the mentor’s name may appear as a co-author and whether as senior or junior, on subsequent publication of the dissertation (usually revised), or on articles prepared from it. Clear understandings in individual cases are expected to be established during the apprenticeship phase, when the ethical practices in publication are addressed within the program’s professional development training.

A form regarding publication permissions and embargo preferences is one of the required documents that is submitted to the Office of Graduate Studies following successful defense of the dissertation.
Dissertations will be made available through ProQuest (http://www.proquest.com/products-services/dissertations/) and KU ScholarWorks (https://kuscholarworks.ku.edu/) unless there is an embargo in place or special circumstances pertain as outlined in the Embargo of Theses and Dissertations (https://catalog.ku.edu/graduate-studies/kumc/#regulationtext) policy in the Regulations section of this catalog.

Interdisciplinary Studies

M.A., M.S., and Ph.D. with a Major in Interdisciplinary Studies

Only superior students admitted and enrolled in a graduate program at KU whose proposed studies require direction not available in any single department are considered for admission to an Interdisciplinary Studies program. Before seeking acceptance, an applicant must assemble a graduate faculty advisory committee headed by a faculty member authorized to direct master’s research (for M.A. or M.S. in Interdisciplinary Studies), doctoral research and dissertations (for Ph.D. in Interdisciplinary Studies). The applicant, in conjunction with the committee, must prepare a proposal for the course of study. The proposal must provide a rationale for the particular mix of disciplines, demonstrating how each contributes to a central theme or focus. It must also show that the proposed program cannot be achieved through an established master’s or doctoral program at KU.

The student seeking to enter the Interdisciplinary Studies program must have an outstanding academic record (a grade-point average of 3.75 or higher on a 4.0 scale for graduate courses or a grade-point average of 3.5 or higher on a 4.0 scale for undergraduate courses if no graduate courses have been taken) and must be admitted to and enrolled in a graduate program at KU at the time of application. A graduate student who has failed to maintain the required grade-point average is not eligible for the Interdisciplinary Studies program. A student is not eligible for this program if he or she has tried and failed to achieve candidacy in a regular graduate department or program at KU.

The student is expected to assume the initiative in determining his or her potential eligibility through consultation with graduate advisors, and if deemed eligible, in forming an advisory committee and preparing documentation to support the application.

Preadmission Procedures

To enter the program, a student should

1. Determine that KU offers courses and research in the areas appropriate to the their interest(s).

2. Prepare a tentative study plan based on those offerings to serve as a basis for initial discussion.

3. Approach a professor whose interests are comparable to those of the student and request that he or she acts as advisor. Normally this professor is a faculty member of the program of principal interest to the student. To grant an M.A. or M.S. in Interdisciplinary Studies, it is essential that the school has the authority to grant master’s degrees. To grant a Ph.D. in Interdisciplinary Studies, it is essential that the school has the authority to grant doctoral degrees. The selected professor must be a full member of the graduate faculty and authorized to chair doctoral dissertation committees for Ph.D. in Interdisciplinary Studies.

4. After a professor agrees to serve as an advisor, the student should assemble an advisory committee of at least 3 additional professors representing the disciplines covered in the Interdisciplinary program. At least 2 disciplines or departments must be represented.

5. In conjunction with the advisor and the committee, the student prepares a proposal for study, including

   • A statement, with supporting documentation, that the proposed Interdisciplinary Studies program cannot be accomplished through established programs.

   • A statement of the interdisciplinary or transdisciplinary nature of the proposed area of study.

   • A definition of the field of study incorporating, including consistent descriptions of the contribution each discipline makes to the broader field.

   • An outline of the course of study, indicating substantive work in the fields represented. Readings courses and independent study do not substitute for regular courses.

   • A description of the method for satisfying research skills and responsible scholarship requirements.

   • A description of the comprehensive examination procedures for the Ph.D. (nature of the examinations and possible examining committee) or final examination for the M.A./M.S.

   • A description, to the extent possible, of the nature of the field in which a dissertation or master’s thesis might be written, indicating the respective contributions of the selected disciplines to the final product.

   • The following attachments:

      i. complete transcripts of all previous work.

      ii. a cover sheet, signed by committee members, indicating their support of the proposal.

      iii. letters of recommendation and other appropriate supporting documents.

Note: The diploma indicates the degree awarded as “M.A. in Interdisciplinary Studies,” “M.S. in Interdisciplinary Studies,” or “Ph.D. in Interdisciplinary Studies,” and does not specify the area of specialization. The transcript notes the area of specialization as determined by the admissions committee.

Admission and Review Procedure

Upon completion of the above, the student must submit the application for admission into the Interdisciplinary Studies program to the Dean of Graduate Studies. The Dean of Graduate Studies appoints an admission committee consisting of (a) the associate dean’s designate for the school most involved in the interdisciplinary undertaking (the school in which the major advisor resides), (b) 2 or more doctoral chairing faculty members from unrelated fields, including at least 1 member of the Graduate Council, and (c) the chair or the graduate director of the department in which the student resides at the time of application. The Dean of Graduate Studies serves as ex-officio chair of the Interdisciplinary
Studies admissions committee. The committee reviews the documents and may, if necessary, interview the student and the advisor for clarification and additional information or to discuss suggested revisions to the proposal.

**Approved Program Implementation**

Upon acceptance of the proposal and admission to the Interdisciplinary Studies program, the student is admitted to the school of the major advisor to facilitate record keeping and to provide a central administrative office. The associate dean or director of graduate studies of that school must enroll the student and monitor the program, and along with the major advisor, must make annual reports to Graduate Studies on the student’s progress. These reports are distributed to the directors of other involved programs along with a request to supply any additional information regarding the student’s performance. Proposals for major deviations from the approved course of study must be submitted for review by Graduate Studies and by the school in which the student resides. It is understood that no additional requirements unique to traditional graduate programs of the school(s) or departments may be imposed unless stated explicitly in the approved study plan.

Once approved, changes to the program plan must be approved by a Graduate Studies committee, appointed by the Dean of Graduate Studies. Significant curricular changes may require a new proposal and admissions process.

All basic rules and requirements for the Master of Arts, Master of Science, and Doctor of Philosophy degrees apply to Interdisciplinary Studies programs. These include program time constraints, residence requirement, post-comprehensive enrollment, final examinations, research skills and responsible scholarship requirements, thesis or dissertation submission and publication, grade-point average, etc. (See Master’s Degree Requirements and Doctoral Degree Requirements in this section of the online catalog.)

**Combined Degrees**

Combined degrees are granted in programs meeting the requirements of the graduate master’s or doctoral degree and the professional post-baccalaureate degree.

**Combined Medical and Master’s Degrees**

Graduate students in the basic medical science departments in the School of Medicine are primarily enrolled in graduate programs. Outstanding medical students, however, are allowed to participate in work leading jointly to the M.D. degree and a graduate degree. A student admitted to both academic programs may enroll concurrently in courses in the respective programs, provided the regular medical course load is reduced to compensate for the added graduate work. The student should discuss concurrent enrollment with the department chair or graduate advisor of the master’s degree program; departmental policies vary. All requirements for the degrees must be met, but within these limitations, superior students may be able to complete the joint degree program in less time than the total required for the 2 degrees to be earned separately. For the master’s degree, a student must complete graduate work equivalent to at least 1 academic year in addition to the time spent on the medical curriculum.

**Combined Medical and Doctoral Degrees**

Outstanding students who are accepted into the M.D.-Ph.D. Physician Scientist Training Program will work toward the completion of the M.D. and the Ph.D. degrees. All the requirements for the respective degrees must be met. The joint degree requirements and application information for the joint M.D.-Ph.D. Physician Scientist Training Program (https://catalog.ku.edu/medicine/combined-md-phd/) are described in that program’s section of this catalog.

**Policies and Processes for Graduate Certificate Programs**

The graduate certificate is a focused collection of courses that when completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines. Students may be awarded these certificates upon completion of a well-defined program of course work. The didactic material comprised within a graduate certificate program may represent a more practice-oriented subset of an existing graduate discipline.

The KU Medical Center campus with oversight from the Office of Graduate Studies offers graduate certificate programs in several disciplines through the Schools of Health Professions, Medicine, and Nursing. Specific information about the certificate programs offered can be found in the the Schools of Health Professions (p. 595), Medicine (p. 2163), and Nursing (p. 2385) sections of this catalog.

**Eligibility and Admission Criteria**

See Graduate Certificate Admission (p. 2573) section of this catalog for admission criteria on the Medical Center campus.

**Number of Credits**

A graduate certificate program will comprise no less than 9 and generally no more than 18 credit hours of course work in a particular discipline or related disciplines of study.

**Expiration of Program**

All proposals for graduate certificate programs will be adopted for a 7-year time period. The certificate program will expire at the end of that period. The program may request renewal of the certificate program by sending an updated program proposal, endorsed by the department and School to the Graduate Council on the Medical Center campus. The proposal will be evaluated for an additional 7-year period. The Office of Graduate Studies will remind the graduate certificate program about its renewal one year before the graduate certificate program is scheduled to expire. If a program expires or is discontinued, no new students may be enrolled in the program and those students currently in the program will continue until completion.

**Student Records Criteria**

- It is the responsibility of the degree program that houses the graduate certificate program to maintain all student records of the graduate certificate program. These records should include, but are not limited to, the number of students that apply to the program, the number accepted and denied into the program, the number of students enrolled in the program by semester, and the number of students who complete the program by semester.
- The courses taken in the graduate certificate program will be listed on the student’s transcript and recognition of the earned certificate will also be posted on the transcript.
The awarding of graduate certificates will coincide with the August, December, and May graduations at the University of Kansas. The certificate awarding program will instruct students to submit an “Application for Degree” (AFD) the semester the student will complete certificate requirements. The same degree granting deadlines for filing the AFD will apply to the awarding of graduate certificates.

The Registrar’s Office will provide Graduate Certificates for students who successfully complete all certificate program requirements each semester using the same timeline as the one established for diplomas.

Graduate certificates will not be recognized by any Graduate Studies official graduation ceremony.

Process of Approval for New Graduate Certificate Programs

Approval Process

Proposals for new graduate certificate programs may be created and submitted by graduate faculty in the same manner as proposals for new graduate degree programs, with the exception that all approvals are made internally at the University of Kansas. The proposal must be approved by the Vice Chancellor for Academic and Student Affairs and accompanied by endorsement from the department chairperson, the dean of the school in which the contributing course work is administered, and the Dean of Graduate Studies.

After a proposal has been endorsed by the sponsoring department and school, the proposal must go to the Graduate Council, and if approved, will be forwarded by the Dean of Graduate Studies to the Vice Chancellor for Academic and Student Affairs.

Curriculum Criteria

- All certificate programs must be linked to a specific KU degree program(s), such that they provide a specific set of skills or knowledge base within a defined body of knowledge of the particular discipline. Certificate programs are encouraged where they might provide value-added benefits to students in existing graduate degree programs or provide a needed educational initiative for post-baccalaureate students in an area not currently addressed by a graduate degree program. These programs are not encouraged where they might detract from existing graduate programs.
- The proposed sequence of course work must offer a clear and appropriate educational objective at the post-baccalaureate level.
- The proposed certificate program must achieve its educational objective in an efficient and well-defined manner.
- A statement of the proposed course sequence associated with the certificate, including course titles, number of graduate credit hours, and course descriptions both for existing courses and any new graduate courses that may be developed.
- Graduate certificate programs may be at the post-baccalaureate, the post-master’s, or post-doctoral level.
- Graduate certificate programs must be proposed for current KU graduate students or new KU students seeking a post-baccalaureate certificate.
- The certificate program must include an appropriate number of credit hours. In general, certificate programs should be no less than 9 credit hours. All proposals must have a maximum time to completion of no more than 4 full academic years.
- The proposal will identify the extent to which the curriculum overlaps with the curriculum of existing degree programs.
- The proposal will identify requirements of the program that are supplemented to the course work, including but not limited to laboratories, practicum, internships, and projects.

Faculty Criteria

Instructors in graduate certificate programs must have gained appointment to the Graduate Faculty.

Materials Required for New Certificate Proposal

Proposals for a graduate certificate program at KU must include the following materials:

- A statement of the educational objectives of the program.
- A statement of the proposed course sequence associated with the certificate, including course titles, number of graduate credit hours, and course descriptions both for existing courses and any new graduate courses that may be developed.
- A statement identifying the important academic objectives of the proposed certificate program, including the range of skills and knowledge future graduates will possess. Proposals should show how the graduate certificate program complements existing courses and does not detract from existing programs.
- A statement of how the proposed course sequence associated with the certificate will meet the stated educational objectives.
- A statement of the need for the proposed program and the basis for such need, supported by either external or internal derived data.
- A list of the names of the faculty associated with or contributing to the certificate program, either by teaching the courses or advising the students within the program. An up-to-date curriculum vitae for each faculty member listed needs to be included.
- The name and curriculum vitae of the faculty member who will be designated as the coordinator of the program.
- A planned date of implementation.

The Graduate Faculty

The Graduate Faculty consists of members of the university faculty and other persons qualified by training and experience who are duly nominated by a graduate department and appointed by the Office of Graduate Studies. Only members of the Graduate Faculty may teach courses for graduate credit, supervise master’s programs, serve on master’s examination and defense committees, or serve on doctoral examination committees.

There are three types of appointment to the Graduate Faculty:

- Regular Status
- Dissertation Status (Dissertation Chair Status)
- Special Member Status

The following sections describe each type of status.

Regular Graduate Faculty Status

Any faculty member who is appointed to a tenure-track position in a graduate degree granting department on the Medical Center campus is eligible for regular graduate status. Present or newly appointed faculty members in tenure-track appointments with the rank of assistant professor or above in departments or programs with approved graduate programs are granted regular membership in the Graduate Faculty, provided they have received the terminal degree in their field of specialization or have
acquired equivalent training and/or professional experience as determined by the Office of Graduate Studies.

Members of the Graduate Faculty with Regular status may:

- teach courses for graduate credit;
- supervise the master’s programs and thesis students;
- serve on master’s and doctoral examination and defense committees;
- chair master’s committees; and/or
- co-chair dissertation committees.

When appropriate, a qualified member of the Regular Graduate Faculty may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with Dissertation status serves as co-chair of the committee and agrees to ensure that all requirements are met. However, if the regular member of the Graduate Faculty has lost dissertation status, this does not apply.

In special cases where faculty members who hold regular membership in the graduate faculty enroll in a KU graduate program as part of their professional development, they may be permitted to retain their Graduate Faculty status. They may not supervise or serve as the instructor of record for students who are peers in the graduate program in which they are enrolled.

To hold regular membership in the Graduate Faculty, a faculty member must continue to show evidence of a pattern of productive professional activity demonstrating the ability to contribute to high-quality graduate education. The form that productive professional activity may take varies across disciplines. Conventional evidence of such activity includes such things as effective teaching, scholarly publication, participation in professional societies, and other scholarly activity. Graduate degree programs are responsible for monitoring faculty with regular membership in the Graduate Faculty.

Dissertation Graduate Faculty Status

To qualify for the privilege of chairing doctoral dissertation committees, a regular member of the Graduate Faculty must demonstrate continuing activity commensurate with being an established scholar in his or her field and involvement in the graduate education program as evidenced by:

- teaching graduate courses;
- advising and mentoring graduate students and serving on thesis and dissertation committees; and/or
- maintaining an ongoing program of scholarly activity including a record of scholarship, publication and other contributions to the field.

It is the graduate program’s responsibility to nominate members of the Graduate Faculty for authorization to chair doctoral committees and to provide evidence of scholarship and involvement in the graduate education program. Authorization to chair dissertation committees is reviewed as part of each graduate program review.

Special Graduate Faculty Status

Special membership may be granted to any university employee or non-employee who is uniquely qualified by training or experience for membership in the Graduate Faculty for the purposes of:

- teaching a course or courses;
- having courses cross-listed as KU courses if they are part of a cooperative graduate program between KU and the appointee’s home institution;
- serving on the thesis, dissertation, or examination committee of a particular student or students;
- chairing master’s thesis committees of a particular student or students; and/or
- co-chairing dissertation committees of a particular student or students.

When appropriate, a qualified member with Special status may be nominated to serve as co-chair of a specific dissertation committee if a faculty member with Dissertation status serves as co-chair of the committee and agrees to ensure that all requirements are met.

Special status memberships are limited to a maximum period of 5 calendar years for teaching purposes or for the duration of the specified committee assignment. Special memberships are renewable.

All nominations for special membership must state clearly the specific purposes for which the nomination is being sought, and when it can be known in advance, the length of time for which it is being requested. Special appointments are reviewed by the appointing graduate department when the term ends and recommended to the Dean of Graduate Studies for renewal as appropriate. The request to renew includes the purpose to be fulfilled by the renewal of the appointment.

Graduate Faculty Appointment Chart

This chart summarizes the organization and privileges of the various types of Graduate Faculty appointments.

<table>

1 The term “doctoral committee” refers to both oral comprehensive and dissertation defense committees.
2 A faculty member with the appropriate status may chair a degree committee alone or co-chair a degree committee with another faculty member (i.e., both co-chairs have equal status). Degree committees cannot have both a chair and a co-chair.
A current list of Graduate Faculty on the Medical Center campus is posted on the Graduate Studies website (http://www.kumc.edu/academic-affairs/graduate-studies/graduate-faculty.html).

Appointment Process
To appoint a faculty member to the Graduate Faculty or to renew a Special status, the graduate director for the department submits a "Graduate Faculty Status Application" through the SharePoint link on the Graduate Studies website (http://www.kumc.edu/academic-affairs/graduate-studies/graduate-faculty.html). A current curriculum vitae is attached to the application that includes a list of graduate courses the appointee has taught and a list of graduate student committees on which the appointee has served. The Dean of Graduate Studies reviews the applications and determines if appointment is approved or not. Approved appointment are then entered in Workday and are approved by the respective school academic affairs office and by the Vice Chancellor for Academic and Student Affairs before the appointment becomes official.

Notice of Non-reappointment and Graduate Faculty Eligibility
Faculty members given a notice of non-reappointment are not eligible to hold Graduate faculty status. The Office of Faculty Affairs (http://www.kumc.edu/kumc-academic-affairs/kumc-faculty-affairs-and-interprofessional-development.html) on the Medical Center campus will provide the Office of Graduate Studies with a written list of faculty who receive a notice of non-reappointment. The Office of Graduate Studies will remove graduate faculty status for these non-reappointed faculty for the appointment period for which the terminal notice is effective. Upon non-reappointment, the faculty member is no longer eligible for Graduate Faculty status. The named faculty member will no longer be allowed to teach future courses for graduate credit or to serve on graduate students' committees.

The appropriate department chairperson for the faculty member receiving the terminal notice may request, in writing, an exception to the policy from the Dean of Graduate Studies. Permission may be given to the faculty member to serve on a graduate student's committee if the graduate student will meet all degree requirements within the semester. The faculty member will be given a copy of the letter defining an exception approved by the Dean.

Outside Graduate Faculty Member for Ph.D. Examination Committees
The outside member of a Ph.D. committee must be a member of the Graduate Faculty with Regular or Dissertation status granted by a department other than the aspirant's major department. The outside member serves as the Graduate Studies representative on the committee.

The presence of the Graduate Studies representative is designed to ensure the appropriate standards of fairness, professionalism, judgment, and skill are applied throughout the examination process for the benefit of the institution and in the best interest of the student.

The Graduate Studies representative is a voting member of the committee and has full rights to participate in the examination. In the case of any unsatisfactory or irregular aspects of the examination or violation of Graduate Studies policy, the Graduate Studies representative shall provide a written report to the Dean of Graduate Studies for consideration of further action.

Before the examination, Graduate Studies provides a list of responsibilities to the Graduate Studies representative. By accepting the role, the outside faculty member attests there is not conflict/duality of interest that would preclude service as an objective participant observer on behalf of Graduate Studies. Following are the specific Graduate Studies guidelines the Graduate Studies representative is verifying:

1. The examination or defense was conducted in compliance with Graduate Studies policies regarding committee composition and attendance at the examination as stated in the Doctoral Degree Requirements (p. 2576) section of this catalog.
2. The examination or defense was held in a manner that was free and open to the public.
3. S/he was accorded full participatory rights in the examination or defense.
4. S/he was accorded full voting rights as a member of the committee.
5. The examination or defense was free from irregularities, unfairness, or perceived conflicts of interest to the student.
6. The examination or defense was free from irregularities, unfairness, or perceived conflict of interest among faculty members.

ASSISTANTSHIP Appointment Types
The Medical Center Campus through their academic departments offers a limited number of Graduate Teaching Assistantships, Graduate Research Assistantships and Graduate Assistantships. Only degree-seeking graduate students are eligible for these appointments. Graduate students interested in an assistantship should inquire directly to their academic program/department about GTA and GRA appointment opportunities. GA appointments are managed by the Office of Graduate Studies. The assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

Principles Guiding Assistantships
The following principles govern all graduate teaching assistant (GTA), graduate research assistant (GRA) and graduate assistant (GA) appointments on the Medical Center campus:

1. Individuals who enroll in graduate educational programs at the University of Kansas do so in order to attain specific educational goals. It is the University’s responsibility to help ensure that graduate students attain their academic goals in a reasonable amount of time and move on to the next stage in their careers, whether to another advanced degree program or to professional employment.
2. When academic programs/departments offer GTA, GRA or GA appointments, the assistantships must contribute to the training experience of the graduate student.
3. The responsibilities required of the GTA, GRA or GA should be in balance with their responsibilities as a student in the graduate program. For appointments of .50 FTE, the expectation is that the assigned duties will average no more than 20 hours per week during the semester. For appointments at other percentages, the number of hours per week must be proportional to the appointment percentage.

ASSISTANT Appointment Limits
Appointments shall not normally exceed .50 FTE. Appointments in excess of .50 FTE but not exceeding .725 FTE for all University employment combined must be approved by the academic program and the Dean of Graduate Studies in advance of an appointment offer and will be approved only in special circumstances. Departments are expected to monitor appointments in excess of .50 FTE to ensure that the graduate
students’ assistantship assignments enhance their academic preparation and do not interfere with progress towards degree.

**Graduate Teaching Assistantships (GTA)**

Graduate Teaching Assistants are paid as salaried student employees whose job duties consist primarily of direct involvement in classroom or laboratory instruction. The duties are performed under the supervision of faculty. The University also requires that a GTA’s teaching assignment be in his/her own field of study or one that is closely related.

A limited number of Graduate Teaching Assistantships are available. Graduate students should inquire directly to their academic program/department about GTA appointment opportunities. Graduate Teaching Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies. [Note: Graduate Teaching Assistantships on the Lawrence campus differ in that they are governed by a memorandum of agreement between the University of Kansas, the Kansas Board of Regents, and the Graduate Teaching Assistants’ Coalition, American Federation of Teachers - Kansas (GTAC), which represents KU GTAs in Lawrence only.]

**GTA Eligibility**

The following eligibility requirements govern all Graduate Teaching Assistant (GTA) appointments at the Medical Center campus:

1. During the semester of appointment, the GTA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus.
2. During the semester of appointment, the GTA is enrolled in no fewer than 6 graduate credit hours per fall and spring semester and 3 graduate credit hours summer semester. See "Enrollment Exceptions" in section following this list.
3. During the semester of appointment, the GTA must be in good academic standing, and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GTA appointment.]
4. The GTA must satisfy the English proficiency criteria established by the Board of Regents for GTAs - see Minimum English Requirement for GTAs in section immediately following this list.
5. A student completing their graduate degree may not continue in a GTA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

**GTA Minimum English Requirement**

All applicants for graduate teaching assistantships whose first language is not English, including international students and U.S. residents or citizens, must meet one of the following criteria:

1. Score a minimum of 22 on the spoken English portion of the TOEFL iBT.
2. Score a minimum of 8 on the spoken English portion of the IELTS.
3. Score a minimum of 50 on the SPEAK administered by the Office of International Programs (http://www.kumc.edu/international-programs/academic-english-requirements/speak-test-faq.html) on the Medical Center campus.

**GTA Enrollment Exception**

A Ph.D. student appointed as a GTA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies.

A clinical doctoral (Au.D., D.C.L.S., D.N.A.P., D.N.P., D.P.T., O.T.D., S.L.P.D.) student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

A master's student appointed as a GTA, who is in his or her final semester, may request approval to reduce enrollment below the GTA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student's final semester after all.

**GTA Tuition Benefit**

The Medical Center campus pays the tuition of graduate students who receive appointments as Graduate Teaching Assistants as defined below for the semester of appointment:

<table>
<thead>
<tr>
<th>.40 FTE or more appointment</th>
<th>100% of tuition</th>
</tr>
</thead>
<tbody>
<tr>
<td>.30 FTE but less than .40 FTE appointment</td>
<td>75% of tuition</td>
</tr>
<tr>
<td>.20 FTE but less than .30 FTE appointment</td>
<td>50% of tuition</td>
</tr>
<tr>
<td>.10 FTE but less than .20 FTE appointment</td>
<td>25% of tuition</td>
</tr>
</tbody>
</table>

A graduate student who has a GTA appointment or a combination of a GTA and GRA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment. The tuition payment program covers only tuition. If the student is eligible for in-state rates, these will be assessed before applying the tuition waiver. The tuition payment program is not applicable to fees (e.g. campus fees, course fees, e-learning fees, etc).

**GTA Health Insurance Benefit**

A graduate student who has a GTA appointment or combination GTA and GRA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that
semesters for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA selects the GTA-GRA plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.

**GTA Resignation or Termination**

If a GTA resigns or abandons the position or the appointment is terminated before working a minimum of 8 pay-periods during the semester, the student must pay full tuition for that semester and will lose eligibility for in-state (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

**Graduate Research Assistantships (GRA)**

Graduate Research Assistants are salaried student employees who perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic). The duties performed are under the direct supervision of faculty or research professionals. A limited number of Graduate Research Assistantships (GRA) are available. Graduate students should inquire directly to their academic program department about GRA appointment opportunities. Graduate Research Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

**GRA Eligibility**

The following eligibility requirements govern all Graduate Research Assistant (GRA) appointments at the Medical Center campus:

1. During the semester of appointment, the GRA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus. Graduate students enrolled in a graduate degree program offered by the Lawrence or Edwards campuses may be approved for enrollment by petition to the Dean of Graduate Studies to be appointed as a GRA on the Medical Center campus if they will perform research that is in their fields (or a closely related field) of study and is integral to the student’s education (e.g., dissertation topic).
2. During the semester of appointment, the GRA is enrolled in no fewer than 6 graduate credit hours per fall and spring semester and 3 graduate credit hours summer semester. See "Enrollment Exceptions" in section following this list.
3. During the semester of appointment, the GRA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GRA appointment.]
4. A student completing their graduate degree may not continue in a GRA appointment after the graduation date unless the student has just completed a master’s degree and is enrolled in a doctoral program in the same field or a closely related field or is a doctoral graduate who has been accepted into another graduate program.

**GRA Enrollment Exception**

A Ph.D. student appointed as a GRA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies.

A clinical doctoral (Au.D., D.C.L.S., D.N.A.P., D.N.P., D.P.T., O.T.D., S.L.P.D.) student appointed as a GRA, who is in his or her final semester, may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student’s final semester after all.

A master’s student who is an appointed GRA and in his or her final semester may request approval to reduce enrollment below the GRA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not his or her final semester after all.

**GRA Tuition Benefit**

A graduate student who has a GRA appointment or a combination of a GRA and GTA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment.

**GRA Health Insurance Benefit**

A graduate student who has a GRA appointment or combination GRA and GTA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester, for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA selects the GTA-GRA plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.

**GRA Resignation or Termination**

If a GRA resigns or abandons the position or the appointment is terminated before working a minimum of 6 pay-periods during the semester, the student will lose eligibility for in-state (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

**GRADUATE ASSISTANTSHIPS (GA)**

Graduate Assistants are salaried student employees who hold a position that furthers the professional and/or academic development of the graduate student. The duties performed are professional in nature and under the direct supervision of faculty, academic professionals, or administrators. Responsibilities may include, but are not limited to,
administrative and professional internships. The Dean of Graduate Studies must approve GA appointments. [Note: Graduate Assistant positions are a distinct category of graduate student support. This category does not include Graduate Research Assistants, Graduate Teaching Assistants, or student-hourly positions held by graduate students.] A limited number of Graduate Assistantships (GA) are available. Graduate Assistantship policy is administered on the Medical Center campus by the Office of Graduate Studies.

**GA Eligibility**

The following eligibility requirements govern all Graduate Assistant (GA) appointments at the Medical Center campus:

1. During the semester of appointment, the GA is admitted to and enrolled in a graduate degree program offered by the Medical Center campus.
2. During the semester of appointment, the GA is enrolled in no fewer than 6 credit hours per fall and spring semester. See “Enrollment Exceptions” in section following this list.
3. During the semester of appointment, the GA must be in good academic standing and making satisfactory progress toward a graduate degree, as determined by Graduate Studies and the department in which the student is enrolled. [Note: A graduate student must maintain a cumulative grade point average of 3.0 to remain in good academic standing. However, if a program judges that a graduate student whose GPA falls below 3.0 is nonetheless making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be allowed to continue with the GA appointment.]
4. A student completing their graduate degree may not continue in a GA appointment after the graduation date.

**GA ENROLLMENT EXCEPTION**

A Ph.D. student appointed as a GA, who has successfully completed the doctoral comprehensive examination and 18 post-comprehensive credit hours, may request approval to reduce enrollment below the GA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies.

A clinical doctoral (Au.D., D.C.L.S., D.N.A.P., D.N.P., D.P.T., O.T.D., S.L.P.D.) student appointed as a GA, who is in his or her final semester, may request approval to reduce enrollment below the GA minimum enrollment requirement. The request form is located on the Graduate Studies website (http://www.kumc.edu/academic-and-student-affairs/opags/graduate-studies/gta-and-gra.html) and is subject to approval by the academic department and the Dean of Graduate Studies. Approval will not be granted for a subsequent semester if the semester approved for reduced enrollment is not the student's final semester after all.

**GA TUITION BENEFIT**

A graduate student who has a GA appointment of at least .40 FTE is eligible for in-state (resident) tuition rates for the semester of appointment.

**GA HEALTH INSURANCE BENEFIT**

A graduate student who has a GA appointment of at least .50 FTE for a given semester is eligible to participate in a health care benefits plan for that semester, for which the University provides a contribution. The health care benefits plan is the same plan that is available to all students, but a portion of the premium is paid by the University if the student appointed as a .50 FTE GTA/GRA/GA selects the GTA,GRA,GA plan. The health insurance information is available from the Student Health Insurance Office (http://www.kumc.edu/student-affairs/student-health-insurance.html) in Student Affairs.

**GA RESIGNATION OR TERMINATION**

If a GA resigns or abandons the position or the appointment is terminated before working a minimum of 6 pay-periods during the semester, the student will lose eligibility for in-state (resident) tuition rates and, if a non-resident, will be required to pay non-resident tuition for that semester.

Academic Misconduct

Guidelines for Alleged Misconduct

The following information shall serve as guidelines for dealing with situations where inappropriate deviations from these accepted standards of conduct by a graduate student are alleged to have occurred. All questions concerning these guidelines should be directed to the Dean of Graduate Studies or his/her designee.

I. Expectations for Conduct by a Graduate Student

One goal shared by the graduate programs at the University of Kansas Medical Center is to provide a seminal educational environment in which a student can master a special field of knowledge and strive to develop competence in independent scholarship and research to make original contributions to knowledge. In achieving that goal, there is an expectation by the University of Kansas Medical Center that the graduate faculty and their students will conduct themselves with high integrity and professional ethics. Such conduct by a graduate student must include adherence to the written and observed or taught guidelines for ethical standards of the profession for which the student is seeking to enter. A graduate student is responsible for informing himself/ herself about these requirements and expectations of conduct as well as seeking answers to his/ her own questions about what constitutes misconduct. Potential sources for this information include the:

A. Director of the Graduate Program and the faculty members of the department in which the graduate student has entered;
B. Student Handbook or a similar document prepared by the student's academic program, department, and/or school;
C. the University of Kansas Medical Center "Behavioral Standards in Patient Care."

Academic Misconduct

Academic misconduct by a student shall include but not be limited to: cheating on examinations whether by a student on his/her own behalf or by giving to another student or receiving from another student unauthorized aid on examinations; giving or receiving of unauthorized aid in the preparation of notebooks, themes, reports, or other types of assignments, or in the preparation of master's theses and/or doctoral dissertations; or knowingly misrepresenting the source of any academic work, falsification of research results, plagiarizing of another's work, violation of regulations, ethical or professional codes for the treatment of humans and animals, or otherwise acting dishonestly.

II. Decisions by a Faculty Member Relative to Academic Misconduct

A. Not to Make a Recommendation for an Investigative Hearing: A faculty member (acting as an instructor or assistant in a course, or a graduate student's advisor or mentor for his/her research and/or academic program, etc.) may decide not to recommend an investigative hearing, as outlined in these guidelines, for what he/she believes is academic misconduct by a student. The faculty member thus may treat as unsatisfactory any student work which he/she believes is a product of academic misconduct and impose a sanction(s) appropriate to the traditionally accepted realm
III. Procedural Information for and Investigative Hearing Process

A. Definitions of Terms Hereafter Applied in these Guidelines

1. "The Faculty Member" is the faculty member initiating an allegation of academic misconduct by a student.

2. "The Student" is the graduate student identified by the Faculty Member as the subject of the alleged act(s) of academic misconduct.

3. The "Involved Department" is the department, center, or functional unit in which the act(s) of academic misconduct allegedly occurred by the student.

4. The "Chairperson" is the Chairperson of the involved department in which the act(s) of academic misconduct allegedly occurred by the student and is the next higher administrative officer to whom the Faculty Member sends the initial report about an allegation of academic misconduct.

a. "Dean of the School of Nursing" replaces the designation of "Chairperson" hereafter throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student as the appropriate administrative officer to whom faculty members in the School of Nursing shall forward any report or recommendation, if the alleged act occurred in this School.

b. Possible Conflicts of Interest:

i. If the Faculty Member perceives (relative to Section III. B., above) that there may be a conflict of interest involved in this issue between the Student and the Chairperson, or if the Chairperson is the Faculty Member initiating the allegation of misconduct, then the Faculty Member’s inquiry report of the alleged incident(s) (see Section IV. B., below) shall be forwarded to the Dean of the Faculty Member’s or Chairperson’s, respectively, School or the next higher administrative officer, as appropriate, who thereafter will assume the responsibilities of "the Chairperson" identified throughout these Guidelines for Dealing With Alleged Misconduct by a Graduate Student.

ii. For Other Situations when questions arise about conflict of interest, the questions shall be directed to the Dean of Graduate Studies.

5. The Official Record of the Hearing Process: The Dean of Graduate Studies shall initiate and maintain in the Office of Graduate Studies an Official Record (i.e., file) of the entire hearing process. All subsequent original written communications, documents, audio tape recordings (see Section V. 3., below), and recommendations that relate to the alleged misconduct and the hearing shall be sent on a timely basis by the Chairperson and/or the Hearing Officer (see Section IV. E., below) to the Dean of Graduate Studies for inclusion in the official record. If the final conclusion of the hearing process is that academic misconduct has not occurred, then only the Dean’s official record of the entire hearing process shall be saved as the permanent record; all other faculty, Departmental, and School copies of a "record/file" for the hearing process must be destroyed (see Section V. B. 2. a., below).

6. The Time Periods for the Hearing Process: Throughout these guidelines, MAXIMUM LIMITS are specified for the length of time allowed for certain stages of the overall hearing process to take place. Unless specified otherwise, all lengths of time shall be in terms of the traditionally considered “working days” of any given week (recognized holidays that occur on otherwise traditional working days are not to be counted in these time frames). Any request for an extension of a time limit shall be made expeditiously, and before the expiration of the limit, to either the Chairperson or the Hearing Officer or the Dean of Graduate Studies, as appropriate, (or, in their absence, their designates), who shall decide and notify within three (3) days if there is good cause for the extension, and if so, for what period of time. Notification shall be to all involved parties of the hearing process and may be done first by telephone if deemed appropriate, and then shall be followed by written notification.

B. Inquiry Report by the Faculty Member is Sent to the Chairperson: Following the decision by the Faculty Member in Section III. B., above, and with due notice to the Student, the Faculty Member shall submit a detailed written report about the allegation (hereafter called the Inquiry Report) to the Chairperson. The Inquiry Report shall be submitted within twenty (20) days of the discovery of the alleged occurrence of misconduct. The Chairperson shall, within fifteen (15) days of receiving the Inquiry Report, review the report and attempt to resolve the allegation through consultation and mediation with the involved persons. If the Chairperson determines that the allegation should be resolved through the investigative hearing process, then the Chairperson shall continue the procedure outlined hereafter in these guidelines. Written notice shall be sent to the Student (see Section IV. D., below) and to the Faculty Member (including a request for the Faculty Member to respond, within ten (10) days of receipt of the notice, with
his/her selection of a faculty member to serve on the Hearing Panel; see Section IV. E. 2., below).

C. Notification of the Dean of Graduate Studies: The Chairperson shall send a written notification to the Dean of Graduate Studies that an investigative hearing process for alleged academic misconduct by the Student is going to be initiated. The Chairperson’s notification shall include copies of the Faculty Member’s Inquiry Report of the alleged misconduct and all written communications up to this time with the Student.

D. Notification About the Allegation to the Student: A written notification of the specific allegation shall be sent (certified or registered letter with return receipt requested indicating the date of receipt) to the Student by the Chairperson within fifteen (15) days after the Chairperson receives the Faculty Member’s Inquiry Report. A copy of this notification shall be sent to the Dean of Graduate Studies. The notice shall include:

1. a statement of the specific allegation(s) with sufficient explanatory information to enable the Student to understand the nature and extent of the allegation(s);

2. an invitation for the student to provide, to the Chairperson, within ten (10) days after receiving the notification letter: a. a written response to the allegation(s); and b. the name of a faculty member whom the Student selects to serve on the Hearing Panel (see Section IV. E. 2., below), and a statement indicating that this faculty member told the Student that he/she agreed to serve;

3. a statement indicating that the Student has the right to continue attending classes as scheduled until such time as the Dean of Graduate Studies has reached his/her final decision UNLESS there is a question of unsafe and/or disruptive behavior and/or offense against other persons (including patients of or visitors to) and/or property of the University of Kansas;

4. a copy of these “Guidelines for Dealing With Alleged Academic Misconduct by a Graduate Student,” so that the student is aware of the procedural process and possible actions.

E. Selection of Members for the Hearing Panel: The Hearing Panel shall be composed of four (4) members of the graduate faculty (voting members of the Panel), excluding the Faculty Member initiating the allegation of misconduct (See Section IV. A. 4., above) and excluding the chairperson of the department in which the Student named in the allegation is a graduate student member, and one (1) graduate student (voting member of the Panel), excluding the Student who is the subject of the allegation. One of the graduate faculty members of the Panel will be designated by the Chairperson as the “Hearing Officer” in charge of the Hearing Panel. Any member of the Hearing Panel who perceives that there is any irregularity in the proceedings of the Hearing process has the responsibility of PROMPTLY reporting this to the Dean of Graduate Studies. Selection of the Hearing Panel shall include at least one but no more than two faculty members from the Involved Department in the allegation and shall be done as follows:

1. the graduate student member:
   - shall be selected by the officers of the Graduate Student Council at an on-need basis;
   - shall not be a graduate student member of the same department as the Student named in the allegation; and
   - must be currently classified as a regular graduate student in the category of degree seeking students and in good academic standing (not on probation);

2. one faculty member from inside or outside the Involved department may be selected by the student named in the allegation;

3. one faculty member from inside or outside the Involved department may be selected by the Faculty Member initiating the allegation; and

4. two faculty members selected by the Chairperson. The Chairperson’s selections shall assure that the composition of the Panel includes at least one but no more than two members from the Involved Department in the event that the student and/or the Faculty Member do not select such a member. Additionally, if the Student and/or the Faculty Member decline(s) to select a Panel member or fail to respond to the Chairperson within ten (10) days of the request (see Section IV. B. and IV. D. 2., above), then the Chairperson will also select that member or members, likewise with due consideration for the basic composition of the Panel as defined above.

F. Scheduling the Hearing: The Hearing Officer shall, within five (5) days of the selection of members of the Hearing Panel, (1) schedule the day, time, and place for the Hearing to occur (which shall be sometime between twenty [20] and thirty [30] days after the selection of the Hearing Panel), and (2) provide written notice of this schedule to the Faculty Member, the Student, the Chairperson, and the Dean of Graduate Studies. Both the Student and the Faculty Member shall be informed with this scheduling notification that during the Hearing each:

1. will be given the opportunity to present his/her own viewpoint of the situation(s) that directly led to the allegation(s); and/or

2. may have witnesses speak or have witnesses’ affidavits read on his/her behalf.

G. Documents, Representatives, and Witnesses for the Hearing: All information cited below shall be promptly sent to (see time deadlines indicated in this Section) or collected by the Hearing Officer, who shall promptly distribute copies of the information to the Student, the Faculty Member, and the rest of the Hearing Panel members.

1. The Faculty Member’s Inquiry Report sent to The Chairperson (see Section IV. B.);

2. The Chairperson’s Notification of Allegation letter sent to the Student (see Section IV. D.)
3. The Hearing Officer shall introduce the hearing to the Student and the Faculty Member stating the day, time, and place for the hearing (see Section IV. F.);

4. The Student's written Response to the allegation(s), if such was sent to the Chairperson (see Section IV. D. 2. a.);

5. Any documents provided by the Student and/or the Faculty Member for presentation as evidence to the Hearing Panel (sent at least by five (5) days before the Hearing);

6. Names of Representatives:

Each party to the Hearing should be present for the Hearing unless the Chairperson agrees that another person may appear as a substitute representative. A Hearing may be held even if the Student and/or the Faculty Member fail to appear for the Hearing. Neither the Student nor the Faculty Member is compelled to appear or testify at the Hearing, and no inference may be drawn by the Hearing Panel against the Student or the Faculty Member due to his/her failure or refusal to testify or appear.

The use of legal counsel is discouraged;

7. Names of Witnesses: The Student and the Faculty Member shall provide a list of intended witnesses, if any, to the Hearing Officer at least ten (10) days before the Hearing is to occur. The Hearing Officer shall provide these names, reciprocally, to the Faculty Member and the Student at least five (5) days before the Hearing; and

8. All materials (including the audio recording tapes identified in Section IV. H. 3., below) concerning the alleged violation of misconduct should be treated as CONFIDENTIAL documents. The Hearing Panel members will return all materials received for the Hearing to the Hearing Officer at the end of the scheduled Hearing. The Hearing Officer will forward ALL ORIGINAL AND PHOTOCOPIED AND AUDIO TAPE RECORDED MATERIALS to the Dean of Graduate Studies (see Section IV. A. 5., above).

H. Conducting the Hearing: The Hearing Officer of the Hearing Panel may establish procedures in addition to those listed, however, the basic requirements of the Hearing procedure as listed here may not be altered by the Hearing Officer. The Hearing shall be conducted in a closed session and witnesses shall be excluded from the Hearing except when actually testifying.

1. The Hearing Officer shall have the authority to keep order, rule on questions of relevance and evidence, and shall possess other powers normal and necessary for a fair and orderly Hearing. Rules of Evidence that govern courtroom proceedings shall not apply.

2. There shall be only a single audio tape recording made of the proceedings to provide an accurate record of the Hearing for possible review by the Hearing Panel (Section IV. 1.) and/or Dean of Graduate Studies (Section IV. 1. 4.).

3. The Hearing Officer shall introduce the hearing to the Faculty Member, the Student, and their representatives, if any.

4. The Hearing Officer shall explain the Hearing Procedures as outlined herein.

5. The Hearing Officer shall announce that the Faculty Member initiating the allegation has the responsibility to persuade the Hearing Panel by a preponderance of evidence that academic misconduct has occurred.

6. The Hearing Officer shall orally review the allegation(s) of misconduct which led to the Hearing, and the possible sanction(s).

7. The Hearing Officer shall allow the Faculty Member to state the allegation and explain the incident. The Faculty Member may choose to remain silent (see Section IV. G. 6. a.).

8. The Hearing Officer shall allow the Student to reply and explain the incident. The Student, if present, may choose to remain silent (see Section IV. G. 6. a.).

9. Hearing Panel members may direct questions to the Faculty Member (if present), the Student (if present), and any witnesses and/or representatives.

10. Through the procedural process of the Hearing, the Student and the Faculty Member may question one another and any witnesses appearing. One witness at a time may be called by either the Faculty Member or the Student. No witness will be permitted to participate in the Hearing if his/her name was not previously given to the Hearing Officer in accord with Section IV. G. 7., above. IN EXCEPTIONAL CIRCUMSTANCES, this provision may be modified by decision of the Hearing Officer, and if it is, the Student and the Faculty Member will be given sufficient opportunity to collect information to respond to whatever the witness presents.

11. The Hearing Officer shall state that the Hearing Panel will make a recommendation to the Dean of Graduate Studies within seven (7) days after the Hearing.

I. Findings of the Hearing Panel and Recommendation Carried Forward:

1. At the conclusion of the Hearing, the Panel members, alone and in closed session, shall deliberate and decide by a majority vote (anonymous written ballot counted by the Hearing Officer and verified by the graduate student member) if "academic misconduct," as alleged by the Faculty Member and only based upon all evidence presented to and heard by the Hearing Panel, "has occurred" or "has not occurred."

2. If the Panel's decision is that "academic misconduct has occurred," then the Panel members shall deliberate and determine (by majority vote) their
recommendation(s) for specific disciplinary action and/or sanction(s), if any.

3. The Hearing Officer shall compile comments, rationale, findings, voting results, and recommendations in writing and forward them within seven (7) days after the Hearing to the Dean of Graduate Studies. The Hearing Panel recommendation(s) shall not be binding upon the Dean of Graduate Studies.

4. The Dean of Graduate Studies shall consider the recommendation(s) and report of the Hearing Officer and any relevant information and take action.

J. Notifications Consequent to the Hearing Process:

1. The Dean of Graduate Studies shall, within seven (7) days of receipt of the summary final report of the Hearing Officer, send written notification of his/ her action(s) to the Faculty Member, the Student (notification by certified or registered mail with return receipt requesting delivery date), and the Hearing Officer.

2. If this final action of the Hearing process concludes that academic misconduct by the Student has NOT occurred, then the Dean of Graduate Studies also shall, in writing, instruct the chairperson(s) of the involved department(s) that: a. all materials appended to any and all departmental files, including a possible so-called permanent file on the Student, that would not have been in these files if an allegation of misconduct had not been made shall be removed (also see Section IV. A. 5., above) b. conscientious efforts are to be made by the involved department(s) not to subject the student to unwarranted bias or action by the department(s) consequent to the hearing process.

IV. Sanctions that may be Imposed for Academic Misconduct:

A. Censure: A written reprimand for actions which constitute academic misconduct. Censure may include a written warning that subsequent actions of academic misconduct may be the cause for a more severe disciplinary sanction.

B. Unsatisfactory Work: Treating as unsatisfactory any work which is a product of academic misconduct. This may include reduction of a pending or existing grade (including the awarding of a Failing grade) for the work and/or a grade in the course.

C. Suspension: Exclusion from classes and other specified privileges or activities for a definite period not in excess of two years.

D. Expulsion: Termination of graduate student status for an indefinite period. The conditions of readmission, if any, shall be stated in the order of expulsion. Approved by Graduate Studies Committee. University of Kansas Medical Center, April 4, 1991.

Academic Probation

The cumulative grade point average is computed at the end of each semester with the inclusion of grades earned at KU for all courses taken for graduate credit. If the cumulative graduate grade point average falls below 3.0 (B average), the student is placed on probation by Graduate Studies and the student and program are both notified in writing by the Dean of Graduate Studies.

The grades of P, S, U, CR, NC, and I for which no numerical equivalents are defined, are excluded from the cumulative grade point average computation. If the student’s overall graduate average has been raised to a 3.0 by the end of the next semester of enrollment after being placed on probation, the student may be returned to good academic standing. If not, the student may not be permitted to enroll and will be dismissed unless the Dean of Graduate Studies acts favorably on a program recommendation for the student to continue study.

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate program that will accept the student. The petition must be approved by the Dean of Graduate Studies on the appropriate campus (Medical Center or Lawrence).

Academic Standing

Evaluation of graduate student academic standing includes, but is not limited to, consideration of performance in and progress through a graduate program according to program expectations. Graduate students must maintain an expected level of performance throughout their program. The evaluation of satisfactory performance is based, but not limited to, the following factors:

1. A minimum cumulative grade-point average (GPA) of 3.0 or higher. Graduate programs may have more stringent GPA requirements;
2. Academic and scholarly integrity;
3. Compliance with academic policies at the university, school, and departmental level; and
4. Satisfactory progress toward completion of the degree or certificate as determined by the program. Graduate programs are responsible for evaluating students at least annually to assess progress toward a degree. Progress may be determined by factors including:

   a. Completion of coursework, milestones, exams, or other program components on a specified timeframe;
   b. Official time to degree; and
   c. Total time in program.

Graduate programs may have additional measures of progress. Failure to maintain an expected level of performance and progress will result in a student not being in good academic standing. Lack of good academic standing will result in the graduate program placing the student on academic probation or recommending to the Dean of Graduate Studies dismissal from the program.

It is expected that graduate programs will evaluate students pursuing more than one degree program based on their progress in each program individually.

Childbirth Accommodation

This policy is intended to describe the process for providing students reasonable accommodations for pregnancy-related limitations or the impending birth or adoption of a child, so the student may continue to make progress toward the completion of their degree.
University of Kansas Medical Center's Title IX Policy prohibits discrimination on the basis of sex, including on the basis of pregnancy, against any individual participating in the University's education programs or activities. KU Medical Center will neither require nor prohibit leaves of absence for reasons of pregnancy or childbirth-related concerns. The University will make good-faith efforts to reasonably accommodate students who request accommodations due to pregnancy, childbirth, adoption or the foster care of a child. The University will grant students up to a six-week accommodation period, or longer if medically necessary, for pregnancy-related illnesses or complications, the birth of a child, the adoption of a child, or the placement of a child for adoption or foster care. The accommodation period can be granted as leave, a revised academic schedule, or a combination of leave and a revised schedule.

This policy applies to all enrolled students regardless of gender or marital status. Other situations related to family life continue to be covered by general leave of absence. Depending on their academic program, timing of birth/adoption, and level of support they will receive in caring for a newborn, a student may find it more advantageous both academically and personally to take a leave of absence rather than utilizing the childbirth accommodation policy.

DEFINITIONS
Students: any person enrolled or otherwise participating, including students from other institutions, in any graduate or undergraduate education at KU Medical Center.
Title IX: Title IX of the Education Amendments of 1972 is a federal statute that prohibits sex discrimination or harassment, including harassment or discrimination based on pregnancy, in any academic program or activity.

APPLYING FOR THE ACCOMMODATION PERIOD

Students requesting a reasonable accommodation under this policy can seek to remain enrolled and continue meeting their academic requirements through a revised schedule or they can request a leave of absence. An accommodation to remain enrolled may include a rescheduling of course assignments, examinations, and other academic requirements and/or an extension of academic milestones, if necessary

Academic Accommodations

To request an accommodation under this policy, a student should contact Academic Accommodation Services, at (913) 945-7035, to initiate the process as soon as possible, but no later than four months prior to the anticipated delivery date, or as soon as a pregnancy-related illness or complication arises. If a child is being welcomed through adoption or foster care, please contact Academic Accommodation Services as soon as possible depending on the situation. The Academic Accommodations Coordinator will review the student's request and, along with the student and other necessary parties (i.e. advisors, instructors), determine if the requested accommodation, or a sufficient alternative, can be provided. These discussions should also detail the type of academic engagement and progress expected from the student while on leave or on a revised academic schedule. Upon approval of a student's request, a plan will be submitted to the Associate Dean for Student Affairs of the student's School. The plan will outline the specific accommodations being provided for a student, as well as any expectations from the academic program.

If a program administrator believes that, due to the student's particular circumstances and their academic requirements, a leave of absence would be more appropriate, the program administrator must consult with the University's Title IX Coordinator before denying an accommodation request. Any denial of an accommodation request must be made to the student in writing with adequate justification and must provide a plan for the student to be able to return to the same academic status following a leave of absence. Students may appeal decisions regarding accommodations. The appeal of the decision must be made in writing and submitted to the Dean of the student's School. The Dean of the student's School will have final decision-making authority.

All academic programs and departments are expected to work with their students and make a good-faith effort to provide reasonable accommodations so that their students can remain in good academic standing and continue progress towards their degree while also balancing the demands of caring for a new child. It is also encouraged that advisors, academic staff, and departmental leaders work with sensitivity and imagination to provide more than these minimum standards put forth by KU Medical Center when circumstances allow for further accommodations. Students should be proactive in speaking with advisors, instructors, and academic deans when they are planning a family or expecting a child to devise the best personal and academic plan.

Student Status

Students will retain their full time student status if approved for an academic accommodation period. Additionally, for students who decide to take a leave of absence, they will have the option to pay student fees if they wish to have continued access to campus resources.

Financial Support (applicable to those funded by GTAs, GRAs, GAS, or Fellowships)

For students who currently receive stipends through a graduate teaching assistantship (GTA), graduate research assistantship (GRA), or graduate assistantship (GA), they will remain fully funded for a six-week period. Students who do not receive stipends at the time of application are not eligible for financial support. Any continuation of support past six weeks will be determined on an individual basis. Students will remain funded by their current stipend source for the first two weeks and then will be funded by a Childbirth Accommodation Fund through the Office of Graduate Studies for up to four additional weeks. If a student is on a grant or fellowship that allows them to receive stipends during maternity/paternity leaves, then they will continue to be paid by their current funding source for the entire six-week period. If funding is not allowed by the outside grant or fellowship, then the student will receive six weeks of support from the Childbirth Accommodation Fund.

If a student believes they are experiencing discrimination due to pregnancy or related conditions, the student should contact KUMC's Office of Equal Opportunity and Academic Compliance, which can review potential violations of the University's Title IX Policy. If a student believes that they are being disproportionately treated due to status as a parent, the EOAC Office can also review claims of parental status discrimination.
The official policy resides in KUMC PolicyStat (https://kumc.policystat.com/policy/7283651/latest/) which is an internal KUMC only website.

**Course Numbering System**

Courses that may give graduate credit are numbered according to the following scheme:

- **Courses numbered 500-699** are designed primarily for juniors and seniors, but are also taken by some graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 700-799** are designed primarily for graduate students who have fewer than 30 hours of graduate credit, but they are also taken by some undergraduates.
- **Courses numbered 800-899** are designed primarily for graduate students who have fewer than 30 hours of graduate credit.
- **Courses numbered 900-999** are designed primarily for graduate students who have 30 or more hours of graduate credit.

Courses that contain a mixture of undergraduate and graduate students should set requirements for graduate credit beyond or different from the requirements for undergraduate credit. No course, regardless of its number, can give graduate credit unless it has been approved for graduate credit by the appropriate Graduate Studies Office (Medical Center or Lawrence) and is taught by a person holding a current appointment to the Graduate Faculty. See the graduate credit section below for more information.

**Co-enrollment for Seniors in Graduate Level Courses**

Seniors at KU who will complete the requirements for a baccalaureate degree in a given semester, and who have very strong academic records (grade-point average higher than 3.0 on a 4.0 scale), may be allowed to enroll in graduate course work during their final undergraduate semester. Seniors requesting the privilege of co-enrollment must make formal application through the online graduate application process and be admitted as degree seeking before the student may proceed with enrollment in a graduate course.

**Procedure**

To meet the criteria of co-enrollment, the student must earn undergraduate credit for at least one class during the co-enrollment semester. Continuing education courses may be used to satisfy this requirement. If after the co-enrollment semester the baccalaureate degree is not completed, the student will not be permitted to enroll in courses for graduate credit until the baccalaureate degree has been conferred.

Students who are eligible to co-enroll receive an email from the Registrar's Office before enrollment with instructions on how to enroll in more than one career (ex. LAW, GRDL-Graduate, GRDK-Graduate, UGDL-Undergraduate). Students will have separate appointment times to enroll for each career and must enroll only in the courses that will count correctly toward the career in which they are enrolling during each appointment time. When enrollment is complete for each career, students must check the grading option for each course to ensure the class will be counted correctly.

**Discontinuance**

A student may voluntarily resign from their program of study by submitting an online "Official Severance Form" located on the Registrar's website (http://www.kumc.edu/student-services/office-of-the-registrar/current-students/dropping-and-withdrawing-from-classes.html).

**Dismissal**

Graduate programs are responsible for evaluating the students in their programs to ensure that they are making satisfactory progress toward a degree. If the graduate program finds that a student is not meeting performance standards and/or not making satisfactory progress, the program may recommend to the Dean of Graduate Studies that the student be dismissed from the program. Dismissal is requested by the graduate program through submission of the dismissal form in the Progress to Degree system.

A dismissal recommendation may be based, but not limited to, the following:

- Continuation on academic probation (cumulative grade-point average continues below 3.0);
- Failure to maintain good academic standing as defined under Academic Standing heading in this same section of the catalog;
- Running out of allowable time to degree as defined in degree requirements in the Degree Programs (https://catalog.ku.edu/graduate-studies/kumc/#programs/text) section of this catalog;
- Neither enrolling nor receiving approval for a leave of absence for two consecutive semesters;
- Committing Academic Misconduct as defined in this same section of the catalog;

Students who have been dismissed from a graduate program may be readmitted for further graduate study at KU only by petition of the graduate program that will accept the student. The petition must be approved by the Dean of Graduate Studies.

**Embargo of Theses and Dissertations**

When an exception to the immediate release of a thesis or dissertation is necessary, an embargo provides a temporary, delayed public release of the work. Embargo periods of six months, one year, or two years are available. While embargoes are not intended to be permanent, renewals of the original embargo period are permissible. Considerations that may be deemed reasonable for granting permission for an embargo include, but are not limited to:

- Patentable rights or other issues are contained in the work the disclosure of which may be detrimental to the rights or interests of the author.
- There is a need to prevent disclosure of government information about persons, institutions, technologies, etc. that is contained in the work.
- An academic or commercial press has expressed interest in acquiring the rights to publish the work as a book that may require an embargo.
- The work contains content that has already been submitted to a peer-reviewed journal that may require an embargo.
- Approval for delay has been granted by the KU Restricted Research Committee.

Requests for an extension of the embargo should be directed to the Office of Graduate Studies on the appropriate campus (Medical Center or Lawrence) and must be received at least one month prior to the expiration of the current embargo to ensure sufficient time to process the request. A request for an embargo submitted to the University of Kansas affects only the publication of the thesis or dissertation in KU ScholarWorks. It is
the graduate student's responsibility to additionally request an extension through ProQuest for the copy published by them.

While there is no limit to the number of times a student can request an embargo extension, embargoes that have been allowed to expire without a request for an extension will result in the thesis or dissertation being made publicly available.

The embargo period will be calculated beginning at the end of the semester in which the student graduates with the specific dates being: December 31st, May 31st, and August 31st.

Steps necessary for embargoing a thesis or dissertation:

Theses and dissertations at the University of Kansas are made available in two electronic databases: KU ScholarWorks and ProQuest Dissertations and Theses. Items in KU ScholarWorks are publicly accessible on the world-wide web and can be indexed by search engines.

Students who do not wish to have their theses or dissertation made public in these two venues must receive permission from their committee chair, department graduate director or department chair to embargo their theses or dissertations. The student must document this permission with the Electronic Thesis and Dissertation (ETD) Release Form. Once the student has obtained the requisite signatures on this form, the student must take two additional steps before graduation to ensure that their work is properly embargoed.

- First, the student must submit the Electronic Thesis and Dissertation (ETD) Release Form to the Office of Graduate Studies on the appropriate campus (Medical Center or Lawrence). If an embargo has been approved, this form will ensure that the work is temporarily restricted in KU ScholarWorks.
- Second, during the electronic submission process to ProQuest, the student must select the embargo option under the publishing restrictions section. If an embargo has been approved, this step will ensure that public view of the work is temporarily restricted in the ProQuest Dissertations and Theses database.

Note: If a student does not receive permission for an embargo and/or does not submit the required documentation requesting such an embargo to the Office of Graduate Studies prior to graduation, the work will be made publicly available through KU ScholarWorks, and search engines will find and index the work. For this reason, once a work is released publicly, it is impossible to deploy an embargo in its entirety, because copies of a released work are likely to be stored on the web even if the KU ScholarWorks and ProQuest copies are retracted. Therefore it is crucial for students who desire the embargo option to request it prior to graduation and to request extensions, if needed, prior to the work being exposed to public search engines.

Dissertation defenses are open to the public. In the event that an embargo is deemed necessary for a dissertation, the committee should consider holding an additional question period for the defense that is closed to the public. Any sensitive data may be discussed in the closed session.

Enrollment Definitions (Full-Time, 3/4-Time, Half-Time, and Part-Time)

Full-time enrollment for fall and spring semester

- Enrollment in 9 credit hours;
- Enrollment in 6 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 6 credit hours for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

Full-time enrollment for summer semesters

- Enrollment in 6 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty;
- Doctoral candidates enrolled in dissertation hour(s). *See doctoral candidates below.

3/4-time Enrollment for Fall and Spring Semesters

- Enrollment in 7 credit hours;
- Enrollment in 4.5 credit hours plus a GTA appointment, regardless of percentage of appointment.

3/4-time Enrollment for Summer Semesters

- Enrollment in 4.5 credit hours;
- Enrollment in 2 credit hours plus a GRA appointment, regardless of percentage of appointment.

Half-time enrollment for fall and spring semesters

- Enrollment in 5 credit hours;
- Enrollment in 3 credit hours plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 3 credit hours for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty.

Half-time enrollment for summer semesters

- Enrollment in 3 credit hours;
- Enrollment in 1 credit hour plus a GTA, GRA, or GA appointment, regardless of percentage of appointment;
- Enrollment in 1 credit hour for graduate students using the Montgomery GI Bill™ – Active Duty (MGIB-AD) and Post-9/11 GI Bill™ – Active Duty.

Part-time enrollment

- Students enrolled in fewer hours than defined by half-time enrollment are considered part-time.

* A doctoral candidate is defined as a doctoral student who has successfully passed the Comprehensive Oral Examination for the
Ph.D. and is enrolled in post-comprehensive hours. See the Post-Comprehensive Enrollment (https://catalog.ku.edu/graduate-studies/kumc/#programtext) policy in the degree requirements section of this catalog.

All students should check with their graduate degree programs and Office of Graduate Studies’ policies to determine if additional enrollment requirements or summer enrollment requirements exist.

**Note:** A few internship programs have been approved by Graduate Studies to count as full-time enrollment. Students enrolled in these internship programs will be counted as full-time students. Students should contact their programs to verify that an internship program qualifies.

### International Student Enrollment

International students in F-1 and J-1 status must also comply with Federal immigration requirements of pursuing a full course of study each semester to maintain their legal status. All international students must conform to residence requirements, even though immigration regulatory requirements may be lower.

### Enrollment Policy

All graduate students are expected either to be enrolled or to be on approved Leave of Absence at all times while completing the credit hours required for the fulfillment of their degrees unless they have been dismissed from the program or discontinued (voluntarily resigned) from the program.

Graduate students are not normally permitted to enroll for more than 16 hours a semester or more than 8 hours in summer session.

Under some circumstances, undergraduate students may enroll in graduate courses. See these policies in this section of the catalog:

- Undergraduate Student Enrollment in Graduate Level Course for Undergraduate Credit
- Co-enrollment for Seniors in Graduate Level Courses

### Grading

**General Guidelines**

Grading scales are assigned on a course-by-course basis. The grading scale selected for a course must be appropriate to the course type and to the students and programs that the course serves. It is expected that designated thesis, dissertation, capstone courses, and their approved equivalent courses will be graded using the A, B, C, D, F, P scale. The I grade is not appropriate for enrollment in thesis, dissertation, capstone projects, or research courses and is not allowed.

Once a grading scale for a particular course has been recommended by the department/program and approved by Graduate Studies, it must be applied to the entire student enrollment in the course or section. This applies to all graduate-level courses.

The individual schools have the option of using or not using the +/-, according to the policy adopted by the particular school.

In courses with the letter-grade scales, the grade of C- is not considered a passing grade. Students receiving a grade of C-, D, and F in a course may not count that course toward fulfilling degree requirements.

### Cumulative GPA

Overall, students must earn at least a B average (i.e., 3.0 GPA) on course work counted toward any master's or doctoral degree at KU. All graduate-level courses will be included in the calculation of the cumulative graduate GPA. Undergraduate courses, even when the student enrolls as part of their graduate career, will not count toward the cumulative graduate GPA. Graduate courses counted as part of the undergraduate degree will not be counted in the cumulative graduate GPA. The student’s graduate GPA calculation will include any degree or certificate graduate course work completed at KU. Courses graded P, S, U, CR, NC, or I are excluded from the computation of the GPA.

### The I Grade: Incomplete Work

The I grade indicates course work that has been of passing quality but which is partially unfinished for good reason. Use of the I grade is optional in some grading scales but is not permitted by other scales (see below). Generally, the I grade is an appropriate option for enrollments other than thesis, dissertation, research, capstone, or the first semester of a two-semester course sequence.

As stated in the University Senate Rules and Regulations, Article II, Section 2.2.3.2 (http://policy.ku.edu/governance/USRR/#art2sect2):

“A student who has an I posted for a course must make up the work by the date determined by the instructor, in consultation with the student, which may not exceed one calendar year, or the last day of the term of graduation, whichever comes first. An I not removed according to this rule shall automatically convert to a grade of F or U, or the lapse grade assigned by the course instructor, and shall be indicated on the student's record.”

### Grading Scale for Regular Courses (two options)

**Grading Scale: A, B, C, D, F**

The basic system is an A, B, C, D, F scale, where:

- A designates above-average graduate work;
- B designates average graduate work;
- C designates passing but not average graduate work;
- C-, D and F designate failing graduate work.

**Grading Scale: A, B, C, D, F, I**

The basic system is an A, B, C, D, F, I scale, where:

- A designates above-average graduate work;
- B designates average graduate work;
- C designates passing but not average graduate work;
- C-, D and F designate failing graduate work;
- I designates incomplete work per definition earlier in this section.
Grading Scale for Research Courses including thesis and dissertation

**Grading Scale: A, B, C, D, F, P**

Departments/programs use this scale to grade their thesis, dissertation, capstone project, and approved thesis- or dissertation-equivalent courses. Other research courses are also graded using the A, B, C, D, F, P scale. The I grade is not appropriate for enrollment in thesis, dissertation, capstone project, or research courses and is not allowed by this grading scale.

In this grading scale the letter P indicates participation in coursework where evidence of performance may not be available. This grading scale is appropriate in two types of situations:

- In designated thesis, dissertation, approved thesis- or dissertation-equivalent, capstone, or research courses;
- In the first semester of two-semester sequence courses.

In any semester, an instructor has the option to assign a letter grade of A, B, C, D, or F, instead of P, when evidence about performance is available. Upon completion of thesis, dissertation, or research hours leading to a master's or doctoral degree, the P remains on the final transcript in all semesters for which it was recorded.

For departments/programs that use this scale, a letter grade (A, B, C, D, or F) must be assigned for a student's final semester of enrollment in thesis, dissertation, capstone, or research course work. The letter grade assigned characterizes the quality of the final product.

**Result Choices for Milestone Examinations**

**Honors, Satisfactory, Unsatisfactory**

Performance on milestone examinations may be graded Honors, Satisfactory, or Unsatisfactory.

These outcome grades are appropriate to the following milestone examinations:

- the general examination for the master's degree;
- the project defense for the master's degree;
- the thesis defense for the master's degree;
- the comprehensive oral examination for the Doctor of Nursing Practice (D.N.P.);
- the comprehensive oral examination for the Ph.D.; and
- the final examination for the Ph.D.

Use of the Honors designation is at the department's discretion.

**Other Grading Scales**

**Grading Scale: S, U, I**

The grades of S and U designate satisfactory (S) and unsatisfactory (U) performance. This grading scale is appropriate to three types of course: continuing education courses; workshop courses; and institute courses.

No more than 6 hours total of graduate course work graded S may count toward a degree. The S, U, I grading scale may be adopted at the department/program's discretion per the incomplete grade definition earlier in this section.

In courses numbered 800 or above, and for which specific authorization has been given, an instructor may report a grade of S for students who have satisfactorily attended the course but for whom it has not been possible to evaluate the quality of performance.

The S and U grades are not used in computing the grade-point average.

**Grading Scale: CR, NC**

The Credit (CR) or No Credit (NC) option is authorized for graduate students: a grade of CR will reflect work earning a C or better and the grade of NC will reflect work earning a C- or below. However, as outlined in USRR 2.2.8.6 (http://policy.ku.edu/governance/USRR/#art2sect2), no course graded CR or NC can count toward the satisfaction of the requirements for a graduate degree or a graduate certificate. This prohibition includes any courses taken to meet the Research Skills and Responsible Scholarship requirement. Please refer to the policy governing Research Skills and Responsible Scholarship (https://catalog.ku.edu/graduate-studies/kumc/#programstext) for more information.

**Graduate Credit**

**Criteria for Offering Graduate Credit**

The following three conditions must be met for a student to receive graduate credit for work satisfactorily completed at KU:

1. The student must have gained graduate admission.
2. The course must be numbered 500 level or above and have been approved for graduate credit by the appropriate school and the Graduate Council on the Medical Center campus.
3. The instructor must hold a current appointment to the Graduate Faculty.

**Minimum Grade for Graduate Credit**

A minimum grade of C is required for a course completed at KU to count for graduate credit. Grades of C- and below do not count toward fulfilling requirements and the course cannot be counted toward a degree or certificate.

**Credit by Examination**

Credit by examination is not accepted toward graduate degree or certificate programs.

**Graduate Course Work Expiration Dates**

Courses completed at KU, or transfer credits from another university, cannot be used to fulfill graduate degree requirements if these courses were completed more than ten (10) years prior to the final defense for doctoral candidates or graduation for master's
students. A request to make an exception to this policy must be approved by the program and the Dean of Graduate Studies.

Transfer Credit

Up to six hours of graduate credit taken at a regionally accredited graduate school may be transferred and applied to a master's degree at KU if the credits were taken before the final semester of enrollment at KU and have the approval of the program. Eight hours may be approved for transfer if the student holds a baccalaureate degree from KU. Graduate credit will not transfer for courses that were previously counted toward the requirements for an undergraduate or graduate degree, whether completed at KU or another institution.

No credit is actually transferred toward the doctoral degree, but programs may take relevant prior graduate work into consideration in setting up programs of study.

Graduate credit from another institution may not be transferred to a KU graduate certificate program.

Only work graded B (3.0 on a 4.0 scale) or higher may be transferred. KU does not accept transfer credit for courses that have been graded B- or below. KU also does not accept transfer for institutes, workshops, or life/work experience. Any exceptions to this policy must be approved by the department/program and the Dean of Graduate Studies.

In order to initiate the actual transfer of credits meeting the transfer credit guidelines, the transfer credit form in the Progress to Degree system must be submitted to Graduate Studies by the student’s department/program.

Graduate Student Oral Exams Attendance

Attendance

Ideally, all members of the committee are physically present at graduate student oral examinations. For M.S. students this includes the final general exam, project defense, capstone, or thesis defense. For Ph.D. students this includes the comprehensive oral examination, and the final oral examination (dissertation defense).

A majority of committee members must be physically present for an examination to commence; for doctoral oral examinations this requirement is 3 of the 5 members, for master’s oral examinations the requirement is 2 of the 3 members.

In addition, it is required that the student being examined, the chair (or co-chairs) of the committee, and the outside committee member (Ph.D. examinations) all be physically present at the examination or defense. Mediated attendance by the student, chair (or co-chairs) and outside member is prohibited. When a situation arises in which a member cannot be physically present, attendance via mediated means (tele/video-conferencing) is acceptable at the discretion of the committee chair (or co-chairs). In cases where the student prefers an examination in which all committee members are physically present, the student’s preference shall be honored.

A request for substitution of any members of the committee once approved by Graduate Studies through the Progress to Degree system must be approved by Graduate Studies in advance of the exam.

In the case of failure of technology during the examination, all members of the committee present must concur that the examination was substantially complete. If any member of the committee dissents, the examination is considered cancelled and must be rescheduled. The committee members at remote locations must be contacted to submit their decision concerning the assessment of the examination before the exam results are recorded.

The Office of Graduate Studies will manage consideration of and decisions on exceptions to the policy outlined above. Requests for exceptions to this policy shall be submitted in writing to the Dean of Graduate Studies. If exceptions are granted, Graduate Studies will request that a member of the departmental leadership (the department chair or graduate director) be present at the examination.

Graduate Student Oral Exams Committee Composition

The majority of committee members serving on a graduate student oral examination committee in most cases are in the candidate’s department/program of study.

Ph.D. Committees

Ph.D. doctoral committees are composed of at least five voting members all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2586) section of this catalog. The committee structure must adhere to the following requirements:

1. The chair of the committee must hold dissertation status. If the committee has co-chairs, at least one of the co-chairs must hold dissertation status.

2. One member must meet the requirements for serving as an outside member; i.e., be a KU faculty member holding regular or dissertation graduate faculty status and is not a faculty member holding graduate status in the candidate’s department/program. The outside member represents Graduate Studies and is a voting member of the committee, has full rights to participate in the examination, and reports any unsatisfactory or irregular aspects of the examination.

Master’s Committees

Master’s committees are composed of at least three voting members all of whom must be members of the Graduate Faculty as described in the Graduate Faculty (p. 2586) section of this catalog.

Grievance Policy and Procedures for Graduate Students

A graduate student who believes herself or himself unfairly or unlawfully treated in an academic matter may present a grievance to the academic department or appropriate program chairperson. Each academic unit has established grievance policies and procedures. Concerns regarding illegal discrimination or harassment should be reported to the Equal Opportunity Office. For academic misconduct issues, see the Academic Misconduct policy in this section of the catalog.

The grievance procedure may not be used as an appeal for a grade. Grades should be appealed at the department or program level. Committees established at the department, program or school level to hear grievances proceed in accordance with their own specific procedures.
and make recommendations to the appropriate administrative officers as
provided in those procedures. Appeals from the decision of a department
or program or school must be made to the Dean of Graduate Studies.

The appellate process is designed to ensure that due process has been
afforded an individual in the initial hearing. The Dean of Graduate Studies
will appoint the committee chair from the membership of the KUMC
Graduate Council. Two other members will be selected by the chair from
the Graduate Council and one other graduate faculty member selected
by the student complainant and a second graduate faculty member
selected by the accused. The selection of these faculty members shall
be acceptable to both parties. A student member will be selected by the
President of the Graduate Student Council. Care should be taken to
ensure that none of the members has a conflict of interest in this case.
This committee will examine all pertinent documents including student
records and interview the parties directly involved in the complaint as
well as other parties deemed necessary. Minutes of testimony will be
made available to both the complainant and accused parties after the
hearing is completed. It is essential that all parties retain confidentiality
of information gained through the hearing process. Both parties will be
provided an opportunity to respond to the minutes in writing before the
committee’s final recommendation is forwarded to the Dean of Graduate
Studies who will make the final determination. The documents provided to
the grievance committee will be retained in the Office of Graduate Studies
for a period of three years, after which time they will be destroyed. There
is no further appeal.

**Intellectual Property Policy**

All enrolled students are subject to the Board of Regents and KU
Intellectual Property Policies. The ownership of student works submitted
in fulfillment of academic requirements is retained by the creator(s). By
enrolling, the student gives the institution a nonexclusive royalty-free
license to mark on, modify, retain the work in the process of instruction,
or otherwise handle the work, as set out in the institution’s Intellectual
Property Policy or in the course syllabus. The institution does not have the
right to use the work in any other manner without the written consent of
the creator(s).

**Leave of Absence**

The Office of Graduate Studies may grant a leave of absence (LOA) from
an academic program for up to one academic year, with the possibility
of extension. The student must complete the official Leave of Absence
Checklist. A leave of absence may be granted in extraordinary
circumstances (e.g. cases of illness, emergency, financial hardship,
military leave, pregnancy/childbirth), to pursue family responsibilities,
or to pursue full-time activities related to long-range professional goals.
The LOA request must be submitted at the beginning of the semester.
Evidence of progress toward degree will also be a determining factor in
the decision to grant a leave. If the leave of absence is approved at the
program level, the program forwards the student’s request along with the
program’s recommendation to the Dean of Graduate Studies for approval.
If approved by the Dean of Graduate Studies, the time on leave from the
academic program will not be counted toward the maximum time granted
to complete a degree (doctoral, 8 years; master’s, 7 years).

All steps to complete a leave request are outlined on the Leave of
Absence Checklist. First, students discuss the leave with their mentor/
advisor and/or their Program Director. If those administrators believe
that the leave is the best path forward for the student, the student
completes the official Leave of Absence Checklist. Second, students
meet with individuals in the Registrar’s Office and Financial Aid to verify
understanding of how the leave could impact their enrollment, access
to campus resources, health insurance, and/or loans. Third, the student
completes the section of the form asking for details about their leave and
how they can be contacted. Fourth, the student returns the form to their
Program Director for a second signature that acknowledges the student
completed all steps. The form is then forwarded to the Dean of Graduate
Studies for a final approval. After the Dean of Graduate Studies approves
the Leave of Absence form, the form is forwarded to the Office of the
Registrar to be recorded in the student’s academic record.

When a student is ready to return from an LOA, the student must
complete the Request for Return from Leave of Absence Checklist. The
form requires the student to complete information about when they will
return as well as a signature from the Program Director. After the Program
Director approves the Return LOA Checklist, the Program Director will
send the form to the Office of Graduate Studies. The Office of Graduate
Studies will review and respond with an approval via email. Then, the
Office of Graduate Studies will send the form to the Office of the Registrar
to reactive the student in Enroll and Pay.

The Requests for Leave of Absence Checklist and for Return from
Leave of Absence checklists are on the Graduate Studies Policies and
Regulations page (http://www.kumc.edu/academic-and-student-affairs/
opags/graduate-studies/policies-and-regulations.html) of their department
website.

**Post-Comprehensive Enrollment for Doctoral Candidates**

Doctoral candidates are required, after passing the comprehensive
oral examination, to be continuously enrolled in one or more hours of
dissertation that both moves the student towards degree completion and
reflect, as accurately as possible, the candidate’s demands on faculty
time and university facilities. During this time, until all requirements for
the degree are completed (including the filing of the dissertation) or until
18 post-comprehensive hours have been completed (whichever comes
first), the candidate must enroll for a minimum of 6 hours a semester and
3 hours a summer session.

Post-comprehensive enrollment may include enrollment during
the semester or summer session in which the comprehensive oral
examination has been passed. If after 18 hours of post-comprehensive
enrollment the degree is not completed, the candidate must continue
to enroll each semester and each summer session until all degree
requirements have been met. The number of hours of each enrollment are
determined by the candidate’s advisor and must reflect as accurately as
possible the candidate’s demands on faculty time and university facilities.

**Posthumous Degrees**

In order to recognize the achievement of students who have died, the
University of Kansas may grant undergraduate, graduate and professional
degrees posthumously. This policy applies to deceased students who
were in good academic standing at the time of death and enrolled for their
final semester at the University of Kansas, as determined by the dean of
the school. Requests for posthumous degrees must be initiated by the
student’s academic department and approved by the dean of the school
conferring the degree. Each case will be determined on its own merits.

The dean of the school posthumously conferring the degree should
contact the Office of the University Registrar to confirm the correct
information for the degree to be conferred, notify the Vice Provost for
Academic Affairs, and coordinate with the Office of the Chancellor for
notification to the family. Posthumous degrees are conferred during the semester in which the student was expected to graduate. The Chancellor informs the student’s family in writing of the posthumous award of the degree.

**Progress to Degree Policy**

The Progress to Degree system is used by Graduate Studies to track and monitor graduate student progress. The forms should be used to report items such as change in degree plan within the same department, transfer credit towards a master’s degree, dismissal from the program, master’s general exam, master’s thesis, capstone defense, project defense, or oral comprehensive, and final exam (dissertation defense) for PhD students. This system is used by designated faculty or staff to request Graduate Studies approval for the various functions indicated. The Registrar’s Office receives notification when forms approved and enters relevant information in the student record system.

**Research Compliance**

There are certain types of research or activities that may not be pursued unless specific prior approval and/or training has been obtained. Students should refer to KUMC Office of Compliance (http://www.kumc.edu/compliance.html) policies.

**Student Responsibilities**

All graduate students are responsible for informing themselves of requirements and policies of the Office of Graduate Studies. They are also expected to be familiar with the regulations and requirements of their departments and of their graduate programs. Program Graduate Directors and the Office of Graduate Studies staff are ready to answer questions and offer counsel. It is each graduate student’s responsibility to know and observe all regulations and procedures relating to the graduate degree program the student is pursuing. In no case will a regulation be waived or an exception be granted because students plead ignorance of, or contend that they were not informed of, requirements, regulations, procedures, and deadlines. Responsibility for following all policies and meeting all requirements and deadlines rests with the student.

**Undergraduate Student Enrollment in Graduate Level Courses for Undergraduate Credit**

Well-qualified undergraduate students may be permitted to enroll in 800- or 900-level courses for undergraduate credit with the approval of the instructor and the student’s advisor. For graduate courses offered by the KUMC campus, the student must bring a Count Towards Degree form signed by the instructor, a letter of explanation and recommendation from the advisor, and current academic record to the Office of Graduate Studies for approval. If approved, the Office of Graduate Studies signs the Count Towards Degree form, which the student must then present to the staff in the KUMC Registrar’s Office if currently enrolled as a KUMC undergraduate or to the Student Records Center in Lawrence if currently enrolled as Lawrence undergraduate. The appropriate office staff (KUMC Registrar’s Office or Student Records Center) will enroll the student in the course(s). Courses taken for undergraduate credit may not be transferred to graduate credit.
Office of Academic Success

Academic Success supports the intellectual engagement and pursuit of learning by KU students throughout their academic career, from orientation to graduation and beyond. Courses offered teach students to navigate the university, explore intellectual interests, maximize experiential learning opportunities, and prepare students for a meaningful career after graduation.

- Undergraduate Certificate in Arts Engagement (p. 2605)
- Undergraduate Certificate in Service Learning (p. 2606)

Courses

UNIV 1. Math Skill Development I. 2 Hours.
Offered to provide opportunities for deeper understanding of MATH 2 content through interactive learning. The course will support students preparing to take Kansas Algebra (KAP) course (Math 2). The content of the course uses the MATH 2 foundations and emphasizes helping students generate a mathematical mindset, understanding how learning occurs in mathematics, and strategies to be successful in future mathematics coursework. Students will engage in discussions surrounding their roles in mathematical learning and practice using mathematical thinking strategies to improve understanding. Prerequisite: Open only to students withdrawing from MATH 2 during the semester. LEC.

UNIV 101. Orientation Seminar. 1-2 Hours.
This course will provide an introduction to the University community and the value and role of higher education in our society, strategies for successful transition to and participation in that community, exploration of the University commitment to diversity and multiculturalism, and information about University resources and procedures. Prerequisite: Eligible students must have fewer than thirty credit hours from the University of Kansas. LEC.

UNIV 102. Orientation Seminar: KU Academic Accelerator Program. 1 Hour.
This course provides an introduction to the University for International Students enrolled in the KU Academic Accelerator Program (KUAAP). The course focuses on resources and resource units, experiences and opportunities, as well as personal and academic expectations. Prerequisite: Students must be enrolled in KUAAP. LEC.

UNIV 103. Orientation Seminar: KU Academic Accelerator Program. 1 Hour.
This course continues the introduction of students to the University, University resources and expectations begun in UNIV 102. Instructors create assignments to help students explore academic, personal and professional goals. Students have opportunities to develop and apply their individual strengths to meet those goals and learn about the diverse community of the University of Kansas. Prerequisite: Students must be enrolled in KUAAP. LEC.

UNIV 104. Orientation Seminar: KU Academic Accelerator Program. 1 Hour.
This course concludes the introduction of students to the University, University resources and expectations begun in UNIV 102 and UNIV 103. Instructors create assignments to further students’ academic, personal and professional goals. Students have opportunities to further develop and apply their acquired skills to meet those goals and learn more about the diverse community of the University of Kansas. Prerequisite: Students must be enrolled in KUAAP. LEC.

UNIV 120. Introduction to Engaged Learning. 2 Hours.
Explore your interests through hands-on mini experiences in service learning, study abroad, undergraduate research, and internships. With individualized support from your instructor in this small course, you’ll test out various experiences both on and off campus, connect to relevant KU departments, and prepare materials needed to apply to these experiences after completing the course. LEC.

UNIV 299. Service Learning Project. 0-1 Hours.
Service Learning Project. Graded on a satisfactory/unsatisfactory basis. LEC.

UNIV 492. Special Projects in the Community. 2 Hours AE52.
UNIV 492 begins with the premise that community service is a valuable response to the social problems that we face in today's society and that understanding of self, knowledge of social issues, and commitment to service are essential for effective engagement in communities. Students will be introduced to existing responses to social problems and will work to formulate their own individual and collective responses. Course is offered in partnership with KU Alternative Breaks. Alternative Breaks works to motivate college students to become active and present members of their own communities, to recognize the different needs of local, national, rural and urban communities, and to engender an understanding of how to be involved in the betterment of society. LEC.

UNIV 602. Sponsored Educational Experiences. 0 Hours AE61.
Goal 6 can be met through an approved experience designed by student and faculty member. Students with a faculty sponsor may propose a unique experience to fulfill Goal 6. Experiences must meet the following set of principles that define a sponsored educational experience. 1) Intention, Preparedness and Planning; 2) Reflection; 3) Monitor Progress; 4) Assessment and Evaluation. In addition, each educational experience considered for the KU Core should have a specific number of contact hours equal to at least 3 credit hours or 120 hours in and out of the classroom over the semester; and an outcome should include a product representative of the student’s effort. Graded on a satisfactory/unsatisfactory basis. IND.

Undergraduate Certificate in Arts Engagement

The Arts Engagement Certificate provides undergraduate students with a broad introduction to the arts through a combination of coursework, event attendance, and hands-on experiences. The Arts Engagement Certificate enables you to explore your interest in the arts of any medium and art education regardless of your major.

By completing the Arts Engagement Certificate, you will:

- Connect with your campus through engaging with the diverse arts opportunities available at KU.
- Explore the world from multiple and alternate points of view through art.
- Communicate your broad cultural knowledge and the value you place on the arts to future employers with the Certificate appearing on your official KU transcript.
• Achieve personal satisfaction by pursuing your interest in the arts by experiencing and producing creative works.

The Arts Engagement Certificate requires three different components: classes, experiences, and written reflections. Classes and experiences can happen in any order. Most students will attend events during the same semesters that they are taking qualifying courses. The final written reflection should be completed after the coursework and event attendance is completed.

Classes

Complete at least 2 arts classes, totaling a minimum of 6 credit hours, with a grade of C or better. These 2 classes should each be from a different school/department.

All classes offered by the following schools and departments qualify:

<table>
<thead>
<tr>
<th>Column One</th>
<th>Column Two</th>
</tr>
</thead>
<tbody>
<tr>
<td>Architecture (<a href="https://architecture.ku.edu/">https://architecture.ku.edu/</a>)</td>
<td>Dance (<a href="https://dance.ku.edu/">https://dance.ku.edu/</a>)</td>
</tr>
<tr>
<td>Design (<a href="https://design.ku.edu/">https://design.ku.edu/</a>)</td>
<td>Creative Writing (<a href="https://english.ku.edu/courses/">https://english.ku.edu/courses/</a>)</td>
</tr>
<tr>
<td>Film &amp; Media Studies (<a href="https://film.ku.edu/">https://film.ku.edu/</a>)</td>
<td>History of Art (<a href="https://arthistory.ku.edu/">https://arthistory.ku.edu/</a>)</td>
</tr>
<tr>
<td>Music (<a href="https://music.ku.edu/">https://music.ku.edu/</a>)</td>
<td>Theatre (<a href="https://theatredance.ku.edu/">https://theatredance.ku.edu/</a>)</td>
</tr>
<tr>
<td>Visual Art (<a href="https://art.ku.edu/">https://art.ku.edu/</a>)</td>
<td>Honors classes taught by arts faculty (<a href="https://honors.ku.edu/">https://honors.ku.edu/</a>)</td>
</tr>
</tbody>
</table>

Experiences

There are two options to choose from in completing this certificate requirement:

Option A

• Attend 6 art events from 3 different arts areas. (These can be any events offered on campus). Example: 2 dance performances, 2 design lectures, and 2 visual art exhibitions. Write a reflection over each event and submit it on Jayhawk Ready (https://jayhawkready.tuapath.com/) within 2 weeks event attendance.

Option B

• Attend 3 art events from 3 different arts areas. Write a reflection over each event and submit it on Jayhawk Ready within 2 weeks of event attendance.

• Complete a semester long, hands-on arts experience (e.g., an additional class - in a different school/department than the courses used to fulfill the coursework requirement - producing creative work; an arts-related internship; or participating in campus music, theatre, or dance productions). Then, submit a written reflection (at least 600 words) and some kind of artifact from your experience on Jayhawk Ready (https://jayhawkready.tuapath.com/). This can be photo documentation of a project with descriptions, video, content that you produced during an internship, a final reflection that was required to complete a class, etc.

You must complete either Option A or Option B to satisfy this component of the certificate.

Most arts events offered at the University of Kansas will count toward the Arts Engagement Certificate. Here is a general list of arts venues and types of arts events that can be count toward your certificate:

• All KU theatre (http://kutheatre.com/performances/) performances
• All performances and art-related talks at the Lied Center (http://lied.ku.edu/calendar/) & master classes
• All exhibitions, performances, and art related talks at Spencer Museum of Art (https://spencerart.ku.edu/calendar/)
• All exhibitions, performances, and art related talks at Nelson Atkins (https://www.nelson-atkins.org/)
• All School of Music (https://music.ku.edu/school-music-calendar/) events
• Senior recitals, thesis exhibitions, and student showcases
• Visiting artists and art-related lectures on campus (e.g. at The Commons, Kansas Union, Hall Center, departmental guest artists, etc.)
• Optional, hands-on workshops offered by participating Arts Engagement Departments
• Film screenings with discussions
• Artist talks, exhibitions, and theatre, music, and dance performances at the Lawrence Arts Center (https://lawrenceartscenter.org/calendar/)
• Art Lectures at the Lawrence Public Library (https://lawrence.bibliocommons.com/events/search/index/)
• Artist talks and exhibitions at the Student Union Gallery in the Kansas Union
• All exhibitions at the Art and Design Building Gallery
• Final Fridays (https://unmistakablylawrence.com/explore/play/unmistakable-events/final-fridays/?cat=19#/gallery/recent) (Lawrence) or First Fridays (http://kccrossroads.org/first-fridays/) (Kansas City) are fine to attend for visual art; however, you need to write about a specific work of art or exhibition.

If you have questions about whether or not an event can count, please e-mail artsengagement@ku.edu (artsengagement@ku.edu)

Final Reflection

Answer 6 written reflection essay questions and take a short exit questionnaire on Jayhawk Ready. Preview the final reflection questions (PDF) (http://artsengagement.ku.edu/sites/artsengagement.ku.edu/files/docs/Arts%20Engagement%20Final%20Reflection%20Questions.pdf).

Undergraduate Certificate in Service Learning

• Service 101 reflection
  • Service 101 is an introduction to service pathways and ethical service work.
  • This is not a class. Resources to help you complete this component will be available on the Center for Service Learning website. After reviewing the online Service 101 resources, you will need to respond to some reflection questions.
  • Service 101 can be completed anytime during the certification process. The Service 101 reflection questions must be submitted and approved before you can complete the final reflection.
• 1 service learning course and 1 social awareness course
• Take 1 designated service-learning (SL) class and 1 social awareness (SA) class. View eligible classes. (https://csl.ku.edu/eligible-courses-1/)

• Service learning classes must be taken for a minimum of 3 credit hours. Classes that qualify toward the certificate vary by semester.

• Some approved courses offer optional service or multiple projects that serve for-profit and non-profit organizations. In order for your service to be approved for certificate, you must have participated in the service learning component of the course, and the service must in non-profit sector.

• You may have taken a SL or SA service-learning class that is not included on the list of courses. Please suggest any course to the CSL Coordinator that you feel should be included. We will seek approval to have the class added to the list.

• 1 social awareness course

• 60 hours of service
  • Complete a minimum of 60 hours of service. Service hours from your service learning class count toward the cumulative 60 hours needed to complete the certificate. If the service hours from your courses fall below 60 hours, you may complete additional service in one of the following ways:
    • participate in an alternative break trip
    • volunteer at a non-profit agency
    • complete another service learning course
  • If you continue service at an agency beyond what is required for your service learning class, you may use those hours to complete this component. Contact us with questions or to discuss other options for completing the additional service.
  • If you complete service hours that are not part of a class, you will need to fill out an additional service verification form and upload it to your submission.

• Final reflection
  • Write a reflection summary including all of your service experiences. Because you will be including all of your service experiences in the reflection, you may not submit the reflection or attend a session prior to completing the majority of your service experiences.

To complete the reflection, you must have registered for the certificate, completed Service 101, and finished the majority of your coursework and service.
Office of International Affairs

International Affairs (https://international.ku.edu/) is the central administrative office for the international division, empowering Jayhawks from all 50 states and over 105 nations to achieve their full potential by mobilizing discovery, research, and service across geopolitical borders. Academic programs include English language instruction provided through the Applied English Center (http://aec.ku.edu/), and a Global Awareness certificate administered by Study Abroad and Global Engagement (https://studyabroad.ku.edu/).

Applied English Center

The Applied English Center (AEC) has a long and illustrious history of serving non-native English speaking students in their goals of English language learning. The program was founded in 1964 and was one of the first intensive English programs in the United States. Since then, the AEC has expanded its reach and now offers additional courses and programs to serve a wide range of constituents.

The AEC offers several learning opportunities:

• Intensive English coursework at any skill level (http://aec.ku.edu/overview/)
• For-credit courses to support degree-seeking KU students (http://aec.ku.edu/courses-ku-international-students/)
• Short-term Study (https://aec-clone.drupal.ku.edu/isp-hp/)
• Online Programs (https://aec-clone.drupal.ku.edu/online-programs-intro/)
• Customized courses for departments across campus (https://aec.ku.edu/ku-outreach-1/
  • Legal English Program (https://aec.ku.edu/legal-english-program/)
  • TEFL Certificate Program (https://aec.ku.edu/tefl-certificate/)

Additionally, we offer a wide range of student support services:

• Cross-cultural Advising (https://aec-clone.drupal.ku.edu/advising-counseling/)
• Conversation Groups (https://aec-clone.drupal.ku.edu/aec-activities/)
• Access to the Learning English Online (LEO) Computer Lab (https://aec-clone.drupal.ku.edu/leo-lab/)
• The Point Tutoring Services (https://aec-clone.drupal.ku.edu/point/)
• SPEAK Test (http://aec.ku.edu/speak-test-and-testing-information/)

Please visit the Applied English Center (http://aec.ku.edu/) website for more information about our programs and services.

For information about admission requirements, please visit the International Admissions (https://world.ku.edu/english-requirements/) website. Admission to KU does not constitute a waiver of the University of Kansas English proficiency requirement. Students may be required to take the English Proficiency Exam and may be required to take courses with the Applied English Center.

Undergraduate Certificate in Global Studies

Global Awareness Program

• Open to all undergraduates
• Complete 2 components to earn GAP OR Complete all 3 to earn GAP with Distinction
• Noted on official transcript
• Offers a competitive advantage and a unique way to highlight your international experience

Academics

Domestic Students

• A minimum of 2 semesters of college-level study in the same modern foreign language
• AND 3 courses (http://gap.ku.edu/course-list/) with a modern, international focus from 3 different departments (2 different departments for STEM students)

International Students

• Pass the English Proficiency Exam through the Applied English Center (AEC), or receive an English requirement waiver
  • Native English-speakers need to pass two semesters of a foreign language
• AND 2 courses with a modern international focus and 1 course (https://gap.ku.edu/us-focused-courses/) with a U.S. focus.

On-Campus Cultural Activities

• Participate in 20 hours of on-campus activities that have an international and/or cultural focus outside of your ethnicity and/or religion.
• Answer reflection questions on your activities

International Experience

Domestic students

• Participate in a KU-approved study/research/internship abroad program for credit.
• Once you return, answer short-answer reflection questions or participate in a discussion group

International students

• Your time at KU counts as your international experience. Answer short-answer reflection questions or participate in a discussion group
Courses

AEC 1. Level 1 Support Course. 2 Hours.
In this class, learners will look at vocabulary in authentic contexts. Students examine vocabulary for depth, considering the types of word knowledge needed to know, to understand, and to use words correctly. Examples of this data include collocations, synonyms, antonyms, and word parts (prefixes, roots, and suffixes). This course also focuses on increasing the breadth of learner vocabulary. Prerequisite: Placement by the Applied English Center. LEC.

AEC 2. Level 2 Support Course. 2 Hours.
Verbs enable language users to convey multi-dimensional messages, allowing them to travel precisely back and forth in time and indicate what is possible, permissible and polite. Yet many students see and use verbs in a one-dimensional way, focusing on the definition of the verb but disregarding the time message of tense and the nuance of modals. This class will address that discrepancy. Although students will practice verb forms, the class concentration will be on the recognition and accurate use of the functional message of verb tenses and modals. Specifically, students will analyze the forms and functions of targeted verb tenses, select appropriate verb tenses in written and oral activities and expand control of sentence-level grammar. Prerequisite: Placement by the Applied English Center. LEC.

AEC 3. Level 3 Support Course. 2 Hours.
This course supports the Level 3 core courses by emphasizing and targeting reading skills in an effort to further improve their reading comprehension, increase their reading fluency and develop their vocabulary as demonstrated in their writing and speaking. Reading selections target comprehension and critical thinking skills while timed word and reading selections are used to promote reading speed and fluency. Vocabulary development is targeted through morphemic analysis of roots and affixes and study of context clues. Prerequisite: Placement in this course by Applied English Center. LEC.

AEC 4. Elective: Special Topics in: ____. 2 Hours.
Skill-based or content-based special topics for upper level students enrolled in at least one Applied English Center core course. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 5. Short Term Program with Applied English Center Course Enrollment: ____. 0-16 Hours U.
Skill-based special topics at appropriate level(s) for short term program students attending core AEC courses for a partial term. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 6. Anticipated Future Applied English Center Credit Hours. 1-16 Hours U.
This course is a placeholder for future anticipated Applied English Center credit hour enrollment. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 7. Short Term Programs Self-Contained Enrollment: ____. 0-16 Hours U.
Specialized English language courses for short term program students. Courses focus on the use of English in particular fields of study or employment based on program objectives. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 10. Diagnostic Tests for Level 1. 1-16 Hours U.
Diagnostic test. Enrollment required for students who take proficiency test at semester start and place into level 1 courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

AEC 82. Classroom Communication for International Teaching Assistants. 3-4 Hours U.
Practice of communication skills: pronunciation, fluency and vocabulary development, question and answer techniques, paraphrasing and discussion; video-recorded practice teaching mini-lectures or demonstrations with feedback by instructor in tutorial sessions and by other native speakers during presentations. Open only to graduate students or seniors near graduation. Four credits in the fall and spring semesters; three credits in the summer term. Prerequisite: Students must have completed all AEC courses except AECG 151 or AECR 151, have a score of at least 35 on the SPEAK test; and have written permission from the Applied English Center. LEC.

AEC 90. English Proficiency Test. 0 Hours U.
Final proficiency test. Required of all students enrolled in one or more Applied English Center courses, except AEC 82. Graded satisfactory/unsatisfactory. LEC.

Courses

Basic English is a fully-integrated English as a Second language course designed for students at the lowest level of English proficiency. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, speaking, listening, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at a beginning to middle A1 CEFR proficiency level. Specifically, students will be able to understand and use familiar everyday expressions and very basic phrases in both speech and writing. Students will also be able to interact in a simple way provided the other person talks slowly and clearly. LEC.

Courses

AECL 13. Listening, Speaking and Grammar for Academic Purposes 1. 3-8 Hours U.
Students in Level 1 Listening/Speaking/Grammar are at the beginning of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, speaking, listening, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the A2 CEFR proficiency level. Specifically, students will be able to communicate and understand simple, foundational English relevant to academic study. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECL 20. Listening, Speaking and Grammar for Academic Purposes 2. 3-8 Hours U.
Students in Level 2 Listening/Speaking/Grammar are at a high-beginning/low-intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B1 CEFR proficiency level. Specifically, students will be able to understand the main points of clear standard input regularly encountered in academic study and can produce simple connected speech on relevant topics. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECL 30. Listening, Speaking and Grammar for Academic Purposes 3. 3-8 Hours U.
Students in Level 3 Listening/Speaking/Grammar are at an intermediate level of English for Academic Purposes study. The purpose of this course
is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2 CEFR proficiency level. Specifically, students will be able to understand the main ideas of lectures on both concrete and abstract topics and will be able to interact with a degree of fluency and spontaneity that makes regular interaction with native speakers possible. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECL 140. Listening, Speaking and Grammar for Academic Purposes 4. 3-8 Hours U.
Students in Level 4 Listening/Speaking/Grammar are at a low-advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in listening, speaking, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas and begin to recognize implicit meaning in lectures on both concrete and abstract topics, and will be able to begin to express him/herself fluently and spontaneously for academic purposes. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECL 151. Listening, Speaking and Grammar for Academic Purposes 5. 3-7 Hours U.
Students in Level 5 Listening/Speaking/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students strengthen and refine their English skills in listening, speaking, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer speech and recognize implicit meaning in lectures on both concrete and abstract topics. Students will also be able to express themselves fluently and spontaneously and use language flexibly and effectively for academic purposes. Prerequisite: Placement in this course by the Applied English Center. LEC.

Courses

AECO 21. University Life in the U.S. 1. 1 Hour.
This is the first course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this first course, students will learn about the U.S. university system, be introduced to campus culture in the U.S., discover what resources and support are available for students at U.S. universities, and explore different aspects of student life. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas. LEC.

AECO 22. University Life in the U.S. 2. 1 Hour.
This is the second course in a two-course series whose purpose is to introduce and acclimate students to U.S. university life and culture. In this second course, students will become familiar with U.S. academic culture and expectations, discover and utilize learning strategies that will be particularly helpful in U.S. classrooms, understand what technology skills are needed to succeed and learn about how to apply to U.S. universities. While language development is not the primary objective of this course, students will be able to self-assess their language skills through their ability to complete course activities. Additionally, students will take a language assessment at the end of the course that will give them an idea of their English proficiency and where they would potentially begin their study should they choose to attend the University of Kansas. LEC.

AECO 51. Intensive English Online 1. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Low B1 to Mid B1 CEFR range, and is the first level of an eight-level, fully online program. LEC.

AECO 52. Intensive English Online 2. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B1 to High B1 CEFR range, and is the second level of an eight-level, fully online program. LEC.

AECO 53. Intensive English Online 3. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Low B1+ to Mid B1+ CEFR range, and is the third level of an eight-level, fully online program. LEC.

AECO 54. Intensive English Online 4. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B1+ to High B1+ CEFR range, and is the fourth level of an eight-level, fully online program. LEC.

AECO 55. Intensive English Online 5. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Low B2-Mid B2 CEFR range, and is the fifth level of an eight-level, fully online program. LEC.

AECO 56. Intensive English Online 6. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B2 to High B2 CEFR range, and is the sixth level of an eight-level, fully online program. LEC.
AECO 57. Intensive English Online 7. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the High B2 to Mid B2+ CEFR range, and is the seventh level of an eight-level, fully online program. LEC.

AECO 58. Intensive English Online 8. 6.5 Hours.
This integrated skills course focuses on the language and academic skills students will need to be successful in a university program of study. Instruction will be given in reading, writing, listening and speaking. Grammar and pronunciation will also be taught in order to increase students’ accuracy and fluency. Students will be exposed to content and vocabulary they will likely encounter in their course of study. This course targets students at the Mid B2+ to High B2+ CEFR range, and is the last level of an eight-level, fully online program. LEC.

AECO 81. Staying Current: Professional Development for EFL Teachers. 2 Hours.
This practical and project-oriented course is for current EFL teachers who want to enhance their professional knowledge and skills. The course has two foundational modules: Enhancing Planning and Engaging the EFL learner. Enhancing Planning builds on foundations of lesson planning through analyzing strong lesson planning features, addressing areas of weakness in plan development, applying new strategies in lesson sequence, and aligning courses with intended outcomes. Engaging the EFL learner is a multifaceted approach to creating a dynamic classroom through cultivating classroom management, using technology and authentic materials, and adapting materials and lessons. Course participants will also participate in two specialized modules: pedagogical grammar and pronunciation. Pedagogical grammar and pronunciation will focus on considerations and best practices in various teaching contexts. Participants will apply what they have learned by developing activities and strategies ready to be used in a classroom setting. LEC.

Courses

AECR 13. Reading, Writing and Grammar for Academic Purposes 1. 3-8 Hours U.
Students in Level 1 Reading/Writing/Grammar are at the beginning of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce written language at the A2 CEFR proficiency level. Specifically, students will be able to communicate and understand simple, foundational English relevant to academic study. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 20. Reading, Writing and Grammar for Academic Purposes 2. 3-8 Hours U.
Students in Level 2 Reading/Writing/Grammar are at a high-beginning/low-intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B1 CEFR proficiency level. Specifically, students will be able to understand the main points of clear standard input regularly encountered in academic study and produce simple connected text on relevant topics. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 30. Reading, Writing and Grammar for Academic Purposes 3. 3-8 Hours U.
Students in Level 3 Reading/Writing/Grammar are at an intermediate level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2 CEFR proficiency level. Specifically, students will be able to understand the main ideas of complex text on both concrete and abstract topics and will be able to produce clear, detailed text on a wide range of subjects. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 140. Reading, Writing and Grammar for Academic Purposes 4. 3-8 Hours U.
Students in Level 4 Reading/Writing/Grammar are at a low advanced level of English for Academic Purposes study. The purpose of this course is to help students develop and strengthen their English skills in reading, writing, grammar and vocabulary, and to prepare them for academic English learning at higher levels. By the end of this course, students will be able to produce language at the B2/C1 CEFR proficiency level. Specifically, students will be able to understand the main ideas of complex text on both concrete and abstract topics and begin to recognize implicit meaning. Students will also be able to produce clear, detailed text on a wide range of subjects and begin to demonstrate control of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECR 151. Reading, Writing and Grammar for Academic Purposes 5. 3-7 Hours U.
Students in Level 5 Reading/Writing/Grammar are at an advanced and final level of English for Academic Purposes study. The purpose of this course is to help students strengthen and refine their English skills in reading, writing, grammar and vocabulary. By the end of this course, students will be able to produce language at the C1 CEFR proficiency level. Specifically, students will be able to understand a wide range of demanding, longer texts, and recognize implicit meaning and will be able to use language flexibly and effectively for academic purposes. Students will also be able to produce clear, well-structured detailed texts showing controlled use of organizational patterns, connectors and cohesive devices. Prerequisite: Placement in this course by the Applied English Center. LEC.

Courses

AECT 1. Special Enrollment in English as a Second Language Non-Credit Tutorial: ___, 1-16 Hours U.
Individualized schedule of instruction in one or more language skills at appropriate level(s) for students enrolling in level 1, 2, or 3 AEC courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

AECT 82. Tutorial in Classroom Communication for International Teaching Assistants: ___. 2-4 Hours U.
Improve English communication skills: work on pronunciation and grammatical accuracy and fluency using speech recognition software and by presenting mini-lectures that are video recorded for review. Receive individual feedback and prioritization of tasks in weekly tutorial. Special emphasis is placed on classroom communication strategies. Open only to graduate students or seniors near graduation. Variable hour enrollment dependent on student need. Prerequisite: Students must have completed all AEC courses except AECG 151 or AECR 151, have a score of at least 35 on the SPEAK test, and have written permission from the Applied English Center. LEC.
**Courses**

**AESP 1. Applied English Center Special Topics: _____, 1-3 Hours.**
This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics. LEC.

**AESP 160. Applied English Center Special Topics: _____, 0-3 Hours.**
This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics. LEC.

**Courses**

**AECT 101. Special Enrollment in English as a Second Language For-Credit Tutorial: _____, 1-16 Hours U.**
Individualized schedule of instruction in one or more language skills at appropriate level(s) for students enrolling in level 4 or 5 AEC courses. Prerequisite: Placement in this course by the Applied English Center. LEC.

**AESP 1. Applied English Center Special Topics: _____, 1-3 Hours.**
This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics. LEC.

**AESP 160. Applied English Center Special Topics: _____, 0-3 Hours.**
This course is designed by the Applied English Center to meet the needs of international students of varying majors, whose first language is not English. These courses are available in several different areas and topics. LEC.

**Courses**

**EAP 101. English for Academic Purposes I 6 Hours U.**
A general introduction to academic English for students in term one of the AAP3 track of the KU Academic Accelerator Program (KU AAP). The course utilizes materials from textbooks and short lectures appropriate for use in courses in the humanities, social sciences, and sciences. The focus is on the use of English and academic strategies necessary to access, understand, recreate, and critically discuss disciplinary content typical of lower division academic courses. Students read textbook chapters, listen to short academic lectures, take tests, write papers, and give oral presentations on topics from various disciplines. This course is paired with EAP 111 and instructors collaborate to teach students how to write a research paper. Prerequisite: Placement in this course is by the Undergraduate Accelerator Program. Students must be concurrently enrolled in or have previously taken EAP 111. LEC.

**EAP 102. English for Academic Purposes II 3 Hours U.**
An advanced academic English course that helps KU AAP students expand their ability to use English to access, understand, re-create, and critically discuss disciplinary content for American Studies 100, a lower division academic class. EAP 102 emphasizes academic strategies and the use of vocabulary, collocations, grammar, and larger pieces of discourse to express ideas and relationships among the concepts central to AMS 100. Students will demonstrate knowledge of academic English based on content from the American Studies course through class discussions and activities, oral presentations, and academic papers. Prerequisite: Completion of EAP 101 with A, B, or C; or placement upon arrival testing. Students must be concurrently enrolled in or have previously taken AMS 100. LEC.

**EAP 111. Information Literacy 1 Hour U.**
An advanced academic English course focusing on introducing the concepts and best practices of information literacy including the critical thinking skills essential to identifying information to be researched, deciding where to search for information, gathering and evaluating sources, avoiding plagiarism by citing sources appropriately, and presenting information effectively. The course emphasizes the process of researching a topic related to concepts taught in EAP 101. Prerequisite: Placement in this course is by the Undergraduate Accelerator Program. LEC.

**EAP 121. English Grammar for Academic Purposes I 2 Hours U.**
A two-credit, high-intermediate grammar course designed to review grammatical structures used in academic disciplines. Students will apply these grammatical structures to freshman-level spoken and written assignments. The focus is on organization, grammatical accuracy, word choice, and general comprehensibility. Prerequisite: Placement in this course is by the Undergraduate Accelerator Program. LEC.

**EAP 122. English Grammar for Academic Purposes II 1 Hour U.**
A one-credit, advanced grammar course that focuses on the grammatical structures used in academic research in humanities, social sciences and natural sciences. Students explore the vocabulary, phrases and grammatical structures necessary to discuss and conduct academic research. There is an intense focus on overall comprehensibility, lexical choice, and grammatical accuracy. Prerequisite: Completion of EAP 121 with A, B, or C. LEC.

**EAP 123. Integrated English Grammar for Academic Purposes. 1 Hour.**
EAP 123 is a one-credit advanced grammar course that focuses on the lexical and grammatical expression of key concepts in EVRN 170 and 171. It is intended for KUAAP students entering the first semester of the AAP 2 program. Students explore the vocabulary, phrases, and grammatical structures necessary for accurate and direct responses to prompts and short-answer questions that reflect the content of EVRN 170 and 171. There is an intense focus on overall comprehensibility, lexical choice, and grammatical accuracy, as demonstrated in writing assignments and other tasks. Prerequisite: Placement in this course is by the Undergraduate Accelerator Program. Students must be concurrently enrolled in or have previously taken the corresponding EVRN course for this grammar course. LEC.

**EAP 601. English for Professional Purposes 4 Hours.**
An advanced English preparatory course that helps students expand their ability to use English to access, understand, re-create, and critically discuss disciplinary content for graduate level academic classes. The class emphasizes academic strategies and the use of vocabulary, collocations, grammar, and larger pieces of discourse to express ideas and relationships among the concepts central to these courses. Students will write papers and give oral presentations based on content from the disciplines. Prerequisite: Participation in the KU MAP program. LEC.

**EAP 602. English for Specific Purposes 2 Hours.**
An advanced grammar course that focuses on building fluency through an applied approach that reinforces the specific language skills necessary to work in a particular field. Content will include the lexical and grammatical expression of key concepts in graduate courses in term 1 of the MAP2 program. The grammar course is created in collaboration with faculty who teach the associated graduate courses. The students explore the vocabulary, phrases, and grammatical options necessary for accurate and direct responses to prompts and short-answer questions. Prerequisite: Participation in the KU MAP Program. LEC.

**Courses**

**GSP 707. Professional Presentations in the American Academy. 2 Hours.**
A course that provides illustrative models and examples, practice, and feedback to allow mastery of professional, informative, and engaging professional and disciplinary presentations. Students will learn the major creative components and organizational structures for professional and conference presentations including: introductions, poster sessions, short lectures or research presentations, and meetings. Students will practice using appropriate delivery modes and skills and develop visual aids for presentations. (Same as GS 707.) Prerequisite: Participation in the KU MAP program. LEC.
GSP 751. Introduction to Graduate Writing in US Institutions. 2 Hours.
A course that prepares students to meet the challenges of advanced academic writing in their chosen field or major by expanding their repertoire of research-related vocabulary, structures, and rhetorical patterns. Students will become familiarized with professional and research writings. Emphasis is placed on citing and quoting primary materials, organizational strategies, and grammar, editing, and usage. (Same as GS 751.) Prerequisite: Participation in the KU MAP program. LEC.
Reserve Officers Training Corps

The University of Kansas is one of only 37 U.S. universities with a full offering of Army, Air Force, and Naval ROTC programs. These programs are integrated into the mainstream of campus activities. All ROTC programs offer scholarships that pay tuition and fees, furnish books and uniforms, and provide a monthly living allowance.

Students in ROTC pursue regular courses toward a degree and augment their studies with courses from the Departments of Military Science, Aerospace Studies, or Naval Science. These courses may be cross-listed with a professional school or reviewed on an individual basis by the Assembly of the College of Liberal Arts and Sciences (http://clas.ku.edu/) for accreditation toward degree requirements.

On successful completion of requirements and graduation from KU, Army and Air Force ROTC cadets are commissioned into their respective service as Second Lieutenants. Naval ROTC midshipmen commission as Ensigns in the Navy, or Marine Corps Second Lieutenants.

Programs

Graduation requirements and regulations for every academic program are provided in this catalog. Degree requirements and course descriptions are subject to change. In most cases, you will use the catalog of the year you entered KU (see your advisor (http://www.advising.ku.edu/) for details).

Other years' catalogs

Army: Department of Military Science
Air Force: Department of Aerospace Studies
Navy: Department of Naval Science

Army: Department of Military Science

The Program

The Department of Military Science administers the Army Reserve Officers Training Corps program at KU. The military science curriculum provides a student with unique leadership and management training, along with practical experience. It develops qualities basic to success in the Army and in the civilian sector. It also offers the student the opportunity to earn an officer’s commission in the Army.

Eligible students enrolled at KU may register for a 100- or 200-level military science course or for ARMY 303 or ARMY 450. These students receive credit if the course they are enrolled in has been approved for degree credit in the College of Liberal Arts and Sciences (http://clas.ku.edu/). The credit does not count toward the required 100 hours in the College for students earning a baccalaureate degree in the College of Liberal Arts and Sciences.

Students who want to receive a commission in the Army through the ROTC program must meet the eligibility requirements of Section 2103, Title 10, U.S. Code, and current Department of Defense and Department of the Army guidelines.

4-Year Program

The 4-year Army ROTC program is made up of a basic course and an advanced course.

Basic Course

The basic course is taken during the first 2 years of college. It covers subjects such as organizational behavior, leadership, management, ethics, writing, public speaking, military affairs, and tactics. All necessary textbooks, classroom materials, uniforms, and other equipment are furnished at no cost. Students who have completed the basic course; have met academic, physical, and medical standards; and have the potential to serve as officers may enter the advanced course.

The basic course is composed of a total of 4 courses. A student may enter the basic course at one of 3 points (if eligible).

1. Entering First-Semester First-Year Students

Advanced Course

The advanced course normally is taken during the final 2 years of college. It offers instruction in military organization, tactics, military law, Army administration, and leadership. All necessary books, classroom supplies, uniforms, and other equipment are issued to students at no cost. During the summer between the junior and senior years of college, students must attend the Leadership Development and Assessment Camp, a fully paid, five-week training and evaluation course. LDAC gives each student the chance to practice for an extended period of time what they have learned in the classroom. All students contracted in the advanced course receive stipends from the government of up to $5,000 a year.

The advanced course is composed of a total of 4 courses.

2-Year Program

Students can receive credit for the basic course in 3 ways other than taking the 4 courses associated with the basic course. Students who complete the basic course by 1 of these alternate means can enroll in basic course classes but cannot enroll in the advanced course until they are academic juniors. Any upper-level student, junior through graduate, may earn a commission through the 2-year program. The 3 alternate ways to receive basic course credit are

1. Successfully completing the basic enlisted training offered by any of the armed services.

2. Successfully completing the ROTC Leadership Training Course held each summer (prerequisite to ARMY 301).

3. Successfully completing at least 4 years of high school Junior ROTC.

Professional Military Education Course

The following course is required for commissioning:

Military History. Gain an understanding of the evolution of warfare, military theory, the military profession, and the place of military institutions in American society. The requirement can be met by successfully completing a history course focusing on either a major war or on military history in general. ROTC courses also meet this requirement.

Scholarships and Financial Assistance

Army ROTC offers 2-, 3-, and 4-year scholarships to qualified students. Scholarships are awarded on a competitive basis to students with outstanding academic and leadership abilities. These scholarships pay for all tuition, required fees, $1,200 a year for books and other supplies, and a stipend of up to $5,000 a year. Special consideration is given to students who major in nursing, engineering, or the sciences. The Kansas Army National Guard offers numerous educational benefits such as the Board of Regents Scholarship.

Army National Guard and Army Reserve Students

Students who are members of the Army National Guard or the Army Reserve may enroll in Army ROTC classes and be members of their units at the same time. Once students enter a contractual agreement as early as their sophomore year, they can remain members of their units under the Simultaneous Membership Program. These students are still eligible for all military benefits they have earned under enlisted contract such as Tuition Assistance, GI Bill, and drill pay; additionally, they may compete for guaranteed reserve forces designated ROTC scholarships if they commit to commissioning to the Army Reserve or Army National Guard.

Courses

ARMY 10. Leadership Laboratory. 0 Hours U.

Required of all Army Cadets. A study of Army customs and courtesies, drill and ceremony, career opportunities in the Army, and the life and work of a junior Army officer. Cadets develop leadership potential through practical supervised training. Course must be taken in conjunction with Army 101, 102, 201, 202, 301, 302, 401, and 402. Course not approved for credit in the College of Liberal Arts and Sciences. LAB.

ARMY 101. Introduction to Military Science I. 1 Hour U.

Required introductory course for the Army military science program. Course is comprised of one hour of lecture and one hour of laboratory per week. Introduces the military science program as an element of the reserve forces and includes an examination of major legislation, the Army organization structure, and military leadership techniques. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

ARMY 102. Introduction to Military Science II. 1 Hour U.

Course comprised of one hour of lecture and one hour of leadership laboratory per week. A general study and appreciation of the American military system from colonial times to the present. The course identifies factors present in the American society and national policy in each particular historical period which influenced the development of American military systems. The relationship between the military establishment and the larger American society is examined in each historical period. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 101 or department approval. LEC.

ARMY 201. Basic Military Science I. 1 Hour U.

Course comprised of one hour of lecture and one hour of laboratory per week. Analyzes the principles of war and military leadership at small unit level, and introduces principles of military writing. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 102 or department approval. LEC.

ARMY 202. Basic Military Science II. 1 Hour U.

Course is comprised of one hour of lecture and one hour of leadership laboratory per week. Curriculum consists of the fundamentals of topographic map reading and their application in a field environment. Includes instruction in various types of maps, marginal information,
topographic symbols and colors, scale, distance, direction and use of the magnetic compass. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 201 or department approval. LEC.

ARMY 301. Theory and Dynamics of Tactical Operations I. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. A comprehensive study of conventional tactical operations. Emphasizes the fundamentals of land warfare and the qualities necessary to conduct fluid, non-linear operations. Introduces the student to the tenets of Air-Land Battle, the underlying structure of modern warfare, the dynamics of combat power, and the application of classical principles of war to a contemporary battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 202 or department approval. LEC.

ARMY 302. Theory and Dynamics of Tactical Operations II. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. Expands on the application of conventional tactical operations in the low, medium, and high intensity conflict spectrum. Examines the three-dimensional nature of modern warfare and the unified battlefield. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 301 or department approval. LEC.

ARMY 303. Military Conditioning. 1 Hour U.
Introduction to the theoretical and practical aspects of developing physical fitness programs for all Army personnel from the commander or supervisor's perspective. Provides an overview of total fitness, defines physical fitness, outlines the phases of fitness, discusses various types of fitness programs, and presents evaluation criteria. Approved for degree credit in the College of Liberal Arts and Sciences. to count within the limit of 25 hours accepted from other schools and divisions. LEC.

ARMY 401. Concepts of Military Management. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. An introduction to the military management system with special attention to the functions, organizations, and operations of military training, logistics and administration. The use of standardized staff formats in the development of plans and orders is emphasized from the standpoint of the leader with limited resources. Extensive use of standard staff procedures is emphasized in problem solving scenarios. Approved for degree credit in the College of Liberal Arts and Sciences. to count within the limit of 25 hours accepted from other schools and divisions. LEC.

ARMY 402. The Military Profession. 3 Hours U.
Course is comprised of three hours of lecture and two hours of leadership laboratory per week. A seminar on the military profession as an object of social inquiry. Focus is on the internal structure of the profession, current problems, and interaction with the larger American society. Seminar topics include but are not limited to the following: a historical perspective on the military profession; civil-military relations; social and political impact of military activities; military justice; professionalism versus careerism. Approved for degree credit in the College of Liberal Arts and Sciences. Such courses count within the limit of 25 hours accepted from other schools and divisions. Prerequisite: ARMY 401 or department approval. LEC.

ARMY 450. Military Analysis. 1 Hour U.
A study of present and future military operations; emphasis placed on analysis of problem. The student will defend his/her analysis through written and oral presentations. Prerequisite: Permission of department chairperson. LEC.

### Reserve Officers Training Corps - Air Force

#### The Program

The Air Force Reserve Officer Training Corps (AFROTC) program provides education and training to prepare men and women to become Air Force officers while completing their college degree. To accomplish this, the Air Force, with the approval of the University of Kansas, has established a curriculum that allows a student to commission as an officer in either 3- or 4- years. Students with previous college credit require a 2.0 GPA to enroll.

#### Air Force: Department of Air & Space Studies

Detachment 280, Military Science Building  
1520 Summerfield Hall Drive, Room 109  
Lawrence, KS 66045  
785-864-4676  
http://www.afrotc.ku.edu/

Lieutenant Colonel Charles Dorssom, Chair  
785-864-4676

#### The Program

The 3- and 4-year Air Force ROTC programs are divided into the General Military Course (GMC) and Professional Officer Course (POC). Each cadet must maintain a minimum cumulative GPA of 2.0 to be in the program.

#### General Military Course (GMC)

The GMC is offered during the first two years of college and constitutes an introduction to the present day Air Force. The emphasis is on the role of military forces in world affairs, customs and courtesies, being an officer, professionalism, the mission and organization of the Air Force, and the history of air power. All necessary textbooks, classroom material, uniforms, and other equipment are furnished at no cost. Students who have completed the GMC, have met academic, physical and medical standards, and have successfully completed 4 weeks of Field Training may enter the Professional Officer Course (POC).

The GMC is composed of a total of 4 courses. A student may enter the GMC at one of three points (if eligible).

1. **Entering First Semester – First Year Students (Freshmen Year)**

   **First Semester:**
   - AIR 100 - Leadership Laboratory - 0 credits
   - AIR 144 - Foundations of the USAF - 1 credit

   **Second Semester:**
   - AIR 100 - Leadership Laboratory - 0 credits
   - AIR 148 - Foundations of the USAF - 1 credit

   **Third Semester:**
AIR 100 - Leadership Laboratory - 0 credits
AIR 284 - Airpower History - 1 credit

Fourth Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 288 - Airpower History - 1 credit

2. Entering Second Semester – First Year Students (Freshmen Year)

First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 148 - Foundations of the USAF - 1 credit
AIR 284 - Airpower History - 1 credit

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 144 - Foundations of the USAF - 1 credit
AIR 284 - Airpower History - 1 credit

A course designed to provide a fundamental understanding of the United States Air Force and Air Force Reserve Officer Training Corps (ROTC). Featured topics include: Air Force Leadership, opportunities and benefits in the Air Force, our heritage and values, Air Force operations, principles of war, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 144. Heritage and Values of the United States Air Force I. 1 Hour U.
Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps (ROTC). Featured topics include: Air Force Leadership, opportunities and benefits in the Air Force, our heritage and values, Air Force operations, principles of war, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 148. Heritage and Values of the United States Air Force II. 1 Hour U.
Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps (ROTC). Featured topics include: Air Force Leadership, opportunities and benefits in the Air Force, our heritage and values, Air Force operations, principles of war, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

AIR 284. Team and Leadership Fundamentals I. 1 Hour U.
A course designed to provide a fundamental understanding of both leadership and team building. It examines many layers to leadership, including aspects that don't always jump to mind such as listening, understanding, being a good follower and problem solving efficiently. The students will apply these leadership perspectives when completing team building activities and discussing things like conflict management, motivation, standards and accountability, and stress management. Leadership Laboratory is mandatory for AFROTC cadets

3. Entering Third Semester – Second Year Students (Sophomore Year)

Students with previous college credit require a 2.0 GPA to enroll.

First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 148 - Foundations of the USAF - 1 credit
AIR 284 - Airpower History - 1 credit

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 144 - Foundations of the USAF - 1 credit
AIR 284 - Airpower History - 1 credit

Professional Officer Course (POC)

The POC normally is taken during the final 2 years of college. The emphasis is on leadership and management, organizational patterns, technologies, military policies and procedures and provides in-depth study of national security affairs. Cadets also learn and practice communication, leadership and management skills. POC cadets receive a non-taxable subsistence allowance. All necessary textbooks, classroom material, uniforms, and other equipment are furnished at no cost. The POC is composed of a total of 4 courses.

First Year (Junior Year)

First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 344 - Leadership Studies - 3 credits

Second Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 348 - Leadership Studies - 3 credits

Second Year (Senior Year)

First Semester:
AIR 100 - Leadership Laboratory - 0 credits
AIR 404 - National Security Affairs - 3 credits

Second Semester:

AIR 100 - Leadership Laboratory - 0 credits
AIR 408 - National Security Affairs - 3 credits

Scholarships

High school seniors may apply for Air Force ROTC scholarships covering the 4-year college period. Some technical majors, such as engineering, are regularly approved for five-year scholarship support. Students should apply no later than December 1 of the senior year of high school. Online applications are available beginning 1 June of the junior year.

Qualified college students can compete for 2- and 3-year scholarship opportunities. These are awarded competitively and students automatically qualify to compete if they meet designated standards.

Scholarships generally cover tuition, laboratory and incidental fees, $600 a year for books, and the non-taxable subsistence allowance. Visit the afrotc.com for more information and to apply online for a high school scholarship.
and complements this course by providing cadets with followership experiences. LEC.

**AIR 288. Team and Leadership Fundamentals II. 1 Hour U.**
A course designed to provide a fundamental understanding of both leadership and team building. It examines many layers to leadership, including aspects that don’t always jump to mind such as listening, understanding, being a good follower and problem solving efficiently. The students will apply these leadership perspectives when completing team building activities and discussing things like conflict management, motivation, standards and accountability, and stress management. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences. LEC.

**AIR 344. Leading People and Effective Communication I. 3 Hours U.**
This course designed to build on the leadership fundamentals taught in AIR 284 and 288. The goal is for students to have a more in-depth understanding of how to effectively lead people, and provide them with the tools to use in leadership roles. The class is centered on leadership and ethics, and is mostly guided discussion with the intent of helping students think about leadership through their own lens. Additionally, students will hone their writing and briefing skills, and this class is designed to get them used to public speaking. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply the leadership principles taught in this course. LEC.

**AIR 348. Leading People and Effective Communication II. 3 Hours U.**
This course designed to build on the leadership fundamentals taught in AIR 284 and 288. The goal is for students to have a more in-depth understanding of how to effectively lead people, and provide them with the tools to use in leadership roles. The class is centered on leadership and ethics, and is mostly guided discussion with the intent of helping students think about leadership through their own lens. Additionally, students will hone their writing and briefing skills, and this class is designed to get them used to public speaking. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply the leadership principles taught in this course. LEC.

**AIR 404. National Security/Leadership Responsibilities and Commissioning Preparation I. 3 Hours U.**
This course will teach students to comprehend the basic elements of national security policy and process. The student should know basic air force domain operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession. Students should understand the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system. The final portion of this course is designed to prepare AFROTC cadets for life as a second lieutenant, and prepare them to transition from civilian life to military life. Leadership Laboratory complements this course by providing advanced leadership experiences giving students the opportunity to apply leadership principles in a dynamic setting. LEC.

**Navy: Department of Naval Science**

**The Program**

Courses in naval science include both practical and theoretical instruction in subjects pertaining to the Navy and the Marine Corps. The **Navy-option** student receives 23 credit hours of naval science instruction over a period of 4 years. The **Marine-option** student receives 17 credit hours of instruction.

Additionally, naval science laboratory meets every semester for 4 years. Laboratory sessions integrate and apply knowledge gained from naval science courses through practical application during tactical planning exercises, leadership training, and professional development. They also include classroom instruction on issues relating to naval careers and policies and some close-order drill.

**Navy: Department of Naval Science**

**4-Year Scholarship NROTC Students**

Students may begin applying for scholarships as early as their second semester of their high school junior year (preceding the year in which the scholarship is desired). This scholarship is rolling, and therefore students will be selected periodically until the deadline (which typically occurs between December and January). Selection is based on high school grades, SAT/ACT test results, physical ability, citizenship, and aptitude for naval service.

If selected, students are appointed as midshipmen and granted compensation and benefits specified by law. These benefits include tuition, required fees, laboratory equipment, a $750-a-year book stipend, and subsistence pay of $250 a month for first-year students. Subsistence pay increases to $300 a month for sophomores, $350 for juniors, and $400 for seniors.

Scholarship students participate in 3 required summer training cruises. Scholarship students assume an obligation to serve at least 5 years on active duty after commissioning as Ensign, U.S. Navy, or 4 years as Second Lieutenant, U.S. Marine Corps.

Students with 30 or more college credits are not eligible to apply for this scholarship. More information can be found at [https://www.nrotc.navy.mil/](https://www.nrotc.navy.mil/).

**4-Year College Program NROTC Students**

These NROTC students have the status of civilians who have entered into an agreement with the Navy. They are not entitled to the benefits
and compensation given to scholarship NROTC students, but are entitled to uniform issue. A subsistence allowance of $350 a month for juniors and $400 for seniors is paid in the final two years of training if they are selected for scholarship.

These students participate in one summer cruise between their junior and senior years. College program students agree to accept commissions in the Navy or Marine Corps.

Upon proven superior performance in the college program, students will apply for a 3- or 2-year scholarship with the same requirements and benefits as 4-year scholarship students. Students must be selected for a scholarship by the end of their junior year to complete training. Admission into this program is through the KU NROTC Recruiting Officer.

### 3- and 2-Year Programs (Side-load Scholarship)

Entrance into the 3- or 2-year scholarship, or “side load scholarship”, program is offered to qualified students with 3 or 2 years remaining to complete their undergraduate degrees. Students applying for these scholarships are encouraged to have completed 1 year of differential and integral calculus of 1 real variable (MATH 115 and MATH 116, or MATH 121 and MATH 122) and must have attained a minimum grade of C. Applications for these programs must be completed by date released via message to the Naval ROTC at University of Kansas. For more information contact the KU NROTC Recruiting Officer.

### Naval Science Students

Any student enrolled at KU may enroll in a naval science course for KU credit after obtaining consent of the Naval Science Instructor. Such students are not considered to be in the NROTC program and are not entitled to receive any compensation, benefits, or a commission.

### 4-Year Program Requirements

Both Navy- and Marine-option students must take professional Navy and Marine courses as part of the NROTC program. The normal sequence of courses is:

#### Navy Students

Courses

MCOR 380. Evolution of Warfare. 3 Hours U.
A study of the art, science, concepts, and evolution of warfare as an instrument of government policy throughout history. The study of selected battles and campaigns serves as a vehicle to emphasize the application of the classical principles of warfare, the influence of leadership, and the advancement of technology of the art and science of war. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of twenty-five hours accepted from other schools and divisions. LEC.

MCOR 384. Fundamentals of Maneuver Warfare. 3 Hours U.
Broad aspects of warfare and their interactions with maneuver warfare doctrine. Focus on the United States Marine Corps as the premier maneuver warfare fighting institution. Historical influences on current tactical, operational, and strategic implications of maneuver warfare practices. Approved for degree credit in the College of Liberal Arts and Sciences effective Fall 1976. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

Courses

NAVY 100. Naval Science Laboratory. 0 Hours U.
Designed for and required annually of all NROTC midshipmen, Sailors and Marines in order to provide increased knowledge in the areas of close-order drill, ceremonial functions, and general military training. Also applies knowledge learned from accredited naval science courses. Highly educated, well known, professional guest lecturers appear frequently and make presentations on topics which apply to naval science courses, increase the educational awareness of future Navy and Marine Corps officers, and further develop the leadership and decision making of the officer candidates. Graded on a satisfactory/unsatisfactory basis. LAB.

NAVY 101. Introduction to Naval Science. 2 Hours U.
An introduction to the Department of the Navy (U.S. Navy and U.S. Marine Corps) emphasizing its mission, organization, operation, and relationship to other U.S. federal and military institutions. Through historical overview, the development of the current Department of the Navy mission, organization and operation, both at sea and ashore, including customs, traditions, regulations, and professional/technical vocabulary is examined. Educational opportunities and specializations for naval officers are also detailed. Approved for degree credit in the College of Liberal Arts and Sciences effective spring 1982. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 180. Introduction to Naval Ships Systems I. 3 Hours U.
A course designed to familiarize students with the types, structures, and purpose of naval ships. Ship compartmentation, propulsion systems, auxiliary power systems, electrical systems, interior communications, and control are included. Elements of ship design to achieve safe operations, damage control, and ship stability characteristics are examined. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 184. Introduction to Naval Ships Systems II. 3 Hours U.
The concept of weapons systems and the systems approach are explored. The techniques of linear analysis of ballistics and weapons are introduced. The dynamics of the basic components of weapons control systems are investigated. This course provides the tools for the future development in the student's understanding of the basic principles that underlie all modern naval weapons systems. To understand the evolving domain of cyber warfare, this course introduces topics in information systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 220. Seapower and Maritime Affairs. 3 Hours U.
A survey of U.S. naval history. Explores the historical evolution of sea power and its effect on world history. Presents naval aspects of U.S. conflicts from the American Revolution to the global war on terror. Introduces prominent U.S. Navy and Marine Corps leaders and their contributions. Examines the influence of technological innovation, domestic politics, and foreign policy on the development and execution of naval doctrine and tactics. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 300. Navigation and Operations I. 3 Hours U.
A comprehensive study of the theory, principles, and procedures of ship navigation in coastal and open ocean environment. Includes piloting, triangulation, ocean and tidal currents, International and U.S. inland rules of the road for navigation, sight reduction, publications, and logs; an introduction to electronic navigation, including theory of wave propagation, hyperbolic and azimuthal systems, doppler, inertial, and satellite systems. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 304. Navigation and Operations II. 3 Hours U.
A study of the laws for the prevention of collisions at sea; tactical formations and dispositions, relative motion, and the maneuvering board. A portion of the semester is devoted to an analysis of naval operations utilizing formal decision making theory, particularly as applied to command and control. Numerous case studies are used to examine the application of the above topics. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 401. Principles of Naval Organization and Management. 3 Hours U.
An introduction of management functions as they apply to routine daily military activities. The concepts of planning, organizing, staffing, directing, controlling, and coordinating are introduced and examined using lecture, seminar, and case study methods. The course includes discussions on responsibility and accountability, power and influence, managerial theories, decision making, personnel appraisal, organizational structure, and communications. Emphasis is placed on management of personnel and physical resources. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1971. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.

NAVY 402. Seminar in Military Leadership and Management. 3 Hours AE51 / U.
A study of military leadership and management which investigates techniques and concepts of task accomplishment in the absence of a normative business environment. The course includes an examination
of military law, ethical leadership, personal responsibility, authority, and bureaucracy. The focus of discussion is on those aspects of leadership and management not normally present in civilian enterprise such as operating in the presence of hostility and morale management. Approved for degree credit in the College of Liberal Arts and Sciences effective fall 1975. Such courses count within the limit of 25 hours accepted from other schools and divisions. LEC.
Pre-Majors

If you’re planning an undergraduate degree in a KU school that doesn't admit first-year students, you'll start out in the College of Liberal Arts and Sciences, complete your prerequisites, and then apply for admission to the KU school you want.

Meanwhile, you’ll be classified in one of the following ways:

- Prebusiness (p. 83)
- Preclinical laboratory science (p. 656)
- Predentistry (p. 1858)\(^1\)
- Pre-education (p. 156)
- Pre-education (elementary) (p. 217)
- Pre-education (secondary) (p. 217)
- Pre-education (sport science/community health) (p. 328)
- Pre-education (p.e./health teacher education) (p. 328)
- Pre-engineering (p. 404)
- Prehealth information management (p. 696)
- Prehealth professions (p. 595)
- Prejournalism (p. 756)
- Prelaw (p. 1857)\(^1\)
- Premedicine (p. 1858)\(^1\)
- Prenursing (p. 2385)
- Pre-occupational therapy (p. 713)\(^1\)
- Pre-optometry (p. 1858)\(^2\)
- Prepharmacy (p. 2435)
- Prephysical therapy (p. 340)\(^1\)
- Prephysician’s assistant (p. 1858)\(^2\)
- Prerespiratory care (p. 747)
- Presocial welfare (p. 2521)
- Preveterinary medicine (p. 1858)\(^2\)

\(^1\) These are graduate programs at KU. If you’re interested in these programs, please consult your academic advisor for more information.
\(^2\) KU doesn’t offer these degree programs. Students may indicate interest in these areas as preparation for programs at other colleges and universities.

## A

Accelerated Master of Arts in Art History (East Asian) .................. 1661
Accelerated Master of Arts in Art History (European and American/Global Modern and Contemporary) .................. 1665
Accelerated Master of Arts in Classics .................................. 1331
Accelerated Master of Arts in Contemporary East Asian Studies .... 1388
Accelerated Master of Arts in English .................................. 1457
Accelerated Master of Arts in History .................................. 1639
Accelerated Master of Arts in Latin American and Caribbean Studies . 1719
Accelerated Master of Arts in Philosophy ................................ 1806
Accelerated Master of Arts in Speech-Language Pathology ............ 1977
Accelerated Master of Urban Planning .................................. 2140
Accelerated Master of Urban Planning/BA in Environmental Studies . 2142
Accelerated Masters of Arts in Economics (BA or BS/MA) ............. 1424
Accelerated Masters of Arts in Economics (Minor/MA) ................. 1426
Accelerated Professional Science Masters-Environmental Assessment ......................................................... 1483
Administration .................................................................. 2272
Adult-Gerontology Acute Care Nurse Practitioner ................. 2420
Adult-Gerontology Primary Care Nurse Practitioner ................. 2421
Aerospace Engineering ....................................................... 450
African and African-American Studies .................................. 1136
American Studies ................................................................ 1164
Anatomy and Cell Biology ................................................... 2164
Anthropology ................................................................. 1180
Applied Behavioral Science ................................................ 1200
Applied Data Science Graduate Certificate .......................... 2189
Applied Statistics Graduate Certificate ................................ 2190
Architecture ........................................................................ 39
Architecture & Design ......................................................... 14
Army: Department of Military Science ................................ 2614
Audiology and Speech-Language Pathology ............................ 636

## B

B.A. Architectural Studies - M.A. Environmental Design .......... 45
B.A. Architectural Studies - M.C.M. Plan ............................... 47
B.A. Architectural Studies - M.U.P. Plan ....................... 46
B.A. Architectural Studies - Master of Architecture Plan .......... 44
BA in African and African-American Studies ....................... 1154
BA in American Sign Language and Deaf Studies ................... 2504
BA in American Studies .................................................... 1172
BA in Anthropology ......................................................... 1194
BA in Applied Behavioral Science, concentration in Organizational Behavior Mgmt. Research & Practice .................. 1225
BA in Applied Behavioral Science with concentration in Adults with Disabilities ........................................... 1217
BA in Applied Behavioral Science with concentration in Basic Research ......................................................... 1218
BA in Applied Behavioral Science with concentration in Community Health & Development .......................... 1219
BA in Applied Behavioral Science with concentration in Conceptual Foundations ............................................ 1220
BA in Applied Behavioral Science with concentration in Early Childhood Autism Intervention .......................... 1221
BA in Applied Behavioral Science with concentration in Early Childhood Education & Intervention .................. 1222
BA in Applied Behavioral Science with concentration in Early Childhood Research ........................................... 1223
BA in Applied Behavioral Science with concentration in Youth Development & Juvenile Justice ......................... 1224
BA in Chemistry .............................................................. 1298
BA in Chemistry with concentration in Biological Chemistry .... 1299
BA in Classical Antiquity .................................................... 1323
BA in Classical Languages .................................................. 1327
BA in Communication Studies ............................................. 1344
BA in East Asian Languages & Cultures with concentration in Chinese Language & Literature ....................... 1373
BA in East Asian Languages & Cultures with concentration in Double Language .................................................. 1377
BA in East Asian Languages & Cultures with concentration in East Asian Studies/Chinese Language ................. 1374
BA in East Asian Languages & Cultures with concentration in East Asian Studies/Japanese Language .................. 1375
BA in East Asian Languages & Cultures with concentration in East Asian Studies/Korean Language .................. 1376
BA in East Asian Languages & Cultures with concentration in Japanese Language & Literature ....................... 1373
BA in Economics ............................................................ 1418
BA in English ................................................................. 1443
BA in English with concentration in Creative Writing ............. 1443
BA in English with concentration in Rhetoric, Language & Writing .. 1444
BA in Environmental Studies .............................................. 1475
BA in Environmental Studies/Accelerated Master of Urban Planning . 1479
BA in Film & Media Studies ............................................... 2058
BA in French and Francophone Studies ................................ 1498
BA in French, Francophone and Italian Studies .................................. 1500
BA in Geography .............................................................................. 1519
BA in Geology with concentration in Environmental Geology .......... 1553
BA in Geology with concentration in General Geology .................... 1552
BA in History .................................................................................. 1633
BA in History of Art ........................................................................... 1659
BA in Human Biology with concentration in Anthropology .............. 1268
BA in Human Biology with concentration in Applied Behavioral Science ................................................................. 1269
BA in Human Biology with concentration in Biology ....................... 1270
BA in Human Biology with concentration in Psychology ................... 1271
BA in Human Biology with concentration in Speech-Language-Hearing ................................................................. 1272
BA in Human Sexuality ...................................................................... 1996
BA in Humanities with concentration in Global Humanities ............. 1680
BA in Humanities with concentration in Peace & Conflict Studies ....... 1680
BA in Italian Studies .......................................................................... 1499
BA in Latin American Area & Caribbean Studies ............................... 1715
BA in Law and Society ...................................................................... 2130
BA in Linguistics .............................................................................. 1743
BA in Literature, Language & Writing .............................................. 1450
BA in Philosophy ............................................................................. 1803
BA in Physics with concentration in Computational Physics ............. 1825
BA in Political Science ...................................................................... 1851
BA in Psychology ............................................................................. 1878
BA in Public Administration ............................................................... 2133
BA in Religious Studies .................................................................... 1897
BA in Slavic Languages & Literatures with concentration in Polish Studies ........................................................................ 1927
BA in Slavic Languages & Literatures with concentration in Russian ... 1928
BA in Slavic Languages & Literatures with concentration in South Slavic Studies ....................................................................... 1929
BA in Sociology ................................................................................ 1947
BA in Speech-Language-Hearing ....................................................... 1972
BA in Theatre with concentration in Performance ............................ 2078
BA in Theatre with concentration in Theatre, Culture & Society ....... 2079
BA in Women, Gender, and Sexuality Studies .................................... 2001
Bachelor of Applied Science in Biotechnology .................................. 2502
Bachelor of Applied Science in Exercise Science .............................. 371
Bachelor of Art Education in Visual Art Education ............................ 2112
Bachelor of Arts and Bachelor of General Studies in African and African-American Studies .................................................. 1151
Bachelor of Arts and Bachelor of General Studies in American Sign Language and Deaf Studies .................................................. 2504
Bachelor of Arts and Bachelor of General Studies in American Studies ................................................................. 1168
Bachelor of Arts and Bachelor of General Studies in Anthropology ... 1192
Bachelor of Arts and Bachelor of General Studies in Applied Behavioral Science ........................................................................ 1212
Bachelor of Arts and Bachelor of General Studies in Classical Antiquity ................................................................................ 1320
Bachelor of Arts and Bachelor of General Studies in Classical Languages ................................................................................ 1325
Bachelor of Arts and Bachelor of General Studies in Communication Studies ........................................................................... 1342
Bachelor of Arts and Bachelor of General Studies in Economics ..... 1417
Bachelor of Arts and Bachelor of General Studies in English .......... 1440
Bachelor of Arts and Bachelor of General Studies in Environmental Studies ................................................................. 1474
Bachelor of Arts and Bachelor of General Studies in Film and Media Studies ........................................................................... 2056
Bachelor of Arts and Bachelor of General Studies in Geography ....... 1517
Bachelor of Arts and Bachelor of General Studies in History .......... 1628
Bachelor of Arts and Bachelor of General Studies in History of Art .... 1656
Bachelor of Arts and Bachelor of General Studies in Human Sexuality 1993
Bachelor of Arts and Bachelor of General Studies in Latin American Area and Caribbean Studies .................................................. 1711
Bachelor of Arts and Bachelor of General Studies in Law and Society . 2129
Bachelor of Arts and Bachelor of General Studies in Linguistics ....... 1741
Bachelor of Arts and Bachelor of General Studies in Literature, Language, and Writing ................................................................. 1448
Bachelor of Arts and Bachelor of General Studies in Philosophy ..... 1802
Bachelor of Arts and Bachelor of General Studies in Political Science . 1849
Bachelor of Arts and Bachelor of General Studies in Psychology ....... 1877
Bachelor of Arts and Bachelor of General Studies in Public Administration ........................................................................... 2131
Bachelor of Arts and Bachelor of General Studies in Religious Studies 1896
Bachelor of Arts and Bachelor of General Studies in Sociology ....... 1946
Bachelor of Arts and Bachelor of General Studies in Speech-Language-Hearing ................................................................. 1970
Bachelor of Arts and Bachelor of General Studies in Theatre .......... 2076
Bachelor of Arts and Bachelor of General Studies in Women, Gender, and Sexuality Studies .................................................. 1997
Bachelor of Arts in Architectural Studies .......................................... 43
Bachelor of Arts in Architectural Studies with concentration in Environmental Design ................................................................. 44
Bachelor of Arts in Astronomy ......................................................... 1816
Bachelor of Arts in Biochemistry ...................................................... 1255
Bachelor of Arts in Biology ............................................................... 1257
Bachelor of Arts in Chemistry ............................................................ 1297
Bachelor of Arts in Dance ................................................................. 2074

<tr>
<td>Bachelor of Health Sciences</td>
<td>2506</td>
</tr>
<tr>
<td>Bachelor of Music</td>
<td>2329</td>
</tr>
<tr>
<td>Bachelor of Music in Jazz</td>
<td>2329</td>
</tr>
<tr>
<td>Bachelor of Music in Music Performance: Organ and Church Music</td>
<td>2340</td>
</tr>
<tr>
<td>Bachelor of Music in Music Performance: Piano</td>
<td>2339</td>
</tr>
<tr>
<td>Bachelor of Music in Music Performance: Strings and Harp</td>
<td>2342</td>
</tr>
<tr>
<td>Bachelor of Music in Music Performance: Voice</td>
<td>2343</td>
</tr>
<tr>
<td>Bachelor of Music in Music Performance: Winds and Percussion</td>
<td>2345</td>
</tr>
<tr>
<td>Bachelor of Music in Music Theory and Composition</td>
<td>2333</td>
</tr>
<tr>
<td>Bachelor of Music in Music Therapy</td>
<td>2335</td>
</tr>
<tr>
<td>Bachelor of Music in Musicology</td>
<td>2331</td>
</tr>
<tr>
<td>Bachelor of Science in Aerospace Engineering</td>
<td>457</td>
</tr>
<tr>
<td>Bachelor of Science in Architectural Engineering</td>
<td>512</td>
</tr>
<tr>
<td>Bachelor of Science in Astronomy</td>
<td>1819</td>
</tr>
<tr>
<td>Bachelor of Science in Athletic Training</td>
<td>355</td>
</tr>
<tr>
<td>Bachelor of Science in Atmospheric Science</td>
<td>1523</td>
</tr>
<tr>
<td>Bachelor of Science in Behavioral Neuroscience</td>
<td>1880</td>
</tr>
<tr>
<td>Bachelor of Science in Biochemistry</td>
<td>1278</td>
</tr>
<tr>
<td>Bachelor of Science in Business</td>
<td>132</td>
</tr>
<tr>
<td>Bachelor of Science in Chemical Engineering</td>
<td>487</td>

<tr>
<td>Bachelor of Science in Engineering Physics</td>
<td>571</td>
</tr>
<tr>
<td>Bachelor of Science in Environmental Studies</td>
<td>1476</td>
</tr>
<tr>
<td>Bachelor of Science in Exercise Science &amp; Sport Management</td>
<td>357</td>
</tr>
<tr>
<td>Bachelor of Science in Geography</td>
<td>1520</td>
</tr>
<tr>
<td>Bachelor of Science in Geology</td>
<td>1554</td>
</tr>
<tr>
<td>Bachelor of Science in Health Information Management</td>
<td>698</td>
</tr>
<tr>
<td>Bachelor of Science in Information Technology</td>
<td>2507</td>
</tr>
<tr>
<td>Bachelor of Science in Interdisciplinary Computing</td>
<td>548</td>
</tr>
<tr>
<td>Bachelor of Science in Interior Architecture</td>
<td>81</td>
</tr>
<tr>
<td>Bachelor of Science in Journalism</td>
<td>768</td>
</tr>
<tr>
<td>Bachelor of Science in Mathematics</td>
<td>1759</td>
</tr>
<tr>
<td>Bachelor of Science in Mechanical Engineering</td>
<td>582</td>
</tr>
<tr>
<td>Bachelor of Science in Microbiology</td>
<td>1283</td>
</tr>
<tr>
<td>Bachelor of Science in Molecular Biosciences</td>
<td>1285</td>
</tr>
<tr>
<td>Bachelor of Science in Molecular, Cellular, and Developmental Biology</td>
<td>1288</td>
</tr>
<tr>
<td>Bachelor of Science in Nursing</td>
<td>2404</td>
</tr>
<tr>
<td>Bachelor of Science in Petroleum Engineering</td>
<td>492</td>
</tr>
<tr>
<td>Bachelor of Science in Physics</td>
<td>1825</td>
</tr>
<tr>
<td>Bachelor of Science in Respiratory Care</td>
<td>750</td>
</tr>
<tr>
<td>Bachelor of Social Work</td>
<td>2531</td>
</tr>
<tr>
<td>BFA in Visual Art with concentration in Ceramics</td>
<td>2110</td>
</tr>
<tr>
<td>BFA in Visual Art with concentration in Metalsmithing/Jewelry</td>
<td>2111</td>
</tr>
<tr>
<td>BFA in Visual Art with concentration in Textile/Fibers</td>
<td>2112</td>

Gerontology .......................................................................... 1585
Global and International Studies ............................................ 1588
Global and International Studies Minor ..................................... 1602
Graduate Certificate in Advanced American Sign Language ....... 2513
Graduate Certificate in African Studies ..................................... 1163
Graduate Certificate in African-American Studies ..................... 1163
Graduate Certificate in American Studies ................................ 1179
Graduate Certificate in Applied Behavior Analysis ..................... 1238
Graduate Certificate in Applied Mathematics ............................ 1767
Graduate Certificate in Architectural Acoustics ......................... 53
Graduate Certificate in Architecture of Health and Wellness ........ 53
Graduate Certificate in ASL/English Interpreting ......................... 2513
Graduate Certificate in Autism Spectrum Disorder ...................... 398
Graduate Certificate in Book Arts ............................................ 79
Graduate Certificate in Building Information Modeling (BIM) ........ 53
Graduate Certificate in Chemical Biology .................................. 1790
Graduate Certificate in City and County Management ................ 2150
Graduate Certificate in Community Health and Development ....... 1238
Graduate Certificate in Computational Fluid Dynamics .............. 465
Graduate Certificate in Construction Management ...................... 523
Graduate Certificate in Cybersecurity ....................................... 563
Graduate Certificate in Data Interpretation and Communication ...... 774
Graduate Certificate in Data Science ......................................... 564
Graduate Certificate in Deaf Studies and Social Justice ............... 2514
Graduate Certificate in Designbuild ........................................... 53
Graduate Certificate in East Asian Cultures ................................. 1385
Graduate Certificate in Entrepreneurship ................................... 155
Graduate Certificate in Environmental Assessment ..................... 1484
Graduate Certificate in Environmental Geology ......................... 1572
Graduate Certificate in Environmental Justice ........................... 1485
Graduate Certificate in Environmental Studies ......................... 1486
Graduate Certificate in Film and Media Studies ......................... 2062
Graduate Certificate in Foundations of Engineering Management .... 2514
Graduate Certificate in Foundations of Project Management ........................................... 2515
Graduate Certificate in Geographic Information Science ............................................. 1540
Graduate Certificate in Health Psychology ................................................................. 1888
Graduate Certificate in High Incidence Disabilities Endorsement (KS) ...................... 399
Graduate Certificate in Historic Preservation ............................................................. 53
Graduate Certificate in Homeland Security: Law and Policy ........................................ 801
Graduate Certificate in Indigenous Studies ................................................................. 1689
Graduate Certificate in Interdisciplinary Early Intervention ........................................ 400
Graduate Certificate in K-12 Building Leadership ....................................................... 306
Graduate Certificate in Latin American and Caribbean Studies .................................... 1725
Graduate Certificate in Law & Society ......................................................................... 2150
Graduate Certificate in Leadership in Special and Inclusive Education ...................... 400
Graduate Certificate in Leadership Studies .................................................................. 1694
Graduate Certificate in Licensure Endorsement in Early Childhood Unified (birth-k) (KS) ................................................................. 401
Graduate Certificate in Low Incidence Disabilities Endorsement (KS) ...................... 402
Graduate Certificate in Medieval and Early Modern Studies ........................................ 1507
Graduate Certificate in Mind, Brain, and Education ..................................................... 327
Graduate Certificate in Museum Studies ...................................................................... 1796
Graduate Certificate in Music Enterprise ..................................................................... 2383
Graduate Certificate in Music Performance .................................................................. 2384
Graduate Certificate in Peace & Conflict Studies ......................................................... 1683
Graduate Certificate in Performance Management ....................................................... 2151
Graduate Certificate in Petroleum Management .......................................................... 500
Graduate Certificate in Professional Workplace Communication ............................. 2515
Graduate Certificate in Public / Nonprofit Management .............................................. 2152
Graduate Certificate in Public Policy ........................................................................... 2153
Graduate Certificate in Reading .................................................................................. 285
Graduate Certificate in Religious Studies ..................................................................... 1901
Graduate Certificate in RF Systems Engineering ......................................................... 565
Graduate Certificate in Russian, East European and Eurasian Studies ...................... 1910
Graduate Certificate in Science Management .............................................................. 2516
Graduate Certificate in Second Language Studies ....................................................... 2512
Graduate Certificate in Social Media Strategy ............................................................. 1732
Graduate Certificate in Software Engineering and Management ............................... 775
Graduate Certificate in Structural Analysis ................................................................... 524
Graduate Certificate in Structural Design ..................................................................... 524
Graduate Certificate in Structural Forensics ................................................................. 524
Graduate Certificate in Studies in Equity and Social Diversity in the U.S. ..................... 1733
Graduate Certificate in Teaching English to Speakers of Other Languages .............. 286
Graduate Certificate in Transition ............................................................................... 403
Graduate Certificate in Urban Design .......................................................................... 54
Graduate Certificate in Urban Planning .......................................................................... 2154
Graduate Certificate in Water Resources ...................................................................... 2154
Graduate Certificate in Women, Gender, and Sexuality Studies ................................. 2010
Graduate Certificate of Public Interest Design ............................................................. 54
