Students must be actively enrolled at the university when they apply for retroactive credit. There is a flat-rate charge of $50; you will receive a bill from the Bursar’s Office after the credit has been applied to your transcript. To apply for retroactive credit, you must bring the following 3 items to the Undergraduate Advisor:

• Copy of your high school transcript, available from the Office of Admissions at the Visitor Center
• A copy of your DPR
• A note stating that you wish to apply for retroactive credit for the German course(s) that you took in high school.

Advanced Placement

KU encourages students to take Advanced Placement Examinations in any of the areas under the College Entrance Examination Board (CEEB) program. KU gives credit only in certain courses with certain scores from the AP examinations.

The results of these examinations must be sent to KU directly from CEEB. Departments may grant advanced placement and/or credit on the basis of the test scores. No college grade is assigned when advanced placement credit is given. Instead, a credit is recorded on the student’s KU record. No fee, beyond that charged by CEEB, is assessed for such college credit or placement. For information on how Advanced Placement scores in English and mathematics affect graduation requirements and initial enrollment in all schools, see the College of Liberal Arts and Sciences Degree Requirements page and the English (p. 1428) and Mathematics (p. 1749) department pages. Contact the Office of Admissions (http://admissions.ku.edu/), adm@ku.edu, for further information.

Credit by Examination

KU offers its own program of examinations for advanced credit. Applications are available online (http://www.registrar.ku.edu/forms/). They must be approved by the Undergraduate Advisor and the chair of the department concerned and by the student’s dean or dean’s representative. A report of the examination taken, showing the hours of credit to be granted and the grade awarded, must be signed by the professor giving the examination, the chair, and the dean or dean’s representative.

At the discretion of each academic dean, grades of A, B, C, or D may be used to indicate degrees of achievement, or a grade of Credit may indicate satisfactory performance. No record is made of an unsatisfactory attempt. Credit by Examination grades are not included in the grade-point average that appears on the official transcript.

A fee is charged for each course. For current fee information, contact the Office of the University Registrar (http://www.registrar.ku.edu/), kuregistrar@ku.edu.

Warning: Some medical schools do not accept credit by examination.

Native Speakers

Students who have completed secondary education in a German-speaking country are generally not eligible to enroll in German courses below the 400 level. The department reserves the right to disenroll such students.

Courses for Future Teachers

Candidates for the B.S. in Education majoring or minoring in German should consult the School of Education.

General Information about the Graduate Program

The Department offers the German Studies M.A. and Germanic Languages & Literatures Ph.D., but has suspended matriculation until further notice.

Work toward the M.A. degree consists of a traditional curriculum providing important foundational knowledge. The curriculum includes historical surveys of the major literary periods and genres, of the structure and function of German and Germanic languages, knowledge of disciplinary methodologies employed in the field, development of language capacity, and control of writing and research strategies. Building on the M.A. foundational base, the KU Ph.D. degree program encourages students to develop their particular intellectual interests in collaboration with KU faculty and their areas of specialization. The graduate program focuses on the following areas:

• German literature
• Germanic linguistics/philology
• German second-language acquisition/applied linguistics

More information regarding areas of concentration is available on the Graduate Admission (http://germanic.ku.edu/graduate-admission/) page of the departmental website.
Departmental Funding
The department does its best to provide funding in the form of Graduate Teaching Assistant (GTA) appointments to incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach German at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://germanic.drupal.ku.edu/gta-appointments-and-fellowships/) of our departmental website.

Post-comprehensive students completing their dissertations are also eligible to apply for one of the the departmental Max Kade Dissertation Fellowships.

Additional Funding
There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for KU graduate students.

Contact
For inquiries concerning the graduate program, please contact:

Professor Nina Vyatkin (vyatkin@ku.edu), Director of Graduate Studies and/or Aley Pennington (aleypennington@ku.edu), Graduate Academic Advisor.

Courses
GERM 100. German Reading Course I. 3 Hours U.
Primarily for graduate students in other departments but also open to seniors planning to pursue graduate study. Fundamentals of grammar and reading texts of medium difficulty. Does not count toward undergraduate language requirement. Previous study of German not necessary. Not open to native speakers of German. LEC.

GERM 101. German Reading Course II. 3 Hours U.
Continuation of GERM 100. Advanced grammar and reading advanced texts in the students' respective fields. Does not count toward undergraduate language requirement. Not open to native speakers of German. Prerequisite: GERM 100 or permission of instructor. LEC.

GERM 104. Elementary German I. 5 Hours AE42 / U / F1.
Introductory German; no previous German required. Development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on everyday topics and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 108. LEC.

GERM 108. Elementary German II. 5 Hours AE42 / U / F2.
Continuation of GERM 104. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on everyday topics and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 201. Prerequisite: GERM 104 or placement by examination. LEC.

GERM 111. Introduction to German I. 3 Hours U.
Introduction to German for special purposes; no previous German required. Provides basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Introduction to the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 110 or permission of instructor. LEC.

GERM 112. Introduction to German II. 3 Hours U.
Continuation of GERM 111. Further development of basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Continued exploration of the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 111 or permission of instructor. LEC.

GERM 113. Introduction to German III. 1.5 Hour U.
Continuation of GERM 112. Further development of basic familiarity with the German language, focusing on speaking and reading skills and the essentials of German grammar. Continued exploration of the culture of the German-speaking world. Three class hours per week; may be delivered by video conference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: GERM 112 or permission of instructor. LEC.

GERM 124. German Cinema in Context. 3 Hours HL AE42 / H.
Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the films' sources, ideologies, techniques, and artistic achievements. Does not count toward the German major or minor. LEC.

GERM 125. German Cinema in Context (Honors). 3 Hours HL AE42.
Course content similar to GERM 124. Taught in English. Screening and analysis of German films from the early 20th century to the present. Readings, lectures, and discussions on the films' sources, ideologies, techniques, and artistic achievements. Does not count toward the German major or minor. LEC.

GERM 128. Introduction to the Arts in German-Speaking Europe. 3 Hours H.
Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 328. LEC.

GERM 130. Today's Challenges in German-Speaking Europe. 3 Hours AE42 / H.
This course explores significant political, social, and cultural challenges facing German-speaking Europe today. Specific issues may include migration, the environment, national identity, European integration, business, remembering the past, and technology. Focus on Germany, Austria, and Switzerland and to a lesser extent Belgium, Luxembourg,
and Liechtenstein. Taught in English. Does not count toward the German Studies major or minor. LEC.

GERM 132. The City of Berlin in German Culture. 3 Hours H.
Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 332. LEC.

GERM 148. Germanic Mythology, Religion, and Folklore. 3 Hours H/W.
Taught in English. Introduction to the pagan myths and beliefs of Teutonic antiquity and their survival in the popular traditions of Germanic countries, within the framework of comparative mythology, archaeology, and anthropology. Does not count toward the German major or minor. LEC.

GERM 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in German. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

GERM 201. Intermediate German I. 3 Hours AE42 / U / F3.
Continuation of GERM 108. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who complete this course successfully should take GERM 202. Prerequisite: GERM 108 or placement by examination. LEC.

Continuation of GERM 201. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts in different genres and to interpret, compare, and contrast German and American cultural phenomena. Emphasis on interaction. Not open to native speakers of German. Students who successfully complete this course should take GERM 301. Prerequisite: GERM 201 or placement by examination. LEC.

GERM 203. Introduction to Business German: Deutsch im Berufssalltag. 3 Hours AE42 / H / F4.
Continuation of GERM 201; completes language proficiency sequence. Further development of students' balanced knowledge of the German language and culture, including the ability to understand and produce short spoken, written, and multimedia texts on the topics related to professional communication and to interpret, compare, and contrast German and American business cultural phenomena. Emphasis on interaction. Recommended for students planning to take GERM 352 and GERM 462. Not open to native speakers of German. Prerequisite: GERM 201 or placement by examination. LEC.

GERM 220. Study Abroad Topics in the German Language. 1-5 Hours U.
This course is for elementary- and intermediate-level instruction in the German language while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies. LEC.

GERM 222. Study Abroad Topics in German Studies: ______. 1-3 Hours H/W.
This course is for elementary- and intermediate-level German Studies courses taught in German taken while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental undergraduate advisor. May be repeated for credit if content varies. LEC.

GERM 233. Introduction to German Conversation. 3 Hours H.
Students learn basic techniques and strategies, expand vocabulary and idiomatic usage, and improve accuracy in grammar and pronunciation. Prerequisite: Only open to students in the KU Summer Language Institute in Eutin, Germany and GERM 108. Corequisite: GERM 201 and GERM 202. LEC.

GERM 250. Migrants and New Media in 21st-century Germany. 3 Hours H.
This course investigates the phenomenon of human migration through the lens of New Media (documentaries, film essays, digitized political performance art, gallery installations) in Germany. Drawing also on cinematic, historical, and legal texts, we will uncover the complex layers of existence that result when migrants cross a national border. Students will better understand the nuanced aesthetics and sociopolitical context of Germany's New Media production. Ultimately, we will analyze how German productions inform the global debate on migration and our understanding of migrant experiences. LEC.

GERM 301. High Intermediate German I. 3 Hours AE42 / H/W / FP.
Continuation of GERM 202. Further development of students' use of German through reading and discussion of literary and non-literary texts (spoken, written, multimedia, combined with intensive grammar review). Introduction to expressive functions of German with emphasis on spoken and written communication. Not open to native speakers of German. Students who complete this course successfully should take GERM 302. Prerequisite: GERM 202 or placement by examination. LEC.

GERM 302. High Intermediate German II. 3 Hours AE42 / H/W / FP.
Continuation of GERM 301. Refinement and expansion of students' use of German. Reading and discussion in German of literary and non-literary texts (spoken, written, multimedia), combined with continued intensive grammar review. Emphasis on better understanding German grammatical structures and acquisition of vocabulary. Not open to native speakers of German. Students who complete this course successfully should take GERM 401. Prerequisite: GERM 301 or placement by examination. LEC.

GERM 315. German Literature and the Modern Era. 3 Hours H.
Introduction in English to German writers 1750-present. Discussion of themes such as technology, modern and postmodern developments, gender, war, politics, and culture in German-speaking Europe. Readings include works in translation by influential German writers. Open to first-year students and non-majors. GERM 315 is required for admission to all courses beyond GERM 402 except GERM 462. LEC.

GERM 320. Border Crossings in German Culture. 3 Hours HT AE42.
Taught in English. Exploration of writers, filmmakers, and artists who have emigrated from, or migrated to German-speaking Europe. Emphasis on both their transnational impact and their representations of border crossings. Topics may include exile communities before, during, and after World War II and multiculturalism in contemporary Germany, Austria, and Switzerland. LEC.

GERM 322. Study Abroad Topics in German Studies: ______. 1-5 Hours H.
This course is for 300-level German Studies courses taught in German taken while studying abroad. Transfer credits must be arranged through the KU Office of Study Abroad, with permission from the departmental...
undergraduate advisor. May be repeated for credit if content varies. Prerequisite: GERM 302 or the equivalent. LEC.

GERM 328. The Arts in German-Speaking Europe. 3 Hours HL AE42. Taught in English. Exploration of the arts in German-speaking Europe: major cultural periods, movements, art forms, and people (artists, architects, composers, writers, filmmakers) from the Middle Ages to the present. Consideration of the arts within the larger European historical and cultural context from which they emerged. Does not count toward the German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 128. LEC.

GERM 330. Topics in: ______. 3 Hours H. Taught in English. Interdisciplinary study of selected aspects of the society or culture of German-speaking Europe or of the European experience. Does not count toward the German major or minor. LEC.

GERM 332. Berlin in German Culture. 3 Hours HL AE42. Taught in English. Introduction to Berlin within the context of major German and European historical, social, intellectual, and artistic developments since 1800. Exploration of complex epochs such as the Bismarck, Nazi, Cold War, and post-unification eras through journalism, literature, sociological writings, and film. Does not count toward German major or minor. This course is offered at the 100 and 300 levels with additional assignments at the 300-level. Not open to students who have completed GERM 132. LEC.

GERM 333. German Conversation and Idioms. 3 Hours H. Intensive practice in conversational German with instruction in proper pronunciation as well as an introduction to idiomatic usage. Only for students in the KU Summer Language Institute in Holzkirchen, Germany or in courses offered through the KU Language Training Center. Prerequisite: GERM 202 or equivalent fourth-semester German course. LEC.

GERM 334. Review of German Grammar. 3 Hours H. Intensive review and practice of select topics in German grammar. Offered only for students in the KU Summer Language Institute in Holzkirchen, Germany or in courses offered through the KU Language Training Center. Prerequisite: GERM 202 or equivalent fourth-semester German course. LEC.

GERM 336. The German Transatlantic Experience. 3 Hours AE41 / U. Introduction to the migration of German-speaking Europeans to North America, 17th century-present. Consideration of European and North American factors motivating migration, the journey to the New World, the experiences of immigrants and their descendants, and the ways in which German-speaking Europeans shaped the multicultural history of America. Taught in English. LEC.

GERM 350. Studies in German Language, History, and Culture. 3 Hours SC / H. Students visit museums and cultural sites in Cologne, Berlin, Munich, and other locations, with a focus on the 20th century. Discussion and written assignments in German. Offered only for the KU Summer Language Institute in Holzkirchen, Germany. Prerequisite: GERM 202 or equivalent fourth-semester German course. LEC.

GERM 353. German Conversation. 3 Hours H/W / FP. Further development of practical conversational skills for students with intermediate proficiency in German. Discussion of topics from everyday German life and current affairs, based on German newspapers and magazines. May be repeated but counts only once toward the major or minor. Not open to native speakers of German. Prerequisite: GERM 202. LEC.

GERM 362. German and Germany in Global Business Culture I. 3 Hours H/W. High-intermediate content-based course with focus on the language skills needed to engage actively with the German business world, including applying for internships and jobs. Introduction to common cultural practices in the German business environment. Use of multimedia sources to explore current events and issues in Germany and their significance within a global business context. Not open to native speakers of German. Prerequisite: GERM 202 or the equivalent. LEC.

GERM 370. German Studies Topics: ______. 3 Hours H. Exploration of German Studies topics such as literature, film, philosophy, social institutions, language, the arts, media. Topics vary, and course may address topics across a narrow or broad time frame. Course conducted in German. May be repeated if content varies. Prerequisite: GERM 302. LEC.

GERM 375. Topics in Film of German-Speaking Europe: ______. 3 Hours H. Examination of topics such as Expressionism, Turkish-German culture in contemporary German film, popular filmmaking, post-unification film, German literature as film, German film and national identity. Topics and periods vary. Prerequisite: GERM 302. LEC.

GERM 400. Introduction to German Literary Masterpieces. 3 Hours H/W / FP. For students enrolled in the KU Summer Language Institute in Germany. Selected works of major German Language writers of the 19th and 20th centuries. Not open to native speakers of German. Prerequisite: GERM 302. LEC.

GERM 401. Advanced German I. 3 Hours H / FP. Continuation of GERM 302. Expansion and refinement of proficiency in German (speaking, listening, reading, writing), increased understanding of German grammatical structures, development of a more sophisticated vocabulary, and introduction to stylistics through discussion and analysis of literary and nonliterary texts. Students successfully completing GERM 401 may take all other GERM courses at the 400 and 500 levels. Prerequisite: GERM 302. LEC.

GERM 402. Advanced German II. 3 Hours H / FP. Continuation of GERM 401. Development of advanced proficiency in German through analysis and discussion of literary and nonliterary texts and practice in advanced composition. Emphasis in both discussions and papers on style and rhetoric and on developing skill in textual analysis. Focus on advanced German grammar and on style and idiomatic expression in spoken and written German. Prerequisite: GERM 401. LEC.

GERM 411. German Culture 1150-1750. 3 Hours AE61 / H / FP. Exploration of major cultural periods and movements within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 412. German Culture 1750-Present. 3 Hours AE61 / H / FP. Exploration of major cultural periods and movements 1750-present within the framework of historical and political change, with investigation of themes such as nation and national identity, founding myths, geography, and language. Study of forms of culture in German-speaking Europe, including visual art, music, literature, architecture, and the press. Prerequisite: GERM 315 and GERM 401. LEC.
GERM 421. Exiles, Migrants, and Refugees in German Literature and Film. 3 Hours H.
What does it mean to cross a border in today’s world? This course explores different examples of “border crossing” in German-speaking Europe and in their broader European and transatlantic context. Engaging with literature, film, and works of art from the 20th to 21st centuries, we will address topics such as fictional representations of America; exile literature before and during World War II; the Berlin Wall and divided Germany; and migration and multiculturalism in contemporary Germany, Austria, and Switzerland. This course is taught in German. Prerequisite: GERM 302. LEC.

GERM 453. Investigation and Conference: _______. 1-3 Hours H/W.
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work is required. Not open to native speakers of German. IND.

GERM 462. German and Germany in Global Business Culture II. 3 Hours H/W / FP.
Advanced content-based course with focus on the language skills needed to examine the German social market economy, legal forms of companies, and the business planning process. Use of multimedia sources to explore current German business and economic issues in international, transatlantic, and global contexts. Team research project and presentation. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 475. Topics in German Studies: _______. 3 Hours H / FP.
Exploration of cultural forms such as literature, film, philosophy, social institutions, linguistics, the arts, and the press. Examination of how cultural meaning is produced and interpreted. Topics vary, and course may address topics across a narrow or broad time frame. May be repeated if content varies. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 480. Literature and Culture of German-Speaking Europe 1150-1750. 3 Hours AE61 / H / FP.
Exploration of medieval and early modern literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 481. Literature and Culture of German-Speaking Europe 1750-1830. 3 Hours AE61 / H / FP.
Exploration of literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 482. Literature and Culture of German-Speaking Europe 1830-1918. 3 Hours AE61 / H / FP.
Exploration of literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 483. Literature and Culture of German-Speaking Europe 1918-Present. 3 Hours AE61 / H / FP.
Exploration of literature within the framework of major cultural movements and historical, political, and economic change. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 501. Advanced German III. 3 Hours H / FP.
Focus on usage-based grammar of contemporary German. Extensive reading and analysis of grammatical structures in context and integration of form, meaning, and use. Exploration of grammatical structures using contemporary electronic textual analysis tools. Prerequisite: GERM 402. LEC.

GERM 550. History of the German Language. 3 Hours H / FP.
Introduction to basic concepts of German philology and historical linguistics and exploration of the development of a national German language. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 560. Structure of the German Language. 3 Hours H / FP.
This course provides an overview of the structure of modern standard German. Students will explore different levels of the linguistic system of German (including phonology, morphology, and syntax) and complete practical exercises. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 575. Topics in Genre: _______. 3 Hours H / FP.
Study of the definition, style, form, and content of a specific literary genre in German-language literature and the social, cultural, political, and economic factors that led to its emergence. Consideration of the genre's suitability for particular writers or periods. Topic and period vary. May be repeated if content varies. Prerequisite: GERM 315 and GERM 401. LEC.

GERM 579. Investigation and Conference: _______. 1-3 Hours AE61 / H / W / FP.
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work required. Prerequisite: GERM 315 and GERM 401. IND.

GERM 580. Senior Capstone Course: German-Speaking Europe Today. 3 Hours AE61 / H / FP.
Students write and present a research paper on an aspect of contemporary German-speaking Europe. Focus on learning or refining the linguistic and research-related skills needed to produce a research paper. Students synthesize their knowledge of German Studies with coursework they have completed in other disciplines. Conducted in German and English. Required of all German Studies majors in senior year. Prerequisite: GERM 315, GERM 401, and senior standing. LEC.

GERM 589. Research for Departmental Honors. 3 Hours H / FP.
Research for a departmental honors project, on a topic chosen in conjunction with the faculty advisor. Emphasis on independent study and writing. Open to students with previous coursework in German at the 400 level, an overall 3.0 GPA, and at least a B+ average in advanced work in German. Prerequisite: GERM 315, GERM 401, senior standing, and permission of Undergraduate Advisor. RSH.

GERM 599. Departmental Honors Project. 3 Hours H / FP.
Continuation of GERM 598. Course consists of completion of Departmental Honors project. Quality of project determines whether student receives credit only or Honors in German. Prerequisite: GERM 598. RSH.

GERM 616. Topics in German Literature: _______. 3 Hours AE61 / H/W.
Readings and discussions in German of selected literary works on a particular topic or theme (e.g., nature, women, art and literature, etc.). May be repeated. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416, and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 618. Topics in German Language and Linguistics: _______. 3 Hours AE61 / H/W.
Readings and discussions in German in an area of specialized language or linguistic study (e.g., lexical fields, modern German dialects, etc.). May be repeated. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416, and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

GERM 620. Topics in German Culture and Folklore: _______. 3 Hours AE61 / H/W.
Readings and discussions in German on some aspect of German culture or folklore, including Landeskunde (study of contemporary Germany).
May be repeated. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416, and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

**GERM 626. Idiomatic Usage in Modern Colloquial and Literary German. 3 Hours AE61 / H/W.**
Practical exercises in the systematic study of idioms and synonyms, designed to foster a more discriminating and effective usage of German. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

**GERM 630. Advanced German Grammar. 3 Hours AE61 / H/W.**
Recommended for students intending to teach German. Prerequisite: Two literature courses from GERM 400, GERM 408, and GERM 416 and two composition courses from GERM 340, GERM 344, and GERM 348, or equivalent. LEC.

**GERM 700. Introduction to Graduate Studies in German. 3 Hours.**
An introduction to the skills required of students enrolled in graduate degree programs in German Studies; areas covered include 1) introduction to literary theory and criticism, 2) bibliography and research methods, including database management software, 3) preparation and presentations of a research/conference paper, 4) technology training, including web design, on-line portfolio, and digital humanities, and 5) professional ethics and awareness of the academic market and alternative careers. We will also be working on practical, professionally useful goals, such as how to (better) make use of technology, how to create a CV and modify it for different positions, how to write an abstract, and how to produce a conference paper. Course requirements will include a variety of smaller assignments and two larger projects, a web-based professional portfolio and an 8 to10-page conference paper. LEC.

**GERM 701. Introduction to the Study of Literature. 3 Hours.**
Introduction to methods of literary research and presentation of seminar papers. Exercises in the use of basic guides to the study of German language and literature, in the documentation of scholarly research, and in the writing of interpretive essays, based on reading and discussion of selected works from different periods of the departmental "Basic Reading List. LEC.

**GERM 710. Workshop for M.A. Students. 1 Hour.**
Discussion of policies in the M.A. program, examinations, thesis proposals, writing of theses, grant proposals, conference presentations, publications of scholarship, and entrance into the academic job market. Required of all M.A. students in the first year in the program. Does not count toward completion of 30 hours of course work for the M.A. RSH.

**GERM 712. The Structure of Modern Standard German. 3 Hours.**
A comprehensive introduction to the structure and usage of contemporary German, including phonetics, phonology, morphology, syntax, text linguistics, semantics, pragmatics, and language variation. Students will listen to lectures, read texts on German linguistics, participate in discussions, and work extensively on linguistic problems involving German. LEC.

**GERM 716. Topics in German Literature: _____. 3 Hours.**
Intensive study of a selected topic in German literature. May be repeated. Offered only in conjunction with GERM 616 when taught by a Max Kade Distinguished Visiting Professor. Graduate students will be assigned additional work. LEC.

**GERM 734. Age of Goethe. 3 Hours.**
Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history. LEC.

**GERM 736. Post-Romantic Nineteenth Century. 3 Hours.**
Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history. LEC.

**GERM 738. Twentieth Century. 3 Hours.**
Reading and discussion of major literary works in the period; combined with lectures and background readings on literary, cultural, and political history. LEC.

**GERM 751. Topics in German Studies: _____. 3 Hours.**
Course covers key topics in German Studies and represents the expertise of faculty in the department as well as department-affiliated faculty. Topics will vary from semester to semester and instructor to instructor to allow flexibility for in-depth analysis of particular topics. May be repeated as topics vary. LEC.

**GERM 753. Investigation and Conference: _____. 1-6 Hours.**
To be taken only in exceptional cases. Permission of the instructor who will supervise the student's work is required. RSH.

**GERM 756. Studies in Enlightenment Literature: _____. 3 Hours. LEC.**

**GERM 800. Seminar: Teaching German as a Second Language. 3 Hours.**
Introduction to selected aspects of second-language acquisition, foreign-language pedagogy, and contrastive grammar, with the major concentration on practical guidance in teaching elementary German, in test preparation and grading, and in the use of equipment. LEC.

**GERM 801. Practicum in GTAs. 1 Hour.**
Discussion of matters relating to the teaching of German in specific courses. Required of all GTAs in each semester of teaching, unless enrolled in GERM 800. Does not count toward completion of 30 hours of course work for the M.A. or 27 hours of course work for the Ph.D. IND.

**GERM 855. Introduction to German Applied Linguistics. 3 Hours.**
Introduction to theories and topics in German applied linguistics. SEM.

**GERM 860. Introduction to Modern German Dialects. 3 Hours.**
Introduction to modern German dialects, methods of dialect research and aspects of linguistic assimilation and loss as well as a survey of German-American dialects. Prerequisite: Permission of instructor required. SEM.

**GERM 899. Master's Thesis. 3 Hours.**
May not be repeated. THE.

**GERM 900. Workshop for Ph.D. Students. 1 Hour.**
Discussion of policies in the Ph.D. program, research specializations, examinations, dissertation proposals, writing of dissertations, grant proposals, conference presentations, publication of scholarship, and entrance into the academic job market. Required of all Ph.D. students in the first year in the program. Does not count toward completion of 27 hours of course work for the Ph.D. LEC.

**GERM 953. Investigation and Conference: _____. 1-6 Hours.**
To be taken only in exceptional cases. Permission of the instructor who will supervise the student's work is required. RSH.

**GERM 960. Seminar on Writers of the Age of Goethe: _____. 3 Hours. LEC.**

**GERM 962. Seminar in Romanticism: _____. 3 Hours. LEC.**

**GERM 967. Seminar in Special Topics: _____. 3 Hours. LEC.**

**GERM 999. Doctoral Dissertation. 1-10 Hours.**
THE.
Bachelor of Arts in German Studies

Why study German Studies?

Knowledge of the language and culture of German-speaking Europe provides students with linguistic and transcultural competence that will enable them to participate productively in a rapidly changing world. German is an official language in six central European countries and the most widely spoken language in the European Union. The United States maintains important economic, political, security, and cultural ties with the German-speaking countries. About 50 million people in the United States claim German ancestry.

Our students complete a diverse and challenging program that encompasses not only the German language but also courses that explore literature, the arts, history, business, and politics. Our program is characterized by interdisciplinary flexibility, a variety of co-curricular activities, and personalized academic advising and mentoring. German Studies students acquire research skills they need to study issues relevant to our field. Many German Studies majors and minors study abroad for a summer, semester, or year, often supported by departmental scholarships, and some complete internships in Germany. All German Studies students have opportunities to make use of the rich resources available at KU, including the Spencer Museum of Art, KU Libraries, Max Kade Center for German-American Studies, Office of Study Abroad, and Center for Undergraduate Research. Our students tend to have a second major or a minor in fields such as Global & International Studies, History, Business, Environmental Studies, Music, Microbiology, and Linguistics.

Our graduates have pursued their passion for language and culture in many ways: working for a non-profit organization affiliated with the U.S. Department of State; translating for a medical software company; serving on the human resources team of a global German sporting goods company; teaching high school German; working as copy editor of a newspaper; and pursuing graduate work in Germanic languages & literatures, social welfare, law, and speech pathology.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements.

See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

The following should be completed as early as possible:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 104</td>
<td>Elementary German I</td>
<td>5</td>
</tr>
<tr>
<td>GERM 108</td>
<td>Elementary German II</td>
<td>5</td>
</tr>
<tr>
<td>GERM 201</td>
<td>Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 202</td>
<td>Intermediate German II</td>
<td>3</td>
</tr>
</tbody>
</table>

Requirements for the B.A. Major

Required Courses

After completion of GERM 202 Intermediate German II, students must complete 15 credits as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 301</td>
<td>High Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 302</td>
<td>High Intermediate German II</td>
<td>3</td>
</tr>
<tr>
<td>GERM 315</td>
<td>German Literature and the Modern Era</td>
<td>3</td>
</tr>
<tr>
<td>GERM 401</td>
<td>Advanced German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 580</td>
<td>Senior Capstone Course: German-Speaking Europe Today</td>
<td>3</td>
</tr>
</tbody>
</table>

GERM 315 must be completed before students can take a course beyond GERM 402 (except GERM 462).

Admission to 400- and 500-level courses after GERM 402 (except GERM 462) without completion of GERM 315 is only with permission of the Undergraduate Advisor.

Elective Courses

A minimum of 15 credit hours at the 300, 400, and 500 levels must be completed beyond the required courses. 12 of these credit hours must be at the 400 or 500 level. In exceptional cases, undergraduates may take courses at the 600 level with permission of the Undergraduate Advisor and the instructor.

With permission of the Undergraduate Coordinator, 6 credit hours (300-500 level) may be counted toward the major by completing two approved courses offered in English by German Studies or offered by other departments with significant content related to German-speaking Europe.

German studies majors are strongly encouraged to study abroad and should discuss this opportunity with the Undergraduate Coordinator early in their undergraduate career.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:

Major Hours

Satisfied by 30 hours of major courses.

Major Hours in Residence
At least 15 hours of coursework at the 300, 400, and 500 levels, including the senior capstone course, GERM 580, must be completed in residence at KU.

### Major Junior/Senior Hours

Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in German Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

¹ The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

² GERM 104, GERM 108, GERM 201, GERM 202, GERM 203, GERM 301, and GERM 302 all fulfill Goal 4.2 Global Awareness. Completing one of these courses fulfills Goal 4.2; it does not matter which course a student takes to begin German language study.

³ Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors in German Studies

To qualify for the B.A. in German Studies with departmental honors, the student must have a minimum grade point average of 3.5 in German Studies at graduation. Students must complete an honors research project during their final year at KU. Topics are selected in consultation with the faculty thesis director from German Studies. Applications for departmental honors must be submitted by the end of the first week of classes, normally during the fall of senior year. Upon acceptance of an application, the student registers for the GERM 598 - GERM 599 sequence. The student presents the completed research project to the thesis director and two other members of the Departmental Honors Committee about one month before concluding his or her final semester at KU. A grade of B or higher in GERM 598 and GERM 599 is required for departmental honors. GERM 598 and GERM 599 may not be used to satisfy other course requirements.
Study Abroad
German Studies conducts two Summer Language Institutes in Germany for students in second-, third-, and fourth-year German. Students normally enroll for 6-9 credit hours and live with German families.

Juniors and seniors are encouraged to spend a semester or a full academic year at a university in Germany. Consult with the Office of Study Abroad and the Undergraduate Advisor early in your undergraduate career.

German Studies offers competitive study abroad scholarships.

Graduating seniors may apply for Direct Exchange Program fellowships at universities in Germany. For information, consult the department (http://germanic.ku.edu/) or the Office of International Programs (http://www.studyabroad.ku.edu/).

Minor in German Studies
Why study German Studies?
Knowledge of the language and culture of German-speaking Europe provides students with linguistic and transcultural competence that will enable them to participate productively in a rapidly changing world. German is an official language in six central European countries and the most widely spoken language in the European Union. The United States maintains important economic, political, security, and cultural ties with the German-speaking countries. About 50 million people in the United States claim German ancestry.

Our students complete a diverse and challenging program that encompasses not only the German language but also courses that explore literature, the arts, history, business, and politics. Our program is characterized by interdisciplinary flexibility, a variety of co-curricular activities, and personalized academic advising and mentoring. German Studies majors and minors acquire research skills they need to study issues relevant to our field. Many German Studies majors and minors study abroad for a summer, semester, or year, often supported by departmental scholarships, and some complete internships in Germany. All German Studies students have opportunities to make use of the rich resources available at KU, including the Spencer Museum of Art, KU Libraries, Max Kade Center for German-American Studies, Office of Study Abroad, Center for Undergraduate Research, and Career Center. Our students tend to have a second major or a minor in fields such as Global & International Studies, History, Business, Environmental Studies, Music, Microbiology, and Linguistics.

Our graduates have pursued their passion for language and culture in many ways: working for a non-profit organization affiliated with the U.S. Department of State; translating for a medical software company; serving on the human resources team of a global German sporting goods company; teaching high school German; working as copy editor of a newspaper; and pursuing graduate work in Germanic Languages & Literatures, social welfare, law, and speech pathology.

Requirements for the Minor
The minor requires 18 hours in courses numbered 300 and above. The prerequisite is completion of the proficiency sequence in German (GERM 202 or equivalent).

German Studies Minor Course Requirements
Required Courses
After completion of GERM 202: Intermediate German II, students must complete the following two courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 301</td>
<td>High Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 302</td>
<td>High Intermediate German II</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective Courses
12 additional hours at the 300, 400, and 500 levels. GERM 315 is strongly encouraged because it is a prerequisite for courses above GERM 402 (except GERM 462).

With permission of the Undergraduate Coordinator, one approved 3-credit course offered in English by German Studies or by another department with significant content related to German-speaking Europe (300-500 level) may be counted toward the German minor. A 600-level course may be counted only with approval of the Undergraduate Coordinator.

Minor Hours & GPA
While completing required courses, minors must also meet each of the following hour and grade point average minimum standards:

- **Minor Hours**
  - Satisfied by 18 hours of minor courses.

- **Minor Hours in Residence**
  - Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

- **Minor Junior/Senior Hours**
  - Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

- **Minor Graduation GPA**
  - Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in World Business Culture
The World Business Culture certificate is designed for student who are interested in pursuing a global career, and to prepare students to interact with people from other cultures, particularly in a business environment. Students will also gain foundational knowledge in business ethics, as well as how to enter into a global career field.

Undergraduate Certificate in World Business Culture
12 credit hours, at least 6 at the Jr/Sr level
(All courses available online)

Master of Arts in German Studies

Overview

Work toward the M.A. degree consists of a traditional curriculum providing important foundational knowledge. The curriculum includes historical surveys of the major literary periods and genres, of the structure and function of German and Germanic languages, knowledge of disciplinary methodologies employed in the field, development of language capacity, and control of writing and research strategies.

Departmental Funding

The department does its best to provide funding in the form of Graduate Teaching Assistant (GTA) appointments to incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

Appointments are guaranteed based on performance for up to 3 years for M.A. students, and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach German at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://germanic.drupal.ku.edu/gta-appointments-and-fellowships/) of our departmental website.

Additional Funding

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for KU graduate students.

Contact

For inquiries concerning the M.A. program, please contact:

Professor Nina Vyatkina (https://germanic.ku.edu/nina-vyatkina/),
Department Chair, and/or Aley Pennington (aleypennington@ku.edu),
Graduate Academic Advisor.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

German Studies Graduate Admission

The Department of Germanic Languages and Literatures has suspended matriculation for the M.A. program until further notice. Please visit the graduate admission (https://germanic.drupal.ku.edu/graduate-admission/) page of the department website, or contact the department Graduate Academic Advisor, Aley Pennington (aleypennington@ku.edu), for more information.

Master of Arts in German Studies

Requirements

1. 30 credits that must include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>

<td>Topics in German Studies: _____¹</td>
<td>3</td>
</tr>
</tbody>
</table>

² This German Studies Topics course is offered with specific topics and subtitles as needed in different semesters. Each semester it will cover key topics in German Studies and represents the expertise of faculty in the department as well as department-affiliated faculty. See current Graduate Student Handbook for possible topics.

First Year Plan of Study:

1st semester: Students choose a graduate advisor and begin compiling a course-based individual reading list. The reading list should consist of twenty primary and secondary works approved by the advisor.

2nd semester: Students declare their choice of thesis, non-thesis or project option and organize their reading list accordingly with the assistance of their advisor.

Thesis Option Exam

The Master's Thesis (50 pages minimum) consists of a scholarly analysis of a chosen topic that is derived from a term paper and expanded to contribute new insights to the discourse surrounding the topic. Students enroll in German 899 Master's Thesis during their third and fourth semesters (6 credits total) to develop and complete their thesis under the direction of a graduate faculty advisor.

Variant within the non-thesis track: Master’s Project

The Master’s Project (30 pages minimum) provides the opportunity to combine scholarly and practical learning. The project, which may be developed from an internship or a broader topic, such as digital Humanities, must be approved in advance by a graduate faculty advisor with whom the student enrolls.

Doctor of Philosophy in Germanic Languages and Literatures

Overview

Building on the M.A. foundational base, the KU Ph.D. degree program encourages students to develop their particular intellectual interests in collaboration with KU faculty and their areas of specialization. The graduate program focuses on the following areas:

- German literature
- Germanic linguistics/philology
- German second-language acquisition/applied linguistics

Ph.D. students studying literature and culture and those studying Germanic philology also benefit from the opportunity to choose a minor field of study. Students may choose a minor of up to 9 credit hours of coursework taken outside the department and chosen in consultation with their dissertation advisor. This minor may also consist of coursework combined with a project.

Departmental Funding

The department does its best to provide funding in the form of Graduate Teaching Assistant (GTA) appointments to incoming graduate students. GTA appointments are awarded for the academic year and come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

Appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach German at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://germanic.drupal.ku.edu/gta-appointments-and-fellowships/) of our departmental website.

Post-comprehensive students completing their dissertations are also eligible to apply for one of the the departmental Max Kade Dissertation Fellowships.

Additional Funding

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for KU graduate students.

Contact

For inquiries concerning the graduate program, please contact:

Professor Nina Vyatkina (https://germanic.ku.edu/nina-vyatkina/),
Department Chair, and/or Aley Pennington (aleypennington@ku.edu), Graduate Academic Advisor.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Germanic Languages & Literatures

Graduate Admission

The Department of Germanic Languages and Literatures has suspended matriculation for the Ph.D. program until further notice. Please visit the graduate admissions (https://germanic.drupal.ku.edu/graduate-admission/) page of the Germanic Languages and Literatures website, or contact the department Graduate Academic Advisor, Aley Pennington, aleypennington@ku.edu, for more information.

Ph.D. Degree Requirements

In addition to the general requirements for the Doctor of Philosophy degree concerning research skills, the oral comprehensive examination, the dissertation, and the final examination, a student must meet the following specific departmental requirements:

1. Normally a minimum of 27 credit hours (excluding GERM 999 Doctoral Dissertation) beyond that required for the M.A. For students in German Applied Linguistics, some of the courses may be taken outside the department. Students in literature and culture and students in Germanic philology may choose a minor up to 9 credit hours of coursework outside the department in consultation with their advisor. This minor may consist of coursework combined with a project. The 9 hours of the minor are included in the required 27 credit hours. Required Courses: One research seminar in the area of specialization; Approved elective courses in the area of specialization; Approved elective courses for the outside minor area (depending on specialization).

2. At least 1 semester of half-time teaching or the equivalent (normally GERM 800 is required concurrently with the first semester of teaching).

3. a). A portfolio evaluation in the third semester of study after successful completion of 18 credit hours of coursework. For a detailed description of portfolio content, see the Graduate Handbook. Upon passing the portfolio evaluation and fulfilling all degree requirements, students advance to the comprehensive examination in the fourth semester of their doctoral studies. b). A comprehensive written and oral examination in the fourth semester upon completion of all required coursework (27 credit hours in German Studies; for students in German Applied Linguistics and for students with a minor...
option, some of the courses will be taken outside of the department) and fulfillment of all degree requirements. The comprehensive examination consists of a 2-part written departmental preliminary examination based on the student’s submitted portfolio followed by an oral examination.

**Research Skills & Responsible Scholarship**

The University requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. For Germanic Languages and Literature doctoral students, this requirement is met by the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 700</td>
<td>Introduction to Graduate Studies in German</td>
<td>3</td>
</tr>
<tr>
<td>GERM 800</td>
<td>Seminar: Teaching German as a Second Language</td>
<td>3</td>
</tr>
<tr>
<td>GERM 855</td>
<td>Introduction to German Applied Linguistics</td>
<td>3</td>
</tr>
</tbody>
</table>

1. This requirement can be fulfilled by completing an approved course or by completing a proficiency examination. Language course may be taken in the summer. If that is not possible, a student may take the course during a Fall or Spring semester while also taking 2 three-credit hour graduate courses in German. Students specializing in medieval philology or older literature must select Latin as the second language for reading knowledge.

**Graduate Handbook**

For further details about the requirements for the Ph.D. see the department’s Graduate Handbook ([https://germanic.drupal.ku.edu/graduate-handbook](https://germanic.drupal.ku.edu/graduate-handbook)).

**Gerontology Program**

**Gerontology Graduate Programs**

Graduate study in gerontology at KU consists of Master of Arts and Doctor of Philosophy degrees in Gerontology, along with the option for a dual-title Ph.D. in Gerontology and selected social science disciplines.

They are administered through the Gerontology Program, a component of the College of Liberal Arts and Sciences.

The Doctor of Philosophy degree in gerontology was approved by the Kansas Board of Regents during the 1996-97 academic year. KU is one of only several universities nationwide offering the Ph.D. in gerontology. KU’s gerontology graduate program is unique in that it is an interdisciplinary research degree emphasizing social and behavioral gerontology.

Faculty affiliated with the program include members of the College of Liberal Arts and Sciences, including the School of the Arts; and the Schools of Architecture, Design and Planning; Education; Engineering; Health Professions; Law; Medicine; Music; Nursing; Pharmacy; and Social Welfare.

The graduate program in gerontology gives students a broad, advanced educational experience in study of older adults. It provides a common focus for all students, yet allows each student to design a course of study most appropriate for her or his career objectives. Courses give students a multidisciplinary perspective on the issues and problems of aging, built on a strong foundation in basic research on aging. The program prepares students for academic and research careers in gerontology, as well as for professional careers in private and public institutions and agencies providing services to older individuals.

Students seeking a terminal M.A. in gerontology are not admitted; the M.A. is offered only to those pursuing a Ph.D.

**Doctor of Philosophy in Gerontology**

**Gerontology Graduate Programs**

Graduate study in gerontology at KU consists of Master of Arts and Doctor of Philosophy degrees in Gerontology, along with the option for a dual-title Ph.D. in Gerontology and selected social science disciplines.

They are administered through the Gerontology Program, a component of the College of Liberal Arts and Sciences.

The Doctor of Philosophy degree in gerontology was approved by the Kansas Board of Regents during the 1996-97 academic year. KU is one of only several universities nationwide offering the Ph.D. in gerontology. KU’s gerontology graduate program is unique in that it is an interdisciplinary research degree emphasizing social and behavioral gerontology.

Faculty affiliated with the program include members of the College of Liberal Arts and Sciences, including the School of the Arts; and the Schools of Architecture, Design and Planning; Education; Engineering; Health Professions; Law; Medicine; Music; Nursing; Pharmacy; and Social Welfare.

The graduate program in gerontology gives students a broad, advanced educational experience in study of older adults. Courses give students a multidisciplinary perspective on the issues and problems of aging, built on a strong foundation in basic research on aging. The program prepares students for academic and research careers in gerontology, as well as for professional careers in private and public institutions and agencies providing services to older individuals.

Students seeking a terminal M.A. in gerontology are not admitted; the M.A. is offered only to those pursuing a Ph.D.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Application and Admission

Any student who has completed at least a B.A. or B.S. degree at an accredited institution of higher education may apply to the Ph.D. program. Required application materials include a résumé, a personal statement of professional and educational goals in gerontology, 1 copy of all undergraduate and graduate transcripts, list of all courses taken that are relevant to gerontology, 3 letters of recommendation, and scores from the Graduate Record Examination. GRE and other scores should be from the last two years. Non-native speakers of English must meet English proficiency requirements as described here http://graduate.ku.edu/english-proficiency-requirements (http://graduate.ku.edu/english-proficiency-requirements/).

Further information is available from the graduate advisor or on the program’s website (http://www.gerontology.ku.edu/).

Submit your graduate application online (http://www.gerontology.ku.edu/).

Program Requirements

For the Ph.D., the student must complete all general degree requirements, including residence, training in research skills and responsible scholarship, the written preliminary examination, the comprehensive oral examination, preparation of a dissertation, and the final oral examination.

Each student designs his or her own curriculum with the assistance of a support committee of 3 gerontology faculty members. All students are expected to acquire multidisciplinary training in gerontology by taking courses in the sociology, psychology, and biology of aging.

Students may enter the program with an acceptable master’s degree from KU or another institution. The admissions committee reviews master’s-level preparation for doctoral-level research. An acceptable level of preparation includes basic training in statistics, program assessment, or policy analysis and completion of an empirical research study or thesis.

Students entering the program without an acceptable master’s degree must complete the M.A. in gerontology before the Ph.D.

The requirements for the M.A. in gerontology are as follows:

• Multidisciplinary Perspectives on Gerontology and Aging (SOC 767)
• 6 hours of core courses in gerontology (selected from at least 2 of the following areas: biology of aging, psychology of aging, social gerontology)
• 12 hours of supplemental courses in gerontology and related fields
• 6 hours of basic statistics courses
• 3 hours of methodology
• 6 hours of thesis credit

For students who enter the program with master’s degrees or who complete the M.A. in gerontology, minimum requirements for the Ph.D. are as follows:

• Multidisciplinary Perspectives on Gerontology and Aging (SOC 767)
• At least 6 hours of core courses in gerontology (selected from at least 2 of the following areas: biology of aging, psychology of aging, social gerontology)
• At least 12 hours of additional supplemental courses in gerontology and related fields
• 6 hours of advanced statistics courses
• 6 additional hours of methodology
• Completion of written and oral comprehensive examination
• 6 hours of dissertation credit, completion of dissertation, and final oral examination

A list of courses meeting requirements in gerontology, statistics, and methodology is available from the graduate advisor.

Evaluation of Satisfactory Performance

Multidisciplinary Perspectives on Gerontology and Aging (SOC 767) and core courses should be completed during the first 2 semesters. Students normally are expected to complete the M.A. degree in 2 years. The maximum time limit for completing all requirements for the M.A. degree is 3 years. Students normally are expected to complete the Ph.D. within 3 years of entering the program or of completing the M.A. The maximum time limit for completing all requirements for the doctoral degree is 8 years after admission to the doctoral program with an acceptable master’s degree or after completion of the M.A. degree in gerontology. Students who complete the M.A. degree in gerontology at KU and subsequently begin doctoral studies have a total enrolled time of 10 years to complete both degrees.

Written Preliminary Examination

Upon completion of the M.A., a major portion of the course requirements, and the research skills and responsible scholarship requirement, each student must pass a written preliminary examination. This examination covers two content areas reflecting the student’s area of concentration and integrates theoretical and methodological issues in gerontology.

Comprehensive Oral Examination

The comprehensive oral examination covers gerontology. The examination can take one of 5 forms:

1. A defense of the written preliminary examination,
2. A defense of a completed research project,
3. A defense of a prospectus for a future research project, including the dissertation,
4. A discussion of a major review paper written by the student,
5. A review of a research grant proposal and a simulated site visit defense of the proposal.

Dissertation Preparation and Final Oral Examination

Upon passing the comprehensive oral examination, the student becomes a candidate for the doctorate. Graduate Studies designates a dissertation committee based on the recommendation of the program. The dissertation committee includes at least three members of the gerontology program faculty.

After passing the comprehensive oral examination, the candidate must be continuously enrolled until all degree requirements have been met. When the completed dissertation has been accepted by the committee, but before it has been bound, and all degree requirements have been met, the program requests the final oral examination to be scheduled, allowing a minimum of 2 weeks to verify the requirements and publicize the examination. At least 5 months must elapse between successful completion of the comprehensive oral examination and the final oral examination.
Research Skills and Responsible Scholarship Requirement

Doctoral students must demonstrate competence in a research skill “distinct from, but strongly supportive of, the dissertation.” The program advisory committee establishes requirements for research skills, including the following options:

1. Demonstrated competency of a language, other than English, relevant to research in gerontology;
2. Competency in research methodology, including quantitative and/or qualitative data analysis;
3. Competency in both computer programming skills and computer applications.
4. A record of professional experience, publication, or presentation at professional meetings or a record of course work in a substantive area such as statistics beyond that required to satisfy the master’s or doctoral degree requirements in gerontology.
5. Successful completion of SPLH 982/PSYC 982 with a grade of B or higher.

Doctoral students are required to have training in responsible scholarship. Such topics may include protection of human subjects; welfare of laboratory animals; conflicts of interest; data management; mentor/ student responsibilities; collaborative research; authorship, publication, plagiarism, copyright; peer review; professional practices; maintenance of confidentiality; and appropriate research conduct and research misconduct.

Please contact your advisor or the Director of Graduate Studies for more information about the Research Skills & Responsible Scholarship requirement. More information can also be found in the departmental Graduate Student Handbook.

Research Experience

All students are expected to be continuously involved in research under the supervision of the graduate advisor and support committee. Research involvement includes the design, execution, and dissemination of research on aging.

Courses

Cooperating departments and schools list courses related to aging. See the website (http://www.gerontology.ku.edu/) for course listings from recent semesters.

Dual-title Ph.D. in Gerontology

Gerontology Graduate Programs

Graduate study in gerontology at KU consists of Master of Arts and Doctor of Philosophy degrees in Gerontology, along with the option for a dual-title Ph.D. in Gerontology and selected social science disciplines.

They are administered through the Gerontology Program, a component of the College of Liberal Arts and Sciences.

The Doctor of Philosophy degree in gerontology was approved by the Kansas Board of Regents during the 1996-97 academic year. KU is one of only several universities nationwide offering the Ph.D. in gerontology. KU’s gerontology graduate program is unique in that it is an interdisciplinary research degree emphasizing social and behavioral gerontology.

Faculty affiliated with the program include members of the College of Liberal Arts and Sciences, including the School of the Arts; and the Schools of Architecture, Design and Planning; Education; Engineering; Health Professions; Law; Medicine; Music; Nursing; Pharmacy; and Social Welfare.

The graduate program in gerontology gives students a broad, advanced educational experience in study of older adults. It provides a common focus for all students, yet allows each student to design a course of study most appropriate for her or his career objectives. Courses give students a multidisciplinary perspective on the issues and problems of aging, built on a strong foundation in basic research on aging. The program prepares students for academic and research careers in gerontology, as well as for professional careers in private and public institutions and agencies providing services to older individuals.

Students seeking a terminal M.A. in gerontology are not admitted; the M.A. is offered only to those pursuing a Ph.D.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Application and Admission

Any student who has completed at least a B.A. or B.S. degree at an accredited institution of higher education may apply to the Ph.D. program. Required application materials include a résumé, a personal statement of professional and educational goals in gerontology, 1 copy of all undergraduate and graduate transcripts, list of all courses taken that are relevant to gerontology, 3 letters of recommendation, and scores from the Graduate Record Examination. GRE and other scores should be from the last two years. Non-native speakers of English must meet English proficiency requirements as described here http://graduate.ku.edu/english-proficiency-requirements/.

Further information is available from the graduate advisor or on the program’s website (http://www.gerontology.ku.edu/).

Submit your graduate application online (http://www.graduate.ku.edu/).

Dual-title Ph.D. Program in Gerontology

This dual-title degree is an option available to students who have first been admitted to the doctoral program in one of these departments: Communication Studies, Psychology, Applied Behavioral Science, and Sociology (as of January 2012). The dual-title degree allows the pursuit of a single degree that incorporates study within a traditional discipline and training in an interdisciplinary field; the student is awarded one
degree (Ph.D.) with both titles identified on the diploma (e.g., “Ph.D. in Psychology and Gerontology”).

This option is designed to appeal to students who are strong in a traditional discipline but also motivated to study across disciplinary lines. In the course of study, students can avail themselves of disciplinary depth and interdisciplinary breadth. At the post-doctoral stage, dual-title graduates will have enhanced career and employment opportunities, able to claim expertise in one or both titles of their degree when seeking positions in education and research.

Plan of Study

The dual-title Ph.D. integrates two programs of doctoral study for students who enter doctoral study having earned a Master’s degree. To ensure integration of the fields in regard to coursework, examinations, and dissertation, the student’s principal faculty advisor must be a faculty member in both fields; or, if this is not possible, the student must have co-advisors from each of the two fields.

The student completes required coursework in the traditional discipline and required coursework in Gerontology. Many theory, methods, and content courses for each side of the pairing can jointly fulfill requirements for both programs in the dual-title degree. Nonetheless, the dual-title student may require an additional semester to fulfill requirements in both programs. Course requirements for doctoral study in Gerontology and the partner discipline are those described in the programs’ respective graduate student handbooks. The course requirements for the Gerontology Ph.D. are those listed in the preceding section under Gerontology Graduate Programs.

Evaluation of Satisfactory Performance

The programs’ respective graduate student handbooks likewise describe procedures for written preliminary material, the Comprehensive Oral Examination, the dissertation, and the Final Oral Examination. With the consent of advisors in both programs, any required written preliminary examinations will be harmonized between the two programs. Comprehensive oral examination: The dual-title degree student’s candidacy examination committee must be composed of faculty from the partner discipline as well as at least one faculty member from the Gerontology Program. The dual-title faculty member may be someone who is appointed in both programs. Typically, the dual-title member will participate in constructing and grading candidacy examination questions in gerontology. The comprehensive exam requirements for both programs must be met, including a defense of the prospectus for the dissertation.

Dissertation and final oral examination: The dissertation topic should integrate both fields and be defended before graduate faculty from both programs.

Application for Admission to the Dual-title Program

Students must enroll in the disciplinary Ph.D. program for at least one semester and be in good academic standing before applying to the dual-title Ph.D. Program. Students may inquire further about the dual-title option and admission procedures by contacting the graduate advisor of the Gerontology Doctoral Program. Before applying, students should likewise consult with their advisor in the department that admitted them to KU.

Students apply by means of a letter to Graduate Advisor of the Gerontology Doctoral Program. This letter should describe one’s professional and educational goals in gerontology and also include one’s reasons for pursuing the dual-title option. The letter should be accompanied by a resume and by a list of all courses previously taken in relevant areas such as sociology, psychology, human development, social welfare, biology, and health services. The Gerontology program may request access to recent materials that the student filed in order to apply for graduate study at KU (undergraduate and graduate transcripts, letters of recommendation, scores from the Graduate Record Examination, and, for international applicants, proof of proficiency in the English language), or the program may request updates of these materials.

If accepted to undertake the dual-title Ph.D. option, the student will select or be assigned an advisor who is a member of both programs. If this is not possible, the student must have two advisors, one from each field. The student will work with her or his advisor(s) in both programs to draft a joint plan of study that outlines the key courses and seminars that will fulfill the course requirements for both programs, to the extent that these are foreseeable. The advisor(s) will sign the joint plan of study to indicate discussion and approval of the plan.

Global and International Studies

Why study global and international studies?

Global and International Studies will give you the tools to understand the rapid and profound changes that are occurring around the world. Today's job market demands employees who are able to negotiate the cross-cultural, multilingual environment increasingly the norm across the professions.

The programs in Global and International Studies at KU emphasize cultural and language knowledge, overseas experience, critical thinking, and research skills that give our students a leg up in both the general job market and in international careers. Our programs are strongly enhanced by the impressive array of international resources available at KU, such as KU's nationally-ranked Office of Study Abroad, and the vast number of foreign languages offered, including many of the languages the US government considers "critical languages," which provide a huge advantage to graduates applying to foreign service and intelligence careers.

Undergraduate Programs

Global and International Studies (GIST) at KU offers an interdisciplinary program in which faculty and students think critically about some of the most fundamental issues facing societies today: population growth, politics and governance, migration, the global economy, poverty and inequality, religion, race and ethnicity, gender and sexuality, peace and conflict, and climate change. Through an investigation of these topics, GIST majors acquire an enriched understanding of the world today, which is not only a desirable end in itself but also a useful background for professional careers in different geographical and cultural areas. A major in GIST is helpful for careers in journalism, foreign service, business and industry, education, law, politics and government, and social service agencies. Students also have the opportunity to receive a minor in GIST.

Students are also strongly encouraged to add to their global and international expertise by incorporating double-majors or minors in KU's other excellent regional studies programs (such as in Latin American Studies, Russian East European and Eurasian Studies, Slavic Languages and Cultures, African and African-American Studies, East Asian Languages and Cultures, European Studies, Jewish Studies
and Middle East Studies), in other relevant disciplines like Political Science, Geography, History, or Sociology, or from other Schools (such as Business and Journalism). The possibility for overlapping coursework makes it a strategic and efficient opportunity to further your educational expertise and portfolio on the global job market.

Beyond offering a major and minor in GIST, the Center for Global and International Studies also offers a co-major in European Studies, which is taken in conjunction with an undergraduate major in another academic discipline, such as with one of the majors in modern European languages and literature, Business, Journalism, History, Philosophy, or GIST. The co-major provides students with a solid foundation in the cultures, politics, languages, and history of Europe in preparation for graduate studies and/or careers in a wide variety of international fields. Studying with KU faculty in the broader disciplines such as social sciences, humanities, the arts, and business, will enable students to increase their awareness and understanding of Europe's past, present, and future and its significant role in our increasingly globalized world. The program offers personalized advising, interdisciplinary flexibility, diverse course offerings, opportunities to conduct research, frequent co-curricular activities, and many options for studying and completing internships abroad.

The Center for Global and International Studies also provides a minor in Middle East Studies and a South Asian Culture Certificate for undergraduates.

**Graduate Programs**

The Master of Arts in Global and International Studies provides an analytically sophisticated understanding of the contemporary global arena and cultivates the skills and knowledge to operate in a world where traditional boundaries are disappearing. Through the 33-credit hour program, students develop a specialization in a world region and can pursue interests in global politics, society, and culture across a broad range of courses in the humanities and social sciences.

Students in Global and International Studies have access to courses by top-notch research faculty across a wide variety of relevant disciplines at KU's main campus in Lawrence (http://www.ku.edu/). Besides access to quality instruction and content, our students have access to the amazing international resources that put KU on the top shelf for international education—a nationally-ranked Study Abroad Program, instruction in 40 foreign languages, and local, national, and international internship opportunities. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in GIST.

**"Traditional" Master's Track**

The self-tailoring and interdisciplinary field of Global and International Studies prepares graduate students with marketable skills (such as professional certification opportunities and research and writing skills) and the knowledge to deal with contemporary global issues. This is critical in our contemporary world in which both problems and opportunities increasingly transcend national boundaries.

KU's Master of Arts in Global and International Studies is designed for those who seek a better understanding of international issues that shape public policy and the global economy and who want to have an impact in these areas.

**Interagency Studies Track**

The Interagency track (https://global.ku.edu/applying-interagency-studies-program/) of the Master's degree program in Global and International Studies is a one-year program designed primarily for officers pursuing their Intermediate Level Education (ILE) program at the Command and General Staff College (CGSC) at Ft. Leavenworth.

The objective of the Interagency Studies Program (ISP), is to prepare military officers for working in interagency environments by expanding their abilities to conceptualize and address issues beyond their military training. The program offers coursework from multiple disciplines with an array of theoretical frameworks. The ISP curriculum consists of 30 credit hours, with KU granting 6 hours of credit for ILE education. The remaining 24 credit hours come from 8 KU courses taught at in the evening at Ft. Leavenworth, along with courses at the Command and General Staff College. The evening classes run the length of the academic year - 3 courses August - December, 3 courses January - April, and 2 courses May - June. The program culminates with a final paper demonstrating the application of program knowledge to a military (preferably interagency) issue, which can be submitted to relevant journal outlets in military studies.

**Center for Global and International Studies**

The Center for Global and International Studies (http://global.ku.edu/) supports and promotes global and international studies at KU. In collaboration with International Programs and the area centers, CGIS works to provide a single point of contact for faculty with international expertise to help facilitate interdisciplinary research and teaching opportunities. Building on longstanding institutional strength in international studies, the center focuses on topics and themes of transnational scope and on world areas of economic and strategic importance not covered by the existing area studies centers.

CGIS prepares students for careers in an increasingly interconnected world by housing undergraduate and graduate degrees in global and international studies and by supporting the introduction of new course offerings and study abroad opportunities. In addition, the center offers outreach activities (https://global.ku.edu/podcasts/) to K-12 teachers, businesses, and governmental agencies across the region and serves as a resource for the local and international community.

**Courses**

**EURS 150. Study Abroad Topics in European Studies: ____. 1-5 Hours U.**

This course is designed for the study of special topics in European Studies at the 100-level (Freshman/Sophomore level). Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in European Studies. May be repeated for credit if content varies. LEC.

**EURS 177. First Year Seminar: ____. 3 Hours GE11 / U.**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in European Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

**EURS 302. European Culture and Society 1945 to Present. 3 Hours HT AE42 / H.**

The course provides historical, cultural, and political overviews of Europe since 1945 with particular emphasis on the contribution of French and
Italian culture and society. The course emphasizes Europe's contribution to Western intellectual thought, social movements, arts and literature, and global society. (Same as HUM 302.) LEC.

**EURS 329. History of War and Peace. 3 Hours HL / H.**
A study of the changing nature of warfare and the struggle to bring about peace. Topics include pacifism, the "military revolution" that created the first professional armies; the development of diplomatic immunity, truces, and international law; the peace settlements of Westphalia, Utrecht, Vienna, Versailles, and San Francisco; the creation of peace movements and peace prizes; the evolution of total war, civil war, and guerrilla warfare involving civilians in the twentieth century; the history of the League of Nations and United Nations; and the rise of intergovernmental and non-governmental organizations. (Same as PCS 329.) LEC.

**EURS 350. Study Abroad Topics in: ______. 1-5 Hours H.**
This course is designed for the study of special topics in European Studies at the Junior/Senior level. Coursework must be arranged through the EU Office of Study Abroad and approved by a faculty advisor in European Studies. May be repeated for credit if content varies. LEC.

**EURS 430. European Civilization in World Context: ______. 3 Hours HL AE42/GE3H / H.**
An introduction to the literature of encounters between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as HUM 430.) Prerequisite: HUM 114 or HUM 204 and HUM 115 or HUM 205. LEC.

**EURS 435. Islam in Europe. 3 Hours AE42 / H.**
Investigation of Muslim migration into Europe and day-to-day interactions of Muslims with other European populations. This is an integrated study of historical, political, religious and economic influences that determine Muslim experience in contemporary European culture. (Same as HUM 435.) LEC.

**EURS 500. Seminar in European Studies. 3 Hours AE42/AE61 / H.**
Provides an interdisciplinary approach to the study of modern European civilization. By discussing both classic and contemporary, controversial readings each week and writing several papers during the semester, students acquire an understanding of the development of modern European culture and society and Europe's contemporary problems. Topics for discussions and papers are drawn from the following subjects: the economic and political integration of European states; modernism and anti-modernism in European culture; imperialism, migration, and ethnic and racial division in European society; democracy versus dictatorship; American-European relations; mass culture, urban development, and the welfare state; and contrasts and comparisons between European Cultures--East and West, North and South. Seminar discussions are led by invited European Studies faculty as well as the instructor or instructors. Required of all European Studies majors. Prerequisite: Junior standing or consent of instructor. LEC.

**EURS 501. Research for Honors in European Studies. 3 Hours AE61 / W.**
Research for a European Studies honors project, on a topic chosen in conjunction with the faculty advisor. Emphasis on independent study and writing. Open to students with previous coursework that counts toward the European Studies co-major at the 400 level, an overall 3.25 GPA, and at least a B+ average in advanced work in European Studies. Prerequisite: At least one course for the EARS co-major at the 400 level and permission of the Academic Director. IND.

**EURS 502. European Studies Honors Project. 3 Hours AE61 / H/W.**
Continuation of EURS 501. Student must defend completed honors project in an oral examination before a thesis committee of three faculty members. The committee determines whether the student earns Honors. See Departmental Honors section of catalog for more information. Prerequisite: EURS 501. IND.

**EURS 504. Europe Today. 3 Hours AE42 / H.**
An exploration of major social, political and economic developments post World War II including the rise of the European Union, the integration of Eastern and Western Europe, the growing role of Islam, attitudes towards the United States, and Europe's role in the world economy. Topics may vary based on current events. (Same as HUM 505.) Prerequisite: Junior or senior standing or consent of instructor. LEC.

**EURS 507. Research in European Collections. 1-3 Hours H.**
This course allows students in the European Studies Co-Major and related disciplines to receive credit for research related to European Collections in one or more of the following institutions: Watson and Spencer Research Libraries, the Dole Institute, the Eisenhower and Truman Presidential Libraries, the U.S. Army Combined Arm's Research and Foreign Military Studies Office at Fort Leavenworth, the Linda Hall Library in Kansas City, and the Winston Churchill Collection at the Westminster College Library in Fulton, Missouri. May be taken in place of EURS 501 by European Studies Honors Students if taken for three credit hours. Permission of instructor necessary. IND.

**EURS 511. Topics in European Studies: ______. 3 Hours H.**
A study of significant themes, movements, or problems in European history, literature, politics, society, or culture. May also relate European issues to issues in other world areas (Africa, North America, Asia, etc.) May be repeated for credit when topic varies. LEC.

**EURS 512. Irish Literature and Culture: ______. 3 Hours H.**
Study of topics in Irish literature and culture. Topics may focus on a particular genre, theme, historical period, or group of authors. May be repeated for credit as the topic changes. (Same as ENGL 530.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**EURS 536. Economic Issues of the European Union. 3 Hours S.**
A survey of the economies of the European Union, with a focus on the economic development of the member states since World War II, and an examination of the various economic issues confronting them today. (Same as ECON 536.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

**EURS 550. Classics of Peace Literature. 3 Hours HL AE51/AE61 / H.**
A study of influential proposals for world peace from Erasmus' The Complaint of Peace (1516) to the 1995 Hague Appeal for World Peace. Selected writings by such authors as Erasmus, Hugo Grotius, Jean-Jacques Rousseau, Immanuel Kant, Henry Thoreau, Henri Dunant, Berthe von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin Luther King, Jr., are considered. (Same as PCS 550.) Prerequisite: HWC 204 or HWC 205. LEC.

**EURS 565. The Literature of Human Rights. 3 Hours H.**
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as GIST 560 and PCS 565.) Prerequisite: Junior/Senior standing or consent of instructor. LEC.
EARS 580. Directed Study. 1-3 Hours AE61 / H.
Independent study and directed reading on special topics. Permission of the instructor who will supervise the student's work is required. LEC.

EARS 604. The European Union. 3 Hours S.
This course will introduce students to the politics of the European Union. The course will cover three closely connected topics. First, it will discuss the institutional make-up of the EU, such as the European commission, the European parliament, the European Council, and the European court of justice. It will assess how well these institutions deal with the growing importance of transnational issues, such as migration and economic policy issues. Second, the course will examine how national governments pursue national interests at the level of the European Union. Third, the class will study how well the EU represents the citizens of European countries. Finally, the course will assess the extent to which the EU has successfully developed into a supra-national federation. (Same as AAAS 203 and GEOG 201.) LEC.

Courses

GIST 111. Mapping Our Changing World. 4 Hours N / LFE.
This course is an introduction to geospatial technologies. It focuses on the conceptual and technical aspects of mapping technologies that transform information about locations, people, objects, environments, events, and phenomena to digital representations of the world and as end-products of geospatial analysis. Topics covered include surveying, aerial photography and photogrammetry, satellite remote sensing, global positioning systems (GPS), geographic information systems (GIS), and thematic mapping. Students will learn how to acquire and develop geospatial data as the sources for mapping, the skills of analyzing and interpreting spatial information, and how geovisualization can be used in addressing real-world problems. (Same as GEOG 111.) LEC.

GIST 139. The Global Cold War. 3 Hours H.
This course provides an immersive introduction to the global Cold War and its legacies. It explores how the contest between capitalism and communism unfolded not only in the United States and the Soviet Union, but also in Asia, Africa, Europe, Latin America, and the Middle East. Through interactive lectures, discussions, and role-playing games, students will learn to "think globally," gain an understanding of imperialism, nationalism, and decolonization, and discover how the Cold War shaped culture, economics, politics, the environment, and the international system in ways that remain relevant today. (Same as HIST 139.) LEC.

GIST 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Global International Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

GIST 201. Topics in: ____. 1-3 Hours U.
An interdisciplinary study of international topics. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

GIST 202. Topics in South Asian Studies: ____. 1-3 Hours U.
An interdisciplinary study of topics related to South Asia. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

GIST 203. Topics in Middle Eastern Studies: ____. 1-3 Hours U.
An interdisciplinary study of topics related to the Middle East. Designed especially for freshmen and sophomores. May be repeated for credit if content varies. LEC.

GIST 210. Culture and Health. 3 Hours AE42 / H/W.
This course offers an holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 204 and GEOG 202.) LEC.

GIST 211. Culture and Health, Honors. 3 Hours AE42 / H/W.
Honors version of AAAS 203, GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 204 and GEOG 202.) LEC.

GIST 220. Introduction to Global and International Studies. 3 Hours GE11 / S.
This course provides an overview to the major approaches and themes involved in the study of world cultures, politics, and societies from a multi-disciplinary perspective. Topics of global importance, such as the construction and maintenance of cultures, comparative political systems, global and regional economies, popular culture, gender and the environment will be covered through their manifestations in particular regional and global contexts. Students will be challenged to address their own views and existing approaches to global dynamics from a critical and reflective perspective. LEC.

GIST 250. Introduction to Globalization. 3 Hours S.
Along with an overview of the origins and historical development of globalization, the course addresses various aspects of the growth of transnational economic, cultural, institutional, and political interconnections, including the implications of rapidly-developing information technology and social media, international security in a transnational world, and the issues related to the movement of goods, people (immigration), images, ideas, and institutional forms across national borders. LEC.

GIST 303. Language, Gender, and Sexuality. 3 Hours GE3S / S.
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, JWSH 305, SLAV 305 and WGS 325.) LEC.

GIST 304. Globalization and Afro-Brazilian Culture. 3 Hours W.
During this study abroad experience, students will explore how Afro-Brazilian cultural elements, such as the music of Afrobeats, the art form/martial art/dance capoeira, and the candomblé religion became realities around the world. Guest lecturers will present on topics such as Brazilian history, music, religion, dance, education, Carnival, and tourism. Planned site visits include temples of Afro-Brazilian religions such as candomblé and syncretic Catholic churches such as the Church of Our Lady of the Black Rosary. The program is based in Salvador, one of the Brazilian cities where African influence is the most visible and celebrated. This course and study abroad program is open to all majors. LEC.
GIST 305. World Indigenous Literatures. 3 Hours NW AE42 / H.
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305 and ISP 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

GIST 306. Global Environmental Literature. 3 Hours AE42 / H.
An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as ENGL 306 and EVRN 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

GIST 308. Key Themes in Modern Global History. 3 Hours H.
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as HIST 308.) LEC.

GIST 310. Modern Turkey: Culture and Society. 3 Hours AE42 / H/W.
As a country that is geographically in the middle of a strategic global region, a key NATO ally, a candidate for EU membership, and representing a mix of democratic traditions, military coups, and authoritarian leaders combined with periods of rapid and drastic socioeconomic transformation, for one reason or another, Turkey seems to always be a country under the spotlight. This course is designed to give an overview of Modern Turkey and familiarize the student with its history, society and culture. Topics to be covered include the early republican period, ethnic and religious minorities, religion and secularism, music, cuisine, women, gender and sexuality, religious and national holidays, cinema and TV, among others. The primary purpose of this course is to help students develop necessary analytical and interpretive skills to identify, compare, and analyze Turkish cultural practices, products and perspectives as they relate to basic social, political, and historical contexts. No background knowledge of Turkey or the Turkish language is required. (Same as SLAV 310 and TURK 310.) LEC.

GIST 314. Globalization: History and Theory. 3 Hours GE3S / H.
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as SLAV 310 and TURK 310.) LEC.

GIST 320. Love, Sex and Marriage in India. 3 Hours H.
This course addresses diverse aspects of the philosophies and expressions of intimacy and pleasure as found in India. Using old and new literature, including from the Kamasutra, as well as media, we examine the following: how and why in ancient times sensual pleasure was another path for ultimate bliss; how perspectives and traditions of intimacy have changed over time; diverse types of marriages; the culture and practice of arranged marriages; same-sex intimacy; and universal concepts of love. LEC.

GIST 321. Graphic Novels as Memory. 3 Hours GE21 / H.
This course examines the interaction between literature and memory, in particular how authors respond to major historical events and contribute to shaping the collective memory of those events. Students will read graphic novels inspired by memories of the Holocaust and Communism. Through the visual and textual mix of the graphic novel, we will consider the impact of historical upheavals on the lives of ordinary individuals, drawing connections to contemporary national and global socio-political problems. Students will write on these topics in a variety of academic and non-academic genres, including: journal, article summary, synthetic essay, analytical essay, and reflection essay/creative writing. (Same as SLAV 320.) LEC.

GIST 323. Environmental Dynamics in India. 3 Hours S/W.
This course introduces students to the relationships the people of India have had with their landscape from ancient times to the present. Students will learn about diverse ecosystems and the indigenous peoples they have harbored from the high Himalayas altitudes to the coastal regions, from the desolate arid deserts to the rain forests of India. The class will discuss how the very nature of the relationship of the people with their land has changed over the long course history of South Asia with specific case studies of environmental challenges, failures and successes. Examples of possible cases include: the Chipko movement led by the women of the Himalayas to save their forests from loggers; the traditions of creating lakes and water conservation lifestyles in the arid region of Rajasthan; and nature worship and cases of leopards and tigers receiving protection by the very villages they terrorize. (Same as ANTH 323.) LEC.

GIST 325. Peoples and Cultures of South Asia. 3 Hours S.
This course provides an introduction to the diversity of peoples in South Asia, including India, Pakistan, Nepal, Bangladesh and Bhutan. The particular cultures and language of the indigenous peoples in the region are highlighted through academic sources and the direct study of reproductions of these cultures in literature and film. LEC.

GIST 335. Iran Through Literature and Film. 3 Hours AE42 / W.
This course examines aspects of Iranian society through literature and film. Students will analyze selected Iranian texts in their historical, social, and political contexts to examine and gain a comprehensive understanding of the complex and pressing issues facing the modern Iranian society. The course will utilize nationalist, Marxist, feminist, and Islamist paradigms to provide a theoretical framework for discussions and to better understand the crosscurrent of ideas in contemporary Iran. No knowledge of Persian language required because all the texts will be available in English translation and subtitles. LEC.

GIST 350. Study Abroad Topics In: ______. 1-5 Hours U.
This course is designed for the study of special topics in global and international studies at the junior/senior level. Course work must be arranged through the KU Office of Study Abroad and approved by a faculty adviser in Global and International Studies. May be repeated for credit if content varies. LEC.

GIST 354. Globalization: A Geographic Approach. 3 Hours S.
This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as GEOG 354.) LEC.
GIST 355. International Women's Rights. 3 Hours SC AE42.
Women face discrimination and abuse around the world: at home, in the workplace, and in the public sphere. How are these systems of oppression connected? How are women working together for change, and what can you do to support their efforts? This course will investigate what feminist solidarity looks like around the world, with an emphasis on connections across different cultural and political contexts. (Same as WGSS 355) LEC.

GIST 371. Environmental Geopolitics. 3 Hours S.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GEOG 371.) LEC.

GIST 376. Immigrants, Refugees, and Diasporas. 3 Hours AE51 / H.
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as HIST 376.) LEC.

GIST 420. Analyzing Contemporary Global Issues. 3 Hours S/W.
This course enhances students' ability to critically analyze the intricacies of current international issues through three core goals. First, the content of the course is unique each semester as it targets major international issues in the moment, so students gain an in-depth understanding about things happening in the world around them. Second, the course refines students' critical writing skills by combining the critical thinking skills needed for issue analysis with the writing skills required to disseminate their thoughts in a variety of forms. Finally, for GIST majors specifically, the course offers an ideal preparation for the senior capstone experience. LEC.

GIST 424. Nationalism(s) in Turkey. 3 Hours S.
This course analyzes the major variations in nationalist paradigms existing in contemporary Turkey, including conservative nationalism, secular nationalism, religious (Islamic) nationalism, and Kurdish nationalism. Through the lens of seminal theories on the origins, development, and types of nationalism and the relevant historical background of the Turkish Republic, we explore how these competing visions of "the nation" and "homeland" have changed, fragmented, and manifested themselves in everyday Turkish politics and society. LEC.

GIST 465. Genocide and Ethnocide. 3 Hours S.
This course provides students with a conceptual and historical synopsis of genocide and ethnocide from an anthropological perspective. Taking its lead from a human rights orientation, the course assesses why such atrocities must be confronted. This includes grappling with ethical, legal and definitional ambiguities surrounding the concepts of genocide and ethnocide. We will explore a range of cases in the 20th and 21st centuries, while focusing on diverse conditions leading to genocide, ethnocide, population displacements, human trafficking and the modern phenomena of refugee camps. The course will analyze the role of the modern state, colonialism, political ideologies, ethnicity and nationalism as major forces underpinning ethnocide and genocidal campaigns. Based primarily on a select review of cases of ethnocide and genocide, the class examines how to spread global awareness and communal engagement by actively protecting human rights. (Same as ANTH 465.) LEC.

GIST 493. Directed Readings. 3 Hours U.
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director. LEC.

GIST 495. Global Internship. 3 Hours U.
Semester-long internship with a business or organization located abroad or that provides a global or international working context for the interning student. The assessment component normally requires the submission of a reflective internship journal documenting work experiences within this unique context, and a final paper on a relevant theme that is determined by instructor and student based on context. This course is available to GIST majors and minors only. Prerequisite: Consent of instructor. INT.

GIST 501. Topics in: ______. 1-3 Hours U.
An interdisciplinary study of international topics. Designed especially for juniors and seniors. May be repeated for credit if content varies. LEC.

GIST 502. Advanced Topics in South Asian Studies: ______. 1-3 Hours U.
An interdisciplinary study of topics related to South Asia. May be repeated for credit if content varies. Prerequisite depends on specific topic offered. LEC.

GIST 503. Advanced Topics in Middle East Studies: ______. 3 Hours U.
An interdisciplinary study of topics related to the Middle East. May be repeated for credit if content e depends on specific topic offered. LEC.

GIST 514. Politics of Human Trafficking. 3 Hours.
This course will examine the definitions and characteristics of human trafficking, both domestically and internationally. The course will compare a range of national and international policies addressing human trafficking, paying particular attention to the frameworks and ideologies shaping those initiatives. Ending human trafficking is a non-partisan issue, often bringing together policy makers and activist that would otherwise never work in coalition. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. There are surprising, uncharacteristic divisions among groups that would otherwise be in unity. This class will examine the contemporary social movements to end trafficking and will attempt to understand the contentious politics found within the movement. How trafficking is framed can have a significant impact on the implementation of anti-trafficking legislation. The course will also examine the significant empirical challenges for studying human trafficking. While estimates of human trafficking vary widely, there is limited verifiable evidence of the extent of trafficking in any one area. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 714, POLS 714, or GIST 714. (Same as POLS 514 and WGSS 514.) Prerequisite: Any previous WGSS, POLS, or GIST course. LEC.

GIST 529. Globalization. 3 Hours S.
Addresses sociological aspects of the growth of transnational economic, cultural, institutional, and political interconnections, the freer and faster movement of goods, images, ideas, people, and institutional forms across national borders, and the consequences and problems of these processes. The focus is on recent (later 20th century to the present) global restructuring in the context of historical shifts in capitalist development. (Same as SOC 529.) Prerequisite: SOC 104 or GIST 220. LEC.
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: Junior or Senior standing or consent of instructor. LEC.

GIST 550. Issues in Global Studies: ____, 3 Hours U.
An interdisciplinary study of topics with particular emphasis on issues of global importance—i.e. transnational and trans-regional. May be repeated for credit if content varies. Prerequisite: GIST 220. LEC.

GIST 555. Seminar in Urban Geography. 3 Hours S.
This course is a survey of recent literature and conceptual advances within the broad domain of urban geography. It begins by examining a few classic works, and then explores several topics within urban political economy, including the urban division of labor and restructuring, changing modes of urban governance, suburbanization, gentrification, global cities, and gender and the city. It also delves briefly into the issue of urbanization in the developing world. (Same as GEGO 555.) Prerequisite: Any upper division course in human geography or urban planning. LEC.

GIST 556. The Literature of Human Rights. 3 Hours H.
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as EURS 565 and PCS 565.) Prerequisite: Junior/Senior standing or consent of instructor. LEC.

GIST 557. Anthropology of Violence. 3 Hours S.
Introduces students to the comparative and cross-cultural study of violence. The course begins by surveying different anthropological approaches to the study of violence, with special attention paid to classical social theorists as well as ethnographic works. Topics may include (post) coloniality and identity politics, nationalism, race, religion, and political culture; geographic areas to be covered may include Africa, Europe, Latin America, the Middle East, and South Asia. (Same as ANTH 570.) Prerequisite: Junior standing or above or permission of instructor. LEC.

GIST 559. Politics and Society in the Contemporary Persianate World. 3 Hours NW / H/W.
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: Junior or Senior standing or consent of instructor. LEC.

GIST 555. Literature and Society in the Contemporary Middle East. 3 Hours NW AE42 / H/W.
This course offers a general introduction to the modern Middle Eastern literatures in English translation. Through analyses of selected short stories and novels from Arabic, Turkish and Persian literature, the students develop an understanding of the issues that shape everyday life in the Contemporary Middle East. The course investigates issues of nation and national identity, war, ethnicity, class, religion, and gender and sexuality. We use a variety of paradigms, namely nationalist, Marxist, feminist, and Islamist, to provide a theoretical framework for discussion of the selected works. No prior knowledge of Arabic, Turkish or Persian language is needed. Prerequisite: Junior or Senior standing or consent of instructor. LEC.

GIST 570. Human Dimensions of Global Change. 3 Hours S.
This class introduces concepts such as coupled human and natural systems, social-ecological resilience, and sustainability science, examines people's responses to major climate, land, water, and coastal change, and discusses case studies. One hour of each seminar will be devoted to individual needs that address topical or methodological issues. Class requirements include presentations, biweekly papers, and a term paper. (Same as GEGO 577.) Prerequisite: One of the following: GEGO 100, GEGO 104, GEGO 374, or an Environmental Studies introductory course. LEC.

GIST 575. Politics and Society in the Contemporary Persianate World. 3 Hours NW / H/W.
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: Junior or Senior standing or consent of instructor. LEC.

GIST 575. Anthropology of Violence. 3 Hours S.
Introduces students to the comparative and cross-cultural study of violence. The course begins by surveying different anthropological approaches to the study of violence, with special attention paid to classical social theorists as well as ethnographic works. Topics may include (post) coloniality and identity politics, nationalism, race, religion, and political culture; geographic areas to be covered may include Africa, Europe, Latin America, the Middle East, and South Asia. (Same as ANTH 570.) Prerequisite: Junior standing or above or permission of instructor. LEC.

GIST 577. Transnational Terrorism. 3 Hours S.
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism. (Same as POLS 582.) Prerequisite: Sophomore level or consent of instructor. LEC.

GIST 577. Human Dimensions of Global Change. 3 Hours S.
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: Junior or Senior standing or consent of instructor. LEC.

GIST 577. Human Dimensions of Global Change. 3 Hours S.
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: Junior or Senior standing or consent of instructor. LEC.

GIST 577. Human Dimensions of Global Change. 3 Hours S.
This course examines the major currents of political developments and their linkages with religion, culture and civil society in Turkey, Iran, Afghanistan, Pakistan and India since the late nineteenth century. During the "pre-modern" period, all these countries formed part of "the Persianate world," a region that extended from the Iranian plateau to the Balkans, Central Asia and the Indian subcontinent, mostly under the Turkic administrations, and tied together by trade, Islam, and Persian as the lingua franca. The dissemination of modern Western political thought and nationalism during the colonial period led to nation-states and the end of the linguistic domination of Persian in the region. Though each of these nation-states ultimately took a different trajectory, they each were faced with similar challenges that offer the basis for interesting comparisons between them. This course explores the trajectories of these countries in regard to the relations between the state, religion, and politics, various strands of nationalism, pluralism, religious and ethnic minorities, social equality, and democratization. Prerequisite: Junior or Senior standing or consent of instructor. LEC.
GIST 610. Interdisciplinary Methods for Global Contexts. 3 Hours S.
An introduction to a variety of widely-employed quantitative and qualitative research methods in the social sciences and humanities, including methods such as statistical analysis, ethnography, and content analysis. Prerequisite: GIST 220 or consent of the instructor. LEC.

GIST 624. Social Movements in the Middle East. 3 Hours S.
Using the major theories and approaches comparatively applied to social movements around the world, this course critically analyzes historical and existing cases of social movements and "nonmovements" in the Middle East. We cover examples of Islamism (and post-Islamist), women's, nationalist, democratic, youth and labor movements and their impact on the region. Contextual factors like technology and social networking, regime type, institutions, and socioeconomic structures are also considered for their role in supporting or inhibiting collective action. Prerequisite: GIST 220 or POLS 150. LEC.

GIST 633. Iran, Turkey, and the Kurds. 3 Hours NW / S.
This course examines the contemporary political and social dynamics within these three communities residing along the northern stretch of what is commonly referred to as the Middle East. Using social and political theories as a starting point, students will comparatively study critical elements and issues facing the members of these societies. Issues and themes for comparison will include the structure and institutions of politics, nation-building and nationalism, Islam and politics, women and politics, and regional and global engagement. (Same as POLS 633.) Prerequisite: GIST 220, POLS 150, SOC 130, or consent of instructor. LEC.

GIST 667. Islam and Politics. 3 Hours AE42/AE51 / W.
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as compatibility of political Islam and democratic politics, political economy in Muslim societies, fundamentalism in Islam, gender relations, identity politics and questions on clash of civilizations are explored. (Same as POLS 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor. LEC.

GIST 678. Chinese Foreign Policy. 3 Hours S/W.
In-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. (Same as EALC 678 and POLS 678.) Prerequisite: Sophomore level or consent of the instructor. LEC.

GIST 684. International Law: The State and the Individual. 3 Hours S.
International law has assumed an increasingly significant role in international life. This course examines major issues in international law including (but not limited to): the changing status and role of the state; rights of minorities and self-determination; the environment; and human rights. The course examines the central questions and the relevant international legal principles associated with each issue. Prerequisite: POLS 170. LEC.

GIST 686. International Human Rights. 3 Hours AE42 / S.
The course introduces students to historical and philosophical bases of contemporary human rights, theoretical approaches and methodological challenges to studying human rights questions, and acquaints them with the main topics, controversies, and tensions in the scholarship, practice and politics of human rights. (Same as POLS 686.) Prerequisite: Sophomore level or consent of instructor is required. LEC.

GIST 696. Diplomacy Lab. 1 Hour S.
This course is a supplemental research lab designed to partner with a jr/sr level course offering an innovative program implemented by the US Department of State. Students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer. This one-credit hour course is intended to function as a special lab project and must be taken in conjunction with a standard course that has a diplomacy lab option. (Same as POLS 691.) Prerequisite: Instructor permission required. LAB.

GIST 697. Research and Diplomacy Lab. 3 Hours S.
This course is designed to provide students with basic tools and an understanding of interdisciplinary social science research and to simultaneously partner with an innovative program implemented by the US Department of State. While learning about the research process and research design, students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer with whom they have contact through video conferencing throughout the semester. The team engages in extensive and systematic research to address the problem and presents their finding in a formal report presented to the State Department in the desired format. (Same as POLS 690.) Prerequisite: GIST 220 or POLS 150 or POLS 170 or instructor permission. LEC.

GIST 698. Capstone Seminar. 3 Hours AE61 / H.
A seminar designed to introduce students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: GIST 610 or consent of the instructor. LEC.

GIST 699. Capstone Seminar, Honors. 3 Hours AE61 / H.
A seminar designed to introduce honors students to the theory and practice of global and international studies. A research paper will be required. May not be repeated for credit. Prerequisite: 12 hours of junior/senior level and above courses that satisfy requirements for the major. LEC.

GIST 701. Approaches to International Studies. 3 Hours.
This course examines various approaches to the study of cultures, politics, and societies in their global and international contexts through the exploration of a series of exemplary works of global/international research from a variety of disciplines (eg. anthropology, sociology, political science, economics, geography, history, etc.). The course will cover the major contributions of these disciplines in their approaches to global questions and themes and will provide a multi-disciplinary framework within which students can begin exploring their own global and international research questions. The course also provides an introduction to the major regions and many of the themes that students will be able to specialize in during the course of the MA program. LEC.

GIST 702. Globalization. 3 Hours.
A central issue in international studies is globalization, the increasing interconnectedness of societies and economies. This course examines globalization from an historical and contemporary perspective. Major topics include (but are not necessarily limited to) the historical expansion of the West since 1500, the growth of international economic institutions, conflict among global cultures, the future of state sovereignty, and the challenges of economic integration. LEC.

GIST 704. Global Cultures and Societies. 3 Hours.
Examination of the components of culture, economic and political anthropology, major global cultural areas, and the impact of cultural differences as expressed through language, literature, religion, thought, and motivation in cross-cultural communications. LEC.

GIST 705. Globalization in History. 3 Hours.
A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include western expansion since 1500, the spread
of state sovereignty, the formation of a world economy, and spread of international institutions. The current world problems investigated will vary, but may include issues such as environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as HIST 705.) SEM.

GIST 707. Studying Modern Islam. 3 Hours.
An in-depth introduction to the issues involved in the academic study of modern Islam. In this class students will investigate the ideas, assumptions and historical circumstances that gave rise to and continue to influence scholarly approaches to Islam. Topics may include the Orientalism, gender studies, colonialism, secularism, Islamism and the concept of modernity. Students will apply what they learn to the study of Islam in contemporary Egypt. LEC.

GIST 709. Research Design. 1-3 Hours.
This course guides new graduate students through the process of designing and developing an original research project. The fundamentals of interdisciplinary research will be the instructional framework within which students will design their own original research project. Instruction regarding the review of literature, methodology, and how to structure and scale the project will be given. Students taking this course will be required to take the companion course, GIST 810. RSH.

GIST 710. Research Design for International Area Studies. 3 Hours.
This course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as CEAS 710 and LAC 710.) Prerequisite: Consent of instructor. LEC.

GIST 714. Politics of Human Trafficking. 3 Hours.
This course will examine the definitions and characteristics of human trafficking, both domestically and internationally. The course will compare a range of national and international policies addressing human trafficking, paying particular attention to the frameworks and ideologies shaping those initiatives. Ending human trafficking is a non-partisan issue, often bringing together policy makers and activists that would otherwise never work in coalition. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. There are surprising, uncharacteristic divisions among groups that would otherwise be in unity. This class will examine the contemporary social movements to end trafficking and will attempt to understand the contentious politics found within the movement. How trafficking is framed can have a significant impact on the implementation of anti-trafficking legislation. The course will also examine the significant empirical challenges for studying human trafficking. While estimates of human trafficking vary widely, there is limited verifiable evidence of the extent of trafficking in any one area. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 514, POLS 514, or GIST 514. (Same as POLS 714 and WGSS 714.) Prerequisite: Graduate standing. LEC.

GIST 750. Topics in International Studies: _______. 3 Hours.
A study of one or more selected topics in international studies. Course may be taken more than once. LEC.

This course explores the history, debates, and contemporary issues related to human rights and U.S. national security policy. Through lecture, practical exercises, and class-led discussions, the course will cover relevant and timely issues such as human rights and counter-terrorism, security assistance and cooperation, peacekeeping and protection of civilians, and global criminal accountability. Prerequisite: Graduate standing or consent of instructor. LEC.

GIST 752. International Conflict Prevention and Resolution. 1 Hour.
This course examines three connected fields of study related to armed conflict and acute violence from the perspective of US policymakers: the nature of contemporary conflict and its causes; mediation, and peacebuilding; and the policy options for preventing or managing conflict. Throughout the short course, students will explore the major analytical frameworks and theories used to examine conflict, and the major approaches applied to address it, including contemporary approach to stabilization and reducing state fragility. LEC.

GIST 781. Environmental Geopolitics. 3 Hours.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. This course is a more advanced and rigorous version of the undergraduate version of this course. It is not open to students who have taken or are enrolled in GEOG 371 or EVRN 371, Environmental Geopolitics. (Same as GEOG 781.) LEC.

GIST 793. Directed Readings. 1-5 Hours.
Individual and supervised readings in a selected area of international studies. Course is repeatable with permission of the program director. LEC.

GIST 810. Graduate Writing Experience. 1-3 Hours.
This course guides students through the process of effectively communicating the findings of original research through formal writing. The purpose of the course is to provide writing guidance and instruction to students conducting ongoing research, so that they are familiar with successful ways of communicating research to academic and professional audiences. Depending on the career objectives of the student, the writing project will be tailored to address the relevant audience--academic or professional. The fundamental components of the research writing process will be individualized to correspond with student's research goals. Prerequisite: GIST 709. RSH.

GIST 897. Examination Preparation. 1 Hour.
Independent study in preparation for the Comprehensive M.A. examination. Graded on satisfactory/unsatisfactory basis. May be repeated. LEC.

GIST 898. Thesis and Research Project Writing. 3 Hours.
This course is primarily designed to guide MA students through the writing development of their concluding graduate research, whether a final graduate research project or a thesis. Students will learn and apply the practices of effective communication and writing of research while completing the various components of their final projects. The intention of the class is to help students complete a high quality draft of their research, though deadlines and assignment may relate to practice in graduate level research writing in general. Within an interdisciplinary framework and an understanding of rhetorical distinctions across various epistemologies, students will practice relevant modeling of academic literature reviews, transparency in communicating research practices, analyzing/interpreting texts, data, or other information, and introducing and concluding their work. (Same as CEAS 898.) Prerequisite: GIST 710. THE.
GIST 899. Thesis. 1-6 Hours.
Enrollment for writing thesis for master's degree. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Bachelor of Arts in Global and International Studies

Why choose a Global and International Studies degree?

Global and International Studies will give you the tools to understand the rapid and profound changes occurring around the world. As a degree of study, it is useful for careers in business and the private sector, non-profit work, and foreign and civil service. Students have also used the degree as a precursor to graduate study and law school. The interdisciplinary curriculum provides a great deal of flexibility to tailor your program toward your career aspirations. We live in a world where a great demand exists in most career fields for the understanding of contemporary global dynamics, language and cultural study, and research and writing development our degree provides.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students with at least 24 hours of credit, prospective students must send transcripts to the Office of Admissions. Unless they are college transfer students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. Major

Students must complete GIST 610 prior to taking this course.

Issues in Global Studies. (9 hours/3 units) Majors must take 3 courses from an approved list of GIST courses focusing on contemporary global themes on subjects such as human trafficking, the global environment, terrorism, transnational migration and borders, global issues in gender, citizenship, indigenous peoples, the global economic system,
Global & International Studies International Electives. Majors must take 3 courses from the list of approved international elective courses. Students are strongly encouraged to strategically select a cluster of three courses that would help them to fulfill KU Core requirements, or maximize a double-major with another program. For example, students double-majoring in geography or history, should choose their courses from the approved list of GEOG or HIST courses. Likewise, students majoring in Latin American Studies or Russian, East European and Eurasian Studies, should choose their courses from the approved list of LAC or REES courses. Students may, however, select from any of the approved courses available.

The following list shows the most commonly taught approved international electives. To see a full list of approved courses for the international elective, consult our website (http://global.ku.edu/courses-1/). Other courses may also be approved in consultation with the department.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 10 units (minimum of 30 credit hours) of major courses.

**Overlapping Courses**
Students in the GIST major can overlap relevant coursework with other programs; however, in order to ensure interdisciplinary breadth, they can only take up to 5 courses offered or cross-listed by any single other academic program.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 21 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Global and International Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120-121**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. This major requirement can be fulfilled by completion of one additional foreign language course (3 hours) beyond the 4th semester proficiency language requirement (300 level or above), or any available additional language course (3-5 hours).

4. 9 hours of "Issues of Global Studies" coursework, and 9 hours of "International Electives" coursework is required for the major. A full list of approved courses for the "International Electives" can be found at: (http://global.ku.edu/courses-1).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors**

To graduate with departmental honors in Global and International Studies, students must complete all requirements for the major plus GIST 699 (Honors Capstone) with a 3.5 grade-point average in the major. The honors seminar allows students to receive individualized assistance from a committee of faculty members while writing their theses.

To enroll in the program, students must have a 3.5 grade-point average in the courses making up the Global and International Studies major. Students must obtain approval of their research topic by the instructor with advice from committee members. Each student will defend their honor's thesis in an oral examination before a thesis committee of three faculty members. The student's committee includes the GIST 699 instructor and two university faculty members the student chooses with the assistance of the instructor.

**Co-Major in European Studies**

**Why study European studies?**

The interdisciplinary European Studies Program is housed in the Center for Global & International Studies, which also provides a home for Middle East Studies and the Undergraduate Certificate in South Asian Studies. European Studies offers an intellectually engaging co-major and minor for students interested in exploring the languages, cultures, history, politics, and economies of Europe and individual European countries. Students integrate the co-major or minor most frequently.
with their study of Global & International Studies, a modern European language, History, Political Science, and English. The program provides students opportunities to attend lectures and panel discussions by leading scholars, conduct research, study abroad, and complete internships, all of which help prepare them for careers in a rapidly changing world and global economy. The European Studies Program also serves as a point of contact and organization for College and University faculty with expertise in European studies, and it promotes both faculty and student expertise by collaborating with local, regional, and national organizations and institutions.

Undergraduate Admission
Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation
To officially declare a co-major in European Studies, please schedule an appointment with the European Studies undergraduate advisor.

The co-major requires a minimum of 24 hours, 18 of which must be numbered 300 or above, and distributed as follows:

During their first and second years, students are strongly encouraged to enroll in HIST 115, HUM 115, or HUM 205 (3) plus 1 additional course from the list below:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

SPAN 550 Colloquium on Spanish Film

Capstone Coursework: EURS Co-majors will complete a senior capstone research project on a European country and the region as they complete the following capstone two-semester coursework (6 hours):

GIST 610 Interdisciplinary Methods for Global Contexts 3
GIST 698 Capstone Seminar 3
or GIST 699 Capstone Seminar, Honors

Students may earn honors in European Studies by completing the two-semester sequence GIST 610 and GIST 699.

Students are strongly encouraged to fulfill general and national/regional elections through a relevant study abroad program in Europe. Students should consult the undergraduate advisor for European Studies about study abroad credit before their program departure.

Co-Major Hours & Major GPA

While completing all required courses, co-majors must also meet each of the following hour and grade-point average minimum standards:

Co-Major Hours
Satisfied by 24 hours of co-major courses.

Major Hours in Residence
Satisfied by a minimum of 24 hours of KU resident credit in the co-major.

Major Junior/Senior Hours
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the co-major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

No more than 12 hours may be shared between a 27-hour European studies co-major and another major.

Departmental Honors

To graduate with Honors in European Studies students must complete the requirements for the co-major plus the two-semester sequence EURS 501 Research for Honors in European Studies and EURS 502 European Studies Honors Project. To qualify for honors, students must maintain a 3.5 grade-point average in the courses making up the European Studies co-major and a 3.25 cumulative grade-point average through graduation. Students must obtain approval of their research topic by a faculty member affiliated with the European Studies Program who will serve as the thesis.
Minor in European Studies

Why study European studies?

The interdisciplinary European Studies Program is housed in the Center for Global & International Studies, which also provides a home for Middle East Studies and the Undergraduate Certificate in South Asian Studies. European Studies offers an intellectually engaging co-major or minor for students interested in exploring the languages, cultures, history, politics, and economies of Europe and individual European countries. Students integrate the co-major or minor most frequently with their study of Global & International Studies, a modern European language, History, Political Science, and English. The program provides students opportunities to attend lectures and panel discussions by leading scholars, conduct research, study abroad, and complete internships, all of which help prepare them for careers in a rapidly changing world and global economy. The European Studies Program also serves as a point of contact and organization for College and University faculty with expertise in European studies, and it promotes both faculty and student expertise by collaborating with local, regional, and national organizations and institutions.

Requirements for the Minor

Students selecting this minor must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EURS 500</td>
<td>Seminar in European Studies</td>
<td>3</td>
</tr>
<tr>
<td>1 approved modern European history course</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>European Studies Minor Electives.</td>
<td>9</td>
<td></td>
</tr>
</tbody>
</table>

Select three of the four following options:

- 1 approved European politics course
- 1 approved European economics or business course

1 approved general European culture or history course
1 approved national or regional European course

A current list of approved courses for the minor is available on the European Studies website and from the Program's Advising Specialist and Academic Director.

Note: No more than 1 course may be counted both in the minor and another degree or minor program.

Minor Hours & Minor GPA

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Junior/Senior (300+) Hours in Residence

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Global and International Studies Minor

Why study global and international studies?

Global and international studies will give you the tools to understand the rapid and profound changes that are occurring around the world.

Requirements for the Minor

Students selecting this minor must complete the following:

GIST Minor Core Requirements

Global & International Studies Core Knowledge and Skills. Satisfied by completion of GIST 220, and one course from the following list:

<table>
<thead>
<tr>

Global & International Studies International Electives: (6 hours/2 courses) Minors must take 2 courses from the list of approved international elective courses. Students are strongly encouraged to strategically select courses that would help them to maximize its linkage to another major or minor with another program, or use the electives to help fulfill requirements from the KU Core. Students may, however, select from any of the approved courses available.

The following list shows the most commonly taught approved international electives. To see a full list of approved courses for the international elective, consult our website (http://global.ku.edu/courses-1/). Other courses may also be approved in consultation with the department.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:
Minor Hours
Satisfied by 18 hours of minor courses.

Overlapping Courses
Students in the GIST minor can overlap relevant coursework with other programs; however, in order to ensure interdisciplinary breadth, they can only take up to 3 courses offered or cross-listed by any single other academic program.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Middle East Studies Minor

Middle East Studies Minor

Why study the “Middle East”? The countries within and neighboring what is commonly referred to as the Middle East continue to play an important role in global affairs and dynamics. The economic and business elements of the region along with its political, cultural, and social realities factor heavily into contemporary world developments. Within such a context, for intrinsic and extrinsic reasons, there are strong reasons to focus one’s study on this area of the world. KU combines education in Arabic, Persian, Turkish, and Hebrew with a rich selection of courses on or related to the region, including courses in Islamic studies, language, culture and art, history, and contemporary social and political dynamics. The minor also complements many majors within the College as well as other degrees across the University. The area's languages and knowledge of cultures, society, and politics in the region can prepare students for careers in business and the private sector, foreign or civil service, or jobs with non-profit organizations.

Language Option: A student pursuing a Middle East Studies minor may also use one 300-level or above ARAB, PERS, TURK, or HEBR language course as an elective that counts toward three credit hours of “Humanities emphasis.”

Middle East Studies Minor Hours & GPA

While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the Minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Undergraduate Certificate in Persian Language and Cultures

The certificate in Persian Language and Cultures provides students an avenue to exemplify their investment in knowledge and skills of this critical language and its cultures—Farsi, Tajik, and Dari. Students can pair this certification with overlapping courses in majors such as Global & International Studies, African & African American Studies, or the Middle East Studies minor. The certificate is also a convenient way to demonstrate language and culture credentials for students in the professional schools, like engineering, journalism, or business. Please contact the undergraduate advisor for Global & International Studies for more information.

#### Code | Title | Hours
--- | --- | ---
Required language coursework: 6 hours in Persian language coursework in courses numbered PERS 220 or above. This includes any of the following: | | 
Completion of PERS 110, PERS 120, PERS 210 or the equivalent is required before starting on the Persian language coursework below.

PERS 220 | Intermediate Iranian/Dari/Tajik Persian II | 
PERS 593 | Directed Study in Persian Culture and Literature: | 
PERS 310 | Advanced Iranian/Dari/Tajik Persian I | 
PERS 320 | Advanced Iranian/Dari/Tajik Persian II | 
Culture Electives: Students must take any two of the following | | 
HIST 325 | Peoples and Cultures of South Asia | 3

### Undergraduate Certificate in South Asian Culture

This certificate option is currently unavailable to new students

South Asia is home to the peoples and cultures of an enormous proportion of the World's population. An understanding of South Asian culture will give you the tools and open doors to exciting exchanges with the peoples in this region. KU offers regular instruction in the critical language of Hindi, and exciting study abroad programs abound which would help you incorporate the South Asian Cultural Certificate into your degree plan. An undergraduate certificate in South Asian Culture allows you to incorporate a cluster of courses on South Asia to your other degree programs and enhance your knowledge of a critical and dynamic area of the world.

#### Requirements for the Undergraduate Certificate in South Asian Culture

12 credit hours - 9 of which must be at the 300 level or above.

#### Code | Title | Hours
--- | --- | ---
**Core Course** | | 
GIST 325 | Peoples and Cultures of South Asia | 3

#### Electives

These courses allow students to deepen their knowledge of the countries and issues in the region.

DANC 440 | Introduction to Classical East Indian Dance | 
GIST 502 | Advanced Topics in South Asian Studies: | 
GIST 530 | Politics and Society in the Contemporary Persianate World | 
HIST 603 | History of Tibet | 
HNDI 301 | Topics in Hindi Culture, Language and Literature: | 
REL 106 | Asian Religions | 
REL 365 | Hinduism | 
REL 545 | 

Language Courses: 3 credit hours of the following can count toward the 9 credit hours of electives requirement above.

HNDI 310 | Advanced Hindi I | 
HNDI 320 | Advanced Hindi II |

### Master of Arts in Global and International Studies

#### Master of Arts in Global and International Studies

The M.A. in GIST provides an analytically sophisticated understanding of the contemporary global arena and cultivates the skills and knowledge to operate in a world where traditional boundaries are disappearing. Through the 33-credit hour program, students develop a specialization in a world region and can pursue interests in global politics, society, and culture across a broad range of courses in the humanities and social sciences.

Students in Global and International Studies have access to courses by top-notch research faculty across a wide variety of relevant disciplines.
at KU's main campus in Lawrence (http://www.ku.edu/). Besides access to quality instruction and content, our students have access to the amazing international resources that put KU on the top shelf for international education—a nationally-ranked Study Abroad Program, instruction in 40 foreign languages, and local, national, and international internship opportunities.

"Traditional" Master’s Track

The self-tailoring and interdisciplinary field of Global and International Studies prepares graduate students with marketable skills (such as professional certification opportunities and research and writing skills) and the knowledge to deal with contemporary global issues. This is critical in our contemporary world in which both problems and opportunities increasingly transcend national boundaries.

KU's Master of Arts in Global and International Studies (https://global.ku.edu/global-ma/) is designed for those who seek a better understanding of international issues that shape public policy and the global economy and who want to have an impact in these areas.

Interagency Studies Track

The Interagency track (https://global.ku.edu/applying-interagency-studies-program/) of the Master’s degree program in Global and International Studies is a one-year program designed exclusively for military personnel pursuing their Intermediate Level Education (ILE) program at the Command and General Staff College (CGSC) at Ft. Leavenworth.

The objective of the Interagency Studies Program (ISP), is to prepare military officers for working in interagency environments by expanding their abilities to conceptualize and address issues beyond their military training. The program offers coursework from multiple disciplines with an array of theoretical frameworks.

KU courses are held primarily at the KU Ft. Leavenworth campus, along with courses at the Command General Staff College and at the KU Lawrence campus. Classes are primarily offered in the evening and run the length of the academic year - three courses August-December, three courses January-April, and two courses May-June.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

For the traditional and Interagency Studies M.A. programs, students are admitted in the fall only. Interagency Studies applications are due by July 23. Applications for the "traditional" MA track are due January 15. All applicants must check the application requirements through the traditional MA (https://global.ku.edu/how-apply/) and Interagency Studies Program (https://global.ku.edu/applying-interagency-studies-program/) pages.

Potential students must submit a complete online graduate application (https://gradapply.ku.edu/apply/). For additional questions regarding program requirements and application processes, please contact the Director of Graduate Studies, Dr. Luciano Tosta (https://global.ku.edu/tosta-luciano/). Applicants may also contact the department (https://global.ku.edu/global-ma/) directly:

The University of Kansas
Global and International Studies
201 Bailey Hall
1440 Jayhawk Blvd., Room 102
Lawrence, KS 66045 | cgis@ku.edu

M.A. Degree Requirements

The Master of Arts in Global and International Studies is a 33 graduate credit hours. All students complete 9 hours of specific requirements at the 700 level:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GIST 701</td>
<td>Approaches to International Studies</td>
<td>3</td>
</tr>
<tr>
<td>GIST 702</td>
<td>Globalization</td>
<td>3</td>
</tr>
<tr>
<td>GIST 710</td>
<td>Research Design for International Area Studies</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the 9 hours of specific requirements, students must then complete 21 credit hours of electives at 700 level or above. These electives form 2 coherent clusters:

Regional Specialization Cluster:

These courses in this cluster should give students focused knowledge about a selected region of the world. Up to 3 language courses (9 hours) at or above the 500 level may also count toward this requirement.

Topic Specialization Cluster:

This cluster must focus on a topic specialization approved by the student’s adviser. Students can choose current global and international themes, or they can select an existing graduate certification program offered by another department, such as certificates in community health and development, peace and conflict, women gender and sexuality studies, international business, public administration or communication studies.

For more on the regional and topical elective options, consult the GIST graduate student handbook (http://global.ku.edu/courses-offered/) or contact one of the GIST graduate advisors.

For all students, the M.A. degree also requires evidence of current competence (equivalent to 2 years of successful college-level study) in a modern spoken and written language other than their native tongue; courses taken to complete this requirement generally do not count toward the degree. Students must meet all general requirements as well as program requirements.

Thesis Option

Students electing to write and defend a thesis must have their thesis project proposal approved by their thesis adviser prior to enrolling in GIST 898 Thesis and Research Project Writing. Students choosing
the thesis option must complete GIST 898. For guidelines and policy regarding the thesis, please consult the GIST graduate student handbook (http://global.ku.edu/thesis-option/).

Non-thesis Options

Option #1 (Research Project and Oral Exam) – students selecting this option are required to take GIST 898 and complete a research project of more limited scope and scale than a thesis, and the project will be followed by an oral exam. For guidelines and policy regarding the research project option, please consult the GIST graduate student handbook (http://global.ku.edu/non-thesis-option/).

Option #2 (Exam) – students choosing this option must take an additional 3 credit hours, corresponding to one of their 2 coherent elective clusters. In the final semester, the student must successfully complete a written examination on the core course content (GIST 701 and GIST 702) and the student’s regional and substantive areas of focus. This is followed by an oral exam. Students considering this option must consult the graduate director first. For guidelines and policy regarding the written and oral exam option, please consult the GIST graduate student handbook (http://global.ku.edu/non-thesis-option/).

Interagency Degree Requirements

The Interagency Studies Program (ISP) is a unique track within the GIST master’s degree for students in the Intermediate Level Education (ILE) program at the Command and General Staff College (CGSC) at Ft. Leavenworth. The curriculum combines coursework from KU and from the ILE program. Students who complete the ILE program at CGSC are approved for a reduced credit hour master’s degree at KU, allowing them to complete the Global & International Studies master’s with a minimum of 24 graduate credit hours.

Below are the KU courses that a student can typically expect to take.

<table>
<thead>
<tr>

Final Examination

The program culminates with a final paper demonstrating the application of program knowledge to a military (preferably interagency) issue, which can be submitted to relevant journal outlets in military studies.

Department of History

Studying history at the University of Kansas will expand your mind. Our course offerings introduce students to medieval witches and Samurai warriors, conspiracy cranks and Native American prophets, Chairman Mao and the Black Panthers. Students can take courses on the history of sexuality, or, if that isn’t exciting enough, courses on natural disasters, wars, and plagues. With 29 tenured and tenure-track faculty, the Department of History covers the globe.

But studying history is more than just an entertaining adventure. Training in historical research, analysis, and writing develops skills that are essential in our information economy, and this preparation is especially useful to students planning to pursue graduate training and careers in law, public policy, journalism, education, and a universe of other possibilities, as our recent undergraduate and graduate alumni throughout the world can attest.

The Department of History at KU offers an outstanding undergraduate program (http://history.ku.edu/undergrad-overview/) with approximately 250 History majors and minors. These students are taught by faculty who consistently win awards for their teaching as well as their research. Beyond the introductory level, class sizes are small, including two required seminars that are capped at fifteen students each, and the optional Senior Honors Thesis, which features direct one-on-one advising with a faculty mentor.

Our graduate program (http://history.ku.edu/ma-overview/) has consistently ranked in the top 25 among public research universities. With an average of 35 graduate students enrolled, we are primarily a doctoral program, granting Ph.D. degrees in geographical areas such as the United States, Europe, Asia, Africa, the Middle East, and Latin America, as well as in thematic fields such as military, environmental, and gender and sexuality. Recent Ph.D. recipients have gone on to tenure-track positions at research universities, liberal arts colleges, junior colleges, and a variety of careers in other sectors.

Finally, faculty in the Department of History are nationally and even internationally known for their research. The books and articles they have published just in the last two years are too numerous to list here, but you can scroll through the faculty page (http://history.ku.edu/faculty/alphabetically/) to gain a sense of their significance shaping our knowledge about the world. Their productivity plays an important role in helping KU maintain its position in the prestigious American Association of Universities.

Take some time to search through our website (http://history.ku.edu/). You’ll find information about our programs, our courses, and our prolific faculty, and you can hear the voices of undergraduates and graduate students who have passed through the Department. Please feel free to contact (http://history.ku.edu/contact/) any of the administrative staff, faculty, and faculty officers with your questions.

Undergraduate Programs

The Department of History at the University of Kansas is particularly distinguished in undergraduate teaching and is a recipient of the Excellence in Undergraduate Advising Award from the College of Liberal Arts and Sciences. The Department ranks well above the University average in student evaluations, and many History faculty members have won individual awards for their teaching, such as the Kemper Prize and Distinguished Professor awards.

- Our Faculty (http://history.ku.edu/faculty/alphabetically/) are nationally and internationally recognized leaders in their field, and they bring this advanced knowledge into the classroom.
- Courses (http://catalog.ku.edu/liberal-arts-sciences/history/#courseinventory) in the department are usually small, and the larger courses always include Teaching Assistants, so students can receive individual attention and feedback on their work.
• Flexibility is given in the department: students have only two required courses—a course on historical methods (HIST 301) and a senior research seminar (HIST 696 or HIST 690/HIST 691)—and a choice of concentrating on any of ten fields. The department and faculty also have strong connections to interdisciplinary work in Environmental Studies, African and African-American Studies, Indigenous Nations Studies, and other area studies programs.
• Resources for historical research at KU are rich. Watson and Anschutz libraries help make up a major research library collection, and the Spencer Library offers such resources as the Wilcox Collection on extremist politics, the University Archives.
• For more information, see the History Major Program Description (http://history.ku.edu/curriculum/).

Courses for Nonmajors

The department welcomes nonmajors in all of our courses and offers a variety of cross-listed classes. Nonmajors may enroll in History courses at any level.

Graduate Programs

The Department of History (http://history.ku.edu/) at the University of Kansas is a dynamic place, with a proud tradition of training scholars from across the globe who have transformed the practice of history. The program offers major or minor concentrations in the areas of United States, African American, Modern European, British & Imperial, Russian/ East European, East Asian, Latin American, African, Medieval, Women and Gender, Military, and Environmental History. KU offers its graduate students great flexibility in their choice of fields, as defined both by traditional geographical and chronological parameters and thematic topics. Students also have the opportunity to take coursework outside the department in fields such as Public History, Museum Studies, Environmental Studies, and the History of Medicine.

Primarily a doctoral program, the Department currently enrolls approximately 80 graduate students from throughout the United States and the world, including Japan, China, Peru, and Russia. Our students make up a very diverse group, and we encourage applicants from traditional and non-traditional backgrounds.

Students who are interested in enrolling in graduate level coursework in the Department of History without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (http://history.ku.edu/admission-grad/) webpage for further details.

For statistics regarding our program, please see our Doctoral Program Profile (http://wwwgraduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/dpp/DPP_A_HIST.pdf), which demonstrates our success at funding and placing current and recent graduates.

Courses

HIST 101. Introduction to Western History: _____ 3 Hours HT / H.
An introduction to the study of history focusing on a topic in Western History. The course will expose the student to the major issues and methods of historical study through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. This course grants HIST Category I credit. LEC.

HIST 102. Introduction to History, Honors: _____ 3 Hours HT / H.
An introduction to the study of history. The course will expose the student to the major issues and methods of historical study. This will be done through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. Prerequisite: Membership in the College Honors Program or consent of department. LEC.

HIST 103. Environment and History. 3 Hours H.
Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as EVRN 103.) LEC.

HIST 104. Introduction to African History. 3 Hours NW GE11/GE3H / H/W.
An introduction to important historical developments in Africa. Topics include empires, kingdoms, the slave trade, European colonialism, liberation movements, national identities, and a return to independence. (Same as AAAS 105.) LEC.

HIST 105. Introduction to Ancient Near Eastern and Greek History. 3 Hours NW GE3H / H/W.
A general survey of the political, social, and economic developments of Mesopotamia, Egypt, Asia Minor, and Greece from Paleolithic times to 323 B.C. (Same as CLSX 105.) LEC.

HIST 106. Introduction to Roman History. 3 Hours H/W.
A general survey of the political, social, and economic developments of ancient Rome from 753 B.C. to 475 A.D. (Same as CLSX 106.) LEC.

HIST 107. Introduction to the Ancient World. 3 Hours H.
This course covers the history of the ancient Near East, Greece and Rome with emphasis on the origins of agriculture, writing, cities, empires, and democracy. Students will be introduced to schemes of interpretation, critical readings, and analysis, primary sources, and evaluation of evidence. LEC.

HIST 108. Medieval History. 3 Hours HT / H/W.
The history of Europe from the Barbarian Invasions to the beginning of the 16th century. LEC.

HIST 109. The Black Experience in the Americas. 3 Hours HT AE41 / H/W.
An interdisciplinary study of the history of the African peoples of the New World, relating their cultures and institutions to the African background and to their peculiar New World experiences up to and including the nineteenth century. While the main emphasis is on the U.S.A., attention is also paid to the Caribbean and Latin America. Approaches include demography, economics, social and political developments, literature, and music. (Same as AAAS 106.) LEC.

HIST 110. Introduction to Non-Western History: 1-3 Hours GE11 / H.
An introduction to the study of history focusing on a topic in non-Western History. The course will expose the student to the major issues and methods of historical study through the study of a specific historical period or topical area. In the study of this period or topic, students will be introduced to schemes of interpretation, critical readings and analysis, primary sources, and evaluation of evidence. This course grants HIST Category II credit. LEC.
HIST 111. Introduction to African History, Honors. 3 Hours NW GE3H / H/W.
An intensive version of AAAS 105/HIST 104. An introduction to important historical developments in Africa, mainly south of the Sahara. Topics include early history, empires, kingdoms and city-states, the slave trade, southern Africa, partition and colonialism, the independence era, military and civilian governments, and liberation movements. Approaches include literature, the visual arts, politics, economics, and geography. Open only to students in the University Honors Program or by consent of instructor. (Same as AAAS 115.) LEC.

HIST 112. Introduction to British History. 3 Hours GE11 / H.
This course will introduce students to the concepts, issues, and methods of historical study, at the same time as it explores the main processes and events which shaped the history of Britain and its imperial dependencies. Students will be introduced to the nature and validity of different historical interpretations, and to the purpose and merit of historical writings. LEC.

HIST 114. Renaissance to Revolution: Europe 1500-1789. 3 Hours HT GE11 / H/W.
An introduction to early modern European history, with emphasis on the cultural, political, economic, and cultural forces which have helped to shape the modern world. The Renaissance, the rise of nation states, the Reformation, absolutism and constitutionalism, the Enlightenment, and the coming of the French Revolution. LEC.

HIST 115. French Revolution to the Present: Europe 1789-Present. 3 Hours HT GE11/GE3H / H/W.
An introduction to recent European history, with emphasis on the social, political, economic, and cultural forces which have helped to create the Europe of today: the French Revolution, the romantic movement, the revolutions of 1848, nationalism, imperialism, Communism, and two World Wars, the cold war, and its aftermath. LEC.

HIST 116. French Revolution to the Present: Europe 1789 to Present, Honors. 3 Hours HT GE11/GE3H / H.
An introduction to recent European history, with emphasis on the social, political, economic, and cultural forces which have helped to create the Europe of today: The French Revolution, the romantic movement, the revolutions of 1848, nationalism, imperialism, Communism, and two World Wars, the cold war and its aftermath. Not open to students who have taken HIST 115. This Honors course is a Humanities Historical Studies Principal Course. Prerequisite: Membership in the College Honors Program or consent of department. LEC.

HIST 117. Russia, An Introduction. 3 Hours HT AE42/GE3H / H/W.
This course introduces students to the history of Russia from its beginnings to the present. It explores Russia’s ethnic and religious diversity, the relationship between the state and its peoples, the geopolitics of its place between Europe and Asia, and the revolutionary movements that shook Russia and shaped the world around it. LEC.

HIST 118. Premodern East Asia. 3 Hours NW AE42 / H/W.
A survey of the premodern history of China, Japan, Korea, and other cultures in East Asia. Students are introduced to the major currents of East Asian history and historical methods used to study them. Not open to students with credit in upper division East Asian history. LEC.

HIST 119. Modern East Asia. 3 Hours NW AE42 / H/W.
A survey of the modern history of China, Japan, Korea, and other cultures in East Asia. Students are introduced to the major currents of East Asian history and historical methods used to study them. Not open to students with credit in upper division East Asian history. LEC.

HIST 120. Colonial Latin America. 3 Hours NW GE21 / H/W.
The principal focus is on the evolution and analysis of societies, economies, and religions of native American peoples, the impact of Spanish and Portuguese conquests and settlement, government, trade and culture upon native civilizations, the influence of African population and culture, and the creole nature of the resulting society in the colonial period. Changes in the society and economy which presaged the movements for independence are also discussed. LEC.

HIST 121. Modern Latin America. 3 Hours HT GE3H / W.
Students are introduced to historical analysis within the context of the emergence of national identities and the process of modernization in the region. It also discusses key processes such as urbanization and industrialization and examines social movements for reform or revolution in the 20th Century. The course compares social, cultural, economic, and political changes across a variety of countries since 1810, giving particular attention to the legacies of colonialism. In this way the course deals with interpretations of the processes and movements and major issues of Latin American historiography. LEC.

HIST 122. Colonial Latin America, Honors. 3 Hours NW AE42/GE3H / H/W.
The principal focus is on the evolution and analysis of societies, economies, and religions of native American peoples, the impact of Spanish and Portuguese conquests and settlement, government, trade and culture upon native civilizations, the influence of African population and culture, and the creole nature of the resulting society in the colonial period. Changes in the society and economy which presaged the movements for independence are also discussed. LEC.

HIST 123. Modern Latin America, Honors. 3 Hours HT GE3H / W.
Similar in content to HIST 121. Students are introduced to historical analysis within the context of the emergence of national identities and the process of modernization in the region. The course compares social, cultural, economic, and political changes across a variety of countries since 1810, giving particular attention to the legacies of colonialism. It also discusses key processes such as urbanization and industrialization and examines social movements for reform and revolution in the 20th century. In this way the course deals with interpretations of these processes and movements and major issues of Latin American historiography. Prerequisite: Membership in the University Honors Program or permission of instructor. LEC.

HIST 124. Latin American Culture and Society. 3 Hours SC AE42 / S.
An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with a basic knowledge base for understanding Latin America today. (Same as LAC 100.) LEC.

HIST 128. History of the United States Through the Civil War. 3 Hours HT GE3H / H.
A historical survey of the United States from the peopling of the continent through the Civil War. This survey is designed to reflect the diversity of the American experience, to offer the student a chronological perspective on the history of the United States, and to explore the main themes, issues, ideas, and events which shaped that history. LEC.

HIST 129. History of the United States After the Civil War. 3 Hours HT GE3H / H.
A historical survey of the American people from Reconstruction to the present. This survey is designed to reflect the diversity of the American experience, to offer the student a chronological perspective on the history
of the United States, and to explore the main themes, issues, ideas, and events that shaped American history. LEC.

HIST 139. The Global Cold War. 3 Hours H.
This course provides an immersive introduction to the global Cold War and its legacies. It explores how the contest between capitalism and communism unfolded not only in the United States and the Soviet Union, but also in Asia, Africa, Europe, Latin America, and the Middle East. Through interactive lectures, discussions, and role-playing games, students will learn to “think globally,” gain an understanding of imperialism, nationalism, and decolonization, and discover how the Cold War shaped culture, economics, politics, the environment, and the international system in ways that remain relevant today. (Same as GIST 139.) LEC.

HIST 140. Global Environment I: The Discovery of Environmental Change. 5 Hours GE3H / U.
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 140 and GEOG 140.) LEC.

HIST 142. Global Environment II: The Ecology of Human Civilization. 5 Hours GE3H / U.
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 142 and GEOG 142) LEC.

HIST 144. Global Environment I: The Discovery of Environmental Change, Honors. 5 Hours U.
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 144 and GEOG 144.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

HIST 145. Global Environment II: The Ecology of Human Civilization, Honors. 5 Hours U.
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics will include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 145 and GEOG 145.) Open only to students in the University Honors Program or by permission of instructor. LEC.

HIST 150. Introduction to Food History: Around the World in Eight Dishes. 3 Hours H.
Foods and drinks such as chocolate, coffee, curry, and olive oil have changed the world in ways that transcend national boundaries; this course follows their stories tracing routes of imperialism and globalization while attentive to the impact of these foods on indigenous peoples. Each week offers new foods and new discoveries drawing from cases globally to ask why people choose certain foods, what that says about their culture, and how foods and drinks have changed historically. Besides learning how food can be a window to history and gaining an introduction to the interdisciplinary methodology of food studies, this course will help you understand the consequences of what you eat in terms of your own body, the environment, and communities a world away. LEC.

HIST 160. Introduction to West African History. 3 Hours AE42/GE3H / W.
This course treats West African history through the first part of the twentieth century. The student is provided with a perspective on the major historical patterns that gave rise to West Africa’s development as an integral part of world history. Special attention is paid to anthropological, geographical, and technological developments that influenced West African political and socioeconomic changes. (Same as AAAS 160.) LEC.

HIST 177. First Year Seminar: ____. 3 Hours HT GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in history. May not contribute to major requirements in history. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. SEM.

HIST 190. Warlords and Rebels in Asia. 3 Hours NW / H.
Warlords tear apart society and try to rebuild it according to their own terms. Rebels challenge the status quo. This course provides an introduction to East Asian political, social, and cultural history through a thematic lens. The class offers students a diverse variety of perspectives on social and political change in East Asia and encourages them to reflect on such themes in Western contexts as well. LEC.

HIST 201. Writing the Past-Category I/Western Topics: ____. 3 Hours GE21 / H.
Many of the words that human beings have written down in one form or another have been stories of events, people, and places from the past. History is a story of countless people-some famous, many anonymous-who have made up the human past. This course will introduce students to the basic skills of analytical, descriptive, and narrative writing and reading through the lens of history. Students will learn how to develop a voice of their own as writers and build a toolkit of skills that will help them effectively communicate in writing, in their course work and careers. This course will cover topics that will fulfill the Category I/Western requirement of the History major. SEM.

HIST 202. Writing the Past-Category II/Non-Western Topics: ____. 3 Hours GE21 / H.
Many of the words that human beings have written down in one form or another have been stories of events, people, and places from the past. History is a story of countless people-some famous, many anonymous-who have made up the human past. This course will introduce students to the basic skills of analytical, descriptive, and narrative writing and
reading through the lens of history. Students will learn how to develop a voice of their own as writers and build a toolkit of skills that will help them effectively communicate in writing, in their course work and careers. This course will cover topics that will fulfill the Category II/Non-Western requirement of the History major. SEM.

HIST 203. Speaking the Past-Category I/Western Topics: _____ 3 Hours GE22 / H.
This seminar offers students the opportunity to learn about a specific theme or topic in history through the development of their verbal communication skills. A variety of scaffolded assignments will introduce students to the essential elements of interpersonal and public speaking, provide opportunities to practice their performances and receive constructive feedback, and hone their organizational and critical-thinking skills. In doing so, they will achieve a deeper understanding of an important aspect of the past. Specific historical topics will be determined by individual instructors. This course will cover topics that will fulfill the Category I/Western requirement of the History major. SEM.

HIST 204. Speaking the Past-Category II/Non-Western Topics: _____ 3 Hours GE22 / H.
This seminar offers students the opportunity to learn about a specific theme or topic in history through the development of their verbal communication skills. A variety of scaffolded assignments will introduce students to the essential elements of interpersonal and public speaking, provide opportunities to practice their performances and receive constructive feedback, and hone their organizational and critical-thinking skills. In doing so, they will achieve a deeper understanding of an important aspect of the past. Specific historical topics will be determined by individual instructors. This course will cover topics that will fulfill the Category II/Non-Western requirement of the History major. SEM.

HIST 206. Disasters in Mediterranean Antiquity. 3 Hours H.
This course examines a variety of natural and man-made disasters in the ancient Mediterranean world including floods, volcanic eruptions, earthquakes, famines, plagues, and tsunamis. Emphasis throughout is on exploring the range of impacts, responses, and attempts at recovery documented by ancient sources and proposed by modern scholars. The focus lies on primary evidence, ranging from the Bible to Greece and Rome via Egypt and Mesopotamia. The course aims to familiarize students with several types of catastrophic events that occurred in antiquity in order to gain an understanding of their effects on the environment and on decision making process. In addition to investigating what these disasters entailed, we seek to appreciate how they affected societies in various ways including economically, psychologically, and demographically, and how individuals and governments reacted and responded to these crises. LEC.

HIST 210. Brazil and Africa: Atlantic Encounters. 3 Hours H.
This is a survey course on the history of the relationships between Brazil and Western Africa from the sixteenth century onward. We examine the shape of the Atlantic world, the nature of the Portuguese empire in Brazil and Africa, the presence of Brazilian born agents in Western Africa, the cultural exchanges, the impact of colonial rule, and the responses of indigenous societies to these developments. Among the topics to receive attention are Brazil/Portuguese slave trade; slavery in Western Africa, urban and rural context of African slavery in Brazil; the family and religious life in both sides of the Atlantic; Brazilian communities in the coast of Africa; the abolition of slavery; and the long lasting relationships between Western Africa and Brazil. Students develop familiarity with major historical concepts, themes, and subjects. The course also aims to explore history as process to make sense of the past and the present. (Same as AAAS 210.) LEC.

HIST 220. A Global History of Human Health. 3 Hours H.
This course surveys how human populations have experienced diseases including those induced by infectious microbes, environmental agents, and dietary causes from prehistoric hunter-gatherer societies to today's global population. Particular emphasis is on major transitions and historical events that have had led to major epidemics. These transitions and events include but are not limited to the transition to agriculture, urbanization, imperial expansion, colonialism, industrialization, world wars, factory farming, and the transportation revolution. The development of medicine, public policies, and global health organizations is a central theme as is the development of global health disparities. Students are challenged to think historically and apply a long-term perspective to understand today's global health problems. LEC.

HIST 229. United States in the 1960s. 3 Hours AE41 / H.
In the Sixties, millions of Americans rejected socially-sanctioned established wisdom, long-standing cultural precepts and conventional political policies and practices. In this gateway course we will examine how and why they did so, why so many other Americans rejected their challenges to the status quo, and what difference these rebellions made in Americans' lives. By placing their struggles in historical context, we will think about how and why people make and resist social change and how historical circumstances restrain and enable people's individual and collective ability to act and to make their own futures. Through readings, lectures, discussion, and various assignments students will have opportunities to debate the great questions of that era and ponder the relevance of historical events and understandings to their own lives and to the life of the nation, as they sharpen their analytic abilities and their capacity to communicate those analyses effectively. LEC.

HIST 230. Sex, Gender, Film, and History. 3 Hours H.
In the second half of the 20th century, Americans struggled over sex and gender-and both their behaviors and beliefs changed dramatically, though not without controversy. In this class, we use mainstream, popular American films produced during this volatile era to analyze historical understandings of gender identity and appropriate sexual behaviors in post-WWII American society. This course is also an introduction to the study of history: students will work extensively with film and other primary documents, and will analyze different scholarly interpretations of the same set of events. LEC.

HIST 231. War and 20th Century U.S. Culture. 3 Hours H.
This course analyzes the "cultural construction" of war in 20th century America by focusing primarily on World War II and the Vietnam War. How have Americans attempted to come to terms with the wars they have fought? How have Americans' cultural understandings shaped the wars they have waged? How have Americans used various cultural forms (film, music, photography, etc.) to support a war effort or to protest against it? We pay special attention to the place of the military in American society, to notions of patriotism and citizenship, to constructions of gender, race, and sexuality, and to the roles of government, media, technology, and public opinion. LEC.

HIST 250. Study Abroad Topics in: _____ 1-5 Hours H.
This course is designed for the study of special topics in History at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

HIST 285. Headless Men: Conquest and Cultural Exchange Before the Age of Exploration. 3 Hours HL AE42/GE3H / H.
In fourteen hundred and ninety-two, Columbus sailed the ocean blue. But what happened before Columbus' great journey? And, more to the point, why did he and his contemporaries feel entitled to simply claim whatever land they found? This course proposes to explore the medieval
experiences of cultural and racial Otherness in order to better understand the roots of some of the assumptions about difference (interpersonal, intercultural, and international) that continue to play out in American society today. Taught in English. (Same as FREN 285.) LEC.

HIST 300. Modern Africa. 3 Hours NW AE42 / H/W.
A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 305.) LEC.

HIST 301. The Historian’s Craft. 3 Hours H.
This course introduces students to the practice and methods of the study of history and serves as the gateway to the major. HIST 301 trains students to think like historians, equipping them with skills in research, critical analysis, and oral and written presentation useful to any career but especially integral to careers in archival work, museum work, law, and research. Students learn (1) to think historically; (2) to understand how historians construct and write about the past through narratives, theory and analytical discussion; (3) to critically evaluate historical arguments and the material used to substantiate those arguments, including an introduction to the process of peer review; (4) to develop writing and research skills including the interpretation of primary sources; and (5) to master professional standards of presenting their findings. This course is required of all history majors and is a prerequisite for HIST 696 Seminar in:________. Prerequisite: Completion of KU Core 2.1 and recommended completion of KU Core 2.2. Open only to declared History majors or by consent of instructor. LEC.

HIST 302. The Historian’s Craft, Honors. 3 Hours H.
This course introduces students to the practice and methods of the study of history and serves as the gateway to the major. Students learn (1) to think historically; (2) to understand how historians construct and write about the past through narratives, theory and analytical discussion; (3) to critically evaluate historical arguments and the material used to substantiate those arguments, including an introduction to the process of peer review; (4) to develop writing and research skills including the interpretation of primary sources; and (5) to master professional standards of presenting their findings. This course, or HIST 301 - its non-honors equivalent, is required of all history majors and is a prerequisite for HIST 696 Seminar in:________. Prerequisite: Open only to students admitted to the University Honors Program who are declared History majors, or by consent of instructor. LEC.

HIST 303. Sin Cities. 3 Hours H.
This course offers a comparative global introduction to the history of the modern city by looking at the ways in which certain metropolii developed an attractive underbelly of decadence at the same time as they sought to be centers of refined and orderly cosmopolitan life. The course examines topics such as popular culture, gambling, prostitution, crime, violence, nightlife, tourism, and corruption in the context of the increased social mobility that characterized the beginning of the industrial age and that has extended into the 21st century. Students investigate the changing relation between work and leisure, spectacle and consumerism, and urban space and the struggle for order. LEC.

HIST 304. 1642, 1688, 1776: Three British Revolutions. 3 Hours H.
Explains and analyzes the three revolutions in the English-speaking world which, more than any others, are held to have laid the foundations of modernity. Themes discussed include social, intellectual, and political developments, structures, and conflicts. 1642 and 1688 are treated in the setting of England's relations with Scotland and Ireland, and against the background of European wars of religion. 1776 is analyzed in a transatlantic context as a civil war within the wider British polity. LEC.

HIST 305. The Scientific Revolution. 3 Hours H.
Describes and analyzes the factors producing a Scientific Revolution in early-modern Europe. Focuses on fundamental changes in astronomy-cosmology, physics, and biology from Copernicus to Newton. Examines the emergence of experimental method as an essential part of Western science. Portrays the development of new forms of scientific organization and the cultural frameworks that bore and shaped them. Surveys the various interpretations of this period expressed by current historians of science. LEC.

HIST 307. Modern Africa, Honors. 3 Hours NW AE42 / H.
An intensive version of HIST 300. A survey of social, political, and economic developments during the colonial era and independence struggles. Themes may include resistance, liberation, nationalism, gender issues, agriculture, genocide, and human rights. (Same as AAAS 307.) Prerequisite: Open only to students admitted to the University Honors Program, or by consent of the instructor. LEC.

HIST 308. Key Themes in Modern Global History. 3 Hours H.
A comparative historical analysis of major global developments from the late 15th century to the present. Some of the themes likely to be explored are empire-building, contact between cultures and colonial social relations; the attraction of cities, their role in a global economy and the shift to an urban world; and the impact of capitalism and industrialization on social organization including conflict between classes and changes in the nature of work. Students learn ways of interpreting primary historical documents and comparing historical investigations across time and space. (Same as GIST 308.) LEC.

HIST 310. American Culture, 1600-1876. 3 Hours H.
An examination of the major historical shifts, trends, and conflicts that have shaped the multicultural nature of life in the United States from the initial European settlements to 1876. In addition to tracing developments in literature, architecture, drama, music, and the visual arts, this course will investigate patterns and changes in the popular, domestic, and material culture of everyday life in America. (Same as AMS 310.) Prerequisite: AMS 100 or AMS 110 or HIST 128. LEC.

HIST 312. American Culture, 1877 to the Present. 3 Hours H.
An examination of the major historical shifts, trends, and conflicts that have shaped the multicultural nature of life in the United States from 1877 to the present. In addition to tracing developments in literature, architecture, drama, music and the visual arts, this course investigates patterns and changes in the popular, domestic, and material culture of everyday life in America. (Same as AMS 312.) LEC.

HIST 314. Globalization: History and Theory. 3 Hours GEES / H.
Explores the rise of global capitalism in the 19th and 20th centuries, contemporary debates about 21st century globalization, and the role of globalization in our everyday lives. Questions considered include: Is globalization an incremental process that has been going on for centuries, or is it a dramatic new force reshaping the post-Cold War world? Is it a cultural and social process or an economic and political one? Or is it all of these things? Not open to students who have completed HIST 315. (Same as GIST 314.) LEC.

HIST 316. Ministers and Magicians: Black Religions from Slavery to the Present. 3 Hours H.
This course examines the history and diversity of African American religious expression from slavery until the present, emphasizing both mainstream and alternative faiths. It covers the religious world views of enslaved Africans, and examines faiths inside and outside of Christianity. Topics may include: independent black churches, magical practices, the Holiness and Pentecostal movements, black Islam, religious freemasonry, and esoteric faiths. The class emphasizes the influence of gender, class,
race, migration, and urbanization on black religion. (Same as AAAS 316 and AMS 316.) LEC.

HIST 317. African American Women: Colonial Era to the Present. 3 Hours AE41 / H.
This interdisciplinary course covers the history of African American women, beginning in West and Central Africa, extending across the Middle Passage into the Americas, and stretching through enslavement and freedom into the 21st century. The readings cover their experiences through secondary and tertiary source materials, as well as autobiographies and letters, plays and music, and poems, novels, and speeches. (Same as AAAS 317, AMS 317, and WGSS 317.) LEC.

HIST 318. Indian Territory. 3 Hours H.
This course examines the cultural, social, economic, environmental, and political history of Indian Territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of Indian Removal Act, assimilation, acculturation, westward expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act, and land runs on Indian Territory residents. The course also treats post-Civil War violence, outlaws, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HUM 345 and ISP 345.) LEC.

HIST 319. History, Women, and Diversity in the U.S.. 3 Hours AE41 / H.
This survey course explores the history of being female in America through a focus on the ways differences in race, sexuality, ethnicity, class, and life cycle have shaped various aspects of women's lives. Themes to be explored could include, but are not limited to: social and political activism; intellectual developments; family; women's communities; work; sexuality; and culture. (Same as WGSS 319.) LEC.

HIST 320. From Goddesses to Witches: Women in Premodern Europe. 3 Hours HT GE11/GE3H / H.
This course examines the social, cultural, and political contexts of women's spirituality and their relations to gender relations in Europe from about 30,000 B.C.E. to the 16th century Protestant Reformation. Lectures move both chronologically and topically, covering such subjects as goddess-worshipping cultures, women's roles in Christian and Jewish societies, symbols of women, and male attitudes toward women. Students will be able to participate in weekly discussions of primary and secondary source readings about women. (Same as WGSS 320.) LEC.

HIST 321. From Mystics to Feminists: Women's History in Europe 1600 to the Present. 3 Hours HT AE42/GE11/GE3H / H.
This survey of women's history in Europe looks at changing patterns of women's economic roles and family structures in preindustrial and industrial society, the importance of women in religious life, cultural assumptions underlying gender roles, and the relationship of women to political movements, including the rise of feminism. (Same as WGSS 321.) LEC.

HIST 322. LGBTQ U.S. History, 1600-1900. 3 Hours H.
This course will take students on the first part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The first part of this two course sequence begins in the colonial period and ends around 1900 as modern categories of sexuality and sexual orientation came into existence. We will examine the ways in which individuals who craved intimacy with members of the same sex understood and negotiated their desires in an often hostile world. And we will consider how Early America's remarkable diversity shaped this history of same-sex love and desire. (Same as WGSS 322.) LEC.

HIST 323. LGBTQ U.S. History, 1900-Present. 3 Hours H.
This course will take students on the second part of an exciting journey through an alternative version of U.S. history, exploring the experiences and treatment of men who love men, women who love women, and people with unconventional sexual and gender identities, telling this story as it unfolded in the British colonies established in North America, through the revolutionary period, and in the United States over the course of the nineteenth and twentieth centuries, and into the early twenty-first century. The second part of this two course sequence focuses on the twentieth and twenty-first centuries. We will examine the changing understanding of non-normative sex, love, and desire; the political tactics, framings, and fights around sexual identities and rights; and the intersection of structural inequalities including, but not limited to, race, class, ability, and gender with LGBTQ histories. Please note that WGSS 322 or HIST 323 is not a prerequisite for WGSS 323 or HIST 323, though students interested in LGBTQ history should consider taking both. (Same as WGSS 323.) LEC.

HIST 324. History of Women and the Body. 3 Hours H.
This course examines different notions about women and their bodies from a historical perspective. It discusses the arguments and circumstances that have shaped women's lives in relation to their bodies, and women's responses to those arguments and circumstances. This course covers a wide geographical and chronological spectrum, from Ancient societies to the present, from Latin America and the Middle East, to North America and Western Europe. (Same as WGSS 324.) LEC.

HIST 325. The Spanish Inquisition. 3 Hours AE42 / H.
A broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as JWSH 315 and SPAN 302.) LEC.

HIST 326. Native Americans Confront European Empires. 3 Hours NW AE42/GE11/GE3H / H/W.
Since 1492, Native American societies have struggled against European conquest and colonization. This course examines the history of Native American encounters with Europeans and their empires from 1492 through 1800 in North and South America. Native American cultures varied widely as did their interactions with Europeans of diverse nations. Using a comparative framework this course will examine the continuities and differences in indigenous reactions to European imperialism in the Americas. Themes of the course include: conquest, colonialism, religion, and resistance and accommodation. LEC.

HIST 327. The Premodern Middle East. 3 Hours NW AE42 / H.
A survey of the history of the Middle East from the origins of Islam in the seventh century to the rise and consolidation of the Ottoman Empire in the eighteenth century. Lectures and discussions focus on diversity within the Middle East at the height of the Islamic empires. Topics include the life of Muhammad and early Islamic communities, expansion of Islam into Asia, Africa and Europe, intellectual strength in the medieval period, and the everyday lives of women, Christians, Jews and other minority groups. LEC.

HIST 328. The Modern Middle East. 3 Hours AE42 / W.
A survey of the history of the Middle East from 1800 to the present. Lectures and discussions focus on diversity within the Middle East over two centuries of major political and cultural change. Topics include causes for the decline of the Ottoman Empire, debates over modernization, European imperialism and the formation of nation-states, twentieth
century cultural revolutions and women’s activism, the Arab-Israeli conflict, and the revival of Islamic social movements. LEC.

HIST 331. Age of Empires – The Atlantic 1400-1800. 3 Hours GE3H / H.
This course examines the history of empires in the Atlantic World. During this period African, European and Native American empires encountered each other vying for people and territory. These encounters vastly transformed the people and societies of this broad geographic region. Not only did these empires challenge each other, anti-imperial groups including pirates and African maroons actively undermined imperial systems. This course will examine themes of empire in the Atlantic including conquest, enslavement and slave trades, indigenous and African resistance, and independence. LEC.

HIST 332. Sex in History. 3 Hours HT / H.
This course offers a survey of the history of human sexuality in the Western world; the second half of the semester emphasizes the American experience. Topics for consideration may include: masturbation, pornography, sex work, homosexuality, bisexuality, “perversions” (paraphilias), sex and marriage, racialized sexualities, sexual violence, trans* identities and experiences, sexuality and national identities, and colonialized sexualities. The course demonstrates the various ways in which sex, specifically the social and political meanings attributed to physical acts, changes over time and shapes human experiences and interactions far beyond the bedroom. (Same as AMS 323, HUM 332 and WGSS 311.) LEC.

HIST 333. Eurometro: Visions of the European Metropolis, 1849-1939. 3 Hours H.
This course investigates the interrelated symbols of the European metropolis during the “Age of Great Cities”, from the filth of the sewers to the “filthiness” of prostitution. Students investigate gender and class in the metropolis by exploring a few stereotypes: the juvenile delinquent, the woman on the street, and the flaneur. The course format stresses discussion of common texts, including short readings of literature from the period and historical scholarship. Students also analyze contemporary photographs, art, architecture, and advertising. LEC.

HIST 334. The Great War: The History of World War I. 3 Hours H.
A historical survey of the causes, course, and consequences of the conflict, 1878-1919, stressing its socio-economic dimensions as well as its political ramifications and military aspects. Considerable use will be made of visual aids. No prerequisites. LEC.

HIST 335. History of Jewish Women. 3 Hours H.
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women’s lives in both Jewish and non-Jewish society. (Same as JWSH 335, WGSS 335.) LEC.

HIST 336. Ethics, Ideas, and Nature. 3 Hours AE51 / H.
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state of managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and right ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent in human-centered environmental ethics and nature-centered environmental ethics. (Same as EVRN 336.) LEC.

HIST 337. History, Ethics, Modernity. 3 Hours AE51 / H.
This course will examine the question “How has human dignity been preserved or violated in the modern age?” Cast in a global framework, some of the probable themes are the history of human rights; the moral universe of genocide; the (in)dignity of industrial work; the shifting status of the poor and the colonized and their treatment by the state and society; the impact of changing technology on ethics in war, peace and the environment; and the violation of dignity as a factor in collective resistance. LEC.

HIST 338. African American Urban Community and Class in the Midwest. 3 Hours H.
This course provides historical perspective on African Americans and the politics of economic class within black urban spaces from the end of Reconstruction to the post-World War II era. It focuses on the development of an upwardly mobile urban black middle class, and impoverished black urban “underclass,” since the 1960s. Students are encouraged to have taken one of three courses: AAAS 104, AAAS 106, or AAAS 306. (Same as AAAS 328.) LEC.

HIST 340. The History of the Second World War. 3 Hours H.
A survey of the origins, course, and consequences of the war, 1930-1945. Political, economic, military, and social aspects will be dealt with in the context of their global effects. Extensive use will be made of motion pictures and other media. LEC.

HIST 341. Hitler and Nazi Germany. 3 Hours AE51 / H/W.
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. (Same as JWSH 341.) LEC.

HIST 343. The Holocaust in History. 3 Hours AE51 / H.
The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. The course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as JWSH 343.) LEC.

HIST 344. Modern Jewish History. 3 Hours H.
This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of antisemitism and the Holocaust. (Same as JWSH 344.) LEC.

HIST 345. Hard Times: The Depression Years in America, 1929-1941. 3 Hours H.
An analysis of the experiences of the American people during the Great Depression. Attention will also be given to the global dimensions of the
crisis, socioeconomic dislocation, cultural and institutional change, and the impact of the Asian and European wars. LEC.

HIST 346. Law and Society in America. 3 Hours H.
Law and lawyers have powerfully shaped American values and institutions. This course explores law's impact on American society from the age of European colonization through present. Topics include liberty, public order, race and ethnicity, the family, property, speech, environment, and self-government. The course also examines the changing images of lawyers and the law over time. Course materials include not just statutes and court decisions, but literature, imagery, and popular culture materials. LEC.

HIST 347. Environmental History of North America. 3 Hours H.
A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialism, urbanization, and such technologies as the automobile, and the origins of conservation. (Same as EVRN 347.) LEC.

HIST 348. History of the Peoples of Kansas. 3 Hours H.
A survey of culture and society in Kansas from prehistory to the present. Topics include Native American life, Euro-American resettlement, Bleeding Kansas and the Civil War, agricultural settlement, urbanization and industrialization, depression and recovery, and modern Kansas in transition. Emphasis in the course will be on social and economic conditions, the experience of ethnic and racial groups, inter-racial relations, and the role of women. LEC.

HIST 349. Antisemitism: A Long History. 3 Hours H/W.
This course surveys the genesis, evolution and persistence of anti-Jewish hatred and prejudice from late antiquity through the twentieth century, exploring its connections to religious and secular ideologies and its changing nature over time, place, and culture. Using primary source documents, religious and secular art and literature, the mass media and popular culture, the course explores how antisemitism was articulated and implemented, how Jews and Judaism were perceived and represented, and how Jews and Judaism responded to antisemitism. (Same as JWSH 349.) LEC.

HIST 350. The Korean War, 1950-1953. 3 Hours H.
An examination of the origins, pattern of development, and legacy of this still unsettled conflict, which in many ways set the tone for the entire post-1945 era of the Cold War. Points of emphasis will include the motives and policies of the major participants (Koreans, Americans, Chinese, and Soviets), as well as the effects of the war on their domestic politics and foreign policy positions. LEC.

HIST 351. American Indian and White Relations to 1865. 3 Hours H.
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HUM 348, ISP 348.) LEC.

HIST 352. American Indians Since 1865. 3 Hours AE41 / H.
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HUM 350 and ISP 350.) LEC.

HIST 353. Indigenous Peoples of North America. 3 Hours NW AE41 / H/W.
This course surveys the history of the first peoples to inhabit North America from prehistory to present. Commonly and collectively referred to as American Indians, indigenous peoples include a diverse array of nations, chiefdoms, confederacies, tribes, and bands, each of which has its own unique cultures, economies, and experiences in dealing with colonial and neocolonial powers. This class seeks to demonstrate this diversity while at the same time providing an understanding of the common struggle for political and cultural sovereignty that all indigenous nations face. Indigenous nations that have developed a relationship with the United States will receive primary focus, but comparative reference will be made to First Nations of Canada. LEC.

HIST 355. U.S. Borderlands Since 1848. 3 Hours H.
This course discusses issues associated with the Mexican borderlands region after conquest and acquisition by the United States. Themes include race relations, immigration, labor, economics, politics, culture, and the environment. We discuss how the region was incorporated into the United States, and how this relationship is evolving. We also examine the notion of a borderlands region and whether or not this is a valid characterization for Kansas. LEC.

HIST 356. At the Movies: U.S. History on the Silver Screen. 3 Hours GE3H / H.
The motion picture was invented right here in the United States more than a century ago, and Americans have been going to the movies ever since. Movies have expressed their dreams and nightmares, aspirations and fears, hopes and dreads. Through a wide-ranging study of Hollywood films from the 1920s to the present, including the industry that created them and the people who watched them, this course explores what Americans have seen and felt at the movies. LEC.

HIST 357. History of the American West. 3 Hours H.
This course examines major themes in the history of the American West from Columbus to the present. The course includes topics familiar to the American West such as the California Gold Rush and the Battle of Little Bighorn. More importantly, it also offers a way of understanding North American history that is different from that of most U.S. history courses: through the lens of imperial settlement. The course focuses on: 1) cultural encounters between settlers and indigenous peoples as well as among Anglo settlers, the Spanish-speaking populations of the Mexican borderlands, and Asian immigrants to the Pacific Coast; 2) the impact of hunting, logging, ranching, and mining on the environment and the influence of the arid Western environment on human societies; and 3) the cultural symbolism of the American West in literature and film as an enduring national icon and ideology that has shaped settlement and regional history. LEC.

HIST 358. The Vietnam War. 3 Hours H.
This course is a survey of the Vietnam War. It covers the early days of Cold War, 1945-54, and all phases of the Vietnam War; the advisory phase (1955-64); the Americanization phase (1965 -68); the Vietnamization Phase (1969-73); and the final phase, the Vietnam Civil War, 1972-75. This course covers the causes, course, conduct, and consequences of the war and in so doing provides a political, military, and social history of the war. LEC.

HIST 359. The Black Experience in the U.S. Since Emancipation. 3 Hours H.
An interdisciplinary study of the history and culture of Black people in American from Reconstruction to the present. Topics covered include an analysis of Reconstruction, Black leaders, organizations and movements,
the Harlem Renaissance, migration, and race relations. Demographic variables covered include socio-economic class, education, political persuasion, and influence by avant-garde culture changes. (Same as AAAS 306.) LEC.

**HIST 361. Youth, Sex, and Romance in Post-WWII United States. 3 Hours AE41 / H.**

Most people don't think of sex and romance as having a history. And youth seems just a natural stage of life. But the nature of “courtship,” the definitions of sex, and the meaning of “youth” have changed dramatically over time, and people struggle over those definitions right up to the current day. In this class we try to make historical sense of those struggles by focusing on a volatile and complicated period in U.S. history: the years from World War II through the recent past. (Same as WGSS 361.) LEC.

**HIST 362. The American Way of War Since World War II. 3 Hours H.**

This course is a survey of American Military History from World War II to current military operations. It covers the Cold War, the Korean War, the Vietnam War, both Persian Gulf wars, the global war on terrorism, and the war in Afghanistan. The course examines the causes, course, conduct, and consequences of the wars and covers advances in technology and doctrine, civil-military relations, foreign policy, and inter-service rivalry, providing a political, military, and cultural history of the wars. LEC.

**HIST 363. Perspectives on Science, Engineering and Mathematics. 3 Hours H.**

Perspectives explores a selection of topics and episodes in the history of science engineering and mathematics relevant to future secondary STEM teachers and to all students who seek to understand how knowledge has emerged through torturous struggles, against obstinate resistance, and within cultural, religious, and social structures. Students are brought to understand that the STEM disciplines are not merely a body of facts, theories, and techniques but they involve diverse, evolving processes which are continually generated and reformulated. The course provides historical perspectives on how practical needs, social conflicts, and personalities have shaped the content and direction of the STEM disciplines. The specific objectives and expectations are part of five broad, interlocking goals: 1) to provide an overview of the history of science, engineering, and mathematics; 2) to enable an understanding of the nature and process of science, engineering, and mathematics 3) to enable students to put these historical and philosophical perspectives to work in both communication and instruction; 4) to promote intellectual curiosity and sharpen critical thinking skills; and 5) to improve presentation and writing skills. The course is a mixture of online activities, readings, videos and discussion. A once a week synchronous online meetings for discussion is required. (Same as HUM 363.) LEC.

**HIST 364. Angry White Male Studies. 3 Hours H.**

This course charts the rise of the “angry white male” in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HUM 365 and WGSS 365.) LEC.

**HIST 365. Invention of the Tropics. 3 Hours AE42 / H.**

This course surveys the history of the tropical environment and its diverse peoples from early European encounters until the current boom in extractivism and ecotourism. It focuses on portrayals of the tropics in historical travel accounts and films. Through these sources, we will seek to understand cross-cultural interactions, and the ways in which science, technology, and tourism have reconstructed these environments over time. Case studies are drawn from Latin America, Africa, Oceania, and/or Asia. (Same as EVRN 365.) LEC.

**HIST 367. Magic and Superstition in European History. 3 Hours AE42 / H.**

This course traces the changing role and understanding of magic in European culture, religion, politics and science from the late Middle Ages through the early 20th century. Topics may include alchemy, miracles, magical healing, witchcraft, monsters and demonic possession. LEC.

**HIST 368. A History of Afro-Latin America. 3 Hours GE3H / H.**

This course examines the history of Africans and their descendants in Latin America. In this region, Africans could be found serving as militia commanders, laboring as skilled tradesmen, running their own businesses, working as household servants, and toiling on plantations. Students will study the varied experiences of these men and women across colonial and national boundaries. Topics include: acculturation/Creolization, manumission, family formation, social networks, economic roles, political mobilization, and interaction with indigenous peoples. LEC.

**HIST 369. Colonialism and Revolution in the Third World, Honors. 3 Hours NW AE42 / H.**

This course will study the structure and dynamics of colonialism and neo-colonialism in the third world beginning in the 19th Century and continuing to the 1980s. It will also examine responses to these systems, from small-scale resistance to nationalist revolutions. Attention will be given to the relationship between ideology and collective behavior. Case studies will be drawn from Africa, Asia, and Latin America. Prerequisite: Membership in the University Honors Program or permission of instructor. LEC.

**HIST 370. Violence and Conflict in Latin American History. 3 Hours H.**

This course treats the history of Latin America since the European conquest through the prism of violence and social conflict. It traces the roots of the region’s social collapse during the twentieth century to political and cultural factors in the colonial and early national periods. Using films and literature in addition to historical texts, the course discusses the sources of nationalism, civil wars, banditry, urbanization, violent dissent, military dictatorships, human rights abuses and guerrilla insurgencies as well as the political uses of violence made by different social groups. LEC.

**HIST 371. Tequila, Tango, Carnival, City. 3 Hours H.**

This course explores the history of modern urban Latin America through the lens of popular culture. Elements of culture that will be examined include music, food, soccer, cinema, photography, and art of the 19th and 20th centuries. Some of the themes likely to be explored are collective identity, exile, travel, cultural resistance to state violence, public rituals, and the evolution of the city and its cultural spaces. LEC.

**HIST 372. Violence and Conflict in Latin American History, Honors. 3 Hours H/W.**

This course treats the history of Latin America since the European conquest through the prism of violence and social conflict. It traces the roots of the region’s social collapse during the 20th century to political and cultural factors in the colonial and early national periods. Using films and literature in addition to historical texts, the course discusses the sources of nationalism, civil wars, banditry, urbanization, violent dissent, military dictatorships, human rights abuses, and guerrilla insurgencies as well as the political uses of violence made by different social groups. Not open to students who have taken HIST 370. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.
HIST 373. The Supreme Court and Religious Issues in the United States. 3 Hours H.
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Not open to freshmen. (Same as REL 373.) LEC.

HIST 374. The History of Modern American Conservatism. 3 Hours GE3H / H.
In this course students will gain an in-depth knowledge of modern American conservatism, primarily through the lens of political history. We will focus on the development of the conservative political movement from the 1930s through contemporary times. We will ponder several interrelated questions: how did conservatives build a movement capable of exercising political power; what do conservatives mean when they discuss equality, liberty, and freedom; how have conservatives conceptualized the role of the United States in the world; what role have ideas played in the conservative movement; how have different factions of conservatives fought for control of their movement while struggling to maintain political unity; and how have conservatives governed? Finally, we will contextualize modern American conservatism in the broader, dynamic political culture of the United States. LEC.

HIST 376. Immigrants, Refugees, and Diasporas. 3 Hours AE51 / H.
This course looks at people who choose to cross political borders, are forced to flee beyond them, or constitute ethnic minorities living outside a homeland. Examining these groups from a global historical perspective, this course explores how ethical debates about the rights of non-citizens and ethnic outsiders have evolved in the modern age. Students learn about important issues that have affected the lives of immigrants, refugees, and diasporas, including citizenship, mobility, cultural representation, asylum policies, and the concept of human rights. The course concludes with a look at contemporary manifestations of these issues, from debates over the place of Muslims in Europe to discussions about immigration policy in the United States. (Same as GIST 376.) LEC.

HIST 377. Everyday Communism in Eastern Europe. 3 Hours H.
This course investigates through film, literature, memoirs, photography, architecture, and scholarship the experience of ordinary citizens under Soviet-style communism in Eastern Europe. We study the ways people supported, resisted, and were forced to navigate the contradictions of the socialist state. Students learn about authoritarian rule, mass culture, political violence, and the everyday lives of people under communism. (Same as REL 377.) LEC.

HIST 378. Beyond the Iron Curtain: Soviet Perspectives on the Cold War. 3 Hours AE42 / H.
This course reimagines the Cold War through Soviet eyes, challenging assumptions and offering less familiar perspectives on a global conflict. Analyzing Soviet and American mass media, popular culture, declassified documents, and personal stories, students investigate the following: Who started the Cold War, and who won it? Was it a time of relative peace or paranoia? How did the two sides view each other and did espionage help them know each other better? How did people and culture sometimes cross the iron curtain? What were the Soviets doing in places like Latin America and the Middle East? And why were both sides so concerned with Olympic athletes, ballet defectors, and cosmonauts? LEC.

HIST 379. Europe in Crisis: Empire, Extremism, and War, 1890-1945. 3 Hours AE42 / H.
This course examines the sense of crisis that defined European life in the first half of the twentieth century, an era defined by economic spasms, cultural revolts, extreme political ideologies, and two massively destructive world wars. We will examine the period between 1890 and 1945 as a violent, at times apocalyptic, clash between three competing ideologies - communism, fascism, and liberal democracy -demonstrating how extremism both fed upon and created a sense of crisis. LEC.

HIST 381. Enemies of Ancient Israel. 3 Hours H.
An exploration of the social world of the Bible through its protagonists and their cultures. We will examine the so-called "Bad Guys of the Bible" using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as JWSH 387 and REL 387.) LEC.

HIST 382. Jerusalem Through the Ages. 3 Hours H.
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, JWSH 382 and REL 382.) LEC.

HIST 387. Alexander the Great: Man and Myth. 3 Hours HT GE11/ GESH / H.
This course explores the life, times, and legacy of Alexander the Great (356-323 BCE). It covers the historical context of ancient Greece and Macedon from which Alexander emerged; his engagement with ancient Greek, Egyptian, and Persian cultures; his military campaigns; his aims in creating an empire; and the immediate aftermath of his conquests. In addition, the course considers the role of "great men" in history and historiographical problems in reconstructing the past. It also explores how the image of Alexander has been transmitted, interpreted, and reshaped from antiquity to the present. Topics may include: the use of the memory of Alexander by later Greeks and Romans; the medieval Alexander tradition; responses to Alexander in Middle Eastern and Indian thought and literature; the legacy of Alexander's conquests in the age of empires; his transformation in Hollywood; and his contested place in the modern political dispute between Greece and North Macedonia. (Same as CLSX 322.) LEC.

HIST 388. Julius Caesar: Man and Myth. 3 Hours HT GE11/GE9H / H.
This course explores the life, times, and legacy of Julius Caesar (c. 100-44 BCE). It covers Caesar’s early political career, his military campaigns, and his rise to power through civil war, with special attention paid to his aims, political reforms, and the institutions that enabled his rise to power. In addition, it considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Caesar has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the impact of Julius Caesar in Rome with the creation of an empire ruled by “Caesars”; Medieval responses to Caesar as tyrant, king, and emperor; Caesar as a paradigm of populist tyranny from the Renaissance to the present; the legacy of his literary output and the Romantic image of Caesar as a genius; his impact on the modern age of empires; and re-imaginings of Caesar in film, TV, and video games. (Same as CLSX 323.) LEC.

HIST 389. Topics in Western History: ______. 3 Hours H.
A study of a specialized theme or topic in Western History. Students will examine major issues and methods of historical study through the study of a specific historical period or topical area. This course grants HIST Category I credit. May be repeated for credit when topic varies. LEC.

HIST 390. Topics in Non-Western History: ______. 3 Hours H.
A study of a specialized theme or topic in non-Western History. Students will examine major issues and methods of historical study through the study of a specific historical period or topical area. This course grants
HIST Category II credit. May be repeated for credit when topic varies. LEC.

HIST 391. Topics in (Honors): _____. 3 Hours H.
A study of a specialized theme or topic in History. May be repeated for credit when topic varies. Open only to students admitted to the University Honors Program. Prerequisite: Permission of instructor. LEC.

HIST 392. Huns, Turks, and Mongols: The Nomad Factor in Asian History. 3 Hours NW / H/W.
This course introduces the history of major nomadic powers in Eurasian Steppe and their impact in the world from the first Millennium BCE to around 1500 AD. The main topics include the culture of the Scythians, the Hun and Xiongnu confederacy, the Mongol conquest, and the Turkish empires in Central and West Asia. It investigates the natural and human forces that shape the identities of the nomads and their changing images in history. LEC.

HIST 393. The Silk Road. 3 Hours H.
A comprehensive introduction to the cultural influence and material exchange among major civilizations along the Silk Road. It covers the period of more than one thousand years between the 2nd and the 15th centuries CE, during which time forces wielded by the Persians, the Chinese, the Indians, the Tibetans and the Mongols shaped the geopolitical landscape of the vast region that spreads from the Caspian Sea to the Gobi Desert. Students explore the role of the Silk Road in the formation of the religious and ethnic identities of these civilizations, as well as their perceptions towards one another. Along with textual materials, the course uses extensive visual and musical materials to present interesting phenomena, such as Sogdian burial practice, Arab accounts of Tang China, Nestorian Christianity at the Mongol court, and Marco Polo's journey to the East. The course begins and concludes with discussion of the contemporary significance of the Silk Road as a historical category. LEC.

HIST 394. Made in China: Chinese Business History. 3 Hours AE42 / H.
This course examines the development of business culture in China since 1900. Looking particularly at how it has transformed and adapted in response to China's own changing political environment as well as China's changing engagement with the West and Japan. We examine cases of western businesses in China and Chinese businesses in both China and the West. Topics include the rise of industrialism, the role of foreign investment, China's role in the global market place, the relationship between business and the state, state-run enterprises, factory life, entrepreneurialism, advertising, consumerism, and economic nationalism. LEC.

HIST 395. History of Sushi. 3 Hours AE42/GE11 / H.
Sushi, now served at Midwestern supermarkets and university cafeterias, reveals the transformation of an ancient Japanese dish into a global phenomenon. This course takes familiar Japanese dishes like sushi and ramen as starting points to ask how food accrues or sheds national characteristics in an age of globalization. To learn the origin of sushi and ramen, the class traces the evolution of the diet in the context of the development of Japanese civilization. Using the methodology of food history, course assignments include short research papers on Japanese foodstuffs; analyses of primary sources from statistics to comic books to movies; and short essays drawing from participant observation of Japanese foods now available locally. LEC.

HIST 397. From Mao to Now: China's Red Revolution. 3 Hours AE42/GE11 / W.
This course on China's Communist revolution considers the evolution of Maoism, or Chinese Communism, from its ideological origins through its implementation during and after the Chinese Communist revolution. It examines major Maoist movements such as Land Reform, the Great Leap Forward, the Cultural Revolution, and the cult of Mao. It further considers the globalization of Maoism by examining examples of other Maoist revolutions and revolutionaries in places like Cambodia, Peru, and Nepal. LEC.

HIST 398. Introduction to History of Japan: Anime to Zen. 3 Hours NW / H/W.
This course provides a foundation for study of Japanese history. It combines lectures on the scope of Japanese history over the past 2,000 years with discussions of topics key to the development of Japanese civilization such as religion and literature. We analyze how different media, such as film, Japanese animation (anime), and art can be used as historical sources, and how these shape our understanding of Japan. Students hone their ability to analyze both thematic and historical questions through writing assignments and discussions. LEC.

HIST 399. The Samurai. 3 Hours NW AE42/GE11 / H/W.
Japan's warrior class, the samurai, dominated politics and society for more than half of Japan's recorded history. This course traces the history of the samurai from their origins to the dissolution of their class in 1877, examining their military role, philosophy, and cultural contributions. It also considers continued references to the "spirit of the samurai" in the twentieth century. LEC.

HIST 400. Indigenous People of the Great Plains. 3 Hours H.
This course examines the emergence of horse-mounted indigenous societies in the Great Plains; the nature of the indigenous societies of the Great Plains in the nineteenth century; conflicts with the United States; the beginning of the reservation period; and indigenous people of the Great Plains in the modern era. Readings combine primary documents and novels with selections from anthropology, social history, and environmental history. (Same as ISP 400.) LEC.

HIST 401. Case Studies in: ____. 2-3 Hours H.
Examination of a limited aspect of a general subject; other aspects of the same subject may be offered other semesters. LEC.

HIST 402. Roman Military History. 3 Hours H.
The Defense of the Roman Frontiers. This course emphasizes the development of the frontiers of the Roman empire from Caesar to the late second century. It includes the origins of the Germans and their society, the Celtic background, and the relationship between the emperor and the army. LEC.

HIST 404. Technology and the Modern World. 3 Hours H.
An examination of the role of technology in the modern era, from a global perspective. This course takes a humanistic approach to technology, placing innovation, implementation, and use of technology within their temporal and geographical contexts, while complicating notions of technological determinism and Western technological superiority. Students will develop an understanding of the give-and-take between technology and politics, culture, social relations, and the environment, respectively. Credit for this course cannot be used toward graduation requirements in the School of Engineering without permission. LEC.

HIST 405. Women, Gender, and Sexuality in the North American West. 3 Hours H.
This course will provide students with an overview of how the history of women have profoundly shaped and given meaning to the development of the North American West (which includes present-day states and provinces in the U.S., Canada, and Mexico). The class will examine the lives of women who represent diverse backgrounds, lands, and time periods in this western region. In addition to women, lectures, readings, and discussion will focus on the themes of gender, masculinity, class, race, ethnicity, sexuality, labor, and environment. Broad in chronological
through the sixteenth centuries. Principal subjects are the distinctive

HIST 407. History of Science in the United States. 3 Hours H.
Traces the evolution of a scientific tradition in American culture. Examines the growth of scientific ideas and institutions under European and indigenous influences. Studies the interactions of science with technological, theological, political, and socio-economic developments. LEC.

HIST 408. History of the Great Plains. 3 Hours H.
This course is an overview of the history of the North American Great Plains up to 1900. Today's plains region comprises ten American states and three Canadian provinces, but it also connects dozens of Indigenous nations that (historically and presently) overlapped through seasonal migrations, trade, resources, and sacred lands. The Great Plains is a unique geographical area that is united by several environmental traits: flatness, aridity, unusual elevations, and an abundance of grasslands. It is also a region of North America characterized by significant cultural diversity, contested spaces, and national myths of empire and settlement. Lectures, readings, and discussion will cover these topics chronologically while emphasizing major themes of ethnicity, race, gender, class, environment, politics, and economic development. LEC.

HIST 410. The American Revolution. 3 Hours AE41 / H.
This course will focus on the meaning the American Revolution had for different groups of Americans. Particular emphasis will be on the relationship between ideology and experience, and the impact of the Revolution on such groups as women, slaves, Indians, African-Americans, the poor, merchants, and loyalists. LEC.

HIST 412. The Civil War in America, 1828-1877. 3 Hours H.
The United States from the rise of sectional conflict through the disintegration and reunification of the Union. LEC.

HIST 413. The Rise of Industrial America, 1877-1920. 3 Hours H.
The political, economic, social, and intellectual development of the United States from 1877 to 1920. LEC.

HIST 415. The Rise of Civilization. 3 Hours S.
A study of evolutionary processes leading to the birth of the early great urban civilizations of the Old World and the New World. Patterns of growth and similarities and differences in the rise of urban complexes and states in Mesopotamia, Egypt, the Indus Valley, and in Mexico/Guatemala and Peru. (Same as ANTH 415.) LEC.

HIST 420. Dante's Comedy. 3 Hours H.
The complete Divine Comedy will be read in English translation, with equal stress on each of its three parts: the Inferno, the Purgatory, and the Paradise. No prerequisite. (Same as HUM 410.) LEC.

HIST 421. Economic and Social History of Later Medieval Europe, 1000-1500. 3 Hours H.
An introductory study of European economic and social history from the Tenth Century Crisis to the 1490s. This course investigates the causes of economic development and the interactions among market, nonmarket, and social institutions such as the family. Topics covered include trade, labor, technologies, consumerism, social unrest and the rise of social and economic thought. LEC.

HIST 424. Venice and Florence in the Renaissance. 3 Hours H.
Comparative urban study of Florence and Venice from the thirteenth through the sixteenth centuries. Principal subjects are the distinctive economies of the city-states, political developments, Renaissance humanism, patronage of the arts, family life, and foreign policy. LEC.

HIST 425. History of the Mediterranean World, 1099-1571. 3 Hours H.
This course examines Mediterranean civilizations from the First Crusade to the Battle of Lepanto. Topics include the commercial revolution, medieval colonization, the Byzantine and Ottoman states, shipping and navigation, and the Atlantic. Equal coverage of the eastern and western Mediterranean. LEC.

HIST 441. Aviation in American Culture. 3 Hours AE41 / H.
This course examines the complex relationship between powered flight and American society from the invention of the airplane to the rise of drone warfare. Through a mixture of scholarly works, personal accounts, and primary sources, we will investigate how use of and access to the airplane became a focal point for the construction and deconstruction of race, gender, and class distinctions and an important site in the struggle for equality and social justice. Using the airplane as a lens, we will recognize and challenge key assumptions within American technoculture such as technological messianism, technological neutrality, and the role of government in technological development. (Same as HUM 373.) LEC.

HIST 444. Frozen in Time: Politics and Culture in the Cold War, 1945-75. 3 Hours H.
This course deals with the interactions between Cold War culture and domestic and international politics chiefly from the American and to some degree comparative perspective. It focuses on the period 1945-1975, and makes use of films, television, music, works of science fiction and related genres, and other cultural manifestations to examine such themes as programs of domestic and international repression, consensus politics, cultural imperialism, gender roles, and class, status, and racial dynamics in the context of what was perceived as bipolar rivalry. LEC.

HIST 450. Study Abroad Topics in: ______. 1-5 Hours H.
This course is designed for the study of special topics in History at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

HIST 460. Topics in: ______. 1.5 Hour H.
An eight-week course devoted to a specific historical topic. May be repeated for credit as topics change. LEC.

HIST 461. The Asia-Pacific War, 1937-1945. 3 Hours H.
This course introduces students to the Asia-Pacific War, which began with the outbreak of fighting between Japan and China in July 1937 and ended with the unconditional surrender of the Japanese Empire to Allied forces in August 1945. The course revolves around three themes, which are explored through lecture, discussion, and extensive use of film and visual materials: the geopolitical and colonial origins of the conflict; the concept of total war and the political and social transformations it unleashed on all belligerent nations; and the ideologies on the home front justifying the mass slaughter of soldiers and civilians. There is also discussion about how people in Japan, the United States, China, Korea, and other countries remember the war in the postwar period. LEC.

HIST 471. Social History of South America. 3 Hours H/W.
The various republics of South America have experienced radical social change since the late 19th century. Compressed industrialization has propelled the accelerated growth of global megacities, mass immigration from Europe and Asia, and the rise of populist and socialist politics that address the needs of the working class. This course follows a thematic approach by examining collective violence, endemic poverty, shifting gender relations, labor conflict, public health, revolutionary movements, and dictatorships. LEC.
HIST 475. Professional Skills in History. 3 Hours H.
This course will introduce students to the fundamentals of planning and organizing job search strategies. Students will identify their professional interests, research specific careers, and prepare applications to positions or internships based on the skills, experience, and knowledge acquired in their History courses. The final project assignment will consist of preparing a digital portfolio that will include a cover letter, c.v., or resume, lists of specific positions or internships they could apply for, and a video of a mock professional interview. LEC.

HIST 480. Travelers' Tales of the Middle East. 3 Hours H.
This reading-intensive seminar examines the multiple visions of "the Orient" that appeared in the letters, memoirs, and novels of Western travelers to the Middle East in the nineteenth and twentieth centuries. We examine the rise of tourism and travel-writing within the Middle East and their links to European imperialism. Working closely with primary source documents, we question what these highly personal and often misinformed types of writing can tell us about the politics and culture of everyday life in the Middle East. LEC.

HIST 481. From Harem to the Streets: Gender in the Middle East, 1900-Present. 3 Hours H.
This reading-intensive seminar examines shifts in gender roles and expectations in the Middle East during the twentieth and twenty-first centuries. The course begins with the importance of harem within Middle Eastern society, and traces Middle Eastern women's increasingly public presence in national movements, feminist activism, and peace protests as well as the impact of Western standards of marriage, child-rearing, beauty, and sexuality on gender roles. The course uses primary and secondary sources to analyze how gender identity is informed by religion and culture and grounded in specific historical moments. LEC.

HIST 482. Readings in History. 1-4 Hours AE61 / H.
Investigation of a subject selected by the student with the advice and direction of an instructor. Individual reports and conferences. Two (2) Readings in History courses may be applied to the major and no more than one (1) may be applied to the minor. Prerequisite: Ten hours of college history including at least two upper-class courses and a "B" average in history. Consent of instructor. IND.

HIST 492. Readings in History. 1-4 Hours AE61 / H.
Investigation of a subject selected by the student with the advice and direction of an instructor. Individual reports and conferences. Two (2) Readings in History courses may be applied to the major and no more than one (1) may be applied to the minor. Prerequisite: Ten hours of college history including at least two upper-class courses and a "B" average in history. Consent of instructor. IND.

HIST 493. History Research Internship. 1-3 Hours H.
The course allows students to work with a faculty mentor and learn firsthand the tasks that historians undertake to research and present their findings. Potential student assignments include database entry and retrieval, translation, fact checking, and compiling sources. Graded on a satisfactory/unsatisfactory basis. Prerequisite: At least one 300-level history course; declared major in history; and permission of the instructor. INT.

HIST 494. Service Learning in History. 1-3 Hours AE61 / H.
This course is designed to give students the opportunity to apply historical knowledge and ideas gained through course work to real-life situations in volunteer service agencies and community centers. Open to History majors and others with significant History backgrounds. Permission of instructor is required. LEC.

HIST 500. History of the Book. 3 Hours H.
Brief history of writing materials and handwritten books; history of printed books from the 15th century as part of cultural history; technical progress and aesthetic change. Offered every second year. (Same as ENGL 520.) LEC.

HIST 501. Topics in Western History: _____. 3 Hours H.
A study of a specialized theme or topic in western History. Students will examine major issues and methods of historical research through the study of a specific historical period or topical area. This course grants HIST Category I credit. May be repeated for credit when topic varies. Prerequisite: Successful completion of a history course numbered below 500, or permission of instructor. LEC.

HIST 502. Development of Ancient Greece, ca. 1000-300 B.C.. 3 Hours H/W.
Emphasis on the ancient sources and texts, developments in political institutions and society, the changing definitions of personal, cultural, and national identities, and the cultural tensions between Greece and the cultures to the west and east, especially Italy and Persia. No knowledge of the ancient languages is required. (Same as CLSX 502). LEC.

HIST 503. The Ancient History of the Near East. 3 Hours H.
History of the rise of civilizations in the ancient Near East from the earliest time to the Muslim conquest of the early seventh century, including the areas of Mesopotamia, Egypt, Syria, Palestine and Asia Minor. An archaeological approach is used in focusing attention on the cultural phenomena and achievements of the peoples of these areas, including the Babylonians, Assyrians, Persians, ancient Israelites, Greeks and Romans. LEC.

HIST 506. Roman Republic. 3 Hours H.
An investigation of the history of Rome from its origins to the end of the Republic in 31 B.C.E., emphasizing political, social and economic aspects of the development of Rome from a minor city to a world power. LEC.

HIST 507. Early Roman Empire. 3 Hours H.
A political, social, and economic investigation of the early Roman Empire from Augustus to Diocletian emphasizing how Rome held together a world-empire until economic and military problems forced a complete reorganization of the imperial system. (Same as CLSX 507.) Prerequisite: Successful completion of a Classics course (CLSX, GRK, or LAT), or a history course numbered below 500, or permission of instructor. LEC.

HIST 508. Late Roman Empire (284-527). 3 Hours H.
An investigation and analysis of the later Roman Empire from Diocletian to Justinian, emphasizing the Christianization of the empire, its division into Western and Eastern Byzantine Empires, and the barbarian invasions. LEC.

HIST 510. Topics in Non-Western History: _____. 3 Hours H.
A study of a specialized theme or topic in non-Western History. Students will examine major issues and methods of historical research through the study of a specific historical period or topical area. This course grants HIST Category II credit. May be repeated for credit when topic varies. Prerequisite: Successful completion of a history course numbered below 500, or permission of instructor. LEC.

HIST 511. Foodways: Native North America. 3 Hours H.
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate, and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HUM 551 and ISP 551.) Prerequisite: Upper division course on indigenous / American Indian history, or permission of the instructor. LEC.

HIST 512. Foodways: Latin America. 3 Hours H.
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food
security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HUM 552, ISP 552, and LAC 552.) Prerequisite: Upper division course on Latin America or permission of the instructor. LEC.

HIST 514. The Civil Rights Movement. 3 Hours H.
An examination of the Civil Rights Movement in American History. Emphasis is placed on the activities of major Civil Rights organizations, Civil Rights legislation and its impact on American life, and conflicts between integrationist and separatist forces in politics, economics, education, culture and race relations in the United States. (Same as AAAS 511.) LEC.

HIST 520. The Age of the Renaissance. 3 Hours H/W.
A survey of economic, political, social, and cultural developments in Italy in the 14th and 15th centuries, with special attention to those elements in the life of the age which look forward to the modern world. LEC.

HIST 521. The Age of the Reformation. 3 Hours H/W.
The Protestant revolt of the 16th century. LEC.

HIST 522. The Age of Religious Wars, 1540-1648. 3 Hours H/W.
The Catholic or Counter-Reformation and the wars of religion, including the Thirty Years War. LEC.

HIST 524. The French Revolution. 3 Hours H/W.
A study of the origins, development, and impact of the French Revolution, beginning with a description of France in the 18th century and ending with a look at France under Napoleon. LEC.

HIST 525. France and Its Empire: From Acadia to Zidane. 3 Hours AE42 / H/W.
A study of modern France through the lens of its overseas empire and the relations between French colonies and the metropolitan "Hexagon." This course studies the establishment of New France in the early modern period, the relationship between the French Revolution and colonies like Haiti, the French obsession with North Africa in the nineteenth century, the "Second Empire" at home and abroad, the French role in the Scramble for Africa and the global age of imperialism, the participation of colonial troops in the world wars, the post-World War II age of colonial wars and decolonization, and the contemporary role of imperial memory and immigrants to France from its former colonies. Prerequisite: Requires a prior history course or permission of the instructor. LEC.

HIST 527. Recent European History, 1870 to the Present. 3 Hours H/W.
A study of the issues and themes that have shaped the contemporary European world, exploring European politics, economy, and society from the zenith of Europe's power and influence at the turn of the century through two world wars and into the contemporary era. This survey begins with the period of consolidation of a system of major national states in western Europe and ends with the search for alternatives to that system in the break-up of empires and movements for European unity in the post-World War II era. The course also considers the emergence of the states of central and eastern Europe and examines the impact of the Russian Revolution and the Soviet state on European affairs. Not open to those who have credit in either HIST 435 or HIST 436. LEC.

HIST 528. Economic History of Europe. 3 Hours S/W.
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as ECON 535.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

HIST 529. Intellectual History of 19th Century Europe. 3 Hours H/W.
A survey of significant currents of thought during this period. Attention to the problem of the relationship between ideas and the historical situation. LEC.

HIST 530. History of American Women--Colonial Times to 1870. 3 Hours AE41 / H.
A survey of women's history in the United States that will consider women's roles as housewives, mothers, consumers, workers, and citizens in preindustrial, commercial, and early industrial America. (Same as AMS 510 and WGSS 510.) LEC.

HIST 531. History of American Women--1870 to Present. 3 Hours AE41 / H.
A survey of women's history in the United States that will include radical and reform movements, the impact of war and depression, professionalization, immigration, women's work, and the biographies of leading figures in women's history. (Same as AMS 511 and WGSS 511.) LEC.

HIST 541. British History, Tudors and Stuarts. 3 Hours H.
An introduction to the impact on the British Isles of the Reformation and Renaissance; the development of the Tudor state; Parliament; the Stuart monarchy; the Anglican counter-reformation; civil war; the Cromwellian experiment. Prerequisite: A prior history course, or permission of the instructor. LEC.

HIST 544. British Political Thought. 3 Hours H.
A survey of British's recovery from civil war; state formation and national identity; ideological conflict; the Revolution of 1688; religion and secularization; social stability and commercial expansion; reform; threats to the state, and the American revolution; Britain's survival of the French Revolution; the breakdown of the ancient regime in 1828-32. Prerequisite: A prior history course, or permission of the instructor. LEC.

HIST 552. History of American Women--Colonial Times to 1870. 3 Hours H/W.
A survey of women's history in the United States that will consider women's roles as housewives, mothers, consumers, workers, and citizens in preindustrial, commercial, and early industrial America. (Same as AMS 510 and WGSS 510.) LEC.
HIST 557. Nationalism and Communism in East Central Europe from 1772 to the Present. 3 Hours H/W.
The peoples of East Central Europe under Hapsburg, Romanov, and German rule; the dissolution of the empires, independence and the role of the new states in the European balance of power; World War II, Soviet domination, and the recent role of East Central Europe in the Communist World. LEC.

HIST 561. Liberation in Southern Africa. 3 Hours AE42 / W.
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and POLS 561.) LEC.

HIST 563. U.S. Environmental Thought in the 20th Century. 3 Hours H.
Explores both leading and dissenting ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as EVRN 563.) Prerequisite: EVRN 148 or HIST 129, or permission of instructor. LEC.

HIST 564. Medieval Russia. 3 Hours H.
Political, economic, social, cultural, and religious developments of Russia from the beginnings of the Russian state in the 9th Century through the 17th Century. LEC.

HIST 565. Imperial Russia. 3 Hours H/W.
The history of Imperial Russia from Peter the Great's reinvention of the empire in the eighteenth century to its demise in the revolutions of 1917. Placing Russia in a global context, the course examines change and continuity in politics, society, economy, and culture and looks at Russia as a diverse empire between Europe and Asia. Readings include historical scholarship and some of the classics of Russian literature. LEC.

HIST 568. Rise and Fall of the Soviet Union. 3 Hours AE42 / H/W.
An exploration of the Soviet Union's creation, evolution, collapse, and legacy in contemporary Russia and Eurasia. Drawing on historical scholarship, literature, music, and film, the course examines the major trends and developments in Soviet politics, ideology, society, economy, and culture. Special attention is paid to how the multiethnic Soviet state's rise and fall reflected broader changes in the world during the "Soviet century. LEC.

HIST 570. The Middle East After World War II. 3 Hours NW AE42 / H/W.
An intensive study of developments and changes in the Middle East since World War II. Topics and themes will vary, but may include the long-lasting effects of European imperialism, Big Oil and the energy crisis, the Arab-Israeli conflict and peace process, American intervention in the Middle East, minority communities, and the revival of Islamic and popular protest movements. LEC.

HIST 571. Pre-Hispanic Mexico and Central America. 3 Hours NW / S/W.
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotecs, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as ANTH 506 and LAC 556.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor. LEC.

HIST 572. Ancient American Civilizations: The Central Andes. 3 Hours W.
An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of "vertical" environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huari, Tiahuanaco, Chimú, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnographic documents. (Same as ANTH 508 and LAC 558.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, History, or Indigenous Studies, or permission of instructor. LEC.

HIST 574. Slavery in the New World. 3 Hours H/W.
Slavery, slave culture, and the slave trade in the U.S., Latin America, and the Caribbean will be examined comparatively. Attention will also be given to African cultures, the effects of the slave trade on Africa, and the effects of African cultures on institutions in the New World. (Same as AAAS 574.) LEC.

HIST 575. The Many Faces of Mexico. 3 Hours H/W.
From Aztecs, Incas, and Mayas, to Spaniards, Mestizos, and Indios to Zapatistas, Narcos, and Luchadores, Mexico has been a place of vast social and cultural diversity. This class examines the history of Mexico and its many facets from the pre-Columbian period through the present. Students examine such topics as conquest and colonialism, independence and revolution, race, politics, and religion. Prerequisite: An earlier course in history or permission of the instructor. LEC.

HIST 576. History of the Caribbean and Central America. 3 Hours H/W.
A comparative examination of Central America and the Caribbean. Emphasis is on understanding the complex social, cultural, and political development of this broad region from the pre-Columbian period until the modern era. Topics include: conquest, colonization, racial and ethnic diversity, economic development, political conflict, and globalization. Prerequisite: HIST 120, HIST 121, or HIST 370. LEC.

HIST 577. The Andean World. 3 Hours H.
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, ISP 577 and LAC 577.) Prerequisite: Prior 300+ level course in related
discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor. LEC.

HIST 579. The History of Brazil. 3 Hours H/W.
The history of Brazil from European discovery to the present with emphasis on social and economic change. Topics discussed will include the Indian, African, and European backgrounds, slave society, the frontier in Brazilian development, cycles of economic growth and regionalism, the role of foreign capital, industrial development, labor, urban problems, the military in government, and human rights. LEC.

HIST 580. Economic History of Latin America. 3 Hours H/W.
A study of the changing economic conditions in Latin America from Colonial times through the Twentieth Century and the effect of these conditions on Latin American society. Emphasis will be on the major theoretical issues of development economics, patterns of growth, and suggested strategies for economic development. Analysis will center on changes in agriculture, industry, labor, finance, transportation and technology, urbanization, immigration, role of women, export and commerce, and foreign involvement. LEC.

HIST 581. The Japanese Empire. 3 Hours GES3 / H.
Although the history of modern Japan was for a long time conventionally understood within the parameters of the nation-state, in fact modern Japanese identity coalesced around empire. This reading-intensive course explores the Japanese empire from its origins in the late nineteenth century to its collapse at the end of World War II in 1945, as well as the empires post-1945 legacies in Asia. Particular attention is paid to different forms of Japanese colonial domination practiced in Hokkaido, Okinawa, Taiwan, Korea, the South Seas Islands, Manchuria, occupied China, and Southeast Asia. We also study the ways in which the empire and colonial subjects, in turn, transformed Japanese state and society. Furthermore, we examine transnational themes the Japanese empire shared with other modern empires in areas such as colonial violence, gender, migration, settlements, war mobilization, and historical memories of the colonial experience. Prerequisite: Successful completion of an East Asian history or culture course numbered below 500; or a history course numbered below 500; or permission of the instructor. LEC.

HIST 583. Imperial China. 3 Hours NW / H/W.
An intensive survey of China's traditional civilization and its history, with emphasis on the last centuries of imperial rule under the Sung, Yuan, Ming, and Ch'ing dynasties (to 1850). (Same as EALC 583.) LEC.

HIST 584. Modern China. 3 Hours NW AE42 / H/W.
An intensive survey of China's history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as EALC 584.) LEC.

HIST 585. Beer, Sake, Tea-Beverages in Japan History. 3 Hours AE42/GE3H / H.
Sake and tea are synonymous with Japan today, but the history of beverages from water to whiskey illuminates key developments in Japanese civilization. This course makes a thematic survey of Japanese beverages introducing the place of drinks in global history before examining their distinct context in Japan. Topics include the ritual consumption of beverages as in the tea ceremony; the place of alcohol in Japanese culture; locales for consuming beverages such as bars, teahouses and coffee shops; and the Westernization of taste preferences as characterized by the introduction of beer and wine. By taking this course, students gain insight into ways that beverages contribute to Japanese culture and help shape personal and national identity. Prerequisite: Successful completion of an East Asian history or culture course number below 500 or permission of the instructor. LEC.

HIST 587. Age of Shoguns: Early Modern Japan. 3 Hours NW AE42 / H/W.
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as EALC 587.) Prerequisite: An earlier course in history or East Asian languages and cultures, or permission of the instructor. LEC.

HIST 588. Japan, 1853-1945. 3 Hours NW / H/W.
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as EALC 588.) LEC.

HIST 589. Japan Since 1945. 3 Hours NW / H/W.
This course provides an overview of Japanese history from the end of World War II to the present day. Among the topics covered will be the Allied Occupation, postwar politics and social change, the economic "miracle," popular culture, women and the family, crime and punishment, the educational system, and Japan's place in the world. (Same as EALC 589.) LEC.

HIST 590. Cultural History of Korea. 3 Hours H.
This course examines the cultural history of Korea in periods prior to the 19th Century. Special attention is given to varying constructions of cultural value, heritage, and identity, together with the historically specific factors that engendered them. (Same as EALC 563.) LEC.

HIST 591. Food in History: West and East. 3 Hours H/W.
A survey of scholarship on food in the West and in East Asia, choosing works primarily by historians, but also by sociologists, geographers, and anthropologists. We consider how scholars have approached issues concerning food productions and consumption, what habits of eating reveal about daily life, and how and when food is embedded with historiography related to these topics, keeping in mind the famous maxim of the noted French gastronome Brillat-Savarin (d. 1826): "Tell me what you eat: I will tell you what you are." LEC.

HIST 593. Modern Korea. 3 Hours NW / H/W.
This course will examine selected topics in Modern Korean history in the 19th and 20th centuries, with special emphasis on Korea's connections to China and Japan. Prerequisite: A college-level course in East Asian history or culture, or consent of instructor. LEC.

HIST 596. Defining Japan: Marginalized Groups and the Construction of National Identity. 3 Hours NW / H/W.
This course investigates the construction of national identity in modern Japan by examining the historical experiences of groups marginalized by mainstream society. We will explore the pressures of conformity, the pervasiveness of social ostracism and the surprising diversity in Japanese society. Among the groups discussed will be indigenous peoples (the Ainu, Okinawans), the Korean minority, the outcast class (burakumin), the sick and disabled, the Yakuza, and political activists. LEC.

HIST 598. Sexuality and Gender in African History. 3 Hours AE42 / W.
An examination of the history of sexuality and gender in Africa with a focus on the 19th and 20th centuries. Major issues and methods in the historical scholarship on gender and sexuality will be covered. Topics of historical analysis include life histories, rites of passage, courtship, marriage, reproduction, education, masculinities, homosexuality, colonial control, and changing gender relations. Prior course work in African history is suggested. Graduate students will complete an additional project
in consultation with the instructor. (Same as AAAS 598 and WGSS 598.) LEC.

**HIST 601. Oral History. 3 Hours H.**

This course explores the emergence of oral history as a methodology and focuses on the guidelines and ways to effectively use oral history in historical, journalistic, and social science research. The skills of collecting and sorting information gathered through eyewitness accounts, oral traditions, genealogies, investigative reporting procedures, and questionnaires are developed. The nature of the interview in relation to personal and public documents, ordinary conversation, and other related data sources will be considered in this course. LEC.

**HIST 603. History of Tibet. 3 Hours NW AE42 / H.**

This course surveys the cultural and political history of Tibet from the eighth to the twentieth century. Through readings, lectures, and discussions, students gain familiarity with the dominant features of Tibetan civilization. Topics include the relationship between Tibet and the civilizations of India and China, Tibetan Buddhism, and the tensions between the struggle for Tibetan independence versus claims of Chinese sovereignty. The course also considers the Tibetan diaspora and the reception of knowledge about Tibetan civilization in the West. LEC.

**HIST 604. Contemporary Greater China. 3 Hours AE42 / W.**

This course considers contemporary China, Taiwan, and Hong Kong in comparative perspective. It begins in the early twentieth century so as to set up a comparison between Nationalist, Communist and Colonial China. It focuses on the evolution from the 1940s to the present studying the political, economic and social systems of the three regions that constitute what we now call 'Greater China' and considers, in particular, important points of difference and similarity between them. LEC.

**HIST 605. Medieval Japan. 3 Hours NW AE42 / H.**

Course examines the history of Japan from the end of the ancient period (c. 1200 AD) through the medieval era (approximately 1573). Issues covered include the formation and destruction of the Kamakura and Muromachi warrior governments, medieval religious life and culture. Writing assignments provide students with opportunities to gain familiarity with historical methods for analysis and to strengthen their written expression. Not open to students who have taken HIST/EALC 586. LEC.

**HIST 610. American Colonial History. 3 Hours H.**

Examines colonial American history from the age of Columbus to the mid-1760s. The course seeks to place colonial American history into the larger historical context, particularly the expansion of the British Empire in the early modern period. Emphasis in the course will be on migration, social and economic conditions, and inter-racial relations. LEC.

**HIST 611. Early American Indian History. 3 Hours H.**

This course will focus on the history of American Indians, especially those of the eastern woodlands, from precontact times to the 1830's. Particular emphasis will be on the response of Indians to demographic catastrophe, the development of trade between Indians and colonists, and Indian responses to European colonization in British America and New France. The role of Indians in the American Revolution and the changes caused by Removal will also be treated. LEC.

**HIST 612. History of Federal Indian Law and Policy. 3 Hours H.**

This course offers a comprehensive examination of federal legislation and court decisions in the United States that have affected American Indians. The history of law and policy will be traced from the colonial period, but the major emphasis will be on the struggle of American Indians to preserve sovereignty in the 19th and 20th centuries. LEC.

**HIST 613. Slavery and Freedom in the Age of Jackson. 3 Hours H.**

This course focuses on the growing importance of the issues of slavery and freedom in the United States between 1815-1848. Recently, scholars have demonstrated that the period was one of disorienting, dramatic, and unprecedented change as politics, economics, racial and gender roles, and key institutions were permanently transformed. The course will examine these changes and how they, in turn, remade the values and identities of all Americans. LEC.

**HIST 615. Rise of Modern America: Politics, Culture, and Society, 1900-1950. 3 Hours H.**

The history of the United States in the First Half of the Twentieth Century. LEC.

**HIST 616. Contemporary America, 1941-Present. 3 Hours H.**

A history of the United States from its entry into World War II to the present. A study of such selected topics as women's history and feminism, race relations and the Afro-American civil rights movement, power, poverty, the military-industrial complex, McCarthyism, and presidential administrations. LEC.

**HIST 617. America in the 1960's. 3 Hours H.**

The people of the United States experienced significant social political, and cultural change during the 1960's. This course studies the history of these changes, focusing on the American people, the institutions that shaped their lives, and the social and political movements, for and against change, that surfaced during this decade. Specific topics include: the struggle for racial equality, the Kennedy, Johnson, and Nixon administrations; the Vietnam War, the antiwar movement, New Left, and counterculture; feminism's rebirth; the white backlash; and the resurgence of political and cultural conservatism. Course requirements include readings, discussion, and original historical research and writing. LEC.

**HIST 618. History of the American West to 1900. 3 Hours H.**

A survey of Western history with emphasis on such topics as Native Americans and Indian-white relations, environment and resource use, exploration and discovery, expansionism and Manifest Destiny, economic development, urban, rural, and alternative communities, ethnic and racial experience, women and violence. Consideration will also be given to topics such as fur trade, mining, the cattle business, and agriculture. LEC.

**HIST 619. History of the American Indian. 3 Hours NW / H/W.**

A study of Indians in the United States from colonial times to the present. Consideration will be given to the political, social, and cultural history of selected Indian tribes and to Indian-white relations with particular attention to the Indian point of view. Other topics will include a comparative study of Indian policy of nations colonizing in America, cultural intermingling and cultural conflict, and current Indian problems. Slides, films, and guest speakers (including American Indians) will be used in the course. LEC.

**HIST 621. The American West in the 20th Century. 3 Hours.**

A study of the post-frontier era and the struggle to create a regional identity, drawn from legends of the heroic past, varieties of racial and ethnic experience, political culture, and the possibilities of the land. LEC.

**HIST 625. The Body, Self and Society. 3 Hours H.**

An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and sensés as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HUM 575, WGSS 575.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor. LEC.

**HIST 628. American Economic Development. 3 Hours H.**

An introductory study of the development of the American economy from colonial times to the present. Investigates long-term trends in output, population, and output per capita, as well as short-term fluctuations,
and the variables and institutions that determined these fluctuations and trends. (Same as ECON 530.) Prerequisite: ECON 104 or ECON 105 or [ECON 142 or ECON 143] and (ECON 144 or ECON 145). LEC.

HIST 630. The United States and the World, 1890-2003. 3 Hours H. An examination of the history of United States foreign relations over the course of the twentieth century. Treats America's emergence as a world power before World War I, imperialism and interventionism, involvement in World War I and World War II, internationalism, the Cold War and America's anti-communist crusade, third world nationalism, responses to a global economy, and the obligations of a military superpower in a chaotic world. LEC.

HIST 631. The Contemporary Afro-American Experience. 3 Hours H. A history of Afro-America from the end of the Civil War to the present. Consideration will be given to such topics as America's capitulation to racism, blacks in agriculture, blacks and the labor movement, Booker T. Washington and W.E.B. DuBois, civil rights protest, migration and urbanization, Marcus Garvey and black nationalism, the Harlem Renaissance, blacks during the New Deal, blacks in recent politics, the modern civil rights movement, ghetto uprisings, and the changing relationships among race, caste, and class. LEC.

HIST 636. Agriculture in World History. 3 Hours H. A survey of the development of agriculture from prehistory through the present. The major themes of the course will be how various methods of farming have spread around the world, how new techniques have transformed agriculture, and how peasants and farmers have interacted with cities and governments. LEC.

HIST 649. History of Feminist Theory. 3 Hours H. This discussion course will cover the development of feminist theories from the late Middle Ages to the 1970s. Reading will include Pisan, Wollstonecraft, Mill, Freud, Woolf, Beauvoir, Friedan, Daly, Kristeva, and others. (Same as WGSS 549.) Prerequisite: Any previous course in WGSS or HIST or permission of instructor. LEC.

HIST 660. Biography of a City: ____. 3 Hours AE42 / H. These interdisciplinary, team-taught courses survey the artistic, intellectual, and historical development of the great cities of the world. London, Paris, and Rome have been offered in recent semesters, and other cities will be studied in the future. LEC.

HIST 661. Palestine and Antiquity. 3 Hours H. A survey of the history of Palestine from biblical origins to the Muslim conquest, with emphasis on such topics as social and religious institutions, cultural and communal diversity, and relations between foreign powers and local authorities. The course further explores the roots of the present conflictual situation in this part of the Middle East. LEC.

HIST 690. Honors Course in History. 3 Hours AE61 / H. This course is the first part of a two-part course that provides a group setting for writing the Senior Honors Thesis, which is a substantial work of historical research based above all on the analysis of primary sources. During this first semester students must produce a serious working draft of the thesis. Assignments and discussions will help students to prepare this draft, which will establish a solid foundation for the Honors Thesis. In addition, this course will provide a close experience of advanced, professional, historical work. Presentations, weekly comments on the work of others, and active participation in seminar discussions with constructive observations and questions will complete that professional experience. A History faculty advisor will provide essential guidance throughout the process of writing the thesis. Prerequisite: HIST 301 and permission of instructor. SEM.

HIST 691. Undergraduate History Honors Seminar. 3 Hours AE61 / H. Required for students in the History major honors program, normally in the second semester of their History honors projects. Another seminar experience may be substituted, with the approval of the Honors Coordinator. Prerequisite: Approval of the Honors Coordinator of the Department of History. SEM.

HIST 692. Independent Capstone. 3 Hours H. This independent study is designated for students who did not, or are unable to, complete one of the department's other capstone offerings (HIST 696 or HIST 691). The course will introduce students to the theory and practice of historical inquiry and require a substantial research project. May not be repeated for credit. Prerequisite: Completion of 75 credit hours of undergraduate study, including HIST 301, and consent of the instructor. IND.

HIST 696. Seminar in: ____. 3 Hours AE61 / H. A seminar designed to introduce students to the theory and practice of historical inquiry. A research paper will be required. May not be repeated for credit. Prerequisite: Completion of 75 credit hours of undergraduate study and completion of HIST 301, and recommended completion of one 500 level history course, or consent of the instructor. LEC.

HIST 705. Globalization in History. 3 Hours. A study of the increasing interaction among world societies since 1500 and an investigation of the long-term developments behind current world problems. Major topics include western expansion since 1500, the spread of state sovereignty, the formation of a world economy, and spread of international institutions. The current world problems investigated will vary, but may include issues such as environmental crises, human rights, migration, free trade and the spread of consumer culture, ethnicity and nationalism, and international intervention within states. (Same as GIST 705.) SEM.

HIST 720. The Nature of Museums. 3 Hours. The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, BIOL 788, GEOL 782, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

HIST 721. Introduction to Museum Public Education. 3 Hours. Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, GEOL 784, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

HIST 722. Conservation Principles and Practices. 3 Hours. This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, GEOL 780, and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

HIST 723. Introduction to Museum Exhibits. 3 Hours. This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing
museum exhibits. Laboratory exercises will provide first-hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, BIOL 787, GEOL 781, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

HIST 725. Introduction to Collections Management and Utilization. 3 Hours.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as AMS 731, BIOL 785, GEOL 783, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

HIST 727. Practical Archival Principles. 3 Hours.
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as MUSE 707.) LEC.

HIST 728. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, GEOL 783, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

HIST 740. Topics in History for Educators: ______. 1-3 Hours.
Reading and discussion of selected historical topics, designed specifically for K-12 educators. Pedagogical methods and resources for the study of history will be addressed. Prerequisite: Approval of the instructor. LEC.

HIST 747. East Asian History and Culture for Teachers. 2 Hours.
An advanced survey of the history, culture, and contemporary affairs of China, Japan, and Korea, specifically designed for K-12 educators who wish to incorporate East Asian topics into their classroom teaching. Pedagogical methods and resources for the study of East Asia will be emphasized. Topics covered will address relevant benchmarks in the state curricular standards in social studies, themes from the Advanced Placement world history examination, and the national standards in world history. Prerequisite: Approval of the instructor. LEC.

HIST 748. East Asian Historical Materials: ______. 3 Hours.
The aim of the course is to provide students with the linguistic tools needed for archival research in East Asian history by assisting them in gaining experience reading primary and secondary language materials in Japanese and/or Chinese including texts in classical forms of these languages. After studying the rules of classical grammar and the particulars of historical materials as needed, students will read primary documents in conjunction with secondary readings in Japanese and/or Chinese. Fundamental aspects of paleography may also be introduced in this course depending on student need. Prerequisite: Capability of reading Japanese or Chinese and permission of the instructor. LEC.

HIST 800. Readings in: ______. 1-8 Hours.
Prerequisite: Consent of instructor. RSH.

HIST 801. Colloquium in: ______. 1-6 Hours.
Reading and discussion of selected topics. SEM.

HIST 802. Seminar in: ______. 3 Hours.
Research Seminar on selected topics. SEM.

HIST 805. The Nature of History. 3 Hours.
The introductory course to graduate study, this colloquium introduces students to the practice and epistemology of history, familiarizing them with various methodological schools, theoretical touchstones, and historiographical subfields. Required of all incoming M.A. and Ph.D. students. SEM.

HIST 806. Studies in: ______. 3 Hours.
The core course for each thematic major field in the graduate program in History. The course, offered in a colloquium style format, will serve as an introduction to the principal standard literature in the field, and will consider the full range of methodologies or approaches appropriate to the field. SEM.

HIST 807. Professional Development Colloquium in Pedagogy. 3 Hours.
This course will help train future professional historians to teach. It will focus on a variety of pedagogical topics for future college history faculty, including: developing students' critical and analytical thinking; teaching research skills; promoting student involvement/participation; determining course goals; use of multimedia technology. In addition to attending class meetings of History 807, students will attend as observers throughout the semester one 500/600-level course in an area relevant to their future teaching and complete the readings assigned to the class. They will produce a course portfolio for an undergraduate course, including: a syllabus designed by the student; a set of assignments that will be part of that course, such as examinations and papers; sample lesson plans; an annotated bibliography of materials relevant to the subject-matter of the course. SEM.

HIST 808. Colloquium in Comparative History: ______. 3 Hours.
A readings-oriented course which explores themes in two or more geographic and/or chronological fields of history. The benefits and disadvantages of comparative methodologies will be analyzed. Topics will vary each term but may include the examination of such subjects as the history of urbanization, labor, colonialism, immigration, the family, political thought, or industrialization. Prerequisite: Varies with area of subtopic. SEM.

HIST 810. Colloquium in Nationalism Studies. 3 Hours.
Exploration of the major contemporary scholarly theories of nationalism and other forms of group identification, supplemented with case studies. SEM.

HIST 811. Colloquium in Comparative Empires. 3 Hours.
This colloquium explores the evolution of empires across space and time by surveying the rather contentious scholarly literature on the subject, offering a methodological introduction to comparative and transnational history in the process. SEM.

HIST 823. Colloquium on Colonial Latin America. 3 Hours.
Explores the historiography and major themes and problems of the history of colonial Latin America. Ordinarily this will involve reading and discussion of historiographical articles, major works in the field and works involving new approaches and perspectives. SEM.

HIST 827. Colloquium in the Social History of Latin America. 3 Hours.
Explores the historiography, methods, and themes of Latin American social history from the conquest to the present. Sessions will focus on specific groups including the history of indigenous groups, peasants, slaves, women, families, workers, and the poor. A long historiographical paper will be required. SEM.
HIST 834. Colloquium in the History of the British Empire. 3 Hours.
The course will deal selectively with themes in the political and cultural interaction of the peoples of the British Isles with peoples overseas, the expansion and contraction of empire, and the rationales for these processes. SEM.

HIST 845. Eastern Europe, 19th and 20th Centuries. 3 Hours.
The course considers the challenges of modernity in Eastern Europe, with a focus on the lands of the former Habsburg Empire. The course is designed to introduce students to major issues in modern Eastern European history and historiography, with an emphasis on recent scholarship. SEM.

HIST 847. Colloquium in Russian History. 3 Hours.
A group readings course that begins with Russia in the medieval period and continues through the end of the twentieth century. Topics may vary each term, but may include such subjects as political, social, religious, gender, or intellectual history. The course will focus around significant interpretive issues and the historiography that address them. SEM.

HIST 848. Colloquium in 20th Century Russia. 3 Hours.
The focus will be on reading and discussion of historical literature on the end of Imperial Russia, the Russian revolutions, and the Soviet Union and its aftermath. SEM.

HIST 853. Colloquium in the Early Modern Atlantic World. 3 Hours.
This colloquium will focus on interactions between the so-called Old and New Worlds in the three centuries following Columbus’ voyages. The course will pay particular attention to the changes in the lives of Europeans, Africans, and the peoples of the Americas as a result of the emergence of transatlantic economies, empires, and cultural systems. SEM.

HIST 856. Colloquium in Modern European History I - Renaissance to the French Revolution. 3 Hours.
This course will concentrate upon a number of selected topics in the history of Europe between the Renaissance and the French Revolution. Emphasis will be placed upon certain problems within this period and the recent historiography that deals with them. The first in a sequence of colloquia in Modern European History. SEM.

HIST 857. Colloquium in Modern European History II - Major Themes in Early Modern History. 3 Hours.
This course will concentrate upon a number of selected topics in early modern European history. Emphasis will be placed upon certain problems within this period and the recent historiography that deals with them. The second in a sequence of colloquia in Modern European History. SEM.

HIST 858. Colloquium in Modern European History III - French Revolution to the Present. 3 Hours.
From the French Revolution into the contemporary era. The third in a sequence of colloquia in Modern European History. SEM.

HIST 859. Colloquium in Modern European History IV - Major Themes in Modern History. 3 Hours.
This course will concentrate upon a number of selected topics in modern European history. Emphasis will be placed upon certain problems within this period and the recent historiography that deals with them. The fourth in a sequence of colloquia in Modern European History. SEM.

HIST 862. Indigenous Archives and Tribal Historic Preservation. 3 Hours.
In this methods class, students will gain foundational knowledge in the archival and preservation of Indigenous source materials: oral histories, printed materials, Tribal documents, letters/journals/diaries, artwork, and a host of other sources. Students will also utilize digital history technology to create online exhibits and an original research paper. Beyond the archives this course introduces students to the important work of Tribal Historical Preservation examining the laws, ethics, cultures, policies, histories, ethics, recovery/restoration, Indigenous GIS, consultation, management, and career paths in Tribal Historical Preservation. Finally, students will gain invaluable experiences by writing grants and developing final projects that can lead to real-world applications of their research. (Same as ISP 862.) LEC.

HIST 878. Colloquium in Global Environmental History. 3 Hours.
This graduate colloquium examines the intersection between environmental history, world history, and global history as interdisciplinary fields of inquiry, as well as regional approaches to environmental history from around the globe. SEM.

HIST 879. Colloquium in North American Environmental History. 3 Hours.
Intensive survey of significant works in the field from colonial times to the present, with attention to bibliography, research methods and needs, and leading issues in interpretation. SEM.

HIST 880. Colloquium in Iberian World History. 3 Hours.
A graduate colloquium focused on a historical topic that examines from a transregional perspective the historical foundations, development, and colonial heritage of regions and societies touched by Iberian expansionism. SEM.

HIST 881. Slavery in the Atlantic World. 3 Hours.
A graduate colloquium examining the historical roots, processes, experiences, and legacies of human slavery from local, regional, comparative, and global perspectives. SEM.

HIST 882. Gender, Sexuality, and Family in Iberian. 3 Hours.
A graduate colloquium that develops theoretical approaches and examines historical case studies focused on the social and cultural construction of gender roles, sexual identities, family structures, and living strategies for peoples and places touched by Iberian expansionism. SEM.

HIST 883. Ethnohistory of the Americas. 3 Hours.
A graduate colloquium that develops methodologies and examines historical case studies for the study of ethnicity, interethnic relations, and cultural hybridity from a hemispheric perspective, not only for indigenous peoples, but also for African-, Asian-, European-, or Pacific-derived groups, as well as new ethnic groupings and identities that emerged from their interaction. SEM.

HIST 890. Colloquium in American History 1492-1800. 3 Hours.
Study of the leading interpretations of major issues in the history of Colonial and Revolutionary America, including appropriate attention to new approaches and techniques in research. The first course in the sequence of colloquia in United States history. SEM.

HIST 891. Colloquium in 19th Century U.S. History. 3 Hours.
Study of the leading interpretations of major issues in the history of the United States in the 19th century. The second course in the sequence of colloquia in United States history. SEM.

HIST 892. Colloquium in 20th Century U.S. History. 3 Hours.
Study of the leading interpretations of major issues in the history of the United States in the 20th century. The third course in the sequence of colloquia in United States history. SEM.

HIST 893. Colloquium in Military, War, and Society. 3 Hours.
Analysis of key historiographical conversations and major trends in US-focused Military, War, and Society scholarship, including their relation to the broader fields of military and US history. SEM.
HIST 895. Colloquium in the History of Gender. 3 Hours.
This colloquium will cover theoretical and topical readings on the history of manhood, womanhood, and gender systems. (Same as AMS 835 and WGSS 835.) SEM.

HIST 896. Colloquium in United States Women's History. 3 Hours.
This colloquium will cover theoretical and topical readings on the history of women in the United States from the pre-contact period to the present. It is designed to familiarize students with the most important and current historiography in the field. (Same as AMS 836 and WGSS 836.) SEM.

HIST 897. Comparative Colloquium in Women's History. 3 Hours.
This colloquium will approach the history of women from a comparative perspective through theoretical and topical readings on women in at least two different cultures. (Same as AMS 837 and WGSS 837.) SEM.

HIST 898. Colloquium in Material Culture and History. 3 Hours.
This course provides an overview of theories and methods used in material culture studies and their application to historical research, writing, and presentation. SEM.

HIST 901. Colloquium in Global History. 3 Hours.
A study of the leading interpretations, periodization, and major issues of transregional and global history, as well as an examination of the theoretical and methodological underpinnings of the field. SEM.

HIST 975. Colloquium in the History of United States Foreign Relations. 3 Hours.
An intensive study of United States foreign policy during a selected period. SEM.

HIST 981. Seminar in Environment and History. 3 Hours.
An inquiry into major issues and methods in environmental history, viewed from both an American and modern world perspective. SEM.

HIST 982. Colloquium in the History of the American West. 3 Hours.
Study of issues and interpretations in the history of the American West from prehistory to the present, including attention to new approaches and techniques in research. SEM.

HIST 986. Colloquium in Historiography of Science. 3 Hours.
Examines the various patterns of interpretation influencing current historiography of science: the substance and impact of "internalist" history, which deals with the evolution of scientific ideas. Readings and discussions will assess intellectual, chronological, socio-economic, theological, philosophical, national, institutional and literary aesthetic influences on the history of science. SEM.

HIST 997. Dissertation Seminar. 1-12 Hours.
In this course, students who have successfully completed their doctoral oral comprehensive exam will research, write, and workshop dissertation chapters, while engaging in other professionalization exercises and discussions. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Must be a second year Ph.D. student and obtain permission of the instructor. RSH.

HIST 999. Doctoral Dissertation. 1-12 Hours.
An inquiry into the source material upon a specific subject. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor. THE.

Bachelor of Arts and Bachelor of General Studies in History

Why study history?

History does not just narrate a sequence of past events. The practice of history examines change over time and tries to understand the forces that contributed to those changes. Historians are most interested in questions that begin by asking 'why' or 'how.' These questions demand complex answers about who we are, how we have come to where we are, and what forces have shaped humanity through time.

In a culture that places primary value only on living in the present, studying history can offer a rare foundation for critiquing or at least comprehending the current state of the world. Studying history helps you cut through the myths that cloud our understanding of ourselves and others and offers a depth of comprehension that few other disciplines can promise. The following are some key characteristics of the Department of History and major:

- **Welcoming:** Politics, sex, art, labor, literature, rebellion, war - the Department of History draws no boundaries between what you may and may not examine. In our teaching and research, faculty are committed to recovering and centering voices of people whose historical experiences have been marginalized through systemic racism, gender and sex prejudice, and class bias. In keep with that goal, we welcome all students and viewpoints in our classrooms.

- **Flexible:** Students must take only two required courses - a seminar on historical methods (HIST 301) and a senior research seminar (HIST 696) or honors thesis (HIST 690 & HIST 691). Because few courses have sequential prerequisites, History is easy to take as a minor or as a second major.

- **Personal:** Courses ([https://history.ku.edu/courses/](https://history.ku.edu/courses/)) in the department are usually small, and the larger courses always include trained Graduate Teaching Assistants to give individual attention and feedback. All our required seminars are capped at fifteen students, and each afford the opportunity to work one-on-one with a faculty member.

- **Prominent:** Faculty ([http://history.ku.edu/faculty/alphabetically/](http://history.ku.edu/faculty/alphabetically/)) in the department are nationally and internationally recognized leaders in their field, and they bring this advanced knowledge into the classroom.

- ** Relevant:** The study of history at the collegiate level prepares students for global citizenship. Our courses develop skills in critical thinking, analysis of qualitative and quantitative sources, research methods and practices, persuasive writing, and articulate speaking – all of which transfer to any number of future careers and occupations. Equally important, the discipline of history instills a worldview that expands beyond ourselves and teaches us to form thoughtful evidence-based arguments, even in the face of uncertainty, bias, and incomplete information.
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Declaring a Major

The Department of History has no admission prerequisites or requirements before declaring a major. You can become a History major by scheduling an appointment with our Advising Specialist (http://history.ku.edu/node/377/) to fill out a Major Declaration Form. We urge you to meet with the Director of Undergraduate Studies (http://history.ku.edu/node/98/) and our Advising Specialist when you declare, so that we can get to know you and your interests, explain the major, and help you get the most out of it. There’s no set time for declaring your major, but you should try to contact the department early for advising, preferably before the end of your sophomore year.

History Program

The history major allows students to explore the richness and diversity of human experience in the past while building skills of analysis, interpretation, research, and communication. All history majors gain knowledge of significant historical transformations that have shaped the world. History majors learn to think critically, to conduct historical research, and to present the results of their research in clear and coherent writing.

First- and Second-Year Preparation

Prospective majors are encouraged to enroll in 1 or 2 introductory courses at the 100 or 300 level in the first 2 years. Many introductory history courses fulfill the College’s HT or NW principal course requirements, and prospective majors might choose one of them to explore their interests in history. Students who come to KU with AP or transfer credit should be aware that only 9 hours of history course work numbered 100-299 may be counted toward the major. Students interested in history as a major are encouraged to meet with a department advisor early in their careers at KU to discuss their academic goals and interests. Contact the undergraduate secretary to schedule an advising appointment.

History Capstone Seminar

Majors must complete a capstone research experience in which they research and write an original thesis based on primary sources. It normally is taken during the senior year. Alternatively, students with a Major GPA of 3.5 or above may choose to write a senior honors thesis. Satisfied by one of the following:

HIST 696  Seminar in: ______ 3
or HIST 690  Honors Course in History
& HIST 691  and Undergraduate History Honors Seminar

History Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

Major Hours
Satisfied by 36 hours of major courses. No more than 2 HIST 492 Readings in History courses may be applied to the major. Only courses taken in the Department of History or cross-listed in other units are accepted for credit toward the major.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major. Of these 27 hours, at least 6 hours (two courses) must be taken at the 500-699 level (in addition to HIST 696).

Major Junior/Senior Graduation (300+) GPA
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Graduation Plan

With careful planning and commitment to a full-time course load, you can graduate with a degree in History in four years. Consult with an Advising Specialist for help in creating your graduation plan.

Double Majors

Many history majors choose to pursue a second major. Fulfilling the requirements of 2 majors in a timely fashion requires careful choice of courses. Consult with an Advising Specialist for help in creating a graduation plan that fulfills all requirements.

A sample 4-year plan for the BA degree in History can be found here: History (p. 1633), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in History can be found here: History (p. 1633), or by using the left-side navigation.

Departmental Honors

The honors program in history allows exceptional undergraduates to work closely with faculty members on a year-long original research project. To graduate with honors, a student must complete the requirements for the major in history, including HIST 301 but excluding HIST 696 Seminar. Students must also hold a 3.5 GPA in History, which must be maintained throughout the year of enrollment.

Honor students enroll in a two-semester sequence: HIST 690, in which the student carries out direct research on the topic of their choice under the supervision of a faculty advisor; and HIST 691, which provides a
group setting for writing and revision of an Honors Thesis. The rigors of these two courses provide an authentic experience of professional historical work. In exceptional circumstances, a student may complete HIST 696 and, by invitation, enroll in HIST 691 to develop the seminar paper into an honors thesis.

Each student who completes an Honors Thesis must defend it in an oral examination before a thesis committee of three faculty members. In most cases, the committee is composed of history faculty members. A student who wants the committee to include faculty members from outside the department should inform the thesis director by March 1. Upon completion, a copy of the thesis is deposited in the department and uploaded to KU Scholar Works. Petitions for exceptions to these regulations should be submitted to the Honors Coordinator.

BA in History

Below is a sample 4-year plan for students pursuing the BA in History. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

<td>Of the 30 required hours (excluding HIST 301 &amp; HIST 696) History majors must complete a minimum of 4 courses (12 hours) in History electives that fulfill either Category I or Category II distribution within the major. A minimum of 4 courses (12 hours) are required for the other category. Only 3 courses (9 hours) at the 100-200 level can apply toward the major and at least 2 courses (6 hours) must be taken at the 500-699 level.</td>
</tr>
</tbody>
</table>

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BGS in History

Below is a sample 4-year plan for students pursuing the BGS in History. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
**Minor in History**

### Why study history?

History does not just narrate a sequence of past events. The practice of history examines change over time and tries to understand the forces that contributed to those changes. Historians are most interested in questions that begin by asking ‘why’ or ‘how.’ These questions demand complex answers about who we are, how we have come to where we are, and what forces have shaped humanity through time.

In a culture that places primary value only on living in the present, studying history can offer a rare foundation for critiquing or at least comprehending the current state of the world. Studying history helps you cut through the myths that cloud our understanding of ourselves and others and offers a depth of comprehension that few other disciplines can promise. The following are some key characteristics of the Department of History and major:

- **Welcoming:** Politics, sex, art, labor, literature, rebellion, war - the Department of History draws no boundaries between what you may and may not examine. In our teaching and research, faculty are committed to recovering and centering voices of people whose historical experiences have been marginalized through systemic racism, gender and sex prejudice, and class bias. In keep with that goal, we welcome all students and viewpoints in our classrooms.

- **Flexible:** Students must take only two required courses - a seminar (HIST 310) and a senior research seminar (HIST 696) or honors thesis (HIST 690 & HIST 691). Because few courses have sequential prerequisites, History is easy to take as a minor or as a second major.

- **Personal:** Courses in the department are usually small, and the larger courses always include trained Graduate Teaching Assistants to give individual attention and feedback. All our required seminars are capped at fifteen students, and each afford the opportunity to work one on one with a faculty member.

---

1. Must be a declared History major in order to enroll in HIST 301. See a departmental advisor to declare.

2. Of the 30 required elective hours (excluding HIST 301 & HIST 696) History majors must complete a minimum of 4 courses (12 hours) in History electives that fulfill either Category I or Category II within the major. A minimum of 4 courses (12 hours) are required for the other category. Only 3 courses (9 hours) at the 100-200 level can apply toward the major and at least 2 courses (6 hours) must be taken at the 500-699 level.

3. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

---

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

1. Must be a declared History major in order to enroll in HIST 301. See a departmental advisor to declare.
• **Prominent**: Faculty (http://history.ku.edu/faculty/alphabetically/) in the department are nationally and internationally recognized leaders in their field, and they bring this advanced knowledge into the classroom.

• **Relevant**: The study of history at the collegiate level prepares students for global citizenship. Our courses develop skills in critical thinking, analysis of qualitative and quantitative sources, research methods and practices, persuasive writing, and articulate speaking—all of which transfer to any number of future careers and occupations. Equally important, the discipline of history instills a worldview that expands beyond ourselves and teaches us to form thoughtful evidence-based arguments, even in the face of uncertainty, bias, and incomplete information.

---

### Requirements for the Minor

**History Minor Course Requirements**

Minors must complete a minimum of 2 courses (6 hours) in both Category I and Category II below. The remaining 6 hours may be taken from either category.

As such, our application processes for the M.A. and M.A./Ph.D. mentorship at every stage of a student’s interaction with our department.

Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog. Please consult the

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

In History at KU, we privilege high-quality graduate advising and mentorship at every stage of a student’s interaction with our department. As such, our application processes for the M.A. and M.A./Ph.D. are geared towards ensuring the best possible fit between faculty and graduate students. Graduate applicants who seek to study at the University of Kansas are **required** to correspond with at least one prospective faculty advisor well in advance of the application deadline. On the most basic level, these preliminary contacts with faculty give applicants a sense of whether or not the prospective advisor is currently taking new students. More than this, these conversations offer candidates for admission a better sense of how they might fit into the program at KU. Our admissions process is designed to educate prospective students about what studying at KU would really be like and about the resources the Department and University possess in their areas of interest, as well as offering an opportunity to get to know some of the people they’d be working with during their time here. Moreover, the early establishment of a relationship between prospective faculty and applicant permits students to refine their applications to better articulate the candidate’s fit with our program. The prospective faculty advisor will be able to more effectively advocate for the applicant’s candidacy based upon this correspondence.

Once candidates for admission have established correspondence with at least one prospective advisor, they must complete the online application through the KU Office of Graduate Studies (http://www.graduate.ku.edu/). International or domestic applicants who are non-native speakers of English should carefully review Graduate Studies’ English Proficiency Requirements (https://gradapply.ku.edu/english-requirements/).

The application deadline is **January 1 for domestic applicants.** International applicants must submit their materials by December 15. Please schedule the TOEFL exam with these deadlines in mind—scores must be received by the application deadline.

- Statement of Academic Objectives, including a clear plan for graduate research in a specific field of study. This statement should be largely academic rather than biographical and should achieve the following objectives:
  - Suggest a potential direction for your research at KU as concretely as possible;
  - Outline how you see an M.A. in History fitting into your broad career goals; and
  - Identify specific chronological, geographical, and thematic areas of interest
- Curriculum Vitae
- Writing Sample (maximum twenty-five pages, double-spaced)
  - The Department is interested in reviewing the best-crafted, most persuasively argued writing sample that applicants are able to provide. Such papers are often derived from an upper-level undergraduate history class in which the student conducted independent research and employed both primary and secondary sources.
- GRE Scores are no longer required
- Official Transcript from each institution that has granted you a degree, or at which you are currently enrolled
- Three letters of recommendation – The letters can be directly uploaded online by those who write the recommendations, or they can be mailed to the University of Kansas, Department of History, ATTN: Graduate Academic Advisor, Wescoe 3650, 1445 Jayhawk Boulevard, Lawrence, KS 66045. A recommendation form for hard copy letters can be downloaded here (http://www.graduate.ku.edu/
M.A. Degree Requirements

The master’s program in history requires satisfactory completion of 30 credit hours of graduate courses including at least 6 hours in history research seminars and the passing of a comprehensive oral examination. Students must complete a minimum of eighteen credit hours in courses numbered 700 or higher.

Soon after admission, the student should select a faculty member as his or her advisor. The advisor directs the student’s work and advises the student about selecting Option A or Option B.

Option A

3 fields of history

The fields are the equivalent of secondary fields drawn from 3 different major fields. With the consent of departmental advisors, when a student’s program warrants a substitution, she or he may substitute an allied field outside the department that provides vital support for the program (e.g., substituting international relations for U.S. diplomatic history). At least 9 hours of course work must be taken in each of the 3 fields. Students must take HIST 805.

9 hours of work in courses at the 800 level or higher (excepting HIST 800) and 6 hours of research seminar are required. Normally, at least 3 hours of seminar under each program should be taken with the student’s program advisor, who chairs the oral examining committee.

All master’s candidates must produce 2 professional-quality, article-length papers (approximately 30 pages) in the 2 required seminars. The final oral examination for the master’s degree includes questions concerning the papers as well as coverage of the student’s major and secondary fields.

Option B

A major field and 1 secondary field

At least 2 history faculty members must serve on the student’s M.A. committee for the major field. At least 18 hours of course work in the major field and 9 hours in the secondary field must be taken. Students must take HIST 805.

9 hours of work in courses at the 800 level or higher (excepting HIST 800) and 6 hours of research seminar are required. Normally, at least 3 hours of seminar under each program should be taken with the student’s program advisor, who chairs the oral examining committee.

All master’s candidates must produce 2 professional-quality, article-length papers (approximately 30 pages) in the 2 required seminars. The final oral examination for the master’s degree includes questions concerning the papers as well as coverage of the student’s major and secondary fields.

Accelerated Master of Arts in History

Note: Admission to the Accelerated M.A. program is open to current KU undergraduate students only. If you are a non-KU student interested in graduate study, consult information about our M.A. and Ph.D. programs, respectively.

Description

The Accelerated M.A. program in History enables qualified KU students to earn both a Bachelor’s degree and a Master’s degree in history in five years. Students apply to join the accelerated program by January 1 of their Junior year, and spend the following two years completing a mix of undergraduate and graduate coursework.

The program has two tracks, one leading to an M.A. in U.S. History and one leading to an M.A. in World History. The M.A. may be pursued as a terminal degree or as preparation to pursue doctoral studies at KU or elsewhere.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees be completed within the five-year timeframe. All prospective students should discuss their interest in admission to the accelerated program with both the Director of Undergraduate Studies and the Director of Graduate Studies as early as possible but no later than Fall of the student’s Junior year.

The annual deadline for applications to the Accelerated M.A. program is January 1. For more information about the admissions process, click here (http://history.ku.edu/accelerated-ma-admission-requirements/).

Prospective students are eligible to apply to the graduate program in their Junior year. The deadline for applications is January 1. The following requirements must be met by this time:

- Major GPA of at least 3.5 and cumulative GPA of at least 3.00;
- On track to complete all requirements for a B.A. degree in History from KU with one additional year of study beyond the junior year.

Applicants must complete an Application for Graduate Study (https://gradapply.ku.edu/apply)/online. The following information should be gathered in advance and uploaded with the application:

- Two letters of recommendation (preferably from professors in the major). You will be asked to enter the names and e-mail addresses for two recommenders while completing the online application. Your recommenders will automatically receive an e-mail requesting their letters when you submit the application. It is not necessary for your recommenders to send hard copies of their letters to the department if they submit their letters electronically. Should a recommender feel uncomfortable with the online submission process, please contact the department for more options.
- Résumé or curriculum vitae
- A one-page statement of educational and career objectives
• A writing sample, preferably from an history course, 5-10 pages of text not including the bibliography, endnotes, or images following endnotes.

Upon review of the Application for Admission, the History Department will notify the student of his or her eligibility to begin coursework in the program the following Fall semester. Final acceptance to the graduate program will be contingent upon the following:

• Successful completion of all requirements for the Bachelor’s degree;
• Grades of B+ or above in all History graduate-level coursework taken in the final year of undergraduate study.
• Submission of a Program of Study

Program of Study

• After acceptance to the program, M.A. students will submit an M.A. Program of Study Worksheet. Students are expected to identify three fields of study (geographical, thematic, and chronological) in consultation with their primary advisor. These fields must be approved by the primary advisor and Director of Graduate Study by April 15. The Program of Study Worksheet also designates a Primary Advisor and two other faculty advisors as the official members of the student’s M.A. Committee.

To express interest and request further information about the History Accelerated M.A. Program, click one of the links below to complete a short form.

Current KU Students inquiry form (https://www.applyweb.com/fixie/form/s/T2b1fa0/)
Future Jayhawks inquiry form (https://college-forms.app.ku.edu/forms/form/1/)

The course requirements for this accelerated program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. Numerous graduate-level courses are regularly offered that fulfill distribution requirements for both the Bachelor’s and M.A. degrees.

### Requirements for the B.A. Major

#### History Major Core Knowledge and Skills

Majors must complete a course in the following area:

The Historian’s Craft. Satisfied by:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>

#### History Required Elective

Majors must complete 10 courses (30 hours) of electives. 4 courses (12 hours) must be in Category I and 4 courses (12 hours) must be in Category II, listed below. At least 9 of these 30 credit hours must be completed at the 500 level or above and will also count toward the master’s degree. No more than three courses (9 hours) may be taken in courses numbering 100-299. The student must be approved to begin coursework toward the master’s degree prior to enrolling in any 500 level or above courses that are to count for both undergraduate and graduate credit.

not pass the proficiency exam, s/he will be expected either to enroll in the appropriate level of language study or establish a plan for passing the language exam at the start of the second semester of Year 5.

**Master’s Degree Requirements**

The master’s program in history requires satisfactory completion of 30 credit hours of graduate courses. In addition to the 12 credit hours of graduate coursework taken during the Senior year, students must complete an additional 18 credit hours of graduate coursework once fully admitted to the master’s program. These include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 802</td>
<td>Seminar in: _____</td>
<td>3</td>
</tr>
<tr>
<td>HIST 805</td>
<td>The Nature of History</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives (12)**

At least 12 hours of electives numbered 800 or above. Students may take up to 3 of these hours outside of the History department.

No more than 9 hours of Electives numbered 500-799. Students in the Accelerated Masters should plan to take 9 hours of 500+ electives before the end of their fourth year.

**MA Examination**

In the final semester of enrollment, terminal M.A. degree will sit for a ninety-minute oral examination that covers the student’s research fields and the papers prepared in the undergraduate capstone seminar (HIST 696 or 690/691) and the graduate research seminar (HIST 802), respectively.

The M.A. exam tests the student’s mastery of the scholarly debates pertinent to their field and their facility with advanced methods of historical research and writing.

The examination will cover basic historiographical questions, and the student should offer evidence of knowledge of the field equivalent to the material contained within a survey textbook. Moreover, the exam is designed to permit the student to demonstrate competency in engaging in an academic conversation. The examining committee will also discuss the content and significance of the research papers and advise upon future directions in the student’s submission of these papers for publication.

A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook, available online at [http://history.ku.edu/resources-graduate-students](http://history.ku.edu/resources-graduate-students/)

**Progression Requirements**

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Upon approval to begin graduate coursework in the accelerated program, the student must meet with the DGS to plan the final year of undergraduate study.
2. In the final semester of undergraduate study, the department will review the student’s performance in graduate-level History courses taken in the final year. The student must earn a grade of B+ or better in each of these courses to be eligible for regular admission to the master’s degree.
3. Following completion and award of the undergraduate degree, the admitted student will again meet with the DGS to review the course
plan for the final year of graduate study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated.

4. The student will not be permitted to enroll in courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the Accelerated M.A. within 2 to 3 semesters of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

### Doctor of Philosophy in History

Earning a KU Ph.D. in History requires a mastery of research skills, including the ability to contextualize and interpret primary sources, knowledge of the languages relevant to one’s research, and the ability to develop an original historical argument that contributes to the historiography of one’s field. Moreover, a KU Ph.D. in History certifies that students can communicate complex ideas persuasively in writing and orally. It also attests to the readiness of a graduate of our program to teach history and advise undergraduates at the level of the university classroom and to train graduate students.

Our program privileges advanced training in History that prepares and encourages students to research and write “across and between” conventionally-defined historiographical fields. To develop such a research program, students read in geographic, chronological, and thematic fields. Fields may be geographic, chronological, and/or thematic to provide maximum flexibility. Ph.D. students designate one major and two minor fields in consultation with their primary advisor and advisory committee.

All students who are admitted into the Ph.D. program for full-time study, except those who have secured guaranteed external institutional funding, are provided with 5 years of funding in the form of a fellowship, teaching, or research position. International students whose native language is not English are eligible to hold a GTA appointment, provided they meet the University’s and the Department’s standards for written and spoken English. Applicants who indicate that they are seeking Department funding will be considered automatically for nomination for University-wide fellowships and grants for entering graduate students.

For statistics regarding our program, please see our Doctoral Program Profile (http://graduate.ku.edu/sites/graduate.ku.edu/files/docs/dpp/).
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

In History at KU, we privilege high-quality graduate advising and mentorship at every stage of a student’s interaction with our department. As such, our application processes for the M.A. and Ph.D. are geared towards ensuring the best possible fit between faculty and graduate students. Graduate applicants who seek to study at the University of Kansas are required to correspond with at least one prospective faculty advisor well in advance of the application deadline. On the most basic level, these preliminary contacts with faculty give applicants a sense of whether or not the prospective advisor is currently taking new students. More than this, these conversations offer candidates for admission a better sense of how they might fit into the program at KU. Our admissions process is designed to educate prospective students about what studying at KU would really be like and about the resources the Department and University possess in their areas of interest, as well as offering an opportunity to get to know some of the people they’d be working with during their time here. Moreover, the early establishment of a relationship between prospective faculty and applicant permits students to refine their applications to better articulate the candidate’s fit with our program. The prospective faculty advisor will be able to more effectively advocate for the applicant’s candidacy based upon this correspondence.

Once candidates for admission have established correspondence with at least one prospective advisor, they must complete the online application through the KU Office of Graduate Studies (http://www.gradapply.ku.edu). International or domestic applicants who are non-native speakers of English should carefully review Graduate Studies’ English Proficiency Requirements (https://gradapply.ku.edu/english-requirements/).

The application deadline is January 1 for domestic applicants. International applicants must submit their materials by December 15. Please schedule the TOEFL exam with these deadlines in mind—scores must be received by the application deadline.

The application comprises the following:

- Statement of Academic Objectives (two pages, double-spaced), including a clear plan for graduate research in a specific field of study. This statement should be largely academic rather than biographical and should achieve the following objectives:
  - Suggest a potential direction for your research at KU as concretely as possible;
  - Outline how you see a PhD. in History fitting into your broad career goals; and

- Identify specific chronological, geographical, and thematic areas of interest

- Curriculum Vitae

- Writing Sample (maximum twenty-five pages, double-spaced). The Department is interested in reviewing the best-crafted, most persuasively argued writing sample that applicants are able to provide. Such papers are often derived from an upper-level undergraduate history class in which the student conducted independent research and employed both primary and secondary sources.

- GRE Scores are not required

- Official Transcript from each institution that has granted you a degree, or at which you are currently enrolled

- Three letters of recommendation – The letters can be directly uploaded online directly by those who write the recommendations, or they can be mailed to the University of Kansas, Department of History, ATTN: Graduate Academic Advisor, Wescoe 3650, 1445 Jayhawk Boulevard, Lawrence, KS 66045. A recommendation form for hard copy letters can be downloaded here (http://www.graduate.ku.edu/sites/graduate.drupal.ku.edu/files/docs/ApplicationProcess/KULetterOfRecForm.pdf).

Please note that documents, including a writing sample and transcripts, should be uploaded to the application. Applicants should not send hard copies of application materials to the Department of History.

When you submit your online application, it is made available to the Department of History for review, yet it is the applicant’s responsibility to ensure the Office of Graduate Studies has received all materials by the deadline. The Department of History Graduate Office cannot process your application and move it forward for consideration by the Graduate Committee until all materials have been received. The Department of History reviews applications for completeness, and the Graduate Academic Advisor will contact you if your application is not complete.

Ph.D. Degree Requirements

Students normally must complete the M.A. degree before they are eligible to enter the Ph.D. program. Students who enter the M.A. program may either complete the degree or petition for direct admission to the Ph.D. program. This petition first must be endorsed by the student’s advisor and the field committee and then be approved by the department’s graduate committee.

Course Requirements

1. A minimum of 33 hours of credit at the graduate level including the following:
   a. A minimum of three historiographical colloquia numbered HIST 801 and above
   b. Two HIST 802 Research Seminars
   c. HIST 805 The Nature of History
   d. HIST 998 Portfolio Preparation
2. At least 24 hours of the minimum credits must be taken as HIST courses.
3. At least 18 hours of the minimum credits must be taken at the 700 level or above.

Research Skills and Responsible Scholarship

In order to fulfill the University research skills and responsible scholarship requirement, all graduate students in History must take HIST 805 and
be certified by the department in a foreign language before taking the comprehensive oral exam.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral research skills and responsible scholarship are listed in the Graduate Studies section of the online catalog and in the KU Policy Library (https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/).

Portfolio and Oral Comprehensive Exam

A written portfolio of the student’s work and an oral examination that will provide the candidate with an opportunity to demonstrate the knowledge they have acquired and respond to questions from the committee about their written portfolio. The student must pass their portfolio exam by the end of their fifth semester of study. Any exception to taking the portfolio exam as outlined above requires a petition to the History Graduate Committee.

Dissertation Prospectus Defense

Students will defend their Dissertation Prospectus in an oral examination with their Advisory committee the semester following their passing of the Portfolio Exam. Students must successfully defend a dissertation prospectus by the end of their sixth semester. Any exception to this requires a petition to the History Graduate Committee.

Doctoral Dissertation and Defense

The dissertation is a book-length piece of original scholarship that makes a significant contribution to historical knowledge. The candidate for the Ph.D. must defend this piece of scholarship in an oral examination.

For more information about the Ph.D. program in History, consult the History Graduate Handbook on the History Department webpage. (http://history.ku.edu/)

Department of History of Art

Why study the history of art?

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

Undergraduate Programs

The curriculum introduces students to diverse forms of art and visual culture from prehistory to the present in Europe, the Americas, East Asia, Africa, and the Middle East, both within national traditions and transnationally. Students develop depth and breadth of knowledge as they probe the ways in which art and visual culture at once reflect and shape the societies in which they are produced. The study of art history fosters visual and cultural literacy and critical thinking, research, and communication skills that are valuable for a variety of careers.

Several introductory courses are offered every semester. These include 1- and 2-semester surveys in Western art (HA 100, HA 300, HA 150, and HA 151), HA 261 Introduction to Modern Art, HA 165 Introduction to Asian Art, HA 166 The Visual Arts of East Asia, HA 367 Art and Culture of Japan, HA 368 Art and Culture of China, HA 369 Art and Culture of Korea, and HA 330 Italian Renaissance Art.

Courses for Nonmajors

All courses are open to nonmajors if they have the necessary prerequisite, which in most cases is one of the introductory courses. An undergraduate advisor counsels nonmajors who need help selecting a course.

Graduate Programs

The Kress Foundation Department of Art History offers graduate art history courses in European, American, and East Asian art. Students may pursue graduate degrees in European and American Art/Global Modern and Contemporary Art or East Asian Art.

The M.A. provides students with a broad and deep knowledge of the visual arts, as well as study of the basic concepts, theories, and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation for doctoral studies at KU or to apply elsewhere.

The Combined M.A./Ph.D. is a streamlined degree track intended for students who want to pursue the Ph.D. in art history at KU, but who do not yet hold the M.A. degree in art history.

The Ph.D. is intended for students who hold the M.A. degree in art history.

Students who are interested in enrolling in graduate level coursework in the Art History Department without formal admission to a graduate program at KU are encouraged to apply for non-degree seeking student status. See the department's admission webpage (http://arthistory.ku.edu/non-degree-overview-admission/) for further details.

Courses

HA 100. Introduction to Western Art History. 3 Hours HT AE42/GE3H / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 103, HA 150, HA 151, HA 160, HA 161, or HA 300. LEC.

HA 103. Introduction to Western Art History, Honors. 3 Hours HT AE42/GE3H / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not fulfill the 30 required hours in the major. Not open to students with credit in HA 100, HA 150, HA 151, HA 160, HA 161, HA 300, or HA 303. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 105. Special Study: ____. 1-6 Hours H.
This course is designed for the study of special topics in art history at the introductory level, including courses taken in the study abroad program.
May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies. LEC.

HA 150. History of Western Art: Ancient Through Medieval. 3 Hours HT AE42/GE3H / H.
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 160. LEC.

HA 151. History of Western Art: Renaissance to Contemporary. 3 Hours GE3H / H.
A survey of art in the West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 161. LEC.

HA 160. History of Western Art: Ancient Through Medieval, Honors. 3 Hours HT AE42/GE3H / H.
A survey of the art of earlier periods in the West, from prehistoric times through the middle ages in Europe, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 150. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 161. History of Western Art: Renaissance to Contemporary, Honors. 3 Hours GE3H / H.
A survey of the art in West from the Renaissance to the contemporary period in Europe and America, with special emphasis on the achievements of individual artists in relation to the cultural movements of their times. Not open to students with credit in HA 151. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 165. Introduction to Asian Art. 3 Hours HT/NW AE42/GE3H / W.
A survey of Asian art from the Neolithic period to the present. Students develop critical skills through analyzing, writing about, and talking about art and Asian cultures. Students also learn about important museums in North America and Asia. No prior knowledge of art history or Asia expected. Not open to students with credit in HA 166. LEC.

HA 166. The Visual Arts of East Asia. 3 Hours AE42/GE3H / W.
A survey of the art of East Asia from the Neolithic period to the present. Students develop critical skills through analyzing, writing about, and talking about art and East Asian cultures. Students also learn about important museums in North America and Asia. No prior knowledge of art history or East Asia expected. Not open to students with credit in HA 165. LEC.

HA 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in History of Art. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HA 261. Introduction to Modern Art. 3 Hours HT GE3H / H.
A survey of the art of the 20th century, with special emphasis on the relationship between artistic developments and cultural changes. Not open to students with credit in HA 161 or HA 165. LEC.

HA 300. Introduction to Western Art History. 3 Hours HT AE42/GE3H / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 160, HA 165, HA 151, HA 161, or HA 303. LEC.

HA 303. Introduction to Western Art History, Honors. 3 Hours HT / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 100, HA 103, HA 150, HA 151, HA 160, HA 161, or HA 300. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 305. Special Study: _____. 1-6 Hours H.
This course is designed for the study of special topics in art history, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies. LEC.

HA 307. Directed Readings. 1-6 Hours U.
This course is designed for the study of special topics in art history, including courses taken in the study abroad program. May deal with individual artists, special themes, or other topics not generally covered in courses offered by the department. May be repeated for credit if content varies. LEC.

HA 311. The Art and Architecture of the British Isles. 3 Hours GE3H / H.
A chronological survey of Western art and architecture, including the ancient Near East, Europe from antiquity to the present, and North America from the colonial period to the present. The course emphasizes major historical and cultural developments, analyzes key art works and monuments, and introduces basic art historical principles and analytical methods. The course is offered at the 100 and 300 levels, with additional reading and writing assigned at the 300 level. Intended for non-majors. Does not count toward the 30 required hours in the major. Not open to students with credit in HA 100, HA 103, HA 150, HA 151, HA 160, HA 161, or HA 300. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

HA 315. The Prehistory of Art. 3 Hours GE3S / S.
The course examines major forms of artistic expression in China, Korea, and Japan. Discussions introduce basic art concepts, the themes and purposes of art, and different art styles in Asia from ancient times to the present. Students develop critical skills through analyzing, writing about, and talking about art and Asian cultures. Students also learn about important museums in North America and Asia. No prior knowledge of art history or Asia expected. Not open to students with credit in HA 165. LEC.
creativity. Course may be offered in lecture or online format. (Same as ANTH 315.) LEC.

HA 322. European Architecture 300-1300. 3 Hours H.
This course surveys the architecture of Western Europe from the 4th through the 14th centuries, concentrating on 750-1300. The medieval millennium was an era of constant conflict: military, diplomatic, intellectual, ideological, theological, and stylistic. Within a chronological framework, this course will examine selected works of architecture and urban design, paying special attention to the tension between architectural innovation and traditional practices. Its mission is to explore why and how these buildings and sites were produced, to understand how they communicate their patrons and makers' ideas, and to discover their audiences' responses to them. Students will consider the reinterpretation and transformation of the classical orders, the adaptation and transformation of several ancient building types, the establishment and development of architecture to serve newly emerging nation-states and religions, the evolution of vaulting, the changing conception of the wall, and the representational qualities of medieval architecture. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor. LEC.

HA 325. Aegean Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaeans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 525 or HA 525. No knowledge of Greek or Latin is required. (Same as CLSX 525.) LEC.

HA 326. Greek Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 526 or HA 526. No knowledge of Greek or Latin is required. (Same as CLSX 326.) LEC.

HA 327. Roman Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 527 or HA 527. No knowledge of Greek or Latin is required. (Same as CLSX 327.) LEC.

HA 330. Italian Renaissance Art. 3 Hours GE3H / H/W.
A survey of the art and architecture of Italy from c. 1300 to 1550. Special emphasis is placed on regional styles and the private, political, and devotional contexts in which works of art and architecture functioned. Some of the artists whose works are considered are Giotto, Duccio, Donatello, Botticelli, Leonardo, and Michelangelo. LEC.

HA 331. Northern European Art from Van Eyck to Brueghel. 3 Hours H.
This course examines Bohemian, French, Netherlandish, and German art in the 14th-16th centuries in settings ranging from religious foundations to noble courts and cities. Participants in the course will consider painting, prints, sculpture, and manuscripts from the era of Jan van Eyck to that of Hieronymus Bosch and Pieter Brueghel the Elder. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor. LEC.

HA 335. Renaissance Architecture in Italy. 3 Hours H.
This course examines the history of Italian Renaissance architecture from its origins in the 15th century to its transformation in the 16th, featuring (but not limited to) the work of three of its most celebrated exponents: Filippo Brunelleschi, Michelangelo Buonarroti, and Andrea Palladio. Students will explore how and why 15th and 16th-century architects and patrons appropriated and interpreted both ancient and medieval forms to create the architectural culture of the Renaissance. We will investigate the revival and transformation of the classical architectural language, the emerging notion of architectural authorship, the ability of architectural forms and materials to convey particular meanings to particular audiences, the deployment of architecture as an instrument of power, and the birth of architectural history and theory. The course is taught at the 300 and 500 levels with additional work required at the 500-level. Not open to students with credit in HA 535. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor. LEC.

HA 340. Special Study in Asian Art Before 1900: ______. 1-6 Hours H.
This course is designed for the study of special topics in Asian art before 1900, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 342. Special Study in 18th/19th-Century European or American Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in European or American art of the 18th and/or 19th centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 343. Special Study in 20th/21st-Century Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in art of the 20th and/or 21st centuries, including courses taken through study abroad. May be repeated for credit if content varies. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 344. Manga: Histories and Theories. 3 Hours H.
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 544. (Same as EALC 344.) LEC.

HA 347. Ceramics of East Asia. 3 Hours NW / H.
This course explores the history of East Asian ceramics from the 10th to the late 20th century. Using critical approaches from art history, anthropology, sociology, literature, and materials science, students discuss the historiography and connoisseurship as well as the production, design, and consumption of ceramics such as Yaozhou celadon,
HA 361. Buddhist Art of Korea. 3 Hours H.
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 561 or REL 511. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as EALC 354.) LEC.

HA 362. Ceramics of Korea. 3 Hours H.
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Ming porcelain pottery. Not open to students who have taken HA 562. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as EALC 360.) Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

HA 363. Modern Korean Art and Culture. 3 Hours AE42 / H.
This course is a thematic introduction to Korean art and culture with an emphasis on modern and contemporary Korea. Pre-modern works are contextualized with respect to contemporary issues. Students learn how to conduct a comprehensive analysis of an artwork by considering the political, historical and social conditions of its time within a broader East Asian cultural framework. (Same as EALC 373.) Prerequisite: An introductory course in art history at the college level, or consent of instructor. LEC.

HA 367. Art and Culture of Japan. 3 Hours NW AE42/GE3H / H/W.
The history of Japanese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Japanese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as EALC 367.) LEC.

HA 368. Art and Culture of China. 3 Hours NW AE42/GE3H / H/W.
The history of Chinese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions between different ethnic groups, and the roots of modernism in Chinese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as EALC 378.) LEC.

HA 369. Art and Culture of Korea. 3 Hours NW AE42/GE3H / H/W.
The history of Korean art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Korean art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as EALC 369.) LEC.

HA 370. American Art. 3 Hours H.
A survey of American painting, sculpture, and architecture from colonial to recent times. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 371. Modern Sculpture. 3 Hours H.
Since the 1870s, modern sculptors have dramatically transformed their medium, pioneering new forms of figuration and abstraction, investigating new materials and processes, and developing installation and site-specific art. With a focus on Europe and the U.S. through the 1980s, expanding to global trends of recent decades, this course examines how this happened, considering the work of major artists from Rodin, Matisse, Picasso, and Brancusi to Donald Judd, Eva Hesse, Anish Kapoor, Jeff Koons, and David Hammons. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 571. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 372. Baroque Art in Europe. 3 Hours H.
This course surveys significant 17th-century paintings, sculpture and architecture that were produced in Italy, Spain, France and the Southern and Northern Netherlands. Artists whose works are discussed include Caravaggio, Bernini, Velazquez, Rubens, Rembrandt and Vermeer. Artistic elements of individual works, major changes in patronage, and the religious, political, economic and cultural contexts in which the art was produced are examined. Assigned readings present a range of methodological perspectives. LEC.

HA 376. Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque. 3 Hours H.
This course surveys significant 17th-century paintings, prints and drawings produced in the Northern and Southern Netherlands (modern-day Netherlands and Belgium). Artists whose works will be discussed include Peter Paul Rubens, Rembrandt van Rijn, Johannes Vermeer, and other painters of scenes of daily life, landscapes, cityscapes, portraits and still-lifes. Artistic elements of individual works and their relationship to major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 576. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

Termoku and Raku tea bowls, stamped and slip-brushed Punch’#ng ware, and Ming blue-and-white porcelain. This is a hybrid course, which means that most of the material and assignments of the course are online. However, students are required to participate in 6-7 field trips, including trips to the Spencer Museum of Art, the kilns located on campus, and a demonstration of the Japanese tea ceremony. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in HA 547. LEC.

HA 353. Modern and Contemporary African Art. 3 Hours H.
In this course, we examine the development of artistic modernisms in Africa in historical context. We also study the content, production, patronage, and display of modern and contemporary African art. In doing so, we consider African artists’ engagement with modernity, globalization, and contemporary issues, as well as interrogate influential myths and assumptions regarding African artists and the work they produce. Course themes include the workshop as a critical site, independence movements and the creation of national art forms, art as global commodity, and art in resistance, remembrance, and revolution. Not open to students with credit in AAAS 569/HA 569. (Same as AAAS 353.) LEC.

HA 354. Japanese Prints. 3 Hours NW / H/W.
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500-level. (Same as AAAS 355.) LEC.
HA 377. African Design. 3 Hours H/W.
This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 677/HA 677. (Same as AAAS 377.) Prerequisite: An Art History course 100 level or above, or consent of instructor. LEC.

HA 380. History of Photography. 3 Hours H.
An introduction to the history of photography. We will consider strategies used over its history to make photography an art, a witness to truth, a record of fact, a purveyor of falsehoods, a mass medium, a hawk of goods and ideologies, an agent of political change, a means of remembrance, and more. Not open to students with credit in HA 580. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 385. The Art of Buddhism. 3 Hours H/W.
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 585. (Same as EALC 385.) LEC.

HA 388. Modern and Contemporary Visual Arts of Japan. 3 Hours H.
This course covers Japanese visual arts (architecture, sculpture, and painting) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan's modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 588. (Same as EALC 388.) LEC.

HA 390. Special Study in African Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 391. Special Study in Asian Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 392. Special Study in Ancient Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 393. Special Study in Medieval Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 394. Special Study in Renaissance Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 395. Special Study in Baroque Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 396. Special Study in American Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in American art. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 397. Special Study in Modern Art: ______, 1-6 Hours H.
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. LEC.

HA 467. Art and Culture of Japan, Honors. 3 Hours NW / H/W.
An introduction to the arts of Japan using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 367, with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 267 or HA 367. LEC.

HA 468. Art and Culture of China, Honors. 3 Hours NW / H/W.
An introduction to the arts of China using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 368, with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 268 or HA 368. LEC.

HA 469. Art and Culture of Korea, Honors. 3 Hours NW / H/W.
An introduction to the arts of Korea using fundamental principles and analytical methods of art history. Emphasis is placed on cultural contexts of art production, including history and religion. Honors version of HA 369, with more classroom discussion and opportunities for original research. Prerequisite: Membership in the University Honors Program or permission of the instructor. Not open to freshmen or students with credit in HA 269 or HA 369. LEC.
HA 505. Special Study: _____ 1-6 Hours H.
This course is designed for the study of special topics in art history on a trial basis, open to both undergraduate and graduate students. Prerequisite: An introductory-level course in art history, appropriate to the specific special study topic; or consent of instructor. LEC.

HA 506. Early Medieval and Romanesque Art. 3 Hours H.
This course examines the art of Europe from the Early Christian era through the Romanesque period, up to 1200. Architecture, sculpture, manuscript illumination, metalwork and painting are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of the instructor. LEC.

HA 507. Gothic Art. 3 Hours H.
This course examines the art of Europe during the Gothic period, from 1140-1500. Architecture, sculpture, manuscript illumination, metalwork, painting and furniture are explored in relation to their political, religious and social contexts. Graduate students can expect to complete additional reading and writing assignments. Prerequisite: HA 100 or HA 150, or permission of instructor. LEC.

HA 510. Medieval Manuscripts and Early Printed Books. 3 Hours H.
Students study the history of the book from 300 to 1500 A.D., concentrating on the role of visual imagery in books and the place of books in medieval and renaissance culture. In addition to discussing the relation between text and image, and studying the stylistic contexts for ancient, medieval, and Renaissance illumination and early woodcut illustration, participants in this course consider such additional topics as methods of book production, the development of cycles of illustration for religious and secular books, and the relationship between manuscripts and early printed books. Lectures and discussion are supplemented by visits to the fine collection of manuscripts, printed books, and facsimiles in the Kenneth Spencer Research Library. Prerequisite: An introductory course in Western art history at the college level, or consent of the instructor. LEC.

HA 511. From Court to City: Northern Art. 3 Hours H.
This course will examine painting, manuscripts, metalwork, tapestry, ivories, prints, and ephemeral arts-such as the material culture of feasts or the entry processions of rulers into cities-in order to gain insight into the place of the arts in late medieval and Renaissance culture in the fourteenth and fifteenth centuries. In addition to discussion of noble, clerical and civic patronage and of artistic style, participants in this course will consider such additional topics as artistic production and the development of art markets in cities. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor. LEC.

HA 512. Humanism and Reform: 16th Century Northern European Art. 3 Hours H.
This course explores the history of Northern European painting, manuscripts, printed books, sculpture, prints, and architecture paying particular attention to the artists and patrons that produced and consumed art, the function of artistic objects in settings ranging from church to palace, and the impact of humanism and the Reformation on the arts. Bosch, Brueghel, Cranach, Dürer, and Holbein will be considered among other artists. Prerequisite: HA 100, HA 150, HA 151, or the equivalent, or consent of instructor. LEC.

HA 517. Directed Readings. 1-6 Hours U.
Supervised study and research into specialized areas of art history. IND.

HA 525. Aegean Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaeans, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 325 or HA 325. No knowledge of Greek or Latin is required. (Same as CLSX 525.) LEC.

HA 526. Greek Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of the ancient Greek world from the Protogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 326 or HA 326. No knowledge of Greek or Latin is required. (Same as CLSX 526.) LEC.

HA 527. Late Medieval Art in Italy. 3 Hours H.
This course examines the history of paintings, sculptures and buildings produced in Italy from c. 1250 to 1400. Important individual works, artists, and decorative complexes, such as Giotto’s Scrovegni (Arena) Chapel, are analyzed in terms of their stylistic, geographical, social, historical, devotional, and literary contexts. Current theories and controversies pertinent to the history and study of 13th- and 14th-century Italian art are also addressed. Prerequisite: HA 100, HA 150, or the equivalent, or consent of instructor. LEC.

HA 528. The Spatial Arts of Urban Italy. 3 Hours.
This course examines the central role played by the arts of urbanism, architecture, and monumental sculpture in shaping the distinctive civic cultures of Italy at the threshold of the Renaissance, 1200-1550. It will pay particular attention to the republics of Florence and Venice, but also consider papal Rome and Pienza, and a changing selection of Italy’s magnificent court cities (including Milan, Padua, Parma, and Verona). Prerequisite: HA 100, HA 150, or the equivalent, and an upper-level (300-level or above) course in art history or Western European culture, or consent of instructor. LEC.

HA 529. Archaeology and Art of the Ancient Near East. 3 Hours H.
A cross-cultural survey of the material remains of the major civilizations of the ancient Near East, including Anatolia, Mesopotamia, the Levant, and Egypt from Neolithic period to the rise of the Roman empire (ca. 6000 B.C.E. - 30 B.C.E.). Includes lectures with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as CLSX 529.) LEC.

HA 533. Rococo to Realism: Painting in Europe c. 1750-1848. 3 Hours H.
This course considers European painting c. 1750 to 1848 within the context of dramatic political and industrial revolutions. Exploring the power of the visual to engage with broader circumstances and to effect change, we will examine the ways in which shifting constructions of gender, empire, colonialism, race, slavery, and class were addressed by such artists as Watteau, David, Vigée-Lebrun, Delacroix, Géricault, Goya, Turner, Constable, Ingres, Daumier, Bonheur, and Courbet. Graduate students will complete additional assignments. (Same as WGSS 533.) Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.
HA 534. Impressionism and Post-Impressionism: 1848-1900. 3 Hours H.
This course considers French painting 1848 to 1900, a period marked
by unprecedented technological advancements, the restructuring
of Paris, and the rise of consumer culture. As large sections of the city were
levelled to make way for broad boulevards, cafés, and department stores,
some artists strove to represent the ever-changing spectacle of urban
life; others found their inspiration away from the city. Focusing on Manet,
Degas, Caillebotte, Morisot, Cassatt, Monet, Renoir, Seurat, Gauguin,
Van Gogh, and Cézanne, we will explore how artists engaged with shifting
constructions of modernity, gender, fashion, public and private, empire,
race, class, and consumer and leisure cultures. Graduate students will
complete additional assignments. (Same as WGSS 534.) Prerequisite: HA
100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 535. Renaissance Architecture in Italy. 3 Hours.
This course examines the history of Italian Renaissance architecture from
its origins in the 15th century to its transformation in the 16th, featuring
(but not limited to) the work of three of its most celebrated exponents:
Filippo Brunelleschi, Michelangelo Buonarroti, and Andrea Palladio.
Students will explore how and why 15th and 16th-century architects
and patrons appropriated and interpreted both ancient and medieval
forms to create the architectural culture of the Renaissance. We will
investigate the revival and transformation of the classical architectural
language, the emerging notion of architectural authorship, the ability
of architectural forms and materials to convey particular meanings to
particular audiences, the deployment of architecture as an instrument
of power, and the birth of architectural history and theory. The course is
taught at the 300 and 500-levels with additional work required at the 500-
level. Not open to students with credit in HA 335. Prerequisite: HA 100,
HA 150, or the equivalent, or consent of instructor. LEC.

HA 536. Islamic Art and Architecture in Africa. 3 Hours H.
Study of Islamic art and architecture in various cultural and geographical
settings, from the first mosques of North African and the Swahili coast
to contemporary Islamized masquerades in West Africa. We consider
art objects and architectural sites in terms of religious practice, trade
and commerce, ritual and political power, and contemporary expression.
(AAAS 536.) Prerequisite: AAAS 102, AAAS 103, HA 100, or HA 150; or
permission of instructor. LEC.

HA 537. Roman Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of ancient Rome
from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis
on major sites, monuments, and changing forms of social and artistic
expression, as well as on Etruscan and Greek influence on Rome and
Rome’s influence on its provinces. Includes lectures with slides and
discussion; use of the Wilcox Museum of Classical Antiquities. For
advanced undergraduates with backgrounds in the humanities; and for
graduate students (especially in Classics and History of Art). This course
is offered at the 300 and 500 level with additional assignments at the
500 level. Not open to students with credit in CLSX 327 or HA 327. No
knowledge of Greek or Latin is required. (Same as CLSX 527.) LEC.

HA 538. Pompeii and Herculaneum. 3 Hours H.
An interdisciplinary treatment of the art and archaeology of the ancient
Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the
structures and decorations of major public spaces and houses and on
aspects of cultural, social, political, commercial, and religious life from
the period of the second century B.C.E. to 79 C.E., when Pompeii and
Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures
and discussion. (Same as CLSX 538, HUM 538.) Prerequisite: Graduate
status, or 6 credit hours in Classics, Greek, Latin, History of Art, or
permission of the instructor. LEC.

HA 539. History of Japanese Buddhist Art. 3 Hours H.
A survey of the Buddhist art of Japan that begins with the introduction
of Buddhism in the sixth century and ends with contemporary Buddhist
art. Students will also consider how Buddhist images function as part
of the living religious tradition in Japan. Prerequisite: A survey of either
Asian art, Japanese art, Asian religions, Japanese culture, or consent of
instructor. LEC.

HA 540. Special Study in Asian Art Before 1900: _____. 1-6 Hours H.
This course is designed for the study of special topics in Asian art before
1900, including courses taken through study abroad. May be repeated
for credit if content varies. The course is taught at the 300 and 500-
levels with additional work required at the 500-level. Same topic may not
be taken at both the 300 and 500-levels. Prerequisite: An appropriate
introductory-level course in Asian art history, or consent of the instructor
LEC.

HA 542. Special Study in 18th-19th Century European or American
Art: _____. 1-6 Hours H.
This course is designed for the study of special topics in European or
American art of the 18th and/or 19th centuries, including courses taken
through study abroad. May be repeated for credit if content varies. The
course is taught at the 300 and 500-levels with additional work required
at the 500-level. Same topic may not be taken at both the 300 and 500-
levels. Prerequisite: An appropriate introductory-level course in art history,
or consent of the instructor. LEC.

HA 543. Special Study in 20th/21st-Century Art: _____. 1-6 Hours H.
This course is designed for the study of special topics in art of the 20th
and/or 21st centuries, including courses taken through study abroad.
May be repeated for credit if content varies. The course is taught at the
300 and 500-levels with additional work required at the 500-level. Same
topic may not be taken at both the 300 and 500-levels. Prerequisite:
An appropriate introductory-level course in art history, or consent of
the instructor. LEC.

HA 544. Manga: Histories and Theories. 3 Hours H.
Manga (Japanese comics) have long been an extremely popular and
influential medium in Japan and internationally. Manga offer engaging
narratives and visual imagery revealing central concerns not only of
Japanese culture, history, society and politics, but also of the global
cultural industry. The medium has been studied through various
disciplinary lenses ranging from art history to visual culture and media
studies, literature, sociology, and anthropology. Through the examination
of several manga artists and works from the late 19th century to the
present as well as reading a broad range of scholarship, this course
explores the major issues addressed and theoretical approaches used
in the interdisciplinary study of manga. The course is taught at the 300
and 500-levels with additional work required at the 500-level. Not open
to students with credit in HA 344. (Same as EALC 544.) Prerequisite: A
college level introduction to Asian art history or Asian studies, or consent
of instructor. LEC.

HA 545. Early Chinese Art. 3 Hours NW / H.
A survey of Chinese art from Neolithic times through the Han Dynasty (ca.
200 C.E.). Emphasis will be placed on recent archaeological excavations
and also on the development of bronze vessels of the Shang and Zhou
Dynasties. Prerequisite: A college level introduction to Asian art history,
or consent of instructor. LEC.

HA 546. Chinese Sculpture. 3 Hours H.
A survey of Chinese sculpture from the Shang dynasty through the Song
dynasty (1600 BCE-1279 CE), focused on sculptural programs in native
funerary art and Buddhist temples and cave-shrines. LEC.
HA 547. Ceramics of East Asia. 3 Hours NW / H.
This course explores the history of East Asian ceramics from the 10th
to the late 20th century. Using critical approaches from art history,
antropology, sociology, literature, and materials science, students
discuss the historiography and connoisseurship as well as the production,
design, and consumption of ceramics such as Yaozhou celadon,
Temmoku and Raku tea bowls, stamped and slip-brushed Punch’#ng
ware, and Ming blue-and-white porcelain. This is a hybrid course, which
means that most of the material and assignments of the course are online.
However, students are required to participate in 6-7 field trips, including
trips to the Spencer Museum of Art, the kilns located on campus, and
a demonstration of the Japanese tea ceremony. This course is offered
at the 300 and 500 level with additional assignments at the 500 level.
Not open to students with credit in HA 347. Prerequisite: A college level
introduction to Asian art history or Asian studies, or consent of instructor.
LEC.

HA 549. Chinese Painting. 3 Hours H.
An introductory survey of painting in China from the 7th through the
19th centuries. Prerequisite: One course in art history, or in East Asian
languages cultures; or consent of instructor. LEC.

HA 550. Capstone in Art History: ____. 3 Hours AE61 / H.
An advanced course dedicated to the in-depth study of special topics
in art history. Students conduct research on a question within the
parameters of the course topic and produce a research product that
integrates knowledge from within the discipline of art history or in
combination with other disciplines to generate new ideas. May be
repeated for credit if content varies. Prerequisite: Junior or senior standing
and twelve hours of art history, or consent of the instructor. LEC.

HA 554. Japanese Prints. 3 Hours NW / H/W.
This course explores the history of Japanese prints with special emphasis
on ukiyo-e (pictures of the floating world) woodblock prints made during
the Edo Period (early 17th to 19th century). The course is organized
thematically as well as chronologically and examines woodblock prints by
focusing on both design and socio-political history. The course is taught
at the 300 and 500-levels with additional work required at the 500-level.
Prerequisite: An introductory course in art history or consent of instructor.
LEC.

HA 561. Buddhist Art of Korea. 3 Hours H.
Introduction to the history of Buddhist temple buildings, paintings,
sculptures and illuminated hand-scrolls in Korea from the 4th through
the 19th centuries, with special emphasis on their stylistic, geographical,
social, devotional and literary contexts. Current theories and controversies
pertinent to the history and study of Korean Buddhist art are also
addressed. Not open to students who have taken HA 361. Work
requirements will be greater for students enrolled at the 500 level than
at the 300 level. (Same as REL 511.) Prerequisite: A college level
introduction to Asian art history, or consent of instructor. LEC.

HA 562. Ceramics of Korea. 3 Hours H.
A survey covering the history of Korean ceramics from prehistoric times
through the early modern period, with special emphasis on their stylistic,
geographical, social and political context. Topics include celadon-glazed,
stamped and slip-decorated stoneware, Korean ceramics related to
the Japanese tea ceremony and Mingel pottery. Not open to students
who have taken HA 362. Work requirements will be greater for students
enrolled at the 500 level than at the 300 level. Prerequisite: A college level
introduction to Asian art history, or consent of instructor. LEC.

HA 564. European Art, 1900-1945. 3 Hours H.
A detailed survey of modern European art from the turn of the century
through World War II. Movements to be considered may include
post-impressionism, cubism, constructivism, dada, and surrealism.
Graduate students may be expected to do additional reading and writing
assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent
of instructor. LEC.

HA 566. Art From 1945 to the 1980s: Modernism to Post-Modernism. 3 Hours H.
An international survey of modern and post-modern art from World War
II to the 1980s. Topics may include abstract expressionism, pop art,
minimalism, happenings and performance art, earth works, conceptual
art, feminist art, photo-realism, the craft revival, and new media. Graduate
students may be expected to complete additional reading and writing
assignments. Prerequisite: HA 100, HA 151 or the equivalent, or consent
of instructor. LEC.

HA 567. Contemporary Art. 3 Hours H.
In this course, we examine the development of artistic modernisms
in Africa in historical context. We also study the content, production,
patronage, and display of modern and contemporary African art. In doing
so, we consider African artists’ engagement with modernity, globalization,
and contemporary issues, as well as interrogate influential myths and
assumptions regarding African artists and the work they produce. Course
themes include the workshop as a critical site, independence movements
and the creation of national art forms, art as global commodity, and art in
resistance, remembrance, and revolution. Not open to students with credit
in AAAS 353/HA 353. (Same as AAAS 569.) Prerequisite: Junior/Senior
standing and at least one course at the 100-level or above in AAAS or
HA. LEC.

HA 570. American Art. 3 Hours H.
A survey of American painting, sculpture, and architecture from colonial
times to the present. (Same as AMS 580.) Prerequisite: An introductory
course in Western art history at the college level. LEC.

HA 571. Modern Sculpture. 3 Hours H.
Since the 1870s, modern sculptors have dramatically transformed their
medium, pioneering new forms of figuration and abstraction, investigating
new materials and processes, and developing installation and site-specific
art. With a focus on Europe and the U.S. through the 1980s, expanding to
global trends of recent decades, this course examines how this happened,
considering the work of major artists from Rodin, Matisse, Picasso, and
Brancusi to Donald Judd, Eva Hesse, Anish Kapoor, Jeff Koons, and
David Hammons. This course is offered at the 300 and 500 level with
additional assignments at the 500 level. Not open to students with credit in
HA 371. Intended for graduate students. Prerequisite: HA 100, HA 151, or
the equivalent, or consent of instructor. LEC.

HA 576. Art in the Age of Rubens, Rembrandt and Vermeer: Northern
Baroque. 3 Hours H.
This course surveys significant 17th-century paintings, prints and
drawings produced in the Northern and Southern Netherlands (modern-
day Netherlands and Belgium). Artists whose works will be discussed
include Peter Paul Rubens, Rembrandt van Rijn, Johannes Vermeer, and
other painters of scenes of daily life, landscapes, cityscapes, portraits
and still-lifes. Artistic elements of individual works and their relationship to
major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 376. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 578. Central African Art. 3 Hours NW / H/W.
Introduction to the arts and cultures of Central Africa. Emphasis is given to the major art-producing cultures of the Equatorial Forest and the Southern Savanna regions of Cameroon, Gabon, Congo, Zaire, and Angola. The historical and cultural contexts for the visual arts associated with centralized leadership and non-centralized societies are explored. (Same as AAAS 578.) LEC.

HA 579. Southern Baroque Art. 3 Hours H.
This course surveys significant 17th-century paintings, sculpture and architecture produced in Italy, Spain and France. Artists whose works will be discussed include Caravaggio, the Carracci, Bernini, Borromini, Velazquez, Poussin, Claude Lorrain, De la Tour and the Le Nain brothers. Artistic elements of individual works and their relationship to major changes in patronage and religious, political, economic and cultural contexts will be examined. Assigned readings will present a range of methodological perspectives. Prerequisite: An appropriate introductory course in Western art history at the college level, or consent of the instructor. LEC.

HA 580. History of Photography. 3 Hours H.
An introduction to the history of photography. We will consider strategies used over its history to make photography an art, a witness to truth, a record of fact, a purveyor of falsehoods, a mass medium, a hawker of goods and ideologies, an agent of political change, a means of remembrance, and more. Intended for graduate students. Not open to students with credit in HA 380. Prerequisite: HA 100, HA 151, or the equivalent, and consent of instructor. LEC.

HA 581. American Art to 1860: Inventing a Nation. 3 Hours H.
A survey of major artists and movements in painting, sculpture, and allied arts, from the period of initial European settlement to the mid-19th century. Consideration will be given to developments in portraiture, history painting, landscape, still-life, statuary, and decorative arts. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 582. American Art 1860-1900: Gilded Age. 3 Hours H.
A survey of major artists and movements in painting, sculpture, and allied arts in the later 19th century. Consideration will be given to developments in landscape painting and images of the American West, the impact of impressionism and other European movements, and the decorative programs of the Gilded Age. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 583. American Art 1900-1945: Rise of Modernism. 3 Hours H.
A survey of major artists and movements in painting, sculpture, and allied arts, from the early urban realists to the emergent avant-garde at mid century. Consideration will be given to the cosmopolitan tendencies of the 1910s and the 1920s, to regionalist impulses of the 1930s, and the assimilation of European modernism. Attention will be paid both to formal developments and to cultural context. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

Prerequisite: HA 100, HA 151, or the equivalent, or consent of instructor. LEC.

HA 585. The Art of Buddhism. 3 Hours NW / H/W.
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 385. Prerequisite: Consent of instructor. LEC.

HA 586. Japanese Painting. 3 Hours NW / H/W.
A survey covering the development of Japanese painting from the Kofun period to the early twentieth century. Topics include Buddhist and other religious paintings, narrative handscrolls, ink painting, decorative screens, ukiyo-e, and western-style paintings of the Meiji and Taisho periods. Graduate students may be expected to complete additional reading and writing assignments. Prerequisite: An introductory course in Asian art or consent of instructor. LEC.

HA 587. Japanese Sculpture. 3 Hours NW / H.
A survey of Japanese sculpture from the Kofun period (300-700 C.E.) to the present day. Emphasis is placed on works of Buddhist sculpture from the 7th through the 13th centuries. Prerequisite: An introductory course in Asian art history or consent of instructor. LEC.

HA 588. Modern and Contemporary Visual Arts of Japan. 3 Hours H.
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan’s modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 388/EALC 388. Prerequisite: An introductory course in art history or consent of instructor. LEC.

HA 589. Japanese Artistic Encounters with Europe and the United States. 3 Hours NW / H.
Consideration of Japanese artistic responses to visual culture from Europe and the United States. The course focuses upon Japanese art from the 16th century to the present. Prerequisite: A college-level introduction to Asian art history or consent of instructor. LEC.

HA 590. Special Study in African Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in African art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history or African Studies, or consent of the instructor. LEC.

HA 591. Special Study in Asian Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in Asian art, including courses taken through study abroad. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history or Asian Studies, or consent of the instructor. LEC.

HA 592. Special Study in Ancient Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in ancient art, including courses taken through study abroad. May be repeated for credit
HA 593. Special Study in Medieval Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in medieval art, including courses taken through study abroad. May be repeated for credit if content varies. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 594. Special Study in Renaissance Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in Renaissance art, including courses taken through study abroad. May be repeated for credit if content varies. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 595. Special Study in Baroque Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in Baroque art, including courses taken through study abroad. May be repeated for credit if content varies. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 596. Special Study in American Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in American art. May be repeated for credit if content varies. Same topic may not be taken at both the 300 and 500-levels. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 597. Special Study in Modern Art: ______. 1-6 Hours H.
This course is designed for the study of special topics in modern art, including courses taken through study abroad. May be repeated for credit if content varies. Prerequisite: An appropriate introductory-level course in art history, or consent of the instructor. LEC.

HA 600. Biography of a City: ______. 3 Hours H/W.
An interdisciplinary study of a city, covering its history, literature, and arts during the periods when the city's culture reached its height. LEC.

HA 677. African Design. 3 Hours NW / H/W.
This course examines the conceptualization of the "decorative" arts in Africa, including textiles, metals, ceramics, wall decoration, and jewelry, and investigates the relation of this art historical category to modernism. How did such a wide range of artistic practices come to be grouped together? Are terms such as "decorative art" and "craft" still operative, and how do they reflect ideas about race and gender? How have African artists approached "traditional" design? What social factors influenced artistic processes and what is the historical symbolism of medium? To address these questions, we will consider artists' writings, art schools and apprenticeships, gender dynamics, transnational artistic exchanges, the concept of the artist-artisan, and the meaning of material and process. Our discussions will span historical and contemporary contexts, and also will examine colonial systems of classification, gender norms and laws, practices of appropriation, and tourism. Not open to students with credit in AAAS 377/HA 377. (Same as AAAS 677.) Prerequisite: An Art History course 100 level or above, or consent of instructor. LEC.

HA 679. African Expressive Culture: ______. 3 Hours NW / H/W.
An in-depth examination of an artistic tradition shared by a number of African cultures. Discussion includes historical development related to style, use and meaning and other relevant issues. Open to juniors, seniors, and graduate students only. (Same as AAAS 679.) Prerequisite: An introductory course in art history at the college level, or consent of instructor. LEC.

HA 698. Honors Essay in Art History. 3 Hours AE61 / H.
Required for departmental honors. A course of directed research and the preparation of a paper on an art history topic, supervised by a professor. Prerequisite: A grade-point average of 3.5 in art history and 3.25 in all courses, and consent of a major advisor and supervising professor. IND.

HA 706. Seminar: ______. 3 Hours.
A concentrated study of a specific topic in art history. May be repeated for credit if content varies. Prerequisite: Consent of instructor. SEM.

HA 707. Directed Readings. 1-6 Hours.
Supervised study and research into specialized areas of art history. IND.

HA 715. Seminar in African Art. 3 Hours.
A concentrated study of a special topic relating to African Art studies. Different topics are offered in different semesters. (Same as AAAS 715.) Prerequisite: Nine hours of Art History and/or consent of instructor. SEM.

HA 719. Art Histories: Theory and Methodology. 3 Hours.
This course examines the major methodologies and theories that have shaped and continue to shape the field of art history. Through critical reading of primary, secondary, and interpretive texts, the course will analyze closely the history and current state of the discipline. Prerequisite: Nine hours of History of Art or consent of instructor. SEM.

HA 720. Asian Art: Theory and Method. 3 Hours.
This course examines important methodologies and theories of the past and present employed in the field of Asian art history. Through critical reading of primary documents and secondary scholarship, students will gain historical perspective on and practical tools for research in the history of Asian art and visual culture. Prerequisite: Nine hours of History of Art or consent of instructor. SEM.

HA 760. Proseminar in Korean Art. 3 Hours.
Intensive study of a selected topic in the visual arts of Korea; topics may focus on a particular genre, theme, historical period or group of artists, for example Buddhist painting and sculpture, Choson period landscape and genre painting, ceramics and lacquerware or modern and contemporary art in North and South Korea. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor. SEM.

HA 788. Proseminar in Japanese Art. 3 Hours.
Critical analysis of readings on selected topics in Japanese art. May be repeated for credit up to a maximum of 12 hours. Prerequisite: Consent of instructor. SEM.

HA 822. Seminar in Buddhist Art: ______. 3 Hours.
A concentrated study of selected problems dealing with Buddhist art in Asia. Different topics are offered in different seminars. May be repeated for credit up to a maximum of twelve hours. Prerequisite: Reading knowledge of Chinese or Japanese and consent of instructor. SEM.

HA 870. Seminar in Photographic History: ______. 3 Hours.
Advanced study of photographic images as made and used in the nineteenth and twentieth centuries. Requires primary research. Prerequisites include study of nineteenth century history of art. Specific topics vary. SEM.

HA 898. Franklin Murphy Seminar in Art History: ______. 3 Hours.
This seminar is given each spring by the Murphy Lecturer of the year and includes two weeks of intensive study with a nationally known expert in a special field of art history. The other weeks of seminar meetings for the
semesters are conducted by the faculty member most closely specialized
in this field. Prerequisite: Consent of supervising faculty member. SEM.

HA 899. Thesis. 1-6 Hours.
Thesis Hours. Graded on a satisfactory progress/limited progress/no
progress basis. THE.

HA 906. Seminar: _____. 3 Hours.
A concentrated study of a specific topic in art history. May be repeated for
credit if content varies. Prerequisite: Consent of instructor. SEM.

HA 907. Directed Readings. 1-6 Hours.
Supervised study and research into specialized areas of art history.
Prerequisite: Nine hours of art history and a reading knowledge of a
pertinent foreign language. IND.

HA 910. Curatorial Project: _____. 3 Hours.
Students will engage in specialized curatorial initiatives using museum
collections to produce a research paper or journal article, or an
exhibition and its attendant publication(s), or other object-based venture.
Prerequisite: Nine hours of graduate study in the history of art and a
reading knowledge of a pertinent foreign language. SEM.

HA 925. Seminar in Late Medieval Art: _____. 3 Hours.
A study of selected problems dealing with the art of the later Middle Ages.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 930. Seminar in Italian Renaissance Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 935. Seminar in Northern Renaissance Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 940. Seminar in 17th Century Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 950. Seminar in 18th Century Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 955. Seminar in 19th Century Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 960. Seminar in 20th Century Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 965. Seminar in American Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 970. Seminar in 16th Century Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 980. Seminar in Chinese Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 990. Seminar in Japanese Art: _____. 3 Hours.
A concentrated study of one or two artists, monuments or movements.
Different topics are offered in different semesters. May be repeated for
credit up to a maximum of 12 credit hours. SEM.

HA 995. Seminar in Korean Art: _____. 3 Hours.
Concentrated study of one particular genre, theme, historical period or
group of artists. Readings will include primary and secondary language
material in Korean, Japanese and/or Chinese including texts in classical
forms of these languages. May be repeated for credit up to a maximum of
twelve hours. Prerequisite: Reading knowledge of Korean, Japanese or
Chinese and consent of instructor. SEM.

HA 999. Doctoral Dissertation. 1-12 Hours.
This course may be taken more than once, but not for more than twelve
hours of credit in any one semester. Graded on a satisfactory progress/
limited progress/no progress basis. THE.

Bachelor of Arts and Bachelor of General Studies in History of Art

Why study the history of art?
The study of the visual arts in their historical contexts enriches our
understanding of human creativity and the human condition. It provides
students with the cultural literacy and critical thinking, research, and
communication skills that are relevant for a variety of careers, including in
art museums, galleries, and collections, as well as schools, universities,
publishers, and archives. The study of art history can also provide the
foundation for a career in other professions such as business, law, media,
or government.

Undergraduate Admission

Admission to KU
All students applying for admission must send high school and college
transcripts to the Office of Admissions. Unless they are college transfer
students with at least 24 hours of credit, prospective students must send
ACT or SAT scores to the Office of Admissions. Prospective first-year
students should be aware that KU has qualified admission requirements
that all new first-year students must meet to be admitted. Consult the
Office of Admissions (http://admissions.ku.edu/) for application deadlines
and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for
information about international admissions.

Students considering transferring to KU may see how their college-
level course work will transfer on the Office of Admissions (http://
credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts
and Sciences
Admission to the College is a different process from admission to a
major field. Some CLAS departments have admission requirements.
See individual department/program sections for departmental admission
requirements.

History of Art Programs

Bachelor’s degrees with majors in the history of art are offered in the
College of Liberal Arts and Sciences (B.A. and B.G.S.) and in the School
of the Arts (B.F.A.). See Bachelor of Fine Arts in History of Art (p. 2105) in the School of the Arts Department of Visual Art section of the catalog for B.F.A. requirements.

### Requirements for the B.A. or B.G.S. Major

4. Complete an art history course approved for Goal 6 in the KU Core. (The Goal 6 art history course may also fulfill one of the breadth requirements above, in which case an elective course should be taken for the final 3 required hours of art history.)

5. Art history elective (0-3 hours; see number 4 above).

Total Hours: 30

Note: HA 100/HA 300 is a 1-semester survey of Western art history intended for non-majors and does not count toward the 30 required hours in art history. A student who takes HA 100 or HA 300 and then decides to major in art history must then also take either HA 150 or HA 151 (or both). A student who already has credit in either HA 150 or HA 151, however, should not take HA 100 or HA 300.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in History of Art can be found here: History of Art (p. 1659), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in History of Art can be found here: History of Art (p. 1659), or by using the left-side navigation.

**Departmental Honors**

The department invites art history undergraduate majors to apply for graduation with departmental honors. They must meet the following criteria:

1. An overall grade-point average of at least 3.25 and an art history grade-point average of 3.5 at the time of declaring intention to seek honors.
2. In consultation with the departmental honors coordinator and with approval from a supervising professor, declared intention of seeking
honors no later than the time of enrollment for the final undergraduate semester.

3. Enrollment in HA 698 Honors Essay and full participation in a concurrent art history graduate seminar (numbered 700 or above) for which the student must write a substantial, original research paper to be submitted to the supervising professor as an honors essay.

4. Approval of the honors essay by the supervising professor and 2 other faculty members who, as a committee, certify to the departmental honors coordinator that the student has successfully completed the requirements to earn honors.

**BA in History of Art**

Below is a sample 4-year plan for students pursuing the BA in History of Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. Breadth Requirement: One course (3 hours) in History of Art at the 300+ level is required from each of the following six categories: Art between 400-1400: European, Mediterranean, or Near Eastern, Art between 1300-1600: European, Mediterranean, or Near Eastern, Art between 1600-1700: European, Art between 1700-1900: European or American, Asian art before 1900, and Art after 1900. See an advisor for help choosing courses for each category.

4. An Art History course approved for Goal 6 Integration & Creativity is required. The department recommends that students take the HA or Studio Art course to satisfy Goal 6 in either the fall or spring semester of their fourth year. HA 698 and HA 550 fulfill a Goal 6 requirement.

5. A course may double count for a Breadth requirement within the major and also for Goal 6 of the KU Core. If one course is taken to fulfill both requirements, then an additional Art History elective at the 300+ level is required.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BGS in History of Art**

Below is a sample 4-year plan for students pursuing the BGS in History of Art. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/)
### Minor in History of Art

#### Why study the history of art?

The study of the visual arts in their historical contexts enriches our understanding of human creativity and the human condition. It provides students with the cultural literacy and critical thinking, research, and communication skills that are relevant for a variety of careers, including in art museums, galleries, and collections, as well as schools, universities, publishers, and archives. The study of art history can also provide the foundation for a career in other professions such as business, law, media, or government.

#### Requirements for the Minor

**History of Art Minor Requirements**

Students selecting this minor must complete a minimum of 6 History of Art courses. Satisfied by 18 hours of History of Art coursework. 12 of the 18 hours must be at the 300 level or above. With approval of the art history undergraduate advisor, 1 closely related course taught outside of the art history department (e.g., history of architecture or design) may count toward the minor.

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120
Master of Arts in History of Art

KU offers graduate art history courses in European, American, Global Modern, Contemporary, and East Asian art. Students may pursue graduate degrees in European and American/Global Modern and Contemporary Art or East Asian Art.

The M.A. provides students with a broad and deep knowledge of the visual arts, as well as study of the basic concepts, theories, and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation for doctoral studies at KU or to apply elsewhere.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A.

To be considered for regular admission status in the program, a student must hold a bachelor's degree and have earned at least a B (3.0) grade-point average in previous academic work. Please review the full Graduate Studies Admissions Policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

A full list of the required application materials can be found on the department's website.

Application Deadline:

For fall semester admission, all application materials submitted by: January 1

For spring semester admission, all application materials submitted by: October 15

M.A. Degree Requirements

The student must complete 30 hours of graduate credit, at least 21 of which must be in art history distributed according to department requirements (see department website). Students pursuing the degree in European and American Art/Global Modern and Contemporary Art must take at least 21 credit hours at the 700-900 level, 6 hours of which must be taken at the 800 level or higher. Students pursuing the degree in East Asian Art must take at least 15 credit hours at the 700 level or higher, 6 hours of which must be taken at the 800 level or higher (see department website for specifics). All course work must satisfy grade standards. The candidate must demonstrate proficiency in the reading of a foreign language, normally a major European language, Chinese, Korean, or Japanese.

A general written examination (in European and American Art/Global Modern and Contemporary Art or East Asian Art) must be passed for the M.A. degree. M.A. and M.A./Ph.D. students who wish to be considered for admission to the Ph.D. program must complete and sign the Petition for Continuation in the Ph.D. Program form, which will be distributed at the M.A. exam. It is expected that such students will already have expressed this interest to a potential major field advisor and received that faculty member's support.

The student must pass the M.A. exam in order for the petition to be considered by the graduate faculty. After receiving departmental approval for the petition and completing all M.A. degree requirements, the student will automatically be entered into the Ph.D. program and will be expected to maintain enrollment as per Graduate Studies guidelines. Students who do not submit the petition at the time of the M.A. exam will need to reapply for admission to the art history graduate program.

Handbook for Graduate Students

A detailed presentation of departmental degree requirements and regulations is included in the department's Graduate Student Handbook, available online (https://arthistory.ku.edu/graduatestudenthandbook/).

Accelerated Master of Arts in Art History (East Asian)

Only current KU undergraduate students are eligible to apply to the Accelerated M.A. program. If you are not a current undergraduate student at KU, please review the admission requirements for History of Art’s M.A., M.A./Ph.D., and Ph.D. programs.

The Accelerated M.A. program enables qualified KU students to earn both a Bachelor’s degree and Master’s degree in art history in 5 years. 12 hours of 500-level-or-above course work in the major completed in Year 4.
of study are eligible to count for both the Bachelor’s and Master’s degrees. The M.A. degree is completed in Year 5.

The M.A. provides students with a broad and deep knowledge of the visual arts, as well as study of the basic concepts, theories, and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation for doctoral studies at KU or to apply elsewhere.

Only current KU undergraduate students are eligible to apply to the Accelerated M.A. program. If you are not a current undergraduate student at KU, please review the admission requirements for History of Art’s M.A., M.A./Ph.D., and Ph.D. programs.

Application Deadline
Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both the B.A. and M.A. degree may be completed within the 5-year time-frame. All prospective students should discuss their interest in admission to the Accelerated M.A. program with both the Undergraduate Advisor and the Graduate Academic Advisor no later than the second semester of the student’s Junior year.

Prospective students are eligible to apply to the graduate program in the second semester of their Junior year. The following requirements must be met by this time:

- Major GPA of at least 3.25 and cumulative GPA of at least 3.00;
- On track to complete all requirements for a B.A. or B.G.S. degree in History of Art from KU by the spring semester of the Senior year.

Required Application Materials

- Two letters of recommendation (preferably from professors in the major). You will be asked to enter the names and e-mail addresses for two recommenders while completing the online application. Your recommenders will automatically receive an e-mail requesting their letters when you submit the application. It is not necessary for your recommenders to send hard copies of their letters to the department if they submit their letters electronically.
- Résumé or curriculum vitae
- A one-page statement of educational and career objectives
- A writing sample, preferably from an art history course, 5-10 pages of text not including the bibliography, endnotes, or images following endnotes.

Upon review of the Application for Admission, the History of Art Department will notify the student of their eligibility to begin graduate-level coursework. Final admission to the graduate program will be contingent upon the following:

- Successful completion of all requirements for the Bachelor’s degree;
- Grades of B+ or above in all History of Art graduate-level coursework taken during the student’s Senior year.

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/)

The course requirements for this accelerated program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. Numerous graduate-level courses are regularly offered that fulfill distribution requirements for both the Bachelor’s and M.A. degrees.

The student must be approved to begin coursework toward the Accelerated Master’s prior to enrolling in any 500 level or above courses that are to count for both undergraduate and graduate credit.

and either

- HA 165 Introduction to Asian Art
- or HA 166 The Visual Arts of East Asia

### Breadth Courses: Six courses total: at least two courses must be completed at the 500 level or above and at least two courses must be completed at the 700 level or above. A course or topic may fulfill only one requirement, either for geographical or chronological breadth.

2. Breadth Courses (geographical regions): Complete one course in three out of four geographical regions.

#### A. Americas, Africa, Middle East

- HA 353/569 Modern and Contemporary African Art
- HA 370/570 American Art
- HA 377/677 African Design
- HA 390/590 Special Study in African Art: _____
- HA 396/596 Special Study in American Art: _____
- HA 529 Archaeology and Art of the Ancient Near East
- HA 536 Islamic Art and Architecture in Africa
- HA 581 American Art to 1860: Inventing a Nation
- HA 582 American Art 1860-1900: Gilded Age
- HA 583 American Art 1900-1945: Rise of Modernism
- HA 706 Seminar: _____

#### B. Europe

- HA 311 The Art and Architecture of the British Isles
- HA 322 European Architecture 300-1300
- HA 325/525 Aegean Archaeology and Art
- HA 326/526 Greek Archaeology and Art
- HA 327/537 Roman Archaeology and Art
- HA 330 Italian Renaissance Art
- HA 331 Northern European Art from Van Eyck to Brueghel
- HA 335/535 Renaissance Architecture in Italy
- HA 372 Baroque Art in Europe
- HA 393/593 Special Study in Medieval Art: _____
- HA 394/594 Special Study in Renaissance Art: _____
- HA 395/595 Special Study in Baroque Art: _____
- HA 506 Early Medieval and Romanesque Art
### 3. Breadth Courses (chronological periods): Complete one course in three out of four chronological periods. 9

#### A. Pre-1400
- HA 322 European Architecture 300-1300
- HA 325/525 Aegean Archaeology and Art
- HA 326/526 Greek Archaeology and Art
- HA 327/537 Roman Archaeology and Art
- HA 361/561 Buddhist Art of Korea
- HA 392/592 Special Study in Ancient Art: ______
- HA 393/593 Special Study in Medieval Art: ______
- HA 506 Early Medieval and Romanesque Art
- HA 507 Gothic Art
- HA 510 Medieval Manuscripts and Early Printed Books
- HA 527 Late Medieval Art in Italy
- HA 529 Archaeology and Art of the Ancient Near East
- HA 538 Pompeii and Herculanum
- HA 545 Early Chinese Art

#### B. 1400-1850
- HA 330 Italian Renaissance Art
- HA 331 Northern European Art from Van Eyck to Brueghel
- HA 335/535 Renaissance Architecture in Italy
- HA 347/547 Ceramics of East Asia
- HA 354/554 Japanese Prints
- HA 372 Baroque Art in Europe
- HA 394/594 Special Study in Renaissance Art: ______
- HA 395/595 Special Study in Baroque Art: ______
- HA 512 Humanism and Reform: 16th Century Northern European Art
- HA 533 Rococo to Realism: Painting in Europe c. 1750-1848
- HA 576 Art in the Age of Rubens, Rembrandt and Vermeer: Northern Baroque
- HA 579 Southern Baroque Art
- HA 581 American Art to 1860: Inventing a Nation

#### C. Post-1850
- HA 343/543 Special Study in 20th/21st-Century Art: ______
- HA 344/544 Manga: Histories and Theories
- HA 353/569 Modern and Contemporary African Art
- HA 363 Modern Korean Art and Culture
- HA 371/571 Modern Sculpture
- HA 377/677 African Design
- HA 380/580 History of Photography
- HA 388/588 Modern and Contemporary Visual Arts of Japan
- HA 390/590 Special Study in African Art: ______
- HA 534 Impressionism and Post-Impressionism: 1848-1900
- HA 536 Islamic Art and Architecture in Africa
- HA 564 European Art, 1900-1945
- HA 566 Art From 1945 to the 1980s: Modernism to Post-Modernism
- HA 567 Contemporary Art

#### C. East Asia
- HA 340/540 Special Study in Asian Art Before 1900: ______
- HA 344/544 Manga: Histories and Theories
- HA 347/547 Ceramics of East Asia
- HA 354/554 Japanese Prints
- HA 361/561 Buddhist Art of Korea
- HA 362/562 Ceramics of Korea
- HA 363 Modern Korean Art and Culture
- HA 367 Art and Culture of Japan
- or HA 467 Art and Culture of Japan, Honors
- HA 368 Art and Culture of China
- or HA 468 Art and Culture of China, Honors
- HA 369 Art and Culture of Korea
- or HA 469 Art and Culture of Korea, Honors
- HA 385/585 The Art of Buddhism
- HA 388/588 Modern and Contemporary Visual Arts of Japan
- HA 391/591 Special Study in Asian Art: ______
- HA 488 Chinese Painting, Honors
- HA 539 History of Japanese Buddhist Art
- HA 545 Early Chinese Art
- HA 546 Chinese Sculpture
- HA 549 Chinese Painting
- HA 586 Japanese Sculpture
- HA 586 Japanese Painting
- HA 587 Japanese Sculpture
- HA 760 Proseminar in Korean Art
- HA 788 Proseminar in Japanese Art
- HA 789 Proseminar in Chinese Art

#### D. Cross-regional
- HA 371/571 Modern Sculpture
- HA 380/580 History of Photography
- HA 566 Art From 1945 to the 1980s: Modernism to Post-Modernism
- HA 567 Contemporary Art
- HA 589 Japanese Artistic Encounters with Europe and the United States
- HA 706 Seminar: ______
The full 30 hours must include:

- graduate coursework, for a total of 30 hours of graduate credit.

In addition to the 12 credit hours of graduate coursework taken during the senior year, students must complete an additional 18 credit hours of language study or establish a plan for passing the proficiency exam at the beginning of Year 5. Should the student not pass the proficiency exam, they will be expected either to enroll in the appropriate level of language study or establish a plan for passing the department's language exam at the start of the second semester of Year 5. These courses should represent a balanced distribution of graduate-level (500 level or above) courses in Chinese, Japanese, and Korean art history.

### Written Comprehensive Examination

A general written examination in East Asian art must be passed for the M.A. degree.

A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook, available online (https://arthistory.ku.edu/graduatetestudenthandbook/).

### Progression Requirements

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Once approved to begin graduate coursework, the student must meet with the DGS to plan the final year of undergraduate study.
2. At the end of the final semester of undergraduate study (Year 4), the department will review the student’s performance in graduate-level HA courses taken in Year 4. The student must earn a grade of B+ or better in each of these courses to be eligible for regular admission to the master’s degree.
3. Following completion and award of the undergraduate degree, the admitted student will again meet with the DGS to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated.
4. For those students who do not meet the minimum GPA requirement of 3.0 in the first semester of Year 5, the department may, at its discretion, devise a plan of study to address the student’s deficiencies, or may dismiss the student from the program.
5. The student will not be permitted to enroll in additional courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the Accelerated Master’s within one year of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

The Accelerated M.A. program enables qualified KU students to earn both a Bachelor's degree and Master's degree in art history in 5 years. 12 hours of 500-level-or-above course work in the major completed in Year 4 of study are eligible to count for both the Bachelor's and Master's degrees. The M.A. degree is completed in Year 5.

The M.A. provides students with a broad and deep knowledge of the visual arts, as well as study of the basic concepts, theories, and methods of the discipline. The M.A. may be pursued as a terminal degree or as preparation for doctoral studies at KU or to apply elsewhere.

Only current KU undergraduate students are eligible to apply to the Accelerated M.A. program. If you are not a current undergraduate student at KU, please review the M.A., M.A./Ph.D., and Ph.D. program catalog pages.

Application Deadline

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both the B.A. and M.A. degree may be completed within the 5-year time-frame. All prospective students should discuss their interest in admission to the Accelerated M.A. program with both the Undergraduate Advisor and the Graduate Academic Advisor no later than the second semester of the student’s Junior year.

Prospective students are eligible to apply to the graduate program in the second semester of their Junior year. The following requirements must be met by this time:

- Major GPA of at least 3.25 and cumulative GPA of at least 3.00;
- On track to complete all requirements for a B.A. or B.G.S. degree in History of Art from KU by the spring semester of the Senior year

### Required Application Materials

1. The Art after 1900 breadth course must be in an East Asian Topic.
2. This requirement can be fulfilled by taking a graduate-level seminar
• Two letters of recommendation (preferably from professors in the major). You will be asked to enter the names and e-mail addresses for two recommenders while completing the online application. Your recommenders will automatically receive an e-mail requesting their letters when you submit the application. It is not necessary for your recommenders to send hard copies of their letters to the department if they submit their letters electronically.

• Résumé or curriculum vitae

• A one-page statement of educational and career objectives

• A writing sample, preferably from an art history course, 5-10 pages of text not including the bibliography, endnotes, or images following endnotes.

Upon review of the Application for Admission, the History of Art Department will notify the student of their eligibility to begin graduate-level coursework. Final admission to the graduate program will be contingent upon the following:

• Successful completion of all requirements for the Bachelor’s degree;

• Grades of B+ or above in all History of Art graduate-level coursework taken during the student’s Senior year

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

The course requirements for this accelerated program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. Numerous graduate-level courses are regularly offered that fulfill distribution requirements for both the Bachelor’s and M.A. degrees.

The student must be approved to begin coursework toward the Accelerated Master’s prior to enrolling in any 500 level or above courses that are to count for both undergraduate and graduate credit.

### Ha 586 Japanese Sculpture

### Ha 587 Japanese Painting

### Ha 706 Seminar: ______
4. Complete a 500 level or above art history course approved for 3 Goal 6 in the KU Core. (The Goal 6 art history course may also fulfill one of the breadth requirements above, in which case an elective course should be taken for the final 3 required hours of art history.)

5. Art history elective (0-3 hours; see number 4 above).

Total Hours: 30

Note: HA 100/HA 300 is a 1-semester survey of Western art history intended for non-majors and does not count toward the 30 required hours in art history. A student who takes HA 100 or HA 300 and then decides to major in art history must then also take either HA 150 or HA 151 (or both). A student who already has credit in either HA 150 or HA 151, however, should not take HA 100 or HA 300.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://degreeprogress.ku.edu/gpa/).

**Master’s Degree Requirements**

Proficiency in a foreign language is required for the M.A. degree. Students in the Accelerated Master’s program should complete at least the fourth semester of a relevant foreign language (normally French, German, Italian, or Spanish) with a grade of B or better by the end of Year 4 or be prepared to demonstrate proficiency by passing the department’s language proficiency exam at the beginning of Year 5. Should the student not pass the proficiency exam, they will be expected either to enroll in the appropriate level of language study or establish a plan for passing the language exam at the start of the second semester of Year 5.

In addition to the 12 credit hours of graduate coursework taken during the senior year, students must complete an additional 18 credit hours of graduate coursework, for a total of 30 hours of graduate credit.

The full 30 hours must include:

- At least 4 graduate courses (12 credit hours) at the 500 level or above
- At least 4 graduate seminars (12 credit hours) at the 700 level or above
- At least 2 graduate seminars (6 credit hours) at the 800 level or above

See the department website (https://arthistory.ku.edu/) for distribution requirements of graduate courses.

**Written Comprehensive Examination**

A general written examination in European and American/Global Modern and Contemporary art must be passed for the M.A. degree.

A detailed presentation of departmental degree requirements and regulations is included in the department’s Graduate Student Handbook, available online (https://arthistory.ku.edu/graduatetestudenthandbook/).

**Progression Requirements**

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Once approved to begin graduate coursework, the student must meet with the DGS to plan the final year of undergraduate study.

2. At the end of the final semester of undergraduate study (Year 4), the department will review the student’s performance in graduate-level HA courses taken in Year 4. The student must earn a grade of B+ or better in each of these courses to be eligible for regular admission to the master’s degree.

3. Following completion and award of the undergraduate degree, the admitted student will again meet with the DGS to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated.

4. For those students who do not meet the minimum GPA requirement of 3.0 in the first semester of Year 5, the department may, at its discretion, devise a plan of study to address the student’s deficiencies, or may dismiss the student from the program.

5. The student will not be permitted to enroll in additional courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the Accelerated Master’s within one year of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

### Total Hours 138

1. This requirement can be fulfilled by taking a graduate-level seminar

Please note:
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

---

**Doctor of Philosophy in History of Art**

KU offers graduate art history courses in European, American, Global Modern, Contemporary, and East Asian art. Students may pursue graduate degrees in European and American/Global Modern and Contemporary Art or East Asian Art.

The Ph.D. is intended for students who already hold an M.A. degree in art history.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Admission to the Ph.D.

Applicants for the Ph.D. are expected to hold an appropriate M.A. degree. To be considered for regular admission status in the program, a student must hold a bachelor's degree and have earned at least a B (3.0) grade-point average in previous academic work. Please review the full Graduate StudiesAdmissions Policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

A full list of the required application materials can be found on the department's website (https://arthistory.ku.edu/admission-phd/).

### Application Deadline:

**For fall semester admission, all application materials must be submitted by: January 1**

**For spring semester admission, all application materials submitted by: October 15**
University Honors Program

Honors Courses

Honors courses are open to qualified undergraduates in any school of the university.

University Honors Program

The goal of the University Honors Program is to challenge students to launch extraordinary lives. We do this by providing exceptional classes, advising, and enrichment opportunities to academically talented undergraduates at the University of Kansas. From convocation to commencement, we strive to foster a transformational community of critical thinkers, a community that is diverse, highly qualified, engaged, and motivated to lead.

Overview

Honors classes are typically small, discussion-oriented, and taught by full-time members of the faculty. Many honors courses fulfill KU Core (or major) requirements, but they are likely to do so in more depth than their non-honors equivalents. While there is no required number of honors credit hours in which a student must enroll each semester, students must complete at least six (6) honors courses totaling at least eighteen (18) credit hours to graduate with University Honors.

During each student’s first year in the program, a semester-long seminar provides an introduction to an academic area of study in an informal setting that allows students to get to know one another and their instructor. The seminar explores the research methods of a discipline and acquaints students with resources available at KU.

Whatever a student’s school or major, the University Honors Program encourages them to explore their interests through the broad curriculum choices KU has to offer, expanding their knowledge through a range of liberal arts and science courses. Additionally, Honors students are required to engage in educational experiences beyond the classroom such as research, study abroad, internships, or community service.

Honors advising involves regular, personalized meetings with honors advisors, faculty fellows, and honors mentors. The program’s advising team facilitates early and frequent contact with academic advisors in the student’s areas of interest. Honors students benefit from priority enrollment, which provides flexibility in planning one’s academic curriculum.

More information is available at honors.ku.edu (https://honors.ku.edu/).

Admission

Students from all backgrounds who are seeking academic challenges, personalized guidance, and an intellectual community during their time at KU are encouraged to apply to the University Honors Program. The program uses a holistic admissions process. For incoming first-year students, the program considers a student’s response to short answer questions and an essay prompt, as well as their academic record and involvement. For current KU students and incoming transfer students, applications are evaluated based on college GPA, involvement and activities, and an essay. Students interested in applying can learn more at honors.ku.edu/apply (http://honors.ku.edu/apply/).

Requirements for Completion

- Cumulative GPA of 3.25 or higher at graduation.
- Students whose GPA drops below 3.25 prior to their final semester will be expected to raise their GPA in subsequent semesters.
- Students whose GPA is consistently below 3.25 over two or more consecutive semesters may be discontinued from the Honors Program.
• One (1) first year honors seminar (HNRS 177, HNRS 190 or HNRS 195).

• At least six (6) honors courses totaling at least eighteen (18) credit hours. These can include:
  • Courses designated HNRS.
  • Honors courses offered by individual departments or programs.
  • Graduate-level courses numbered 700 and above.
  • Less commonly taught languages (maximum of two courses).
  • Courses completed under an Honors Course Contract (https://honors.ku.edu/course-contract/).

• Four (4) Enhanced Learning Experiences (ELEs). Each ELE may have course-based and/or experience-based paths for completion. Each of the student’s four ELEs must be from a different category, chosen from among the following:
  • Public Service.
  • Cultural Literacy & Social Justice.
  • Global Citizenship.
  • Aesthetic Engagement.
  • Professional Development & Social Entrepreneurship.
  • Leadership.
  • Research Skills & In-Depth Learning.
  • Interdisciplinarity & Breadth of Learning.

To receive credit for an ELE, students must post a written reflection in their KU Portal when the experience is completed. Though some experiences may overlap between two or more categories, no single activity can be counted toward more than one ELE requirement. A course taken toward the 18 hours of Honors credit can also be used to fulfill an ELE if the student completes an appropriate reflection.

For further questions regarding Honors Program requirements, please contact the University Honors Program at honors@ku.edu or 785-864-4225.

Nunemaker Center

Nunemaker Center is the home of the Honors Program, located on Daisy Hill across the street from Templin Hall. Honors students are encouraged to take advantage of the spaces available at Nunemaker, including several classrooms and study areas, a kitchen, comfortable lounges, and wireless Internet access. Honors advisors are regularly available to meet with students throughout the year, and the center is open most days and evenings.

Courses

HNRS 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, course for first-time freshmen, addressing current issues in Honors. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HNRS 190. First Year Honors Seminar: _____. 1 Hour U.
This seminar serves as an introduction to the University Honors Program, to research opportunities and other academic resources available at the University of Kansas, and to specific disciplinary perspectives on an overarching theme. While closely examining the designated topic, students develop skills in research, reading, writing, and in-depth discussion. Required of all first-year Honors students; open only to first-year students in the University Honors Program. LEC.

HNRS 195. Transfer Honors Seminar: _____. 1 Hour U.
This seminar serves as an introduction to the Honors Program, and to the research opportunities and other academic resources available at the University of Kansas. This seminar fosters the transfer students’ oral and written communication and the critical assessment of their academic and pre-professional goals. The instructor of the student’s seminar also serves as the student’s honors mentor. Open only to transfer students in the University Honors Program. LEC.

HNRS 250. Citizen Philanthropy: An Introduction to the Nonprofit World. 3 Hours AE51 / U.
This interdisciplinary course explores the historical and economic roots of citizen generosity and the role of the nonprofit/philanthropic sector. This service learning course combines volunteer experiences and public service internships with research and exploration of the missions and ethical orientations of nonprofit organizations. The course is designed to explore the social and the ethical contexts of the nonprofit sector with opportunities to demonstrate social and civic responsibility. LEC.

HNRS 300. Honors Commons Course. 3 Hours H.
An opportunity to investigate a broad topic across various subjects and disciplines. In alliance with the University Commons at Spooner Hall, this course examines a problem or topic from perspectives of several disciplines across the arts, sciences, social sciences and humanities. The course is complemented by a dedicated annual university lecture series germane to the course’s topic. Prerequisite: Membership in the University Honors Program. LEC.

HNRS 310. University Scholars Seminar. 3 Hours U.
An interdisciplinary survey to acquaint students with some of the main ideas, methods, and outstanding problems in various areas of scholarship. The organization of human knowledge inside and outside the university, as well as the implications of this organization for scholarship and society, are emphasized. Ideas and methods in various disciplines are contrasted and compared. Required of and open only to newly admitted students in the University Scholars Program. LEC.

HNRS 320. Global Scholars Seminar. 3 Hours H.
The Global Scholars Seminar is designed to foster academically talented and motivated undergraduate students’ interest in global studies. Through interdisciplinary coursework, mentorship and research experience in global studies, the seminar provides cohorts of students with opportunities to develop their intellectual capabilities and interests to the fullest and better prepares them for careers, further study, and leadership roles in today’s complex international arena. Required of and open only to newly admitted students in the Global Scholars Program. LEC.

HNRS 370. Personal Writing Seminar. 1 Hour U.
This seminar helps students develop their personal writing abilities. Students analyze language and rhetorical choices in the genre of the personal essay. Students demonstrate rhetorical flexibility within the genre, considering audience, purpose, and application of the material. This course is intended for candidates for national fellowships, regardless of University Honors Program membership. (Same as LAS 370.) Prerequisite: Permission of the Office of Fellowships. LEC.

HNRS 380. Critical Thinking and Advocacy Seminar. 1 Hour U.
The focus of this class is on honing the two basic skills of critical thinking and advocacy. In this seminar, students develop a basic system for critical analysis that can be applied generally; test that critical analysis system in a series of practicums to develop the skills necessary to apply it; and develop a basic system for designing effective and ethical persuasive messages. (Same as LAS 380.) Prerequisite: Permission of the Office of Fellowships. LEC.
HNRS 395. Edwards Campus Honors Seminar. 1 Hour.
This seminar serves as an introduction to the KU Edwards Campus Honors Program, and to the research opportunities and other academic resources available at the University of Kansas Edwards Campus. The seminar focuses on an overarching theme or current societal problem, and explores specific disciplinary perspectives of that theme. While closely examining the designated topic, students develop skills in research, reading, writing, and in-depth discussion. This seminar fosters the KU Edwards Campus students' oral and written communication and the critical assessment of their academic and pre-professional goals. Required of all KU Edwards Campus Honors students. Prerequisite: KU Edwards Campus Honors Student. LEC.

HNRS 410. Professional Responsibility, Honors: ______. 1-3 Hours.
This course focuses on the challenges facing practitioners in a specific professional field. Students will learn about the ethics, conduct, and other responsibilities associated with that profession, and will explore career choices within the field. Prerequisite: Membership in the University Honors Program, sophomore standing or above, and prior completion of an Honors Seminar (HNRS 190 or HNRS 195.) Concurrent enrollment with HNRS 195 is possible with special permission from the Honors Program. SEM.

HNRS 430. Honors Interdisciplinary Seminar. 3 Hours U.
An opportunity to synthesize topic across various subjects and disciplines. This course examines a problem or topic from the perspectives of several disciplines. Open to qualified sophomores, juniors, and seniors in the University Honors Program. LEC.

HNRS 492. Topics and Problems on: ______. 1-6 Hours U.
An interdisciplinary study of different topics. Designed especially for juniors and seniors. LEC.

HNRS 495. Honors Directed Study. 1-3 Hours U.
Individual and supervised study of an interdisciplinary topic or topics. May be repeated for a total of up to 6 hours. Up to one 3-hour enrollment will count as one course toward completion of the University Honors Program. Prerequisite: Membership in the University Honors Program and consent of the instructor. IND.

HNRS 496. Honors Internship. 1-3 Hours U.
Students participate in an internship in an organization related to their professional/career goals. An internship plan is developed by the student in conjunction with the student's academic adviser and an authorized agent of the internship site. Prerequisite: Instructor permission required. INT.

HNRS 497. Honors Seminar Assistantship. 0 Hours.
Open to all Honors students selected to be Honors Seminar Assistants, regardless of major field. These students assist Seminar instructors in the teaching of an Honors seminar in various ways, including but not limited to: leading group discussions, engaging students in the learning process, developing classroom material, encouraging and guiding students to solve problems themselves and helping students prepare for their advising appointments. May be repeated. Prerequisite: HNRS 190 or HNRS 195 and membership in the University Honors Program. LEC.

HNRS 595. Edwards Campus Honors Capstone. 2 Hours.
This course serves as an interdisciplinary capstone experience for students in the KU Edwards Honors Program. It is an opportunity to synthesize a topic across various subjects and disciplines. This course examines a problem or topic from the perspectives of several disciplines incorporating experiential learning opportunities. Open to qualified juniors and seniors in the KU Edwards Campus Honors Program. Prerequisite: HNRS 395. HNRS 395 may be taken concurrently with instructor permission. LEC.

Humanities Program

Why study Humanities?
Integrated learning in humanities fosters broad cultural understanding by exploring the connections among diverse areas of knowledge. Studying humanities allows students to examine key issues relating to human experiences and the human condition from a variety of perspectives, including philosophy, history, religion, literature, art, and language. Such study provides excellent preparation for 21st century careers by preparing students to take part in the world around them, equipping them for success in many fields, including business, medicine, law, marketing, sales, and social services.

Undergraduate Programs

Courses for Nonmajors
All HUM courses are open to nonmajors. HUM 204, HUM 205, HUM 206, and PCS 120 are recommended to nonmajors for fulfilling KU CORE Goal 1.1 (Critical Thinking). HUM 110 and HUM 204 are recommended for fulfilling KU CORE Goal 2.1 (Written Communication). HUM 110, HUM 206, HUM 150, HUM 304, HUM 308, HUM 312, and HUM 430 are recommended for fulfilling KU CORE Goal 3 (Breadth of Knowledge). HUM 204, HUM 205, HUM 302, HUM 430, HUM 435, HUM 505, and HUM 600 are recommended for fulfilling KU CORE Goal 4.2 (Culture and Diversity).

Humanities Programs
Students have unusual freedom to select courses from a variety of departments. They can create integrated interdisciplinary programs and work closely with a faculty advisor. Majors may choose a track in global humanities or peace and conflict studies. Depending on the track, majors may focus on a particular era or culture in Eastern or Western civilization, such as the Italian Renaissance or China during the Ming dynasty, from an interdisciplinary perspective. Or they may examine a theme or issue that cuts across disciplinary lines, such as classicism versus romanticism or ideas of war and peace.

The Graduate Certificate program in Peace & Conflict Studies is designed to provide students with a focused program of study in the subject area and certification of the completion of the program on the graduate transcript. Enrollment in the program will be open to students admitted to a regular KU graduate program or to non-degree seeking graduate status. A Graduate Certificate in Peace & Conflict Studies should be of interest and value to students across a broad range of humanistic and social-scientific disciplines, especially in such fields as the international area studies programs, History, International Studies, Political Science, and Religious Studies. The certificate will enhance the credentials of students seeking careers in government service both civil and military, nongovernmental organizations, international business, law, and teaching.

Courses

HUM 110. Introduction to Humanities. 3 Hours HL GE21/GE3H / H.
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education, perspectives and methods in the humanities, the humanities and human diversity, and interdisciplinary approaches to understanding and interpreting texts. LEC.
HUM 111. Introduction to Humanities, Honors. 3 Hours HL GE21/GE3H / H.
An introduction to the humanities as a division of learning and to interdisciplinary study in the humanities. Topics include the history and role of the humanities in a liberal education; perspectives and methods in the humanities; the humanities and human diversity; and interdisciplinary approaches to understanding and interpreting texts. Prerequisite: Membership in the University Honors Program. LEC.

HUM 112. Exploring The Human Condition: ____. 3 Hours GE11 / H.
This is a special topics course that provides an interdisciplinary exploration of human experience through the study of specific themes, periods or genres. Through reading and discussion of primary sources and scholarly texts, students will examine issues central to the human condition. This course introduces the methods that disciplines in the humanities use to analyze them, and the skills of close reading, critical analysis, and the interpretation of evidence. Assignments require students to analyze source material, synthesize information, solve problems and construct arguments to support conclusions. LEC.

HUM 114. Western Civilization I Honors. 3 Hours AE42/GE11/GE21 / H.
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. Prerequisite: Membership in the University Honors Program or permission of the department. LEC.

HUM 115. Western Civilization II Honors. 3 Hours AE42/GE11 / H.
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period. Prerequisite: Membership in the University Honors Program or permission of department. LEC.

HUM 125. Introduction to Medical Humanities. 3 Hours H.
An interdisciplinary introduction to the field of medical humanities, which considers the relationship between medicine and humanistic thought. Students analyze the role of medicine in a variety of genres, while considering the growing importance of narrative and artistic expression in the medical profession. Topics may include: the objectification of the body, ageism, art and self-expression as medical care, and the impact of race, class, and culture on definitions of "illness", "health", and "beauty". LEC.

HUM 133. Technology and the Individual. 3 Hours GE11 / H.
This course focuses on the complex relationship among technological change, increasing social complexity, and the individual from the Paleolithic Era to the so-called Computer Revolution, with a particular emphasis on Europe and the United States. Through the study of foundational texts in the history of technology and dystopian fiction, students will analyze a range of technologies from stone tools to smartphones to better understand the social, cultural, and economic forces that underlie technological change and how to critically evaluate assumptions about the nature of that change. LEC.

HUM 140. Introduction to World Literature. 3 Hours GE21 / H.
This course provides an introduction to the field of world literature as an approach to critical reading and writing about literary works in a global context. Topics may include: what constitutes literature; challenges to reading works across time or within different cultural traditions; reading works in translation; history of writing technologies and canon formation; literature and market forces; and the literature of global encounters and exchanges. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. LEC.

HUM 150. Civilizations and the Individual. 3 Hours HL GE3H / H.
Introduction to perennial themes that define human experience through reading and discussion of primary texts. Topics may include the nature of humanity; nature and the supernatural; the individual and the state. Prerequisite: Membership in the University Honors Program, or permission of instructor. LEC.

HUM 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Humanities. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HUM 204. Western Civilization I. 3 Hours AE42/GE11/GE21 / H.
A program of study using readings and writing to explore and understand the record of Western Civilization from the ancient world through the early modern period. This is a writing intensive and writing instructive course designed to expand critical thinking and global awareness through the medium of composition practice. LEC.

HUM 205. Western Civilization II. 3 Hours AE42/GE11 / H.
A program of study emphasizing the reading and discussion of some of the influential writings and ideas that have shaped the intellectual and cultural heritage of the Western world. Western Civilization II includes readings from the modern period. LEC.

HUM 206. Contemporary Western Civilization. 3 Hours HL GE11/GE3H / H.
A sequel to the two Western Civilization courses which offers the opportunity to examine influential works of literature, philosophy, history, and political thought written since the end of World War II. In keeping with the decline of colonialism and the growth of global and multicultural civilization since 1945, the readings of the course are selected from both Western and non-Western writers. LEC.

HUM 251. Civilizations and Individual, Honors. 3 Hours HL GE3H / H.
Honors version of HWC 250. Introduction to perennial themes that define human experience through reading and discussion of primary texts. Topics may include the nature of humanity; nature and the supernatural; the individual and the state. Prerequisite: Membership in the University Honors Program, or permission of instructor. LEC.

HUM 300. Studies In: ____. 3 Hours H.
An interdisciplinary course, focusing on different topics and drawing on diverse media, cultures, and historical periods. Humanities-based, this course, depending on its topic, may include the arts, the social sciences, and the natural sciences. May be repeated for credit with different topics. LEC.

HUM 302. European Culture and Society 1945 to Present. 3 Hours HT AE42 / H.
The course provides historical, cultural, and political overviews of Europe since 1945 with particular emphasis on the contribution of French and Italian culture and society. The course emphasizes Europe's contribution to Western intellectual thought, social movements, arts and literature, and global society. (Same as EURS 302.) LEC.
HUM 304. World Literature I. 3 Hours HL GE3H / H.
The study of great books in English translation from antiquity through the
fifteenth century from two or more national literatures. LEC.

HUM 308. World Literature II. 3 Hours HL GE3H / H.
The study of great books in English translation from the sixteenth,
seventeenth, eighteenth, and early nineteenth centuries from two or more
national literatures. LEC.

HUM 312. World Literature III. 3 Hours HL GE3H / H.
The study of great books in English translation in the modern period (late
nineteenth and twentieth centuries) from two or more national literatures.
LEC.

HUM 320. Being Human in the Workplace. 3 Hours AE51 / H.
a study of what it means to be human and humane in the workplace.
Topics include the concepts of work, the worker, and the workplace;
workers' rights; issues of discrimination; business ethics; privacy and
confidentiality; bullying; whistle blowing; workplace environment. LEC.

HUM 325. Theory and Method in Interdisciplinary Studies in the
Humanities. 3 Hours H.
An introduction to recent cultural theory and interdisciplinary methods
used across the humanities and qualitative social sciences. Includes
examination of traditional views of the humanities and its implicit cultures
along with discussion of new methodologies of cultural analysis. LEC.

HUM 328. Law and the Legal Profession. 3 Hours H.
An overview of Western Legal education, both in historical and modern
contexts. Legal subjects such as constitutional law, contracts, property,
the courts and ethics are also studied. Students gain perspective on law
as a profession, and the legal environments in which we live. Note: this
course does not guarantee admission to law school or constitute entry into
the legal profession as a career. It is intended to provide information and
help students identify interests in the field of legal study. LEC.

HUM 332. Sex in History. 3 Hours HT / H.
This course offers a survey of the history of human sexuality in the
Western world; the second half of the semester emphasizes the
American experience. Topics for consideration may include:
masturbation, pornography, sex work, homosexuality, bisexuality,
"perversions" (paraphilias), sex and marriage, racialized sexualities,
sexual violence, trans* identities and experiences, sexuality and national
identities, and colonized sexualities. The course demonstrates the
various ways in which sex, specifically the social and political meanings
attributed to physical acts, changes over time and shapes human
experiences and interactions far beyond the bedroom. (Same as AMS
323, HIST 332 and WGSS 311.) LEC.

HUM 335. Introduction to Indigenous Studies. 3 Hours NW / H.
This course is an introduction to the study of modern and historic
indigenous peoples. It surveys the concepts, methods and content
relevant to Indigenous Studies, using case studies drawn from the diverse
indigenous cultures. Special attention is paid to the various ways in which
standard academic disciplines --history, anthropology, literature, law,
political science, among others --contribute to the study of Indigenous
cultures and current issues. The course illustrates that the social, political,
religious, and economic aspects of indigenous life are interconnected and
tribal histories and cultures cannot be understood without an awareness of
these fields. (Same as ISP 335.) LEC.

HUM 340. Understanding the European Migrant Crisis. 3 Hours H.
This course offers students the opportunity to explore the social, political
and ethical consequences of transnational migration in a European
context. As the foundation of a winter-break study abroad experience in the
Humanities Program, the course surveys the history and geography of
human mobility across the EU with a focus on concepts such as
"fortress Europe," and "shelter Europe," and the borderization of the
Mediterranean basin. The main component of the course consists of
experiential learning activities. Students engage in site visits, interact
with activists and immigrants, and participate in migrant relief projects to
better understand the dynamics of immigration policies as well as efforts
to foster multiculturalism and integration within the area in question. (The
program will take place in select European cities and location may vary by
semester.) Prerequisite: Open only to students in the Humanities winter
break study abroad program. FLD.

HUM 345. Indian Territory. 3 Hours H.
This course examines the cultural, social, economic, environmental,
and political background of Indian territory in what is now the state of
Oklahoma. It surveys the diverse geographical regions, tribal cultures,
the impact of the Indian Removal Act, assimilation, acculturation, westward
expansion, the Civil War, boarding schools, the Dawes Act, the Curtis Act,
and land runs on Territory residents. The course also treats post-Civil War
violence, outlaws, and the role of tribal courts along with controversies
over removals, Land Run celebrations, allotment scandals, and Osage oil
murders. (Same as HIST 318 and ISP 345.) LEC.

HUM 348. American Indian and White Relations to 1865. 3 Hours H.
This course provides an intensive survey of the Indians of North America
from Prehistory to 1865, and focuses on ancient indigenous cultures, early
European-Indian relations and the impact of European culture upon the
indigenous peoples of North America. (Same as HIST 351, ISP 348.)
LEC.

HUM 350. American Indians Since 1865. 3 Hours AE41 / H.
This course examines American Indian/White relations from
reconstruction to the present. It surveys the impact of westward expansion
and cultural changes brought about by the Civil War, forced education,
intermarriage, the Dawes Act, the New Deal, the World Wars, termination,
relocation and stereotypical literature and movies. The class also
addresses the Red Power and AIM movements, as well as indigenous
efforts to decolonize and to recover and retain indigenous knowledge.
After learning about the past from both Native and non-Native source
materials, students will gain multiple perspectives about historical events
and gain understandings of diverse world views, values, and responses to
adversity. (Same as HIST 352 and ISP 350.) LEC.

HUM 353. Perspectives on Science, Engineering and Mathematics. 3
Hours H.
Perspectives explores a selection of topics and episodes in the history of
science engineering and mathematics relevant to future secondary STEM
teachers and to all students who seek to understand how knowledge
has emerged through torturous struggles, against obstinate resistance,
and within cultural, religious, and social structures. Students are brought
to understand that the STEM disciplines are not merely a body of facts,
theories, and techniques but they involve diverse, evolving processes
which are continually generated and reformulated. The course provides
historical perspectives on how practical needs, social conflicts, and
personalities have shaped the content and direction of the STEM
disciplines. The specific objectives and expectations are part of five broad,
interlocking goals: 1) to provide an overview of the history of science,
engineering, and mathematics; 2) to enable an understanding of the
nature and process of science, engineering, and mathematics 3) to enable
students to put these historical and philosophical perspectives to work in
both communication and instruction; 4) to promote intellectual curiosity
and sharpen critical thinking skills; and 5) to improve presentation and
writing skills. The course is a mixture of online activities, readings,
videos and discussion. A once a week synchronous online meetings for
discussion is required. (Same as HIST 363.) LEC.
HUM 364. Pregnancy in Modern Literature. 3 Hours HL GE21.
An examination of pregnancy, childbirth and reproductive control as depicted in literature from various national traditions in the twentieth and twenty-first centuries. This course draws together voices from literature, history, and feminist theory to deepen students' understanding of the ways nationality, class, race, ability, and gender affect the aesthetics surrounding reproduction. Special attention is given to the relationship between society and the pregnant/postpartum individual. Other topics may include: eugenics, contraception, male pregnancy, and speculative reproduction. (Same as WGSS 364.) LEC.

HUM 365. Angry White Male Studies. 3 Hours H.
This course charts the rise of the “angry white male” in America and Britain since the 1950s, exploring the deeper sources of this emotional state while evaluating recent manifestations of male anger. Employing interdisciplinary perspectives this course examines how both dominant and subordinate masculinities are represented and experienced in cultures undergoing periods of rapid change connected to modernity as well as to rights-based movements of women, people of color, homosexuals and trans individuals. (Same as AMS 365, HIST 364 and WGSS 365.) LEC.

HUM 366. Fat, Food and the Body in Global Perspective. 3 Hours H.
An examination of fat and food as they relate to human embodiment in a variety of world locations. Bringing into a dialogue a number of disciplinary voices, including anthropology, fat studies, feminist theory, food studies, history, medicine, and psychology, the course applies theories of culture and embodiment to select global case studies as a means of approaching the pleasures, anxieties, health implications, and symbolic functions of ingesting food and drink. Topics may include the cultural and gender politics of fatness and thinness; anorexia and feederism; food, sex, and animality; vegetarianism, food scares and food purity movements; neoliberalism and the consuming body; and the material and symbolic aspects of fats and oils. (Same as WGSS 366.) LEC.

HUM 370. The Twentieth Century. 3 Hours H.
An integrated study of several disciplines such as history, philosophy, art, music, and literature as they relate to the twentieth century in one country, or one historical or aesthetic movement occurring during this time. LEC.

HUM 373. Aviation in American Culture. 3 Hours AE41 / H.
This course examines the complex relationship between powered flight and American society from the invention of the airplane to the rise of drone warfare. Through a mixture of scholarly works, personal accounts, and primary sources, we will investigate how use of and access to the airplane became a focal point for the construction and deconstruction of race, gender, and class distinctions and an important site in the struggle for equality and social justice. Using the airplane as a lens, we will recognize and challenge key assumptions within American technoculture such as technological messianism, technological neutrality, and the role of government in technological development. (Same as HIST 441.) LEC.

HUM 375. The Refugee Experience: Stories of Statelessness and Citizenship. 3 Hours.
This course draws on materials from multiple disciplines in the humanities including literature, history, philosophy, and cultural studies, to examine how belonging or not belonging to a state shapes the human experience. Literary texts, theoretical reflections, and historical studies on the subject of mass migration in Europe in the middle of the 20th-century will prepare for discussions of contemporary statelessness as well as responses to the refugee condition in a global context. (Same as PCS 375.) LEC.

HUM 380. Modern Themes, Ancient Models: ______. 3 Hours H.
The study of the evolution of a cultural or literary tradition from the Graeco-Roman world into modern times. The theme of the course will normally vary from semester to semester; topics such as these may be examined: the analysis of a literary genre (e.g. drama, satire, lyric), the transformation of the ancient mythical heritage, the reception of ancient astronomy. Students should consult the Schedule of Classes for the theme of the course in a given semester. With departmental permission, may be repeated for credit as topic varies. (Same as CLSX 350.) LEC.

HUM 390. Comparative Literary Theory. 3 Hours H.
A study of selected works in literary theory and of selected problems in literary interpretation and comparative literary methodology, designed to examine and apply systematically basic critical principles and approaches. Study of approaches such as feminism, Marxism, deconstruction, psychoanalysis, and cultural studies are carried out through discussion and writing. Prerequisite: Completion of the freshman-sophomore English requirement or its equivalent. LEC.

HUM 410. Dante’s Comedy. 3 Hours H.
The complete Divine Comedy will be read in English translation, with equal stress on each of its three parts—the Inferno, the Purgatory, and the Paradise. The poem will be explained for the general reader by specialists having a variety of perspectives. (Same as HIST 420.) LEC.

HUM 420. The Interrelations of the Humanities and the Arts. 3 Hours H.
An interdisciplinary seminar on the relations of several of the humanities and the arts. Topics will vary, but the interrelation of the humanities and arts will be the central focus. Not open to freshmen and sophomores; recommended in the junior year. Required of students majoring in humanities. LEC.

HUM 424. Senior Seminar in Humanities. 3 Hours AE61 / H.
A seminar to result in the student’s integration of knowledge within the Humanities major. Students undertake a project that reflects and utilizes the interdisciplinary perspectives of the humanities. Options for the final project include a portfolio, web page, or significant writing project. Not open to freshmen and sophomores; recommended in the senior year. Prerequisite: Completion of at least 9 hours of upper division courses in the major. IND.

HUM 430. European Civilization in World Context: ______. 3 Hours HL AE42/GE31 / H.
An introduction to the literature of encounters between European and non-European civilizations, drawing on both Western and non-Western sources. The course may include European interactions with areas such as the Mediterranean Basin, Sub-saharan Africa, South and East Asia, and the Americas. World areas and historical periods chosen for study will vary from semester to semester according to the interest and field of the instructor. Not open to freshmen. (Same as EARS 430.) Prerequisite: HUM 114 or HUM 204 and HUM 115 or HUM 205. LEC.

HUM 435. Islam in Europe. 3 Hours AE42 / H.
Investigation of Muslim migration into Europe and day-to-day interactions of Muslims with other European populations. This is an integrated study of historical, political, religious and economic influences that determine Muslim experience in contemporary European culture. (Same as EURS 435.) LEC.

HUM 436. Islam in Europe, Honors. 3 Hours H.
Investigation of Muslim migration into Europe and day-to-day interactions of Muslims with other European populations. This is an integrated study of historical, political, religious and economic influences that determine Muslim experience in contemporary European culture. Prerequisite: Membership in the University Honors Program or permission of department. Not open to students who have completed EURS/HWC 435 LEC.
HUM 477. Gender and Religion. 3 Hours H.
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as REL 477 and WGSS 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender Sexuality Studies. LEC.

HUM 490. Roots of Federal Indian Policy. 3 Hours H.
This course introduces students to the basic concepts and ideologies of US Federal Indian policy. It surveys European intellectual trends that were influential in creating policies applied to colonized native peoples. The course explores the origins of such policies, including removals, "civilization programs," the reservation period, the Dawes (Allotment) Act, the New deal, termination, relocation, NAGPRA and tribal rights, in addition to issues surrounding American Indian identity, tribal membership and demographics. This course serves as a foundation for more in-depth study of Federal Indian Law pertinent to the Indigenous peoples of the United States. (Same as ISP 490.) LEC.

HUM 494. Humanities Directed Study: ______. 1-3 Hours AE61 / H.
Investigation of a subject in fields or on topics not covered in regularly scheduled courses. May be repeated for a total of 6 hours. Does not replace or satisfy specific course requirements for the HWC major. May be counted as part of the total junior-senior credit hours required. LEC.

HUM 500. Studies in: ______. 3 Hours H.
A study of significant themes, topics, or problems in the humanities. May also relate an issue in the humanities to the social sciences or natural sciences. May be repeated for credit when the topic varies. LEC.

HUM 505. Europe Today. 3 Hours AE42 / H.
An exploration of major social, political and economic developments post World War II including the rise of the European Union, the integration of Eastern and Western Europe, the growing role of Islam, attitudes towards the United States, and Europe's role in the world economy. Topics may vary based on current events. (Same as EURS 504.) Prerequisite: Junior or senior standing or consent of instructor. LEC.

HUM 508. Special Topics in World Literature: ______. 3 Hours H.
An examination of selected theoretical texts and literary works relevant to the emerging field of "world literature studies" that seeks to account for the ways that global relationships structure literary production, circulation, and reception. Topics and texts vary. May be taken more than once if content differs sufficiently. LEC.

HUM 510. Science, Technology, and Society. 2-3 Hours H.
The objective of this course is to provide members of the university community with information that enables them to judge the humanistic, moral, and ethical implications of scientific and technological developments. Formal presentations by guest lecturers, followed by question-and-answer periods, will alternate with panel discussions, symposia, etc., prepared by faculty members drawn from the various departments, schools, and organizational units of K.U. LEC.

HUM 514. Totalitarianism and Literature in Central Europe. 3 Hours H.
This course asks how fiction written in Central Europe engaged and grappled with the totalitarian experience imposed by Nazi and Soviet forms of government. The course focuses on the works by 20th-century Polish, Czech, and Hungarian writers that deal with totalitarianism. (Same as SLAV 514.) LEC.

HUM 520. Literature in Translation: ______. 3 Hours H.
Studies in one or more national literatures. Discussion and frequent critical papers. Prerequisite: Completion of one junior-senior level course in a language and literature department. LEC.

HUM 524. Chinese Thought. 3 Hours NW / H/W.
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and PHIL 506.) Prerequisite: Eastern civilization course or a course in Asian history or a distribution course in philosophy. LEC.

HUM 538. Pompeii and Herculaneum. 3 Hours H.
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as CLSX 538, HA 538) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor. LEC.

HUM 540. Translation. 3 Hours H.
Students will undertake substantial work in the translation of non-technical writing, e.g., poems, short stories, novels, essays, from any foreign language to English, and examine the practical and theoretical problems encountered in or raised by translation. Prerequisite: Satisfactory completion of at least third-year foreign language work. LEC.

HUM 545. Methodologies in Digital Humanities, Honors. 3 Hours H.
This course addresses research possibilities and ongoing debates in the field of Digital Humanities. Students will examine how digital technologies and methodologies can enhance or suggest new modes of Humanities research. The course focuses on core topics in the field, including text analysis, data visualization, digital mapping, archiving and (digital) cultural studies. We will take a hands-on and critical approach to investigating the benefits and limitation of different digital methods. Course assignments will consist of blog posts and mini projects conducted throughout the semester. At the end of the semester, students will develop a proposal for a project that brings digital methodologies to bear on a research inquiry related to the student's discipline. No prior experience in digital work or technical skills required. Prerequisite: Instructor permission. LEC.

HUM 551. Foodways: Native North America. 3 Hours H.
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and ISP 551.) Prerequisite: Upper division course on indigenous/ American Indian history, or permission of the instructor. LEC.

HUM 552. Foodways: Latin America. 3 Hours H.
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, ISP 552, and LAC 552.) Prerequisite: Upper division course on Latin America or permission of the instructor. LEC.
HUM 566. The Devil in Russian Literature. 3 Hours H.
This course traces the various manifestations of the Devil through Russian and European folklore, myth, theology, culture, and literature. Although the focus is on Russian literature, classic European works are discussed, as they had a powerful impact on the modern Russian conception of the Evil One. Readings in English. (Same as SLAV 566.) LEC.

HUM 570. Men and Masculinities. 3 Hours H.
An intensive examination of the history and theory of masculinities in the Western world. Students become acquainted with some of the key theories of men and masculinities, and develop research projects on a topic negotiated with the instructor. (Same as WGSS 570.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor. LEC.

HUM 575. The Body, Self and Society. 3 Hours H.
An intensive examination of the role of the human body in the creation of personal and social identities in the Western world. Students become acquainted with contemporary theories of embodiment and senses as they are applied to a variety of historical themes, and develop research projects on a topic negotiated with the instructor. (Same as HIST 625, WGSS 575.) Prerequisite: An upper-division course in History, Humanities, or Women Gender and Sexuality Studies; or permission of instructor. LEC.

HUM 600. Biography of a City: ______. 3 Hours AE42 / H/W.
Examination in depth of the historical, social, and artistic growth and development of one major urban center. LEC.

HUM 701. Practicum in Teaching Humanities and Western Civilization. 1 Hour.
Discussion of matters relating to teaching in Humanities and Western Civilization courses. Sections may vary according to course topics. Required of all GTAs in the first year of teaching in the Program or for the first semester of a new teaching assignment. Does not count towards completion of coursework for the M.A. or Ph.D. in any field or department. Open only to GTAs employed by the Humanities Program. Graded on a satisfactory/unsatisfactory basis. LEC.

HUM 770. Research in Men and Masculinities. 3 Hours.
An intensive examination of the history and theory of masculinities in the Western World since the sixteenth century. Students will become acquainted with some of the key theories of men and masculinities, examine in depth the interplay between manhood and modernity, and develop research projects on a topic negotiated with the instructor. May be repeated if content varies sufficiently. (Same as WGSS 770.) LEC.

HUM 775. Advanced Study in the Body and Senses. 3 Hours.
An intensive examination of the role of the human body in the creation of personal and social identities in the West since the sixteenth century. Emphasis is on understanding how contemporary theories of embodiment are applied to concrete historical or contemporary problems. May be repeated if course content varies sufficiently. (Same as WGSS 775.) LEC.

Courses

PCS 120. Introduction to Peace and Conflict Studies. 3 Hours HT GE11/GE3H / H.
An introduction to the content and methods of peace studies. Peace studies is a multidisciplinary and interdisciplinary approach to the study of war and peace. Building on and integrating the work of various fields of study, the course examines the causes of structural and direct violence within and among societies and the diverse ways in which humans have sought peace, from conquest and balance of power to international organizations and nonviolent strategies. LEC.

PCS 121. Introduction to Peace and Conflict Studies, Honors. 3 Hours HT / H.
Honors version of PCS 120. An introduction to the content and methods of peace studies. Peace studies is a multidisciplinary and interdisciplinary approach to the study of war and peace. Building on and integrating the work of various fields of study, the course examines the causes of structural and direct violence within and among societies and the diverse ways in which humans have sought peace, from conquest and balance of power to international organizations and nonviolent strategies. Open only to students admitted to the University Honors Program or by permission of instructor. Not open to students who have completed PCS 120. LEC.

PCS 150. Study Abroad in Topics in Peace and Conflict Studies: ______. 1-5 Hours H.
This course is designed for the study of special topics in Peace Conflict Studies at the 100-200 level (Freshman/Sophomore level). Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in Peace Conflict Studies. May be repeated for credit if content varies. LEC.

PCS 329. History of War and Peace. 3 Hours HL / H.
A study of the changing nature of warfare and the struggle to bring about peace. Topics include pacifism, the "military revolution" that created the first professional armies; the development of diplomatic immunity, truces, and international law; the peace settlements of Westphalia, Utrecht, Vienna, Versailles, and San Francisco; the creation of peace movements and peace prizes; the evolution of total war, civil war, and guerrilla warfare involving civilians in the twentieth century; the history of the League of Nations and United Nations; and the rise of intergovernmental and non-governmental organizations. (Same as EURS 329.) LEC.

PCS 350. Study Abroad in Topics in Peace and Conflict Studies: ______. 1-5 Hours H.
This course is designed for the study of special topics in Peace and Conflict Studies at the Junior/Senior level. Coursework must be arranged through the KU Office of Study Abroad and approved by a faculty advisor in Peace and Conflict Studies. May be repeated for credit if content varies. LEC.

PCS 375. The Refugee Experience: Stories of Statelessness and Citizenship. 3 Hours.
This course draws on materials from multiple disciplines in the humanities including literature, history, philosophy, and cultural studies, to examine how belonging or not belonging to a state shapes the human experience. Literary texts, theoretical reflections, and historical studies on the subject of mass migration in Europe in the middle of the 20th-century will prepare for discussions of contemporary statelessness as well as responses to the refugee condition in a global context. (Same as HUM 375.) LEC.

PCS 550. Classics of Peace Literature. 3 Hours HL AE51/AE61 / H.
A study of influential proposals for world peace from Erasmus' The Complaint of Peace (1515) to the 1995 Hague Appeal for World Peace. Selected writings by such authors as Erasmus, Hugo Grotius, Jean-Jacques Rousseau, Immanuel Kant, Henry Thoreau, Henri Dunant, Berthe von Suttner, Woodrow Wilson, Mahatma Gandhi, and Martin Luther King, Jr., are considered. (Same as EURS 550.) Prerequisite: HWC 204 or HWC 205. LEC.

PCS 555. Topics in Peace and Conflict Studies: ______. 3 Hours H.
This course offers specialized or interdisciplinary perspectives on historical, political, social, and religious movements, institutions, societies, agencies, or texts dealing with conflict resolution. May be repeated for credit with different topics. LEC.
Bachelor of Arts in Humanities

Why choose a degree in Humanities?

The BA in Humanities is an interdisciplinary degree program that provides excellent preparation for twenty-first century careers. Students choose from three major tracks and complete coursework in three or more humanities departments or programs across the university. The program’s focus on values, ethics, and civil debate is also reflected in its emphasis on critical thinking, reading and writing, and on individualized student advising and a flexible curriculum.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualification admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. Major

Humanities Major Core Knowledge and Skills

The Humanities major requires a total of 30 credit hours. 18 of the 30 credit hours must be in courses numbered 300 or above.

Note: Sharing course work (credit hours) between the HUM major and another major is restricted to 6 hours.

All non-HUM courses taken toward the major must be approved by the HUM undergraduate coordinator.

 Majors must choose 1 of the following tracks: Global Humanities or Peace and Conflict Studies.

Track 1: Global Humanities

This track studies aspects of the cultures of Western and non-Western civilizations (e.g., Africa, Asia, Latin America, or Indigenous Peoples). It is designed to provide the student with knowledge of diverse cultures and with methods for investigating their differences and commonalities. 30 credit hours, to include the following:

PCS 556. Education for Peace and Non-Violence. 3 Hours H.
This course reviews the history, aims and methodology of peace education. Topics include examination of the roots and causes of social violence; educational initiatives that seek to reduce structural and direct violence; and teaching methodologies in the field of multicultural education and pedagogy. LEC.

PCS 560. Directed Study in Peace and Conflict Studies. 1-3 Hours AE61 / H.
Practicum or research under the supervision of a faculty member and with the approval of the Peace and Conflict Studies Minor. Individual conferences, reports, and papers, and, in the case of practicum, supervised experience with an approved organization or agency. Prerequisite: Completion of three core courses in the minor. IND.

PCS 565. The Literature of Human Rights. 3 Hours H.
Examines in literature, art, and film from about 1800 to the present, both sides of the ongoing debate surrounding the idea that all human persons possess inalienable rights because all persons possess intrinsic value as persons, value independent of race, gender, caste or class, wealth, age, sexual preference, etc. Anti- and pro-rights proponents are paired and studied with equal care. (Same as EURS 565 and GIST 560.) Prerequisite: Junior/Senior standing or consent of instructor. LEC.

PCS 650. Senior Seminar in Peace and Conflict Studies. 3 Hours AE61 / H.
This capstone seminar provides a sustained and in-depth study of a particular topic in Peace and Conflict Studies, to be chosen by the instructor. Each student is required to carry out a substantive research project to produce a term paper or comparable work. Required for completion of minor. Prerequisite: Students must have completed at least nine hours in the minor before enrolling. LEC.

PCS 760. Investigation and Conference in Peace and Conflict Studies. 3 Hours.
Research under the supervision of a faculty member and approved for the Peace and Conflict Studies program. Individual conferences, reports, and papers; may be combined with classwork. Open only to graduate students. LEC.

PCS 801. Peace and Conflict Studies: Texts and Methods. 3 Hours.
An interdisciplinary study of the historic literature on human conflict and peacemaking and the methods used to analyze and interpret the literature. Peace literature encompasses a range of genres that include religious teachings, philosophical essays, political proposals, treaties and conventions, fiction, poetry, and drama. Approaches to solutions to human conflict cover a spectrum including political revolution, diplomacy and treaties, international law and organizations, and world government. Students produce a substantial graduate-level research project. PCS 801 is required for the Graduate Certificate in Peace and Conflict Studies, and to be taken as early as possible in the students program of study. Open only to graduate students. LEC.

PCS 850. Peace and Conflict Studies Research Seminar. 3 Hours.
The capstone of the Graduate Certificate program, providing a sustained and in-depth study of a particular topic in Peace and Conflict Studies, to be chosen by the instructor. The members of the seminar have the option of doing a research project or supervised practicum resulting in a substantial paper that integrates their work in the program. Required for the Graduate Certificate and open only to graduate students. Prerequisite: At least six hours of course work toward the Graduate Certificate including PCS 801. SEM.

Bachelor of Arts in Humanities
This track provides students with opportunities to study issues of violence and methods of peace-making from an interdisciplinary humanities perspective. Majors choosing this option must complete 30 credit hours to include the following:

**Track 2: Peace and Conflict Studies**

**Introductory and Capstone Coursework**

21 additional hours to include:

- 6 hours PCS upper division courses (2 out of 3):
  - PCS 550 Classics of Peace Literature
  - PCS 555 Topics in Peace and Conflict Studies
  - PCS 565 The Literature of Human Rights

- 6 hours of interdisciplinary core courses, for example:
  - ANTH 501 Topics in Sociocultural Anthropology
  - GEOG/EVRN Environmental Geopolitics
  - HIST 314 Globalization: History and Theory
  - POLS 674 Ethics in International Relations
  - POLS 684 International Law: The State and the Individual
  - or POLS 685 International Law: Laws of Armed Conflicts

9 hours of courses from one of the three designated areas:

- Area 1: The pursuit of social, economic and environmental justice, for example:
  - HIST 334 The Great War: The History of World War I
  - HIST 340 The History of the Second World War
  - POLS 661 Politics of the Middle East
  - POLS 678 Chinese Foreign Policy
  - or POLS 685 International Law: Laws of Armed Conflicts

- Area 2: The role of nation-states and of international norms and institutions, for example:
  - HIST 314 Globalization: History and Theory
  - HIST 340 The History of the Second World War
  - POLS 661 Politics of the Middle East
  - POLS 678 Chinese Foreign Policy
  - or POLS 685 International Law: Laws of Armed Conflicts

- Area 3: The impact of religious, philosophical, and cultural influences, for example:
  - ANTH 501 Topics in Sociocultural Anthropology
  - ENGL 536 Readings in the Holocaust
  - PCS 555 Topics in Peace and Conflict Studies

### Total Hours 120-123

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. 6-9 hours (2-3 courses) in aspects of the cultures of Western Civilization, 1 of which must be an HUM course, is required.
4. 6-9 hours (2-3 courses) in aspects of the cultures of Non-Western Civilization is required.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120-123

1  The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2  Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3  6 hours of PCS upper division coursework chosen from the following are required: PCS 550, PCS 555, PCS 565.
4  6 hours (2 courses) of interdisciplinary courses are required. For a list of approved courses visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/humanities/ba/#requirementstext) tab.
5  9 hours (3 courses) are required from one of three designated areas. To review the 3 areas and the courses approved to fulfill them, visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/humanities/ba/#requirementstext) tab.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Humanities

The minor in Humanities addresses the needs of students who seek to complement their major field of study with a solid grounding in the intellectual traditions and cultural practices of a particular area of world culture, or who wish to deepen and broaden their knowledge and understanding of a specific historical period. In addition, study in the humanities provides an excellent opportunity for students preparing for careers in the professions that require high standards of written and oral communication skills. Given its emphasis on text-based curriculum that encourages critical thinking, shared discussion, and written and oral analysis on significant topics, the Minor in Humanities prepares undergraduates to excel as they move forward into graduate or professional schools or the work force.

Requirements for the Minor

The Minor in Humanities requires 18 hours of coursework, 9 hours of which must be taken at the junior/senior level, and 3 of which may be shared with a student’s major.

Students selecting this minor must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HUM 110</td>
<td>Introduction to Humanities or HUM 111</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduction to Humanities, Honors</td>

</tbody>
</table>

Three HUM or PCS courses numbered 300 and above, chosen in consultation with an advisor, and focusing on a specific theme. Including, but not limited to, the following examples:
Minor in Peace and Conflict Studies

Why study Peace and Conflict Studies?
This multidisciplinary program enables students to examine conflict within and between societies as well as ways that humans address conflict through war, mediation, law, diplomacy, institutions, and peaceful resistance.

Requirements for the Minor
Students selecting this minor must complete each of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td></td>
<td></td>
</tr>
</tbody>
</table>

Minor Hours and GPA
While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 GPA in all courses in the minor. GPA calculations include all courses in the field of study including Fs and repeated courses.

Undergraduate Certificate in World Literature
The Undergraduate Certificate in World Literature provides a survey of movements and trends in World Literature as well as the opportunity to focus on specific topics, eras, or areas of the field. Students are given a conceptual framework and the methodological tools to enable them to analyze works of literature, including genres, rhetorical choices, and worldviews that are reflected in national literatures. The certificate program will deepen a student’s knowledge of various cultural beliefs, behaviors, practices, and value systems as these are expressed in literature and related works of art.
Graduate Certificate in Peace & Conflict Studies

Offered by the Humanities Program, Peace & Conflict Studies is a multidisciplinary and interdisciplinary approach to the study of human conflict. It examines the origins and nature of conflict within and among societies and the various ways in which humans address conflict. Through academic coursework and the possibility of practical experience, Peace & Conflict Studies offers students a concentrated program of study of one of the most central and urgent human issues: the causes and consequences of human conflict and the achievements and possibilities of building peaceful and equitable forms of social existence.

The Graduate Certificate program in Peace & Conflict Studies is designed to provide students with a focused program of study in the subject area and certification of the completion of the program on the graduate transcript. Enrollment in the program will be open to students admitted to a regular KU graduate program or to non-degree seeking graduate status. A Graduate Certificate in Peace & Conflict Studies should be of interest and value to students across a broad range of humanistic and social scientific disciplines, especially in such fields as the international area studies programs, History, International Studies, Political Science, and Religious Studies. The certificate will enhance the credentials of students seeking careers in government service both civil and military, nongovernmental organizations, international business, law, and teaching.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).

Students must complete 4 courses for a total of 12 graduate credit hours:

Choose one of the following:

Two courses representing two separate national literatures in original language or in translation

Examples include but are not limited to the following:

- AAAS 356 African-American Theatre and Drama
- AAAS 433 Islamic Literature
- EALC 312 Japan's Literary Legacy
- ISP 305 World Indigenous Literatures
- ITAL 405 Italian Literature in Translation: _____

Indigenous Studies Program

Indigenous Studies Graduate Program

KU’s Indigenous Studies Program serves students, Native American and Indigenous Nations and communities in Kansas, the Midwest, the U.S., and the world through our teaching, research, creative work, and service. At the core of these endeavors is our deep commitment to and engagement with the nations and communities we come from, learn from, and serve. Our aim is to contribute to the continuing projects of knowledge building, effective leadership, and infrastructure development.

KU Indigenous Studies offers an undergraduate minor, a master’s program, and a graduate certificate program. Students who are interested in enrolling in graduate-level coursework in the Indigenous Studies Program without admission to a formal graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See our admission webpage for further details.

Courses

ISP 101. Introduction to Indigenous Nations Studies. 3 Hours NW / S.
An introduction to the study of Indigenous peoples. It surveys the concepts, methods, and content relevant to Applied Indigenous Studies, using case studies drawn from diverse cultures. The course illustrates that the social, political, religious, and economic aspects of American Indian life are interconnected and that tribal histories cannot be understood without an awareness of these fields. Students are introduced to controversies over how to research, write, and interpret American Indians, and will address the foundations of Indigenous Studies, and that is Indigenous concepts of decolonization, empowerment and Nation-building. The course explores how the lives of Indigenous people have been affected by colonization, while exploring the varying definitions of “colonialism”, “colonizer” and the “colonized. LEC.

ISP 204. Special Topics: _____ 1-6 Hours.
This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs. Some sections may be offered at Haskell Indian Nations University through the Haskell-KU Exchange, which requires permission from the Haskell-KU liaison. LEC.

ISP 304. Special Topics: _____ 3 Hours H.
This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines to examine issues related to the survival, self-
sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs. LEC.

**ISP 305. World Indigenous Literatures. 3 Hours NW AE42 / H.**
A survey of contemporary world indigenous literatures that includes those from North America, Australia, New Zealand, the South Pacific, the Arctic, and Latin America. Texts are in English (original or translation). Genres studied include the novel, poetry, and drama, supplemented by works from the oral tradition, the visual arts, and film. (Same as ENGL 305/GIST 305.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ISP 330. Native American Religions. 3 Hours NW AE41 / H.**
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative (myth), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Open to students who have completed ISP 331 or REL 331. (Same as REL 330.) LEC.

**ISP 331. Native American Religions, Honors. 3 Hours NW AE41 / H.**
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative (myth), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have completed ISP 330 or REL 330. (Same as REL 331.) LEC.

**ISP 335. Introduction to Indigenous Studies. 3 Hours NW / H.**
This course is an introduction to the study of modern and historic indigenous peoples. It surveys the concepts, methods, and content relevant to Indigenous Studies, using case studies drawn from the diverse indigenous cultures. Special attention is paid to the various ways in which standard academic disciplines—history, anthropology, literature, law, political science, among others—contribute to the study of Indigenous cultures and current issues. The course illustrates that the social, political, religious, and economic aspects of indigenous life are interconnected and tribal histories and cultures cannot be understood without an awareness of these fields. (Same as HUM 335.) LEC.

**ISP 345. Indian Territory. 3 Hours H.**
This course examines the cultural, social, economic, environmental, and political background of Indian Territory in what is now the state of Oklahoma. It surveys the diverse geographical regions, tribal cultures, the impact of the Indian Removal Act, assimilation, acculturation, westward expansion, the Civil war, boarding schools, the Dawes Act, the Curtis Act, and land runs on Territory residents. The course also treats post-Civil War violence, outbreaks, and the role of tribal courts along with controversies over removals, Land Run celebrations, allotment scandals, and Osage oil murders. (Same as HIST 318 and HUM 345.) LEC.

**ISP 348. American Indian and White Relations to 1865. 3 Hours H.**
This course provides an intensive survey of the Indians of North America from Prehistory to 1865, and focuses on ancient indigenous cultures, early European-Indian relations and the impact of European culture upon the indigenous peoples of North America. (Same as HIST 351, HWC 348.) LEC.

**ISP 350. American Indians Since 1865. 3 Hours AE41 / H.**
This course examines American Indian/White relations from reconstruction to the present. It surveys the impact of westward expansion and cultural changes brought about by the Civil War, forced education, intermarriage, the Dawes Act, the New Deal, the World Wars, termination, relocation and stereotypical literature and movies. The class also addresses the Red Power and AIM movements, as well as indigenous efforts to decolonize and to recover and retain indigenous knowledge. After learning about the past from both Native and non-Native source materials, students will gain multiple perspectives about historical events and gain understandings of diverse world views, values, and responses to adversity. (Same as HIST 352 and HUM 350.) LEC.

**ISP 355. Indigenous Film and Media. 3 Hours H.**
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum—including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 750 or ISP 755. (Same as FMS 350.) LEC.

**ISP 400. Indigenous People of the Great Plains. 3 Hours H.**
This course examines the emergence of horse-mounted indigenous societies in the Great Plains; the nature of the indigenous societies of the Great Plains in the nineteenth century; conflicts with the United States; the beginning of the reservation period; and indigenous people of the Great Plains in the modern era. Readings combine primary documents and novels with selections from anthropology, social history, and environmental history. (Same as HIST 400.) LEC.

**ISP 490. Roots of Federal Indian Policy. 3 Hours H.**
This course introduces students to the basic concepts and ideologies surrounding modern United States Federal Indian policy. It will survey the European intellectual trends that were influential in creating policies that were (and still are) applied to the colonized Native peoples. The course will explore the roots of US Indian policy, including removals, "civilization programs," the reservation period, the Dawes (Allotment) Act, the New Deal, termination, relocation, NAGPRA and tribal rights, in addition to the issues surrounding American Indian identity, tribal membership and demographics. This course serves as the foundation for more in-depth study into the complicated and ever-changing field of Federal Indian Law as it pertains to the Indigenous peoples of the United States. (Same as HUM 490.) LEC.

**ISP 495. Directed Readings. 1-3 Hours.**
Work for advanced majors in fields or on topics not covered in course work. May be repeated for a total of up to six hours. May be counted as part of the total junior-senior credit hours required. Prerequisite: Consent of instructor. IND.

**ISP 504. Topics in Indigenous Studies: _____ 3 Hours W.**
This course concentrates on selected problems in the interdisciplinary field of Indigenous Studies. Courses in this field utilize methods developed in various disciplines in order to examine issues related to the survival, self-sufficiency, mutual support, empowerment, and decolonization of Indigenous Peoples throughout the world. May be repeated for credit when the topic differs. Recommended for juniors or seniors, or for students who have completed ISP 101/GINS 101/INS 101. LEC.

**ISP 510. Indigenous Women and Activism. 3 Hours NW / S.**
Examines the roles of activist Indigenous women in politics, social work, academia, business, environmental and health issues. Compares and contrasts the ideology of the predominantly white feminist movement with the goals and concerns of the "Red Power" movement and emphasizes...
Indigenous socio-cultural values and concerns. Profiles prominent Indigenous female activists, tribal leaders and writers, in addition to topics of serious concern to Indigenous women: violence, racism, loss of culture and language, education, health care and other manifestations of continued colonization. LEC.

**ISP 530. Indigenous Food and Health. 3 Hours NW / U.**
This course investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. The class traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems and offers traditional cultural strategies for health recovery. LEC.

**ISP 542. Ethnobotany. 3 Hours S.**
Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on Native North Americans); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as ANTH 582 and EVRN 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor. LEC.

**ISP 551. Foodways: Native North America. 3 Hours H.**
This course surveys the traditional foodways of the indigenous peoples of North America. We survey hunting, gathering and fishing methods, meal preparation, medicinal plants and the cultivation of crops according to tribal seasons. Because modern indigenous peoples are suffering from unprecedented health problems, such as diabetes, obesity, high blood pressure and related maladies, the course traces through history the reasons why tribal peoples have become unhealthy and why some have lost the traditional knowledge necessary to plant, cultivate, and save seeds. The course also addresses the destruction of flora and fauna from environmental degradation. (Same as HIST 511 and HWC 551.) Prerequisite: Upper division course on indigenous / American Indian history, or permission of the instructor. LEC.

**ISP 552. Foodways: Latin America. 3 Hours H.**
This course explores traditional foods, ways of eating, and cultural significance of food among peoples of Latin America. The course surveys the vast array of flora in Central and South America and the Caribbean, and focuses on issues of environmental protection, bioethics, food security, and the growth of farming and ranching. The class studies the impact that foods such as maize, potatoes and cacao have had globally, and includes African, Asian, and European influences on Latin cuisine, as well as health problems associated with dietary changes. (Same as HIST 512, HUM 552 and LAC 552.) Prerequisite: Upper division course on Latin American or permission of the instructor. LEC.

**ISP 567. Native Feminisms. 3 Hours SC AE42 / H/W.**
This course examines the foundation of Native feminist scholarship and the history of Native feminist activism. The class will begin by considering whether feminist theory can support contemporary Native women Native Two-Spirit (LGBTQ+) in their struggles against settler colonialism and heteropatriarchy. While the course begins by examining the North American experience, the course will also cover a range of international indigenous contexts, with a focus on the Global South and the Indigenous Pacific. Topics explored include the history of settler-colonialism, cultural revitalization and gender roles, change and continuity under cycles of settler-colonialism, the connection between colonialism and sexual violence in Native communities, debates over citizenship and sovereignty, and contemporary Native gender roles and identities. During the conclusion of the course, students will learn to identity how Native feminism informs activism and practice. (Same as WGSS 567.) Prerequisite: Any previous course in WGSS or ISP, or by permission of instructor. LEC.

**ISP 577. The Andean World. 3 Hours H.**
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, HIST 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor. LEC.

**ISP 600. Research Methods and Indigenous Peoples. 1-3 Hours NW / U.**
An introduction to the social science methods of investigation and analysis that are used in Indigenous Nations Studies as a discipline. The nature of Indigenous Nations Studies data sources and methods of data collection, the logic of social scientific inquiry, and key methods of data analysis are emphasized. In addition, the social and educational implications of the results are examined. Prerequisite: Permission of instructor. LEC.

**ISP 601. Indigenous Peoples of the World. 3 Hours S.**
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GEOG 601 and GIST 601.) Prerequisite: Permission of instructor. LEC.

**ISP 673. Environmental Justice. 3 Hours NW / U.**
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping, and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. (Same as EVRN 673.) Prerequisite: Permission of instructor. LEC.

**ISP 755. Indigenous Film and Media. 3 Hours.**
This course offers a survey of global Indigenous cultures, theory and aesthetics in cinema and digital media. It establishes an Indigenous media optics by examining media practices across a broad contemporary spectrum—including music videos and social media platforms, podcasting and video games. As the course moves geographically, students learn how media practices in diverse communities situate identity and experience in related but unique contexts. Through weekly readings, screenings and design workshops, students build the critical tools
necessary for an examination of the wide range of practices that lend themselves to Indigenous media sovereignty. This course is offered at the 300 and 700 level with additional assignments at the 700 level. Not available to students with credit in FMS 350 or ISP 355. (Same as FMS 750.) LEC.

ISP 800. Indigenous Issues in the United States. 3 Hours.
This course will focus on contemporary issues relating to Indigenous peoples and nations within the United States, with particular emphasis on such issues as sovereignty, indigeneity, colonialism and decolonization. The course will address varied disciplinary approaches to this range of issues and will consider how this discourse bears upon scholarly conversations regarding broader themes in other selected fields of study. LEC.

ISP 801. Indigenous Peoples of the World. 3 Hours.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of externally-dominated economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law will be used. The course is offered at the 600 and 800 levels, with additional assignments at the 800 level. (Same as GEOG 801.) LEC.

ISP 804. Special Topics: ______. 1-3 Hours.
Designed to fulfill program needs of the Indigenous Studies master's program, this course may meet with appropriate professional or graduate courses. Can be repeated for credit when topic differs. LEC.

ISP 806. Directed Readings. 1-3 Hours.
An individual readings course with a qualified instructor on a topic in Indigenous Studies. IND.

ISP 807. Internship in Indigenous Studies. 1-6 Hours.
Internships provide students the opportunity to obtain training and perform professional duties for academic credit at pre-approved indigenous-related agencies, organizations, and communities. Students are required to demonstrate a minimum of 60 contact hours for each one credit hour. To enroll, students must obtain the consent of an ISP faculty member and the Program's Curriculum Committee. May be repeated for credit. Prerequisite: Permission from instructor. INT.

ISP 810. Indigenous Women and Activism. 3 Hours.
An examination of the roles and ideologies of prominent Indigenous female activists, tribal leaders and writers. LEC.

ISP 824. Federal Indian Law. 2.5-3 Hours.
Addresses the law and policy of the United States regarding Indian nations and their members. Issues include the origins and contours of federal plenary power over Indian affairs, the scope of inherent tribal sovereignty, the limits of state power in Indian country, civil and criminal jurisdiction, and gaming. (Same as LAW 914) Prerequisite: Permission from instructor. LEC.

ISP 830. Indigenous Food and Health. 3 Hours.
Investigates the historic diets of Indigenous peoples, including cultivation of crops, hunting and fishing methods, food preparation and seed preservation. Traces through history the colonial policies and ideologies that caused the cultures to alter their ways of eating, resulting in unprecedented modern health problems. Will offer traditional cultural strategies for health recovery. LEC.

ISP 862. Indigenous Archives and Tribal Historic Preservation. 3 Hours.
In this methods class, students will gain foundational knowledge in the archival and preservation of Indigenous source materials: oral histories, printed materials, Tribal documents, letters/journals/diaries, artwork, and a host of other sources. Students will also utilize digital history technology to create online exhibits and an original research paper. Beyond the archives this course introduces students to the important work of Tribal Historical Preservation examining the laws, ethics, cultures, policies, histories, ethics, recovery/restoration, Indigenous GIS, consultation, management, and career paths in Tribal Historical Preservation. Finally, students will gain invaluable experiences by writing grants and developing final projects that can lead to real-world applications of their research. (Same as HIST 862.) LEC.

ISP 871. Community Health and Development. 3 Hours.
This course extends knowledge and skills for addressing issues in community health and development (e.g., substance abuse, adolescent pregnancy, child and youth development, prevention of violence). Students learn core competencies such as analyzing community problems and goals, strategic planning, intervention, and evaluation, and then apply these skills to issues that matter to them and to the communities they serve. (Same as ABSC 710.) LEC.

ISP 873. Environmental Justice. 3 Hours.
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. LEC.

ISP 874. Natural Resource Management: Indigenous Perspectives. 3 Hours.
An examination of resource management issues in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in the management schemes. Case study analyses of management techniques derived from European-based science with Indigenous traditions and beliefs. LEC.

ISP 875. Native and Western Views of Nature. 3 Hours.
A comparison of the attitudes and perspectives towards the natural world developed by different cultural traditions. A review of western attitudes and also the traditional ecological knowledge of Indigenous peoples toward management of natural resources, non-human animals, and the natural world. LEC.

ISP 876. Comparative Law. 2.5-3 Hours.
A general introduction to and comparison of major legal systems of the world, with special emphasis given to how those systems reflect differing cultural values in addressing common legal questions. A major goal of the course is to deepen the students' understanding of law and practice in the United States and to broaden their perspective of law beyond the boundaries of the common law systems. (Same as LAW 879.) Prerequisite: Permission from instructor. LEC.

ISP 882. Native American Natural Resources. 2-3 Hours.
This course provides a detailed examination of natural resource law as it applies to Indian Country. Among the topics to be discussed are water law, environmental protection, and subsurface property rights. (Same as LAW 967.) LEC.
ISP 883. Sovereignty, Self-Determination and Indigenous Nations. 2-3 Hours.
Examines legal, governmental, political, social, cultural, and economic issues associated with American Indian tribal sovereignty and self-determination. Includes the source and scope of tribal sovereignty; the threats to tribal sovereignty; and the methods by which tribal sovereignty can be strengthened and revitalized. (Same as LAW 987.) Prerequisite: Permission from instructor. LEC.

ISP 898. Master's Non-Thesis. 1-6 Hours.
Course for Indigenous Studies students completing a portfolio Master’s exam. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Permission from instructor. RSH.

ISP 899. Master's Thesis. 1-6 Hours.
Course for Indigenous Studies Program students completing Master's thesis projects. Prerequisite: Permission from instructor. THE.

Indigenous Studies Minor

The minor in Indigenous Studies provides undergraduate students with knowledge essential to understand a broad variety of cultural, historical, political, religious, and social issues affecting Indigenous peoples. Students gain disciplinary knowledge in preparation for graduate study or immediate employment in fields such as government and other public service, or the private sector. Courses offered across the university allow students to create an individualized program of study. Our affiliated faculty members have appointments in the humanities, social sciences, arts, and professional schools across the university. Courses taken at Haskell Indian Nations University through the exchange program can count toward the Indigenous Studies minor.

Requirements for the Minor

Indigenous Studies Minor Course Requirements

The Indigenous Studies minor requires 18 hours of Indigenous Studies courses, of which 12 must be in courses numbered 300 or above, with a 2.0 grade-point average.

One course taken at Haskell Indian Nations University is strongly recommended.

(Courses must have 30% or more content focused on indigenous peoples, and be approved by the ISP Executive Committee.)

Indigenous Studies Admission Requirements

The Indigenous Studies program accepts applications on a rolling basis, so apply to begin your studies either in the fall or spring semester. To be considered for University or departmental scholarships, the priority consideration deadline is April 1 for fall admission.

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy. To be considered for admission to regular graduate status in the program, a student must hold a bachelor’s degree and have earned at least a B (3.0) grade-point average in previous academic work. A full list of the required application materials can be found on the Indigenous Studies website.

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Master of Arts in Indigenous Studies

Indigenous Studies Master of Arts Program

KU’s Indigenous Studies Program serves students and Native American and Indigenous Nations and communities in Kansas, the Midwest, the U.S., and the world through our teaching, research, creative work, and service. At the core of these endeavors is our deep commitment to and engagement with the nations and communities we come from, learn from, and serve. Our aim is to contribute to the continuing projects of knowledge building, effective leadership, and infrastructure development.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Core Curriculum

ISP 800 Indigenous Issues in the United States. A 3-hour graduate-level course taught by the director of the ISP with guest presentations by faculty who study indigenous peoples from various disciplinary perspectives.

18 hours of approved coursework with content relevant to the field of Indigenous studies approved by the student’s graduate committee. Courses are offered by Indigenous Studies, as well as certain departments such as Anthropology, Environmental Studies, English, History, Political Science, Religion, and Geography. A list of approved courses can be found here (http://indigenous.ku.edu/courses/#tab3name).

Plan A: Non-Thesis Option

- 9 hours of electives. Electives should be selected in consultation with an advisor and complement your research, body of graduate work, and future career goals.
- An M.A. examination: an oral examination in which the candidate defends his or her portfolio, which will be composed of the student’s entire body of work completed in courses counted for the degree.

Plan B: Thesis Option

- 6 hours of electives. Electives should be selected in consultation with an advisor and complement your research, body of graduate work, and future career goals.
- 3 hours of thesis on an approved subject with an oral defense.

Course Level Requirement

Students pursuing an M.A. in Indigenous Studies must take 50% or more of their coursework at the 700 level or above. ISP 800 and thesis hours (if applicable) count toward this requirement.

Joint Degree with KU Law

The University of Kansas offers a joint degree program in Law and Indigenous Studies. As part of this unique program, students may graduate with both the J.D. and an M.A. in Indigenous Studies in three to four years, making it an ideal choice for students interested in tribal law. Students must apply separately to the Law School and the Indigenous Studies graduate program.

The program “aspires to facilitate the protection and strengthening of Indigenous sovereignty, self-determination, and self-sufficiency” in Indigenous nations throughout the Americas.

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

If you are interested in pursuing a joint M.A./J.D. with the KU School of Law or the PSM + ISP graduate certificate, you will need to apply to both programs.

M.A. Degree Requirements

Students pursuing the M.A. in Indigenous Studies must successfully complete a minimum of 30 graduate credit hours: a 21-hour core curriculum plus 9 hours taken according to either Plan A or Plan B.
The University of Kansas was the third institution of higher learning in the United States to offer a joint degree program relating to Indigenous peoples.

**Graduate Certificate in Indigenous Studies**

**Indigenous Studies Graduate Certificate**

The Graduate Certificate in Indigenous Studies is designed to provide students with necessary knowledge of the events, laws, policies, and treaties that have defined the relationship between the United States and Indigenous Nations and Peoples. This knowledge is essential to analysis of a broad range of historical, political, religious, and social issues in the U.S.

The program will provide students with a solid grounding in the histories and cultures of the indigenous peoples of North America. The certificate program enables students to integrate knowledge of Indigenous issues into their own academic disciplines or professional training.

Completion of the certificate in Indigenous Studies represents an additional credential for graduate students from a variety of academic fields who are preparing for careers in research and teaching or professional practice. The certificate will also enhance the qualifications of students seeking careers with Indigenous organizations, governments, and museums, among many other options.

Enrollment in the program is open to students admitted to a regular KU graduate program as well as students who are not currently enrolled at KU.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Certificate Application and Admissions Procedure**

Eligibility criteria for admission to the certificate program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to regular graduate status in the program, a student must hold a bachelor's degree and have earned at least a B (3.0) grade-point average in previous academic work. For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted through the Graduate Admissions website (https://gradapply.ku.edu/apply/).

Application requirements differ for current KU students versus non-KU students. Please visit the Indigenous Studies website (http://indigenous.ku.edu/application-admissions/) for a full list of the required application materials. Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

**Certificate Requirements**

The Indigenous Studies Graduate Certificate requires 12 hours of coursework:

- ISP 800: Indigenous Issues in the United States (3 hrs)
- 9 hours of graduate-level coursework with content relevant to the field of Indigenous Studies taken from the list of approved courses, which can be found on the Indigenous Studies website (http://indigenous.ku.edu/courses/).

**Institute for Leadership Studies**

**Institute for Leadership Studies**

The Institute for Leadership Studies (ILS) supports the university’s mission of preparing students for a diverse and challenging world through innovative, interdisciplinary curricula at the undergraduate and graduate levels. Our programs inspire students to make a difference from where they are with what they have because we envision a world mobilized by Jayhawks with the courage and leadership skills to ignite positive change.

The ILS engages students across campus and from all disciplines in learning to do the work of leadership through a variety of programs designed to complement any degree or career path, in residence and online. The Leadership Studies Minor (LSM) serves as the centerpiece of our undergraduate curriculum, offering students opportunities to work in a small-group environment, developing universal professional skills that are highly valued in today’s workforce. Through innovative coursework, students practice diagnosis, problem-solving, and ethical decision making while developing a self-awareness which enhances tolerance for ambiguity, empathy, perspective-taking, and active reflection while increasing understanding of diversity. The combination of theoretical and experiential coursework allows students to frame existing leadership experiences, explore new leadership opportunities, and engage their disciplinary content with greater confidence and efficacy.

In addition to the LSM, undergraduate students may elect to complete the Leadership Engagement Certificate, the Online Leadership Strategies and Applications certificate, or participate in Leadership Studies centered study abroad experiences.

**Courses**

LDST 200. Introduction to Leadership Studies and Applications. 3 Hours SC AE51 / S.

This course combines an introduction to a theoretical, research-based approach to the study of leadership with hands-on application, analysis and experimentation with the process of leadership. Students will explore core leadership competencies and apply leadership tools and processes across a variety of groups and systems, addressing issues of concern within those communities. This course satisfies the LDST 201/LDST 202 requirement for the Leadership Studies Minor. This course is not available to students with credit in LDST 201/LDST 202. Prerequisite: Instructor permission. LEC.

LDST 201. Introduction to Leadership. 2 Hours S.

This course introduces students to the study of the leadership process. The course covers theories and research on core themes of leadership,
facilitating on how course materials relate to students' own leadership experiences. Concurrent enrollment in LDST 202 is recommended. Students considering the Leadership Studies Minor must complete LDST 202. This course is not available to students with credit in LDST 200. Not open to seniors. LEC.

LDST 202. Introduction to Leadership Applications. 1 Hour AE51 / S. This course focuses on the application of information learned in LDST 201. Activities and discussions emphasize application, analysis, and engagement with the process of leadership. Concurrent enrollment in LDST 201 is recommended. Students considering the Leadership Studies Minor must complete LDST 201 and LDST 202. This course is not available to students with credit in LDST 200. Not open to seniors. Prerequisite: Corequisite: LDST 201. LEC.

LDST 203. Introduction to Leadership, Honors. 3 Hours AE51 / S. This course combines an introduction to a theoretical, research-based approach to the study of leadership with hands-on application, analysis, and engagement with the process of leadership. Within a small group setting, students explore core leadership competencies and experiment with the process of leadership by engaging classmates and members of the university and local communities and addressing issues of concern within those communities. This course satisfies the LDST 201/LDST 202 requirement for the Leadership Studies Minor. This course is not available to students with credit in LDST 200 or LDST 201/LDST 202. Prerequisite: Admission to the University Honors Program, Instructor Permission. LEC.

LDST 260. Study Abroad Topics in Leadership Studies. 1-6 Hours S. This course is designed to enhance international experience in topic areas related to Leadership Studies at the freshman/sophomore level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. FLD.

LDST 271. Foundations of Adaptive Leadership. 3 Hours S. This course introduces students to the study of the leadership process with an emphasis on applying the Adaptive Leadership paradigm to current systems in which the student is engaged. Activities and discussions focus on analysis and diagnosis of current leadership cases, offering students opportunities to apply concepts to their own professional disciplines and systems. LEC.

LDST 272. Ethics and Diversity in Leadership. 3 Hours AE51 / S. This course examines in-depth the role of ethics and diversity in effectively engaging in the process of Adaptive Leadership. Activities and discussion will focus on the application of theories of ethics and diversity as well as the development of core leadership competencies within student's own professional disciplines and systems. Prerequisite: LDST 271. LEC.

LDST 290. Foundations of Leadership in Society. 3 Hours S. This course will expose students to a variety of concepts, theories, and skills relevant to contemporary leadership thought. Students will be challenged to consider their personal conceptions and philosophy of leadership. Students will examine leadership within particular contexts such as creating change, ethical leadership, leadership and management, and historical leadership thought and leaders. LEC.

LDST 301. It's On Us: Gender Based Violence Prevention. 0-1 Hours S. This course is the first in a series of four addressing Gender Based Violence Prevention. This course examines the foundational concepts of Gender Based Violence Prevention at the individual level. Topics covered include; but are not limited to, Consent, Drug and Alcohol Facilitated Rape, Gender Based Violence as Oppression, and Bystander Intervention. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course students will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Identify the four main characteristics of consent and describe what is necessary for consent to be present (3) Identify and apply strategies for safely intervening as an active bystander on the individual level (4) Identify multiple ways that power and oppression is impacted by individual identity. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. LEC.

LDST 302. Breaking the Cycle: Gender Based Violence Prevention. 0-1 Hours S. This class is the second in a series of four addressing Gender Based Violence Prevention. This class examines the intersection between Gender Based Violence and individual identities in relation to gender and sexual orientation on the relationship level. Topics cover include; but are not limited to, Introduction to Social Justice, Gender Roles and Gender Construct, Sexual Health and Sex Positivity, and Healthy Relationships. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course student will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Assess behaviors that contribute to sexual health and sex positivity (3) Identify multiple ways that power and oppression are used through the social construct of gender and toxic masculinity (4) Identify multiple characteristics of healthy relationships and describe what is necessary for consent to be present in intimate partner relationships (5) Identify and apply strategies for safely intervening as an active bystander on the relationship level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. Prerequisite: LDST 301. LEC.

LDST 303. Prevention is Possible: Gender Based Violence Prevention. 0-1 Hours S. This class is the third in a series of four addressing Gender Based Violence Prevention. This class examines the critical role social justice plays in the prevention of Gender Based Violence on the community level. Topics cover include; but are not limited to, Introduction to Social Justice, Cultural Humility, Systems of Oppressions, and Primary Prevention as Activism. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course student will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Identify and apply strategies for safely intervening as an active bystander on the relationship and community level (3) Identify multiple ways that power and oppression is impacted by individual identity (4) Contribute to gender based violence prevention on the community level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S. Prerequisite: LDST 302. LEC.

LDST 304. ACTivist: Gender Based Violence Prevention. 0-1 Hours S. This is the final class in a series of four addressing Gender Based Violence Prevention. This class examines Gender Based Violence prevention through a Social Justice Frame Work and the Socioecological Model on the community and societal level. Topics cover include; but are not limited to, Social Justice Frame Work, Socioecological Model, Evidence Based Primary Prevention, and Accountability. Students will participate in small and large group discussions, online reflection journals, and evidence based trainings. At the end of the eight-week course student will be able to 1) Assess behaviors that put other at risk for violence, victimization, or perpetration (2) Assess the intersection between the socioecological model and the social justice frames work (3) Identify and apply strategies for safely intervening as an active bystander on the community and societal level (4) Identify multiple ways that power and oppression is impacted by individual identity (5) Contribute to gender
based violence prevention on the community or societal level. Completion of three credits of LDST 301-LDST 304 will fulfill KU Core Goal 3S.
Prerequisite: LDST 303. LEC.

LDST 320. How to Plan (Almost) Anything: Event Development and Management. 3 Hours S.
This course is designed to provide an introduction to the principles of special event planning and management. Students will gain foundational concepts and professional skills through researching, planning, coordinating, marketing, management and evaluation of special events. This course will develop student skills necessary to lead and manage in an ethically, environmentally, economically, and socially sustainable way. By utilizing the adaptive leadership model, students will analyze core objectives of event planning, while experimenting with smart risks and disciplined assessment. Essential topics will include event planning and coordination, sponsorship, negotiations, marketing, communications, customer service, vendor management, volunteer management, crisis risk management, and event evaluation. LEC.

LDST 420. Communication, Leadership, and Conflict Management. 3 Hours S.
This course introduces students to theories of conflict management from a variety of academic perspectives and the role leadership plays in managing conflict across multiple contexts. Students will learn how to successfully assess and command situations and effectively resolve interpersonal, organizational, and systemic conflict while doing the work of leadership. (Same as COMS 415.) LEC.

LDST 431. Communication and Leadership. 3 Hours GE3S / S.
This course provides an overview of the role of communication in leadership in a variety of contexts, including: interpersonal, small group, intercultural, organizational, and public sphere. It will include theoretical and experiential approaches to effective leadership communication.
Prerequisite: LDST 200, LDST 201, or LDST 203. LEC.

LDST 460. Study Abroad Topics in Leadership Studies. 1-6 Hours S.
This course is designed to enhance international experience in topic areas related to Leadership studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. FLD.

LDST 470. Independent Study in Leadership Studies. 1-6 Hours S.
This course engages students in an investigation of a special topic or project selected by the student with advice, approval, and supervision of a Leadership Studies instructor. Such study may take the form of special research, individual reports and/or conferences. Prerequisite: Permission of Instructor, LDST 201, LDST 202. INT.

LDST 480. Internship in Leadership Studies. 1-6 Hours S.
Students complete leadership-centered fieldwork in an organization related to their career goals. Criteria for the organizations and work assignments suitable for internship credit are available through the Institute for Leadership Studies. An internship plan is developed with the field supervisor and internship faculty adviser. Reports and meetings are required. Prerequisite: Permission of Instructor. LEC.

LDST 490. Special Topics in Leadership Studies: ____. 3 Hours S.
This course is designed for the study of special topics in leadership studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor. LEC.

LDST 500. Directed Readings in Leadership Studies. 1-6 Hours S.
This course is designed for directed readings in selected areas of Leadership Studies. Individual and supervised readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Permission of Instructor. IND.

LDST 520. Leadership Ethics. 3 Hours AE51 / S.
Through collaboration, discussion, case study, and course readings, Leadership Ethics familiarizes students with various theoretical perspectives of ethical decision making and the ethics-guided behavior essential for competent leadership. Upon completion, students will understand a variety of ethical perspectives for the prescription of action in a leadership context, apply a variety of ethical perspectives to the choice and evaluation of action in leadership work, and recognize the significance of considering multiple ethical perspectives in both leadership and broader contexts. Prerequisite: LDST 202. LEC.

LDST 532. Leadership Studies Practicum. 3 Hours AE61 / S.
Students simultaneously complete a 1-hour seminar in equity-centered leadership and a 2-hour supervised, direct, community involvement project in which they apply leadership knowledge, tools, and skills to a real world environment. Written assignments, journal reflections, and group discussions are used to record and assess learning. Prerequisite: LDST 201 and admission to the Leadership Studies minor. FLD.

LDST 535. Seminar in Leadership Strategies and Applications. 3 Hours S.
This seminar serves as the capstone course for the Leadership Studies minor. It includes advanced readings on leadership theory and practice, as well as major written and applied projects in which students integrate and demonstrate what they have learned in the program. Prerequisite: LDST 201 or LDST 431, and admission to the Leadership Studies minor. LEC.

LDST 690. Special Topics in Leadership Studies: ____. 3 Hours S.
This course is designed for the study of special topics in Leadership Studies. Course content addresses major topics and specialized issues in the field and topics change as needs and resources develop. May be repeated for credit if the content differs. Prerequisite: Permission of instructor. LEC.

LDST 695. Advanced Special Topics in Leadership Studies: ____. 3 Hours S.
This course is designed to take advantage of special competence by an individual faculty member in Leadership Studies. Course content addresses timely topics and relevant issues in the field and topics change as needs and resources develop. May be repeated for credit if the content varies. Prerequisite: Permission of instructor. LEC.

LDST 700. Introduction to Graduate Studies. 3 Hours.
This course is designed to prepare students accepted into the Master of Arts in Leadership in Diversity and Inclusion program for further graduate studies through a series of workshops, experiential learning opportunities, lecture, discussion, research assignments, and peer collaboration. Upon completion, students will have a better understanding of the expectations of graduate education as well as campus resources, and networking opportunities designed to support degree work. Students will develop their academic skill set by focusing on scholarly writing, oral communication/presentation, research and information literacy, critical thinking, and argumentation.
Prerequisite: Permission of Instructor. LEC.

LDST 705. Professionalization Seminar in Leadership Studies. 3 Hours.
This course is designed to cultivate professional habits, perspectives, and identities for graduate students primarily in the humanities and social science fields, but is open to students from all fields. The course focuses on preparation for career paths outside of higher education and based in work around Leadership in Diversity and Inclusion in the United States.
Prerequisite: Graduate standing. LEC.
LDST 710. History and Theory of Leadership Studies. 3 Hours.
Theoretical foundations in leadership, organizational decision making, and communication will enhance students’ development of expertise in assessing organizational and systems issues, and facilitating unit-, organization-, and system-wide improvements. Traditional approaches to leadership, organizing and communicating are contrasted with emerging approaches that promote sensitivity to diverse organizational cultures, systems, and populations. Through examination of theoretical perspectives, the student will develop an ability to integrate the contributions of different points of view and ways of thinking crucial to effectively assess, design and lead high performing organizations in a dynamic world. Contexts discussed will include for-profit, not-for-profit, healthcare, community, and military organizations. Prerequisite: Graduate standing. LEC.

LDST 720. Leadership Ethics. 3 Hours.
This course establishes a theoretical groundwork with readings and discussions that will familiarize students with five perspectives on ethical decision making and behavior as well as the essential competencies of leadership. For each of those perspectives, students will engage in reflections, collaborative case studies, and debates based on a case in point approach as well as a single-authored analysis of a selected leadership case. Prerequisite: Graduate Standing. LEC.

LDST 730. Managing the Work of Leadership. 3 Hours.
Through webinars and case in point pedagogy, this course prepares students to manage the day to day communicative and executive functions necessary for doing the work of leadership. Topics will include crisis management, stakeholder engagement, speech writing, fundraising, image management, and professionalization. Prerequisite: Graduate standing. LEC.

LDST 740. Leadership and Power. 3 Hours.
Leadership and power often are confused and this misunderstanding can lead to members of oppressed groups dismissing their own leadership potential. Through reading, reflective writing, and engaged discussion, this course will help students understand power and leadership as distinct concepts that occasionally intersect. Within their various systems, people continuously perceive, encounter, and work within different power dynamics. Thus students will learn about historical and culturally diverse understandings of power, the ethical responsibilities of power, the dangers of misuse of power, and doing the work of leadership with (and without) power. Prerequisite: Graduate standing. LEC.

LDST 770. Independent Study in Leadership Studies. 1-3 Hours.
This course engages students in a graduate-level investigation of a special topic or project selected by the student with advice, approval, and supervision of a Leadership Studies instructor. Such study may take the form of special research, individual reports and/or conferences. Prerequisite: Permission of instructor. IND.

LDST 800. Directed Readings in Leadership Studies. 1-3 Hours.
This course is designed for graduate level directed readings in selected areas of Leadership Studies. Individual and supervised readings address major topics and specialized issues in the field. May be repeated for credit if the content differs. Prerequisite: Permission of instructor. IND.

LDST 850. Leadership in Diversity and Inclusion Capstone. 1-3 Hours.
This course provides students an opportunity to integrate and synthesize the interdisciplinary knowledge they have gained in their graduate learning, combining self assessment and reflection with a guided project to create a final portfolio. Students will work closely with their faculty committee to design an experience that makes relevant connections across disciplines represented within the degree program and applies this knowledge to a new setting or complex problem. Prerequisite: Graduate standing. Instructor Consent. LAB.

Minor in Leadership Studies

Why study leadership studies?

The KU Leadership Studies Minor (LSM) believes that leadership is a process, not an outcome. Effective leadership starts with effective communication, and therefore students develop their learning around the adaptive leadership paradigm and develop core leadership competencies in order to mobilize others to tackle tough challenges and thrive.

Requirements for the Minor

Leadership Studies is an 18-credit hour interdisciplinary minor offered through the Institute for Leadership Studies. The minor requires completion of LDST 200, LDST 201 and LDST 202 or LDST 203 with an additional 15-credit hours as identified below. Due to limited space capacity, top candidates will be given preferential permission to enroll in the subsequent LDST courses in the minor. Therefore, students may apply for admission to the minor while taking LDST 200, LDST 202 or LDST 203 or upon completion of the course. Course work involves studying theory and research in leadership and applying it to the students’ leadership experiences.

Graduate Certificate in Leadership Studies

The purpose of the Graduate Certificate in Leadership Studies is to build foundational knowledge of the history, theory, and practice of leadership with a focus on ethical decision making and understanding of the dynamics of power in doing the work of leadership. The primary objectives are to offer graduate students and working professionals tools and techniques to better understand and navigate leadership opportunities within professional and community environments, and to respond efficiently and effectively to the demands of a changing social, cultural, and political landscape while doing the work of leadership.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Any applicant seeking to pursue a graduate certificate in Leadership Studies must submit an application at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/). Applications are accepted on a rolling basis. Please see the Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/) policy for information on admission requirements.

New Applicants

Applicants who are not already enrolled in a KU graduate program must have completed a bachelor’s degree with a 3.0 or higher GPA. These applicants should include the following materials in their application to the certificate program:

- A statement of purpose outlining their interest in the Leadership Studies graduate certificate
- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges and universities attended

Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/).

Current KU Graduate Students

Applicants already in a KU graduate program must be in good standing with their home department to be eligible for admission the certificate program. Current KU graduate students should include the following materials in their online application:

- A statement of purpose outlining their interest in the Leadership Studies graduate certificate
- A letter of support from their faculty advisor or the Director of Graduate Studies in their home academic unit

Contact

Visit the Institute for Leadership Studies website (https://ils.ku.edu/admission-graduate-certificate/) for more detailed information about the application process.

Completion of 12 credit hours across 4 online courses:

Interdisciplinary Studies in Liberal Arts and Sciences

Cross-Departmental Degree Programs

The College of Liberal Arts and Sciences offers graduate degrees that cross multiple departments and units. For information on these, see:

- Center for East Asian Studies (p. 1386);
- Center for Global and International Studies (p. 1588);
- Indigenous Studies Program (p. 1683);
- Center for Latin American & Caribbean Studies (p. 1705);
- Museum Studies Program (p. 1791); and
- Center for Russian, East European, and Eurasian Studies (p. 1902).

Cross-departmental studies that have no defined degree program may be authorized upon petition. See Interdisciplinary Studies in the Graduate Studies section of the online catalog for more information.

Graduate students in degree programs may add a graduate certificate in the following areas:

- African Studies
- American Studies
- Applied Behavior Analysis
- Applied Math
- Chemical Biology
- City and County Management
- Community Health and Development
- East Asian Cultures
- Environmental Assessment
- Environmental Justice
- Environmental Studies
- Geographic Information Systems
- Global and International Studies
- Health Psychology
- Indigenous Studies
- Latin American and Caribbean Studies
- Medieval and Early Modern Studies
- Museum Studies
- Peace and Conflict Studies
- Performance Management
- Professional Workplace Communication
- Religious Studies
- Russian, East European, and Eurasian Studies
- Science Management
- Second Language Studies
- Women, Gender and Sexuality Studies

Information on these Graduate Certificate Programs may be found in this catalog in the College of Liberal Arts and Sciences’ Overview section.

Jewish Studies Program

The Program in Jewish Studies offers an undergraduate major (BA in Jewish Studies) and minor, Departmental Honors (both by research paper and by service learning), and courses in Jewish Studies, Hebrew, and Yiddish; and an Undergraduate Certificate in Holocaust Studies. We also co-sponsor courses in many other units, especially Religious Studies and History. Among our several focus areas are Jewish history and culture, Judaism, Holocaust Studies, Israel Studies, Jewish languages and narratives, and applied service in Jewish organizations.

Jewish culture and religion have flourished in a rich variety of forms and in remarkably disparate places on the globe for thousands of years. Jewish contributions have deeply affected the art, languages and literature, law, philosophy, and political thought, and the sciences of all nations. The global impact of Jewish culture thus warrants its study as an important component of the liberal arts curriculum at KU. The Jewish Studies Program at KU is the only such program in the state of Kansas. Its mission, therefore, is to celebrate the Jewish experience and promote the understanding of its cultural importance with courses and academic programs that focus on the history, diversity, culture, languages, thought, and practices of the Jewish people and their religion.

As a Jewish Studies major you will gain skills in critical thinking and cultural awareness that lead to successes in a wide array of career fields, including education, law, journalism, healthcare, and social justice advocacy. Requirements for the Jewish Studies major include 2 courses in Jewish history and/or culture; 2 courses in Judaism; 3 electives; demonstration of proficiency at the intermediate level of Hebrew or Yiddish (usually satisfied by taking 2 courses at the 200-level); and JWSH 601, a capstone course.

Courses

HEBR 110. Elementary Israeli Hebrew I. 5 Hours U / F1.
A beginning course in modern Israeli Hebrew. Essentials of grammar, syntax and conversational practice; elementary reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam. LEC.

HEBR 120. Elementary Israeli Hebrew II. 5 Hours U / F2.
A continuation of HEBR 110. Note Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 110. LEC.

HEBR 177. First Year Seminar: _______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hebrew. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HEBR 200. Elementary Studies in Modern Hebrew. 3 Hours H.
This course is designed to help prepare students for the intermediate level of Modern Hebrew. Not open to native speakers of Hebrew. Does not count toward the JWSH minor or major. Prerequisite: HEBR 110 or equivalent. Consent of instructor. IND.

HEBR 210. Intermediate Israeli Hebrew I. 3 Hours U / F3.
Further development of language skills: listening comprehension, oral efficiency, intermediate grammar and syntax, reading and writing. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 120. LEC.

HEBR 220. Intermediate Israeli Hebrew II. 3 Hours U / F4.
A continuation of HEBR 210. Note: Students with other previous experience in Hebrew must take a placement exam. Prerequisite: HEBR 210. LEC.
HEBR 230. Biblical Hebrew. 3 Hours U.
This course introduces students to the grammatical structure and vocabulary of biblical Hebrew. It includes basic biblical passages for students to translate into English and analyze. LEC.

HEBR 240. Biblical Hebrew II. 3 Hours U.
This is a continuation of HEBR 230. It continues the study of the grammatical structure and vocabulary of biblical Hebrew, and includes biblical texts for students to translate and analyze. Prerequisite: HEBR 230 or permission of the instructor. LEC.

HEBR 340. Advanced Israeli Hebrew I. 3 Hours U / FP.
Advanced study of Modern Hebrew. This course is designed to strengthen linguistic skills, enrich vocabulary, and further the study of grammar and syntax. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or permission of the instructor. LEC.

HEBR 350. Advanced Israeli Hebrew II. 3 Hours U / FP.
Continued advanced study of modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 340 or permission of the instructor. LEC.

HEBR 395. Study Abroad Topics in Hebrew: ____. 3-6 Hours H.
This course is designed for the study abroad of special topics in Hebrew at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

HEBR 410. Studies in Modern Hebrew Literature. 3 Hours H / FP.
An introduction to Hebrew literature from the nineteenth century to the present day. The course emphasizes the development of basic interpretive skills and the understanding of basic literary movements, genres, and concepts. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. LEC.

HEBR 420. Studies in Modern Hebrew. 3 Hours U / FP.
This course is designed to help students achieve fluency in speaking, listening, and writing Modern Hebrew. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. LEC.

HEBR 490. Independent Study. 1-3 Hours U.
Intensive reading or research under faculty supervision. Not open to native speakers of Hebrew. Prerequisite: HEBR 220 or equivalent. IND.

Courses

JWSh 107. Jews, Christians, Muslims. 3 Hours HR AE42/GE3H / H.
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Not open to students who have taken JWSh 109 or REL 109. (Same as REL 107.) LEC.

JWSh 109. Jews, Christians, Muslims, Honors. 3 Hours HR AE42/GE3H / H.
A basic introduction to the major religious traditions in the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken JWSh 107 or REL 107. (Same as REL 109.) LEC.

JWSh 120. Exploring the Jewish Experience. 1 Hour H.
This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, and culture. Not open to students who have completed JWSh 400 or JWSh 610. LEC.

JWSh 124. Understanding the Bible. 3 Hours HR AE42/GE3H / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 311 or JWSh 321 or REL 315. Not open to students who have taken REL 125 or JWSh 125. (Same as REL 124.) LEC.

JWSh 125. Understanding the Bible, Honors. 3 Hours HR AE42/GE3H / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSh 124. (Same as REL 125.) LEC.

JWSh 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Jewish Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

JWSh 300. Topics in Jewish Studies: ____. 3 Hours H.
Examination of special topics in Jewish Studies. May be repeated if topic varies. LEC.

JWSh 305. Language, Gender, and Sexuality. 3 Hours GE3S / S.
How do people express gender in diverse languages around the world? In a globalized world in which English is increasingly prominent, how are other languages changing to account for both global and local shifts in gender norms and expectations? This course will examine gender, multilingualism and globalization using approaches of sociolinguistics, linguistic anthropology, and communication studies. We will explore such topics as gender, sexuality, and multilingualism; gendered language variants; gender norms, politeness, and globalization; nonbinary and trans identities encoded in languages around the world, including but not limited to gender pronouns; identity, body, and linguistic practices; and considerations of power, hegemony, and imperialism. (Same as ANTH 325, GIST 303, SLAV 305 and WGSS 325.) LEC.

JWSh 311. Narratives of Jewish Life. 3 Hours HL AE42 / H.
The course focuses on the narratives through which Jews made sense of their lives under the impact of the forces of modernity, beginning in the "old world," and moving through the 19th century and into the 20th. The goal is to analyze how the imagination of Jewish writers was captured by the changes in social structures such as new educational, residential and occupational opportunities, leading to increased interactions with the gentile society. Students read and discuss literary works based in the shtetl in revolutionary Russia, and in America. We will also look at memoirs and letters written by ordinary Jews. All assigned texts will be in English. LEC.

JWSh 315. The Spanish Inquisition. 3 Hours AE42 / H.
a broad historical study of the Spanish Inquisition from 1478 to its afterlife in modern culture, including its use in political debates and its depiction in popular culture. Topics include anti-Semitism, the nature of the inquisitorial investigation, the use of torture, censorship and the relationship between the Inquisition, the Spanish monarchy and other religious and lay authorities. Taught in English. Will not count toward the Spanish major. (Same as HIST 325 and SPAN 302.) LEC.

JWSh 318. Jews and Slavs in Eastern Europe. 3 Hours H.
Jews and Slavs have shared territory from the Middle Ages to the present day. The contact between these culturally and linguistically distinct groups
have shaped many centuries of Eastern European history - from the extreme violence of the pogroms to long periods of peaceful coexistence and cooperation. "Jews and Slavs" examines the history and cultural geography of Slavic-Jewish contact from the perspectives of both groups. Through literature, film, journalism, and folklore, students learn about the profound influence Jews and Slavs have had on each other, the uneasy feelings that accompanied their interactions, and the creative and fascinating impact their interaction had on both cultures. (Same as SLAV 318.) LEC.

**JWSH 320. The Bible Then and Now. 3 Hours.**
An introduction and survey of the history and interpretation of the Jewish and Christian bibles from their first formation to the present day. Students will explore the way the text, interpretation and format of the Bible have adjusted over time to accommodate religious, political, social and technological changes. Class will occasionally meet in the university's rare book collection to study rare bibles. (Same as SLAV 320.) LEC.

**JWSH 321. Religion of Ancient Israel. 3 Hours H/W.**
An introduction to the religion of ancient Israel through examination of biblical texts and archaeological evidence. Emphasis is placed on understanding the texts of the Hebrew Bible (Old Testament) in their historical and cultural contexts, including the relationship of their religious views to other religious perspectives current in ancient Israel and the Near East. Attention is given to the processes by which the biblical texts developed and came to be viewed as scripture. (Same as REL 311.) LEC.

**JWSH 322. The Jewish World of Jesus. 3 Hours GE3H / H.**
An introduction to the figure of Jesus in his ancient Jewish context. What was Jewish life like in Jesus’s time? What did the early Jesus movement share with other forms of Judaism, and how did it differ? Evidence from the New Testament, the Dead Sea Scrolls, and other textual and archaeological sources will be used to explore the first-century Jewish society of which both Jesus and the first Christians were a part. (Same as REL 322.) LEC.

**JWSH 325. Introduction to Judaism. 3 Hours H.**
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as REL 325.) LEC.

**JWSH 326. The Talmud: Its Origins, Nature, and Evolution. 3 Hours H.**
This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries. (Same as REL 326.) Prerequisite: REL 104, REL 107, or REL 124 or REL 125, or permission of the instructor. LEC.

**JWSH 327. Jewish Secular Culture. 3 Hours HL AE42 / H.**
By examining the modern concept of Yiddishkeit (Jewishness), this course explores Jewish secularism as a set of modern intellectual, literary, and cultural practices that redefined the relationship between the secular and religious in literature, music, theatre, art, humor, and foodways. This interdisciplinary course draws on theoretical approaches from history, cultural studies, religious studies, folklore, and linguistics to examine the different secularizing cultural practices of the Jews in Central and Eastern Europe, as well as in North America. LEC.

**JWSH 329. Israeli-Palestinian Conflict: An Introduction. 3 Hours S.**
This course provides an introduction to the Israeli-Palestinian conflict including its history from the Ottoman period to the present day, the social and political effects on Israeli and Palestinian life and citizenship, official and unofficial narratives, and international responses. LEC.

**JWSH 330. Mystical Tradition in Judaism. 3 Hours H.**
Mystical experiences and supernatural encounters in Jewish texts and tradition: Dybbuks and demons, angels and Elijah; from ecstatic enlightenment to succumbing to satan - Jewish texts and tradition are riddled with the arcane, the occult and the mystical. This course will mine the sources for a deep exploration of these aspects of Judaism that are most often obscured by "normative" teachings and practices, yet remain deeply embedded in the customs and beliefs of Jews around the world. (Same as REL 329.) LEC.

**JWSH 335. History of Jewish Women. 3 Hours H.**
This course explores the history of Jewish women from antiquity to the twentieth century. It examines the historical constructions of women's gender roles and identities in Jewish law and custom as well as the social and cultural impact of those constructions in the context of the realities of women's lives in both Jewish and non-Jewish society. (Same as HIST 335, WGSS 335.) LEC.

**JWSH 336. Jewish American Literature and Culture. 3 Hours AE41 / H.**
An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folklore, music, film, and visual art. (Same as ENGL 336.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**JWSH 337. Religious Zionisms. 3 Hours H.**
A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required. (Same as REL 327.) LEC.

**JWSH 338. Languages of the Jews. 3 Hours H.**
From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as LING 338.) LEC.

**JWSH 339. Languages of the Jews, Honors. 3 Hours H.**
Honors version of JWSH 338 or LING 338, Languages of the Jews. Prerequisite: Membership in the University Honors Program or consent of instructor. (Same as LING 339.) LEC.

**JWSH 340. Topics in Modern Jewish Literature: _____. 3 Hours.**
This course treats Jewish literature in English or English translation in the 20th and 21st centuries either as a broad survey or according to specific themes. May be repeated for credit. LEC.

**JWSH 341. Hitler and Nazi Germany. 3 Hours AE51 / H/W.**
An examination of the rise of Hitler and Nazism, beginning with the breakdown of 19th century culture in the First World War and continuing through the failure of democracy under the Weimar Republic. The course will also discuss the impact of Nazism on Germany and how Nazism led to the Second World War and the Holocaust. (Same as HIST 341.) LEC.

**JWSH 342. Medieval to Early Modern Jewish History. 3 Hours H.**
This course surveys the political, economic, social, and cultural experience of Jews in the medieval and early modern periods, from the sixth through the seventeenth centuries. It examines Jewish life in the
Mediterranean diaspora, the Iberian Peninsula, and Christian Europe and considers the impact of Jewish communities on the non-Jewish host societies in which they settled. LEC.

**JWSH 343. The Holocaust in History. 3 Hours AE51 / H.**

The systematic murder of the Jews of Europe by the Nazis during World War II is one of the most important events of modern history. This course studies the Holocaust by asking about its place in history. It compares other attempted genocides with the Holocaust and examines why most historians argue that it is unique. Other topics covered include the reasons the Holocaust occurred in Europe when it did, the changing role of anti-Semitism, and the effects of the Holocaust on civilization. This course also discusses why some people have sought to deny the Holocaust. The course concludes by discussing the questions people have raised about the Holocaust and such issues as support for democracy, the belief in progress, the role of science, and the search for human values which are common to all societies. (Same as HIST 343.) LEC.

**JWSH 344. Modern Jewish History. 3 Hours H.**

This course explores the complex of interactions between Jews, Judaism, and modernity by examining the challenges to Jewish life and thought, community and culture, self-understanding and survival, from the early modern period to the present day. Through the lenses of religious, cultural, intellectual, and political expression, the course examines the social, economic, and demographic changes in Jewish communities in Western, Central and Eastern Europe, the United States, and Israel along with the impact of antisemitism and the Holocaust. (Same as HIST 344.) LEC.

**JWSH 346. The Jewish Experience in America. 3 Hours.**

This course surveys the history of American Jewry from the 17th to the 20th centuries through overlapping perspectives of economics, politics, ethnicity, culture, and gender. The first part of the course examines the three waves of Jewish immigration - Sephardic ("Spanish-Portuguese"), West-Ashkenazic ("German"), and East Ashkenazic ("Russian") - that took place between the 1600s and World War I: their specific European roots and American circumstances; the different ways in which each group adapted to, interacted with, shaped and was shaped by American life, constructed ideas of community and identity, and influenced those who came later. The second part of the course explores the genesis of an integrated and distinctive modern American "Jewishness" that emerged after World War I and reached its zenith in the 1960s. Informed by interwar and postwar social, economic and demographic transformation and critical domestic and international political developments, this process involved the reconstruction of Jewish identity and community based on the conscious blending of Jewish values, traditions, rituals, and institutions with American notions of personal happiness and success, family, domesticity and upward mobility and the conscious broadening of Jewish concepts of philanthropy and activism based on expanded notions of American Jewry's social and political mission in the United States and the world. LEC.

**JWSH 349. Antisemitism: A Long History. 3 Hours H/W.**

This course surveys the genesis, evolution and persistence of antipathy towards Jews and Judaism from late antiquity through the twentieth century, exploring its connections to religious and secular ideologies and its changing nature over time, place, and culture. Using primary source documents, religious and secular art and literature, the mass media and popular expression, the course examines how antisemitism was articulated and implemented, how Jews and Judaism were perceived and represented, and how Jews and Judaism responded to antisemitism. (Same as HIST 349.) LEC.

**JWSH 350. Contemporary Jewish Identities. 3 Hours SC / H.**

This course explores the variety of ways in which American Jews create Jewish identities as individuals and groups. It traces the emergence of the various current divisions within Judaism: Reform Judaism (which by definition, implies Orthodoxy), then Conservative Judaism, and then the later development of Reconstructionist Judaism. The course also explores other contemporary options for being Jewish: cultural Jews, secular Jews, unaffiliated Jews, religious Jews, and gay or lesbian or transgendered Jews. LEC.

**JWSH 361. Jewish Film. 3 Hours HL / H.**

An examination of the cultural history of the Jews through films that explore Jewish themes, including but not limited to: issues of tradition and modernity, religion and secularism, immigration, gender, Zionism, anti-Semitism, and the Holocaust. Films studied may be in English and in foreign languages (with English subtitles) like Yiddish, Hebrew, and Russian. LEC.

**JWSH 371. Archaeology of Ancient Israel. 3 Hours H.**

Archaeology and art, sites and monuments of ancient Israel from the Neolithic period to Late Roman. Special topics will include the peoples of the region, nomadism and urbanization, the kingdoms of Israel, Second Temple Period, Qumran, Roman Jerusalem, and the creation and development of the synagogue. (Same as CLSX 371.) LEC.

**JWSH 382. Jerusalem Through the Ages. 3 Hours H.**

As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, HIST 382 and REL 382.) LEC.

**JWSH 387. Enemies of Ancient Israel. 3 Hours H.**

An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called "Bad Guys of the Bible" using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as HIST 381 and REL 387.) LEC.

**JWSH 395. Study Abroad Topics in Jewish Studies: ____. 3-6 Hours H.**

This course is designed for the study of special topics in Jewish Studies at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

**JWSH 400. Foundations of Jewish Studies. 3 Hours H.**

This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, ethnicities and narratives, languages, customs and the arts. Special attention will be given to various career options available to students of Jewish studies. Not open to students who have completed JWSH 120 or JWSH 610. LEC.

**JWSH 410. Israel: From Idea to State. 3 Hours S.**

The course surveys the emergence of modern Israel, Israeli government, culture, and society. The course is divided into four periods: Hovevei Zion, the Zionist movement, and the first and second Aliyah; the Yishuv during Mandatory Palestine; the First two decades of statehood, 1948-1967; and Israel after the 1967 war. LEC.
JWSH 412. Mandatory Palestine: 1920-1948. 3 Hours S.
A review of the thirty-year history of the British Mandate over Palestine, with a focus on the successful nation building by the Jewish people and the demise of the Palestinian project in 1948. LEC.

JWSH 414. Israel/Palestine: The War of 1948. 3 Hours S.
The war of 1948 shaped the history of the modern Middle East more than any other single event. Issues that will be discussed include the participating parties, the efforts of the international community, the establishment of Israel, the division of Palestine, and the continuing problem of Palestinian refugees. LEC.

JWSH 416. Israel in the First Decade. 3 Hours S.
The course focuses on the formative period of the State of Israel from sociological, economic, religious, and cultural perspectives. LEC.

JWSH 420. Government of Israel. 3 Hours S.
The course is an introduction to the Israeli system of government and its complexities, from a comparative perspective. The course aims to deal with the processes and critical issues that characterize the Israeli political system, as well as dilemmas and conflicts that are part of it since the early days of statehood until today. LEC.

JWSH 422. Topics in Israeli Society: ________. 3 Hours U.
This course explores the social interconnections and interactions of the various cultures, religions, and ethnic identities in Israel. LEC.

JWSH 426. Polls and Public Opinion in Israel. 3 Hours S.
An examination of public opinion in Israel, polls, and their effect on election results, policy making, and politics -- from a comparative perspective. We will discuss the validity of public opinion polls as a measurement tool, its advantages and disadvantages, and its success and failure at predicting election results. LEC.

JWSH 434. Arab-Palestinian Society, Culture and Politics. 3 Hours AE42/GE21 / S.
This course introduces students to the study of Arab-Palestinians in Israel, by exploring the construction of Palestinian identity, their social and political structures, their culture, relations with Israeli Jews and the status of integration vs segregation within Israel. LEC.

JWSH 440. International Relations of the Middle-East. 3 Hours S.
An overview of the politics and the governmental systems of Middle Eastern nations, including the historic, religious, ideological, economic and cultural forces that shape government policies and social movements. LEC.

JWSH 445. Local Self-Governments in Israel. 3 Hours S.
An introduction to the fundamentals of local governments in Israel and their relationships, political, legal, and economic, to the central government. LEC.

JWSH 490. Directed Study in Jewish Studies. 3 Hours AE61 / H.
Intensive reading or research under faculty supervision. Prerequisite: Consent of instructor. IND.

JWSH 491. Directed Study in Jewish Studies, Honors. 3 Hours AE61 / H.
Honors version of JWSH 490. Intensive reading or research under faculty supervision. Prerequisite: Membership in the University Honors Program or consent of instructor. IND.

JWSH 523. The Dead Sea Scrolls. 3 Hours H.
A study of the archeological evidence and texts from the Dead Sea area that provide primary evidence for Jewish religious belief and practice in the Greek and Roman periods (ca. 250 B.C.E. - 135 C.E.). (Same as REL 523.) Prerequisite: REL 124 or JWSH 124 or consent of instructor. LEC.

JWSH 525. Jews and Christians. 3 Hours H/W.
This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as REL 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. LEC.

JWSH 526. Jewish History and Literature in the Greek and Roman Periods. 3 Hours H/W.
The history and literature of the Jewish people from the hellenistic period (late fourth century B.C.E. to the codification of the Mishnah 210 C.E.). Select texts from the Hebrew Bible, the so-called apocrypha and pseudepigrapha, the Qumran scrolls, Philo, Josephus, related early Christian texts, and Rabbinic texts will be studied. (Same as CLSX 506 and REL 526.) Prerequisite: REL 124 or JWSH 124 or permission of instructor. LEC.

JWSH 560. Modern Jewish Thought. 3 Hours H.
This course examines how a number of prominent Jewish thinkers from the seventeenth century through the present have encountered and engaged the special challenges posed by modernity to religious traditions, including the challenge of science to the validity of miracles, the challenge of the secular state to religious authorities, and the challenge of historical studies to the integrity of scripture. Thinkers covered may include Spinoza, Mendelssohn, Frankel, Hirsch, Geiger, Hermann Cohen, Buber, Rosenzweig, Arendt, Scholem, Leo Strauss, Levinas, and Derrida. Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. (Same as REL 560.) LEC.

JWSH 562. Judaism and Political Theology. 3 Hours H.
A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization, pluralism, democracy, and revolution. (Same as REL 572.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

JWSH 563. Judaism and Sexuality. 3 Hours H.
An exploration of the complex interactions of Judaism, Jewishness, and sexuality. The course serves as a basic introduction to traditional Jewish understandings of gender and power, love and sex, and the body and embodiment. It also introduces the changes undergone by this tradition under the impact of contemporary feminism and queer theory. (Same as REL 573, WGSS 573.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

JWSH 570. Studies in Judaism. 3 Hours H.
A study of the major intellectual sources of the Jewish tradition from the Mishna, Talmud, Midrash, prayerbook, philosophers, the Zohar, and the Shulchan Aruch. (Same as REL 570.) Prerequisite: A course in Religious Studies or Jewish Studies numbered 300 or above. LEC.

JWSH 572. Jewish Folklore. 3 Hours H.
Jewish folklore is extraordinarily rich and varied. From folktales to riddles, from legends about the exalted rabbis to irreverent jokes, folklore is central to the Jewish way of life. This course traces the extent to which oral elements appear in traditional Jewish literary texts such as the Bible; read and discuss folktales, and examine minor genres such as proverbs, riddles and jokes. Topics include the supernatural beings of Jewish folklore dybubks, seductive female demons, and golems. Students acquire theoretical tools with which to analyze folklore (Jewish or otherwise), read stories, watch movies, and collect samples of folklore from informants. LEC.
JWSH 573. Jewish Folklore, Honors. 3 Hours H.
Honors version of JWSH 572. Jewish folklore is extraordinarily rich and varied. From folktales to riddles, from legends about the exalted rabbis to irreverent jokes, folklore is central to the Jewish way of life. This course traces the extent to which oral elements appear in traditional Jewish literary texts such as the Bible; read and discuss folktales, and examine minor genres such as proverbs, riddles and jokes. Topics include the supernatural beings of Jewish folklore dybbuks, seductive female demons, and golems. Students acquire theoretical tools with which to analyze folklore (Jewish or otherwise), read stories, watch movies, and collect samples of folklore from informants. Open only to students in the University Honors Program or by permission of instructor. LEC.

JWSH 590. Research Methods. 3 Hours U.
This seminar will introduce students to appropriate approaches and methods, especially in the Humanities and Social Sciences, for conducting research in Jewish Studies and/or in Israel Studies. Examples will draw on many disciplines, especially in the humanities and social sciences. Students will prepare a research proposal and investigative methodology. Prerequisite: Any JWSH course 300 or above or permission of the instructor. LEC.

JWSH 600. Advanced Topics in Jewish Studies: ____, 3 Hours H.
Examination of advanced topics in Jewish Studies. May be repeated if topic varies. Prerequisite: Consent of instructor. LEC.

JWSH 601. Senior Seminar in Jewish Studies. 3 Hours AE61 / H.
Investigation of topics related to Jewish studies from an interdisciplinary perspective: Jewish culture, history, and religion. The course focuses on research methods and intensive writing. Prerequisite: Open only to Jewish studies majors. Suggested for students with senior standing. LEC.

JWSH 610. Foundations of Jewish Studies. 3 Hours H.
This course introduces students to basic aspects of Jewish studies, including Jewish history, Judaism and theology, philosophy and science, ethnicities and narratives, languages, customs and the arts. Special attention will be given to various career options available to students of Jewish studies. Not open to students who have completed JWSH 120 or JWSH 400. Prerequisite: Graduate status. LEC.

JWSH 650. Service Learning in Jewish Studies. 3 Hours S.
This course, to be taken in the junior or senior year, is designed to give students the opportunity to apply the knowledge, concepts, and ideas gained in courses in Jewish Studies to real-life situations in appropriate agencies and organizations. Open to students in the Jewish Studies program. Prerequisite: Permission of instructor. FLD.

JWSH 681. Regimes in the Middle-East and North Africa. 3 Hours S.
Using governmental case-studies in North Africa and the Middle East, this course will examine basic definitions and behaviors of liberal democracies, dictatorships, and hybrid regimes, the transitions between them, and the strategies they (and their leaders) use to stay in power. Prerequisite: JWSH 440 or permission of instructor. LEC.

JWSH 695. Study Abroad Advanced Topics: ____, 3 Hours U.
Advanced study abroad topics in Jewish and Israel studies. Prerequisite: Any JWSH course 300 or above or permission of the instructor. RSH.

JWSH 700. Topics in Jewish Studies: ____, 3 Hours.
A study of one or more selected topics in Jewish studies. Topics can be on Jewish religion, history, culture, languages, or Israel studies. Repeatable for credit if topic varies. Prerequisite: Any JWSH course 300 and above, or equivalent permission of instructor. SEM.

JWSH 729. Research in the Israeli-Palestinian Conflict. 3 Hours.
This course guides students in conducting research on any aspect of the Israeli-Palestinian conflict, such as its history from the Ottoman period to the present day, the social and political effects on Israelis and Palestinians, various narratives, and international responses. Prerequisite: JWSH 329 or JWSH 410 or JWSH 414 or JWSH 412 or JWSH 434 or permission of the instructor. LEC.

**Courses**

YDSH 104. Elementary Yiddish I. 5 Hours U / F1.
Essentials of grammar, practice in speaking, reading, and writing Yiddish. Not open to native speakers of Yiddish. LEC.

YDSH 108. Elementary Yiddish II. 5 Hours U / F2.
Continuation of grammar, practice in conversation, composition, and reading. Not open to native speakers of Yiddish. Prerequisite: YDSH 104 or equivalent. LEC.

YDSH 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Yiddish. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

YDSH 212. Intermediate Yiddish I. 3 Hours U / F3.
Structured grammar review, composition, conversation, with readings of literary and cultural texts. Not open to native speakers of Yiddish. Prerequisite: YDSH 108 or equivalent. LEC.

YDSH 216. Intermediate Yiddish II. 3 Hours U / F4.
A continuation of YDSH 212. Structured grammar review, composition, conversation, with readings of literary and cultural texts. Not open to native speakers of Yiddish. Prerequisite: YDSH 212 or equivalent. LEC.

YDSH 300. Studies in Yiddish: _____. 3 Hours H.
Examination of special topics in Yiddish. May be repeated if topic varies. LEC.

YDSH 395. Study Abroad Topics in Yiddish: _____, 3-6 Hours H.
This course is designed for the study abroad of special topics in Yiddish at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

YDSH 410. Studies in Modern Yiddish Literature. 3 Hours H.
An introduction to Yiddish literature from the nineteenth century to the present day. The course emphasizes the development of basic interpretive skills and the understanding of basic literary movements, genres, and concepts. Prerequisite: YDSH 216 or equivalent. LEC.

YDSH 490. Independent Study. 1-3 Hours U.
Intensive reading or research under faculty supervision IND.

**Bachelor of Arts in Jewish Studies**

The Program in Jewish Studies offers an undergraduate major (BA in Jewish Studies) and minor, Departmental Honors (both by research paper and by service learning), and courses in Jewish Studies, Hebrew, and Yiddish; we also co-sponsor courses in many other units, especially Religious Studies and History. Among our several focus areas are Jewish history and culture, Judaism, Holocaust studies, Israel Studies, Jewish languages and narratives, and applied service in Jewish organizations.

Students who choose to complete the BA in Jewish Studies often find employment working in Jewish education, non-profit organizations, outreach, and other areas where knowledge of Jewish languages, history, and culture is an asset. The Jewish Studies BA is easy to combine
with other majors and/or minors within the College of Liberal Arts and Sciences.

Jewish culture and religion have flourished in a rich variety of forms and in remarkably disparate places on the globe for thousands of years. Jewish contributions have deeply affected the art, languages and literature, law, philosophy, and political thought, and the sciences of all nations. The global impact of Jewish culture thus warrants its study as an important component of the liberal arts curriculum at KU. The Jewish Studies Program at KU is the only such program in the state of Kansas. Its mission, therefore, is to celebrate the Jewish experience and promote the understanding of its cultural importance with courses and academic programs that focus on the history, diversity, culture, languages, thought, and practices of the Jewish people and their religion.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the credittransfer.ku.edu/ website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Requirements for the B.A. Major**

Students take 30 credit hours structured according to the following plan:

- 2 courses in Jewish History and/or Culture
- 2 courses of intermediate or advanced Hebrew and/or Yiddish
- 1 capstone seminar course (JWSH 601), writing intensive
- 3 elective courses

The student to explore Jewish Studies in greater breadth and depth.

1 Capstone Seminar Course 3 JWSH 601 Senior Seminar in Jewish Studies

Electives 9 Other JWSH courses not chosen to satisfy the above requirements. HEBR and YDSH courses at 300+ level qualify as electives for up to 6 credit hours total. HEBR/YDSH courses at 200 level must be approved manually.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Jewish Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
Elective or possible minor course 300+ (Total Hours) | Elective or possible minor course 300+ (Total Hours) | 3
---|---|---

**Total Hours 120**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) (http://college.ku.edu/undergrad/curriculum/ba_ QR/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. Please note: the HEBR and YDSH Intermediate I and II courses listed on this four-year plan will fulfill both the BA Second Language requirement and the Language requirement in major. A complete list of courses that can count toward the Language requirement for the major is listed on the Degree Requirements tab. Not all the courses listed will fulfill the BA Second Language requirement. Students who use courses from the course list to fulfill the major Language requirement that do not also fulfill the BA Second Language requirement need to be sure that they either complete coursework or obtain a letter of proficiency to satisfy the BA Second Language requirement.

4. This major requires 3 courses of Jewish Studies major electives, which can be chosen from all the course lists provided under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors**

For departmental honors in Jewish Studies, students must meet the following criteria:

1. Candidates will have a grade-point average in Jewish Studies of 3.5 both at the time of declaring their intention to seek honors and by graduation.

2. In consultation with the JS honors coordinator and with approval from a supervising professor, candidates will declare their intention to seek honors no later than the time of enrollment for the final undergraduate semester.

3. Candidates will fill out a declaration form (available here (http://college.ku.edu/sites/clas.drupal.ku.edu/files/docs/SAS/Forms/dept_honors_intent_form.pdf)) and submit a copy of that form to College Advising and Student Services (109 Strong Hall).

4. Candidates intending to conduct research and write a substantial, original research paper (honors essay) will enroll in JWSH 490 Directed Study in Jewish Studies or in JWSH 491 Directed Study in Jewish Studies Honors (if they are in the University Honors Program) for one or two semesters. Candidates intending to engage in service learning at a community organization will enroll in JWSH 650 and, at the end of service, will submit an essay that describes the service and reflects on the student’s experience. A grade of B or higher must be earned in this/these courses.

5. A committee of three members of the University faculty (the supervising professor and two others, one of whom must be a member of the Jewish Studies faculty) will approve the honors essay or service learning project and will certify to the JS honors coordinator that the candidate has successfully completed the requirements to earn honors. The JS honors coordinator will write to notify College Advising and Student Services that the JS Honors Program has been successfully completed.

6. If the candidate is earning a double major and is attempting to earn departmental honors in two different departments, one research project may be used to satisfy the requirements of both departments if the candidate obtains approval from both. Both departments must be represented on the student’s committee.

**Minor in Jewish Studies**

The minor in Jewish Studies provides undergraduate students with an opportunity to gain basic knowledge in Jewish Studies, with required coursework in areas of Judaism as well as Jewish History and Culture. Students will also take Jewish Studies electives in their areas of interest. The Jewish Studies minor is a great complement to a variety of majors, due to its interdisciplinary nature and flexibility.

**Requirements for the Minor**

**Jewish Studies Minor Course Requirements**

Student selecting this minor must complete a course in each of the following areas:

Undergraduate Certificate in Holocaust and Genocide Studies

The Holocaust was a watershed event, not just for the 20th century but also in human history. It was not an accident; it occurred because individuals, organizations, and governments legalized discrimination, fostered prejudice and hatred, and ultimately committed mass murder. This certificate will provide basic information about the Holocaust, its context, and similar genocides. This course of study not only provides academic background, but aims to equip students with the necessary knowledge to combat efforts to deny historical truths and to honor the memory of survivors and their cultural legacies; to combat prejudice, hate, intolerance, and discrimination; to develop recognition and respect for cultural diversity; and to stimulate reflection on the fragility of democratic institutions and the roles and responsibilities of citizens to protect the human rights of all people.

Latin American & Caribbean Studies

Why study Latin American and Caribbean studies?

Are you interested in exploring Brazil’s rainforest? How are Latin American nations dealing with the Zika outbreak? Do you want to know more about the people that built the ancient Mayan ruins of Tikal or Palenque? How did soccer become so popular in Latin America, but also in human history? It was not an accident; it occurred because why do Dominicans and Cubans love baseball more? Why is China so interested in economic opportunities in Latin America? These are the questions that spur students to take classes in Latin American Studies.

Latin American nations account for almost two thirds of the total population of the Western Hemisphere. Today, Latinos represent the largest minority group in the United States, accounting for sixteen percent of the population. Knowledge of Latin American and Caribbean culture, environment, and society is crucial to U.S. hemispheric relations and
world understanding. For over fifty years, the Center for Latin American & Caribbean Studies (CLACS) has provided KU students the opportunity to study this region and its people and encourage the development of foreign language, research, writing, and critical thinking skills.

What kind of job can I get?

The Center for Latin American & Caribbean Studies is committed to helping you enrich your understanding of the world today, which will allow you to distinguish yourself among peers and colleagues. Many U.S. employers have a strong interest in Latin America and value employees who speak its languages and understand its cultures.

Training in Latin American Studies provides graduates with a diverse skill set applicable to many different career paths. The emphasis on critical thinking, analysis, and interdisciplinary approaches make LACS graduates valued voices in businesses, non-governmental organizations, public service, and education.

Through the diverse courses offered within Latin American Studies students gain important cultural competencies that can serve them well on the job market. With the an ever increasing number of Latinos and growing ties between the United States and our Latin American neighbors, Latin American Studies majors will play an important role in bridging the cultural divides that has impeded connections across the Western Hemisphere.

Although students may choose to single major, you may find that double majoring in Latin American Area Studies and another discipline makes you particularly attractive to employers. Students who combine Latin American & Caribbean Studies with journalism can work for newspapers, radio and television stations, and advertising agencies that serve Latin American countries and Latin/o communities in the United States. A double major with business or social welfare prepares students to work with companies or social service agencies that serve Latin American customers or clients.

Other students complement their Latin American & Caribbean Studies major with a second major in fields such as history, political science, Spanish, economics, or anthropology.

Some Latin American & Caribbean Area Studies graduates go on for advanced degrees in business, education, or journalism where they use their knowledge of Spanish and Portuguese languages and cultures to develop a special career niche for themselves. Like many fields in the liberal arts, Latin American and Caribbean Studies helps students build a broad background of knowledge, strengthen writing and critical thinking skills, and develop the flexibility of thought that today’s constantly changing workplace requires.

Undergraduate Programs

There are many different combinations and paths to choose from, providing you the opportunity to sculpt your education to suit your needs and interests.

As an interdisciplinary program, we teach students how to critically examine Latin America and its diverse populations by exposing them to different frameworks of study each offering a unique critical lens. Latin American Studies offers students interested in Latin America the opportunity to take a wide range of classes drawing from different departments and disciplines. A student interested in environmental issues in Latin America might take classes in History, Environmental Studies, and Anthropology. Another student might take classes in Spanish and Portuguese, Music, and Film and Media Studies to explore contemporary Latin American film and theater. With more than 100 core, affiliate, and research faculty members associated with the Center, you will cultivate a knowledge of Latin America and the Caribbean that will help you develop cultural fluency, intellectual flexibility, problem-solving skills, and a breadth of knowledge about Latin America. Most majors further their education by participating in study abroad, and have the opportunity to study languages of the region, including the indigenous ones.

The program offers a range of opportunities for students from most academic disciplines to study this region. KU has particular depth in Central America, Mexico, Haiti, the Andes, Paraguay, and Brazil and professors and courses concerned with much of the rest of Latin America. KU has an excellent library collection on Latin America and is one of the few U.S. universities teaching Haitian Creole, Andean Kichwa, and the Miskitu language of Nicaragua.

Prospective majors should begin language study in Spanish or Portuguese as early as possible. The intensive language program is recommended for those without high school preparation. Core courses in Latin American and Caribbean Studies have been certified as meeting KU Core learning outcomes, enabling majors to complete significant portions of their general education requirements within the major.

All students must be advised by the program’s advisor (http://clacs.ku.edu/melissa-foree/) as early as possible; call the Center for Latin American and Caribbean Studies (http://latamst.ku.edu/) at 785-864-4213 to make an appointment.

Graduate Programs

The Center for Latin American and Caribbean Studies (CLACS) offers an interdisciplinary MA program (https://latamst.ku.edu/overview-ma/) to students interested in exploring and advancing knowledge in the histories, cultures, and social, political and economic affairs of the region. Our program is distinguished by its quality and long term national recognition, facilitating graduate research at home and abroad, sponsoring events that promote transcultural competence, and development of outreach resources to regional educators. Students from other areas of study may complete a graduate certificate in Latin American and Caribbean Studies, Brazilian Studies, or Central American and Mexican Studies.

Graduate students may pursue the degree of Master of Arts (MA) through either the thesis or comparative research paper track. Both programs require 30 credit hours of graduate-level coursework. Students on either track have substantial flexibility in choosing their courses and will work with the graduate advisor to create a coherent and focused program of study. The Center for Latin American & Caribbean Studies administers an interdisciplinary program of substantive and language courses leading to the Master of Arts degree. Students may pursue the M.A. as a terminal degree for careers in the public or private sector or as preparation for additional graduate study. The center also offers a graduate certificate in Latin American and Caribbean Studies.

Our graduate students produce impactful contributions that are representative of the vitality of Latin American scholarship. At KU they will have access to our robust tradition of research and professional development, providing a thesis option for those interested in a future academic career and a non-thesis option for those seeking professional employment. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in L&CS.
Center for Latin American and Caribbean Studies

The nationally recognized Center for Latin American and Caribbean Studies (http://latamst.ku.edu/) promotes interdisciplinary study of the Americas and their languages through teaching, scholarship, outreach, study abroad, and international exchanges. It administers bachelor’s and master’s degree programs and a graduate certificate Latin American and Caribbean Studies. Areas of particular strength are Brazil, Central America, the Caribbean, Mexico and Paraguay. Languages include Spanish, Portuguese, Quichua, Haitian Creole, and Miskitu. The Center coordinates Latin American events on campus including lectures, films, exhibits, and theatrical performances. Exchanges and study abroad programs have been developed in Argentina, Costa Rica, Cuba, Mexico, Peru, and Brazil. The Center offers outreach to schools, businesses, and the community and serves as a resource for the state, the region, and the nation.

Courses

KQKL 110. Elementary Kaqchikel Maya I. 3 Hours U / F1.
An orientation to Kaqchikel Maya language and culture for beginning students. Includes elements of grammar, conversation, and composition. Kaqchikel is the first language of approximately 500,000 people of highland Guatemala and one of roughly 30 Mayan languages. This course is offered at the 100 and 600 level with additional assignments at the 600 level. Not open to students with credit in KQKL 600. LEC.

KQKL 114. Elementary Kaqchikel Maya II. 3 Hours U / F2.
Continuation of KQKL 110. Prerequisite: Completion of KQKL 110 or equivalent. LEC.

KQKL 230. Intermediate Kaqchikel Maya I. 3 Hours U / F3.
Continuation of KQKL 114. Prerequisite: Completion of KQKL 114 or equivalent. LEC.

KQKL 234. Intermediate Kaqchikel Maya II. 3 Hours U / F4.
Continuation of KQKL 230. Prerequisite: Completion of KQKL 230 or equivalent LEC.

KQKL 350. Advanced Kaqchikel Maya I. 3 Hours.
Advanced study of Kaqchikel Maya, continuation of KQKL 234. Prerequisite: KQKL 234 or equivalent. LEC.

KQKL 360. Advanced Kaqchikel Maya II. 3 Hours.
Advanced study of Kaqchikel Maya, continuation of KQKL 350. Prerequisite: Completion of KQKL 350 or equivalent. LEC.

KQKL 500. Directed Studies in Kaqchikel Maya. 3 Hours.
Advanced work in Kaqchikel language and culture. May be taken more than once. Prerequisite: KQKL 360 or equivalent. LEC.

KQKL 600. Elementary Kaqchikel Maya I. 3 Hours U.
An orientation to Kaqchikel Maya language and culture for beginning students. Includes elements of grammar, conversation, and composition. Kaqchikel is the first language of approximately 500,000 people of highland Guatemala and one of roughly 30 Mayan languages. This course is offered at the 100 and 600 level with additional assignments at the 600 level. Not open to students with credit in KQKL 110. Prerequisite: Instructor permission. LEC.

Courses

LAC 100. Latin American Culture and Society. 3 Hours SC AE42 / S.
An introduction to the interdisciplinary study of Latin America, as manifest in the arts and literature, history, and in environmental, political, economic, and social realities. Explores and critiques the principal themes and methodologies of Latin American Studies, with an aim towards synthesizing contributions from several different disciplines. Emphasizes the unique insights and perspectives made possible by interdisciplinary collaboration and provides students with a basic knowledge base for understanding Latin America today. (Same as HIST 124.) LEC.

LAC 102. Orientation Seminar in Latin American and Caribbean Studies. 1 Hour U.
LAC 102 is an online orientation seminar designed to introduce students to the Latin American and Caribbean Studies major at KU and help students place the major in the context of their overall undergraduate experience and career plans. The course provides students with introductory information about Latin America and the Caribbean and the nature of interdisciplinary inquiry, and an interdisciplinary major, and about resources available at KU and beyond for research and study related to the region. During the course, students also learn about typical careers pursued by Latin American and Caribbean Studies majors, reflect on their own educational and career goals, and determine whether the major matches those goals. Finally, the course provides students with information about requirements for the major, along with information about when required courses are offered and when they should be taken. LEC.

LAC 177. First Year Seminar: ___. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Latin Area and Caribbean Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

LAC 300. Interdisciplinary Themes in Latin American Studies. 3 Hours AE51 / U.
This course offers an in-depth examination of several key themes in Latin American Studies. Emphasis is placed on exploring the utility of interdisciplinary methods and on becoming familiar with the theoretical framework that underpins the field. Prior completion of LAC 100 recommended. LEC.

LAC 302. Topics in Latin American Area Studies: ___. 1-3 Hours U.
Investigation of special topics on Latin America at the undergraduate level. LEC.

LAC 310. Topics in LAC - Anthropology: ___. 3 Hours W.
A Latin American and Caribbean topics course with content related to the Anthropology disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 311. Topics in LAC - History: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the History disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 312. Topics in LAC - Spanish American Literature and Culture: ___. 3 Hours.
A Latin American and Caribbean topics course with content related to the Spanish American Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 313. Topics in LAC - Brazilian Literature and Culture: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Brazilian Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit. LEC.
LAC 314. Topics in LAC - Latino and Caribbean Literature: ______. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Latino/a and Caribbean Literature disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 315. Topics in LAC - Film Music Arts: ______. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Film, Music, Arts disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 316. Topics in LAC - Geography and Environment: ______. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Geography and Environment disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 317. Topics in LAC - Politics, Society, Business and Economy: ______. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Politics, Society, Business and Economy disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 318. Topics in LAC - Transatlantic and Transnational: ______. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Transatlantic and Transnational disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 319. Topics in LAC - Methodology and Theory: ______. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Methodology and Theory disciplinary group of the Latin American studies major. May be repeated for credit. LEC.

LAC 322. Language and Society in Latin America. 3 Hours AE42 / W.
This course will examine the cultural and social significance of Amerindian languages in Latin America. Spanish and Portuguese will be related in language situations to Amerindian languages, such as Quechua, Aymara, the Mayan languages, Nahuatl, and Guarani. Some African-substratum Creole languages will be used to illustrate the multifaceted relations between language and ethnic group, sex, nation, geography, social class, context, and social interaction. Prerequisite: Membership in the University Honors Program. LEC.

LAC 333. Language and Society in Latin America, Honors. 3 Hours NW AE42 / S.
This course will examine the cultural and social significance of Amerindian languages in Latin America. Spanish and Portuguese will be related in language situations to Amerindian languages, such as Quechua, Aymara, the Mayan languages, Nahuatl, and Guarani. Some African-substratum Creole languages will be used to illustrate the multifaceted relations between language and ethnic group, sex, nation, geography, social class, context, and social interaction. Prerequisite: Membership in the University Honors Program. LEC.

LAC 334. Indigenous Traditions of Latin America. 3 Hours NW AE42 / S/W.
A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken LAC 634. (Same as ANTH 379,) LEC.

LAC 335. The Politics of Language in Latin America. 3 Hours NW / S.
Although approximately 600 indigenous languages are spoken by 30 million people in Latin America, public life is conducted in Spanish. The class provides a comprehensive survey of language issues in Latin America by analyzing the situation of minority language groups, language rights, language policies, and language planning, as well as by considering the questions that arise regarding bilingual education, literacy, and the role of minority languages in educational systems. LEC.

LAC 402. Topics in Latin American Area Studies. 3 Hours U.
Investigation of special topics on Latin America at the undergraduate level. LEC.

LAC 499. Honors Course in Latin American Studies. 3 Hours AE61 / H.
Intensive study and research under faculty direction. Open to students wishing to graduate with honors in Latin American Studies and having a grade point average of at least 3.5 in Latin American Studies and at least 3.25 overall. Requires an interdisciplinary project concerning a specific topic involving at least two disciplines. Must be directed by a faculty member in Latin American Studies, approved by the Center Associate Director, and defended before a committee of at least three faculty members. To earn departmental honors, a student must take the course for two semesters (with a minimum grade of B the first semester, and an A the second). LEC.

LAC 500. Directed Study in Latin American Area Studies. 1-3 Hours AE61 / U.
Independent study and directed reading on special topics. IND.

LAC 501. Multilingualism and Multiculturalism in Latin America. 3 Hours H.
Examines the sociolinguistic issues of multicultural countries in Latin America from an interdisciplinary perspective. Topics include but are not limited to linguistic inequality, the language of politics, language and education, urban and rural linguistic interaction, and indigenous creole languages. Prerequisite: A liberal arts course with Latin American content. LEC.

LAC 503. Race, Gender, Ethnicity, and Nationalism in Latin America. 3 Hours NW AE42 / H.
The development of cultural identity in Latin America is traced through the study of major narrative trends including Amerindian languages and the analysis of "indigenista" literature. The African substratum of Latin American culture and its relation to concepts such as "marvelous realism" is explored. The importance of "race," "gender," and "ethnicity" are investigated as tools to define national identity in Latin America. The influence of modernization, industrialization, and nationalistic and populist thought on their emergence of distinctive writing and themes is also assessed. LEC.

LAC 504. Politics of Culture in Modern Latin America. 3 Hours H.
This course explores the relationship between political development and cultural phenomena of Latin America from 1800 to the present, with special emphasis on gender, popular culture, and ideology. The influences of 20th-century ideologies and technology on cultural development in Latin America will also be examined. LEC.

LAC 505. U.S. Latino and Latin American Film and Literature. 3 Hours H.
This course follows the development of U.S. Latino and Latin American cinema from its origins to the present and its relationship with literary discourse. U.S. Latino/Latin American cinema can be seen as a specific practice that cannot be reduced in all its manifestations to the institutional mode of production of the dominant Hollywood model. The course examines the creation of a national cinema that seems to be more
dependent on a literary canon. Knowledge of Spanish is not required.
LEC.

LAC 506. Race, Gender, Ethnicity, and Nationalism in Latin America, Honors. 3 Hours NW AE42 / H.
The development of cultural identity in Latin America is traced through the study of major literary works of the nineteenth and twentieth centuries. The importance of "race," "gender," and "ethnicity" are explored as tools to define national identity in Latin America. The impact of modernization, industrialization, and nationalistic and populist thought on the emergence of distinctive writing and themes is also assessed. Prerequisite: Membership in the University Honors Program. LEC.

LAC 510. Topics in LAC - Anthropology: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Anthropology disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 511. Topics in LAC - History: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the History disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 512. Topics in LAC - Spanish American Literature and Culture: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Spanish American Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 513. Topics in LAC - Brazilian Literature: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Brazilian Literature and Culture disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 514. Topics in LAC - Latino and Caribbean Literature: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Latino/a and Caribbean Literature disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 515. Topics in LAC - Film Music Arts: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Film, Music, Arts disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 516. Topics in LAC - Geography and Environment: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Geography and Environment disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 517. Topics in LAC - Politics, Society, Business and Economy: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Politics, Society, Business and Economy disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 518. Topics in LAC - Transatlantic and Transnational: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Transatlantic and Transnational disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 519. Topics in LAC - Methodology and Theory: ___. 3 Hours U.
A Latin American and Caribbean topics course with content related to the Methodology and Theory disciplinary group of the Latin American studies major. May be repeated for credit. Prerequisite: LAC 100 or HIST 124 or LAC 300 or any LAC course at the 300 level. LEC.

LAC 552. Capstone in Latin American and Caribbean Studies. 3 Hours AE61 / U.
The capstone course in the major offers interdisciplinary approaches to a thematic topic or focus related to Latin America/ the Caribbean and contains substantial writing and independent research requirements. By the end of the class and culminating their study of the field at KU, students will be able to discuss the course topic from a variety of theoretical, methodological, and disciplinary perspectives. Prerequisite: Completion of at least 18 credits toward the LAA major, or permission of instructor. LEC.

LAC 555. Pre-Hispanic Mexico and Central America. 3 Hours NW / S/W.
A survey of indigenous, Pre-Hispanic cultures of Mexico and Central America, including Olmecs, Teotihuacan, Mayas, Zapotes, Toltecs, and Aztecs. This course teaches how to interpret art, architecture, artifacts, and culture change in the context of iconography and symbols, metaphysical beliefs and ritual practices, crafts and technologies, trade and exchange, social inequality and conflict resolution, and the relationships among these cultures and their environments. (Same as ANTH 506 and HIST 571.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, Indigenous Studies, History, or permission of instructor. LEC.

LAC 556. The Ancient Maya. 3 Hours S/W.
An intensive examination of current scholarship on the ancient Maya civilization of Mexico and Central America. The course will consider Maya culture from its roots in early villages of the Preclassic period to the warring city-states of the Postclassic period. Topics will include settlement and subsistence systems, sociopolitical evolution, art and architecture, myth and symbolism, and Maya hieroglyphic writing. An important theme of the course will be the relevance of the PreColumbian Maya for understanding complex societies and contemporary Latin American Culture. (Same as ANTH 507.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, or Indigenous Studies, or permission of instructor. LEC.
LAC 558. Ancient American Civilizations: The Central Andes. 3 Hours W.
An archaeological survey of the ancient peoples of Peru and neighboring countries in South America. The origins of complex societies on the coast and in the Andean highlands will be reviewed with special consideration of the role of “vertical” environments in the development of Andean social and economic systems. Cultures such as Chavin, Moche, Nazca, Huarí, Tiwanaku, Chimú, and the rise of the imperial Inca state will be examined through artifacts, architectural remains, and ethnohistoric documents. (Same as ANTH 508 and HIST 572.) Prerequisite: A course in Anthropology, Latin American Studies, Art History, Museum Studies, History, or Indigenous Studies, or permission of instructor. LEC.

LAC 559. Ancient Central America. 3 Hours NW / S.
This course will examine the Pre-Columbian cultures of the region situated between Mesoamerica to the north and the Central Andes to the south, focusing principally on the countries of Honduras, Nicaragua, Costa Rica, Panama, and Colombia. Once regarded as an “Intermediate Area” on the peripheries of the ancient civilizations to the north and south, the area of southern Central America and northern South America is now recognized as a center of innovation from very remote times up until the Spanish Conquest. The archaeological remains of stone tools, pottery, jade carvings, gold and copper ornaments, and a wide variety of structures will be interpreted within the context of information on subsistence, settlement patterns, social organization and religious ideology. Issues of the relationships with populations of regions in major culture areas to the north and south will also be considered in detail. (Same as ANTH 509.) Prerequisite: ANTH 110 or ANTH 115. LEC.

LAC 561. Indigenous Development in Latin America. 3 Hours AE42 / S.
Surveys the history of the development enterprise since WWII, examines the marginalization and impoverishment of Latin America’s indigenous peoples, and provides training to carry out projects for and with them to enhance their quality of life. Development is understood as not merely technological or economic, but also social, emotional, and educational. Students work in teams to design their own mock development project. A 3-credit non-obligatory companion course, Applied Anthropological Field School among the Chorti Maya, will follow in the intersession after each version of this course. (Same as ANTH 561.) Prerequisite: ANTH 100, ANTH 108, ANTH 160 or LAC 100; or consent of instructor. LEC.

LAC 562. Mestamexica. 3 Hours SC AE41 / H.
This class surveys the relations between Mexico and the U.S. as nation-states, and among Mexicans, Mexican Americans, and Anglo Americans (to a lesser extent other U.S. citizens) in historical perspective. Issues of sovereignty, national and ethnic identity, immigration, migration, labor relations, popular culture, media, and transnational economics are covered. (Same as ANTH 562.) Prerequisite: ANTH 108 or ANTH 308 or ANTH 160 or ANTH 360 or LAC 100. LEC.

LAC 577. The Andean World. 3 Hours H.
The Andean environment is defined by its mountains, but includes all of the earth’s major biomes: from tropical rainforest to the world’s oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as EVRN 577, HIST 577 and ISP 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor. LEC.

LAC 587. Multidisciplinary Field School in Partnership with the Chorti Maya. 3 Hours S.
Teams of interdisciplinary students partner with the Chorti Maya of Guatemala and Honduras to share information and experiences. One third of the course consists of readings and 4-5 orientation sessions on campus, and two thirds entails two weeks in Central America. Examples of activities might include historical research, water testing and improvement, photography, art, music, tourism consultation, marketing of crafts, human rights advocacy, web design, computer training, and museum work, among others. There are no prerequisites, but students with a working knowledge of Spanish will receive preference for admission. (Same as ANTH 587.) LEC.

LAC 602. Topics in Latin American Studies: _______. 1-3 Hours U.
Investigation of special topics on Latin America. LEC.

LAC 634. Indigenous Traditions of Latin America. 3 Hours NW AE42 / S/W.
A survey of the major indigenous traditions of Mesoamerica, the Andes, and lowland tropical Latin America. Coverage emphasizes how indigenous cultural traditions and societies have both continued and changed since the European Invasion and addresses such current issues as language rights, territorial rights, sovereignty, and state violence. Students enrolled in the 600-level section will be required to complete additional research and class leadership tasks. Not open to students who have taken ANTH 379 or LAC 334. LEC.

LAC 701. Interdisciplinary Seminar in Latin American Culture and Problems. 3 Hours.
An interdisciplinary seminar incorporating significant and pertinent materials from the fields of anthropology, economics, geography, history, political science, sociology, and Spanish and Portuguese literature. Required of all graduate students enrolled in the Master of Arts program in Latin American Area Studies. Prerequisite: LAC 710 (may be taken simultaneously with LAC 701 if both courses offered during same semester.) LEC.

LAC 702. Topics in Latin American Studies: _______. 3 Hours.
Investigation of special topics on Latin America. Topics are drawn from many disciplines within Latin American and Caribbean Studies. Course can be repeated for credit as the topic changes. LEC.

LAC 703. Research Colloquium on Brazil. 3 Hours.
An interdisciplinary research seminar on historical and contemporary issues in Brazil, incorporating information and analysis from such fields as anthropology, economics, geography, history, political science, sociology, and Spanish and Portuguese literature and culture. Required for the Brazilian Graduate Certificate. Prerequisite: Recommended reading proficiency in Portuguese. LEC.

LAC 704. Research Colloquium on Central America and Mexico. 3 Hours.
An interdisciplinary research seminar on historical and contemporary issues in Central America and Mexico, incorporating information and analysis from such fields as anthropology, economics, geography, history, political science, sociology, and Spanish and Portuguese literature and culture. Required for the Central America Mexico Graduate Certificate. Prerequisite: Recommended reading proficiency in Spanish. LEC.

LAC 710. Research Design for International Area Studies. 3 Hours.
This course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of
research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as CEAS 710 and GIST 710.) Prerequisite: Consent of instructor. LEC.

LAC 800. Investigation and Conference. 1-2 Hours. Investigation and research of interdisciplinary topics in Latin American Studies. RSH.

LAC 899. Thesis/Non-Thesis. 1-6 Hours. Prerequisite: Consent of instructor. THE.

Courses

QUEC 110. Elementary Quechua I. 3 Hours U / F1. An orientation to Ecuadorian Quechua language and culture for beginning students. Includes elements of grammar, conversation, and composition. Quechua (a.k.a. Kechwa, Quichua, Kechua, Ketchua, Kichwa, Khetchua, or Runa Ximi) in its various forms is an indigenous language spoken by over six million people in Ecuador, Peru and Bolivia combined. LEC.

QUEC 114. Elementary Quechua II. 3 Hours U / F2. Continuation of QUEC 110. Prerequisite: QUEC 110 or equivalent. LEC.

QUEC 230. Intermediate Quechua I. 3 Hours U / F3. Continuation of QUEC 114. Prerequisite: QUEC 114 or equivalent. LEC.

QUEC 234. Intermediate Quechua II. 3 Hours U / F4. Continuation of QUEC 230. Prerequisite: QUEC 230 or equivalent. LEC.

QUEC 610. Directed Study in Quechua Language and Culture. 3 Hours H. This course is intended for students seeking proficiency in Quechua beyond QUEC 234. Instructor will direct the student through readings and materials in Quechua that will add to the student's substantive knowledge of Quechua speakers and their cultures. May be taken multiple semesters for credit with varying content. Prerequisite: QUEC 234 or consent of instructor. IND.

Bachelor of Arts and Bachelor of General Studies in Latin American Area and Caribbean Studies

Overview of the Bachelor of Arts degree in Latin American & Caribbean Studies

The Bachelor of Arts degree in Latin American & Caribbean Studies provides a broad academic background with a deep regional focus, often in conjunction with a second major in a specific discipline, and a mastery of Spanish and other languages. The program enables students to take courses through a variety of departments as a part of their plan of study and can lay a strong foundation for graduate work. Students are encouraged to pursue graduation with honors in Latin American & Caribbean Studies.

Prospective majors should begin language study in a Latin American language of their choice as soon as possible. The intensive language program is recommended for those without high school preparation. All three core courses for the Latin American & Caribbean Studies major are certified as meeting KU Core learning outcomes. All students must be advised by the designated advisor (https://latamst.ku.edu/melissa-foree/) of the program.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Latin American and Caribbean Studies Majors

Students may earn a double major (one in a particular discipline and one in Latin American and Caribbean studies) or a single major in Latin American and Caribbean studies. In addition to meeting the College language requirement in Spanish or Portuguese, all majors earn a minimum of 30 hours in substantive courses on Latin America and the Caribbean.

Requirements for the B.A. or B.G.S. Major

Course Requirements
Complete each of the following (9 hours):
- LAC 100 Latin American Culture and Society 3
- LAC 300 Interdisciplinary Themes in Latin American Studies 3
- LAC 550 Capstone in Latin American and Caribbean Studies 3

Disciplinary Diversity
A minimum of 24 hours (8 different courses) is required. These courses may also be used toward a minor. Students must take 9 hours in two of the following disciplinary groups. The remaining 6 hours can be taken in any disciplinary group. No more than 9 hours can be taken at the 100-200 level:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Disciplinary Diversity</td>
<td>LAC 634</td>
<td>Indigenous Traditions of Latin America</td>
<td>3</td>
</tr>
</tbody>
</table>

Minimum Major Requirements 33 Hours

Note: Students earning a double major must have 15 hours unique to each major.

Latin American and Caribbean Studies Courses by Disciplinary Groups

Note: All courses must have at least 25 percent Latin American and Caribbean content to count toward the major. In classes with comparative content in which students are allowed to choose research/paper topics, students must select a topic related to Latin America and the Caribbean.

Courses with a blank (_____ ) at the end of their titles are typically topics or seminar courses that may be repeated for credit. Usually these courses offer different topics each time they are taught. Students should check with the course instructor about the requirements to take the course and what the topic will be when it is offered.

A sample 4-year plan for the BA in Latin American & Caribbean Studies can be found here: Latin American & Caribbean Studies. (p. 1715) Or use left-side navigation.

A sample 4-year plan for the BGS in Latin American & Caribbean Studies can be found here: Latin American & Caribbean Studies. (p. 1716) Or use left-side navigation.

### Departmental Honors

Honors in the Major: To attain the designation of departmental honors, students must fulfill all of the above requirements plus the following:

1. A minimum grade point average of 3.5 in all courses taken to complete the major.
2. Completion of a study abroad or a service learning experience related to Latin American and Caribbean Studies
3. Attainment of further foreign language competency equivalent to fourth-semester level in a second European language or second-semester level in an indigenous language
LA&S 490 (Recommended, or elective) | 3 Elective or possible minor course 300+ (Total Hours) | 3
---|---|---
Elective or possible minor course 300+ (Total Hours) | 3 Elective or possible minor course 300+ (Total Hours) | 3
Elective or possible minor course 300+ (Total Hours) | 3 LA&S 492 (Job Search Strategies, or elective) | 1
---|---|---
Total Hours 120-121

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. The Latin American & Caribbean Studies major requires 4th level language proficiency in Spanish or Portuguese.

3. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

4. 24 hours of electives are required. 9 hours must be taken in two of the disciplinary categories of the major. This sample plan takes 9 hours in History and 9 hours in Music, Film, Arts. The remaining 6 hours may be taken in any combination of courses from the disciplinary category lists.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BGS in Latin American & Caribbean Studies

Below is a sample 4-year plan for students pursuing the BGS in Latin American & Caribbean Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120

---

1. The Latin American & Caribbean Studies major requires 4th-level language proficiency in Spanish or Portuguese.
Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

24 hours of electives are required. 9 hours must be taken in two of the disciplinary categories of the major. This sample plan takes 9 hours in Anthropology and 9 hours in Environment and Geography. The remaining 6 hours may be taken in any combination of courses from the disciplinary category lists.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Latin American Area Studies

The Undergraduate Minor in Latin American & Caribbean Studies provides students with a solid foundation of instruction on Latin American topics to supplement their primary field. There are two tracks within the minor: the General Latin American and Caribbean Studies Track and the Indigenous Studies in Latin America (ISLA) Minor Track. Both tracks require 3 hours of core classes followed by 15 hours of upper-division electives from a wide variety of courses approved by the center. No more than 1 course (3 hours) may be shared with the student’s major. For the General LACS minor track there is no language requirement. The ISLA track requires two semesters of an indigenous language spoken in Latin America. For the General Track LAC 100, LAC 300, LAC 332/LAC 333, or LAC 334/ANTH 379 can count as a core course. For the ISLA Track ISP 101 may also count as a core course.

The General Track is for students from several departments and schools who do not wish to concentrate in language studies, but who are interested in aspects such as the history, culture, geography, anthropology, art history, politics, business or journalism of Latin America. This minor will be a great complement to a degree in, for example, business or architecture. There is great flexibility for students who wish to create their own program in order to acquire knowledge in various disciplines subjects. The ISLA track is for similar students who are particularly interested in indigenous peoples of the Western Hemisphere and wish to study an indigenous language. In particular, the ISLA track allows students to integrate coursework in indigenous population of what is now the United States with coursework on such populations elsewhere in the Western Hemisphere.

The Latin American & Caribbean Studies advisor (http://clacs.ku.edu/melissa-foree/) will be glad to speak with any student who may be interested in obtaining the minor. If you would like to make an appointment with the undergraduate advisor or have any questions about the new minor, please contact the Center of Latin American & Caribbean Studies (https://latamst.ku.edu/).

The Undergraduate Minor in Latin American & Caribbean Studies provides students with a basic foundation of knowledge on Latin America & the Caribbean to complement their primary area(s) of expertise. There are two options: the General Latin American and Caribbean Studies Option and the Indigenous Studies in Latin America (ISLA) Option.

The General Option is for students interested in building knowledge of Latin America & the Caribbean in such areas as anthropology, art history, business, film, geography, history, indigenous studies, literature, journalism, politics, and theatre.

1. Two Required Courses (6 hours):

<table>

<td>Indigenous Traditions of Latin America</td>
<td>3</td>
</tr>
</tbody>
</table>

2. Four additional upper-division LAC electives (12 hours). Students may take any upper-division LAC course or its cross-listed number as an elective.

The ISLA Option is for students interested in indigenous people of Latin America and who wish to study an indigenous language.

1. Two Required Courses (6 hours):

<tr>
<td>KQKL 500</td>
<td>Directed Studies in Kaqchikel Maya</td>
<td>3</td>
</tr>
</tbody>
</table>

Other indigenous Latin American languages may be substituted with approval of Director of Undergraduate Studies.

3. Two additional upper-division LAC electives (6 hours). Students may take any upper-division LAC course or its cross-listed number as an elective.
A minimum of 12 credit hours must be taken at the 300+ level to complete the minor.

If a student would like to apply a non-LAC (or cross-listed) course with at least 25% Latin American and/or Caribbean content (which may include assignments) for either minor, they can seek approval from the CLACS Undergraduate Coordinator by sharing the syllabus. No more than 2 such courses may count toward the minor.

**Master of Arts in Latin American and Caribbean Studies**

**Why study Latin American and Caribbean studies?**

Knowledge of Latin American and Caribbean culture, environment, and society is crucial to U.S. hemispheric relations and world understanding.

The Center for Latin American and Caribbean Studies (CLACS) offers an interdisciplinary MA program to students interested in exploring and advancing knowledge in the histories, cultures, and social, political and economic affairs of the region. Our program is distinguished by its quality and long term national recognition, facilitating graduate research at home and abroad, sponsoring events that promote transcultural competence, and development of outreach resources to regional educators. For over 50 years, the Center for Latin American & Caribbean Studies (CLACS) has provided KU students the opportunity to study this region and its people, and encourage the development of foreign language, research, writing, and critical thinking skills.

**Graduate Programs**

The Center for Latin American & Caribbean Studies administers an interdisciplinary program of substantive and language courses leading to the Master of Arts degree. Students may pursue the M.A. as a terminal degree for careers in the public or private sector or as preparation for additional graduate study. The MA degree requirements exhibit an interdisciplinary perspective, emphasizing language competency and supervised field research. There is a thesis option (for students planning to continue in a PhD program) and a non-thesis option for those seeking professional employment.

With more than 100 core, affiliate, and research faculty members, the Center for Latin American and Caribbean Studies offers a graduate certificate (https://latamst.ku.edu/overview-graduate-certificates/) for students who want to cultivate a knowledge of Latin America and the Caribbean and to develop cultural fluency and intellectual flexibility. A graduate certificate in Latin American and Caribbean Studies is also available with three tracks: general, Central American and Mexican Studies, and Brazilian Studies.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Eligibility criteria for admission to the Master's program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

M.A. admission requires a Bachelor's degree, preferably in one of the social sciences or humanities, and language proficiency in either Spanish or Portuguese as demonstrated by completion of a fourth-semester course or the equivalent. For all applicants, please check the application requirements through the LA&CS Admission page. (https://latamst.ku.edu/admission-ma-0/)

Domestic and international applications must submit a complete online graduate application (https://gradapply.ku.edu/apply/). For additional questions regarding program requirements and application processes, please contact the Director of Graduate Studies, Dr. Robert Schwaller (https://latamst.ku.edu/robert-c-schwaller/) Robert Schwaller. Applicants may also contact the department directly:

**The University of Kansas**

Center for Latin American & Caribbean Studies
Bailey Hall, Room 320
1440 Jayhawk Blvd. | Lawrence, KS 66045
785-864-4213 | latamst@ku.edu

**M.A. Degree Requirements**

**Course Work**

A minimum of 30 graduate credit hours (500 level or above) is required in social sciences or humanities courses with Latin American content. Requirements are meant to provide training in research design, content breadth, disciplinary breadth as well as exposure to discipline-specific methods and problems, independent research, and language competence.

1. **Research Design:** Research Design in International Area Studies (LAC 710) 3 hrs
2. **Area Content:** 7-8 courses with Latin American / Caribbean content, which must meet the following requirements (an individual course may count towards multiple requirements) 21-24 hrs
   a. 12 hours (4 courses) of the area content courses must be at the 700-level or above
   b. 12 hours (4 courses) must be selected from the program’s list of approved courses with at least 50% Latin American / Caribbean content
   c. Courses must be drawn from at least two separate disciplines
   d. 9 hours (3 courses) must constitute a “specialization cluster” designed to prepare the student for the thesis / comparative research paper. The specialization cluster may be in a topic / issue, in a geographical area, in a particular discipline, etc., and is designed in consultation with the student’s advisor and approved by the Director of Graduate Studies.
   e. For students who will only enroll in 3 credit hours of LAC 899, the remaining 3 credit hours (to complete the 30 required) must be
selected from the program’s list of approved courses with at least 25% Latin American / Caribbean Content.

3. Thesis Hours: 3-6 hours of Thesis Research and Writing (LAC 899) 3-6 hrs
   a. MA Thesis option students must enroll in at least 3 hours
   b. Comparative Research paper option students must enroll in only 3 hours

Language Proficiency

M.A. candidates must demonstrate comprehensive proficiency in Spanish or Portuguese. This includes aural, speaking, reading, and writing ability. Completion of SPAN 424 and SPAN 428 or a higher-level course constitutes comprehensive proficiency in Spanish. Comprehensive proficiency in Portuguese requires completion of a 500-level or higher literature course.

The language requirements should be satisfied as early as possible. Students also must complete two semesters in a second language (SPAN 104 and SPAN 108; PORT 104 and PORT 108), or the equivalent (e.g. PORT 611). Quichua, Kaqchikel Maya, or Haitian Creole may be substituted as the language of reading proficiency with approval of the director.

M.A. Degree Options

Thesis and nonthesis degrees are offered. The thesis degree is most appropriate as preparation for a doctoral program and dissertation. Students must declare their intention to write a thesis before the end of the first year and form a committee of three faculty members, each from a different discipline. The student defends the completed thesis in an oral examination before this committee. A student must enroll in at least 3 credit hours of thesis. Students may count up to 6 credit hours of thesis toward the degree.

The nonthesis M.A. degree is suitable for a career in public service or business. The culmination of the nonthesis M.A. is an oral examination during the last semester of the student’s program. The Center for Latin American and Caribbean Studies produces a handout, Nonthesis M.A. Degree Option: Oral Exam Guidelines.

According to the continuous enrollment policy of the College, once the student’s course work is completed, the student must enroll in at least 1 credit hour of thesis/nonthesis (LAC 899) a semester (excluding summers) until the thesis and its defense or the oral examination is completed.

Recommended Graduate Courses

For a list of recommended Graduate Courses with 25-100% Latin American or Caribbean Content please visit the department website (https://latamst.ku.edu/courses/). Courses with a blank (_____ ) at the end of their titles are typically topics or seminar courses that may be repeated for credit. Usually these courses offer different topics each time they are taught. Students should check with the course instructor about the requirements to take the course and what the topic will be when it is offered.

Study in Latin America

The Center encourages students to study and do research (https://latamst.ku.edu/study-abroad-0/) in Latin America or the Caribbean. Intensive language institutes in Portuguese and Spanish are held in Salvador, Brazil; and Puebla, Mexico; respectively. The Center has helped develop exchange relationships with universities in Costa Rica, Paraguay, Peru and Brazil. One of the oldest and most successful academic study abroad programs in Latin America is the Kansas program at the Universidad de Costa Rica.

Accelerated Master of Arts in Latin American and Caribbean Studies

The Accelerated M.A. program enables qualified KU students to earn both a Bachelor’s degree and a Master’s degree in Latin American and Caribbean Studies in 5 years. 12 hours of 500-level or above coursework in the major completed in Year 4 (senior year) are may count for both the B.A. and the M.A. The M.A is completed in Year 5.

The M.A. may be pursued as a terminal degree or as preparation for doctoral studies at KU or elsewhere.

Admission Criteria

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time-frame. First year students should indicate their interest in the program by selecting the appropriate interest code during enrollment. All prospective students should discuss their interest in admission to the Accelerated program with the Director of Undergraduate Study and the Director of Graduate Study no later than the student’s Junior year.

Prospective students are eligible to apply to the Accelerated degree program as early as Spring Semester of their Sophomore year, and must apply no later than Spring Semester of their Junior year. At the time of application, the student must have a major GPA of at least 3.25 and an overall GPA of at least 3.0. The overall GPA requirement may be temporarily waived with an interview, at the discretion of the Director of Graduate Studies, Director of Undergraduate Studies, and Center Director.

Application Process

Applicants must complete an Application for Graduate Study (https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/)) online. The following information should be gathered in advance and uploaded with the application:

1. Statement of interest that succinctly summarizes the students’ interests, education, their long-term career goals, and how the accelerated degree program will help them achieve those goals;
2. A copy of the student’s KU transcript;
3. The names of three persons qualified to comment on the applicant’s academic abilities and probable success in graduate study. These individuals will be asked to provide a letter of recommendation. At least two should be faculty members who have had the student in class.
4. English Proficiency: If an applicant is not a native speaker of English, they must verify their English proficiency. Please see Graduate Admissions’ English Proficiency Requirements (https://gradapply.ku.edu/english-requirements/).
Upon review of the application for admission, the program will notify the student of their eligibility to begin coursework in the program. Final acceptance will be contingent upon the following:

- Successful completion of all requirements for the bachelor’s degree;
- A cumulative undergraduate GPA of 3.0;
- Completion of 12 credit hours at 500 level or above that count towards the CLACS major and graduate degree requirements (including the capstone course), with a grade of B or above;
- An official copy of the student’s undergraduate transcript will be required if final admission is granted.

Any student who does not meet the minimum grade requirement for CLACS courses at the 500-level or above may continue in the program but must take additional 500-level (or above) courses in order to meet the minimum grade requirement of B or above in four CLACS 500-level classes, prior to officially enter the Master’s program. Students may also elect to earn only the bachelor’s degree and re-apply to the graduate program at a later time.

The course requirements for this accelerated program are fulfilled by a combination of pre-requisite coursework, 12 hours of graduate credit courses (500 level and above) taken while still an undergraduate degree-seeking student, which count toward both undergraduate and graduate degrees, and 18 hours of graduate credit courses taken in a final year of graduate study.

Requirements for both the Bachelor’s and the Master’s degree (including language proficiency requirements) remain the same.

**Requirements for the B.A. or B.G.S. Major**

In addition to meeting the College language requirement in Spanish or Portuguese, all majors earn a minimum of 30 hours in substantive courses on Latin America and the Caribbean.

**Language Proficiency Requirements**

**Requirements for the MA Degree**

In addition to the 12 credit hours of graduate coursework taken while an undergraduate, students must complete an additional 18 credit hours of graduate coursework, for a total of 30 hours of graduate credit.

In the final year of graduate study, students in the Accelerated program will complete the following master’s degree requirements:

1. **Area Content**: 15 credit hours (at least two courses per semester) with 50% Latin American / Caribbean content at the 700 level or above. LAC 701 is strongly recommended.
   - Whether taken while still completing the undergraduate degree or during the final year of graduate study, area content courses must:
     a. be drawn from at least two separate disciplines
     b. include a “specialization cluster” of at least 9 hours designed to prepare the student for the thesis / comparative research paper. The specialization cluster may be in a topic / issue, in a geographical area, in a particular discipline, etc., and is designed in consultation with the student’s advisor and approved by the Director of Graduate Studies.

2. **Research Hours**: (LAC 899) 3 hrs

**Language Proficiency**
M.A. candidates must demonstrate comprehensive proficiency in Spanish or Portuguese. This includes aural, speaking, reading, and writing ability. Completion of SPAN 424 and SPAN 428 or a higher-level course conducted in Spanish (or with significant readings in Spanish) constitutes comprehensive proficiency in Spanish. Comprehensive proficiency in Portuguese requires completion of a 500-level or higher literature course. The language requirements should be satisfied as early as possible. Students also must complete two semesters in a second language.

**M.A. Degree Options**

Thesis and nonthesis (comparative research paper) degree options are offered. The thesis option is most appropriate as preparation for a doctoral program and dissertation. Students must declare their intention to write a thesis before the end of the first year and form a committee of three faculty members, each from a different discipline. The student defends the completed thesis in an oral examination before this committee. A student must enroll in at least 3 credit hours of thesis preparation (LAC 899). A student may enroll in as many as 6 thesis credit hours of LAC 899 for the thesis option, but this will probably extend the time of the accelerated MA degree.

The comparative research paper option is particularly suitable for a career in the public or private sector. Students take 3 credits of LAC 899 with their chair. The research topic must consist of an interdisciplinary analysis of a broad issue that goes beyond the student’s coursework and involves more than one country for purposes of comparison. The culmination of the comparative research paper M.A. is an oral examination during the last semester of the program. The student will form a committee of three faculty members for the oral examination.

According to the continuous enrollment policy of the College, once the student’s course work is completed, the student must enroll in at least 1 credit hour of thesis/nonthesis (LAC 899) a semester (excluding summers) until the thesis and its defense or the oral examination is completed.

**Recommended Graduate Courses**

For a current list of courses that have 50 to 100 percent Latin American or Caribbean content please see the CLACS website (https://latamst.ku.edu/courses/). Courses with a blank (_____ ) at the end of their titles are typically topics or seminar courses that may be repeated for credit. Usually these courses offer different topics each time they are taught. Students should check with the course instructor about the requirements to take the course and what the topic will be when it is offered.

Directed service learning projects or study abroad at the appropriate level may count toward the 18 hours of graduate coursework in year 5 with prior approval of the Director of Graduate Study; students may choose to enroll in 3-6 hours of LAC 800 Investigation and Conference for such projects.

Students are expected to discuss their plans of study with the graduate advisor. The information that follows is only a guide toward that discussion, using fall admission as an example:

Policies and procedures of Graduate Studies govern the process of admission as either a degree-seeking or non-degree seeking student. An applicant seeking to pursue graduate study in the College may be admitted on a preliminary or permanent basis.

Admission to Graduate Studies

Total Hours 138-139

Graduate Certificate in Latin American and Caribbean Studies

The Graduate Certificate in Latin American & Caribbean Studies (https://latamst.ku.edu/curriculum-graduate-certificates/) is intended to:

a) encourage current and future graduate students to deepen their training in Latin American and Caribbean Studies

b) document and highlight the expertise of current graduate students who are already engaged in a course of study with substantial Latin American & Caribbean content, and

c) allow new students to earn a recognized credential demonstrating their expertise in Latin America for the purposes of employment or personal interests.

There are two specialized tracks available: Central American & Mexican Studies track recognizes students with a working knowledge of all of Latin America and the Caribbean but also intensive training specific to the geographical region running from the U.S. border to Panama. The Brazilian track recognizes students with a working knowledge of all of Latin America and the Caribbean but also intensive training specific to Brazil.

Those interested in broad training on Latin America & the Caribbean or in a Latin American or Caribbean region other than Central America, Mexico, and Brazil may complete the Certificate without selecting a separate track.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of

Graduate Admission

Eligibility criteria for admission to the certificate program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/). A Bachelor’s degree in Latin American & Caribbean studies is not required for admission, but the department expects applicants to show on their transcripts significant exposure to the humanities and social sciences.

For all applicants, please check the application requirements through the LA&CS Graduate Certificate Overview page (https://latamst.ku.edu/overview-graduate-certificates/).

Potential students must submit a complete online graduate application (https://gradapply.ku.edu/apply/). For additional questions regarding program requirements and application processes, please contact the Director of Graduate Studies, Dr. Cecile Accilien. Applicants may also contact the department directly:

The University of Kansas
Center for Latin American & Caribbean Studies
Bailey Hall, Room 320
1440 Jayhawk Blvd. | Lawrence, KS 66045
785-864-4213 | latamst@ku.edu

The Graduate Certificate in Latin American & Caribbean Studies requires 12 credits completed through 4 courses at the 500-level and above. Three options are available for students: the general Latin American & Caribbean Studies Certificate, or specialized tracks in Central American & Mexican Studies or Brazilian Studies.

All certificate students must complete:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAC 701</td>
<td>Interdisciplinary Seminar in Latin American Culture and Problems</td>
<td>3</td>
</tr>
</tbody>
</table>

Students must choose, in consultation with the Director of Graduate Studies, three additional courses from the department’s current approved list of Latin American & Caribbean Studies courses. For the Central American & Mexican Studies Track the 3 courses must have at least 50% content on Central America, Mexico, or both. For the Brazilian Studies Track the 3 courses must have at least 50% content on Brazil.

Total Hours 12
Liberal Arts and Sciences Bachelor of General Studies Degree

Why pursue the B.G.S. Liberal Arts and Sciences degree option?

If, as a student, your personal goals are best served by:

- A more broad-based, liberal arts and sciences curriculum with balanced contributions from natural sciences and mathematics, social sciences, and the humanities (requiring exploration in 15 different disciplines in the College).
- The broadest preparation for admission into a professional program.
- An avenue for adding a bachelor’s degree to an already existing technical degree or licensure certificate.
- A degree option with maximum flexibility.
- A distance-education option for a KU degree.
- A degree that provides students the opportunity to build the skills and knowledge employers indicate are required for success in our changing economy and world community — skills that are limited in current college graduates.

The B.G.S. Liberal Arts and Sciences degree option is:

- Not an “Easy Out” degree option. Academic standards are the same for all degrees granted by the College of Liberal Arts and Sciences.
- Not a quick option for a bachelor’s degree. (A minimum of 120 hours is required, including degree specific coursework.)
- Not an option in which students may pursue majors or minors in the College.

Courses

LA&S 101. Learning Communities Seminar in: _____. 1-2 Hours U.
This course is designed to expand student's knowledge of the University community by exploring an academic theme and the connections between courses. Through the study of different topics students explore the inherent relationships among fields of study. Designed especially for freshmen and sophomores. Enrollment is limited to students participating in designated learning community. Concurrent enrollment in specified learning community courses is required. May be repeated for credit up to 4 hours if topic varies. SEM.

LA&S 108. Personal Numeracy. 3 Hours NM GE12.
This course will provide the tools to help you understand and make decisions using data. You will learn the basics of human decision making and why relying on numerical data is an important component of good decisions. The class will also help you understand the basics of probability and statistics. This will include fundamental statistical concepts used in everyday decision-making as well as training to perform statistical tests. The class will conclude with applications of numeracy to make sound personal financial decisions regarding spending and borrowing and saving and investing. Throughout the course, you will learn to use Excel to perform calculations, analyze data and spending habits and develop a personal budget. LEC.

LA&S 110. Cherokee Language I. 5 Hours U / F1.
Emphasizes the vocabulary of and fundamentals of reading and writing the Cherokee language. Students will have an opportunity to learn the language, beliefs, and religious practices of the Cherokee. Taught at Haskell Indian Nations University. LEC.

LA&S 120. Cherokee Language II. 5 Hours U / F2.
Continuation of Cherokee Language I. Includes an intermediate level of vocabulary skill with increased emphasis on reading and writing. Taught at Haskell Indian Nations University. Prerequisite: LAS 110. LEC.

LA&S 150. Academic Success Seminar. 1 Hour U.
This course provides students with the skills and resources necessary to improve their approach to their academic career. It is designed to help enhance students’ time management and study skills as well as facilitate a connection with student success resources. Students and instructors work together in an interactive learning environment to create an academic foundation for success. Additional topics covered include: test preparation and anxiety; reading comprehension; procrastination; and memory and concentration. Recommended for students with less than a 2.5 GPA. LEC.

LA&S 160. Dean's Scholars Program Seminar. 0.5-3 Hours U.
An enhancement of communication, time management, and leadership skills. The students will explore resources and determine goals pertinent to their objectives regarding graduate school. Restricted to students in the Dean's Scholars Program. LEC.

LA&S 172. Exploring Health Professions. 3 Hours U.
Students will have the opportunity to explore health care career pathways broadly and will look more thoroughly at specific pathways of interest through experiential learning activities. Class-time will include discovering the knowledge, skills, and attributes typically seen in health care professionals and the requirements for gaining admission to the various professional degree programs. The course will also discuss important ethical issues in health care and the future direction of the field. This course is designed for KU students who are interested in pursuing a health care career. This includes but is not limited to: medicine, pharmacy, physician assistant, physical therapy, and occupational therapy. LEC.

LA&S 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in liberal arts and sciences. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

LA&S 200. Topics at HINU: _____. 1-6 Hours U.
Special topics at the undergraduate level. Taught at Haskell Indian Nations University. Special permission from the Provost's Office required. LEC.

LA&S 202. History of North American Indian Tribes. 3 Hours W.
Introductory survey of the origin, evolution, and distribution of Indians throughout North America, location of tribes in historic times, their relationships to one another, and their responses to white penetration of the continent. Emphasis on American Indian leadership and major contributions of American Indian people to American society. Taught at Haskell Indian Nations University. LEC.

LA&S 204. Contemporary Issues of the American Indian. 3 Hours H.
An overview of current and historical issues which have resulted in policies and regulations affecting American Indians and Alaska Natives. The issues include: education, treaties, sovereignty and self-determination, religions, natural resources, legislation, jurisdiction, reservation and/or urban status, federal trust relationship, tribal economics and enterprises, American Indian policy, federal recognition, and
current issues both regional and local. Taught at Haskell Indian Nations University. LEC.

LA&S 206. Indian Law and Legislation. 3 Hours S.
An introduction and general overview of federal Indian law and processes and its relationship to tribal governments. Focus will be on sovereignty and its relationship to the internal and domestic laws of the United States government, tribal governments, and the international community. Taught at Haskell Indian Nations University. LEC.

LA&S 210. Tribal Resources and Economic Development. 3 Hours S.
Inventory and identify the resources currently available to tribal governments to include natural and human resources and those financial resources available to tribal governments from federal, state, and private resources. Included will be an economic analysis on how to best optimize available resources while recognizing the economic concept of constrained maximization. Taught at Haskell Indian Nations University. LEC.

LA&S 230. Cherokee Language III. 5 Hours U / F3.
Continuation of Cherokee language II. Taught at Haskell Indian Nations University. Prerequisite: LAS 120. LEC.

This course is a continuation of LAS 230, Cherokee Language III, and includes the study of grammar, with particular attention to speaking fluency and continued practice in reading and writing. Taught at Haskell Indian Nations University. Prerequisite: LAS 230. LEC.

LA&S 250. Western Civilization I. 3 Hours H.
The beliefs and values of Western civilization from the eighth century BC to the close of the eighteenth century are compared with the ideas central to American Indian cultural traditions. Fulfills the Western Civilization I requirement for CLAS. Taught at Haskell Indian Nations University. LEC.

LA&S 252. Western Civilization II. 3 Hours H.
The beliefs and values of Western Civilization since the close of the eighteenth century are compared with the ideas central to American Indian cultural traditions. Fulfills the Western Civilization II requirement for CLAS. Taught at Haskell Indian Nations University. LEC.

LA&S 260. Interpersonal Management. 3 Hours U.
This course is designed to provide students with an understanding of their personal strengths and skills that can be applied in a variety of organizational settings and in society. The course includes skills needed to be successful as a member of both professional and citizen communities, including ethical views, project management, financial management, technology, and information literacy. LEC.

LA&S 262. Workplace Success Skills. 3 Hours U.
This course is designed to provide students with the skills and content they need to be successful professionals in a variety of organizational settings. The course includes professional communication skills along with an understanding of organizational culture and context. LEC.

LA&S 290. Approaches to Teaching Science and Mathematics I. 1 Hour U.
Science and Mathematics students explore teaching as a career by teaching lessons in elementary classrooms in order to obtain first hand experience planning and implementing inquiry-based curriculum. This course is open to any student who has completed or is concurrently enrolled in a science or mathematics course at KU. LEC.

LA&S 291. Approaches to Teaching Science and Mathematics II. 1 Hour U.
Science and Mathematics students continue to explore secondary teaching as a possible career choice by teaching several lessons in a middle school classroom. The students build upon and practice lesson design skills that were developed in LAS 290, in which they taught in elementary classrooms. Prerequisite: LAS 290. LEC.

LA&S 292. Topics and Problems on: ____. 1-6 Hours U.
An interdisciplinary study of different topics. Designed especially for freshmen and sophomores. LEC.

LA&S 295. Introduction to Secondary Stem Teaching. 2 Hours U.
The UKanTeach program invites all students who have 45 hours toward their degree and have an interest in teaching secondary mathematics and/or science to take this two-hour UKanTeach course. Students learn quickly whether they are suited to the profession of teaching while also acquiring important communication skills. Through coursework and classroom experiences, students teach four hands-on inquiry-based science/mathematics lessons in local elementary and middle school classrooms. Upon successful completion of this course, student are eligible for acceptance to the UKanTeach program as they complete their bachelors degree. This course is only offered in the summer semester. Prerequisites: Minimum of 45 hours toward a BA or a BS degree. LEC.

LA&S 301. Learning Communities Seminar in: ____. 1-2 Hours U.
This course is designed to expand student's knowledge of the University community by exploring an academic theme and the connections between courses. Through the study of different topics students will explore the inherent interdisciplinarity of fields of study. Designed especially for juniors and seniors. Enrollment is limited to students participating in designated learning community. Concurrent enrollment in specified learning community courses is required. May be repeated for credit up to 4 hours. LEC.

LA&S 325. Career Transitions. 3 Hours U.
This career development course studies the theories of career development and decision making focusing significantly on self-assessment and occupational research to help students make informed career decisions by better understanding themselves and the world of work in relationship to career transitions. In addition, students will learn valuable networking, personal branding, and job search tips. Prerequisite: This course is designed for students in the Military Transition Program and currently enrolled veterans. Instructor consent is required to enroll. LEC.

LA&S 340. Computers for the Classroom. 1-3 Hours U.
"The Art and Science of Computer Presentation." An inter-disciplinary course designed to explore current technology in "Computer Presentations" (various equipment and programs), research the field of information processing, and develop applications for interactive multimedia communications. Not open to students who have received credit for LAS 740. Prerequisite: Consent of instructor. LEC.

LA&S 370. Personal Writing Seminar. 1 Hour U.
This seminar helps students develop their personal writing abilities. Students analyze language and rhetorical choices in the genre of the personal essay. Students demonstrate rhetorical flexibility within the genre, considering audience, purpose, and application of the material. This course is intended for candidates for national fellowships, regardless of University Honors Program membership. (Same as HNRS 370.) Prerequisite: Permission of the Office of Fellowships. LEC.

LA&S 372. Preparing for Programs in the Health Professions. 3 Hours U.
Students will participate in experiential learning activities to confirm their interest in the health care professions and prepare documents for their application. Class-time will include exploring crucial health care topics such as ethical standards, the future of medicine, and social determinants of health. Additionally, students will prepare application materials, research professional programs, create a personal statement,
participate in mock interviews, and decide where to apply. This course is designed for KU students who are planning to apply in the current or subsequent academic year to a health professional program including (but not limited to) medicine, pharmacy, physician assistant, physical therapy, and occupational therapy. LEC.

LA&S 380. Critical Thinking and Advocacy Seminar. 1 Hour U.
The focus of this class is on honing the two basic skills of critical thinking and advocacy. In this seminar, students develop a basic system for critical analysis that can be applied generally; test that critical analysis system in a series of practicums to develop the skills necessary to apply it; and develop a basic system for designing effective and ethical persuasive messages. (Same as HNRS 380.) Prerequisite: Permission of the Office of Fellowships. LEC.

LA&S 400. Teaching and Tutoring Writing. 3 Hours U.
Students explore theories and strategies of teaching and tutoring writing across academic disciplines. They learn more about themselves as writers as they build a repertoire of writing techniques useful in their studies, in the workplace, and in their personal lives. By observing and consulting in the writing center, they understand how reflection leads to responsive, ethical, and engaged practice. (Same as ENGL 400.) Prerequisite: ENGL 102 or equivalent. LEC.

LA&S 414. Ethnobiology. 5 Hours N.
Integrates Native American traditional knowledge of ecology and biology with modern, western science. One purpose of the course is to preserve the unique knowledge and varied cultural traditions relating to the life sciences that are possessed by indigenous people. Taught at Haskell Indian Nations University. Prerequisite: BIOL 100 or BIOL 150. LEC.

LA&S 450. Topics at Haskell Indian Nations University: ______. 1-6 Hours.
Special topics at the junior/senior undergraduate level. Taught at Haskell Indian Nations University. Special permission from the Provost's office required. LEC.

LA&S 470. Job Search Skills for Liberal Arts and Sciences Majors. 1 Hour U.
This course is designed to introduce students to the fundamentals of planning and organizing job search strategies. Emphasis is placed on practical application of employment search tools for post-graduation employment or graduate school admission, stressing the value of the arts and sciences degree in the labor market. Prerequisite: Students must be sophomore standing or above. LEC.

LA&S 475. Professional Career Management. 3 Hours U.
When envisioning the future, many students consider immediate post-graduation needs but may fail to consider future professional career management, life and career transitions, and career progression. This advanced career development course studies the theories of career development, organizational and industrial psychology, and human resources. Students learn theories from these areas and understand how to apply them to their own professional career, future career transitions, and lifelong career progression. Prerequisite: Students must be sophomore standing or above. LEC.

LA&S 480. Preparing for International Careers. 1-3 Hours U.
This course, delivered through an 8-week seminar and week-long study abroad experience, teaches the fundamentals of executing an international job search. The course is open only to participants admitted to the Preparing for International Careers study abroad program. Students must complete a study abroad application and be approved before enrolling in the course. LEC.

LA&S 485. Global Career Management. 3 Hours U.
This global career development course studies the theories of cross-cultural communication and analyzes the global economy to help students apply these concepts to their own lifelong career management. Furthermore, the course builds upon the international experiences students are having at KU and also allows any student to gain lifelong knowledge and skills to be successful in a global job search or career transition, by assisting them to articulate their skills and value through a cross-cultural perspective to potential employers. Prerequisite: Students must be sophomore standing or above. LEC.

LA&S 490. Internship Exploration. 1-5 Hours AE61 / U.
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students complete reading and writing assignments, participate in an online discussion and create a final portfolio of internship accomplishments. Hours of credit recorded (1-5) are based on number of hours at internship site and agreement of instructor. Credit hours will be assigned a letter grade. Repeatable for up to 5 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor. INT.

LA&S 492. Topics and Problems on: ______. 1-6 Hours U.
An interdisciplinary study of different topics. Topics include Sanskrit. Designed especially for Juniors and Seniors. LEC.

LA&S 494. Senior Seminar in Liberal Arts and Sciences. 3 Hours AE61 / H.
This course is a seminar to result in the student's integration of knowledge within the liberal arts and sciences. Through lecture and discussion, students explore a series of issues or themes that integrate several disciplines in the humanities, arts, social sciences, and mathematics and natural sciences. A final project (options include a portfolio, web page, paper, presentation) demonstrates the students' knowledge of the concepts, theories, and methods of several disciplines, and their ability to integrate that knowledge across disciplines. Not open to freshmen and sophomores; recommended in the senior year. Prerequisite: Completion of at least 30 junior/senior hours. LEC.

LA&S 700. Writing Center Theory and Administration. 3 Hours.
This course explores theories motivating writing center administration and practice. Students will investigate the multiple functions of writing centers, from writing labs associated with college composition instruction, to decentralized resources for writing faculty teaching writing across the disciplines, to elementary, secondary, and community support centers for writers, to online consultation services. Students will choose a special interest or problem, and, from an administrative perspective, design a research study and propose actions such as creating policy, developing curricula, designing materials, or conducting assessments. (Same as ENGL 885.) Prerequisite: LAS 400, ENGL 400, or consent of instructor. LEC.

LA&S 701. Introduction to Graduate Professional Development. 1 Hour.
This course is designed to introduce early career graduate students to self-assessment and career exploration tools and best practices in developing a professional network and strong mentoring relationships. Emphasis is placed on practical application of career exploration, networking, and managing mentor relationships in order to identify and successfully pursue a variety of career pathways within and beyond the academy. Graded on satisfactory/unsatisfactory basis. LEC.

LA&S 702. Introduction to Career Preparation for Graduate Students. 1 Hour.
This course is designed for 2nd year master's students and mid-career PhD students who are soon to complete or have just completed their comprehensive exams. The course will present various career preparation
tools and techniques for careers both within and beyond the academy, and other best practices aimed at supporting students in the completion of their research and creative projects. Topics covered include but are not limited to: individual development plans, project management, building a professional network, informational interviews, CV and resume development, and identifying and applying for funding opportunities. Graded on a satisfactory/unsatisfactory basis. Prerequisite: LAS 701 or permission by the instructor. LEC.

LA&S 703. Fundamentals in Career Planning for PhD Students. 1 Hour.
This course is designed to introduce late-career PhD students to the fundamentals of effective planning and organizing job search and application strategies for a variety of career paths. Emphasis will be placed on career paths beyond the professoriate including the private, non-profit, and public/government sectors. Topics covered include but are not limited to: external opportunities and fellowships for PhDs (ex. Presidential Management Fellowship, ACLS Public Fellows, AAAS Science Technology Fellowships) in non-academic careers, advanced resume and cover letter development, interview and negotiation skills, and tailoring application materials to specific job postings. Graded on a satisfactory/unsatisfactory basis. Prerequisite: LAS 702 or instructor permission. LEC.

LA&S 710. Computer Assisted Language Learning. 1 Hour.
An introduction to the use of computer-based technologies in language learning and teaching. A project-based approach will combine discussions of current research with hands-on technical training. Prerequisite: Consent of instructor LEC.

LA&S 720. Introduction to Language Teaching Research. 3 Hours.
An introductory study of topics in language teaching research with the focus on higher education contexts. Intended for graduate students in any area of specialization related to foreign language teaching and learning. Prerequisite: Consent of instructor. LEC.

LA&S 740. Computers for the Classroom. 1-3 Hours.
"The Art and Science of Computer Presentation." An inter-disciplinary course designed to explore current technology in "Computer Presentations" (various equipment and programs), research the field of information processing, and develop applications for interactive multimedia communications. Not open to students who have received credit for LAS 340. Prerequisite: Consent of instructor. LEC.

LA&S 792. Topics in: ______. 1-3 Hours.
An interdisciplinary study of a variety of topics from the Liberal Arts and Sciences. Usually intended for graduate students, but may also be taken by qualified upper level undergraduates. May be repeated for credit when topic differs. LEC.

Bachelor of General Studies in Liberal Arts and Sciences

Why pursue the B.G.S. Liberal Arts and Sciences degree option?

If, as a student, your personal goals are best served by:

- A more broad-based, liberal arts and sciences curriculum with balanced contributions from natural sciences and mathematics, social sciences, and the humanities (requiring exploration in 15 different disciplines in the College).
- The broadest preparation for admission into a professional program.
- An avenue for adding a bachelor’s degree to an already existing technical degree or licensure certificate.
- A degree option with maximum flexibility.
- A distance-education option for a KU degree.
- A degree that provides students the opportunity to build the skills and knowledge employers indicate are required for success in our changing economy and world community — skills that are limited in current college graduates.

The B.G.S. Liberal Arts and Sciences degree option is:

- Not an “Easy Out” degree option. Academic standards are the same for all degrees granted by the College of Liberal Arts and Sciences.
- Not a quick option for a bachelor’s degree. (A minimum of 120 hours is required, including degree specific coursework.)
- Not an option in which students may pursue majors or minors in the College.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements to Select B.G.S. Liberal Arts and Sciences Degree Option

CLAS Bachelor of General Studies (BGS) General Education Requirements

General Education provides opportunities for the development of core skills, critical inquiry, integrated knowledge, an appreciation of diversity, contemporary issues, and social responsibility.

B.G.S. Liberal Arts and Sciences Degree Option Requirements

The Bachelor of General Studies degree has two distinct options and requires, in addition to completion of the KU Core*, either:

Full PDF 2021-2022 1729
• **Option A.** Completion of the requirements of a single BGS major AND a secondary field of academic study study (a second degree offered by CLAS or other school, a second CLAS major or co-major, a minor offered by CLAS or another school, or two certificates offered by CLAS or another school);

• completion of an approved career preparation course (minimum 3 credit hours total). A list of currently approved courses can be found here. ([https://collegeadvising.ku.edu/sites/collegeadvising.ku.edu/files/docs/BGSCareerPreparation.pdf](https://collegeadvising.ku.edu/sites/collegeadvising.ku.edu/files/docs/BGSCareerPreparation.pdf))

OR

• **Option B.** Completion of the B.G.S. in Liberal Arts and Sciences, which is also offered as an online degree completion program. This degree program requires:
  
  • Liberal Arts and Sciences Breadth Requirement. Satisfied by the completion of a course (with a minimum of 2 credit hours) in 15 unique departments/programs within the College or School of the Arts (as determined by course prefix). Courses fulfilling this requirement may also contribute to the KU Core and other requirements.

  • World Language and Culture.
    • 2 courses (each with 3 credit hours or more) in a single world language, or proof of two-semester proficiency in a language other than English, OR
    • Completion of 3 courses (each with 3 credit hours or more) designated as KU Core Goal 4.2 (AE42), world culture (W), or non-Western culture (NW); or language areas, beyond the KU Core. This may include a variety of areas, languages, and cultures.

  • Additional Natural Sciences and Mathematics. Satisfied by the completion of two additional courses from the natural sciences (requirement code N) and/or mathematics (MATH prefix courses) beyond the KU Core.

**NOTE:** Option B, the B.G.S in Liberal Arts and Sciences is not an option in which students may pursue a major or minor.

*While Goal 6 of the KU Core can be completed using a course from another major department (prerequisites permitting), LA&S 494: Senior Seminar in Liberal Arts is an approved Goal 6 course that has been developed for students pursuing the Liberal Arts and Sciences BGS degree.

**Minimum hour and grade-point average standards (all CLAS degrees)**

• 120 credit hours

• 45 junior/senior credit hours (numbered 300 or above, 30 of which must be taken in residence at KU)

• 2.0 minimum KU cumulative grade-point average

Below is a sample 4-year plan for students pursuing the BGS in Liberal Arts & Sciences. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website ([http://kucore.ku.edu/courses/](http://kucore.ku.edu/courses/)).

**Total Hours 120-124**

¹ Satisfied by 2 courses (each with 3 credit hours or more) in a single world language, or proof of two-semester proficiency in a language other than English OR satisfied by completion of 3 courses (each with 3 credit hours or more) in world, non-Western culture (W or NW designated courses), or language areas beyond the KU Core. This may include a variety of areas, languages, and cultures.

² Additional Natural Sciences and Mathematics satisfied by the completion of two additional courses from the natural sciences (requirement code N) and/or mathematics (MATH prefix courses) beyond the KU Core.
LA&S 494 is not required for this degree to fulfill Goal 6, but is recommended as it is tailored specifically to students completing this degree program.

Please note:

Additional requirement: Liberal Arts & Sciences Breadth Requirement. This is satisfied by the completion of a course (with a minimum of 2 credit hours) in 15 unique departments/programs within the College or School of the Arts (as determined by course prefix). Courses fulfilling this requirement may also contribute to the KU Core and other requirements.

The Liberal Arts and Sciences BGS degree is not an option in which students may pursue a major or minor, however, undergraduate certificates may be pursued/completed.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal.

Graduation with Honors

Undergraduates may earn honors upon graduation in 3 ways. The student may graduate with distinction or highest distinction, earn departmental honors in the major, or complete the University Honors Program (http://www.honors.ku.edu/). It is possible to earn honors in 1 of these areas, any combination of them, or all 3. The award of honors is noted on the student’s transcript and in the Commencement program. Distinction and highest distinction are noted on the diploma. However, students completing Option B - the BGS in Liberal Arts and Sciences are not eligible to pursue departmental honors, as this degree option does not include a major.

Graduation with Distinction or Highest Distinction

The top 10 percent of each year’s graduating class is designated as graduating with distinction. Of these, the top one-third is designated as graduating with highest distinction. To be eligible, students must have completed at least 60 credit hours, graded A through F, in residence at KU. See Required Work in Residence below.

Undergraduate Certificate in Advanced Professional Skills

The Advanced Professional Skills Certificate is a credit-bearing certificate that enhances employability skills focused on current workforce demands. This certificate is designed for students who want to further develop in-demand employability skills, as well as students who are underemployed or unemployed and looking to enhance their skills. The Advanced Professional Skills Certificate is also available to workforce partners wanting to strengthen individual employee skills.

The Advanced Professional Skills Certificate requires the completion of 12 credit hours which is comprised of 6 credit hours of In-Demand Skill Development courses and 6 credit hours of the Career Management courses below or other departmentally approved electives, which can be found at: https://edwardscampus.ku.edu/advanced-professional-skills-program-details/.

Master of Arts in Leadership in Diversity and Inclusion

The MA in Leadership in Diversity and Inclusion offers graduate students and working professionals tools and techniques to better understand and navigate leadership opportunities within the context of social diversity and equity in the United States.

As an interdisciplinary program, the focus of the MA in Leadership in Diversity and Inclusion is to:

1. Build foundational knowledge of the history, theory, and practice of leadership with an emphasis on ethical decision making and understanding of the dynamics of power in doing the work of leadership
2. Increase understanding of the meaning of social diversity and equity in the United States
3. Apply this knowledge to real world situations such as workplace bias and fairness, teaching environments, youth sports and recreation activities, work with community nonprofit agencies, etc.

Academic objectives for the program combine those of the constituent graduate certificates, supplemented by an introduction to the culture of graduate education, offering graduate students and working professionals:

1. Knowledge, tools, and strategies to enter into, understand, navigate through, and succeed in the culture of higher education
2. Tools and techniques to better understand and navigate leadership opportunities within professional and community environments
3. Knowledge and strategies to respond efficiently and effectively to the demands of a changing social, cultural, and political landscape while doing the work of leadership
4. Resources necessary to supplement their degrees and professional positions with a stronger understanding and historical background of core domains relevant to social differences and their meanings

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Application Deadlines

The MA program in Leadership in Diversity and Inclusion accepts applications for the fall, spring, and summer terms. Applications and all required supplemental materials must be submitted by the deadlines listed on the program's website (http://diversityleadership.ku.edu/admission-ma/) to be considered for admission.

Application Materials

Applicants should upload the supporting application documents listed below to the online application (https://gradapply.ku.edu/apply/).

- Copy of official transcripts (https://graduate.ku.edu/transcripts/) from all colleges or universities attended
- Statement of purpose (no longer than two pages, single spaced)
- Research-based writing sample (at least five pages, double spaced)
- Three letters of recommendation

Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/).

Contact

Visit the MA in Leadership in Diversity and Inclusion website (https://diversityleadership.ku.edu) for more information about the program and admissions requirements.

Students must complete a minimum of 30 graduate-level credit hours in approved courses with Leadership and Diversity and Inclusion content. Coursework is a combination of face-to-face and online classes.

Core Seminar (3)

LDST 705 Professionalization Seminar in Leadership Studies (3)

Equity and Social Diversity (12)

Four courses (3 credit hours each) totaling 12 graduate credit hours. Courses are categorized into three pathways:

1. U.S. Race and Ethnicity
2. Women, Gender, and Sexuality
3. U.S. Social Differences

Students must develop a concentration in one pathway by taking at least 6 credit hours of coursework in any one of the three pathways. Courses must be selected in consultation with a faculty advisor.

At least 1 course (3 credit hours) must be taken in a pathway other than the concentration.

A current list of approved courses for each pathway is available on the program website. The Diversity and Inclusion course list continues to grow and is updated regularly.

Leadership Studies (12)

4 courses (3 credit hours each, all completed online) totaling 12 graduate credit hours:

Capstone (3)

LDST 850 Leadership in Diversity and Inclusion Capstone

This course is required of all admitted students in the final semester of their degree program and provides students with the opportunity to integrate and synthesize the interdisciplinary knowledge they have gained.

Final Exam

All MA students must pass a final oral exam and defense of their capstone project. Students are required to be physically present for the exam unless permission for distance examination has been granted.

Supplemental Coursework

LDST 700: Introduction to Graduate Studies in Leadership in Diversity and Inclusion

This course is required for all provisionally admitted students and is offered as an optional course to all admitted students.

Graduate Certificate in Second Language Studies

The purpose of the graduate certificate program in Second Language Studies (SLS) is to enhance the preparation and professionalization of graduate students in the School of Languages, Literatures, and Cultures (SLLC), the Department of Linguistics, and other departments affiliated with SLLC. The certificate provides an opportunity at KU for graduate students of foreign language, literature, and culture and theoretical linguistics to add a concentration in applied linguistics and language teaching.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.
Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admissions

Current graduate students in any School of Languages, Literatures, and Cultures department, Linguistics, or School of Education are eligible to apply. Others interested in the certificate should contact the School to determine eligibility. For more information on admission to a graduate certificate program, see the policy on Graduate Certificate Programs - Eligibility and Admission Criteria (http://policy.ku.edu/graduate-studies/grad-certification-program-admission/).

The certificate will be awarded to MA or Ph.D. students who successfully complete 4 graduate-level courses across disciplines (12 credits total):

1. LING 715 Second Language Acquisition I
2. LA&S 720 Introduction to Language Teaching Research or another approved* related graduate-level course offered by Linguistics, CLAS languages, literatures, and cultures departments, or by the School of Education.
3. A graduate-level course in Linguistics, or another approved* related graduate-level course offered by Linguistics, CLAS languages, literatures, and cultures departments, or by the School of Education.
4. Elective course in Second Language Studies. This could be fulfilled by a Teaching Methods course required of GTAs teaching in language departments (FREN 704, SLAV 824, SPAN 801) and by other approved related graduate-level courses, including those offered by the School of Education.

A student who has prior coursework deemed equivalent to any of the required courses may replace these with approved electives.

*Graduate-level course equivalents will be approved by the Linguistics Academic Administrator for the Second Language Studies certificate program for Linguistics students and by the Academic Director for the Second Language Studies certificate program for all other students.

Graduate Certificate in Studies in Equity and Social Diversity in the U.S.

The focus of the graduate certificate in Studies in Equity and Social Diversity in the U.S. is to (1) increase understanding of the meaning of social diversity and equity (DE) in the United States and (2) consider the application of this knowledge to real world situations such as workplace bias and fairness, teaching environments, youth sports and recreation activities, work with and for community nonprofit agencies, and more. Through interdisciplinary coursework, the main objective is to offer graduate students and working professionals the necessary tools to supplement their degrees and professional positions with a stronger understanding and historical background of core domains relevant to social differences and their meanings. These domains include but are not limited to intersectional identities of race, ethnicity, gender identities, gender expressions, sexual orientation, socioeconomic status, age, disabilities, religion, regional background, veteran status, citizenship status and nationality. Select courses will be offered with multiple partners across the College of Liberal Arts and Sciences and School of Education.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Any applicant seeking to pursue a graduate certificate in Studies in Equity and Social Diversity in the U.S. must submit an application at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/). Applications are accepted on a rolling basis.

New Applicants

Applicants who are not already enrolled in a KU graduate program must have completed a bachelor’s degree with a 3.0 or higher GPA. These applicants should include the following materials in their application to the certificate program.

- A statement of purpose outlining their interest in the Studies in Equity and Social Diversity in the U.S. graduate certificate
- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges and universities attended

Non-native speakers of English must meet English proficiency requirements as described here: http://graduate.ku.edu/english-proficiency-requirements/

Current KU Graduate Students

Applicants already in a KU graduate program must be in good standing with their home department to be eligible for admission the certificate program. Current KU graduate students should include the following materials in their online application:

- A statement of purpose outlining their interest in the Studies in Equity and Social Diversity in the U.S. graduate certificate
- A letter of support from their faculty advisor or the Director of Graduate Studies in their home academic unit

Contact

Visit the Institute for Leadership Studies website (https://ils.ku.edu/admission-graduate-certificate/) for more detailed information about the application process.

Graduate certificate coursework focuses on the experiences of U.S. racial/ethnic minorities (e.g. African American/Black, Native American/Alaskan Native, Native Hawaiian/Other Pacific Islander, Latinx) and on U.S. marginalized populations (e.g. gender, gender expression, sexuality, disabilities). Students must take a total of 12 graduate credit hours of coursework. Courses for this certificate are categorized into three pathways.

Pathway 1: US Race and Ethnicity
Pathway 2: Women, Gender and Sexuality

Pathway 3: US Social Differences

Students must develop a plan of study in consultation with and approved by a faculty advisor. This plan of study must include a concentration consisting of at least 6 credit hours of coursework in one of the three pathways. At least one course (3 credit hours) must be taken in a pathway other than the concentration. At least two courses (6 credit hours) must be taken at the 700 level or above.

A current list of approved courses for each pathway can be found here (https://linguistics.ku.edu/sites/linguistics.ku.edu/files/docs/EQSCDUS%20Certificate%20Courses%20SP19.pdf).

Department of Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

The Linguistics Department at KU offers a full range of degrees: B.A. (http://linguistics.ku.edu/overview/), M.A. (http://linguistics.ku.edu/overview-2/) and Ph.D. (http://linguistics.ku.edu/overview-1/) The first linguistics courses at KU were offered in 1957. In 1968, Linguistics became a department and was authorized to offer a Ph.D. degree. Today, the unique strength of the Linguistics department is the systematic pairing of theoretical and experimental investigations of linguistic knowledge. Its nucleus of full-time faculty members in Linguistics (http://linguistics.ku.edu/faculty-1/), plus several actively involved faculty members in other departments (http://linguistics.ku.edu/faculty-affiliates/), serves a student body of about 35 graduate students, 80 undergraduate majors, and many non-majors taking introductory and intermediate courses each semester.

Areas of special strength in the graduate program include Phonetics, Phonology, Syntax, First and Second Language Acquisition, Psycholinguistics, and Neurolinguistics, Semantics, and the study of Indigenous Languages. The department also cooperates with other departments, such as Speech-Language-Hearing (http://sgph.ku.edu/), Child Language (http://cldp.ku.edu/), Indigenous Nations Studies (http://indigenous.ku.edu/), Anthropology (http://anthropology.ku.edu/), Education and Human Sciences (http://soe.ku.edu/), and Psychology (http://psych.ku.edu/).

Research Facilities

The Department of Linguistics houses 7 research and teaching laboratories.

The Developmental Psycholinguistics Laboratory is equipped to investigate how preschool-age children acquire and use the knowledge of meaning in their first language. The lab uses various psycholinguistic tasks, such as linguistic comprehension tasks and the visual-world eye tracking paradigm, to assess children’s representation and real-time processing of meaning. The lab houses an eye tracking system with a remote camera designed specifically for children to participate in the visual-world eye tracking paradigm.

The Field Linguistics Laboratory provides an environment for on-site elicitation work with speakers as well as the processing, analysis, and archiving of field data. The laboratory is equipped with computer workstations and an assortment of audio/video recording devices suitable for a range of fieldwork projects.

The Mayan Language Acquisition Laboratory provides facilities for documenting the acquisition of Mayan languages. The laboratory processes audio and video recordings of children acquiring the Mayan languages Ch’ol, K’iche’, Mam, and Q’anjob’al. The laboratory uses the Qanform software suite to produce transcriptions that conform to the Minimal Coding standard (Pye 2001). A uniform transcription protocol ensures that transcriptions for all the languages have a standard format. Transcripts are available online at the Adquisición de Lenguas Mayas (ALMA) website.

The Neurolinguistics and Language Processing Laboratory is fully equipped for multi-method, cross-linguistic research on the implementation of language in the brain. The laboratory includes a 70-channel Neuroscan Synamps2 EEG system for visual and auditory ERP (event-related potentials) studies, and two dedicated testing rooms for psycholinguistic experiments including lexical decision, priming, and self-paced reading. Brain imaging studies, including MEG and fMRI, are conducted at the Hoglund Brain Imaging Center at the University of Kansas Medical Center in Kansas City.

The Phonetics and Psycholinguistics Laboratory provides an integrated environment for the experimental study of speech and language, including production, perception, and acquisition. Primary research areas in the lab are acoustic and auditory phonetics as well as spoken and written word recognition, all across a variety of languages. Software includes MultiSpeech and Praat for speech analysis and Paradigm, Superlab, and Matlab for collecting responses from up to six subjects simultaneously. Digital noise-free recordings are made in our anechoic chamber.

The Second Language Acquisition Laboratory is equipped with 5 computer workstations and 2 dedicated testing rooms. Computers are equipped with software (Paradigm) for running psycholinguistic experiments (including interpretation tasks, reaction time, self-paced reading, and speeded grammaticality judgment) and for conducting statistical analyses. Primary research areas in the lab are the acquisition and processing of syntax and semantics by adult second language learners, all across a variety of languages. Our research focuses on the linguistic and cognitive factors that impact acquisition at varying stages of development.

The Second Language Processing & Eye-Tracking Laboratory has 2 testing rooms equipped with computer stations for investigating second language speech and sentence processing as well as a head-mounted eye tracker. The research methods employed in the lab include speech perception and word recognition, cross-modal priming and masked priming, self-paced reading and sentence comprehension, and eye tracking in the visual world paradigm and in reading.

Undergraduate Programs

The department offers a broad range of courses that provide a basic understanding of human language and communication. Linguistics courses examine features of language that underlie the human capacity to express concepts and communicate ideas. The courses address the connections between language, brain, culture, mind, and history. The major gives students a basic understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.
Linguistics is a superb preparation for careers that require expertise in the use of language as a means of communication, e.g., business, communications, personnel administration, teaching, health care, and social service. Many majors pursue graduate study in education, law, psychology, computer science, speech and hearing sciences, and languages.

Graduate Programs

M.A. Overview (https://linguistics.ku.edu/overview-2/)

Our M.A. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student's research interests.

The M.A. program usually takes two years. Students in the M.A. program complete a written Research Proposal and an Oral Examination of the Research Proposal, typically in their fourth semester of study. Students are required to take an Advanced II-level course to develop their understanding of research in their area of interest.

Ph.D. Overview (https://linguistics.ku.edu/overview-1/)

Our Ph.D. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student's research interests.

The Ph.D. program usually takes five years which includes completing an M.A. degree en route to the Ph.D. All Ph.D. students receive a five-year funding package.

Non-Degree Seeking (https://linguistics.ku.edu/overview-4/)

Students who are interested in enrolling in graduate level coursework in the Department of Linguistics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department's admission webpage (https://linguistics.ku.edu/admission/#tab2name) for further details.

Courses

LING 106. Introductory Linguistics. 3 Hours SC AE42/GE11/GE3S / S.
Introduction to the fundamentals of linguistics, with emphasis on the description of the sound system, grammatical structure and semantic structure of languages. The course will include a survey of language in culture and society, language change, computational linguistics and psycholinguistics, and will introduce students to techniques of linguistic analysis in a variety of languages including English. (Same as ANTH 106). LEC.

LING 107. Introductory Linguistics, Honors. 3 Hours SC AE42/GE11/GE3S / S.
Introduction to the fundamentals of linguistics, with emphasis on the description of the sound system, grammatical structure, and semantic structure of languages. The course includes a survey of language in culture and society, language change, computational linguistics and psycholinguistics, and introduces students to techniques of linguistic analysis in a variety of languages including English. Open only to students admitted to the University Honors Program or by consent of instructor. (Same as ANTH 107.) LEC.

LING 110. Language and Mind. 3 Hours SI AE41/GE11/GE3S / S.
A study of the relation between language and the human mind, focusing on language as a fundamental aspect of human cognition. Topics include what is innate and what is learned during first and second language acquisition, how we process language, and whether there are areas of the brain specialized for language. LEC.

LING 111. Language and Mind, Honors. 3 Hours SI AE41/GE11/GE3S / S.
A study of the relation between language and the human mind, focusing on language as a fundamental aspect of human cognition. Topics include what is innate and what is learned during first and second language acquisition, how we process language, and whether there are areas of the brain specialized for language. Open only to students admitted to the University Honors Program, or by consent of instructor. LEC.

LING 120. The Physics of Speech. 4 Hours N.
An introduction to the acoustic structure of speech intended for nonscience majors. Emphasis will be placed on the methods and standards by which scientists measure and evaluate the physical characteristics of speech. Topics will include: simple harmonic motion, the propagation of sound waves, aerodynamic aspects of vocal fold vibration, resonance, digital speech processing, frequency analysis, and speech synthesis. Three class hours and one laboratory per week. (Same as SPLH 120.) Prerequisite: MATH 101 or 104 or equivalent. LEC.

LING 177. First Year Seminar: ____. 3 Hours SC GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in linguistics. May not contribute to major requirements in linguistics. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

LING 180. Study Abroad Topics in Linguistics: ____. 1-3 Hours U.
This course is designed for the study of special topics in Linguistics. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

LING 300. Empirical Approaches to Languages. 3 Hours S.
This course provides students with a current overview of experimental data and up-to-date theories addressing empirical approaches to the study of language. A hands-on approach is used to facilitate understanding variation in language comprehension and production,
the biological bases of language, and the acquisition of first and second languages. LEC.

LING 305. Phonetics I. 3 Hours S.
This course provides a basic introduction to the study of human speech sounds. Topics to be covered include anatomy and physiology of the speech production apparatus, transcription and production of the world’s sounds, basic acoustics, computerized methods for speech analysis, acoustic characteristics of speech sounds, stress, and intonation. A hands on laboratory project is part of the course. Prerequisite: An introductory course in Linguistics. LEC.

LING 308. Linguistic Analysis. 3 Hours GE11 / H.
Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from various languages of different structural types. Prerequisite: LING 106. LEC.

LING 312. Phonology I. 3 Hours S.
This course focuses on crucial phonological concepts such as contrast, alternation, neutralization, distinctive features, and the syllable. It also provides students with basic skills for phonological analysis, including the selection of underlying representations, rule notation, rule ordering, identifying phonological universals, and how to make an informed decision when multiple analyses are viable. In addition, it discusses the external motivations for phonological grammar and relates phonology to other disciplines in linguistics such as language acquisition and psycholinguistics. Not open to students who have taken LING 712. Prerequisite: LING 305. LEC.

LING 320. Language in Culture and Society. 3 Hours SC AE41/AE61 / S.
Language is an integral part of culture and an essential means by which people carry out their social interactions with the members of their society. The course explores the role of language in everyday life of peoples in various parts of the world and the nature of the relationship between language and culture. Topics include world-view as reflected in language, formal vs. informal language, word taboo, and ethnography of speaking. (Same as ANTH 320.) LEC.

LING 321. Language in Culture and Society, Honors. 3 Hours SC AE41/AE61 / S.
An honors section of LING 320 for students with superior academic records. Not open to students who have had ANTH 320 or LING 320. (Same as ANTH 321.) Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

LING 325. Syntax I. 3 Hours H.
An introduction to generative syntax with special attention to theory and method. The course covers such topics as phrase structure, the lexicon, transformations and derivation. Prerequisite: LING 106. LEC.

LING 338. Languages of the Jews. 3 Hours H.
From the beginning, Jewish history and culture is closely tied to language, from Hebrew and Aramaic to the languages of diaspora such as Yiddish and Ladino. Focusing on issues of language in society, this course will survey the languages spoken by the Jews throughout their long history in diverse communities around the world. We will learn about Hebrew as a spoken and a sacred language, examine how Jewish languages are born and die, and discuss the resurrection of Modern Hebrew in the state of Israel. All readings are in English. No prior knowledge of languages or linguistics is required. (Same as JWSH 338.) LEC.

LING 339. Languages of the Jews, Honors. 3 Hours H.
Honors version of LING 338 or JWSH 338. Languages of the Jews. (Same as JWSH 339.) Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

LING 340. Sociolinguistics. 3 Hours S.
The formal features of language reflect a broad range of social factors, including age, context, culture, occupation, sex and social class. This course will introduce students to the ways social variables affect the forms of spoken and written language. Prerequisite: An introductory linguistics course or consent of instructor. LEC.

LING 343. Bilingualism. 3 Hours S.
This course provides an introduction to bilingualism and bilingual education exploring the linguistic, sociolinguistic, and psycholinguistic aspects of bilingualism. We read about and discuss bilingualism in the world and in the U.S.; language maintenance and language loss; effects of languages in contact; bilingual acquisition; the cognitive advantages of bilingualism; and the processing of language in the multilingual mind. Students are guided in conducting a small research project on one of these areas, learning how to read scientific studies about bilingualism and developing an understanding of the relationship between primary research sources and the popular press. LEC.

LING 345. Language and Gender. 3 Hours S.
This course explores the relationship between language use and gender. The course will specifically focus on how gender affects the ways we use spoken language as well as how we interpret the speech of others. Topics to be discussed will include the function of language in social relationships and language variation in different social contexts. LEC.

LING 370. Introduction to the Languages of Africa. 3 Hours NW AE42/GE3H / H/W.
A survey of the indigenous languages of Africa from a linguistic perspective, covering the main language families and their geographic distribution, and focusing on the features and structure of the more widely spoken and representative languages in each family (e.g., Fula, Hausa, Maninka, Swahili, Yoruba). (Same as AAAS 370.) LEC.

LING 380. Study Abroad Topics in Linguistics: , 1-6 Hours S.
This course is designed for the study of special topics in Linguistics at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. LEC.

LING 415. Second Language Acquisition I. 3 Hours H.
Introduction to the study of second language acquisition: The application of theoretical linguistics to the description of the language that a learner acquires, and to the process of acquisition. Prerequisite: An introductory course in linguistics. LEC.

LING 418. Introduction to Cognitive Science. 3 Hours S.
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an interdisciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as PHIL 418, PSYC 418, and SPLH 418.) Prerequisite: Consent of instructor. LEC.

LING 420. Capstone: Research in Language Science. 3 Hours AE61 / S.
This course, an on-site practicum in Linguistics, provides a foundation for designing, conducting, and critically evaluating quantitative and qualitative research in the language sciences. Topics include formulating a research hypothesis, participant selection, ethical considerations, the scientific method, dependent and independent variables, data collection, descriptive and inferential statistics. Instruction builds discipline-specific
knowledge and skills for career preparation. Students apply their knowledge of linguistics to formulate a research hypothesis and design an experiment to evaluate this hypothesis. Prerequisite: LING 305, LING 312, LING 325, and either LING 415, LING 425, LING 435, or LING 438. LEC.

LING 421. Capstone: Typology-Unity and Diversity of Human Language. 3 Hours AE61 / S.
This course, an on-site practicum in Linguistics, explores the similarities and differences among the world's languages. Students apply their knowledge of phonetics, phonology, morphology, and syntax in describing and analyzing phenomena from a number of languages. The typological perspective that students develop is applied to topics such as word order, morphological typology, case, lexical categories, and valency. In addition to lecture style instruction, students get hands on practice in collecting, transcribing, and analyzing data from different languages through face to face elicitation with native speakers. Instruction builds discipline-specific knowledge and skills for career preparation. Prerequisite: LING 305, LING 312, and LING 325. LEC.

LING 425. First Language Acquisition I. 3 Hours S.
An introductory course in the acquisition of child language. The course will cover relevant historical studies of child language but will focus primarily on recent psycholinguistic approaches toward the description of the process by which a child acquires his native language. Phonological, syntactic, semantic, cognitive, pragmatic, sociolinguistic, and anthropological aspects of the acquisition process are covered. Prerequisite: An introductory course in linguistics. LEC.

LING 430. Linguistics in Anthropology. 3 Hours S.
The study of language as a symbolic system. Exploration into the interrelatedness of linguistic systems, of nonlinguistic communicative systems, and of other cultural systems. (Same as ANTH 430.) LEC.

LING 435. Psycholinguistics I. 3 Hours S / LFE.
A detailed examination of issues in the processing of language. The course provides a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes are examined. Prerequisite: An introductory course in linguistics or permission of instructor. LEC.

LING 438. Neurolinguistics I. 3 Hours S.
The course explores how language is represented and processed in the human brain. This includes a critical survey of the foundations and the current research in the cognitive neuroscience of language, focusing on the techniques of functional brain imaging (fMRI, PET, EEG, MEG, and related methods), and research on aphasia and other language disorders. This course also includes a component providing laboratory experience with brain imaging research on language. Prerequisite: An introductory course in Linguistics. LEC.

LING 440. Linguistic Data Processing. 3 Hours H.
This course introduces the tools and techniques necessary to analyze fieldwork data, including research design, recording and elicitation techniques, computational data processing and analysis, and field ethics. The course also covers field recording and data analysis technology, along with methods of phonetic transcription, grammatical annotation and analysis of language context. Practice of techniques is provided via short studies of at least one language. Prerequisite: LING 305 or permission of instructor. LEC.

LING 447. North American Indian Languages. 3 Hours AE41 / S.
This course introduces students to the indigenous languages of North America. Students critically examine the structures and status of these languages, which have greatly expanded our knowledge of human language and linguistic theory. Topics include the history and future of North American languages and indigenous speech communities, the history of the field of Americanist linguistics, as well as important linguistic questions raised by phenomena from American languages in phonology, morphology, syntax, semantics, and historical linguistics. Prerequisite: An introductory course in linguistics. Not open to students enrolled in 747 LEC.

LING 451. Topics in Research in Acquisition and Processing: _____, 3 Hours H.
This course is primarily intended for students actively engaged in linguistic research on language acquisition, language processing, and neurolinguistics. Students in this course present and discuss study design, methods, data analysis and interpretation of results for their research projects. Professional development topics such as CV development, applications for fellowships, grants and jobs, and the dissemination of research findings are also discussed. May be repeated. Prerequisite: Permission of instructor. LEC.

LING 470. Language and Society in Africa. 3 Hours NW AE42/GE3H / H/W.
Examines issues and problems associated with language use in sub-Saharan Africa from a sociological perspective. Topics covered include an overview of the types of languages spoken on the continent: indigenous languages, colonial languages, pidgins and creoles, and Arabic as a religious language; problems associated with the politics of literacy and language planning; writing and standardization of indigenous languages; and the cultural and ideological dilemmas of language choice. (Same as AAAS 470.) Prerequisite: AAAS 103, AAAS 305, or LING 106; or consent of instructor. LEC.

LING 490. Independent Study. 1-3 Hours AE61 / U.
A special research project or directed readings in an area of linguistics not covered in other courses. No more than 3 hours of LING 490 may be applied toward the requirements for the major. Prerequisite: Consent of instructor. IND.

LING 491. Topics in Linguistics: _____, 1-3 Hours H.
The content, prerequisites, and credits of this course will vary. May be repeated. IND.

LING 492. Topics in Linguistics: _____, 1-3 Hours S.
The content, prerequisites, and credits of this course will vary. May be repeated. (Distribution credit given for two or three hours only.) Prerequisite: Consent of instructor. IND.

LING 496. Honors Essay in Linguistics. 1-3 Hours AE61 / H.
Individual directed research and preparation of an essay on a linguistic topic. Prerequisite: A grade-point average of 3.5 in linguistics and 3.25 in all courses, and consent of the major adviser. IND.

LING 507. Phonetics II. 3 Hours AE61 / S.
This course is a continuation of Phonetics I (LING 305/705) and provides a more detailed survey of acoustic and auditory phonetics. Topics to be covered include vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, prosody, the phonetics of second language acquisition, and the production and perception of cues to gender, talker, region, and socio-economic status. In addition, a number of laboratory projects are required. Prerequisite: LING 305. LEC.

LING 514. Phonology II. 3 Hours AE61 / S.
This course discusses the problems in rule-based phonology that led to the development of Optimality Theory. Discussions of Optimality Theory include its basis architecture, the nature of markedness constraints, the role of phonetics in the theory, correspondence between different levels of representation, and how variants of the theory can model free and lexical variation. A selection of the following topics will also be included depending on class interest: interface between phonology and
morphology, syntax, and the lexicon, reduplication, loanword phonology, biases in phonological learning, stress, and tone. The course has a particular focus on theory-building, with discussions on the how to lay out the predictions of a theoretical proposal, and how phonological predictions can be tested using experimental methods. Not open to students who have taken LING 714. Prerequisite: LING 312 or instructor consent. LEC.

LING 516. Second Language Acquisition II. 3 Hours AE61 / S.
This advanced course provides in-depth reading and discussion of several current topics including second language acquisition within a generative framework, processing approaches to second language acquisition, and the role of input and learnability principles in second language acquisition. Both theoretical and methodological issues are discussed. Prerequisite: LING 415 and LING 325; or permission of instructor. LEC.

LING 526. Syntax II. 3 Hours AE61 / S.
An advanced course covering one or more current theories of syntax. The course provides in-depth reading and discussion on the major areas of syntactic theory including universal grammar, phrase structure theory; lexicon and argument structure; binding, control, locality conditions; constraints on representation and derivation; and the relation between syntax and the semantic module. Prerequisite: LING 325. LEC.

LING 572. Morphology. 3 Hours S.
An exploration of several topics in word structure and formation. Covers three broad areas: traditional morphology, morpho-phonology, and morpho-syntax. Traditional morphology includes a survey of several kinds of word formation processes, the internal structure of words, morpheme types, inflection, paradigms, derivation, and compounding. Morpho-phonology deals with phonological constraints on morphological processes and prosodic morphology. Morpho-syntax concentrates on the syntactic properties of morphological phenomena and interaction of syntactic processes and morphology. The course has a strong emphasis on cross-linguistic comparative morphology. Prerequisite: LING 312 and LING 325, or permission of instructor. LEC.

LING 531. Semantics. 3 Hours S.
This course explores how meaning works in the grammar of natural languages. Students actively learn and apply formal structures to meaning in relation to truth, logic, and morphosyntax. The course emphasizes the role of context in semantic and pragmantic interpretation, including using context-based elicitation techniques to collect semantic data. Other topics include the nature of events and argument structure, tense and aspect, reference and binding, quantification and scope, and the semantic motivation behind syntactic structures. This course is offered at the 500 and 700 level, with additional assignments at the 700 level. Not open to students with credit in LING 731. Prerequisite: LING 525 or instructor permission. LEC.

LING 537. Psycholinguistics II. 3 Hours AE61 / S.
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. Prerequisite: LING 435 or consent of instructor. LEC.

LING 539. First Language Acquisition II. 3 Hours.
A second semester course in child language that explores the acquisition of morphology, syntax, and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. Prerequisite: LING 425 or consent of instructor. LEC.

LING 541. Field Methods in Linguistic Description. 3 Hours AE61 / H.
The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language.
LING 706. Current Linguistic Anthropology. 3 Hours.
The fundamental issues, methods, and theories in contemporary linguistic anthropology. (Same as ANTH 736.) Prerequisite: Graduate standing or consent of the instructor. LEC.

LING 707. Phonetics II / LFE.
This course is a continuation of Phonetics I (Ling 705) and provides a more detailed survey of acoustic and auditory phonetics. Topics to be covered include vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, prosody, the phonetics of second language acquisition, and the production and perception of cues to gender, talker, region, and socio-economic status. In addition, a number of laboratory projects will be required. Prerequisite: LING 705. LEC.

LING 708. Linguistic Analysis. 3 Hours.
Practice in applying the techniques of phonological, grammatical, and syntactic analysis learned in introductory linguistics to data taken from a variety of languages of different structural type. (Same as ANTH 736.) Prerequisite: An introductory course in linguistics. Not open to students who have taken LING 308. LEC.

LING 709. First Language Acquisition I. 3 Hours.
Introduction to the study of language acquisition: the significant findings, the basic methodological procedures, and some of the more recent theoretical accounts. Not open to students who have taken LING 425. (Same as CLDP 709.) Prerequisite: Graduate standing or consent of instructor. LEC.

LING 712. Phonology I. 3 Hours.
This course focuses on crucial phonological concepts such as contrast, alternation, neutralization, distinctive features, and the syllable. It also provides students with basic skills for phonological analysis, including the selection of underlying representations, rule notation, rule ordering, identifying phonological universals, and how to make an informed decision when multiple analyses are viable. In addition, it discusses the external motivations for phonological grammar and relates phonology to other disciplines in linguistics such as language acquisition and psycholinguistics. Not open to students who have taken LING 312. Prerequisite: LING 705. LEC.

LING 714. Phonology II. 3 Hours.
This course discusses the problems in rule-based phonology that led to the development of Optimality Theory. Discussions of Optimality Theory include its basic architecture, the nature of markedness constraints, the role of phonetics in the theory, correspondence between different levels of representation, and how variants of the theory can model free and lexical variation. A selection of the following topics will also be included depending on class interest: interface between phonology and other components of the grammar (e.g., morphology, syntax, and the lexicon), reduplication, loanword phonology, biases in phonological learning, stress, and tone. The course has a particular focus on theory-building, with discussions on how to lay out the predictions of a theoretical proposal and how phonological predictions can be tested using experimental methods. Not open to students who have taken LING 514. Prerequisite: LING 712. LEC.

LING 715. Second Language Acquisition I. 3 Hours.
Introduction to the study of second language acquisition: The application of theoretical linguistics to the description of the language a learner acquires, and to the process of acquisition. Prerequisite: Graduate standing or consent of instructor. LEC.

LING 716. Second Language Acquisition II. 3 Hours.
This advanced course will provide in-depth reading and discussion of several current topics including second language acquisition within a generative framework, processing approaches to second language acquisition, and the role of input and learnability principles in second language acquisition. Both theoretical and methodological issues will be discussed. Prerequisite: LING 715; LING 725, which may be taken concurrently, or permission of instructor. LEC.

LING 720. Research Methods in Linguistics. 3 Hours.
This course provides a foundation for designing, conducting, and critically evaluating quantitative and qualitative research in the language sciences. Topics include formulating a research hypothesis, participant selection, ethical considerations, the scientific method, validity, reliability, data collection, dependent and independent variables, descriptive and inferential statistics. This course will serve students who are interested in the basics of research design and statistics for the study of language. Prerequisite: Graduate standing or consent of instructor. LEC.

LING 722. Linguistic Typology. 3 Hours.
Different languages use different linguistic mechanisms to encode meanings. This course surveys grammatical concepts and categories found in the world's languages including tense, aspect, mood, voice, person, and number as well as case relations such as nominative, accusative, ergative, and absolutive. Basic word order typology and discourse functions such as topic, focus, and cohesion are introduced. Examples will be drawn from a wide variety of languages to illustrate how the same concept may be encoded differently, i.e., morphologically, syntactically, or lexically, in different languages. Prerequisite: Graduate standing or consent of instructor. LEC.

LING 725. Syntax I. 3 Hours.
The basics of theoretical syntax, examining the principles of universal grammar. Topics include phrase structure, relations among syntactic constituents, and the nature of syntactic rules and lexical categories. Prerequisite: Graduate standing or consent of instructor. LEC.

LING 726. Syntax II. 3 Hours.
An advanced course covering one or more current theories of syntax. The course will provide in-depth reading and discussion on the major areas of syntactic theory including universal grammar, phrase structure theory, lexical projections of argument structure, binding, control, locality condition, constraints on representation, and the relation between syntax and the semantic module. Prerequisite: LING 725. LEC.

LING 727. Morphology. 3 Hours.
An exploration of several topics in word structure and formation. Covers three broad areas: traditional morphology, morpho-phonology, and morpho-syntax. Traditional morphology includes a survey of several kinds of word formation processes, the internal structure of words, morpheme types, inflection, paradigms, derivation, and compounding. Morpho-phonology deals with phonological constraints on morphological processes and prosodic morphology. Morpho syntax concentrates on the syntactic properties of morphological phenomena and interaction of syntactic processes and morphology. The course has a strong emphasis on cross-linguistic comparative morphology. Prerequisite: LING 712, LING 725, or permission of instructor. LEC.

LING 730. Linguistics in Anthropology. 3 Hours.
The study of language as it concerns anthropology. Language systems in relation to culture, language taxonomy, semantics, linguistic analysis as an ethnographic tool. (Same as ANTH 730.) LEC.

LING 731. Semantics. 3 Hours.
This course explores how meaning works in the grammar of natural languages. Students actively learn and apply formal structures to meaning in relation to truth, logic, and morphosyntax. The course emphasizes the role of context in semantic and pragmatic interpretation, including using context-based elicitation techniques to collect semantic data. Other
**LING 725. Techniques of Research Design. 3 Hours.**

This course focuses on research design, methods of phonetic transcription, data from a language consultant. In-depth research on one language. The elicitation and analysis of phonological, grammatical, and discourse context. Practice of techniques via short studies of at least one language. Techniques of research design, methods of phonetic transcription, grammatical annotation, and analysis of language context. (Same as ANTH 741.) Prerequisite: LING 705 or permission of the instructor. LEC.

**LING 732. Discourse Analysis. 3 Hours.**

This course focuses on linguistic frameworks for the analysis of discourse. Discourse is a linguistic system larger than the sentence (utterance), which connects and contextualizes speech and written text. This course focuses on current issues and theoretical frameworks in the analysis of discourse. Using oral and written data, students will examine how contexts influence and shape linguistic form. Topics covered include transcription systems, the structure and organization of different genres of language, and the performance of social actions, including stance-taking, framing, and the construction of identity. Students will also have an opportunity to perform discourse analytic research on the data of their choice. (Same as ANTH 732.) Prerequisite: ANTH 706 or permission of the instructor. LEC.

**LING 735. Psycholinguistics I. 3 Hours / LFE.**

A detailed examination of issues in the processing of language. The course will provide a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processes will be examined. (Same as PSYC 735.) LEC.

**LING 737. Psycholinguistics II. 3 Hours.**

An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. (Same as PSYC 737.) Prerequisite: PSYC 735/LING 735 or consent of instructor. LEC.

**LING 738. Neurolinguistics I. 3 Hours.**

We will explore how language is represented and processed in the human brain. This will include a critical survey of the foundations and the newest state-of-the-art research in the cognitive neuroscience of language, focusing on the techniques of functional brain imaging (fMRI, PET, EEG, MEG, and related methods), and research on aphasia and other language disorders. This course will also include a laboratory component providing hands-on experience with brain imaging research on language. Prerequisite: Graduate standing or consent of instructor. LEC.

**LING 739. First Language Acquisition II. 3 Hours.**

A second semester course in child language which explores the acquisition of morphology, syntax and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. (Same as CLDP 739.) Prerequisite: LING 709 or permission of the instructor. LEC.

**LING 740. Linguistic Data Processing. 3 Hours.**

The tools and techniques necessary to analyze linguistic fieldwork data, including research design, recording and elicitation techniques, computational data processing and analysis, and field ethics. Techniques of research, field recording, and data analysis technology. Methods of phonetic transcription, grammatical annotation, and analysis of language context. Practice of techniques via short studies of at least one language. (Same as ANTH 740.) Prerequisite: LING 700 or permission of instructor. LEC.

**LING 741. Field Methods in Linguistic Description. 3 Hours.**

The elicitation and analysis of phonological, grammatical, and discourse data from a language consultant. In-depth research on one language. Topics include the nature of events and argument structure, tense and aspect, reference and binding, quantification and scope, and the semantic motivation behind syntactic structures. This course is offered at the 500 and 700 level, with additional assignments at the 700 level. Not open to students with credit in LING 531. Prerequisite: LING 725 or instructor permission. LEC.

**LING 742. Neurolinguistics II. 3 Hours.**

An in-depth discussion of the representation and processing of language from a cognitive neuroscience perspective. This course involves critical discussion of selected topics of current research interest in neurolinguistics. The course also includes a significant hands-on component, in which students receive training in research on the cognitive neuroscience of language by developing and implementing a new EEG study on an aspect of language, as well by completing as a series of mini-labs introducing neuroimaging methods and analyses. Prerequisite: LING 738 or permission of the instructor. SEM.
LING 810. Seminar in Ethnolinguistics:_____. 2-3 Hours.
An advanced study of the relations between language and culture.
Subject will vary each semester. Students may repeat the course more
than once. (Same as ANTH 810.) LEC.

LING 814. Seminar in Phonology. 3 Hours.
Critical examination of recent theoretical issues and empirical findings in
the study of phonology. Prerequisite: LING 712 or consent of instructor.
LEC.

LING 822. Seminar in First Language Acquisition. 3 Hours.
Critical examination of recent theoretical issues and empirical findings in
the study of first language acquisition. (Same as CLDP 822.) Prerequisite:
LING 709 or consent of instructor. LEC.

LING 826. Seminar in Syntax. 3 Hours.
Critical examination of recent theoretical issues and empirical findings in
the study of syntax. Prerequisite: LING 725 or consent of instructor. LEC.

LING 831. Seminar in Semantics. 3 Hours.
Critical examination of recent theoretical issues and empirical findings in
the study of semantics. Prerequisite: LING 731 or consent of instructor.
LEC.

LING 837. Seminar in Psycholinguistics. 3 Hours.
Critical examination of recent theoretical issues and empirical findings in
the study of psycholinguistics. Prerequisite: LING 735 or consent of
instructor. LEC.

LING 842. Seminar in Neurolinguistics. 3 Hours.
Critical examination of recent theoretical issues and empirical findings in
the study of neurolinguistics. Prerequisite: LING 738 or consent of
instructor. LEC.

LING 850. Topics in Research in Experimental Linguistics:_____. 1-9
Hours.
This course is primarily for students actively engaged in experimental
linguistic research. The course provides students with the opportunity
to focus on their current research projects and involves critical analysis,
presentation, and discussion of research design, methods, statistical
analysis, and data interpretation. May be repeated. Prerequisite:
Permission of instructor. SEM.

LING 851. Research in Language Acquisition and Processing. 1-9
Hours.
This course is primarily intended for students actively engaged in
linguistic research on language acquisition, language processing,
and neurolinguistics. Students in this course present and discuss
study design, methods, data analysis and interpretation of results for
their research projects. Professional development topics such as CV
development, applications for fellowships, grants and jobs, and the
dissemination of research findings are also discussed. May be repeated.
Prerequisite: Permission of instructor. SEM.

LING 852. Research in Field and Formal Linguistics. 1-9 Hours.
This course is intended for students who are conducting field work on
syntax or morphology, typically of an understudied language. The course
is structured around a set of topics (variable by semester) which each
student will investigate in a particular language. The focus of the course
is on data collection and analysis and students will present and discuss
the results of their research projects. May be repeated. Prerequisite:
Permission of instructor. SEM.

LING 860. Seminar in Second Language Acquisition. 3 Hours.
Critical examination of recent theoretical issues and empirical findings in
the study of second language acquisition. Prerequisite: LING 715 or
permission of instructor. LEC.

LING 899. Master’s Research Project. 1-3 Hours.
A course for students working on their M.A. Research Project. Normally to
be taken during the semester in which the student is submitting the M.A.
Research Project. Students must enroll for at least one credit hour. Up to
three credits will count toward the minimum number of credits required for
the M.A. degree in linguistics. RSH.

LING 910. Linguistic Seminar:_____. 1-3 Hours.
The content and prerequisites of this course will vary. May be repeated.
LEC.

LING 947. Seminar in Amerindian Linguistics. 1-3 Hours.
The aim of the seminar is to provide opportunity for interaction among
faculty and students sharing an interest in North American Native
languages and linguistics. Activities include reading, discussion, and
criticism of literature on Amerindian languages and linguistics, and reports
on current research of the participants. May be repeated. Prerequisite:
LING 747. LEC.

LING 980. Linguistics Field Work. 3-6 Hours.
Independent field work with an informant on a language not normally
offered at the University of Kansas, or on a non-standard dialect of one
of the more accessible languages. Student must show evidence (file slips
for grammatical and phonological analysis, dictionary slips, etc.) of having
done the required amount of work without necessarily being able to turn
in a completed analysis. Normally for three credits; six credits would be
available under certain circumstances such as intensive summer work on
location away from the university. Graded on satisfactory/unsatisfactory
basis. Prerequisite: LING 712 and LING 725. FLD.

LING 997. Ph.D. Examinations. 1-12 Hours.
A course for students writing answers to the preliminary Ph.D.
examination and/or preparing to take the Oral Comprehensive
Examination. Normally to be taken during the semester in which the
student is submitting answers to the written preliminary examination. May
be taken for a maximum of two semesters or twelve credits, whichever
comes first. Does not count toward the minimum number of credits
required for a graduate degree in linguistics. Graded satisfactory/
unsatisfactory on the results of the examination. RSH.

LING 998. Independent Study. 1-12 Hours.
A special research project or directed readings in an area of linguistics not
covered in other courses. Prerequisite: Written consent of instructor. RSH.

LING 999. Doctoral Dissertation. 1-12 Hours.
THE.

Bachelor of Arts and Bachelor of General Studies in Linguistics

Why study Linguistics
Because language is the window into the mind. Linguistics provides an
understanding of the human capacity to acquire, perceive, and produce
language and of language’s role in contemporary society.

B.A./B.G.S. Overview
The department offers a broad range of courses that provide a basic
understanding of human language and communication. Linguistics
courses examine features of language that underlie the human capacity
to express concepts and communicate ideas. The courses address
the connections between language, brain, culture, mind, and history.
The major gives students a basic understanding of the human capacity
to acquire, perceive, and produce language and of language’s role in contemporary society.

Linguistics is a superb preparation for careers that require expertise in the use of language as a means of communication, e.g., business, communications, personnel administration, teaching, health care, and social service. Many majors pursue graduate study in education, law, psychology, computer science, speech and hearing sciences, and languages.

A degree in Linguistics may also be combined with a Research Experience Certification through the KU Research Program (REP) [http://ugresearch.ku.edu/student/rep/overview/]. KU’s Research Experience Program (REP) is an undergraduate certificate program in which students learn content and skills via classes, apply and integrate what they’ve learned via a research/creative project, present the project, and then reflect on the progress they’ve made. Completion of the REP certificate appears on a student’s official transcript. Please speak with the Linguistics Undergraduate Research Coordinator, Dr. Minai (minai@ku.edu), if you are interested in pursuing Research Experience Program certification as part of your Linguistics degree.

You can also combine your degree in Linguistics with a Global Awareness Certification through the [http://gap.ku.edu] Global Awareness Program (GAP) [http://gap.ku.edu], KU’s Global Awareness Program (GAP) is an undergraduate certificate program in which you can expand your cultural knowledge and navigate multiple perspectives. GAP tracks your progress on the three components: Academic [http://gap.ku.edu/Academic/], On-Campus Activities with a global focus [http://gap.ku.edu/co-curricular-activities/], and/or International Experience [http://gap.ku.edu/international-experience/] (Two-out-of-three components needed to earn the certificate.) Completion of the GAP certificate appears on a student’s official transcript. Please speak with the Director of Undergraduate Studies, Dr. Fiorentino (fiorentino@ku.edu), if you are interested in pursuing Global Awareness Program certification as part of your Linguistics degree.

Undergraduate Admission
Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Visit the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements.

See individual department/program sections for departmental admission requirements.

Requirements for the B.A. or B.G.S. Major
Linguistics Language Proficiency
Major must demonstrate fourth semester proficiency in a single non-English language, or third semester proficiency in a first non-English language and first semester proficiency in a second non-English language. This requirement may be met through coursework or examination by the appropriate language department.

To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Below is a sample 4-year plan for students pursuing the BA in Linguistics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Capstone Experience (3 Credit Hours)**
- LING 420: Capstone: Research in Language Science
  - or LING 421: Capstone: Typology-Unity and Diversity of Human Language

**Major Hours & Major GPA**
While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses, or 33 hours required if completing departmental honors course LING 496.

**Major Hours in Residence**
Satisfied by a minimum of 24 junior/senior (300+) hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Linguistics can be found here: Linguistics (p. 1743), or by using the left-side navigation.

**Departmental Honors**
The honors program allows exceptional undergraduate students to work closely with faculty members on a research project. To graduate with honors in linguistics, a student must complete all requirements for the linguistics major and LING 496 Honors Essay in Linguistics (usually taken in the fall semester of the senior year). The student must have a grade-point average of at least 3.5 in Linguistics courses.

Consult the departmental honors coordinator or the director of undergraduate studies for information. Prospective honors candidates are encouraged to select a thesis topic and thesis director at the end of the junior year.

**BA in Linguistics**
Below is a sample 4-year plan for students pursuing the BA in Linguistics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
## BGS in Linguistics

Below is a sample 4-year plan for students pursuing the BGS in Linguistics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. One course is required from a list of courses that satisfy the Acquisition & Processing requirement and the Analysis & Description requirement in the major. For a list of courses approved for each area, please review the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/linguistics/ba-bgs/#requirementstext) tab.

4. One course is required from a list of advanced courses. For a list of approved advanced courses, please review the degree requirements (https://catalog.ku.edu/liberal-arts-sciences/linguistics/ba-bgs/#requirementstext) tab.

5. Either LING 420 (Fall only course) or LING 421 (Spring only course) is required.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language's role in contemporary society.

Minor Overview

The department offers a broad range of courses that provide a basic understanding of human language and communication. Linguistics courses examine features of language that underlie the human capacity to express concepts and communicate ideas. The courses address the connections between language, brain, culture, mind, and history. The minor gives students a basic understanding of the human capacity to acquire, perceive, and produce language and of language's role in contemporary society.

Linguistics is a superb preparation for careers that require expertise in the use of language as a means of communication, e.g., business, communications, personnel administration, teaching, health care, and social service. Many majors pursue graduate study in education, law, psychology, computer science, speech and hearing sciences, and languages.

A minor in Linguistics may also be combined with a Research Experience Certification through the KU Research Program (REP) (http://ugresearch.ku.edu/student/rep/overview). KU's Research Experience Program (REP) is an undergraduate certificate program in which students learn content and skills via classes, apply and integrate what they’ve learned via a research/creative project, present the project, and then reflect on the progress they’ve made. Completion of the REP certificate appears on a student's official transcript. Please speak with the Linguistics Undergraduate Research Coordinator, Dr. Utako Minai (minai@ku.edu), if you are interested in pursuing Research Experience Program certification as part of your Linguistics degree.

You can also combine your degree in Linguistics with a Global Awareness Program Certification through the Global Awareness Program (GAP) (http://gap.ku.edu). KU’s Global Awareness Program (GAP) is an undergraduate certificate program in which you can expand your cultural knowledge and navigate multiple perspectives. GAP tracks your progress on the three components: Academic (http://gap.ku.edu/Academic), On-Campus Activities with a global focus (http://gap.ku.edu/co-curricular-activities/), and/or International Experience (http://gap.ku.edu/international-experience/) (Two-out-of-three components needed to earn the certificate.) Completion of the GAP certificate appears on a student's official transcript. Please speak with the Director of Undergraduate Studies, Dr. Fiorentino (fiorentino@ku.edu), if you are interested in pursuing Global Awareness Program certification as part of your Linguistics degree.

Requirements for the Minor

Students can graduate with one of the two Linguistics tracks - either the General Linguistics Track or the Second Language Acquisition Track.

General Linguistics Track:

Master of Arts in Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language's role in contemporary society.

M.A. Overview (https://linguistics.ku.edu/overview-2/)

Our M.A. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student's research interests.

The M.A. program usually takes two years. Students in the M.A. program complete a written Research Proposal and an Oral Examination of the Research Proposal, typically in their fourth semester of study. Students are required to take an Advanced II-level course to develop their understanding of research in their area of interest.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants must submit a curriculum vitae, a statement of purpose, an official copy of transcript from the baccalaureate granting institution and any transcripts from institutions attended post-baccalaureate, 3 letters of recommendation, and Graduate Record Examination scores. Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Submit your graduate application online (https://gradapply.ku.edu/apply/). Send all other requested application materials to the department:

The University of Kansas

Total Hours 18

Minor Hours & GPA

While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 12 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Doctor of Philosophy in Linguistics

Why study linguistics?

Because language is a window into the mind. Linguistics provides an understanding of the human capacity to acquire, perceive, and produce language and of language’s role in contemporary society.

Ph.D. Overview (https://linguistics.ku.edu/overview-1/)

Our Ph.D. program in Linguistics requires the student to develop a solid understanding of the core areas of the discipline in addition to an in-depth specialty in one of the many areas available through the research interests of the faculty. Areas of special strength in the graduate program include phonetics, phonology, syntax, psycholinguistics, neurolinguistics, first language acquisition, second language acquisition, semantics, and the study of indigenous languages.

The student will work with their academic advisor to devise a course of study that best suits the student’s research interests.

The Ph.D. program usually takes five years which includes completing an M.A. degree en route to the Ph.D. All Ph.D. students receive a five-year funding package.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Applicants must submit a curriculum vitae, a statement of purpose, an official copy of transcript from the baccalaureate granting institution and any transcripts from institutions attended post-baccalaureate, 3 letters of recommendation, and Graduate Record Examination scores. Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).
Submit your graduate application online (https://gradapply.ku.edu/). Send all other requested application materials to the department:

The University of Kansas  
Department of Linguistics  
Blake Hall  
1541 Lilac Lane, Room 427  
Lawrence, KS 66045

### Ph.D. Degree Requirements

The Ph.D. is structured as a five year program. Students will earn an M.A. en route to the Ph.D.

#### Research Skills

The university requires that every doctoral student have training in research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. One of the following courses with a grade of B or above fulfills the requirements for research skills:

1. A graduate-level (500 or above) course in statistics
2. A graduate-level (500 or above) course in a computer programming language
3. LING 720 Research Methods in Linguistics
4. LING 741 Field Methods in Linguistic Description
5. LING 782 Research Methods in Child Language

#### Responsible Scholarship

The university requires that every doctoral student have training in responsible scholarship pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. LING 794 Proseminar fulfills the requirements for responsible scholarship.

#### Minimum Course Requirements

57 credit hours consisting of 33 credit hours at the M.A. level and 24 hours at the Ph.D. level.

**Research Presentation Requirement**

Students must give 1 research presentation each semester beginning in their second year of the program. For students who are just beginning their independent research projects, this presentation may involve the discussion of published research relevant to the student’s research interests. This requirement may be satisfied through a presentation in one of the empirical research seminars (LING 850, LING 851, LING 852), a presentation at a local, regional, or international conference, a presentation in the Linguistics colloquium series, or a presentation at any other relevant forum as determined by the faculty adviser. Students must include the titles and dates of these presentations in their annual report each year.

**M.A. Research Project for PhD Students**

The Master’s research project should consist of a detailed research proposal and include pilot results and/or preliminary analyses. Students in the Ph.D. program should be able to continue working on the project with the aim of submitting it as a qualifying paper for the Ph.D. program.

An M.A. candidate in residence who has begun work on a research project must enroll for at least 1 credit hour of LING 899 Master’s Research Project each semester (summer session excluded) until the thesis is completed.

The research project must be defended successfully in an oral examination. The oral exam is scheduled when all 3 committee members have indicated in writing their approval or disapproval of the research project for defense and at least 2 (including the chair) have approved scheduling the exam. The oral examination will typically last 1-2 hours.

Following the oral examination, the student's performance will be evaluated by the project committee and reported by a Progress-to-Degree form to Graduate Studies as the outcome of the Master's oral examination. The committee will evaluate the M.A. research project with the following grades: 0-fail, 1-pass but cannot continue to the Ph.D. program, 2-pass and can continue to the Ph.D. program.

**Qualifying Papers**

The student needs to write 2 qualifying papers -- a major paper in the area of specialization and a minor paper in a different area. Both papers should represent original work and both papers must have different advisers. The major paper may be an expanded version of the M.A. research project and should be of publishable quality. The minimum lengths of the major and minor papers are 25 pages and 15 pages, respectively.

The major and minor papers are developed in close consultation with an Advisory Committee (3 faculty members) and the 2 papers should be supervised by different faculty members. The adequacy of the papers is evaluated on the quality of the literature review, theoretical contribution, and research integration as well as the basis of their logical coherence and organization. The student does not need to orally defend the qualifying papers.

**Dissertation Proposal and the Oral Comprehensive Exam**

When the major and minor qualifying papers have been approved by the Advisory Committee, the student may form a Ph.D. committee (4 Department of Linguistics Graduate Faculty members, 1 Graduate Studies Representative member), which helps the student work on the dissertation, starting from the dissertation proposal. The proposal should clearly identify the research questions that the dissertation will address, include a comprehensive literature review, lay out the methodology for the research, discuss preliminary data and results, if any, and present a timetable for the dissertation research. The minimum length for the dissertation proposal is 10 pages.

The Oral Comprehensive Exam is the official exam required by Graduate Studies and consists of an oral defense of the dissertation proposal and the answering of any other questions related to the fields of study of the dissertation research. It must be completed the spring semester of the 4th year (at the latest). The oral examination will typically last 2 to 3 hours.

**Dissertation and Dissertation Defense**

The dissertation is developed in consultation with the Ph.D. committee. The dissertation must be orally defended in front of the Ph.D. committee. The student will be asked first to summarize his/her dissertation and evidence, and then will be questioned by the committee. The dissertation defense will typically last 1 to 2 hours.

**University Requirements**

Throughout the course of doctoral study, the student must fulfill all relevant College and University policies (http://coga.ku.edu/graduate-policies/), such as those concerning doctoral residency, time constraints, continuous post-comprehensive enrollment, human subjects review, electronic filing, and graduation.

**Department of Mathematics**

**Why study mathematics?**

Because mathematics is a framework upon which humanity builds an understanding of the world.

The mission of the Department of Mathematics is to create and teach mathematics, and to develop in all students the capacity to understand, discover, enjoy, and use mathematics.

This is a wide-ranging enterprise that involves:

- Enabling students to experience the value and power of mathematical reasoning:

Select 2 Elective courses (6 credit hours) May include LING 850, LING 851, LING 852, LING 998. Select in conjunction with student's Linguistic advisor.

Select 2 Research Seminars (6 credit hours) LING 850, LING 851, LING 852 are repeatable for credit.

LING 850 Topics in Research in Experimental Linguistics: _____

LING 851 Research in Language Acquisition and Processing

LING 852 Research in Field and Formal Linguistics
• Providing for the specific mathematical needs of users of mathematics, e.g., in engineering, computer science, economics, physics, finance, education and other physical and social sciences;
• Providing statewide leadership in the mathematics education of all Kansans from K-12 through graduate school;
• Developing interdisciplinary research with other units which make extensive use of mathematics;
• Fostering a climate conducive to active faculty research and interaction with other departments.

The Mathematics Department offers two undergraduate degrees, a B.A. in Mathematics and a B.S. in Mathematics, as well as an Undergraduate Certificate in Actuarial Science. The B.A. has fewer mathematics course requirements and more general education requirements. The B.S. requires more mathematics courses, an applied mathematics concentration, and fewer general education courses. Students who wish to teach mathematics in high school should pursue a B.A. or B.S. in mathematics while participating in the UKanTeach program. The mathematics department offers two graduate degrees, an M.A. and a Ph.D., as well as a Certificate in Applied Mathematics.

Undergraduate Programs

Placement

Students who have not completed a college-level mathematics course should consult the Placement Table (see below) for Initial Enrollment in Mathematics. For information about the Early and Continuous Enrollment in Math requirement, see the CLAS Degree Requirements page (p. 808).

Students may also take the ALEKS Placement, Preparation and Learning Math assessment (http://math.ku.edu/what-aleks/) to determine their proper initial placement in mathematics courses. Students with college credit in mathematics should enroll according to the credit shown on their transcripts and the stated prerequisites for the courses.

Courses for Nonmajors

Students interested in mathematics as part of a background in the liberal arts should enroll in MATH 115, MATH 125, MATH 105, or MATH 365, and other courses according to their interests. Students preparing to use mathematics as a tool in another field should look at the requirements and recommendations of their schools or departments.

Math 2 is considered a developmental course by all KU schools and is not counted in the minimum number of hours required for graduation.

Placement Table for Initial Enrollment in Mathematics

KU encourages all entering students to complete 4 years of mathematics in high school, including Algebra I and II, Geometry, Trigonometry, and Analytic Geometry, along the lines of the Kansas Board of Regents recommendations (https://admissions.ku.edu/freshman-requirements-deadlines/college-prep-curriculum/).

Before enrolling in MATH 002, these students are encouraged to prepare by self-study or by completing a beginning algebra course in high school or community college.</td>
</tr>
</tbody>
</table>

After their initial enrollment in mathematics, students must remain continuously enrolled until they have completed MATH 101 or MATH 104.

Preparation for Graduate Study

Students who plan to attend graduate school in the mathematical sciences should speak to an advisor about the best preparation, depending on their goals. Students planning to enter a general mathematics graduate program are encouraged to take MATH 765, MATH 766, MATH 790, and MATH 791. Some graduate degrees require a reading knowledge of French, German, or Russian.

Preparation for Graduate Study

Students who plan to attend graduate school in the mathematical sciences should speak to an advisor about the best preparation, depending on their goals. Students planning to enter a general mathematics graduate program are encouraged to take MATH 765, MATH 766, MATH 790, and MATH 791. Some graduate degrees require a reading knowledge of French, German, or Russian.

Graduate Programs

The department offers a graduate program leading to both the M.A. and Ph.D. degrees. A broad range of programs is possible in algebra, analysis, combinatorics, control theory, dynamical systems, geometry, numerical analysis, probability, statistics, partial differential equations, set theory, and topology.

The Department of Mathematics has a long tradition of excellence. The first Ph.D. granted at KU was in mathematics in the year 1895. Since then, the graduate program has been a central part of the department’s research and teaching mission and an important component of its long-term planning. The department’s commitment to graduate education has boosted its recent growth in size and enhanced its reputation. Prospective students are encouraged to read additional information (http://www.math.ku.edu/academics/graduate/) online.

Students who are interested in enrolling in graduate level coursework in the Department of Mathematics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (https://mathematics.ku.edu/applications-and-admissions/) webpage for further details.
Courses

MATH 2. Intermediate Mathematics. 3 Hours U.
Mathematics (primarily algebra) preparatory to MATH 101. Qualification: Two years of high school college preparatory mathematics, algebra and geometry, and a score of 16 or more on ACT mathematics; or a qualifying score on the mathematics placement test. MATH 002 is the lowest level mathematics course offered at the University of Kansas. Students not prepared for MATH 101 will be permitted to enroll in MATH 002. However, before enrolling in MATH 002, such students are encouraged to prepare by self-study or by completing a beginning algebra course in high school, community college, or correspondence study. LEC.

MATH 101. College Algebra: _____, 3 Hours GE12 / U.
Coordinate systems, functions and their graphs; linear, quadratic, general polynomial, rational, exponential, and logarithmic functions; equations and inequalities; and linear and non-linear systems. Data Driven sections are intended for non-STEM majors and cover college algebra content with increased emphasis on context and interpretation of data, and decreased emphasis on symbolic manipulation. Enrollment in Enhanced sections will benefit students by providing additional instructional time and integrated review of some prerequisite material. Students in Enhanced sections must enroll in Math 197 as a co-requisite. Not open to students with credit in MATH 104. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. Students with slightly lower ACT scores may be admitted to Enhanced sections based on high school GPA. LEC.

MATH 103. Trigonometry. 2 Hours U.
The circular functions and their applications. Not open to students with credit in MATH 104. May not be used to fulfill the College mathematics requirement. Prerequisite: MATH 101, or two years of high school algebra and a score of 26 or higher on enhanced ACT mathematics, or a qualifying score on the mathematics placement test. LEC.

MATH 104. Precalculus Mathematics. 5 Hours GE12 / U.
An introduction to the elementary functions (polynomial, rational, exponential, logarithmic, and trigonometric) and their properties. Open for only two hours credit for students with credit in MATH 101. Not open to students with credit in MATH 103. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. LEC.

MATH 105. Introduction to Topics in Mathematics. 3 Hours GE12 / N.
This course has two purposes. First, to provide the student with some experience and insight into several areas of mathematics not normally covered in elementary courses. Typical topics which may be covered are number theory, geometries, introductory calculus, introductory probability and statistics. Second, to provide the student with some skill in handling abstract mathematical concepts. The material will develop dually the intuitive and axiomatic approach. A high degree of manipulative skill is not required for this course. Prerequisite: MATH 101 or MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. LEC.

MATH 109. Mathematics for Elementary School Teachers I. 3 Hours U.
This course is designed to give the prospective elementary school teacher an overview of several components of the elementary school mathematics curriculum, including number systems, estimation, inequalities and order, sequences and patterns, sets, and relations and functions. The class meets each week for three one-hour instruction sessions and one two-hour laboratory session. This course may not be used to satisfy the College mathematics requirement. Prerequisite: MATH 101 or equivalent placement. LEC.

MATH 110. Mathematics for Elementary School Teachers II. 3 Hours U.
Continuation of MATH 109, including geometry (including transformations) and elementary probability and statistics. Class meets each week for three one-hour instruction sessions and one two-hour laboratory session. This course does not serve as a prerequisite for any mathematics course. It may not be used to satisfy the College mathematics requirement. Prerequisite: MATH 109. LEC.

MATH 115. Calculus I. 3 Hours GE12 / N.
Elementary differential and integral calculus, with applications in management and the biological sciences. Not open to students with credit in MATH 125 or MATH 145. Prerequisite: MATH 101 or MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. LEC.

MATH 116. Calculus II. 3 Hours NM / N.
Continuation of MATH 115 including exponential, logarithmic, and trigonometric functions, techniques of integration, and the calculus of functions of several variables. Not open to students with credit in MATH 127 or MATH 147. Prerequisite: MATH 115 plus a course in trigonometry, or MATH 125 or MATH 145. MATH 103 may be taken concurrently. LEC.

MATH 120. Integration Techniques and Applications. 1 Hour U.
A study of techniques and applications of integration. Techniques include integration by parts, integration by trigonometric substitution, integration by partial fractions and improper integrals. Applications of integration include area, volume, arc length, average value, and physical applications such as work and hydrostatic force. Not open for credit to students with credit in MATH 116. Prerequisite: MATH 119. LEC.

MATH 125. Calculus I. 4 Hours GE12 / N.
Limits, continuity and derivatives of algebraic, trigonometric, exponential and logarithmic functions. Curve sketching, optimization and other applications of the derivative. Antiderivatives, Riemann sums, the definite integral, and the fundamental theorem of calculus. Open for only 1 hour credit to students with credit in MATH 115. Not open for credit to students with credit in MATH 116 or MATH 145. Prerequisite: MATH 103 or MATH 104, with a grade of C- or higher; or 3 years of college preparatory mathematics including trigonometry, with a score of 28 or higher on the ACT Mathematics exam. LEC.

MATH 126. Calculus II. 4 Hours N.
Techniques of integration, including integration by parts. Applications of integration, including volume, arc length, work and average value. Infinite sequences and series and Taylor series. Polar coordinates, vectors and the geometry of space. Open for only 2 hours of credit to students with credit in MATH 116. Not open for credit to students with credit in MATH 116 or MATH 145. Prerequisite: MATH 116 or MATH 145, with a grade of C- or higher. LEC.

MATH 127. Calculus III. 4 Hours N.
Multivariable functions, partial derivatives and their applications, multiple integrals and their applications. Vector-valued functions, line and surface integrals, Green, Gauss and Stokes Theorems. Not open for credit to students with credit in MATH 147. Prerequisite: MATH 126 or MATH 146, with a grade of C- or higher. LEC.

MATH 145. Calculus I, Honors. 4 Hours NM GE12 / N.
Limits, continuity and derivatives of algebraic, trigonometric, exponential and logarithmic functions. Curve sketching, optimization and other applications of the derivative. Antiderivatives, Riemann sums, the definite integral, and the fundamental theorem of calculus. Open for only 1 hour
credit to students with credit in MATH 115. Not open for credit to students with credit in MATH 116 or MATH 125. Prerequisite: An ACT Math score of 34 or higher, or membership in the University Honors Program and an ACT Math score of 32 or higher. LEC.

MATH 146. Calculus II, Honors. 4 Hours N.
Techniques of integration, including integration by parts. Applications of integration, including volume, arc length, work and average value. Infinite sequences and series and Taylor series. Polar coordinates, vectors and the geometry of space. Open for only 2 hours credit to students with credit in MATH 116. Not open for credit to students with credit in MATH 126. Prerequisite: MATH 125, or MATH 145, with a grade of C- or higher; and invitation of the Department of Mathematics. LEC.

MATH 147. Calculus III, Honors. 4 Hours N.
Multivariable functions, partial derivatives and their applications, multiple integrals and their applications. Vector-valued functions, line and surface integrals, Green, Gauss and Stokes Theorems. Not open for credit to students with credit in MATH 127. Prerequisite: MATH 126 or MATH 146, with a grade of C- or higher; and invitation of the Department of Mathematics. LEC.

MATH 177. First Year Seminar: ______. 3 Hours NM GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in math. May not contribute to major requirements in math. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

MATH 197. Mathematical Workshops: ______. 1-3 Hours U.
Offered to provide opportunities for deeper understanding of freshman-sophomore mathematics through interactive learning. Topics will vary. May be repeated for additional credit. Prerequisite: Variable. LAB.

MATH 209. Functions and Modeling. 3 Hours N.
Study of the use of functions in mathematical modeling, with topics drawn from algebra, analytic geometry, statistics, trigonometry, and calculus. These topics include function properties and patterns, complex numbers, parametric and polar equations, vectors and various growth models. The course also includes inquiry methods, collaborative problem solving, the use of multiple representations and data analysis techniques, and the justification and presentation of results. Central to the course are investigative labs employing various technologies and software. The course is designed to help prepare students for secondary school mathematics teaching. (Same as PHSX 209.) Prerequisite: MATH 126 or MATH 146. LEC.

MATH 220. Applied Differential Equations. 3 Hours N.
Linear ordinary differential equations, Laplace transforms, systems of equations, and applications. Not open to those who have taken MATH 320. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher; previous or concurrent enrollment in MATH 290 or MATH 291 recommended. LEC.

MATH 221. Applied Differential Equations, Honors. 3 Hours N.
Linear Ordinary Differential Equations, Laplace Transforms, Systems of Equations, Enrichment Applications. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher, and invitation from the Department of Mathematics; previous or concurrent enrollment in MATH 290 or MATH 291 recommended. Not open to students with credit in MATH 320. LEC.

MATH 290. Elementary Linear Algebra. 2 Hours N.
Systems of linear equations, matrices, vector spaces, linear transformations, and applications. Not open to those who have taken MATH 590. Prerequisite: MATH 126 or MATH 146 with grade of C- or higher. LEC.

MATH 291. Elementary Linear Algebra, Honors. 2 Hours N.
Systems of Linear Equations, Matrices, Vector Spaces, Linear Transformations, Enrichment Applications. Prerequisite: MATH 126 or MATH 146 with a grade of C- or higher, and invitation from the Department of Mathematics. Not open to students who have taken MATH 590. LEC.

MATH 296. Special Topics: ______. 1-3 Hours N.
Designed for the study of special topics in mathematics at the freshman/sophomore level. May be repeated for additional credit; does not count toward the major or minor in mathematics. Prerequisite: Variable. LEC.

MATH 320. Elementary Differential Equations. 3 Hours N.
Linear ordinary differential equations, series solutions. Laplace transforms. Systems of equations. Not open to those who have taken MATH 220. Prerequisite: MATH 127 or MATH 147 with a grade of C- or higher, and MATH 290 or MATH 291. LEC.

MATH 365. Elementary Statistics. 3 Hours GE12 / N.
Elementary descriptive statistics of a sample of measurements; probability; the binomial, Poisson, and normal distributions, populations and sampling from populations; simple problems of statistical inference. May not be counted for junior-senior credit toward a major in mathematics. Not open to students with credit in DSCI 202, BIOL 570, MATH 465, MATH 526, or MATH 628. Prerequisite: MATH 101, MATH 104, or two years of high school algebra and a score of 26 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. LEC.

MATH 409. Topics in Geometry for Secondary and Middle School Teachers. 2 Hours N.
Study of selected topics from Euclidean, non-Euclidean, and transformation geometry chosen to give breadth to the mathematical background of secondary and middle school teachers. May not be counted for junior-senior credit towards a major in mathematics. Prerequisite: MATH 126 or MATH 146. Students enrolled in MATH 409 must concurrently enroll in MATH 410. LEC.

MATH 410. Topics in History of Mathematics for Secondary and Middle School Teachers. 1 Hour N.
Study of selected topics from mathematical history chosen to provide students with knowledge of major historical developments in mathematics including individual contributions and contributions from different cultures. These topics will include a historical development of Euclidean and non-Euclidean geometry. May not be counted for junior-senior credit towards a major in mathematics. Prerequisite: MATH 126 or MATH 146. Students enrolled in MATH 410 must concurrently enroll in MATH 409. LEC.

MATH 450. Discrete Mathematics. 3 Hours N.
Basic topics in discrete mathematics including sets, logic, relations and functions, graphs and combinatorics. Advanced topics chosen from partially ordered sets and lattices, Boolean algebras, automata, game theory, coding theory, cryptography, optimization and enumeration. Prerequisite: MATH 290. LEC.

MATH 470. Problem Solving. 1-3 Hours N.
An introduction to the general methods of solving mathematical problems. Particular techniques such as specialization, generalization, contradiction, and induction will be presented. Topics presented may vary from semester to semester. Prerequisite: MATH 127 or MATH 147 or concurrent enrollment in MATH 127 or MATH 147. LEC.

MATH 500. Intermediate Analysis. 3 Hours N.
A careful formulation of convergence and limits of sequences and functions; continuity and properties of continuous functions; differentiation; the Riemann integral; mean-value theorems and the fundamental theorem
of calculus. Not open to students with credit in MATH 765. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291. LEC.

MATH 510. Introduction to the Theory of Computing. 3 Hours N.
Finite state automata and regular expressions. Context-free grammars and pushdown automata. Turing machines. Models of computable functions and undecidable problems. The course emphasis is on the theory of computability, especially on showing limits of computation. (Same as EECS 510.) Prerequisite: EECS 210 and upper-level EECS eligibility. LEC.

MATH 526. Applied Mathematical Statistics I. 3 Hours NM / N.
A first course in statistics for students with the techniques of calculus at their disposal. The following topics are studied with illustrations and problems drawn from various fields of applications: basic notions of probability and probability distributions; classical estimation and testing procedures for one and two sample problems; chi-square test. Not open to those with credit in MATH 628. Prerequisite: MATH 127 or MATH 147 or MATH 116 (MATH 127 or MATH 147 recommended.) LEC.

MATH 530. Mathematical Models. 3 Hours N.
An introduction to mathematical models useful in a large variety of scientific and technical endeavors. Topics include: model construction, Markov chain models, models for linear optimization, graphs as models, and game theory. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291. LEC.

MATH 540. Elementary Number Theory. 3 Hours N.
Divisibility, primes and their distribution, the Euclidean algorithm, perfect numbers, Fermat's theorem, Diophantine equations, applications to cryptography. Prerequisite: MATH 127 or MATH 147. LEC.

MATH 542. Vector Analysis. 2 Hours N.
Vector algebra; vector and scalar fields; line and surface integrals; theorems of Gauss, Green, and Stokes. Curvilinear coordinates. Applications. Introduction to tensor analysis. Not open to those with credit in MATH 143. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291. LEC.

MATH 558. Introductory Modern Algebra. 3 Hours N.
Development of the number systems. Polynomials. Introduction to abstract number systems such as groups and fields. Not open to students with credit in MATH 791. Prerequisite: MATH 290 or MATH 291. LEC.

MATH 559. Modern Geometries. 3 Hours N.
Selected topics in Euclidean geometry. Synthetic and analytic projective geometry; duality, Desargues' theorem, perspectives, conics. Non-Euclidean and metric projective geometries. Prerequisite: MATH 127 or MATH 147. LEC.

MATH 581. Numerical Methods. 3 Hours N.
An introduction to numerical methods and their application to engineering and science problems. Applied treatment of elementary algorithms selected from the subject areas: finding roots of a single nonlinear equation, numerical differentiation and integration, numerical solution of ordinary differential equations. Emphasis on implementing numerical algorithms using the computer. Not open to students with credit in MATH 781 or MATH 782. Prerequisite: MATH 220 and MATH 290, or MATH 320. LEC.

MATH 590. Linear Algebra. 3 Hours N.
Vector spaces, linear transformations, and matrices. Canonical forms, Determinants. Hermitian, unitary and normal transformations. Not open to students with credit in MATH 792. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291. LEC.

MATH 591. Applied Numerical Linear Algebra. 3 Hours N.
An introduction to numerical linear algebra. Possible topics include: applied canonical forms, matrix factorizations, perturbation theory, systems of linear equations, linear least squares, singular value decomposition, algebraic eigenvalue problems, matrix functions, and the use of computational software. Not open to students with credit in MATH 780 or MATH 782. Prerequisite: MATH 290 or MATH 291. EECS 138 or equivalent recommended. LEC.

MATH 596. Special Topics: _____. 1-3 Hours N.
Arranged as needed to present appropriate material to groups of students. May be repeated for additional credit. Prerequisite: Variable. LEC.

MATH 597. Special Topics, Honors: _____. 3 Hours AE61 / N.
A study of a specialized topic in mathematics. May be repeated for credit when the topic varies. Prerequisite: A previous Honors course in Mathematics or permission of instructor. Other prerequisites depending on topic possible. LEC.

MATH 601. Algebraic Topics in Computing: _____. 3 Hours N.
Topics motivated by applications in computer science, studied from a mathematical perspective, and based on methods from linear and abstract algebra. Examples of topics include error-correcting codes, cryptography, and computer algebra. May be repeated with different topics for additional credit. Prerequisite: MATH 290 or MATH 291. LEC.

MATH 605. Applied Regression Analysis. 3 Hours N.
The matrix approach to regression. Weighted least squares, transformations, examination of residuals, model selection, and analysis of variance. Prerequisite: MATH 290 or MATH 291, and MATH 526 or MATH 628. LEC.

MATH 611. Time Series Analysis. 3 Hours N.
An introduction to the theory and computational techniques in time series analysis. Descriptive techniques: trends, seasonality, autocorrelations. Time series models: autoregressive, moving average, ARIMA models; model specification and fitting, estimation, testing, residual analysis, forecasting. Stationary processes in the frequency domain: Fourier methods and the spectral density, periodograms, smoothing, spectral window. Prerequisite: A calculus based statistics course. LEC.

MATH 624. Discrete Probability. 3 Hours N.
Theory and applications of discrete probability models. Elementary combinatorial analysis, random walks, urn models, occupancy problems, and the binomial and Poisson distributions. Prerequisite: MATH 127 or MATH 147, and MATH 290 or MATH 291. LEC.

MATH 627. Probability. 3 Hours N.
Introduction to mathematical probability; combinatorial analysis; the binomial, Poisson, and normal distributions; limit theorems; laws of large numbers. Prerequisite: MATH 127 or MATH 147 and MATH 290 or MATH 291. LEC.

MATH 628. Mathematical Theory of Statistics. 3 Hours N.
An introduction to sampling theory and statistical inference; special distributions; and other topics. Prerequisite: MATH 627. LEC.

MATH 630. Actuarial Mathematics. 3 Hours N.
This course is an introduction to some of the notions and computations in actuarial mathematics. Many computations are associated with compound interest with applications to bank accounts, mortgages, pensions, bonds, and annuities. Life contingencies are considered for annuities and insurance. Some introduction to option pricing is given, particularly the Black-Scholes formula. This course provides the background material needed for some of the initial examinations given by the societies for
actuaries, including the Financial Mathematics Exam. Prerequisite: MATH 526 or MATH 627 or a comparable course in probability. LEC.

**MATH 646. Complex Variable and Applications. 3 Hours N.**
Analytic functions of a complex variable, infinite series in the complex plane, theory of residues, conformal mapping and applications. Prerequisite: MATH 127 or MATH 147. LEC.

**MATH 647. Applied Partial Differential Equations. 3 Hours N.**
Boundary value problems; topics on partial differentiation; theory of characteristic curves; partial differential equations of mathematical physics. Prerequisite: MATH 127 or MATH 147 and MATH 220 or MATH 221 or MATH 320. LEC.

**MATH 648. Calculus of Variations and Integral Equations. 3 Hours N.**
Topics in the calculus of variations, integral equations, and applications. Prerequisite: MATH 127 or MATH 147 and MATH 220 or MATH 221 or MATH 320. LEC.

**MATH 650. Nonlinear Dynamical Systems. 3 Hours N.**
This course provides an introduction to nonlinear ordinary differential equations and dynamical systems theory with an emphasis on applications. Topics covered include the existence and uniqueness of solutions to initial value problems, as well as the qualitative behavior of solutions, including existence of equilibria, periodic and connecting orbits and their stability. Additional topics include an introduction to bifurcation theory and chaos. Prerequisite: MATH 127 or MATH 147, and MATH 220 or MATH 221 or MATH 320, and MATH 290 or MATH 291. LEC.

**MATH 660. Geometry I. 3 Hours N.**
An introduction to modern geometry. Differential geometry of curves and surfaces, the topological classification of closed surfaces, dynamical systems, and knots and their polynomials. Other topics as time permits. Prerequisite: MATH 127 or MATH 147 and MATH 290 or MATH 291. LEC.

**MATH 661. Geometry II. 3 Hours N.**
Continuation of Math 660. Prerequisite: MATH 660 or permission of instructor. LEC.

**MATH 696. Special Topics: ______. 1-3 Hours N.**
Arranged as needed to present appropriate material to groups of students. May be repeated for additional credit. Prerequisite: Variable. LEC.

**MATH 699. Directed Reading. 1-3 Hours AE61 / N.**
Directed reading on a topic chosen by the student with the advice of an instructor. May be repeated for additional credit. Consent of the department required for enrollment. IND.

**MATH 701. Topics in Mathematics for Teachers: ______. 1-6 Hours.**
Material, including both mathematical content and teaching methodology, related to classroom use at various levels, elementary through secondary. Topics may vary. May not be counted for junior-senior credit towards a major in mathematics, nor for graduate credit towards a graduate degree in mathematics. Prerequisite: Permission of instructor. RSH.

**MATH 715. Sampling Techniques. 3 Hours.**
Statistical methodology of survey sampling. Data analysis and estimation methods for various experimental designs; fixed or random sample sizes, pre-and/or post-stratified samples, and multistage sampling. Estimates of totals, means, ratios and proportions with methods of estimating variances of such estimates. Prerequisite: A post-calculus probability or statistics course. LEC.

**MATH 717. Nonparametric Statistics. 3 Hours.**
Methods requiring few assumptions about the populations sampled. Topics include quantile tests, tolerance limits, the sign test, contingency tables, rank-sum tests, and rank correlation. Prerequisite: MATH 628 or permission of instructor. LEC.

**MATH 724. Combinatorial Mathematics. 3 Hours.**
Counting problems, with an introduction to Polya's theory; Mobius functions; transversal theory; Ramsey's theorem; Sperner's theorem and related results. Prerequisite: MATH 290 and a math course numbered 450 or higher. LEC.

**MATH 725. Graph Theory. 3 Hours.**
Graphs; trees; connectivity; Menger's theorem; eulerian and hamiltonian graphs; planarity; coloring of graphs; factorization of graphs; matching theory; alternating chain methods; introduction to matroids with applications to graph theory. Prerequisite: MATH 290 and a math course numbered 450 or higher. LEC.

**MATH 727. Probability Theory. 3 Hours.**
A mathematical introduction to premeasure-theoretic probability. Topics include probability spaces, conditional probabilities and independent events, random variables and probability distributions, special discrete and continuous distributions with emphasis on parametric families used in applications, the distribution problem for functions of random variables, sequences of independent random variables, laws of large numbers, and the central limit theorem. Prerequisite: MATH 290, or equivalent. LEC.

**MATH 728. Statistical Theory. 3 Hours N.**
Theory of point estimation and hypothesis testing with applications. Confidence region methodologies and relations to estimation and testing. Prerequisite: MATH 727 or equivalent. LEC.

**MATH 735. Optimal Control Theory. 3 Hours.**
An examination of the mathematical methods of deterministic control theory is given by considering some specific examples and the general theory. The methods include dynamic programming, the calculus of variations, and Pontryagin's maximum principle. Various problems of linear control systems, e.g., the linear regulator problem, are solved. Prerequisite: MATH 320 or equivalent. LEC.

**MATH 740. Number Theory. 3 Hours.**
Divisibility, the theory of congruences, primitive roots and indices, the quadratic reciprocity law, arithmetical functions and miscellaneous additional topics. Prerequisite: MATH 290, or equivalent. LEC.

**MATH 750. Stochastic Adaptive Control. 3 Hours.**
Stochastic adaptive control methods. Stochastic processes such as Markov chains and Brownian motion, stochastic integral, differential rule, stochastic differential equations, martingales and estimation techniques. Identification and control of discrete and continuous time linear stochastic systems. Specific applications and simulation results of stochastic adaptive control theory. Prerequisite: MATH 627 and some knowledge of control. LEC.

**MATH 765. Mathematical Analysis I. 3 Hours.**
MATH 765 and MATH 766 are theoretical courses on the fundamental concepts of analysis and the methods of proof. These two courses include the concept of a real number; limits, continuity, and uniform convergence; derivatives and integrals of functions of one and of several real variables. Prerequisite: MATH 290, or equivalent. LEC.

**MATH 766. Mathematical Analysis II. 3 Hours.**
A continuation of MATH 765. Prerequisite: MATH 765. LEC.

**MATH 780. Numerical Analysis of Linear Systems. 3 Hours.**
Computational aspects of linear algebra, linear equations and matrices, direct and indirect methods, eigenvalues and eigenvectors of matrices, error analysis. Prerequisite: MATH 590 and MATH 781. LEC.
MATH 781. Numerical Analysis I. 3 Hours.
Finite and divided differences. Interpolation, numerical differentiation, and integration. Gaussian quadrature. Numerical integration of ordinary differential equations. Curve fitting. (Same as EECS 781.) Prerequisite: MATH 320 and knowledge of a programming language. LEC.

MATH 782. Numerical Analysis II. 3 Hours.
Direct and interactive methods for solving systems of linear equations. Numerical solution of partial differential equations. Numerical determination of eigenvectors and eigenvalues. Solution of nonlinear equations. (Same as EECS 782.) Prerequisite: EECS 781 or MATH 781. LEC.

MATH 783. Applied Numerical Methods for Partial Differential Equations. 3 Hours.
Finite difference methods applied to particular initial-value problems (both parabolic and hyperbolic), to illustrate the concepts of convergence and stability and to provide a background for treating more complicated problems arising in engineering and physics. Finite difference methods for elliptic boundary-value problems, with a discussion of convergence and methods for solving the resulting algebraic system. Variational methods for elliptic problems. Prerequisite: MATH 647 or equivalent. LEC.

MATH 790. Linear Algebra II. 3 Hours.
A theoretical course on the fundamental concepts and theorems of linear algebra. Topics covered are: vector space, basis, dimension, subspace, norm, inner product, Banach space, Hilbert space, orthonormal basis, positive definite matrix, minimal polynomial, diagonalization and other canonical forms, Cayley-Hamilton, spectral radius, dual space, quotient space. Prerequisite: MATH 590. LEC.

MATH 791. Modern Algebra. 3 Hours.
This course includes the following topics: multiplicative properties of the integers and introductions to group theory, ring theory and field theory. Prerequisite: MATH 290, or equivalent. LEC.

MATH 796. Special Topics: ___. 1-3 Hours.
Arranged as needed to present appropriate material for groups of students. May be repeated for credit. Prerequisite: Variable. LEC.

MATH 799. Directed Readings. 1-3 Hours.
Directed readings on a topic chosen by the student with the advice of an instructor. May be repeated for additional credit. Consent of the department required for enrollment. RSH.

MATH 800. Complex Analysis I. 3 Hours.
Cauchy's theorem and contour integration; the argument principle; maximum modulus principle; Schwarz symmetry principle; analytic continuation; monodromy theorem; applications to the gamma function and Riemann's zeta function; entire and meromorphic functions; conformal mapping; Riemann mapping theorem; univalent functions. Prerequisite: MATH 766 or concurrently with MATH 766. LEC.

MATH 801. Complex Analysis II. 3 Hours.
Continuation of MATH 800. Prerequisite: MATH 800. LEC.

MATH 802. Set Theory. 3 Hours.
Axiomatic set theory; transfinite induction; regularity and choice; ordinal and cardinal arithmetic; miscellaneous additional topics (e.g., extra axioms such as GCH or MA; infinite combinatorics; large cardinals). Prerequisite: MATH 765 or MATH 791, or concurrent enrollment in MATH 765 or MATH 791, or equivalent evidence of mathematical maturity. LEC.

MATH 810. Real Analysis and Measure Theory I. 3 Hours.

MATH 811. Real Analysis and Measure Theory II. 3 Hours.
Continuation of MATH 810. Prerequisite: MATH 810. LEC.

MATH 820. Introduction to Topology. 3 Hours.
General topology. Set theory; topological spaces; connected sets; continuous functions; generalized convergence; product and quotient spaces; embedding in cubes; metric spaces and metrization; compact spaces; function spaces. Prerequisite: MATH 765. LEC.

MATH 821. Algebraic Topology I. 3 Hours.
The fundamental group and covering spaces (including classification); compact surfaces; homology theory, computations (including homotopy invariance) and applications (including Brouwer fixed point theorem); introduction to cohomology theory. Prerequisite: MATH 790 and MATH 820, or permission of instructor. LEC.

MATH 822. Algebraic Topology II. 3 Hours.
Review of simplicial homology; Lefschetz fixed point theorem and degree theory; singular, cellular, and axiomatic homology; Jordan Brouwer separation theorems; universal coefficient theorems, products in cohomology, homotopy groups, and the Hurewicz Theorem. Prerequisite: MATH 821. LEC.

MATH 824. Algebraic Combinatorics. 3 Hours.
A study of some structures, theorems, and techniques in algebra whose use has become common in many branches of mathematics. Prerequisite: MATH 790 and MATH 791. LEC.

MATH 830. Abstract Algebra. 3 Hours.
Continuation of MATH 830. Prerequisite: MATH 830. LEC.

MATH 840. Differentiable Manifolds. 3 Hours.
Multilinear algebra of finite dimensional vector spaces over fields; differentiable structures and tangent and tensor bundles; differentiable mappings and differentials; exterior differential forms; curves and surfaces as differentiable manifolds; affine connections and covariant differentiation; Riemannian manifolds. Prerequisite: MATH 765 and MATH 790. LEC.

MATH 850. Differential Equations and Dynamical Systems. 3 Hours N.
Discrete and differentiable dynamical systems with an emphasis on the qualitative theory. Topics to be covered include review of linear systems, existence and uniqueness theorems, flows and discrete dynamical systems, linearization (Hartman-Grobman theorem), stable and unstable manifolds, Poincare sections, normal forms, Hamiltonian systems, and an introduction to bifurcation theory and chaos. Prerequisite: MATH 320 and MATH 766, or permission of instructor. LEC.

MATH 851. Topics in Dynamical Systems. 3 Hours.
Topics to be covered include complex dynamical systems, perturbation theory, nonlinear analysis of time series, chaotic dynamical systems, and numerical methods as dynamical systems. This course may be repeated for credit. Prerequisite: MATH 850 or permission of instructor. LEC.

MATH 865. Stochastic Processes I. 3 Hours.
Markov chains; Markov processes; diffusion processes; stationary processes. Emphasis is placed on applications: random walks; branching theory; Brownian motion; Poisson process; birth and death processes. Prerequisite: MATH 627 and MATH 765. LEC.
MATH 866. Stochastic Processes II. 3 Hours.
This is a second course in stochastic processes, focused on stochastic calculus with respect to a large class of semi-martingales and its applications to topics selected from classical analysis (linear PDE), finance, engineering, and statistics. The course will start with basic properties of martingales and random walks and then develop into the core program on Itô’s stochastic calculus and stochastic differential equations. These techniques provide useful and important tools and models in many pure and applied areas. Prerequisite: MATH 727 and MATH 865. LEC.

MATH 870. The Analysis of Variance. 3 Hours.
The general linear hypothesis with fixed effects; the Gauss-Markov theorem, confidence ellipsoids, and tests under normal theory; multiple comparisons and the effect of departures from the underlying assumptions; analysis of variance for various experimental designs and analysis of covariance. Prerequisite: MATH 628 or MATH 728, and either MATH 590 or MATH 790. LEC.

MATH 872. Multivariate Statistical Analysis. 3 Hours.
The multivariate normal distribution; tests of hypotheses on means and covariance matrices; estimation; correlation; multivariate analysis of variance; principal components; canonical correlation. Prerequisite: MATH 628 or MATH 728, and either MATH 590 or MATH 790. LEC.

MATH 874. Statistical Decision Theory. 3 Hours.
Game theory, admissible decision functions and complete class theorems; Bayes and minimax solutions; sufficiency; invariance; multiple decision problems; sequential decision problems. Prerequisite: MATH 628 and MATH 766. LEC.

MATH 881. Advanced Numerical Linear Algebra. 3 Hours N.
Advanced topics in numerical linear algebra including pseudo-spectra, rounding error analysis and perturbation theory, numerical methods for problems with special structure, and numerical methods for large scale problems. Prerequisite: Math 781, 782, 790, or permission of the instructor. LEC.

MATH 882. Advanced Numerical Differential Equations. 3 Hours N.
Advanced course in the numerical solution of ordinary and partial differential equations including modern numerical methods and the associated analysis. Prerequisite: MATH 781, 782, 783, or permission of the instructor. LEC.

MATH 890. Fourier Analysis. 3 Hours.
Introduction to modern techniques in Fourier Analysis in the Euclidean setting with emphasis in the study of functions spaces and operators acting on them. Topics may vary from year to year and include, among others, distribution theory, Sobolev spaces, estimates for fractional integrals and fractional derivatives, wavelets, and some elements of Calderón-Zygmund theory. Applications in other areas of mathematics, in particular partial differential equations and signal analysis, will be presented based on the instructor’s and the students’ interests. Prerequisite: Math 810 and Math 800, or instructor's permission. LEC.

MATH 896. Master’s Research Component. 1-6 Hours.
RSH.

MATH 899. Master’s Thesis. 1-10 Hours.
THE.

MATH 905. Several Complex Variables. 3 Hours.
Holomorphic functions in several complex variables, Cauchy's integral for poly-discs, multivariable Taylor series, maximum modulus theorem. Further topics may include: removable singularities, extension theorems, Cauchy-Riemann operator, domains of holomorphy, special domains and algebraic properties of rings of analytic functions. Prerequisite: MATH 800. LEC.

MATH 910. Algebraic Curves. 3 Hours.
Algebraic sets, varieties, plane curves, morphisms and rational maps, resolution of singularities, Reimann-Roch theorem. Prerequisite: MATH 790 and MATH 791. LEC.

MATH 915. Homological Algebra. 3 Hours.
Injective and projective resolutions, homological dimension, chain complexes and derived functors (including Tor and Ext). Prerequisite: MATH 830 and MATH 831, or consent of instructor. LEC.

MATH 920. Lie Groups and Lie Algebras. 3 Hours.
General properties of Lie groups, closed subgroups, one-parameter subgroups, homogeneous spaces, Lie bracket, Lie algebras, exponential map, structure of semi-simple Lie algebras, invariant forms, Maurer-Cartan equation, covering groups, spinor groups. Prerequisite: MATH 766 and MATH 790 and MATH 791. LEC.

MATH 940. Advanced Probability. 3 Hours.
Probability measures, random variables, distribution functions, characteristic functions, types of convergence, central limit theorem. Laws of large numbers and other limit theorems. Conditional probability, Markov processes, and other topics in the theory of stochastic processes. Prerequisite: MATH 811. LEC.

MATH 950. Partial Differential Equations. 3 Hours.
Introduction; equations of mathematical physics; classification of linear equations and systems. Existence and uniqueness problems for elliptic, parabolic, and hyperbolic equations. Eigenvalue problems for elliptic operators; numerical methods. Prerequisite: MATH 766. LEC.

MATH 951. Advanced Partial Differential Equations II. 3 Hours.
The course uses functional analytic techniques to further develop various aspects of the modern framework of linear and nonlinear partial differential equations. Sobolev spaces, distributions and operator theory are used in the treatment of linear second-order elliptic, parabolic, and hyperbolic equations. In particular we discuss the kind of potential, diffusion and wave equations that arise in inhomogeneous media, with an emphasis on the solvability of equations with different initial/boundary conditions. Then, we will survey the theory of semigroup of operators, which is one of the main tools in the study of the long-time behavior of solutions to nonlinear PDE. The theories and applications encountered in this course will create a strong foundation for studying nonlinear equations and nonlinear science in general. Prerequisite: MATH 950 or permission of the instructor. LEC.

MATH 960. Functional Analysis. 3 Hours.
Topological vector spaces, Banach spaces, basic principles of functional analysis. Weak and weak-topologies, operators and adjoints. Hilbert spaces, elements of spectral theory. Locally convex spaces. Duality and related topics. Applications. Prerequisite: MATH 810 and MATH 820 or concurrent with MATH 820. LEC.

MATH 961. Functional Analysis. 3 Hours.
Continuation of MATH 960. LEC.

MATH 963. C*-Algebras. 3 Hours.
The basics of C*-algebras, approximately finite dimensional C*-algebras, irrational rotation algebras, C*-algebras of isometries, group C*-algebras, crossed products C*-algebras, extensions of C*-algebras and the BDF theory. Prerequisite: MATH 811 or MATH 960, or consent of instructor. LEC.
Bachelor of Arts in Mathematics

Why study mathematics?

Because mathematics is a framework upon which humanity builds an understanding of the world.

The degree of Bachelor of Arts in Mathematics offers in depth training in mathematics. A B.A. degree in mathematics at KU allows you to focus on the mathematics that is most relevant and interesting to you. A total of 120 hours is required to graduate with a B.A. in the College of Liberal Arts and Sciences. The requirements for all students earning a B.A. in the College include the KU Core Curriculum (http://kucore.ku.edu), a laboratory or field experience, and proficiency in a language other than English.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Mathematics Programs

Separate programs lead to the B.A. in mathematics and the B.S. in mathematics. The B.A. has fewer mathematics course requirements and more general education requirements. The B.S. requires more mathematics courses, an applied mathematics concentration, and fewer general education courses. Students wishing to attend graduate school in mathematics or to pursue a career that makes substantial use of mathematics (as an actuary, for example) should get a B.S. in mathematics. Many students majoring in mathematics are interested in a liberal arts degree; such students may want to consider the B.A. in mathematics. Students who wish to teach mathematics in high school should pursue a B.A. or B.S. in mathematics while participating in the UKanTeach program (http://ukanteach.ku.edu/).

Math Breadth

Majors must complete a minimum of 5 mathematics courses numbered 300 and above (each at least 3 credits), excluding MATH 365, MATH 409 and MATH 410, but including the upper division courses used to satisfy the core and sequence requirements. The goals are to gain exposure to a variety of concepts and methods in mathematics, develop abstract and critical thinking, and acquire knowledge to prepare for a career using mathematics, further study of mathematics, or interdisciplinary work involving mathematics.

## Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 29 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Mathematics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 prior to freshman year, fall semester.

### Freshman

<table>
<thead>
<tr>
<th>Fall</th>
<th>Hours</th>
<th>Spring</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101 (Goal 2.1 (2 crs req), BA Writing I)</td>
<td>3</td>
<td>ENGL 102 (Goal 2.1 (2 crs req), BA Writing II)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 125 or 145 (Goal 1.2 Quantitative Reasoning, BA Quant Req)</td>
<td>4</td>
<td>MATH 126 or 146 (Major Requirement)</td>
<td>4</td>
</tr>
<tr>
<td>1st Semester Language (BA Second Language)</td>
<td>5</td>
<td>2nd Semester Language (BA Second Language)</td>
<td>5</td>
</tr>
<tr>
<td>First Year Seminar (Goal 1.1 Critical Thinking)</td>
<td>3</td>
<td>Goal 2.2 Communication</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>15</strong></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Sophomore

<table>
<thead>
<tr>
<th>Fall</th>
<th>Hours</th>
<th>Spring</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 127 or 147 (Major Requirement)</td>
<td>4</td>
<td>MATH 590 (Major Requirement)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 290 or 291 (Major Requirement)</td>
<td>2</td>
<td>4th Semester Language, or 1st semester of Another Language (BA Second Language)</td>
<td>3-5</td>
</tr>
<tr>
<td>3rd Semester Language (BA Second Language)</td>
<td>3</td>
<td>Goal 3 Social Science</td>
<td>3</td>
</tr>
<tr>
<td>Goal 3 Natural Science</td>
<td>3</td>
<td>Goal 4.2 Global Awareness</td>
<td>3</td>
</tr>
</tbody>
</table>
The same course cannot be used to fulfill more than one KU Core Goal. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

For undergraduate departmental honors, the student must satisfy the College requirements for honors, attain a grade-point average of 3.5 in all mathematics courses numbered 500 and above. The student must also complete two out of the following four sequences: MATH 727 and MATH 728; MATH 765 and MATH 766; MATH 781 and MATH 782; and MATH 790 and MATH 791, with a grade no lower than B- in each of these courses. The student must make a satisfactory oral presentation to the department, preferably on a topic related to his or her mathematics coursework. Preparation should include enrollment in MATH 699 Directed Reading (for 1 or more credit hours) with a faculty mentor.

### Bachelor of Science in Mathematics

#### Why study mathematics?

Because mathematics is a framework upon which humanity builds an understanding of the world.

The degree of Bachelor of Science in Mathematics offers more extensive training in mathematics and its applications than is possible in the B.A. curriculum. The requirements for the B.S. in Mathematics allow a great deal of flexibility in choice of courses and concentrations. Students should plan their programs carefully to meet individual interests and goals, and carefully check the prerequisites for all courses in their programs.

Many students have strong interests in particular areas of mathematics. The Department has created three informal tracks within the B.S. program: a statistics track, an applied mathematics track, and a track in pure mathematics. These tracks are advisory only. Students without strong interests in one of these areas are encouraged to put together a broad program within the B.S. Degree.

#### Undergraduate Admission

##### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credit.transfer.ku.edu/) website.

##### Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements.

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Majors must complete a 2-course sequence (http://catalog.ku.edu/liberal-arts-sciences/math/ba/#requirements) for application deadlines and specific admission requirements.

3. Completion of four upper division mathematics courses that form two sequences in mathematics and statistics can fulfill KU Core Goal 6 (http://kucore.ku.edu/experiences/).

4. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to completed 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
Mathematics Programs

Separate programs lead to the B.A. in mathematics and the B.S. in mathematics. The B.A. has fewer mathematics course requirements and more general education requirements. The B.S. requires more mathematics courses, an applied mathematics concentration, and fewer general education courses. Students wishing to attend graduate school in mathematics or to pursue a career that makes substantial use of mathematics (as an actuary, for example) should get a B.S. in mathematics. Many students majoring in mathematics are interested in a liberal arts degree; such students may want to consider the B.A. in mathematics. Students who wish to teach mathematics in high school should pursue a B.A. or B.S. in mathematics while participating in the UKanTeach program (http://ukanteach.ku.edu/).

Notes: A student using at least 2 statistics courses for the applied concentration must complete MATH 627 and MATH 628 (or MATH 727 and MATH 728) as a List A sequence. (MATH 627, MATH 628, MATH 727, and MATH 728 do not count for the applied concentration.) A student using at least 2 curriculum & instruction courses for the applied concentration must complete PHSX 211 as one of the natural science courses and must complete at least 1 of the geometry courses MATH 559, MATH 660, or MATH 661.

Courses used to satisfy the core requirements can also be used to complete List A and List B sequences. However, no course can be used for 2 List A or B sequences, and courses used for the Applied Concentration requirement cannot also be counted toward the 24 credit hours of advanced mathematics courses for the B.S. degree.

Some courses satisfying the sequence requirements are taught infrequently. More advanced courses can be substituted for lower level courses in many cases. Consult the mathematics department for expected course offerings and substitutions.

Below is a sample 4-year plan for students pursuing the BS in Mathematics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 104 prior to the freshman year, fall semester.

### Freshman

**Fall**
- Goal 1.1 Critical Thinking 3 ENGL 102 (Goal 2.1 Written Communication, 2 Crs Required, BS Writing 2) 3
- Goal 3 Natural Science 3 Goal 2.2 Oral Communication 3
- Lab Science (to complement Goal 3N) (BS Requirement) 1-2 EECS 138, 168, or 169 (BS 3-4
- ENGL 101 (Goal 2.1 Written Communication, 2 Crs Required, BS Writing 1) 3 MATH 126 (Major Requirement) 4
- MATH 125 (Goal 1.2 Quantitative Literacy, Major Requirement) 4 Elective (Total Hours) 3

**Hours** 14-15

### Sophomore

**Fall**
- Goal 3 Humanities 3 Goal 3 Social Science 3
- Additional Natural Science (BS Requirement) 3 MATH 320, 220, or 221 (Major Requirement) 3
- MATH 127 (Major Requirement) 4 Goal 4.1 US Diversity 3
- MATH 290 (Major Requirement) 2 MATH 590 (Major Requirement) 3
- Pre-requisite for Applied Concentration or Elective (Pre-requisite for Major Requirement, Total Hours) 3 Pre-requisite for Applied Concentration or Elective (Pre-requisite for Major Requirement, Total Hours) 4

**Hours** 15

### Junior

**Fall**
- Goal 4.2 Global Awareness 3 Goal 5 Social Responsibility & Ethics 3
- MATH 558 (Major Requirement) 3 MATH 500 (Major Requirement) 3
- MATH Sequence Course 3 MATH Sequence Course 3
- 500+ (Major Requirement) 3 500+ (Major Requirement) 1.5 3

**Hours** 15
course work. Preparation should include enrollment in MATH 699 Directed Reading (for 1 or more credit hours) with a faculty mentor.

Students interested in graduating with departmental honors are strongly urged to inform the Associate Chair or the Chair of the departmental Honors Committee of their intention as soon as possible. Ideally, this should happen by the end of the sophomore year to ensure sufficient time to complete all the requirements.

**Minor in Mathematics**

**Why study mathematics?**

Because mathematics is a framework upon which humanity builds an understanding of the world.

Students getting a bachelor's degree (B.S., B.A., or B.G.S.) in the College of Liberal Arts and Sciences, with a major in another field, may earn a minor in mathematics. Students getting degrees in most of the other Schools of the university (including the School of Business and the School of Engineering) may also earn the mathematics minor. The requirements are the same for all students.

The minimum course requirements for the minor are completion of 18 credit hours of mathematics department courses, including MATH 127 or MATH 147, and at least 12 credit hours of courses numbered 300 and above, excluding MATH 365. The grade point average for all mathematics courses must be at least 2.0. MATH 290, while not required for the minor, is a prerequisite to most upper division mathematics courses.

A math minor allows you to focus on the mathematics that is most relevant and interesting to you. For more information or guidance on courses, make an appointment with a math department advisor.

**Requirements for the Minor**

The student must earn a grade point average of 2.0 in all mathematics courses attempted.

- **Lower-Division Preparation:** Calculus including MATH 127 or 147.
- **Upper-Division Courses:** 12 credit hours of courses numbered 300 and above (excluding MATH 365).

**Note:** Most upper-division mathematics courses have MATH 290 as a prerequisite.

**Minimum Minor Requirements 18 hours**

**Undergraduate Certificate in Actuarial Science**

Actuarial Science is the study of risk. Actuaries are employed by insurance companies, financial institutions and other businesses to plan for financial stability and manage risk. This 12 credit undergraduate certificate will prepare students majoring in different programs to enter the actuarial field. The program requires four upper division courses from an approved list. Included are courses that prepare students for two actuarial exams and other courses that satisfy the Validation by Educational Experience requirements of the Society of Actuaries.

Students who are interested in pursuing this Undergraduate Certificate should email collegeadvising@ku.edu (collegeadvising@ku.edu)?
Master of Arts in Mathematics

Why study mathematics?

Because mathematics is a framework upon which humanity builds an understanding of the world.

Mission of the Graduate Program:

The mission of the Graduate Program of the Department of Mathematics is to prepare students for leadership roles in meeting the mathematical needs of our society and to produce professional mathematicians for positions in universities, colleges, industry, governmental agencies, and research centers.

Master of Arts in Mathematics:

The Mathematics Department offers the degree of Master of Arts (M.A.) in Mathematics. The M.A. entails study of advanced mathematics, typically culminating in a substantial thesis or final project demonstrating expertise in a particular area of mathematics. It is intended for students who plan to pursue a Ph.D. subsequently, as well as those who intend to work outside academia. A broad range of specialties is possible; research interests of department faculty include algebra, analysis, combinatorics, control theory, dynamical systems, geometry, numerical analysis, partial differential equations, probability, and statistics. The program offers three options for the M.A. degree, as detailed in the section Degree Requirements. College-wide requirements for graduate students may be found in the Graduate School Catalog (http://catalog.ku.edu/liberal-arts-sciences/graduatetext).

Admission to the M.A. in Mathematics

The minimum prerequisites for admission are:

- an undergraduate degree from an accredited institution with a program of study in mathematics;
- a record of achievement that shows strong promise of success in graduate school, including a 3.0 cumulative grade-point average in undergraduate studies and a 3.0 grade-point average in mathematics;
- course work in abstract algebra, linear algebra, and advanced calculus or introduction to analysis (comparable to KU courses MATH 500, MATH 558, and MATH 590).

It is beneficial to have preparation in probability/statistics (comparable to MATH 627/MATH 628) and/or numerical analysis (comparable to MATH 581). Although not required, it is also helpful to have taken introductory courses in complex analysis (comparable to MATH 646), partial differential equations (comparable to MATH 647), and/or topology.

The department requires the general Graduate Record Examination (GRE) for all incoming students. This requirement has been suspended for Spring 2021 and Fall 2021 admission. International students whose native language is not English also must fulfill English language requirements specified by university policies.

Applicants must submit a graduate application online (https://gradapply.ku.edu/apply/), including the following required materials:

- Transcript from each college or university the applicant has attended (an official transcript must be sent upon acceptance and completion of degree).
- Applicant's résumé/curriculum vitae.
- A list of the textbooks used in mathematics courses beyond calculus.
- A statement of purpose indicating the applicant's mathematical preferences and interests.
- 3 letters of reference.
- International applicants must fulfill the University's requirements for English proficiency (https://gradapply.ku.edu/english-requirements/).

Incomplete applications will not be considered. The minimum admission requirements do not guarantee admission. The Department of Mathematics evaluates candidates and makes recommendations to the Office of Graduate Studies regarding admission. The number of students admitted to the program changes from year to year, and admissions are competitive based on all application materials. The Department ordinarily does not award GTA positions to students accepted to the M.A. program. Further information about applications and admissions is available from the Department of Mathematics (https://mathematics.ku.edu/applications-and-admissions/).

1460 Jayhawk Blvd.
Lawrence, KS 66045
kate.pleskac@ku.edu

The M.A. program is flexible and accommodates the different interests and backgrounds of students. Some of the courses required for the M.A. are common to the Ph.D. tracks, and we encourage students interested in an M.A. to take advanced Ph.D. classes among their selective course work. Many Ph.D. students earn an M.A. on the way to the doctoral degree. They have the option to do so after completing the qualifying examinations. A candidate for the M.A. must fulfill general requirements. At least 30 hours of appropriate graduate credit must be earned with at least a B average, and a research component must be included in the candidate’s program. Usually the research component is fulfilled by writing a thesis or by completing appropriate seminars, independent research, or advanced graduate courses. In addition, a candidate must complete one of these options:

**Option 1**
Pass the departmental Ph.D. written qualifying examinations and complete 30 hours of courses at the 700 level or higher, of which 12 hours are at the 800 level or higher.

**Option 2**
Complete the following courses and pass an oral examination:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 800</td>
<td>Complex Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 810</td>
<td>Real Analysis and Measure Theory I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 820</td>
<td>Introduction to Topology</td>
<td>3</td>
</tr>
<tr>
<td>MATH 830</td>
<td>Abstract Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 831</td>
<td>Abstract Algebra</td>
<td>3</td>
</tr>
</tbody>
</table>

Select and at least 9 of the remaining 15 hours from courses numbered 700 or above

The additional 9 hours may include the credit (a minimum of 2 hours and a maximum of 6 hours) used to fulfill a research component (e.g., enrollment in MATH 896, MATH 899, MATH 990, MATH 993, or advanced courses). An M.A. candidate must demonstrate an ability to communicate mathematics both orally and in written form. In particular, an M.A. candidate not selecting the thesis option (MATH 899) is expected to write a technical report as part of his or her research component. Also, a candidate must give a short (30 to 60 minutes) presentation of her or his research in the first part of the oral examination. A proposed program of study must be submitted to the chair of the graduate studies committee at the earliest feasible time, preferably during the second semester of enrollment. The degree is awarded only on the basis of an approved program, which can, however, be revised.

**Doctor of Philosophy in Mathematics**

Why study mathematics?
Because mathematics is a framework upon which humanity builds an understanding of the world.

Mission of the Graduate Program:
The mission of the Graduate Program of the Department of Mathematics is to prepare students for leadership roles in meeting the mathematical needs of our society and to produce professional mathematicians for positions in universities, colleges, industry, governmental agencies, and research centers.

**Doctor of Philosophy in Mathematics:**
The Mathematics Department offers the degree of Doctor of Philosophy (Ph.D.) in Mathematics. The Ph.D. program provides broad and deep expertise in mathematics, culminating in a dissertation that includes significant original work. It is intended for students with a strong mathematical background who plan a career in research in academia or industry. A broad range of specialties is possible; research interests of department faculty include algebra, analysis, combinatorics, control theory, dynamical systems, geometry, numerical analysis, partial differential equations, probability, and statistics. There are two tracks: Pure Mathematics and Applied Mathematics. The requirements for each track are listed in the section Degree Requirements. College-wide requirements for graduate students may be found in the Graduate School Catalog (http://catalog.ku.edu/liberal-arts-sciences/#graduatetext).

**Admission to Graduate Studies**
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Ph.D. in Mathematics**
The minimum prerequisites for admission are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 727</td>
<td>Probability Theory</td>
<td>3</td>
</tr>
<tr>
<td>MATH 765</td>
<td>Mathematical Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 781</td>
<td>Numerical Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 790</td>
<td>Linear Algebra II</td>
<td>3</td>
</tr>
<tr>
<td>MATH 791</td>
<td>Modern Algebra</td>
<td>3</td>
</tr>
</tbody>
</table>

Complete a research component and pass an oral examination. At least 24 of the 36 hours must be in courses numbered 700 or above. Course equivalents to MATH 727, MATH 765, MATH 781, MATH 790, or MATH 791 may be substituted if approved by the graduate studies committee. An M.A. candidate may, with prior approval of the chair of the graduate studies committee, substitute up to 9 hours of courses taught in other departments. Also, the 36 hours may include the credit (a minimum of 2 hours and a maximum of 6 hours) used to fulfill a research component (e.g., enrollment in MATH 896, MATH 899, MATH 990, MATH 993, or advanced courses). An M.A. candidate must demonstrate an ability to communicate mathematics both orally and in written form. In particular, an M.A. candidate not selecting the thesis option (MATH 899) is expected to write a technical report as part of his or her research component. Also, a candidate must give a short (30 to 60 minutes) presentation of her or his research in the first part of the oral examination. A proposed program of study must be submitted to the chair of the graduate studies committee at the earliest feasible time, preferably during the second semester of enrollment. The degree is awarded only on the basis of an approved program, which can, however, be revised.
• an undergraduate degree from an accredited institution with a program of study in mathematics;
• a record of achievement that shows strong promise of success in graduate school, including a 3.0 cumulative grade-point average in undergraduate studies and a 3.0 grade-point average in mathematics;
• course work in abstract algebra, linear algebra, and advanced calculus or introduction to analysis (comparable to KU courses MATH 500, MATH 558, and MATH 590).

It is beneficial to have preparation in probability/statistics (comparable to MATH 627/MATH 628) and/or numerical analysis (comparable to MATH 581). Although not required, it is also helpful to have taken introductory courses in complex analysis (comparable to MATH 646), partial differential equations (comparable to MATH 647), and/or topology.

The department requires the general Graduate Record Examination (GRE) for all incoming students. This requirement has been suspended for Spring 2021 and Fall 2021 admission. International students whose native language is not English also must fulfill English language requirements specified by university policies.

Applicants must submit a graduate application online (https://gradapply.ku.edu/apply/), including the following required materials:

• Transcript from each college or university the applicant has attended (an official transcript must be sent upon acceptance and completion of degree).
• Applicant’s résumé/curriculum vitae.
• A list of the textbooks used in mathematics courses beyond calculus.
• A statement of purpose indicating the applicant’s mathematical preferences and interests.
• 3 letters of reference.
• International applicants must fulfill the University’s requirements for English proficiency (https://gradapply.ku.edu/english-requirements/).

Incomplete applications will not be considered. The minimum admission requirements do not guarantee admission. The Department of Mathematics evaluates candidates and makes recommendations to the Office of Graduate Studies regarding admission. The number of students admitted to the program changes from year to year, and admissions are competitive based on all application materials.

There are no additional application forms for financial support. Students are considered for support based on merit. Most Ph.D. students accepted by the program receive an offer of financial support in the form of a Graduate Teaching Assistantship. The number of GTAs available is limited. Further information about applications and admissions is available from the Department of Mathematics (https://mathematics.ku.edu/applications-and-admissions/).

Ph.D. Degree Requirements

In addition to general requirements, the department requires the student to meet the following requirements before being admitted to the comprehensive examination.

1. Pass 2 written qualifying examinations, 1 exam in either algebra or analysis and a second exam in either numerical analysis or probability/statistics and complete the required qualifying exam coursework. The qualifying examinations must be completed by the beginning of the student’s fifth semester. The qual course requirement must be met before taking the preliminary exam.
2. Pass 1 preliminary examination in an area close to the focus of the eventual doctoral dissertation. The preliminary examination must be completed by the beginning of the student’s eighth semester.
3. Satisfy the research skills and responsible scholarship requirement by demonstrating a working knowledge of a programming language such as C++ or FORTRAN and by completing the departmental training in responsible scholarship. To meet the research skills requirement students must complete an introductory programming language course approved by the graduate committee. Alternatively, students may complete an approved computing project demonstrating competence in either a programming language or the use of specialized software that supports the student’s research.
4. Pass a set of required courses, differing in different tracks.

Note: Contact your department or program for more information about the qualifying exam coursework requirement, the research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the Graduate Studies section of the online catalog and in the KU Policy Library.

Pure Mathematics

This track requires:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 800</td>
<td>Complex Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 810</td>
<td>Real Analysis and Measure Theory I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 830</td>
<td>Abstract Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 820</td>
<td>Introduction to Topology</td>
<td>3</td>
</tr>
<tr>
<td>MATH 821</td>
<td>Algebraic Topology</td>
<td></td>
</tr>
<tr>
<td>MATH 840</td>
<td>Differentiable Manifolds</td>
<td>3</td>
</tr>
<tr>
<td>MATH 910</td>
<td>Algebraic Curves</td>
<td></td>
</tr>
<tr>
<td>MATH 920</td>
<td>Lie Groups and Lie Algebras</td>
<td></td>
</tr>
</tbody>
</table>

Select an approved course in geometry, e.g.:

- MATH 840 Differentiable Manifolds
- MATH 910 Algebraic Curves

Applied Mathematics

This track requires:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 727</td>
<td>Probability Theory (or the corresponding qualifying examination)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 781</td>
<td>Numerical Analysis I (or the corresponding qualifying examination)</td>
<td>3</td>
</tr>
<tr>
<td>MATH 800</td>
<td>Complex Analysis I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 810</td>
<td>Real Analysis and Measure Theory I</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:
Applicants must submit an application for admission to the Graduate Certificate in Applied Mathematics. Criteria and requirements for admission are available from the Department of Mathematics (https://mathematics.ku.edu/applications-and-admissions/). The Department of Mathematics evaluates candidates and makes recommendations to the Office of Graduate Studies regarding admission. The Department ordinarily does not award GTA positions to students accepted to the Graduate Certificate program. Further information about applications and admissions is available from the Department of Mathematics.

Examination Preparation

Normally the work required to prepare a student for the oral comprehensive examination (and to do research) includes 1 or more semesters of advanced courses, directed readings, and seminars. In the oral comprehensive examination, a student must show proficiency in the chosen area of mathematics. Precise areas of responsibility on this examination are discussed in detail with the advisory committee (the student’s advisor and two other members of the department’s Graduate Faculty).

The student must complete 4 additional courses at the 800 level or above before the final examination. Mathematics courses numbered 896, 899, 990, 993 and 999 may not be used to satisfy this requirement.

Graduate Certificate in Applied Mathematics

The Graduate Certificate in Applied Mathematics is designed to enhance training in various aspects of applied mathematics. It is intended for students who are currently pursuing a graduate degree in a discipline outside the Mathematics Department, or for students who wish to pursue the certificate as a stand-alone program.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Graduate Certificate in Applied Mathematics

Applicants must submit a graduate application online. (https://gradapply.ku.edu/apply/) The prerequisites for admission are:

- Current enrollment in a KU graduate program outside the Department of Mathematics, or as a non-degree-seeking student
- Completion of two MATH graduate courses from those listed in the Certificate Requirements, with a minimum 3.0 GPA. These courses can then count towards the 12 credits required for the certificate.

The certificate requires the completion of four courses from the following list:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 601</td>
<td>Algebraic Topics in Computing: ____</td>
<td>3</td>
</tr>
<tr>
<td>MATH 605</td>
<td>Applied Regression Analysis</td>
<td>3</td>
</tr>
<tr>
<td>MATH 611</td>
<td>Time Series Analysis</td>
<td>3</td>
</tr>
<tr>
<td>MATH 630</td>
<td>Actuarial Mathematics</td>
<td>3</td>

<td>Advanced Partial Differential Equations II</td>
<td>3</td>
</tr>
</tbody>
</table>
Other courses (600 level or above) may be substituted with the approval of the Director of Graduate Studies. At least two courses must be at the 700 level or above. Courses should be selected in consultation with an advisor.

Department of Molecular Biosciences

Molecular Biosciences Graduate Programs

We are an interdisciplinary group of faculty who perform cutting edge research across a wide range of areas (http://molecularbiosciences.ku.edu/research/), including biochemistry, biophysics, structural biology, bioinformatics, cancer biology, genetics, genomics, immunology, microbiology, virology, neurobiology, molecular, cellular and developmental biology. We work closely with postdoctoral fellows, graduate students, and undergraduates to investigate fundamental biological and biomedical problems on all levels from molecules to cells to organisms. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and education.

The department offers Doctor of Philosophy and Master of Arts graduate degrees in Biochemistry and Biophysics (http://molecularbiosciences.ku.edu/biochemistry-graduate-program/), in Molecular, Cellular, and Developmental Biology (MCDB (http://molecularbiosciences.ku.edu/mcdb-graduate-program/)), and in Microbiology (http://molecularbiosciences.ku.edu/microbiology-0/). General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website (http://molecularbiosciences.ku.edu/). Detailed information about admission (http://molecularbiosciences.ku.edu/admissions/) to our graduate program, curricula (http://molecularbiosciences.ku.edu/Ph.D.-Overview/), and financial support (http://molecularbiosciences.ku.edu/stipend/) is also available.

Students who are interested in enrolling in graduate level coursework in the Department of Molecular Bioscience without formal admission to a graduate program at KU can apply for graduate, non-degree seeking student status. See the department’s admission (http://molecularbiosciences.ku.edu/admissions/) page for further information.

Biochemistry and Biophysics

The biochemistry group is a dynamic community of scholars and distinguished investigators engaged in research at the forefront of areas including enzymology, structural biology, protein chemistry, proteomics, metabolic biology, and computational biology. Biochemistry researchers have access to numerous excellent core facilities and state-of-the-art equipment, and research activities are strongly supported by public and private funding sources. In addition, biochemistry researchers have close ties with chemistry, chemists and chemical engineers in several other departments at KU as well as at the KU Medical Center. The biochemistry degree track offers a challenging, stimulating and nurturing environment for PhD students. Biochemistry faculty are committed to providing exceptional scientific training through mentoring in the laboratory, coursework and teaching opportunities. Graduate-level coursework covers advanced biochemical systems and methods, physical biochemistry, and molecular modeling.

MCDB

Graduate study in MCDB is supported by a strong interdisciplinary and collaborative group of researchers composed of noted professors and the students, postdoctoral associates, and research staff who work with them in their labs. MCDB researchers seek to address a range of fundamental biomedical questions at the molecular and cellular level. Research areas include modern cell biology, genetics, genomics, developmental biology, cancer biology and neurobiology. Researchers utilize this collaborative environment to leverage the intellectual expertise and tools from multiple labs to study problems at the cutting edge of science using novel, synthetic approaches and a wide variety of model organisms. MCDB researchers have access to numerous excellent core facilities and state-of-the-art equipment, and research activities are strongly supported by public and private funding sources. In addition, MCDB researchers have close ties with researchers in several other departments at KU as well as at the KU Medical Center. MCDB PhD graduates have a high rate of success in securing post-degree positions in academic and industrial research, teaching, law, and other careers. The MCDB degree track offers a challenging, stimulating and rigorous environment that nurtures success for PhD students. The MCDB faculty is committed to providing dynamic and modern scientific training through mentoring in the laboratory, coursework and teaching opportunities. A flexible series of graduate-level course are offered, covering advanced cell biology, genetics, developmental biology, and neurobiology, that aids the student in the development of their research program and dissertation work.

Microbiology

The microbiology group is a dynamic community of scholars and distinguished investigators engaged in research at the forefront of areas including immunology, bacterial pathogenesis and genetics, virology, and fungal secondary metabolites. Microbiology researchers have access to numerous stellar core facilities and state-of-the-art equipment. Microbiology research activities are strongly supported by public and private funding sources, and microbiology researchers have close ties with microbiologists in several other departments at KU as well as at the KU Medical Center. The microbiology degree track offers a challenging, stimulating and nurturing environment for PhD students. Microbiology faculty are committed to providing exceptional scientific training through mentoring in the laboratory, coursework and teaching opportunities. Graduate-level coursework covers pathogenic microbiology, immunology, virology and microbial genetics.

Biology Undergraduate Programs

Various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs (http://catalog.ku.edu/liberal-arts-sciences/biology/) page.

Courses

BIOL 100. Principles of Biology. 3 Hours NB GE3N / N.
Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101 and BIOL 103, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended. LEC.

BIOL 101. Principles of Biology, Honors. 3 Hours NB GE3N / N.
Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels
of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 or BIOL 103 is recommended. BIOL 101 and either BIOL 102 or BIOL 103 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor. LEC.

BIOL 102. Principles of Biology Laboratory. 1 Hour U / LFE.
Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). An honors laboratory (BIOL 103) is offered for students with superior academic records. Prerequisite: Concurrent enrollment in BIOL 100 is recommended. LAB.

BIOL 103. Principles of Biology Laboratory, Honors. 1 Hour U / LFE.
Intended for non-science majors with superior academic records. Exercises are designed to give the students hands-on experience with selected topics from the associated lecture course (BIOL 101). Prerequisite: Membership in the College Honors Program or consent of instructor. Concurrent enrollment in BIOL 101 is recommended. LAB.

BIOL 105. Biology Orientation Seminar. 1 Hour N.
Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about degree requirements, academic advising, research opportunities, and career options, as well as how to align academic and professional goals. Graded on a satisfactory/unsatisfactory basis. LEC.

BIOL 116. Introduction to Evolutionary Biology. 3 Hours N / LFE.
An account of evolutionary thinking from classical to contemporary time. The emphasis is on mainstream developments (Darwinism, Mendelism, the Modern Synthesis, Cultural Ecology), but certain social issues will be examined (social Darwinism, creationism). LEC.

BIOL 120. Insects in Your World. 3 Hours NB GE3N / N.
Students will learn about the global impact of insects on human concerns, both positive (pollination and decomposition) and negative (competition with humans for food, fiber, and shelter, and disease transmission) while developing an appreciation for the ways in which scientists work with real problems involving insects. The course will cover the overwhelming abundance and diversity of insects, and their life history, ecology, behavior, and physiology. This course is intended for both nonbiology and biology majors. Format: two lectures and one discussion section per week. LEC.

BIOL 150. Principles of Molecular and Cellular Biology. 3 Hours NB GE3N / N / LFE.
A course for biology majors and students planning to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. An honors section (BIOL 151) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or consent of instructor. LEC.

BIOL 151. Principles of Molecular and Cellular Biology, Honors. 3 Hours NB GE3N / N / LFE.
A course for students with superior academic records who are biology majors or who plan to take additional courses in biology. This course covers basic biochemistry, cell structure and function, molecular biology, genetics, physiology, and development of plants and animals. Three hours of lecture per week. Prerequisite: Membership in the University Honors Program and concurrent or prior enrollment in CHEM 130, CHEM 190 and CHEM 191, CHEM 150, or CHEM 170; or consent of instructor. LEC.

BIOL 152. Principles of Organismal Biology. 3 Hours NB GE3N / N / LFE.
A course for biology majors and students who plan to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. An honors section (BIOL 153) is offered for students with superior academic records. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170; or consent of instructor. LEC.

BIOL 153. Principles of Organismal Biology, Honors. 3 Hours NB GE3N / N / LFE.
A course for students with superior academic records who are biology majors or planning to take additional courses in biology. This course covers basic elements of plant and animal morphology and physiology, principles of evolution, organismal diversity and phylogeny, population biology, population genetics, ecology, and behavior. Three hours of lecture per week. Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170 and membership in the University Honors Program; or consent of instructor. LEC.

BIOL 154. Introductory Biology Lab for STEM Majors. 2 Hours N / LFE.
A hybrid laboratory course for majors in STEM fields. This hybrid laboratory course will use online modules (~ 2 hours per week) to introduce students to key core competencies (e.g., critical thinking, quantitative reasoning, scientific communication, collaboration, etc.) that are applicable to all STEM fields. Two hours of face-to-face laboratory instruction will provide students hands-on opportunities to apply these core competencies and skills to research questions in the biological sciences. Students will apply research skills and engage in an authentic research activity during the second half of the course and will present the results to their peers in oral and written formats. LAB.

BIOL 155. Principle Lab in: ____. 1-3 Hours U / LFE.
This introductory laboratory exposes the students to basic principles in biology and modern experimental techniques through an open-ended authentic research experience directed by a faculty member. Prerequisite: Consent of instructor. LEC.

BIOL 177. First Year Seminar: ____. 3 Hours NB GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in biology. Does not contribute to major requirements in biology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

BIOL 200. Basic Microbiology. 3 Hours NB GE3N / N.
Introduction to bacteria and viruses. Topics include historical development of microbiology, bacterial structure and growth, enzymes and energy production, disinfection, antibacterial drugs, gene transfer, viral replication, infection and immunity, with emphasis on infectious diseases. Can be substituted for BIOL 201 as a prerequisite for other microbiology courses by consent of department. Not open to those with credit in BIOL 400, or BIOL 401. Prerequisite: A course in high school biology and a course in high school chemistry. This course is not recommended for first semester freshmen. LEC.

BIOL 203. Introductory Microbiology Laboratory. 2 Hours U / LFE.
Laboratory exercises to complement BIOL 200. Prerequisite: BIOL 200. May be taken concurrently. LAB.
BIOL 210. Introduction to Clinical Laboratory Sciences. 1 Hour U.
An introductory overview of medical technology as a profession including types of analyses performed, specialties, interrelationships in the health care system and a visit to a clinical laboratory. This course will enable those considering a major in medical technology to have a clear definition of the profession. This course does not meet any degree requirements in biology. No prerequisite. (Same as CLS 210.) LEC.

BIOL 225. Evolution and the History of Life. 3 Hours GE3N / N.
This introductory course for non-majors focuses on the significance of the history of life and the fossil record for our understanding of evolution. Key events in the history of life are considered, including the origins of life, the eukaryotic cell, and humans, and also various mass extinctions. The focus is on general scientific and evolutionary principles and mechanisms that can be extracted from the study of the fossil record. It also uses the lessons of the fossil record to consider the prospects for our own species. LEC.

BIOL 240. Fundamentals of Human Anatomy. 3 Hours N.
Introduction to the gross anatomy of the human body. Covers the spatial arrangement and appearance of structures throughout the body, including visual identification of these structures. Musculoskeletal relationships, and the anatomy of major organ systems, are emphasized. Not intended for biology majors. Prerequisite: BIOL 100, or equivalent. LEC.

BIOL 241. Human Anatomy Observation Laboratory. 2 Hours U / LFE.
One of the two laboratories in gross anatomy designed to complement BIOL 240. Emphasizes the three-dimensional appearance and spatial relationships of anatomical structures through supervised observations of pre-dissected human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy observation laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is required. LAB.

BIOL 246. Principles of Human Physiology. 3 Hours N.
An introduction to the physiological and biochemical processes and general physiological principles necessary to sustain life. Organ and organ system processes are emphasized. Intended for students majoring in allied health or sports related curricula who require a course in human physiology. Not intended for biology majors. Prerequisite: BIOL 100 or equivalent. LEC.

BIOL 247. Principles of Human Physiology Laboratory. 2 Hours U / LFE.
Designed to complement BIOL 246. Uses experiments and simulations to demonstrate laboratory techniques and representative processes in areas of human physiology. Concurrent or prior enrollment in BIOL 246 required. LAB.

BIOL 350. Principles of Genetics. 4 Hours N.
Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian genetics and mapping; control of gene expression; cytogenetics; epigenetics and non-Mendelian genetics; and population and quantitative genetics. Examples are taken from a wide variety of organisms, including viruses, bacteria, plants, fungi, insects, and humans. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher; or consent of instructor. LEC.

BIOL 360. Principles of Genetics, Honors. 4 Hours N.
The science of genetics aims to explain why individuals differ from one another and how these differences are inherited. Honors Genetics covers all core topics in fundamental genetics: Mendelian inheritance, meiosis and recombination, mutation, molecular genetics, population genetics, quantitative genetics and genomics. Special attention given to the practice of genetics and the complex relationship between genotype, phenotype and environment. A broader goal of Honors Genetics is to provide students a framework for understanding recent advances in medical genetics and the modern era of personal genomics. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher and membership in the University Honors Program; or consent of the instructor. LEC.

BIOL 400. Fundamentals of Microbiology. 3 Hours NB GE3N / N.
Fundamental principles of microbiology with emphasis on physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics, pathogenesis and immunity, industrially important microorganisms. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher and two semesters of college chemistry with a grade of C- or higher, or consent of the instructor. LEC.

BIOL 401. Fundamentals of Microbiology, Honors. 4 Hours N.
Honors section of BIOL 400 and BIOL 612, by application and invitation. Prerequisite: BIOL 150 or BIOL 151, two semesters of college chemistry, and membership in the University Honors Program, or consent of the instructor. LEC.

BIOL 402. Fundamentals of Microbiology Laboratory. 2 Hours U / LFE.
Laboratory exercises designed to complement BIOL 400 or BIOL 700. Prerequisite: BIOL 400 or BIOL 612, or BIOL 400 or BIOL 612 concurrently. LAB.

BIOL 405. Laboratory in Genetics. 3 Hours U / LFE.
A laboratory course that provides hands-on experience with classical genetics and modern molecular genetics. Experiments involve Mendelian genetics (dominance/recessivity, complementation, segregation, independent assortment) in eukaryotic organisms; recombinant DNA; basic bacterial genetics; polymerase chain reaction; DNA sequencing; computational genetics; and genome editing. Prerequisite: Concurrent or prior enrollment in BIOL 350. LAB.

BIOL 412. Evolutionary Biology. 4 Hours N.
Introduction to the patterns and processes of organic evolution. Considered are the history of evolutionary thought, molecular evolution, genetics and microevolution, selection and adaptation, and speciation and macroevolution. Emphasis will be placed on how scientists study and document change over time in natural populations, methods for testing hypotheses about events in evolutionary history, and how discovering evolutionary mechanisms at one level of organization can help to explicate general processes in the natural world. Prerequisite: BIOL 152 and BIOL 350, or consent of the instructor. LEC.

BIOL 413. History and Diversity of Organisms. 3 Hours N / LFE.
An integrated lecture and laboratory course presenting an overview of the variety and ancestry of life on earth. Using representatives from prokaryotes, protists, plants, fungi, and animals, principles of phylogenetic reconstruction are illustrated and evolutionary trends in the life history features, functional morphology, and structural complexity of extant and extinct organisms are presented. Two hours of lecture and three hours of laboratory per week. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.
BIOL 414. Principles of Ecology. 3 Hours N.
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as EVRN 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.

BIOL 415. Field and Laboratory Methods in Ecology. 2 Hours N.
This course complements BIOL 414 with field trips and laboratory exercises that illustrate the basic concepts of ecology. Topics covered include methodologies for quantitative sampling of terrestrial and aquatic systems, design of field studies, computer simulation and digital data analysis techniques, and scientific writing. Prerequisite: Concurrent or prior enrollment in BIOL 414. A statistics course is recommended. FLD.

BIOL 416. Cell Structure and Function. 3 Hours N.
Lecture survey of molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Prerequisite: BIOL 150 or BIOL 151; BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; or consent of the instructor. LEC.

BIOL 417. Biology of Development. 3 Hours N.
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Prerequisite: BIOL 350 and BIOL 416 or consent of the instructor. LEC.

BIOL 418. Laboratory in: ______. 1-3 Hours U / LFE.
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor. LAB.

BIOL 419. Topics in: ______. 1-3 Hours N / LFE.
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs. IND.

BIOL 420. Seminar: ______. 1-3 Hours N.
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor. LEC.

BIOL 421. Topics in Molecular Biosciences: ______. 3 Hours N.
Lecture instruction and the preparation and presentation of oral and written reports on selected topics from the recent research literature in molecular biosciences. Students may enroll in a given topic only once. Prerequisite: Course work varying with the topic of the seminar; or consent of instructor. LEC.

BIOL 423. Non-laboratory Independent Study. 1-9 Hours AE61 / N.
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

BIOL 424. Independent Study. 1-9 Hours AE61 / N.
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

BIOL 425. Teaching Apprenticeship in Biology. 1-9 Hours N.
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology. FLD.

BIOL 426. Laboratory in Cell Biology. 3 Hours U / LFE.
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; concurrent or prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended. LAB.

BIOL 428. Introduction to Systematics. 3 Hours N.
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systematics background. LEC.

BIOL 430. Laboratory in Molecular Biology. 3 Hours U / LFE.
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology. LAB.

BIOL 435. Introduction to Neurobiology. 3 Hours N.
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Prerequisite: BIOL 350 and BIOL 416 or consent of the instructor. LEC.

BIOL 440. Advanced Human Anatomy. 6 Hours N / LFE.
Integrated lecture and laboratory course designed to provide students with a detailed understanding of the structure of the human body. Cadaver dissection will reinforce three-dimensional relationships discussed in lecture and each of the main organ systems will be considered using a regional approach to the body. Prerequisite: BIOL 152 or equivalent; BIOL 240 and BIOL 241, or BIOL 240 and BIOL 442 or BIOL 242; and consent of the instructor. LEC.

BIOL 442. Human Anatomy Dissection Laboratory. 3 Hours U.
Laboratory in gross anatomy designed to build on content from BIOL 240 and BIOL 241. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial dissection experience. Students perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Prerequisite: BIOL 240 and BIOL 241, and consent of the instructor. LAB.
BIOL 448. Kansas Plants. 3 Hours N.
A study of common and important non-cultivated Kansas plants, with special emphasis on the ecology of the state; paleoclimatic and paleobotanical background of the central prairies and plains; present climate, physiography and vegetation; poisonous, edible, and medicinal plants; identification by means of simplified keys. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Hours AE61 / N / LFE.
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor. LAB.

BIOL 451. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 451 and GEOG 451.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor. LAB.

BIOL 454. Brain Diseases and Neurological Disorders. 3 Hours N.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 416 or BIOL 435 or BIOL 546, or consent of instructor. LEC.

BIOL 477. Ecology and Global Change. 3 Hours N.
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor. LEC.

BIOL 480. Biology and Diversity of Parasites. 3 Hours N.
Introductory lecture course to the field of Parasitology. Provides basic knowledge about the morphology and biology of parasitic animals. Coverage includes a diversity of protozoan and metazoan groups parasitizing animals, including humans (e.g., malaria, amoebas, hookworms, tapeworms). Some emphasis is given to groups of parasites of particular medical and/or economic importance. Selected principles of parasitism are introduced. Prerequisite: BIOL 152 or BIOL 153, or permission of instructor. LEC.

BIOL 481. Parasitology Laboratory. 1 Hour U / LFE.
Laboratory course in the study of protozoan and metazoan parasites of animal, including humans, emphasizing their diversity, classification, morphology, and identification. One three-hour laboratory each week. Prerequisite: Concurrent or prior enrollment in BIOL 480. LAB.

BIOL 490. Internship and Practical Applications. 1-6 Hours AE61 / N.
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor. INT.

BIOL 494. Introduction to Mammalogy. 3 Hours / LFE.
A study of mammals, with emphasis on evolution, biogeography, systematic, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 152 or 153 or permission of instructor. LEC.

BIOL 499. Introduction to Honors Research. 2 Hours N.
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level natural sciences coursework or consent of instructor. LEC.

BIOL 500. Biology of Insects. 3 Hours N.
A study of insects, including general classification, structure, phylogeny, identification, development, physiology, behavior, ecology, and relations to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

BIOL 501. Physiological Adaptations of Plants to Extreme Environments. 3 Hours N.
Exploration of physiological adaptations of plants to bright sunlight, deep shade, drought flooding, excess heat subfreezing, excess elements and too few elements. Examples of adaptations include: red leaves, blue leaves, succulence, root "knees", moving leaves, frozen leaves, heavy metal plants, carnivorous plants, parasitic plants, ephiphytes. Prerequisite: BIOL 150 or BIOL 152 or consent of instructor. LEC.

BIOL 502. Laboratory in Insect Biology and Diversity. 2 Hours U / LFE.
Laboratory and field studies of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent. LAB.

BIOL 503. Immunology. 3 Hours N.
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness, hypersensitivity; specific immunologic tolerance. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. LEC.

BIOL 504. Immunology Laboratory. 2 Hours U / LFE.
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently. LAB.
Biol 506. Bacterial Infectious Diseases. 3 Hours N.
Explores bacterial infectious diseases from the perspective of how
disease is established and the mechanisms that underlie disease, as well
as how to treat and prevent infectious disease. Not open to freshmen or
sophomores. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or
higher, or consent of instructor. LEC.

Biol 507. Bacterial Infectious Diseases Laboratory. 2 Hours U / LFE.
Laboratory to complement BIOL 506. Cultivation of pathogenic
microorganisms, diagnostic procedures, and experiments to demonstrate
various aspects of microbial pathogenicity and host responses.
Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or
consent of instructor. LAB.

Biol 509. Biology of Spiders. 3 Hours N.
An introduction to the evolution, anatomy, physiology, behavior, and
ecology of spiders and other arachnids. Special topics include the
action of spider venoms; the composition and uses of silk; courtship
and mating; predation; social behavior; and the role of spiders in
natural and agricultural ecosystems. Concurrent enrollment in BIOL
511 is encouraged. Prerequisite: BIOL 152, BIOL 153 or permission of
instructor. LEC.

Biol 510. Comparative Anatomy. 5 Hours N / LFE.
Structure, function, and evolution of the vertebrates. Lectures and
laboratory study. A course designed for zoologists. Prerequisite: BIOL
100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

Biol 511. Biology of Spiders Laboratory. 1 Hour U / LFE.
Topics will include comparative biology of arachnid orders (spiders,
scorpions, harvestmen, mites, and others), external and internal anatomy
of spiders, identification of common spider families and genera, and
spider behavior. Students will be required to make a small collection
(collect, preserve, and identify specimens). Prerequisite: BIOL 509;
concurrent enrollment is preferred. LAB.

Biol 512. General Virology. 3 Hours N.
Lectures and discussions covering the basic nature and characteristics of
viruses from a general biological point of view: viruses of bacteria, animals
and plants, physical-chemical properties; host cell-viral interactions; mode
of replication of DNA and RNA viruses, tumor viruses. Prerequisite: BIOL
400 or BIOL 401 with a grade of C- or higher, or consent of instructor.
LEC.

Biol 513. Virology Laboratory. 2 Hours U / LFE.
Experiments involving cultivation, quantitation, and identification of animal
viruses, continuous cell culture and primary chicken embryo culture
techniques. Molecular biology techniques are used to demonstrate the
steps in virus replication. The value of viruses as tools to understand
normal cellular processes is emphasized in experiments which
demonstrate the relative simplicity of viruses and the relative complexity of
eukaryotic cells. Demonstrations include transformation of cells by tumor
viruses and electron microscopy of virus particles. Prerequisite: BIOL
402 and BIOL 512, or consent of instructor. LAB.

Biol 518. Microbial Genetics. 3 Hours N.
Bacteria and viruses as models of genetic systems. Mutagenesis and
repair. Transformation, transductions, and recombination. Molecular
biology of gene expression. Prerequisite: BIOL 400 or BIOL 401 with a
grade of C- or higher or consent of instructor. LEC.

Biol 519. Microbial Genetics Laboratory. 2 Hours U / LFE.
A laboratory course on the genetic analysis of bacteria. Includes
mutagenesis, cloning, agarose and polyacrylamide gel electrophoresis,
PCR, regulation of gene expression, and computational analysis of DNA
sequences and protein structures. Prerequisite: BIOL 350 or BIOL 360.
LAB.

Biol 520. Marine Biology. 3 Hours N.
This introductory course covers biological, physical, and chemical ocean
sciences, with an emphasis on ecological aspects. In addition to this
Lawrence campus course, students may enroll for a supplementary 1
credit field trip class to a Caribbean coral reef island offered in December
or January. Prerequisite: BIOL 414 or permission of the instructor. LEC.

Biol 521. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living
and fossil orders and the more common families primarily on the basis
of external morphology. The biology, ecology, phylogeny, and geological
history of each order is covered. Includes both lectures and laboratory
exercises. The course is offered at the 500 and 700 levels, with additional
assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or
equivalent, or permission of instructor. LEC.

Biol 524. Mammalian Paleontology. 3 Hours.
Evolution of mammals, and anatomical modifications involved in the
process as ascertained from the fossil record. Lectures and laboratory.
(Same as GEOL 524.) Prerequisite: One of the following: BIOL 225, BIOL
412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor. LEC.

Biol 525. Aquatic Entomology. 4 Hours N.
Designed to enable students to develop skill in the area of identification
of aquatic insects and to gain a detailed comprehension of their community
structure and dynamics. The external morphology of all aquatic orders
is covered, followed by consideration of specific physiological and
behavioral adaptations that facilitate an aquatic existence. Includes
both lectures and laboratory exercises. Requirements include making a
collection of aquatic insects. The course is offered at the 500 and 700
levels, with additional assignments at the 700 level. Prerequisite: BIOL
414 or BIOL 500. LEC.

Biol 527. Primate Evolution and the Fossil Record. 3 Hours N.
This course exposes students to fundamental concepts of paleontology
and evolutionary biology using the mammalian order Primates as a
high-profile case study. Primates are interesting partly because humans
are primates. Hence, scientific understanding of human origins and
human evolution must be grounded in knowledge of our nearest relatives.
This course places human origins within the broader framework of
how primates have evolved over the course of the Cenozoic Era, often
in response to radical changes in the Earth's physical environment.
Prerequisite: BIOL 412 or BIOL 413, or consent of the instructor. LEC.

Biol 528. External Morphology of Insects. 4 Hours N.
A study of external structure common to all insect orders, with detailed
comparative laboratory studies of representative species. Includes both
lectures and laboratory exercises. The course is offered at the 500 and
700 levels, with additional assignments at the 700 level. Prerequisite:
BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

Biol 530. Biodiversity Discovery and Assessment. 2 Hours N.
An integrated lecture and laboratory course designed to provide an
overview of modern methods in biodiversity exploration and discovery.
Lectures cover the theory and practice of planning fieldwork in remote
locations, documenting species and their natural history, how museum
collections are made, calculating and comparing species richness
estimates, and the process of describing and naming new species. The
laboratory component provides students experience in documenting
species and their natural history, processing and curating samples of
natural history specimens, and the statistical analysis of biodiversity data.
(Same as EVRN 530.) Prerequisite: BIOL 152, 153, or equivalent, or
permission of instructor. LEC.
BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Hour U.
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as EVRN 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged. LAB.

BIOL 533. Biology of Fungi. 4 Hours N / LFE.
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 536. Cell Structure and Function (Honors). 3 Hours N.
BIOL 536 is the honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 540. General Invertebrate Zoology. 4 Hours N / LFE.
Phylogeny, physiology, and embryology; evolutionary processes; characteristics of major ecological groupings. Laboratory will consider major taxonomic categories with emphasis on functional morphology and its evolutionary modifications. Prerequisite: BIOL 152 or BIOL 153. LEC.

BIOL 541. Biology of Freshwater Invertebrates. 3 Hours N.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 and/or BIOL 540. LEC.

BIOL 544. Comparative Animal Physiology. 3 Hours N.
An intermediate physiology course with lectures and discussions of the structures, functions, mechanisms, and interactions of vertebrate and invertebrate organ systems with a focus on the different ways in which animals adapt to their environments. Topics include digestion and nutrition, metabolism, gas exchange, circulation, excretion, neurophysiology, endocrinology, and muscle physiology. Prerequisite: BIOL 152 or BIOL 153, and CHEM 330, or consent of instructor. A college physics course is recommended but not required. LEC.

BIOL 545. Evolution of Development. 4 Hours AE61 / N.
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent. LEC.

BIOL 546. Mammalian Physiology. 3 Hours N.
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and CHEM 330 or consent of instructor. LEC.

BIOL 547. Mammalian Physiology Laboratory. 2 Hours U / LFE.
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 546. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 546 or BIOL 646. LAB.

BIOL 555. General Plant Physiology. 3 Hours N.
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: Consent of instructor. LEC.

BIOL 560. Histology. 3 Hours N.
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153. LEC.

BIOL 570. Introduction to Biostatistics. 4 Hours N / LFE.
Statistical concepts related to biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, emphasizing analysis of variance. Prerequisite: College algebra and ten hours of natural science. LEC.

BIOL 571. Introduction to Biostatistics Laboratory. 2 Hours U / LFE.
Introductory statistical analyses on microcomputers. Data entry and export; simple graphs and exploratory data analysis; descriptive statistics; sampling; point and interval estimation; one and two sample t-tests; Chi-square; regression and correlation; analysis of variance; and nonparametric methods. Prerequisite: BIOL 570 or equivalent (may be taken concurrently). LAB.

BIOL 582. Principles of Biogeography. 3 Hours N.
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macroevolutionary trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor. LEC.

BIOL 583. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematic, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. LEC.

BIOL 592. Ichthyology. 4 Hours N / LFE.
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. This course meets with...
BIOL 792. Students taking this course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 and/or BIOL 413. LEC.

BIOL 593. Ornithology. 3 Hours N / LFE.
A lecture and laboratory course on the biology, evolution, and diversity of birds. Prerequisite: BIOL 412 (or BIOL 413), or permission of instructor. LEC.

BIOL 594. Forest Ecosystems. 3 Hours.
Students learn basic concepts of forest productivity, forest water relations, forest hydrology, nutrient cycling, through soils and vegetation, nutrient uptake, carbon cycling, decomposition, linkages to aquatic ecosystems, and agents of disturbance to these cycles. The class spends a significant part of the semester exploring forest soil profiles and the challenges they present to different forest ecosystems. We discuss the function of forested ecosystems in a global context and identify and understand smaller-scale processes that drive forest function. Prerequisite: CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; and BIOL 414. LEC.

BIOL 595. Human Genetics. 3 Hours N.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350 or BIOL 360. LEC.

BIOL 598. Research Methods. 3 Hours N / LFE.
An introduction to the foundational concepts that underpin scientific inquiry and problem solving. Coursework is built around three student-designed inquiries, and topics considered within that context include experimental variables, basic principles of statistics, safety and ethics of investigation, professional communication techniques, and appropriate literature review. Enrollment priority will be given to students currently admitted to the UKanTeach program. LEC.

BIOL 599. Senior Seminar: ______. 1 Hour AE61 / N.
A synthesis and discussion of current trends in a discipline or disciplines related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline’s state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences. LEC.

BIOL 600. Introductory Biochemistry, Lectures. 3 Hours N.
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry. LEC.

BIOL 601. Principles of Biochemistry Laboratory. 2 Hours.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite: Corequisite: BIOL 600; or consent of instructor. LAB.

BIOL 602. Plant Ecology. 3 Hours N.
Introduction to basic concepts, focused at community and species level. Architectural ecomorphology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession as an interaction among species differing in ecomorphology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemic defenses; genealogy; paleoecology. Prerequisite: BIOL 414 or consent of instructor. Concurrent enrollment in parallel laboratory, BIOL 607, recommended. LEC.

BIOL 603. Systematic Botany. 3 Hours N / LFE.
A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenetically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent. LEC.

BIOL 606. Ecological Plant Physiology. 3 Hours N.
Physiological responses of higher plants to environmental factors are discussed. Major topics are: water relations, heat transfer, resistance to water and temperature stress, dormancy, photoperiodism, photosynthesis and respiration under natural conditions, and effects of environmental pollution. Prerequisite: Consent of instructor. LEC.

BIOL 607. Field and Laboratory Exercises in Plant Ecology. 2 Hours U / LFE.
Introduction to quantitative analysis of plant communities and correlated environmental parameters; field and/or laboratory measurements of ecophysiological traits and comparative ecomorphology of principal species. Prerequisite: BIOL 414. Concurrent enrollment in parallel lecture, BIOL 602, recommended, but not required. LAB.

BIOL 612. Fundamentals of Microbiology. 3 Hours NB / N.
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor. LEC.

BIOL 616. Medical Entomology. 3 Hours N.
A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor. LEC.

BIOL 622. Paleontology. 3 Hours N.
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as GEOL 521.) Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEOL 105, or GEOL 304. LEC.

BIOL 623. Paleontology Laboratory. 1 Hour U / LFE.
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.) LAB.

BIOL 625. Behavioral Ecology and Sociobiology. 3 Hours N.
The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 152; either
BIOL 350, BIOL 412 or BIOL 414 recommended; or consent of instructor. LEC.

BIOL 630. Conservation and Wildlife Biology. 3 Hours N.
Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended. LEC.

BIOL 636. Biochemistry I. 4 Hours N.
First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor, LEC.

BIOL 637. Introductory Biochemistry Laboratory. 2 Hours U / LFE.
The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce students to cell constituents and biochemical reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment. LAB.

BIOL 638. Biochemistry II. 4 Hours N.
Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: CHEM 335 with a grade of C or higher and BIOL 636 with a grade of C or higher, or consent of instructor. LEC.

BIOL 639. Advanced Biochemistry Laboratory. 3 Hours AE61 / U / LFE.
The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art methodology. Prerequisite: BIOL 637 and BIOL 638 (BIOL 638 may be taken concurrently). LAB.

BIOL 640. The Biology and Evolution of Fossil Plants. 3 Hours N.
A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. (Same as GEOL 528.) Prerequisite: BIOL 413 or permission of instructor. LEC.

BIOL 641. Laboratory in Paleobotany. 1 Hour U / LFE.
An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. (Same as GEOL 529.) Prerequisite: BIOL 413 or permission of instructor. Must be taken concurrently with BIOL 640. LAB.

BIOL 642. Biochemistry III: Machines on Genes. 4 Hours N.
This one-semester lecture course for biochemistry majors is designed to complement the topics covered in BIOL 636 and BIOL 638. Emphasis will be placed on the various molecular machines involved in the transmission and utilization of genetic information, providing a biochemical perspective of replication, transcription, and translation. Prerequisite: BIOL 636 and BIOL 638 with a grade of C or higher. LEC.

BIOL 648. Systematics and Macroevolution. 3 Hours N.
An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 650. Advanced Neurobiology. 3 Hours N.
The course builds an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

BIOL 652. Comparative Animal Behavior. 3 Hours N.
A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite. LEC.

BIOL 654. Comparative Animal Behavior, Laboratory. 1 Hour U / LFE.
Laboratory and field phase of BIOL 652. Students may elect sections according to their special interests. Prerequisite: Prior or concurrent enrollment in BIOL 652. LAB.

BIOL 655. Behavioral Genetics. 3 Hours N.
A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 656. Ecosystem Ecology. 3 Hours N.
An introduction to the patterns and processes that affect terrestrial ecosystems. Emphasis is placed on understanding nutrient cycles (e.g., carbon nitrogen phosphorous), hydrologic cycles, and patterns of net primary productivity. The role of both natural and anthropogenic disturbances in structuring terrestrial ecosystems is examined in the context of global land-use patterns. Discussion of current research literature will be expected. (Same as EVRN 656.) Prerequisite: BIOL 414 and CHEM 130. LEC.

BIOL 660. Summer Field Ecology. 3 Hours N.
An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as EVRN 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N). LAB.

BIOL 661. Ecology of Rivers and Lakes. 3 Hours N.
Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended. LEC.

BIOL 662. Aquatic Ecology Laboratory. 2 Hours U / LFE.
A field and laboratory course introducing biological, physical, and chemical characteristics of lentic (ponds and lakes) and lotic (creeks and rivers) habitats. Students learn sampling and monitoring techniques and how to classify aquatic biota at higher taxonomic levels. Prerequisite:
Corequisite: CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and BIOL 661. LAB.

BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Hours N.
The course focuses on the role of chemical information molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor. LEC.

BIOL 668. Evolutionary Ecology. 3 Hours N.
Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor. LEC.

BIOL 672. Gene Expression. 3 Hours N.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 673. Cellular and Molecular Neurobiology. 3 Hours.
Mechanisms of neural function and development will be considered at the cellular and molecular levels. Synaptic mechanisms of learning and memory, modulation of transmitter release, and the molecular basis of neurodegenerative disorders will also be discussed. Prerequisite: BIOL 435, BIOL 646, or permission of instructor. LEC.

BIOL 680. Genomics. 3 Hours N.
Genomics is the study of the structure, function and evolution of the genome. High-throughput technologies have given us the ability to easily and quickly sequence genomes, and measure genomewide patterns of gene expression. These tools, and the vast amounts of genome-scale data they provide, have transformed biology and medicine. This course will cover the key technological and computational methods by which genomic DNA is sequenced, genomes are assembled, and how RNA and epigenetic patterns are measured. Subsequently, we will emphasize how these genomics tools and techniques have deepened our understanding of biology, covering questions from diverse fields to illustrate the impact of genomics on evolutionary biology, molecular and developmental genetics, human medical genetics and personalized, precision medicine. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. LEC.

BIOL 688. The Molecular Biology of Cancer. 3 Hours N.
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor. LEC.

BIOL 694. The Art of Becoming a Professional Scientist. 3 Hours N.
Discusses aspects of graduate education that are directed at students entering graduate school and that focus on how to be successful in the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One three hour discussion per week. Senior standing and planning on entering graduate school. LEC.

BIOL 699. Biology Honors Research Colloquium. 1 Hour AE61 / U.
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor. LEC.

BIOL 700. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 701. Topics in: ____. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests. LEC.

BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Hours.
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences. LAB.

BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Hour.
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry. LEC.

BIOL 706. Natural Sciences Curation and Collections Management. 3 Hours.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloguing, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum’s paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art’s ethnographic collections. Student projects will involve one of the museum’s collections with the opportunity for hands-on experience. (Same as MUSE 710.) LEC.

BIOL 708. External Morphology of Insects. 4 Hours.
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 711. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and
geological history of each order will be covered. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500 and BIOL 502 or equivalent, or permission of instructor. LEC.

**BIOL 712. Evolutionary Biology - Graduate. 3 Hours.**
A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent or consent of instructor. LEC.

**BIOL 714. Graduate Ecology. 3 Hours.**
A thorough survey of the discipline of ecology. Topics include elements in physiological, population, community and ecosystem ecology. Overarching themes are 1) pattern and process, 2) ecology and evolution, 3) hierarchical nature of ecology, 4) variation in space and time, and 5) human dimensions of ecology. Prerequisite: Graduate standing or consent of instructor. LEC.

**BIOL 720. Scientific Illustration. 3 Hours.**
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor. LEC.

**BIOL 725. Aquatic Entomology. 4 Hours.**
Identification of aquatic insects and detailed study of their community structure and dynamics. The external morphology of all aquatic orders will be covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500 or permission of instructor. LEC.

**BIOL 735. Scientific Communication. 3 Hours.**
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.) LEC.

**BIOL 741. Biology of Freshwater Invertebrates. 3 Hours.**
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Graduate students will be expected to submit either an original collection of freshwater invertebrates or write a research essay on a topic mutually agreed upon with the professor. Not open to students who have taken BIOL 541. Prerequisite: Graduate standing; recommended: undergraduate invertebrate biology class. LEC.

**BIOL 742. Plant Population Biology. 3 Hours.**
A survey of the major areas of plant population ecology and genetics including competition, demography, pollination ecology, gene flow, natural selection and mating systems. Each topic is introduced by a lecture and is further explored by discussion of the current literature. Prerequisite: BIOL 412 or equivalent. LEC.

**BIOL 743. Population Genetics. 3 Hours.**
Description and discussion of genetic variation in natural populations. The effects and interaction of selection, migration, mutation, mating systems, and finite population size on the maintenance of genetic variation. Discussion of the interface with evolution and population ecology. Prerequisite: BIOL 350 and BIOL 412 or equivalent. LEC.

**BIOL 747. Quantitative Genetics. 3 Hours.**
A discussion of genetic traits for which individual gene differences do not separate a population into qualitatively distinct groups. Includes the estimation of heritability, genetic determination, and number of loci, and a study of selection theory. Prerequisite: BIOL 404 or BIOL 412 or equivalent and a course in statistics. LEC.

**BIOL 750. Advanced Biochemistry. 3 Hours.**
The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor. LEC.

**BIOL 752. Cell Biology. 3 Hours.**
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor. LEC.

**BIOL 753. Advanced Genetics. 3 Hours.**
An advanced course in modern genetic analysis of eukaryotes. Course material will consist mainly of primary literature in the field of genetics. Topics covered include: genomic structure and genome projects; nature of mutations; mutant analysis; genetic recombination and mapping; analysis of gene function; genetic buffering; RNAi and epigenetics; and the genetics of model organisms. This course is meant for graduate students in the Molecular Biosciences and Genetics programs. Prerequisite: BIOL 807 and BIOL 808, or a course in genetics and a course in biochemistry, or permission of the instructor. LEC.

**BIOL 754. Brain Diseases and Neurological Disorders. 3 Hours.**
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor. LEC.

**BIOL 755. Mechanisms of Development. 3 Hours.**
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor. LEC.

**BIOL 757. Carcinogenesis and Cancer Biology. 3 Hours.**
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor. LEC.
BIOL 759. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the Anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.) FLD.

BIOL 772. Gene Expression. 4 Hours.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. This course meets concurrently with BIOL 672 and is open to graduate students seeking a more rigorous treatment of techniques in molecular biology that students receive in BIOL 672. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as CHEM 775, MDCM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent or consent of instructor. LEC.

BIOL 782. Principles of Biogeography. 3 Hours.
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended. LEC.

BIOL 783. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. Students taking the course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 Principles of Organismal Biology, and/or BIOL 413 History and Diversity of Organisms. LEC.

BIOL 784. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 785. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 786. Fundamentals of Tropical Biology. 1-8 Hours.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August. FLD.

BIOL 787. Introduction to Museum Exhibits. 3 Hours.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 788. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, GEOL 782, HIST 720, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 790. Paleontology of Lower Vertebrates. 3 Hours.
General account of the osteology, geologic distribution, and evolution of the principal groups of fishes, amphibians, reptiles, and birds. Lectures and laboratory. Prerequisite: GEOL 105 or GEOL 304, or GEO 521. LEC.

BIOL 792. Ichthyology. 4 Hours.
A study of fishes. Lecture topics include the structure and function of fishes; the adaptations of fishes to the aquatic environment; and a survey of major fish groups with emphasis on evolutionary relationships and biogeography. Laboratory topics include a survey of fishes using specimens, and the use of keys to identify fishes with emphasis on the Kansas fish fauna. A research paper using primary scientific literature is required. Prerequisite: Graduate standing or permission of the instructor. LEC.

BIOL 794. Mammalogy. 3 Hours.
A study of mammals. With emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413. LEC.

BIOL 795. Biology of Amphibians. 3 Hours.
Evolutionary biology of amphibians with emphasis on systematics, morphology, development, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: Permission of instructor. LEC.

BIOL 796. Biology of Reptiles. 3 Hours.
Evolutionary biology of reptiles with emphasis on systematics, morphology, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: Permission of instructor. LEC.

BIOL 797. Field Course in Vertebrate Paleontology. 3-6 Hours.
Training in the techniques of collecting vertebrate fossils, description and interpretation of the stratigraphy of fossiliferous sediments, and interpretation of the adequacy and bias of samples. FLD.

BIOL 798. Introduction to Collections Management and Utilization. 3 Hours.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public
engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor. LEC.

BIOL 801. Topics in: ______. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests. LEC.

BIOL 802. The Art of Becoming a Professional Scientist. 3 Hours.
Discusses aspects of graduate education that are directed at the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One 3-hour discussion per week. LEC.

BIOL 805. Scientific Integrity in Ecology and Evolutionary Biology. 1 Hour.
This course covers the responsible conduct of research to help students initiate research projects ethically. Topics covered include expectations of federal granting agencies and the university, best practices for data management and publishing, and professional development as a graduate student. Prerequisite: Admission to the graduate program in Ecology and Evolutionary Biology, or consent of instructor. LEC.

BIOL 807. Graduate Molecular Biosciences. 3 Hours.
An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, kinetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 809. Graduate Molecular Biosciences for Medicinal Chemists. 4 Hours.
An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor. LEC.

BIOL 811. Advanced Molecular and Cellular Immunology. 2 Hours.
Covers recent advances in immunochemistry and immunobiology. Topics include structure and function of antibodies, hybridoma systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoimmunity, and cancer. Prerequisite: BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor. LEC.

BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Hours.
Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesins, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in biochemistry, or consent of instructor. LEC.

BIOL 814. Advanced Molecular Virology. 2 Hours.
The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics and a course in virology, or consent of instructor. LEC.

BIOL 815. Advanced Molecular Genetics. 2 Hours.
A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor. LEC.

BIOL 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor. SEM.

BIOL 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Hours.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as CHEM 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student. SEM.

BIOL 818. Biometry I. 5 Hours.
The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra. LEC.

BIOL 841. Biometry I. 5 Hours.
The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra. LEC.

BIOL 848. Phylogenetic Methods. 4 Hours.
A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor. LEC.

BIOL 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

BIOL 890. Advanced Study in Microbiology. 1-10 Hours.
Original investigation by students at the master's degree level. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Ten or more hours of microbiology and consent of department. RSH.

BIOL 895. Human Genetics. 3 Hours.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics. LEC.
BIOL 899. Master’s Thesis. 1-10 Hours.
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory progress/limited progress/no progress basis. THE.

BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Hour.
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission. LEC.

BIOL 902. Graduate Seminar in Molecular, Cellular, and Developmental Biology. 1 Hour.
Advanced course examining current research topics in molecular, cellular, and developmental biology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental permission. SEM.

BIOL 905. Advanced Molecular Genetics. 1-3 Hours.
A review of current literature in molecular genetics. RSH.

BIOL 906. Advanced Genetics. 1-3 Hours.
May be repeated for credit up to six hours. Review of current literature and genetic theory of selected topics such as population, molecular, quantitative, and physiological genetics. RSH.

BIOL 918. Modern Biochemical and Biophysical Methods. 4 Hours.
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 817, or permission of instructor. LEC.

BIOL 925. Research Grant Proposal Preparation. 3 Hours.
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantsmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 943. Multivariate Data Analysis. 3 Hours.
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: Knowledge of elementary matrix algebra. LEC.

BIOL 944. Topics in Quantitative Ecology: _____, 1-3 Hours.
Presentation and discussion by instructor and students of mathematical and statistical concepts in ecology. Topics are selected from texts or sets of readings. LEC.

BIOL 950. Evolutionary Mechanisms. 3 Hours.
Reading and discussions of evolutionary mechanisms from the genetic, ecologic, and systematic viewpoints. Prerequisite: BIOL 412. LEC.

BIOL 952. Introduction to Molecular Modeling. 3 Hours.
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. Prerequisite: Graduate standing or consent of instructor. LEC.

BIOL 985. Advanced Study. 1-10 Hours.
Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis. RSH.

BIOL 999. Doctoral Dissertation. 1-12 Hours.
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Master of Science in Biochemistry and Biophysics

Molecular Biosciences Masters Programs

Molecular Biosciences is an interdisciplinary group of faculty, postdoctoral fellows and graduate students who perform cutting edge research across a wide range of areas, including biochemistry, biophysics, structural biology, bioinformatics, cancer biology, genetics, genomics, immunology, microbiology, virology, neurobiology, molecular, cellular and developmental biology. Our researchers investigate fundamental biological and biomedical problems on all levels, from molecules to cells to organisms. Our research labs collaborate to solve complex questions using a range of approaches, and make use of the world-class core facilities at KU. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and graduate training in biology.

The department offers Master of Science degrees in Biochemistry and Biophysics, in Molecular, Cellular, and Developmental Biology (MCDB), and in Microbiology. General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website (http://molecularbiosciences.ku.edu/molecularbiosciences.ku.edu/). Detailed information about admission (http://molecularbiosciences.ku.edu/admissions/) to our graduate program, curricula (http://molecularbiosciences.ku.edu/Ph.D.-Overview/), and financial support (http://molecularbiosciences.ku.edu/stipend/) is also available.

Note that the various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs (http://catalog.ku.edu/liberal-arts-sciences/biology/) page.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Admission

The Department of Molecular Biosciences (http://molecularbiosciences.ku.edu/) recognizes the importance of investing in the careers of future biomedical scientists. We welcome graduate students into our vibrant scientific community, where they have the opportunity to become outstanding researchers and prepare for an exciting future in science.

All students seeking a graduate degree must submit a formal application to the Molecular Biosciences graduate program. Full information on the application process, and a link to apply online can be found on our website (http://molecularbiosciences.ku.edu/admissions/). Application materials for the Molecular Biosciences graduate program include:

1. An application form
2. 1 official copy of all academic transcripts (international students must also provide a translated copy);
3. A Curriculum Vitae or résumé (1 to 2 pages);
4. 3 letters of recommendation from qualified individuals using the Graduate Letter of Recommendation form;
5. A Statement of Research Interests and Goals. A strong statement will include: (a) A description of previous research experiences, if applicable, discussing how these have prepared you for graduate school both professionally and personally, (b) A discussion of your broad research interests, and (c) A description of your future career goals, discussing how a PhD from our department will help further these goals. (1-2 pages)
6. Application Fee
7. Non-native speakers of English must meet the English proficiency requirements for employment as a GTA/GRA: minimum TOEFL (iBT) SPEAKING score of 22, AND all other parts scores at least 20; or IELTS SPEAKING score of 8, with no other part score below 5.5. Scores must be less than 2 years old from the time of initial enrollment.

More information can be found here: https://gradapply.ku.edu/english-requirements (https://gradapply.ku.edu/english-requirements/)

GRE scores are not required for your application. You may submit your official GRE scores if you feel it will help the admissions committee better understand your academic capabilities. But electing not to submit scores will not impact your chance of admission.

Complete applications received by December 1st are reviewed by the Molecular Biosciences graduate admissions committee. Admission into our program is competitive, and we receive a large number of applications each year. Students will be informed of admission decisions early in the new year, admissions decisions are finalized by April 15, and newly admitted students matriculate in August.

Our holistic evaluation is based on several criteria, including grades, the strength of recommendation letters, previous research experience, and the fit of your career goals with our educational program.

The department is committed to enhancing diversity (https://molecularbiosciences.ku.edu/dei-statement/) in the life sciences, encourage participation from individuals with diverse life experiences, and strive to foster an inclusive research and training environment for all our faculty, students, and staff.

All supporting documentation should be uploaded online when you apply. If this is not possible, please send documentation to:

Department of Molecular Biosciences
Haworth Hall
1200 Sunnyside Ave., Room 2034
Lawrence, KS 66045

M.A. Degree Requirements:
Biochemistry and Biophysics
General Requirements for All M.S. Students

Refer to each discipline for specific course requirements. General requirements include

1. A minimum of 30 hours of graduate credit;
2. A minimum of 1 laboratory rotation during the first semester of graduate study;
3. Enrollment every semester in BIOL 701 Topics in Molecular Biosciences Seminar;
4. Completion of the following courses: BIOL 807 Graduate Molecular Biosciences and BIOL 817 Rigor, Reproducibility, and Responsible Conduct in Research.
5. A graduate committee established by the beginning of the spring semester of the first year;
6. A minimum of 1 annual graduate committee meeting until completion of the degree.

The following thesis options are available:

1. Write a thesis resulting from original research on a laboratory problem.
2. Publish a research paper in a national, refereed journal. Acceptance of the paper for publication constitutes publication for conferral of the degree.
3. Write a library thesis on a topic approved by the student’s graduate committee.

Specific M.S. Requirements:

7. Non-native speakers of English must meet the English proficiency requirements for employment as a GTA/GRA: minimum TOEFL (IBT) SPEAKING score of 22, AND all other parts scores at least 20; or IELTS SPEAKING score of 8, with no other part score below 5.5. Scores must be less than 2 years old from the time of initial enrollment.

More information can be found here: https://gradapply.ku.edu/english-requirements (https://gradapply.ku.edu/english-requirements/)

GRE scores are not required for your application. You may submit your official GRE scores if you feel it will help the admissions committee better understand your academic capabilities. But electing not to submit scores will not impact your chance of admission.
Complete applications received by December 1st are reviewed by the Molecular Biosciences graduate admissions committee. Admission into our program is competitive, and we receive a large number of applications each year. Students will be informed of admission decisions early in the new year, admissions decisions are finalized by April 15, and newly admitted students matriculate in August.

Our holistic evaluation is based on several criteria, including grades, the strength of recommendation letters, previous research experience, and the fit of your career goals with our educational program.

The department is committed to enhancing diversity (https://molecularbiosciences.ku.edu/dei-statement/) in the life sciences, encourage participation from individuals with diverse life experiences, and strive to foster an inclusive research and training environment for all our faculty, students, and staff.

All supporting documentation should be uploaded online when you apply. If this is not possible, please send documentation to:

Molecular, Cellular, and Developmental Biology
General Requirements for All M.S. Students

Refer to each discipline for specific course requirements. General requirements include

1. A minimum of 30 hours of graduate credit;
2. A minimum of 1 laboratory rotation during the first semester of graduate study;
3. Enrollment every semester in BIOL 701 Topics in Molecular Biosciences Seminar;
4. Completion of the following courses: BIOL 807 Graduate Molecular Biosciences and BIOL 817 Rigor, Reproducibility, and Responsible Conduct in Research;
5. A graduate committee established by the beginning of the spring semester of the first year;
6. A minimum of 1 annual graduate committee meeting until completion of the degree.

The following thesis options are available:

1. Write a thesis resulting from original research on a laboratory problem.
2. Publish a research paper in a national, refereed journal. Acceptance of the paper for publication constitutes publication for conferral of the degree.
3. Write a library thesis on a topic approved by the student’s graduate committee.

Specific M.S. Requirements:

Electives to satisfy the 30-hour course requirement. Electives are determined in consultation with the graduate advisor and graduate committee.

Doctor of Philosophy in Biochemistry and Biophysics

Molecular Biosciences Doctoral Programs

Molecular Biosciences is an interdisciplinary group of faculty, postdoctoral fellows and graduate students who perform cutting edge research across a wide range of areas (http://molecularbiosciences.ku.edu/research/), including biochemistry, biophysics, structural biology, bioinformatics, cancer biology, genetics, genomics, immunology, microbiology, virology, neurobiology, molecular, cellular and developmental biology. Our researchers investigate fundamental biological and biomedical problems on all levels, from molecules to cells to organisms. Our research labs collaborate to solve complex questions using a range of approaches, and make use of the world-class core facilities at KU. The Department of Molecular Biosciences at the University of Kansas is an excellent environment for research and graduate training in biology.

The department offers Doctor of Philosophy degrees in Biochemistry and Biophysics (http://molecularbiosciences.ku.edu/biochemistry-graduate-program/), in Molecular, Cellular, and Developmental Biology (MCDB (http://molecularbiosciences.ku.edu/mcdb-graduate-program/), and in Microbiology (http://molecularbiosciences.ku.edu/microbiology-0/). General information about the department, our faculty and students, and alumni of our graduate programs can be found on our website (http://molecularbiosciences.ku.edu/). Detailed information about admission (http://molecularbiosciences.ku.edu/admissions/) to our graduate program, curricula (http://molecularbiosciences.ku.edu/Ph.D.-Overview/), and financial support (http://molecularbiosciences.ku.edu/stipend/) is also available.

Note that the various B.A. and B.S. undergraduate degree programs in biology are listed at the Biology Undergraduate Programs (http://catalog.ku.edu/liberal-arts-sciences/biology/) page.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Admission

The Department of Molecular Biosciences (http://molecularbiosciences.ku.edu/) recognizes the importance of investing in the careers of future biomedical scientists. We welcome graduate students into our vibrant scientific community, where they have the opportunity to become outstanding researchers and prepare for an exciting future in science.

All students seeking a graduate degree must submit a formal application to the Molecular Biosciences graduate program. Full information on the application process, and a link to apply online can be found on our website (http://molecularbiosciences.ku.edu/admissions/). Application materials for the Molecular Biosciences graduate program include:

1. An application form
2. 1 official copy of all academic transcripts (international students must also provide a translated copy);
3. A Curriculum Vitae or résumé (1 to 2 pages);
4. 3 letters of recommendation from qualified individuals using the Graduate Letter of Recommendation form;
5. A Statement of Research Interests and Goals. A strong statement will include: (a) A description of previous research experiences, if applicable, discussing how these have prepared you for graduate school both professionally and personally, (b) A discussion of your broad research interests, and (c) A description of your future career goals, discussing how a PhD from our department will help further these goals. (1-2 pages)
6. Application Fee
7. Non-native speakers of English must meet the English proficiency requirements for employment as a GTA/GRA: minimum TOEFL (iBT) SPEAKING score of 22, AND all other parts scores at least 20; or IELTS SPEAKING score of 8, with no other part score below 5.5. Scores must be less than 2 years old from the time of initial enrollment.

More information can be found here: https://gradapply.ku.edu/english-requirements

GRE scores are not required for your application. You may submit your official GRE scores if you feel it will help the admissions committee better understand your academic capabilities. But electing not to submit scores will not impact your chance of admission.

Complete applications received by December 1st are reviewed by the Molecular Biosciences graduate admissions committee. Ph.D. Degree Requirements

Biochemistry and Biophysics

General requirements for all Molecular Biosciences Ph.D. Students

Students should be familiar with departmental expectations associated with their degree. We recommend reviewing the MB Graduate Student Guide (https://molecularbiosciences.ku.edu/current-graduate-students-0/) which provides additional detail on departmental policies, recommendations, and requirements.

1. Complete a common first-year curriculum (see below). This includes BIOL 817 which satisfies both the responsible scholarship and the research skills requirements.
2. Establish a graduate advisory committee during Fall of the second year of graduate study at the latest. This committee must meet a minimum of once each year.
3. From the start of the second year of graduate study, enroll in either BIOL 701 Cellular and Molecular Proteins or BIOL 905 Advanced Molecular Genetics, every semester.
4. To assist with development and writing of the orals research proposal, enroll in BIOL 925 Research Grant Proposal Preparation during the second year of graduate study.
5. Prepare an orals research proposal. Steps include: (a) have a graduate advisory committee meeting to discuss the specific aims of the orals proposal during the semester BIOL 925 is taken, (b) following approval of the aims, write the full proposal, (c) submit a full draft of the proposal to your readers (your major advisor, the Chair of your orals committee, and one other committee member) the semester following enrollment in BIOL 925, and (d) submit the final version of the proposal to your entire committee prior to the comprehensive orals examination.
6. Schedule the comprehensive orals examination between May 1 and June 30 of the second year of graduate study.
7. Complete at least two semesters of teaching as a GTA (Graduate Teaching Assistant) during the program.
8. Write a dissertation based on original research, provide the document to your graduate advisory committee for evaluation, and describe your research in a public oral presentation.
9. Complete the degree within seven years. (Exceptions to this requirement require a recommendation from the Director of Graduate Studies.)

Specific Ph.D. Requirements: Molecular, Cellular, and Developmental Biology

In addition to the required courses listed above, all MCDG PhD students are required to take a minimum of three (3) graduate-level courses (numbered 600 and above) that are collectively worth a minimum of nine (9) credits. All such classes must be completed by the end of the second year of graduate study. A number of acceptable classes are offered each year, and the specific classes each student takes will be decided upon in consultation with their research mentor and/or graduate advisory committee. Please see the graduate handbook for an up-to-date list of possible courses.

Graduate Certificate in Chemical Biology

Graduate Certificate in Chemical Biology

Through scientific progress our understanding of cellular systems has grown leading to a more nuanced appreciation of both these systems and associated disease processes. This knowledge has led to the formulation of a myriad new questions regarding the interactions of macromolecules within cells and the regulation of these interactions. The Certificate Program in Chemical Biology (http://chembio.ku.edu/) focuses on developing molecular tools necessary to probe these systems and explore new questions. In order to employ these tools, students require educational training program that hones their skills and provides a specialized environment within the laboratory of their research mentor. Multidisciplinary curricula that unite students around common goals empower students to acquire a working knowledge of disciplines outside their area of expertise. The resulting interdisciplinary experience paves the road to collaborative science driving broad advances in understanding human health. The program has participation of students and mentors from the College of Liberal Arts and Sciences (http://clas.ku.edu/) (primarily Chemistry (http://chem.ku.edu/) and Molecular Biosciences (http://molecularbiosciences.ku.edu/), the School of Pharmacy (http://pharmacy.ku.edu/) (primarily in Medicinal Chemistry (http://medchem.ku.edu/) and Pharmaceutical Chemistry (http://pharmchem.ku.edu/)) and the School of Engineering (https://engr.ku.edu/) (Bioengineering (https://bioengr.ku.edu/)).

About the Program

At the heart of the Certificate Program in Chemical Biology is an integrated academic curriculum that provides participating students with a working knowledge of the key concepts and methods of the interdisciplinary field of Chemical Biology. Students with strong chemical or biological backgrounds will reap the benefits of collaborative exposure to modern techniques and theories in disciplines across the chemical biology interface. Students are required to:

- Follow a defined course sequence designed to provide a working knowledge across the chemical biology interface. The curriculum includes a flagship course defining the principles and practice of chemical biology. A fundamental part of the curriculum is the seminar course entitled "Careers in the Biomedical Sciences," which highlights opportunities for doctoral graduates in outside academia and industry. The training also emphasizes the completion of rigorous, reproducible, transparent and ethical research.
- Organize and participate in the annual Biomedical Sciences Symposium. This symposium includes oral presentations by the students on their research and a lecture by an internationally recognized keynote speaker in a research area at the chemistry/biology interface. The students also lead an afternoon interdisciplinary poster session that is open to all students.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The Certificate Program is open to all graduate students at KU. The training platform will provide students with an integrated educational training program that hones their skills and provides a broad wealth of information for career development. This program extends beyond the standard knowledge and capabilities developed in the independent departmental doctoral programs. Candidates in this program develop a working knowledge of both advanced chemistry and advanced biochemistry/biology, which supplements the more specialized environment within the laboratory of their research mentor. Underrepresented minority students and students with disabilities are encouraged to apply. Any necessary accommodations for students with disabilities are made with the assistance of the Office of Student Access Services (http://access.ku.edu/).

Please see the Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/) policy for information on admission requirements. Applications may be submitted at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).
Certificate Requirements
Course requirements: Students must complete 5 courses for a total of 14-17 graduate credit hours.

Museum Studies Program

Museum Studies Graduate Program
These are exciting and challenging times for museums -- longstanding premises are being questioned, and many established practices are being reconsidered. Museum professionals today work in an environment far different than that of even a few years ago. Emerging technologies now allow museums to bring their collections and their programs to audiences well beyond the confines of museum buildings. With this expanded reach, museums are preparing for dramatic changes in the age, ethnicity, education, and economic status of their audiences. Exhibitions and public programs are evolving; more than ever, educators, curators, and designers are seeking ways to engage visitors in complex issues of broad concern. Behind the scenes, collection stewardship is being reevaluated in response to practical, political, and ethical concerns. Additionally, unprecedented scholarly attention is being directed toward the ways in which museums have acquired their collections, represented their subjects, and engaged with the public. In the midst of this transformation, long-standing assumptions about museums’ public value have been called into question, requiring museum leaders to craft new collaborations and community partnerships in order to survive.

To advance and thrive in this dynamic environment, twenty-first century museum professionals will need knowledge informed by practice, imagination tempered by rigor, and leadership stimulated by collaboration. This is what we can offer at the University of Kansas. Students take advantage of the superb facilities at KU, including the Dole Institute of Politics, Biodiversity Institute & Natural History Museum, Spencer Museum of Art, Spencer Research Library, and Wilcox Classical Museum, as well as nearby historical agencies, specialized libraries, and museums.

KU Museum Studies offers a master's program, a joint master's program with African & African-American Studies, and a graduate certificate program. Students who are interested in enrolling in graduate-level coursework in the Museum Studies Program without admission to a formal graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See our admission webpage (http://museumstudies.ku.edu/non-degree-seeking/) for further details.

Courses

MUSE 177. First Year Seminar: ______. 3 Hours GE11.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Museum Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. SEM.

MUSE 301. Museums and Society: Past, Present, Future. 3 Hours H.
An introduction to museums and the field of museum studies. Using short lectures, discussion, laboratory exercises, field trips, and guest speakers, students will explore the history, role, and function of museums including types, dimensions, creation and management of collections, exhibition development, administration, and visitor experiences. Includes instruction and practice in writing for a variety of museum contexts and audiences. Designed for students interested in museums and curious about museum careers. LEC.

MUSE 400. Directed Readings in Museum Studies. 1-3 Hours.
Directed reading in an area of Museum Studies for which there is no course in the Museum Studies program or in cooperating departments and in which a member of the faculty has expertise. Prerequisite: Consent of instructor. IND.

MUSE 480. Special Topics in Museum Studies: ______. 1-3 Hours.
Courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Instructor permission usually required. Prerequisite: Varies by section and instructor. LEC.

MUSE 580. Special Topics in Museum Studies: ______. 1-3 Hours.
Courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Instructor permission may be required. Prerequisite: Successful completion of a History, Art History, Anthropology or Museum Studies course numbered below 500, or permission of instructor. LEC.

MUSE 699. Anthropology in Museums. 3 Hours S.
The course reviews the history of archeological, ethnographic, physical anthropological and other types of collections. It also considers current issues facing anthropologists, such as: contested rights to collections and the stories that accompany them; representation and interpretation of cultures; art and artifact; conceptualization, design and building of exhibitions; and anthropological research and education in the museum. (Same as ANTH 699.) Prerequisite: ANTH 150 or ANTH 108 or consent of instructor. LEC.

MUSE 701. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL
MUSE 703. Introduction to Museum Exhibits. 3 Hours.
Presentation of principles and practices of exhibit management, design, and production. Topics will include developing a master plan for museum exhibits; concept development; design, installation, and maintenance of exhibits; design theory; design process; label writing and editing; selection of materials; architectural requirements and building codes; cost estimating; publicity; security; and exhibit evaluation. Consideration will be given to exhibition problems in public and private museums in the areas of anthropology, art, history, natural history, and technology. (Same as AMS 700, BIOL 787, GEOL 781, and HIST 723.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

MUSE 704. Introduction to Collections Management and Utilization. 3 Hours.
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, ANTH 798, BIOL 798, GEOL 785, and HIST 725.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

MUSE 705. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, GEOL 784, and HIST 721.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

MUSE 706. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will be also be considered. (Same as AMS 714, BIOL 700, GEOL 780, and HIST 722.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

MUSE 707. Practical Archival Principles. 3 Hours.
Study of the principles and practices applicable to the preservation, care, and administration of archives and manuscripts. Practical experience will be an integral part of this course. (Same as HIST 727.) LEC.

MUSE 710. Natural Sciences Curation and Collections Management. 3 Hours.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloguing, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum’s paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art’s ethnographic collections. Student projects will involve one of the museum’s collections with the opportunity for hands-on experience. (Same as BIOL 706.) LEC.

MUSE 780. Special Topics: ______. 1-3 Hours.
Advanced courses on special topics in museum studies, given as need arises. Lectures, discussions of readings, and guest speakers. Topic for semester to be announced. Prerequisite: Graduate standing in Museum Studies Program or permission of instructor. LEC.

MUSE 782. Seminar in Museum Topics: ______. 1-3 Hours.
In-depth examination of specific topics currently of concern to museums and museum professionals. Topic for semester to be announced. Prerequisite: Graduate standing in Museum Studies Program, or permission of instructor. LEC.

MUSE 790. Advanced Study. 1-3 Hours.
Individual research in a specialized topic not ordinarily treated in a Museum Studies core course for which there is a member of the graduate faculty competent and willing to direct a research project. Prerequisite: Consent of instructor. RSH.

MUSE 792. Directed Readings. 1-3 Hours.
Directed reading in an area of Museum Studies in which there is no particular course in the Museum Studies program or in cooperating departments but in which there is a member of the graduate faculty competent and willing to direct a program study. Prerequisite: Consent of instructor. IND.

MUSE 799. Museum Internship. 1-6 Hours.
Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, ANTH 799, and GEOL 723.) INT.

MUSE 801. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, BIOL 788, GEOL 782, and HIST 720.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

MUSE 802. Culture of Museums. 3 Hours.
Culture of Museums is the second of a 2-semester course sequence, and highlights classic texts and current directions in museum studies. It is organized around the core conceptual domains of museums - Materiality, Representation, and Engagement. The course establishes the framework for understanding changes on the horizon for museums, and enables students to be familiar with classic texts in the field. Museums of art, history, natural history, are included, as well as museums large and small. Each week the class will read assigned articles or chapters and will be prepared to discuss and analyze the assignment. In addition, each week there will be several monographs assigned that elaborate and inform the topic. One student will take responsibility for each week and will lead discussion concerning the material. The student will familiarize themselves with the work, and should meet with the instructor before class to structure their presentation. In class, the student will lead discussion and emphasize key elements in the work. SEM.

MUSE 803. Seminar in Current Museum Topics. 3 Hours.
This course has two core objectives - (1) to consider current issues in and around museums that will have a bearing on the field’s future, and (2) to be a springboard for museum studies students to formulate and make substantial headway on their required final projects. Therefore, in addition to each week’s readings assigned by the instructor, each student will have several opportunities to select the readings for the rest of the
class. The student-assigned readings will be relevant to each student's research, and will (1) help students acquire a more nuanced and critical grasp of works that are key to their research by getting feedback from the rest of the class; and (2) build the class's general awareness of important scholarship in the field. SEM.

Master of Arts in Museum Studies

Museum Studies M.A. Program

The KU master's degree in Museum Studies is a 36-credit-hour program built around 3 fundamental components – Foundational courses and experiences, Conceptual inquiry and application, and Professional specialization and expertise. Students who earn the M.A. in Museum Studies will have acquired mastery of the professional and conceptual dimensions of museums in the broadest sense, while also developing the specialized skills necessary for success in the field.

The graduate curriculum in Museum Studies provides a comprehensive overview of the discipline, opportunities for mastering core components of museum practice, avenues for exploring the interdisciplinary nature of museums, solid grounding in current issues facing museums, and possibilities for research to develop new and innovative approaches in the field. The Museum Studies Program's core courses provide a foundation in the theories, history, techniques, and problems common to museums, historical agencies, and related institutions as well as the specialized operations of such institutions. Students also receive classroom and field training in methods and subject matter within their chosen professional specialty: Leadership and Management, Interpretation, Collections, and Community Connections. The Museum Studies Program also has well-established connections with academic disciplines such as American Studies, Anthropology, Geology, Art History, History, and Natural History, and students have many opportunities to take courses in those fields. Museum Studies graduates are well-equipped to undertake professional and leadership responsibilities in museums, historical agencies, and related institutions.

Graduates (http://museumstudies.ku.edu/alumni/) of the program work as curators, archivists, directors, exhibit designers, collection managers, and much more at museums across the country and around the world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Museum Studies M.A. Program

Students are admitted to the M.A. program only in the fall semester. The deadline for submitting applications is January 15. The Museum Studies Admissions Committee seeks to notify applicants of admission decisions by early March. Only in exceptional circumstances will we consider applications submitted after the deadline.

Eligibility criteria for admission to the M.A. program follow Graduate Studies' admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to regular graduate status in the program, a student must hold a bachelor's degree and have earned at least a B (3.0) grade-point average in previous academic work. Acceptance in the program is determined by the Museum Studies Admissions Committee. A full list of the required application materials can be found on the Museum Studies website (http://museumstudies.ku.edu/how-apply/).

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

M.A. Degree Requirements

The M.A. degree in museum studies requires 36 credit hours at the graduate level. Students in the Museum Studies program will complete the following:

1. The Museum Studies Core - 9 credit hours
2. Museum Professional Areas - 9 credit hours
3. Museum Conceptual Domains - 6 credit hours
4. Electives - 9 credit hours
5. Museum Experience (Internship) - 3 credit hours
6. Final Product & Examination

1. Museum Studies Core (9 credit hours)

The Museum Studies Core ensures that all Museum Studies students gain a comprehensive understanding of the theories, history, techniques, and problems common to museums, historical agencies and related institutions. The Capstone course, taken in a student's third semester of study, provides an avenue for students to conduct research or other creative activities that advance the discipline of museum studies.

<td>3</td>
</tr>
</tbody>
</table>

2. Museum Professional Areas (9 credit hours)

Students will develop expertise in one of the principal specialties of museum work by completing at least two courses in that area, at least one of which must be a Museum Studies (MUSE) course. Many courses in other departments could fulfill requirements; it is the responsibility of students, and their advisors, to ensure that individual courses meet program requirements based on the general relevance of the course and assurance that the student's work in the class will be applicable to museum studies by meeting with instructors and examining syllabi. Courses taken must be at the 500 level or above. The following lists include examples of courses that may fulfill the professional areas requirement.

<table>

</tr>
</tbody>
</table>

Examples of Courses in Other Departments and Programs:
4. Electives and Other Museum Studies Courses (9 credit hours)

Please see Museum Studies website for examples of possible courses.

5. Museum Experience (3 credit hours)

While enrolled in the Museum Studies program, students are required to gain at least 500 hours of museum experience, of which at least 250 hours must be in an approved, professionally supervised internship.

6. Final Product and Examination

Each student will be responsible for a final product, developed through research or other creative activity, that contributes to museum studies and demonstrates the student’s ability to engage conceptually and professionally with the discipline of museum studies.

Course Level Requirement

Students pursuing an M.A. in Museum Studies must take 50% or more of their coursework at the 700 level or above. Core courses count toward this requirement.

Joint Degree: MA in Museum Studies and African and African-American Studies

Museum Studies and African and African-American Studies offer joint master’s degrees with coordinated curricula so students are able to complete two M.A. degrees in three years. Fifteen graduate credit hours are applied to both programs, allowing students to complete a 33-credit-hour AAAS degree and a 36-credit-hour Museum Studies degree with just 54 graduate credits.

This program of study is designed to enhance and diversify opportunities for graduate students who are motivated to enter the cultural heritage field as specialists in African and African-American Studies. This three-year joint program allows students expand their contacts with faculty, enhance their professional networks, and deepen their knowledge of both fields of study.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Students seeking admission to the joint degree will apply to both the Museum Studies M.A. and the African & African-American Studies M.A. separately and will be expected to meet the established admission requirements of each program.

Museum Studies M.A. - Admission Requirements (http://museumstudies.ku.edu/how-apply/)
African & African-American Studies | Admission Requirements

http://afs.ku.edu/admission/

Students who have begun course work in either Museum Studies or African & African-American Studies can apply to be a joint degree student prior to completing all course work requirements for the first degree. In consultation with each department's Director of Graduate Studies, they may be able to receive credit for course work already completed. However, the student may be required to take more than the required 54 credit hours of course work to obtain both degrees if the application for admission to the second degree program is submitted after the student has completed courses that will not count toward the second program's requirements.

Please see the Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/) policy for additional information on admission requirements. Applications may be submitted through the Graduate Admissions website (https://gradapply.ku.edu/apply/).

Students completing the joint degree take all of the required courses in each of the respective programs, as well as fulfilling each program's requirements to gain a breadth of knowledge. Coordination in advising between the two programs enables students to take courses that satisfy the degree needs for both programs. To earn both degrees, students complete 54 graduate credit hours, 15 of which are applied to both programs. Because the required courses are offered regularly, students are able to complete the required courses in the first four semesters of the program, using the final two semesters to complete the remaining credit hour requirements. The programs' curricular requirements follow; further details on program expectations are available in the respective Graduate Student Handbooks.

<tbody>
<tr>
<td>6. Joint Degree Electives</td>
<td>15</td>
<td></td>
</tr>
</tbody>
</table>

Any graduate-level MUSE or AAAS course may count as an elective. Out-of-field courses must be approved by the Directors of Graduate Study for both programs.

7. Final Project or Thesis

Students completing the joint degree program are required to defend either a final project or thesis in their final semester. The student should consult with their African & African-American Studies and Museum Studies faculty advisors to identify a project or thesis topic that effectively incorporates both areas of study. Faculty advisors from both programs will oversee and evaluate the project or thesis. Students who choose to complete a thesis must enroll in 3 credit hours of AAAS 899 in their final semester in lieu of an elective course. Students who choose to complete a final project will take 15 credit hours of joint degree electives as described above.

Each student will successfully defend their final project or thesis as their final master's examination. The final exam committee, chosen by the student, must have at least four members; at least two from the Museum Studies area and at least two from the African & African-American Studies area.

If a student decides to complete only the MUSE M.A. or AAAS M.A. and withdraw from the other program, they must complete all requirements for the stand-alone degree.

Course Level Requirement

Students pursuing a Joint M.A. in Museum Studies and African & African-American Studies must take 50% or more of their coursework at the 700 level or above. Core courses and thesis hours (if applicable) count toward this requirement.
Graduate Certificate in Museum Studies

Graduate Certificate in Museum Studies

The course of study leading to the Graduate Certificate in Museum Studies comprises 15 credit hours at the graduate level. It is designed to provide students with a solid grounding in the histories, concepts, and practices of the discipline of museum studies. The certificate program enables students to integrate knowledge of museum studies into their own academic disciplines or professional training.

The Museum Studies core curriculum is the basis for the Graduate Certificate, which emphasizes the essential interdisciplinary and collaborative nature of museum work by drawing on a range of departments in the University. Students in the program gain knowledge in preparation for doctoral study, as well as for employment in museums and related fields such as historic preservation, cultural resource preservation, archives, and government agencies.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Graduate Certificate in Museum Studies

Eligibility criteria for admission to the certificate program follow Graduate Studies' admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to the program, an applicant must hold a bachelor's degree and have earned at least a B (3.0) grade-point average in previous academic work. Completion of the program will appear on the graduate transcript. For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted through the Graduate Admissions website (https://gradapply.ku.edu/apply/).

Application requirements differ for current KU students versus non-KU students. Please visit the Museum Studies website (http://museumstudies.ku.edu/admissions/) for a full list of the required application materials. Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

The Museum Studies Graduate Certificate will require 15 hours of course work including a 3 credit (minimum) research practicum or internship. The remaining 9 hours will be selected from courses in which there is a demonstrable component that has relevance to museum studies.

Choose 1 course in a museum conceptual domain 1

The conceptual domains of museum work address in depth the conceptual and theoretical foundations of museums. Courses that emphasize conceptual domains will place museological subjects in broader historical and intellectual frameworks. Students may take courses which may be offered in one or several disciplines. Courses will be selected based on the general relevance of the course, and assurance that the student's work in the class will be applicable to museum studies. Please see the Museum Studies website for examples of possible courses.

Research, Practicum or Internship 2

3

Total Hours 3

1 To satisfy the requirement of 1 course in a museum conceptual domain, students must have approval of their advisor.

Department of Philosophy

Why study philosophy?

In philosophy we ask big, important questions. While asking such questions is easy, answering them is difficult. Because these questions are often abstract and vague, it is necessary to use precise reasoning and analysis to clarify what exactly it is we are asking. Only then can we attempt to develop answers. For example:

- What is the morally right thing to do?
- What is the nature of the mind?
- When can we know something, rather than merely believing it?
- Do the sciences exhaust what can be known about the natural world?
- What is justice?
- What assumptions do we make when we try to answer questions like these?
- Plus many, many others...

In studying philosophy, you will learn what others have thought about life's big questions. You will also learn to challenge those views, and to develop your own thoughts in a precise, logical manner. Philosophy will help you develop critical thinking skills, enabling you to analyze the underlying logic and assumptions in arguments about a variety of topics. This is a skill that generalizes to virtually every area of life.

Undergraduate Programs

The department offers a range of courses in philosophy, both in the main systematic divisions of the subject and in its major historical periods. Philosophy courses are often suitable not only for majors but also for
students whose main interests lie in other areas. Many philosophy courses satisfy requirements in other degree programs in the College and professional schools.

**Argument and Reason Requirement**

PHIL 148 and PHIL 310 each meet the College argument and reason requirement for the B.A. and B.G.S. degrees.

**Interdisciplinary Course Work**

The department offers courses in applied ethics, ethics, feminism, logic, and the philosophy of science to fit the needs and interests of nonmajors. Many of these may be taken without prerequisites. The nonmajor may wish to supplement work in other fields or schools with a series of related courses in philosophy. Some suggested programs to be supplemented with this type of interdisciplinary course work are business, prelaw, premedicine, and engineering; classics, art history, and literature; and natural sciences and mathematics. Lists of philosophy courses relating to these areas are available. Consult the director of undergraduate studies.

**Graduate Programs**

The department offers graduate programs in philosophy leading to M.A. and Ph.D. degrees. With the School of Law, the department also offers a joint program in law and philosophy leading to a J.D./M.A. Our faculty (http://philosophy.ku.edu/faculty/) is dynamic, professionally active, and committed to excellence in scholarship and teaching. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation.

**Departmental Funding**

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year (9 months) and come with a competitive salary, a 100% tuition waiver, and qualify the student for University-subsidized group health insurance. Appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas.

GTAs in the department receive thorough training, close mentoring, and the opportunity to teach courses in a variety of fields within philosophy, providing them with a strong base of teaching experience upon entering the job market.

**Additional Funding**

There are also university fellowships for truly outstanding students. Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for KU graduate students.

**Graduate Non-Degree Seeking Status**

Students who are interested in enrolling in graduate-level coursework in the Department of Philosophy without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s webpage (https://philosophy.ku.edu/nds-overview/) for further details.

**Courses**

**PHIL 140. Introduction to Philosophy. 3 Hours HR GE11/GE3H / H.**

An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge. LEC.

**PHIL 141. Introduction to Philosophy Honors. 3 Hours HR GE11/GE3H / H.**

An introductory examination, based primarily on writings of major philosophers, of such central philosophical problems as religious belief, the mind and its place in nature, freedom and determinism, morality, and the nature and kinds of human knowledge. Prerequisite: Open only to students in the University Honors Program or by consent of department. LEC.

**PHIL 148. Reason and Argument. 3 Hours GE11/GE3H / H.**

An introduction to the theory and practice of logical analysis. Special emphasis is placed upon the logical appraisal of everyday arguments. LEC.

**PHIL 150. Philosophical Communication. 3 Hours GE22 / S.**

This course provides an introduction to philosophy, with a focus on the traditional philosophical practice of oral communication and argument. Through exploration of perennial philosophical questions (e.g., Are there different ways of knowing? What makes for a good life? Could computers have minds? Are we obligated to obey the law? What makes you the same person over time?), students develop their ability to participate in various forms of philosophical communication. In this course, students have the opportunity to teach course material to peers, engage in class debates over philosophical issues, and craft short presentations exploring a facet of the course topic. LEC.

**PHIL 160. Introduction to Ethics. 3 Hours HR AE51/GE11/GE3H / H.**

An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice. LEC.

**PHIL 161. Introduction to Ethics Honors. 3 Hours HR AE51/GE11/GE3H / H.**

An introductory study of the nature of morality and of philosophical bases for the assessment of actions, agents, and institutions. Special emphasis will be placed upon the views of such important philosophers as Aristotle, Hume, Kant, and Mill. Some attention will be paid to applications of moral theory to practice. Prerequisite: Open only to students in the University Honors Program or by consent of department. LEC.

**PHIL 170. The Meaning of Life. 3 Hours GE11/GE3H / H.**

This course introduces central questions about the meaning of life. The question itself may be taken in a number of ways: Why is there a universe that contains life? What is the nature or purpose of human being and persons? What is the point of our existence? Is it possible to lead a meaningful life? This course examines these and other questions relating to meaning in life, such as our place in the physical universe, the possibility and significance of God’s existence, the nature of human persons (including the relation between, and nature of, body, mind, and consciousness), what death tells us about the nature of life and whether it is appropriate to fear death, the nature of ‘the good life’ (including the import for ‘the good life’ of knowledge, success, pleasure, health, friendship, love, in both our physical and mental life, etc.), the nature of value and its relation to meaning in life, and our obligations to other beings. LEC.

**PHIL 177. First Year Seminar: _____. 3 Hours GE11 / U.**

A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Philosophy. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics
are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LAB.

PHIL 180. Introduction to Social and Political Philosophy. 3 Hours HR AE51/GE3H / H.
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty. LEC.

PHIL 181. Introduction to Social and Political Philosophy, Honors. 3 Hours HR AE51/GE3H / H.
An introductory study, based primarily on classic philosophical texts, of such central issues as the justification of governmental authority, the social sources of power, the nature of a just distribution of social resources, competing conceptions of human nature, and the proper limits of governmental interference with individual liberty. Prerequisite: Open only to students in the University Honors Program or by consent of department. LEC.

PHIL 200. Study Abroad Topics in Philosophy: ____. 1-6 Hours H.
This course is designed for the study of special topics in Philosophy. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

PHIL 310. Introduction to Symbolic Logic. 3 Hours GE11/GE3H / H.
An introduction to the theory and practice of elementary symbolic logic. Special emphasis will be placed upon the logical analysis of mathematical proof and upon a proof of the consistency of elementary logic. LEC.

PHIL 320. Philosophical Issues in the Life Sciences. 3 Hours HR AE51/GE3H / H.
A philosophical analysis of theoretical and ethical issues that arise in the practice of the life sciences. Discusses the conceptual foundation of the life sciences—evolutionary theory and genetics. Critically explores the use of statistical and non-human-animal models. Examines ethical issues including problems that arise in human and other animal experimentation, obligations to the environment, proper use of patents, and conflicts in professional duties. LEC.

PHIL 330. Philosophical Issues in Religion. 3 Hours GE3H / H.
This course will consider, from a philosophical perspective, some of the problems in religion which arise in the development of “Natural Theology” broadly conceived. (Same as REL 380.) LEC.

PHIL 355. Moral Issues in Political Governance. 3 Hours HR AE51.
This course offers a survey of competing ethical frameworks and applies them to issues in governmental policy and political activity. Topics may include the duties and virtues of citizenship, conflict of interest, public health policy, immigration, corruption, the value of patriotism, and conflicts between private and public morality. This course leaves aside debates about what sort of political framework to adopt and focuses on moral issues that matter from most any political perspective. LEC.

PHIL 360. Moral Issues in Business. 3 Hours AE51 / H.
After a brief survey of techniques of moral argument and analysis, particular moral issues related to business will be discussed. These will include such topics as advertising, conflict of interest, personal and corporate responsibility, codes of conduct, private property, strikes, just wage, and the tension between moral ideals and business pressures. LEC.

PHIL 365. Moral Issues in the Professions. 3 Hours H.
An analysis of the nature and justification of standards of professional conduct. Issues of professional behavior that concern more than one profession such as fidelity to a client’s interests, candor, confidentiality, obligations to human research subjects, obligations to uphold professional standards, professional strikes, and affirmative action will be discussed. LEC.

PHIL 368. Moral Issues in Sports. 3 Hours H.
This course is a philosophical investigation of the nature and value of sports. Provides students with an overview of ethical theory and considers principled answers to questions about the values of sports and about how those values can be sustained or demeaned. Students debate a variety of live controversies in sports today such as drugs, cheating, sexism, racism, the role of sports in educational institutions, Title IX, commercialization, and violence. LEC.

PHIL 369. Moral Issues in Warfare. 3 Hours H.
This course is a philosophical investigation of the nature and ethical dimensions of warfare and the use of force. It provides students with an overview of ethical theory and considers answers to questions about the principles of just war theory, the values served by these principles, and about how those values can be sustained or demeaned. Students debate a variety of live controversies in warfare today such as just causes for war, when threats ought to be deemed imminent, collateral damage and the nature of non-civilians on the battlefield, and terrorism. LEC.

PHIL 370. Moral Issues in Medicine. 3 Hours H.
After a brief survey of techniques of moral argument and analysis, particular moral issues related to medicine will be discussed. The justification and limits of some rules of professional conduct that deal with such matters as confidentiality, truth-telling, and protection of medical research subjects will be considered. Issues relating to death and dying in medicine such as abortion, euthanasia, and the refusal of life-saving medical therapy also will be discussed. LEC.

PHIL 375. Moral Issues in Computer Technology. 3 Hours AE51 / H.
After surveying the nature of ethics and morality and learning some standard techniques of moral argumentation, we shall examine such topics as: property and ownership rights in computer programs and software; privacy in computer entry and records; responsibility for computer use and failure; the “big brother” syndrome made possible by extensive personal data banks; censorship and the world-wide web; computer illiteracy and social displacement; and ethical limits to computer research. Prerequisite: EECS 168 or permission of instructor. LEC.

PHIL 380. Environmental Ethics. 3 Hours AE51 / H.
After a brief survey of techniques of moral argument and analysis, particular moral issues related to the environment will be discussed. These will include such topics (one of which may be dealt with in depth) as animal rights, rights of future generations, wilderness preservation, population control, endangered species, and economics and public policy. Prerequisite: EVRN 148 or consent of instructor. LEC.

PHIL 381. Feminism and Philosophy. 3 Hours AE41/GE3H / H.
An examination of topics of philosophical interest that are important in the feminist movement such as the nature of sexism, the concept of sexual equality, the ethics of sexual behavior, the nature of love, feminist analyses of the value of marriage and family, the ethics of abortion, and justifications for preferential treatment of women. (Same as WGSS 381.) LEC.

PHIL 384. Ancient Philosophy. 3 Hours HR GE3H / H.
A survey of the thought of the principal philosophers of ancient Greece, with emphasis on the pre-Socratics, Plato, and Aristotle. LEC.
PHIL 386. Modern Philosophy from Descartes to Kant. 3 Hours HR GE3H / H.
A survey of the writings of some principal philosophers of the modern period as Descartes, Spinoza, Leibniz, Hobbes, Locke, Berkeley, Hume, and Kant. LEC.

PHIL 388. Analytic Philosophy: Frege to Quine. 3 Hours H.
An introduction to the principal figures in the philosophical tradition that forms the background to contemporary investigations in analytic philosophy of language. Particular attention will be paid to Frege, Russell, Wittgenstein, and Quine. Prerequisite: PHIL 310 or equivalent, or PHIL 310 may be taken concurrently. LEC.

PHIL 418. Introduction to Cognitive Science. 3 Hours S.
Examines the data and methodologies of the disciplines that comprise Cognitive Science, an inter-disciplinary approach to studying the mind and brain. Topics may include: consciousness, artificial intelligence, linguistics, education and instruction, neural networks, philosophy, psychology, anthropology, evolutionary theory, cognitive neuroscience, human-computer interaction, and robotics. (Same as LING 418, PSYC 418, and SPLH 418.) Prerequisite: Consent of instructor. LEC.

PHIL 499. Senior Essay. 3 Hours AE61 / H.
This course is required, in addition to regular major requirements, of those students wishing to work for departmental honors in Philosophy. Students wishing to enroll should first speak with the departmental adviser for majors. Prerequisite: Open to senior majors in Philosophy by consent of instructor. IND.

PHIL 500. Studies in Philosophy: ______. 1-6 Hours H.
(Topic, instructor, and specific prerequisite to be announced in Schedule of Classes.) A study of particular philosophical problems or thinkers not covered by other courses. The course may be offered concurrently by different instructors under different subtitles, and may, with the consent of the chair, be taken more than once if content varies. LEC.

PHIL 504. Philosophy of Sex and Love. 3 Hours H.
A discussion of philosophical issues such as the relation between love, autonomy, and friendship; heterosexual and homosexual relationships; marriage and adultery; rape and sexual harassment; prostitution; and pornography. LEC.

PHIL 506. Chinese Thought. 3 Hours NW AE42/GE3H / H/W.
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as EALC 642 and HUM 524.) Prerequisite: Eastern Civilization course, or a course in Asian history, or a distribution course in Philosophy. LEC.

PHIL 508. Early Greek Philosophy. 3 Hours H/W.
A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers, with some attention paid to the Sophists and the Hippocratic corpus. (Same as GRK 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor. LEC.

PHIL 555. Justice and Economic Systems. 3 Hours H.
An examination of important representative theories of the justness of an economic system, with particular attention paid to such institutions as private property, a market economy, means and relationships of production, and principles of distribution to individuals. The theorists under consideration include Locke, Adam Smith, Marx and Engels, contemporary utilitarians, Rawls, and Nozick. Prerequisite: A course in ethics or an introductory course in economics or in business. LEC.

PHIL 557. Kant. 3 Hours H.
A survey of the major works of Immanuel Kant, with attention to his critical method and its application to issues in theoretical philosophy, practical philosophy, aesthetics, or the philosophy of history. Prerequisite: PHIL 386. LEC.

PHIL 558. Seventeenth Century Philosophy. 3 Hours H.
The development of philosophy in the 17th century. Special attention will be paid to such major figures as Descartes, Malebranche, Spinoza, Leibniz, Elisabeth of Bohemia, Cavendish, Conway, Astell, Hobbes, and Locke. Prerequisite: PHIL 386 or consent of instructor. LEC.

PHIL 559. Eighteenth Century Philosophy. 3 Hours H.
The development of philosophy in the 18th century. Special attention will be paid to such major figures as Hutcheson, Butler, Berkeley, Mandeville, Hume, Smith, Kant, Rousseau, Bentham, Wolstonecraft and Shepherd. Prerequisite: PHIL 386 or consent of instructor. LEC.

PHIL 560. Nineteenth Century Philosophy. 3 Hours H.
The development of philosophy in the 19th century. Special attention will be paid to such major figures as Hegel, Kierkegaard, Marx, Nietzsche, and Mill. Prerequisite: PHIL 386. LEC.

PHIL 562. Kierkegaard. 3 Hours H.
A study of the thought of Soren Kierkegaard through examination of some of his major writings. Some attention is given to his influence on the development of existentialist philosophies. Prerequisite: PHIL 384 or PHIL 386. LEC.

PHIL 570. Nietzsche. 3 Hours H.
A study of Nietzsche's major writings and ideas, with some attention to his philosophical influence. Prerequisite: PHIL 384 or PHIL 386 or permission of instructor. LEC.

PHIL 580. Marxism. 3 Hours H/W.
A philosophical study of the classical texts of Marxism and of their contemporary development. Prerequisite: A course in philosophy or a course in political science. LEC.

PHIL 582. Existentialism. 3 Hours H/W.
A study of the main themes and leading philosophers of the existentialist movement. Prerequisite: Two courses in philosophy. LEC.

PHIL 590. Phenomenology. 3 Hours H.
A study of the main themes and leading philosophers of the phenomenological movement. Prerequisite: PHIL 386. LEC.

PHIL 592. Contemporary Continental Philosophy. 3 Hours H.
A study of selected topics in 20th century European philosophy, such as hermeneutics, critical theory, and poststructuralism. Figures to be studied could include Heidegger, Gadamer, Adorno, Habermas, and Foucault. Prerequisite: PHIL 386. LEC.

PHIL 600. Readings in Philosophy: ______. 1-6 Hours H.
Individual reading on topics not covered in course work. Prerequisite: Consent of instructor. IND.

PHIL 605. The Philosophy of Plato. 3 Hours H.
A survey of the major works of Plato, with attention both to Plato's distinctive arguments and positions in the major areas of philosophy and to the distinctive literary form in which Plato presents his thinking. Prerequisite: PHIL 384. LEC.

PHIL 607. The Philosophy of Aristotle. 3 Hours H.
A survey of the major works of Aristotle, with the aim of understanding Aristotle's distinctive formulations of central philosophical questions, the arguments he presents for his answers to those questions, and the systematic interconnections between his positions in the different areas of philosophy. Prerequisite: PHIL 384. LEC.
PHIL 608. Hellenistic Philosophy. 3 Hours H.
Survey of Stoicism, Epicureanism, and Skepticism from their beginnings through the second century AD. Prerequisite: PHIL 384 and another course in philosophy. LEC.

PHIL 610. Symbolic Logic. 3 Hours H.
Propositional calculus, predicate calculus, consistency, decidability of formal systems, the paradoxes and number concept will be covered. Prerequisite: PHIL 310 or EECS 210 or MATH 450 or consent of instructor. LEC.

PHIL 611. Topics in Symbolic Logic: _____ 1-3 Hours H.
This course is a workshop in any of a variety of topics in symbolic logic of special importance to contemporary analytic philosophy, such as modal logic, tense logic, axiomatic set theory, Goedel's theorems, model theory, etc. May be repeated for credit as topics vary. Prerequisite: PHIL 310. LEC.

PHIL 612. Modal and Non-classical Logics. 3 Hours H.
This course provides an investigation of logics beyond first-order predicate logic, including modal logic, non-classical logic, and second-order logic. Prerequisite: PHIL 310 or EECS 210 or MATH 450 or consent of instructor. LEC.

PHIL 620. Philosophy of Natural Science. 3 Hours H.
An examination of conceptual and foundational issues in the natural sciences. Topics may include the methodology of science (the nature and status of laws, the precise way in which experiment contributes to theory) and puzzles concerning the content of science (the status of space and time, the problematic nature of quantum mechanics). Prerequisite: PHIL 310 or PHIL 610, or permission of instructor. LEC.

PHIL 622. Philosophy of Social Science. 3 Hours H.
A critical examination of the methods, concepts, and practices of the social sciences. Topics to be considered may include: theories of explanation, methodological individualism vs. holism, objectivity, the role of rationality, myth and the unconscious in the explanation of behavior, and the value neutrality of science. Prerequisite: One previous course in philosophy, or permission of instructor. LEC.

PHIL 630. Philosophy of Mathematics. 3 Hours H.
An examination of varying conceptions of the role and status of mathematical arguments. Topics may include realism/anti-realism, the consequences of Goedel's Incompleteness Theorems, the role of mathematics in the sciences, and an examination of such historical thinkers as Plato, Frege, Russell, Wittgenstein, Goedel, and Hilbert. Prerequisite: PHIL 310 or PHIL 610, or permission of instructor. LEC.

PHIL 638. Philosophy of Language. 3 Hours AE61 / H.
An examination of the nature of language using the methods of analytic philosophy. Topics may include meaning, truth, reference, language and thought, and the nature of linguistic rules. Prerequisite: PHIL 388 or permission of instructor. LEC.

PHIL 648. Theory of Knowledge. 3 Hours AE61 / H.
An examination of the nature of knowledge. Topics may include the concept of knowledge, knowledge of the external world, induction, theories of justification, and scientific knowledge. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor. LEC.

PHIL 650. Metaphysics. 3 Hours AE61 / H.
An examination of some of the central issues in metaphysics. Topics may include causation, the mind-body problem, free will and determinism, modality, natural kinds, the nature of properties, and personal identity. Prerequisite: PHIL 384 and PHIL 386, PHIL 388 (which may be taken concurrently), or permission of instructor. LEC.

PHIL 654. Philosophy of Mind. 3 Hours AE61 / H.
An examination of the nature of mind using the methods of analytic philosophy. Topics may include consciousness, perception, propositional attitudes, thought and language, action and intention, mind and body, the prospects for scientific psychology, and personal identity. Prerequisite: PHIL 388 or permission of instructor. LEC.

PHIL 662. Aesthetics. 3 Hours H.
A study of some of the central themes and problems in aesthetics, such as the beautiful and the sublime in nature and the arts. Prerequisite: Two courses in philosophy or graduate standing. LEC.

PHIL 666. Rational Choice Theory. 3 Hours H.
This course is an introduction to the philosophical issues surrounding individual decision theory, game theory, and social choice theory. This includes issues of scientific theory selection, the nature of preference, the uses of games to model social interaction, and the ethical and political implications of Arrow's impossibility theorem. Formal techniques of modeling and proof, akin to those used in logic and mathematics, will be used in much of the course. Prerequisite: Two courses in economics, a philosophy course numbered 500 or above, or consent of instructor. LEC.

PHIL 668. Political Philosophy. 3 Hours H.
A systematic analysis of the concepts of politics, with reference to representative political theories. Prerequisite: A course in philosophy and a course in political science. LEC.

PHIL 670. Contemporary Ethical Theory. 3 Hours AE51 / H.
An examination of some major moral philosophers and some important issues in ethical theory since the beginning of the twentieth century. Topics covered typically include intuitionism, emotivism, utilitarianism, virtue ethics, and the relationship between morality and rationality. Prerequisite: PHIL 160 or PHIL 161 or two courses in philosophy. LEC.

PHIL 671. Feminist Theories in Ethics. 3 Hours H.
This course addresses the role (if any) that gender plays in constructing ethical theories. Topics include the impact of culture, affect, and the body on our understanding of gender differences and the importance of these differences for ethics. Prerequisite: PHIL 160 or PHIL 161, or two previous philosophy courses. LEC.

PHIL 672. History of Ethics. 3 Hours AE51 / H.
An interpretive and critical examination of central texts in the history of moral philosophy, which may include works by Aristotle, Hume, Kant, and J.S. Mill. Prerequisite: PHIL 160 or PHIL 161 or two previous philosophy courses. LEC.

PHIL 674. Philosophy of Law. 3 Hours H.
An examination of the concept of law and of legal reasoning. In addition, the course may consider such topics as natural law, legal excuses, the relations between law and morality, civil disobedience, civil liberties, the concept of property. Prerequisite: Two courses in philosophy or one course in philosophy and one course in law or consent of instructor. LEC.

PHIL 676. Medical Ethics: Life and Death Issues. 3 Hours AE51 / H.
After a brief survey of techniques of moral argument and analysis especially as they pertain to the moral impermissibility of murder, particular moral and conceptual issues relating to death and dying in medical contexts will be addressed. Topics such as abortion, infanticide, suicide, euthanasia, the definition of death, and the right to refuse life-saving medical therapy will be included. Prerequisite: Two courses in biology or consent of instructor. LEC.

PHIL 677. Medical Ethics: Professional Responsibilities. 3 Hours H.
After a brief survey of techniques of moral argument and analysis, particular moral issues related to the obligations of health care professionals and the rights of patients will be discussed. These will
include such matters as confidentiality, truth-telling, informed consent, the ethics of research on human subjects, psychosurgery, the rights of the mentally ill, and the rights of the mentally retarded. Prerequisite: Two courses in biology or consent of instructor. LEC.

PHIL 684. Main Currents of Russian Thought I. 3 Hours H/W.
A study of philosophical, theological and literary monuments designed to acquaint the student with the main cultural forces that have shaped Russian thought and manners. From the origins to Napoleonic times. (Same as SLAV 684.) LEC.

PHIL 686. Main Currents of Russian Thought II. 3 Hours H/W.
A continuation of SLAV 684 from the age of Pushkin to the present. (Same as SLAV 686.) LEC.

PHIL 800. Tutorial. 3 Hours.
Intensive supervised training in and application of the techniques of research. Required of every graduate student seeking an advanced degree in the first or second semester of enrollment. Passing this tutorial constitutes partial fulfillment of the Ph.D. RSHS requirements. Consent of instructor required for repeating the course. Prerequisite: Graduate standing. RSH.

PHIL 805. Plato. 3 Hours.
Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor. LEC.

PHIL 807. Aristotle. 3 Hours.
Prerequisite: PHIL 508 or PHIL 605 or PHIL 607 or PHIL 608 or permission of instructor. LEC.

PHIL 820. Topics in the History of Philosophy: ______. 3 Hours.
This course may be offered by different instructors under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisites to be announced in the Schedule of Classes. Prerequisite: 500-600 level course as specified or permission of instructor. LEC.

PHIL 824. Hume. 3 Hours.
Prerequisite: PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor. LEC.

PHIL 828. Kant. 3 Hours.
Prerequisite: PHIL 648 or PHIL 650 or PHIL 654 or permission of instructor. LEC.

PHIL 831. Hegel. 3 Hours.
Prerequisite: PHIL 560 or 500-600 level course as specified or permission of instructor. LEC.

PHIL 833. Nietzsche. 3 Hours.
A study of the philosophy of Friedrich Nietzsche. Prerequisite: PHIL 560 or PHIL 570 or permission of instructor. LEC.

PHIL 835. Frege. 3 Hours.
Gottlob Frege was the founder of the analytic movement in philosophy, having done seminal work in logic, the philosophy of language, and the philosophy of mathematics. This course will focus on his primary texts as well as his influence on present-day studies. Prerequisite: PHIL 630 or PHIL 638 or permission of instructor. LEC.

PHIL 848. Wittgenstein. 3 Hours.
Prerequisite: PHIL 638 or PHIL 650 or PHIL 654 or permission of instructor. LEC.

PHIL 850. Topics in Recent Philosophy: ______. 3 Hours.
This course may be offered by different instructors under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in Schedule of Classes. Prerequisite: 500-600 level as specified or permission of instructor. LEC.

PHIL 860. Topics in Philosophy of Science: ______. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 620 or PHIL 622 or PHIL 648 or PHIL 650 or permission of instructor. LEC.

PHIL 868. Topics in Philosophy of Language: ______. 3 Hours.
This course may be offered under different subtitles and may be taken more than once if the subject matter varies sufficiently. Prerequisite: PHIL 638 or permission of instructor. LEC.

PHIL 870. Topics in Metaphysics: ______. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 650 or permission of instructor. LEC.

PHIL 872. Topics in Theory of Knowledge: ______. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 648 or permission of instructor. LEC.

PHIL 877. Topics in Philosophy of Mind: ______. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 654 or permission of instructor. LEC.

PHIL 880. Topics in Ethics: ______. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 670 or PHIL 672 or permission of instructor. LEC.

PHIL 884. Topics in Social and Political Philosophy: ______. 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 555 or PHIL 666 or PHIL 668 or PHIL 674 or permission of instructor. LEC.

PHIL 885. Topics in Law and Philosophy. 3 Hours.
Explores various topics at the intersection of law and philosophy. Content varies but may include: What is freedom and what role should government play in a free society? What is equality and what is the best way to achieve it? What is the relationship between law and social justice? What is the source and value of human rights? Should social and economic rights be legally guaranteed? How should government redress historical injustices such as slavery, apartheid, and the Holocaust? Students must complete a substantial seminar paper. LEC.

PHIL 886. Topics in Applied Ethics: ______. 3 Hours.
This course may be offered under different subtitles, such as professional ethics or some issue in business ethics (e.g., corporate responsibility) or in medical ethics (e.g., the definition of death); it may be taken more than once if the subject matter varies sufficiently. Topic, instructor, and specific prerequisite to be announced in Schedule of Classes. Prerequisite: PHIL 670 or PHIL 672 or 500-600 level course as specified or permission of instructor. LEC.
PHIL 888. Topics in the Philosophy of the Social Sciences: _____ 3 Hours.
This course may be offered under different subtitles, such as philosophy of a particular social science (e.g., economics, psychology) or a particular issue in the social sciences (e.g., ideology, reductionism), and may be taken more than once if the subject matter varies sufficiently. Topic and instructor and specific prerequisite to be announced in the Schedule of Classes. Prerequisite: PHIL 622 or permission of instructor. LEC.

PHIL 890. Topics in Continental Philosophy: _____ 3 Hours.
This course may be offered under different subtitles, and may be taken more than once if the subject matter varies sufficiently. Topics, instructor, and specific prerequisites to be announced in the Schedule of Classes. LEC.

PHIL 899. Master's Thesis. 1-6 Hours.
Six hours of credit will be awarded upon completion of the master's thesis, but no more than six hours of credit may be obtained in this course altogether. Graded on a satisfactory progress/limited progress/no progress basis. THE.

PHIL 900. Research in Philosophy: _____ 1-3 Hours.
Intensive research in philosophy. This course may be taken through individual arrangement, or in connection with small research seminars which are offered occasionally. Students may only enroll for three hours in any given semester. May be repeated if content varies significantly. Prerequisite: Twelve hours of graduate work. RSH.

PHIL 901. Ph.D. Tutorial. 3 Hours.
Independent research on any topic that a graduate student and a faculty member shall agree on. It shall result in a tightly focused 20-30 page paper. The student's written work will be repeatedly evaluated over the semester by the director, and the final product must be defended in an oral examination conducted by a three-member faculty committee (including the director). Prerequisite: Students must be admitted to the Ph.D. program and have successfully completed the Ph.D. core courses requirement. RSH.

PHIL 999. Dissertation. 1-12 Hours.
This course may be taken more than once, but not for more than twelve hours of credit in any one semester. Graded on a satisfactory progress/limited progress/no progress basis. THE.

**Bachelor of Arts and Bachelor of General Studies in Philosophy**

**Why study philosophy?**

In philosophy we ask big, important questions. While asking such questions is easy, answering them is difficult. Because these questions are often abstract and vague, it is necessary to use precise reasoning and analysis to clarify what exactly it is we are asking. Only then can we attempt to develop answers.

In studying philosophy, you will learn what others have thought about life's big questions. You will also learn to challenge those views, and to develop your own thoughts in a precise, logical manner. Philosophy will help you develop critical thinking skills, enabling you to analyze the underlying logic and assumptions in arguments about a variety of topics. This is a skill that generalizes to virtually every area of life.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**First- and Second-Year Preparation**

Although majors are not required to take courses in philosophy in their first 2 years, the department recommends that they do so. Prospective majors are encouraged to begin with one of the 100-level courses. These courses provide introductions to broad areas of philosophy, and students may apply one 100-level course toward the major requirements. PHIL 310, PHIL 384, and PHIL 386 are required prerequisites for upper-division work and should be taken early. Prospective majors should consult the director of undergraduate studies early to plan course work.

**Requirements for the B.A. or B.G.S. Major**

A sample 4-year plan for the BA degree in Philosophy can be found here: Philosophy (p. 1804), or by using the left-side navigation.

**Departmental Honors**

To graduate with departmental honors, undergraduates must take 6 hours in philosophy in addition to the 27 hours required for the B.A. or B.G.S., for a total of 33 hours. The 6 additional hours include:

- An additional course numbered 500 or above for a total of at least 15 hours at that level, and
- PHIL 499 Senior Essay.

A committee of 3 faculty members reads the finished essay, gives the candidate an oral examination over the essay, and determines whether it warrants honors. This committee must consist of the instructor in PHIL 499, the departmental honors coordinator, and a third member of the philosophy faculty.

Honors are not awarded to anyone who receives a grade lower than B in PHIL 499, whose final grade-point average in philosophy is lower than 3.5. To be eligible for departmental honors, students must file a declaration of intent with the departmental honors coordinator no later than enrollment for the final undergraduate semester.

The most important element in departmental honors is the honors essay. Once a student has determined the area in which he or she wishes to work, he or she should arrange to write the essay under the guidance of a faculty member with appropriate expertise. Ideally, this work should be completed during a single semester. However, students often find it difficult to complete the essay in one semester. Therefore, we recommend that the essay be begun in the semester before the one in which the student intends to graduate (typically, in the fall semester of the senior year).

The honors essay should be intermediate between a master’s thesis and a term paper. It should normally be at least 20 pages (6,000 words) long. It should go beyond mere exposition, whether by criticism or by comparison of different works. Interpretations of rare or difficult texts may occasionally be accepted.

**BA in Philosophy**

Below is a sample 4-year plan for students pursuing the BA in Philosophy. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Sophomore

- **Fall**
  - PHIL 384 or 386 (Major Requirement)
  - Elective or possible minor course (Total Hours)
  - Elective or possible minor course (Total Hours)
  - Elective or possible minor course (Total Hours)

### Total Hours 120-123

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:
Minor in Philosophy

Why study philosophy?

In philosophy we ask big, important questions. While asking such questions is easy, answering them is difficult. Because these questions are often abstract and vague, it is necessary to use precise reasoning and analysis to clarify what exactly it is we are asking. Only then can we attempt to develop answers.

In studying philosophy, you will learn what others have thought about life’s big questions. You will also learn to challenge those views, and to develop your own thoughts in a precise, logical manner. Philosophy will help you develop critical thinking skills, enabling you to analyze the underlying logic and assumptions in arguments about a variety of topics. This is a skill that generalizes to virtually every area of life.

Requirements for the Minor

Students selecting this option must complete at least 6 courses (18 hours) of philosophy elective courses

PHIL 384 and especially PHIL 386 are strongly recommended.

Minor Hours and Minor GPA

While completing all required courses (above), minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 junior/senior courses (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in Logic and Formal Reasoning

The certificate in Logic and Formal Reasoning provides students with the opportunity to engage in a series of courses unified around the idea that logic and formal reasoning is a general skill, useful in a wide variety of academic contexts and applications. This certificate can be completed entirely within philosophy or with a more interdisciplinary course plan.

Students who complete the certificate will be well-versed in formal methods of reasoning.

The rationale is that requirement 1 is an introductory course, requirement 2 is a necessary symbolic logic course, and requirement 3 comprises two advanced courses.

Master of Arts in Philosophy

The Philosophy department at the University of Kansas comprises 14 full-time faculty members and about 35 graduate students. The department fosters teaching and research that reflects a broad range of philosophical orientations and fields of philosophy. The department’s chief strengths are in ethics, philosophy of science, and history of philosophy (ancient, modern, 19th century). The department is in Wescoe Hall, the main humanities building.

The M.A. degree requires 30 hours of graduate course work, including a first-year graduate tutorial.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of
Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. in Philosophy

Apply to the graduate program via the Office of Graduate Studies online application system (https://gradapply.ku.edu/apply/).

In addition to the general admission requirements (https://gradapply.ku.edu/apply/) from the Office of Graduate Studies, applicants are expected to have taken the following seven courses or their equivalents as preparation for graduate work:

1. symbolic logic
2. history of ancient philosophy
3. history of modern philosophy
4. history of 20th-century analytic philosophy (roughly from Frege to Quine)
5. history of 19th/20th-century Continental philosophy
6. value theory
7. metaphysics/epistemology (broadly construed to include philosophy of language and philosophy of mind).

Students may be admitted without some of these courses, but they are expected to make up the deficiencies early in their graduate careers and outside of the minimum hours required for degree.

For additional information, including relevant deadlines and a list of required supplemental documentation to be submitted with the online application, please visit the graduate page of the Philosophy website (http://philosophy.ku.edu/ma-admissions/), or contact the department Graduate Academic Advisor, Aley Pennington, aleypennington@ku.edu.

M.A. Degree Requirements

The department offers thesis and non-thesis M.A. options. Both require:

1. 30 credit hours of graduate work in philosophy with a grade of B- or higher, with a GPA of at least 3.0 over all courses in philosophy. At least 15 of these hours must be in courses numbered 800 or above and, for the thesis option, may include up to 6 hours of PHIL 899 Master’s Thesis. Students must complete two courses at the 500 level or above (or the equivalent) in each of these areas: history of philosophy, metaphysics and epistemology (broadly construed), and value theory. Courses taken during the undergraduate career may be counted toward these area requirements, but such work does not count toward the overall 30-hour graduate credit requirement unless the student took this course work for graduate credit and it has department approval.

2. PHIL 800 Tutorial must be taken in the first year of study

3. A final examination:
   a. For the thesis option, the student will complete an oral defense of the thesis in accordance with Graduate Studies policy. The oral examination is held during the semester of the student’s final enrollment in course work and when the advisor approves the thesis for defense. Any philosophical issue that is relevant to the thesis may be explored in the oral exam to ensure the thesis reflects a breadth of philosophical knowledge.
   b. For the non-thesis option, the student must pass an oral examination covering the material of the M.A. program. The non-thesis option final exam can be satisfied by Ph.D. students who successfully complete PHIL 901 Ph.D. Tutorial with a grade of B or higher.

Time Limits and Other Restrictions

Information on time limits may be found under Master’s Degree Requirements and Program Time Constraints in the Graduate Studies section of the online catalog. The rule for transferring credit toward the M.A. appears under General Regulations in the Graduate Studies section of the online catalog.

Accelerated Master of Arts in Philosophy

The Accelerated M.A. provides excellent KU undergraduates in Philosophy an opportunity to complete the M.A. in Philosophy within a year of completing the bachelor’s degree. Talented students who are planning to continue their studies at the doctoral level or to continue to law school will receive a competitive advantage by acquiring a master’s degree in half the time traditionally required for a terminal M.A.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission Requirements

1. All requirements for a bachelor’s in philosophy from KU complete or in progress
2. GPA of 3.5 in philosophy
3. GRE not required, though the department will consider GRE scores as part of an application

Application Deadlines

Students who receive a bachelor’s from KU in Spring or Summer must have a completed application with all supplemental documentation by August 1. Priority consideration is guaranteed for students whose applications are complete by April 30. Students who receive a bachelor’s in Fall must have a completed application by November 30.

Students who submit an application by January 15 may be considered for funding in the form of a graduate fellowship.

Interested students are encouraged to contact the department Director of Graduate Studies, Dr. Sarah Robins, skrobins@ku.edu, as early as possible during their undergraduate studies.
Degree Requirements

Students must complete all of the following requirements for the Accelerated M.A. within one calendar year post-bachelor's:

1. 24 credit hours of graduate coursework (500-level or above) in philosophy post-bachelor's with a grade of B or higher. At least 15 of these hours must be in courses numbered 800 or above. Students must complete two courses at the 500-level or above (or the equivalent) in each of these areas: history of philosophy, metaphysics and epistemology (broadly construed), and value theory. Courses taken during the undergraduate career may be counted toward these area requirements, but such work does not count toward the overall 24-hour graduate credit requirement unless the student took this course work for graduate credit and it has department approval.

2. PHIL 800 Tutorial with a grade of B or higher

3. An M.A. exam consisting in the oral defense of a seminar paper of the student's choosing

Time Limits and Other Restrictions

Students must maintain a minimum GPA of 3.5 in the first semester of graduate study in order to maintain eligibility for the program. They will be subject to a formal mid-year review to ensure satisfactory progress towards completion of the degree.

A student who receives a bachelor’s degree in Spring or Summer begins the M.A. portion of the degree that Fall. The student must then complete all requirements for the Accelerated M.A. by the first day of classes the following Fall.

If a student does not complete the Accelerated M.A. requirements within one year post-bachelor's, the student may petition the department for admission to the standard 30-hour M.A. track. In extraordinary circumstances, for example, serious illness, students may petition the department to remain in the 24-hour track.

Juris Doctor and Master of Arts in Philosophy

Joint J.D.-M.A. Degree Program

The joint degree program leading to the J.D. and the M.A. in philosophy develops a student’s understanding and appreciation of the converging disciplines of law and philosophy. The program combines into 3 years and 1 summer session the normal 3-year J.D. program offered by the School of Law and the 2-year M.A. offered by the Department of Philosophy in the College of Liberal Arts and Sciences. Students complete 81 credit hours in law and 21 credit hours in philosophy.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Joint Program

The program is open to those who have earned baccalaureate degrees from accredited colleges or universities and whose undergraduate academic records indicate that they have the capacity to complete the program. Applicants must meet the admission requirements and prerequisites of the School of Law and the Department of Philosophy. The only exception to this is that the Law School Admission Test (LSAT) is the only required entrance examination for such applicants (GRE is not required for either program). Students must apply and be admitted to each school separately. Generally, students apply to the School of Law first, and if admitted, subsequently apply for admission to the M.A. in Philosophy. No student may enter the combined program after completing more than 30 credit hours in the School of Law or 12 hours in the Department of Philosophy.

For information about applying to the Law School, see the school website (http://www.law.ku.edu/admissions/). For information about applying to the M.A. program in Philosophy, please visit the graduate program page (http://philosophy.ku.edu/grad-admissions/) of the Philosophy department website, or contact the Graduate Academic Advisor, Aley Pennington, aleypennington@ku.edu.

It is essential for the student to consult the director of graduate studies in philosophy and a representative of the School of Law about specific courses required or recommended for this program.

For additional information, see the School of Law (p. 777) and the Guidelines and Information for Graduate Students available from the Department of Philosophy (http://philosophy.ku.edu/).

**Doctor of Philosophy in Philosophy**

The Philosophy Department at the University of Kansas comprises 14 full-time faculty members and about 35 graduate students. The department fosters teaching and research that reflects a broad range of philosophical orientations and fields of philosophy. The department's chief strengths are in ethics, philosophy of science, and history of philosophy (ancient, modern, 19th century). The department is in Wescoe Hall, the main humanities building.

The Ph.D. degree requires 39 hours of graduate course work, including a first-year graduate tutorial and a research tutorial. Ph.D. candidates also must satisfy the University's Research Skills and Responsible Scholarship requirement, pass both a departmental examination over the research tutorial and an oral comprehensive examination, and write and successfully defend a dissertation.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Ph.D. in Philosophy**

Apply to the graduate program via the Office of Graduate Studies online application system (https://gradapply.ku.edu/).

In addition to the general admission requirements (https://gradapply.ku.edu/apply/) from the Office of Graduate Studies, applicants are expected to have taken the following seven courses or their equivalents as preparation for graduate work:

1. symbolic logic
2. history of ancient philosophy
3. history of modern philosophy
4. history of 20th-century analytic philosophy (roughly from Frege to Quine)
5. history of 19th/20th-century Continental philosophy
6. value theory
7. metaphysics/epistemology (broadly construed to include philosophy of language and philosophy of mind).

Students may be admitted without some of these courses, but they are expected to make up the deficiencies early in their graduate careers and outside of the minimum hours required for degree.

For additional information, including relevant deadlines and a list of required supplemental documentation to be submitted with the online application, please visit the graduate page of the Philosophy (http://www.philosophy.ku.edu/) website, or contact the department Graduate Academic Advisor, Aley Pennington, a (aleypennington@ku.edu) or contact the department Graduate Academic Advisor, Aley Pennington, a (aleypennington@ku.edu) or contact the department Graduate Academic Advisor, Aley Pennington, a (aleypennington@ku.edu).

**Ph.D. Degree Requirements**

A student preparing for a doctorate in philosophy must meet general requirements and, before officially enrolling in PHIL 999 Dissertation, must satisfy these special requirements:

Complete at least 39 credit hours of graduate work in regular philosophy courses numbered 500 or above with grades in each course of at least B– and an overall grade-point average of at least B in all graduate philosophy courses. At least 24 of these hours must be at the 800 level or above (including PHIL 800 Tutorial and PHIL 901 Ph.D. Tutorial). Beyond the 39-hour requirement, additional hours in PHIL 999 Dissertation are required as appropriate in accordance with the rules of the Office of Graduate Studies and the Department.

1. Complete PHIL 800 Tutorial with a grade of B- or higher in the first year of enrollment.
2. **Formal Philosophy Requirement**: Complete PHIL 610 Metalogic, PHIL 611 Topics in Symbolic Logic: _____ or PHIL 666 Rational Choice Theory with a grade of B- or higher.
3. **Ph.D. Course Distribution Requirement**:

PHIL 800
PHIL 901
• Demonstrated competence in an approved foreign language. OR completion of a faculty-approved course in a discipline related to the student's research interests.

6. Pass the comprehensive oral examination for Ph.D. candidacy. This examination must be taken after all of the above requirements have been completed, or in the semester in which the requirements will be completed.

After the oral comprehensive examination has been passed, the student must write a dissertation of substantial merit showing the planning, conduct, and result of original research and must pass a final oral examination and defense of the dissertation.

Reduction of Credits
University graduate credit policy (http://policy.ku.edu/graduate-studies/graduate-credit/) does not allow for a direct transfer of credits toward the Ph.D.; however, the department’s requirement of 39 credit hours of acceptable graduate work for the Ph.D. may be reduced by departmental petition depending on the amount and quality of equivalent graduate work completed at another institution. At minimum, 24 hours of acceptable graduate work must be taken in the Department of Philosophy at KU.

Department of Physics and Astronomy

Why study physics and astronomy?
Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse careers ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate Programs
We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational physical science and critical thinking can be useful – example teaching and medicine – and anyone seeking to include astronomy and physics as part of their general education. The department offers BS degrees in astronomy, physics, and engineering physics and BA degrees in astronomy and physics. Degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The primary degree offered is a BS in Physics. In addition to this standard
BS in Physics, there are also interdisciplinary and pre-medicine versions (concentrations) of the BS in Physics degree. The interdisciplinary track allows students to take elective courses in other STEM disciplines and the pre-medicine emphasis is for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in locales such as Antarctica, Chile, and CERN.).

Courses for Nonmajors

ASTR 191 is a survey of contemporary astronomy, taught at a level using basic mathematics; ASTR 391 offers an introduction to physical astronomy at a calculus-based level. PHSX 111 provides a general introduction to important physics topics and is taught at a level using basic algebra. The department offers two introductory physics sequences that include laboratory work. PHSX 114 and PHSX 115 cover the major fields of physics without calculus. PHSX 211 and PHSX 212, with labs PHSX 216 and PHSX 236, provide a calculus-based foundation in physics for students in physical science, engineering, and mathematics. PHSX 313 and the laboratory course, PHSX 316, provide an introduction to modern physics for majors in physics and some engineering and physical science programs.

Students in biological sciences, health sciences, physical sciences, mathematics, engineering, and prospective elementary and secondary teachers should see appropriate sections of this catalog and major advisors for guidance about required physics course work. Chemistry majors should note that PHSX 211 and PHSX 212 are prerequisites to advanced work in chemistry.

For programs in engineering physics (p. 569), see the School of Engineering section of the online catalog.

Graduate Programs

The department offers two primary graduate programs: (i) an M.S. degree in Physics and (ii) a Ph.D. degree in Physics. The M.S. in Physics has the possibility of having a concentration in Computational Physics and Astronomy. This option requires a thesis, as does one of the M.S.-Physics options. The department does not offer a graduate-level degree in Astronomy, although students have obtained M.S. degrees in Physics by doing astronomy projects. In addition, the department has added flexibility in its course offerings to allow a student to obtain a Ph.D. in Physics while working on an astronomy or astrophysics multidisciplinary plan of study.

The department is proud to be an APS Bridge Program (https://physics.ku.edu/bridge-program/) partner. Information about admission, requirements, and graduate programs is also on the Department of Physics & Astronomy web page (https://physics.ku.edu/graduate-studies/). Please note that the General and Subject GRE are not required for admissions to the Physics and Astronomy graduate program.

Courses

ASTR 177. First Year Seminar: . 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Astronomy. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ASTR 190. Astronomy and Civilization. 3 Hours N.
A survey course that describes the interplay between the science of astronomy and cultural beliefs. It uses, among others, examples of how religious and philosophical tenets have enhanced or conflicted with scientific principles. Not for astronomy majors. LEC.

ASTR 191. Contemporary Astronomy. 3 Hours NP GE3N / N.
The structure and evolution of the universe, from nearby planets to distant quasars, are examined. Topics include recent discoveries concerning planets, stars, pulsars and black holes as well as their evolution, the structure of the universe today and how it will be in the future. The emphasis is descriptive rather than mathematical. (Same as PHSX 191.) Prerequisite: Eligibility for MATH 101. LEC.

ASTR 196. Contemporary Astronomy Laboratory. 1 Hour NP / N / LFE.
An introduction to astronomical observations and modern data analysis methods. Students will carry out independent investigations as well as standard exercises. This is an online course, delivered through Blackboard. (Same as PHSX 196.) Prerequisite: Corequisite: ASTR 191. LAB.

ASTR 293. Astronomy Bizarre. 3 Hours GE3N / N.
An exploration of physical phenomena found in astrophysical extremes. Topics may include the following: the most violent explosions in the Universe (supernovae and gamma ray bursts); the biggest collisions in nature (galaxy interactions); the densest and most bizarre forms of matter (white dwarfs, neutron stars); the strongest magnetic fields (magnetars, pulsars); the amazing range of exo-planetary properties; and the mysteries of black holes. Prerequisite: Eligibility for MATH 101. LEC.

ASTR 390. Undergraduate Problems. 1-3 Hours AE61 / N.
Undergraduate observational or theoretical problems in astronomy. Maximum credit, six hours. Prerequisite: Permission of department. IND.

ASTR 391. Physical Astronomy, Honors. 3 Hours NP GE12/GE3N / N.
An honors, calculus-based introduction to astronomy and astrophysics, required for astronomy majors. Components of the Universe - from planetary systems, stellar systems, large scale structure and cosmology - are examined to illuminate the physics principles which govern their evolution. Prerequisite: MATH 125, and either permission of instructor, or participation in the University Honors Program. LEC.

ASTR 394. The Quest for Extraterrestrial Life. 3 Hours NP GE11 / N.
An introduction to the search for planets around other stars and for life in the universe beyond the earth. A discussion of the astronomical conditions under which life might form and the biological conditions of life formation and evolution. Methods of searching for extraterrestrial life. Prerequisite: An introductory course in astronomy, biology, or geology. LEC.

ASTR 400. Topics in Astronomy: . 1-3 Hours N.
A course on special topics in astronomy. Course may be repeated for different topics. Each section may have additional prerequisites to be determined by the instructor. LEC.

ASTR 501. Honors Research. 1-4 Hours AE61 / N.
This course is for students seeking Departmental Honors in Astronomy, Engineering Physics, or Physics to fulfill the undergraduate research requirement. At the completion of the required four hours of total enrollment, a written and oral report of the research is required. (Same as EPHX 501 and PHSX 501.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor. IND.
ASTR 503. Undergraduate Research. 1-4 Hours AE61 / N.
This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as EPHX 503 and PHSX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor. IND.

ASTR 591. Stellar Astronomy. 3 Hours N.
Fundamentals of stellar astronomy including astronomical optics and techniques, coordinate and time systems, stellar spectroscopy, properties of normal, binary and variable stars. Prerequisite: PHSX 212 and PHSX 236. An introductory astronomy course is desirable. LEC.

ASTR 592. Galactic and Extragalactic Astronomy. 3 Hours N.
A study of stellar groups, the interstellar medium, galactic structure and dynamics, galaxies, and cosmology. Prerequisite: ASTR 591 or consent of instructor. LEC.

ASTR 596. Observational Astrophysics. 3 Hours NP AE61 / N.
Students acquire practical experience with astronomical equipment and data reduction techniques used in research and educational contexts. ASTR 596, combined with an independent research experience, provides a pathway for students to demonstrate creativity and integration of background knowledge. Prerequisite: Corequisite: ASTR 591. LEC.

ASTR 691. Astrophysics I. 3 Hours N.
An introduction to radiation processes, thermal processes, and radiative transfer in stellar atmospheres and the interstellar medium. (Same as EPHX 691 and PHSX 691.) Prerequisite: PHSX 313 or consent of instructor. LEC.

ASTR 692. Astrophysics II. 3 Hours N.
The formation and evolution of stars, nucleosynthesis of the elements, and the physical processes of high energy physics. Prerequisite: ASTR 691 or consent of instructor. LEC.

ASTR 791. Seminar in Astrophysics. 1-3 Hours.
Seminar designed to cover current topics in the physics of the Universe beyond the solar system. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. Open to undergraduates with twelve hours of physics/astronomy courses numbered 500 or above, or consent of instructor. LEC.

ASTR 792. Topics in Advanced Astrophysics. 3 Hours.
This course will address one or more of the following advanced topics in astrophysics: high energy astrophysics, nuclear astrophysics, galactic and extragalactic astrophysics, space physics, cosmology, astrobiophysics, and the interstellar and intergalactic media (ISM/IGM.) This course may be repeated for credit if topical content differs. (Same as PHSX 792.) Prerequisite: ASTR 692 or permission of instructor. LEC.

ASTR 795. Space Plasma Physics. 3 Hours.
The physics of fully ionized gases in magnetic fields and their application to interplanetary processes, planetary radiation belts, and the surface of the sun. The motion of charged particles in magnetic fields, magnetohydrodynamic waves, the solar wind and the magnetosphere. (Same as PHSX 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631. LEC.

ASTR 815. Computational Methods in Physical Sciences. 3 Hours.
Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document computer programs to solve physical problems. (Same as PHSX 815 and CHEM 914.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above. LEC.

Courses

PHSX 111. Introductory Physics. 3 Hours NP GE11/GE3N / N.
A one-semester survey of classical and modern physics, designed primarily for liberal arts students. Typical subjects include the laws of motion, gravity, electricity and magnetism, sound, light, quantum mechanics, atomic and subatomic physics. Subjects are treated mainly conceptually with some use of basic data. Prerequisite: Eligibility for MATH 104. LEC.

PHSX 112. Concepts in Physics, Honors. 3 Hours NP GE3N / N.
A discussion of important concepts in physics. While basic concepts such as force, energy, and mass will be introduced as needed, the emphasis will be on an understanding and appreciation of contemporary science. Prerequisite: Eligibility for MATH 104 and participation in the University Honors Program or permission of instructor. LEC.

PHSX 114. College Physics I. 1-4 Hours NP GE11/GE12/GE3N / N / LFE.
Principles and applications of mechanics, fluids, heat, thermodynamics, and sound waves. Three class hours and one laboratory per week. This course emphasizes the development of quantitative concepts and problem solving skills for students needing a broad background in physics as part of their preparation in other major programs, and for those who wish to meet the laboratory science requirement of the College. Students who enroll in this course are expected to have had 3.5 years of college-prep math, including trigonometry. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 211 or PHSX 216 or PHSX 212 or PHSX 236. Prerequisite: MATH 104 or a score of 25 or higher on ACT mathematics. LEC.

PHSX 115. College Physics II. 1-4 Hours NP GE3N / N.
A continuation of PHSX 114. Principles and applications of electricity, magnetism, light, atomic physics, and nuclear physics. Three class hours and one laboratory per week. In special circumstances, permission to enroll in less than four hours may be obtained from the department. Not open to students with credit in PHSX 212 or PHSX 236. Prerequisite: PHSX 114. LEC.

PHSX 116. Introductory Physics Laboratory. 1 Hour U / LFE.
A laboratory exploring classical and modern physics, designed primarily for liberal arts students. Experiments in motion gravity, electricity and magnetism, sound, light, atomic and subatomic physics are designed to teach physics concepts and basic laboratory techniques. One two-hour lab period per week. Counts as a laboratory science when preceded or accompanied by PHSX 111. Prerequisite: Eligibility for MATH 104. Corequisite: PHSX 111. LAB.

PHSX 150. Seminar in Physics, Astronomy and Engineering Physics. 0.5 Hours N.
This course is intended for all students in physics, astronomy and engineering physics. Course content includes topics of current interest in all fields of physics and astronomy, and an introduction to professional ethics and frameworks for ethical decision making. Topics covered include but are not limited to nanotechnology, cosmology, nuclear and high energy physics, galactic evolution, condensed matter physics, space physics, biophysics and plasma physics. Course will include hands on demonstrations, group in-class activities and general advising information. LEC.
PHSX 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Physics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

PHSX 191. Contemporary Astronomy. 3 Hours NP GE3N / N.
The structure and evolution of the universe, from nearby planets to distant quasars, are examined. Topics include recent discoveries concerning planets, stars, pulsars and black holes as well as their evolution, the structure of the universe today and how it will be in the future. The emphasis is descriptive rather than mathematical. (Same as ASTR 191.) Prerequisite: Eligibility for MATH 101. LEC.

PHSX 196. Contemporary Astronomy Laboratory. 1 Hour NP / N / LFE.
An introduction to astronomical observations and modern data analysis methods. Students will carry out independent investigations as well as standard exercises. This is an online course, delivered through Blackboard. (Same as ASTR 196.) Prerequisite: Corequisite: ASTR 191. LAB.

PHSX 201. Calculus Supplement to College Physics I. 1 Hour N.
A calculus-based course in classical mechanics and thermodynamics for students who have had an algebra-based course in classical mechanics and thermodynamics. This course, combined with PHSX 114, covers the content of PHSX 211 or PHSX 210. Prerequisite: PHSX 114 and MATH 116 or MATH 125. Corequisite: MATH 126; and permission of the department. LEC.

PHSX 202. Calculus Supplement to College Physics II. 1 Hour N.
A calculus-based course in electricity and magnetism for students who have had an algebra-based course in electricity and magnetism. This course, combined with PHSX 115, covers the content of PHSX 212. Prerequisite: PHSX 115 and permission of the department. Corequisite: MATH 126. LEC.

PHSX 209. Functions and Modeling. 3 Hours N.
Study of the use of functions in mathematical modeling, with topics drawn from algebra, analytic geometry, statistics, trigonometry, and calculus. These topics include function properties and patterns, complex numbers, parametric and polar equations, vectors and various growth models. The course also includes inquiry methods, collaborative problem solving, the use of multiple representations and data analysis techniques, and the justification and presentation of results. Central to the course are investigative labs employing various technologies and software. The course is designed to help prepare students for secondary school mathematics teaching. (Same as MATH 209.) Prerequisite: MATH 126 or MATH 146. LEC.

PHSX 210. General Physics I for Engineers. 3 Hours GE11/GE3N / N.
Introduction to classical mechanics and thermodynamics designed for students in the School of Engineering who have completed MATH 125 or MATH 145 with a grade of C or better. Students not admitted to the School of Engineering must receive permission from instructor. PHSX 210 and PHSX 211 cannot both be taken for credit. Prerequisite: MATH 125 or MATH 145 with a grade of C or better; co-requisite MATH 126 or MATH 146; courses in high school physics and/or chemistry recommended. LEC.

PHSX 211. General Physics I. 4 Hours NP GE11/GE12/GE3N / N / LFE.
Introduction to classical mechanics and thermodynamics. Designed for students in engineering and physical science majors. Prerequisite: MATH 116 or MATH 125 or MATH 145. Corequisite MATH 126 or MATH 146; courses in high school physics and/or chemistry are recommended. LEC.

PHSX 212. General Physics II. 3 Hours GE3N / N / LFE.
Study of electricity, magnetism, waves, and optics. Prerequisite: PHSX 201, PHSX 210, PHSX 211 or PHSX 213; MATH 126 or MATH 146. Co-enrollment in MATH 127 or MATH 147 is strongly encouraged. LEC.

PHSX 213. General Physics I Honors. 1-5 Hours NP GE11/GE12/GE3N / N / LFE.
An honors section of PHSX 211 and PHSX 216. Credit for fewer than five hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in Astronomy, Physics, or Engineering Physics. Courses in high school physics and chemistry are strongly recommended. Prerequisite: MATH 125 or MATH 145; co-requisite MATH 126 or MATH 146; and permission of instructor. LEC.

PHSX 214. General Physics II Honors. 1-4 Hours GE3N / N / LFE.
An honors section of PHSX 212 and PHSX 236. Credit for fewer than four hours requires permission of the department. Recommended for students with a strong math background who are either in the University Honors Program or intending to major in Astronomy, Physics, or Engineering Physics. Prerequisite: PHSX 216 together with either PHSX 211 or PHSX 210; or PHSX 213, and permission of instructor. Corequisite: MATH 127 or MATH 147. LEC.

PHSX 216. General Physics I Laboratory. 1 Hour N / LFE.
Experiments in classical mechanics and thermodynamics. The course includes practice in the ethics of recording and presentation of data. Counts as a laboratory science when accompanied by PHSX 210 or PHSX 211. Prerequisite: Corequisite: PHSX 210 or PHSX 211. LAB.

PHSX 236. General Physics II Laboratory. 1 Hour N / LFE.
Experiments in electricity and magnetism, waves and sound. Students will practice data reduction and error analysis in ways that are consistent with professional ethics. Prerequisite: Corequisite: PHSX 212. LAB.

PHSX 313. General Physics III. 3 Hours GE3N / N / LFE.
Introduction to modern physics. Topics include special relativity, optics, and introductions to quantum mechanics and solid state physics. Prerequisite: PHSX 212 and PHSX 236, or PHSX 214, or PHSX 202, or EECS 220 or EECS 221. Corequisite: MATH 320 or MATH 220 or MATH 221. LEC.

PHSX 315. Introduction to Computation for Physics and Astronomy. 3 Hours N.
This course introduces the use of computational techniques as applied to solving problems in physics and astronomy. It serves as a gateway to the use of such methods in upper level classes and research. Highlighted techniques will include the use of numerical methods for the solution of differential equations encountered in physics and astronomy, the use of random numbers for simulation and modeling, data analysis using computers, and data visualization. Problems will be drawn from a wide variety of physical applications including mechanics, electromagnetism, thermodynamics, and stellar dynamics. Students will develop their own computer programs to investigate, illustrate, and report their results. Prerequisite: EECS 138 or EECS 168 or EECS 169, or permission of the instructor. Corequisite: PHSX 212 or PHSX 214. LEC.

PHSX 316. Intermediate Physics Laboratory I. 1 Hour U / LFE.
Experiments in optics and modern physics. Development of experimental skills, data reduction, error analysis, and technical writing. One lab meeting per week and one lecture per week on topics including error analysis and experimental design, and the development of professional ethics in regard to citation and data presentation. Prerequisite: Corequisite: PHSX 313. LAB.
PHSX 395. Physics Education Theory and Practice. 3 Hours N.
This course focuses on how people teach, learn, and understand key concepts in physics, including an introduction to physics education research. Topics include student conceptions, assessments, impacts of student identity, metacognition, and nature of science. Current issues and tensions in science and math education will be discussed, especially as it relates to physics instruction. This course also provides students firsthand experience in planning and implementing a phenomena-based curriculum through teaching lessons in elementary or middle school classrooms. Prerequisite: Corequisite: PHSX 313. LEC.

PHSX 400. Topics in Physics and Astronomy: ____. 1-3 Hours N.
A course on special topics in physics and astronomy, given as the need arises. Course may be repeated for different topics. Each section may have prerequisites to be determined by the instructor. LEC.

PHSX 420. Science and Policy. 3 Hours AE52 / N.
An introduction to the relationship between science and public policy. The mutual interactions between public policy and scientific practice are explored within an ethical framework with examples that include energy and sustainability issues. An experiential course where students will be asked to develop and implement ethical solutions and engage meaningfully on a practicum project for local, regional, national, or international partners who are working on policy decisions which have technology implications. Honors credit is available for this course. Prerequisite: Eligibility for MATH 101. LEC.

PHSX 500. Special Problems. 1-5 Hours AE61 / N.
Work in some area of physics beyond the topics or material covered in other courses. For some problems, continued enrollment in consecutive semesters may be appropriate. Prerequisite: One junior-senior course in science in an area related to the problem and consent of instructor. IND.

PHSX 501. Honors Research. 1-4 Hours AE61 / N.
This course is for students seeking Departmental Honors in Astronomy, Engineering Physics, or Physics to fulfill the undergraduate research requirement. At the completion of the required four hours of total enrollment, a written and oral report of the research is required. (Same as ASTR 501 and EPHX 501.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor. IND.

PHSX 502. Seminar in Physics and Astronomy Instruction. 1-3 Hours N.
One meeting per week to plan and report progress on projects which may include tutoring of students in personalized modes of study; developing, administering, and scoring test items; designing and improving demonstration and laboratory experiments. Amount of credit depends on projects contracted for and completed. (Distribution credit given for two-three hours only.) Prerequisite: Evidence of prior academic experience relevant to the student's proposed activities in the seminar and permission of instructor. LEC.

PHSX 503. Undergraduate Research. 1-4 Hours AE61 / N.
This course is for students seeking to fulfill the undergraduate research requirement. Students are expected to participate in some area of ongoing research in the department, chosen with the help of their advisor. At the end of the term, students will present their results in a seminar to other students and faculty. (Same as ASTR 503 and EPHX 503.) Prerequisite: Junior/Senior standing in Astronomy, Engineering Physics, or Physics, or permission of instructor. IND.

PHSX 511. Introductory Quantum Mechanics. 3 Hours N.
An introduction to quantum mechanics, emphasizing a physical overview. Topics should include the formalisms of non-relativistic quantum mechanics, the 3-dimensional Schrodinger equation with applications to the hydrogen atom; spin and angular momentum; multi-particle systems of Fermi-Dirac and Bose-Einstein particles; time-independent perturbation theory. (Same as EPHX 511.) Prerequisite: PHSX 313 and MATH 290. LEC.

PHSX 516. Physical Measurements. 4 Hours N / LFE.
A laboratory course emphasizing experimental techniques and data analysis, as well as scientific writing and presentation skills. Experiments will explore a range of classical and modern physics topics. Students will also practice ethical decision making using case studies appropriate for the discipline. (Same as EPHX 516.) Prerequisite: PHSX 313, EPHX 316 or PHSX 316 and EPHX 521 or PHSX 521. (EPHX 521 or PHSX 521 may be taken concurrently.) LAB.

PHSX 518. Mathematical Physics. 3 Hours N.
Applications of modern mathematical methods to problems in mechanics and modern physics. Techniques include application of partial differential equations and complex variables to classical field problems in continuous mechanics, unstable and chaotic systems, electrodynamics, hydrodynamics, and heat flow. Applications of elementary transformation theory and group theory, probability and statistics, and nonlinear analysis to selected problems in modern physics as well as to graphical representation of experimental data. Prerequisite: PHSX 313 and MATH 320 or permission of instructor. (Same as EPHX 518.) LEC.

PHSX 521. Mechanics I. 3 Hours N.
Newton's laws of motion. Motion of a particle in one, two, and three dimensions. Motion of a system of particles. Moving coordinate systems. (Same as EPHX 521.) Prerequisite: PHSX 211 and PHSX 216, or PHSX 213; MATH 127; MATH 290; and MATH 220 or MATH 320. LEC.

PHSX 531. Electricity and Magnetism. 3 Hours N.
The properties of electric and magnetic fields, including electrostatics, Gauss' Law, boundary value methods, electric fields in matter, electromagnetic induction, magnetic fields in matter, the properties of electric and magnetic dipoles, and of dielectric and magnetic materials. (Same as EPHX 531.) Prerequisite: PHSX 214, or PHSX 212 and PHSX 236; PHSX 521 or special permission; MATH 127; MATH 290; and MATH 220 or MATH 320. LEC.

PHSX 536. Electronic Circuit Measurement and Design. 4 Hours N / LFE.
A laboratory course that explores the theory and experimental techniques of analog and digital electronic circuit design and measurement. Topics include transient response, transmission lines, transistors, operational amplifiers, and digital logic. (Same as EPHX 536.) Prerequisite: PHSX 214 or PHSX 212 and PHSX 236; PHSX 521 or special permission; MATH 127; and MATH 290. PHSX 313 and 316 recommended. LAB.

PHSX 594. Cosmology and Culture. 3 Hours AE42 / N.
A survey of modern physical cosmology, its recent historical roots, and creation myths from many world cultures. An examination of the effects of these stories on their parent cultures. LEC.

PHSX 598. Research Methods. 3 Hours N / LFE.
An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling, laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UKanTeach program. (Same as CHEM 598.) Prerequisite: At least one course at the 100 level or above in CHEM, MATH, or PHSX. LEC.
PHSX 600. Special Topics in Physics and Astrophysics: ______. 3 Hours N.
Different topics will be covered as needed. This course will address topics in physics and astrophysics not covered in regularly offered courses. May be repeated if topic differs. (Same as EPHX 600.) Prerequisite: Permission of instructor. LEC.

PHSX 601. Design of Physical and Electronic Systems. 4 Hours AE61 / N / LFE.
A laboratory course emphasizing the application of physical principles to the design of systems for research, monitoring, or control. Topics include the use of microcomputers as controllers, interfacing microcomputers with measurement devices, and use of approximations and/or computer simulation to optimize design parameters, linear control systems, and noise. (Same as EPHX 601.) Prerequisite: Twelve hours of junior-senior credit in physics or engineering, including one laboratory course. LAB.

PHSX 615. Numerical and Computational Methods in Physics. 3 Hours N.
An introduction to the use of numerical methods in the solution of problems in physics for which simplifications allowing closed-form solutions are not applicable. Examples are drawn from mechanics, electricity, magnetism, thermodynamics, and optics. (Same as EPHX 615.) Prerequisite: PHSX 313, MATH 320 or equivalent, and EECS 138 or equivalent. LEC.

PHSX 621. Mechanics II. 3 Hours N.
Continuation of PHSX 521. Lagrange's equations and generalized coordinates. Mechanics of continuous media. Tensor algebra and rotation of a rigid body. Special relativity and relativistic dynamics. (Same as EPHX 621.) Prerequisite: EPHX 521 or PHSX 521. LEC.

PHSX 631. Electromagnetic Theory. 3 Hours N.
Maxwell's equations, wave propagation, optics and waveguides, radiation, relativistic transformations of fields and sources, use of covariance and invariance in relativity. Normally a continuation of PHSX 531. (Same as EPHX 631.) Prerequisite: EPHX 531 or PHSX 531. LEC.

PHSX 641. Introduction to Nuclear Physics. 3 Hours N.
Experimental methods in nuclear physics, elementary concepts and simple considerations about nuclear forces, alpha and beta decay, gamma radiation, nuclear structure, and reaction systematics. (Same as EPHX 641.) Prerequisite: PHSX 313 and PHSX 511. LEC.

PHSX 655. Optics. 3 Hours N.
Geometric optics. Wave properties of light: interference, diffraction, coherence. Propagation of light through matter. Selected topics in modern optics, e.g., lasers, fibers. (Same as EPHX 655.) Prerequisite: PHSX 531 or EPHX 531 or PHSX 212 or PHSX 214 and special permission from instructor. LEC.

PHSX 661. Introduction to Elementary Particle Physics. 3 Hours N.
Properties and interactions of quarks, leptons, and other elementary particles; symmetry principles and conservation laws; broken symmetry; gauge bosons; the fundamental interactions, grand unified theories of strong, electromagnetic, and weak interactions; the cosmological implications of elementary particle physics. (Same as EPHX 661.) Prerequisite: PHSX 511 and MATH 320. LEC.

PHSX 671. Thermal Physics. 3 Hours N.
Development of thermodynamics from statistical considerations. Techniques of calculating thermodynamic properties of systems. Application to classical problems of thermodynamics. Elementary kinetic theory of transport processes. Fermi-Dirac and Bose-Einstein systems. (Same as EPHX 671.) Prerequisite: PHSX 511. LEC.

PHSX 681. Concepts in Solids. 3 Hours N.
Properties of common types of crystals and amorphous solids. Lattice vibrations and thermal properties of solids. Electrons and holes in energy bands of metals, semiconductors, superconductors, and insulators. (Same as EPHX 681.) Prerequisite: PHSX 313 and PHSX 511. LEC.

PHSX 691. Astrophysics I. 3 Hours N.
An introduction to radiation processes, thermal processes, and radiative transfer in stellar atmospheres and the interstellar medium. (Same as ASTR 691 and EPHX 691.) Prerequisite: PHSX 313 or consent of instructor. LEC.

PHSX 693. Gravitation and Cosmology. 3 Hours N.
An overview of topics relevant to gravitation and modern cosmology: special relativity, tensor notation, the equivalence principle, the Schwarzschild solution, black holes, and Friedmann models. Cosmic black body radiation, dark matter, and the formation of large-scale structure. The idea of quantum gravity and an introduction to the current literature in cosmology. (Same as EPHX 693.) Prerequisite: PHSX 313 and MATH 320. LEC.

PHSX 700. Colloquium. 1 Hour.
Topics of current interest in physics, astronomy, and atmospheric science. Repeated enrollments are permitted. LEC.

PHSX 701. Major Experiments and Observations in Classical and Contemporary Physics. 1-3 Hours.
Critique, discussions, and interpretation of the most important discoveries and observations in physics. LEC.

PHSX 702. Introductory Physics Pedagogy. 1 Hour.
This course will address basic elements of pedagogy in specific relation to the teaching of physics and astronomy labs. It contains such elements as: peer and instructor evaluations of teaching, reading and discussion of pedagogical materials, development of online course material, and discussion of teaching methods. This course may be repeated for credit. Prerequisite: Permission of instructor. LEC.

PHSX 703. Proposal Writing. 1 Hour.
Means and methods for preparing a successful proposal. This course will discuss how to find funding and other award opportunities. Students will learn how to develop an effective application and will complete an application. Intended for early career graduate students and advanced undergraduate students. LEC.

PHSX 711. Quantum Mechanics I. 3 Hours.

PHSX 717. Graduate Seminar. 1 Hour.
First year graduate students meet to survey research opportunities in the department and develop skills in giving oral presentations in physics and related areas. Students will also learn about topics in responsible scholarship that may include: the origin of ideas and the allocation of credit, the treatment of data, scientific misconduct, intellectual property and entrepreneurship, the researcher in society, collaborative research, mentor/trainee responsibilities, and safe practices. LEC.

PHSX 718. Mathematical Methods in Physical Sciences. 3 Hours.
Review of complex variable theory; introduction to the partial differential equations of physical systems; Fourier analysis; special functions of mathematical physics; and chemistry. (Same as CHEM 718.) Prerequisite: Two semesters of junior-senior mathematics. LEC.
PHSX 719. Physics and Astronomy Graduate Problem Solving. 1 Hour.
This course teaches students skills in solving graduate level physics and
astronomy problems. Graded on a satisfactory/unsatisfactory basis. LEC.

PHSX 721. Chaotic Dynamics. 3 Hours.
Topics covered may include the following: dynamical systems, attractors,
sensitive dependence on initial conditions, chaos, one-dimensional maps,
strange attractors and fractal dimensions, fat fractals, the horseshoe map,
symbolic dynamics, linear stability of periodic orbits, stable and unstable
manifolds, Lyapunov exponents, topological entropy, quasiperiodicity,
strange nonchaotic attractors, nonattracting chaotic sets, fractal basin
boundaries, renormalization group analysis, intermittency, crisis and
chaotic transients. Prerequisite: Mechanics (PHSX 521, or its equivalent),
ordinary differential equations (MATH 320, or its equivalent), and some
computer programming knowledge. LEC.

PHSX 727. Advanced Geophysics: ______. 1-3 Hours.
Topics to vary with demand and include heat flow, wave propagation,
synthetic seismograms, groundwater exploration, geothermal exploration,
electrical methods in exploration, rock mechanics-geotechnics, rock
magnetism, geomagnetism, paleomagnetism, geophysical inverse theory,
and others upon sufficient demand. May be repeated for different topics.
(Same as GEOL 771.) Prerequisite: GEOL 572 or consent of instructor.
LEC.

PHSX 731. Molecular Biophysics. 3 Hours.
Methods and concepts in contemporary molecular biophysics are
discussed. Particular emphasis is placed on the thermodynamics of
macromolecular interactions and quantitative methods of data analysis.
Basic enzymology and biophysical spectroscopy will also be reviewed.
Prerequisite: PHSX 212, MATH 125, and either CHEM 135 or CHEM 175.
LEC.

PHSX 741. Nuclear Physics I. 3 Hours.
Experimental methods in nuclear physics, elementary concepts
and simple considerations about nuclear forces, alpha and beta
decay, gamma radiation, nuclear structure, and reaction systematics.
Prerequisite: PHSX 511. LEC.

PHSX 761. Elementary Particles I. 3 Hours.
Particle accelerators and detectors; quarks and leptons; invariance
principles and conservation laws; strong, electromagnetic, and weak
interactions of elementary particles; unification of electroweak and other
interactions. Prerequisite: Corequisite: PHSX 711. LEC.

PHSX 781. Solid State Physics I. 3 Hours.
Classification of solids, structure and symmetry of crystals; lattice
vibrations and thermal properties of solids; electric and magnetic
properties; electron theory of metals and semiconductors; electronic and
atomic transport processes; theory of ionic crystals. Prerequisite: PHSX
511 (or CHEM 648) and PHSX 671 (or CHEM 646). LEC.

1-3 Hours.
Seminar designed to cover current topics in the physics of the Universe
beyond the solar system. Content will vary. Graduate students engaged
in or preparing for research may repeat enrollments in this course. Open
to undergraduates with twelve hours of physics/astronomy courses
numbered 500 or above, or consent of instructor. LEC.

PHSX 792. Topics in Advanced Astrophysics. 3 Hours.
This course will address one or more of the following advanced topics in
astrophysics: high energy astrophysics, nuclear astrophysics, galactic and
extragalactic astrophysics, space physics, cosmology, astrophysics,
and the interstellar and intergalactic media (ISM/IGM). This course may
be repeated for credit if topical content differs. (Same as ASTR 792.)
Prerequisite: ASTR 692 or permission of instructor. LEC.

PHSX 793. Physical Cosmology. 3 Hours.
Discussion of how fundamental laws of physics govern the evolution of
the universe as a whole along with its structure. Survey of cosmogenic
clues in the observable universe, including observed structures, cosmic
background radiation and evidence for dark matter. Development
of the universe, including theories of initial conditions; cosmological
phase transitions; generation of possible relics and dark matter;
symmetry breaking; baryon asymmetry; nucleosynthesis; recombination,
gravitational instability and the formation of structure; current experimental
techniques. Prerequisite: PHSX 718. Recommended: PHSX 693. LEC.

PHSX 795. Space Plasma Physics. 3 Hours.
The physics of fully ionized gases in magnetic fields and their application
to interplanetary processes, planetary radiation belts, and the sun.
The motion of charged particles in magnetic fields, magnetohydrodynamic
waves, the solar wind, the ionosphere, and the magnetosphere. (Same as
ASTR 795.) Prerequisite: PHSX 621. Corequisite: PHSX 631. LEC.

PHSX 800. Graduate Problems. 1-5 Hours.
Advanced laboratory problems, special research problems, or library
reading problems. Repeated enrollments are permitted. RSH.

PHSX 801. Advanced Topics. 1-3 Hours.
Lectures on advanced material not covered by regular courses. The topics
are not limited but generally address recent experimental or theoretical
developments in subjects such as superconductivity, nuclear physics,
elementary particle physics, quantum field theory, gauge and unified
theories, nonlinear or chaotic systems, space plasma physics, and
astrophysics and cosmology. Repeated enrollments are permitted. LEC.

PHSX 811. Quantum Mechanics II. 3 Hours.
Time dependent perturbation theory. Gauge invariance and
electromagnetic interactions. Quantization of the electromagnetic field
and applications. The Dirac equation, its transformation properties
and applications to relativistic problems. Scattering theory, elementary
applications, and formal properties. Prerequisite: PHSX 711. LEC.

PHSX 815. Computational Methods in Physical Sciences. 3 Hours.
Advanced computer applications in physical science. General discussion
and illustration of program organization and solution by numerical and
other methods with examples from physics, astronomy, and other physical
sciences. Students will design, write, validate, and document computer
programs to solve physical problems. (Same as ASTR 815 and CHEM
914.) Prerequisite: Six hours of computer science courses numbered 300
or above, and six hours of physics and/or astronomy courses numbered
300 or above. LEC.

PHSX 817. Graduate Seminar. 1 Hour.
First year graduate students meet to survey research opportunities in
the department and develop skills in giving oral presentations in physics
and related areas. Prerequisite: Only one hour of 817 can count toward
required hours for degree. LEC.

PHSX 821. Classical Mechanics. 3 Hours.
Vector and tensor notation; review of Newtonian mechanics; Lagrangian
mechanics; linear vector spaces and matrix theory with applications to the
treatment of small oscillations; rigid bodies; Hamiltonian formalism. Special
relativity. Prerequisite: Twelve hours of junior-senior courses in physics.
LEC.

PHSX 831. Electrodynamics I. 3 Hours.
Electrostatics and magnetostatics; Maxwell's equations; plane waves;
waveguides. Prerequisite: PHSX 718 and PHSX 821. LEC.
PHSX 841. Nuclear Physics II. 3 Hours.
Nuclear forces and the two-body problem; nuclear models; phenomenological treatment of nuclear reactions and decay processes. Prerequisite: PHSX 741 and PHSX 811. LEC.

PHSX 855. Advanced Optics. 3 Hours.
Advanced topics in optics that may include: Laser principles and techniques, light propagation in dielectrics, absorption and luminescence, interaction of light with free electrons and phonons, nonlinear optics, photonic devices, and optical spectroscopy. LEC.

PHSX 861. Elementary Particles II. 3 Hours.
Theoretical analysis of the standard model of strong and electroweak interactions. Applications to decay and scattering processes with comparison to experiments. Selected topics in non-perturbative physics. Examples of tests to probe beyond the standard model. Prerequisite: PHSX 761. Corequisite: PHSX 911. LEC.

PHSX 871. Statistical Physics I. 3 Hours.
Review of and advanced topics in thermodynamics; the Maxwell relations; the third law; phase transitions. Kinetic theory: the Boltzmann equation; transport phenomena. Statistical mechanics: ideal Maxwell-Boltzmann, Fermi-Dirac and Bose-Einstein gases; ensemble theory; derivation of the laws of thermodynamics. Prerequisite: PHSX 711 and PHSX 821. PHSX 671 is recommended. LEC.

PHSX 881. Solid State Physics II. 3 Hours.
More advanced topics in solid state physics that may include: diamagnetism, paramagnetism, ferromagnetism, and antiferromagnetism; electron and nuclear spin magnetic resonance; dielectric properties and ferroelectricity; photoconductivity and luminescence. Prerequisite: PHSX 631 and PHSX 711 (or CHEM 750). LEC.

PHSX 895. Plasma Physics. 3 Hours.
Magnetohydrodynamics, including discussion of shocks, waves, and stability theory; statistical mechanical foundations; kinetic theory; microstability; non-linear phenomena. Prerequisite: PHSX 795. LEC.

PHSX 899. Master's Research/Thesis. 1-10 Hours.
Research work (either experimental or theoretical) in physics for students working toward the master's degree. Repeated enrollments are permitted. Graded on a satisfactory progress/limited progress/no progress basis. TBE.

PHSX 911. Quantum Mechanics III. 3 Hours.
Path integral formulation of quantum mechanics. Introduction to quantum field theory using the canonical approach and using the path integral approach. Application of perturbation theory in quantum electrodynamics. Selected applications in condensed matter, nuclear, and particle physics. Prerequisite: PHSX 811. LEC.

PHSX 912. Quantum Field Theory. 3 Hours.
Survey of problems in quantum field theory. Functional methods. Renormalization and renormalization group. Role of symmetries. Gauge field theories. Symmetry breaking. Prerequisite: PHSX 911. LEC.

PHSX 915. Relativity. 3 Hours.
Reviews of special relativity, manifolds, tensors, and geometry. General coordinate covariance and general relativity. Applications to classical theory of gravitation: weak field tests, isotropic, homogeneous cosmology, Schwarzschild solution. Selected advanced topics. Prerequisite: A total of 10 hours of junior/senior work in physics and mathematics, including at least concurrent enrollment in MATH 646. LEC.

PHSX 917. Seminar in Theoretical Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. LEC.

PHSX 931. Electrodynamics II. 3 Hours.
Inhomogeneous Maxwell's equations and multipole radiation fields; special theory of relativity; radiation from accelerated charges; scattering and dispersion. Prerequisite: PHSX 831. LEC.

PHSX 947. Seminar in Particle Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. LEC.

PHSX 957. Seminar in Physics Education Research. 1-3 Hours.
Seminar designed to cover current topics in physics education research. Content will vary. Graduate students engaged in or preparing for research may repeat enrollments in this course. LEC.

PHSX 967. Seminar in Particle Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. LEC.

PHSX 971. Advanced Statistical Mechanics. 3 Hours.
Advanced equilibrium statistical mechanics and introduction to nonequilibrium statistical mechanics. Topics include: the theory of liquids, critical phenomena, linear response theory and time correlation functions, Langevin dynamics, and molecular hydrodynamics. (Same as CHEM 950.) Prerequisite: PHSX 871 or CHEM 917. LEC.

PHSX 987. Seminar in Solid State Physics. 1-3 Hours.
Graduate students engaged in or preparing for research may repeat enrollments in this course. The content will vary. LEC.

PHSX 999. Ph.D. Dissertation Research. 1-12 Hours.
Research work (either experimental or theoretical) in physics for students working toward the Ph.D. degree. Repeated enrollments are permitted. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Bachelor of Arts in Astronomy

Why study physics and astronomy?
Our goal is to understand the physical universe. The questions addressed by our department's research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billonths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate programs in astronomy
Astronomy degrees are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics,
and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, biology, or geology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Advising

Students considering a major in astronomy should confer early with a departmental representative about the selection of courses. The B.A. degree is appropriate for students who want a general education in astronomy as part of a broadly structured liberal education. The B.S. is a more specialized program with a substantial emphasis on physics content as well as astronomy. It provides preparation for a professional career or graduate work in astronomy, astrophysics, or related fields. A total of 120 credit hours is required for graduation.

First- and Second-Year Preparation

All major programs in physics and astronomy share requirements in basic physics and mathematics including PHSX 150, a seminar course for majors. Completion of MATH 125 and MATH 126 in the first year allows students to start calculus-based physics foundation courses (PHSX 211 and PHSX 216 or PHSX 213, followed by PHSX 212 and PHSX 236 or PHSX 214) by the second semester. Majors are encouraged to take PHSX 213 and PHSX 214, the honors versions of PHSX 211 and PHSX 212. Students should take these courses and ASTR 391 in their first two years. B.S. astronomy majors normally complete additional course work in mathematics (M http://catalog.ku.edu/search/?P=MATH

Requirements for the B.A. Major in Astronomy

All students pursuing the Bachelor of Arts in Astronomy must complete the KU Core requirements and the College BA specific requirements, listed in the KU Core and College sections of the catalog.

Additional astronomy, astrophysics, or physics courses required for major
In addition to the above specifically required courses, Astronomy BA candidates must complete at least 4 additional credits in physics or astronomy at the 300+ level. Students may enroll in ASTR 390 for undergraduate problems for 1 or more credit hours and in ASTR 503 (ASTR 501 honors) for research credit. ASTR 394 is highly recommended. Other recommended courses include ASTR 691 and 692, PHSX 594, GEOL 572, PHSX 313/316 and other PHSX courses 500 and above; most of these course have pre-requisites that may require additional preparation in mathematics and/or physics.

**Major Hours & Major GPA**

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 25.5 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**

Satisfied by a minimum of 16 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**

Satisfied by 25.5 hours of major courses.

Major GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Astronomy. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have completed MATH 104, or equivalent prior to the freshman year, fall semester.

### Total Hours 120.5-122.5

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CHEM 130 requires MATH 115 eligibility for enrollment.
3. Majors are required to complete a minimum of 5 hours of 300+ level electives in Physics or Astronomy.
4. Course Timing is interchangeable between Junior and Senior years and is dependent on course offering/availability. ASTR 591 is taught in fall semesters of odd-numbered years and ASTR 592 is taught in spring semesters of even-numbered years.
5. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate’s final semester, achieve a GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 503, PHSX 501 or PHSX 503. All of our department’s honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. Students planning to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.

Bachelor of Science in Astronomy

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate programs in astronomy

Astronomy degrees are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics, and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, biology, or geology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualification requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Advising

Students considering a major in astronomy should confer early with a departmental representative about the selection of courses. The B.A. degree is appropriate for students who want a general education in astronomy as part of a broadly structured liberal education. The B.S. is a more specialized program with a substantial emphasis on physics content as well as astronomy. It provides preparation for a professional career or graduate work in astronomy, astrophysics, or related fields. A total of 120 credit hours is required for graduation.

First- and Second-Year Preparation

All major programs in physics and astronomy share requirements in basic physics and mathematics including PHSX 150, a seminar course for majors. Completion of MATH 125 and MATH 126 in the first year allows students to start calculus-based physics foundation courses (PHSX 211 and PHSX 216 or PHSX 213, followed by PHSX 212 and PHSX 236 or PHSX 214) by the second semester. Majors are encouraged to take PHSX 213 and PHSX 214, the honors versions of PHSX 211/PHSX 216 and PHSX 212/PHSX 236. Students should take these courses and ASTR 391 in their first two years. B.S. astronomy majors normally complete additional course work in mathematics (MATH 127, MATH 290, and MATH 320), as well as PHSX 313 and PHSX 316, in the second year.
Requirements for the B.S. Degree in Astronomy

All students pursuing the Bachelor of Science in Astronomy must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the KU Core requirements, please see the KU Core section of the catalog.

**Code** | **Title** | **Hours**
--- | --- | ---

### General science requirements

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

**Computing and Programming. Satisfied by one of the following:**

- EEC 138 Introduction to Computing: 3-4
- or EEC 168 Programming I
- or EEC 169 Programming I: Honors

*Calculus I. Satisfied by one of the following:*

- MATH 125 Calculus I: 4
- or MATH 145 Calculus I, Honors

*Calculus II. Satisfied by one of the following:*

- MATH 126 Calculus II: 4
- or MATH 146 Calculus II, Honors

**Seminar in Physics, Astronomy, & Engineering Physics. Satisfied by the following:**

- PHSX 150 Seminar in Physics, Astronomy and Engineering Physics: 0.5

*General Physics I. Satisfied by one of the following:*

- PHSX 211 General Physics I: 5
- & PHSX 216 and General Physics I Laboratory
- PHSX 213 General Physics I Honors: 5

*General Physics II. Satisfied by one of the following:*

- PHSX 212 General Physics II: 4
- & PHSX 236 and General Physics II Laboratory
- PHSX 214 General Physics II Honors: 4

*Foundations of Chemistry I. Satisfied by one of the following:*

- CHEM 130 General Chemistry I: 5
- or CHEM 150 Chemistry for Engineers
- or CHEM 170 Chemistry for the Chemical Sciences I
- or CHEM 190 Foundations of Chemistry I, Honors
- & CHEM 191 and Foundations of Chemistry I Laboratory, Honors

### Advanced Mathematics Core Knowledge and Skills

**Vector Calculus. Satisfied by the following:**

- MATH 127 Calculus III: 4
- or MATH 147 Calculus III, Honors

**Elementary Linear Algebra. Satisfied by the following:**

- MATH 290 Elementary Linear Algebra: 2
- or MATH 291 Elementary Linear Algebra, Honors

**Elementary Differential Equations. Satisfied by the following:**

- MATH 320 Elementary Differential Equations: 3
- or MATH 220 Applied Differential Equations
- or MATH 221 Applied Differential Equations, Honors

*Math Elective. Satisfied by one of the following:*

- MATH 526 Applied Mathematical Statistics I
- or MATH 530 Mathematical Models
- or MATH 581 Numerical Methods
- or MATH 590 Linear Algebra
- or MATH 628 Mathematical Theory of Statistics
- or MATH 646 Complex Variable and Applications
- or MATH 647 Applied Partial Differential Equations
- or MATH 648 Calculus of Variations and Integral Equations
- or MATH 660 Geometry I
- or MATH 661 Geometry II

*any 700-level MATH lecture course except MATH 701 and MATH 715.*

**Astronomy Requirements for Major**

Majors must complete the following seven courses:

- ASTR 391 Physical Astronomy, Honors: 3
- ASTR 591 Stellar Astronomy: 3
- ASTR 592 Galactic and Extragalactic Astronomy: 3
- ASTR 596 Observational Astrophysics: 2
- ASTR 691 Astrophysics I: 3
- ASTR 692 Astrophysics II: 3
- ASTR 503 Undergraduate Research: 1-4

### Physics Core Knowledge and Skills

Majors must complete courses as indicated in the following areas:

**General Physics III. Satisfied by the following:**

- PHSX 313 General Physics III: 3

*Intermediate Physics Lab. Satisfied by the following:*

- PHSX 316 Intermediate Physics Laboratory I: 1

*Introductory Quantum Mechanics. Satisfied by the following:*

- PHSX 511 Introductory Quantum Mechanics: 3

*Physical Measurements or Electronic Circuit Measurement and Design. Satisfied by one of the following:*

- PHSX 516 Physical Measurements: 4
- PHSX 536 Electronic Circuit Measurement and Design: 4

*Mechanics I. Satisfied by the following:*

- PHSX 521 Mechanics I: 3

*Electricity and Magnetism. Satisfied by the following:*

- PHSX 531 Electricity and Magnetism: 3

*Thermal Physics. Satisfied by the following:*

- PHSX 671 Thermal Physics: 3

*Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher (PHSX 693 recommended) (with the exception of PHSX 594), including:*

- ASTR 792 Topics in Advanced Astrophysics
- ASTR 795 Space Plasma Physics
- or PHSX 795 Space Plasma Physics
- PHSX 693 Gravitation and Cosmology (recommended)

### Major Hours & Major GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Major Junior/Senior Graduation GPA, Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Below is a sample 4-year plan for students pursuing the BS in Astronomy. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have completed MATH 104, or its equivalent, prior to the freshman year, fall semester.

**Total Hours 120.5-122.5**

1. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
2. Offered odd-numbered years.
3. Offered even-numbered years.
4. PHSX 150, PHSX 521, ASTR 591, ASTR 596, ASTR 691, PHSX 531, and PHSX 671 are Fall only courses.
5. ASTR 391, PHSX 511, ASTR 592, and ASTR 692 are Spring only courses.
6. Majors are encouraged to take PHSX 213.

**Please note:**
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate's final semester, achieve a minimum GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 503, PHSX 501 or PHSX 503. All of our department’s honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline
specific meeting); or (3) presentation of a poster at an appropriate venue. Students to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.

**Bachelor of Arts in Physics**

**Why study physics and astronomy?**

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse careers ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

**Undergraduate programs in physics and astronomy**

We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational physical science and critical thinking can be useful – examples include teaching and medicine – and anyone seeking to include astronomy and physics as part of their general education. The department offers BA degrees in astronomy and physics and BS degrees in astronomy, physics, and engineering physics. Degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The primary degree offered is a BS in Physics. In addition to this standard BS in Physics, there are also interdisciplinary and pre-medicine versions (concentrations) of the BS in Physics degree. The interdisciplinary track allows students to take elective courses in other STEM disciplines and the pre-medicine emphasis is for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in locales such as Antarctica, Chile, and CERN).

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Requirements for the B.A. Major in Physics**

All students pursuing the Bachelor of Arts in Physics must complete the KU Core requirements and the College BA specific requirements, listed in the KU Core and College sections of the catalog.

**Bachelor of Arts in Physics Major Course Requirements**

<td>Visit this website [<a href="https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/">https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/</a>] for a list of courses that fulfill the BA Quantitative Reasoning requirement.</td>
</tr>
</tbody>
</table>

Please note: All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/ Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate's final semester, achieve a minimum GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in one of the following: ASTR 503, PHSX 501 or PHSX 503. All of our department's honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue.

Students planning to graduate with honors must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.
**BA in Physics with concentration in Computational Physics**

Below is a sample 4-year plan for students pursuing the BA in Physics with a concentration in Computational Physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to freshman year, fall semester.

### Freshman

**Total Hours:** 13

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Prerequisite for MATH 125: MATH 104; or MATH 103; or three years of college preparatory mathematics including trigonometry and a score of 28 or higher on ACT mathematics; or a qualifying score on the mathematics placement test.
3. MATH 320 or MATH 220 (or MATH 221) is a pre-requisite for PHSX 313.
4. Either PHSX 536 or PHSX 516 is required for the major, not both.
5. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

- All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
- The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Bachelor of Science in Physics

**Why study physics and astronomy?**

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of years to the age of the universe. Our courses and laboratory/research experiences help students hone their
problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse careers ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate program in physics and astronomy

We welcome all students curious about the universe around them. This includes not only students planning on graduate study in STEM, but also students from other disciplines where a background in foundational physical science and critical thinking can be useful – examples include teaching and medicine – and anyone seeking to include astronomy and physics as part of their general education. The department offers BA degrees in astronomy and physics and BS degrees in astronomy, physics, and engineering physics. Degrees in astronomy and physics are granted through the College of Liberal Arts and Sciences whereas engineering physics degrees are granted through the School of Engineering. The primary degree offered is a BS in Physics. In addition to this standard BS in Physics, there are also interdisciplinary and pre-medicine versions (concentrations) of the BS in Physics degree. The interdisciplinary track allows students to take elective courses in other STEM disciplines and the pre-medicine emphasis is for students interested in health professions. We also offer minors in astronomy and physics and a certificate in astrophysics of origins. We involve our undergraduate majors in cutting-edge research practically from the day they join the department; research is a requirement of both the BS Astronomy and BS Physics degrees. The breadth of our research program affords our students exposure to a number of different fields and we are justifiably proud of our undergraduate researchers who routinely publish papers, attend conferences, and/or conduct research abroad (in locales such as Antarctica, Chile, and CERN.).

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadliness and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements.

See individual department/program sections for departmental admission requirements.

Requirements for the B.S. Degree in Physics

Physics Bachelor of Science (B.S.) General Education Requirements

All students pursuing the Bachelor of Science in Physics must complete the KU Core requirements in addition to the degree and major requirements. For details regarding the KU Core requirements, please see the KU Core section of the catalog.

### BS in Physics with Interdisciplinary Specialization 25-30

Computing and Programming. Satisfied by:
- EECS 138 Introduction to Computing: _____
- or EECS 167 Programming I
- or EECS 167 Programming I: Honors

Advanced Physics Labs. Satisfied by one of the following:
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design

Advanced Physics. Satisfied by two of the following:
- PHSX 621 Mechanics II
- PHSX 631 Electromagnetic Theory
- PHSX 711 Quantum Mechanics I
- PHSX 516 Physical Measurements
- PHSX 536 Electronic Circuit Measurement and Design

Physics Elective. Satisfied by any PHSX lecture or laboratory course numbered 500 or higher and not part of the other specific requirements for the major.

Math Elective. Satisfied by one of the following:
- PHSX 518 Mathematical Physics
- PHSX 718 Mathematical Methods in Physical Sciences
- MATH 526 Applied Mathematical Statistics I
- MATH 530 Mathematical Models
- MATH 558 Introductory Modern Algebra
- MATH 581 Numerical Methods
- MATH 590 Linear Algebra
- MATH 628 Mathematical Theory of Statistics
- MATH 646 Complex Variable and Applications
- MATH 647 Applied Partial Differential Equations
- MATH 648 Calculus of Variations and Integral Equations
- MATH 660 Geometry I
- MATH 661 Geometry II
- any 700-level MATH lecture course except MATH 701 and MATH 715

Allied Science Fields. Satisfied by the completion of 2 advanced courses in 1 allied science field chosen from the following:

- Biology. Satisfied by two of the following:
  - BIOL 400 Fundamentals of Microbiology
  - BIOL 412 Evolutionary Biology
  - BIOL 416 Cell Structure and Function
  - BIOL 595 Human Genetics
  - BIOL 600 Introductory Biochemistry, Lectures
  - BIOL 636 Biochemistry I
  - BIOL 638 Biochemistry II
  - BIOL 546 Mammalian Physiology
- Chemistry. Satisfied by two of the following:
  - CHEM 598 Research Methods (UKanTeach students only)
  - CHEM 310 Fundamentals of Organic Chemistry
  - CHEM 330 Organic Chemistry I
  - CHEM 335 Organic Chemistry II
  - CHEM 530 Physical Chemistry I
  - CHEM 535 Physical Chemistry II
- Geology. Satisfied by two of the following:
  - GEOL 360 Field Investigation
GEOL 562 Structural Geology
GEOL 575 Seismic Exploration
GEOL 576 Potential Fields Exploration

Electrical Engineering and Computer Science. Satisfied by two of the following:
EECS 622 Microwave and Radio Transmission Systems
EECS 628 Fiber Optic Communication Systems
EECS 670 Introduction to Semiconductor Processing
EECS 713 High-Speed Digital Circuit Design
EECS 721 Antennas
EECS 728 Fiber-optic Measurement and Sensors

BS in Physics with Pre-Medicine Specialization 65
Advanced Physics Labs. Satisfied by one of the following:
PHSX 516 Physical Measurements
PHSX 536 Electronic Circuit Measurement and Design
Introductory Biology. Satisfied by the following:
BIOL 150 Principles of Molecular and Cellular Biology
BIOL 152 Principles of Organismal Biology
BIOL 154 Introductory Biology Lab for STEM Majors
BIOL 240 Fundamentals of Human Anatomy
or BIOL 546 Mammalian Physiology
Genetics. Satisfied by the following:
BIOL 350 Principles of Genetics
Advanced Biology. Satisfied by:
BIOL 400 Fundamentals of Microbiology
BIOL 503 Immunology
Biochemistry. Satisfied by the following:
BIOL 600 Introductory Biochemistry, Lectures
General Chemistry II. Satisfied by:
CHEM 135 General Chemistry II
or CHEM 17 Chemistry for the Chemical Sciences II
or CHEM 19 Foundations of Chemistry II, Honors
& CHEM 19 and Foundations of Chemistry II Laboratory, Honors
Organic Chemistry. Satisfied by:
CHEM 330 Organic Chemistry I
CHEM 331 Organic Chemistry I Laboratory
CHEM 335 Organic Chemistry II
CHEM 336 Organic Chemistry II Laboratory
Physical Chemistry. Satisfied by:
CHEM 520 Biological Physical Chemistry with Laboratory
or CHEM 53 Physical Chemistry I
& CHEM 53 and Physical Chemistry Laboratory
BIOL, MATH, or PHSX Elective (above 400 level)

Additional Requirements
SOC 104 Elements of Sociology Also satisfies KU Core Goal Goal 4.1
or SOC 105 Elements of Sociology, Honors
PSYC 104 General Psychology Also satisfies KU Core Goal Goal 3.3
or PSYC 105 General Psychology, Honors
SPAN 104 Elementary Spanish I
or SPAN 111 Intensive Elementary Spanish

1 This course will not count as one of the two Advanced Physics Courses if it has already counted toward the one required Advanced Physics Lab.

Physics Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Departmental Honors in Physics and Astronomy

Qualified students earning either a B.A. or a B.S. degree in the College of Liberal Arts and Sciences with a major in astronomy or physics may graduate with Honors in Physics & Astronomy by fulfilling the following requirements: (1) By the end of the candidate’s final semester, achieve a minimum GPA of 3.5 in the major, in all courses taken in residence and elsewhere; and (2) Complete at least 24 semester hours of astronomy and physics courses numbered 500 or above, including undergraduate research represented by two hours of credit in ASTR 503, PHSX 501 or PHSX 503. A grade of B or better must be earned in the following: ASTR 503, PHSX 501 or PHSX 503. All of our department’s honors requirements include student research, for which results shall be presented in either: (1) a written research summary, read by 3 faculty members in physics and astronomy or related fields or authorship on a peer-reviewed manuscript; or (2) a research-based oral presentation at an appropriate venue (e.g., Undergraduate Research Symposium, a presentation in an advanced department seminar class, a discipline specific meeting); or (3) presentation of a poster at an appropriate venue. Students planning to graduate with honors in physics and astronomy must file a Declaration of Intent Form with the Departmental Honors Coordinator, preferably during their junior year but no later than enrollment for the final undergraduate semester.

BS in Physics with specialization in Interdisciplinary Physics

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BS in Physics with specialization in Pre-Professional Physics

Below is a sample 4-year plan for students pursuing the BS in Physics. This degree provides coursework and training necessary for students interested in pursuing graduate study in physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
BS in Physics with specialization in Pre-Medicine

The BS in Physics, Pre-Medicine specialization, provides coursework and training necessary for students interested in pursuing a career in medicine, medical physics, or biophysics. The requirements of this degree program are designed to meet the admission requirements of regional medical schools.

Below is a sample 4-year plan for students pursuing the BS in Physics with Pre-Medicine specialization. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Astrobiology

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billionths of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Undergraduate programs in astronomy

Astronomy degrees are offered through the Department of Physics and Astronomy. The astronomy curriculum offers undergraduates a survey of modern astronomy and an introduction to physical science, gives science and engineering students an introduction to astronomy and astrophysics,
and prepares students majoring in astronomy for graduate study in astronomy or related fields.

Courses for Nonmajors

ASTR 191 surveys a wide range of contemporary astronomy topics while ASTR 293 discusses a shorter list of astrophysically extreme objects in greater detail; both courses require eligibility for MATH 101. ASTR 394 is open to students with previous coursework in astronomy, biology, or geology; ASTR 391 offers an introduction to physical astronomy at a calculus-based level.

**Total Hours**

21-22

## Minor Hours & Minor GPA

While completing all required courses (above), minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**

Satisfied by 21 hours of major courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the major.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 13 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in the minor. GPA calculations include all courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
Undergraduate Certificate in Astrophysics of Origins

The undergraduate certificate, Astrophysics of Origins, offers an exposure to the wonders of the Universe and the possible future of space exploration in the 21st century. Building on foundational coursework in physics, the certificate course offerings provide exposure to astrophysics and the search for life in the Universe as well as a cultural appreciation of origin stories from many cultures.

1. PHSX 210 (General Physics I for Engineers, 3 credit hours) or PHSX 211 (General Physics I, 4 credit hours) or PHSX 213 (General Physics I, Honors, 5 credit hours).
2. PHSX 212 (General Physics II, 3 credit hours)
3. Any two of the following courses: ASTR 391 (Physical Astronomy, Honors, 3 credit hours); ASTR 394 (Quest For Extranerrestrial Life, 3 credit hours); PHSX 594 (Cosmology and Culture, 3 credit hours).

This certificate thus requires between 12 and 14 credit hours.

Master of Science in Physics

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem solving and analytical skills and thereby become broadly trained critical thinkers. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Physics and Astronomy Graduate Program

Admission requires an undergraduate grade-point average of at least B (3.0 on a 4.0 scale), overall and in the major. A baccalaureate degree with a major in physics is desirable but not required. Recommended preparation consists of courses in mechanics, electromagnetic theory, thermal physics, introductory quantum mechanics, advanced laboratory, and at least one course in mathematics beyond differential equations. Working knowledge of computers and of an advanced programming language is helpful. A student with less than the recommended preparation may enroll in these courses for graduate credit.

The General and Subject GRE are not required for admissions to the Physics and Astronomy graduate program. Submit your graduate application online (https://gradapply.ku.edu/apply/). Send all other requested application materials to the department:

The University of Kansas
Department of Physics and Astronomy
Graduate Coordinator
1251 Wescoe Hall Dr.
1082 Malott Hall
Lawrence, KS 66045

M.S. Degree in Physics

Candidates must complete a minimum of 30 credit hours of advanced lecture courses (numbered 500 or above) in physics and related subjects within a period of 7 years. Credit toward the 30 required hours is not given to students who take courses at a lower level after having completed similar upper level courses (as determined by the department) with a grade of B- or higher.

Program requirements include

1. Within 12 months of entering the program the student must fulfill the requirements of the individualized plan of study (http://physics.ku.edu/individualized-plan-of-study/) for all graduate degrees to certify an undergraduate knowledge of Physics. Visit the Department’s website for more information on these requirements and the process of certification.
2. 4 basic courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHSX 711</td>
<td>Quantum Mechanics I</td>
<td>3</td>

<td>PHSX 795</td>
<td>Space Plasma Physics</td>
<td>3</td>
</tr>
<tr>
<td>PHSX 815</td>
<td>Computational Methods in Physical Sciences</td>
<td>3</td>
</tr>
</tbody>
</table>

4. A minimum of 2 hours in PHSX 899 Master’s Research/Thesis is required, with a maximum of 6 hours that count toward the master’s degree. No more than 3 hours will be allowed unless directed towards completion of a thesis on original research or a written report. Students must consult with the research advisor before enrolling in more than 3 credit hours.
5. The remaining 6 to 10 hours of advanced electives must be either advanced lecture courses or advanced undergraduate laboratory courses. (This proviso excludes seminars and special problems courses.)

6. All graduate students, after their first semester, will deliver at least 1 oral presentation per semester.

7. General Examination: Candidates must pass a general oral examination in physics. The examination is given shortly before completion of other work for the degree. A master’s thesis is not required but may be submitted if the candidate and the director of the candidate’s research believe it to be appropriate.

The departmental web page with some additional information, e.g., milestones, can be found at http://www.physics.ku.edu/~physics/graduate/about.shtml (http://www.physics.ku.edu/~physics/graduate/about.shtml/)

Please go to this website to see the University’s policy on time limits: https://policy.ku.edu/graduate-studies/ma-program-time-constraints (https://policy.ku.edu/graduate-studies/ma-program-time-constraints/)

---

**M.S. with emphasis in Computational Physics and Astronomy**

This degree is a subspecialty program for students with a background in physics, astronomy, computer science, mathematics, or engineering who wish to become familiar with computer-based approaches to problems in these fields. This degree is intended as a terminal MS that can be completed in two years. Minimum preparation expected includes a year’s course in general physics, mathematics through differential equations, and a knowledge of python, FORTRAN, C++ or another programming language suited to scientific applications. Students pursuing this degree with an applied mathematics emphasis may wish to consider also earning a Graduate Certificate in Applied Mathematics (http://www.math.ku.edu/news/2016/12/Graduate_Certificate_in_Applied_Mathematics.pdf).

---

**Degree Requirements**

A total of at least 33 hours of credits including 30 hours of graduate credit is required for the degree. At least 50% of these hours must be at the 700 level or above. Courses numbered 500 or above count for graduate credit. Some of the courses listed below are undergraduate level EECS courses that do not count as graduate credit. Students entering the program may have satisfied several of these requirements but a total of 30 hours of graduate credit is still required. No more than the required 6 hours of PHSX 899 (Master’s Research/Thesis) may be counted toward the degree.

1. Within 12 months of entering the program the student must fulfill the requirements of the individualized plan of study (http://physics.ku.edu/individualized-plan-of-study/) for all graduate degrees to certify an undergraduate knowledge of Physics. Visit the Department’s website for more information on these requirements and the process of certification.

2. Required Courses (24 credit hours)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EECS 781</td>
<td>Introduction to Scientific Computing</td>
<td>3</td>
</tr>
</tbody>
</table>

---

**EECS – 1 course at the 300 level or above (in addition to MATH/EECS 781)** (Note: courses below the 500 level will not count towards the required 30 hours of graduate credit.)

EECS or MATH - 1 course at the 700 level or above in EECS or MATH (in addition to MATH/EECS 781 and the EECS 300+ requirement)

1 additional PHSX/ASTR lecture course at the 500 level or above

PHSX 899 Master’s Research/Thesis

3. 9 or more credits from at least 3 lecture or lab courses from the following list of courses:

   Note: Double counting of courses is not allowed, e.g. a course used to fulfill a requirement under part 2. (e.g. EECS 448) may not also be counted under part 3.

PHSX/ASTR Courses Numbered 500 and above

---

4. All graduate students, after their first semester, will deliver at least 1 oral presentation (http://physics.ku.edu/academics/graduate/requirements/#communication) per semester.

5. An important component of this degree is the completion and documentation of a successful computer project. A thesis must be presented that describes the basic physics involved in the project, the method of implementing the project, and a discussion of the results. An oral defense of the thesis is required before a committee of at least 3 members of the graduate faculty.

The departmental web page with some additional information, e.g., the Graduate Handbook and milestones, can be found at http://physics.ku.edu/graduate-studies (http://physics.ku.edu/graduate-studies/)
Doctor of Philosophy in Physics

Why study physics and astronomy?

Our goal is to understand the physical universe. The questions addressed by our department’s research and education missions range from the applied, such as an improved understanding of the materials that can be used for solar cell energy production, to foundational questions about the nature of mass and space and how the Universe was formed and subsequently evolved, and how astrophysical phenomena affected the Earth and its evolution. We study the properties of systems ranging in size from smaller than an atom to larger than a galaxy on timescales ranging from billions of a second to the age of the universe. Our courses and laboratory/research experiences help students hone their problem-solving abilities and analytical skills and thereby become broadly trained critical thinkers. While about half of our majors move on to graduate studies in STEM, many find employment in the private sector in diverse situations ranging from financial analysts to physicians. Graduates of all our degree programs can be found in key positions regionally, nationally, and internationally. In this way, our department is at the forefront of telling the academic story of the University of Kansas to people around the state and around the world.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Physics and Astronomy Graduate Program

Ph.D. Degree Requirements

Undergraduate Preparation

All students must adhere to the General Requirements for all Graduate Degrees (http://physics.ku.edu/individualized-plan-of-study/), which are part of each student’s Individualized Plan for ensuring student preparation.

Course Requirements

What follows are the default set of requirements for all Ph.D. candidates.

1. A total of 10 advanced lecture courses (30 hours of level 700 and above) is required. This excludes all seminars, classes taken as part of the Individualized Plan, and colloquia.

2. Core Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHSX 711</td>
<td>Quantum Mechanics I</td>
<td>3</td>
</tr>
<tr>
<td>PHSX 811</td>
<td>Quantum Mechanics II</td>
<td>3</td>
</tr>
<tr>
<td>PHSX 821</td>
<td>Classical Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>PHSX 831</td>
<td>Electrodynamics I</td>
<td>3</td>
</tr>
</tbody>
</table>

3. Other required courses:

<table>
<thead>
<tr>

<tr>
<td>PHSX 871</td>
<td>Statistical Physics I</td>
<td>3</td>
</tr>
<tr>
<td>PHSX 931</td>
<td>Electrodynamics II</td>
<td>3</td>
</tr>
</tbody>
</table>

4. Two additional PHSX lecture courses numbered 700 or above. This excludes PHSX 815 (computational physics) and PHSX 717 (graduate seminar). The 2 courses must be in different sub-fields of physics and they may not be used to simultaneously satisfy other degree requirements in force.

5. One credit hour of Colloquium is required (PHSX 700). See Department website (https://physics.ku.edu/degrees/physics/phd/course-requirements/) for explanation.

6. All graduate students, after their first semester, will deliver at least 1 oral presentation per semester.

The courses listed above comprise the Department course requirements common to all students except those pursuing a multi-disciplinary plan of study, which is described below. Subsequent work, consisting of advanced courses in appropriate fields and seminars, will be selected by the student and the advisor on the basis of the student’s need and intended field of specialization. The student’s dissertation committee will determine the adequacy of the student’s courses and seminars and will specify the total course requirements.

Students who wish to pursue a more multidisciplinary plan of study may incorporate coursework from up to 2 other natural science, engineering, or mathematics (STEM) departments at KU by substituting non PHSX courses at the 600 level and above from these other disciplines for the 2 additional electives described in items 3 and 4 above. The research advisor, or in the absence of one, the Departmental Graduate Advisor (who is the default advisor for all students without a research advisor),
shall approve all such outside course choices and provide documentation for the student file on the approved courses and their rationale.

Students who wish to take courses in the social sciences, humanities, or professional schools must submit a detailed plan of study that must be approved by the Physics and Astronomy Graduate Committee. Please note that while these unique plans involving non-STEM fields will be considered, there is no guarantee that the plan of study will be approved.

**Preliminary Candidacy**

To be admitted to preliminary candidacy, each graduate student must satisfy the following department requirements:

1. Within 12 months of entering the program the student must fulfill the requirements of the individualized plan of study (http://physics.ku.edu/individualized-plan-of-study/) for all graduate degrees to certify an undergraduate knowledge of Physics. Visit the Department’s website for more information on those requirements and the process of certification.

2. Achieve a minimum core course grade point average of 3.2. The core course GPA is computed from the following equally weighted elements:
   a. Grade obtained in PHSX 711 Quantum Mechanics I
   b. Grade obtained in PHSX 811 Quantum Mechanics II
   c. Grade obtained in PHSX 821 Classical Mechanics
   d. Grade obtained in PHSX 831 Electrodynamics I
   e. Average grade of 2 other PHSX lecture courses numbered 700 or higher, excluding PHSX 815 (computational physics) and PHSX 717 (graduate seminar).

3. Students may repeat of the core courses (PHSX 711, PHSX 811, PHSX 821, PHSX 711, PHSX 821, and PHSX 831) once for the purpose of improving the core GPA. In calculating the core GPA, the Department will use only the better of the two grades.

4. The two additional 700 level or higher PHSX lecture courses (#4 under course requirements) must be taken at KU, but students entering with graduate credit from other institutions may petition the Graduate Committee for a waiver for any of the 4 named core courses. For the purposes of the core GPA, grades (of "B" or better) from the previous institution may be used for at most 3 of the 4 named courses.

5. Graduate students are normally expected to complete all core courses by the end of their second year of enrollment.

**Decision on Preliminary Candidacy**

Once requirements for Preliminary Candidacy have been met, the Graduate Committee will decide whether or not to admit the student to Preliminary Candidacy. Once requirements for Preliminary Candidacy have been met and confirmed by the Graduate Committee, the Graduate Committee Chair will report this result to the Graduate Faculty.

**Research Skills and Responsible Scholarship**

By the end of 1 year after being admitted to preliminary candidacy, the student must complete PHSX 815/ASTR 815, Computational Physics and Astronomy, with a grade of "B" or higher in order to satisfy the Research Skills requirement. Note that this course has significant prerequisites in undergraduate Computer Science. The Responsible Scholarship requirement is filled via completion of PHSX 717.

**Pedagogical Instruction**

Every student who receives a GTA appointment will be required to complete PHSX 702 at the first offering of the course starting with the semester of the student's initial GTA appointment. Failure to complete this class at the first opportunity may affect consideration for subsequent GTA appointments.

**Comprehensive Examination**

After completing a major portion of the required course work and satisfying the computing skills requirement, the student must pass the comprehensive examination.

The student will write a 2,000 to 4,000 word paper on a topic in their chosen sub-field that is relevant to their thesis work.

**Post-Comprehensive Requirements**

Upon passing the comprehensive examination, the student becomes a candidate for the Ph.D. degree. Each candidate must complete a research project that has been approved by the dissertation committee. The committee establishes the candidate's course requirements and directs the research.

At least once each year after passing the comprehensive examination, the student must schedule a meeting with his or her dissertation committee to discuss progress towards the completion of the dissertation and any other concerns.

**Final Oral Examination**

To be awarded the PhD in Physics, a candidate for the degree must complete a dissertation and pass a final oral examination.

The departmental web page with some additional information, e.g., the Graduate Handbook and milestones, can be found at http://physics.ku.edu/graduate-studies/ (http://physics.ku.edu/graduate-studies/)

**Department of Political Science**

**Why study political science?**

Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought of today, as one of the social sciences, is a comparatively new discipline. It developed in the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government.

Political scientists are concerned with the origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

Ask yourself, Am I interested in public affairs? Am I a good analytical and critical thinker? Am I curious about the world and it's workings? Do I communicate well orally and in writing? Do I want to be a knowledgeable citizen? Am I interested in the relationship between government and the people? Am I curious about how decisions are made and how conflicts are resolved?
Undergraduate Programs

Course work is for students studying contemporary political processes as part of their general education, for students majoring in allied social sciences, for students planning to enter professions such as law and teaching, and for majors in political science.

Courses for Nonmajors

Political Science offers several introductory courses that may be used as electives, to fulfill KU Core requirements, or to prepare for study in advanced topics in the same area.

Public Affairs Internship Program

The department supervises integrated internships for majors who are second-semester juniors or seniors. They are offered during the spring semester in Topeka and Washington, D.C. Programs consist of up to 12 hours in political science—an internship, participation in an intern seminar, and directed readings. Students serve as interns in Topeka or Washington at least 4 days each week and attend weekly seminars. Students also may enroll in a directed readings course with a faculty member on campus. Readings provide a theoretical and analytical study program related to the internship and the seminar. Contact the department early in the fall semester.

Graduate Programs

The department offers M.A. and Ph.D. degrees for students interested in academic work in political science leading to teaching and research careers. Political science graduates also have found careers in the public, private, and not-for-profit sectors. Ph.D. students can pursue concentrations in U.S. politics, comparative politics, international relations, political theory, and public policy.

Students who are interested in enrolling in graduate level coursework in the Department of Political Science without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking status. See the department's non-degree seeking admission webpage (https://kups.ku.edu/admission-nds/) for further details.

Fields of Graduate Study

For graduate study, courses in the department are divided into the following fields:

- U.S. political institutions and processes
- Comparative politics
- International relations
- Public policy
- Political philosophy and empirical theory

Courses

POLS 102. Introduction to Political Science as a Career. 1 Hour S.
Provides an overview of the discipline of political science; emphasizes developing an understanding of opportunities in political science at the University of Kansas and careers with a political science degree. Major sub-fields within the discipline are discussed as well as the benefits of particular tracks within the departmental coursework. The course helps students plan their goals for their education and match those goals to career goals. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Enrollment by permission of the instructor only. LEC.

POLS 110. Introduction to U.S. Politics. 3 Hours SF GE3S / S.
An introduction to basic American governmental institutions, political processes, and policy. LEC.

POLS 111. Introduction to U.S. Politics Honors. 3 Hours SF GE3S / S.
Open only to students in the College Honors Program or by consent of instructor. LEC.

POLS 125. Intelligence: Supporting National Security. 3 Hours S.
This course examines the evolution of the U.S. Intelligence Community and how it is adapting to new international security challenges. The course discusses the historical background of U.S. intelligence and how political ideology, domestic policies, technology, and the threat have shaped today’s U.S. Intelligence Community. The course provides an overview of the roles, missions, and structure of the U.S. Intelligence Community and how the various components support national security decision makers. The course also provides an overview of diplomacy and intelligence as tools of statecraft. Course looks at foreign intelligence services, their targets, and operational successes and failures. Finally, the course addresses emerging national security issues potentially shaping future U.S. intelligence operations. On completion of the course, students will have an in-depth understanding of the U.S. Intelligence community, how it supports national security decision makers, and how it can influence policy development. LEC.

POLS 130. US Intelligence Community. 3 Hours S.
This course provides a comprehensive look at the roles, missions, and structure of the U.S. Intelligence Community. Students will develop an understanding of the components of the intelligence process used by the U.S. Intelligence Community: (1) planning and direction, (2) collection, (3) processing, (4) analysis and production, and (5) dissemination. This course also addresses the various polices and executive orders shaping intelligence collection both domestically and abroad, such as, intelligence oversight and restrictions on sharing and dissemination of information within and between local, state, and federal government agencies and the private sector. On completion of the course, students will have an in-depth understanding of the roles of the various components of the U.S. Intelligence Community and the intelligence processes used to support national security decision makers. Prerequisite: POLS 125. LEC.

POLS 150. Introduction to Comparative Politics. 3 Hours SF AE42/GE3S / S.
An introduction to the comparative study of political systems emphasizing governmental structures, parties, electoral techniques, and recent trends in the field. The course also considers major differences between (1) representative and autocratic systems, and (2) developed and underdeveloped nations. LEC.

POLS 151. Introduction to Comparative Politics Honors. 3 Hours SF AE42/GE3S / S.
Open only to students in the College Honors Program or by consent of instructor. LEC.

POLS 170. Introduction to International Politics. 3 Hours SF AE42/GE3S / S.
A study of the nation-state system including the role of nationalism, sovereignty, and power. Patterns of state action including neutralism, collective security, war, and cooperation through international organizations are stressed. Specific examples of contemporary international problems are also analyzed and discussed. LEC.

POLS 171. Introduction to International Politics Honors. 3 Hours SF AE42/GE3S / S.
Open only to students in the College Honors Program or by consent of instructor. LEC.
POLS 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Political Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

POLS 249. Study Abroad Topics in Political Science: _____. 1-6 Hours S.
This course is designed for the study of special topics in Political Science at the freshman/sophomore level. Course work must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

POLS 301. Introduction to Political Theory, 3 Hours GE3S / S.
An examination of the perennial issues and major concepts in political philosophy. Ideas such as community, liberty, equality, justice, and democracy are examined in order to understand the various meanings given to these concepts in political discourse and to understand the role of these ideas in various political theories. LEC.

POLS 302. Introduction to Political Theory, Honors. 3 Hours S.
Honors Version of POLS 301. An examination of the perennial issues and major concepts in political philosophy. Ideas such as community, liberty, equality, justice, and democracy are examined in order to understand the various meanings given to these concepts in political discourse and to understand the role of these ideas in various political theories. Prerequisite: Open only to students in the University Honors Program. LEC.

POLS 306. Political Science Methods of Inquiry, 3 Hours GE12 / S.
An introduction to the social science methods of investigation and analysis that are used in political science as a discipline and, in many cases, in public and private sector analytical work as well. The nature of political science data sources and methods of data collection, the logic of social scientific inquiry, and key methods of data analysis are emphasized. Prerequisite: POLS 110 or POLS 150 or POLS 170 (or their Honors equivalents), or consent of instructor. LEC.

POLS 308. Topics in Social Justice: _____, 3 Hours.
The study of selected problems in social justice or equity. Course is repeatable for different topics. LEC.

POLS 310. Contemporary Issues in U.S. Politics, 3 Hours S.
An examination of issues and problems concerning government and politics in American society. This course is intended primarily for non-majors, and does not meet the junior/senior level course field distribution requirement. LEC.

POLS 320. Introduction to Public Policy, 3 Hours GE3S / S.
Offers an introduction to the policy-making process covering policy formulation, adoption, and implementation. Overview of major theories of the policy-making process, the actors involved in the process, and the constraints and enhancements offered by the broader political environment. The theoretical frameworks are applied to several substantive policy areas. LEC.

POLS 325. Intelligence Analytics, 3 Hours GE11 / S.
This course develops advanced critical thinking, writing, oral communication skills by enhancing the student's ability to apply analytic tradecraft methods to intelligence products. Course emphasizes in-class, hands-on exercises to enhance the student's ability to apply structured analytic techniques, critically assess bias and logical fallacies in information sources, critiquing analytical products, and applying sound analytical tradecraft to individual and team writing exercises and oral presentations. Course also emphasizes the team-oriented environment of the intelligence profession, specifically focusing on standards of practice found in US intelligence agencies. On completion of the course, students will have an understanding of the analytic processes and guidelines the U.S. Intelligence Community uses to create intelligence products for national security decision makers. Prerequisite: POLS 125 and POLS 130.

POLS 330. Introduction to Public Administration. 3 Hours S.
Introduction to administration, public policy and policy makings is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 330.) Prerequisite: POLS 110. LEC.

POLS 331. Introduction to Public Administration, Honors. 3 Hours S.
Introduction to administration, public policy and policy making, for honors students, is the study of government workers, the organizations in which they work, how they are financed, and how government engages citizens to help form and maintain community. In various ways, the class sessions explore the three important issues of public administration: discretion, authority, and accountability. (Same as PUAD 331.) Prerequisite: POLS 110. LEC.

POLS 345. Counterintelligence, 3 Hours S.
This course provides an overview and history of the counterintelligence discipline; the structure and operations of the U.S. counterintelligence community including its legal foundation; and the privacy and civil liberties implications of counterintelligence operations. Course discusses how counterintelligence has evolved from the Cold War-era, with its focus on counter espionage, to 21st Century challenges such as threats from non-state actors and to our cyber networks. Course also addresses the emerging national security issues which will shape future U.S. counterintelligence operations. On completion of the course, students will have an understanding of how the U.S. counterintelligence capabilities and programs work to detect and neutralize the impact of espionage against US interests. Prerequisite: POLS 125 and POLS 130. LEC.

POLS 350. Contemporary Issues in Comparative Politics, 3 Hours.
This course will survey selected current political issues around the globe. The focus of the course will be on understanding and analyzing the wide diversity of political phenomena that mark countries around the world. Topics may include such things as elections and electoral politics; political parties; government stability; democratization; ethnic, racial, caste, or religious conflict; protest and revolutionary movements; social movements (environmental, feminist, and others); and the politics of economic reform. This course is intended primarily for non-majors, and does not meet the junior/senior level course field distribution requirement. LEC.

POLS 370. Contemporary Issues in International Politics, 3 Hours S.
A survey of selected issues in current international relations. Topics include global economic interdependence, regional conflicts and nationalism, United States military and economic policy in the post-Cold War era, the role of international organizations such as the United Nations and the European community, global environmental problems and the contemporary role of international law. This course is intended primarily for non-majors and does not meet the junior/senior level course field distribution requirement. LEC.

POLS 492. Field Work in Politics and Policy-Making, 3-6 Hours AE61 / S.
This offering provides course credit for field work in politics and policy-making that takes place outside the department's Spring Semester internship programs in Washington, D.C. and Topeka. Consent of Instructor is required prior to enrollment. FLD.
POLS 493. Directed Readings. 1-3 Hours AE61 / U.
Individual and supervised readings in selected areas of political science. Course is repeatable for different areas; however, only 3 hours of directed readings can be applied to the major. Prerequisite: Junior level and consent of department. IND.

POLS 494. Washington Semester Intern Seminar. 3 Hours AE61 / S.
Intern seminar in Washington, D.C. Students meet weekly during Washington Semester program, in speaker/seminar format. Participation is expected, and a term paper is a requirement. Prerequisite: Consent of instructor. FLD.

POLS 495. Topeka Semester Intern Seminar. 3 Hours AE61 / S.
Intern seminar at statehouse in Topeka. Students meet weekly during this program, in speaker/seminar format. Participation is expected, and a term paper is a requirement. Prerequisite: Consent of instructor. FLD.

POLS 496. Washington Semester Field Work. 3-6 Hours AE61 / S.
Supervised internships in public and private agency offices in the Washington, D.C. area. This course is open to students who are participating in the department's organized, supervised, semester-long Washington internship program. In order to be eligible for the program, students must have junior or senior standing, an overall grade-point average of 2.75, must have completed POLS 110 and have a 3.0 grade point average in all political science courses. Course will be graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor is required prior to enrollment. FLD.

POLS 497. Topeka Semester Field Work. 3-6 Hours AE61 / S.
Supervised internships in public and private agency offices in the Topeka area. This course is open only to students who are participating in the department's organized, supervised, semester-long Topeka internship program. In order to be eligible for the program, students must have junior or senior standing, an overall grade point average of 2.75, must have completed POLS 110 and have a 3.0 grade-point average in all political science courses. Course will be graded satisfactory/unsatisfactory. Prerequisite: Consent of instructor is required prior to enrollment. FLD.

POLS 498. Honors Thesis. 3-6 Hours AE61 / S.
Political science majors who in their senior year who wish to become candidates for graduation with honors in political science must enroll in and successfully complete six hours of honors thesis work. Consent of the department is required and candidate must have minimum grade point averages of 3.5 in political science courses and 3.25 in all courses, in both in-residence and combined work. IND.

POLS 499. Capstone Research/Field Work Experience. 3 Hours S.
Capstone research and/or field work experience project for political science majors. Project specified under the direction of a faculty mentor and approved by the undergraduate director. Prerequisite: Senior standing and 12 hours of upper division credit in POLS, RSH.

POLS 501. Contemporary Political Thought. 3 Hours AE51 / S.
An examination of the major theoretical questions concerning citizenship and government in modern society. Major ideologies and important contemporary philosophers are examined to determine how they address such issues as the meaning of the public interest, the just distribution of power and privilege, the proper role of government in society, and legitimate methods for making collective decisions. Prerequisite: POLS 301, or consent of instructor. LEC.

POLS 502. History of Political Thought. 3 Hours S.
A survey of major concepts and theories in political philosophy from Plato to Marx. The emphasis is on understanding major classics in western political thought. Prerequisite: Sophomore level or consent of instructor. LEC.

POLS 503. Politics in Literature. 3 Hours S.
An examination and analysis of the portrayal of politics and political problems in literature. Classical and modern texts will be considered, including dramas, poems, and novels. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 512. Latino Politics in the U.S.. 3 Hours AE41 / S.
An overview of the political position of Latinos/os in the United States. The focus is on the three largest Latino groups in the U.S.: Mexican-Americans, Cuban-Americans, and Puerto Ricans; as well as an examination of other South American and Central American populations in the U.S. The main topics include identity formation, the political circumstances of Latinos, relationship to the electoral process, political behavior, and the policy process. LEC.

POLS 514. Politics of Human Trafficking. 3 Hours.
This course will examine the definitions and characteristics of human trafficking, both domestically and internationally. The course will compare a range of national and international policies addressing human trafficking, paying particular attention to the frameworks and ideologies shaping those initiatives. Ending human trafficking is a non-partisan issue, often bringing together policy makers and activist that would otherwise never work in coalition. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. There are surprising, uncharacteristic divisions among groups that would otherwise be in unity. This class will examine the contemporary social movements to end trafficking and will attempt to understand the contentious politics found within the movement. How trafficking is framed can have a significant impact on the implementation of anti-trafficking legislation. The course will also examine the significant empirical challenges for studying human trafficking. While estimates of human trafficking vary widely, there is limited verifiable evidence of the extent of trafficking in any one area. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 714, POLS 714, or GIST 714. (Same as GIST 514 and WGSS 514.) Prerequisite: Any previous WGSS, POLS, or GIST course. LEC.

POLS 515. American Political Parties. 3 Hours S.
Survey of the development of the American political party system, stressing party organization, nominating systems, campaigns, elections, role of mass media, and party finances. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 516. Public Opinion and American Democracy. 3 Hours S.
This course examines the construction, administration, and interpretation of public opinion polls. The course will also examine the role of public opinion in the democratic process and the formation of public opinion. LEC.

POLS 520. Political Campaigns. 3 Hours H.
This course will examine the communication involved in political campaigns. Students will be exposed to theories and ideas related to campaigns and will apply this knowledge to current political activity. Although the primary focus of the course is politics, students interested in public relations and strategic communication also benefit from learning and practicing media relations strategies. The mediated nature of modern political communication, as well as the communication strategies of campaigns and journalists, will be examined in a semester-long simulated campaign. By the end of the semester, students will become more informed users and consumers of political campaign messages. (Same as COMS 607.) Prerequisite: COMS 130 or COMS 150. LEC.

POLS 521. Mass Media and Politics. 3 Hours H.
The primary goal of this course is to critically examine the role of mass media in U.S. politics. Students learn how information makes it into news coverage, as well as how media content affects individuals, political
POLS 528. Environmental Justice and Public Policy. 3 Hours S.
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several different public policy areas that have been impacted by the environmental justice movement: hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as EVRN 528.) Prerequisite: POLS 306 or a statistics class or consent of instructor. LEC.

POLS 533. Comparative Environmental Politics. 3 Hours S.
This course compares environmental policies and politics across a number of countries, including those in North America, Western Europe, East Asia, and Latin America. (Same as EVRN 553.) LEC.

POLS 532. Introduction to Political Computing. 3 Hours S.
This course allows student to learn the major software programs associated with data analysis in politics, including R and STATA. Students will be able to critically evaluate political and media systems in the U.S. (Same as COMS 335.) Prerequisite: COMS 130 or COMS 150. LEC.

POLS 553. Comparative Environmental Politics. 3 Hours S.
This course compares environmental policies and politics across a number of countries, including those in North America, Western Europe, East Asia, and Latin America. (Same as EVRN 553.) LEC.

POLS 560. Contemporary Feminist Political Theory. 3 Hours S.
A detailed introduction to feminist thought post-1960. Examines feminism in relation to the categories of political theory: liberal feminism, socialist feminism, radical feminism, and postmodern feminism. Within these categories and separately, we will also consider feminism as it is influenced by women traditionally excluded from mainstream feminist thought, namely U.S. woman of color and women of post-colonial societies. This course is a service learning course that provides students with on-site practicum, mentoring, and networking skills. (Same as WGSS 600.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 561. Liberation in Southern Africa. 3 Hours AE42 / W.
This course examines struggles for freedom in southern Africa and the consequences of political, economic, and social changes in the region. The end of colonial rule, the demise of white-settler domination, and the fall of the apartheid regime is discussed. As a major political event of the twentieth century, the liberation of southern Africa had both local and global consequences. The course analyzes transnational issues of liberation and resistance to consider broader regional and international perspectives. Course themes pay particular attention to gender and ethnicity and include a focus on democratization and contemporary meanings of liberation. Prior coursework in African Studies is strongly recommended, but not required. (Same as AAAS 561 and HIST 561.) LEC.

POLS 562. Women and Politics. 3 Hours AE41 / S.
This course exposes students to contemporary research on women and politics by surveying the sub-fields of political science. Topics include women's representation in the U.S., women and U.S. public policy, gender and legal theory, international women's movements, women and revolution, and women as political elites. We will examine the ways in which feminist theory and women's activism have challenged the narrow focus of the discipline as well as redefined women's place in society. (Same as WGSS 562.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 563. Comparative Political Economy. 3 Hours S.
This course studies fiscal, monetarist, and trade policies to assess the usefulness and problems posed by these policy instruments across countries. This includes examining exchange rates, interest rates, budget deficit, trade deficit, and debt, to understand their composition and relevance to domestic economy, employment, investment, development, and international trade, the problems they pose, and how these may be overcome. We then examine when, how, and why government enacts these instruments across countries and regions. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 564. Elections and Political Parties Around the World. 3 Hours S.
An examination of the diverse forms of election rules and their consequences for political parties, politicians, and voters. The course will survey election rules in theory and practice; the design and re-design of election rules in new and established democracies; and how elections affect party strategies or governance and representation, and the types of party systems that emerge. The course will also incorporate intensive studies of election campaigns occurring during the semester that the course meets. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 565. Political Change in Asia. 3 Hours S.
This course focuses on three periods of major political changes in Asia since 1945: independence from colonization; adoption of governance; and steps toward democratization. The focus on political change is to help students see that a) many countries initiate political reforms domestically; b) the ability to implement changes is correlated to ability to win support; c) the constitutional process may favor some groups over others; d) the ability to mediate political stability depends on (a), (b), and (c). Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 566. Political Change in Asia. 3 Hours S.
This course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism. (Same as GIST 585.) Prerequisite: Sophomore level or consent of instructor. LEC.

POLS 582. Transnational Terrorism. 3 Hours S.
A study of political movements and thinkers from the Puritan period to the present that have influenced the development of contemporary political ideas. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 583. American Political Ideas. 3 Hours S.
Detailed study of the typical and perennial dilemmas that arise in theories of democratic governance with an emphasis on contemporary analytical investigations of democratic systems. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 600. Religion and Political Theory. 3 Hours S.
An examination of the relationship between religious faith and politics in Western political thought and theory. The approach will be both historical and philosophical, beginning with Moses on the one hand, and the Greeks on the other. Texts will include biblical, Greek philosophical, Jewish and Christian philosophical and theological writings. (Same as REL 604.) Prerequisite: POLS 301, or for non-majors completion of Western Civilization requirement, or consent of instructor. LEC.

POLS 606. Introduction to Political Computing. 3 Hours S.
This course allows student to learn the major software programs associated with data analysis in politics, including R and STATA. Students
also learn the major sources of political and policy data. Students will conduct data collection and analysis for specific political research activities like public opinion surveys, voting behavior, Congressional behavior, comparisons of political processes in different countries, and the evaluation of public policies. Prerequisite: POLS 306. LEC.

POLS 607. Modern Political Theory. 3 Hours S.
An analysis of works by various authors, with the intention of exploring the political ideas that emerge in conjunction with the appearance of modern science, the Enlightenment, the Industrial Revolution, and Romanticism. Topics will include the modern conceptions of the nature of being, truth, justice, and the relationship of the individual to the community. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 609. Topics in Political Theory: _____ 3 Hours S.
A study of selected theorists in relation to a topic in political theory. Sample topics include: revolution; authority and community; elements of political power; political elites: ideology, human nature in politics, political conflict, etc. Theorists will range from ancient to contemporary. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 610. Constitutional Law: Governmental Powers. 3 Hours S.
The Supreme Court viewed as a political branch of our government. Special emphasis on the Court's role in determining powers of government and their relationships. Prerequisite: Junior level or consent of instructor. LEC.

POLS 611. Constitutional Law: Civil Liberties. 3 Hours S.
The constitutional limits on governmental powers are studied with special emphasis on constitutional guarantees of individuals freedom. Prerequisite: Junior level or consent of instructor. LEC.

POLS 612. Psychology in Politics. 3 Hours S.
An examination of psychological perspectives on political phenomena. Topics include political personality, foreign policy decision making, international conflict and cooperation, voting behavior, and political participation and socialization. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 613. Comparative U.S. State Politics. 3 Hours S.
A systematic comparative analysis of structures, functions, and policies of state political systems. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 614. Urban Politics. 3 Hours S.
A survey of the social, cultural, economic, and structural differences among cities and an investigation into how these factors affect urban politics and policies. Specific topics include leadership, governmental reform, citizen participation, inter-ethnic conflict, and economic development. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 615. Campaigns and Elections. 3 Hours S.
This course examines the behavior of candidates, campaigns, and voters in the electoral process. Topics will include the role of media, the impact of money, the operations of political campaigns and the effect of campaign laws. LEC.

POLS 616. Interest Group Politics. 3 Hours S.
Study of internal group organization and the politics of interests within the U.S. policy-making process. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 617. The Congress. 3 Hours S.
Descriptive and comparative analysis of legislative institutions and processes in the United States, covering Congress and state legislatures. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 618. The Presidency. 3 Hours S.
The office of the President of the United States, its place in the constitutional and political system. Emphasis is given to modern experience and current problems. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 619. Topics in American Politics: _____ 1-3 Hours S.
A study of selected contemporary problems of policy or politics in the United States. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 620. Formulation of Public Policy. 3 Hours S.
Analysis and evaluation of the structures and processes involved in the formulation of public policy at all levels of government. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 621. Public Policy Analysis. 3 Hours S.
An introduction to the study and analysis of public policy with emphasis on the concepts and techniques of policy thinking. The methods of policy description, explanation, evaluation, and choice will be applied to a variety of policy topics, e.g. health care, defense, environmental protection, education, etc. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 622. The Politics of Social Policy. 3 Hours S.
An examination of the formulation and execution of key social policies in the United States, such as welfare policy, crime and drug control policy, disability rights policy, education policy, and social regulatory policy concerning controversial social issues such as abortion and gun control. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 623. Environmental Politics and Policy. 3 Hours S.
Analysis of environmental politics and the formulation and implementation of environmental policy. Examines the history and development of environmental politics as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as EVRN 620.) LEC.

POLS 624. Extremist Groups and Government Response. 3 Hours S.
Examines left- and right-wing extremist political groups in America and how the government has developed policies and respond to these groups. Special attention will be given to the process of policy adoption and implementation and how the government might respond to extremist groups in the future. Issues and themes will include groups such as the left-wing terrorists of the 1960s and 1970s, right-wing anticommunist groups of the 1950s and 1960s, international terrorists acting in the U.S., hate crime, ecoterrorism, citizen militia groups, and pro- and anti-abortion extremist groups. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 625. Public Polling and Survey Research. 3 Hours S.
This course focuses on the role of polling in the political process and introduces the theory and methods used in survey research. Topics include the role of polling in campaigns and the policy process, how survey research firms produce polls, analysis of polling for campaigns and public opinion, the psychology of survey response, survey construction, and sampling. Other data collection techniques commonly used in politics and political science such as focus groups and experiments will be covered. Students will conduct original surveys. Prerequisite: Junior level or consent of instructor. LEC.

POLS 626. The Politics of Public Health. 3 Hours S.
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation's public health, explore the role of government in reducing risk and promoting well being, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes
include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as EVRN 628.) Prerequisite: POLS 110 and POLS 306 are recommended. LEC.

POLS 629. Topics in Public Policy: __________. 1-3 Hours S.
Examination of the U.S. political system and policy formulation and administration through intensive analysis of selected current public policy problems. Sample topics include the environment, education, and economic well-being. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 630. Politics of Identity. 3 Hours AE41 / S.
This seminar explores the nature of identity and how identity is relevant to politics and policy with a focus on political attitudes and behavior, institutions, and public policy. Topics include individual and group identity, identities such as gender, racial, sexual orientation, and partisan, and the enduring importance of identity for understanding politics as well as the policy process. The approach is multidisciplinary but political science perspectives are relied on more heavily. (Same as WGSS 630.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 633. Iran, Turkey, and the Kurds. 3 Hours NW / S.
This course examines the contemporary political and social dynamics within these three communities residing along the northern stretch of what is commonly referred to as the Middle East. Using social and political theory as a starting point, students will comparatively study critical elements and issues facing the members of these societies. Issues and themes for comparison will include the structure and institutions of politics, nation-building and nationalism, Islam and politics, women and politics, and regional and global engagement. (Same as GIST 633.) Prerequisite: GIST 220, POLS 150, SOC 130, or consent of instructor. LEC.

POLS 640. Politics of Reproductive Policy. 3 Hours S.
Reproductive policy has historically been a highly politicized policy arena, which has elicited attention from the political community as well as the public. This course moves beyond the popular rhetoric associated with reproductive issues, by critically investigating the history, development, implementation and the relative success of various reproductive policies in the United States. These policies are compared to, and assessed against, policies governing similar topics in various countries. This course is a service learning course that provides students with on-site practicum, mentoring, and networking skills. (Same as WGSS 640.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 643. The European Union. 3 Hours S.
This course will introduce students to the politics of the European Union. The course will cover three closely connected topics. First, it will discuss the institutional make-up of the EU, such as the European commission, the European parliament, the European Council, and the European court of justice. It will assess how well these institutions deal with the growing importance of transnational issues, such as migration and economic policy issues. Second, the course will examine how national governments pursue national interests at the level of the European Union. Third, the class will study how well the EU represents the citizens of European countries. Finally, the course will assess the extent to which the EU has successfully developed into a supra-national federation. (Same as EURS 604.) Prerequisite: Sophomore standing or consent of instructor. LEC.

POLS 644. Justice and Public Policy in Democratic Societies. 3 Hours S.
Examines the ethical and philosophical choices that inform public policy in democratic societies. The guiding idea of the course is that public policies reflect underlying decisions about the nature of state authority and the just use of that authority. The theoretical focus is on modern European and American liberal democratic thought; the empirical focus is global. Among the policy issues examined in the course are public education, immigration, gender equality, same-sex marriage, and drugs. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 645. Corruption, Crisis and Scandal. 3 Hours S.
This course investigates political events and decisions that are considered illegal or illegitimate. Cases from the U.S. and around the world are considered. Issues discussed include the misuse of governmental power and funds, electoral fraud. and bribery. Conditions under which problems arise and reforms that address them are considered. Prerequisite: Junior level or consent of instructor. LEC.

POLS 648. Western European Politics. 3 Hours W.
This class is an introductory course to European politics which pursues three goals. First, the class is designed to introduce you to a variety of different aspects of European political systems, their main political actors, and basic historical traditions. A second objective consists of discussing the enormous transformation of European politics that is currently underway in Europe. Third, you will become acquainted in some detail with the institutions and operating procedures of four political systems that we focus on: France, Germany, Great Britain, and the European Union. These systems represent the range of traditions we encounter in Western and Central Eastern Europe so they serve as an example of how European politics work. Prerequisite: POLS 150. LEC.

POLS 650. Palestinians and Israelis. 3 Hours S.
Examines the international relations, political institutions, and social policies of these two ethnonational communities in relation to each other. Specific topics include the historical evolution of the Israeli-Palestinian conflict, prospects for conflict resolution, electoral systems and political parties in the two nations, state-society relations, social movements, and roles of gender and religion. Prerequisite: Nine hours of Political Science, including POLS 150/POLS 151 or POLS 170/POLS 171, or permission of instructor. LEC.

POLS 652. Politics in Europe. 3 Hours S.
The study of the politics and government of Europe. Major countries are covered in depth, while smaller democracies are grouped according to political concepts. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 653. Gender, War, and Peace. 3 Hours S.
This course explores ways in which militarization and warfare are gendered processes. We ask, what does war tell us about gender, and what does gender tell us about war? Though the majority of fighters are men, women are essential to war efforts. They also represent a high proportion of the casualties of war. Yet women are rarely examined in relation to war; thus we work to uncover women's experiences of war. We also look to women's contributions to the peace movement in terms of both theory and practice, asking: Is peace a feminist issue? Should feminists support women's access to combat positions or oppose the military? What if women ruled the world--would that end wars? Does militarized masculinity harm men more than benefit them? How do states mobilize citizens to war and how is the process gendered? (Same as WGSS 653.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 654. Politics and Government of Russia and the Central Eurasian States. 3 Hours S/W.
The collapse of the Soviet system and the problems of transforming a central planned authoritarian state into a free market democracy. The roles of ethnic and national tensions, economic decay, and cultural factors. Prerequisite: Sophomore level or consent of the instructor. LEC.
POL 655. Politics of East-Central Europe. 3 Hours S/W.
This course analyzes Communist political theory in its application to the countries of East-Central Europe with consideration of their traditional backgrounds and their patterns of political, social, and economic developments. It constructs a theoretical model of the communist state and discusses its variations by description and comparison of the governments and political processes of Albania, Bulgaria, Czechoslovakia, German Democratic Republic, Hungary, Poland, Rumania, and Yugoslavia. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 656. Government and Politics of East Asia. 3 Hours NW AE42 / S/W.
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. (Same as EALC 656.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 657. Government and Politics of Southeast Asia. 3 Hours NW AE42 / S/W.
An evaluation of the traditional and contemporary political institutions, behavior and ideas of the countries of Southeast Asia. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 658. Theories of Politics in Latin America. 3 Hours S/W.
This course examines how political science can be used to explain the political dynamics of Latin America. The course will be devoted to understanding different theories about politics -- many of which have been devised by political scientists whose primary focus of study is not Latin America -- and examining their uses and limitations in understanding Latin America. Among the themes we will be examining are the relationships between economic growth, political culture, and democracy, the role of the military in politics, the political impact of new social movements (such as the women's movement and religious movements), theories of revolution, and understanding the prevalence of political corruption in the region. Along the way, we will analyze how political scientists attempt to develop hypotheses, gather data, and test theories. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 659. Political Dynamics of Latin America. 3 Hours S/W.
Study of the institutions, processes, and special problems of selected Latin American countries. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 660. Politics of Development: Latin America, Africa, and Asia. 3 Hours NW AE42 / S/W.
A focus on topics pertinent to all of the underdeveloped areas such as the role of the military, styles of political leadership, land tenure systems, the role of the middle sectors, the nature of bureaucracy, the activity of the students, and foreign policy attitudes. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 661. Politics of the Middle East. 3 Hours NW AE42 / S/W.
Survey of domestic and international political developments in the Middle East. Topics include: emergence of the modern nation-state, the role of Islam, leadership patterns, competing political ideologies, prospects for democratization, foreign policy relations, and regional conflicts. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 662. Gender and Politics in Africa. 3 Hours S.
This course is designed to explore the field of gender and African politics. We begin by paying particular attention to African women's political roles during the pre-colonial and colonial society. Next, we examine the impetus, methods, and path of liberation struggles and how gender roles were shaped, shifted, and changed during these struggles. The majority of the class focuses on current issues in African politics, including gender and development, HIV/AIDS and women's health, gender and militarism. We also explore women's roles in political institutions, civil society organizations, trade and labor unions, and transnational movements. We also examine contemporary constructions of masculinity and femininity in African states and explore how these constructions affect social policy and national political agendas. (Same as AAAS 662 and WSSS 662.) Prerequisite: Sophomore level or consent of instructor. LEC.

POL 665. Politics in Africa. 3 Hours AE42 / W.
A survey of politics in Africa, focused on the countries of sub-Saharan or Black Africa. The course includes a historical discussion of precolonial Africa, colonization and the creation of contemporary states, and the politics of independence, before examining contemporary political systems and the forces influencing patterns of politics on the continent. (Same as AAAS 660.) Prerequisite: POLS 150 or AAAS 105 or AAAS 305 or consent of instructor. LEC.

POL 666. Political Economy of East Asia. 3 Hours S.
This course provides basic understanding of fiscal, monetarist, and trade politics; how governments in East Asia use them to pursue growth; the extent to which these governments follow or controvert economics to pursue growth; and how the performances of economies in East Asia relate to the U.S. and global economies. (Same as EALC 666.) Prerequisite: POLS 150. LEC.

POL 667. Islam and Politics. 3 Hours AE42/AE51 / W.
This course gives students a basic understanding of Islam and Islamic movements, explores the economic, social, political, and cultural context in which these movements take place, and examines the impact of Islam on politics in select countries. Issues such as compatibility of political Islam and democratic politics, political economy in Muslim societies, fundamentalism in Islam, gender relations, identity politics and questions on clash of civilizations are explored. (Same as GIST 667 and SOC 640.) Prerequisite: A principal course in sociology, POLS 150, or consent of instructor. LEC.

POL 668. Reform in Contemporary China. 3 Hours NW AE42 / H/W.
Examines the epochal changes that have occurred in China from Deng Xiaoping's rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 "prodemocracy" movement at Tiananmen. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and economic decentralization, and leadership succession. A previous course on China is helpful, but not mandatory. (Same as EALC 587.) LEC.

POL 669. Topics in Comparative Politics: _____. 2-3 Hours S.
A study of selected contemporary problems of policy or politics affecting several countries. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 670. United States Foreign Policy. 3 Hours S.
An evaluation of the formulation of United States foreign policy in the post-World War II period. Economic, military, and diplomatic dimensions of policy; internal and external influences on policy; theories of foreign policy decision-making. Prerequisite: Nine hours of political science. LEC.

POL 671. International Cooperation. 3 Hours S.
An examination of the gains possible from international cooperation and the barriers to achieving cooperation. Theoretical perspectives on international cooperation will be explored along with cases such as trade, the environment, arms control, and the European community. Prerequisite: Sophomore level or consent of the instructor. LEC.

POL 672. International Political Economy. 3 Hours S.
Structural theories of the international political economy provide the framework for a consideration of the nature of hegemony, the
management problem of multinational corporations, the role of international regimes and organizations, development, and dependency. Prerequisite: Junior level or consent of instructor. LEC.

POLS 673. International Organization. 3 Hours S.
International organizations are examined with special emphasis devoted to the United Nations. A central theme of the course rests upon the question of whether strengthened international organization offers the only alternative to further world wars. Prerequisite: Junior level or consent of instructor. LEC.

POLS 674. Ethics in International Relations. 3 Hours H.
This course reviews how philosophical perspectives elucidate the role ethics plays in foreign policy. It covers human rights doctrines, issues of economic and political justice, just war theory (jus ad bellum) and just conduct of war (jus en bello) and humanitarian intervention. Prerequisite: Junior level or consent of instructor. LEC.

POLS 675. Russian Foreign Policy. 3 Hours AE42 / S/W.
Examination of the history of Soviet and Russian foreign policy and current issues of foreign policy in the Post-Soviet era. Analysis of foreign policy making in Russia and the other Post-Soviet states. Emphasis on the changed nature of international security problems after the cold war and on the role of foreign policy in economic development. Prerequisite: Junior level or consent of instructor. LEC.

POLS 676. International Relations of Asia. 3 Hours S/W.
An intensive study of the problems of ideological conflict, diplomatic relations, strategic arrangements, economic cooperation, and cultural exchange in East and Southeast Asia with special emphasis upon the roles of major world powers. (Same as EALC 676.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 677. U.S. National Security Policy. 3 Hours S.
An investigation into (1) how security policy is made; (2) the evolution of changing assumptions, strategies and goals since 1945; and (3) the present policy and its alternatives. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 678. Chinese Foreign Policy. 3 Hours S/W.
In-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. (Same as EALC 678 and GIST 678.) Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 679. International Conflict. 3 Hours S.
Examination of the historical and theoretical issues surrounding the sources and control of international conflict. Topics will include political and anthropological theories of conflict, the role of force in the international system, international law and just war approaches, nuclear conflict, arms control, and nonviolent alternatives to conflict. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 680. International Relations in Political Philosophy. 3 Hours S.
A consideration of classical and modern theories of the international system, such as the writing of Thucydides, Machiavelli, twentieth-century realists, and others. Topics include, theories of the state, the role of ethics and normative judgments in the world order, the nature and use of power, the relationship between domestic and international politics. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 681. Comparative Foreign Policy. 3 Hours S.
An examination of theories that seek to explain the foreign policy behavior and decision making processes of states in international relations and a survey of past and present foreign policies of several states in Latin America, Western and Eastern Europe, Africa, the Middle East, and the Far East. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 682. Trafficking, Organized Crime and Terrorism: U.S. Government Response. 3 Hours S.
The course addresses multiple ways, in which international terrorism, organized crime, and trafficking intersect and new challenges that the trafficking-terrorism nexus poses to national and international security. It surveys national and international responses by the U.S. government to the crime-terror nexus. Prerequisite: POLS 110, or POLS 170, or POLS 150, or POLS 582, or POLS 625 or consent of instructor. LEC.

POLS 684. International Law: The State and the Individual. 3 Hours S.
International law has assumed an increasingly significant role in international life. This course will examine major law including (but not limited to): the changing status and role of the state; rights of minorities and self-determination; the environment; and human rights. The course will examine the central questions and the relevant international legal principles associated with each issue. Prerequisite: Junior level or consent of instructor. LEC.

POLS 685. International Law: Laws of Armed Conflicts. 3 Hours S.
This course examines the principles, roles, and functions of international law in the conduct of war. As the course reviews the development and application of the basic rules of armed conflict, several current issues and conflicts are addressed including: the legitimate use of force; the proper definitions of combatants and civilians; actions that constitute war crimes, the legality of new weapons technology, and, if the laws of armed conflict apply to the current "war on terrorism." Prerequisite: Junior level or consent of instructor. LEC.

POLS 686. International Law: The State and the Individual. 3 Hours S.
The course introduces students to historical and philosophical bases of contemporary human rights, theoretical approaches and methodological challenges to studying human rights questions, and acquaints them with the main topics, controversies, and tensions in the scholarship, practice and politics of human rights. (Same as GIST 686.) Prerequisite: Sophomore level or consent of instructor is required. LEC.

POLS 687. Introduction to Cyber Intelligence. 3 Hours S.
Course will provide instruction about the fundamental principles, impact and issues of cyber intelligence. Course will focus on cyber intelligence supporting operations in cyberspace (to include risk management functions, cyber defense, cyber espionage, and cyber-attack) as well as intelligence developed through cyberspace. Topics include cyber-threats, cyber defense, and cyber warfare as well as ethical and legal considerations. In addition to providing a foundation of understanding cyber intelligence within the context of the United States, this course will analyze cyber capabilities of nations and non-nation state actors. Learning outcomes for students include an understanding of the cyber intelligence cycle and structured analytic techniques in providing cyber intelligence products to national security and organizational leadership. Students will also gain an understanding of cyber threat actors and complexity of emerging threats. Prerequisite: Instructor permission. LEC.

POLS 688. U.S. Counterterrorism Approaches to International and Domestic Terror Groups. 3 Hours S.
The course will cover U.S. counterterrorism policy and practices historically and in the current era. For international (multinational) terrorism, the course will focus on how the historical actions of western powers contributed to the rise of terrorist groups, as well as the evolution of U.S. responses to these groups. Groups examined could include Hamas and Al-Qaida. For domestic terrorism, the course will focus on the evolution of counterterrorism responses within the U.S., with particular attention to far-right terrorism, including the Oklahoma City Bombing. We will examine U.S. counterterrorism policy in the law, as well as in the
practices of Intelligence, Department of Defense, and law enforcement. Prerequisite: POLS 125 or POLS 130 or permission from the instructor. LEC.

POLS 689. Topics in International Relations:. 2-3 Hours.
A study of selected problems in international relations. Course is repeatable for different topics. Prerequisite: Sophomore level or consent of the instructor. LEC.

POLS 690. Research and Diplomacy Lab. 3 Hours S.
This course is designed to provide students with basic tools and an understanding of interdisciplinary social science research and to simultaneously partner with an innovative program implemented by the US Department of State. While learning about the research process and research design, students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer with whom they have contact through videoconferencing throughout the semester. The team engages in extensive and systematic research to address the problem and presents their finding in a formal report presented to the State Department in the desired format. (Same as GIST 697.) Prerequisite: GIST 220 or POLS 150 or POLS 170 or instructor permission. LEC.

POLS 691. Diplomacy Lab. 1 Hour S.
This course is a supplemental research lab designed to partner with a jr/sr level course offering an innovative program implemented by the US Department of State. Students enrolling in this course team up with a group of four or more students to address a real world problem posed by a State Department officer. This one-credit hour course is intended to function as a special lab project and must be taken in conjunction with a standard course that has a diplomacy lab option. (Same as GIST 686.) Prerequisite: Instructor permission required. LAB.

POLS 705. Research Design for Political Science. 3 Hours.
Introduction to the discipline of political science, the philosophy of science, research design, and data acquisition. Prerequisite: Graduate standing or consent of instructor. LEC.

POLS 706. Research Methods I. 3 Hours.
An introduction to quantitative research methods, including probability theory, hypothesis-tests, and multiple regression. Includes regression diagnostics, the treatment of numeric and categorical predictors, interaction effects and elementary nonlinear models. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and lab sessions where computing applications are taught. LEC.

POLS 707. Research Methods II. 3 Hours.
This course covers basic techniques for multivariate analysis, focusing on multiple regression. Topics include interpretation of regression statistics, diagnostics for common problems, dummy variables, instrumental variables, basic time series methods including adjustment for autocorrelated error, logistic models, and nonlinear modeling; additional techniques may be covered at the discretion of the instructor. Prerequisite: POLS 706. LEC.

POLS 708. Advanced Qualitative Research Methods. 3 Hours.
An examination of qualitative research approaches frequently employed within political science. Topics may include the use of case studies, archival and documentary research, content analysis, interviewing and focus group techniques, ethnographic fieldwork, narrative and discourse analysis, and others. The course will examine the strengths and limitations of these methods in relation to major research traditions such as culturalist approaches, historical institutionalism, rational choice, and constructivism. Prerequisite: POLS 705 and either graduate standing or consent of instructor. LEC.

POLS 709. Topics in Political Theory: ______. 3 Hours.
At the discretion of the instructor, this course will select one or more important areas of political theory for in-depth analysis. Prerequisite: Six hours in Political Theory. LEC.

POLS 711. The Psychological Base of Political Behavior. 3 Hours.
Examination of the relations between psychological mechanisms and social milieu factors and individual political behavior. Particular attention is devoted to understanding the development of politically relevant psychological traits and dispositions, and to the methodology employed in studying the socio-psychological factors which underlie individual political behavior. Prerequisite: Twelve hours of political science and consent of instructor. LEC.

POLS 712. The Electoral Process. 3 Hours.
A study of the characteristics of voting behavior and the influences upon such behavior in the United States. Emphasis is placed upon relevant research findings concerning partisanship and participation in politics, and on the methodology employed in the study of political behavior. Prerequisite: Twelve hours of political science and consent of instructor. LEC.

POLS 714. Politics of Human Trafficking. 3 Hours.
This course will examine the definitions and characteristics of human trafficking, both domestically and internationally. The course will compare a range of national and international policies addressing human trafficking, paying particular attention to the frameworks and ideologies shaping those initiatives. Ending human trafficking is a non-partisan issue, often bringing together policy makers and activists that would otherwise never work in coalition. Yet, the current movement to end trafficking also has deep chasms and ideological divisions. There are surprising, uncharacteristic divisions among groups that would otherwise be in unity. This class will examine the contemporary social movements to end trafficking and will attempt to understand the contentious politics found within the movement. How trafficking is framed can have a significant impact on the implementation of anti-trafficking legislation. The course will also examine the significant empirical challenges for studying human trafficking. While estimates of human trafficking vary widely, there is limited verifiable evidence of the extent of trafficking in any one area. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in WGSS 514, POLS 514, or GIST 514. (Same as GIST 714 and WGSS 714.) Prerequisite: Graduate standing. LEC.

POLS 716. Political Behavior. 3 Hours.
A seminar for students interested in understanding the public opinion, voting, and other forms of political participation. This course will include a discussion of the formation, measurement of political attitudes as well as an examination of protest and other forms of extra-legal participation. Prerequisite: Graduate standing or consent of instructor. LEC.

POLS 719. Topics in the American Political Institutions: ______. 3 Hours.
A seminar to be offered as occasion demands, dealing with, but not limited to special topics in the presidency, congress, and judicial processes. Prerequisite: Graduate standing or consent of instructor. LEC.

POLS 720. The Scope of Public Policy. 3 Hours.
Introductory graduate course in the examination of public policy making. Considers institutions, basic theoretical frameworks, and standard methods, and places policy-making within a broad political context. Emphasizes American examples, but relevant comparative material is employed. Prerequisite: Twelve hours of political science. LEC.
POL 726. Public Policy in Comparative Perspective. 3 Hours.
This seminar examines the application of policy theory in regional and comparative contexts. Much of the research examined focuses on comparative public policy, but select weeks focus on specific regions of the world. A key goal is to help students understand which theories of policy may be best suited for universal application. LEC.

POL 754. Politics and Government of Russia and the Central Eurasian States. 3 Hours.
The collapse of the Soviet system and the problems of transforming a central planned authoritarian state into a free market democracy. The roles of ethnic and national tensions, economic decay, and cultural factors. Prerequisite: Eight hours in the social sciences and/or history, including POLS 150, or consent of instructor. LEC.

POL 774. International Law. 3 Hours.
Study of topics in international law, relating these closely to the dynamics of international relations. Special emphasis will be given to regulating force, resolving disputes, the law of the sea, human rights, and emerging problem areas such as the environment, outer space, the oceanic seabed, and genocide. Prerequisite: Six hours of courses in international relations including POLS 170 and/or relevant courses in the social sciences and modern history. LEC.

POL 782. Transnational Terrorism. 3 Hours.
The course provides a study of the patterns of transnational terrorism. First, it introduces students to the analytical study of terrorism. The course traces the evolution of terrorism, from the French Revolution to the modern day era. It also covers how scholarship defines, conceptualizes, and measures terrorism. The second goal is to introduce students to key scholarly debates within the literature. Some of the example questions we ask are: are democracies more vulnerable to terrorism? Does globalization render states open to being attacked by transnational actors? Is torture warranted as an effective counterterrorism tactic? The readings draw on empirical scholarship on the causes and consequences of transnational terrorism. LEC.

POL 789. Topics in International Relations: ____. 2-3 Hours.
A study of selected problems in international relations. Prerequisite: Consent of instructor. RSH.

POL 810. American Politics. 3 Hours.
A survey and critical examination of recent theoretical developments and research focusing on national institutions, electoral behavior, and policy-making processes. Emphasis is given to conceptualizing and analyzing the changing nature of the American political system. LEC.

POL 812. Political Psychology. 3 Hours.
A critical examination of the principal areas in current literature in political psychology, including psychological perspectives on mass political behavior, elite decision making, and international relations. Attention will be given to articulating and evaluating theories, constructing research questions and programs, and comparing methodologies. LEC.

POL 820. Policy Formulation and Adoption. 3 Hours.
Survey of the literature on the institutional, socioeconomic, and political forces influencing the formulation and adoption of public policy, as well as policy change, at all levels of government. Topics include problem definition, agenda setting, and the methods of decision-making. This is a research seminar so students will be required to conduct an original research project. LEC.

POL 821. Policy Implementation and Analysis. 3 Hours.
An overview of the policy implementation process and the analysis of public policy. The course covers a variety of theories and methods related to the study of the implementation process, policy evaluation, policy analysis, and policy change and learning. Substantive policy areas covered include environmental regulation, education, criminal justice, public safety, and health care. LEC.

POL 825. Urban Policy and Administration. 3 Hours.
This course explores the development, implementation and evaluation of public policy in the local government context. It examines a variety of policy tools used to address urban problems and applies theories of the policy process, intergovernmental relations, and institutions to municipal governance. In so doing, the course examines a range of current substantive policy and administrative issues facing urban communities and governments. (Same as PUAD 825.) LEC.

POL 830. Advanced Research Methods for Public Policy. 3 Hours.
Research seminar organized around advanced quantitative and qualitative method skills for research on American and comparative politics and public policy. The course will combine advanced statistical estimation procedures (e.g., hazard analysis, event history analysis, hierarchical "contextual effects" models) with methods for the collection and integration of data. This course is intended to facilitate research efforts of students in the fields of American politics, comparative politics, and public policy. The course is open to Ph.D. students from other departments who have completed a course in intermediate regression analysis. Prerequisite: POLS 707 or similar graduate level course. LEC.

POL 849. Law, Courts, and Public Policy. 3 Hours.
This course provides an overview of the role of law, litigation, and courts in the public policy process, with an emphasis on bureaucratic institutions. The course covers the main theories and empirical research on the policy effects of litigation and intervention, with a particular focus on civil rights in the areas of employment, policing, welfare, prisons, and environmental policy. (Same as PUAD 849.) Prerequisite: Graduate standing or consent of instructor. LEC.

POL 850. Introduction to Comparative Politics. 3 Hours.
This course provides a graduate level introduction to the field of Comparative Politics. Among topics it will survey are: the history and development of the field; classic works and major founding concerns of the field; methodological and epistemological debates; competing paradigms which had characterized Comparative Politics (structural-functionalism, culturalists, state-centrists, institutionalists, rational choice, and other); theory building and the role of area studies. LEC.

POL 851. Comparative Institutions and Government. 3 Hours.
This course provides a survey of the subfield of political institutions within Comparative Politics. Among the topics it will cover are: identifying regime types (democracy vs. non-democracy); comparative electoral systems; party systems; presidential vs. parliamentary systems; comparative legislatures; constitutional engineering and democratic transitions, and others. Prerequisite: POLS 850. LEC.

POL 852. Comparative Political Economy. 3 Hours.
This course provides a survey of some of the major works, research traditions, and current debates in the subfield of comparative political economy. This includes such topics as: The political economy of development and underdevelopment; dependency and world systems theory; the relationship between economic development and democracy; capitalist development and democracy; the political economy of dual transitions; the political economy of privatization and structural adjustment; comparative welfare states; and comparative labor-business-government relations. Prerequisite: POLS 850. LEC.

POL 870. International Relations. 3 Hours.
Critical evaluation of the major approaches to international relations and their application to conflict and conflict resolution, foreign policy, and international political economy. LEC.
POLS 878. Conducting and Analyzing Fieldwork in Developing Countries. 3 Hours.
An introduction to fieldwork and surveys conducted in developing and non-democratic countries. The course covers the challenges of conducting interviews and surveys in these countries. The intent is to develop the research skills necessary for data collection and fieldwork as well as evaluating an analyzing survey data collected by other researchers in developing countries. Prerequisite: POLS 705 or equivalent or consent of the instructor. SEM.

POLS 888. Contemporary China Studies. 3 Hours.
This course will review and analyze the current literature on China's social and political development, including a wide range of topics within political science. There is a rich body of literature within each topic such as civil society in China, legal reform, political culture, nationalism, gender issues, ethnicity, political behavior, elections, economic development, and inequality. This course will introduce key literature within each topic focusing on the debates among China scholars as well as how these debates fit in the normal field of political science. (Same as EALC 888.) Prerequisite: POLS 668 or permission of the instructor. LEC.

POLS 898. Non-Thesis Research. 1 Hour.
Research course used to fulfill continuous enrollment requirement for master's degree students. Hours cannot count toward degree. Must be graded Satisfactory/Unsatisfactory. RSH.

POLS 899. Thesis. 1-6 Hours.
Enterrollment for writing thesis for master's degrees. Graded on a satisfactory progress/limited progress/no progress basis. THE.

POLS 904. Statistical Computing Foundations. 3 Hours.
This is an interdisciplinary course for social science researchers who need to develop routines to estimate and evaluate statistical models. It introduces tools for software development, primarily with the statistical programming language R (and related languages like C). Topics include code organization and optimization, concurrent version management, LaTeX document preparation, and high-performance computing on the KU Linux cluster. Examples from various fields are considered. Prerequisite: Two courses in graduate level statistics and familiarity with R. LEC.

POLS 906. Advanced Regression. 3 Hours.
Covers topics appropriate for a second course in regression analysis. The content will vary according to the interest of the instructor and students, but will generally include such topics as multiple imputation of missing data, the generalized linear model (GLM), and specialized models for longitudinal data. The course will include a review of the principles of maximum likelihood estimation and applications of matrix algebra and differential calculus in statistical applications. LEC.

POLS 907. Research Methods in International Studies. 3 Hours.
This course focuses on quantitative methods of research relevant to international relations and comparative politics. Topics will vary with the instructor and student interests, but may include time series analysis, classification algorithms, computer programming and computational modeling, simulation, event data and content analysis, and dynamic models. Prerequisite: POLS 707. LEC.

POLS 909. Topics in Methodology: _____ . 3 Hours.
An intensive seminar in a method (or a variety of relevant methods) of theoretical or empirical research designed for Ph.D. students only. Emphasis is on deepening the understanding and ability to use advanced methods of analysis. Prerequisite: Admission to the Ph.D. program or consent of instructor. RSH.

POLS 910. Research Seminar in American Government. 2-3 Hours.
A faculty and advanced graduate student colloquium research experience focusing on American politics, policy-making and administration, with faculty and students engaged in the production of scholarly research articles, books and conference papers. Topics will be chosen by individual students with consent of the seminar professor. LEC.

POLS 911. The U.S. Congress. 3 Hours.
This seminar employs various theoretical and methodological perspectives to explore the burgeoning post-1960 literature on Congress. Traditional subjects such as committees, parties, and elections are examined through applications of formal models, behavioral analyses, and participant observation. LEC.

POLS 912. Elections and Voting Behavior. 3 Hours.
A research seminar for students interested in theoretical and empirical approaches to the behavior of candidates, voters and contributors in campaigns and elections. The impact of campaign laws and other institutional influences will also be examined. LEC.

POLS 913. State and Local Politics. 3 Hours.
Research seminar on various aspects of state and local government, such as reformed institutions, fiscal stress, citizen participation, and various policy problems. LEC.

POLS 914. Political Behavior. 3 Hours.
Survey of various approaches to the analysis of political behavior, including an evaluation of each approach in terms of its utility in building empirically-based political theory. Examples of the application of the various approaches will focus upon the American political process. LEC.

POLS 915. American Political Parties. 3 Hours.
A survey of the theories and research findings dealing with political parties in American politics, including third and minor parties. Topics to be covered include the development and evolution of the party system, the nature of party organization and the recruitment of party activists, the role of parties in the electoral process, the impact of parties upon public policy, and party reform. LEC.

POLS 917. The Presidency. 3 Hours.
An advanced research seminar for students interested in theoretical and empirical approaches to the American presidency. This seminar will examine the powers and organizations of the White House through a study of the literature. LEC.

POLS 918. Topics in U.S. Government and Politics: _____ . 2-3 Hours.
A seminar to be offered as occasion demands, dealing with, but not limited to, bureaucracy, legislative policy, federalism, and special problems in U.S. politics. LEC.

POLS 920. Policy Analysis Research Seminar. 3 Hours.
Research seminar designed to apply public policy theory and policy analysis methods to evaluate the impact of public policies. Students will be required to design and conduct an original research project with the intention of presenting the work at a professional conference or publishing the work in a professional journal. LEC.

POLS 929. Topics in Public Policy: _____ . 1-3 Hours.
Study of selected topics in public policy. LEC.

POLS 940. Teaching Political Science. 1 Hour.
A discussion of teaching methods and approaches. Students are expected to develop a personal teaching portfolio that describes their outlook on teaching political science and provides sample teaching materials. This course must be taken by all graduate teaching assistants and assistant instructors during the first year of their appointment. Grades are issued on a pass/fail basis. LEC.
POLS 950. Research Seminar in International Studies. 2-3 Hours.
A faculty and advanced graduate student collegial research experience, focusing on comparative politics, area studies, and international relations, with faculty and students engaged in the production of scholarly research articles, books, and conference papers. Topics will be chosen by individual students with consent of the seminar professor. RSH.

POLS 952. Comparative Electoral and Party Systems. 3 Hours.
This research seminar addresses the major theoretical and empirical issues in the study of electoral and party systems. In addition to evaluating the classic works of Arrow, Duverger, Lipset and Rockman, Rae, and Taagepera and Shugart, students will assess contemporary work on electoral and party systems that has evolved from this source material. The course will address the design and reform of electoral systems, institutional rules and the strategic environment they create for political actors, the role of institutional and social factors in the development of political party systems, and the role of election administration. Students will develop and present original research papers related to these topics. Prerequisite: POLS 850. LEC.

POLS 954. Politics in Post-Soviet States. 3 Hours.
In-depth study of the politics of Russia, Ukraine, and the other Post-Soviet states. Focus on the problems of transforming a centrally planned authoritarian system to a free market democracy. LEC.

POLS 955. Politics of Advanced Industrial Societies. 3 Hours.
Theory and research on the patterns of behavior that characterize the politics of North America, Europe, and developed regions of Asia. Topics include corporatism and alternative forms of interest intermediation, economic theories of socialization and electoral choice, and the role of the state; its finances, adaptation, and the problem of power and legitimacy. Prerequisite: POLS 850 or permission of instructor. LEC.

POLS 956. The Governments and Politics of Asia. 2-3 Hours.
A research seminar on selected subjects and issues in the governments and politics of selected Asian countries. The particular focus each year will depend upon the instructor. LEC.

POLS 957. Comparative Political Behavior. 3 Hours.
The course introduces students to the vast literature on comparative elections and comparative political parties. It pursues a twofold goal. First, the course surveys the large comparative electoral behavior literature. The themes covered in the first half include a discussion of why voters participate in elections, how voters form preferences, how psychological processes affect mass views, and how these, in turn, influence party preferences. Second, the course introduces students to the supply-side of politics and the role of political parties. This second part of the course, therefore, examines why parties form in the first place, what motives they have, what choices they offer in short, how and why parties compete. Together, the way voters form preferences and the logic of party formation illuminate a central element of the democratic process. LEC.

POLS 959. Topics in Comparative Politics: ______. 1-3 Hours.
Study of selective topics in comparative government and politics. LEC.

POLS 960. Politics of Developing Countries. 2-3 Hours.
LEC.

POLS 970. Foreign Policy Analysis. 3 Hours.
Designed to acquaint students with the principal theories, approaches and types of empirical analysis generally employed to explain and interpret the creation and implementation of foreign policy. Topics include rational actor models, collective and bureaucratic processes, societal influences, cognitive and psychological factors, and comparative foreign policy. Prerequisite: POLS 870. An undergraduate United States foreign policy class is recommended. LEC.

POLS 972. Theories of International Conflict. 3 Hours.
An in-depth survey of theories and research on international conflict. Topics will range from anthropological studies of conflict in primitive societies to contemporary theories of nuclear conflict. The course will also cover current empirical research methodology and results of research on international conflict, as well as models of conflict processes. Prerequisite: POLS 870. LEC.

POLS 973. International Political Economy. 3 Hours.
Provides an eclectic survey of major developments in the field. Topics include the intellectual origins of IPE; the historical evolution of the international system; North-South and Western trade, investment, and monetary relations; foreign aid, debt technology transfer, development, international economic institutions (e.g., IMF, IBRD, MNCs, etc.). (Same as SOC 873.) Prerequisite: POLS 870 or consent of instructor. LEC.

POLS 977. Ethics in International Relations Theory. 3 Hours.
This course examines how issues of International Ethics have been treated in International Relations theory. This course begins by reviewing several theoretical perspectives of International Relations and how these perspectives have historically understood the role ethics plays in international politics. By the end of the semester, students should have a firm understanding of (1) the salient issues of international ethics in world politics and (2) whether and how IR scholars have (theoretically and methodologically) placed those issues in their research paradigms. The issue areas the course will cover include, but are not limited to, human rights doctrines, issues of economic and political justice, just war theory (jus ad bellum) and just conduct of war (jus in bello), and humanitarian intervention. The course will assess the role international law has played in stemming and/or punishing human rights abuses. Students will review several historical cases of genocide, as well as several cases of truth and reconciliation commissions. LEC.

POLS 979. Topics in International Relations: ______. 3 Hours.
To be offered periodically when topics of special interest arise. LEC.

POLS 980. International Organizations. 3 Hours.
Considers theoretical and empirical work on international governmental and non-governmental organizations (IOs). Specifically highlights the evolving scholarly debates regarding the function, design, and delegation of authority to IOs as well as their behavior and change. Explores these questions in depth through a wide range of cases, including comprehensive coverage of the United Nations, Bretton Woods Institutions, and the European Union, and their activities in issue areas concerning international security, trade, finance, development, humanitarian aid, and the environment. LEC.

POLS 993. Directed Readings. 1-5 Hours.
Designed to meet the needs of graduate students whose study in political science cannot be met with present course. Prerequisite: Consent of instructor. RSH.

POLS 995. Directed Research. 2 Hours.
Designed for advanced graduate students who are concurrently enrolled or who will be enrolled in a subsequent semester in one of the Research Seminars in American Government or International Studies. Students enrolling in this course should have the prior approval of the faculty member with whom they wish to conduct the research. RSH.

POLS 997. Preparation for the Comprehensive Examination. 1-6 Hours.
An independent reading course for students preparing to take the Ph.D. comprehensive examination. May be taken for two semesters or six credits, whichever comes first. Graded on A, B, C, D, or F depending on the results of the comprehensive examination. RSH.
Bachelor of Arts and Bachelor of General Studies in Political Science

Why study political science?

Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political Science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought today, as one of the social sciences, is a comparatively new discipline.

It developed in the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

Ask yourself, Am I interested in public affairs? Am I a good analytical and critical thinker? Am I curious about the world and it's workings? Do I communicate well orally and in writing? Do I want to be a knowledgeable citizen? Am I interested in the relationship between government and the people? Am I curious about how decisions and made and how conflicts are resolved?

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

- POLS 689 Topics in International Relations:

### Political Science Required Electives

Majors must complete 4 elective courses (12 hours), of which 3 courses (9 hours) must be upper-level courses.

### Capstone Experience

Recommended for majors but not required:
- POLS 493 Directed Readings
- POLS 494 Washington Semester Intern Seminar
- POLS 495 Topeka Semester Intern Seminar
- POLS 496 Washington Semester Field Work
- POLS 497 Topeka Semester Field Work
- POLS 498 Honors Thesis
- POLS 499 Capstone Research/Field Work Experience

### Honors Experience

Recommended for students with a minimum grade point average of 3.5 in Political Science coursework and 3.25 overall. These averages must be achieved before the final semester.

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours

Satisfied by 30 hours of major courses. A student may count no more than 6 hours toward the major from the following courses combined: POLS 493, POLS 494, POLS 495, POLS 496, POLS 497, or POLS 498.

#### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior (300+) Hours

Satisfied by a minimum of 21 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study.
study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://www.collegesas.ku.edu/GPAcalculator.shtml).

A sample 4-year plan for the BA degree in Political Science can be found here: Political Science (p. 1851), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Political Science can be found here: Political Science (p. 1852), or by using the left-side navigation.

**Departmental Honors**

**1. Eligibility:**

Undergraduate majors in the department with senior standing, a minimum 3.5 GPA in Political Science and a minimum 3.25 overall GPA are eligible to enroll in departmental honors work. These GPA levels also must be achieved at the end of the candidate's final semester for both in-residence and combined work.

**2. Procedures:**

Majors wishing to pursue the honors program must file a declaration of intent form with the department's Undergraduate Studies Coordinator no later than at enrollment for the final semester of undergraduate study. Normally students will be expected to enroll at the beginning of their senior year of study, for two consecutive semesters.

Students pursuing honors will enroll in POLS 498, *Honors Thesis*, with an individual faculty member who has agreed to serve as thesis adviser, thus accepting responsibility for directing the honors research project. Enrollment for 3 hours for two consecutive semesters in POLS 498 is usually expected. In unusual cases students may enroll for 6 hours in one semester, doing all the thesis work in that period.

**3. Requirements for graduation with honors:**

Completion of a written research project which has been read and approved by a committee of at least three members of the College faculty (of whom at least two must be political science faculty, including thesis advisor). The committee will then certify successful completion of the honors thesis enrollment. Work considered by the project director to be less than "A" quality will not be considered for honors and will not be presented to the committee for approval. The written report is expected to be more than an extended term paper, while something less than a graduate-level thesis. It must reflect analysis and perceptive understanding of the subject matter being studied.

**4. Research timetable:**

It is strongly recommended that students follow a relatively strict schedule in completing their research studies, in order to avoid having the honors oral examination come very late in the final semester. The following timetable is recommended:

1. A research design should be submitted by the middle of the first semester of enrollment.
   a. At the latest, the first draft of the written report should be completed approximately 2 months before the end of the semester in which honors are to be awarded (e.g., March 15, or October 15)
   b. At the latest, the final draft of the written report should be completed 1 month before the end of the semester in which honors are to be awarded.

**BA in Political Science**

Below is a sample 4-year plan for students pursuing the BA in Political Science. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Please note:

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. For a list sub-fields and courses used to fulfill the sub-field requirements, and POLS 400+ elective requirements, review the degree requirements tab in the catalog, or see your advisor.

4. These are recommended capstone courses for majors. If one of these courses is not taken, another course that fulfills Goal 6 Integration & Creativity must be chosen.

**Total Hours 120-123**

1 2 3 4 5

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

1. The BGS requires completion of a minor (or a second major) outside of the major area of study. Most minors require 18 hours with 12 at the 300+ level.

2. For a list of sub-fields and courses used to fulfill the sub-field requirements, and POLS 400+ elective requirements, review the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/political-science/ba-bgs/#requirementstext) tab in the catalog, or see your advisor.

3. These are recommended capstone courses for majors. If one of these courses is not taken, another course that fulfills Goal 6 Integration & Creativity must be chosen.

Please note:
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in Intelligence and National Security Studies

The minor in Intelligence & National Security Studies in Political Science supports the Defense Intelligence Agency’s (DIA) Intelligence Community Centers for Academic Excellence mission, which is to enhance the recruitment & retention of an ethically and culturally diverse workforce with capabilities critical to U.S. national security interests. DIA has identified specific core courses as fundamental to the academic preparation for entry-level positions within the U.S. Intelligence Community. This minor directly supports these core requirements. Students complete six courses (18 hours), four of which are the required core for the INSS minor (12 hours).

- To complete the INSS minor in Political Science, students complete six courses (18 hours), four of which are the required core for the INSS minor (12 hours) and available through KU Online.

In addition to the four core courses, students then complete two additional courses related to INSS (6 hours) from the list below (Each course is offered at least once per year on the KU Lawrence campus):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 125</td>
<td>Intelligence: Supporting National Security</td>
<td>3</td>
</tr>
<tr>
<td>POLS 130</td>
<td>US Intelligence Community</td>
<td>3</td>
</tr>
<tr>
<td>POLS 325</td>
<td>Intelligence Analytics</td>
<td>3</td>
</tr>
<tr>
<td>POLS 345</td>
<td>Counterintelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the four core courses, students then complete two additional courses related to INSS (6 hours) from the list below (Each course is offered at least once per year on the KU Lawrence campus):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 625</td>
<td>Extremist Groups and Government Response</td>
<td>3</td>
</tr>
<tr>
<td>POLS 652</td>
<td>Politics in Europe</td>
<td>3</td>
</tr>
<tr>
<td>POLS 661</td>
<td>Politics of the Middle East</td>
<td>3</td>
</tr>
<tr>
<td>POLS 675</td>
<td>Russian Foreign Policy</td>
<td>3</td>
</tr>
<tr>
<td>POLS 677</td>
<td>U.S. National Security Policy</td>

<tr>
<td>POLS 676</td>
<td>International Relations of Asia</td>
<td>3</td>
</tr>
</tbody>
</table>

Additionally, participation in 10 hours of campus activities with INSS focus, such as lectures, workshops and other events, will be required. As designed, the INSS minor will fulfill the majority of the required ICWA Knowledge Units within the core and optional intelligence topics categories. Upon completion of the minor, students will have in-depth knowledge of the intelligence community, intelligence collection, intelligence analysis, and threats the United States faces in the public and private sectors.

Minor in Political Science

The minor is a general political science minor that allows students to take coursework across the different subfields in political science. This provides options to students beyond the major to broaden student learning and understanding in an important discipline that will impact their lives beyond college. Students in more than one minor offered through the political science department cannot overlap more than one course between two minors.

Requirements for the Minor

Students in more than one minor offered through the Political Science department cannot overlap more than one course between two minors. (See also general regulations for minors in the Undergraduate tab of the Liberal Arts and Sciences section of the catalog)

Global Option

18 credit hours of coursework in Political Science, 12 of which must be taken at the junior/senior level.

Global Security Option

Minor Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Minor in Public Policy in the United States

Students majoring in various social science disciplines are encouraged to minor in Public Policy. Students earning a BA or BGS can obtain a minor; the minor consists of 18 credit hours.

#### Requirements for the Public Policy in the U.S. Minor

The Public Policy in the U.S. minor involves course work focused on domestic U.S. public policy and the political environment surrounding the making and implementation of policy.

*NOTE - Students in more than one minor offered through the political science department cannot overlap more than one course between two minors.

#### Public Policy in U.S. Minor Core

#### Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Junior/Senior Hours in Residence**
Satisfied by a minimum of 12 hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses (300+) in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Undergraduate Certificate in Intelligence and National Security Studies

The undergraduate certificate in Intelligence & National Security Studies (INSS) introduces students to the highly desired skills and competencies necessary to work within the US Intelligence Community. Combining courses and extracurricular activities, the INSS certificate demonstrates to future employers that you are knowledgeable about the dynamic, multidisciplinary field of intelligence, it's role in security and diplomacy, and the ethics and laws governing intelligence collection and dissemination. Open only to undergraduates.

#### Code Title Hours

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 125</td>
<td>Intelligence: Supporting National Security</td>
<td>3</td>

<tr>
<td>POLS 325</td>
<td>Intelligence Analytics</td>
<td>3</td>
</tr>
<tr>
<td>POLS 345</td>
<td>Counterintelligence</td>
<td>3</td>
</tr>
</tbody>
</table>

Students enrolled in the certificate program are also required to participate in 20 hours of campus activities through workshops, lectures, etc. that have an intelligence/national security focus (the effort to complete these experience points will not exceed 2 credit hours).

### Master of Arts in Political Science

#### Why study political science?

Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought of today, as one of the social sciences, is a comparatively new discipline. It developed in the
United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with the origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

What's special about the Political Science graduate program?

Our medium size allows faculty to teach seminars on a variety of topics with individualized mentoring in and out of the classroom. Graduate students work closely with faculty on research and themselves publish independent papers and win fellowships and awards. This productivity is complemented by a diverse group of students, many coming from around the world. In addition, by the time of graduation most of our graduate students will teach their own classes. We believe teaching is an important part of a graduate education and serves our students well in an increasingly competitive job market. Our unique Thompson Summer Scholarship Research Program offers students the opportunity to engage in a genuine collaborative research project with selected faculty. Working with faculty on a variety of research topics, students maximize their potential by earning a competitive stipend and sharpening their research skills across the summer months. The program has generated many conference papers and publications as well. Our department therefore offers unparalleled access to our faculty and valuable opportunities in both research and teaching.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The MA program in Political Science accepts applications for the fall semester only. Applications and all required supplemental materials must be submitted by the deadlines listed on the program’s website (http://kups.ku.edu/admission-ma/) to be considered for admission.

Application Materials

Applicants should upload the supporting application documents listed below to the online application (https://gradapply.ku.edu/apply/). There is no need to send copies of application materials directly to the Department of Political Science.

- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges or universities attended
- Statement of purpose (no longer than two pages, single spaced)
- Resume or CV
- Official GRE score report no more than five years old (this requirement is waived for applicants who will hold an MA from an institution which conducts all instruction entirely in English by the beginning of their first term in the program)
- Three letters of recommendation (preferably from faculty members)

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Contact

Visit the Admissions (https://kups.ku.edu/admissions/) page on the Department of Political Science website for detailed information about the application process.

M.A. Degree Requirements

All candidates for the M.A. degree must complete, at a satisfactory level,

1. 30 semester hours of graduate credit, 21 of which must be earned in courses at the 700 level or above;
2. Research methods through POLS 706; and
3. A comprehensive master's oral examination.

The student selects a principal advisor from the Graduate Faculty by the end of the first year to choose courses and prepare for the comprehensive examination. The examination is administered by a 3-person M.A. committee that includes the student’s principal advisor and 2 other members of the KU Graduate Faculty selected by the student in consultation with the principal advisor. One member of the committee may be from another department (including Special Status members of the Graduate Faculty).

Directed readings courses in excess of 5 hours cannot be counted toward the 30 hours required for the degree. With prior written approval, candidates may count up to 6 graduate hours taken outside the department (either at KU or at another institution accredited by the North Central Association of Colleges and Schools) toward the 30 hours required for the degree.

Applicants who have not completed at least 15 undergraduate credit hours in political science may be admitted with the provision that they complete additional hours of course work.

All candidates must fulfill the requirements of either the thesis or the non-thesis option for the Master of Arts degree.

Thesis Option

Upon completion and certification of an acceptable thesis, candidates may count 6 credit hours of thesis enrollment toward the 30 credit hours required for the M.A. degree.

Non-thesis Option

Candidates may substitute a minimum of two 800- or 900-level research courses plus satisfactory performance on a comprehensive written examination administered by the three-person M.A. committee before the oral examination.
Doctor of Philosophy in Political Science

Why study political science?
Because political science advances our understanding of politics, power, governance, and public policy in the United States and across the globe. In the broadest sense, political science is the study of governments and governmental procedures. Political science is as old as civilization, because people always have been interested in their government and in their leaders. But political science as it is thought of today, as one of the social sciences, is a comparatively new discipline. It developed in the United States during the last century as political scientists developed an ability to make increasingly scientific observations of government. Political scientists are concerned with the origins and sources of governmental organizations, their growth, and their decline, as well as with the processes and structure of government.

What’s special about the Political Science graduate program?
Our medium size allows faculty to teach seminars on a variety of topics with individualized mentoring in and out of the classroom. Graduate students work closely with faculty on research and themselves publish independent papers and win fellowships and awards. This productivity is complemented by a diverse group of students, many coming from around the world. In addition, by the time of graduation most of our graduate students will teach their own classes. We believe teaching is an important part of a graduate education and serves our students well in an increasingly competitive job market. Our unique Thompson Summer Scholarship Research Program offers students the opportunity to engage in a genuine collaborative research project with selected faculty. Working with faculty on a variety of research topics, students maximize their potential by earning a competitive stipend and sharpening their research skills across the summer months. The program has generated many conference papers and publications as well. Our department therefore offers unparalleled access to our faculty and valuable opportunities in both research and teaching.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog. Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
The PhD program in Political Science accepts applications for the fall semester only. Applications and all required supplemental materials must be submitted by the deadlines listed on the program’s website (http://kups.ku.edu/admission-phd-0/) to be considered for admission.

Application Materials
Applicants should upload the supporting application documents listed below to the online application (https://gradapply.ku.edu/apply/). There is no need to send copies of application materials directly to the Department of Political Science.

- Copy of official transcripts (http://graduate.ku.edu/transcripts/) from all colleges or universities attended
- Statement of purpose (no longer than two pages, single spaced)
- Resume or CV
- Official GRE score report no more than five years old
- Three letters of recommendation (preferably from faculty members)

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Contact
Visit the Admissions (https://kups.ku.edu/admissions/) page on the Department of Political Science website for detailed information about the application process.

Ph.D. Degree Requirements
Students who complete the Master of Arts degree may be eligible to pursue the PhD degree. Students must complete coursework in two major subfields, one minor subfield, and research methods.

Major Subfields
The major subfields must be drawn from the four subfields listed below (American Politics, Comparative Politics, International Relations, and Public Policy). Before their first attempt at the written preliminary examination in any subfield, all doctoral students must complete at least four graduate level courses courses in that field, three of which are at the 700 level or above. Enrollment in directed research covering a particular subfield may be substituted for one of the four courses/seminars. Students should consult their faculty advisor to plan a schedule of courses in each of their major subfields to provide adequate preparation for the written preliminary examination based on the requirements outlined below.

American Politics

To become a doctoral candidate, the student must satisfactorily complete a comprehensive oral examination. No student may attempt the comprehensive oral examination until they have passed the two written preliminary examinations. To become a doctoral candidate, the student must satisfactorily complete a comprehensive oral examination. No student may attempt the comprehensive oral examination. Students must complete all courses in their two major subfields prior to completing their dissertation. Students must write a dissertation approved by a departmental dissertation committee and pass a final oral defense of the dissertation to qualify for the doctoral degree.

Additional Information

Additional information about course and degree requirements for the Political Science doctoral program is located in the department's graduate student handbook (http://kups.ku.edu/sites/kups.ku.edu/files/docs/POLS%20Graduate%20Student%20Handbook.pdf) for reference.

Premedical Professions

Preparation

Premedical Professions Advising

Predentistry, premedicine, preoptometry, and preveterinary medicine are
career interests, usually developed together with completing a bachelor's
degree. Students prepare by taking courses required for entry, studying to
learn concepts and perform well academically, volunteering and
shadowing to get experience, taking a standardized admissions test, and
applying for admission to graduate-level professional schools.

For more information, visit the website (https://prehealth.ku.edu/).

Predentistry

Predentistry is a career interest, usually developed together with
completing a bachelor's degree and major. Students prepare by taking
courses to meet dental school entry requirements, studying to learn
concepts and perform well academically, shadowing or working in dental
practices, and volunteering to serve people in need. They take the
Dental Admission Test (http://www.ada.org/dat.aspx) (DAT) and apply for
admission to dental schools, usually in the summer between the junior
and senior year.

The UMKC School of Dentistry also requires:

Code | Title | Hours
---|---|---

PHSX 214 | General Physics II Honors | 4-5

Some dental schools require additional mathematics, psychology, and/or
biology courses.

For more information, visit the website (http://prehealth.ku.edu/dentistry-
new/).

Premedicine

Premedicine is a career interest, usually developed together with
completing a bachelor's degree and major. Students prepare by taking
courses to meet medical school entry requirements, studying to learn
concepts and perform well academically, volunteering or working in health
care settings, and serving people in need. They take the Medical College
Admission Test (https://www.aamc.org/students/applying/mcat/) (MCAT)

<td>3</td>
</tr>
<tr>
<td>SOC 161</td>
<td>Social Problems and American Values, Honors</td>
<td>3</td>
</tr>
</tbody>
</table>

And, the KU School of Medicine also strongly encourages candidates to complete an immunology course before entering medical school:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 503</td>
<td>Immunology</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 503</td>
<td>has a pre-requisite of BIOL 400: Fundamentals of Microbiology, which is also recommended by most medical schools.</td>
<td>4</td>
</tr>
</tbody>
</table>

For more information, visit the website (http://prehealth.ku.edu/medicine-new/).

**Preoptometry**

Preoptometry is a career interest, usually developed together with completing a bachelor's degree and major. Students prepare by taking courses to meet optometry school admission requirements, studying to learn concepts and perform well academically, shadowing or working in optometry practices, and volunteering to serve people in need. They take the Optometry Admission Test (http://www.ada.org/en/oat/) (OAT) and apply for admission to optometry schools, usually in the summer between the junior and senior year.

Optometry schooling is four years of graduate-level, professional education and training. There is no optometry school in Kansas, however, there are agreements for some seats for Kansas residents at the University of Missouri - St. Louis School of Optometry, Northeastern State
University of Oklahoma College of Optometry, and the Southern College of Optometry in Tennessee.

Most optometry schools require:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 101</td>
<td>Composition or ENGL 10H: Honors Introduction to English</td>

<td>Introduction to Biostatistics</td>
<td></td>
</tr>
</tbody>
</table>

Some may require additional mathematics, psychology, and/or other courses.

For more information, visit the website (http://prehealth.ku.edu/optometry-new/).

**Preveterinary Medicine**

Preveterinary medicine is a career interest, usually developed together with completing a bachelor’s degree and major. Students prepare by taking courses to meet veterinary school admission requirements, studying to learn concepts and perform well academically, shadowing or working in veterinary practices, and volunteering to help people and other animals in need. They take the Graduate Record Examination (http://www.ets.org/gre/) (GRE) and apply for admission to veterinary schools, usually in the summer between the junior and senior year.

Veterinary schooling is four years of graduate-level, professional education and training. The only veterinary school in Kansas is the Kansas State College of Veterinary Medicine.

The Kansas State College of Veterinary Medicine requires:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</table>
Department of Psychology

The Psychology Department at the University of Kansas

Our mission is to further our understanding of behavior and the physiological, cognitive, and social processes associated with behavior. Psychology is also the profession that applies the science of behavior to practical problems, such as clinical, psychological disorders. This mission includes the discovery and dissemination of principles pertaining to both individual and group psychological functioning and its development. In addition to doing this critical research, we expend great effort in training students at both the undergraduate and graduate levels so that these students will be well equipped with the knowledge and methods that will place them at the forefront of progress across a broad range of the psychological disciplines.

Psychology Undergraduate Program

Students have many reasons for wanting to major in psychology. Some are simply fond of observing the behavior of others around them, fascinated with the results of their observations and curious to learn why people behave as they do. Some plan to become psychologists themselves or to enter one of the many professions where a background in psychology can be useful -- such as, business, teaching, medicine, nursing, law, social work, the ministry, counseling, student services, child development, administration, or human resources.

Psychology Graduate Program

We offer a single doctoral degree which may be earned in one of the following programs: brain, behavior, and quantitative science, clinical psychology, or social psychology. Students admitted to one of these programs enter with the expectation of continuing graduate study through the Ph.D. as the department does not admit terminal master's students.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child psychology program, please visit their website (https://cchild.drupal.ku.edu/clinical-child-psychology-program/).

Undergraduate Programs

Undergraduate courses are designed as part of a general education, for students preparing for careers in professional fields, and for students majoring in psychology, including those anticipating graduate work.

Preparation for Graduate Study

Students who plan to apply for graduate work in psychology should supplement their beginning course in methodology (PSYC 200/PSYC 201) and statistics (PSYC 210/PSYC 211) with a laboratory course (e.g., PSYC 618, PSYC 620, PSYC 622, PSYC 624, or PSYC 625). Methods (PSYC 200/PSYC 201) and Statistics (PSYC 210/PSYC 211) should be taken as early as possible in the undergraduate education. The laboratory course should be completed during the junior or senior year.

Graduate Programs

We offer a single doctoral degree in psychology which may be earned in one of the following programs: brain, behavior, and quantitative science, clinical psychology, and social psychology. Please visit our Psychology Graduate Program (http://psych.ku.edu/overview-phd/) webpage for more details.

All of our programs boast distinguished and award-winning faculty, notable research publications, and a deep foundation in the historical progress of psychological advances.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child graduate program, please visit their website (https://cchild.drupal.ku.edu/clinical-child-psychology-program/).
Dual-title Ph.D. in Psychology and Gerontology

This dual-title degree is an option available to students who have first been admitted to the doctoral program. The dual-title degree allows the pursuit of a single degree that incorporates study within a traditional discipline and training in an interdisciplinary field; the student is awarded one degree (Ph.D.) with both titles identified on the diploma (e.g., “Ph.D. in Psychology and Gerontology”).

This option is designed to appeal to students who are strong in a traditional discipline but also motivated to study across disciplinary lines. In the course of study, students can avail themselves of disciplinary depth and interdisciplinary breadth. At the post-doctoral stage, dual-title graduates will have enhanced career and employment opportunities, able to claim expertise in one or both titles of their degree when seeking positions in education and research.

More information about this option, its admissions requirements, and plan of study can be found on the Dual-Title Ph.D. program (http://psych.ku.edu/overview-dual-title-phd/) webpage or the Gerontology program website. (http://gerontology.ku.edu/degrees/)

Non-Degree Seeking

Students who are interested in enrolling in graduate level coursework in the Department of Psychology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s Non-Degree Seeking (http://psych.ku.edu/overview/) webpage for further details.

Questions regarding the our graduate programs can be directed to our graduate academic advisor, Kirsten Hermreck, kahermreck@ku.edu.

Courses

PSYC 102. Orientation Seminar in Psychology. 1 Hour S.
Provides an overview of the discipline of psychology. Emphasizes developing an understanding of opportunities in psychology at the University of Kansas, exploring service-learning options related to the major, and helping students plan goals for their education through an understanding of their personal values and options within and outside the discipline. Open to KU-degree-seeking students only. Contact the Psychology Department to enroll in the course. Non-degree-seeking and non-KU students may enroll in the course by signing up with KU Continuing Education. Graded on a satisfactory/unsatisfactory basis. LEC.

PSYC 104. General Psychology. 3 Hours SI GE3S / S.
A basic introduction to the science of psychology. LEC.

PSYC 105. General Psychology, Honors. 3 Hours SI GE3S / S.
Open to students in College or Departmental Honors programs or by permission of instructor. LEC.

PSYC 177. First Year Seminar: _______. 3 Hours SI GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in psychology. May not contribute to major requirements in psychology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

PSYC 200. Research Methods in Psychology. 3 Hours S.
An examination of the scientific “ways of knowing” employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Prerequisite: PSYC 104. LEC.

PSYC 201. Research Methods in Psychology, Honors. 3 Hours S.
An examination of the scientific “ways of knowing” employed by psychologists to discover the laws governing human behavior across a wide domain. The focus of the course is upon these methods and the statistical techniques that support them. Open to students in University and Departmental Honors programs or by permission of instructor. Not open to students taking PSYC 200. Prerequisite: PSYC 104. LEC.

PSYC 202. Study Abroad Topics in: _______. 1-6 Hours S.
This course is designed for the study of special topics in Psychology equivalent to courses at the 100 and 200 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

PSYC 210. Statistics in Psychological Research. 3 Hours GE12 / S.
An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Prerequisite: PSYC 104. LEC.

PSYC 211. Statistics in Psychological Research, Honors. 3 Hours S.
An introduction to statistical concepts and methods as they relate to analysis and interpretation of psychological data. Open only to student in University and Departmental Honors programs or by permission of instructor. Not open to students who have taken PSYC 210. Prerequisite: PSYC 104. LEC.

PSYC 250. Human Development. 3 Hours S.
This course examines the psychological, social, and physical development of humans across the lifespan from conception through infancy, childhood, adolescence, adulthood and death. The course will explore the broad array of factors that contribute to development including cognitive, emotional, social, neurological, physical, genetic, and environmental influences. (Same as ABSC 250.) Prerequisite: PSYC 104 or PSYC 105. LEC.

PSYC 318. Cognitive Psychology. 3 Hours S.
An introduction to contemporary research and theory in human learning and memory, relevant perceptual processes, and higher functions such as language. Prerequisite: PSYC 104. LEC.

PSYC 319. Cognitive Psychology, Honors. 3 Hours S.
Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104. LEC.

PSYC 320. Personality. 3 Hours S.
A survey of personality theories, development, assessment and current research. Prerequisite: PSYC 104. LEC.

PSYC 321. Personality, Honors. 3 Hours S.
Honors version of PSYC 320. Open to students in College or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104. LEC.

PSYC 333. Child Development. 3 Hours S.
A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Prerequisite: PSYC 104. LEC.

PSYC 334. Child Development, Honors. 3 Hours S.
A survey course on the science and application of child and adolescent development; including physical, motoric, social, emotional, and cognitive changes from conception through adolescence. The course covers methods and theory, genetics, and may incorporate content on aggression, morality, parenting, media, and peers. Open to students...
in University or Departmental Honors Programs or by permission of instructor. Prerequisite: PSYC 104. LEC.

**PSYC 350. Abnormal Psychology. 3 Hours S.**
An examination of psychopathology including anxiety disorders, psycho-physiological disorders, affective disorders, and schizophrenic disorders. Disorders are considered from psychodynamic, behavioral, cognitive, and biological perspectives. Prerequisite: PSYC 104. LEC.

**PSYC 351. Abnormal Psychology, Honors. 3 Hours S.**
Open to students in College or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104. LEC.

**PSYC 350. Social Psychology. 3 Hours S.**
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Prerequisite: PSYC 104. LEC.

**PSYC 351. Social Psychology, Honors. 3 Hours S.**
An introduction to the psychology of social behavior. Systematic consideration of such concepts as social influence, conformity and deviation, social attitudes and prejudice, socialization and personality, communication and propaganda, morale, and leadership. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: PSYC 104. LEC.

**PSYC 350. Behavioral Neuroscience. 3 Hours N.**
A survey of topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

**PSYC 351. Behavior Neuroscience, Honors. 3 Hours N.**
A survey of basic topics related to the biological processes underlying behavior in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and neuropharmacology. Selected topics within the area of behavioral neuroscience are also covered, such as motivation, appetite, reward, homeostasis, biological rhythms, addiction, aggression, stress, emotion, and sleep. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology; an introductory course in Biology and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

**PSYC 375. Cognitive Neuroscience. 3 Hours N.**
A survey of topics related to the biological processes underlying cognition in humans and in animals, including the physiology of neuronal and synaptic transmission, neurochemistry, and functional neuroanatomy. Selected topics within the area of cognitive neuroscience also covered, such as sensory processing, hearing, vision, learning and memory, attention, motor control, language, hemispheric asymmetry, executive function, and neuroplasticity. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

**PSYC 380. Clinical Neuroscience. 3 Hours N.**
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dyskinetic movement disorders, and senile dementia. Prerequisite: An introductory course in Psychology, an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

**PSYC 381. Clinical Neuroscience, Honors. 3 Hours N.**
The organization and function of the nervous system as it relates to topics of interest to psychologists, including pain, anxiety, stress, sleep, depression, schizophrenia, akinetic and dyskinetic movement disorders, and senile dementia. Open to students in University or Departmental Honors programs or by permission of instructor. Prerequisite: An introductory course in Psychology, an introductory course in Biology, and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

**PSYC 385. Social Neuroscience. 3 Hours S.**
This course is designed to acquaint students with the Social Neuroscience approach as well as recent findings using this approach. The class will focus on particular social phenomena and (a) evaluate the utility of current social neuroscience research examining these phenomena and (b) consider future experimental designs using the Social Neuroscience approach to further inform our understanding of each phenomenon. Prerequisite: An introductory course in Psychology; an introductory course in Biology; and PSYC 200 or PSYC 201 and PSYC 210 or PSYC 211. LEC.

**PSYC 390. The Psychology of Aging. 3 Hours S.**
Social, psychological, and economic adjustments required by aging; changes in cognition, role and personality necessitated by advancing age. Not open to students with credit in PSYC 691. Prerequisite: PSYC 104. LEC.

**PSYC 402. Study Abroad Topics in: _____. 1-6 Hours S.**
This course is designed for the study of special topics in Psychology equivalent to courses at the 300 to 600 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

**PSYC 405. Children and Media. 3 Hours H.**
The applied study of child development theories and research methods on the influences and effects of television and related visual media on childhood in the contexts of families, schools, and society. (Same as ABSC 405 and THR 405.) LEC.

**PSYC 410. Intimate Relationships. 3 Hours S.**
A social psychological perspective on adult intimate relationships, examining friendship, dating, committed relationships, and the dissolution of committed relationships. Topics include romance, jealousy, self-disclosure, power, loneliness, and social support. Discussion of heterosexual and homosexual relationships, traditional forms (e.g., marriage) of relationships as well as alternative lifestyles (e.g., cohabitation) and gender-linked differences in relationships. (Same as WGSS 410.) Prerequisite: PSYC 104. LEC.

**PSYC 412. Introduction to Motivation and Emotion. 3 Hours S.**
An examination of contemporary issues, theories, and research in motivation and emotion. Prerequisite: PSYC 360 or PSYC 361, or consent of instructor. LEC.

**PSYC 415. Social and Cultural Sources of Self. 3 Hours S.**
An interdisciplinary exploration of the social and cultural sources of self-experience. The first part of the course emphasizes a general process: how the development and experience of self, though it might seem essentially personal, is shaped by social interaction. The second part of the course highlights particular cases: how self-experience may be constructed differently depending on the particular social and cultural settings a person inhabits. Cases include influences of gender, socioeconomic status, and age group on the construction of self-
experience within societies from around the world, and ethnic-identity
groups within the USA. Prerequisite: PSYC 104. LEC.

PSYC 418. Introduction to Cognitive Science. 3 Hours S.
Examines the data and methodologies of the disciplines that comprise
Cognitive Science, an inter-disciplinary approach to studying the mind and
brain. Topics may include: consciousness, artificial intelligence, linguistics,
education and instruction, neural networks, philosophy, psychology,
anthropology, evolutionary theory, cognitive neuroscience, human-
computer interaction, and robotics. (Same as LING 418, PHIL 418, and
SPLH 418.) Prerequisite: Consent of instructor. LEC.

PSYC 430. Cognitive Development. 3 Hours S.
A basic survey course in the development of thinking and understanding
in normal children. The course will cover Piaget's theory and information
processing theories at the advanced undergraduate level. Topics include
perception, attention, learning, memory, language, problem solving, and
individual differences from birth to the mid-teens. Prerequisite: PSYC 104
or ABS/HDFL 160. LEC.

PSYC 449. Laboratory/Field Work in Human Biology. 1-3 Hours
AE61 / N / LFE.
This biological anthropology lab course builds upon concepts introduced
in ANTH 150 and ANTH 304. It provides students with practical, hands-
on experience in biological anthropology laboratory methods and theory.
Topics include: genetics, osteology, forensic anthropology, modern
human biological variation, primatology, paleoanthropology, and human
evolution. Students integrate their knowledge of human variation,
genetics, and critical approaches to the concept of social and biological
race. For the final project, students analyze genetic markers using a
commercial ancestry test. They will either be given anonymous data to
work with, or, if they pay an optional laboratory fee, they can investigate
their own genome for the final project. This fee for self-study is not
required for full participation in the final project. (Same as ANTH 449,
BIOL 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340,
Human Biology major, or permission of instructor. LAB.

PSYC 453. Psychological Foundations of Musical Behavior. 3 Hours
S.
Study of human musical behavior, including basic psychoacoustic
phenomena, musical taste, functional music, musical ability, cultural
organization of musical sounds, and the affective response. Prerequisite:
General Psychology, MENT 370, or consent of instructor. LEC.

PSYC 460. Honors in Psychology. 1-2 Hours AE61 / S.
A seminar for juniors and seniors in the Honors Program in Psychology.
Students who have been admitted to the Honors Program in Psychology
may enroll for one credit for one or both semesters of their junior year
and are required to enroll for two credits for both semesters in their senior
year. IND.

PSYC 465. Stereotyping and Prejudice Across Cultures. 3 Hours S.
This course covers a variety of theoretical views concerning the origins of
stereotypes and the factors that maintain them, as well as how and when
the revision of such beliefs take place. Analysis of various stereotypes
(including gender and race) and the experience of prejudice across a
variety of cultural contexts is examined. Many difficult social issues are
discussed in depth. Prerequisite: PSYC 360 or PSYC 361; or consent of
instructor. LEC.

PSYC 468. Psychology of Women. 3 Hours S.
A survey of the psychological theories about women; similarities and
differences in the behavior of women and men; the effects of biological
and social factors on the behavior of women and men; and issues of
concern to women of different races, sexual orientations, ages, and so
forth. (Same as WGSS 468.) Prerequisite: Any previously completed
course in PSYC or WGSS. LEC.

PSYC 469. Seminar: ______. 1-5 Hours U.
Discussion of current problems in psychological theory and research.
Prerequisite: PSYC 104. LEC.

PSYC 470. Introduction to Contemporary Psychotherapies. 3 Hours
S.
Review of current psychotherapies with special references to their
underlying philosophies, theories of personality, techniques, and
effectiveness. Issues concerning the use of drugs in the treatment of
mental disorders are also reviewed. Prerequisite: PSYC 104. LEC.

PSYC 472. Psychology of Sleep and Dreaming. 3 Hours S.
This course reviews recent evidence on the roles of dreaming and
dreamless sleep. Psychological, developmental, personality, and social
psychological aspects are considered. Prerequisite: PSYC 104. LEC.

PSYC 480. Independent Study. 1-5 Hours U.
Investigation of a special research problem or directed reading in an
area not covered in regular courses. No more than 3 hours of PSYC
480 may be counted toward the minimum hours required for the major.
Prerequisite: Consent of instructor. IND.

PSYC 481. Research Practicum. 1-5 Hours U.
Guided participation in ongoing research programs to augment
quantitative skills through direct practicum experience. No more than 3
hours of PSYC 481 may be counted toward the Psychology minor or the
Psychology, Developmental Psychology, and Behavioral Neuroscience
major requirements. Prerequisite: PSYC 200 or PSYC 201 or PSYC 210
or PSYC 211 or consent of instructor. RSH.

PSYC 482. Sensation and Perception. 3 Hours S.
Introduction to human sensory and perceptual capabilities. Topics include:
sensory systems, perceptual development, and perceiving color, objects,
space, movement, sound, speech, touch, smell, and taste as well as various
perceptual illusions. Prerequisite: PSYC 104. LEC.

PSYC 483. Undergraduate Internship in Psychology. 1-3 Hours U.
Students conduct psychology focused fieldwork in an organization related
to their professional/career goals. Credit hours are determined on the
basis of 120 clock hours for 3 credit hours, 80 clock hours for 2 credit
hours, and 40 clock hours for 1 credit hour. An internship plan (contract)
is developed by the student in conjunction with the student's academic
adviser and signed off by the academic adviser and an authorized agent
of the internship site. At the conclusion of the internship experience,
the authorized agent of the internship site writes the academic adviser
indicating that the student has met the goals of the internship plan and
the hours required. No more than 3 hours of PSYC 483 may be counted
toward the minimum hours required for the major. Prerequisite: Admission
to the Psychology major. INT.

PSYC 484. Classroom to Career. 3 Hours S.
Students who are preparing to enter the workforce are introduced to
current challenges and trends in professional development and workforce
psychology. In addition to discussion of interdisciplinary research
focused around career management topics such as preventing burnout,
recognizing and eliminating bias in interviews, or predictors of job
satisfaction and productivity, emphasis is placed on the creation of a job
dossier and tools to help bridge skills from the classroom and their place
in an individual’s career. Prerequisite: Junior or senior status. LEC.

PSYC 492. Psychology and Social Issues. 3 Hours S.
A study of psychological aspects of selected social issues in
contemporary American society. Race relations and the civil rights
movement. Political extremism. Public opinion and social change. Social
psychological approaches to a variety of social problems. Prerequisite: PSYC 360 or 361, or consent of instructor. LEC.

**PSYC 499. Conceptual Issues in Psychology. 3 Hours S.**

This course examines classic issues in psychology—free-will and determinism, nature and nurture, the mind-body problem, approaches to human action, cultural influences on psychological theories, the evolution of intellectual paradigms, and inductive and deductive approaches to social scientific research—from multiple perspectives within psychology and related social sciences. Prerequisite: PSYC 104 or equivalent. LEC.

**PSYC 500. Intermediate Statistics in Psychological Research. 3 Hours U.**

A second course in statistics with emphasis on applications. Analysis of variance, regression, analysis, analysis of contingency tables; possibly selected further topics. Prerequisite: Grade of B- or better in PSYC 210 or PSYC 211. LEC.

**PSYC 502. Human Sexuality. 3 Hours S.**

An introduction to the field of human sexuality. Topics to be covered include sexual anatomy and physiology, fertilization, pregnancy, birth and lactation, contraception, human sexual response, sexuality across the life cycle, love, marriage, alternatives to marriage, sexual orientation, sex differences in behavior, parenthood, sexually transmitted diseases, sex and the law, and sex education. (Same as WGSS 502.) Prerequisite: Any previous coursework in either WGSS or PSYC. LEC.

**PSYC 513. Behavioral Economics. 3 Hours.**

Decisions link our thoughts to our actions and as a result define who we are and who people think we are. This makes decision making a fundamental life skill. But, can we make better decisions? This course will introduce you to the science of decision making that has developed as scholars including biologists, economists, mathematicians, philosophers, psychologists, and others have sought to answer this very question.

Over the course of the semester we will examine what we have learned so far such as how people predict and mispredict events, how people make decisions and how their decisions can be quite irrational from one perspective but simultaneously appear quite reasonable, how people bargain and why they sometimes choose to cooperate and other times not, and why negotiating can be so difficult. (Same as ECON 513.) Prerequisite: PSYC 104 or ECON 142; MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. LEC.

**PSYC 518. Human Memory. 3 Hours S.**

In-depth coverage of human memory phenomena, including phenomena concerning acquisition, storage and retrieval, unconscious forms of memory, memory monitoring and control, and practical aspects of memory such as autobiographical memory, mnemonic techniques and eyewitness memory. Prerequisite: PSYC 104. LEC.

**PSYC 520. Memory and Eyewitness Testimony in Children. 3 Hours S.**

A review of the literature on the development of memory in young children, and the implications of this research for understanding children's eyewitness testimony. The course will present current research on children's long-term memory abilities, the impact of stress on recall performance, the effectiveness of various types of interviewing techniques, and the suggestibility of children's recollections. Policy issues and potential guidelines for the elicitation and evaluation of children's memory reports in both clinical and legal arenas will be discussed. Prerequisite: PSYC 104 or ABSC/HDFL 160, or consent of instructor. LEC.

**PSYC 521. Women and Violence. 3 Hours S.**

An examination of research on women and violence, including rape, domestic violence, sexual harassment, stalking, and child sexual abuse. The nature, prevalence, causes, and consequences of violence against women are discussed. (Same as WGSS 521.) Prerequisite: PSYC 104. LEC.

**PSYC 533. The Psychology of Addictive Behaviors. 3 Hours S.**

This course provides a comprehensive review of psychological theories and interventions for addressing addictive behaviors. Emphasis is placed on clinical processes. Prominent models are presented for conceptualizing addictive behaviors, along with clinical treatments based on these models. Specific topics covered include: screening for and diagnosing addictive behaviors, brief psychological interventions, understanding addiction as a syndrome, stages of change, empirically-supported treatments, evidence-based practice, relapse prevention, harm reduction, addressing common co-existing disorders, and community services. This course is not open to students with credit in PSYC 823. Prerequisite: PSYC 104. LEC.

**PSYC 535. Developmental Psychopathology. 3 Hours S.**

A review of the literature on contemporary psychological and developmental disorders of children and youth. Course will present current models of psychopathology, classification systems, assessment methods, and treatment approaches designed for the individual, the family, and the community. Specific attention will be given to age, gender, and cultural differences and similarities. Topics include: anxiety disorders, oppositional behavior disorders, physical/sexual abuse, learning disabilities, and autism. (Same as ABSC 535.) Prerequisite: ABSC 160, PSYC 333, or consent of instructor. LEC.

**PSYC 545. Culture and Psychology. 3 Hours S.**

The course considers the relationship between culture and psyche. One theme throughout the course involves revealing the cultural grounding of psychological functioning. The second and complementary theme involves identifying the psychological processes involved in the phenomenon of culture. Prerequisite: PSYC 333, 334, 360 or 361 or consent of instructor. LEC.

**PSYC 555. Evolutionary Psychology. 3 Hours S.**

A review of evolutionary theory and its application to human personality, cognition, interpersonal relationships, family dynamics, and development. Prerequisite: PSYC 104 and at least 3 additional hours in Psychology, or consent of instructor. LEC.

**PSYC 565. Applied Developmental Psychology. 3 Hours S.**

An advanced study of the application of theories and concepts of developmental and behavioral psychology to a range of specific issues and problems of childhood and adolescence. This course will rely heavily upon the empirical research literature. Topics include contemporary social issues and child development, research in applied settings, assessment, intervention, and prevention, as well as program evaluation. (Same as ABSC 565.) Prerequisite: ABSC 160 or PSYC 333, and ABSC/PSYC 535. LEC.

**PSYC 566. Psychology and the Law. 3 Hours S.**

An application of psychological processes and concepts to the American legal system. Among the topics covered are the socialization of legal attitudes, opinions about the purposes of the criminal justice system and especially of prisons, the concept of “dangerousness,” the nature of jury decision making, and the rights of prisoners, patients, and children. LEC.

**PSYC 570. Group Dynamics. 3 Hours S.**

A study of the processes underlying the dynamics of the group, including the observation of group phenomena and a consideration of their relation to research findings. Prerequisite: PSYC 360 or 361, or consent of instructor. LEC.
PSYC 572. Psychology and International Conflict. 3 Hours S.
A study of psychological approaches to analysis and intervention in the field of international conflict and peace-making. Focus on major contributions and important paradigms for explanation and action. Prerequisite: PSYC 360 or consent of instructor. Background study in international relations or recent world history desirable. LEC.

PSYC 578. Social Attitudes. 3 Hours S.
An introduction to the study of attitudes focusing on problems of measurement and on empirical findings and theories of attitude acquisition and change. Prerequisite: PSYC 360, 361, or consent of instructor. LEC.

PSYC 580. Research Lab. 1-5 Hours S.
Supervised research under the guidance of a faculty member in the Department of Psychology. Students will be part of a collaborative laboratory environment, and will be involved in research design, data collection, and data analysis, and will take part in regularly scheduled laboratory meetings. Prerequisite: Permission of instructor. LEC.

PSYC 590. Nonverbal Communication. 3 Hours S.
Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems. (Same as COMS 590.) Prerequisite: COMS 356 or PSYC 210 or PSYC 211. LEC.

PSYC 592. Psychological Significance of Physical Illness and Disability. 3 Hours S.
A lecture course to help students become more aware of and responsive to the psychological needs of persons with physical illnesses or disabilities. Emphasis is upon the meanings of such conditions in individuals' lives and the effects of treatment and rehabilitation settings on psychological adaptation. Prerequisite: PSYC 104. LEC.

PSYC 595. Eating and Weight Disorders. 3 Hours S.
This course is an intensive seminar in which students will critically examine up-to-date research and theoretical models on eating and weight disorders. Content will include diagnosis and assessment, as well as psychological, social, cognitive, biological, and "addiction" model influences/perspectives. Students will gain exposure to literature on treatment and prevention of eating disorders and obesity. Class will include critical discussion, brief lecture, and active-learning strategies to facilitate learning during class. Students will also participate in group work. Prerequisite: PSYC 350 or instructor permission. LEC.

PSYC 598. Positive Psychology. 3 Hours S.
An introduction to the core assumptions and research findings associated with human strengths and positive emotions. Also an exploration of interventions and applications informed by positive psychology in counseling and psychotherapy, and its application to school, work, family and other close relationships. (Same as EPSY 580.) Prerequisite: PSYC 104 or consent of instructor. LEC.

PSYC 605. Health Psychology. 3 Hours S.
Review of research and theory concerning the role of psychological factors in the development of physical illness and the contribution of psychologists to the treatment and prevention of physical illness. Prerequisite: PSYC 104. LEC.

PSYC 610. Advanced Personality. 3 Hours S.
A survey of selected topics in the area of personality (e.g., defense mechanisms, aggression, interpersonal relations). Prerequisite: PSYC 320 or consent of instructor. LEC.

PSYC 613. History and Systems in Psychology. 3 Hours S.
A survey of the historical development of modern theoretical systems in psychology. Prerequisite: PSYC 104, plus twelve hours in psychology. LEC.

PSYC 618. Experimental Psychology: Human Learning. 6 Hours AE61 / S.
Lectures and laboratory research on human information processing as related to theories of word recognition, reading, and language comprehension. Major emphasis on experimental design, data analysis, interpretation, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

PSYC 620. Experimental Psychology: Sensation, Perception, and Cognition. 6 Hours AE61 / S.
Lectures and laboratory work on human sensory processes and how they result in perceptions of the environment. Experience is provided in designing and implementing research as well as in the skills necessary for statistical analysis, interpretation of data, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

PSYC 622. Experimental Psychology: Social Behavior. 6 Hours AE61 / S.
Lectures, laboratory and field work on various issues in research in social psychology (e.g., conformity, attitude change, social processes). Two two-hour periods a week and appointment for research. Prerequisite: PSYC 104, PSYC 360, and PSYC 210 or PSYC 211 or consent of instructor. LEC.

PSYC 624. Experimental Psychology: Clinical Psychology. 6 Hours AE61 / S.
Lectures and laboratory research on contemporary issues in clinical psychology. Emphasis on experimental design, data analysis, interpretation of data, and scientific writing. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

PSYC 625. Experimental Psychology: Methods in Psychophysiology and Neuroscience. 6 Hours AE61 / S.
Lectures and laboratory work on psychophysiology and neuropsychology research methods. Overview of psychophysiological tools to measure the central and peripheral nervous systems. Experience designing and implementing neuropsychology and psychophysiology research. Prerequisite: PSYC 104 and PSYC 210 or PSYC 211 or consent of instructor. LEC.

PSYC 626. Psychology of Adolescence. 3 Hours S.
Impact of factors of social environment and physical growth upon psychological development from puberty to young adulthood. (Same as ABSC 626.) Prerequisite: PSYC 104, PSYC 333, or HDFL/ABSC 160. LEC.

PSYC 630. Clinical Psychology. 3 Hours S.
The historical and empirical foundations of clinical psychology. Significant trends in theory, research, and social organization which have shaped clinical practice. A review of clinical practice. Prerequisite: PSYC 104. LEC.

PSYC 632. Advanced Child Behavior and Development. 3 Hours S.
An advanced course in child development that includes a survey of the field's principles and theoretical approaches, and current issues in research and practice. Topics will include: prenatal development, cognition and language, social-emotional development, socialization influences in childhood, developmental psychopathology, and social policies. (Same as ABSC 632.) Prerequisite: ABSC/HDFL 160, PSYC 333, or instructor permission, and senior or graduate status. LEC.
PSYC 644. Behavioral Pharmacology. 3 Hours S.
Addresses psychological and behavioral effects of drugs, including psychotropic medications. A central theme is that effects of drugs frequently cannot be characterized solely from a pharmacological perspective. Thus, emphasis is placed on examining the interaction of pharmacological and behavioral variables. For example, how do psychological factors moderate responses to drugs? The nature of this area assumes some knowledge of general psychology, research methods, biology, chemistry, neurophysiology, and the nervous system. Prerequisite: PSYC 104 or consent of instructor. LEC.

PSYC 650. Statistical Methods in Behavioral and Social Science Research I. 4 Hours S.
Elementary distribution theory; t-test; simple regression and correlation; multiple regression and multiple correlation; curvilinear regression; logistic regression; general linear model. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 790 will have different course requirements. Prerequisite: A grade of B- or better in a beginning course in statistics (e.g., PSYC 210 or PSYC 211, MATH 365, POLS 306, COMS 356, SOC 380, or equivalent) is recommended, or consent of instructor. LEC.

PSYC 651. Anova and Other Factorial Designs. 4 Hours S.
Course covers one-way analysis of variance, linear trends, contrasts, post hoc tests; multi-way analysis of variance for crossed, blocked, nested, and incomplete designs; analysis of covariance; repeated measures analysis of variance; general linear model. Applications across the social, educational, and behavior sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 791 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 657. Drugs and Behavior. 3 Hours S.
A survey of the methods used to study the effects of drugs on behavior, and of the effect of selected drugs on behavior, particularly the narcotics, hallucinogens, and drugs used in the treatment of mental illness. Prerequisite: PSYC 104. LEC.

PSYC 659. Applied Nonparametric Statistical Methods. 4 Hours S.
This course covers nonparametric statistical methods for testing hypotheses. Topics include a review of parametric statistics, sampling distributions, hypothesis testing, and motivations for using nonparametric techniques. In-depth coverage is given to distribution-free procedures, goodness-of-fit tests, resampling methods, and theory underlying nonparametric methods. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 879 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 687. Factor Analysis. 4 Hours S.
This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 887 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 689. Conceptual Issues in Human Sexuality. 3 Hours S.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinence-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 689.) Prerequisite: Any previously completed course in PSYC or WGSS. LEC.

PSYC 690. Seminar: _____ . 1-5 Hours U.
Discussion of current problems in psychological theory and research. Prerequisite: PSYC 104 and sophomore status. LEC.

PSYC 691. The Psychology of Aging. 3 Hours S.
Social, psychological, and economic adjustments required by aging; changes in cognition, role and personality necessitated by advancing age. Not open to students with credit in PSYC 390. Prerequisite: PSYC 104 or consent of instructor. LEC.

PSYC 692. Test Theory. 4 Hours S.
This course begins with recommendations for how to write a test, covers basics of classical test theory, and then emphasizes modern statistical methods for analyzing item data. Methods include factor analysis of categorical responses, methods for identifying measurement invariance (differential item functioning), and item response theory. Approximately one-half of the meetings are labs (primarily consisting of data analysis). The course is offered at the 600 and 800 levels with additional assignments at the 800 level. Prerequisite: PSYC 790/650 or equivalent, or consent of the instructor. LEC.

PSYC 693. Multivariate Analysis. 4 Hours S.
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 893 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 694. Multilevel Modeling I. 4 Hours S.
Introduction to statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. Emphasis will be on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 894 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 695. Categorical Data Analysis. 4 Hours S.
Introduction to multivariate analyses of count data, including error models, statistical inference, loglinear models, logit models, logistic regression, homogeneity, symmetry, and selected other topics. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC
PSYC 995. Open to advanced undergraduates with consent.

PSYC 696. Structural Equation Modeling I. 4 Hours S.
Introduction to statistical methods for modeling latent variables. Topics include a review of latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, and hierarchical CFA. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Students taking this course as PSYC 996 will have different course requirements. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 697. Longitudinal Data Analysis. 3 Hours S.
Reviews and contrasts various statistical models for the analysis of change. Course focuses on techniques to analyze longitudinal (repeated measures) data beyond the repeated-measures ANOVA framework. Applications across the behavioral and social sciences are emphasized. Students taking this course as PSYC 997 will have different course requirements. Prerequisite: PSYC 696 or equivalent, or consent of instructor. LEC.

PSYC 698. Bayesian Data Analysis. 3 Hours.
This course will provide a tutorial introduction to doing Bayesian data analysis. The course is intended to make advanced Bayesian methods accessible to all students in the behavioral and social sciences. During the course we will cover the fundamental of Bayesian methods and work from the simplest model up through hierarchical or multilevel models for all types of data from binary to continuous to count data. By the end of the course each student should be able to carry out their own Bayesian data analysis for nearly any question they might ask in the social and behavioral sciences. Open only to undergraduate students. Not open to students with credit in PSYC 797. Prerequisite: PSYC 650 or equivalent, or consent of instructor. LEC.

PSYC 704. Research Practicum in Clinical Child Psychology. 3 Hours.
This course provides students in the Clinical Child Psychology Program with the opportunity to enhance and consolidate their research activities by fulfilling one of the elective cluster course requirements. This practicum involves a contract with a research advisor and the program director. The contract includes definable products and dates for completion to prepare research for submission for publication, develop a grant proposal, or conduct additional research project independent of other requirements in the program. The course is not to be taken as an overload, but is to be part of a full-time course schedule. May be repeated. (Same as ABSC 704, formerly HDFL 704.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. LEC.

PSYC 706. Special Topics in Clinical Child Psychology: ______. 3 Hours.
A course offering detailed discussion of the literature and research methods of a special topic within clinical child and pediatric psychology. Topic and instructor may change by semester and will be announced in the Schedule of Classes. May be repeated. (Same as ABSC 706, formerly HDFL 706.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. LEC.

PSYC 710. Feminist Issues in Psychology. 3 Hours.
Detailed examination and discussion of psychological theory and research from a feminist perspective. Specific topics will vary. The goal of the course is to facilitate students' ability to develop feminist critiques of existing research and theory as well as to generate nonsexist alternative approaches. Open to advanced undergraduates with consent of instructor. Prerequisite: Some familiarity with research methods in the social sciences. LEC.

PSYC 723. Advanced Cognitive Psychology. 3 Hours.
Advanced cognitive psychology reviewing theories of pattern recognition, attention, working memory, language comprehension and problem solving. Emphasis will be placed upon the application of these theories to real-life situations. Prerequisite: PSYC 104 and six additional credit hours in psychology, or permission of the instructor. LEC.

PSYC 725. Cognitive Neuroscience. 3 Hours.
A survey of the critical issues within cognitive and behavioral neuroscience. The course will provide information about neuronal physiology, functional neuroanatomy, and psychophysiological research methods. Human cognition and the neurophysiology that subserves the primary cognitive functions will be discussed. LEC.

PSYC 735. Psycholinguistics I. 3 Hours.
A detailed examination of issues in the processing of language. The course will provide a survey of research and theory in psycholinguistics, reflecting the influence of linguistic theory and experimental psychology. Spoken and written language comprehension and language production processing will be examined. (Same as LING 735.) LEC.

PSYC 737. Psycholinguistics II. 3 Hours.
An in-depth examination of selected topics in psycholinguistics. Topics may include spoken language processing, written language processing, neurolinguistics, prosody, and syntactic processing. (Same as LING 737.) Prerequisite: PSYC 735/LING 735 or consent of instructor. LEC.

PSYC 750. Advanced Seminar in Gender Identity and Sexual Orientation. 3 Hours.
Design and execution of research on the causes and consequences of variations in gender identity, sexual orientation or affectional preference, sex roles, and sex-linked behaviors. Prerequisite: Consent of instructor. LEC.

PSYC 757. Theories of Perception. 3 Hours.
A consideration of the facts and theories of human perception. The emphasis will be on vision, although hearing, smell, pain, and other senses will also be discussed. Of particular concern is the question of perceptual modifiability and the response of the human observer to unusual sensory environments. Prerequisite: PSYC 104. LEC.

PSYC 774. Advanced Social Psychology I. 3 Hours.
First semester of a two-semester course. Designed to provide a thorough background in social psychology and to motivate a continuing exploration of theoretical problems and issues in the field. Combines examination of historical development of theories and methods in social psychology with analysis of theoretical and methodological approaches to a variety of contemporary topics. LEC.

PSYC 777. Social Psychology: Theory, Research, and Clinical Applications. 3 Hours.
A continuation of PSYC 774. LEC.

PSYC 780. Research Lab. 1-5 Hours S.
Supervised research under the guidance of a faculty member in the Department of Psychology. Students will be part of a collaborative laboratory environment, and will be involved in research design, data
collection, and data analysis, and will take part in regularly scheduled laboratory meetings. Prerequisite: Permission of instructor. LEC.

PSYC 782. Research Methods in Child Language. 3 Hours.
A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as CLDP 782 and LING 782.) LEC.

PSYC 787. Multidisciplinary Perspectives on Gerontology and Aging. 3 Hours.
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 767, COMS 787, and SOC 767.) LEC.

A course emphasizing the practical application of inferential statistics to a variety of research designs and outcome variables. Topics will include both parametric and nonparametric statistical procedures, and various applications of both ANOVA and multiple regressions. Prerequisite: Graduate standing in the Department of Psychology or consent of instructor. LEC.

PSYC 790. Statistical Methods in Psychology I. 4 Hours.
Elementary distribution theory; t-test; simple regression and correlation; multiple regression and multiple correlation; curvilinear regression; logistic regression; general linear model. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: A beginning course in statistics and graduate standing, or consent of instructor. LEC.

PSYC 791. Statistical Methods in Psychology II. 4 Hours.
Continuation of PSYC 790. One-way analysis of variance, linear trends, contrasts, post hoc tests; multi-way analysis of variance for crossed, blocked, nested, and incomplete designs; analysis of covariance; repeated measures analysis of variance; general linear model. Applications across the social, educational, and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 795. Computing and Psychology. 3 Hours.
Introduction to the use of personal computers to facilitate and standardize administration of research protocols and to automate data collection. Lectures and projects emphasize direct application to research in the behavioral sciences. Prerequisite: Graduate standing in the Department of Psychology and consent of instructor. LEC.

PSYC 796. Computer Models of Brain and Behavior. 3 Hours.
An introduction to the techniques of computer modeling with applications in the study of brain-behavior mechanisms. Early and contemporary efforts to simulate the neuron, neural networks, and neural processes which regulate behavior, are reviewed. Application of modeling techniques in sample brain-behavior problem areas are used to illustrate the operation of thresholds, feedback, dynamic equilibrium, redundancy, plasticity, network structure, and similar constructs. Programming skill in a high-level language available on personal computers or mainframe is required. Prerequisite: EECS 128 or EECS 138 or PSYC 795, and PSYC 370, or equivalent courses or experience. LEC.

PSYC 797. Bayesian Data Analysis. 3 Hours.
This course will provide a tutorial introduction to doing Bayesian data analysis. The course is intended to make advanced Bayesian methods accessible to all students in the behavioral and social sciences. During the course we will cover the fundamental of Bayesian methods and work from the simplest model up through hierarchical or multilevel models for all types of data from binary to continuous to count data. By the end of the course each student should be able to carry out their own Bayesian data analysis for nearly any question they might ask in the social and behavioral sciences. Not open to students with credit in PSYC 698. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 798. Introduction to Mathematical Methods in Psychology. 3 Hours.
A first course in scaling and modeling psychological processes. Substantive areas treated selected from sensation, perception, learning, memory, preference, choice and decision processes, problem solving, games, social interaction, and individual differences. May be repeated with permission. Prerequisite: Previous course work beyond the introductory level in psychology or a closely related area, a course in statistics, and a course in calculus. LEC.

PSYC 799. Proseminar in Child Language. 2 Hours.
A review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, CLDP 799, LING 799, and SPLH 799.) (Formerly HDFL 797.) SEM.

PSYC 800. Experimental Psychology: ______. 3 Hours.
An advanced survey of theory and research in a selected area of experimental psychology. Continual enrollment for four semesters is required of entering graduate students in experimental psychology. Open to other students with graduate standing in psychology or a closely related field. May be repeated with permission. LEC.

PSYC 802. Social-Psychological Aspects of Health, Disability, and Associated Life Stress. 3 Hours.
Disabling myths; perception of causes and effects of disease and disability; attitudes and interpersonal relations; hoping, coping, and reality issues; values; professional-client relations; public media and societal rehabilitation. A departmental core course for graduate students. LEC.

PSYC 803. Fundamentals of Psychological Assessment and Intervention with Children. 3 Hours.
Lecture and supervised experience covering the theoretical and empirical literature on assessment and intervention methods for children, adolescents, and families. Students will learn and demonstrate evidence-based clinical interviewing skills, behavioral observation techniques, risk assessment techniques, therapeutic communication approaches, strategies for providing assessment feedback to families, and ethical principles related to the provision of assessment and psychotherapy (including client file and resource management.) The course requires interaction with clinical populations and communication with referral sources. (Same as ABSC 803.) Prerequisite: Graduate student in clinical child psychology program. LEC.

PSYC 805. History of Psychology. 3 Hours.
A historical survey of basic concepts and theories in psychology with emphasis on their relationship to contemporary problems in theory. LEC.

PSYC 809. Professional Issues: Clinical Child Psychology. 1 Hour.
Consideration of special problems confronting the child and family oriented scientist-practitioner, and in the development of a professional identity. Topics include critical issues including ethical, legal, cultural, empirical, and clinical aspects of research and practice. May be repeated.
PSYC 810. History and Ethics in Psychology. 3 Hours.
A historical survey of basic concepts and theories in psychology with
emphasis on their relationship to contemporary issues. Examination
of historical and contemporary code of ethics and its application to the
conduct of clinical psychologists. SEM.

PSYC 811. Achievement and Intellectual Assessment in Clinical
Child Psychology. 3 Hours.
Course covers the basic theory, research, administration, and reporting of
psychological assessment of development, intelligence, and achievement
for children, adolescents, and adults within cultural and developmental
contexts. The range of psychological instruments examined includes, for
example, WIAT, K-ABC, W-J, S-B, WISC, WAIS, and WPPSI. (Same as
ABSC 811.) Prerequisite: Graduate student in clinical child psychology.
LEC.

PSYC 812. Behavioral and Personality Assessment of Children. 3
Hours.
Lecture, laboratory, field work, and supervision appointment. Theory and
applications in the psychological evaluation of children with standardized
assessment techniques. The administration, scoring, interpretation, and
reporting of behavioral and personality functioning in children. (Same as
ABSC 812, formerly HDFL 812.) Prerequisite: Graduate standing in
clinical child psychology. LEC.

PSYC 814. Advanced Child and Family Assessment. 3 Hours.
Lecture, laboratory, field work, and supervision appointment. Supervised
experience in specialized psychological assessment approaches
for children and families. Emphasis on interviewing, observation,
psychometric scales, and consultation. Rationale, administration,
analysis, and reporting of mental health functioning of children and
families. Experience with clinical populations, and communication with
referral sources. (Same as ABSC 814, formerly HDFL 814.) Prerequisite:
Graduate student in clinical child psychology. LEC.

PSYC 815. Design and Analysis for Developmental Research. 3
Hours.
Coverage of the philosophy and basic principles of group-design
research, with a special emphasis on designs that are appropriate
for developmental studies. Designs for both experimental and quasi-
experimental research are covered, and appropriate statistical procedures
are presented concomitantly with the designs. Individual-difference
analyses and statistical control issues are also addressed. LEC.

PSYC 816. Design and Analysis for Neuroimaging Research. 3
Hours.
Course covers research design and analysis issues for event-related
potential (ERP) and functional magnetic resonance imaging (fMRI)
studies. Repeated measures, statistical parametric mapping, principal
components analysis, and independent components analysis techniques
are covered. Both practical and theoretical aspects of these statistical
techniques will be explored in Matlab environment. Matrix algebra
recommended but not required. Prerequisite: PSYC 790 and 791 or
equivalent are required. LEC.

PSYC 818. Experimental Research Methods in Social Psychology. 3
Hours.
Systematic discussion of the techniques of research in social psychology,
with practice in the utilization of selected methods. Prerequisite: One
course in social psychology in addition to introductory social psychology.
LEC.

PSYC 819. Field and Evaluation Research Methods in Social
Psychology. 3 Hours.
Basic principles and practices of field methods in basic and applied
research in social psychology and related fields; relationships between
field and laboratory studies; special emphasis on survey and evaluation
research methods and study designs; client and respondent relationships;
research and public policy. LEC.

PSYC 820. Advanced Child Development. 3 Hours.
A survey of the basic empirical research in the field of child development,
covering intelligence, cognition, perception, attention, personality, social
behavior, and socialization processes. These literatures are integrated
and their implications for social application are addressed. Prerequisite: A
course in child development or equivalent. LEC.

PSYC 821. Women and Violence. 3 Hours.
An examination of research on women and violence, including rape,
domestic violence, sexual harassment, stalking, and child sexual abuse.
Research on the nature, prevalence, causes, and consequences of
violence against women is discussed. (Same as WGSS 821.)
Prerequisite: Six hours in WGSS and/or PSYC, or permission of
instructor. LEC.

PSYC 823. The Psychology of Addictive Behaviors. 3 Hours.
This course provides a comprehensive review of psychological theories
and interventions for addressing addictive behaviors. Emphasis is
placed on clinical processes. Prominent models are presented for
conceptualizing addictive behaviors, along with clinical treatments
based on these models. Specific topics covered include: screening for
diagnosing addictive behaviors, brief psychological interventions,
understanding addiction as a syndrome, stages of change, empirically-
supported treatments, evidence-based practice, relapse prevention, harm
reduction, addressing common co-existing disorders, and community
services. This course is not open to students with credit in PSYC 533.
Prerequisite: PSYC 104. LEC.

PSYC 825. Social Development. 3 Hours.
A lecture and discussion course in social development. It includes such
topics as theoretical approaches to the study of social development, as
well as the literature on family processes, peer relations, aggression and
prosocial behavior, child abuse and neglect, family violence, child care,
and the media. (Formerly PSYC 880.) (Same as ABSC 825.) Prerequisite:
A course in child psychology or development. LEC.

PSYC 831. Advanced Human Learning and Memory. 3 Hours.
An in-depth analysis of current research and theory. Focus will be on
experimental methodology in these areas. LEC.

PSYC 832. Clinical Health Psychology: Health Promotion and
Disease Prevention. 3 Hours.
An overview of the field of health psychology as applied to health
promotion and disease prevention. Content areas include history and
current research regarding behavioral and psychosocial risk factors for
disease, as well as empirically supported assessment and therapeutic
techniques for risk factor reduction and health promotion. Prerequisite:
Graduate student in psychology or health-related fields, or permission of
instructor. LEC.

PSYC 833. Clinical Health Psychology: Acute and Chronic Illness. 3
Hours.
An overview of the field of health psychology as applied to acute and
chronic illness in adult, adolescent, and child populations. Content
areas include psychological aspects of acute and chronic illness,
including relevant empirically supported assessment and intervention
strategies, adherence to medical regimens, pain, and enhancement of the
psychologist's role in medical settings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

**PSYC 834. Clinical Health Psychology: Physical Aspects of Health and Disease. 3 Hours.**
An overview of physical manifestations of health and disease. Content areas include overview of anatomy and physiology of each body system, description of how deviations form normal anatomical development and physiological function result in common disorders, methods for distinguishing psychological from organic etiologies, indications of side effects of medications for common disorders, and description of roles of key members of health care team members. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

**PSYC 835. Clinical Practicum IV: Health. 3 Hours.**
Supervised assessment and treatment of individuals and families within a medical setting, as well as multidisciplinary consultation. Inpatient and outpatient clinical health psychology rotations may include pediatrics, oncology, pain, rehabilitation, and other health psychology related fields. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 970 and graduate student in clinical health psychology specialty. FLD.

**PSYC 836. Clinical Practicum V: Health. 3 Hours.**
Continuation of PSYC 835. Prerequisite: Graduate student in clinical health psychology specialty. FLD.

**PSYC 838. Assessment and Management of Chronic Pain Across the Life Span. 3 Hours.**
Focuses on chronic pain affecting a person's life span from childhood to older adults. Topics include traditional versus modern biopsychosocial models along with treatments/measurements of chronic pain. In addition to medical and non-medical (mainly cognitive-behavioral) treatments for chronic pain. Also discussed will be experimental designs/determining significance in pain research and ethical/policy issues related therein. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

**PSYC 839. Palliative Care in Health Psychology. 3 Hours.**
Based on the biopsychosocial model, this course focuses on the current practice of palliative care in community and hospital settings by health care professionals. Classes will be discussion based, centered on current issues and controversies in care of the chronically ill and dying. Recent research will be highlighted, as will cultural perspectives on death. Students will be expected to identify applicable literature for presentation and class discussion, along with assigned readings. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

**PSYC 840. Psychology of Women's Health. 3 Hours.**
A seminar devoted to examination of psychosocial and behavioral factors in women's health. Content areas include women and the health care system, social roles and health, gender differences, and similarities in morbidity and mortality, gynecologic health, chronic diseases, and health-related behaviors. Prerequisite: Graduate student in psychology or health-related field, or by permission of instructor. LEC.

**PSYC 841. Stress and Coping. 3 Hours.**
Theories and research on conceptualization, assessment, and effects of stress. Focus on coping processes and other determinants of adjustment to stressful conditions. Discussion of psychological interventions for managing stress and trauma. Prerequisite: Graduate student in psychology or related fields. LEC.

**PSYC 842. Specialized Health Psychology Practicum. 1-3 Hours.**
Specialized advanced practicum in clinical health psychology, with an area of emphasis mutually defined by student and instructor. Prerequisite: Consent of instructor. FLD.

**PSYC 843. Behavioral Pharmacology. 3 Hours.**
Addresses psychological and behavioral effects of drugs, including psychotropic medications. A central theme is that effects of drugs frequently cannot be characterized solely from a pharmacological perspective. Thus, emphasis will be placed on examining the interaction of pharmacological and behavioral variables. For example, how do psychological factors moderate responses to drugs? The nature of this area assumes some knowledge of general psychology, research methods, biology, chemistry, neurophysiology, and the nervous system. Specific course structure will be modified to suit student interests. Prerequisite: Graduate student in psychology or health-related fields, or by permission of instructor. LEC.

**PSYC 844. Mental Health and Aging. 3 Hours.**
Reviews recent research and application in the field of mental health and aging. Theoretical perspectives appropriate for understanding mental health issues with increased age are discussed. The epidemiology, assessment, diagnosis, and treatment methods associated with a variety of mental health conditions are surveyed. The community mental health resources available for older adults are discussed as well as practically-related issues such as evaluations of functional independence and competency among older adults. Prerequisite: Graduate student in psychology or related health field, or permission of instructor. LEC.

**PSYC 845. Impression Formation and Interpersonal Behavior. 3 Hours.**
Intensive investigations of the processes involved in impression formation and of the effects of established impressions upon interpersonal communications. (Same as COMS 835.) Prerequisite: PSYC 670 or COMS 535. LEC.

**PSYC 846. Practicum in Clinical Child Psychology I. 1-3 Hours.**
Introductory practicum experience for the Clinical Child Psychology Program. Orientation to psychological evaluation and treatment of children, adolescents, and their families and initial development of professional self-assessment skills. Students acquire specific clinical competencies through shadowing cases, assisting with interpretation of test of intelligence and academic achievement, conducting behavioral observations in field settings, and performing co-therapy of cases presenting to the KU Child and Family Services Clinic. May be taken in more than one semester. (Same as ABSC 846.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

**PSYC 847. Practicum in Clinical Child Psychology II. 1-3 Hours.**
Intermediate practicum experience for the Clinical Child Psychology Program. Development of specific competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire specific clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic. Students develop ability to identify specific treatment goals and select therapeutic interventions that are conceptually congruent with clients’ presenting problems and are based on sound empirical evidence. Students also develop the ability to integrate and synthesize test results, interview material, and behavioral observations into coherent case conceptualizations. May be taken in more than one semester. (Same as ABSC 847.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.
PSYC 848. Clinical Practicum VI: Health. 3 Hours.
Intensive clinical psychology practice, including group and individual supervision that may be taken either through Clinical Psychology or an approved site outside of the university. Focus is on the acquisition and demonstration of advanced therapy skills with a focus on acquiring core Health Psychology competencies. Graded on a satisfactory/unsatisfactory basis. Prerequisite: PSYC 835 and PSYC 836 and graduate student in clinical health psychology specialty. FLD.

PSYC 849. Clinical Practicum VII: Health. 3 Hours.
Continuation of PSYC 848. Graded on a satisfactory/unsatisfactory basis. Prerequisite: PSYC 848 and graduate student in clinical health psychology specialty. FLD.

PSYC 850. Assessment I: Foundations of Psychological Assessment. 3 Hours.
Introduction to the history, methods and theory underlying psychological assessment techniques and methods. Students learn to administer, score, and interpret mental status exams and intelligence tests for children, adolescents and adults. Structured diagnostic assessments are introduced and practiced. Psychological report writing is introduced and practiced. The psychometric theory underlying the construction and validation of personality assessment instruments is reviewed. Prerequisite: Graduate student in clinical psychology or consent of instructor. FLD.

PSYC 853. Advanced Acoustical and Psychological Aspects of Musical Behavior. 3 Hours.
Study and experimental investigation of acoustic, psychoacoustic, and psychological phenomena as they influence music. Attention will be given to physical parameters; perception of pitch, loudness, and timbre; magnitude estimation; theories of consonance; experimental aesthetics; and measurement and prediction of musical ability. Each student will be expected to complete an experiment or quasi-experiment related to human musical behavior. (Same as MINT 953.) Prerequisite: PSYC 453 or equivalent; or consent of instructor. LEC.

PSYC 855. Assessment II: Integrative Psychological Assessment. 3 Hours.
Lecture, laboratory and field work. Students learn to administer, score and interpret various personality assessment instruments. Students apply skills acquired in previous coursework to write integrated psychological assessment reports based on anamnesis, structured interview data, intelligence tests, and both objective and projective personality assessment instruments. Prerequisite: PSYC 850 or consent of instructor. FLD.

PSYC 860. Affective Science. 3 Hours.
An in-depth analysis of current research and theory in affective bases of psychological science. Emphasis will be placed on basic research on emotion, culture, and psychopathology using a broad range of experimental, psychophysiological, and neural methods to test theories about affective psychological mechanisms underlying human behavior. Prerequisite: Graduate student in psychology or health-related fields. LEC.

PSYC 863. Clinical Neuropsychology Across the Lifespan. 3 Hours.
Reviews neural development and the brain-behavior relationships in intact, injured, and diseased brain systems. Details basic issues in clinical assessment and reporting of cognitive impairment resulting from developmental disorders, stroke, traumatic brain injury, and brain-disease. Selected topics include perception, speech, memory/dementia, judgment, and attention. Prerequisite: Graduate status and PSYC 961 or consent of instructor. LEC.

PSYC 864. Clinical Neuropsychology. 3 Hours.
Brain-behavior relationships in humans; structure and function of the brain; evaluation of function; the interpretation of neuropsychological data. Lecture and laboratory. LEC.

PSYC 865. Advanced Psychological Assessment: Interview Based Techniques. 3 Hours.
Lecture and fieldwork. Advanced clinical interviewing. Structured diagnostic interviewing. Coverage of specialized areas of clinical interviewing (e.g., motivational interviewing). Report writing focused on documentation of clinical and structured interviewing. Prerequisite: PSYC 855 or consent of instructor. FLD.

PSYC 870. Cognitive Development. 3 Hours.
A lecture/discussion course in cognitive development. The course will contrast the theory and research of Jean Piaget and his followers, with an information processing or cognitive psychology approach to issues. Topics include development of perception, attention and information getting; memory and metamemory; problem solving; discrimination learning and concept formation; and individual differences in cognitive styles and strategies. Prerequisite: A course in child psychology or development, a course in cognitive psychology, or consent of instructor. LEC.

PSYC 872. Attention, Perception, and Learning in Infancy. 3 Hours.
Coverage of the basic literatures on perceptual-cognitive behavior during the first three years of life, as assessed by measures of attention, perception, learning, and memory. Course material is approached from an information-processing framework. LEC.

PSYC 875. Advanced Assessment: Integration of Assessment Techniques. 3 Hours.
Lecture and fieldwork on selection, administration, scoring and interpretation and integration of data from personality and abilities tests. Focus on assessments includes history, theory and application in psychological assessment batteries. Emphasis on advanced training in objective personality assessment, projective personality assessment, psychometric theory and integrated report writing. Prerequisite: PSYC 855 or consent of instructor. FLD.

PSYC 879. Applied Nonparametric Statistical Methods. 4 Hours.
This course covers nonparametric statistical methods for testing hypotheses when the assumptions of ordinary parametric statistics are not met. Topics include a review of parametric statistics, sampling distributions, the logic of hypothesis testing, and motivations for using nonparametric techniques. In-depth coverage will be given to distribution-free procedures, sign tests, contingency tables, median tests, chi-square and other goodness-of-fit tests, rank correlations, randomness tests, Monte Carlo methods, resampling methods, tests of independence, 1-sample, 2-sample, and k-sample methods, permutation tests, and function smoothing and splines. There will be an emphasis on the theory underlying nonparametric methods. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 and 791 or equivalent, or consent of instructor. LEC.

PSYC 881. Proseminar in Quantitative Behavioral and Social Sciences. 1 Hour.
This course is an open forum discussion of issues, topics, and presentations in quantitative behavioral and social sciences. The course can be repeated for credit and is open to any graduate student in any discipline across the behavioral and social sciences. SEM.
PSYC 882. Theory and Method for Research of Human Environments. 3 Hours.
Conceptual and technical methods for analysis of behavioral environments; theory and research utilization of behavior settings and other ecobehavioral units. Prerequisite: Nine hours of social science including at least one course dealing with research methods and consent of instructor. LEC.

PSYC 885. Altruism and Helping Behavior. 3 Hours.
Review of contemporary research of prosocial behavior. Topics to be covered include the existence of altruism, why people do and do not help others, and the effect of institutional roles on the behavior of service professionals such as therapists, counselors, and social workers. LEC.

PSYC 886. Item Response Theory. 4 Hours.
This course covers the basic concepts and methods of item response models. Focal topics include the theory underlying IRT models and their general properties. Also covered are methods for checking model assumptions and interpreting IRT estimates. The course uses examples from the social and behavioral sciences to demonstrate how IRT methods can be used to inform and refine survey development, to assess measurement equivalence, link survey scores, and build item banks for short forms or computer-adaptive testing (CAT). Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 and 791 or equivalent, or consent of instructor. LEC.

PSYC 887. Factor Analysis. 4 Hours.
This course covers the theory behind, and application of, exploratory factor analysis. Topics include a review of multiple linear regression and matrix algebra. In-depth coverage is devoted to diagrams, model specification, goodness of fit, model selection, parameter estimation, rotation methods, scale development, and sample size and power issues. Extensions to confirmatory settings are elaborated. Both the theory underlying factor analytic techniques and hands-on application using software are emphasized. Applications across the social and behavioral sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 888. Diversity Issues in Clinical Psychology. 3 Hours.
Review of individual differences pertaining to culture, ethnicity, race, gender, sexual orientation, age, etc., as these have an impact upon theory, research, assessment, and treatment issues in clinical psychology. (Same as ABSC 888.) Prerequisite: Graduate status in clinical psychology, or instructor permission. LEC.

PSYC 889. Conceptual Issues in Human Sexuality. 3 Hours.
An examination of the social construction of sexuality and research methods and issues relevant to sexuality. These concepts are applied to various topics, such as defining and conceptualizing sex and gender, sexual dysfunction, sexual orientation, the social control of sexuality, sexual coercion and abuse, and abstinance-only sex education. The course does not cover anatomical or physiological aspects of sexuality. (Same as WGSS 889.) Prerequisite: Six hours in WGSS and/or PSYC, or permission of instructor. LEC.

PSYC 890. Foundations of the Mind. 3 Hours.
Advances in cognitive psychology have illuminated the way in which we understand mind and mental processes and have the power to affect how we conduct our lives as moral beings (e.g., Are human beings alone in the animal kingdom in possessing minds?). In this graduate course, we will cover key historical and social events that shaped the field; when and how cognitive psychology became a science; and future directions of studying the mind, especially in light of cognitive neuroscience. Students will analyze and critically evaluate cognitive psychological theory, empirical research, and practice in a historical context, as well as develop ideas, critiques, and conclusions of their own on the accomplishments and prospects of the science of cognitive psychology. Readings and discussion include an analysis of significant theoretical, historical, and empirical work of topics in cognitive psychology, as well as the cognitive and brain sciences more generally. LEC.

PSYC 891. Intelligence and Cognition. 3 Hours.
This course concerns the nature of intelligence. Theory and research on cognitive abilities, reasoning, and complex problem solving are surveyed. Special emphasis is given to contemporary cognitive ability research that applies both experimental and correlation methods to understand the nature of intelligence. LEC.

PSYC 892. Test Theory. 4 Hours.
This course begins with recommendations for how to write a test (with or without correct answers, for assessing a wide variety of constructs of interest in social and behavioral sciences), covers basics of classical test theory, and then emphasizes modern statistical methods for analyzing item data. Methods include factor analysis of categorical responses, methods for identifying measurement invariance (differential item functioning), and item response theory. Lectures and Laboratory. This course is offered at the 600 and 800 levels, with additional assignments at the 800 level. Prerequisite: PSYC 790/650 or equivalent, or consent of instructor. LEC.

PSYC 893. Multivariate Analysis. 4 Hours.
Introduction to the central methods used in the analysis of multivariate data. Includes linear transformations, multivariate analysis of variance, multivariate multiple regression, discriminant analysis, canonical correlation, factor analysis, and an introduction to methods for clustering and classification. Applications across the behavior and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 894. Multilevel Modeling. 4 Hours.
Statistical methods for modeling multilevel (hierarchically structured) data. Topics include a review of ordinary least squares regression analysis, random effects ANOVA, intraclass correlation, multilevel regression, testing and probing interactions, maximum likelihood estimation, model assumptions, model evaluation, and the analysis of longitudinal data. There will be a heavy emphasis on the theory underlying multilevel modeling techniques and hands-on application using software. Applications across the social, educational, and behavior sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 895. Categorical Data Analysis. 4 Hours.
Multivariate analyses of count data. Error models, statistical inference, loglinear models, logit models, logistic regression. Homogeneity, symmetry, and selected other topics. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

PSYC 896. Structural Equation Modeling 1. 4 Hours.
Introduction to statistical methods for modeling latent variables. Topics include a review latent variables, covariance structures analysis, mean structures analysis, confirmatory factor analysis (CFA), structural equation modeling (SEM), multiple group CFA, longitudinal CFA, longitudinal SEM, Hierarchical CFA, and Multi-trait Multi-Method SEM. Applications across the behavioral and social sciences are emphasized. Course consists of three hours of lecture and a required one-hour lab session where
computing applications are taught. Prerequisite: PSYC 790 or equivalent, or consent of instructor. LEC.

**PSYC 897. Master’s Thesis in Clinical Child Psychology. 1-10 Hours.**
Supervised research experience completing thesis leading to master’s degree. (Formerly HDFL/PSYC 897.) (Same as ABSC 897.) RSH.

**PSYC 898. Proseminar: Professional Issues in Clinical and Health Psychology. 1 Hour.**
Discussion of current theoretical, empirical, and applied issues in clinical and health psychology involving students, faculty, guest speakers. Prerequisite: Graduate student in clinical psychology. RSH.

**PSYC 899. Thesis. 1-10 Hours.**
Thesis hours. Graded on a satisfactory progress/limited progress/no progress basis. THE.

**PSYC 902. Proseminar in Experimental Psychology. 1 Hour.**
Seminar in experimental psychology to be conducted in rotation by the experimental psychologists on the staff and a monthly visiting experimental psychologist. LEC.

**PSYC 903. Proseminar in Social Psychology. 1 Hour.**
A series of research talks on topics relevant to social and personality psychology featuring different weekly speakers from inside and outside the university. Graded on a satisfactory/unsatisfactory basis. SEM.

**PSYC 905. Psychopathology in Children. 3 Hours.**
Diagnosis and treatment of psychological problems in childhood and adolescence. (Same as ABSC 905.) Preference given to graduate students in child clinical psychology, school psychology, and counseling psychology. Prerequisite: Fifteen hours of graduate credit in psychology or consent of instructor. LEC.

**PSYC 921. Seminar in Early Development. 3 Hours.**
A seminar devoted to factors affecting early human development with some attention to theoretical formulations and the relevant animal literature. LEC.

**PSYC 923. History and Systems of Developmental Psychology: Developmental Theory. 3 Hours.**
An intensive study of traditional and recent developmental theories with an emphasis upon the role of heredity, early stimulation, reinforcement, and modification as each affects the course of the development of children. LEC.

**PSYC 925. Seminar in Cognitive, Affective, and Social Bases of Psychology. 3 Hours.**
Integrative examination of foundations and contemporary issues in the cognitive, affective, and social bases of psychological science. Review of the historical development of psychological theories and research in cognitive, affective, and social aspects of behavior, and examination of recent developments and contemporary trends in these areas. Topics include mood, emotion, and emotion regulation, memory, attention, perception, decision-making, group relations, attributions, discrimination, and attitudes. Prerequisite: Graduate standing in clinical or counseling psychology, or consent of instructor. LEC.

**PSYC 927. Seminar in Psychobiology. 3 Hours.**
A detailed study of a specific research area dealing with the biological foundations of behavior. Each week articles will be assigned from the journal literature. LEC.

**PSYC 930. Research Seminar on Intimate Relationships. 3 Hours.**
Consideration of current psychological theory and research on adult intimate relationships: friendship, dating, committed relationships, dissolution of committed relationships. Students will be expected to be involved in on-going empirical research in the area. Prerequisite: Graduate level courses in research design and statistics. LEC.

**PSYC 933. Seminar: The Measurement of Attitudes. 3 Hours.**
An examination of the concept of attitude and the methods developed to assess the various aspects of attitudes. Prerequisite: PSYC 578 or consent of instructor. LEC.

**PSYC 935. Seminar in Group Dynamics. 3 Hours.**
Intensive examination of selected problems in the functioning of small groups. May be taken for two semesters. LEC.

**PSYC 936. Group Therapeutic Techniques. 3 Hours.**
LEC.

**PSYC 943. Advanced Practicum in Clinical Child Psychology III. 1-3 Hours.**
Advanced practicum experience for the Clinical Child Psychology Program. Development of advanced competencies in assessment and intervention with children, adolescents, and their families through didactics, field experience, and supervision. Students acquire advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., formal case presentation), and modeling of clinical competencies for junior students. Students will demonstrate the ability to implement empirically derived therapeutic interventions in consideration of individual differences, cultural values, and individual preferences. Students in external practicum sites will demonstrate an understanding of evidence-based models of consultation and provision of consultation to care providers in professional contexts. May be taken in more than one semester. (Same as ABSC 943.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

**PSYC 944. Advanced Practicum in Clinical Child Psychology IV. 1-3 Hours.**
Advanced practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies in assessment, intervention, and consultation with children, adolescents, and their families through didactics, field experience, and supervision in the semester(s) prior to required clinical internship. Students demonstrate advanced clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum (i.e., integrated case presentation), and modeling of clinical competencies for junior students. Course requirements include the development of portfolios for demonstration of clinical competencies and application to clinical internships. May be taken in more than one semester. (Same as ABSC 944.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

**PSYC 946. Theories and Methods of Psychotherapy. 3 Hours.**
Comparative examination and analysis of major theories and approaches to psychotherapeutic interventions, core principles of therapeutic change, scientific approaches to establishing treatment efficacy, current intervention issues. Prerequisite: Nine hours in graduate clinical psychology or consent of instructor. LEC.

**PSYC 947. Advanced Practicum in Clinical Child Psychology V. 1-5 Hours.**
Specialized practicum experience for the Clinical Child Psychology Program. Demonstration of advanced competencies related to supervision and consultation in clinical psychology. With faculty supervision, students will develop and demonstrate the ability to provide effective supervision to less advanced students in the program in selected cases appropriate to the service setting. Further development of advanced
clinical competencies through supervised provision of assessment and interventions for cases presenting to the KU Child and Family Services Clinic and/or approved external practicum sites, leadership of didactic components of practicum, and modeling of clinical competencies for junior students. May be taken in more than one semester. (Same as ABSC 947.) Prerequisite: Graduate standing in clinical child psychology and instructor permission. FLD.

**PSYC 949. Evidence Based Practice in Psychology. 3 Hours.**
This course provides an overview of theoretical and applied issues germane to evidence-based treatment in clinical psychology. The course will include an in-depth examination of several psychotherapy protocols which have been identified as empirically supported, with considerable attention accorded to implementation of techniques within the context of evidence-based practice. LEC.

**PSYC 950. Clinical Supervision and Consultation: Theory & Research. 1 Hour.**
Lecture, readings, and discussion of theory and research related to the practices of clinical supervision and consultation. Developmental and competency based approaches to supervision with exposure to other approaches. Professional issues, ethics, and multicultural aspects of supervision and consultation. Prerequisite: Previous or concurrent enrollment in PSYC 969 or consent of instructor. LEC.

**PSYC 951. Clinical Supervision Practicum. 1-3 Hours.**
Fieldwork in supervision under direction of instructor. Practice in supervision of clinical work, assessment, psychotherapy, and documentation. Prerequisite: Previous or concurrent enrollment in PSYC 950 and PSYC 969, or consent of instructor. FLD.

**PSYC 955. Close Relationships and Adult Attachment: Theory, Research, and Current Controversies. 3 Hours.**
Review of attachment theory literature and the research it has generated in clinical developmental, personality, and social psychology. The course will allow discussion of a wide range of issues including the evolution of behavioral systems that underlie close human relationships, the developmental roots of relational styles and affect-regulation processes, the role of mental representations in interpersonal behavior, and some of the attachment and close relationship processes involved in good and poor mental health. Prerequisite: Graduate standing or consent of instructor. LEC.

**PSYC 956. Social Neuroscience. 3 Hours.**
Acquaint students with the Social Neuroscience approach as well as recent findings using this approach. The course will focus on particular social phenomena and (a) evaluate the utility of current social neuroscience research examining these phenomena and (b) consider future experimental designs using the Social Neuroscience approach to further inform our understanding of each phenomenon. After being acquainted with foundational concepts, students will analyze findings in a number of core content domains (including emotions, emotion regulation, self, stereotyping, attitudes and beliefs, social decision making, cooperation, close relationships), focusing on neuroscience's contribution beyond traditional methods. Prerequisite: Graduate standing or consent of instructor. LEC.

**PSYC 960. Advanced Psychopathology. 3 Hours.**
Review of current nosology of adult psychopathological syndromes emphasizing development of diagnostic skills. Critical survey of recent research and theory related to the etiology, course, prognosis, and treatment of adult psychopathological conditions. Prerequisite: Graduate student status in clinical psychology, clinical child psychology, or counseling psychology. LEC.

**PSYC 961. Biological Foundations of Psychopathology. 3 Hours.**
A review of fundamental topics in the neurosciences and their relevance to selected psychopathological disorders. The fundamental topics are taken from genetics, neuroanatomy, neurophysiology, and neurochemistry. The disorders include schizophrenia, depression, anxiety disorders, Alzheimer's disease, Parkinson's disease, and Huntington's disease. Prerequisite: Graduate student in clinical psychology or consent of instructor. LEC.

**PSYC 962. Advanced Personality. 3 Hours.**
A survey of selected advanced topics in the area of personality. Includes review of theoretical and research issues in the area of personality. Prerequisite: Consent of instructor. LEC.

**PSYC 963. Clinical Child Psychology Internship. 1 Hour.**
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by qualified clinical child psychology faculty and field staff clinicians. Required of all clinical child psychology program students. An intensive guided experience in application of clinical child psychology theory, methods, and practices. Integrates scientific and clinical aspects of field. (Same as ABSC 963, formerly HDFL 963.) Prerequisite: Completion of Ph.D. comprehensive examinations and permission of clinical child psychology faculty. INT.

**PSYC 964. Clinical Practicum I. 3 Hours.**
Lecture, laboratory and field work, and supervision appointment. Psychological evaluation and treatment of individuals, couples, families, and groups; supervised, progressive experience in psychological treatment and in the clinical evaluation of intellectual, personality, and social functioning. Emphasis in selection of and training in psychological intervention strategies is on the use of empirically supported treatments where possible. Grading on Satisfactory/Fail basis. Prerequisite: Graduate student in clinical psychology program. FLD.

**PSYC 965. Clinical Practicum II. 3 Hours.**
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964 or permission of instructor. FLD.

**PSYC 966. Clinical Practicum III. 1-3 Hours.**
A continuation of PSYC 964. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 964 or permission of instructor. FLD.

**PSYC 967. Psychotherapy with Families. 3 Hours.**
Clinical approaches to marriage and family therapy. Intensive consideration of the theoretical positions, research findings, clinical methods, and technical problems in marriage and family therapy. Prerequisite: PSYC 946. LEC.

**PSYC 968. Research Methods in Clinical Psychology. 3 Hours.**
Systematic consideration of research methods in clinical psychology including identification of a research problem, selection of the research design and assessment strategies, and methods of evaluating the results. The principles, pitfalls, artifacts, biases, and sources of controversy in research in this area are also covered. Prerequisite: Graduate standing in clinical or counseling psychology. LEC.

**PSYC 969. Clinical Practicum IV. 3 Hours.**
Lecture, laboratory, field work, and supervision appointment. Advanced psychological treatment of the individual, couple, family, and group client; supervised, progressive experience in the clinical application of psychotherapeutic treatment methods with emphasis on the use of empirically supported interventions where possible. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 966 or consent of instructor. FLD.
PSYC 970. Clinical Practicum V. 3 Hours.
A continuation of PSYC 969. Grading on Satisfactory/Fail basis. Prerequisite: PSYC 969 or consent of instructor. FLD.

PSYC 974. Clinical Psychology Internship. 1-3 Hours.
Three consecutive enrollments, covering a minimum of eleven months of experience in an approved clinical psychology field setting; supervision by clinical psychology faculty and field staff clinical psychologists. Required of all clinical psychology program students. An intensive guided experience in the application of clinical psychology theory, methods, and practices. An emphasis upon the relationships between scientific and clinical functions. Integrations between research and clinical practice. Prerequisite: Completion of Ph.D. comprehensive examinations and consent of clinical psychology faculty. INT.

PSYC 975. Professional and Ethical Problems in Clinical Psychology. 3 Hours.
Interprofessional relationships, case security, legal aspects, ethical code of practice, clinic administration, and problems in the clinical practice of psychology. Issues involving ethics in research will also be explored. Prerequisite: Consent of instructor. LEC.

PSYC 976. Therapeutic Interventions with Children. 3 Hours.
Clinical approaches to the therapeutic treatment of children with special emphasis on research findings and laboratory (practicum) experience. A survey of relationship therapies, operant strategies, family approaches, parent education, and play therapy by the right therapist for a specific child with a particular problem. (Same as ABSC 976.) Prerequisite: Instructor permission. LEC.

PSYC 977. Specialized Clinical Practicum. 1-4 Hours.
Lecture; laboratory and field work, and supervision appointment. Specialized psychological services for the evaluation and/or treatment of the individual client or the group or the institution. Investigation of and experience in a special practicum area not covered in regular courses. Prerequisite: Students must consult with members of the clinical faculty and propose an acceptable project in advance of enrollment. FLD.

PSYC 980. Special Problems in Psychology. 1-5 Hours.
Investigation of a special research problem or directed reading in an area not covered in regular courses. Prerequisite: Consent of instructor. RSH.

PSYC 981. Teaching Psychology. 1 Hour.
Discussion of the problems and techniques of teaching psychology at the undergraduate level. A minimum of one credit of this course must be taken by all assistant instructors during the two semesters of the first year of their appointment in the department. Only three hours may count toward the Ph.D. degree. LEC.

PSYC 982. Issues in Scientific Conduct. 3 Hours.
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as CLDP 982 and SPLH 982.) SEM.

PSYC 983. Methods & Professional Issues in the Cognitive & Brain Sciences. 3 Hours.
Methodology, inferential problems, and professional issues in the cognitive and brain sciences. Prerequisite: PSYC 790 and PSYC 791 or consent of instructor. LEC.

PSYC 984. Missing Data Analysis. 3 Hours.
The primary goal of the course is to promote a solid understanding of the logic and implementation of modern missing data techniques. The following topics are included: missing data theory, traditional missing data techniques, maximum likelihood estimation, EM algorithm, multiple imputation, planned missing data designs, and techniques for missing not at random data. Students will learn how to implement the missing data techniques in SAS, Mplus, and R. Prerequisite: PSYC 790 and PSYC 896. LEC.

PSYC 986. Interprofessional and Integrated Behavioral Health Care. 3 Hours.
Overview of current interprofessional care models in primary care. Review integrated behavioral health care approaches to common mental health disorders and approach to lifestyle issues, such as smoking, exercise and poor sleep, and how they impact health. Learn how medical and behavioral health services come together within primary care at an interprofessional level to deliver health care. Review research emerging on integrated and interprofessional care models. Prerequisite: Graduate student in psychology, health related field, or permission of instructor. LEC.

PSYC 988. Modeling of Intraindividual Observations. 4 Hours.
Many statistical methods are apt for modeling cross-sectional data or growth processes. These methods are often not ideal for researchers collecting intensive intraindividual observations, such as those from diary studies, ecological momentary assessments, and physiological data, which often exhibit complex, nonlinear changes over time. This class examines methods for extracting information from intensive intraindividual observations. This class will survey methods and concepts from areas such as dynamical systems, chaos theory, time series analysis and differential equation modeling. Some prior experience with R or related language strongly encouraged. Some prior experience with R or related language strongly encouraged. Prerequisite: PSYC 790 or equivalent and a course in Structural Equation Modeling or Multilevel Modeling (Hierarchical Linear modeling, Mixed Models.) LEC.

PSYC 990. Methods for Clustering and Classification. 3 Hours.
Statistical methods for identifying classes, clusters, and taxa. Topics include k-means, discriminant analysis, hierarchical clustering algorithms, additive trees, neural network models for clustering, latent class models, finite mixture models, and models for skills/cognitive diagnosis. Applications across the social and behavior sciences are emphasized. Prerequisite: PSYC 790 and PSYC 791 or equivalent, or consent of instructor. LEC.

PSYC 991. Longitudinal Data Analysis. 3 Hours.
Reviews and contrasts various statistical methods for the analysis of change. Course focuses on various techniques to analyze longitudinal (repeated-measures) data beyond the repeated-measures ANOVA framework. Techniques covered include latent change scores, latent difference scores, individual-differences modeling of latent residual and change scores, intra-individual differences modeling (e.g., growth curve, mixed modeling) and growth mixture modeling. Applications across the behavioral and social sciences are emphasized. Prerequisite: PSYC 896 or equivalent, or consent of instructor. LEC.

PSYC 993. Seminar: ______. 1-5 Hours.
LEC.

PSYC 996. Structural Equation Modeling II. 3 Hours.
Continuation of PSYC 896. Advanced applications of modern methods for testing hypotheses on multivariate correlational data in the behavioral and social sciences. Topics include advanced confirmatory factor analysis, mediation and moderation among latent variables, latent growth curve modeling, and other latent variable mean and covariance structures analysis techniques. Applications across the behavioral and social
sciences are emphasized. Prerequisite: PSYC 896 or equivalent, or consent of instructor. LEC.

**PSYC 998. Doctoral Dissertation in Clinical Child Psychology. 1-10 Hours.**
Research experience making original contribution to literature in clinical child psychology. (Formerly HDFL/PSYC 998.) (Same as ABSC 998.) THE.

**PSYC 999. Dissertation. 1-12 Hours.**
Dissertation hours. Graded on a satisfactory progress/limited progress/no progress basis. THE.

## Bachelor of Arts and Bachelor of General Studies in Psychology

### Bachelor of Arts and Bachelor of General Studies in Psychology

See here for more information ([https://catalog.ku.edu/liberal-arts-sciences/#undergraduatetext](https://catalog.ku.edu/liberal-arts-sciences/#undergraduatetext)) on the difference between a BA and a BGS.

Psychology examines all aspects of human behavior: Why do people behave the way they do? What makes people happy or unhappy? What are the relationships between the mind and the brain? Majoring in psychology allows you to explore the behavior of people and how their minds work, and then apply that knowledge to the modern world.

Students have many reasons for wanting to major in psychology. Some are simply fond of observing the behavior of others around them, fascinated with the results of their observations and curious to learn why people behave as they do. Some plan to become psychologists themselves or to enter one of the many professions where a background in psychology can be useful -- such as, business, teaching, medicine, nursing, law, social work, the ministry, counseling, student services, child development, administration, or human resources.

Our department offers a wide variety of psychology courses (p. 3) from which to choose and additional experiences and opportunities are available beyond the classroom. There are many chances to engage in extracurricular enrichment, including Psi Chi ([http://psych.ku.edu/psi-chi](http://psych.ku.edu/psi-chi)), a research-focused Honors Program ([http://honors.ku.edu](http://honors.ku.edu)), research assistantships and volunteer opportunities in faculty labs ([http://psych.ku.edu/undergraduate-research](http://psych.ku.edu/undergraduate-research)).

Our scientific approach to understanding human behavior equips students with a solid foundation of analytical, research and interpersonal skills for careers in many fields with a human service emphasis.

Learn more about career paths available to psychology majors:
What are you going to do with that degree? ([http://benschmidt.org/jobs/](http://benschmidt.org/jobs/))

### Undergraduate Admission

#### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions ([http://admissions.ku.edu/](http://admissions.ku.edu/)) for application deadlines and specific admission requirements.

Visit the International Support Services ([http://www.iss.ku.edu/](http://www.iss.ku.edu/)) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions ([http://credittransfer.ku.edu/](http://credittransfer.ku.edu/)) website.

### Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

### Requirements for the B.A. or B.G.S. Major

#### B.A. or B.G.S. Major in Psychology

Full PDF 2021-2022 1877
PSYC 380  Clinical Neuroscience
PSYC 381  Clinical Neuroscience, Honors

**Diversity, Equity, and Ethical Behavior**
Majors must complete 3 hours. Choose one of the following:
- PSYC 485  Stereotyping and Prejudice Across Cultures
- PSYC 492  Psychology and Social Issues
- PSYC 545  Culture and Psychology
- PSYC 592  Psychological Significance of Physical Illness and Disability

**Psychology Required Electives**
Majors must complete 9 hours, at least 6 of these hours must be completed with courses numbered 300 or higher.

**Psychology Major Hours & Major GPA**
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 37 hours of major courses. Note: No more than 3 hours of PSYC 480, PSYC 481, or PSYC 483 may count toward the minimum hours required for the major. (No more than a 6-hour combination of these courses may be counted toward the major.)

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Psychology can be found here: Psychology (p. 1878), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Psychology can be found here: Psychology (p. 1879), or by using the left-side navigation.

**Departmental Honors**
Students may inquire about departmental honors as soon as they are admitted to the undergraduate major. The department website (http://psych.ku.edu/babgs-honors) has details. Participation usually begins in the senior year. A 3.5 grade-point average in psychology courses is required. Students follow individualized courses of study arranged through the director. Students who complete PSYC 460, individual research, and a paper under the direction of an instructor may graduate with departmental honors.

**BA in Psychology**
Below is a sample 4-year plan for students pursuing the BA in Psychology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
Elective or possible minor course 300+ (Total Hours) 3 Elective or possible minor course 300+ (Total Hours) 3
Elective or possible minor course 300+ (Total Hours) 3 Elective or possible minor course 300+ (Total Hours) 3

Total Hours 120-123

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3 An introductory course in Biology is required for the Biological Psychology course requirement in the major. Choose to take either BIOL 100 and BIOL 102, or BIOL 150 which will also fulfill the lab science requirement.

4 There are six core courses that must be taken for the PSYC major: PSYC 318/PSYC 319, PSYC 333/PSYC 334, PSYC 350/PSYC 351, PSYC 360/PSYC 361, one of the following: PSYC 370, PSYC 371, PSYC 375, PSYC 380, or PSYC 381 as well as one of the following: PSYC 465, PSYC 492, PSYC 545, or PSYC 592.

5 Both PSYC 200 and PSYC 210 are required for the major. Take whichever one has not already been taken.

6 LA&S 490: Internship Exploration is recommended for PSYC majors to fulfill Goal 6 Integration & Creativity. If LA&S 490 is not taken, be sure to choose another Goal 6 course, or approved experience, to fulfill the requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BGS in Psychology

Below is a sample 4-year plan for students pursuing the BGS in Psychology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120

1 An introductory course in Biology is required for the Biological Psychology course requirement in the major. Choose to take either BIOL 100 or BIOL 150.

2 Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

3 Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major or minor).
There are six core courses that must be taken for the PSYC major: PSYC 318/PSYC 319, PSYC 333/PSYC 334, PSYC 350/PSYC 351, PSYC 360/PSYC 361. Also, one of the following: PSYC 370, PSYC 371, PSYC 375, PSYC 380, or PSYC 381 as well as one of the following: PSYC 465, PSYC 492, PSYC 545, or PSYC 592.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Science in Behavioral Neuroscience

B.S. in Behavioral Neuroscience Overview

Behavioral Neuroscience is a new major in Psychology at the University of Kansas. The concentration in behavioral neuroscience is designed for students with a focused interest in the biological bases of behavior and thought. The concentration is well suited for students who are contemplating professional or mainly research careers in medicine, pharmacology, veterinarian medicine, animal science, neurology, neurobiology, and neuroscience. It is also suitable as a degree for those headed into other health-related fields or graduate school in other areas of psychology. As a behavioral neuroscience major, you will take courses in many different departments because, as you explore the neural basis of behavior and prepare to enter the neuroscience research field, you will need to acquire knowledge in the realms of chemistry, biology, psychology, statistics, and even computer science.

For additional information and advising for the BS Major please contact:

Dr. Michael Vitevitch
Director, BS Major in Behavioral Neuroscience
mvitevit@ku.edu

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

### Mathematics (14 hrs. minimum)
Satisfied by completing a total of 4 mathematics courses totaling at least 14 hours, of which at least 6 hours must be calculus or calculus based. The 8 hours of calculus can be satisfied by taking at least one calculus I course (MATH 115 or 125) and one calculus II course (MATH 116 or 126). The remaining four to six hours of mathematics can be satisfied by taking a minimum of two additional math courses at any level (excluding MATH 002).

<table>
<thead>
<tr>

<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EECS 138</td>
<td>Introduction to Computing: _____</td>
<td>3</td>
</tr>
</tbody>
</table>

The second 3 hours could either be a second semester of EECS 138 (focused on a second programming language) or be from an additional approved course that provides an opportunity to gain computing experience. This second course could be PSYC 480 or PSYC 481 if this Independent Study requires independent, original application of the student’s computing skills such as computer simulation of cognitive processes, or experience with computationally complex neuroscience techniques, such as brain imaging and mapping, or physiological data collection and analysis. (3)

Applied Research Experience (4 hours minimum). Satisfied by one of the following:
- PSYC 449 Laboratory/Field Work in Human Biology
- PSYC 460 Honors in Psychology
- PSYC 480 Independent Study
- PSYC 481 Research Practicum

Elective Courses in Psychology or Other Disciplines
Majors must complete 12 hours minimum (other electives may be accepted with permission of the B.S. director). Satisfied by:
- PSYC 390 The Psychology of Aging
- PSYC 418 Introduction to Cognitive Science or PSYC 311 Cognitive Psychology
- PSYC 482 Sensation and Perception
- PSYC 535 Developmental Psychopathology
- PSYC 555 Evolutionary Psychology
- PSYC 605 Health Psychology
- PSYC 630 Clinical Psychology
- PSYC 644 Behavioral Pharmacology
- PSYC 678 Drugs and Behavior
- LING 438 Neurolinguistics I

Behavioral Neuroscience Major Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 40 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by 28 hours of junior/senior level major coursework.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BS in Behavioral Neuroscience. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
Participation usually begins in the senior year. A 3.5 grade-point average is required. Students who complete Departmental Honors are admitted to the undergraduate major. The requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors. However, overlap of a KU Core course with a major or degree-specific requirement is not permitted. The same course cannot be used to fulfill more than one KU Core Goal.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level. The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

Students may inquire about departmental honors as soon as they are admitted to the undergraduate major. The department website (http://psych.ku.edu/bs-behavioral-neuroscience-honors/) has details. Participation usually begins in the senior year. A 3.5 grade-point average in psychology courses is required. Students follow individualized courses of study arranged through the director. Students who complete PSYC 460, individual research, and a paper under the direction of an instructor may graduate with departmental honors.

### Minor in Psychology

#### Why Minor in Psychology?

A Minor in Psychology will add a strong emphasis to any degree plan at the University of Kansas. Our courses offer real world and practical applications to enhance your major(s) of choice and demonstrate to graduate programs and employers that you bring a unique understanding of statistical and research methodology, critical analysis, and the complexities of human nature.

We invite you to explore our minor further by visiting our department site (http://psych.ku.edu/) and our advisors site. (https://psych.ku.edu/staff/) Students on the KU Edwards Campus in Overland Park should contact Ben Herron (bherron2@ku.edu).

### Declaring a Psychology Minor

To declare the Psychology minor, you will need to meet with your advisor.

### Requirements for the Minor

Students selecting this minor must complete each of the following:

<table>
<thead>
<tr>
<th>Course</th>

**Psychology Minor Remaining Electives**

The remaining elective courses may include any undergraduate courses offered by the Department of Psychology including: 9

- PSYC 480 | Independent Study |
- PSYC 481 | Research Practicum |
- PSYC 483 | Undergraduate Internship in Psychology |

A maximum of 3 hours of PSYC 480 or PSYC 481 or PSYC 483, or any combination of these 3 courses totaling 3 hours may count toward the minor.
Psychology Minor Hours & Minor GPA
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**
Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Minor in Social and Behavioral Sciences Methodology

**Minor in Social and Behavioral Sciences Methodology (SBSM)**
Are you interested in psychology but have a different academic path in mind? Would you like to enhance your current major for more attention in the workforce?

The Minor in Quantitative Behavioral and Social Sciences is a program that provides undergraduate students a broadened and coordinated platform for advanced training in research methodology and practical research experience.

Students electing to minor in SBSM are provided with an opportunity to receive advanced training in quantitative and qualitative methods as applied in the behavioral and social sciences. This Minor allows students to develop graduate-level expertise in applied statistical methods. Students who graduate with this Minor acquire skills that will significantly enhance their career opportunities in areas related to their primary major (e.g., sociology, political science, psychology, a foreign language).

We invite you to explore this unique minor further by visiting our department site (http://quantitative.ku.edu/minor-requirements/) and meeting with our advisors listed here (https://psych.ku.edu/staff/).

**Declaring a Psychology Minor**
To declare the Psychology minor, you will need to meet with your advisor.

**Requirements for the Social and Behavioral Sciences Methodology Minor**

**Social and Behavioral Science Methodology Minor Course Requirements**
Students selecting this minor must complete each of the following:

**Prerequisite Knowledge for Minor**
Satisfied by a course in elementary statistics with a B- or better grade (e.g., COMS 356; MATH 365, MATH 526; POLS 306; PSYC 210; PUAD 332; SOC 380). This prerequisite does not count towards the SBSM minor hours.

**Code** | **Title** | **Hours**
---|---|---
PSYC 650 | Statistical Methods in Behavioral and Social Science Research I. (or equivalent) | 4
PSYC 480 | Independent Study | 3
PSYC 481 | Research Practicum | 3
PSYC 651 | Anova and Other Factorial Designs | 3
PSYC 687 | Factor Analysis | 3
PSYC 692 | Test Theory | 3
PSYC 693 | Multivariate Analysis | 3
PSYC 694 | Multilevel Modeling I | 3
PSYC 695 | Categorical Data Analysis | 3
PSYC 696 | Structural Equation Modeling I | 3
PSYC 697 | Longitudinal Data Analysis | 3

**Social and Behavioral Methods Minor Hours & Minor GPA**
While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**
Satisfied by 18 hours of minor courses.

**Minor Junior/Senior (300+) Hours in Residence**
Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the minor.

**Minor Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).
study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in Mind and Brain

The Mind & Brain certificate provides students majoring in different programs with cross-disciplinary training in several ancillary fields that study various aspects of the mind and brain. The program requires two introductory courses from two different fields (LING, PHIL, PSYC), and two junior/senior level electives.

Requirements for the Undergraduate Certificate in Mind and Brain

12 credit hours, of which at least 6 must be taken at the junior/senior level.

Master of Arts in Psychology

Department of Psychology Master's Overview

Our department does not admit terminal master's students.

We offer a single doctoral degree in psychology which may be earned in one of the following programs: brain, behavior, and quantitative science (http://bbq.ku.edu/), clinical psychology (http://clinical.ku.edu/), and social psychology (http://social.ku.edu/). Please visit our department website (http://psych.ku.edu/) for more information on these programs. Students admitted to one of these programs enter with the expectation of continuing graduate study through the Ph.D.

All of our programs boast distinguished and award-winning faculty, notable research publications, and a deep foundation in the historical progress of psychological advances.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child graduate program, please visit their website (https://clichild.drupal.ku.edu/clinical-child-psychology-program/).

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The department does not admit students seeking the terminal master’s degree, as students enter the department with the expectation of earning the Ph.D. For further information regarding the application process for our program, including department-specific deadlines and required supplemental documentation, please visit the Admissions (http://psych.ku.edu/graduate-program/) page of the department website, or contact the department’s graduate academic advisor, Kirsten Hermreck, kahermreck@ku.edu.

M.A. Degree Requirements

Within 2 years of first enrollment in the Ph.D. program, the student must earn at least 30 graduate credit hours, no more than 6 of which may be in courses offered by other departments. Courses required for the M.A. degree are determined in consultation with the faculty of the program in which the student is enrolled as part of the process of development of an individualized program. No more than 6 thesis hours may be applied to the 30 hours required for the M.A. At least 50% of coursework for the master’s degree must be taken at the 700 level or above. The student must complete an acceptable thesis based on an empirical study and pass an oral examination. The oral examination may cover the thesis as well as more general material.
Doctor of Philosophy in Psychology

The Department of Psychology Graduate Program at the University of Kansas

We offer a single doctoral degree in Psychology which may be earned in one of the following programs: brain, behavior, and quantitative science, clinical psychology, and social psychology. Admission decisions are made separately within each program. Students admitted to one of these programs enter with the expectation of continuing graduate study through the Ph.D. as the department does not admit terminal master's students.

All of our programs boast distinguished and award-winning faculty, notable research publications, and a deep foundation in the historical progress of psychological advances.

Please visit our department website (http://psych.ku.edu/) for more information on these programs.

A separate clinical child psychology training program has been developed for doctoral students in an interdepartmental program with the Department of Applied Behavioral Science. For more information regarding the clinical child graduate program, please visit their website (https://cchild.drupal.ku.edu/clinical-child-psychology-program/).

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The department does not admit students seeking the terminal master’s degree, as students enter the department with the expectation of earning the Ph.D.

In addition to the general admissions requirements (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/?num1_1=) from the Office of Graduate Studies, applicants are required to have completed 15 credit hours in psychology or a closely related field, including a first course in statistics and a course in experimental psychology or psychological research methods.

Submit your graduate application online (https://gradapply.ku.edu/apply/). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admission (http://psych.ku.edu/graduate-program/) page of the department website, or contact the department's graduate academic advisor, Kirsten Hermreck, kahermreck@ku.edu.

Dual-title Ph.D. Program in Psychology and Gerontology

The dual-title degree enables students at KU to meet the challenge of undertaking graduate education in the emerging, interdisciplinary field of gerontology that is combined with training in established, traditional disciplines. Interested students apply and are admitted to the psychology Ph.D. program. After completing an M.A. in psychology, they may apply to undertake the dual-title option. The student’s diploma will carry the name of both fields.

This option is designed to appeal to students who are strong in a traditional discipline but also motivated to study across disciplinary lines. In the course of study, students can avail themselves of disciplinary depth and interdisciplinary breadth. More information can be found on the Gerontology Department (http://gerontology.ku.edu/degrees/) page or by contacting our graduate academic advisor, Kirsten Hermreck, kahermreck@ku.edu

Ph.D. Degree Requirements

Although graduate education is offered through separate programs, each student prepares an individualized plan of study in consultation with faculty members. These plans indicate how the student proposes to fulfill the requirements for the M.A. and Ph.D. degrees, including all general requirements and conditions.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Social Psychology

The social psychology program is an intensive research training experience seeking students who are committed to empirical, scholarly work. The major research interests of faculty members are stereotyping, prejudice, intergroup relations, person perception, close relationships, emotion and motivation, self and identity, culture.

In addition to course work, the central requirement of the program is continuous involvement in research. Research opportunities range from laboratory experimentation to field research. Depending on backgrounds and goals, students may move from one research setting to another or concentrate on a particular type of research throughout their training.

Requirements

Students are guided by individually tailored plans called contracts. These describe sequences of learning experiences developed by the student and a 3-member faculty committee. Beginning students are urged to enroll in basic courses in theory and research in social psychology and statistics. The contract specifies students’ long-range goals, specialties, other fields of psychology or related disciplines in which they will become proficient, proposed sequence of course work, research and teaching experiences they hope to obtain, plans for the M.A. proposal, comprehensive requirements and dissertation landmarks, and an approximate timetable. Contract details can be changed by agreement of the student and faculty committee.

The contract is a general framework that permits students’ graduate work to be adapted to their interests and abilities and provides a standard
Brain, Behavior, and Quantitative Science

The Brain, Behavior, and Quantitative Science program provides instruction and research training for students pursuing careers in the academic, public, and private sectors that draw on the research and scholarly interests of the core faculty. These interests include behavioral economics, cognitive neuroscience, cognitive science, developmental science, learning, and quantitative and computational methods. Across all areas, a strong emphasis is placed on students developing a fundamental understanding of psychological theory, acquiring advanced statistical and computational skills and expertise, and learning how to apply this science to improve the development and/or well-being of individuals in society. Toward this end, the program requires both coursework and sustained involvement in the research endeavor, whether in the laboratory or in the field, and (where appropriate) active engagement in opportunities to translate basic science into practice or application.

Requirements

Students are guided by individually tailored plans, or contracts. These contracts are a mutual agreement between the student and a faculty committee that describe a set of learning experiences designed to allow the student to establish a career in the behavioral sciences whether that is within or outside of academia. In general, each contract specifies a set of courses tailored to each student that provides the student training in core substantive areas of psychology, quantitative and computational psychology, and training in translational science that are relevant to the goals of the degree on which the faculty and student agree. In addition, the contract specifies a student’s long-term goals, planned research activities, other professional development necessary for the student to achieve his/her goals, a plan for the evaluation of progress in the program, and a timeline with proposed completion dates. As a part of this contract system students are evaluated annually on their progress within the program.

The contract is a general framework that permits students to adapt their graduate work to their interests, strengths, and weaknesses. It also provides a standard against which progress can be assessed. Students' contracts must specify how the research skills and responsible scholarship requirement is to be met. The research skills requirement typically is met by completion of 6 graduate courses in statistics and research design. The responsible scholarship requirement is met via coursework as specified in the contract, completion of online tutorials, and attendance at ethics proseminars. All contracts must comply with other departmental and general rules including residence and time limits.

Clinical Science

The clinical psychology program educates students to master knowledge in the field of scientific psychology so that they can generate new scientific knowledge and theory related to the field of clinical psychology, and can make independent contributions to the evolving base of skills and scientific knowledge required for clinical practice. All students take basic course work and practica in academic/research and clinical application. Students may take electives or practica to augment either aspect of training. About half the graduates pursue academic/research-oriented careers, and the rest undertake careers emphasizing applied activities (e.g., psychotherapy in community mental health centers or hospitals). Information is available from the graduate admission secretary or online (http://psych.ku.edu/clinical/).

Major Area of Study in Health and Rehabilitation Psychology

Work centers on the psychosocial and biomedical aspects of physical health, illness, and disability. Students apply the knowledge and techniques to problems of prevention, assessment, treatment, and rehabilitation. A detailed overview is available from the graduate admission secretary or online (http://psych.ku.edu/clinical/).

Requirements

Individual plans of study are designed to meet the standards established by state licensing boards and professional organizations. Individualization is achieved by selecting among alternate ways of meeting specific requirements and by selected electives or choosing the health and rehabilitation emphasis. The plan of study constitutes an agreement between the student and the entire clinical faculty. Program requirements:

</table>

**Note:** Because this is an American Psychological Association-approved clinical program, the faculty expect all students to operate within the APA Code of Ethics in professional and personal behavior. Adherence to the ethical principles is part of the normal evaluation of students during the degree program.

**Research Skills and Responsible Scholarship**

The research skills requirement is met by completion of 2 graduate courses in statistics and 1 research design course. The responsible scholarship requirement is met by 1 course in research design, 1 course in ethics, and completion of online tutorials.

**Thesis and Dissertation (18 hours)**

The student must complete a master’s thesis based on an empirical study (minimum of 6 hours) and an empirical doctoral dissertation (minimum of 12 hours) and defend each in separate oral examinations. The thesis should be completed by the end of the second year and written in a form suitable for journal submission.

**Electives/Independent Study (6 credit hours, minimum)**

Because a minimum of 86 hours of graduate credit is required for the degree, the hours not included in the requirements above may be elective courses selected by the student and his or her advisor.

**Examinations: Task**

Each student must propose and demonstrate competence in one task or project. This task typically is done in the third year. It may be in applied/clinical, research/methodology, or program evaluation. A complete description is available from the clinic office or online (http://psych.ku.edu/clinical/).

Upon completion of all degree requirements except the dissertation and internship, the student must pass the oral comprehensive examination. This examination addresses a proposal for the dissertation as well as related, general questions in the field. It should be taken before completion of 4 calendar years for students entering with the B.A. and 3 years for students entering with the M.A. The faculty believes that the student is best served by completing the entire dissertation before the internship.

**Internship (3 hours)**

Students must complete a 12-month predoctoral internship at a setting approved by the clinical psychology faculty. Clinical students may complete their internships at any setting approved by the American Psychology Association.

**Graduate Certificate in Health Psychology**

**Benefits of a Graduate Certificate in Health Psychology**

Health psychology is involved in many professions, including psychology, educational psychology, allied health professions, exercise science, sociology, social welfare, and many others. Today’s health care is an inter-professional approach to service and health psychology is part of patient contact and research being conducted in all health areas. Researchers and providers that have education and training in health psychology are in high demand with the changes in health care emerging. Our graduate certificate supplies broad and specific education in health psychology theory, research, and clinical applications. For more information regarding our program, please visit our graduate
certificate program (http://clinical.ku.edu/health-psychology-certificate-program/) website.

From the very beginning, health psychology has always been a “hybrid” discipline. Following from those interdisciplinary roots, the health psychology certificate would welcome students from a broad range of programs who have a variety of educational goals.

**Students in Health Service Delivery Programs.** Course offerings provide students the option of selecting classes that could be used to inform practice with patients with chronic or acute health problems. Practicum training is NOT offered, but didactic work can be used to inform training offered in other programs that prepare students to deliver mental or physical health related services (e.g., counseling psychology, social welfare, physical therapy, and nursing).

**Students interested in Health Promotion.** Course offerings provide students the option of selecting classes that could be used by students interested in careers related to health promotion or primary prevention, or careers that involve communication about health care (e.g., health, sport, and exercise science, public policy, health care administration).

**Students interested in Transdisciplinary Research.** Course offerings provide students the option of selecting classes with an applied focus in other domains of social science (e.g., social psychology, cognitive psychology, quantitative psychology, philosophy/ethics).

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Current Department of Psychology GRADUATE STUDENTS**

Psychology department graduate students who wish to pursue a Health Psychology Graduate Certificate should consult with Dr. Sarah Kirk or Dr. Nancy Hamilton. The Department will then request that the College/school add a certificate to a graduate degree-seeking student’s plan.

**Current KU Graduate Students Outside of THE Department of Psychology**

Current KU graduate students outside the Department of Psychology who wish to pursue the certificate will complete an application (https://gradapply.ku.edu/apply/) through Graduate Studies. Students must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission.

**Application requirements include:**

- Statement of one’s interest in Health Psychology
- Current Degree Progress Report (DPR) or Advising Report; a current graduate GPA of 3.0 or higher is required
- Letter of support from home academic department

**Non-KU Students**

Non-KU graduate students must complete an application (https://gradapply.ku.edu/apply/) through Graduate Studies for admissions to the certificate program. Students must have earned a bachelor's degree.

**Application requirements include:**

- One letter of recommendation from persons familiar with your academic work or potential for graduate school
- Official Graduate Record Examination (GRE) scores – University of Kansas institutional code is 6871.
- Transcripts from all institutions from which a degree was obtained, or any institutions attended post-bachelors. A GPA of 3.0 or higher in undergraduate work is required for admission. Copies of official transcripts that you have opened may be uploaded to the application online and used for admissions consideration. If you are admitted, sealed, or official electronic transcripts showing degree conferral, if applicable, must be provided by the end of your first semester at KU. Send official, sealed transcripts to:

**KU Visitor Center**

1502 Iowa St.
Lawrence, KS 66045

OR

graduateadm@ku.edu

- Applicants who indicate English is not their native language: Proof of English proficiency, (https://gradapply.ku.edu/english-requirements/) as required by the Office of Graduate Studies.

**Application Deadline:**

Applications for the program are accepted on a rolling basis. For more information on admission to a graduate certificate program, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Questions? Please contact our graduate academic advisor, Kirsten Hermreck, at kahermreck@ku.edu for more information.

**Health Psychology Graduate Certificate Program Requirements**

Students must maintain a 3.0 or higher GPA in courses taken in the certificate program and maintain good standing in any University program of study for which they are enrolled.

For more information regarding program requirements and a complete list of approved electives, please visit our health psychology graduate
Course Requirements:

To complete the health psychology graduate certificate, 12 credit hours of graduate work must be completed, including:

Department of Religious Studies

Why study religious studies?

Religions have been and remain among the most powerful forces shaping human history. Their discourses and practices inform the way we perceive ourselves, those around us, and existence at large, even when we are not actively religious. They are central to understanding both what divides us and what unites us. The academic study of religion is a trans-disciplinary endeavor to understand from an objective perspective how religious traditions shape the lives of their adherents, without seeking to promote or disprove any specific belief system. Religious Studies acquaints students with the diversity of religious cultures and introduces them to key methods and theories employed in their examination as "religion."

Undergraduate Programs

The undergraduate degree in the Department of Religious Studies is a research, analysis, and writing intensive program that features close work with faculty in small classroom settings. It seeks to develop a foundational knowledge of the world’s diversity of religious cultures and critical awareness of the ways in which religion shapes how we see and act toward ourselves, others, and the environment around us. Through the study of specific religious traditions and settings, students come away with a background that is invaluable to understanding and working with people of other cultures, whether in international business or simply as an informed global citizen.

Graduate Programs

The department offers a graduate program leading to the Master’s of Arts, as well as a Graduate Certificate program. Both programs enable students to pursue specialized advanced work that builds in tandem on the interests of the students and the specializations of the faculty. At all levels, interdepartmental and interdisciplinary cooperation is encouraged as important to a comprehensive program. Continuing research in religious studies is indispensable and intimately related both to teaching and to the wider exchange and advancement of knowledge.

A library of some 15,000 volumes, owned by the Friends of the Department of Religious Studies at the University of Kansas, is housed with and used by the department in Smith Hall’s Moore Reading Room. The Department of Religious Studies at KU is also generally able to provide substantial financial support for students seeking the M.A. degree. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in Religious Studies.

Courses

REL 100. Introduction to Religious Ethics. 3 Hours H.
In this class we will learn how religious values are used to make ethical judgments, but we will also ask if and how those judgments influence practices or the behavior of people in their everyday lives. What causes a disjunction between norms and behavior? What is the tension between different values when deciding how to act? What about differences of opinion between and even within different religious traditions? What happens when societal expectations conflict with religious values or vice versa? Or when ethical reasoning leads to two different conclusions about how to act? Using specific cases, such as human rights, environmental and sexual ethics, race and violence students will learn how ethical reasoning unfolds in different religious traditions, what values support that reasoning and what happens in society when those values compete. LEC.

REL 102. Violence and Religious Ethics. 3 Hours AE51 / H.
This course will examine the connection between violence and religion from an ethical perspective. It will focus primarily on Jewish, Christian and Muslim ethical theories, which will be compared and applied to specific cases. We will also consider the ethical justifications for inter-religious conflict and the impact violence has had on targeted religious communities. The course will begin with an interrogation of the meaning of religion, ethics and religious violence—exploring questions like: Are religions inherently violent? Are theories derived from religious ethics used to justify violence? How are acts of violence morally justified? We will then consider these questions in more depth by comparing ethical theories within Judaism, Christianity and Islam, such as just war theory and jihad theory, to see whether religions encourage or seek to curb violence. In addition, each moral theory will be studied in light of specific historical or present cases. Case studies include the Crusades, Medieval Spain, ISIS, white nationalism in America, and recent killings in places of worship. The course will end on a positive note, by examining ethical theories within religions that promote peace, and comparing theories that justify peace with theories that justify war. LEC.

REL 104. Introduction to Religious Studies. 3 Hours HR GE11/GE3H / H.
This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Not open to students who have taken REL 105. LEC.
REL 105. Introduction to Religious Studies, Honors. 3 Hours HR GE11/GE3H / H.
This course introduces students to the academic study of religions. It acquaints students with key methods and issues in religious studies, and provides an introductory survey of selected religions. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 104. LEC.

REL 106. Asian Religions. 3 Hours HR/NW AE42/GE3H / H/W.
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. Not open to students who have taken REL 108/EALC 108. (Same as EALC 105.) LEC.

REL 107. Jews, Christians, Muslims. 3 Hours HR AE42/GE3H / H.
A basic introduction to the major religious traditions of the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Not open to students who have taken JWSH 109 or REL 109. (Same as JWSH 107.) LEC.

REL 108. Asian Religions, Honors. 3 Hours HR/NW AE42/GE3H / H.
A basic introduction to religion in India, China, and Japan, with emphasis upon religions that affect the modern period. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 106/EALC 105. (Same as EALC 108.) LEC.

REL 109. Jews, Christians, Muslims, Honors. 3 Hours HR AE42/GE3H / H.
A basic introduction to the major religious traditions in the Near East, Europe, and the Americas, with an emphasis on their development through the modern period and their expressions in contemporary life. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken JWSH 107 or REL 107. (Same as JWSH 109.) LEC.

REL 124. Understanding the Bible. 3 Hours HR AE42/GE3H / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in the history and religious life of the people who produced and used them. Cannot be taken concurrently with REL 311 or JWSH 321 or REL 315. Not open to students who have taken REL 125 or JWSH 125. (Same as JWSH 124.) LEC.

REL 125. Understanding the Bible, Honors. 3 Hours HR AE42/GE3H / H.
An introduction to the literature of the Bible, exploring the relationships among the various types of literature present and the function of each type in history and religious life of the people who produced and used them. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 124 or JWSH 124. (Same as JWSH 125.) LEC.

REL 130. Myth, Legend, and Folk Belief in East Asia. 3 Hours NW AE42 / H/W.
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the world view of the ordinary peoples of East Asia. (Same as ANTH 293, EALC 130.) LEC.

REL 137. Religious Ethics and Moral Decisions. 3 Hours AE51 / H.
When faced with ethical dilemmas how do we decide what is the right course of action? In what ways are our decisions affected by religious ideas about morality? In this class we examine the ethical problems we encounter every day in light of the solutions offered from various religious traditions. Cases to be examined include issues of life and death, war and peace, sexual morals, torture, the treatment of animals and the environment. LEC.

REL 138. Religion and Moral Decisions, Honors. 3 Hours H.
Honors version of REL 137. Introduction to religious viewpoints on individual and social ethics. This course examines the influence of religious thought on the making of moral decisions, and on value development in relation to specific moral issues. Open only to students who have been admitted to the University Honors Program or by permission of instructor. LEC.

REL 171. Religion in American Society. 3 Hours HR AE41/GE3H / H.
A broad introduction to religion in American culture. This class emphasizes the well-established religions with large followings (viz. Judaism, Catholicism, Eastern Orthodoxy, and Protestantism). Some attention is also given to other religions active in America. Other topics covered include the relationship of church and state, religion in ethnic and racial minority groups, and women and religion. Not open to students who have taken REL 172. (Same as AMS 290.) LEC.

REL 172. Religion in American Society, Honors. 3 Hours HR AE41/GE3H / H.
Honors version of REL 171. A broad introduction to religion in American culture. This class emphasizes the well-established religions with large followings (viz. Judaism, Catholicism, Eastern Orthodoxy, and Protestantism). Some attention is also given to other religions active in America. Other topics covered include the relationship of church and state, religion in ethnic and racial minority groups, and women and religion. Not open to students who have taken AMS 290. Open only to students in the University Honors Program or by permission of instructor. LEC.

REL 177. First Year Seminar: ___. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Religious Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

REL 200. Study Abroad Introductions to: ___. 1-4 Hours H.
This course is designed for the study of special topics in Religious Studies. Credit for coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

REL 311. Religion of Ancient Israel. 3 Hours H/W.
An introduction to the religion of ancient Israel through examination of biblical texts and archaeological evidence. Emphasis is placed on understanding the texts of the Hebrew Bible (Old Testament) in their historical and cultural contexts, including the relationship of their religious views to other religious perspectives current in ancient Israel and the Near East. Attention is given to the processes by which the biblical texts developed and came to be viewed as scripture. (Same as JWSH 321.) LEC.

REL 315. Miracles, Martyrs, and Heretics. 3 Hours H/W.
A study of ancient Christian culture and religion employing the popular categories of miracles, martyrs and heretics as entry points into the basic features of religious thought and practice. Prerequisite: An undergraduate course in the humanities. LEC.

REL 316. Ancient Magic and Witches. 3 Hours AE42/GE3S / H.
This course provides a survey of magic and witchcraft in ancient Greece and Rome and interprets these practices through anthropological theories of magic and witchcraft. Emphasized topics may include magicians, witches, ghosts, spirits, demons, divination, and spells. This course considers issues such as how magic works, how people engage with the divine, the marginalization of magical practitioners, and the difference
between magic, witchcraft and religion. All readings will be in English; no knowledge of any ancient languages is required. (Same as CLSX 316.) LEC.

REL 320. The Bible Then and Now. 3 Hours.
An introduction and survey of the history and interpretation of the Jewish and Christian bibles from their first formation to the present day. Students will explore the way the text, interpretation and format of the Bible have adjusted over time to accommodate religious, political, social and technological changes. Class will occasionally meet in the university's rare book collection to study rare bibles. (Same as JWSH 320.) LEC.

REL 323. The Jewish World of Jesus. 3 Hours GE3H / H.
An introduction to the figure of Jesus in his ancient Jewish context. What was Jewish life like in Jesus's time? What did the early Jesus movement share with other forms of Judaism, and how did it differ? Evidence from the New Testament, the Dead Sea Scrolls, and other textual and archaeological sources will be used to explore the first-century Jewish society of which both Jesus and the first Christians were a part. (Same as JWSH 323.) LEC.

REL 325. Introduction to Judaism. 3 Hours H.
Analyzes a selection of the core texts, teachings, and practices of Jewish religious traditions in terms of classical and contemporary understanding. (Same as JWSH 325.) LEC.

REL 326. The Talmud: Its Origins, Nature, and Evolution. 3 Hours H.
This course demystifies the Talmud, arguably the most central yet also the most mysterious text of rabbinic Judaism. Students are introduced to the scope, substance, styles, and major figures of the Talmud, and also learn how the text came into being over the course of several centuries. (Same as JWSH 326.) Prerequisite: REL 104, REL 107, or REL 124 or REL 125, or permission of the instructor. LEC.

REL 327. Religious Zionisms. 3 Hours H.
A survey of the many types of Religious Zionism, from the origins of the movement to the present, from Left to Right, and from Jewish to Christian. The class asks questions about the relationship between religion and politics in Israel using case studies as examples, and also considers the views of religious Jewish anti-Zionists. No previous knowledge of Judaism or Israeli history is required. (Same as JWSH 327.) LEC.

REL 329. Mystical Tradition in Judaism. 3 Hours H.
Mystical experiences and supernatural encounters in Jewish texts and tradition: Dybbuks and demons, angels and Elijah; ecstatic enlightenment to succumbing to satan. Jewish texts and tradition are riddled with the arcane, the occult and the mystical. This course will mine the sources for a deep exploration of these aspects of Judaism that are most often obscured by "normative" teachings and practices, yet remain deeply embedded in the customs and beliefs of Jews around the world. (Same as JWSH 337.) LEC.

REL 330. Native American Religions. 3 Hours NW AE41 / H.
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative (myth), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Not open to students who have completed ISP 331 or REL 331. (Same as ISP 330.) LEC.

REL 331. Native American Religions, Honors. 3 Hours NW AE41 / H.
A survey of religious traditions among selected Native American peoples. Topics include religious freedom, ritual activity, cultural narrative (myth), kinship, healing practices, ecology, government relations, impact of colonization, impact of missionization, contact between cultures, and secularization. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have completed ISP 330 or REL 330. (Same as ISP 331.) LEC.

REL 333. Magic, Mysteries, Mummies in Ancient Egypt. 3 Hours H.
A study of ancient Egyptian culture and religion employing the popular categories of magic, mysteries and mummies as entry points into the basic features of religious belief and practice. Prerequisite: Any course in the Humanities or Social Sciences. LEC.

REL 334. Studies in Ritual: _____, 3 Hours H.
A study of ritual theory and a comparative study of ritual activity among selected religious traditions. May be repeated if topic varies. LEC.

REL 339. History of Religion in America. 3 Hours H.
Survey of the development of religious institutions and ideas in America from colonial times to the present. Emphasis is given to the mainstream religious traditions (Protestant, Catholic, Jewish), but attention is also paid to other phenomena, including nonwestern and native American religions. LEC.

REL 341. Mysticism. 3 Hours H.
The nature of mystical experience and reflection as expressed in selected mystical literature of the world's religions. LEC.

REL 342. Religion and Literature. 3 Hours H.
An examination of contemporary writings to explore the authors' presuppositions concerning the nature of God, the nature of human beings, the meaning of good and evil, the significance of human existence, and the means of attaining fulfillment or salvation. LEC.

REL 345. Christianity. 3 Hours H.
An introductory examination of the history, doctrines, and practices of Christianity. Selected readings from the creeds, papal decrees, and major Christian theologians. LEC.

REL 350. Islam. 3 Hours NW AE42/GE3H / H/W.
Islam's Origins, the prophet Muhammed, the Holy Koran, religious symbols and moral mandates, and historical developments. (Same as AAAS 349.) LEC.

REL 355. Muslim Societies. 3 Hours H.
In this class we study Muslim societies throughout the world. We examine variation between regions by looking at Muslim history and culture in different countries, such as Pakistan, Indonesia, Mali, Bosnia, Egypt, Yemen, and others. LEC.

REL 357. Women and Gender in Islam. 3 Hours AE51 / H.
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. (Not open to students who have taken REL 657.) LEC.

REL 360. The Buddhist Tradition in Asia. 3 Hours AE42/GE3H / W.
A historical and geographical survey of the Buddhist tradition from its origins in India to modern day developments in the three major regional Buddhist cultures of Southeast Asia, Tibet, and East Asia (China, Korea, and Japan). Prerequisite: Prior coursework in Asian studies or permission of instructor. LEC.

REL 365. Hinduism. 3 Hours H.
An introduction to the diversity and richness of Hinduism from the Vedic period to the present; explores Hindu practices, beliefs, and communities using primary texts and extensive audio-visual resources. LEC.

REL 371. Religion and Society in Tension. 3 Hours H.
Specific issues of conflict between the values of certain religious groups and those of the larger society. Includes problems of church and state, birth control and abortion, civil disobedience and dissent, education, war and peace, and "civil religion. LEC.
REL 373. The Supreme Court and Religious Issues in the United States. 3 Hours H.
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Not open to freshmen. (Same as HIST 373.) LEC.

REL 374. Religious Perspectives on Selfhood and Sexuality. 3 Hours H.
The nature of the self in its individual and social dimensions. Self experienced and expressed in sexuality. Survey of viewpoints in religious literature. (Same as WGSS 374.) LEC.

REL 375. The Supreme Court and Religious Issues in the United States, Honors. 3 Hours H.
Historical study of the interpretation of the religion clauses of the First Amendment with special reference to the questions of establishment, the free exercise of religion, freedom of religious belief, worship, and action, and religion and the public schools. Open only to students in the University Honors Program or by permission of the instructor. LEC.

REL 376. American Judaism: Life and Thought. 3 Hours H.
A study of the conflicts between secularists and religious groups, between Zionists and synagogue representatives, and the patterns of compromise in American Jewish life. Questions of Americanism and Jewish survival, support for the State of Israel, and the bureaucratic structure of rabbinical training and philanthropy in America will be raised. LEC.

REL 379. Prophets and Profits. 3 Hours H.
The course will examine what religious traditions have had to say about controversies in economic ethics, focusing on how religious thinkers develop arguments on the basis of methods particular to their traditions. At the same time, it presents these traditions alongside secular approaches to economic ethics. Judaism, Christianity, Islam, Hinduism, and Buddhism will be considered, as will liberalism, Marxism, feminism, and natural law theory. Topics include economic inequality, wealth accumulation, licit and illicit commerce, slavery, and profit. Attention will also be paid to the methodological challenges of the study of the topic, which necessarily brings together political economy, ethics, economic history, and hermeneutics. Students will work with a diverse array of primary sources, from ancient scriptures to modern thinkers. The ultimate goal will be to understand how it is possible for thinkers within the same religious tradition to take differing stances on economic ethics, while considering themselves wholly grounded in tradition, depending on their relationships to the modern secular approaches we discuss. LEC.

REL 380. Philosophical Issues in Religion. 3 Hours GE3H / H.
This course will consider, from a philosophical perspective, some of the problems in religion which arise in the development of “Natural Theology” broadly conceived. (Same as PHIL 350.) LEC.

REL 382. Jerusalem Through the Ages. 3 Hours H.
As a prominent site in the religious and cultural histories of Judaism, Christianity, and Islam, Jerusalem is uniquely situated as one of the world's most sacred cities. For more than 3,000 years, this city has been a focal point of religious and political activity. Through the critical reading of historical and religious texts, and archaeological data, this course will explore the historical development of Jerusalem as a sacred place in Judaism, Christianity, and Islam. (Same as CLSX 382, HIST 382 and JWSH 382.) LEC.

REL 387. Enemies of Ancient Israel. 3 Hours H.
An exploration of the social world of the Bible through its antagonists and their cultures. We will examine the so-called “Bad Guys of the Bible” using the lenses of history, archaeology, geography, and religion to better understand their cultures and how they are portrayed in the biblical text. (Same as HIST 381 and JWSH 387.) LEC.

REL 400. Study Abroad Special Topics: ___. 1-4 Hours H.
This course is designed for the study of special topics in Religious Studies equivalent to courses at the 300 to 600 level at KU. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

REL 404. Undergraduate Seminar in Religion: ___. 1-3 Hours H.
Topic, instructor, prerequisite and hours of credit to be announced in Schedule of Classes. Particular subject matter any given semester responding to student interest and taking advantage of special faculty competence. Class discussion, readings, and individual projects. LEC.

REL 405. Directed Study in Religion. 1-4 Hours AE61 / H.
Investigation of a special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading or special research. Individual reports and conferences. May be repeated, with maximum cumulative credit of four hours. Course taken for one hour of credit may not be used to fulfill College distribution requirement. Prerequisite: One previous course in religious studies at the University of Kansas and permission of instructor. IND.

REL 425. Religion and Film. 3 Hours H.
An examination of the treatment of religious themes through the medium of film and an examination of the attitudes of religious organizations toward films and film production. Selected films will be viewed and analyzed from the perspectives taken within religious studies. LEC.

REL 447. Islamic Law in the Digital Age. 3 Hours H.
In this class we trace how Islamic law has changed in the modern era, beginning with an overview of shari’a and its traditional function in Muslim society, and then examine how the practice of Islamic law was altered by colonialism and the rise of the nation state. We mark these transformations by studying how Islamic law is used in the online environment today. LEC.

REL 450. Popular Culture in the Muslim World. 3 Hours NW / H.
A study of pop songs, television, comics, and other idioms of popular culture from different parts of the Muslim world, with attention to Muslims' sense of humor, tragedy, aesthetics, and pertinent issues of the day. (Same as AAAS 450.) LEC.

REL 477. Gender and Religion. 3 Hours H.
Examination of the symbols, images, scriptures, rites and teachings that define gender in various religious traditions. (Same as HUM 477 and WGSS 477.) Prerequisite: An introductory course in Humanities, Religious Studies or Women, Gender Sexuality Studies. LEC.

REL 490. Senior Seminar in Theories and Methods. 3 Hours AE61 / H.
A capstone course for religious studies majors to survey methods and theories in religious studies. Prerequisite: Religious Studies major or permission of the instructor. LEC.

REL 494. Research Internship. 1-3 Hours S.
Practical research experience in Religious Studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis. May be used as a component of the Research Experience Program (REP). Prerequisite: Permission of the instructor. LEC.

REL 499. Undergraduate Honors Research. 1-3 Hours AE61 / H.
Required for Departmental Honors. May be taken more than once; total credit not to exceed 6 hours. Prerequisite: Open only to candidates for degree with departmental honors and with consent of the student's research supervisor. IND.
REL 500. Readings in Non-English Religious Texts. 1-4 Hours.
This course provides directed readings for students in either primary or secondary texts related to religious studies utilizing material in languages other than English. IND.

REL 502. Special Topics in Religion: ______. 3 Hours H.
Topic and instructor to be announced in Schedule of Classes. May be offered by different instructors under different subtitles, and may be taken more than once if subject matter varies sufficiently. Prerequisite: One previous course in Religious Studies or instructor permission.

REL 507. Religion in India. 3 Hours NW AE42/GE3H / H/W.
Survey of religious thought and practice in India from the Vedic period to the present. LEC.

REL 508. Religion in China. 3 Hours NW AE42/GE3H / H/W.
Survey of religious thought and practice in China from the Shang to the People's Republic. LEC.

REL 509. Religion in Japan. 3 Hours NW AE42/GE3H / H/W.
Survey of religious thought and practice in Japan from the Jomon period to the present. (Same as EALC 509.) LEC.

REL 510. Religion in Korea. 3 Hours AE42/GE3H / W.
Survey of religious thought and practice in Korea from the Three Kingdoms period to the present. Prerequisite: REL 106/EALC 105; EALC 104; or permission of instructor. LEC.

REL 511. Buddhist Art of Korea. 3 Hours H.
Introduction to the history of Buddhist architecture, painting, sculpture and illuminated scriptures in Korea from the 4th through the 19th centuries, with particular emphasis on their stylistic, geographical, social, devotional and literary contexts. Not open to students who have taken HA 361 or HA 561. Work requirements will be greater for graduate students. (Same as HA 561.) Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

REL 523. The Dead Sea Scrolls. 3 Hours H.
A study of the archeological evidence and texts from the Dead Sea area that provide primary evidence for Jewish religious belief and practice in the Greek and Roman periods (ca. 250 B.C.E. - 135 C.E.). (Same as JWSH 523.) Prerequisite: REL 124 or JWSH 124 or consent of instructor LEC.

REL 525. Jews and Christians. 3 Hours H/W.
This course examines the ways Jews and Christians have interacted with and characterized one another at various points in their histories. Special emphasis is placed on the gradual separation of the two religious traditions in the 1st-4th centuries. (Same as JWSH 525.) Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. LEC.

REL 526. Jewish History and Literature in the Greek and Roman Periods. 3 Hours H/W.
The history and literature of the Jewish people from the hellenistic period (late fourth century B.C.E. to the codification of the Mishnah 210 C.E.). Select texts from the Hebrew Bible, the so-called apocrypha and pseudepigrapha, the Qumran scrolls, Philo, Josephus, related early Christian texts, and Rabbinic texts will be studied. (Same as CLSX 506 and JWSH 526.) Prerequisite: REL 124 or JWSH 124 or permission of instructor. LEC.

REL 527. Ancient Mesopotamian Culture and Religion. 3 Hours H.
A study of the basic features of Mesopotamian history, culture and religion from the origins of writing (ca. 3500 B.C.E.) to the rise of Greek rule in the region (ca. 350 B.C.E.). Prerequisite: A principal course in religious studies or consent of instructor. LEC.

REL 530. Christian Origins: from the Beginnings to Augustine. 3 Hours H/W.
This course covers the major political, literary, and theological developments in Christianity from the first century through Augustine in the early fifth century, including: (1) the development and significance of the New Testament canon, (2) relations between Christians, Jews, and the Roman government, (3) the nature of orthodoxy and heresy, and the rise of the major gnostic systems, (4) the growth of the orthodox network, (5) theological debates and councils, and (6) the biography and theology of Augustine and his influence on the medieval church. Prerequisite: Junior standing or above. LEC.

REL 532. Studies in Islam. 3 Hours H.
Study of religious thought, practice, and institutions of Islam with an emphasis on the examination of primary documents. (Same as AAAS 532.) LEC.

REL 535. The History of Islam in Africa. 3 Hours H/W.
A study of the history and institutions of Islam in Africa. Emphasis will be placed on the impact of Islam on African traditional religions and African civilization in general; the historiographical traditions of Islam in Africa. (Same as AAAS 542.) LEC.

REL 551. Shari'ā, Democracy, and Society. 3 Hours H.
In this class we examine the question of whether or not democracy and shari'a can coexist. Is there a necessary opposition between democratic visions of society and the institutionalization of Islamic law? As a case study we look at changes in the modern Egyptian political system and the role religious ideals have played in these changes, especially the push for democracy. Prerequisite: An introductory course in religious studies or consent of instructor. LEC.

REL 555. Buddhists and Buddhism in China. 3 Hours NW AE42 / H.
A reading and media-rich survey of institutional, ritual, literary, educational, and exegetical practices that have shaped the lives of Buddhists in China, past and present. Alterities within the Buddhist tradition, and interactions with other religious options, are considered. (Same as EALC 555.) LEC.

REL 557. Modern Islamic Reform Movements. 3 Hours H.
This course examines movements of renewal and reform in the Islamic world today. Also studies the conditions that gave rise to calls for reform throughout the Muslim majority world, as well as the impact reform movements have had on the practices and beliefs of Muslims today. LEC.

REL 560. Modern Jewish Thought. 3 Hours H.
This course examines how a number of prominent Jewish thinkers from the seventeenth century through the present have encountered and engaged the special challenges posed by modernity to religious traditions, including the challenge of science to the validity of miracles, the challenge of the secular state to religious authorities, and the challenge of historical studies to the integrity of scripture. Thinkers covered may include Spinoza, Mendelssohn, Frankel, Hirsch, Geiger, Hermann Cohen, Buber, Rosenzweig, Arendt, Scholem, Leo Strauss, Levinas, and Derrida. Prerequisite: A previous course in Religious Studies or Jewish Studies; or consent of instructor. (Same as JWSH 560.) LEC.

REL 570. Studies in Judaism. 3 Hours H.
A study of the major intellectual sources of the Jewish tradition from the Mishna, Talmud, Midrash, prayerbook, philosophers, the Zohar, and the Shulchan Aruch. (Same as JWSH 570.) Prerequisite: A course in Religious Studies or Jewish Studies numbered 300 or above. LEC.

REL 572. Judaism and Political Theology. 3 Hours H.
A consideration of the relationship between religion and politics in Judaism, and of the relevance of Judaism to broader discussions about religion and politics. Topics will include sovereignty, secularization,
pluralism, democracy, and revolution. (Same as JWSH 562.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

REL 573. Judaism and Sexuality. 3 Hours H.
An exploration of the complex interactions of Judaism, Jewishness, and sexuality. The course serves as a basic introduction to traditional Jewish understandings of gender and power, love and sex, and the body and embodiment. It also introduces the changes undergone by this tradition under the impact of contemporary feminism and queer theory. (Same as JWSH 563, WGSS 573.) Prerequisite: At least one course in Jewish Studies or Religious Studies, or permission of instructor. LEC.

REL 585. New Religious Movements (Western). 3 Hours H.
A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, rooted primarily in Christianity and Judaism. LEC.

REL 586. New Religious Movements (Nonwestern). 3 Hours H/W.
A survey of the beliefs, practices, and social impact of religious minorities in the United States, both contemporary and historical, which have developed primarily from sources other than Christianity and Judaism. LEC.

REL 604. Religion and Political Theory. 3 Hours S.
An examination of the relationship between religious faith and politics in Western political thought and theory. The approach will be both historical and philosophical, beginning with Moses on the one hand, and the Greeks on the other. Texts will include biblical, Greek philosophical, Jewish and Christian philosophical and theological writings. (Same as POLS 604.) Prerequisite: POLS 201, or for non-POLS majors completion of Western Civilization requirements, or consent of instructor. LEC.

REL 650. Sufism. 3 Hours NW / H.
A survey of developments in Sufi (Islamic Mystical) thought, poetry, and ritual throughout Muslim history and across the Muslim world. (Same as AAAS 650.) Prerequisite: AAAS 349/REL 350 or permission of instructor. LEC.

REL 657. Women and Gender in Islam. 3 Hours W.
Focusing on issues of gender, this course follows major religious developments in the Islamic tradition. Also examines how Muslim women have impacted those developments. (Not open to students who have taken REL 357.) (Same as AAAS 657.) Prerequisite: AAAS 349/REL 350, graduate standing, or permission of instructor. LEC.

REL 671. American Communes. 3 Hours H.
An examination of utopian communities in North America from the seventeenth century to the present. The course will survey the history, literature, and social dynamics of representative communal societies and movements including the Shakers, the Hutterites, the Oneida Community, Catholic religious communities, egalitarian communities, and other religious and secular communities. LEC.

REL 701. Approaches to the Study of Religion. 3 Hours.
An introduction to the various methods by which social scientists, historians, philosophers, and theologians study the meaning, influence, and significance of religion as an integral part of society and its cultural heritage. Prerequisite: Graduate student or permission of instructor. LEC.

REL 704. Russian Orthodoxy in Historical Perspective. 3 Hours.
This course examines Russian Orthodoxy as a religious system and the institution of the Russian Orthodox Church from its first appearance in Russia to the present. It focuses on beliefs and practices of the clergy and the laity; institutional structures; the relationships between Church and State; interaction with non-Orthodox religious communities; responses to Soviet atheist policies; Orthodox influences on political theory, philosophy, literature, and the fine arts. (Same as REES 704.) LEC.
