**Total Hours 120**

The BGS requires completion of a minor (or a second major) outside of the major area of study. Most minors require 18 hours with 12 at the 300+ level.
see an ABS advisor and consider completing a course sequence

We recommend that students who are interested in an ABS minor may count toward the general ABS minor. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

The BGS requires completion of a minor (or a second major) outside of the major area of study. Most minors require 18 hours with 12 at the 300+ level.

1 The BGS requires completion of a minor (or a second major) outside of the major area of study. Most minors require 18 hours with 12 at the 300+ level.

2 9 hours of ABSC Specialty Area elective courses are required. Visit the degree requirements tab for a list of approved courses.

3 10 hours of ABSC 694 Practicum are required.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. Please note:

Minor in Applied Behavioral Science

Why study applied behavioral science?

The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention.

Requirements for the Minor

Students selecting a minor in Applied Behavioral Science are required to complete ABSC 100 and at least 15 credit hours of coursework in ABS, 12 of which must be at the junior/senior level (courses numbered 300 or above). No more than 3 credit hours in practicum courses and no more than 3 credit hours in research, special topics, and study abroad courses may count toward the general ABS minor.

We recommend that students who are interested in an ABS minor see an ABS advisor and consider completing a course sequence that focus on one of the following specialty areas: Early Childhood Education and Intervention; Early Childhood Autism Intervention, Early Childhood Research, Youth Development and Juvenile Justice, Adults with Disabilities, Community Health and Development, Basic Research in Behavioral Science, Organizational Behavior Management Research and Practice, and Historical and Conceptual Foundations of Behavioral Science. Specialty area course sequences are described below.

Early Childhood Autism Intervention

<table>
<thead>

Applied Behavioral Science Minor Hours & GPA
While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

Minor Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the Minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Master of Arts in Applied Behavioral Science
The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention. The department's master's program in applied behavioral science satisfies coursework requirements for Board Certification in Behavior Analysis and, in most states, licensure as a behavior analyst.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. Program
For admission in the fall semester, the deadline to submit applications and supporting materials is December 15th. Later applications receive consideration in the order of their receipt. Students may be admitted for the spring semester, but there is no filing deadline.

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to regular graduate status in the program, a student must hold a bachelor’s degree with a cumulative 3.0 GPA.

For admission with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department’s application materials is a list of department faculty members. Please review the faculty members (http://absc.ku.edu/faculty/) and descriptions of their research, scholarly, and professional interests on the department's website. Applicants should select any faculty members within the application whose research interests match their own. These faculty members review the applicant’s materials. An applicant is accepted when one of the faculty members consent to admit the student. This faculty member becomes the advisor of record.

A full list of the required application materials can be found on the Graduate Admission (http://absc.ku.edu/graduate-admission/) page of our departmental website (http://absc.ku.edu/). (http://absc.ku.edu/)

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

M.A. in Applied Behavioral Science Degree Requirements
The master’s program trains highly competent scientist-practitioners in applied behavioral science. It requires course work on the basic principles and conceptual foundations of behavioral science and its research methods but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

The master’s program follows a junior-colleague model. Students work closely with their advisors and join them in many aspects of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with one advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor’s interests change, students are free to change advisors.

The M.A. degree requires 30 credit hours: 18 hours in 6 content areas, 3 hours in a practicum, and research and elective courses. Students also must conduct, write up, and orally defend an empirically based thesis. The following 6 courses are required:

1. Ethical, Legal, and Professional Issues (3). Instruction in ethical principles in the conduct of research (e.g., informed consent, data analysis), legal issues in professional conduct (e.g., plagiarism,
2. Principles of Behavior I (3). The science of behavior (e.g., observation, experimentation), laboratory methods, basic behavioral principles (e.g., reinforcement, stimulus control), and their applications (e.g., early childhood, disabilities). ABSC 841

3. Research Methods I (3). Strategies and tactics of scientific research (e.g., objectivity, empiricism), the logic of experimentation (e.g., validity, reliability), measurement and direct observation, and experimental designs for single-subject and time-series analyses. ABSC 735

4. Conceptual Foundations I (3). The history and philosophy of behavioral science, contemporary advances in basic research for application, the analysis of everyday behavior (e.g., cognition, emotion), and current issues in the discipline and the profession (e.g., relations between basic and applied research). ABSC 800

5. Applied Behavior Analysis I (3). The characteristics of applied behavioral research (assessment, analysis, intervention, evaluation), intervention research (clinical, community), applied procedures and programs, social validity, and ethical issues. ABSC 746

6. Experimental Analysis of Behavior (3) ABSC 799

7. Research or Intervention Practicum (3). A supervised practicum course in either basic or applied research or behavioral interventions.

This course work also satisfies 6 of the course requirements and the thesis requirement in the doctoral program.

Master's students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance.

M.A. in Applied Behavioral Science Degree Requirements

The online master's program trains highly competent scientist-practitioners in applied behavioral science. It requires course work on the basic principles and conceptual foundations of behavioral science and its research methods but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

The online master's program follows a junior-colleague model. Students work closely with their advisors and join them in many aspects of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with one advisor, but may work with other faculty members or have co-advisors. If a student's or advisor's interests change, students are free to change advisors.

The online M.A. degree requires a minimum of 30 credit hours: 18 hours in 6 content areas (required courses), 3 hours in a practicum, and research and elective courses. Students also must conduct, write up, and orally defend an empirically based thesis. The following 6 courses are required:

1. ABSC 850 Principles of Behavior Analysis (3). The science of behavior (e.g., observation, experimentation), laboratory methods, basic behavioral principles (e.g., reinforcement, stimulus control), and their applications (e.g., early childhood, disabilities).

2. ABSC 851 Ethical, Legal, and Professional Issues in Applied Behavioral Science (3). Instruction in ethical principles in the conduct of research (e.g., informed consent, data analysis), legal issues in professional conduct (e.g., plagiarism, copyright), and professional skills (e.g., journal reviewing, professional communication).

3. ABSC 854 Experimental Analysis of Behavior (3). the basic principles of operant and respondent conditioning in the context of basic non-human and human subjects research.

4. ABSC 770 Within Subjects Research Methodology and Direct Observation (3). Strategies and tactics of scientific research (e.g., objectivity, empiricism), the logic of experimentation (e.g., validity, reliability), measurement and direct observation, and experimental designs for single-subject and time-series analyses.

5. ABSC 771 Introduction to Applied Behavioral Science (3). The characteristics of applied behavioral research (assessment, analysis, intervention, evaluation), intervention research (clinical, community), applied procedures and programs, social validity, and ethical issues.

6. ABSC 772 Conceptual Foundations of Behavior Analysis (3). The history and philosophy of behavioral science, contemporary advances in basic research for application, the analysis of everyday behavior (e.g., cognition, emotion), and current issues in the discipline and the profession (e.g., relations between basic and applied research).

7. ABSC 871 or ABSC 872 Research or Intervention Practicum (3). A supervised practicum course in either basic or applied research or behavioral interventions.

Master's students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance. Completing this requirement necessitates traveling to the Lawrence campus and presenting in person.

Doctor of Philosophy in Behavioral Psychology

The Department of Applied Behavioral Science offers a curriculum through which students learn how to examine and address problems of social importance across the lifespan. Students receive training in the application of behavioral science to improve the human condition through prevention and intervention. The department's doctoral program in behavioral psychology satisfies coursework requirements for Board Certification in Behavior Analysis and, in most states, licensure as a behavior analyst. It does not satisfy requirements for licensure in psychology.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student.
Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the Ph.D. Program

For admission in the fall semester, the deadline to submit applications and supporting materials is December 15th. Later applications receive consideration in the order of their receipt. Students may be admitted for the spring semester, but there is no filing deadline.

Eligibility criteria for admission to the Ph.D. program follow Graduate Studies' admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to regular graduate status in the program, a student must hold a bachelor's degree with a cumulative 3.0 GPA.

For admission with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department's application materials is a list of departmental faculty members. Students should review faculty members (http://absc.ku.edu/faculty/) on the department's website and descriptions of their research, scholarly, and professional interests. Applicants should select any faculty members whose research interests match their own. These faculty members review the applicants' materials. An applicant is accepted when one of the faculty members consent to admit the student. This faculty member becomes the advisor of record.

A full list of the required application materials can be found on the Graduate Admission (http://absc.ku.edu/graduate-admission/) page of our departmental website (http://absc.ku.edu/).

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Ph.D. in Behavioral Psychology Degree Requirements

The doctoral program trains highly competent researchers in applied behavioral science (e.g., applied behavior analysis, applied psychology). Students are taught to discover and produce, translate and apply, and communicate knowledge in the behavioral sciences for understanding and solving problems of individual and societal importance, both local and global. The curriculum requires a sequence of instruction that integrates courses in the basic principles of behavior, experimental methods and research design, and conceptual foundations, but emphasizes course work and training in applied and intervention research (e.g., assessment, analysis, intervention, evaluation). Its objective is to discover and advance empirically based solutions to problems of individual and societal importance, both local and global.

The doctoral program follows a junior-colleague model. Students work closely with their advisors and join them in every aspect of professional development. This includes designing and conducting research, preparing manuscripts for presentation and publication, presenting and publishing those manuscripts, preparing editorial reviews of manuscripts, and engaging in all facets of the responsible conduct of research. Students typically work with 1 advisor, but may work with other faculty members or have co-advisors. If a student’s or advisor’s interests change, students are free to change advisors.

Course Requirements

The doctoral degree program requires students to take 1 course in 10 areas, along with 2 practicum courses. The areas and the practicum courses are:

Departmental requirements are still in effect.

Eligibility criteria for admission to the Ph.D. program follow Graduate Studies' admission policy (https://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to regular graduate status in the program, a student must hold a bachelor's degree with a cumulative 3.0 GPA.

For admission with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.
usually scheduled for Friday afternoons at 3:30. Pro-seminars are typically scheduled throughout the Fall and Spring semesters. These are mandatory for first and second-year students.

Pro-seminar I Requirement
Graduate students are expected to attend pro-seminar sessions when they are scheduled throughout the Fall and Spring semesters. These are usually scheduled for Friday afternoons at 3:30. Pro-seminars are typically open to all students.

Master's Thesis
Students complete an empirically based master's thesis and pass an oral examination on it. With their advisor's approval, empirically based theses from other programs may meet this requirement.

Research Skill
The Office of Graduate Studies requires students to have training in responsible scholarship and research skills pertinent to the field of research. This will be met by:
- Satisfactory completion of either ABSC 735 OR ABSC 770
- Satisfactory completion of either ABSC 841 OR ABSC 851

One of the following:
- At least one submission of a first-author manuscript for publication in a peer-reviewed journal, OR
- At least two scholarly presentations at regional, state, or national professional meetings.
  - The work for these must have been entirely completed at KU
  - No more than one may be a poster
  - At least one must have been presented by the time of the comprehensive examination; if the other has not yet been presented by the time of the comprehensive examination, it must be accepted for presentation at an upcoming meeting
- At least one must list the student as either first or presenting author

Teaching Requirement
Graduate students receive training in the teaching and supervision of undergraduates. The requirement may be met in 1 of 2 ways. In the first, students serve as a paid half-time teaching assistant for 1 semester or as a quarter-time assistant for 2 semesters, assuming proportionate responsibility for class organization, lecturing, grading, and office hours under a faculty member's supervision. In the second, students take LA&S 792 or ABSC 941, attend 3 brown bag lectures at the Center for Teaching Excellence, and present a guest lecture to the department. In both cases, students must also write a statement of teaching philosophy and obtain numeric evaluations of their teaching in their guest lectures.

Pro-seminar I Requirement
Graduate students are expected to attend pro-seminar sessions when they are scheduled throughout the Fall and Spring semesters. These are usually scheduled for Friday afternoons at 3:30. Pro-seminars are typically open to all students.

Professional Seminar II Requirement
Doctoral students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance.

Editorial Critiques
Students write 3 editorial reviews of published or unpublished journal articles, all of them empirical. The articles cover a range of topics and experimental designs. The first 2 are graded pass-fail by the student's advisor; the third must be passed by 2 other faculty members.

Comprehensive Examination
Students must complete the comprehensive examination by the end of the third year if entering the PhD program with a completed Master's obtained at another university, or within a year of defending their Master's in the Applied Behavioral Science MA program at KU. The examination has 2 components:

1. Program of Study Written Document. Students will generate a program of study document, developed in concert with their mentor, that includes:
   - A list of all graduate lecture/discussion courses completed in behavioral science and how the coursework fulfills ABAI accreditation standards
   - Up to 10 representative readings from each completed graduate lecture/discussion course
   - Research interest statement (2-3 pages)
   - Career plans statement (2-3 pages)
   - Up-to-date CV

In preparation for the oral examination, students provide their program of study document to the comprehensive examination committee. The examination committee will have the right to request additions/ modifications to the reading list. The student will have a minimum of 2 weeks to prepare for the oral examination upon finalization of the program of study with the examination committee.

2. Oral Examination. The program of study will be used by the comprehensive examination committee to generate relevant and individualized questions to ask during the oral examinations. Questions will span all coursework and student-indicated research domains (those of personal interest to the student and relevant to their career trajectory). These questions will be posed during the oral examination. The oral examination will last two hours and is not open to the public. The defense is successful if a majority of the committee members vote to pass it.

Dissertation Proposal
In preparation for the dissertation, students will complete a departmental required written dissertation proposal and an oral discussion of the
Graduate Certificate in Applied Behavior Analysis

The online certificate in Applied Behavior Analysis (https://edwardscampus.ku.edu/ma-applied-behavioral-science/certificate/) provides students with the necessary coursework preparation for certification as a Board Certified Behavior Analyst. It requires coursework on the basic principles of behavioral science and its research methods but emphasizes course work and training in application (e.g., assessment, analysis, intervention, evaluation). Its objective is to advance empirically based solutions to problems of individual and societal importance, both local and global.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Applicants to the program must have either a Master’s degree (or higher) or be currently enrolled in a masters or doctoral program at KU or another 4 year institution.

To be eligible to take the Behavior Analyst Certification Board exam, students must have supervised experience working with client populations. It is strongly recommended that incoming students who have not already completed supervised experience as part of their master’s degree requirements do so while completing the Certificate coursework. However, this supervised experience is not part of the Certificate curriculum.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). A full list of the required application materials can be found on the certificate page (https://edwardscampus.ku.edu/ma-applied-behavioral-science/certificate/) of our website. Applications may be submitted at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).

Certificate students must complete the following courses for a total of 24 graduate credit hours:

<table>
<thead>
<tr>

Total Hours 24
must be either regular KU graduate students or admitted as certificate-only students.

Students will enroll in 3 3-credit hour courses for a total of 9 credit hours.

ABSC 710 Community Health and Development

ABSC 875 Practicum in Community Health Promotion

ABSC 876 Practicum in Community Development

**Joint Degree: Ph.D. in Behavioral Psychology and Master of Public Health**

The department offers a joint Ph.D./M.P.H. degree in collaboration with the Master of Public Health (p. 2250) program in the Department of Preventive Medicine and Public Health at KU Medical Center. The degree incorporates efficiencies in the elective and research requirements of both departments. This is the first degree in the nation to combine an M.P.H. with the strengths of advanced study in applied behavioral science.

Faculty and student research teams address issues in community health and development, child and youth health and development, disabilities and independent living, and healthy aging. Separate admission is required to both the Ph.D. program of the Department of Applied Behavioral Science (http://absc.ku.edu/phd_mph) and M.P.H. program of the Department of Preventive Medicine and Public Health (http://ph.kumc.edu/).

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Joint Degree: Ph.D. in Behavioral Psychology and Master of Public Health**

For admission in the fall semester, the deadline to submit applications and supporting materials to the Ph.D. program is December 15th. Later applications receive consideration in the order of their receipt. Students may be admitted for the spring semester, but there is no filing deadline.

Note: Although students may be applying for the Ph.D. track, students must also submit a separate application for the MPH. Each program (the MPH and Ph.D.) will review the corresponding application separately and will notify students of their admission decision individually. It is possible to be accepted into one program without acceptance in the other.

Eligibility criteria for admission to the Ph.D./M.P.H. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). To be considered for admission to regular graduate status in the program, a student must hold a bachelor’s degree with a cumulative 3.0 GPA.

For admission to the Ph.D. program with full graduate standing, the department recommends that applicants complete 12 credit hours of undergraduate or graduate course work in behavior analysis, behavioral science, psychology, education, or related fields, and 6 hours in experimental methods, research design, or statistics.

Among the department’s application materials is a list of department faculty members. Please review faculty members (http://absc.ku.edu/faculty/) on the department’s website and the descriptions of their research, scholarly, and professional interests. Applicants should select any faculty members whose research interests in an area of public health match their own. These faculty members review the applicant’s materials. An applicant is accepted when one of the faculty members consents to admit the student. This faculty member becomes the advisor of record.

A full list of the required application materials can be found on the Graduate Admission (http://absc.ku.edu/graduate-admission/) page of our departmental website (http://absc.ku.edu/).

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

**Joint Ph.D. M.P.H. Degree**

Offered by the Department of Applied Behavioral Science (Lawrence) and the Department of Preventive Medicine and Public Health (KU Medical Center, Kansas City and Wichita). This joint program is the first in the nation to combine the strengths of advanced study in applied behavioral science with a Master of Public Health (M.P.H.) degree. It results from a unique collaboration between two units: the Department of Applied Behavioral Science, offering a Ph.D. in Behavioral Psychology; and the Department of Preventive Medicine and Public Health, with its M.P.H. program.

**Course Requirements Checklist for Joint MPH/Ph.D. Program:**

Please note, listed below are the minimum course requirements for the joint degree. Those obtaining a Ph.D. degree in the Applied Behavioral Science program complete M.A. coursework and degree requirements. It is possible to enter the Ph.D. with an M.A. from another university. If that is the case, students will work with the program to waive M.A. equivalent coursework and the M.A. Thesis requirement at the departmental level.

Students in the joint MPH/PhD program are required to complete a total of 42 credit hours before earning their MPH. Some courses have been approved to fulfill requirements in both the MPH and PhD programs.

Research and/or Intervention Practicum

Master’s Thesis

Students complete an empirically based master’s thesis and pass an oral examination on it. With their advisor’s approval, empirically based theses from other programs may meet this requirement.

Research Skill

The Office of Graduate Studies requires students to have training in responsible scholarship and research skills pertinent to the field of research. This will be met by:

- Satisfactory completion of either ABSC 735 OR ABSC 770
- Satisfactory completion of either ABSC 841 OR ABSC 851

One of the following:

- At least one submission of a first-author manuscript for publication in a peer-reviewed journal, OR
- At least two scholarly presentations at regional, state, or national professional meetings.

- The work for these must have been entirely completed at KU
- No more than one may be a poster
- At least one must have been presented by the time of the comprehensive examination; if the other has not yet been presented by the time of the comprehensive examination, it must be accepted for presentation at an upcoming meeting
- At least one must list the student as either first or presenting author

Teaching Requirement

Graduate students receive training in the teaching and supervision of undergraduates. The requirement may be met in 1 of 2 ways. In the first, students serve as a paid half-time teaching assistant for 1 semester or as a quarter-time assistant for 2 semesters, assuming proportionate responsibility for class organization, lecturing, grading, and office hours under a faculty member’s supervision. In the second, students take LA&S 792 or ABSC 941, attend 3 brown bag lectures at the Center for Teaching Excellence, and present a guest lecture to the department. In both cases, students must also write a statement of teaching philosophy and obtain numeric evaluations of their teaching in their guest lectures.

Pro-seminar I Requirement

Graduate students are expected to attend pro-seminar sessions when they are scheduled throughout the Fall and Spring semesters. These are usually scheduled for Friday afternoons at 3:30. Pro-seminars are typically presentations given by graduate students (see next paragraph), faculty members, and visiting scholars.

As part of your master’s degree requirements, you are required to present the results of your research (basic, applied, or conceptual) at a weekly pro-seminar meeting. The presentation must be comparable to that which would be given at a professional conference (not a panel discussion). You should be ready to field questions from your peers and the faculty in attendance.

Professional Seminar II Requirement

Doctoral students are required to present the results of their research at a department professional seminar meeting. The presentation is comparable to what would be presented at a professional conference. Students answer questions from their peers and the faculty in attendance.

Editorial Critiques

Students write 3 editorial reviews of published or unpublished journal articles, all of them empirical. The articles cover a range of topics and experimental designs. The first 2 are graded pass-fail by the student’s advisor; the third must be passed by 2 other faculty members.

Comprehensive Examination

Students must complete the comprehensive examination by the end of the third year if entering the PhD program with a completed Master’s obtained at another university, or within a year of defending their Master’s in the Applied Behavioral Science MA program at KU. The examination has 2 components:

1. **Program of Study Written Document.** Students will generate a program of study document, developed in concert with their mentor, that includes:
• A list of all graduate lecture/discussion courses completed in behavioral science and how the coursework fulfills ABAI accreditation standards
• Up to 10 representative readings from each completed graduate lecture/discussion course
• Research interest statement (2-3 pages)
• Career plans statement (2-3 pages)
• Up-to-date CV

In preparation for the oral examination, students provide their program of study document to the comprehensive examination committee. The examination committee will have the right to request additions/modifications to the reading list. The student will have a minimum of 2 weeks to prepare for the oral examination upon finalization of the program of study with the examination committee.

2. Oral Examination. The program of study will be used by the comprehensive examination committee to generate relevant and individualized questions to ask during the oral examinations. Questions will span all coursework and student-indicated research domains (those of personal interest to the student and relevant to their career trajectory). These questions will be posed during the oral examination. The oral examination will last two hours and is not open to the public. The defense is successful if a majority of the committee members vote to pass it.

Dissertation Proposal

In preparation for the dissertation, students will complete a departmental required written dissertation proposal and an oral discussion of the proposal. The proposal will include a) a thorough literature review and b) a research proposal. Students should follow specific instructions for these components as dictated in the student handbook. The dissertation proposal discussion will entail a one hour meeting with the dissertation committee and will be open to the public.

Dissertation

In consultation with their advisors, students conduct an empirically based dissertation, typically based on the comprehensive examination proposal, and pass an oral examination on it. The defense is successful if a majority of the committee members vote to pass it. The dissertation defense will be open to the public.

Biology Undergraduate Program

The Department of Ecology & Evolutionary Biology (https://eeb.drupal.ku.edu/), the Department of Molecular Biosciences (http://molecularbiosciences.ku.edu/), and the Undergraduate Biology Program (http://kuub.ku.edu/) work together to offer the following undergraduate majors and degrees.

Biochemistry—B.A. & B.S.

Biochemistry is the study of life at the level of individual molecules. Biochemistry lies at the intersection of cell biology, physiology, organic chemistry, and physical chemistry. The B.A. Biochemistry major includes one year of biochemistry, as well as upper-division courses in cellular mechanisms and biological physical chemistry. The B.S. Biochemistry major includes two semesters of calculus, one year of biochemistry, analytical chemistry, biological physical chemistry, and upper-division courses in cellular mechanisms and related elective courses.

Biology—B.A.

Biology is the study of living systems and is the broadest biological sciences major available at KU. The B.A. Biology degree provides students with much flexibility in their major course choices and can include ecology, microbiology, organismal physiology, and biochemistry.

Ecology, Evolution, and Organismal Biology—B.A. & B.S.

This set of majors focuses on the integration of biological systems at the whole organism level, and on how living organisms exist in populations, species, and communities within their environment. Core classes such as genetics, physiology, ecology, and evolutionary biology are combined with courses such as biochemistry, statistics, systematics, and organismal diversity to provide a strong foundation in biology. Students choose electives from a diverse set of classes that allow them to focus on areas of interest.

Human Biology—B.A.

This interdisciplinary major permits students to understand humans from a variety of academic viewpoints: anthropology, applied behavioral science, biology, psychology, and speech-language-hearing. Each human biology concentration offers major-level courses in topical categories that allow students to focus on areas that interest them most while retaining the interdisciplinary manner of the major. The broad nature of this major can prepare students for a variety of post-undergraduate opportunities.

Microbiology—B.A. & B.S.

Microbiology is the study of bacteria, viruses, the immune system, and their roles in human health, the environment and beyond. Job prospects for microbiologists with a bachelor’s or higher degree continue to be strong. Upper-division courses in immunology, bacterial infectious diseases, virology, and microbial genetics couple laboratory courses with lecture courses to provide students with hands-on practical experience. The B.A. Microbiology major includes a choice of three upper-division lecture and laboratory course pairs, while the B.S. Microbiology major includes all four of the upper-division lecture and laboratory course pairs.

Molecular Biosciences—B.S. (Edwards Campus only)

A bachelor’s degree in molecular biosciences offers students a strong background in genetics, microbiology, cell biology and biochemistry, as well as hands-on lab experience. Many students in this program continue on to pursue medical, dental or pharmacy school, or graduate work in the health sciences with high success rates. The KU Edwards Molecular Biosciences program is designed for undergraduate students who have already earned an associate’s degree or equivalent hours and are looking to complete the last two years necessary for a bachelor’s degree.

Molecular, Cellular, and Developmental Biology—B.A. & B.S.

This set of majors emphasizes study of the fundamental systems of living organisms and leads to an integrated program of study in the biomedical sciences. Core classes in genetics, cell and developmental biology, and neurobiology are combined with critically important classes in subjects such as organic chemistry, evolutionary biology, and statistics. Additionally, students can choose from a diverse set of elective courses. The molecular, cellular, and developmental biology major provides
education and training in a range of scientific areas vital to understanding human health and disease.

Undergraduate Majors and Degrees

The Department of Ecology & Evolutionary Biology, the Department of Molecular Biosciences, and the Undergraduate Biology Program offer the following undergraduate majors and degrees.

- B.A. and B.S. in biochemistry,
- B.A. in biology,
- B.A. and B.S. in ecology, evolution, and organismal biology,
- B.A. in human biology (concentrations in anthropology, applied behavioral science, biology, psychology, and speech-language-hearing science),
- B.A. and B.S. in microbiology,
- B.A. and B.S. in molecular, cellular, and developmental biology, and
- B.S. in molecular biosciences (KU Edwards Campus).

Advising and Career Counseling

Undergraduate majors are encouraged to consult their academic advisor as soon as possible for academic advising and career advising (http://kuub.ku.edu/advising/). Faculty advisors are also available to discuss career planning.

Courses for Nonmajors

BIOL 100 Principles of Biology. 3 Hours NB GE3N / N. Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101 and BIOL 103, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended. LEC.

BIOL 101. Principles of Biology, Honors. 3 Hours NB GE3N / N. Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 or BIOL 103 is recommended. BIOL 101 and either BIOL 102 or BIOL 103 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor. LEC.

BIOL 102. Principles of Biology Laboratory. 1 Hour LFE. Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). An honors laboratory (BIOL 103) is offered for students with superior academic records. Prerequisite: Concurrent enrollment in BIOL 100 is recommended. LAB.

BIOL 103. Principles of Biology Laboratory, Honors. 1 Hour LFE. Intended for non-science majors with superior academic records. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 101). Prerequisite: Membership in the College Honors Program or consent of instructor. Concurrent enrollment in BIOL 101 is recommended. LAB.

BIOL 105. Biology Orientation Seminar. 1 Hour N. Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about the UBP director on all undergraduate issues and provides a forum for concerns and suggestions.

Biology Courses by Topics

For a list of biology courses by topics, see Courses (http://kuub.ku.edu/courses/).

Related Biology Courses

A biological course from departments outside the Undergraduate Biology Program may count toward a B.A. degree (up to 4 hours of credit). Check with a biology faculty advisor to determine whether nonbiology courses are acceptable to satisfy biology degree requirements.

Ecology and Evolutionary Biology

The Department of Ecology and Evolutionary Biology (http://www2.ku.edu/~eeb/) offers M.A. and Ph.D. degrees in ecology and evolutionary biology, botany, and entomology.

Molecular Biosciences

The Department of Molecular Biosciences (http://www.molecularbiosciences.ku.edu/) offers Ph.D. degrees in biochemistry and biophysics; microbiology; and molecular, cellular, and developmental biology.

The B.S. degree in molecular biosciences is offered on the KU Edwards Campus (http://edwardscampus.ku.edu/).

Courses

BIOL 100. Principles of Biology. 3 Hours NB GE3N / N. Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101 and BIOL 103, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended. LEC.

BIOL 101. Principles of Biology, Honors. 3 Hours NB GE3N / N. Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 or BIOL 103 is recommended. BIOL 101 and either BIOL 102 or BIOL 103 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor. LEC.
BIOL 116. Introduction to Evolutionary Biology. 3 Hours N / LFE.
An account of evolutionary thinking from classical to contemporary time.
The emphasis is on mainstream developments (Darwinism, Mendelism,
the Modern Synthesis, Cultural Ecology), but certain social issues will be
examined (social Darwinism, creationism). LEC.

BIOL 120. Insects in Your World. 3 Hours NB GE3N / N.
Students will learn about the global impact of insects on human concerns,
both positive (pollination and decomposition) and negative (competition
with humans for food, fiber, and shelter, and disease transmission) while
developing an appreciation for the ways in which scientists work with
real problems involving insects. The course will cover the overwhelming
abundance and diversity of insects, and their life history, ecology,
behavior, and physiology. This course is intended for both nonbiology
and biology majors. Format: two lectures and one discussion section per
week. LEC.

BIOL 150. Principles of Molecular and Cellular Biology. 3 Hours NB
GE3N / N / LFE.
A course for biology majors and students planning to take additional
courses in biology. This course covers basic biochemistry, cell structure
and function, molecular biology, genetics, physiology, and development
of plants and animals. Three hours of lecture per week. An honors
section (BIOL 151) is offered for students with superior academic records.
Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and
CHEM 191; CHEM 150; or CHEM 170; or consent of instructor. LEC.

BIOL 151. Principles of Molecular and Cellular Biology, Honors. 3
Hours NB GE3N / N / LFE.
A course for students with superior academic records who are biology
majors or who plan to take additional courses in biology. This course
covers basic biochemistry, cell structure and function, molecular biology,
genetics, physiology, and development of plants and animals. Three
hours of lecture per week. An honors section (BIOL 151) is offered for students with superior academic records.
Prerequisite: Concurrent or prior enrollment in CHEM 130; CHEM 190 and
CHEM 191; CHEM 150; or CHEM 170; or consent of instructor. LEC.

BIOL 152. Principles of Organismal Biology. 3 Hours NB GE3N / N / 
LFE.
A course for biology majors and students who plan to take additional
courses in biology. This course covers basic elements of plant and animal
morphology and physiology, principles of evolution, organismal diversity
and phylogeny, population biology, population genetics, ecology, and
behavior. Three hours of lecture per week. An honors section (BIOL
153) is offered for students with superior academic records. Prerequisite:
Concurrent or prior enrollment in CHEM 130; CHEM 190 and CHEM 191;
CHEM 150; or CHEM 170; or consent of instructor. LEC.

BIOL 153. Principles of Organismal Biology, Honors. 3 Hours NB
GE3N / N / LFE.
A course for students with superior academic records who are biology
majors or planning to take additional courses in biology. This course
covers basic elements of plant and animal morphology and physiology,
principles of evolution, organismal diversity and phylogeny, population
biology, population genetics, ecology, and behavior. Three hours
of lecture per week. Prerequisite: Concurrent or prior enrollment in
CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170 and
membership in the University Honors Program; or consent of instructor.
LEC.

BIOL 154. Introductory Biology Lab for STEM Majors. 2 Hours N / 
LFE.
A hybrid laboratory course for majors in STEM fields. This hybrid
laboratory course will use online modules (~ 2 hours per week) to
introduce students to key core competencies (e.g., critical thinking,
quantitative reasoning, scientific communication, collaboration, etc.)
that are applicable to all STEM fields. Two hours of face-to-face laboratory
instruction will provide students hands-on opportunities to apply these
core competencies and skills to research questions in the biological
sciences. Students will apply research skills and engage in an authentic
research activity during the second half of the course and will present the
results to their peers in oral and written formats. LAB.

BIOL 155. Principle Lab in: ___. 1-3 Hours U / LFE.
This introductory laboratory exposes the students to basic principles in
biology and modern experimental techniques through an open-ended
authentic research experience directed by a faculty member. Prerequisite:
Consent of instructor. LEC.

BIOL 177. First Year Seminar: _____. 3 Hours NB GE11.
A limited-enrollment, seminar course for first-time freshmen, organized
around current issues in biology. Does not contribute to major
requirements in biology. First year seminar topics are coordinated and
approved through the Office of First Year Experiences. Prerequisite: First-
time freshman status. LEC.

BIOL 200. Basic Microbiology. 3 Hours NB GE3N / N.
Introduction to bacteria and viruses. Topics include historical development
of microbiology, bacterial structure and growth, enzymes and energy
production, disinfection, antibacterial drugs, gene transfer, viral
replication, infection and immunity, with emphasis on infectious diseases.
Can be substituted for BIOL 201 as a prerequisite for other microbiology
courses by consent of department. Not open to those with credit in BIOL
400, or BIOL 401. Prerequisite: A course in high school biology and a
course in high school chemistry. This course is not recommended for first
semester freshmen. LEC.

BIOL 203. Introductory Microbiology Laboratory. 2 Hours U / LFE.
Laboratory exercises to complement BIOL 200. Prerequisite: BIOL 200.
May be taken concurrently. LAB.

BIOL 210. Introduction to Clinical Laboratory Sciences. 1 Hour U.
An introductory overview of medical technology as a profession including
types of analyses performed, specialties, interrelationships in the health
care system and a visit to a clinical laboratory. This course will enable
those considering a major in medical technology to have a clear definition
of the profession. This course does not meet any degree requirements in
biology. No prerequisite. (Same as CLS 210.) LEC.

BIOL 225. Evolution and the History of Life. 3 Hours GE3N / N.
This introductory course for non-majors focuses on the significance of the
history of life and the fossil record for our understanding of evolution. Key
events in the history of life are considered, including the origins of life,
the eukaryotic cell, and humans. and also various mass extinctions. The
focus is on general scientific and evolutionary principles and mechanisms
that can be extracted from the study of the fossil record. It also uses the
lessons of the fossil record to consider the prospects for our own species.
LEC.

BIOL 240. Fundamentals of Human Anatomy. 3 Hours N.
Introduction to the gross anatomy of the human body. Covers the spatial
arrangement and appearance of structures throughout the body, including
visual identification of these structures. Musculoskeletal relationships, and
the anatomy of major organ systems, are emphasized. Not intended for
biology majors. Prerequisite: BIOL 100, or equivalent. LEC.
BIOL 241. Human Anatomy Observation Laboratory. 2 Hours U / LFE.
One of the two laboratories in gross anatomy designed to complement
BIOL 240. Emphasizes the three-dimensional appearance and spatial
relationships of anatomical structures through supervised observations of
pre-dissected human cadavers. Limited to students enrolled in, or seeking
admission to, programs that require a human anatomy observation
laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is
required. LAB.

BIOL 246. Principles of Human Physiology. 3 Hours N.
An introduction to the physiological and biochemical processes and
general physiological principles necessary to sustain life. Organ and
organ system processes are emphasized. Intended for students majoring
in allied health or sports related curricula who require a course in human
physiology. Not intended for biology majors. Prerequisite: BIOL 100 or
equivalent. LEC.

BIOL 247. Principles of Human Physiology Laboratory. 2 Hours U /
LFE.
Designed to complement BIOL 246. Uses experiments and simulations to
demonstrate laboratory techniques and representative processes in areas
of human physiology. Concurrent or prior enrollment in BIOL 246 required.
LAB.

BIOL 350. Principles of Genetics. 4 Hours N.
Why are related individuals more similar than unrelated individuals and
what is the basis for heritable traits? From Mendel's discoveries of the
patterns of genetic inheritance, to the study of transmissible hereditary
factors, genetics is central to understanding the biological sciences.
Topics include molecular genetics and genetic engineering; Mendelian
genetics and mapping; control of gene expression; cytot genetics;
epigenetics and non-Mendelian genetics; and population and quantitative
genetics. Examples are taken from a wide variety of organisms, including
viruses, bacteria, plants, fungi, insects, and humans. Prerequisite: CHEM
135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or
higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL
152 or BIOL 153 with a grade of C- or higher; or consent of instructor.
LEC.

BIOL 360. Principles of Genetics, Honors. 4 Hours N.
The science of genetics aims to explain why individuals differ from
one another and how these differences are inherited. Honors Genetics
covers all core topics in fundamental genetics: Mendelian inheritance,
meiosis and recombination, mutation, molecular genetics, population
 genetics, quantitative genetics and genomics. Special attention given to
the practice of genetics and the complex relationship between genotype,
phenotype and environment. A broader goal of Honors Genetics is to
provide students a framework for understanding recent advances in
medical genetics and the modern era of personal genomics. Prerequisite:
CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C-
or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL
152 or BIOL 153 with a grade of C- or higher and membership in the
University Honors Program; or consent of the instructor. LEC.

BIOL 400. Fundamentals of Microbiology. 3 Hours NB GE3N / N.
Fundamental principles of microbiology with emphasis on physical and
chemical properties of the bacterial cell; microbial metabolism, cultivation,
growth and death of bacteria; microbial genetics, pathogenesis and
immunity, industrially important microorganisms. Prerequisite: BIOL 150
or BIOL 151 with a grade of C- or higher and two semesters of college
chemistry with a grade of C- or higher, or consent of the instructor. LEC.

BIOL 401. Fundamentals of Microbiology, Honors. 4 Hours N.
Honors section of BIOL 400 and BIOL 612, by application and invitation.
Prerequisite: BIOL 150 or BIOL 151, two semesters of college chemistry,
and membership in the University Honors Program, or consent of the
instructor. LEC.

BIOL 402. Fundamentals of Microbiology Laboratory. 2 Hours U /
LFE.
Laboratory exercises designed to complement BIOL 400 or BIOL
700. Prerequisite: BIOL 400 or BIOL 612, or BIOL 400 or BIOL 612
concurrently. LAB.

BIOL 405. Laboratory in Genetics. 3 Hours U / LFE.
A laboratory course that provides hands-on experience with classical
genetics and modern molecular genetics. Experiments involve Mendelian
 genetics (dominance/recessivity, complementation, segregation,
 independent assortment) in eukaryotic organisms; recombinant DNA;
basic bacterial genetics; polymerase chain reaction; DNA sequencing;
computational genetics; and genome editing. Prerequisite: Concurrent or
prior enrollment in BIOL 350. LAB.

BIOL 412. Evolutionary Biology. 4 Hours N.
Introduction to the patterns and processes of organic evolution.
Considered are the history of evolutionary thought, molecular evolution,
genetics and microevolution, selection and adaptation, and speciation
and macroevolution. Emphasis will be placed on how scientists study and
document change over time in natural populations, methods for testing
hypotheses about events in evolutionary history, and how discovering
evolutionary mechanisms at one level of organization can help to
explicate general processes in the natural world. Prerequisite: BIOL 152
and BIOL 350, or consent of the instructor. LEC.

BIOL 413. History and Diversity of Organisms. 3 Hours N / LFE.
An integrated lecture and laboratory course presenting an overview of
the variety and ancestry of life on earth. Using representatives from
prokaryotes, protists, plants, fungi, and animals, principles of phylogenetic
reconstruction are illustrated and evolutionary trends in the life history
features, functional morphology, and structural complexity of extant and
extinct organisms are presented. Two hours of lecture and three hours of
laboratory per week. Prerequisite: BIOL 152 or BIOL 153, or consent of
the instructor. LEC.

BIOL 414. Principles of Ecology. 3 Hours N.
Study of the principles underlying species population density changes,
community structure and dynamics, biogeochemical cycles, and
energy flow and nutrient cycling in ecosystems. (Same as EVRN 414.)
Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.

BIOL 415. Field and Laboratory Methods in Ecology. 2 Hours N.
This course complements BIOL 414 with field trips and laboratory
exercises that illustrate the basic concepts of ecology. Topics covered
include methodologies for quantitative sampling of terrestrial and aquatic
systems, design of field studies, computer simulation and digital data
analysis techniques, and scientific writing. Prerequisite: Concurrent or
prior enrollment in BIOL 414. A statistics course is recommended. FLD.

BIOL 416. Cell Structure and Function. 3 Hours N.
Lecture survey of molecular cell biology with emphasis on experimental
approaches to understanding cell function; topics include biological
membranes and transmembrane transport, vesicular trafficking (secretion
and endocytosis), cell signaling, cell motility and the cytoskeleton, and
the regulation of the cell division cycle. Prerequisite: BIOL 150 or BIOL
151; BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190
and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM
196; or consent of the instructor. LEC.

BIOL 417. Biology of Development. 3 Hours N.
A general course designed to introduce students to the developmental
biology of animals. Emphasis is placed on understanding how a
single-celled fertilized egg develops into a complex multicellular
organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating development, including classic embryology and modern molecular genetics. Prerequisite: BIOL 350 and BIOL 416 or consent of the instructor. LEC.

**BIOL 418. Laboratory in: ______. 1-3 Hours U / LFE.**
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor. LAB.

**BIOL 419. Topics in: ______. 1-3 Hours N / LFE.**
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs. IND.

**BIOL 420. Seminar: ______. 1-3 Hours N.**
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor. LEC.

**BIOL 421. Topics in Molecular Biosciences: ______. 3 Hours N.**
Lecture instruction and the preparation and presentation of oral and written reports on selected topics from the recent research literature in molecular biosciences. Students may enroll in a given topic only once. Prerequisite: Course work varying with the topic of the seminar; or consent of instructor. LEC.

**BIOL 423. Non-laboratory Independent Study. 1-9 Hours AE61 / N.**
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

**BIOL 424. Independent Study. 1-9 Hours AE61 / N.**
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

**BIOL 425. Teaching Apprenticeship in Biology. 1-9 Hours N.**
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology. FLD.

**BIOL 426. Laboratory in Cell Biology. 3 Hours U / LFE.**
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; concurrent or prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended. LAB.

**BIOL 428. Introduction to Systematics. 3 Hours N.**
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systemsatics background. LEC.

**BIOL 430. Laboratory in Molecular Biology. 3 Hours U / LFE.**
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology. LAB.

**BIOL 435. Introduction to Neurobiology. 3 Hours N.**
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Prerequisite: BIOL 350 and BIOL 416 or consent of the instructor. LEC.

**BIOL 440. Advanced Human Anatomy. 6 Hours N / LFE.**
Integrated lecture and laboratory course designed to provide students with a detailed understanding of the structure of the human body. Cadaver dissection will reinforce three-dimensional relationships discussed in lecture and each of the main organ systems will be considered using a regional approach to the body. Prerequisite: BIOL 152 or equivalent; BIOL 240 and BIOL 241, or BIOL 240 and BIOL 442 or BIOL 242; and consent of the instructor. LEC.

**BIOL 442. Human Anatomy Dissection Laboratory. 3 Hours U.**
Laboratory in gross anatomy designed to build on content from BIOL 240 and BIOL 241. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial dissecting experience. Students perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Prerequisite: BIOL 240 and BIOL 241, and consent of the instructor. LAB.

**BIOL 448. Kansas Plants. 3 Hours N.**
A study of common and important non-cultivated Kansas plants, with special emphasis on the ecology of the state; paleoecological and paleobotanical background of the central prairies and plains; present climate, physiography and vegetation; poisonous, edible, and medicinal plants; identification by means of simplified keys. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

**BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Hours AE61 / N / LFE.**
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor. LAB.

**BIOL 451. Ecosystems Stewardship. 3 Hours.**
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of
stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 451 and GEOG 451.) FL.D.

BIOL 454. Brain Diseases and Neurological Disorders. 3 Hours N.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 416 or BIOL 435 or BIOL 546, or consent of instructor. LEC.

BIOL 477. Ecology and Global Change. 3 Hours N.
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor. LEC.

BIOL 480. Biology and Diversity of Parasites. 3 Hours N.
Introductory lecture course to the field of Parasitology. Provides basic knowledge about the morphology and biology of parasitic animals. Coverage includes a diversity of protozoan and metazoan groups parasitizing animals, including humans (e.g., malaria, amoebas, hookworms, tapeworms). Some emphasis is given to groups of parasites of particular medical and/or economic importance. Selected principles of parasitism are introduced. Prerequisite: BIOL 152 or BIOL 153, or permission of instructor. LEC.

BIOL 481. Parasitology Laboratory. 1 Hour U / LFE.
Laboratory course in the study of protozoan and metazoan parasites of animal, including humans, emphasizing their diversity, classification, morphology, and identification. One three-hour laboratory each week. Prerequisite: Concurrent or prior enrollment in BIOL 480. LAB.

BIOL 490. Internship and Practical Applications. 1-6 Hours AE61 / N.
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor. INT.

BIOL 494. Introduction to Mammalogy. 3 Hours / LFE.
A study of mammals, with emphasis on evolution, biogeography, systematics, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 152 or 153 or permission of instructor. LEC.

BIOL 499. Introduction to Honors Research. 2 Hours N.
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level natural sciences coursework or consent of instructor. LEC.

BIOL 500. Biology of Insects. 3 Hours N.
Lectures and demonstrations providing an introduction to the study of insects, including general classification, structure, phylogeny, identification, development, physiology, behavior, ecology, and relations to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

BIOL 501. Physiological Adaptations of Plants to Extreme Environments. 3 Hours N.
Exploration of physiological adaptations of plants to bright sunlight deep shade, drought flooding, excess heat subfreezing, excess elements and too few elements. Examples of adaptations include: red leaves, blue leaves, succulence, root “knees”, moving leaves, frozen leaves, heavy metal plants, carnivorous plants, parasitic plants, epiphytes. Prerequisite: BIOL 150 or BIOL 152 or consent of instructor. LEC.

BIOL 502. Laboratory in Insect Biology and Diversity. 2 Hours U / LFE.
Laboratory and field studies of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent. LAB.

BIOL 503. Immunology. 3 Hours N.
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness, hypersensitivity; specific immunologic tolerance. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. LEC.

BIOL 504. Immunology Laboratory. 2 Hours U / LFE.
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently. LAB.

BIOL 506. Bacterial Infectious Diseases. 3 Hours N.
Explores bacterial infectious diseases from the perspective of how disease is established and the mechanisms that underlie disease, as well as how to treat and prevent infectious disease. Not open to freshmen or sophomores. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor. LEC.

BIOL 507. Bacterial Infectious Diseases Laboratory. 2 Hours U / LFE.
Laboratory to complement BIOL 506. Cultivation of pathogenic microorganisms, diagnostic procedures, and experiments to demonstrate various aspects of microbial pathogenicity and host responses. Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or consent of instructor. LAB.

BIOL 509. Biology of Spiders. 3 Hours N.
An introduction to the evolution, anatomy, physiology, behavior, and ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship and mating; predation; social behavior; and the role of spiders in natural and agricultural ecosystems. Concurrent enrollment in BIOL 511 is encouraged. Prerequisite: BIOL 152 , BIOL 153 or permission of instructor. LEC.

BIOL 510. Comparative Anatomy. 5 Hours N / LFE.
Structure, function, and evolution of the vertebrates. Lectures and laboratory study. A course designed for zoologists. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 511. Biology of Spiders Laboratory. 1 Hour U / LFE.
Topics will include comparative biology of arachnid orders (spiders, scorpions, harvestmen, mites, and others), external and internal anatomy
of spiders, identification of common spider families and genera, and
spider behavior. Students will be required to make a small collection
(collect, preserve, and identify specimens). Prerequisite: BIOL 509;
concurrent enrollment is preferred. LAB.
BIOL 512. General Virology. 3 Hours N.
Lectures and discussions covering the basic nature and characteristics of
viruses from a general biological point of view: viruses of bacteria, animals
and plants, physical-chemical properties; host cell-viral interactions; mode
of replication of DNA and RNA viruses, tumor viruses. Prerequisite: BIOL
400 or BIOL 401 with a grade of C- or higher, or consent of instructor.
LEC.

BIOL 513. Virology Laboratory. 2 Hours U / LFE.
Experiments involving cultivation, quantitation, and identification of animal
viruses, continuous cell culture and primary chicken embryo culture
techniques. Molecular biology techniques are used to demonstrate the
steps in virus replication. The value of viruses as tools to understand
normal cellular processes is emphasized in experiments which
demonstrate the relative simplicity of viruses and the relative complexity of
eukaryotic cells. Demonstrations include transformation of cells by tumor
viruses and electron microscopy of virus particles. Prerequisite: BIOL 402
and BIOL 512, or consent of instructor. LAB.

BIOL 518. Microbial Genetics. 3 Hours N.
Bacteria and viruses as models of genetic systems. Mutagenesis and
repair. Transformation, transductions, and recombination. Molecular
biology of gene expression. Prerequisite: BIOL 400 or BIOL 401 with a
grade of C- or higher or consent of instructor. LEC.

BIOL 519. Microbial Genetics Laboratory. 2 Hours U / LFE.
A laboratory course on the genetic analysis of bacteria. Includes
mutagenesis, cloning, agarose and polyacrylamide gel electrophoresis,
PCR, regulation of gene expression, and computational analysis of DNA
sequences and protein structures. Prerequisite: BIOL 350 or BIOL 360.
LAB.

BIOL 520. Marine Biology. 3 Hours N.
This introductory course covers biological, physical, and chemical ocean
sciences, with an emphasis on ecological aspects. In addition to this
Lawrence campus course, students may enroll for a supplementary 1
credit field trip class to a Caribbean coral reef island offered in December
or January. Prerequisite: BIOL 414 or permission of the instructor. LEC.

BIOL 521. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living
and fossil orders and the more common families primarily on the basis
of external morphology. The biology, ecology, phylogeny, and geological
history of each order is covered. Includes both lectures and laboratory
exercises. The course is offered at the 500 and 700 levels, with additional
assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or
equivalent, or permission of instructor. LEC.

BIOL 524. Mammalian Paleontology. 3 Hours.
Evolution of mammals, and anatomical modifications involved in the
process as ascertained from the fossil record. Lectures and laboratory.
(Same as GEOL 524.) Prerequisite: One of the following: BIOL 225, BIOL
412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor. LEC.

BIOL 525. Aquatic Entomology. 4 Hours N.
Designed to enable students to develop skill in the area of identification of
aquatic insects and to gain a detailed comprehension of their community
structure and dynamics. The external morphology of all aquatic orders
is covered, followed by consideration of specific physiological and
behavioral adaptations that facilitate an aquatic existence. Includes
both lectures and laboratory exercises. Requirements include making a
collection of aquatic insects. The course is offered at the 500 and 700
levels, with additional assignments at the 700 level. Prerequisite: BIOL
414 or BIOL 500. LEC.

BIOL 527. Primate Evolution and the Fossil Record. 3 Hours N.
This course exposes students to fundamental concepts of paleontology
and evolutionary biology using the mammalian order Primates as a
high-profile case study. Primates are interesting partly because humans
are primates. Hence, scientific understanding of human origins and
human evolution must be grounded in knowledge of our nearest relatives.
This course places human origins within the broader framework of
how primates have evolved over the course of the Cenozoic Era, often
in response to radical changes in the Earth's physical environment.
Prerequisite: BIOL 412 or BIOL 413, or consent of the instructor. LEC.

BIOL 528. External Morphology of Insects. 4 Hours N.
A study of external structure common to all insect orders, with detailed
comparative laboratory studies of representative species. Includes both
lectures and laboratory exercises. The course is offered at the 500 and
700 levels, with additional assignments at the 700 level. Prerequisite:
BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 530. Biodiversity Discovery and Assessment. 2 Hours N.
An integrated lecture and laboratory course designed to provide an
overview of modern methods in biodiversity exploration and discovery.
Lectures cover the theory and practice of planning fieldwork in remote
locations, documenting species and their natural history, how museum
collections are made, calculating and comparing species richness
estimates, and the process of describing and naming new species. The
laboratory component provides students experience in documenting
species and their natural history, processing and curating samples of
natural history specimens, and the statistical analysis of biodiversity data.
(Same as EVRN 530.) Prerequisite: BIOL 152, 153, or equivalent, or
permission of instructor. LEC.

BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Hour U.
An introduction to modern field methods of assessing biodiversity.
Fieldwork employs insects and various field methods to estimate and
compare species diversity between different habitats and field sites.
Taught at different sites in tropical South America over Spring Break.
Contact Undergraduate Biology, or the Office of Study Abroad. (Same
as EVRN 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission
of instructor. Concurrent or prior enrollment of BIOL 530 is strongly
couraged. LAB.

BIOL 533. Biology of Fungi. 4 Hours N / LFE.
A study of the major groups of fungi from slime molds to mushrooms.
Emphasis on their activities in natural substrates, isolation techniques,
parasitic and mutualistic relationships with other organisms, uses
in research, industrial applications, production of mycotoxins and
poisons, and physiological, genetic and reproductive behavior. Lectures,
laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or
BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 536. Cell Structure and Function (Honors). 3 Hours N.
BIOL 536 is the honors version of BIOL 416. Completion of this class
will satisfy the BIOL 416 requirement. Open to students in the Honors
program or by permission of instructor. Prerequisite: BIOL 350 or consent
of instructor. LEC.

BIOL 540. General Invertebrate Zoology. 4 Hours N / LFE.
Phylogeny, physiology, and embryology; evolutionary processes;
characteristics of major ecological groupings. Laboratory will consider
major taxonomic categories with emphasis on functional morphology and
its evolutionary modifications. Prerequisite: BIOL 152 or BIOL 153. LEC.
BIOL 541. Biology of Freshwater Invertebrates. 3 Hours N.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 and/or BIOL 540. LEC.

BIOL 544. Comparative Animal Physiology. 3 Hours N.
An intermediate physiology course with lectures and discussions of the structures, functions, mechanisms, and interactions of vertebrate and invertebrate organ systems with a focus on the different ways in which animals adapt to their environments. Topics include digestion and nutrition, metabolism, gas exchange, circulation, excretion, neurophysiology, endocrinology, and muscle physiology. Prerequisite: BIOL 152 or BIOL 153, and CHEM 330, or consent of instructor. A college physics course is recommended but not required. LEC.

BIOL 545. Evolution of Development. 4 Hours AE61 / N.
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent. LEC.

BIOL 546. Mammalian Physiology. 3 Hours N.
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and CHEM 330 or consent of instructor. LEC.

BIOL 547. Mammalian Physiology Laboratory. 2 Hours U / LFE.
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 546. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 546 or BIOL 646. LAB.

BIOL 555. General Plant Physiology. 3 Hours N.
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: Consent of instructor. LEC.

BIOL 560. Histology. 3 Hours N.
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153. LEC.

BIOL 570. Introduction to Biostatistics. 4 Hours N / LFE.
Statistical concepts related to biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, emphasizing the analysis of variation. Prerequisite: College algebra and ten hours of natural science. LEC.

BIOL 571. Introduction to Biostatistics Laboratory. 2 Hours U / LFE.
Introductory statistical analyses on microcomputers. Data entry and export; simple graphs and exploratory data analysis; descriptive statistics; sampling; point and interval estimation; one and two sample t-tests; Chi-square; regression and correlation; analysis of variance; and nonparametric methods. Prerequisite: BIOL 570 or equivalent (may be taken concurrently). LAB.

BIOL 582. Principles of Biogeography. 3 Hours N.
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macroevolutionary trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor. LEC.

BIOL 583. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. LEC.

BIOL 584. Ichthyology. 4 Hours N / LFE.
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. This course meets with BIOL 792. Students taking this course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 and/or BIOL 413. LEC.

BIOL 589. Human Genetics. 3 Hours N.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350 or BIOL 360. LEC.

BIOL 598. Research Methods. 3 Hours N / LFE.
An introduction to the foundational concepts that underpin scientific inquiry and problem solving. Coursework is built around three student-designed inquiries, and topics considered within that context include experimental variables, basic principles of statistics, safety and ethics of investigation, professional communication techniques, and appropriate literature review. Enrollment priority will be given to students currently admitted to the UKanTeach program. LEC.
BIOL 599. Senior Seminar: _____  1 Hour AE61 / N.
A synthesis and discussion of current trends in a discipline or disciplines related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline's state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences. LEC.

BIOL 600. Introductory Biochemistry, Lectures. 3 Hours N.
Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry. LEC.

BIOL 601. Principles of Biochemistry Laboratory. 2 Hours.
Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite: BIOL 600; or consent of instructor. LAB.

BIOL 602. Plant Ecology. 3 Hours N.
Introduction to basic concepts, focused at community and species level. Architectural ecomorphology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession as an interaction among species differing in ecomorphology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemic defenses; genealogy; paleoecology. Prerequisite: BIOL 414 or consent of instructor. Concurrent enrollment in parallel laboratory, BIOL 607, recommended. LEC.

BIOL 603. Systematic Botany. 3 Hours N / LFE.
A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent. LEC.

BIOL 606. Ecological Plant Physiology. 3 Hours N.
Physiological responses of higher plants to environmental factors are discussed. Major topics are: water relations, heat transfer, resistance to water and temperature stress, dormancy, photoperiodism, photosynthesis and respiration under natural conditions, and effects of environmental pollution. Prerequisite: Consent of instructor. LEC.

BIOL 607. Field and Laboratory Exercises in Plant Ecology. 2 Hours U / LFE.
Introduction to quantitative analysis of plant communities and correlated environmental parameters; field and/or laboratory measurements of ecophysiological traits and comparative ecomorphology of principal species. Prerequisite: BIOL 414. Concurrent enrollment in parallel lecture, BIOL 602, recommended, but not required. LAB.

BIOL 612. Fundamentals of Microbiology. 3 Hours NB / N.
Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor. LEC.

BIOL 616. Medical Entomology. 3 Hours N.
A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor. LEC.

BIOL 622. Paleontology. 3 Hours N.
A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as GEOL 521.) Prerequisite: BIOL 100, BIOL 101, BIOL 152, BIOL 153, GEO 105, or GEOL 304. LEC.

BIOL 623. Paleontology Laboratory. 1 Hour U / LFE.
Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as GEOL 523.) LAB.

BIOL 625. Behavioral Ecology and Sociobiology. 3 Hours N.
The role of natural selection in animal behavior, and the influence of behavior on population biology and social dynamics of animal species. Topics include: game theory and optimization as applied to animal behavior; altruism, cooperation and competition; kin recognition and interactions; group formation and dynamics, dominance, aggression, and territoriality; feeding strategies; reproductive behavior including mate choice, parental care, and mating systems. Prerequisite: BIOL 152; either BIOL 350, BIOL 412 or BIOL 414 recommended; or consent of instructor. LEC.

BIOL 630. Conservation and Wildlife Biology. 3 Hours N.
Examination of the concepts and processes involved in conservation of plant and animal populations and communities. Topics to be covered include conservation of endangered species, problems with invasions of exotic species and habitat fragmentation, wildlife management, and design of nature reserves. Prerequisite: BIOL 414, BIOL 412 strongly recommended. LEC.

BIOL 636. Biochemistry I. 4 Hours N.
First semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the physical structure of macromolecules and membranes, enzyme structure/function, and enzyme kinetics. Prerequisite: CHEM 335 or consent of instructor. LEC.

BIOL 637. Introductory Biochemistry Laboratory. 2 Hours U / LFE.
The laboratory portion of BIOL 600 or 636. Experiments have been selected to introduce the student to cell constituents and biochemical reactions. One four-hour laboratory and one-hour lecture each week. Prerequisite: BIOL 600 or BIOL 636, or concurrent enrollment. LAB.

BIOL 638. Biochemistry II. 4 Hours N.
Second semester of a two-semester lecture course in introductory biochemistry. Emphasis upon the metabolism of carbohydrates, lipids, amino acids, proteins, and nucleic acids. Prerequisite: CHEM 335 with a grade of C or higher and BIOL 636 with a grade of C or higher, or consent of instructor. LEC.

BIOL 639. Advanced Biochemistry Laboratory. 3 Hours AE61 / U / LFE.
The laboratory portion of BIOL 638. One four-hour laboratory and a one-hour lecture each week. Experiments have been selected to familiarize students with experimental biochemical techniques using state-of-the-art techniques.
methodology. Prerequisite: BIOL 637 and BIOL 638 (BIOL 638 may be taken concurrently). LAB.

BIOL 640. The Biology and Evolution of Fossil Plants. 3 Hours N.
A lecture course in which fossil plants, proplasts and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. (Same as GEOL 528.) Prerequisite: BIOL 413 or permission of instructor. LEC.

BIOL 641. Laboratory in Paleobotany. 1 Hour U / LFE.
An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. (Same as GEOL 529.) Prerequisite: BIOL 413 or permission of instructor. Must be taken concurrently with BIOL 640. LAB.

BIOL 642. Bioinformatics III: Machines on Genes. 4 Hours N.
This one-semester lecture course for biochemistry majors is designed to complement the topics covered in BIOL 636 and BIOL 638. Emphasis will be placed on the various molecular machines involved in the transmission and utilization of genetic information, providing a biochemical perspective of replication, transcription, and translation. Prerequisite: BIOL 636 and BIOL 638 with a grade of C or higher. LEC.

BIOL 648. Systematics and Macroevolution. 3 Hours N.
An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including testing of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 650. Advanced Neurobiology. 3 Hours N.
The course builds an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

BIOL 652. Comparative Animal Behavior. 3 Hours N.
A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite. LEC.

BIOL 654. Comparative Animal Behavior, Laboratory. 1 Hour U / LFE.
Laboratory and field phase of BIOL 652. Students may elect sections according to their special interests. Prerequisite: Prior or concurrent enrollment in BIOL 652. LAB.

BIOL 655. Behavioral Genetics. 3 Hours N.
A survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 656. Ecosystem Ecology. 3 Hours N.
An introduction to the patterns and processes that affect terrestrial ecosystems. Emphasis is placed on understanding nutrient cycles (e.g., carbon nitrogen phosphorous), hydrologic cycles, and patterns of net primary productivity. The role of both natural and anthropogenic disturbances in structuring terrestrial ecosystems is examined in the context of global land-use patterns. Discussion of current research literature will be expected. (Same as EVRN 656.) Prerequisite: BIOL 414 and CHEM 130. LEC.

BIOL 660. Summer Field Ecology. 3 Hours N.
An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as EVRN 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N). LAB.

BIOL 661. Ecology of Rivers and Lakes. 3 Hours N.
Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended. LEC.

BIOL 662. Aquatic Ecology Laboratory. 2 Hours U / LFE.
A field and laboratory course introducing biological, physical, and chemical characteristics of lentic (ponds and lakes) and lotic (creeks and rivers) habitats. Students learn sampling and monitoring techniques and how to classify aquatic biota at higher taxonomic levels. Prerequisite: Corequisite: CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and BIOL 661. LAB.

BIOL 667. Chemical Communication in Sex, Feeding, and Fighting. 3 Hours N.
The course focuses on the role of chemical information molecules in the interrelationships among organisms, with particular attention to interactions (a) within and between animal species, (b) within and between plant species, (c) between animals and plants, (d) between predators and prey, and (e) between parasites and hosts. Prerequisite: BIOL 100 or BIOL 101 or BIOL 152 or BIOL 153 or consent of instructor. LEC.

BIOL 668. Evolutionary Ecology. 3 Hours N.
Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor. LEC.

BIOL 672. Gene Expression. 3 Hours N.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 673. Cellular and Molecular Neurobiology. 3 Hours.
Mechanisms of neural function and development will be considered at the cellular and molecular levels. Synaptic mechanisms of learning and memory, modulation of transmitter release, and the molecular basis of neurodegenerative disorders will also be discussed. Prerequisite: BIOL 435, BIOL 646, or permission of instructor. LEC.
BIOL 680. Genomics. 3 Hours N.
Genomics is the study of the structure, function and evolution of the genome. High-throughput technologies have given us the ability to easily and quickly sequence genomes, and measure genomewide patterns of gene expression. These tools, and the vast amounts of genome-scale data they provide, have transformed biology and medicine. This course will cover the key technological and computational methods by which genomic DNA is sequenced, genomes are assembled, and how RNA and epigenetic patterns are measured. Subsequently, we will emphasize how these genomics tools and techniques have deepened our understanding of biology, covering questions from diverse fields to illustrate the impact of genomics on evolutionary biology, molecular and developmental genetics, human medical genetics and personalized, precision medicine. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. LEC.

BIOL 688. The Molecular Biology of Cancer. 3 Hours N.
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor. LEC.

BIOL 694. The Art of Becoming a Professional Scientist. 3 Hours N.
Discusses aspects of graduate education that are directed at students entering graduate school and that focus on how to be successful in the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One three hour discussion per week. Senior standing and planning on entering graduate school. LEC.

BIOL 699. Biology Honors Research Colloquium. 1 Hour AE61 / U.
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor. LEC.

BIOL 700. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 701. Topics in: ____. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests. LEC.

BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Hours.
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences. LAB.

BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Hour.
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry. LEC.

BIOL 706. Natural Sciences Curation and Collections Management. 3 Hours.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloguing, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum’s paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art’s ethnographic collections. Student projects will involve one of the museum’s collections with the opportunity for hands-on experience. (Same as MUSE 710.) LEC.

BIOL 708. External Morphology of Insects. 4 Hours.
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 711. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and geological history of each order will be covered. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500 and BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 712. Evolutionary Biology - Graduate. 3 Hours.
A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent or consent of instructor. LEC.

BIOL 714. Graduate Ecology. 3 Hours.
A thorough survey of the discipline of ecology. Topics include elements in physiological, population, community and ecosystem ecology. Overarching themes are 1) pattern and process, 2) ecology and evolution, 3) hierarchical nature of ecology, 4) variation in space and time, and 5) human dimensions of ecology. Prerequisite: Graduate standing or consent of instructor. LEC.

BIOL 720. Scientific Illustration. 3 Hours.
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor. LEC.
BIOL 725. Aquatic Entomology. 4 Hours.
Identification of aquatic insects and detailed study of their community structure and dynamics. The external morphology of all aquatic orders will be covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500 or permission of instructor. LEC.

BIOL 735. Scientific Communication. 3 Hours.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.) LEC.

BIOL 741. Biology of Freshwater Invertebrates. 3 Hours.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Graduate students will be expected to submit either an original collection of freshwater invertebrates or write a research essay on a topic mutually agreed upon with the professor. Not open to students who have taken BIOL 541. Prerequisite: Graduate standing; recommended: undergraduate invertebrate biology class. LEC.

BIOL 742. Plant Population Biology. 3 Hours.
A survey of the major areas of plant population ecology and genetics including competition, demography, pollination ecology, gene flow, natural selection and mating systems. Each topic is introduced by a lecture and is further explored by discussion of the current literature. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 743. Population Genetics. 3 Hours.
Description and discussion of genetic variation in natural populations. The effects and interaction of selection, migration, mutation, mating systems, and finite population size on the maintenance of genetic variation. Discussion of the interface with evolution and population ecology. Prerequisite: BIOL 350 and BIOL 412 or equivalent. LEC.

BIOL 747. Quantitative Genetics. 3 Hours.
A discussion of genetic traits for which individual gene differences do not separate a population into qualitatively distinct groups. Includes the estimation of heritability, genetic determination, and number of loci, and a study of selection theory. Prerequisite: BIOL 404 or BIOL 412 or equivalent and a course in statistics. LEC.

BIOL 750. Advanced Biochemistry. 3 Hours.
The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor. LEC.

BIOL 752. Cell Biology. 3 Hours.
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor. LEC.

BIOL 753. Advanced Genetics. 3 Hours.
An advanced course in modern genetic analysis of eukaryotes. Course material will consist mainly of primary literature in the field of genetics. Topics covered include: genomic structure and genome projects; nature of mutations; mutant analysis; genetic recombination and mapping; analysis of gene function; genetic buffering; RNAi and epigenetics; and the genetics of model organisms. This course is meant for graduate students in the Molecular Biosciences and Genetics programs. Prerequisite: BIOL 807 and BIOL 808, or a course in genetics and a course in biochemistry, or permission of the instructor. LEC.

BIOL 754. Brain Diseases and Neurological Disorders. 3 Hours.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor. LEC.

BIOL 755. Mechanisms of Development. 3 Hours.
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor. LEC.

BIOL 757. Carcinogenesis and Cancer Biology. 3 Hours.
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor. LEC.

BIOL 759. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.) FLD.

BIOL 772. Gene Expression. 4 Hours.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. This course meets concurrently with BIOL 672 and is open to graduate students seeking a more rigorous treatment of techniques in molecular biology that students receive in BIOL 672. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint.
BIO 782. Principles of Biogeography. 3 Hours.
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended. LEC.

BIO 783. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. Students taking the course at the 700 level will have additional work required of them. Prerequisite: BIO 152 Principles of Organismal Biology, and/or BIO 413 History and Diversity of Organisms. LEC.

BIO 784. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution’s public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIO 785. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIO 786. Fundamentals of Tropical Biology. 1-8 Hours.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August. FLD.

BIO 787. Introduction to Museum Exhibits. 3 Hours.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIO 788. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, GEOL 782, HIST 720, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIO 790. Paleontology of Lower Vertebrates. 3 Hours.
General account of the osteology, geologic distribution, and evolution of the principal groups of fishes, amphibians, reptiles, and birds. Lectures and laboratory. Prerequisite: GEOL 105 or GEOL 304, or GEOL 521. LEC.

BIO 792. Ichthyology. 4 Hours.
A study of fishes. Lecture topics include the structure and function of fishes; the adaptations of fishes to the aquatic environment; and a survey of major fish groups with emphasis on evolutionary relationships and biogeography. Laboratory topics include a survey of fishes using specimens, and the use of keys to identify fishes with emphasis on the Kansas fish fauna. A research paper using primary scientific literature is required. Prerequisite: Graduate standing or permission of the instructor. LEC.

BIO 794. Mammalogy. 3 Hours.
A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIO 100 or BIO 413. LEC.

BIO 795. Biology of Amphibians. 3 Hours.
Evolutionary biology of amphibians with emphasis on systematics, morphology, development, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: Permission of instructor. LEC.

BIO 796. Biology of Reptiles. 3 Hours.
Evolutionary biology of reptiles with emphasis on systematics, morphology, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: Permission of instructor. LEC.

BIO 797. Field Course in Vertebrate Paleontology. 3-6 Hours.
Training in the techniques of collecting vertebrate fossils, description and interpretation of the stratigraphy of fossiliferous sediments, and interpretation of the adequacy and bias of samples. FLD.

BIO 798. Introduction to Collections Management and Utilization. 3 Hours.
This course examines the roles collections play in fulfilling a museum’s mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor. LEC.

BIO 801. Topics in: _____. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests. LEC.

BIO 802. The Art of Becoming a Professional Scientist. 3 Hours.
Discusses aspects of graduate education that are directed at the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One 3-hour discussion per week. LEC.

BIO 805. Scientific Integrity in Ecology and Evolutionary Biology. 1 Hour.
This course covers the responsible conduct of research to help students initiate research projects ethically. Topics covered include expectations of federal granting agencies and the university, best practices for data management and publishing, and professional development as a graduate student. Prerequisite: Admission to the graduate program in Ecology and Evolutionary Biology, or consent of instructor. LEC.

BIO 807. Graduate Molecular Biosciences. 3 Hours.
An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for
BIOL 895. Human Genetics. 3 Hours.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics. LEC.

BIOL 899. Master’s Thesis. 1-10 Hours.
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory/unsatisfactory basis. THE.

BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Hour.
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission. LEC.

BIOL 902. Graduate Seminar in Molecular, Cellular, and Developmental Biology. 1 Hour.
Advanced course examining current research topics in molecular, cellular, and developmental biology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental permission. SEM.

BIOL 905. Advanced Molecular Genetics. 1-3 Hours.
A review of current literature in molecular genetics. RSH.

BIOL 906. Advanced Genetics. 1-3 Hours.
May be repeated for credit up to six hours. Review of current literature and genetic theory of selected topics such as population, molecular, quantitative, and physiological genetics. RSH.
BIOL 918. Modern Biochemical and Biophysical Methods. 4 Hours.
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 817, or permission of instructor. LEC.

BIOL 925. Research Grant Proposal Preparation. 3 Hours.
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantsmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 943. Multivariate Data Analysis. 3 Hours.
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: Knowledge of elementary matrix algebra. LEC.

BIOL 944. Topics in Quantitative Ecology: ______, 1-3 Hours.
Presentation and discussion by instructor and students of mathematical and statistical concepts in ecology. Topics are selected from texts or sets of readings. LEC.

BIOL 950. Evolutionary Mechanisms. 3 Hours.
Reading and discussions of evolutionary mechanisms from the genetic, ecologic, and systematic viewpoints. Prerequisite: BIOL 412. LEC.

BIOL 952. Introduction to Molecular Modeling. 3 Hours.
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. Prerequisite: Graduate standing or consent of instructor. LEC.

BIOL 985. Advanced Study. 1-10 Hours.
Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis. RSH.

BIOL 999. Doctoral Dissertation. 1-12 Hours.
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Bachelor of Arts in Biochemistry

Biochemistry

Biochemistry is the study of life at the level of individual molecules. Biochemistry lies at the intersection of cell biology, physiology, organic chemistry, and physical chemistry. The B.A. Biochemistry major includes one year of biochemistry, as well as upper-division courses in cellular mechanisms and biological physical chemistry.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Please note that students completing a B.A. in Biochemistry may not earn a minor in Chemistry.

Requirements for the B.A. Major in Biochemistry

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

</tbody>
</table>

### Biochemistry Electives

- Satisfied by completing at least 6 hours of biology courses numbered 400 or higher. These courses must be selected in consultation with a biochemistry advisor. No more than 3 hours of BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) can be applied towards the elective requirement.

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**
  - Satisfied by 37 hours of major courses.

- **Major Hours in Residence**
  - Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Junior/Senior Hours**
  - Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

### Major Junior/Senior Graduation GPA

Satisfied by a minimum of 2.0 KU GPA in major junior/senior courses as determined by the following:

- **Major Hours & Major GPA**
  - Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

- **Major Hours in Residence**
  - Satisfied by 37 hours of major courses.

- **Major Hours in Residence**
  - Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Hours & Major GPA**
  - Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

Please note that students completing a B.A. in Biochemistry may not also earn a minor in Chemistry. Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

**CHEM 510 (Major Requirement)** | 3 | Elective or possible minor course 300+ (Total Hours) | 3 |
| Elective or possible minor course 300+ (Total Hours) | 2 |

| Total Hours | 14-16 |

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. CHEM 170/CHEM 130 and BIOL 150 require a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course.
3. Concurrent or prior enrollment in CHEM 170/CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
4. CHEM 335 and BIOL 638 and BIOL 639 are offered only in spring; BIOL 636, and BIOL 637 and CHEM 510 are only in fall.
5. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.
6. 6 hours of BIOL 400+ electives required. Consult a biochemistry advisor to select major electives.
7. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning Requirement.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

### Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

### Bachelor of Arts in Biology

#### Biology

Biology is the study of living systems and is the broadest biological sciences major available at KU. The B.A. Biology degree provides students with much flexibility in their major course choices and can include ecology, microbiology, organismal physiology, and biochemistry.
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Majors and Concentrations

Bachelor's degree requirements in biology are modified as necessary. Current requirements are available in the UBP office and online (http://www.kuub.ku.edu/). Major programs are offered in biochemistry, biology, human biology, and microbiology. Students may choose to concentrate in a range of specialties in the biological sciences, such as botany, cellular biology, developmental biology, environmental biology, ecology, entomology, genetics, marine biology, molecular biology, neurobiology, paleontology, physiology, systematics, or zoology (invertebrate or vertebrate).

BIOL 501  Physiological Adaptations of Plants to Extreme Environments
BIOL 544  Comparative Animal Physiology
or BIOL 546  Mammalian Physiology
BIOL 600  Introductory Biochemistry, Lectures

Electives and Laboratory Requirements
Satisfied by completing 10 hours of BIOL courses numbered 400 or higher which include at least 4 hours of laboratory credit. Courses listed above which have not been used to fulfill the above requirements may be used as electives. No more than 3 hours of BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) can be applied towards the elective requirement with no more than 2 hours of BIOL 424 being applied towards the laboratory requirement.

Biology Electives
Satisfied by completing at least 6 hours of biology courses numbered 400 or higher.

Biology Laboratory Electives
Satisfied by completing at least 4 hours of biology lab courses numbered 400 or higher. No more than 2 hours of BIOL 424 may be applied towards the laboratory requirement.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 36 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Biology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

Total Hours 120-123

1  The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
they fulfill the following requirements:

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

3. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.

4. BIOL 412 is offered only in the spring.

5. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335 and CHEM 336 sequence.

6. Biology major electives: choose from BIOL 413, BIOL 414, and BIOL 428 AND choose two from BIOL 400, BIOL 416, BIOL 417, BIOL 501, BIOL 544 or BIOL 546, and BIOL 600.

7. 10 credit hours of BIOL 400+ level courses, including at least 4 hours of lab credit. See the degree requirements page in the catalog for limits on using BIOL 423 and/or BIOL 424 for this requirement.

8. BIOL 499 is approved to fulfill Goal 6. This goal can also be fulfilled by completion of an approved educational experience, or an approved integration of courses and/or experiences. See your advisor for more information.

9. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.

6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

**Bachelor of Arts in Ecology, Evolution, and Organismal Biology**

Ecology, Evolution, and Organismal Biology

The B.A. focuses on the integration of biological systems at the whole organism level, and on how living organisms exist in populations, species, and communities within their environment. Core classes such as genetics, physiology, ecology, and evolutionary biology are combined with courses such as statistics, systematics, and organismal diversity to provide a strong foundation in biology. Students choose electives from a diverse set of classes that allow them to focus on areas of interest.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.
First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 36 hours of major courses

**Major GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+).

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours

Satisfied by a minimum of 28 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA calculator (http://clas.ku.edu/undergrad/tools/gpa).

Below is a sample 4-year plan for students pursuing the BA in Ecology, Evolution, and Organismal Biology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website.

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to the freshman year, fall semester.

Bachelor of Arts in Human Biology

Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Arts in Human Biology

Human Biology

This interdisciplinary major permits students to understand humans from a variety of academic viewpoints: anthropology, applied behavioral science, biology, psychology, and speech-language-hearing. Each human biology concentration offers major-level courses in topical categories that allow students to focus on areas that interest them most while retaining the interdisciplinary manner of the major. The broad nature of this major can prepare students for a variety of post-undergraduate opportunities.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.
Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

**Majors and Concentrations**

Bachelor’s degree requirements in biology are modified as necessary. Current requirements are available in the UBP office and online (http://www.kuub.ku.edu/). Major programs are offered in biochemistry, biology, human biology, and microbiology. Students may choose to concentrate in a range of specialties in the biological sciences, such as botany, cellular biology, developmental biology, environmental biology, ecology, entomology, genetics, marine biology, molecular biology, neurobiology, paleontology, physiology, systematics, or zoology (invertebrate or vertebrate).

**Requirements for the B.A. Major in Human Biology**

The curriculum builds from a broad background of general science courses and adds depth in a set of 5 specialized disciplines. Courses in the disciplines emphasize topics related to humans and provide a solid understanding of each field of knowledge.

For general requirements for the B.A. degree, see CLAS General Education Degree Requirements (p. 803) on the College of Liberal Arts and Sciences Degree Requirements page.

Students must choose 1 concentration from the 5 areas:

- Anthropology
- Applied behavioral science
- Biology
- Psychology
- Speech-language-hearing

**Code** | **Title** | **Hours**
--- | --- | ---
**General Science Requirements**

Majors must complete the following 33-hour minimum of general science requirements that serve as foundational courses for this major.

**Psychology Concentration Categories**

Satisfied by completing 2 of the following 4 categories listed below. (18 hours required)

- **Category 1: Evolution, Adaptation and Health**
  - Satisfied by completing 9 hours selected from the following:
    - PSYC 555 Evolutionary Psychology
    - PSYC 605 Health Psychology
    - ANTH 340 Human Variation and Evolution
    - ANTH 341 Human Evolution
    - ANTH 350 Human Adaptation
    - ANTH 442 Anthropological Genetics

- **Category 2: Human Development**
  - Child Development. Satisfied by:
    - PSYC 333 Child Development
    - PSYC 334 Child Development, Honors

- **Category 3: Human Cognition and Language**
  - Cognitive Psychology. Satisfied by:
    - PSYC 318 Cognitive Psychology

- **Category 4: Neuroscience**
  - Human Psychology. Satisfied by completing 6 hours selected from the following:
    - PSYC 418 Introduction to Cognitive Science
    - PSYC 482 Sensation and Perception
    - PSYC 518 Human Memory
    - SPLH 466 Language Science
    - SPLH 566 Language Development

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:
Major Hours
Satisfied by 31 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Speech-Language-Hearing Concentration Categories
Satisfied by completing 2 of the following 4 categories (18-19 hours 18-19 required):

Category 1: Development and Genetics

- Biology of Development. Satisfied by:
  - BIOL 417 | Biology of Development |

- Development and Genetics. Satisfied by completing 6 hours selected from the following:
  - BIOL 405 | Laboratory in Genetics |
  - BIOL 416 | Cell Structure and Function |
  - or BIOL 536 | Cell Structure and Function (Honors) |
  - BIOL 595 | Human Genetics |
  - BIOL 655 | Behavioral Genetics |
  - PSYC 333 | Child Development |
  - PSYC 430 | Cognitive Development |
  - SPLH 464 | Undergraduate Seminar in: _____ |
  - or SPLH 764 | Seminar in: _____ |

Category 2: Anatomy and Physiology

- Anatomy and Physiology. Satisfied by completing 6 hours selected from the following:
  - BIOL 240 | Fundamentals of Human Anatomy |
  - BIOL 241 | Human Anatomy Observation Laboratory |
  - BIOL 440 | Advanced Human Anatomy |
  - BIOL 547 | Mammalian Physiology Laboratory |
  - SPLH 462 | Principles of Speech Science |
  - SPLH 463 | Principles of Hearing Science |

Category 3: Neuroscience

- Physiology of Organisms. Satisfied by:
  - BIOL 544 | Comparative Animal Physiology |

- Neuroscience. Satisfied by completing 6 hours selected from the following:
  - BIOL 416 | Cell Structure and Function |
  - BIOL 435 | Introduction to Neurobiology |
  - PSYC 370 | Behavioral Neuroscience |
  - PSYC 375 | Cognitive Neuroscience |
  - PSYC 380 | Clinical Neuroscience |
  - SPLH 464 | Undergraduate Seminar in: _____ (Neural Bases of Speech & Voice) |
  - SPLH 464 | Undergraduate Seminar in: _____ (Speech Motor Control) |

Category 4: Research Practicum
Satisfied by completing 9 hours selected from the following courses:

- SPLH 464 | Undergraduate Seminar in: _____ (Circuit Theory & Bioinstrumentation) |
- SPLH 449 | Laboratory/Field Work in Human Biology (various topics) |
- SPLH 499 | Directed Study in Speech-Language-Hearing |

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Human Biology with concentrations in the following can be found here: Anthropology (p. 1268), Applied Behavioral Science (p. 1269), Biology (p. 1270), Psychology (p. 1271), and Speech-Language-Hearing (p. 1272), or by using the left-side navigation.
**Departmental Honors**

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad.
Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

**BA in Human Biology with concentration in Anthropology**

Below is a sample 4-year plan for students pursuing the BA in Human Biology with a concentration in Anthropology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

**Total Hours 120-126**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 Requires a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 and MATH 116 to fulfill the Math requirement.

3 Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.

4 BIOL 570 is offered only in fall.

5 Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence and PHSX 114/PHSX 211 & PHSX 216 and PHSX 115/PHSX 212 & PHSX 236

6 Refer to the degree requirements in the catalog, the departmental website (http://humanbio.ku.edu/overview-HBIO-ANTH/), the Degree Progress Report (DPR), or your advisor for a list of applicable courses. Completion of 2 of 4 major categories is required.

7 BIOL 599 is approved to fulfill Goal 6. This goal can also be fulfilled by completion of an approved educational experience, or an approved integration of courses and/or experiences. See your advisor for more information.

8 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

9 ANTH 304, ANTH 309, ANTH 340, or BIOL 412 (offered in spring only) can fulfill this requirement. Only one course is required.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BA in Human Biology with concentration in Applied Behavioral Science**

Below is a sample 4-year plan for students pursuing the BA in Human Biology with a concentration in Applied Behavioral Science. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Requires a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 and MATH 116 to fulfill the Math requirement.
3. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
4. BIOL 570 is offered only in the fall.
5. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence and PHSX 114/PHSX 211 & PHSX 216 and PHSX 115/PHSX 212 & PHSX 236.
6. Refer to the departmental website (http://humanbio.ku.edu/overview-HB-SPLH/), the Degree Progress Report (DPR), or your advisor for a list of applicable courses. Completion of 2 of 4 major categories is required.

Bachelor of Arts in Microbiology

Microbiology

Microbiology is the study of bacteria, viruses, the immune system, and their roles in human health, the environment and beyond. Job prospects for microbiologists with a bachelor's or higher degree continue to be strong. Upper-division courses in immunology, bacterial infectious diseases, virology, and microbial genetics couple laboratory courses with lecture courses to provide students with hands-on practical experience. The B.A. Microbiology major includes a choice of three upper-division lecture and laboratory course pairs.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

**Requirements for the B.A. Major in Microbiology**

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

**General Science Requirements**

**Microbiology Core Knowledge & Skills**

- Fundamentals of Microbiology. Satisfied by one of the following: 3-4
  - BIOL 400 | Fundamentals of Microbiology |
  - BIOL 401 | Fundamentals of Microbiology, Honors |
- Fundamentals of Microbiology Laboratory. Satisfied by: 2
  - BIOL 402 | Fundamentals of Microbiology Laboratory |

**Microbiology Electives and Laboratory Requirements**

Satisfied by completing 15 hours of microbiology courses, including 3-4 lecture-lab pairings, selected from the following:

- BIOL 503 | Immunology |
- BIOL 504 | Immunology Laboratory |
- BIOL 506 | Bacterial Infectious Diseases |
- BIOL 507 | Bacterial Infectious Diseases Laboratory |
- BIOL 512 | General Virology |
- BIOL 513 | Virology Laboratory |
- BIOL 518 | Microbial Genetics |
- BIOL 519 | Microbial Genetics Laboratory |

**Microbiology Elective**

Satisfied by completing 3 additional hours of BIOL courses numbered 400 or higher; to be selected in consultation with a microbiology advisor.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 23-24 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.
Major Junior/Senior Graduation GPA
Satisfies by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the BA in Microbiology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Requires a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 and MATH 116 to fulfill the Math requirement.
3. MATH 115 eligibility is required for enrollment.
4. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
5. BIOL 506, BIOL 507, BIOL 512, and BIOL 513 are offered only in the spring.
6. BIOL 400/BIOL 401, BIOL 402, BIOL 503, BIOL 504, BIOL 518, and BIOL 519 are offered only in the fall.
7. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.
8. 15 hours of Microbiology courses, including 3 lecture-lab pairings, selected from BIOL 503, BIOL 504, BIOL 506, BIOL 507, BIOL 512, BIOL 513, BIOL 518, and BIOL 519.
9. 3 hours of BIOL course(s) 400+ selected in consultation with a Microbiology advisor.
10. BIOL 600 (3 hours) or BIOL 636 and BIOL 638 (8 hours) required. BIOL 636 is offered only in the fall semester, BIOL 638 is offered only in the spring semester, and BIOL 600 is offered in both the fall and spring semesters.
11. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Please note:
Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Arts in Molecular, Cellular, and Developmental Biology

Molecular, Cellular, and Developmental Biology

The Molecular, Cellular, and Developmental Biology B.S. and B.A. degrees provide students with a broad understanding of biological systems at the molecular, cellular, and organismal levels. The MCDB degree includes study of genetics, cell biology, developmental biology, cancer biology, and neurobiology. Students have the option of elective courses in these areas for an advanced, in-depth learning experience.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Bachelor of Science in Biochemistry

Biochemistry

Biochemistry is the study of life at the level of individual molecules. Biochemistry lies at the intersection of cell biology, physiology, organic chemistry, and physical chemistry. The B.S. Biochemistry major includes two semesters of calculus, one year of biochemistry, analytical chemistry, biological physical chemistry, and upper-division courses in cellular mechanisms and related elective courses.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Students completing a B.S. in Biochemistry may not complete a minor in Chemistry.

Requirements for the B.S. Degree in Biochemistry

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.
**General Science Requirements**

Majors must complete the following general science requirements that serve as foundational courses for this major.

**Biology Orientation Seminar. Satisfied by:**
- BIOL 105 Biology Orientation Seminar 1

**Chemistry I. Satisfied by one of the following:**
- CHEM 170 Chemistry for the Chemical Sciences I 5
- CHEM 130 General Chemistry I
- CHEM 190 Foundations of Chemistry I, Honors & CHEM 191 and Foundations of Chemistry I Laboratory, Honors

**Chemistry II. Satisfied by one of the following:**
- CHEM 175 Chemistry for the Chemical Sciences II 5
- CHEM 135 General Chemistry II & CHEM 195 Foundations of Chemistry II, Honors & CHEM 196 and Foundations of Chemistry II Laboratory, Honors

**Organic Chemistry I. Satisfied by one of the following:**
- CHEM 330 Organic Chemistry I 3
- CHEM 380 Organic Chemistry I, Honors

**Organic Chemistry I Laboratory. Satisfied by:**
- CHEM 331 Organic Chemistry I Laboratory 2

**Organic Chemistry II. Satisfied by one of the following:**
- CHEM 335 Organic Chemistry II 3
- CHEM 385 Organic Chemistry II, Honors

**Organic Chemistry II Laboratory. Satisfied by:**
- CHEM 336 Organic Chemistry II Laboratory 2

**Calculus. Satisfied by:**
- MATH 115 Calculus I 6-12
  & MATH 116 and Calculus II
- MATH 125 Calculus I 6-12
  & MATH 126 and Calculus II
  & MATH 127 and Calculus III

**Physics. Satisfied by one of the following options:**
- Option 1: General Physics I & II
  - PHSX 211 General Physics I
  & PHSX 216 and General Physics I Laboratory
  - PHSX 212 General Physics II
  & PHSX 236 and General Physics II Laboratory
- Option 2: College Physics I & II
  - PHSX 114 College Physics I
  & PHSX 115 College Physics II 8-9

**Biochemistry Course Requirements**

Satisfied by completing 36 hours from courses below.

**Principles of Molecular and Cellular Biology. Satisfied by one of the following:**
- BIOL 150 Principles of Molecular and Cellular Biology 3
- BIOL 151 Principles of Molecular and Cellular Biology, Honors

**Principles of Organismal Biology. Satisfied by one of the following:**
- BIOL 152 Principles of Organismal Biology 3
- BIOL 153 Principles of Organismal Biology, Honors

**Introductory Biology Lab for STEM Majors. Satisfied by:**
- BIOL 154 Introductory Biology Lab for STEM Majors 2

**Biochemistry Required Electives**

Satisfied by completing 12 hours of BIOL courses numbered 400 or higher, which must be selected in consultation with a Biochemistry advisor. No more than 3 hours of BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) can be applied towards the elective requirement.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 48 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Biochemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to the freshman year, fall semester.

### Total Hours 120

1. BIOL 105: Biology Orientation Seminar (1 hour online course) can be taken the summer prior to your freshman year.
2. Concurrent or prior enrollment in CHEM 170/CHEM 130 is required.
3. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
4. Requires a Math ACT score of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course.
5. BIOL 636, BIOL 637, CHEM 400, CHEM 401, CHEM 510, and CHEM 530 are Fall only courses. CHEM 335, CHEM 336, BIOL 638, and BIOL 639 are Spring only courses.
6. Satisfied by completing 12 hours of BIOL courses numbered 400 or higher, which must be selected in consultation with a Biochemistry advisor.

**Please note:**

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.
Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

**Study Abroad**

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

**Bachelor of Science in Ecology, Evolution, and Organismal Biology**

**Ecology, Evolution, and Organismal Biology**

The B.S. focuses on the integration of biological systems at the whole organism level, and on how living organisms exist in populations, species, and communities within their environment. Core classes such as genetics, ecology, and evolutionary biology are combined with courses such as statistics, biochemistry, systematics, and organismal diversity to provide a strong foundation in biology. Students choose electives from a diverse set of classes that allow them to focus on areas of interest.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

**Code** | **Title** | **Hours**
--- | --- | ---
**General Science Requirements**
BIOL 105 | Biology Orientation Seminar | 1
CHEM 130 | General Chemistry I | 5
CHEM 135 | General Chemistry II | 5
CHEM 330 | Organic Chemistry I | 3
CHEM 331 | Organic Chemistry I Laboratory | 2

Choose one of the following: 4-6
- MATH 115 | Calculus I | 4
& MATH 116 | and Calculus II | 2
- MATH 125 | Calculus I | 1

Choose one of the following: 8-9
- PHSX 114 | College Physics I | 4
& PHSX 115 | and College Physics II | 4
- PHSX 211 | General Physics I | 3
& PHSX 216 | and General Physics I Laboratory | 3

- BIOL 413 | History and Diversity of Organisms | 3
- BIOL 414 | Principles of Ecology | 3
- BIOL 428 | Introduction to Systematics | 3
- BIOL 570 | Introduction to Biostatistics | 4
- BIOL 599 | Senior Seminar: _____ | 1

**Ecology, Evolution, and Organismal Biology Elective Hours**
Satisfied by completing 15 hours of BIOL courses numbered 400 or higher, including at least 4 hours of lab credit and 2 hours of seminar/topics courses (BIOL 419, 420, 499, 701). No more than 5 hours of BIOL 423 Non-Lab Independent Study and/or BIOL 424 Independent Study (combined) can be applied to the elective requirement, with no more than 2 hours of BIOL 424 being applied to the laboratory requirement. The Undergraduate Biology Program must approve exceptions to these elective requirements.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 48 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Total Hours 120-121**

1. Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 + MATH 116 to fulfill the math requirement.
2. Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.
3. BIOL 412 and BIOL 428 are offered only in the spring.
4. Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.
5. BIOL 400, BIOL 413, BIOL 414, BIOL 544, and BIOL 570 are offered only in the fall.
6. 15 credit hours of BIOL courses numbered 400 or higher, including at least 4 hours of lab credit and 2 hours of seminar/topics course credit (BIOL 419, BIOL 420, BIOL 498, BIOL 701). No more than 5 hours of BIOL 423 and/or BIOL 424 can be applied towards elective requirement, with no more than 2 hours of BIOL 424 applied towards the lab requirement.
7. BIOL 105 Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.
8. BIOL 570 is recommended in sophomore year when possible.

Please note: Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.
Departmental Honors
Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad
Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Science in Microbiology
Microbiology
Microbiology is the study of bacteria, viruses, the immune system, and their roles in human health, the environment and beyond. Job prospects for microbiologists with a bachelor’s or higher degree continue to be strong. Upper-division courses in immunology, bacterial infectious diseases, virology, and microbial genetics couple laboratory courses with lecture courses to provide students with hands-on practical experience. The B.S. Microbiology major includes all four of the upper-division lecture and laboratory course pairs.

Undergraduate Admission
Admission to KU
All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences
Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation
Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Requirements for the B.S. Degree in Microbiology
In addition to degree and major requirements, all students must complete the KU Core.

### Microbiology Course Requirements

Satisfied by completing 34-35 hours from the following courses:

- **Fundamentals of Microbiology**: 3-4
  - **BIOL 400**: Fundamentals of Microbiology
  - **BIOL 401**: Fundamentals of Microbiology, Honors
- **Fundamentals of Microbiology Laboratory**: 2
  - **CHEM 190**: Foundations of Chemistry I, Honors
  - **CHEM 191**: Foundations of Chemistry I Laboratory, Honors
- **Cell Structure & Function**: 3
  - **BIOL 416**: Cell Structure and Function
  - **or BIOL 536**: Cell Structure and Function (Honors)
- **Immunology**: 3
  - **BIOL 503**: Immunology
  - **BIOL 504**: Immunology Laboratory
- **Bacterial Infectious Diseases**: 3
  - **BIOL 506**: Bacterial Infectious Diseases
  - **BIOL 507**: Bacterial Infectious Diseases Laboratory
- **General Virology**: 2
  - **BIOL 512**: General Virology
- **Virology Laboratory**: 2
  - **BIOL 513**: Virology Laboratory
- **Microbial Genetics**: 3
  - **BIOL 518**: Microbial Genetics
  - **BIOL 519**: Microbial Genetics Laboratory

### Microbiology Required Electives

Satisfied by completing 6 hours of BIOL courses numbered 400 or higher, which must be selected in consultation with a microbiology advisor.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 519</td>
<td>2</td>
</tr>
</tbody>
</table>

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**: Satisfied by 34-35 hours of major courses.
- **Major GPA**: Satisfied by completing 6 hours of BIOL courses numbered 400 or higher, which must be selected in consultation with a microbiology advisor.

### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 402</td>
<td>3-4</td>
</tr>
</tbody>
</table>

### Major Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 400 or 401</td>
<td>3-4</td>
</tr>
</tbody>
</table>

### Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Microbiology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

Total Hours 120-123

1 Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 + MATH 116 to fulfill the BS Microbiology math requirement.

2 Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and offered in the spring semesters.

3 BIOL 512, BIOL 513, BIOL 506, BIOL 507, and CHEM 335 are offered only in the spring.

4 BIOL 400/Biol 401, BIOL 402, BIOL 503, BIOL 504, BIOL 518, BIOL 519, BIOL 570, and BIOL 636 are offered only in the fall.

5 Microbiology major electives: 6 hrs of Biol courses 400+ level to be selected in consultation with a Microbiology advisor.

6 BIOL 600 (3 hours) or BIOL 636 and BIOL 638 (8 hours) required. BIOL 636 is offered only in the fall semester, BIOL 638 is offered only in the spring semester, and BIOL 600 is offered in both the fall and spring semesters.

* BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

7 BIOL 416 is recommended prior to BIOL 512 and BIOL 503.

Please note:

Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.

2. Achieve a minimum grade-point average of 3.5 in the major.

3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.

4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.

5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.

6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.

Bachelor of Science in Molecular Biosciences

Molecular Biosciences

A bachelor’s degree in molecular biosciences offers students a strong background in genetics, microbiology, cell biology and biochemistry, as
well as hands-on lab experience. Many students in this program continue on to pursue medical, dental or pharmacy school, or graduate work in the health sciences with high success rates.

The KU Edwards Molecular Biosciences program is designed for undergraduate students who have already earned an associate's degree or equivalent hours and are looking to complete the last two years necessary for a bachelor's degree.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

First- and Second-Year Preparation

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

Molecular Biosciences

KU Edwards Campus

The undergraduate program in molecular biosciences is offered in its entirety only at the KU Edwards Campus (http://edwardscampus.ku.edu/), 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate's degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor's degree.

Requirements for the B.S. Degree in Molecular Biosciences

The program offers students a strong background in genetics, microbiology, cell biology, and biochemistry, as well as laboratory skills in genetics and microbiology. Graduates have entered medical school, dental school, and graduate school with high success rates. Contact the CLAS undergraduate advisor on the Edwards Campus for more information.

General Education Requirements

In addition to degree and major requirements for all plans and subplans, all students must complete the KU Core.

Molecular Biosciences Course Requirements

Molecular & Cellular Biology. Satisfied by:

- BIOL 150  Principles of Molecular and Cellular Biology  3
- or BIOL 151 Principles of Molecular and Cellular Biology, Honors

Principles of Organismal Biology. Satisfied by:

- BIOL 152  Principles of Organismal Biology  3
- or BIOL 153 Principles of Organismal Biology, Honors
- BIOL 154 Introductory Biology Lab for STEM Majors  2

Principles of Genetics. Satisfied by:
GPA Calculator

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

The Molecular Biosciences major is only available at the Edwards campus in Overland Park, KS. The Edwards Campus only offers Junior/ Senior level courses (300+). Lower level courses (100-299) may need to be taken at the KU Lawrence campus or transferred in from another institution. Please consult an academic advisor for more assistance.

<tr>
<td>BIOL 701</td>
<td>Topics in: _____</td>
</tr>
</tbody>
</table>

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 43-44 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Molecular Biosciences. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/). This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

The Molecular Biosciences major is only available at the Edwards campus in Overland Park, KS. The Edwards Campus only offers Junior/Senior level courses (300+). Lower level courses (100-299) may need to be taken at the KU Lawrence campus or transferred in from another institution. Please consult an academic advisor for more assistance.
Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

The Bachelor of Science in Molecular, Cellular, and Developmental Biology (MCDB) degrees provide students with a broad understanding of biological systems at the molecular, cellular, and organismal levels. The MCDB degree includes study of genetics, cell biology, developmental biology, cancer biology, and neurobiology. Students have the option of elective courses in these areas for an advanced, in-depth learning experience.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.
Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**First- and Second-Year Preparation**

Because biology study requires preparation in other sciences, students should begin meeting major requirements in the first year. It is particularly important to take CHEM 130 and CHEM 135 in the first year and, for several majors, to take CHEM 330, CHEM 331, CHEM 335, and CHEM 336 in the second year. Ideally, most majors should also take BIOL 150 and BIOL 152 during the first year, as well as BIOL 105.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 47 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 39 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 3.0 KU GPA in junior/senior courses (300+) in the major.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 47 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 39 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 3.0 KU GPA in junior/senior courses (300+) in the major.

**GPA Calculations**

Major GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Molecular, Cellular, and Developmental Biology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 47 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 39 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of 3.0 KU GPA in junior/senior courses (300+) in the major.

**GPA Calculations**

Major GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Below is a sample 4-year plan for students pursuing the B.S. in Molecular, Cellular, and Developmental Biology. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, or equivalent prior to the freshman year, fall semester.
BIOL 154  2 Goal 2.2 Oral Communication  3

14  17

Sophomore
Fall Hours Spring Hours
CHEM 330 (General Science Requirement) 3  CHEM 335 (General Science Requirement) 3  3
CHEM 331 (General Science Requirement) 2  BIOL 412 (Major Requirement) 3  4
BIOL 350 or 360 (Major Requirement) 4  BIOL Elective 400+ (Major Requirement) 3  3
MATH 116 (General Science Requirement) 3  Goal 3 Social Science Requirement 3  3
Goal 3 Arts and Humanities 3  Goal 4.1 US Diversity 3  3
15  16

Junior
Fall Hours Spring Hours
BIOL 416 (Major Requirement) 3  PHSX 115 (or PHSX 212 & 236 (General Science Requirement) 4  3
BIOL 600 (Major Requirement) 3  BIOL 405 or 426 (Major Requirement) 3.5.6  3
PHSX 114 (or PHSX 211 & 216, Goal 1.1 Critical Thinking, General Science Requirement) 4  3

BIOL 570 or MATH 365 (General Science Requirement) 4  BIOL Elective 400+ (Major Requirement) 7  3
Elective or possible minor course (Total Hours) 3  Elective or possible minor course (Total Hours) 3  3
Elective or possible minor course (Total Hours) 3  Elective or possible minor course (Total Hours) 3  3
16  13

Total Hours 120-121

1 Requires MATH ACT scores of 26+, a comparable SAT or KU Math Placement Exam score, or credit for a MATH 101 or MATH 104 equivalent course. MATH 125 can be taken instead of MATH 115 + MATH 116 to fulfill the math requirement.

2 Concurrent or prior enrollment in CHEM 130 is required. BIOL 151 is the honors equivalent of BIOL 150 and is offered in the fall semesters. BIOL 153 is the honors equivalent of BIOL 152 and is offered in the spring semesters.

3 BIOL 412, BIOL 417, BIOL 426, BIOL 650, BIOL 672 and CHEM 335 are offered only in the spring.

4 Most medical schools require the full CHEM 330, CHEM 331, CHEM 335, and CHEM 336 sequence.

5 BIOL 405, BIOL 435, BIOL 570, and BIOL 668 are offered only in the fall.

6 Choose BIOL 405 or BIOL 426. BIOL 405 is offered only in the fall, and BIOL 426 is offered only in the spring.

7 12 credit hours of BIOL courses at 400+ level, with no more than 3 hours of BIOL 423 and/or BIOL 424 (combined) applied toward the elective requirement.

8 Choose BIOL 650, BIOL 672, or BIOL 688. BIOL 650 and BIOL 672 are offered only in the spring. BIOL 688 is offered only in the fall.

9 BIOL 105: Biology Orientation Seminar (1 hour online course) is required for the major. It can be taken the summer prior to your freshman year.

Note: Students may earn degrees in more than one major within biological sciences, or in a biological science and an area outside biology by meeting the requirements of both degree programs and taking at least 15 hours of courses unique to each major.

Departmental Honors

Undergraduate majors are eligible to graduate with honors in biology if they fulfill the following requirements:

1. Complete all course work required for the appropriate degree in biology.
2. Achieve a minimum grade-point average of 3.5 in the major.
3. Complete BIOL 499 Introduction to Honors Research with a grade of B or higher.
4. Complete BIOL 699 Biology Honors Research Colloquium with a grade of B or higher.
5. Complete an independent research project under the supervision of a faculty member in an area appropriate to the degree sought.
6. Submit an honors thesis to the honors committee once the research is complete and present the results of the completed research at the honors research symposium.

Students majoring in Human Biology with Anthropology, Applied Behavioral Science, Psychology, or Speech-Language-Hearing concentrations will follow the honors requirements for their respective concentration department.

Specific guidelines and intent forms are available in the Undergraduate Biology Program office and online (http://www.kuub.ku.edu/). Candidates must declare their intent to graduate with honors at least 2 semesters before graduation.

Study Abroad

Consult an advisor at least 4 months before undertaking study abroad. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/), 108 Lippincott Hall, for information about study in one of the many countries (e.g., Scotland, Australia, Switzerland) with special arrangements with KU.
Department of Chemistry

Why study chemistry?

At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry, including emerging fields of microfluidics, precision medicine and sustainable catalysis.

Undergraduate Program

The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a Minor in chemistry for those seeking a secondary area of study.

Graduate Program

For a student wishing to earn a Doctor of Philosophy (Ph.D.) degree or a Master of Science (M.S.) degree in chemistry, the selection of a graduate school is one of the most important career decisions you will make. Your choice will not only determine where you will be during the next several years, but will lay the foundation for your future.

The KU Chemistry Graduate Program provides exceptional and diverse opportunities for the student interested in a career in cutting-edge research, higher education or any one of a number of chemically related positions requiring an advanced degree. We have a department of outstanding faculty, each of whom is dedicated to providing mentoring to graduate students and guiding them during their journey from undergraduate to professional.

Undergraduate Programs

Chemistry course work educates undergraduates to become professional chemists or to do graduate work in chemistry. It also provides the basic chemistry background for students entering such fields as biochemistry, biological sciences, dentistry, engineering, environmental science, geology, medicine, pharmacy, physics, and secondary-level science education. Courses in chemistry provide general knowledge and appreciation of chemistry and its impact on society.

Advanced Placement

Students who have taken the Advanced Placement Examination in chemistry should have the results forwarded to the Office of Admissions (http://admissions.ku.edu/). Students who score 5 need not take CHEM 130 and CHEM 135 and receive 10 hours of credit. With departmental permission, those who score 3 or 4 receive credit for CHEM 130. Credit for CHEM 135 also may be given to those who pass a special examination. Students who score at least 50 on the College Level Examination Program general chemistry examination receive 5 hours of credit in CHEM 130.

Courses for Non-majors

Undergraduates taking chemistry as preparatory study for another field should consult the courses listed for that field in this catalog. CHEM 100 and CHEM 110 are introductory courses for the non-science major who wants to study the general principles, methods, role, and significance of chemistry in the modern world, for pre-nursing students, and for students who plan to take no additional courses in chemistry. Pre-medical students and chemistry or other science majors should not take CHEM 100 or CHEM 110. CHEM 100 is lecture only. CHEM 110 includes a laboratory. Engineering students who need only one semester of chemistry should take CHEM 150. CHEM 130 is an introductory course for students who plan to take more than one year of college chemistry, including chemical engineering, pre-medical, pre-pharmacy, and pre-dental students and students in biological sciences who must take organic chemistry. Students should continue with CHEM 135 in the same academic year that they take CHEM 130.

Graduate Programs

The department’s graduate program, its Ph.D. program in particular, produces graduates with the basic knowledge, skills, and experimental training necessary to enter productive careers in academic, industrial, and government positions. Faculty and graduate students work collegially, not only in the search for new knowledge at the frontiers of chemistry, but also toward the solution of problems of fundamental societal concern.

Although the department believes it is essential to provide graduate students with a knowledge base spanning the traditional areas of analytical, inorganic, organic, and physical chemistry, it nurtures its particular strengths in several important research areas at the interface of chemistry and the biological/medical sciences. The Department of Chemistry at KU is a worldwide leader in graduate training and research in bioanalytical chemistry, and its additional interactions with the pharmaceutical and biological sciences have led to strong graduate research programs in diverse areas such as bio-inorganic, bio-organic, and biophysical chemistry.

The department also recognizes its central science role by maintaining strong research and Ph.D. programs in areas that interface closely with molecular biosciences, physics, chemical engineering, mathematics, and computer science, for example, in drug discovery, theoretical chemistry, materials, molecular modeling, and laser spectroscopy. The entering Ph.D. student can be assured of finding vigorous programs spanning a full range of chemical studies, and the graduating Ph.D. student can be equally confident that his or her training and skills are marketable commodities.

The department’s M.S. program is a traditional companion to the Ph.D. program and shares the same goals. It is encouraged for students who prefer a program with less depth and a research (thesis) project that is manageable in 2 to 4 semesters. Although most entering graduate students choose the Ph.D.—the most desirable degree for those who wish to work as independent scientists in academic, industrial, or institutional settings—the M.S. serves a useful and essential role for students with other ambitions.

Research support facilities include the Instrumentation Design Laboratory, Mass Spectrometry Laboratory, Molecular Graphics and Modeling Laboratory, Nuclear Magnetic Resonance Laboratory, and X-ray
Crystallography Laboratory. Anschutz Library contains more than 300,000 books and periodicals spanning the fields of chemistry, biochemistry, physics, geology, and pharmacy.

Non-Degree Seeking
Students who are interested in enrolling in graduate level coursework in the Department of Chemistry without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s degrees (https://chem.ku.edu/degrees/) webpage for further details.

Courses
CHEM 100. Chemistry in Context: _____. 3 Hours NP GE3N / N.
An introduction to chemistry that focuses on basic chemical principles, designed for students with no previous background in chemistry. This course promotes the development of chemical literacy within a context that encourages an appreciation for the role and significance of chemistry in the modern world. Not intended for students who need to fulfill a specific chemistry requirement as part of their degree program. LEC.

CHEM 110. Introductory Chemistry. 5 Hours NP GE3N / N / LFE.
This integrated lecture and laboratory course provides an introduction to basic concepts related to general, organic, and biological chemistry. Suitable for students seeking an introductory course and for students who are majoring in health and allied health fields. Students whose majors require more than one semester of chemistry should enroll in CHEM 130, CHEM 170, or CHEM 190. CHEM 110 and CHEM 150 cannot both be taken for credit. LEC.

CHEM 130. General Chemistry I. 5 Hours NP GE12/GE3N / N / LFE.
This course seeks to develop a working knowledge of the conceptual foundation and the quantitative chemical relationships on which subsequent chemistry courses are built. Atomic structure, chemical bonding, reaction stoichiometry, thermochemistry, and periodic trends are emphasized in this integrated lecture and laboratory course. Students pursuing or considering a major in one of the chemical sciences should strongly consider taking CHEM 170 or CHEM 190. Students with credit in CHEM 110 will have two hours added on to their total number of hours required for graduation. Prerequisite: Must be eligible for MATH 115. LEC.

CHEM 135. General Chemistry II. 5 Hours GE3N / N / LFE.
This course, which is a continuation of CHEM 130, focuses on chemical kinetics, chemical equilibria, acid-base chemistry, and thermodynamics. Additional topics, such as environmental chemistry, electrochemistry, coordination chemistry, nuclear chemistry, organic chemistry, and/or polymers, may also be introduced in this integrated lecture and laboratory course. Students pursuing or considering a major in one of the chemical sciences should strongly consider taking CHEM 175 or CHEM 195. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 with a grade of C- or higher. LEC.

CHEM 149. Chemistry for Engineers Supplement. 2 Hours N.
This course is intended for students in the School of Engineering who have credit for CHEM 130 but still need selected elements of second-semester general chemistry. Students will learn to describe phases of matter and quantify changes among them, and to analyze chemical equations and equilibria in the context of acid-base and redox chemistry. Prerequisite: Student in the School of Engineering and CHEM 130 or equivalent (or have Departmental consent). Credit in CHEM 135, CHEM 150, CHEM 175, or CHEM 195 precludes enrollment in and credit for CHEM 149. LEC.

CHEM 150. Chemistry for Engineers. 5 Hours GE3N / N / LFE.
This one semester course is designed for students in the School of Engineering who are not required to take additional chemistry courses at the college level. In this integrated lecture and laboratory course, students will learn to predict properties of substances based on their molecular structure, to describe phases of matter and quantify changes among them, and to analyze chemical equations and equilibria in the context of acid-base and redox chemistry. Technical communication and experimental design are also emphasized. Prerequisite: Must have completed a course in high school chemistry and be eligible for MATH 115 (or have Departmental consent). Students not admitted to the School of Engineering must receive permission from instructor. CHEM 110 and CHEM 150 cannot both be taken for credit. LEC.

CHEM 170. Chemistry for the Chemical Sciences I. 5 Hours NP GE12/GE3N / N / LFE.
The first course in a two-course sequence focused on the principles and applications of modern chemistry. This integrated lecture and laboratory course is designed for students pursuing or considering a major in one of the chemical sciences (such as chemistry, biochemistry, chemical engineering or petroleum engineering). The CHEM 170/CHM 175 course sequence covers the same general topics as CHEM 130/CHM 135, but with an increased emphasis on modern applications of chemistry. Students with credit in CHEM 110 will have two hours added on to their total number of hours required for graduation. Prerequisite: Eligibility for MATH 115. LEC.

CHEM 175. Chemistry for the Chemical Sciences II. 5 Hours N / LFE.
An integrated lecture and laboratory course which is a continuation of CHEM 170. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 with a grade of C- or higher. LEC.

CHEM 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Chemistry. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

CHEM 180. Seminar I. 0.5 Hours U.
Special topics for chemistry majors such as using the chemical literature, educational and professional perspectives, scientific ethics, and undergraduate research opportunities. It is recommended that students take this half-semester course in their freshman or sophomore year. Prerequisite: A declared major in chemistry or consent of instructor. LEC.

CHEM 190. Foundations of Chemistry I, Honors. 3 Hours NP GE12/GE3N / N / LFE.
CHEM 190, together with corequisite laboratory course CHEM 191, provides an integrated treatment of theoretical and experimental aspects of chemistry for qualified and highly motivated students. It is anticipated that students in CHEM 190 and CHEM 191 plan to take more than one year of chemistry at the college level. Students with credit in CHEM 110 will have two hours added on to their total number of hours required for graduation. Prerequisite: High school chemistry and calculus; at least one of the following: (a) acceptance into the KU Honors Program, (b) an AP exam score in chemistry of 3 or higher, (c) a mathematics ACT score of 30 or higher; or permission of instructor. Corequisite: CHEM 191. LEC.

CHEM 191. Foundations of Chemistry I Laboratory, Honors. 2 Hours NP / N / LFE.
Laboratory course for students enrolled in CHEM 190. Prerequisite: Corequisite: CHEM 190. LAB.
CHEM 195. Foundations of Chemistry II, Honors. 3 Hours NP GE3N / N / LFE.
CHEM 195 and corequisite laboratory course CHEM 196 continue the integrated theoretical and experimental exploration of chemistry topics for qualified and highly motivated students. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 and CHEM 191 with a grade of C- or better, and permission of the instructor. Corequisite: CHEM 196. LEC.

CHEM 196. Foundations of Chemistry II Laboratory, Honors. 2 Hours NP / N / LFE.
Laboratory course for students enrolled in CHEM 195. Prerequisite: CHEM 130, CHEM 170, or CHEM 190 and CHEM 191 with a grade of C- or better, and permission of the instructor. Corequisite: CHEM 196. LAB.

CHEM 201. Laboratory Safety in the Chemical Sciences. 1 Hour U.
A course for undergraduate students focusing on chemical safety in modern laboratories. The course will feature practical instruction in lab safety, an introduction to safety resources, and group discussions centered around case studies. Required for all B.S. majors, and for all B.A. majors participating in undergraduate research. Students with credit in CHEM 201 may not take CHEM 701 for credit. Prerequisite: CHEM 135, CHEM 175, or CHEM 195. LEC.

CHEM 250. Mathematical Methods for the Chemical Sciences. 3 Hours NM.
A one-semester course covering advanced mathematical methods necessary for upper-level physical and analytical chemistry courses. Topics include complex numbers and functions, ordinary and partial differential equations, linear algebra and probability and statistics with special emphasis on applications to problems in the chemical sciences. Prerequisite: Corequisite: MATH 127. LEC.

CHEM 310. Fundamentals of Organic Chemistry. 3 Hours GE3N / N.
A study of the structures and reactions of important classes of organic compounds. Along with the organic laboratory, CHEM 331, this course will fulfill the needs of students requiring a single semester of organic chemistry. Students requiring more than one semester of organic chemistry should enroll in CHEM 330. Prerequisite: CHEM 135, CHEM 175, or CHEM 195 with a grade of C- or higher. LEC.

CHEM 330. Organic Chemistry I. 3 Hours GE3N / N.
A study of the structure and reactivity of selected classes of organic compounds. CHEM 330 is the first course of a two-semester sequence. Students with credit in CHEM 310 will have two hours added on to their total number of hours required for graduation. Prerequisite: CHEM 135, CHEM 175, or CHEM 195 with a grade of C- or higher. LEC.

CHEM 331. Organic Chemistry I Laboratory. 2 Hours U / LFE.
Emphasis on basic techniques for the preparation, separation, and purification of organic compounds. Required for a major in chemistry and by those departments and programs specifying a complete undergraduate organic chemistry course. Prerequisite: CHEM 310 or CHEM 330 or CHEM 380 with a grade of C- or higher or concurrent enrollment in CHEM 310 or CHEM 330 or CHEM 380. LAB.

CHEM 335. Organic Chemistry II. 3 Hours N.
A continuation of CHEM 330, intended for students who want further training in organic chemistry. Prerequisite: CHEM 330 or CHEM 380 with a grade of C- or higher. LEC.

CHEM 336. Organic Chemistry II Laboratory. 2 Hours U / LFE.
More advanced organic laboratory techniques with emphasis on modern spectroscopic methods for determining the structure and purity of organic compounds. Prerequisite: CHEM 331 and CHEM 335 or CHEM 385 with a grade of C- or higher or concurrent enrollment in CHEM 335 or CHEM 385. LAB.

CHEM 380. Organic Chemistry I, Honors. 3 Hours GE3N / N.
This is the first half of a two-semester sequence in organic chemistry for students with strong records in previous chemistry courses. Recommended for members of the University Honors Program and students majoring in chemistry or related fields. Students with credit in CHEM 310 who take and complete CHEM 380 will have two hours added to their total number of credit hours required for graduation. Prerequisite: CHEM 135, CHEM 175, or CHEM 195 with a grade of C- or higher and permission of the instructor. LEC.

CHEM 385. Organic Chemistry II, Honors. 3 Hours N.
This is the second course in a two-semester sequence in organic chemistry for students with strong records in previous chemistry courses. Recommended for members of the University Honors Program and students majoring in chemistry or related fields. Prerequisite: CHEM 330 or CHEM 380 with a grade of C- or higher, and permission of the instructor. LEC.

CHEM 390. Topics in Chemistry, Honors: ______. 1-5 Hours N.
A course on special topics in chemistry, given as the need arises. Course content applies and expands upon general chemistry concepts, such as chemical thermodynamics, kinetics, and bonding. In this course, students gain knowledge in a topic of contemporary interest in chemistry, are challenged to examine the experimental and theoretical basis of this knowledge, and consider the broader impacts of this knowledge outside the discipline. Course may be repeated for different topics. Prerequisite: CHEM 135, CHEM 175 or CHEM 195 and membership in the University Honors Program; or permission of instructor. Each section may have additional prerequisites to be determined by the instructor. LEC.

CHEM 400. Analytical Chemistry. 3 Hours N.
Principles of analytical chemistry with emphasis on the fundamental methods used for chemical analysis. Topics include experimental error, statistical analysis, method development, sampling, calibration methods, spectrophotometry, chromatography, mass spectrometry, and electrochemistry. Prerequisite: One semester of organic chemistry and one semester of organic chemistry laboratory, or permission of instructor. Corequisite: CHEM 401. LEC.

CHEM 401. Analytical Chemistry Laboratory. 2 Hours U.
Experiments illustrate fundamental principles of chemical analysis methods. The course serves as an introduction to advanced instrumental methods of analysis. Prerequisite: One semester of organic chemistry and one semester of organic chemistry lab, or permission of instructor. Corequisite: CHEM 400. LAB.

CHEM 450. Directed Readings/Laboratory in Chemistry. 1-3 Hours N.
Individual and supervised study or laboratory work on special topics or problems in chemistry. Prerequisite: Ten hours of chemistry and a minimum overall grade-point average of 2.0 or consent of department. IND.

CHEM 498. Undergraduate Research. 1-2 Hours N.
A research course for Chemistry majors, consisting of experimental or theoretical work in chemistry or a closely related field. A final report must be submitted to the instructor at the end of the semester. Prerequisite: CHEM 201, or CHEM 201 concurrently, or documentation of appropriate laboratory safety training. IND.

CHEM 510. Biological Physical Chemistry. 3 Hours N.
A one-semester course that explores the fundamentals of physical chemistry with specific application to biological systems. The basic principles of thermodynamics, chemical kinetics, quantum mechanics and spectroscopy will be introduced, and their application to aqueous solutions and biochemical systems will be emphasized. This class consists of lecture only. Students requiring laboratory experience should enroll
in CHEM 520. Prerequisite: One semester of organic chemistry, two semesters of calculus, and two semesters of physics. LEC.

CHEM 520. Biological Physical Chemistry with Laboratory. 5 Hours AE61 / N.
A one-semester integrated lecture and laboratory course that explores the fundamentals of physical chemistry with specific application to biological systems. The basic principles of thermodynamics, chemical kinetics, quantum mechanics and spectroscopy will be introduced, and their applications to aqueous solutions and biochemical systems will be emphasized. Students who do not wish to take the laboratory component should enroll in CHEM 510. Prerequisite: One semester of organic chemistry, two semesters of calculus and two semesters of physics. LEC.

CHEM 525. Physical Chemistry for Engineers. 4 Hours N.
An introduction to the basic principles of quantum mechanics, atomic and molecular structure, molecular rotations and vibrations, statistical mechanics, statistical thermodynamics and reaction dynamics. Prerequisite: Two semesters of general chemistry; PHSX 212; MATH 127, MATH 220 or MATH 320 and MATH 290 or consent of instructor. LEC.

CHEM 530. Physical Chemistry I. 4 Hours N.
An introduction to the basic principles of quantum mechanics, atomic and molecular structure, molecular rotations and vibrations, group theory, spectroscopy, and statistical mechanics. Prerequisite: Two semesters of general chemistry; PHSX 212; MATH 127; and CHEM 250 or (MATH 220 or MATH 320 and completion of, or concurrent enrollment in MATH 290) or consent of instructor. LEC.

CHEM 535. Physical Chemistry II. 3 Hours N.
Emphasizes the thermodynamics of molecular systems with application to the structure and properties of gases, liquids, solids, materials, statistical thermodynamics, chemical kinetics, and reaction dynamics. Prerequisite: CHEM 530 or consent of instructor. LEC.

CHEM 537. Physical Chemistry Laboratory. 3 Hours U / LFE.
Experiments in physical chemistry, with emphasis on the fundamental principles of quantum mechanics, spectroscopy, thermodynamics and kinetics as applied to chemical systems. Prerequisite: CHEM 401 and CHEM 530 and concurrent enrollment in CHEM 535. LAB.

CHEM 598. Research Methods. 3 Hours N / LFE.
An introduction for pre-service teachers to the tools used by scientists to solve scientific problems. Topics include design of experiments and interpretation of their results, use of statistics, mathematical modeling, laboratory safety, ethical treatment of human subjects, writing scientific papers, giving oral presentations, and obtaining data from the scientific literature. Open only to students in the UKanTeach program. (Same as PHSX 598.) Prerequisite: At least one course at the 100 level or above in CHEM, MATH, or PHSX. LEC.

CHEM 635. Instrumental Methods of Analysis. 2 Hours U.
Theory and application of instrument methods to modern analytical problems. Topics covered include atomic and molecular spectroscopy, electrochemistry, mass spectrometry, and separations. Prerequisite: CHEM 400 and CHEM 401 and one semester of physical chemistry laboratory, or permission of instructor. LEC.

CHEM 636. Instrumental Methods of Analysis Laboratory. 3 Hours AE61 / U / LFE.
Theory and application of instrument methods to modern analysis problems. Experiments covered in this capstone laboratory course include atomic and molecular spectroscopy, electrochemistry, and separation methods. Prerequisite: CHEM 400 and CHEM 401, and one semester of physical chemistry laboratory; or permission of instructor. Prerequisite or Corequisite: CHEM 635. LAB.

CHEM 660. Systematic Inorganic Chemistry. 3 Hours N.
A systematic study of the elements and their compounds, emphasizing the relationship between properties of substances and their atomic and molecular structures and the positions of the elements in the periodic systems. Prerequisite: CHEM 510, CHEM 520, or CHEM 530. LEC.

CHEM 661. Advanced Inorganic Laboratory. 2 Hours U / LFE.
Experiments concerning the synthesis and characterization of inorganic compounds. Prerequisite: CHEM 660 or concurrent enrollment in CHEM 660. LAB.

CHEM 680. Topics in Chemistry: ____. 1-5 Hours N.
Courses on special topics in chemistry, given as the need arises. Course may be repeated for different topics. Prerequisite: 20 hours of Chemistry. Each section may have additional prerequisites to be determined by the instructor. LEC.

CHEM 695. Seminar II. 0.5 Hours U.
Special topics and presentations by students and faculty in areas of current interest such as recent advancements in chemistry, professional development, societal issues facing chemists, and reports of ongoing research. This half-semester course is recommended for seniors. Prerequisite: CHEM 180. LEC.

CHEM 699. Undergraduate Capstone Research. 1-2 Hours AE61 / N.
An undergraduate capstone research experience in chemistry or a closely related field, consisting of experimental or theoretical work on a topic developed in consultation with the faculty research advisor. A total of 3 credit hours must be accumulated for the course to count toward KU Core Goal 6. Students will submit a final report to the Chemistry Department during the semester in which the third credit hour is completed, and also present their results in a public forum. Prerequisite: CHEM 201, or CHEM 201 concurrently (or documentation of appropriate laboratory safety training), CHEM 335 (or CHEM 385) and CHEM 336 with grades of C or higher, and permission of the Chemistry Department. IND.

CHEM 699. Undergraduate Honors Research. 1-2 Hours AE61 / N.
An undergraduate research experience in chemistry or a closely related field for students in the Chemistry Department Honors Program, consisting of experimental or theoretical work on a topic developed in consultation with the faculty research advisor. A minimum of 4 credit hours must be accumulated to satisfy Chemistry Department Honors requirements, and 3 of those credit hours will satisfy KU Core Goal 6. At the completion of the research, a written thesis, and an oral defense of the thesis, will be required. Prerequisite: Acceptance to the Chemistry Department Honors Program; CHEM 201, or CHEM 201 concurrently, or documentation of appropriate laboratory safety training. IND.

CHEM 700. Responsible Scholarship in the Chemical Sciences. 1 Hour.
A course for beginning graduate students with particular emphasis on scholarship issues relevant to the chemical sciences. Topics will include scientific ethics, codes of conduct, record keeping, authorship, and the responsibilities of a scientist. Group discussions, particularly centered around case studies, will be a significant component of the course. LEC.

CHEM 701. Laboratory Safety in the Chemical Sciences. 1 Hour.
A course for beginning graduate students focusing on chemical safety in modern laboratories. The course will feature practical instruction in lab safety, an introduction to safety resources, and group discussions centered around case studies. LEC.

CHEM 718. Mathematical Methods in Physical Sciences. 3 Hours.
Review of all complex variable theory; introduction to the partial differential equations of physics; Fourier analysis; and special functions
CHEM 720. Fundamentals and Methods of Analytical Chemistry. 3 Hours.
An introductory graduate level course in analytical chemistry, in which the principles of electrochemistry, spectroscopy, and separation science are utilized to solve analytical problems in inorganic, organic and biochemistry. Prerequisite: An undergraduate course in analytical chemistry, a year of organic chemistry, and a year of physical chemistry. LEC.

CHEM 730. Coordination and Organometallic Chemistry. 3 Hours.
An examination of the basic foundations of coordination chemistry and organometallic chemistry including symmetry methods, bonding, magnetism, and reaction mechanisms. Prerequisite: Two semesters of organic chemistry and one semester of physical chemistry in which quantum chemistry is introduced. The latter course may be taken concurrently with CHEM 730. LEC.

CHEM 740. Principles of Organic Reactions. 3 Hours.
A consideration of the structural features and driving forces that control the course of chemical reactions. Topics will include acid and base properties of functional groups; qualitative aspects of strain, steric, inductive, resonance, and solvent effects on reactivity; stereo-chemistry and conformations; an introduction to orbital symmetry control; basic thermodynamic and kinetic concepts; and an overview of some important classes of mechanisms. Prerequisite: Two semesters of undergraduate organic and one semester of physical chemistry or concurrent enrollment. LEC.

CHEM 742. Spectroscopic Identification of Organic Compounds. 3 Hours.
The use of techniques such as infrared, nuclear magnetic resonance, and ultraviolet spectroscopy, and mass spectrometry for elucidating the structure of organic molecules. A lecture and workshop course. Prerequisite: CHEM 626 and CHEM 627. LEC.

CHEM 750. Introduction to Quantum Mechanics. 3 Hours.
An introduction to the basic principles of quantum theory relevant to atomic and molecular systems. Topics include operators and operator algebra, matrix theory, eigenvalue problems, postulates of quantum mechanics, the Schrodinger equation, angular momentum, electronic structure, molecular vibrations, approximation methods, group theory, and the foundations of spectroscopy. Prerequisite: Two semesters of physical chemistry. LEC.

CHEM 760. Introduction to Chemistry in Biology. 3 Hours.
A comprehensive introduction to the application of chemistry to address problems in biology at the molecular level. The fundamentals of biomolecules (nucleic acids, proteins, lipids and carbohydrates) and techniques of chemical biology research will be discussed. LEC.

CHEM 775. Chemistry of the Nervous System. 3 Hours.
A study of the overall concept of central nervous system functioning. A brief introduction to neuroanatomy and neurophysiological techniques as well as a relatively detailed discussion of the chemistry of neurotransmitters is included. (Same as BIOL 775, MDCM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: One year of undergraduate organic chemistry. LEC.

CHEM 800. Research. 1-10 Hours.
Original investigation on the graduate level. RSH.

CHEM 810. Colloquium: ______. 1 Hour.
Colloquia on various topics of current interest are presented by students, faculty, and visiting scientists. LEC.

CHEM 812. Chemical Seminar. 1-3 Hours.
Individual studies of certain advanced phases of chemistry not covered in the regular graduate courses. IND.

CHEM 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as BIOL 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor. SEM.

CHEM 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Hours.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as BIOL 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student. SEM.

CHEM 820. Analytical Separations. 3 Hours.
An advanced treatment of analytical separations techniques. The theory of separation science will be augmented with discussion of practical aspects of instrumentation and experiment design. Prerequisite: CHEM 720. LEC.

CHEM 822. Electrochemical Analysis. 3 Hours.
An advanced treatment of selected electroanalytical techniques and methodology. Prerequisite: CHEM 720. LEC.

CHEM 824. Spectrochemical Methods of Analysis. 3 Hours.
General concepts of encoding chemical information as electromagnetic radiation; major instrumental systems for decoding, interpretation, and presentation of the radiation signals; atomic emission, absorption, and fluorescence; ultraviolet, visible, infrared, and microwave absorption; molecular luminescence; scattering methods; mass spectrometry; magnetic resonance; automated spectrometric systems. Prerequisite: CHEM 720. LEC.

CHEM 826. Mass Spectrometry. 3 Hours.
An introduction to mass spectrometry. The various ionization techniques and mass analyzers will be discussed, and many examples of different mass spectrometric applications will be introduced. Prerequisite: CHEM 720. LEC.

CHEM 828. Bioanalysis. 3 Hours.
A course covering important aspects in modern chemical measurement with particular emphasis placed on bioanalysis. This course will survey the modern analytical challenges associated with the ongoing efforts in genomics and proteomics and discuss future trends in methods in instrumentation. Prerequisite: CHEM 720. LEC.

CHEM 830. Structure, Bonding and Spectroscopic Methods in Inorganic Chemistry. 3 Hours.
An introduction of quantum and group theories in relation to bonding and physicochemical properties of inorganic substances. Topics include vibrational and electronic spectroscopies, magnetism, and inorganic photochemistry. Prerequisite: CHEM 730. LEC.
CHEM 832. Inorganic Reaction Mechanisms and Catalysis. 3 Hours. Mechanistic aspects of transition metal chemistry including substitution reactions, electron transfer reactions, rearrangement reactions, ligand reactions and inorganic photochemistry. Principles and applications of heterogeneous and homogeneous catalytic processes emphasizing catalysis at transition metal centers. Prerequisite: CHEM 730. LEC.

CHEM 840. Physical Organic Chemistry. 3 Hours. An examination of the methods used to probe the mechanisms of organic reactions and of the chemistry of some important reactive intermediates. Topics will include isotope effects, kinetics, linear free energy relationships, solvent effects, a continuing discussion of orbital symmetry, rearrangements, carbocations, carbanions, carbones, radicals, excited states, and strained molecules. Prerequisite: CHEM 740. LEC.

CHEM 842. Organic Synthesis I. 3 Hours. A discussion of fundamental reactions for the formation of carbon-carbon bonds, oxidation, reduction, and functional group interchange. Prerequisite: CHEM 740. LEC.

CHEM 844. Problem Solving in Organic Chemistry. 1 Hour. A course designed to develop a student's ability to apply fundamental concepts of mechanistic organic and organometallic chemistry, physical organic chemistry, bioorganic chemistry, synthetic organic reactions and techniques for structure elucidation. Students will propose solutions to practice problems mimicking challenges that arise in contemporary research in organic chemistry. The format includes interactive problem-solving discussions led by faculty and peers and monthly written examinations. May be repeated up to three times until the student has passed at least four of the written exams. Graded on a Satisfactory/Unsatisfactory basis. Prerequisite: CHEM 740 or permission of instructor. SEM.

CHEM 850. Advanced Quantum Mechanics. 3 Hours. The advanced mathematical and physical principles of quantum mechanics relevant to atomic and molecular systems. Topics may include abstract vector spaces and representations, time-dependent quantum dynamics, electronic structure theory, density matrices, second-quantization, advanced group theory, path integrals, and scattering theory. Prerequisite: CHEM 750 or its equivalent. LEC.

CHEM 852. Statistical Thermodynamics. 3 Hours. Thermodynamics and introduction to equilibrium statistical mechanics with emphasis on problems of chemical interest. The course consists of two roughly equal parts: 1) An advanced overview of the laws and concepts of thermodynamics with application to specific problems in phase and chemical equilibria and 2) An introduction to equilibrium statistical mechanics for both classical and quantum systems. Prerequisite: CHEM 750 or its equivalent. LEC.

CHEM 854. Chemical Kinetics and Dynamics. 3 Hours. A study of the rates, mechanisms, and dynamics of chemical reactions in gases and liquids. Topics include an advanced overview of classical kinetics, reaction rate theories (classical collision theory, transition-state theory and introductory scattering theory), potential energy surfaces, molecular beam reactions, photochemistry, Marcus electron transfer theory and other areas of current interest. Prerequisite: CHEM 750 or its equivalent. LEC.

CHEM 856. Molecular Spectroscopy. 3 Hours. Quantitative molecular spectroscopy and its chemical applications. The basic principles of the molecular energy levels, selection rules and spectral transition intensities will be discussed and applied to rotational, vibrational, electronic, and nuclear magnetic spectroscopy. Linear and nonlinear spectroscopies will be addressed. Prerequisite: CHEM 750 or its equivalent. LEC.

CHEM 860. Principles and Practice of Chemical Biology. 3 Hours. A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as BIOL 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

CHEM 899. Master's Thesis. 1-10 Hours. Research work (either experimental or theoretical) in chemistry for students working toward the M.S. degree. Graded on a satisfactory progress/limited progress/no progress basis. THE.

CHEM 900. Advanced Research. 1-10 Hours. Original investigation in chemistry at the graduate level. Graded on satisfactory/unsatisfactory basis. Prerequisite: Advancement to doctoral candidacy. RSH.

CHEM 914. Computational Methods in Physical Sciences. 3 Hours. Advanced computer applications in physical science. General discussion and illustration of problem organization and solution by numerical and other methods with examples from physics, astronomy, and other physical sciences. Students will design, write, validate, and document computer programs to solve physical problems. (Same as ASTR 815 and PHSX 815.) Prerequisite: Six hours of computer science courses numbered 300 or above, and six hours of physics and/or astronomy courses numbered 300 or above. LEC.

CHEM 930. Bioinorganic Chemistry. 3 Hours. A survey of metalloproteins and metalloenzymes, their structures and functions, including recent advances in biomimetic modeling, small molecule activation in biological systems, and related physical methods. Prerequisite: CHEM 832. LEC.

CHEM 942. Organic Synthesis II. 3 Hours. A survey of important techniques in organic chemistry with respect to scope, limitations, mechanism, and stereochemistry. Emphasis will be placed on new synthetic methods and application of such methods to the synthesis of structurally interesting compounds, particularly natural products. Prerequisite: CHEM 842. LEC.

CHEM 950. Advanced Statistical Mechanics. 3 Hours. Advanced equilibrium statistical mechanics and introduction to nonequilibrium statistical mechanics. Topics include: the theory of liquids, critical phenomena linear response theory and time correlation functions, Langevin dynamics, and molecular hydrodynamics. (Same as PHSX 971.) Prerequisite: CHEM 909 or equivalent. LEC.

CHEM 970. College Teaching Experience in Chemistry. 3 Hours. A student will engage in a semester-long, planned instructional activity that shall include college classroom teaching under the supervision of a chemistry department faculty member. Prerequisite: Two semesters as a graduate teaching assistant. LEC.

CHEM 980. Advanced Topics in Chemistry: ______. 2-3 Hours. A course covering special advanced topics in chemistry not included in other graduate courses. One or more topics will be covered in a given semester and an announcement of the course content and prerequisites will be made at the end of the previous semester. This course may be taken more than once when the topic varies. LEC.

CHEM 999. Doctoral Dissertation. 1-10 Hours. Research work (either experimental or theoretical) in chemistry for students working toward the Ph.D. degree. Graded on a satisfactory progress/limited progress/no progress basis. THE.
Bachelor of Arts in Chemistry

Why study chemistry?

At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry, including emerging fields of microfluidics, precision medicine and sustainable catalysis.

Undergraduate Program

The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Chemistry Programs

The B.A. degree is for the student who wants to understand the fundamental principles of chemistry and to study a number of other fields. The B.S. degree prepares students for graduate school and professional careers. Both are based on a high school background that includes at least 1½ years of algebra and 1 year of geometry. High school courses in chemistry and physics are desirable but are not required. Many chemistry majors are preparing for medical school or for graduate study in chemistry and related fields. For graduate school, the common body of knowledge in the B.A. program is the minimum prerequisite. For premedical students, much of the knowledge will be important in their careers. Even more important, however, is the training in logical thinking, drawing conclusions from experimental observations, and digesting and understanding scientific information.

First- and Second-Year Preparation

Because study in chemistry requires preparation in mathematics and physics as well as a structured series of courses in chemistry, students should begin meeting major requirements in the first year. Students planning to major in chemistry should consult a chemistry department major advisor during their first semester to develop a 4-year plan for degree completion. It is particularly important to take CHEM 170 (or CHEM 130 or CHEM 190 and CHEM 191) and CHEM 175 (or CHEM 135 or CHEM 195 and CHEM 196) in the first year and CHEM 330 or CHEM 380) and CHEM 331 in the second year. For those seeking a B.A. degree, it is also important to complete two semesters of calculus and two semesters of physics during the first two years. Minimum requirements in these subject areas for the B.A. degree are MATH 115, MATH 116, PHSX 114 and PHSX 115.

Requirements for the B.A. Major

In addition to the common College requirements for the B.A., a minimum of 29 hours in chemistry (including 5 hours each of analytical, organic, and physical chemistry lecture and laboratory) and one year each of calculus and physics (prerequisites for physical chemistry) are required. These courses fulfill the requirements:

<table>

or CHEM 38 Organic Chemistry II, Honors
CHEM 336 Organic Chemistry II Laboratory
Analytical Chemistry (Lecture and Lab). Satisfied by: 5
CHEM 400 Analytical Chemistry
CHEM 401 Analytical Chemistry Laboratory
Physical Chemistry (Lecture and Lab). Satisfied by one of the following (CHEM 520 recommended)
CHEM 520 Biological Physical Chemistry with Laboratory
CHEM 530 Physical Chemistry I
& CHEM 535 and Physical Chemistry II
& CHEM 537 and Physical Chemistry Laboratory
Seminar II. Satisfied by: 0.5
CHEM 695 Seminar II
Capstone experience (Fulfills KU Core Goal 6). Satisfied by one of the following:
CHEM 636 Instrumental Methods of Analysis Laboratory
or CHEM 698 Undergraduate Capstone Research
or CHEM 699 Undergraduate Honors Research

Mathematics and Physics 14-20
Mathematics: (choose one of the following (MATH 115 & MATH 116 recommended))
MATH 115 Calculus I
& MATH 116 and Calculus II
MATH 125 Calculus I
& MATH 126 and Calculus II
& MATH 127 and Calculus III
Physics: (Choose one of the following (PHSX 114 & PHSX 115 recommended))
PHSX 114 College Physics I
& PHSX 115 and College Physics II
PHSX 211 General Physics I
& PHSX 216 and General Physics I Laboratory
& PHSX 212 and General Physics II
& PHSX 236 and General Physics II Laboratory

Courses that fulfill KU Core Goal 6 are CHEM 636 Instrumental Methods of Analysis Laboratory or 3 credits of CHEM 698 or CHEM 699. Students choosing CHEM 636 will be required to take CHEM 635 as the pre or co-requisite.

Biological Chemistry Option

This option is available to students interested in the biological applications of chemistry. The curriculum is compatible with many pre-health-professions programs and prepares the student for graduate study or career opportunities.

In addition to all of the requirements for the regular B.A. major, the following courses are required:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 636</td>
<td>Biochemistry I</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 638</td>
<td>Biochemistry II</td>
<td>4</td>
</tr>
<tr>
<td>Plus 1 elective (3) (In consultation with a faculty major advisor, choose 1 course from those listed in the Biology Option Group in requirements for the B.S. degree in Chemistry: Biological Chemistry option.)</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 35-40 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 23.5 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of 3.5 GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator. (http://clas.ku.edu/undergrad/tools/gpa/)

Sample 4-year plans for the BA degree with the following concentrations, can be found here: Chemistry (p. 1298), Biological Chemistry (p. 1299), or by using the left-side navigation.

Sample 4-year plans for the BS degree in Chemistry can be found by using the left-side navigation.

Departmental Honors

Undergraduates may apply for admission to the departmental honors program after completion of an analytical, organic, and physical chemistry course but no sooner than the beginning of the junior year. Highly motivated and superior B.A. and B.S. students are admitted to the honors program. Honors in chemistry are awarded to students who have been admitted to the program and who have completed the following requirements with superior performance, including a major GPA of 3.5.

1. At least 2 semesters of CHEM 699 (4-8 hours total) resulting in a written thesis.
2. Evaluation and approval of the thesis by a faculty advisory committee.
3. Oral presentation of the thesis results at a special departmental seminar or other approved forum.

For an application form and further information, consult the department office.

BA in Chemistry

Below is a sample 4-year plan for students pursuing the standard BA in Chemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104, prior to freshman year, fall semester.

### BA in Chemistry with concentration in Biological Chemistry

Below is a sample 4-year plan for students pursuing the BA in Chemistry with a Biological Chemistry option. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 101 or MATH 104 prior to freshman year, fall semester.

#### Freshman

<table>
<thead>
<tr>

</tbody>
</table>

**Total Hours 13.5**

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 CHEM 170 requires eligibility for MATH 115 in order to enroll.

3 Students can elect to enroll in 3 hours of research or CHEM 636, Instrumental Methods of Analysis Lab to fulfill the Capstone, Goal 6 requirement. Goal 6 may also be satisfied by 3 hours of CHEM 698. Those students that elect CHEM 636 must also take CHEM 635 Instrumental Methods of Analysis as the co-requisite.

4 CHEM 180, CHEM 201, CHEM 400, CHEM 401, CHEM 520, CHEM 695 are Fall only courses. CHEM 635, CHEM 636 are Spring only courses.

5 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
The Bachelor of Science in Chemistry provides a rigorous program certified by the American Chemical Society, consisting of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

Undergraduate Program

The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements.

The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

Chem 170 requires eligibility for Math 115 in order to enroll.

BIOL 150 or BIOL 151 is a pre-requisite for the elective courses needed to fulfill the Biological Chemistry concentration elective requirement.

Choose from a list of electives approved to count for the Biological Chemistry elective requirement. See the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/chemistry/ba/#requirementstext) tab for a list of courses.

BIOL 636 is a fall only course. BIOL 638 is a spring only course. CHEM 180, CHEM 201, CHEM 400, CHEM 401, CHEM 530, CHEM 695 are Fall only courses. CHEM 635 and CHEM 636 are Spring only courses.

A Goal 6 course is required to fulfill the KU Core. Students can elect to enroll in 3 hours of research or CHEM 636, Instrumental Methods of Analysis Lab to fulfill the Capstone, Goal 6 requirement. Goal 6 may also be satisfied by 3 hours of CHEM 698. Those students that elect CHEM 636 must also take CHEM 635 Instrumental Methods of Analysis as the co-requirement.

Visit this website ([https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/](https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/)) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Bachelor of Science in Chemistry**

**Why study chemistry?**

At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry, including emerging fields of microfluidics, precision medicine and sustainable catalysis.

**Undergraduate Program**

The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics, physics, and biochemistry, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements.
that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Chemistry Programs**

The B.S. degree prepares students for graduate school and professional careers. The B.A. degree is for the student who wants to understand the fundamental principles of chemistry and to study a number of other fields. Both are based on a high school background that includes at least 1½ years of algebra and 1 year of geometry. High school courses in chemistry and physics are desirable but are not required. Many chemistry majors are preparing for medical school or for graduate study in chemistry and related fields. For graduate school, the common body of knowledge in the B.A. program is the minimum prerequisite. For premedical students, much of the knowledge will be important in their careers. Even more important, however, is the training in logical thinking, drawing conclusions from experimental observations, and digesting and understanding scientific information.

**First- and Second-Year Preparation**

Because study in chemistry requires preparation in mathematics and physics as well as a structured series of courses in chemistry, students should begin meeting major requirements in the first year. Students planning to major in chemistry should consult a chemistry department major advisor during their first semester to develop a 4-year plan for degree completion. It is particularly important to take CHEM 170 (or CHEM 130 or CHEM 190 & CHEM 191) and CHEM 175 (or CHEM 135 or CHEM 195 & CHEM 196) in the first year and CHEM 201, CHEM 330 (or CHEM 380) and CHEM 331 in the second year. For those seeking a B.S. degree it is also important to complete CHEM 335 (or CHEM 385) and CHEM 336 in the second year as well as their mathematics preparation (MATH 125, 126, 127 and CHEM 250) and physics preparation (PHSX 211 & PHSX 216, and PHSX 212 & PHSX 236) in the first 2 years.

**Requirements for the B.S. Degree**

**General Education Requirements**

All students must complete the KU Core.

**Chemistry Core Knowledge and Skills**

Majors must complete courses as indicated in the following areas:

**Chemistry for the Chemical Sciences I. Satisfied by one of the following:**

- CHEM 170 Chemistry for the Chemical Sciences I
- CHEM 130 General Chemistry I
- CHEM 190 Foundations of Chemistry I, Honors & CHEM 191 Foundations of Chemistry I Laboratory, Honors

**Chemistry for the Chemical Sciences II. Satisfied by one of the following:**

- CHEM 175 Chemistry for the Chemical Sciences II
- CHEM 135 General Chemistry II
- CHEM 195 Foundations of Chemistry II, Honors & CHEM 196 Foundations of Chemistry II Laboratory, Honors

**Seminar I. Satisfied by:**

- CHEM 180 Seminar I

**Laboratory Safety in the Chemical Sciences. Satisfied by:**

- CHEM 201 Laboratory Safety in the Chemical Sciences

**Organic Chemistry I (Lecture and Lab). Satisfied by:**

- CHEM 330 Organic Chemistry I or CHEM 38 Organic Chemistry I, Honors

**CHEM 331 Organic Chemistry I Laboratory**

**Organic Chemistry II (Lecture and Lab). Satisfied by:**

- CHEM 335 Organic Chemistry II or CHEM 38 Organic Chemistry II, Honors

**CHEM 336 Organic Chemistry II Laboratory**

**Analytical Chemistry (Lecture and Lab). Satisfied by:**

- CHEM 400 Analytical Chemistry & CHEM 401 Analytical Chemistry Laboratory

**Physical Chemistry I. Satisfied by:**

- CHEM 530 Physical Chemistry I
Physical Chemistry II. Satisfied by: 
CHEM 535 Physical Chemistry II 3

Physical Chemistry Laboratory. Satisfied by: 
CHEM 537 Physical Chemistry Laboratory 3

Instrumental Methods of Analysis. Satisfied by: 
CHEM 635 Instrumental Methods of Analysis 2

Systematic Inorganic Chemistry. Satisfied by: 
CHEM 660 Systematic Inorganic Chemistry 3

Advanced Inorganic Laboratory. Satisfied by: 
CHEM 661 Advanced Inorganic Laboratory 2

Seminar II. Satisfied by: 
CHEM 695 Seminar II 0.5

Capstone Experience (Fulfills KU Core Goal 6). Satisfied by one of the following: 
CHEM 636 Instrumental Methods of Analysis Laboratory 3
or CHEM 685 Undergraduate Capstone Research 3
or CHEM 699 Undergraduate Honors Research 3

Major Hours & Major GPA
KU Core Goal 6 is satisfied by either CHEM 636 Instrumental Methods of Analysis Laboratory, or 3 credit hours of CHEM 698 or CHEM 699.

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 47 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 35.5 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator. (http://clas.ku.edu/undergrad/tools/gpa/)

Biological Chemistry Option
This option is available to students interested in the biological applications of chemistry. The curriculum is compatible with many pre-health-professions programs and prepares the student for graduate study or career opportunities.

General Education Requirements
All students must complete the KU Core.

Calculus II. Satisfied by one of the following: 
MATH 126 Calculus II or MATH 141 Calculus II, Honors 4

Calculus III. Satisfied by one of the following: 
MATH 127 Calculus III or MATH 141 Calculus III, Honors 4

Mathematical Methods for the Chemical Sciences. Satisfied by: 
CHEM 250 Mathematical Methods for the Chemical Sciences 3

General Physics I. Satisfied by one of the following: 
PHSX 211 General Physics I & PHSX 216 and General Physics I Laboratory 5
PHSX 212 General Physics I Honors 4

General Physics II. Satisfied by one of the following: 
PHSX 212 General Physics II & PHSX 236 and General Physics II Laboratory 4
PHSX 214 General Physics II Honors 4

Chemistry Core Knowledge and Skills
Majors must complete courses as indicated in the following areas:

Chemistry for the Chemical Sciences I. Satisfied by one of the following: 
CHEM 170 Chemistry for the Chemical Sciences I 5

CHEM 130 General Chemistry I 5

CHEM 190 Foundations of Chemistry I, Honors & CHEM 191 and Foundations of Chemistry I Laboratory, Honors 4

Chemistry for the Chemical Sciences II. Satisfied by one of the following: 
CHEM 175 Chemistry for the Chemical Sciences II 5

CHEM 135 General Chemistry II 5

CHEM 195 Foundations of Chemistry II, Honors & CHEM 196 and Foundations of Chemistry II Laboratory, Honors 4

Seminar I. Satisfied by: 
CHEM 180 Seminar I 0.5

Laboratory Safety in the Chemical Sciences. Satisfied by: 
CHEM 201 Laboratory Safety in the Chemical Sciences 1

Organic Chemistry I (Lecture and Lab). Satisfied by: 
CHEM 330 Organic Chemistry I or CHEM 385 Organic Chemistry I, Honors 5

CHEM 331 Organic Chemistry I Laboratory 5

Organic Chemistry II (Lecture and Lab). Satisfied by: 
CHEM 335 Organic Chemistry II or CHEM 385 Organic Chemistry II, Honors 5

CHEM 537 Physical Chemistry Laboratory 3

Instrumental Methods of Analysis. Satisfied by: 
CHEM 636 Instrumental Methods of Analysis Laboratory 2
CHEM 635  Instrumental Methods of Analysis
Systematic Inorganic Chemistry. Satisfied by:  3
CHEM 660  Systematic Inorganic Chemistry
Advanced Inorganic Laboratory. Satisfied by:  2
CHEM 661  Advanced Inorganic Laboratory
Seminar II. Satisfied by:  0.5
CHEM 695  Seminar II
Capstone Experience (Fulfills KU Core Goal 6). Satisfied by one of the following:
CHEM 636  Instrumental Methods of Analysis Laboratory
or CHEM 696 Undergraduate Capstone Research
or CHEM 699 Undergraduate Honors Research

Biological Chemistry Core Knowledge and Skills
Biochemistry. Satisfied by:  8
BIOL 636  Biochemistry I
BIOL 638  Biochemistry II
Biochemistry Laboratory. Satisfied by:  2
BIOL 637  Introductory Biochemistry Laboratory
Biological Chemistry Required Electives
Majors choosing this option should select 1 elective (3 hours) from the following:
BIOL 350  Principles of Genetics
BIOL 400  Fundamentals of Microbiology
BIOL 416  Cell Structure and Function

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 47 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 35.5 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Chemical Physics Option
This option allows students to focus on the theoretical basis of chemistry. Students are prepared for graduate programs or employment.

General Education Requirements
All students must complete the KU Core.

Major Junior/Senior Hours
Satisfied by a minimum of 35.5 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Departmental Honors
Undergraduates may apply for admission to the departmental honors program after completion of an analytical, organic, and physical chemistry course but no sooner than the beginning of the junior year. Highly motivated and superior B.A. and B.S. students are admitted to the honors program. Honors in chemistry are awarded to students who have been admitted to the program and who have completed the following requirements with superior performance, including a major GPA of 3.5.

1. At least 2 semesters of CHEM 699 (4-8 hours total) resulting in a written thesis.
2. Evaluation and approval of the thesis by a faculty advisory committee.
3. Oral presentation of the thesis results at a special departmental seminar or other approved forum.

For an application form and further information, consult the department office.

BS in Chemistry
Below is a sample 4-year plan for the American Chemical Society Certified BS degree in Chemistry. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 103 or MATH 104 prior to freshman year, fall semester.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 47 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Chemical Physics Core Knowledge and Skills
12

Majors must complete 2 courses from each of the following groups:

Group I

PHSX 313 General Physics III
& PHSX 316 and Intermediate Physics Laboratory I (PHSX 313 and PHSX 316 should be taken concurrently)

PHSX 518 Mathematical Physics
PHSX 521 Mechanics I
PHSX 615 Numerical and Computational Methods in Physics
PHSX 655 Optics
PHSX 681 Concepts in Solids

Group II

PHSX 531 Electricity and Magnetism
PHSX 621 Mechanics II
MATH 646 Complex Variable and Applications
MATH 647 Applied Partial Differential Equations
CHEM 698 Undergraduate Capstone Research
CHEM 750 Introduction to Quantum Mechanics

Organic Chemistry II (Lecture and Lab). Satisfied by: 5

CHEM 335 Organic Chemistry II
or CHEM 383 Organic Chemistry II, Honors

CHEM 336 Organic Chemistry II Laboratory

Analytical Chemistry (Lecture and Lab). Satisfied by: 5

CHEM 400 Analytical Chemistry
& CHEM 401 and Analytical Chemistry Laboratory

Physical Chemistry I. Satisfied by: 4

CHEM 530 Physical Chemistry I

CHEM 535 Physical Chemistry II

Physical Chemistry Laboratory. Satisfied by: 3

CHEM 537 Physical Chemistry Laboratory

Instrumental Methods of Analysis. Satisfied by: 2

CHEM 635 Instrumental Methods of Analysis

Systematic Inorganic Chemistry. Satisfied by: 3

CHEM 660 Systematic Inorganic Chemistry

Advanced Inorganic Laboratory. Satisfied by: 2

CHEM 661 Advanced Inorganic Laboratory

Seminar II. Satisfied by: 0.5

CHEM 695 Seminar II

Capstone Experience (Fulfills KU Core Goal 6). Satisfied by one of the following:

CHEM 636 Instrumental Methods of Analysis Laboratory
or CHEM 698 Undergraduate Capstone Research
or CHEM 699 Undergraduate Honors Research

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 47 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.
### BS in Chemistry with concentration in Biological Chemistry

Below is a sample 4-year plan for students pursuing the BS in Chemistry with a concentration in Biological Chemistry. To view the list of courses approved to fulfillment KU Core Goals, please visit the [KU Core website](http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 103 or MATH 104 prior to freshman year, fall semester.

**Total Hours 120**

1. CHEM 170 requires eligibility for MATH 115 in order to enroll.
2. CHEM 180, CHEM 201, CHEM 530, CHEM 400, CHEM 401, CHEM 660, CHEM 695, are Fall only courses. CHEM 250, CHEM 535, CHEM 537, CHEM 635, CHEM 636, CHEM 661 are Spring only courses.

### Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
This degree plan assumes students will have the equivalent of KU Core Goals, please visit the KU Core website or kucore.ku.edu/courses/ approved to fulfill KU Core Goals, please visit the KU Core website prior to freshman year, fall semester.

### BS in Chemistry with concentration in Chemical Physics

Below is a sample 4-year plan for students pursuing the BS in Chemistry with a concentration in Chemical Physics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

This degree plan assumes students will have the equivalent of MATH 103 or MATH 104 prior to freshman year, fall semester.

#### Total Hours 120-121

1. CHEM 170 requires eligibility for MATH 115 in order to enroll.
2. CHEM 180, CHEM 201, CHEM 400, CHEM 401, CHEM 530, CHEM 660, CHEM 695 are Fall only courses. CHEM 250, CHEM 535, CHEM 537, CHEM 635, CHEM 661 are Spring only courses.
3. 3 hours of CHEM 698 or CHEM 699 can also be used to satisfy KU Core Goal 6.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
The undergraduate program in the Department of Chemistry has two primary missions. One of these is to help its majors attain a mastery of the discipline in preparation for further study in chemistry or a chemical science, or for immediate employment in chemistry. The other is to provide an opportunity for students majoring in other disciplines to acquire a basic knowledge of the fundamental areas of chemistry.

The curriculum leading to the Bachelor of Science (B.S.) degree, a rigorous program certified by the American Chemical Society, consists of a full spectrum of chemistry courses as well as supporting courses in mathematics and physics, and is designed to prepare students for a professional career in chemistry. The Bachelor of Arts (B.A.) degree program, with fewer required courses, allows students to obtain a broader knowledge of areas outside of chemistry, or to tailor their chemistry program for specific or unique objectives. We also offer a minor in chemistry for those seeking a secondary area of study.

Requirements for the Minor

The minor allows many non-chemistry majors to obtain a strong, distributed background in the discipline. It is particularly useful for students in STEM fields or pre-professional programs that require at least one year of chemistry coursework but whose career plans would be enhanced by a deeper understanding of the molecular sciences. Due to extensive overlap in required chemistry coursework, the Chemistry minor is not available to students majoring in Biochemistry and Chemical Engineering.

**Chemistry Minor Course Requirements**

Students selecting this minor must complete the following:

**Mathematics and Physics**

Mathematics: (choose one of the following (MATH 115 & MATH 116 6-12 recommended))

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

Admitted as either a degree-seeking or non-degree seeking student.

An applicant seeking to pursue graduate study in the College may be admitted to Graduate Studies from undergraduate to colleague.

At the University of Kansas, we feel that our program provides exceptional mentoring to graduate students and guiding them during their journey of outstanding faculty, each of whom is dedicated to providing cutting-edge research, higher education or any one of a number of diverse opportunities for the student interested in a career in medicine and sustainable catalysis.

Why study chemistry?

At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry, including emerging fields of microfluidics, precision medicine and sustainable catalysis.

Graduate Program

For a student wishing to earn a Doctor of Philosophy (Ph.D.) degree or a Master’s of Science (M.S.) degree in chemistry, the selection of a graduate school is one of the most important career decisions you will make. Your choice will not only determine where you will be during the next several years, but will lay the foundation for your future.

At the University of Kansas, we feel that our program provides exceptional and diverse opportunities for the student interested in a career in cutting-edge research, higher education or any one of a number of chemically related positions requiring an advanced degree. We have a department of outstanding faculty, each of whom is dedicated to providing mentoring to graduate students and guiding them during their journey from undergraduate to colleague.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Prerequisites

Before beginning graduate work, students should have completed a bachelor's degree in chemistry or a related field.

Application

Applications for admission are accepted online through the Office of Graduate Studies. Applications must include academic transcripts from all post-secondary schools attended, as well as recommendation letters from 3 individuals familiar with the applicant’s academic background and abilities. Additional materials that are strongly recommended include Graduate Record Examination scores (GRE), a resume/CV and a personal statement describing the applicant’s qualifications and reasons for pursuing a graduate degree in chemistry.

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Although the preferred submission deadline is December 15, applications must be received by April 15 to be considered for admission in the fall semester.

To apply, complete the online graduate application (https://gradapply.ku.edu/apply/) and upload all requested documents.

Procedure

Completed applications are reviewed by a committee of faculty members from the Department of Chemistry. Offers of admission depend on favorable evaluation of the application materials and an expectation that the student will attain an undergraduate grade-point average of B or higher in chemistry and all other natural science and mathematics courses. Admission to the graduate program is contingent upon completion of a bachelor’s degree in chemistry (or a related field) and all other general admission requirements.

M.S. Degree Requirements

Each M.S. candidate must complete the following course requirements:

1. Distribution Requirement: Each student must complete (with a B or higher) a distribution requirement consisting of two courses selected from the following list of introductory courses in the 5 major areas of study:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 720</td>
<td>Fundamentals and Methods of Analytical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 730</td>
<td>Coordination and Organometallic Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 740</td>
<td>Principles of Organic Reactions</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 750</td>
<td>Introduction to Quantum Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 760</td>
<td>Introduction to Chemistry in Biology</td>
<td>3</td>
</tr>
</tbody>
</table>
2. Complete CHEM 700 (Responsible Scholarship in the Chemical Sciences) and CHEM 701 (Laboratory Safety in the Chemical Sciences) with a B or higher.

3. Complete with a B or higher 4 courses at the 700 level or above in chemistry or a related area. The list of courses to be completed must be agreed upon by the student and the student’s research advisor and approved by the Graduate Affairs Committee before the beginning of the student’s second semester in the program. (Changes to the list can only be made with the approval of the student, the research advisor, and the Graduate Affairs Committee.) Note: these 4 courses represent a minimal set and do not preclude the student, with consultation of the research advisor, from taking additional courses in support of the research effort.

The minimum total credit hours required for the master’s degree is 30.

The candidate for the master’s degree must complete a thesis that does not exceed one-third of the credit hours and demands the solution of some research problem in chemistry. The remaining work may consist of additional specialized courses in chemistry or in related fields such as physics, mathematics, microbiology, biochemistry, or chemical engineering. Students completing a master’s thesis in chemical education must take EPSY 715 Understanding Research in Education and EPSY 710 Introduction to Statistical Analysis. Courses from outside the department cannot be from more than 2 departments.

At the time of the completion of the thesis, a candidate for the master’s degree must pass an oral thesis defense (examination) administered by a committee of three members of the department’s Graduate Faculty.

**Doctor of Philosophy in Chemistry**

**Why study chemistry?**

At KU Chemistry, we have faculty dedicated to mentoring both undergraduate and graduate students and to helping each student achieve scientific maturity. In addition to required classroom and laboratory courses, options exist for doing research in exciting areas of mainstream chemistry, including emerging fields of microfluidics, precision medicine and sustainable catalysis.

**Graduate Program**

For a student wishing to earn a Doctor of Philosophy (Ph.D.) degree or a Master’s of Science (M.S.) degree in chemistry, the selection of a graduate school is one of the most important career decisions you will make. Your choice will not only determine where you will be during the next several years, but will lay the foundation for your future.

At the University of Kansas, we feel that our program provides exceptional and diverse opportunities for the student interested in a career in cutting-edge research, higher education or any one of a number of chemically related positions requiring an advanced degree. We have a department of outstanding faculty, each of whom is dedicated to providing mentoring to graduate students and guiding them during their journey from undergraduate to colleague.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

**Prerequisites**

Before beginning graduate work, students should have completed a bachelor’s degree in chemistry or a related field.

**Application**

Applications for admission are accepted online through the Office of Graduate Studies. Applications must include academic transcripts from all post-secondary schools attended, as well as recommendation letters from three individuals familiar with the applicant’s academic background and abilities. Additional materials that are strongly recommended include Graduate Record Examination (GRE) scores, and a resume/CV and personal statement describing the applicant’s qualifications and reasons for pursuing a graduate degree in chemistry. Although the preferred submission deadline is December 15, applications must be received by April 15 to be considered for admission in the fall semester.

To apply, complete the online graduate application form (https://gradapply.ku.edu/apply/) and upload all requested documents.

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

**Procedure**

Completed applications are reviewed by a committee of faculty members from the Department of Chemistry. Offers of admission depend on favorable evaluation of the application materials and an expectation that the student will attain an undergraduate grade-point average of B or higher in chemistry and all other natural science and mathematics courses. Admission to the graduate program is contingent upon completion of a bachelor’s degree in chemistry (or a related field) and all other general admissions requirements.

**Ph.D. Degree Requirements**

Each Ph.D. aspirant must complete the following course requirements:

1. **Distribution Requirement:** Each student must complete (with a B or higher) a distribution requirement consisting of two courses selected from the following list of introductory courses in the 5 major areas of study:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 720</td>
<td>Fundamentals and Methods of Analytical Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 730</td>
<td>Coordination and Organometallic Chemistry</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 740</td>
<td>Principles of Organic Reactions</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 750</td>
<td>Introduction to Quantum Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>CHEM 760</td>
<td>Introduction to Chemistry in Biology</td>
<td>3</td>
</tr>
</tbody>
</table>
2. Complete with a B or higher 4 courses at the 700 level or above in chemistry or a related area. The list of courses to be completed must be agreed upon by the student and the student’s research advisor and approved by the Graduate Affairs Committee before the beginning of the student’s second semester in the program. (Changes to the list can only be made with the approval of the student, the research advisor, and the Graduate Affairs Committee.) Note: These 4 courses represent a minimal set and do not preclude the student, with consultation of the research advisor, from taking additional courses in support of the research effort.

3. Complete CHEM 700 (Responsible Scholarship in the Chemical Sciences) and CHEM 701 (Laboratory Safety in the Chemical Sciences) with a B or higher. CHEM 700 satisfies the university’s Responsible Scholarship requirement for the chemistry Ph.D.

These courses must be satisfactorily completed before a student takes the comprehensive oral examination.

The aspirant also must fulfill the following requirements:

1. A comprehensive oral examination must be completed. The student must prepare a written, original research proposal before the examination is scheduled. The proposal must be presented and defended orally at the examination; however, the examination is comprehensive in nature. The student must be prepared for questions on a range of topics in the discipline. It should be noted that requirements (1) and (2) must be completed before the comprehensive oral examination can be taken. Failure to pass the oral examination before the beginning of the fourth year of graduate study leads to ineligibility for support by departmental or research funds.

2. A dissertation based on original work of high quality in one of the principal fields of chemistry must be completed.

3. A final oral examination and defense of the dissertation must be completed.

For further details, see Doctoral Degree Requirements, Doctor of Philosophy (p. 2544) in the Graduate Studies section of the online catalog.

Child Language Doctoral Program

The doctoral program in Child Language offers a specialized degree in this interesting area of study. The program crosses traditional academic boundaries to give students the theoretical, empirical, and methodological competence necessary to study basic and applied issues in language acquisition. This multidisciplinary program is a cooperative endeavor of faculty members from the Departments of Applied Behavioral Science, Clinical Child Psychology, Linguistics, Molecular Biosciences, Psychology, and Speech-Language-Hearing: Sciences and Disorders. In addition, the Child Language Doctoral Program has faculty specializing in genetics of language and speech, and in quantitative methods.

Students study 4 areas:

1. Core theoretical and experimental work on language acquisition,
2. Relevant methods and theories in linguistics and psycholinguistics,
3. Theoretical perspectives on developmental psychology, and
4. The nature of disordered language development and methods and techniques for language intervention.

In addition, new areas of study are offered in genetics of language acquisition and impairments, as well as quantitative methods.

Each student is advised by a support committee of 3 faculty members. Enrollment in a proseminar in language acquisition is required of all students in addition to participation in research activities. Opportunities for individual research projects include the projects of participating faculty members and the research teams of the Schiefelbusch Institute for Life Span Studies, the Speech-Language-Hearing Clinic, and the clinical/research facilities of KU Medical Center.

Graduates are candidates for teaching and research positions, clinical positions providing service to communicatively disabled persons, and research work in business and governmental sectors.

Faculty

We are a cross-disciplinary program and our faculty (https://cldp.ku.edu/faculty/) is involved in research spanning many diverse fields of study. Our portfolios are dynamic and growing, so you will be directed to our most recent information.

An internationally recognized scholar leads the program activities: Mabel L. Rice (https://cldp.ku.edu/mabel-l-rice/) is the Director and Graduate Advisor.

Courses

CLDP 709. First Language Acquisition I. 3 Hours. Introduction to the study of language acquisition: the significant findings, the basic methodological procedures, and some of the more recent theoretical accounts. Not open to students who have taken LING 425. (Same as LING 709.) Prerequisite: Graduate standing or consent of instructor. LEC.

CLDP 739. First Language Acquisition II. 3 Hours. A second semester course in child language which explores the acquisition of morphology, syntax and the ways in which morphology and syntax interact in linguistic theory and language development. Topics covered in the course include agreement, case, null subjects, question formation, pronoun binding, quantification, and control. (Same as LING 739.) Prerequisite: LING 709 or permission of the instructor. LEC.

CLDP 782. Research Methods in Child Language. 3 Hours. A survey of methods for studying phonological, morphological, syntactic, and semantic change during language development. Methods include: diary interpretation, language sample analysis, probe elicitation tasks, and clinical assessment. (Same as LING 782 and PSYC 782.) LEC.

CLDP 799. Proseminar in Child Language. 2 Hours. Review and discussion of current issues in children's language acquisition. May be repeated for credit. Graded on a satisfactory/unsatisfactory basis. (Same as ABSC 797, LING 799, PSYC 799 and SPLH 799.) (Formerly HDFL 797.) SEM.

CLDP 822. Seminar in First Language Acquisition. 3 Hours. Critical examination of recent theoretical issues and empirical findings in the study of first language acquisition. (Same as LING 822.) Prerequisite: LING 709 or consent of instructor. LEC.

CLDP 852. Concepts in Human Molecular Genetics. 3 Hours. This is a lecture course providing concepts in human genetics, fundamentals of gene pathways, Mendelian and non-Mendelian transmission of genetic diseases, gene regulation and expression, genotype/phenotype correlation, characteristics of human genome, Microarray and DNA cloning. The major goal is to introduce a breadth of genetic concepts to students and at the same time provide recent
developments in human genetic research. Students are expected to actively participate in discussion of readings from text books, review articles and research papers. There will be at least 3 lab days to demonstrate methodologies like DNA purification from saliva, polymerase chain reaction and DNA electrophoresis. Prerequisite: Consent of instructor. SEM.

CLDP 854. Principles for the Study of Genetic Disorders. 3 Hours.
This course explores the fundamentals of disease gene identification methods and tools that are effective to explore the genetic components of inherited disorders. Fundamentals of pedigree based genetic analyses will be covered, along with Mendelian and non-Mendelian inheritance patterns, gene mapping methods, population allele frequencies, heterogeneity, microarray expression, DNA sequencing, recent development in disease gene identification, online human genomic databases, genetic variations, pathogenicity and bioinformatic tools. Recent topics like gene editing, personalized medicine, and pharmacogenetics will be discussed. There will be at least 3 lab days to demonstrate DNA quantification, polymorphism, Sanger sequencing and bioinformatic tools like oligo design, prediction of pathogenicity of protein coding SNPs, and browsing human genome databases. Prerequisite: Consent of instructor. SEM.

CLDP 856. Epigenetics of Behavioral and Developmental Disorders. 3 Hours.
This course will include discussion of the epigenetic mechanisms involved in behavioral and developmental disorders. The topics reviewed will be DNA methylation, histone modification, genomic imprinting, neurogenesis, epigenetic control of gene expression, non-coding RNAs, prions, microbiota and epigenetics, influence of environment, life style, diet and exercise on gene regulation and cellular pathways. The topics of pharmacoeugenetics, personalized epigenetics and future perspectives of epigenetics in human health will be covered. Recent development in epigenetic research will be discussed. Prerequisite: Consent of instructor. SEM.

CLDP 874. Research Practicum. 1-3 Hours.
Master's level. Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting an experimental investigation on topics related to child language acquisition and disorders, including quantitative methods. May be repeated for up to a maximum of 3 credits. Prerequisite: SPLH 660 or equivalent research methods course. RSH.

CLDP 876. Independent Study in Problems of Child Language. 1-6 Hours.
Investigation of special topics by individual master's level students. Paper required. Prerequisite: Consent of instructor. IND.

CLDP 880. Seminar in Child Language. 1-3 Hours.
A seminar devoted to factors affecting children's language acquisition and language impairments, with some attention to theoretical formulations, causal pathways and mechanisms of change. Topics may vary. Prerequisite: Consent of instructor. SEM.

CLDP 898. Investigation and Conference (Masters). 1-8 Hours.
Directed research and experimentation for M.A. students in some phase of child language acquisition/disorders. Prerequisite: Consent of instructor. RSH.

CLDP 899. Master's Thesis. 1-6 Hours.
Development of Master's Thesis in the area of child language acquisition and/or disorders. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor. THE.

CLDP 944. Multilevel Models for Longitudinal and Repeated Measures Data. 3 Hours.
Applications of the multilevel model (hierarchical linear model, general linear mixed model) for analyzing longitudinal and repeated measures data, including analysis of growth curves, within-person fluctuation, repeated measures research designs with crossed random effects, and simultaneous prediction of multiple sources of variation. Prerequisite: Instructor permission LEC.

CLDP 945. Advanced Multilevel Models. 3 Hours.
Advanced applications of the multilevel model (hierarchical linear model, general linear mixed model) for examining multiple sources of variation, models for crossed sources of nesting, three levels of nesting, heterogeneous variances, multivariate outcomes, and non-linear outcomes. Prerequisite: Instructor permission. LEC.

CLDP 948. Latent Trait Measurement and Structural Equation Models. 3 Hours.
Contemporary measurement theory and latent variable models for scale construction and evaluation, including confirmatory factor analysis, item response modeling, diagnostic classification models, and structural equation modeling. (Same as EPSY 906.) Prerequisite: EPSY 905 and instructor permission. LEC.

CLDP 964. Seminar in Child Language. 1-3 Hours.
A seminar that considers advanced research problems in investigations of child language and language impairment, diagnosis, longitudinal development, change over time, and causal factors. Paper is required. Prerequisite: Consent of instructor. SEM.

CLDP 974. Research Practicum. 3 Hours.
Application of research methodology in a laboratory situation. Emphasis is on direct participation in designing and conducting a study related to child language acquisition or impairments, and analyzing outcomes. Prerequisite: Consent of instructor. RSH.

CLDP 975. Directed Teaching: Child Language. 1-3 Hours.
Provides experiences in classroom and laboratory instruction under supervision of graduate faculty. Variable credit to reflect amount of instructional responsibility assumed. Prerequisite: Consent of instructor. IND.

CLDP 982. Issues in Scientific Conduct. 3 Hours.
Lectures and discussion on issues in the conduct of a scientific career, with emphasis on practical topics of special importance in behavioral science. Topics will include the academic and scientific roles of behavioral scientists, establishing a research lab, communicating research findings, tenure processes, gender equity, ethical conduct, and good scientific citizenship. Discussions will highlight important case studies. (Same as PSYC 982 and SPLH 982.) SEM.

CLDP 998. Investigation and Conference. 1-8 Hours.
Directed research, experimentation, and/or quantitative analysis for Ph.D. students in topics related to child language acquisition, language impairment, diagnosis, causation, or treatment. Prerequisite: Consent of instructor. RSH.

CLDP 999. Doctoral Dissertation. 1-12 Hours.
Doctoral Dissertation in topics related to child language acquisition, language impairment, diagnosis, causation, or treatment. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Consent of instructor. THE.
Doctor of Philosophy in Child Language

Child Language Doctoral Program

The doctoral program in Child Language offers a specialized degree in this interesting area of study. The program crosses traditional academic boundaries to give students the theoretical, empirical, and methodological competence necessary to study basic and applied issues in language acquisition. This multidisciplinary program is a cooperative endeavor of faculty members from the Departments of Applied Behavioral Science, Clinical Child Psychology, Linguistics, Molecular Biosciences, Psychology, and Speech-Language-Hearing; Sciences and Disorders. In addition, the Child Language Doctoral Program has faculty specializing in genetics of language and speech, and in quantitative methods.

Students study 4 areas:

1. Core theoretical and experimental work on language acquisition,
2. Relevant methods and theories in linguistics and psycholinguistics,
3. Theoretical perspectives on developmental psychology, and
4. The nature of disordered language development and methods and techniques for language intervention.

In addition, new areas of study are offered in genetics of language acquisition and impairments, as well as quantitative methods.

Each student is advised by a support committee of 3 faculty members. Enrollment in a proseminar in language acquisition is required of all students in addition to participation in research activities. Opportunities for individual research projects include the projects of participating faculty members and the research teams of the Schiefelbusch Institute for Life Span Studies, the Speech-Language-Hearing Clinic, and the clinical/research facilities of KU Medical Center.

Graduates are candidates for teaching and research positions, clinical positions providing service to communicatively disabled persons, and research work in business and governmental sectors.

Faculty

We are a cross-disciplinary program and our faculty is involved in research spanning many diverse fields of study. Our portfolios are dynamic and growing, so you will be directed to our most recent information.

An internationally recognized scholar leads program activities: Mabel L. Rice is the Director and the Graduate Advisor.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Students are admitted for the fall semester. Rolling admissions with applications accepted throughout the year. Review of applications for fall admissions begins January 15th, the preferred deadline. Applicants must submit a curriculum vita (C.V.) or resume, a personal statement describing professional goals and interest in program, Graduate Record Examination scores (GRE), 3 letters of recommendation, and a list of all courses taken in relevant areas such as child development, linguistics, psychology, special education, speech and hearing sciences, genetics, and statistics. Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Applicants should have earned bachelor’s degrees that include course work in linguistics, psychology, speech pathology, genetics, and/or statistics with minimum grade-point averages of B. Preference is given to those with master’s degrees in linguistics, psychology, education, special education, speech and hearing sciences, molecular biosciences, genetics, or to applicants with relevant post-baccalaureate work experience. No one is admitted for a terminal M.A. degree. Admission materials are reviewed by a subcommittee of the CLDP faculty. The admissions committee supervises the admission process and recommends applicants for admission.

Submit your graduate application online (https://gradapply.ku.edu/apply/). Send all other requested application materials to the program:

The University of Kansas
Child Language Doctoral Program
Dole Human Development Center
1000 Sunnyside Ave., Room 3031
Lawrence, KS 66045

Students who are interested in enrolling in graduate level coursework in the Child Language Doctoral Program without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the admission details above.

Ph.D. Degree Requirements

For the Ph.D. degree, the student must complete all general requirements. These include residence, research skills, comprehensive oral examination, preparation of a dissertation, and the final oral examination and defense of the dissertation. 2 options for fulfilling the research skills requirement are available:

1. Proficiency in a language other than English or reading knowledge of 2 languages other than English can be demonstrated.
2. A record of professional research experience or publication may be used to demonstrate research skills.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

For students entering without the master’s degree, the requirements for the M.A. are at least 8 credit hours of core courses in language acquisition; 10 hours of supplemental courses in linguistics, psycholinguistics, developmental psychology, language intervention, or genetics of language and speech; 6 hours of statistics; and 6 hours of thesis. Continuous enrollment in the child language proseminar is required. Within 3 years of entering the program, students normally
complete the required 30 graduate credit hours, prepare an M.A. thesis, and pass a final general examination and defense of the thesis.

Ph.D. post-master’s requirements include a minimum of 36 additional graduate credit hours. These should include at least 8 hours of additional core courses, 13 hours of additional supplemental courses, 9 hours of additional statistical and methodological courses, and a minimum of 6 hours of dissertation. Continuous enrollment in the proseminar is required.

After completing the research skills requirement and the major portion of the course work, the doctoral student must pass a written preliminary examination and a comprehensive oral examination. The written examination covers 4 areas:

1. Language acquisition,
2. Psycholinguistics,
3. Developmental psychology,
4. Disordered language development or language intervention.

The comprehensive oral examination covers the major field, taking one of 5 forms:

1. A defense of the written preliminary examinations,
2. A defense of a completed research project,
3. A prospectus for a future research project,
4. A discussion of a major review paper, or
5. A review of a research grant proposal and a simulated site visit defense of the proposal.

All doctoral students are expected to complete a dissertation and complete a successful defense of the dissertation.

All students are expected to be engaged continuously in research on child language. Research involvement is documented with appropriate enrollment in research, thesis, and dissertation credit hours, and in the proseminar in child language.

Courses

See course listings for the Child Language Doctoral Program and cooperating departments.

Department of Classics

Why study classics?

Because knowledge of Greek and Roman antiquity is fundamental to understanding the ancient and modern world.

What is classics?

Classics is the integrated study of ancient Greek and Roman civilization through its languages, its literature, and its artistic and archaeological remains. This broad field includes the study of the great texts of classical antiquity, such as Vergil’s Aeneid, Homer’s Iliad and Odyssey, Plato’s Symposium, Sophocles’ Antigone, and the love poems of Sappho and Catullus, but also encompasses research into everyday life in the societies that produced those great works.

In addition to training in the classical languages (Greek and Latin), the department introduces students to a range of work in literary criticism and cultural studies. Topics include archaeology and ancient art, ancient theatre, mythology, women’s history, Greek and Roman humor, cultural exchange across the Mediterranean, the translation of Greek and Latin poetry, and the history of slavery, sexuality, and ethnicity in ancient society.

A commitment to teaching and learning

Our curriculum is diverse, innovative, and responsive to students’ needs. We offer a variety of topics as mentioned above, and an array of course structures and formats, including small in-person language courses, hybrid ancient Greek and Latin that combines face-to-face instruction with online exercises, mid-sized discussion courses on archaeological or literary themes, online offerings during the summer and the academic year, and one large energetic lecture course.

Our faculty members have won nearly all KU’s teaching awards, including the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other university-level teaching and advising awards. The department as a whole received the first ever Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

Beyond KU:

In addition to the rich and interdisciplinary content, the Classics degree teaches strong and widely useful critical skills such as clear writing, effective interpretation and use of evidence, and evaluation of sources. Classics graduates bring all these to bear in a variety of careers. Our students have gone on to careers in law, business, library science, journalism, medicine, museum studies, education, writing and publishing, and technology.

Innovative scholarship:

KU Classics Faculty members conduct research on a variety of ancient topics, from Greek tragedy to Roman architecture. Their research engages some of the world’s most enduring questions, such as: How did the Greek and Roman societies envision happiness? How does knowledge of the past affect one’s choices and identities? How do modern theories about gender and sexuality intersect with ancient concepts? How are cultural values encoded into art, architecture, literature, language, law, religion, and politics? And, who “owns” the classical past?

Classics students can work with faculty as research assistants or can develop their own research projects, and many Classics courses count toward KU’s Research Experience Program. Our undergraduate students have received Undergraduate Research Awards and McNair Scholarships, and many write undergraduate honors theses.

Study Abroad

The Classics Department offers a variety of study opportunities for its students to study in Greece or Italy, the UK, and elsewhere in Europe. We offer scholarships to students who participate in overseas programs that focus on the ancient world.

Undergraduate Programs

Classics is the integrated study of Greek and Roman civilization through its languages, its literature, and its artistic and archaeological remains. The Department of Classics offers 2 majors. Both provide students of diverse career goals a broad humane education and afford a solid foundation for those who wish to pursue graduate work in classics. The Classical Antiquity major provides inclusive, interdisciplinary training in ancient Greek and Roman cultures and prepares you for graduate study in Greek and Roman archaeology, art history, or history. The Classical Languages major trains you to read the great authors of classical antiquity (e.g., Homer, Plato, Vergil, Sappho, Saint Augustine) in the original
language and prepares you for graduate study in classics and for teaching in some private schools. You might also combine your classical language interest with a degree in the School of Education. A degree in education with a Latin major allows you to teach Latin in public high schools.

**Language Proficiency**

The CLAS language requirement may be fulfilled by taking either Latin or Greek. To meet the language requirement in Latin, a student should complete LAT 104, LAT 108, and LAT 112 followed by LAT 200 (or their equivalents). To meet the language requirement in Greek, a student should complete GRK 104, GRK 108 or their equivalents, and 2 more courses (6 hours) at the GRK 300 level. The number of hours required may be reduced if a student has high school or transfer hours.

**Placement in Latin**

Students who wish to enroll in Latin after studying Latin in high school or elsewhere should seek advice from the classics faculty about appropriate placement in Latin courses at KU. Whenever possible, make an advising appointment in advance by calling the Department of Classics at 785-864-3153 or by contacting an advisor.

**Retroactive Credit in Latin**

In cooperation with the University Registrar, the Department of Classics awards retroactive university credit for work in Latin at the high school level. To qualify for retroactive credit, the student’s initial university-level enrollment in Latin must be in a KU course. The student qualifies for retroactive credit only after completing the KU Latin course with a grade of C or higher.

After completing such a course with a qualifying grade, the student must bring his or her high school transcript to the Department of Classics office for verification. The department then notifies the Office of the University Registrar of the number of credit hours to be awarded. The student’s transcript shows the number of hours awarded but no letter grade. The hours count toward graduation. Guidelines are as follows:

- **2 Years of High School Latin:** A student must enroll initially at KU in LAT 112 or LAT 113 and receive a grade of C or higher. 3 hours of retroactive credit will be awarded.
- **3 Years of High School Latin:** A student who initially enrolls in LAT 200 or LAT 201 and receives a grade of C or higher will receive 6 hours of retroactive credit. A student who enrolls in LAT 112 or LAT 113 and receives a grade of C or higher will receive 3 hours of retroactive credit.
- **4 Years of High School Latin:** A student who initially enrolls in a Latin course higher than LAT 200 or LAT 201 (e.g., any 300-level Latin course) and receives a grade of C or higher will receive 9 hours of retroactive credit. A student who enrolls in LAT 200 or LAT 201 and receives a grade of C or higher will receive 6 hours of retroactive credit.

*Note:* If a student initially enrolls in a course below the specified level (e.g., a student with 4 years of high school Latin enrolls in LAT 112 or LAT 113), he or she receives no retroactive credit. If a student initially enrolls in a course above the specified level (e.g., a student with 2 years of high school Latin enrolls in LAT 200 or LAT 201, or a student with 3 years of high school Latin enrolls in a Latin course higher than LAT 200 or LAT 201) and receives a grade of C or higher, he or she is eligible for the full retroactive credit allowed for that course.

**Courses for Nonmajors**

The department offers a range of courses in ancient art, archaeology, literature, and language, including 4 years of undergraduate Latin and 3½ years of ancient Greek. No knowledge of Latin or Greek is needed for courses labeled CLSX, such as the principal course CLSX 148 Greek and Roman Mythology.

**Undergraduate Scholarships and Awards**

The department offers several scholarships and awards, such as the Mildred Lord Greef award for best paper or essay, the Albert O. Greef award for literary translation, the Tenney Frank scholarships for undergraduate study, and the Tenney Frank awards for foreign study of the classics. For information, contact the department (http://classics.ku.edu/).

All graduate students who wish to be considered for KU scholarships and financial aid must complete applications with Financial Aid and Scholarships.

**KU Financial Aid**

All undergraduates who wish to be considered for KU scholarships and financial aid must complete applications with Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/).

**Graduate Programs**

The Department of Classics offers advanced course work in the ancient civilizations of Greece and Rome. Students are expected to study the classical languages (Greek and Latin) and literatures as well as the art and archaeological remains of the Greek and Roman worlds.

**Graduate Teaching Assistantships**

Financial support is available in the form of teaching assistantships in Latin, Greek, or mythology. Contact the department (http://classics.ku.edu/) for information.

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

**Graduate Non-Degree Seeking Status**

Students who are interested in enrolling in graduate-level coursework in the Department of Classics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s webpage (http://classics.ku.edu/nds-overview/) for further details.

**Courses**

CLSX 105. Introduction to Ancient Near Eastern and Greek History. 3 Hours NW GE3H / H/W.

A general survey of the political, social, and economic developments of Mesopotamia, Egypt, Asia Minor, and Greece from Paleolithic times to 323 B.C. (Same as HIST 105.) LEC.

CLSX 106. Introduction to Roman History. 3 Hours H/W.

A general survey of the political, social, and economic developments of ancient Rome from 753 B.C. to 475 A.D. (Same as HIST 106.) LEC.
CLSX 148. Greek and Roman Mythology. 3 Hours HL AE42/GE11/GE3H / H/W.
A systematic examination of the traditional cycles of Greek myth and their survival and metamorphosis in Latin literature. Topics include the problems of comparative mythology and the related areas of archaeology and history. Slides and other illustrated materials. No knowledge of Latin or Greek is required. LEC.

CLSX 149. Greek and Roman Mythology Honors. 3 Hours HL AE42/GE11/GE3H / H/W.
The study of Greek and Roman mythology through extensive readings in primary classical texts and secondary authors. Prerequisite: Admission to the Honors Program or consent of instructor. LEC.

CLSX 151. Introduction to Greek and Roman Archaeology. 3 Hours HT GE11/GE3H / H/W.
An introduction to the history, methods, and excavation techniques of archaeology, with special emphasis on ancient Greece and Rome. Topics include stratigraphy, chronology, artifact analysis, the role of archaeology in our understanding of Greek and Roman society, and the treatment of archaeology in popular culture. Illustrated throughout with presentations of important archaeological sites of the ancient Mediterranean such as Athens and Pompeii, from the earliest times through late antiquity. LEC.

CLSX 168. Ancient Epic Tales. 3 Hours HL AE42/GE11/GE3H / H.
This course provides a survey of ancient epic poetry, focusing on literature from the Greek, Roman, and Mediterranean world. All readings will be in English; no knowledge of any ancient languages is required. The works selected will be ancient epic tales primarily from Greece, Rome and the Mediterranean world (e.g. Epic of Gilgamesh, Homer, Apollonius, Vergil, Ovid, Statius) though some ancient epics from other cultures may be used for comparative purposes (e.g. Beowulf, Popol Vuh, Mahabharata). Class discussion and assignments focus on understanding the ancient cultures and their relation to our own, evaluating the arguments of scholars, and creating well-reasoned written and oral arguments about ancient epics. LEC.

CLSX 169. Ancient Epic Tales, Honors. 3 Hours HL AE42/GE11/GE3H / H.
Honors version of CLSX 168. This course provides a survey of ancient epic poetry, focusing on literature from the Greek, Roman, and Mediterranean world. All readings will be in English; no knowledge of any ancient languages is required. The works selected will be ancient epic tales primarily from Greece, Rome and the Mediterranean world (e.g. Epic of Gilgamesh, Homer, Apollonius, Vergil, Ovid, Statius) though some ancient epics from other cultures may be used for comparative purposes (e.g. Beowulf, Popol Vuh, Mahabharata). Class discussion and assignments focus on understanding the ancient cultures and their relation to our own, evaluating the arguments of scholars, and creating well-reasoned written and oral arguments about ancient epics. LEC.

CLSX 171. Ancient Ethical Problems. 3 Hours H/W.
This course introduces some of the fundamental ethical questions raised by Greek and Roman philosophers and considers how their answers to these questions can help us solve the social, political, and environmental problems we face today. We will cover questions like “what makes a good friend?”; “would I be happier if I had more money?”; “do I have a responsibility to protect the natural world?”, and “how can I make myself a better person?” We will explore a number of ancient ethical theories that emerged in response to these problems, such as the Hedonism of Epicurus, the Intellectualism of the Socrates and the Stoics, and the Primitivism of the Cynics, and we will consider how these theories can be applied in the contemporary world. All readings will be in English; no knowledge of any ancient languages is required. LEC.

CLSX 177. First Year Seminar: .... 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Classics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

CLSX 178. Writing About Greek and Roman Culture. 3 Hours GE21 / H.
This course uses focused content from Greek and Roman mythology as a vehicle for learning, applying, and practicing essential skills of writing. The content varies from term to term but is always circumscribed, such as Helen of Sparta, nature myths, the wandering hero, or children in Greek tragedy. Students complete a variety of writing exercises that build upon each other and include revision. The course will be taught in English. LEC.

CLSX 210. Greek Rhetoric in Theory and Practice. 3 Hours GE22 / H.
This course explores the theory and practice of ancient Greek rhetoric, with the aim of developing student's own rhetorical skills and habits. All readings are in translation; no knowledge of ancient Greek is required. Students study rhetoric in such authors as Homer, Demosthenes, Plato, and Lysias and discuss such topics as the role of public speaking in maintaining Greek democracy, the difference between rhetorical skill as a means and an end, the relationship between rhetorical style and civic identity, and the adaptability of rhetoric to various circumstances and audiences. Students practice delivery with ancient speeches; write and deliver speeches tailored to a variety of situations; and listen to and critique the speeches of their peers and others. LEC.

CLSX 220. Roman Oratory in Theory and Practice. 3 Hours GE22 / H.
This course explores the theory and practice of ancient Roman rhetoric, with the aim of developing student's own rhetorical skills and habits. All readings are in translation; no knowledge of Latin is required. Students will study rhetoric in such authors as Cicero, Quintilian, Caesar, and Seneca and discuss such topics as the role of rhetorical theory in Roman education; oratory as a hallmark of public service during the Republic, and its transition to a pastime in the Imperial age; the ways the Romans connected oratorical style with humor, the body, and gender identity; and the leeway given to speakers in constructing an argument. Students practice delivery with ancient speeches; write and deliver speeches tailored to a variety of situations; and listen to and critique the speeches of their peers and others. LEC.

CLSX 230. Greek Culture and Civilization. 3 Hours HL GE3H / H.
This course introduces the world of the ancient Greeks, with a focus on Greek cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; athletics and competition; oral performance; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including major literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. No knowledge of Greek is required; all readings will be in English. LEC.

CLSX 232. Word Power: Greek and Latin Elements in English. 3 Hours H/W.
A study of English words drawn from Greek and Latin for all those interested in the sources of the English vocabulary. Enough Greek and Latin for essential purposes is also studied. No knowledge of Greek or Latin is required. A student may not receive credit for both CLSX 232 and CLSX 332. LEC.

CLSX 240. Roman Culture and Civilization. 3 Hours HL GE3H / H.
This course introduces the world of ancient Rome, with a focus on Roman cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; politics and empire; games and gladiators;
gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. All readings will be in English; no knowledge of any ancient languages is required. LEC.

CLSX 305. Greek and Roman Art. 3 Hours GE11/GE3H / H/W.
An introduction to the history, methods of study, and evidence for Greek and Roman art from Archaic Greece to Late Antiquity (600 B.C.E. – 400 C.E.), mainly sculpture, painting, and crafted objects. Emphasized topics include: the diversity of approaches towards the study of ancient artifacts, cross-cultural exchange between the cultures of Greece and Rome, ancient vs. modern definitions of art and artists, patrons and audiences, and current debates about ancient art. Illustrated throughout with presentations of significant works and case studies. Use of the study collection in the Wilcox Classical Museum. LEC.

CLSX 316. Ancient Magic and Witches. 3 Hours AE42/GE3S / H.
This course provides a survey of magic and witchcraft in ancient Greece and Rome and interprets these practices through anthropological theories of magic and witchcraft. Emphasized topics may include magicians, witches, ghosts, spirits, demons, divination, and spells. This course considers issues such as how magic works, how people engage with the divine, the marginalization of magical practitioners, and the difference between magic, witchcraft and religion. All readings will be in English; no knowledge of any ancient languages is required. (Same as REL 316.) LEC.

CLSX 322. Alexander the Great: Man and Myth. 3 Hours HT GE11/GE3H / H.
This course explores the life, times, and legacy of Alexander the Great (356-323 BCE). It covers the historical context of ancient Greece and Macedon from which Alexander emerged; his engagement with ancient Greek, Egyptian, and Persian cultures; his military campaigns; his aims in creating an empire; and the immediate aftermath of his conquests. In addition, the course considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Alexander has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the use of the memory of Alexander by later Greeks and Romans; the medieval Alexander tradition; responses to Alexander in Middle Eastern and Indian thought and literature; the legacy of Alexander’s conquests in the age of empires; his transformation in Hollywood; and his contested place in the modern political dispute between Greece and North Macedonia. (Same as REL 316.) LEC.

CLSX 323. Julius Caesar: Man and Myth. 3 Hours HT GE11/GE3H / H.
This course explores the life, times, and legacy of Julius Caesar (c. 100-44 B.C.E.). It covers Caesar’s early political career, his military campaigns, and his rise to power through civil war, with special attention paid to his aims, political reforms, and the institutions that enabled his rise to power. In addition, it considers the role of “great men” in history and historiographical problems in reconstructing the past. It also explores how the image of Caesar has been transmitted, interpreted, challenged, and reshaped from antiquity to the present. Topics may include: the impact of Julius Caesar in Rome with the creation of an empire ruled by “Caesars”; Medieval responses to Caesar as tyrant, king, and emperor; Caesar as a paradigm of populist tyranny from the Renaissance to the present; the legacy of his literary output and the Romantic image of Caesar as a genius; his impact on the modern age of empires; and re-imaginations of Caesar in film, TV, and video games. (Same as HIST 388.) LEC.

CLSX 325. Aegean Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaen, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 525 or HA 525. No knowledge of Greek or Latin is required. (Same as HIST 325.) LEC.

CLSX 326. Greek Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of the ancient Greek world from the Protopolitical period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 526 or HA 526. No knowledge of Greek or Latin is required. (Same as HIST 326.) LEC.

CLSX 327. Roman Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.c.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome’s influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 527 or HA 527. No knowledge of Greek or Latin is required. (Same as HIST 327.) LEC.

CLSX 330. Greek Culture and Civilization, Honors. 3 Hours GE3H / H/W.
Honors version of CLSX 230. This course introduces the world of the ancient Greeks, with a focus on Greek cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; athletics and competition; oral performance; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including major literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. No knowledge of Greek is required; all readings will be in English. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.

CLSX 332. Medical Terminology: Greek and Latin Roots. 3 Hours HL GE3H / H.
A comprehensive study of the Greek and Latin elements in medical terminology. Students will learn word roots and how to combine them, as well as become acquainted with their relationship to mythology and the influence of ancient ideas about health and the body on modern healthcare. This class is useful for anyone going into the health field and personal letters, as well as ancient art and archaeology. No knowledge of Greek or Latin is required. A student may not receive credit for both CLSX 232 and CLSX 332. LEC.

CLSX 340. Roman Culture and Civilization, Honors. 3 Hours HL GE3H / H.
Honors version of CLSX 240. This course introduces the world of ancient Rome, with a focus on Roman cultural beliefs, values, and social structures. Topics covered include: religious beliefs and practices; politics and empire; games and gladiators; gender and sexuality; class, status, and slavery. The course surveys a wide variety of sources, including literary works, inscriptions, legal texts, and personal letters, as well as ancient art and archaeology. All readings will be in English; no knowledge of any ancient languages is required. Prerequisite: Membership in the University Honors Program or consent of instructor. LEC.
CLSX 350. Modern Themes, Ancient Models: ____. 3 Hours H.
The study of the evolution of a cultural or literary tradition from the
Graeco-Roman world into modern times. The theme of the course will
normally vary from semester to semester; topics such as these may be
examined: the analysis of a literary genre (e.g. drama, satire, lyric), the
transformation of the ancient mythical heritage, the reception of ancient
astronomy. Students should consult the Schedule of Classes for the
theme of the course in a given semester. With departmental permission,
may be repeated for credit as topic varies. (Same as HUM 380.) LEC.

CLSX 351. Introduction to Greek and Roman Archaeology, Honors. 3
Hours HT GE11/GE3H / H/W.
Honors version of CLSX 151, with the focus towards critical approaches
and research. Special attention is paid to recent methodological,
thoretical, and ethical debates within the profession of Classical
archaeology. Assignments and activities may include position papers on
contentious issues of the day, research assignments, and/or field trips to
museums and related institutions. Prerequisite: Admission to the Honors
Program or consent of instructor. LEC.

CLSX 355. Ancient Greece and Rome in Film. 3 Hours H.
This course explores the reception of the cultures of ancient Greece and
Rome in film. Students in this course learn about the cultures of ancient
Greece and Rome through primary sources, and analyze several films
from the 20th and 21st centuries for which these sources are relevant.
The course considers the relationship between historical accuracy and
artistic license in the films selected for the course, how each film reflects
the concerns of the modern cultural context in which it was made, the
common visual and thematic elements that link films set in ancient Greece
or Rome, and the reuse of elements from Greek and Roman mythology
and history in films set in the modern world. No knowledge of Latin or
Greek required. LEC.

CLSX 365. Ancient Rome, Monuments, and Memory. 3 Hours H.
This course explores the monuments and historical topography of the city
of Rome, Italy across the Ancient, Medieval, Renaissance, Baroque, and
Modern periods. Focusing on a series of case studies, monuments, and
urban spaces such as the Pantheon, the Colosseum, and the imperial
forums, this course explores how public spaces change in their usage
and meaning over time. The course emphasizes Rome’s illustrious
architects and artists, such as Michelangelo and Bernini, who attempted
to modernize the “eternal city” by drawing on its ancient origins with
such endeavors as New St. Peter’s Basilica. Throughout the course,
students are challenged to compare the city of Rome to modern urban
environments, and even to Lawrence, Kansas. All readings are in English;
no prerequisites required. LEC.

CLSX 371. Archaeology of Ancient Israel. 3 Hours H.
Archaeology and art, sites and monuments of ancient Israel from the
Neolithic period to Late Roman. Special topics will include the peoples of
the region, nomadism and urbanization, the kingdoms of Israel, Second
Temple Period, Qumran, Roman Jerusalem, and the creation and
development of the synagogue. (Same as JWSH 371.) LEC.

CLSX 375. Studies in: ____. 1-3 Hours H/W.
Selected readings in Greek and Roman antiquity and the classical
tradition for students who desire special work on a flexible basis. No
knowledge of Greek or Latin is required. May be repeated for credit, the
maximum being twelve hours. Prerequisite: Consent of instructor. LEC.

CLSX 378. Food and Drink in the Ancient Mediterranean. 3 Hours H.
This course examines the means of production and preparation, as
well as the social role, of food and drink in Greek and Roman antiquity.
The course will introduce students to different methodologies from
anthropology and sociology of food for studying patterns of production
and consumption, and class discussions and assignments will ask
students to consider how the attitudes to and experience of food and drink
in the ancient world differed from our own. All readings will be in English;
no knowledge of any ancient languages is required. LEC.

CLSX 381. Ancient Roman Gladiators and Spectacle. 3 Hours W.
This course studies ancient Roman gladiators and spectacle – the public
entertainment that included staged beast hunts, mock naval battles,
chariot races, and the punishment of criminals. Students use historical,
literary, and archaeological approaches to study the development of
gladiatorial combat and its reception in later periods. Emphasized topics
may include: slavery in ancient Rome, the relationship between politics
and spectacle, the architecture and engineering of the Colosseum, the
representation of gladiators in modern film and video games, and the
intersection of violence and entertainment in ancient Roman and modern
American culture. All readings are in English; no knowledge of Latin is
required. LEC.

CLSX 382. Jerusalem Through the Ages. 3 Hours H.
As a prominent site in the religious and cultural histories of Judaism,
Christianity, and Islam, Jerusalem is uniquely situated as one of the
world’s most sacred cities. For more than 3,000 years, this city has been
a focal point of religious and political activity. Through the critical reading
of historical and religious texts, and archaeological data, this course will
explore the historical development of Jerusalem as a sacred place in
Judaism, Christianity, and Islam. (Same as HIST 382, JWSH 382 and
REL 382.) LEC.

CLSX 384. Ethics in Greek Tragedy. 3 Hours H.
This course provides an introductory survey of theories of morality and
uses Greek tragedy as case studies for understanding ethical problems.
Students will read passages from ethical theorists alongside plays
by Aeschylus, Sophocles, and Euripides, giving particular attention
to identifying the ethical dilemmas the characters face, the criteria by
which these characters make their decisions, ethical assessment of their
decisions by their own standards and by those of ethical theories, and
the role of cultural context in understanding the ethical dimensions of the
plays. No knowledge of Greek is required. LEC.

CLSX 496. Honors Essay in Classical Antiquity. 3 Hours AE61 / H/W.
Individual directed research and preparation of an essay on a topic
in Classical literature, culture, or language. Prerequisite: Eligibility for
departmental honors and consent of essay advisor. IND.

CLSX 501. The History of the Latin Language. 3 Hours H.
The place of Latin among the Indo-European languages and the
languages of Italy, its development as a literary medium, and how it
changed in pronunciation, vocabulary, and grammar from its beginnings
through the Medieval period. LEC.

CLSX 502. Development of Ancient Greece, ca. 1000-300 B.C.E. 3
Hours H/W.
Emphasis on the ancient sources and texts, developments in political
institutions and society, the changing definitions of personal, cultural,
and national identities, and the cultural tensions between Greece and the
cultures to the west and east, especially Italy and Persia. No knowledge of
the ancient languages is required. (Same as HIST 502.) LEC.

CLSX 506. Jewish History and Literature in the Greek and Roman
Periods. 3 Hours H/W.
The history and literature of the Jewish people from the hellenistic
period (late fourth century B.C.E. to the codification of the Mishnah 210
C.E.). Select texts from the Hebrew Bible, the so-called apocrypha and
pseudepigrapha, the Qumran scrolls, Philo, Josephus, related early
Christian texts, and Rabbinic texts will be studied. (Same as JWSH 526
and REL 526.) Prerequisite: REL 124 or JWSH 124 or permission of
instructor. LEC.
CLSX 507. Early Roman Empire. 3 Hours H.
A political, social, and economic investigation of the early Roman Empire from Augustus to Diocletian emphasizing how Rome held together a world-empire until economic and military problems forced a complete reorganization of the imperial system. (Same as HIST 507.) Prerequisite: Successful completion of a Classics course (CLSX, GRK, or LAT), or a history course numbered below 500, or permission of instructor. LEC.

CLSX 515. Gender and Sexuality in Greek Culture. 3 Hours AE42 / H.
This course explores various approaches to the study of gender and sexuality in Greek antiquity. Contents will vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as WGSS 515.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor. LEC.

CLSX 516. Gender and Sexuality in Roman Culture. 3 Hours HL AE42 / H.
This course explores various approaches to the study of gender and sexuality in Roman antiquity. Contents vary, and the course may focus on methodology and case studies, or on particular themes, historical periods, or artistic or literary genres. No knowledge of Greek or Latin is required. (Same as WGSS 516.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, or Women, Gender and Sexuality Studies; or permission of instructor. LEC.

CLSX 525. Aegean Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the major cultures of the prehistoric Aegean (Greek) world from the Neolithic period to the end of the Bronze Age (ca. 3000-1100 B.C.E.), with special emphasis on the cultural and artistic achievements of the Mycenaean, Minoans, and Cycladic islanders, including their contacts with the neighboring cultures of Anatolia (Hittites and Troy), the Levant, Egypt, and South Italy. Includes lecture with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 325 or HA 325. No knowledge of Greek or Latin is required. (Same as HA 525.) LEC.

CLSX 526. Greek Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of the ancient Greek world from the Preprotogeometric period to the end of the Hellenistic age (ca. 1100 - 30 B.C.E.), with emphasis on the major sites, monuments, and changing forms of social and artistic expression (e.g., architecture, sculpture, vase painting). Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 326 or HA 326. No knowledge of Greek or Latin is required. (Same as HA 526.) LEC.

CLSX 527. Roman Archaeology and Art. 3 Hours H/W.
An interdisciplinary survey of the material culture of ancient Rome from its origins to the late empire (8th c.B.C.E. - 4th c.C.E.). Emphasis on major sites, monuments, and changing forms of social and artistic expression, as well as on Etruscan and Greek influence on Rome and Rome's influence on its provinces. Includes lectures with slides and discussion; use of the Wilcox Museum of Classical Antiquities. For advanced undergraduates with backgrounds in the humanities; and for graduate students (especially in Classics and History of Art). This course is offered at the 300 and 500 level with additional assignments at the 500 level. Not open to students with credit in CLSX 327 or HA 327. No knowledge of Greek or Latin is required. (Same as HA 537.) LEC.

CLSX 529. Archaeology and Art of the Ancient Near East. 3 Hours H.
A cross-cultural survey of the material remains of the major civilizations of the ancient Near East, including Anatolia, Mesopotamia, the Levant, and Egypt from Neolithic period to the rise of the Roman empire (ca. 6000 B.C.E. - 30 B.C.E.). Includes lectures with slides and discussion. For advanced undergraduates with backgrounds in the humanities and for graduate students (especially in Classics and History of Art). No knowledge of Greek or Latin is required. (Same as HA 529.) LEC.

CLSX 538. Pompeii and Herculaneum. 3 Hours H.
An interdisciplinary treatment of the art and archaeology of the ancient Roman cities of Pompeii and Herculaneum in Italy. Emphasis on the structures and decorations of major public spaces and houses and on aspects of cultural, social, political, commercial, and religious life from the period of the second century B.C.E. to 79 C.E., when Pompeii and Herculaneum were buried by the eruption of Mt. Vesuvius. Slide lectures and discussion. (Same as HA 538, HUM 538.) Prerequisite: Graduate status, or 6 credit hours in Classics, Greek, Latin, History of Art, or permission of the instructor. LEC.

CLSX 550. Capstone in Classics. 1-3 Hours AE61 / H.
This capstone seminar synthesizes various aspects in the discipline of Classics by focusing on recent award-winning scholarship or creative work in the field. Specific assignments and additional readings vary from one semester to another and will be stated on the instructor's syllabus. Introductory knowledge of Greek or Latin is required. Prerequisite: 15 hours in CLSX/LAT/GRK at the 200 level or above, or status as a senior major in the department, or permission of the instructor. LEC.

CLSX 570. Study Abroad Topics in Greek and Roman Culture: ____. 1-3 Hours H.
This course is designed for the study of special topics in Classics at the junior/senior level. Coursework must be arranged through the Office of KU Study Abroad. May be repeated for credit if content varies. LEC.

CLSX 575. Readings in: ____. 1-3 Hours.
Selected readings in Greek and Roman antiquity and the classical tradition for students who desire special work on a flexible basis. No knowledge of Greek or Latin is required. May be repeated for credit if topic varies. Only six hours may count toward the major. Prerequisite: Consent of instructor. LEC.

CLSX 576. Topics in Greek and Roman Literature: ____. 3 Hours H.
Lecture and discussion course focusing on a theme, genre, or period of literature from the ancient classical world. No knowledge of Greek or Latin is required. May be repeated for credit if topic varies. Only 6 hours may count toward the major. LEC.

CLSX 577. Topics in the Archaeology and Art of the Ancient Mediterranean: ____. 3 Hours AE61 / H.
Lecture and discussion course focusing on a theme, medium, region, or period in the archaeology and art of the ancient Near Eastern and classical world. May be repeated for credit if topic varies. Only 6 hours may count toward the major. LEC.

CLSX 675. Studies in: ____. 1-3 Hours H/W.
Selected readings in Greek and Roman antiquity and the classical tradition for students who desire special work on a flexible basis. No knowledge of Greek or Latin is required. May be repeated for credit, the maximum being twelve hours. Prerequisite: Consent of instructor. IND.
to the languages of the Bible. The course will focus on extending the Hellenistic and Roman periods, with special attention given to the contact and conflict between different political, linguistic, ethnic, and religious communities that characterized the Hellenistic and Roman worlds. This course will be indispensable both for those interested in the history and culture of Greece and Rome beyond the fifth century B.C., and for those interested in reading the Bible and early Christian writers. Prerequisite: GRK 108 or GRK 109. LEC.

GRK 375. Readings in: ____. 1-3 Hours H/W / F3. Readings in classical Greek texts. May be repeated for up to twelve hours. Prerequisite: GRK 108 or the equivalent. IND.

GRK 496. Honors Essay in Greek. 3 Hours AE61 / H/W / FP. Individual directed research and preparation of an essay on a topic in Greek literature or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor. IND.

GRK 508. Early Greek Philosophy. 3 Hours H/W / FP. A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers with some attention paid to the Sophists and the Hippocratic Corpus. (Same as PHIL 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor. LEC.

GRK 701. Archaic Poetry. 3 Hours. Close reading of texts from Homer, Hesiod, Pindar, the lyric poets. LEC.

GRK 702. Drama. 3 Hours. Close reading of texts from Aeschylus, Sophocles, Euripides, Aristophanes. LEC.

GRK 703. History and Oratory. 3 Hours. Close reading of texts from Herodotus, Thucydides, Xenophon, Attic orators. LEC.

GRK 704. Philosophy. 3 Hours. Close reading of texts from Plato, Aristotle, the pre-Socratics. LEC.

GRK 705. Readings in Classical Greek. 3 Hours. Extensive reading in a variety of Greek authors. LEC.

GRK 790. Practicum in the Teaching of Greek. 0.5 Hours. Required of all assistant instructors and teaching assistants in the teaching of Greek. May be repeated up to three semester hours credit in total. FLD.

GRK 798. Studies in: ____. 1-3 Hours. Selected readings for qualified students who desire special work on a flexible basis. May be repeated for credit, the maximum being twelve hours. Prerequisite: Undergraduate proficiency in Greek or equivalent. RSH.

GRK 899. Thesis. 1-6 Hours. Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Courses

GRK 104. Elementary Ancient Greek. 5 Hours U / F1. The essentials of ancient Greek grammar, with readings. LEC.

GRK 105. Elementary Ancient Greek, Honors. 5 Hours U / F1. The essentials of ancient Greek grammar, with readings. Prerequisite: Membership in the University Honors Program or permission of instructor. LEC.

GRK 108. Ancient Greek Readings and Grammar. 5 Hours U / F2. A continuation of Greek 104, with extensive readings from one or more classical authors. Prerequisite: GRK 104 or GRK 105. LEC.

GRK 109. Ancient Greek Readings and Grammar, Honors. 5 Hours U / F2. A continuation of GRK 105, with extensive readings from one or more classical authors. Prerequisite: GRK 104 or 105; and membership in the University Honors Program or permission of instructor. LEC.

GRK 177. First Year Seminar: ____. 3 Hours GE11 / U. A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Greek. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

GRK 301. Philosophy and Oratory. 3 Hours H/W / F3. Systematic grammar review in conjunction with readings selected from Plato, Aristotle and the Attic orators, with attention to issues of interpretation and social and cultural history. Prerequisite: GRK 108 or GRK 109. LEC.

GRK 302. Drama and Lyric Poetry. 3 Hours H/W / F3. Systematic grammar review in conjunction with readings selected from Aeschylus, Sophocles, Euripides, and the lyric poets, with attention to issues of literary interpretation and cultural history. Prerequisite: GRK 108 or GRK 109. LEC.

GRK 303. Greek Narrative Prose. 3 Hours H/W / F3. Systematic grammar review in conjunction with readings selected from the historians Herodotus, Thucydides, and Xenophon, as well as from the Greek novels and the New Testament. Attention will be given to issues of interpretation and cultural history. Prerequisite: GRK 108 or GRK 109. LEC.

GRK 310. Homer's Odyssey. 3 Hours H/W / F4. Selections from Homer's Odyssey, with attention to issues of literary translation and interpretation, performance, and social and cultural history. Prerequisite: GRK 301, or GRK 302, or GRK 303. LEC.

GRK 312. Homer's Iliad. 3 Hours H/W / F4. Selections from Homer's Iliad, with attention to issues of literary translation and interpretation, performance, and social and cultural history. Prerequisite: GRK 301, or GRK 302, or GRK 303. LEC.

GRK 315. Biblical and Imperial Greek. 3 Hours W. This course surveys the post-classical development of Greek in the Hellenistic and Roman periods, with special attention given to the languages of the Bible. The course will focus on extending linguistic knowledge and developing an understanding of the historical development of Greek through close readings of selections from the Septuagint, New Testament, and Greek authors of the Roman Empire, such as Lucian. We will examine how and why koine ("common") Greek differs from Classical Greek, and we will interpret these texts in light of the contact and conflict between different political, linguistic, ethnic, and religious communities that characterized the Hellenistic and Roman worlds. Prerequisite: GRK 108 or GRK 109. LEC.

GRK 375. Readings in: ____. 1-3 Hours H/W / F3. Readings in classical Greek texts. May be repeated for up to twelve hours. Prerequisite: GRK 108 or the equivalent. IND.

GRK 496. Honors Essay in Greek. 3 Hours AE61 / H/W / FP. Individual directed research and preparation of an essay on a topic in Greek literature or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor. IND.

GRK 508. Early Greek Philosophy. 3 Hours H/W / FP. A study of the doctrines of Greek philosophy before Plato. Emphasis on the Pre-Socratic philosophers with some attention paid to the Sophists and the Hippocratic Corpus. (Same as PHIL 508.) Prerequisite: PHIL 384, or GRK 301, or GRK 302, or GRK 303, or GRK 310, or GRK 312, or permission of instructor. LEC.

GRK 701. Archaic Poetry. 3 Hours. Close reading of texts from Homer, Hesiod, Pindar, the lyric poets. LEC.

GRK 702. Drama. 3 Hours. Close reading of texts from Aeschylus, Sophocles, Euripides, Aristophanes. LEC.

GRK 703. History and Oratory. 3 Hours. Close reading of texts from Herodotus, Thucydides, Xenophon, Attic orators. LEC.

GRK 704. Philosophy. 3 Hours. Close reading of texts from Plato, Aristotle, the pre-Socratics. LEC.

GRK 705. Readings in Classical Greek. 3 Hours. Extensive reading in a variety of Greek authors. LEC.

GRK 790. Practicum in the Teaching of Greek. 0.5 Hours. Required of all assistant instructors and teaching assistants in the teaching of Greek. May be repeated up to three semester hours credit in total. FLD.

GRK 798. Studies in: ____. 1-3 Hours. Selected readings for qualified students who desire special work on a flexible basis. May be repeated for credit, the maximum being twelve hours. Prerequisite: Undergraduate proficiency in Greek or equivalent. RSH.

GRK 899. Thesis. 1-6 Hours. Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Courses

LAT 104. Elementary Latin I. 5 Hours U / F1. An introduction to the Latin language. LEC.

LAT 105. Elementary Latin I, Honors. 5 Hours U / F1. Integrates study of elementary Latin with study of Roman culture. Prerequisite: Admission to Honors Program or permission of department. LEC.
LAT 108. Elementary Latin II. 5 Hours U / F2.
Latin grammar concluded with selected readings. Prerequisite: LAT 104 or LAT 105, or permission of department. LEC.

LAT 109. Elementary Latin II, Honors. 5 Hours U / F2.
Latin grammar concluded with selected readings, integrated with study of Roman culture. Prerequisite: LAT 105 or permission of department. LEC.

LAT 112. Readings in Latin Literature. 3 Hours U / F3.
Systematic grammar review in conjunction with selected prose authors, such as Cicero or Caesar, with additional readings in Roman poetry. Attention to literary history and historical context. Prerequisite: LAT 108 or LAT 109, or permission of department. LEC.

LAT 113. Readings in Latin Literature, Honors. 3 Hours U / F3.
Systematic grammar review in conjunction with selected prose authors, such as Cicero or Caesar, with additional readings in Roman poetry. Exercises in literary analysis and/or prose composition. Prerequisite: LAT 109 or permission of department. LEC.

LAT 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Latin. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

LAT 200. Vergil's Aeneid. 3 Hours H/W / F4.
Selections from Vergil's Aeneid, with attention to literary interpretation and literary history. Prerequisite: LAT 112 or LAT 113 or permission of department. LEC.

LAT 201. Vergil's Aeneid, Honors. 3 Hours H/W / F4.
Selections from Vergil's Aeneid with attention to literary history. Exercises in literary interpretation and verse composition. Prerequisite: LAT 113 or permission of department. LEC.

LAT 300. Intermediate Latin Composition. 3 Hours H/W / FP.
Composition in Latin prose, stressing the basic principles of Latin syntax and style. Recommended for majors and minors. Prerequisite: LAT 200 or LAT 201. LEC.

LAT 301. Prose Fiction and Epistolography. 3 Hours H/W / FP.
Selected readings from such authors as Cicero, Seneca, Petronius, Pliny, and Apuleius, with attention to literary interpretation and historical context. Prerequisite: LAT 200 or LAT 201, or permission of department. LEC.

LAT 302. Hexameter Poetry. 3 Hours H/W / FP.
Selected readings from such authors as Lucretius, Vergil, Ovid, and the satirists, with attention to literary interpretation and historical context. Prerequisite: LAT 200 or LAT 201, or permission of department. LEC.

LAT 303. Roman Historians. 3 Hours H/W / FP.
Selected readings from such authors as Caesar, Livy, and Tacitus, with attention to issues in Roman history and historiography. Prerequisite: LAT 200 or LAT 201, or permission of department. LEC.

LAT 304. Lyric and Elegiac Poetry. 3 Hours H/W / FP.
Selected readings from such authors as Catullus, Horace, Tibullus, Propertius, Sulpicia, Ovid, and Martial, with attention to literary interpretation and historical context. Prerequisite: LAT 200 or LAT 201, or permission of department. LEC.

LAT 305. Roman Drama. 3 Hours H/W / FP.
Selected readings from such authors as Plautus, Terence, and Seneca, with attention to literary interpretation, theater history, and performance. Prerequisite: LAT 200 or LAT 201, or permission of department. LEC.

LAT 375. Readings in: _____. 1-3 Hours H/W / FP.
Readings in Latin literature, selected in consultation with the instructor. May be repeated for up to twelve hours. Prerequisite: LAT 200 or LAT 201, or consent of instructor. IND.

LAT 496. Honors Essay in Latin. 3 Hours AE61 / H/W / FP.
Individual directed research and preparation of an essay on a topic in Latin literature or language. Prerequisite: Eligibility for departmental honors and consent of essay advisor. IND.

LAT 700. Advanced Latin Prose Composition. 3 Hours.
An examination of the grammar, syntax, and style of the Latin language through exercises in composition. Prerequisite: Consent of instructor. LEC.

LAT 701. Hexameter Poetry. 3 Hours.
Close reading of texts from authors such as Lucretius, Vergil, Ovid, Statius. Prerequisite: Consent of instructor. LEC.

LAT 702. Lyric and Elegy Poetry. 3 Hours.
Close reading of texts from authors such as Catullus, Horace, Propertius, Tibullus, Sulpicia, Ovid, Martial. Prerequisite: Consent of instructor. LEC.

LAT 703. History, Oratory, Philosophy. 3 Hours.
Close reading of texts from authors such as Cicero, Livy, Seneca, Tacitus, Augustine. Prerequisite: Consent of instructor. LEC.

LAT 704. Drama, Satire, and Novel. 3 Hours.
Close reading of texts from Plautus, Terence, Horace, Petronius, Seneca, Juvenal, Apuleius. LEC.

LAT 705. Readings in Classical Latin. 3 Hours.
Extensive reading in a variety of Latin authors. LEC.

LAT 790. Practicum in the Teaching of Latin. 0.5 Hours.
Required of all assistant instructors and teaching assistants in the teaching of Latin. May be repeated up to three semester hours credit in total. FLD.

LAT 791. Seminar in the Teaching of Latin. 3 Hours.
An introduction to teaching required of all assistant instructors and teaching assistants. Topics to include: pronunciation, etymology, Latin style, testing methods, and the selecting of texts. LEC.

LAT 798. Studies in: _____. 1-3 Hours.
Selected readings for qualified students who desire special work on a flexible basis. May be repeated for credit, the maximum being twelve hours. Prerequisite: Undergraduate proficiency in Latin or equivalent. RSH.

LAT 899. Thesis. 1-6 Hours.
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Bachelor of Arts and Bachelor of General Studies in Classical Antiquity

Why classics?

Because knowledge of Greek and Roman antiquity is fundamental to understanding the ancient and modern world.

What is classics?

Classics is the integrated study of ancient Greek and Roman civilization through its languages, its literature, and its artistic and archaeological remains. This broad field includes the study of the great texts of
classical antiquity, such as Vergil’s *Aeneid*, Homer’s *Iliad* and *Odyssey*, Plato’s *Symposium*, Sophocles’ *Antigone*, and the love poems of Sappho and Catullus, but also encompasses research into everyday life in the societies that produced those great works.

In addition to training in the classical languages (Greek and Latin), the department introduces students to a range of work in literary criticism and cultural studies. Topics include archaeology and ancient art, ancient theatre, mythology, women’s history, Greek and Roman humor, cultural exchange across the Mediterranean, the translation of Greek and Latin poetry, and the history of slavery, sexuality, and ethnicity in ancient society.

**A commitment to teaching and learning:**

Our curriculum is diverse, innovative, and responsive to students’ needs. We offer a variety of topics as mentioned above, and an array of course structures and formats, including small in-person language courses, hybrid ancient Greek and Latin that combines face-to-face instruction with online exercises, mid-sized discussion courses on archaeological or literary themes, online offerings during the summer and the academic year, and one large energetic lecture course.

Our faculty members have won nearly all KU’s teaching awards, including the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other university-level teaching and advising awards. The department as a whole received the first ever Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

**Beyond KU:**

In addition to the rich and interdisciplinary content, the Classics degree teaches strong and widely useful critical skills such as clear writing, effective interpretation and use of evidence, and evaluation of sources. Classics graduates bring all these to bear in a variety of careers. Our students have gone on to careers in law, business, library science, journalism, medicine, museum studies, education, writing and publishing, and technology.

**Innovative scholarship:**

KU Classics Faculty members conduct research on a variety of ancient topics, from Greek tragedy to Roman architecture. Their research engages some of the world’s most enduring questions, such as: How did the Greek and Roman societies envision happiness? How does knowledge of the past affect one’s choices and identities? How do modern theories about gender and sexuality intersect with ancient concepts? How are cultural values encoded into art, architecture, literature, language, law, religion, and politics? And, who “owns” the classical past?

Classics students can work with faculty as research assistants or can develop their own research projects, and many Classics courses count toward KU’s Research Experience Program. Our undergraduate students have received Undergraduate Research Awards and McNair Scholarships, and many write undergraduate honors theses.

**Study Abroad**

The Classics Department offers a variety of study opportunities for its students to study in Greece or Italy, the UK, and elsewhere in Europe. We offer scholarships to students who participate in overseas programs that focus on the ancient world.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Classics Majors**

The Department of Classics offers 2 majors. Both provide students of diverse career goals a broad humane education and afford a solid foundation for those who wish to pursue graduate work in classics. The **Classical Antiquity** major provides inclusive, interdisciplinary training in ancient Greek and Roman cultures and prepares you for graduate study in ancient archaeology, art, or history. The **Classical Languages** major trains you to read the great authors of classical antiquity (e.g., Homer, Plato, Vergil, Sappho, Saint Augustine) in the original language and prepares you for graduate study in classics and for teaching in some private schools.

You might also combine your classical language interest with a degree in the School of Education. A degree in education with a Latin major allows you to teach Latin in public high schools.

**First- and Second-Year Preparation**

Potential classics majors should keep in mind that proficiency in Greek or Latin is required for either major; they need to enroll in GRK 104 or LAT 104 or their equivalents as early as possible. For students with no former training, proficiency takes 4 semesters; Classical Languages majors need additional language courses. Other courses to consider taking during the first or second year include CLSX 148, CLSX 151, CLSX 168, CLSX 230, CLSX 240, or the honors versions of those courses. As soon as the student decides that classics is a possible major, he or she should talk to an undergraduate advisor in classics.

**Requirements for the B.A. or B.G.S. Major: Classical Antiquity**

The Classical Antiquity major consists of 30 hours of work in Classics and related courses, in addition to the coursework in Latin and/or Greek required for the major. The major is designed to encourage
interdisciplinary understanding of ancient Greek and Roman cultures while maximizing student flexibility.

Of the 30 hours that constitute the major, 15 must be in the Classics Department, i.e., CLSX, GRK, and LAT courses; and 15 must be junior/senior hours, i.e., at the 300 level or above. This major has two tracks: Classical Humanities, and Classical Art and Archaeology. Coursework in Latin and or Greek required for the major: 4-semester proficiency in Latin or ancient Greek, or four semesters combined Greek and/or Latin, or the equivalent.

Students who are double majoring in Classical Languages and Classical Antiquity must have 9 unique credit hours in each major.

**List A - Classical Archaeology**

- CLSX 151 Introduction to Greek and Roman Archaeology or CLSX 351 Introduction to Greek and Roman Archaeology, Honors
- CLSX 305 Greek and Roman Art
- CLSX 325 Aegean Archaeology and Art
- CLSX 326 Greek Archaeology and Art
- CLSX 327 Roman Archaeology and Art
- CLSX 371 Archaeology of Ancient Israel
- CLSX 525 Aegean Archaeology and Art
- CLSX 526 Greek Archaeology and Art
- CLSX 527 Roman Archaeology and Art
- CLSX 529 Archaeology and Art of the Ancient Near East
- CLSX 538 Pompeii and Herculaneum
- CLSX 577 Topics in the Archaeology and Art of the Ancient Mediterranean: _____
- HA 600 Biography of a City: _____
- ANTH 418 Summer Archaeological Field Work
- ANTH 419 Training in Archaeological Field Work

**List B - Classical Humanities**

- CLSX 105 Introduction to Ancient Near Eastern and Greek History
- CLSX 106 Introduction to Roman History
- CLSX 148 Greek and Roman Mythology or CLSX 149 Greek and Roman Mythology Honors
- CLSX 168 Ancient Epic Tales or CLSX 169 Ancient Epic Tales, Honors
- CLSX 210 Greek Rhetoric in Theory and Practice
- CLSX 220 Roman Oratory in Theory and Practice
- CLSX 230 Greek Culture and Civilization or CLSX 330 Greek Culture and Civilization, Honors
- CLSX 240 Roman Culture and Civilization or CLSX 340 Roman Culture and Civilization, Honors
- CLSX 384 Ethics in Greek Tragedy
- CLSX 502 The Age of Heroes: Early Greece
- CLSX 507 Early Roman Empire
- CLSX 576 Topics in Greek and Roman Literature: _____
- LAT/GRK courses beyond those used to satisfy the requirement
- ENGL 308 Introduction to Literary Criticism and Theory
- PHIL 384 Ancient Philosophy
- PHIL 508 Early Greek Philosophy
- PHIL 605 The Philosophy of Plato
- PHIL 607 The Philosophy of Aristotle
- PHIL 608 Hellenistic Philosophy
- HUM 304 World Literature I

**List C - Electives**

- CLSX 177 First Year Seminar: _____
- CLSX 178 Writing About Greek and Roman Culture
- CLSX 232 Word Power: Greek and Latin Elements in English or CLSX 332 Medical Terminology: Greek and Latin Roots
- CLSX 316 Ancient Magic and Witches
- CLSX 322 Alexander the Great: Man and Myth
- CLSX 323 Julius Caesar: Man and Myth
- CLSX 350 Modern Themes, Ancient Models: _____
- CLSX 355 Ancient Greece and Rome in Film
- CLSX 375 Studies in: _____
- CLSX 382 Jerusalem Through the Ages
- CLSX 496 Honors Essay in Classical Antiquity
- CLSX 506 Jewish History and Literature in the Greek and Roman Periods
- CLSX 515 Gender and Sexuality in Greek Culture
- CLSX 516 Gender and Sexuality in Roman Culture
- CLSX 550 Capstone in Classics
- CLSX 570 Study Abroad Topics in Greek and Roman Culture: _____
- CLSX 575 Readings in: _____
- CLSX 675 Studies in: _____
- ANTH 110 Introduction to Archaeology
- ANTH 415 The Rise of Civilization
- ANTH 520 Archaeological Ceramics
- HIST 402 War and Society in Greece and Rome
- HIST 506 Roman Republic
- HIST 507 Early Roman Empire
- HIST 508 Late Roman Empire (284-527)
- LING 106 Introductory Linguistics
- REL 525 Jews and Christians
- REL 526 Jewish History and Literature in the Greek and Roman Periods
- REL 527 Ancient Mesopotamian Culture and Religion
- REL 530 Christian Origins: from the Beginnings to Augustine
Any course from List A or B beyond those used to fulfill the requirement.

1 Only 6 hours each of CLSX 575, CLSX 576, and CLSX 577 may count toward the major.

Students wishing to use their LAT or GRK to satisfy the university’s language requirement must do four semesters of the same language.

**Classical Antiquity Major Hours & Major GPA**

While completing all required courses (above), majors must also meet each of the following hour and grade point average minimum standards:

<table>
<thead>
<tr>
<th>Major Hours</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Major Hours in Residence</td>
<td>15</td>
</tr>
<tr>
<td>Major Junior/Senior (300+) Hours</td>
<td>15</td>
</tr>
<tr>
<td>Major Junior/Senior (300+) Graduation GPA</td>
<td>15</td>
</tr>
</tbody>
</table>

A candidate for honors must meet all the general requirements for graduation with honors established by the College. The independent research requirement is met by successful completion of Honors Essay: CLSX 496, GRK 496, or LAT 496. This is normally in the spring semester of the senior year. This enrollment substitutes for one of the optional major courses, whether central or peripheral.

**Study Abroad**

The department offers study abroad opportunities in Greece and Italy. All students may apply to attend these summer programs, and classics majors are especially encouraged to enroll. Courses offered vary from year to year; consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) or advisors in the Department of Classics.

For scholarships, students should apply to Study Abroad as well as to the department. The department also offers advice to students interested in non-KU programs or in summer internships at archaeological sites.

**BA in Classical Antiquity**

Below is a sample 4-year plan for students pursuing the BA in Classical Antiquity. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).
**BGS in Classical Antiquity**

Below is a sample 4-year plan for students pursuing the BGS in Classical Antiquity. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120**

1. Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
The Classical Antiquity major has two tracks: Classical Archaeology and Classical Humanities. 6 hours from approved courses on List A and List B are required for both tracks. A remaining 9 hours of coursework should be chosen from either List A or List B depending on your track. To review these requirements the lists of approved courses, visit the degree requirements tab.

Both tracks within the Classical Antiquity major require 9 hours chosen from List C, for a list of approved courses see the degree requirements tab.

Goal 6 satisfied by CLSX 496, CLSX 550, or CLSX 577. If one of these is not used to satisfy a major requirement and Goal 6, then a free elective may also be used to satisfy Goal 6.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Bachelor of Arts and Bachelor of General Studies in Classical Languages**

**Why classics?**

Because knowledge of Greek and Roman antiquity is fundamental to understanding the ancient and modern world.

**What is classics?**

Classics is the integrated study of ancient Greek and Roman civilization through its languages, its literature, and its artistic and archaological remains. This broad field includes the study of the great texts of classical antiquity, such as Vergil's Aeneid, Homer's Iliad and Odyssey, Plato's Symposium, Sophocles' Antigone, and the love poems of Sappho and Catullus, but also encompasses research into everyday life in the societies that produced those great works.

In addition to training in the classical languages (Greek and Latin), the department introduces students to a range of work in literary criticism and cultural studies. Topics include archaeology and ancient art, ancient theatre, mythology, women's history, Greek and Roman humor, cultural exchange across the Mediterranean, the translation of Greek and Latin poetry, and the history of slavery, sexuality, and ethnicity in ancient society.

**A commitment to teaching and learning:**

Our curriculum is diverse, innovative, and responsive to students’ needs. We offer a variety of topics as mentioned above, and an array of course structures and formats, including small in-person language courses, hybrid ancient Greek and Latin that combines face-to-face instruction with online exercises, mid-sized discussion courses on archaeological or literary themes, online offerings during the summer and the academic year, and one large energetic lecture course.

Our faculty members have won nearly all KU’s teaching awards, including the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other university-level teaching and advising awards. The department as a whole received the first every Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

**Beyond KU:**

In addition to the rich and interdisciplinary content, the Classics degree teaches strong and widely useful critical skills such as clear writing, effective interpretation and use of evidence, and evaluation of sources. Classics graduates bring all these to bear in a variety of careers. Our students have gone on to careers in law, business, library science, journalism, medicine, museum studies, education, writing and publishing, and technology.

**Innovative scholarship:**

KU Classics Faculty members conduct research on a variety of ancient topics, from Greek tragedy to Roman architecture. Their research engages some of the world’s most enduring questions, such as: How did the Greek and Roman societies envision happiness? How does knowledge of the past affect one’s choices and identities? How do modern theories about gender and sexuality intersect with ancient concepts? How are cultural values encoded into art, architecture, literature, language, law, religion, and politics? And, who “owns” the classical past?

Classics students can work with faculty as research assistants or can develop their own research projects, and many Classics courses count toward KU’s Research Experience Program. Our undergraduate students have received Undergraduate Research Awards and McNair Scholarships, and many write undergraduate honors theses.

**Study Abroad**

The Classics Department offers a variety of study opportunities for its students to study in Greece or Italy, the UK, and elsewhere in Europe. We offer scholarships to students who participate in overseas programs that focus on the ancient world.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements.
See individual department/program sections for departmental admission requirements.

Classics Majors

The Department of Classics offers 2 majors. Both provide students of diverse career goals a broad humane education and afford a solid foundation for those who wish to pursue graduate work in classics. The Classical Antiquity major provides inclusive, interdisciplinary training in ancient Greek and Roman cultures and prepares you for graduate study in ancient archaeology, art, or history. The Classical Languages major trains you to read the great authors of classical antiquity (e.g., Homer, Plato, Vergil, Sappho, Saint Augustine) in the original language and prepares you for graduate study in classics and for teaching in some private schools.

You might also combine your classical language interest with a degree in the School of Education. A degree in education with a Latin major (p. 227) allows you to teach Latin in public high schools.

The department offers study abroad opportunities in Greece and Italy. All students may apply to attend these summer programs, and classics majors are especially encouraged to enroll.

First- and Second-Year Preparation

Potential classics majors should keep in mind that proficiency in Greek or Latin is required for either major; they need to enroll in GRK 104 or LAT 104 or their equivalents as early as possible. For students with no former training, proficiency takes 4 semesters; Classical Languages majors need additional language courses. Other courses to consider taking during the first or second year include CLSX 148, CLSX 151, CLSX 168, CLSX 230, CLSX 240, or the honors versions of those courses. As soon as the student decides that classics is a possible major, he or she should talk to an undergraduate advisor in classics.

Requirements for the B.A. or B.G.S. Major: Classical Languages

The Classical Languages major consists of 27 hours of work in classics and related courses, beyond these 4 preliminary requirements: LAT 104, LAT 108, GRK 104, and GRK 108 or their equivalents. Students who have already taken the equivalents of those courses proceed to the next level. Study of both languages is required, but students with particular career plans may obtain written permission from the chair to substitute electives for one of the languages. This major requires at least 15 hours in language courses starting with LAT 112/LAT 113 or GRK 301, 3 hours in ancient art and archaeology, 3 hours in ancient history, and 6 hours in electives. Students aiming for graduate school in classics should take as many semesters of Latin and Greek as possible—at the least, 3 years of one ancient language and 2 years of the other. Future graduate students should also consider double majoring in Classical Antiquity and Classical Languages.

Students who are double majoring in Classical Languages and Classical Antiquity must have 9 unique credit hours in each major.

Classical Languages Major Required Electives

Majors must complete 2 courses (6 hours) of electives. Elective courses may include any CLSX, Greek, or Latin courses and any course listed above (but not used to satisfy the requirement), and PHIL 384, PHIL 508, PHIL 605, PHIL 607, PHIL 608, HUM 380, HUM 390, ENGL 308 or other courses in allied fields as approved by the department chair.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and GPA minimum standards:

Major Hours
Satisfied by 27 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Major Junior/Senior Attempts
Summary includes Classical Languages junior/senior (300+) hours attempted, including F's and incompletes.

A sample 4-year plan for the BA in Classical Languages can be found here: Classical Languages (p. 1327), or by using the left-side navigation. A sample 4-year plan for the BGS in Classical Languages can be found here: Classical Languages (p. 1328), or by using the left-side navigation.

Departmental Honors

For scholarships, students should apply to Study Abroad as well as to the department. The department also offers advice to students interested in non-KU programs or in summer internships at archaeological sites.

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. The Classical Languages major requires 15 hours of advanced language study beyond GRK 108 and LAT 108, beginning with LAT 112 or GRK 301. Must complete at least 3 semesters in LAT or GRK, and one semester in the other in order to fulfill the BA Language Requirement.

4. Choose from the approved list of Classical History courses found on the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/classics/ba-bgs-classical-languages/#requirementstext) tab.

5. Choose from the list of approved Ancient Art & Archaeology courses found on the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/classics/ba-bgs-classical-languages/#requirementstext) tab.

6. Two courses (6 hours) of additional electives are required for the Classical Language major. See the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/classics/ba-bgs-classical-languages/#requirementstext) tab for a list of approved elective courses.

7. Typically KU Core Goal 6 is fulfilled by a major course. If an approved Classical Languages course is not available to fulfill Goal 6, another course will need to be chosen. A free elective may need to be used to meet Goal 6 course pre-requisites.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
A commitment to teaching and learning:

Our curriculum is diverse, innovative, and responsive to students’ needs. We offer a variety of topics as mentioned above, and an array of course structures and formats, including small in-person language courses, hybrid ancient Greek and Latin that combines face-to-face instruction with online exercises, mid-sized discussion courses on archaeological or literary themes, online offerings during the summer and the academic year, and one large energetic lecture course.

Our faculty members have won nearly all KU’s teaching awards, including the HOPE, Kemper, and Ned Fleming awards, and a wide variety of other university-level teaching and advising awards. The department as a whole received the first ever Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

Beyond KU:

In addition to the rich and interdisciplinary content, the Classics degree teaches strong and widely useful critical skills such as clear writing, effective interpretation and use of evidence, and evaluation of sources. Classics graduates bring all these to bear in a variety of careers. Our students have gone on to careers in law, business, library science, journalism, medicine, museum studies, education, writing and publishing, and technology.

Innovative scholarship:

KU Classics Faculty members conduct research on a variety of ancient topics, from Greek tragedy to Roman architecture. Their research engages some of the world’s most enduring questions, such as: How did the Greek and Roman societies envision happiness? How does knowledge of the past affect one’s choices and identities? How do modern theories about gender and sexuality intersect with ancient concepts? How are cultural values encoded into art, architecture, literature, language, law, religion, and politics? And, who "owns" the classical past?

Classics students can work with faculty as research assistants or can develop their own research projects, and many Classics courses count toward KU’s Research Experience Program. Our undergraduate students have received Undergraduate Research Awards and McNair Scholarships, and many write undergraduate honors theses.

Study Abroad

The Classics Department offers a variety of study opportunities for its students to study in Greece or Italy, the UK, and elsewhere in Europe. We offer scholarships to students who participate in overseas programs that focus on the ancient world.

Requirements for the Minor

The minor requires 18 credit hours (12 hours at the junior/senior level) in courses in the Department of Classics (and other approved courses).

Minor Hours & GPA

While completing all required courses, minors must also meet each of the following hour and grade point average minimum standards:

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Master of Arts in Classics

Why study classics?
Knowledge of ancient Greek and Roman culture is fundamental to understanding both history and the modern world. The Department of Classics offers advanced course work and research in the ancient civilizations of Greece and Rome. Students study the classical languages (ancient Greek and Latin) and literatures, as well as the art and archaeology of the Greek and Roman worlds. A Master’s degree serves as preparation for a doctorate in classics and related fields, such as ancient history and archaeology. The degree also offers valuable training for students pursuing teaching careers at the secondary level.

Graduate Teaching Assistantships
Financial support is available in the form of teaching assistantships in Latin, Greek, or courses on ancient Greek and Roman culture taught in translation. Contact the department (http://classics.ku.edu/) for information.

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission
The B.A. in classics or another field in the humanities is required. For admission to the graduate program, the entering student should have 15 junior/senior hours in Latin and/or Greek. Well-qualified candidates with fewer hours in ancient languages are considered for admission and may be offered positions as graduate teaching assistants in non-language courses. Financial support is available in the form of teaching assistantships in Latin, Greek, or courses on ancient Greek and Roman culture taught in translation. The Graduate Record Examination is not required but is necessary if the applicant wishes to be considered for university-level scholarships.

Submit your graduate application online (https://gradapply.ku.edu/apply/).

Scholarships and Awards
The department offers several scholarships and awards, such as the Oliver Phillips Scholarship for aspiring Latin teachers, the Mildred Lord Greef award for best paper or essay, the Albert O. Greef award for literary translation, the Sterling-Walker prize for a Greek translation exam, the Tenney Frank scholarships for undergraduate study, and the Tenney Frank awards for foreign study of the classics. For information, contact the department.

All graduate students who wish to be considered for KU scholarships and financial aid must complete applications with Financial Aid and Scholarships.

M.A. Degree Requirements
Course Requirements
1. The degree program consists of 30 hours, whether one chooses the thesis or non-thesis option.
   a. At least 50% of coursework must be taken at the 700 level or above.
2. The student may stress either Latin or Greek or a combination of both. Students who take only one of the ancient languages at the graduate level must present at least 10 hours of elementary course work in the other; this requirement may also be satisfied by passing a departmental examination.
3. Students may select their 30 hours from graduate courses in Greek, Latin, classics, and certain courses in philosophy, history, history of...
art, and linguistics. A maximum of 12 hours may be taken in non-language courses.

4. Students who elect to write an M.A. thesis must complete at least 24 hours on the graduate level, in addition to 6 hours of Thesis (LAT 899 or GRK 899 or CLSX 899). In consultation with the graduate advisor, each student selects a thesis committee of 3 members.

5. The student selecting the non-thesis option must complete 30 hours of courses on the graduate level. In 2 of these courses, students must prepare research papers that meet the approval of the appropriate instructors and the graduate advisor. These papers are placed on file in the department office.

Language Requirements

Incoming graduate students take a diagnostic reading examination in Greek or Latin or both if they plan to take graduate-level courses in both languages. Students who take only one of the ancient languages at the graduate level must demonstrate a basic knowledge of the other. By the end of graduate study, the student must also demonstrate a reading knowledge of German, Italian, or French as specified in the Research Skills section of the Department of Classics Graduate Handbook (http://classics.ku.edu/masters-program-overview/).

Examinations

A written general examination is required of all M.A. students. For further information, see the Department of Classics Graduate Handbook (http://classics.ku.edu/masters-program-overview/).

Accelerated Master of Arts in Classics

The combined B.A. / M.A. degree allows high-achieving undergraduate majors in Classical Languages at the University of Kansas to move directly into the Master’s degree in Classics, completing it within one year of completing the B.A.

Students take the same courses (and the same number of courses) as those required for the two degrees under the normal sequence, but in a more flexible configuration. For especially well prepared students with superior grade-point averages, the M.A. requires 24 graduate hours rather than 30. Students enroll as an undergraduate in six hours of 500-700 level courses that count toward the B.A. but are beyond those required for the Classical Languages major. All other requirements for the M.A. are the same as for other tracks: the principal focus remains ancient Greek and/or Latin (concluding with a comprehensive exam in both languages), and there remains a thesis and non-thesis option and required reading knowledge of a modern research language. At least 50% of coursework must be taken at the 700 level or above. See department website (http://classics.ku.edu/overview-0/) for details.

Students enroll as an undergraduate in six hours of 500-700 level courses that count toward the B.A. but are beyond those required for the Classical Languages major. All other requirements for the M.A. are the same as for other tracks: the principal focus remains ancient Greek and/or Latin (concluding with a comprehensive translation exam), and there remains a thesis and non-thesis option and required reading knowledge of a modern research language.

The shift of 6 credit hours from the M.A. to pre-requisites for the B.A. allows students greater flexibility and will ease the burden on their final year of study. More precisely, the flexibility allows faculty to advise students on a course of study that distributes courses across the 5 years of study in the most optimal way for language development.

In summary, students will successfully complete the M.A. in Classics from the University of Kansas if the following credit hour and Enroll & Pay career conditions are met:

1. A minimum of 24 hours at the 500+ level on the graduate program line.
2. A minimum of 6 hours at the 500+ level on the undergraduate program line beyond what is required of the Classics undergraduate major.

Students may be eligible to co-enroll in their final semester of undergraduate study. This should be discussed and planned during the junior year of undergraduate study.

The requirement that students in the program write an undergraduate honors thesis also provides preparation toward the M.A. thesis. Students who choose the non-thesis option are not required to write an undergraduate thesis.
Examinations

All students must write a final translation examination prepared by a committee of three members of the graduate faculty, at least two of whom, including the committee chair, must be members of the Classics Department. The members of the examination committee will be selected by the student, with the approval of the graduate faculty of the Department, and the examination will be prepared by the committee in consultation with the student.

One section of this examination will be drawn from material read in graduate classes. The student will present a reading list of no less than 400 pages, according to pagination in the Oxford Classical Text or its equivalent. This will consist of 50-150 pages from at least four of the eight major areas of Greek and Latin literature that form the four-semester cycle of courses (see below). A second section will be a sight passage from one of the major genres of Greek or Latin literature selected by the student.

Four-Semester Cycle of Courses

Headings indicate areas from which instructors may draw material for author or genre courses. Author listings are representative, not exclusive.

Greek

• Epic and Lyric Poetry: From Homer to the Hellenistic poets
• Drama: Aeschylus, Sophocles, Euripides, Aristophanes
• History and Oratory: Herodotus, Thucydides, Xenophon, Attic Orators
• Philosophy: Pre-Socratics, Plato, Xenophon, Aristotle

Latin

• Epic Poetry: Lucretius, Ovid, Vergil, post-Augustan epic poets
• Lyric and Elegy: Catullus, Horace, Tibullus, Propertius, Ovid
• History, Oratory, Philosophy: Caesar, Sallust, Cicero, Livy, Seneca, Tacitus, Augustine, Boethius
• Drama, Satire, and Novel: Plautus, Terence, Horace, Petronius, Seneca, Juvenal, Apuleius

Total Hours 144-147

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3 The Classical Languages major requires 15 hours of advanced language study beyond GRK 108 and LAT 108, beginning with LAT 112 or GRK 301. The student must complete at least 3 semesters in LAT or GRK, and one semester in the other in order to fulfill the B.A. Language Requirement.
The Clinical Child Psychology Program (CCPP) at the University of Kansas is a graduate program leading to the doctoral degree (Ph.D.) in Clinical Child Psychology. The CCPP is accredited by the American Psychological Association’s Commission on Accreditation as a clinical psychology doctoral training program with a special emphasis on children, adolescents, and families. The Program is affiliated with the Departments of Psychology and Applied Behavioral Science, and has strong ties with Department of Pediatrics at the University of Kansas School of Medicine (KUMC) and with Children’s Mercy Hospital. The program does not offer a terminal Masters degree. However, students admitted to the Doctoral program without a Masters degree will obtain a MA in Clinical Child Psychology en route to the Ph.D.

The mission of the CCPP is to develop leaders in the research, dissemination, and practice of clinical science for children, youths, and their families. As such, doctoral training in the CCPP develops clinical scientists capable of conducting innovative research and developing and delivering interventions for a range of human problems, particularly those involving children and families. In service of its mission, the CCPP is designed to promote profession-wide competencies in nine specific domain areas (e.g., Research, Assessment, Intervention, Individual and Cultural Diversity, Ethics and Legal issues), as well as program specific competencies in two domains (Administration/Management, and Professional Leadership and Communications). This is accomplished through broad and general training across the substantive areas of the science of psychology (i.e., behavioral, social, cognitive, affective, and biological bases of psychology), specialized training in research methodology and statistical analytic methods, and specialized clinical training through basic and advanced practica. Subdomains of the professional competency and substantive knowledge areas are detailed in the CCPP Training Manual (http://ccpp.ku.edu/resources/). A particular strength of the program is the developmental perspective that pervades all core courses.

The field of psychological science is changing rapidly, with advances in our understanding, assessment, diagnosis, prevention, and treatment of a range of conditions. Our goal is to train the professionals who are at the forefront of these advances in research, dissemination, education, and service. The program’s didactic and practical experiences prepare graduates for the many roles open to clinical child psychologists. Graduates hold research/teaching positions in universities, medical schools, colleges, and internship programs, and direct service delivery positions in mental health centers, hospitals, and schools.

In its fulfillment of the training model of clinical psychology known as the “scientist-practitioner model,” the CCPP utilizes report of the National Conference on Scientist-Practitioner Education and Training for the Professional Practice of Psychology. This conference defined the model as “an integrative approach to science and practice wherein each must continually inform the other” in which the scientific research base is related to clinical practice, and practice elements are inherently interrelated to research. The CCPP places an extremely high priority on the development of research skills and competencies.

Students can complete course work, practicum requirements, and research requirements for the doctoral degree in 4 years of full-time study followed by a 1-year pre-doctoral clinical internship at an approved site, although some students take longer. Students are expected to, and indeed want to, participate maximally in research and clinical experiences to ensure the breadth of their training. An empirically-based master’s thesis (if not obtained prior to admission), qualifying examination, and doctoral dissertation are formal milestones of research progress in addition to regular evaluation in courses, clinical practica, and annual faculty reviews.

The Director of the Program serves as the official Academic Advisor for all students in the program. As such, the Director bears responsibility for assisting the student in course selection, articulating career goals, assisting with program requirements (e.g., internship applications), and designing experiences consonant with career goals. Each student in the Clinical Child Psychology Program also selects a Research Advisor who provides individualized guidance with regard to course selection, developing and articulating career goals, and designing experiences consonant with career goals.

Doctor of Philosophy in Clinical Child Psychology

Clinical Child Psychology Graduate Program

The Clinical Child Psychology Program (CCPP) at the University of Kansas is a graduate program leading to the doctoral degree (Ph.D.) in Clinical Child Psychology. The CCPP is accredited by the American Psychological Association’s Commission on Accreditation as a clinical
psychology doctoral training program with a special emphasis on children, adolescents, and families. The Program is affiliated with the Departments of Psychology and Applied Behavioral Science, and has strong ties with the Department of Pediatrics at the University of Kansas School of Medicine (KUMC) and with Children’s Mercy Hospital. The program does not offer a terminal Masters degree. However, students admitted to the Doctoral program without a Masters degree will obtain a MA in Clinical Child Psychology en route to the Ph.D.

The mission of the CCPP is to develop leaders in the research, dissemination, and practice of clinical science for children, youths, and their families. As such, doctoral training in the CCPP develops clinical scientists capable of conducting innovative research and developing and delivering interventions for a range of human problems, particularly those involving children and families. In service of its mission, the CCPP is designed to promote profession-wide competencies in nine specific domain areas (e.g., Research, Assessment, Intervention, Individual and Cultural Diversity, Ethics and Legal issues), as well as program specific competencies in two domains (Administration/Management, and Professional Leadership and Communications). This is accomplished through broad and general training across the substantive areas of the science of psychology (i.e., behavioral, social, cognitive, affective, and biological bases of psychology), specialized training in research methodology and statistical analytic methods, and specialized clinical training through basic and advanced practica. Subdomains of the professional competency and substantive knowledge areas are detailed in the CCPP Training Manual (http://ccpp.ku.edu/resources/). A particular strength of the program is the developmental perspective that pervades all core courses.

The field of psychological science is changing rapidly, with advances in our understanding, assessment, diagnosis, prevention, and treatment of a range of conditions. **Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Admission to the CCPP is highly competitive. All completed applications are reviewed and incoming students are selected by an admissions committee chaired by the Program Director and comprising core CCPP faculty members and a student representative. Essential requirements for admission include (a) a Bachelor’s degree (BA, BS) from an accredited institution, (b) a record of scholarly achievement that shows strong promise of success in course work, research, and clinical work, and (c) at least 15 credit hours in psychology coursework, including statistics and research methodology. Preferred qualifications for admission include a strong record of research experience and evidence of research productivity (e.g., presentations, posters, honors theses). Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

The Admissions committee will use the following when determining suitability for admission: The applicant’s transcripts and grade point averages (GPAs) from previous educational institutions; a written statement of interests/goals provided by the candidate; the candidate’s résumé or CV; 3 letters of recommendation from professionals who can address the candidate’s potential in a doctoral training program; and a statement (max. 500 words) describing (a) your views on diversity, equity, and inclusion (DEI) in clinical child psychology, (b) evidence of your contribution to DEI to date, and/or (c) your commitment to DEI in your future career. Applicants may also submit a writing sample that demonstrates their technical/professional writing skills. Highly rated applicants will be invited to interview with CCPP faculty and students prior to admissions decisions. Financial aid is available. Please visit the program’s website (http://www.ccpp.ku.edu/student-admissions-data/) for information regarding student admissions, outcomes, and other data.

Submit your graduate application online (https://gradapply.ku.edu/apply/) (College of Liberal Arts and Sciences, Psychology — Clinical Child Psychology Program) as well as all supplemental materials.

**Clinical Child Psychology Curriculum**

### Research Skills and Responsible Scholarship

#### Responsible Scholarship Requirement

Responsible Scholarship in the CCPP involves pertinent areas of protection of human subjects, collaborative research, conflicts of interest, authorship, publication, plagiarism, copyright, data management, professional practices, mentor/student responsibilities, maintenance of confidentiality, approach research conduct and research misconduct, HIPAA, and ethics of publishing clinical case material, among other related topics. This requirement must be met before taking the Comprehensive Oral Examination.

Students in the CCPP fulfill the Responsible Scholarship Requirement through
Courses in the curriculum:

- The Collaborative Institutional Training Initiative (CITI) Human Subjects Protection and HIPAA online tutorial

Research Skills Training Requirement in CCPP

The additional Research Skill requirement is fulfilled by 1 additional course above the 2 required courses in statistical or data analysis (quantitative, applied behavior analysis, qualitative). No course is specified, but must be approved by the student’s research advisor and the program director.

Master’s Degree and Thesis

The master’s degree requires a thesis consisting of empirical research and a minimum of 30 hours of course work (24 of which must be nonthesis credit hours). A minimum of 6 credit hours in ABSC 897/PSYC 897 Master’s Thesis in Clinical Child Psychology is required.

Ph.D. Preliminary Examination: The Task

The program uses the Task system for its preliminary examination in research methodology, teaching, or applied/clinical area. Details are available in the Clinical Child Psychology Program Training Manual, available on the program's website (http://ccpp.ku.edu/resources/).

Ph.D. Oral Comprehensive Examination

Upon completion of all course requirements for the Ph.D. and of the Task, except for dissertation and internship, the student must pass the oral comprehensive examination. Details are available in the Clinical Child Psychology Program Training Manual, available on the program's website (http://ccpp.ku.edu/resources/).

Doctoral Dissertation

The Ph.D. dissertation must be based on an original, empirical investigation. A minimum of 12 hours in dissertation in clinical child psychology is required.

Predoctoral Internship

An 11-month clinical internship at a setting accredited by the American Psychological Association is required. Students enroll in ABSC 963/PSYC 963 for a total of 3 credit hours.

Courses

See the course listings for the Departments of Applied Behavioral Science and Psychology.

Department of Communication Studies

Why study communication studies?

The Communication Studies undergraduate major equips students with a diversity of skill sets by investigating communication in various cultural contexts, including relational, organizational, intercultural, political, and more.

In an increasingly globalized world, competent communication is crucial for career advancement, interpersonal relationships, and public democratic participation. Here’s what we know: humans rely on communication, and the creation and translation of symbols, language, and messages are integral to daily interactions. In other words, communication connects us.

The major expands on fundamental public speaking principles from the introductory course through emphasizing theories, methods, performances that apply to everyday communication practices.

Undergraduate Programs

In our complex, mediated, global, and pluralistic world, we are awash in messages. Others seek to influence our ideas and our actions, and we seek to influence theirs. Studying human communication in its many forms and contexts enables students to be engaged civic participants, reflective audience analysts, effective communicators at work and in relationships, and reflective consumers of messages. Examining communication through historical and contemporary lenses demonstrates its power to move individuals, to enable the development of groups ranging from families to nations, and to inspire events. The communication studies curriculum prepares students to engage with the world they enter as thoughtful, critical communicators and as agents of community building in a global world.

Graduate Programs

The Department of Communication Studies offers a Graduate Certificate, Master of Arts, and Doctorate of Philosophy. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in COMS.

Graduate Certificate Program

The 4-course, 12-hour Professional Workplace Communication certificate is intended to increase communication competencies for effective decision-making, team-building, problem-solving, and crisis-resolution practices with various professional stakeholders.

Lawrence campus M.A. Program

The M.A. program is designed as a 30-hour, 2-year degree program in either Relationships & Social Interaction or Rhetoric & Political Communication. Students will complete a thesis or non-thesis plan of study. The primary mission of the Master of Arts in COMS is to introduce graduate students to the process of conducting original research in human communication. The majority of our MA students go on to pursue a PhD in communication or a related field. Others use the MA as preparation for careers in business, legal consulting, politics, social work, or other related areas of employment.
Ph.D. Program

The doctoral program in COMS is designed to as an intensive, 4-year program with content in experimental, qualitative, quantitative, and rhetorical methods. Students may specialize in either Relationships & Social Interaction or Rhetoric & Political Communication. The primary mission of the Doctor of Philosophy in COMS is to train students in the process of conducting original research in human communication. With few exceptions, KU PhD graduates pursue careers doing research and teaching in higher educations.

Courses

COMS 104. Introduction to Communication Studies. 3 Hours H.
Survey of the major areas of the Communication Studies field. Provides an overview of communication theory and research methods, and introduces key topics, approaches, and applications in core areas such as rhetoric, organizational communication, interpersonal communication, intercultural communication, and communication technology. LEC.

COMS 130. Speaker-Audience Communication. 3 Hours GE22 / U.
Study of rhetorical theory and its application to the preparation, presentation, and criticism of oral discourse in audience situations. Special consideration of listening behavior and of the ethical conduct of speech in a free society. This course fulfills the College argument and reason requirement. LEC.

COMS 131. Speaker-Audience Communication, Honors. 3 Hours GE22 / U.
The study of rhetorical theory and its application to the preparation, presentation, and criticism of oral discourse in audience situations. Special consideration of listening behavior and of the ethical conduct of speech in a free society. This course fulfills the College argument and reason requirement. This is an honors section of COMS 130 open only to students in the Honors Program. LEC.

COMS 132. Speaker-Audience Communication for the Professional Schools. 3 Hours GE22 / H.
This course focuses on the study of oral communication: the application, preparation, presentation and criticism of messages appropriate in the business or organizational setting. Special consideration is given to speaker confidence, working in teams, listening behaviors and application of communication theories to the audience and rhetorical situation. Not open to students with credit in COMS 150. Prerequisite: Open only to students in the professional schools. LEC.

COMS 133. Speaker-Audience Communication for the Professional Schools, Honors. 3 Hours GE22 / H.
This course focuses on the study of oral communication: the application, preparation, presentation and criticism of messages appropriate in the business or organizational setting. Special consideration is given to speaker confidence, working in teams, listening behaviors and application of communication theories to the audience and rhetorical situation. Not open to students with credit in COMS 150. Prerequisite: Open only to students in the professional schools who are members of the University Honors Program. LEC.

COMS 150. Personal Communication. 3 Hours U.
This course is an introduction to communication theory, process, and skill. The course seeks to increase the student's understanding of communication theory, both interpersonal and public, and of his or her own communicative behavior. Class projects and participation urge students to apply this theoretical knowledge to a variety of settings, including interpersonal and addressing groups and audiences. This course does not fulfill the College argument and reason requirement. Not open to those who have credit in COMS 130. LEC.

COMS 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Communication Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

COMS 207. Introduction to Political Communication. 3 Hours S.
This class addresses the different ways in which the three main players in political communication processes (leaders, the media and citizens) affect the political behavior, attitudes or cognitions of individuals; or have outcomes that influence public policy at different levels. The contents of the course are organized into three areas: Foundations of political communication, central questions and theories in political communication, and political campaigning and advertising. Prerequisite: Concurrent or prior enrollment in COMS 130. LEC.

COMS 210. Introduction to Organizational and Professional Communication. 3 Hours S.
Introduces foundational concepts in organizational communication, focusing on topics such as superior-subordinate relationships, information- and feedback-seeking, relationships with stakeholders, and dealing with organizational change. The course emphasizes individual communication practices and responsibilities that contribute to organizational outcomes and personal success in organizations. Prerequisite: Concurrent or prior enrollment in COMS 130. LEC.

COMS 230. Fundamentals of Debate. 3 Hours GE11 / U.
Introduction to the principles of debating. Emphasis on debating techniques, analysis of the question, methods of using evidence, refutation, and brief making. This course fulfills the College argument and reason requirement. LEC.

COMS 231. Practicum in Forensics. 1 Hour U.
For students selected by faculty supervisor for work on university debate squad. Students to enroll at time of their selection. Recurring enrollments permitted. FLD.

COMS 232. Introduction to Rhetoric. 3 Hours HR GE3H / H.
Historical survey of theories of communication and persuasion, the people who produced them, and the philosophical assumptions upon which they rest. Beginning with the Greeks, especially Plato and Aristotle, and ending with selections from Kenneth Burke and other contemporary figures, the course focuses on changing concepts of rhetoric throughout a time span of some 2000 years. Prerequisite: Concurrent or prior enrollment in COMS 130. LEC.

COMS 233. Introduction to Political Communication. 3 Hours S.
This course addresses the different ways in which the three main players in political communication processes (leaders, the media and citizens) affect the political behavior, attitudes or cognitions of individuals; or have outcomes that influence public policy at different levels. The contents of the course are organized into three areas: Foundations of political communication, central questions and theories in political communication, and political campaigning and advertising. Prerequisite: Concurrent or prior enrollment in COMS 130. LEC.

COMS 235. Introduction to Rhetoric and Social Influence. 3 Hours HL GE11 / H.
This course examines in detail the texts of speeches and essays on controversial issues in order to illustrate the varied forms of rhetorical action and the diverse modes of analysis and evaluation that can be applied to them. Examples are drawn from the rhetorical literature of contemporary U.S. speakers and prose writers. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 238. Cases in Persuasion. 3 Hours H.
An exploration of basic principles that explain the effect and effectiveness of the arts of persuasion currently practiced in American society. Class discussions of incidents leading to the discovery of principles and theories that explain them. Continuing emphasis on issues concerning the ethical character of persuasion in contemporary life. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.
COMS 244. Introduction to Interpersonal Communication Theory. 3 Hours SI GE3S / S.
Examines basic theoretical perspectives and research on verbal and nonverbal communication elements affecting communication between individuals in a variety of contexts. Topics include communication competence, developmental aspects of interpersonal communication, and interpersonal influence. Prerequisite: Concurrent or prior enrollment in COMS 130. LEC.

COMS 246. Introduction to Intercultural Communication. 3 Hours S.
This course attempts to provide an understanding of communication as it affects culture and as it is affected by culture. Special emphasis will be placed on the principle of similarity and differences as it relates to the roles of verbal and non-verbal symbols, codes, and cues, stereotypes, prejudices and value and thought patterning systems between and among cultures. Prerequisite: Concurrent or prior enrollment in COMS 130. LEC.

COMS 310. Advanced Organizational and Professional Communication. 3 Hours SC GE3S / S.
This course provides a foundation for the study of communication in organizational contexts. It introduces students to various organization theories including classical, human relations, systems, and cultural approaches and examines the role of communication in each. Information flow, communication climate, communication networks, work relationships and managerial communication are discussed as well as organizational symbolism, conflict resolution, rituals and ethics. The course is designed to heighten students’ awareness of the role of communication in the organizing process and to develop their abilities to diagnose and prevent communication-related problems. Prerequisite: COMS 130 or COMS 150. LEC.

COMS 320. Communication on the Internet. 3 Hours S.
This course introduces social and communication issues in the context of online interaction. Surveys a range of social internet technologies (e.g., newsgroups, chat, MUDs, etc.). Focus is on the interpersonal topics, including the establishment and maintenance of individual and cultural identities, personal relationships, the emergence of online communities, power and conflict in online groups, language use in online contexts, and how online groups are used to enhance or alter civic and global cultures. LEC.

COMS 322. Audience Centered Public Speaking in the Workplace. 3 Hours GE22 / S.
In this course, students develop and present their ideas by applying communication theories to organizational audiences in various presentation situations. Specifically, this course focuses on presentation development, preparation, presentation and critique of messages appropriate in the business or organization setting. Special attention is given to speaking with confidence, presenting and working effectively in teams, reflecting and improving on presentations skills, and listening and speaking ethically in an increasingly diverse world. Prerequisite: Not intended for Communication Studies Majors. Does not count toward Communication Studies Major or Minor requirements. Must have completed at least 15 credit hours at KU to enroll. LEC.

COMS 330. Effective Business Communication. 3 Hours S.
The purpose of this course is to develop the student’s written, spoken and electronically mediated business communication skills to prepare to enter a career field. Focus is placed on job search preparation including the development of cover letters, resumes, online applications, and interviewing skills. Students are also engaged with business communication by expanding their current writing skills to meet the needs of a business, exposure to common business writing situations, and developing professional presentations. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 331. Persuasive Speaking. 3 Hours H.
Guided experiences in the preparation and presentation of discourse intended to influence outcomes of human interactions in various speaker-audience situations, including television. Special emphasis on speech styles in influencing thought, attitudes, and behavior. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 335. Mass Media and Politics. 3 Hours H.
The primary goal of this course is to critically examine the role of mass media in U.S. politics. Students learn how information makes it into news coverage, as well as how media content affects individuals, political campaigns, and governing decisions. The course covers media effects theories, news bias and polarization, political entertainment, and other topics. Although the primary focus of the course is politics, students interested in public relations and strategic communication also benefit from learning about U.S. journalism. By the end of the semester, students will be able to critically evaluate political and media systems in the U.S. (Same as POLS 521.) Prerequisite: COMS 130 or COMS 150. LEC.

COMS 342. Problem-Solving in Teams and Groups. 3 Hours S.
This course introduces basic concepts important to leading and/or participating in problem-solving work teams. Problem identification and analysis and leadership are emphasized and practiced. Teamwork variables are discussed and promoted. Lecture, demonstrations, exercises in class are structure for students to analyze groups outside of class. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 356. Introduction to Behavioral Research Methods in Communication. 3 Hours GE12 / S.
An introduction to the nature of theory and theory building in the study of human communication. Research methods include experimentation, survey, content analysis, and field description. An introduction to statistics and statistical tests is included as well. Prerequisite: MATH 101 and admission to the Communication Studies major or consent of instructor. LEC.

COMS 410. Micro-Level Organizational Communication. 3 Hours AE41 / S.
An examination of dyadic level communication in organizations, with emphasis on contexts of superior-subordinate and peer communication. The course also addresses contexts of organizational entry and exit, perception and judgment, information seeking, feedback, and organizational attachment. This course also explores social identities (gender, race, social class, sexuality, ability, and age) and the way they are relevant to communication in contemporary workplaces. Prerequisite: COMS 310. LEC.

COMS 415. Communication, Leadership, and Conflict Management. 3 Hours S.
This course introduces students to theories of conflict management from a variety of academic perspectives and the role leadership plays in managing conflict across multiple contexts. Students will learn how to successfully assess and command situations and effectively resolve interpersonal, organizational, and systemic conflict while doing the work of leadership. (Same as LDST 420.) LEC.

COMS 420. Communication, Technology and Globalization. 3 Hours H.
Examines the social, cultural, and economic challenges and opportunities advanced communication technologies and globalization pose to processes such as democratic deliberation, urban governance, and environmental sustainability. Prerequisite: COMS 130. LEC.
COMS 425. Communication and the American Presidency. 3 Hours H.
Examination of the ways in which American presidents communicate with the American people and how such communication influences the public. Emphasis is on a number of approaches to better understanding presidential communication, including rhetorical, historical, and content analysis. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 435. Forms and Styles of American Public Discourse. 3 Hours H.
Changing styles of public discourse are examined from the beginning of the nation to contemporary times, and the generic forms of address that have emerged from our national dialogue, such as jeremiads, inaugurals and apologies, are studied from a formistic perspective. Prerequisite: COMS 235. LEC.

COMS 440. Communication and Gender. 3 Hours AE41 / S.
Focuses attention on the relationship between communication and gender, including both physical and psychological dimensions. Topics include: sex role orientations and stereotypes; perceived and actual differences in verbal and nonverbal communication behaviors; the influence of gender on communication in a variety of contexts. (Same as WGS 440.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 447. Intercultural Communication: The Afro-American. 3 Hours AE41 / H/W.
An examination of the barriers to effective communication between black Americans and non-black Americans. (Same as AAAS 420.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 450. Ethical Issues in Political Communication. 3 Hours AE41 / H.
Application of ethical standards to the evaluation of political communication. Examination of value questions related to advocacy in modern society (propaganda, demagoguery, credibility). Analysis of First Amendment rights and other issues pertaining to censorship and freedom of speech (defamation, dissent, incitement, public morals, privacy). Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 454. Rhetoric of Popular Culture. 3 Hours H.
A study of the social and cultural importance of popular culture. Emphasis is on using rhetorical analysis and a number of important theoretical perspectives to help examine popular culture’s often unnoticed influence. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 460. Undergraduate Seminar in: ______. 1-3 Hours S.
Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (Distribution credit given for two or three hour enrollments only.) LEC.

COMS 485. Communication and Organizational Change. 3 Hours S.
Examines communication processes that support or hinder implementation of organizational change. Topics include stakeholder analysis, individual responses to change, communicating about change, generating support for change, and managing resistance to change. LEC.

COMS 496. Capstone in: ______. 3 Hours AE61 / S.
In the capstone course students synthesize and apply knowledge and skills gained through the major. Capstone coursework requires students to integrate practices and theories learned in their areas of concentration. Topics within each concentration change as needs and resources develop. Prerequisite: Senior standing, COMS 130 or COMS 131, and completion of COMS 235 and COMS 356. LEC.

COMS 498. Honors Thesis. 2-6 Hours AE61 / H.
(Six hours maximum credit, which may be distributed through two semesters.) Study should include readings directed toward original research, i.e., an intensive investigation of a specific problem in this field. Prerequisite: Consent of the Department Honors Committee. IND.

COMS 499. Directed Study in Communication Studies. 1-3 Hours H.
(A maximum of six hours of credit may be counted, with not more than four in a single area of study.) Investigation of a special topic or project selected by the student with advice, approval, and supervision of an instructor. Such study may take the form of directed reading, or special research, individual reports and conferences. (Distribution credit given for two-three hours only.) Prerequisite: At least seven hours of credit in the department and consent of instructor. IND.

COMS 503. Post-Soviet Communication. 3 Hours H.
This course is designed to acquaint students with the shifting manner of public discourse in Post-Soviet Russia and help them to explore in some depth cross-cultural communication between America and Russia. In addition to contemporary and historical background on Russian communicative practices, students examine discourse in business development, mass media, marketing, and advertising. All readings in English. (Same as SLAV 503). LEC.

COMS 530. Internship in Communication Studies. 1-3 Hours AE61 / S.
Students do communication-centered fieldwork in an organization related to their career goals. Criteria for the organizations and work assignments suitable for internship credit are in an information brochure available at the COMS Department office and website. The internship plan is developed with field supervisor and internship faculty adviser. Reports and meetings are required. Prerequisite: Permission of instructor, admission to COMS major. FLD.

COMS 535. American Public Address, Puritans to 1900. 3 Hours H.
A history of American public address from the Puritans to about 1900. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 235. LEC.

COMS 536. American Public Address, 1900-Present. 3 Hours H.
A history of American public address from 1900 to the present. Using the tools of rhetorical criticism, students describe, analyze, and evaluate select rhetoric from the period. Graduate students are assigned extra reading and a research paper. Prerequisite: COMS 235. LEC.

COMS 537. Communication in Conflict Resolution. 3 Hours S.
An examination of conflict situations and the manner in which communication can serve as a vehicle for their intensification or resolution. The focus is on the theory of games as it applies to conflict within interpersonal situations; implications will be drawn for larger social systems. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 538. Persuasion Theory and Research. 3 Hours S.
This course focuses on the social scientific study of persuasion. Traditional theories of attitude change and persuasion research are studied along with techniques of measuring attitudes. Attention is also given to the attitude-behavior relationship and the production of compliance-gaining messages. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 539. Argumentation. 3 Hours AE51 / S.
Analysis of the theory and techniques of argumentation in historical and contemporary writings, with special emphasis on the works of Aristotle, John Stuart Mill, Richard Whately, and Stephen Toulmin. Application of argumentation theory to political and legal discourse. Opportunity
for student performances in the preparation and criticism of argument. Prerequisite: Four hours in the department. LEC.

COMS 544. Advanced Interpersonal Communication: Theories and Research. 3 Hours S.
Intensive exploration of contemporary theories and research in the field of interpersonal communication; emphasis on an array of theoretical models and research exemplars; comparative analysis of major theoretical and research paradigms. Prerequisite: COMS 244 or instructor consent. LEC.

COMS 546. Communication Across the Life-span. 3 Hours S.
Examination of the ways in which communication changes across the life-span, and influences human development. Course will include topics such as barriers to communication among elderly populations; communication and mis-communication across generations; the role of language in constructing life-span development (e.g., the mid-life crisis); development of language and social interaction during childhood; peer relationships and communication in adolescence; uses and effects of mass communication across the life-span. Prerequisite: COMS 244 and COMS 356. LEC.

COMS 547. Communication and Culture. 3 Hours S.
A study of the systematic relationship between communication and culture. Emphasis is on culture as a variable in communicative situations: cultural aspects of attitude and cognition, language interchange, cultural differences in extra-verbal behavior, interaction between oral traditions and mass media. Prerequisite: COMS 130, COMS 150, COMS 230, or an introduction course in anthropology. LEC.

COMS 548. Advanced Interviewing Skills and Strategies. 3 Hours S.
Comprehensive study of communication processes in dyadic, face-to-face situations commonly encountered in organizations and professional environments. Intensive analysis of simulated and real-life interviews. Prerequisite: COMS 130 and COMS 330. LEC.

COMS 551. The Rhetoric of Black Americans. 3 Hours H/W.
A study of the rhetoric of black Americans, from their earliest protest efforts to the contemporary scene, with focus on the methods and themes employed to alter their status in American society. (Same as AAAS 534.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 552. The Rhetoric of Women's Rights. 3 Hours AE41 / H.
An analysis of the themes and rhetorical strategies of the women's rights movement in America. The course will view the struggle for women's rights from a historical perspective and will conclude with contemporary issues concerning the role of women in society. (Same as WGS 552.) Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 555. Family Communication. 3 Hours S.
An examination of trends and theory related to the scientific study of the family, with a focus on issues related to family interaction, functioning, relationships, and communication. Research and theories from communication, sociological, and psychological perspectives are employed to examine topics such as family violence, mental health problems, marital satisfaction, divorce, courtship, and the impact of the family on its children (and vice versa). Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 557. East Asian Communication. 3 Hours S.
Explores the major communication theories and research in the East Asian cultural contexts by focusing on the Chinese, Japanese, and Korean cultures. Examines, from a broader perspective, certain cultural values (e.g., harmony, hierarchy, conservatism, and modernism) upheld in East Asian cultures and their influences on people's communicative behaviors in an age of globalization. Students explore issues of history, identity, verbal and non-verbal symbols, stereotypes, prejudice, values and thought patterning systems in the East Asian cultural context from a communicative perspective. This course is designed as a bridge course and meets with a graduate level section of the same title. Prerequisite: COMS 130. LEC.

COMS 560. Seminar in: ______. 3 Hours S.
Course organized any given semester to study particular subject matter or to take advantage of special competence by an individual faculty member. Topics change as needs and resources develop. Class discussion, readings, and individual projects. (May be repeated for credit if content varies). LEC.

COMS 590. Nonverbal Communication. 3 Hours S.
Examination of non-linguistic behavior in human communication, including proxemics (spacing), kinesics (movement and expression), and paralinguistics (voice quality). Includes phylogenetic and developmental perspectives, methods of analysis, applications to interpersonal problems. (Same as PSYC 590.) Prerequisite: COMS 356 or PSYC 210 or PSYC 211. LEC.

COMS 605. Speech Writing. 3 Hours H.
Emphasis is on actual practice in preparing speech manuscripts for oneself and others. Model speeches are examined to better understand language, evidence, and stylistic choices available to speech writers. The ethical dimensions of writing for others in corporate and political positions are stressed. Students are required to prepare a variety of speeches and analyses of others' speeches. Prerequisite: COMS 130, COMS 150, or COMS 230. LEC.

COMS 607. Political Campaigns. 3 Hours H.
This course will examine the communication involved in political campaigns. Students will be exposed to theories and ideas related to campaigns and will apply this knowledge to current political activity. Although the primary focus of the course is politics, students interested in public relations and strategic communication also benefit from learning and practicing media relations strategies. The mediated nature of modern political communication, as well as the communication strategies of campaigns and journalists, will be examined in a semester-long simulated campaign. By the end of the semester, students will become more informed users and consumers of political campaign messages. (Same as POLS 520.) Prerequisite: COMS 130 or COMS 150. LEC.

COMS 620. Communication and New Technology. 3 Hours S.
This course explores the impact of new communication technology on individuals and groups in various contexts. Topics include: The development of computer-mediated communication, social and psychological impacts of new communication technology, the evolution of telework and advances in interactive telecommunications. LEC.

COMS 639. Legal Communication. 3 Hours S.
An analysis of how communication principles and theories operate within the context of the legal system. Topics covered will include the lawyer/client interview, depositions and pre-trial discovery, settlement negotiation, jury selection, opening and closing statements, and witness testimony. Prerequisite: COMS 130 or COMS 150. LEC.

COMS 647. Issues in Intercultural Communication. 3 Hours S.
Examination of the processes and factors affecting communication in an intercultural context, and of methods of training for intercultural communication roles. Prerequisite: COMS 547 and an introductory course in anthropology, or consent of instructor. LEC.

COMS 656. Mass Media: Social Science Applications. 3 Hours S.
This course introduces students to the major theories of and prominent research in mass communication. The aim is to stimulate critical thinking about the content and effects of mass communication, develop critical consumption skills, and enhance awareness of public policy issues relating to the media. Students are required to read a variety of chapters
and articles on mass communication, promoting independent investigation into specific areas of interest. This course is a bridge course and meets with a graduate level section of the same title. Prerequisite: COMS 356. LEC.

COMS 667. Interpersonal Communication in Multinational Organizations. 3 Hours.
A study of interpersonal communication in management and professional development in intercultural situations. Focus on preparation of the global manager or professional in the organizational environment. Special attention to the problems and challenges of intercultural interactions in the context of multinational organizations. LEC.

COMS 741. Special Topics in Communication Studies: ____. 2-3 Hours.
Examination of special topics in Communication Studies. Prerequisite: Instructor consent. LEC.

COMS 787. Multidisciplinary Perspectives on Gerontology and Aging. 3 Hours.
A seminar coordinated by the Gerontology Program. The seminar explores essential areas of gerontology for researchers and practitioners, providing a multidisciplinary (biology, health services, behavioral and social sciences, human services) perspective on aging. The seminar surveys contemporary basic and applied research, service programs, and policy and management issues in gerontology. (Same as ABSC 787, AMS 787, PSYC 787, and SOC 787.) LEC.

COMS 810. Organizational Communication: Theory and Research. 3 Hours.
This course examines the theoretical and philosophical underpinnings of organizational communication research. Course topics cover variable analytic traditions and systems theory, as well as cultural, critical, and various interpretive approaches to understanding communication in organizational contexts. LEC.

COMS 835. Impression Formation and Interpersonal Behavior. 3 Hours.
Intensive investigation of the processes involved in impression formation and of the effects of established impressions upon interpersonal communication. (Same as PSYC 845.) Prerequisite: COMS 535 or PSYC 670. LEC.

COMS 844. Seminar in Interpersonal Communication. 3 Hours.
This class will address current theory and research in interpersonal communication. Issues addressed may include verbal or nonverbal communication in families, close relationships, initial interactions, and the like. LEC.

COMS 846. Communication and Aging. 3 Hours.
Examination of the interrelationship between communication and the aging process. The course will include current research and theory on such topics as intergenerational communication, language and age identity, age-stereotyping and communication, mass media and aging, age and health communication, and others of current interest in the field. LEC.

COMS 851. Communication Research: Historical and Descriptive. 3 Hours.
An introduction to types of historical and descriptive research in human communication. Library resources and methods of research will be covered. Emphasis will be placed upon preparing a research prospectus and upon writing the research report. LEC.

COMS 852. Communication Research: Behavioral and Social Science. 3 Hours.
An introduction to the process of research in communication studies, including consideration of basic principles in research design, methods of observation and measurement, and the application of appropriate statistical techniques. LEC.

COMS 855. Qualitative Research Methods in Communication Studies. 3 Hours.
Study of strategies for describing communication behavior in particular contexts, emphasizing ethnography and specific observational and interview data gathering and analysis methods. Prerequisite: COMS 755 or equivalent. LEC.

COMS 856. Communication Research: Quantitative Analysis. 3 Hours.
An intermediate overview of statistical techniques commonly used in communication research. Content will include a review of univariate statistical tests such as t-test, correlation, chi-square, and other nonparametric techniques of data analysis. Additionally, factor analysis of variance, multiple regression, and factor analysis will be covered, along with the application of appropriate statistical techniques. Prerequisite: An introductory course in statistics. LEC.

COMS 859. Proseminar in Communication Studies. 3 Hours.
An overview and integration of communication studies based upon an examination of selected basic writings in the discipline. LEC.

COMS 898. Investigation and Conference (For Master's Candidates). 1-8 Hours.
(Limited to eight hours credit toward the M.A. degree.) Directed research and experimentation for M.A. students in some phase of speech science or the teaching of speech and drama. RSH.

COMS 899. Master's Thesis. 1-6 Hours.
Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis. THE.

COMS 907. Seminar in Political Communication. 3 Hours.
This course will focus on contemporary political communication theory and illustrate how such theories are exemplified in modern political contexts: political arguments and developing consensus, communication strategies in Congressional and bureaucratic decision-making, the rhetorical presidency, the dissemination of political information, political narrative, and political campaigns. LEC.

COMS 920. Introduction to Teaching Oral Communication. 3 Hours.
This seminar prepares new graduate teaching assistants for their first teaching experience. Students will develop course materials including lectures, discussion prompts, assignments, exams based on pedagogical best practices. Students will apply theoretical concepts related to teaching, learning and assessment, and apply those theories to their own classrooms. LEC.

COMS 930. Seminar in Speech: ____. 1-4 Hours.
Special problems in speech. LEC.

COMS 932. Theories of Rhetoric: Classical. 3 Hours.
An intensive study of the rhetorical theories of classical writers from 466 B.C. to the decline of Roman oratory. Principal emphasis will be on Isocrates, Plato, Aristotle, Quintilian, Cicero, and Longinus. LEC.

COMS 933. Theories of Rhetoric: Neo-Classical. 2-3 Hours.
A study of the development of rhetorical theory from 325 A.D. to the twentieth century. Notable departures from the classical tradition will be examined. Special concentration on the writings of Augustine and the tradition of medieval preaching. Alcuin, Ramus, Bacon, Campbell,
Whately, Blair, John Quincy Adams, and the elocutionary movement. LEC.

**COMS 936. Seminar in Language and Discourse. 3 Hours.**
This seminar uses interdisciplinary readings to examine central theoretical questions regarding language and communication. The course moves from considering major theoretical positions to current research in communication on discourse. Methodological issues in the study of language and discourse are also addressed. LEC.

**COMS 938. Seminar in Persuasion. 2-3 Hours.**
Examination of selected topics in persuasion, with emphasis on the application of recent theories and experimental research to the analysis of persuasive discourse. Prerequisite: COMS 538 or equivalent. LEC.

**COMS 939. Seminar in Argumentation. 2-3 Hours.**
Examination of special problems in argumentation, with emphasis on the relationship of systems of argumentation to their philosophic presuppositions. Discussion of the writings of Toulmin, Natason, Johnstone, Perelman, Dewey. Prerequisite: COMS 539 or equivalent. LEC.

**COMS 945. Seminar in Social Support. 3 Hours.**
This course is a survey of the many disciplines of the fundamental form of communication known as social or emotional support or comforting. Emphases include message-, receiver-, and interactionally-oriented approaches, as well as support contexts, dilemmas, structures, features, and positive effects on physical and mental health. SEM.

**COMS 946. Seminar in Communication and Intergroup Relations. 3 Hours.**
Conceptual and theoretical frameworks for exploring and understanding relations between individuals from different societal groups (e.g., cultural/ethnic, gender, age). Focus on issues of identity, power relations as manifested in interpersonal, mass media, and organizational contexts. The course will include methodological and applied implications for studying different groups, both within the USA and around the world. LEC.

**COMS 948. Seminar in Organizational Communication. 2-3 Hours.**
Analysis of speech communication functions in the organizational structures of business, industry, labor, military, education, government, and professional agencies. Development of conceptual schemes for conducting research and training programs on speech systems which characterize the operation of organized groups. LEC.

**COMS 950. Seminar in Public Address. 3 Hours.**
The study of public address by historical periods or by topics. LEC.

**COMS 951. Seminar in Movement Theory and Genre Criticism. 3 Hours.**
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on social movements and rhetorical genres. It will review existing theory on these topics, develop a methodological approach to both forms of critical analysis, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor. LEC.

**COMS 952. Seminar in Mythic and Narrative Approaches to Rhetorical Criticism. 3 Hours.**
This course examines the theoretical and methodological underpinnings of approaches to rhetorical analysis focusing on narrative rhetoric, with a special emphasis on myth as a type of narrative. It will review existing theory on these topics, consider a number of alternative methodological approaches, and test each methodological approach via case studies. Prerequisite: COMS 755 or consent of instructor. LEC.

**COMS 953. Seminar in Organizational Rhetoric. 3 Hours.**
This course focuses on theoretical and methodological materials related to the use of rhetoric in an organizational setting. It will review existing theory and methodological development on this topic, paying special attention to the distinction between rhetoric used within an organization and rhetoric focused on audiences external to the organization. Multiple case-studies will be considered to illuminate the functioning of both internal and external organizational rhetoric. Prerequisite: COMS 755 or consent of instructor. LEC.

**COMS 955. Seminar in Rhetorical Criticism. 3 Hours.**
A study of contemporary and historical writings on rhetorical criticism. Emphasis is placed upon the development of critical methodology for future research and writing. Prerequisite: COMS 755. LEC.

**COMS 958. Comparative Theories of Speech Communication. 3 Hours.**
A descriptive and comparative analysis of theories of communication applicable to speech behavior. Prerequisite: COMS 859 or equivalent. LEC.

**COMS 959. Theories of Rhetoric: Contemporary. 3 Hours.**
A study of the writings on rhetorical theory in the twentieth century. Principal emphasis will be on the psychological treatment of rhetoric. I.A. Richards and Kenneth Burke, and the relationship in the twentieth century between rhetoric and dialectic, rhetoric and poetic. Prerequisite: COMS 859 or equivalent. LEC.

**COMS 997. Research in: _____. 1-6 Hours.**
Supervised research under the direction of a faculty member on a topic of mutual interest to the faculty and graduate student. RSH.

**COMS 998. Investigation and Conference (For Doctoral Candidates). 1-8 Hours.**
(Limited to eight hours credit towards the Ph.D. degree.) Directed research and experimentation for Ph.D. students in some phase of speech science or the teaching of speech and drama. RSH.

**COMS 999. Doctoral Dissertation. 1-12 Hours.**
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis. THE.

**Bachelor of Arts and Bachelor of General Studies in Communication Studies**

The Communication Studies undergraduate major equips students with a diversity of skill sets by investigating communication in various cultural contexts, including relational, organizational, intercultural, political, and more.

In an increasingly globalized world, competent communication is crucial for career advancement, interpersonal relationships, and public democratic participation. Here’s what we know: humans rely on communication, and the creation and translation of symbols, language, and messages are integral to daily interactions. In other words, communication connects us.

The major expands on fundamental public speaking principles from the introductory course through emphasizing theories, methods, performances that apply to everyday communication practices.
Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Students should meet with departmental academic advisor or faculty member to declare a Communication Studies major.

Communication Studies Required Electives

All majors must take 12 elective hours in Communication Studies

Note: For students pursuing the B.G.S. degree, it is recommended that you choose one of the following courses as part of your 12 hours of required major electives, as either of these also fulfill the Career Preparation Requirement for the B.G.S. COMS 330, COMS 342

Major Hours & Major GPA

While completing all required courses, majors also must meet each of the following hour and grade point average minimum standards:

**Major Hours**

Satisfied by 33 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Communication Studies can be found here (p. 1344), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Communication Studies can be found here (p. 1344), or by using the left-side navigation.

**Departmental Honors**

Outstanding undergraduates may earn departmental honors if they meet the following criteria:

1. A grade-point average at the time of graduation of at least 3.5 in Communication Studies courses.
2. Completion of an honors thesis involving independent research — either a single comprehensive project or an integration of several related projects. Completion requires satisfactory defense of the thesis in an oral examination and submission of a satisfactory thesis.
manuscript to the department office by one month before graduation. Independent research for the thesis must be conducted under the direction of a faculty member. The student must be enrolled with that instructor in 2 to 6 hours of COMS 498, usually over two semesters.

**BA in Communication Studies**

Below is a sample 4-year plan for students pursuing the BA in Communication Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120-123**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. The COMS 130/COMS 131 requirement can also be fulfilled by exemption (http://kucore.ku.edu/exemptions/).
3. COMS 356 is required for the major and requires admission to the major in order to be able to enroll.
4. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
5. See degree requirements (p. 1343) for list of eligible courses.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BGS in Communication Studies**

Below is a sample 4-year plan for students pursuing the BGS in Communication Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Freshman

<table>
<thead>
<tr>
<th>Fall</th>

<td>3 COMS 207 or 232 (Major Requirement)</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>COMS 130 (Goal 2.2 Oral Communication, Major Requirement)</td>
<td>3 Elective (Total Hours)</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

**Total Hours 15**
Please note:

1. The COMS 130/COMS 131 requirement can also be fulfilled by exemption.
2. Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
3. See degree requirements (p. 1343) for list of eligible courses

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Minor in Communication Studies

#### Why study communication studies?

The Communication Studies undergraduate major equips students with a diversity of skill sets by investigating communication in various cultural contexts, including relational, organizational, intercultural, political, and more.

In an increasingly globalized world, competent communication is crucial for career advancement, interpersonal relationships, and public democratic participation. Here's what we know: humans rely on communication, and the creation and translation of symbols, language, and messages are integral to daily interactions. In other words, communication connects us.

The major expands on fundamental public speaking principles from the introductory course through emphasizing theories, methods, performances that apply to everyday communication practices.

#### Requirements for the Minor

Students selecting the communication studies minor must complete 6 COMS courses (18 hours).

**Prerequisite Knowledge.** Minors must complete a public speaking requirement. These hours do not contribute to the minimum number of hours required for the minor.

**Code**  **Title**  **Hours**

<table>
<thead>
<tr>
<th>Speaker-Audience Communication</th>
</tr>
</thead>

</tr>
<tr>
<td>COMS 230 Fundamentals of Debate</td>
</tr>
<tr>
<td>Exemption</td>
</tr>
</tbody>
</table>

**Communication Studies Course Requirements.** Satisfied by 6 COMS courses (18 hours), 12 hours at the 300+ level.

### Minor Hours & GPA

While completing all required courses, majors must also meet each of the following hour and grade point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of junior/senior (300+) hours of KU resident credit in the minor.

**Minor Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Undergraduate Certificate in Professional Communication**

Good communication skills are consistently ranked in the top 5 desired skills for employers (National Association of Colleges and Employers Job Outlook Survey, 2016). And, interpersonal and team skills were identified as the second most required workplace competency employers expected in new hires. The undergraduate certificate in professional communication meets these workforce needs. This interdisciplinary certificate prepares students by fostering a better understanding of human communication in organizational settings and by coaching students in their writing skills. Gain an advantage in your job search and career by honing your professional communication skills.

**Requirements for the Undergraduate Certificate in Professional Communication**

12 credit hours, 6 of which must be completed at the Jr/Sr level.

(All courses available online)

**Master of Arts in Communication Studies**

The Communication Studies program offers a Masters of Arts at the Lawrence and Edwards campus. The degree requirements at both locations are the same. The program in Communication Studies at the University of Kansas is research intensive and primarily designed to train students for careers doing research and teaching in the field of human communication at institutions of higher education. More specifically, our graduate program expects students to focus on one of the department’s two primary areas of research, with a narrower focus on one or two of the research subareas:

- Relationships & Social Interaction, with an emphasis on digital media, interpersonal, intercultural, and organizational communication.
- Rhetoric & Political Communication, with an emphasis on argumentation, democratic inclusion, digital media, political institutions, and public memory.

Across both areas of research, our department collectively focuses on communication as it relates to gender, race, social class, national identity, and other cultural indices. Moreover, the department offers training in qualitative, quantitative, and rhetorical methods.

Almost all Communication Studies graduate students are funded through the department as either Graduate Teaching Assistants (GTA) or Graduate Research Assistants (GRA), which both include competitive stipends, tuition coverage, and health care benefits. In addition, all GTAs and GRAs are provided annual travel assistant to attend academic conferences, and the department awards approximately $25,000 a year in graduate awards for research, teaching, and service.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Eligibility criteria for admission to the M.A. program follow Graduate Studies’ admission policy (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

For all domestic or international M.A. applicants on the Lawrence or Edwards campuses, please check the application requirements through the MA COMS Admission page (https://coms.ku.edu/admissions/).

Potential students must submit a complete online graduate application (https://gradapply.ku.edu/apply/). For additional questions regarding program requirements and application processes, please contact the chair of the department, Dr. Jay Childers (https://coms.ku.edu/jay-p-childers/). Applicants may also contact the department directly:

</table>
Two primary areas of research, with a narrower focus on one or two of the subareas:

- Relationships & Social Interaction, with an emphasis on digital media, interpersonal, intercultural, and organizational communication.
- Rhetoric & Political Communication, with an emphasis on argumentation, democratic inclusion, digital media, political institutions, and public memory.

Across both areas of research, our department collectively focuses on communication as it relates to gender, race, social class, national identity, and other cultural indices. Moreover, the department offers training in qualitative, quantitative, and rhetorical methods.

Almost all Communication Studies graduate students are funded through the department as either Graduate Teaching Assistants (GTA) or Graduate Research Assistants (GRA), which both include competitive stipends, tuition coverage, and health care benefits. In addition, all GTAs and GRAs are provided annual travel assistance to attend academic conferences, and the department awards approximately $25,000 a year in graduate awards for research, teaching, and service.

Ph.D. Degree Requirements

Concentration in Communication Studies

Requirements include:

<table>
<thead>
<tr>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>A second methodology course chosen in consultation with your advisor</td>
<td>3</td>
</tr>
<tr>
<td>COMS 859 Proseminar in Communication Studies</td>
<td>3</td>
</tr>
<tr>
<td>COMS 899 Master's Thesis</td>
<td>6</td>
</tr>
<tr>
<td>Select at least 6 hours in each of 2 areas of communication</td>
<td>6</td>
</tr>
<tr>
<td>Select 3 additional credit hours from any communication studies courses or from outside the department</td>
<td>3</td>
</tr>
<tr>
<td>Final oral examination</td>
<td>6</td>
</tr>
<tr>
<td>Total Hours</td>
<td>30</td>
</tr>
</tbody>
</table>

Nonthesis Option

A nonthesis option is available in communication studies. Requirements for this option include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 859</td>
<td>Proseminar in Communication Studies</td>
<td>3</td>
</tr>
<tr>
<td>COMS 851</td>
<td>Communication Research: Historical and Descriptive</td>
<td>3</td>
</tr>
<tr>
<td>or COMS 852</td>
<td>Communication Research: Behavioral and Social Science</td>
<td></td>
</tr>
<tr>
<td>Select at least 9 hours in each of 2 areas of communication</td>
<td>9</td>
<td></td>
</tr>
<tr>
<td>Select 6 hours of electives</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>General examination structured as follows:</td>
<td>6</td>
<td></td>
</tr>
<tr>
<td>1 hour written over required courses</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2 hours written over the first major area of communication</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2 hours written over the second major area of communication</td>
<td></td>
<td></td>
</tr>
<tr>
<td>1 hour oral examination</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Each student must complete an examination over the 2 course work concentrations.

KU Edwards Campus M.A. Program

The M.A. also is offered on the KU Edwards Campus (http://edwards.ku.edu/) in Overland Park. The requirements for the degree at the Edwards Campus are the same as for the program on the Lawrence campus. Edwards Campus classes are taught by the same faculty members who teach regularly in Lawrence. Courses are scheduled during the late afternoons and evenings to accommodate working professionals.

Doctor of Philosophy in Communication Studies

The Communication Studies program offers a Doctor of Philosophy (PhD) at the Lawrence Campus. The program in Communication Studies at the University of Kansas is research intensive and primarily designed to train students for careers doing research and teaching in the field of human communication at institutions of higher education. More specifically, our graduate program expects students to focus on one of the department’s two primary areas of research, with a narrower focus on one or two of the subareas:
Research Skills & Responsible Scholarship requirement:

The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the Comprehensive Oral Exam.

- The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the Comprehensive Oral Exam.
- This requirement may be fulfilled by taking either COMS 851 Communication Research: Historical & Descriptive or COMS 852: Communication Research: Behavioral & Social Science, in addition to four graduate research methods courses as approved by the Director of Graduate Studies.

All students must enroll in dissertation hours (COMS 999) in accordance with the University policy on Doctoral Candidacy (http://policy.ku.edu/graduate-studies/doctoral-candidacy/).

Final oral examination.

### Approved Methodology Courses

The following lists identify methods courses taught in and outside of the department for the two main research areas: Relationships & Social Interaction and Rhetoric & Political Communication. The faculty of the Communication Studies Department agrees that these courses qualify as methods courses toward the course requirements for doctoral candidates.

Three caveats:

1. These lists are not comprehensive. Other courses may count as methods courses provided the student receives approval from the advisor.
2. The courses on these lists are not required. These are recommended courses for training in each methods type.
3. All methods courses should be chosen with the advisor's input.

Rhetorical methods courses include but are not limited to:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 851</td>
<td>Communication Research: Historical and Descriptive</td>
<td>3</td>
</tr>
<tr>
<td>COMS 930</td>
<td>Seminar in Speech: _____ (Postmodern Rhetorical Theories)</td>
<td>1-4</td>
</tr>
<tr>
<td>COMS 930</td>
<td>Seminar in Speech: _____ (Contemporary Theories in Public Address)</td>
<td>1-4</td>
</tr>
<tr>
<td>COMS 951</td>
<td>Seminar in Movement Theory and Genre Criticism</td>
<td>3</td>
</tr>
<tr>
<td>COMS 952</td>
<td>Seminar in Mythic and Narrative Approaches to Rhetorical Criticism</td>
<td>3</td>
</tr>
<tr>
<td>COMS 955</td>
<td>Seminar in Rhetorical Criticism</td>
<td>3</td>
</tr>
</tbody>
</table>

Please consult with your advisor and other relevant faculty members about courses that may meet the research methods requirement. Courses that may be used to meet a Methods requirement instead of Theory, because they involve systematic and explicit reflection on research methods including appropriate research questions, objects of study, and units of analysis include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 930</td>
<td>Seminar in Speech: _____ (Seminar on Burke)</td>
<td>1-4</td>
</tr>
<tr>
<td>COMS 933</td>
<td>Theories of Rhetoric: Neo-Classical</td>
<td>2-3</td>
</tr>
<tr>
<td>COMS 953</td>
<td>Seminar in Organizational Rhetoric</td>
<td>3</td>
</tr>
</tbody>
</table>

Courses outside of COMS may qualify as a rhetorical methods course subject to advisor approval.

### In Department Qualitative Methods Courses

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMS 855</td>
<td>Qualitative Research Methods in Communication Studies</td>
<td>3</td>
</tr>
</tbody>
</table>
COMS 930  Seminar in Speech: ______ (Analyzing Qualitative Data)  1-4
COMS 936  Seminar in Language and Discourse  3

It is recommended that graduate students complete COMS 855 prior to taking qualitative methods courses outside of Communication Studies.

### Qualitative Methods Graduate Courses at KU that are Not in Communication Studies:

Courses with an asterisk have been recommended by our graduate students or affiliate faculty. Please review all course selections with your advisor prior to enrolling.

<table>
<thead>
<tr>
<th>Code</th>

---

### Computational Biology Program

#### Computational Biology Graduate Program

Computational Biology is an interdisciplinary science at the interface of biology, chemistry, medicine, mathematics, and computer science. Its goal is development and application of computational approaches to studies of life processes and improvement of human health. The Computational Biology Graduate Program recruits students with bachelor’s or master’s degrees who made a choice to pursue a career in computational biology. The Ph.D. degree in Computational Biology requires successful completion of formal courses and demonstration of accomplishments in basic research, qualifying examinations, scientific writing, and formal presentations of research data.

#### Courses

**BINF 701. Computational Biology I. 5 Hours.**
First semester of a two-semester course in bioinformatics and computational biology. Topics include basic concepts of bioinformatics and molecular modeling, bioinformatics databases, computational tools and modeling methods, protein sequence and structure alignment, conformational analysis, secondary structure determination, tertiary structure modeling (homology, threading, ab initio, protein folding and dynamics), networks, data mining and machine learning, as well as student presentations of material from current papers in the field of study and their own on-going research for discussion and critique. Students will also learn responsible scholarship, including allocation of credit, treatment of data, scientific misconduct, collaborative research, and mentor/trainee responsibilities. Prerequisite: College introductory biochemistry (no requirement for specific courses), math, and computer courses or concurrent enrollment in such courses and consent of instructor. LEC.

**BINF 702. Computational Biology II. 5 Hours.**
Second semester of a two-semester course in bioinformatics and computational biology. Topics include protein quaternary structure modeling (protein-protein/DNA/small ligand docking, binding, computer-aided drug design), protein structure-function relationships, modeling of genome-wide protein interaction networks based on structure, systems biology, mathematical and computational modeling of complex systems, synthetic biology and dynamics of chemical reaction networks as well as student presentations of material from current papers in the field of study and their own on-going research for discussion and critique. Students will also learn responsible scholarship, including allocation of credit, treatment of data, scientific misconduct, collaborative research, and mentor/trainee responsibilities. Prerequisite: BINF 701. LEC.

**BINF 703. Advanced Computational Biology I. 5 Hours.**
This is the first semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 701 and BINF 702, or consent of instructor. LEC.

**BINF 704. Advanced Computational Biology II. 5 Hours.**
This is the second semester of an intensive two-semester course in Computational Biology, aimed at second-year graduate students. Topics include graph theory, systems biology, mathematical and computational modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 701 and BINF 702, or consent of instructor. LEC.
modeling of complex systems, synthetic biology and protein design. Students will gain a mastery of cutting-edge topics in Computational Biology through lectures, careful reading of current literature, and advanced individual research projects. Prerequisite: BINF 703. LEC.

**BINF 709. Topics in: _____. 1-3 Hours.**
Advanced courses on special topics in Bioinformatics, given as need arises, including lectures, discussions, readings, or laboratory. Students may select sections according to their special interests. LEC.

**BINF 999. Doctoral Dissertation. 1-12 Hours.**
Original research that is to be incorporated into a PhD dissertation. THE.

---

**Doctor of Philosophy in Computational Biology**

**Computational Biology Graduate Program**

Computational biology is an interdisciplinary science at the interface of biology, chemistry, medicine, mathematics, and computer science. Its goal is development and application of computational approaches to studies of life processes and improvement of human health. The Computational Biology Graduate Program recruits students with bachelor’s or master’s degrees who made a choice to pursue a career in computational biology. The Ph.D. degree in Computational Biology requires successful completion of formal courses and demonstration of accomplishments in basic research, qualifying examinations, scientific writing, and formal presentations of research data.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Ph.D. Admission**

**Admission Requirements**

Applicants must have a bachelor’s or master’s degree in natural sciences, mathematics, engineering, or another relevant field. Applications are accepted online (https://gradapply.ku.edu/apply/).

**Non-Degree Seeking Admission**

Students who are interested in enrolling in graduate level coursework in the Department of Computational Biology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (http://compbio.ku.edu/apply-0/) for further details.

**Ph.D. Degree Requirements**

Students must earn credit in each of the following courses or their equivalents:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BINF 701</td>
<td>Computational Biology I</td>
<td>5</td>
</tr>
<tr>
<td>BINF 702</td>
<td>Computational Biology II</td>

<td>6</td>
<td></td>
</tr>
</tbody>
</table>

By the end of the second year, the student should have completed the formal course work to fulfill requirements for the degree. The student completes and submits a research proposal for the comprehensive oral examination. The proposal must develop a research topic related to the general areas of computational biology. The topic of the research proposal is decided upon by the student in consultation with the thesis advisor. Upon completion of the comprehensive oral examination, the student aggressively carries out research in the laboratory of the thesis advisor. In addition, the student continues attending the weekly Computational Biology seminar series and participating in the Computational Biology student seminar series. A Ph.D. degree is awarded once the student has written a final dissertation and carried out a successful defense of it before a committee.

The research skills training and responsible scholarship requirements are met through BINF 701/BINF 702 coursework, as well as through collaborations in the Center for Computational Biology, student research presentations and individual mentorship.

**Department of East Asian Languages and Cultures**

**Why study East Asian languages and cultures?**

The areas of East Asia covered - China, Japan, and Korea - represent three of the oldest continuous civilizations in the world. Japan and mainland China have the world’s largest economies after the United States. South Korea and Taiwan are key U.S. trading partners. The economic and political relationships between the U.S. and East Asia will be among the most important for the U.S. in the 21st century. In-depth knowledge of East Asia is critical in the new global culture and marketplace.

**Eastern Civilizations Courses**

The Eastern Civilizations courses promote a broad understanding of the civilizations of China, Japan, and to a limited extent, Korea.

ECIV 104, ECIV 304, and ECIV 305 (Honors). Eastern Civilizations consist of readings from the major works of East Asian thought, religion, and literature. Those who are considering a major or minor in EALC are encouraged to enroll in ECIV 304 or ECIV 305 (Honors), rather than ECIV 104.

**Undergraduate Programs**

The department offers a full program of instruction in the languages, literatures, and cultures of China, Japan, and Korea.
With an EALC B.A., students can pursue a range of careers in business, government, education, nonprofit organizations, etc., or continue on to graduate study in East Asian languages and literatures. Some students choose an EALC B.A. to connect with their heritages or to fulfill personal interests.

Placement
If students have already learned Chinese, Japanese, or Korean to some degree, whether at home, in a classroom, or elsewhere, they must take a placement test before enrolling in a language class. For more information, contact the department administrator at 785-864-3100. There is no fee for a placement test. To be eligible for enrollment in intermediate Chinese, Japanese, or Korean, a student must have earned college credit for the first year or have earned 2 years of high school credit in that language or have permission from the department based on the results of the placement test.

Retroactive Credit
Students with no prior college or university Chinese, Japanese, or Korean course credit are eligible for retroactive credit according to this formula:

- Students with 2 or 3 years of high school study who enroll in second-semester Chinese, Japanese, or Korean (CHIN 108, JPN 108, KOR 108) and earn grades of C or higher may receive 2 hours of retroactive credit.
- Students with 3 or 4 years of high school study who enroll in third-semester Chinese, Japanese, or Korean (CHIN 204, JPN 204, KOR 204) and earn grades of C or higher may receive 5 hours of retroactive credit.
- Students with 4 years of high school study who enroll in fourth-semester Chinese, Japanese, or Korean (CHIN 208, JPN 208, KOR 208) and earn grades of C or higher may receive 7 hours of retroactive credit.

Courses for Non-majors
Courses available to non-language specialists are listed under East Asian Languages and Cultures Courses.

EALC also offers elementary and intermediate language courses in Tibetan (TIB 101, TIB 102, TIB 201, TIB 202) and Uyghur (UYGR 101, UYGR 102, UYGR 201, UYGR 202). Tibetan and Uyghur language studies can be used to fulfill the CLAS second language requirement necessary to complete the B.A. degree.

Graduate Program
M.A. in East Asian Languages & Cultures
The Department of East Asian Languages and Cultures (EALC) is the only department in Kansas offering a regular program of instruction in the languages, literatures, and cultures of East Asia.

The EALC M.A. program trains students who will devote themselves to becoming effective links between the Far East and the United States.

Students concentrate in Chinese, Japanese, Korean, or East Asian Cultures, usually entering the program with at least two years of college-level language. The program typically takes two years to complete, including the defense of a Master's thesis or oral defense for non-thesis students.

Graduate Non-Degree Seeking Status
Students who are interested in enrolling in graduate-level coursework in the Department of East Asian Languages and Cultures without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s webpage (https://ealc.ku.edu/nds-overview/) for further details.

Center for East Asian Studies
The Center for East Asian Studies (http://www.ceas.ku.edu/) is a National Resource Center funded by the U.S. Department of Education. CEAS promotes East Asian language and area studies; coordinates interdisciplinary activities; works with the East Asian Library; advises students in East Asian studies; awards Foreign Language and Area Studies Fellowships in Chinese, Japanese, Korean, Uyghur, and Tibetan; and arranges special events related to East Asia on campus. CEAS also offers outreach to schools, businesses, and the community and serves as a regional resource for information about East Asia.

Courses
CHIN 100. Elementary Conversational Chinese I. 3 Hours U.
Three hours of class per week plus outside use of recorded text materials. Basic spoken language instruction intended primarily for beginners planning travel or work in China and Taiwan. Introduction to basic written characters. Does not fulfill College of Liberal Arts and Sciences foreign language distribution requirements or department major and minor requirements. LEC.

CHIN 101. Elementary Conversational Chinese II. 3 Hours U.
Continuation of CHIN 100. Prerequisite: CHIN 100 or equivalent. LEC.

CHIN 102. Beginning Chinese I. 4 Hours U.
Taught mainly in the summer, this course covers about 75% of the material in CHIN 104, upon which this course is modeled. LEC.

CHIN 104. Elementary Chinese I. 5 Hours U / F1.
Three hours of lecture and three hours of spoken drill each week. An introduction to spoken and written modern standard Chinese (Mandarin). Open to students with native ability in Mandarin or Chinese dialect. Students who have any previous knowledge of Chinese must take a placement exam before enrolling in Chinese classes at K.U. Consult Department of East Asian Languages and Cultures for details. LEC.

CHIN 106. Elementary Chinese for Advanced Beginners. 3 Hours U.
This course is designed for students who have already acquired some elementary Chinese language abilities (in high school or from family), but cannot be placed in CHIN 108, Elementary Chinese II. The course focuses on perfecting listening, speaking, reading and writing skills, and prepares students for CHIN 108. For admission to the class, students must take the EALC Chinese placement exam, be interviewed by designated instructors, and approved. LEC.

CHIN 108. Elementary Chinese II. 5 Hours U / F2.
Continuation of CHIN 104. Prerequisite: CHIN 101, CHIN 104, or equivalent. LEC.

CHIN 148. Intensive Elementary Chinese. 10-12 Hours U / F1 / F2.
An accelerated one semester course in elementary Chinese, covering the material of CHIN 104 and CHIN 108. Classes meet for two hours of lecture and one hour of drill daily. Emphasis on spoken language with grammar and readings in selected texts. No prerequisite. LEC.

CHIN 177. First Year Seminar: . . . . 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Chinese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics
CHIN 498. Directed Readings in Chinese. 1-4 Hours H/W / FP.
Readings in Chinese on a subject selected by a student with the consent of the instructor. May be repeated for credit. Prerequisite: CHIN 564 or permission of instructor. IND.

CHIN 504. Advanced Modern Chinese I. 5 Hours H/W / FP.
Continuation of CHIN 504. Prerequisite: CHIN 504 or equivalent. LEC.

CHIN 508. Advanced Modern Chinese II. 5 Hours H/W / FP.
Continuation of CHIN 508. Prerequisite: CHIN 504 or equivalent. LEC.

CHIN 512. Advanced Chinese I. 2 Hours H/W / FP.
Readings in modern Chinese texts on a variety of subjects and discussion in Chinese. Prerequisite: CHIN 218 or equivalent. LEC.

CHIN 513. Advanced Chinese II. 2 Hours H/W / FP.
Continuation of CHIN 512. Prerequisite: CHIN 512 or equivalent. LEC.

CHIN 524. Introduction to Classical Chinese. 3 Hours H/W / FP.
An introduction to Classical Chinese through detailed analysis of short original passages from a variety of early Chinese texts. Students gain a foundation in the grammar and vocabulary of Classical Chinese, preparing them for CHIN 544. The course is offered at the 300 and 500 levels, with additional requirements for students taking CHIN 542. Prerequisite: A basic knowledge of Chinese characters (e.g. from CHIN 108 or JPN 108) and consent of instructor, or CHIN 208 or JPN 208. Not open to students who have completed CHIN 342. LEC.

CHIN 544. Readings in Classical Chinese: ______. 3 Hours AE42/ AE61 / H/W / FP.
Classical Chinese is the language of the most famous works of Chinese philosophy, and most Chinese literature before the twentieth century. This topics course introduces readings on a specific theme or genre, for example: Early Chinese Philosophy, Poetry, Religion, Confucian Philosophical Texts, Daoist Philosophical Texts, etc. Primary-text readings are in original Classical Chinese while secondary readings are in English. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 744. Prerequisite: CHIN 342 or CHIN 542 or consent of the instructor. May be repeated for credit if content varies. LEC.

CHIN 562. Modern Chinese Texts I. 3 Hours NW AE61 / H/W / FP.
Readings and interpretation of varied modern Chinese texts. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 762. Prerequisite: CHIN 504 or equivalent. LEC.

CHIN 564. Modern Chinese Texts II. 3 Hours H/W / FP.
A continuation of CHIN 562 with materials of increasing difficulty. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 764. Prerequisite: CHIN 562. LEC.

CHIN 580. Introduction to Chinese Research Materials. 1 Hour U / FP.
An introduction to basic reference works in Chinese and Western languages, including dictionaries, encyclopedias, concordances, and bibliographies. Library organization and research methods will also be discussed. (Five week course.) Prerequisite: CHIN 208 or equivalent. LEC.

CHIN 598. Readings in ______. 1-3 Hours H/W / FP.
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: CHIN 564 or permission of instructor. IND.

CHIN 690. Seminar in Chinese Texts. 1-3 Hours H/W / FP.
Varying topics with varying prerequisites. LEC.

Classical Chinese is the language of the most famous works of Chinese philosophy, and most Chinese literature before the twentieth century. This topics course introduces readings on a specific theme or genre, for example: Early Chinese Philosophy, Poetry, Religion, Confucian Philosophical Texts, Daoist Philosophical Texts, etc. Primary-text readings are in original Classical Chinese while secondary readings are in English. This course is offered at the 500 and 700 level with additional
assignments at the 700 level. Not open to students with credit in CHIN 544. May be repeated for credit if topic varies. Prerequisite: CHIN 342 or CHIN 542 or consent of the instructor. LEC.

CHIN 762. Modern Chinese Texts I. 3 Hours.
Readings and interpretation of varied modern Chinese texts. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in CHIN 562. Prerequisite: CHIN 504 or equivalent. LEC.

CHIN 801. Directed Readings and Research in Chinese. 1-4 Hours / FP.
Advanced language training for the study of Chinese sources in the humanities or social science field of the student. Prerequisite: Consent of instructor. RSH.

Courses

EALC 105. Asian Religions. 3 Hours HR/NW AE42/GE3H / H/W.
A basic introduction to religion in India, China, and Japan with emphasis upon religions that affect the modern period. Not open to students who have taken REL 108/EALC 108. (Same as REL 106.) LEC.

EALC 108. Asian Religions, Honors. 3 Hours HR/NW AE42/GE3H / H.
A basic introduction to religion in India, China, and Japan, with emphasis upon religions that affect the modern period. Open only to students in the University Honors Program or by permission of instructor. Not open to students who have taken REL 106/EALC 105. (Same as REL 108.) LEC.

EALC 121. Introduction to Contemporary China. 3 Hours NW AE42 / H.
An overview of contemporary Chinese culture and society since the economic reforms and opening up launched in 1978, through the study of changes in politics, the economy, society, culture and everyday life in China. The course is taught in English. No prior knowledge of Chinese language is required. LEC.

EALC 130. Myth, Legend, and Folk Beliefs in East Asia. 3 Hours NW AE42 / H.
A survey of the commonly held ideas about the beginning of the world, the role of gods and spirits in daily life, and the celebrations and rituals proper to each season of the year. The purpose of the course is to present the traditional world view of the peoples of East Asia. (Same as ANTH 293, REL 130.) LEC.

EALC 142. Ethics in Chinese Philosophy. 3 Hours AE51 / H.
How can ethical codes help us lead a better life? What principles of government will ensure an ordered and harmonious society? What responsibilities do we have to others and to the natural world? Thinkers in early China asked these questions and came to a variety of different conclusions, ranging from a goal of spontaneous harmony, to a rigid law-and-order ethic. Their ideas are still relevant today and in this course we will both survey these different ethical perspectives and also apply them to contemporary social, political, and environmental issues. LEC.

EALC 177. First Year Seminar: _____, 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in East Asian Languages and Cultures. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EALC 198. Studies in: ____. 1-5 Hours H.
Special purpose subject in East Asia and contiguous regions. LEC.

EALC 231. Introduction to: _____. 1-3 Hours NW / H/W.
Topics are various aspects of Chinese and Japanese cultures. LEC.

EALC 298. Studies in: ____. 1-5 Hours H.
Special purpose subject in East Asia and contiguous regions. LEC.

EALC 308. Music in East Asia. 3 Hours AE42.
Study of musical cultures in China, Korea, and Mongolia, with a special focus on court music, musical theater, popular music, and the influence of East Asian music on the Western art music and vice-versa. (Same as MUSC 308.) LEC.

EALC 312. Japan's Literary Legacy. 3 Hours H/W.
A survey of the major works of Japan's long literary heritage. Readings from such classics as the Tale of Genji, the world's first novel, No drama, and poetry will acquaint the student with one of the world's great literary traditions. LEC.

EALC 315. Survey of Japanese Film. 3 Hours NW AE42 / H.
This course surveys the major developments in and critical approaches to twentieth-century Japanese film. Focusing mostly on narrative films, the course introduces students to basic methodological issues in Japanese film history, especially questions of narrative, genre, stardom, and authorship. We examine Japanese cinema as an institution located within specific contexts focusing on the ways in which this institution shapes gender, race, class, ethnic and national identities. This course examines how patterns of distribution, exhibition, and reception have influenced film aesthetics and film style over the last century. Through secondary readings, lectures, and discussions students critically examine how Japanese cinema as an institution both responds to and intervenes in the social, cultural, and political history of twentieth century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 315.) LEC.

EALC 316. Modern Japanese Fiction and Film. 3 Hours AE42 / H/W.
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others are covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 716. LEC.

EALC 317. Contemporary Japanese Fiction and Film. 3 Hours HL AE42 / H/W.
A survey of major literary and cinematic works of Japan's post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. Novels by Dazai Osamu, Mishima Yukio, Oe Kenzaburo, Murakami Haruki and Yoshimoto Banana and films by Imamura Shohei, Ozu Yasujirō, Teshigahara Hiroshi and others will be covered. Course format is a combination of lecture and discussion. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 717. LEC.

EALC 318. Modern Chinese Fiction and Film. 2-3 Hours AE42 / H/W.
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 518. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. LEC.

EALC 319. Contemporary Chinese Fiction and Film. 3 Hours AE42 / H.
A general survey of important Chinese fiction and film from the late 20th century to the present. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 519.) LEC.
EALC 320. Modern East Asia: Multiple Perspectives. 3 Hours NW / H.
A survey of the major political changes in China, Japan, Korea and Tibet in the 20th century. Students will learn about the changes that swept through East Asia as it rapidly modernized via documentary films and lectures and will study the impact of these changes on individuals by reading autobiographies. LEC.

EALC 325. Minorities in Japan. 3 Hours S.
This course offers a sociological and historical exploration of Japan's minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan's minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels with additional assignments required at the 600-level. LEC.

EALC 330. China's Cultural Legacy. 3 Hours HL/NW AE42 / H/W.
An examination of Chinese literature and culture from earliest times to the modern period. Not open to students who have taken EALC 530. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. LEC.

EALC 331. Studies In: _______. 1-3 Hours H/W.
Topics in the Chinese and Japanese cultures. LEC.

EALC 332. Asian Literature in Translation: _______. 3 Hours NW / H/W.
Introduction to Asian culture and society through close reading and analysis of important works of Asian literature. Themes and issues to be focused upon will vary (e.g., traditional or modern literature of China, Japan, or Korea, and special topics of interest). Lecture and discussion format. Knowledge of Asian languages is not required. LEC.

EALC 333. Asian Literature in Translation, Honors: _______. 3 Hours NW / H/W.
An honors course that may be cross-listed with an existing EALC literature course. Students are required to do additional work. Open only to students in the University Honors Program or by permission of instructor. LEC.

EALC 340. Structure of Chinese. 3 Hours H.
A detailed study of the phonological and grammatical structure of Chinese and the interactions between language and culture. Depending on student interest, a unit on the pedagogy of teaching Chinese as a foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. Students taking the course at the 500 level will have more work required of them. LEC.

EALC 344. Manga: Histories and Theories. 3 Hours H.
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 544. (Same as HA 344.) LEC.

EALC 345. Chinese Cinema. 3 Hours H.
This course surveys representative Chinese films since the 1980s and their global reception. The most recent formalistic, industrial, and institutional developments of Chinese cinema are examined. Students view films, do secondary readings, and learn theories and methodologies of film studies. Lectures and class discussions also cover the socio-historical context of contemporary Chinese filmmaking. This course is taught at the 300 and 500-levels with additional assignments required at the 500-level. Prerequisite: Junior status, or permission of the instructor. Not open to students with credit in EALC 545. LEC.

EALC 350. Contemporary Japan. 3 Hours NW / U.
An exploration of the Japanese way of life, self-concepts, and world view through lecture, discussion, reading, and field trips to businesses, community organizations, and cultural sites. Offered only during the Summer Institute in Hiratsuka, Japan. LEC.

EALC 354. Japanese Prints. 3 Hours NW / H/W.
This course explores the history of Japanese prints with special emphasis on ukiyo-e (pictures of the floating world) woodblock prints made during the Edo Period (early 17th to 19th century). The course is organized thematically as well as chronologically and examines woodblock prints by focusing on both design and socio-political history. The course is taught at the 300 and 500-levels with additional work required at the 500-level. (Same as HA 354.) LEC.

EALC 360. Buddhist Art of Korea. 3 Hours H.
Introduction to the history of Buddhist temple buildings, paintings, sculptures and illuminated hand-scrolls in Korea from the 4th through the 19th centuries, with special emphasis on their stylistic, geographical, social, devotional and literary contexts. Current theories and controversies pertinent to the history and study of Korean Buddhist art are also addressed. Not open to students who have taken HA 561 or REL 511. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as HA 361.) Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

EALC 361. Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of Korea from the end of Choson dynasty through the Colonial period (1910-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. Not open to students with credit in EALC 561. LEC.

EALC 362. Post-Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of South Korea from the time of its liberation from Japan in 1945 to the present in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature, and film. Not open to students with credit in EALC 561 or EALC 561, or permission of the instructor. Not open to student with credit in EALC 562. LEC.

EALC 363. Gendered Modernity in East Asia. 3 Hours H.
This course explores rapidly changing gender relationships and the sense of being "modern" in East Asia by examining marriage and family systems, work, education, consumer culture, and geopolitics. The class seeks to understand how uneven state control over men and women shapes desires, practices, and norms and how men and women act upon such forces. Avoiding biological or social determinism, this course treats gender as an analytical category and examines how modern nation-states and global geopolitics are constituted and operated. (Same as ANTH 363 and WGSS 363.) LEC.

EALC 367. Art and Culture of Japan. 3 Hours NW AE42/GE3H / H/W.
The history of Japanese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological
discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Japanese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as HA 367.) LEC.

EALC 368. The Peoples of China. 3 Hours NW / S/W.
An analysis of the cultural origin, diversity, and unity of the peoples of China. Emphasis on historical development, social structure, cultural continuity and change, and ethics. (Same as ANTH 368.) LEC.

EALC 369. Art and Culture of Korea. 3 Hours NW AE42/GE3H / H/W.
The history of Korean art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions with different countries, and the roots of modernism in Korean art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as HA 369.) LEC.

EALC 372. Ceramics of Korea. 3 Hours H.
A survey covering the history of Korean ceramics from prehistoric times through the early modern period, with special emphasis on their stylistic, geographical, social and political context. Topics include celadon-glazed, stamped and slip-decorated stoneware, Korean ceramics related to the Japanese tea ceremony and Mingei pottery. Not open to students who have taken HA 562. Work requirements will be greater for students enrolled at the 500 level than at the 300 level. (Same as HA 362.) Prerequisite: A college level introduction to Asian art history, or consent of instructor. LEC.

EALC 373. Modern Korean Art and Culture. 3 Hours AE42 / H.
This course is a thematic introduction to Korean art and culture with an emphasis on modern and contemporary Korea. Pre-modern works are contextualized with respect to contemporary issues. Students learn how to conduct a comprehensive analysis of an artwork by considering the political, historical and social conditions of its time within a broader East Asian cultural framework. (Same as HA 363.) Prerequisite: An introductory course in art history at the college level, or consent of instructor. LEC.

EALC 375. Love, Sexuality and Gender in Japanese Literature. 3 Hours HL / H.
An examination of Japanese attitudes toward love, sexuality and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students who have taken EALC 575/ WGSS 576. (Same as WGSS 376.) LEC.

EALC 378. Art and Culture of China. 3 Hours NW AE42/GE3H / H/W.
The history of Chinese art interpreted from visual, historical, social, religious, and political perspectives. Representative topics: archaeological discoveries, Buddhist images and architecture, gender relationships expressed through art, interactions between different ethnic groups, and the roots of modernism in Chinese art. Art history goals: direct engagement with museum collections and enhanced ability to analyze, write about, and talk about art. (Same as HA 368.) LEC.

EALC 380. Popular Cultures of East Asia. 3 Hours NW / H.
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. Not open to students who have taken EALC 580. LEC.

EALC 385. The Art of Buddhism. 3 Hours H/W.
A survey of Buddhist visual arts (architecture, sculpture, and painting) of India, China, Japan, and Korea. Through an examination of the history of Buddhist art interpreted from visual, historical, social, and political perspectives, the course enables students to analyze a wide range of Buddhist art forms within their regional contexts. Students will also consider how Buddhist-related material functions within museums and engage with local collections. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 585. (Same as HA 385.) LEC.

EALC 388. Modern and Contemporary Visual Arts of Japan. 3 Hours H.
This course covers Japanese visual arts from the Meiji era (1868-1912) through the present day. The course is designed thematically as well as chronologically, and examines painting, sculpture and architecture focusing on both socio-political contexts and artistic concerns that emerged at certain times in recent Japanese history. The aim of this course is to provide first-hand knowledge of Japanese modern and contemporary visual arts as well as an in-depth consideration of some of the key issues attached to Japan’s modernization and modernity. The course is taught at the 300 and 500 levels with additional work required at the 500 level. Not open to students with credit in HA 588. (Same as HA 388.) LEC.

EALC 415. Ancient China. 3 Hours NW / H.
A survey of ancient Chinese culture to the Qin period. Major archaeological discoveries and the literary tradition are taken as the primary evidence through which a number of topics are introduced (for example: environment, food, writing, art, thought, ritual). A knowledge of Chinese is not required. The course is offered at the 400 and 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 725. LEC.

EALC 418. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Hours NW / H.
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. Recommended: A course in East Asian studies. Not open to students who have taken EALC 618. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. (Same as WGSS 418.) Prerequisite: One course in EALC or WGSS. LEC.

EALC 420. Daily Life in China From the Opium War to 1911. 3 Hours NW AE42 / H/W.
This course examines everyday life in China from the mid-19th century to the end of the last dynasty in 1911. The focus is on living conditions, social customs, and gender relations of people of all social levels, from emperors and empresses to servants, prostitutes, and concubines. Other topics include: the culture of drugs in the form of opium smoking, including how opium served as a key point of contact between China and the Euro-west; sexual culture, especially in the form of the history of prostitution and gender roles and values in China on the verge of modernity; interactions in daily life between Chinese and Westerners in China; and the experience of China’s last imperial rulers. These topics are weighed against the backdrop of the decline of China’s last dynasty and the concurrent impact of modernity in the form of social, political and technological change, especially as effected by the intrusion of the Euro-west. This course is offered at the 400 and 700 level with additional
assignments at the 700 level. Not open to students with credit in EALC 720. LEC.

EALC 431. Studies in: ______. 1-3 Hours H/W.
Topics in the Chinese and Japanese traditions. LEC.

EALC 498. Directed Readings in East Asian Languages and Cultures. 1-4 Hours AE61 / H/W.
Readings in English on an East Asian subject, selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: ECIV 104 or ECIV 304 and consent of instructor. IND.

EALC 499. Honors Thesis. 3 Hours AE61 / H/W.
Required of all students working for a degree with honors. May be repeated for a total of nine semester hours. IND.

EALC 509. Religion in Japan. 3 Hours NW AE42/GE3H / H/W.
Survey of religious thought and practice in Japan from the Jomon period to the present. (Same as REL 509.) LEC.

EALC 518. Modern Chinese Fiction & Film. 3 Hours AE42 / H.
A general survey of important Chinese fiction and film of the 20th century. Lectures, readings, and discussions in English. Knowledge of Chinese is not required. Not open to students with credit in EALC 318. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor. LEC.

EALC 519. Contemporary Chinese Fiction and Film. 3 Hours H.
A general survey of important Chinese fiction and film from the late 20th century to the present. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor. (Not open to students with credit in EALC 319.) LEC.

EALC 530. China’s Cultural Legacy. 3 Hours NW AE42 / H/W.
An examination of Chinese literature and culture from earliest times to the modern period. This course is taught at the 300 and 500 levels with additional assignments at the 500-level. Prerequisite: An introductory East Asian studies course such as ECIV 104 or ECIV 304 or EALC 105; or consent of instructor. Not open to students with credit in EALC 330. LEC.

EALC 541. Asian Film. 3 Hours NW AE42 / H.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic perspectives. Addresses the 12 impact of key cultural, economic, and political issues on each film industry. Class discussion, reports, and individual research papers. The course is offered at the 500 and 800 levels, with additional assignments at the 800 level. (Same as FMS 541.) Prerequisite: Junior status. LEC.

EALC 543. Contemporary Japanese Film. 3 Hours NW AE42 / H.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We survey recent industrial and stylistic trends as well as key critical debates. Class discussion, reports, and individual research papers. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as FMS 543.) Prerequisite: Junior status. LEC.

EALC 544. Manga: Histories and Theories. 3 Hours H.
Manga (Japanese comics) have long been an extremely popular and influential medium in Japan and internationally. Manga offer engaging narratives and visual imagery revealing central concerns not only of Japanese culture, history, society and politics, but also of the global cultural industry. The medium has been studied through various disciplinary lenses ranging from art history to visual culture and media studies, literature, sociology, and anthropology. Through the examination of several manga artists and works from the late 19th century to the present as well as reading a broad range of scholarship, this course explores the major issues addressed and theoretical approaches used in the interdisciplinary study of manga. The course is taught at the 300 and 500-levels with additional work required at the 500-level. Not open to students with credit in HA 344. (Same as HA 544.) Prerequisite: A college level introduction to Asian art history or Asian studies, or consent of instructor. LEC.

EALC 545. Chinese Cinema. 3 Hours H.
This course surveys representative Chinese films since the 1980s and their global reception. The most recent formalistic, industrial, and institutional developments of Chinese cinema are examined. Students view films, do secondary readings, and learn theories and methodologies of film studies. Lectures and class discussions also cover the socio-historical context of contemporary Chinese filmmaking. This course is taught at the 300 and 500-levels with additional assignments required at the 500-level. Prerequisite: Junior status, or permission of the instructor. Not open to students with credit in EALC 345. LEC.

EALC 546. Post-Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of Korea from the end of the Choson dynasty through the colonial period (1920-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature and film. Prerequisite: An introductory East Asian studies course, such as ECIV 104 or ECIV 304, or EALC 105; or consent of instructor. There are additional readings and more extensive writing assignments than in EALC 361. Not open to students with credit in EALC 361. LEC.

EALC 547. The Structure of Japanese. 3 Hours H.
A detailed study of the phonological and grammatical structure of Japanese and the use of the language in social/cultural contexts. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as LING 547.) LEC.

EALC 548. Modern Chinese Fiction & Film. 3 Hours AE42 / H.
A reading and media-rich survey of institutional, ritual, literary, educational, and exegetical practices that have shaped the lives of Buddhists in China, past and present. Alterities within the Buddhist tradition, and interactions with other religious options, are considered. (Same as REL 555.) LEC.

EALC 561. Colonial Korea. 3 Hours H.
This course examines the history, society, and culture of Korea from the end of the Choson dynasty through the colonial period (1920-1945) in its East Asian and global context. The course uses a multi-disciplinary approach, including history, anthropology, literature and film. Prerequisite: An introductory East Asian studies course, such as ECIV 104 or ECIV 304, or EALC 105; or consent of instructor. There are additional readings and more extensive writing assignments than in EALC 361. Not open to students with credit in EALC 361. LEC.

EALC 562. Cultural History of Korea. 3 Hours H.
This course examines the cultural history of Korea in periods prior to the 19th Century. Special attention is given to varying constructions of cultural value, heritage, and identity, together with the historically specific factors that engendered them. (Same as HIST 590.) LEC.

EALC 563. Cultural History of Korea. 3 Hours H.
This course examines the cultural history of Korea in periods prior to the 19th Century. Special attention is given to varying constructions of cultural value, heritage, and identity, together with the historically specific factors that engendered them. (Same as HIST 590.) LEC.
foreign language may also be included. Primarily for students who want a linguistic knowledge of the language rather than a practical command of it. (Same as LING 572.) LEC.

EALC 575. Love, Sexuality and Gender in Japanese Literature. 3 Hours HL / H.
An examination of Japanese attitudes toward love, sexuality, and gender differences as revealed in literature from the tenth century to the present. Discussion format. Not open to students with credit in EALC 375/WGSS 376. (Same as WGSS 576.) Prerequisite: One course in EALC or WGSS. LEC.

EALC 578. Gender and Society in Modern China. 3 Hours H.
This course examines gender politics and social institutions in modern China by examining important literary works and films from the Republican era (1911-1949), the Maoist era (1949-1976), and the post-Mao era (1976-present). Secondary readings are also supplied. All the readings are in English. No knowledge of Chinese is required. Prerequisite: An introductory East Asian studies course such as ECIV 104. ECIV 304, or EALC 105; or consent of the instructor. LEC.

EALC 580. Popular Cultures of East Asia. 3 Hours NW / H.
This course examines the contemporary popular cultures of Korea, Japan, China, and Taiwan, with particular emphasis on relations between East Asia and North America. Students study the issue of globalization and how the transnational flow of commodities and culture affects local societies and individual identities. They learn to identify, describe, and analyze the cross-cultural content of popular cultural artifacts and modes of expression relating to East Asia. To this end, they explore in detail such subjects as: fashion, foodways, cinema, manga, soap operas, and punk rock. More extensive writing requirements than 380. Not open to students who have taken EALC 380. LEC.

EALC 583. Imperial China. 3 Hours NW / H/W.
An intensive survey of China's traditional civilization and its history, with emphasis on the last centuries of imperial rule under the Sung, Yuan, Ming, and Ch'ing dynasties (to 1850). (Same as HIST 583.) LEC.

EALC 584. Modern China. 3 Hours NW AE42 / H/W.
An intensive survey of China's history from the early 19th century to the present. Key topics include the decline of the traditional system, the rise of communism, the Maoist era, and the tensions of change and control in the 1980s and 1990s. (Same as HIST 584.) LEC.

EALC 585. Reform in Contemporary China. 3 Hours NW AE42 / H/W.
Examines the epochal changes that have occurred in China from Deng Xiaoping's rise to power in 1978 to the present. Includes a focus on the historical background of the revolutionary period before examining the political and economic changes that spawned the 1989 "prodemocracy" movement at Tiananmen. The course includes an analysis of the events of the 1990s focusing on U.S.-China political and economic relations and the destabilizing effects of inflation, infrastructural reform, political and economic decentralization, and leadership succession. A previous course on China is helpful, but not mandatory. (Same as HIST 584.) LEC.

EALC 587. Age of Shoguns: Early Modern Japan. 3 Hours NW AE42 / H/W.
Early modern Japan (16th to 19th century) examines the history, culture, and patterns of life during an era of rigid social control but artistic brilliance. After an historical overview of the period, students will explore topics including the social structure, travel, religion, thought, and the formation of traditional cultural forms such as Kabuki theater. (Same as HIST 587.) Prerequisite: An earlier course in history or east Asian languages and cultures, or permission of the instructor. LEC.

EALC 588. Japan, 1853-1945. 3 Hours NW / H/W.
This course provides an intensive survey of Japanese history from the arrival of Commodore Perry through the Pacific War. Social, economic, and political themes will be emphasized. Among the topics covered will be the Meiji Restoration, industrialization, Japanese imperialism, Taisho democracy, and wartime mobilization. (Same as HIST 588.) LEC.

EALC 589. Japan Since 1945. 3 Hours NW / H/W.
This course provides an overview of Japanese history from the end of World War II to the present day. Among the topics covered will be the Allied Occupation, postwar politics and social change, the economic "miracle,“ popular culture, women and the family, crime and punishment, the educational system, and Japan’s place in the world. (Same as HIST 589.) LEC.

EALC 590. Topics in East Asian Languages and Cultures: ____. 1-9 Hours H/W.
Specific topical courses will be offered every year covering a number of disciplines. Credit, description, and prerequisites will vary. Note: May be repeated for credit up to the stated limit. LEC.

EALC 591. Topics in East Asian Languages and Cultures: ____. 1-9 Hours S/W.
Specific topical courses will be offered every year covering a number of disciplines. Credit, descriptions, and prerequisites will vary. Note: May be repeated for credit up to the stated limit. LEC.

EALC 610. Minorities in Japan. 3 Hours S.
This course offers a sociological and historical exploration of Japan's minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan's minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels, with additional assignments required at the 600-level. (Same as CEAS 610.) Prerequisite: An introductory East Asian Studies course or consent of the instructor. LEC.

EALC 618. Sexual Politics in Chinese Literature and Culture: Premodern Times. 3 Hours NW / H.
This course uses myth, literature, history, biography, and other documents to discuss sexual politics in China from ca 1500 B.C.E. to the end of the last dynasty in 1911. Topics include: emperors, empresses, and consorts, polygamy, prostitution, love, yin and yang cosmology, the art of the bedchamber, women's literature, and erotic literature. (Same as WGSS 618.) Prerequisite: A course in East Asian studies. Not open to students who have taken EALC 418. This course is taught at the 400 and 600 levels with additional assignments at the 600-level. LEC.

EALC 642. Chinese Thought. 3 Hours NW AE42/GE3H / H/W.
A survey of the principal modes of Chinese thought from their origins through the imperial period. Not open to students with credit in EALC 132. (Same as HUM 524 and PHIL 506.) Prerequisite: Eastern civilizations course or a course in Asian history or a distribution course in philosophy. LEC.

EALC 656. Government and Politics of East Asia. 3 Hours NW AE42 / S/W.
A comparative examination of the contemporary political institutions, processes and ideas of China, Japan, and Korea. (Same as POLS 656.) Prerequisite: Junior level or consent of the instructor. LEC.
EALC 666. Political Economy of East Asia. 3 Hours S.
This course provides basic understanding of fiscal, monetarist, and trade policies; how governments in East Asia use them to pursue growth; the extent to which these governments follow or controvert economics to pursue growth; and how the performances of economies in East Asia relate to the US and global economies. (Same as POLS 666.) Prerequisite: POLS 150. LEC.

EALC 676. International Relations of Asia. 3 Hours S/W.
An intensive study of the problems of ideological conflict, diplomatic relations, strategic arrangements, economic cooperation, and cultural exchange in East and Southeast Asia with special emphasis upon the roles of major world powers. (Same as POLS 676.) Prerequisite: Sophomore level or consent of the instructor. LEC.

EALC 678. Chinese Foreign Policy. 3 Hours S/W.
In-depth examination of China's changing policies toward other countries with special emphasis on policy-making process, negotiating behavior, military strategy, economic relations, and cultural diplomacy. (Same as GIST 678 and POLS 678.) Prerequisite: Sophomore level or consent of the instructor. LEC.

EALC 701. Practicum in Teaching Chinese. 1 Hour.
This course is required every semester for graduate teaching assistants in the Chinese language program in EALC. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Chinese classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department. SEM.

EALC 702. Practicum in Teaching Japanese. 1 Hour.
This course is required every semester for graduate teaching assistants in the Japanese language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Japanese language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department. SEM.

EALC 703. Practicum in Teaching Korean. 1 Hour.
This course is required every semester for graduate teaching assistants in the Korean language program in East Asian Languages and Cultures. The course will cover applicable second language acquisition theories and principles of foreign language pedagogy and focus on teaching methodologies, instructional techniques, and development of pedagogical materials specific to the Korean language classroom. This class will be conducted in a seminar format. Prerequisite: Teaching appointment in the East Asian Languages and Cultures department. SEM.

EALC 704. Contemporary East Asia. 3 Hours.
This graduate seminar explores rapidly changing societies in contemporary East Asia, particularly China, Japan, and Korea. The course provides a critical overview of East Asia and its diversity and complexity using cross-cultural perspectives and interdisciplinary social science approaches, and situates East Asian societies in the context of globalization. (Same as CEAS 704.) LEC.

EALC 715. Survey of Japanese Film. 3 Hours.
This course surveys the major developments in patterns of distribution, exhibition, and reception and their influence on film aesthetics in twentieth-century Japanese film. Through secondary readings, lectures, and discussions, students will examine how Japanese cinema as an institution responds to and intervenes in the social, cultural, and political history of twentieth-century Japan. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. (Same as FMS 715.) LEC.

EALC 716. Fiction and Film in Japan. 3 Hours.
A survey of major works of fiction and film in modern Japan. Topics include the social and spiritual challenges of modernization, urbanization, and the issues of race and national identity. Works by Akutagawa, Kawabata, Kurosawa, Ogai, Ozu, Soseki and Tanizaki and others will be covered. Lectures, discussion, readings, and films in English. Knowledge of Japanese language is not required. This course is offered at the 300 and the 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 316. LEC.

EALC 717. Contemporary Japanese Literature in Translation: 1945-Present. 3 Hours.
A survey of major literary works of Japan's post-war and contemporary eras. Topics include life during and after the war, the experience of the atomic bomb, and the postmodern landscape. The course is offered at the 300 and 700 levels, with additional assignments at the 700 level. An individual research project in an area of the student's special interest will be required. Not open to students who have completed EALC 317. LEC.

EALC 718. Readings in Modern Chinese Literature. 2-3 Hours.
A general survey of the important writers of the 20th century and their works. Lectures, readings, and discussions in English. A knowledge of Chinese is not required. (Not open to students with credit in EALC 318.) LEC.

EALC 720. Daily Life in China from the Opium War to 1911. 3 Hours.
This course examines everyday life in China from the mid-19th century to the end of the last dynasty in 1911. The focus is on living conditions, social customs, and gender relations of people of all social levels, from emperors and empresses to servants, prostitutes, and concubines. Other topics include: the culture of drugs in the form of opium smoking, including how opium served as a key point of contact between China and the Euro-west; sexual culture, especially in the form of the history of prostitution and gender roles and values in China on the verge of modernity; interactions in daily life between Chinese and Westerners in China; and the experience of China's last imperial rulers. These topics are weighed against the backdrop of the decline of China's last dynasty and the concurrent impact of Modernity in the form of social, political, and technological change, especially as effected by the intrusion of the Euro-west. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EALC 420. Prerequisite: An upper-level course on China or East Asia or consent of instructor. LEC.

EALC 725. Ancient China. 3 Hours.
A survey of ancient Chinese culture to the Qin period. Major archaeological discoveries and the literary tradition will be taken as the primary evidence through which a number of topics are introduced (for example: environment, food, writing, art, thought, ritual). A knowledge of Chinese is not required. The course is offered at the 400 and 700 levels, with additional assignments at the 700 level. Not open to students who have completed EALC 415. LEC.

EALC 743. Japanese Film. 3 Hours.
Seminar on the major developments in the contemporary (1980-present) Japanese film industry examining how filmmaking practices and film criticism have been influenced by such issues as transnationalism, postcolonialism, critical race theory, postmodernism, and new media. We will survey recent industrial and stylistic trends as well as key critical debates. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 700 levels, with additional assignments at the 700 level. (Same as FMS 743.) SEM.
EALC 790. Topics in East Asian Languages and Cultures: _____ 1-3 Hours.
Special topical courses covering a number of disciplines. Credit descriptions and prerequisites will vary. NOTE: May be repeated for up to 12 total credits. RSH.

EALC 801. Directed Readings. 1-5 Hours.
Designed to meet the needs of advanced students whose study in East Asian studies cannot be met with regular courses. Prerequisite: Consent of instructor. RSH.

EALC 841. Asian Film. 3 Hours.
Seminar on various national film cultures of East and Southeast Asia. Representative films are studied from formal, stylistic, and socio-historic perspectives. Addresses the impact of key cultural, economic and political issues on each film industry. Class includes discussion, reports, and individual research papers. This course is offered at the 500 and 800 levels, with additional assignments at the 800 level. (Same as FMS 841.) SEM.

EALC 888. Contemporary China Studies. 3 Hours.
This course will review and analyze the current literature on China's social and political development, including a wide range of topics within political science. There is a rich body of literature within each topic such as civil society in China, legal reform, political culture, nationalism, gender issues, ethnicity, political behavior, elections, economic development, and inequality. This course will introduce key literature within each topic focusing on the debates among China scholars as well as how these debates fit in the general field of political science. (Same as POLS 888.) Prerequisite: POLS 668 or permission of the instructor. LEC.

EALC 899. Thesis. 1-6 Hours.
An inquiry into the source material upon a specific subject. THE.

Courses

ECIV 104. Eastern Civilizations. 3 Hours HL/NW AE42 / H/W.
This course acquaints the student with the broad outlines of the traditional cultures and literatures of East Asia, and explores the interaction between these regions and cultures as well as their continuities and disparities. Course materials include translations and discussions of original sources. The course is most appropriate for students with no background in Asian culture. Does not complete major requirement. Not open to students with credit in ECIV 304. LEC.

ECIV 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Eastern Civilization. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ECIV 304. Eastern Civilizations. 3 Hours HL/NW AE42 / H/W.
This course acquaints the student with the broad outlines of the traditional cultures and literatures of East Asia, and explores the interaction between these regions and cultures as well as their continuities and disparities. Course materials include translations and discussions of original sources. The course is most appropriate for students with no background in Asian culture. Not open to students with credit in ECIV 104. If majoring in EALC and have completed ECIV 104, see major advisor about completing the ECIV 304 major requirement. LEC.

ECIV 305. Eastern Civilizations Honors. 3 Hours HL/NW AE42 / H/W.
An introductory course designed to acquaint the student with the broad outlines of the traditional cultures and literatures of East Asia. By reading translations of original source materials, the student is able to see the interaction among the various cultures as well as their essential continuity.

The course is most appropriate for students without any background in Asian culture. Similar to ECIV 304, but reading and writing assignments reflect the fact that this is an honors course. Open only to students in the University Honors Program or by permission of instructor. LEC.

Courses

HNDI 110. Beginning Hindi I. 5 Hours U / F1.
An introduction to modern standard Hindi that emphasizes acquisition of basic language skills (speaking, comprehension, reading and writing) through a combination of lecture, drill, and work with the Devanagari script. LEC.

HNDI 120. Beginning Hindi II. 5 Hours U / F2.
A continuation of Beginning Hindi I that builds on basic skills of speaking and comprehension, and the writing and reading of the Devanagari script developed in Beginning Hindi I. Prerequisite: HNDI 110 or placement exam that establishes a level of proficiency in Hindi suited to Beginning Hindi II. LEC.

HNDI 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Hungarian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

HNDI 210. Intermediate Hindi I. 3 Hours U / F3.
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 120 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi I. LEC.

HNDI 220. Intermediate Hindi II. 3 Hours U / F4.
Enhancement of speaking, comprehension, reading and writing abilities in modern standard Hindi, with emphasis on grammar. Readings will be introduced from representative genres of Hindi literature. Prerequisite: HNDI 210 or placement exam that establishes a level of proficiency in Hindi suited to Intermediate Hindi II. LEC.

HNDI 301. Topics in Hindi Culture, Language and Literature: _____ 3 Hours U.
Investigation of special topics on Hindi culture, language and literature at the undergraduate level. May be repeated for credit when topic varies. LEC.

HNDI 310. Advanced Hindi I. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 220 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi I. LEC.

HNDI 320. Advanced Hindi II. 3 Hours U / FP.
Enhancement of speaking, comprehension, reading and writing abilities in Hindi. Readings are introduced from representative genres of Hindi literature. Prerequisite: HNDI 310 or placement exam that establishes a level of proficiency in Hindi suited to Advanced Hindi II. LEC.

HNDI 593. Directed Study in Hindi Culture and Literature: _____ 1-3 Hours H.
This course is designed for students seeking proficiency in Hindi beyond HNDI 320. Instructor will direct the student through readings and materials in Hindi that will add to the students substantive knowledge of India and culture in the Hindi language. May be taken multiple semesters for credit with varying content. Prerequisite: HNDI 320, and consent of instructor. LAB.
Courses

JPN 100. Beginning Japanese I. 3 Hours U.
An introduction to Japanese. Familiarity with the basic structural patterns of the language through conversation is stressed. The hiragana and katakana syllabaries are introduced and a few characters are learned. Usually offered as part of a Summer Study Abroad Program. LEC.

JPN 101. Beginning Japanese II. 3 Hours U.
Continuation of JPN 100. Available to students who took JPN 100 as part of the Summer Study Abroad Program. Not available for credit for students who have previously completed JPN 104. Prerequisite: JPN 100 or equivalent. LEC.

JPN 104. Elementary Japanese I. 5 Hours U / F1.
Three hours of lecture, three hours of drill per week. Acquisition of basic language skills (listening, speaking, reading, writing). Not available for credit for students who have previously completed JPN 101. LEC.

JPN 108. Elementary Japanese II. 5 Hours U / F2.
Continuation of JPN 104. Prerequisite: JPN 101, JPN 104, or equivalent. LEC.

JPN 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Japanese. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

JPN 204. Intermediate Japanese I. 5 Hours U / F3.
Three hours of lecture, three hours of drill. Prerequisite: JPN 108 or equivalent. LEC.

JPN 206. Intermediate Japanese Conversation. 2-4 Hours U.
Enhancement of conversational ability at the intermediate level. Used primarily to accommodate transfer credits. Prerequisite: JPN 204 or equivalent. LEC.

Continuation of JPN 204. Prerequisite: JPN 204. LEC.

JPN 226. Japanese in Context - Intermediate. 3 Hours U.
Supervised and individualized study and practice of language skills through direct experience in interviews and guided practical applications in various public settings in Japan. Some conventional classroom instruction in grammar included. Offered only during the Summer Institute in Hiratsuka, Japan. Prerequisite: Two semesters or the equivalent of Japanese language study. LEC.

JPN 233. Special Skills in Japanese: ____. 1-4 Hours U.
Instruction in special skills in Japanese, such as recognition and writing of Chinese characters, comprehension of broadcast media, etc. at the junior/senior level. If part of a Study Abroad program, approval by the Department of East Asian Languages and Cultures is required. May be repeated for credit if content varies. IND.

JPN 386. Advanced Japanese Conversation III. 1-3 Hours U / FP.
Instruction in discussion in formal contexts and speech making. Prerequisite: JPN 504 or equivalent. LEC.

JPN 498. Directed Readings in Japanese. 1-4 Hours H/W / FP.
Readings in Japanese on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor. IND.

JPN 504. Advanced Modern Japanese I. 5 Hours H/W / FP.
Readings in selected modern Japanese texts on various topics: history, education, society, and business. Includes oral discussion and written short essays. Meets five hours per week. Prerequisite: JPN 208 or equivalent. LEC.

JPN 508. Advanced Modern Japanese II. 5 Hours H/W / FP.
Continuation of JPN 504. Prerequisite: JPN 504 or equivalent. LEC.

JPN 542. Introduction to Classical Japanese I. 3 Hours H/W / FP.
Introductory grammar and readings in classical Japanese texts. Prerequisite: JPN 508. LEC.

JPN 562. Modern Japanese Texts I. 3 Hours AE61 / H/W / FP.
Readings and interpretation of modern Japanese texts from various fields. Continued study of the language in the form of oral discussion and written reports. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 762. Prerequisite: JPN 508. LEC.

JPN 564. Modern Japanese Texts II. 3 Hours H/W / FP.
A continuation of JPN 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in JPN 764. Prerequisite: JPN 562 or equivalent. LEC.

JPN 569. Advanced Business Japanese. 3 Hours U / FP.
This course strengthens reading and writing skills and continues developing conversational ability. It assumes a higher level of competency in Japanese and includes both verbal and non-verbal aspects of Japanese business practices. Prerequisite: Completion of third-year Japanese or equivalent. LEC.

JPN 598. Readings in: ____. 1-3 Hours H/W / FP.
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: JPN 564 or permission of instructor. IND.

JPN 690. Seminar in: ____. 1-3 Hours H/W / FP.
Varying topics with varying prerequisites. LEC.

JPN 801. Directed Readings and Research in Japanese. 1-4 Hours / FP.
Advanced language training for the study of Japanese sources in the humanities or social science field of the student. Prerequisite: JPN 564 or consent of instructor. RSH.

Courses

KOR 100. Beginning Korean I. 3 Hours U.
Introduction to basic communication skills in Korean and Korean culture; Korean alphabet, survival Korean expressions, cultural etiquette and norms; speaking, listening, reading, and writing in basic Korean. Does not fulfill College of Liberal Arts and Sciences foreign language requirements or department major and minor requirements. LEC.
KOR 101. Beginning Korean II. 3 Hours U.
Continuation of KOR 100. Basic communicative skills in Korean. Speaking, listening, reading, writing, and culture are equally emphasized throughout the course. Does not fulfill College of Liberal Arts and Sciences foreign language requirements or department major and minor requirements. Prerequisite: KOR 100 or equivalent. LEC.

KOR 104. Elementary Korean I. 5 Hours U / F1.
Five hours of class and two hours of drill in the spoken language each week. Grammar and readings in selected texts. LEC.

KOR 108. Elementary Korean II. 5 Hours U / F2.
Continuation of KOR 104. Prerequisite: KOR 104. LEC.

KOR 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Korean. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

KOR 204. Intermediate Korean I. 5 Hours U / F3.
Five hours of class and two hours of spoken drill. Readings in selected texts in modern Korean. Prerequisite: KOR 108 or equivalent. LEC.

KOR 208. Intermediate Korean II. 5 Hours U / F4.
Continuation of KOR 204. Prerequisite: KOR 204. LEC.

KOR 498. Directed Readings in Korean. 1-4 Hours H/W / FP.
Readings in Korean on a subject selected by a student with the advice and direction of the instructor. Individual meetings and reports. Prerequisite: Consent of instructor. IND.

KOR 504. Advanced Modern Korean I. 5 Hours H/W / FP.
Readings and discussion of selected modern Korean texts on various topics: history, literature, society, and language. Prerequisite: KOR 208 or equivalent. LEC.

KOR 508. Advanced Modern Korean II. 5 Hours H/W / FP.
Readings and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. Prerequisite: KOR 504 or equivalent. LEC.

KOR 562. Modern Korean Texts I. 3 Hours H / FP.
Readings and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in KOR 762. Prerequisite: KOR 508 or equivalent. LEC.

KOR 564. Modern Korean Texts II. 3 Hours H / FP.
Continuation of KOR 562. Reading and analysis of modern or contemporary texts from various fields. Includes oral discussion and written essays. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in KOR 764. Prerequisite: KOR 562 or equivalent. LEC.

KOR 598. Readings in: _____ 1-3 Hours U.
Students will read selections from materials on a given topic or topics. May be repeated for credit. Prerequisite: KOR 508 or permission of instructor. IND.

Courses

MONG 101. Elementary Mongolian I. 3 Hours U.
The first semester of Elementary Mongolian is designed to give the student basic communicative competency, including pronunciation and intonation, structure, and syntax. Effective oral and written communication is stressed. LEC.

MONG 102. Elementary Mongolian II. 3 Hours U.
A continuation of Elementary Mongolian I. Prerequisite: Elementary Mongolian I or the equivalent. LEC.

MONG 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Mongolian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

Courses

TIB 101. Elementary Tibetan I. 3 Hours U / F1.
An introduction to the Tibetan language in both its literary and colloquial forms according to the Central Tibetan dialects. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

TIB 102. Elementary Tibetan II. 3 Hours U / F2.
A continuation of TIB 101. Prerequisite: TIB 101 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

TIB 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Tibetan. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

TIB 201. Intermediate Tibetan I. 3 Hours U / F3.
Continuation of TIB 102. Prerequisite: TIB 102 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

Continuation of TIB 201. Prerequisite: TIB 201 or equivalent. Four semesters of 3-credit Tibetan language courses fulfill the College of Liberal Arts and Sciences foreign language requirement. LEC.

TIB 301. Advanced Tibetan I. 1-3 Hours H.
This course focuses on developing reading fluency in classical and modern Tibetan with continued practice in the spoken language as well. Prerequisite: Tibetan 202 or permission of the instructor. LEC.

TIB 302. Advanced Tibetan II. 1-3 Hours H.
This course focuses on more advanced reading fluency in classical and modern Tibetan with continued practice in the spoken language as well. Prerequisite: TIB 301 or permission of the instructor. LEC.

Courses

UYGR 101. Elementary Uyghur I. 3 Hours U / F1.
Uyghur is an important Central Asian Turkic language spoken by nine million people in China. The first semester is designed to give the student basic communicative competency, including pronunciation and intonation, structure, and syntax. Effective oral and written communication is stressed. LEC.

UYGR 102. Elementary Uyghur II. 3 Hours U / F2.
Continuation of UYGR 101. Prerequisite: UYGR 101 or the equivalent. LEC.

UYGR 177. First Year Seminar: _____ 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Uyghur. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics
are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.
UYGR 201. Intermediate Uyghur I. 3 Hours U / F3. Continuation of UYGR 102. Prerequisite: UYGR 102 or equivalent. LEC.
UYGR 202. Intermediate Uyghur II. 3 Hours U / F4. Continuation of UYGR 201. Prerequisite: UYGR 201 or equivalent. LEC.

Bachelor of Arts in East Asian Languages and Cultures

Why study East Asian languages and cultures?

China, Japan, and Korea are three of the oldest continuous civilizations in the world, offering rich literary and philosophical traditions, vibrant contemporary cultures, and cutting-edge technological innovation. Mainland China and Japan have the world's largest economies after the United States and, along with South Korea and Taiwan, are key U.S. trading partners. The economic and political relationships between the U.S. and East Asia will be among the most important for the U.S. in the 21st century.

With an EALC B.A., students can pursue a range of careers in business, government, education, nonprofit organizations, to name a few, or continue on to graduate study in East Asian languages and cultures. Many students pair an EALC major or minor with a second major to widen their skill-set and increase their competitiveness as they enter the global marketplace. Some students choose EALC-related courses to connect with their heritage or to fulfill personal interests.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Major and Concentrations

For undergraduates in the department, the B.A. degree in East Asian languages and cultures is available in the following concentrations:

1. Chinese language and literature.
2. Japanese language and literature.
3. East Asian studies with Chinese language.
4. East Asian studies with Japanese language.
5. East Asian studies with Korean language.
6. Double language Concentration: Chinese and/or Japanese and/or Korean.

First- and Second-Year Preparation

Students considering a major in EALC should begin language training as soon as possible, starting with CHIN 104/JPN 104/KOR 104-CHIN 108/JPN 108/KOR 108 in the first year and advancing to the intermediate 204-208 level. Students are encouraged to take ECIV 104/ECIV 304/ECIV 305 as soon as possible. Students are encouraged to complete EALC 142 to fulfill the KU Core goal 5.1. Talk to the undergraduate advisor in the target language to plan a 4-year course of study. Call 785-864-3100 for information about advisors to contact.

East Asian Languages and Cultures Core Knowledge and Skill

Majors choosing this concentration must complete a course or courses in each of the following areas:

- Eastern Civilizations. Satisfied by:
  - ECIV 104 Eastern Civilizations
  - or ECIV 304 Eastern Civilizations
  - or ECIV 305 Eastern Civilizations Honors

- Advanced Language. Satisfied by:
  - CHIN 504 Advanced Modern Chinese I
  - & CHIN 508 Advanced Modern Chinese II
  - CHIN 342 Introduction to Classical Chinese
  - or CHIN 542 Introduction to Classical Chinese
  - CHIN 562 Modern Chinese Texts I
  - & one of the following:
    - CHIN 544 Readings in Classical Chinese: _____
    - or CHIN 744 Readings in Classical Chinese: _____
    - CHIN 564 Modern Chinese Texts II

East Asian Languages and Cultures Required Electives

9
Majors choosing this concentration must complete a course in each of the following areas (A course cannot be used in more than 1 area). Please consult an EALC advisor for additional courses that may fulfill the requirements:

**Satisfied by one course in Pre-modern Chinese literature or culture:**

- CHIN 544 Readings in Classical Chinese: ______

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 31 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 12 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 28 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

East Asian Languages and Cultures Prerequisite Knowledge

Elementary Korean I. Satisfied by:

KOR 104 Elementary Korean I 5

Elementary Korean II. Satisfied by:

KOR 108 Elementary Korean II 5

Language Proficiency. Satisfied by:

KOR 204 Intermediate Korean I 10
& KOR 208 Intermediate Korean II

East Asian Languages and Cultures Core Knowledge and Skills

Majors choosing this concentration must complete a course or courses in each of the following areas:

Eastern Civilizations. Satisfied by one of the following:

ECIV 104 Eastern Civilizations 3
or ECIV 304 Eastern Civilizations
or ECIV 305 Eastern Civilizations Honors

Advanced Language. Satisfied by:

KOR 504 Advanced Modern Korean I
& KOR 508 and Advanced Modern Korean II

East Asian Languages and Cultures Required Electives 18

Majors choosing this concentration must complete a course in each of the following areas (a course cannot be used in more than one area). Please consult an EALC advisor for additional courses that may fulfill the requirements:

Korea. Satisfied by two of the following:

EALC 360 Buddhist Art of Korea
or HA 361 Buddhist Art of Korea
or HA 561 Buddhist Art of Korea

EALC 361 Colonial Korea
or EALC 561 Colonial Korea

EALC 362 Post-Colonial Korea
or EALC 562 Post-Colonial Korea

East Asian Languages and Cultures Core Knowledge and Skills 8-10

Advanced Language. Satisfied by one of the following sequences:

| CHIN 504 | Advanced Modern Chinese I                 |       |
| & CHIN 508 | and Advanced Modern Chinese II            |       |
| JPN 504 | Advanced Modern Japanese I                |       |
| & JPN 508 | and Advanced Modern Japanese II           |       |
| KOR 504 | Advanced Modern Korean I                  |       |
| & KOR 508 | and Advanced Modern Korean II             |       |

Pre-Modern Culture

Choose 2 of the following 3, matching language choices (6 credits combined - must be in the same two languages as chosen to fulfill the language sequences):

China: Please choose from the list above.
Japan: Please choose from the list above.
Korea: Please choose from the following:

| EALC 563 | Cultural History of Korea                 |       |
| HA 361 | Buddhist Art of Korea                     |       |
| or HA 561 | Buddhist Art of Korea                    |       |
| HA 362 | Ceramics of Korea                         |       |
| or HA 562 | Ceramics of Korea                         |       |
| HA 369 | Art and Culture of Korea                  |       |
| REL 510 | Religion in Korea                         |       |

Modern Culture

Choose 2 of the following 3, matching language choices (6 credits combined - must be in the same two languages as chosen to fulfill the language sequences):

China: Please choose from the list above.
Japan: Please choose from the list above.
Korea: Please choose from the following:

| EALC 361 | Colonial Korea                            |       |
| EALC 362 | Post-Colonial Korea                       |       |
| HA 363 | Modern Korean Art and Culture             |       |
| HIST 350 | The Korean War, 1950-1953                 |       |

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30-32 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 30-32 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in East Asian Languages and Cultures with the following concentrations can be found here: Chinese Language & Literature (p. 1373), Japanese Language & Literature (p. 1373), East Asian Studies-Chinese Language (p. 1374), East Asian Studies-Japanese Language (p. 1375), East Asian Studies-Korean Language (p. 1376), Double Language (p. 1377), or by using the left-side navigation.

Departmental Honors
The department awards honors to undergraduates who demonstrate exceptional academic achievement. Students should make their intentions known in writing before the final undergraduate semester, preferably during the junior year. The candidate must achieve a minimum of 3.5 in the major and complete EALC 499 with a grade of B or higher. In EALC 499, the student writes an honors thesis under the supervision of a faculty member. Two faculty members evaluate the thesis.

Study Abroad
Students are encouraged to undertake a substantial study abroad experience as part of the major. Study abroad helps students dramatically increase their foreign language proficiency and affords them cultural understanding far beyond what can be conveyed in a classroom. Employers value study-abroad experience in job candidates, making KU graduates more competitive as they enter global society.

Students are encouraged to talk to an EALC study abroad advisor (https://ealc.ku.edu/study-abroad) about the many options available for study abroad in the language they are studying. Study-abroad programs vary in length from several weeks to a full year. They include language-intensive programs (some allowing one to complete a year’s worth of US-college course credit in Chinese, Japanese or Korean in eight weeks), programs that include non-language courses taught in English, and programs that offer an
internship experience. We work with students to find a program that fits their requirements and degree plan. Credit from study abroad programs can be transferred and can almost always be used to fulfill requirements for the major.

KU offers scholarships for several full-year study abroad programs to China, Japan, and South Korea, and EALC offers a three-week study abroad program in Hiraotsuka, Japan, every summer. The Office of Study Abroad (https://studyabroad.ku.edu/) offers help with the practical aspects of study abroad, as well as advice about programs and scholarships.

**BA in East Asian Languages & Cultures with concentration in Chinese Language & Literature**

Below is a sample 4-year plan for students pursuing the BA in East Asian Languages & Culture with a concentration in Chinese Language & Literature. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120-121**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120-121

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. Typically Goal 6 is fulfilled using a course required by the major. Review the list of Goal 6 courses (http://kucore.ku.edu/courses/goal6/) that may apply to the major, or choose another course. A free elective may need to be used to fulfill pre-requisites if a course within the major is not chosen.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.
The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BA in East Asian Languages & Cultures with concentration in Double Language**

Below is a sample 4-year plan for students pursuing the BA in East Asian Languages & Culture with a concentration in Double Language. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

</tbody>
</table>

**Total Hours: 15**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. One Pre-Modern Culture or Modern Culture course should be used to fulfill KU Core Goal 4.2 (Global Awareness).
4. Double Language majors must complete a two-semester sequence of Advanced Language in two languages chosen from: Japanese (JPN 504 and JPN 508), Chinese (CHIN 504 and CHIN 508), or Korean (KOR 504 and KOR 508).
5. Typically Goal 6 is fulfilled using a course required by the major. Review the list of Goal 6 courses (http://kucore.ku.edu/courses/goal6/) that may apply to the major, or choose another course. A free elective may need to be used to fulfill pre-requisites if a course within the major is not chosen.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Minor in East Asian Languages and Cultures

**Why study East Asian languages and cultures?**

China, Japan, and Korea are three of the oldest continuous civilizations in the world, offering rich literary and philosophical traditions, vibrant contemporary cultures, and cutting-edge technological innovation. Mainland China and Japan have the world’s largest economies after the United States and, along with South Korea and Taiwan, are key U.S. trading partners. The economic and political relationships between the U.S. and East Asia will be among the most important for the U.S. in the 21st century.
With an EALC B.A., students can pursue a range of careers in business, government, education, nonprofit organizations, to name a few, or continue on to graduate study in East Asian languages and cultures. Many students pair an EALC major or minor with a second major to widen their skill-set and increase their competitiveness as they enter the global marketplace. Some students choose EALC related courses to connect with their heritage or to fulfill personal interests.

**Requirements for the Minor**

Students selecting this minor must complete one of the following options:

**East Asian Languages and Cultures Minor with Advanced Language**

</table>
The Department of East Asian Languages and Cultures (EALC) is the only department in Kansas offering a regular program of instruction in the languages, literatures, and cultures of East Asia.

The EALC Thesis M.A. program trains students who will devote themselves to becoming effective links between the Far East and the United States. Students concentrate in Chinese, Japanese, or East Asian Cultures, usually entering the program with at least two years of college-level language. The program typically takes two years to complete, including the defense of a required Master’s thesis.

FLAS Fellowships

Students in the M.A. program may also be eligible for a Foreign Language and Area Studies (FLAS) (http://flas.ku.edu/) fellowship through the Center for East Asian Studies. FLAS fellowships include:

- Summer award - up to $5,000 for tuition and a stipend of $2,500 for living expenses for summer language study equivalent to one full year of language study.
- Academic Year award - up to $18,000 for tuition and a stipend of $15,000 for living expenses for academic year study that includes two semesters of language and six credits or more of East Asian culture courses.

Students in the joint J.D./M.A. or who are also admitted to other programs are strongly encouraged to apply (https://flas.ku.edu/apply/) for this funding.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission to the M.A. program

Apply to the EALC M.A. program via the Office of Graduate Studies online application system (https://gradapply.ku.edu/). For additional information regarding departmental admissions requirements, deadlines, and the application process, please visit the graduate admissions page (https://ealc.drupal.ku.edu/_prerequisites/) of the EALC Department website, or contact the EALC Department Graduate Program directly at ealc@ku.edu.

Master’s Program

The department offers a master’s degree in East Asian languages and cultures. The student declares his or her concentration in 1 of 4 options.

- Chinese language and literature
- Japanese language and literature
- Korean language and literature
- East Asian cultures
Students of Chinese, Japanese, or Korean language and literature gain in-depth knowledge of these ancient civilizations, which have produced some of the world’s greatest literature.

Students of East Asian cultures develop a broad interdisciplinary knowledge of East Asia. This concentration is for students pursuing professional or noncollege teaching careers, for students in the early stages of language training, or for students who have already acquired competence in an East Asian language.

At least 50% of coursework for the master’s degree must be taken at the 700 level or above.

Prerequisites

Entrance requirements for a concentration in either Chinese, Japanese, or Korean language and literature include

- 3 years of the modern language and, for Chinese language students, one year of classical Chinese or the demonstrated equivalent. Students not meeting this prerequisite may be admitted with deficiencies provided they achieve this level of proficiency outside the minimum of 30 graduate credit hours required for the degree.**
- 2 lecture courses dealing with East Asia.

Entrance requirements for a concentration in East Asian cultures are

- At least 2 years of an East Asian language. Students not meeting this prerequisite may be admitted with deficiencies provided they achieve this level of proficiency outside the minimum of 30 graduate credit hours required for the degree.**
- 2 lecture courses dealing with East Asia.

Requirements for Chinese, Japanese, or Korean Language and Literature Concentration

1. A minimum of 30 graduate credit hours:
   a. Fourth-year level of language.**
   b. While students may apply credit hours from study abroad toward their degree, at least 18 credit hours must be taken in residence at KU.
   c. No more than 6 hours of directed readings courses may be included in the required 30 hours.
   d. A course involving research methods, to be determined in consultation with the Thesis/Faculty Advisor and the Director of Graduate Studies.
   e. Students are expected to take at least one course at the 500 level or above in the literature of their concentration.

2. Thesis Option
   a. A thesis that will demonstrate in-depth research on a topic in the area of concentration, typically completed over 1 or 2 semesters (EALC 899, 3 to 6 credit hours). Students are expected to make significant use of primary and secondary sources in the language of concentration.

3. Non-Thesis Option
   a. Must write three substantial research papers on East Asian topics (15-20 pages).
      i. At least one of the papers must be completed by the end of the second semester in the program.

   ii. The papers will be evaluated and graded by the instructor of the class in which the paper is submitted. The grade must be A or B.
   iii. The student will submit each paper to the Director of Graduate Studies (DGS), plus an abstract (no more than 500 words) summarizing each. The student will submit the original copy with the instructor’s remarks and grade. The DGS may require revisions be made before final acceptance.

b. With the permission of the DGS, students may include relevant courses in non-East Asian areas (such as linguistics, language pedagogy, anthropology, political science, and literary theory). A paper for such a course would generally not be used to fulfill the above requirements unless it was on an East Asian topic approved beforehand by the DGS.

c. Students will meet regularly with the DGS (at least once a semester) to determine course selection, progress to degree, and designation of courses in which papers are to be submitted for the degree.

d. With approval of the DGS, students with a specific focus of study will work with a faculty member with knowledge of that field as their faculty advisor. The DGS will liaise with the advisor on all matters listed above.

e. In the final semester of study, the DGS, faculty advisor, and student will work together to assemble an oral defense committee of three graduate faculty. The student will select one of the three papers to present and defend for their exam. The committee may also ask general questions about the two other research papers that were submitted to meet the non-thesis requirements.

Requirements for East Asian Cultures Concentration

1. A minimum of 30 graduate credit hours:
   a. Third-year level of language.**
   b. While students may apply credit hours from study abroad toward their degree, at least 18 credit hours must be taken in residence at KU.
   c. A course involving research methods, to be determined in consultation with the Thesis/Faculty Advisor and the Director of Graduate Studies.
   d. Students are expected to select 1 of the East Asian cultures for their concentration and to include in their programs at least 2 courses dealing wholly with an East Asian culture outside the concentration or broadly on East Asia.
   e. Students may not take more than 6 hours of directed readings.
   f. Students may, in consultation with the department graduate director, take other credit hours in a discipline or disciplines closely related to their studies. The balance between courses in EALC and related departments must be determined with the student’s thesis advisor and the director of graduate studies. East Asian area courses are offered in anthropology, business, film and media studies, geography, history, history of art, linguistics, political science, religious studies, and sociology.
   g. Students must take 1 literature or culture course with an EALC department graduate faculty member at the 500 level or above in the country of their concentration.

2. Thesis Option
   a. A thesis that will demonstrate in-depth research on a topic in the area of concentration (China, Japan, or Korea), typically completed over 1 or 2 semesters (EALC 899, 3 to 6 credit hours).
3. Non-Thesis Option
   a. Must write three substantial research papers on East Asian topics (15-20 pages).
      i. At least one of the papers must be completed by the end of the second semester in the program.
      ii. The papers will be evaluated and graded by the instructor of the class in which the paper is submitted. The grade must be A or B.
      iii. The student will submit each paper to the Director of Graduate Studies (DGS), plus an abstract (no more than 500 words) summarizing each. The student will submit the original copy with the instructor’s remarks and grade. The DGS may require revisions be made before final acceptance.
   b. With the permission of the DGS, students may include relevant courses in non-East Asian areas (such as linguistics, language pedagogy, anthropology, political science, and literary theory). A paper for such a course would generally not be used to fulfill the above requirements unless it was on an East Asian topic approved beforehand by the DGS.
   c. Students will meet regularly with the DGS (at least once a semester) to determine course selection, progress to degree, and designation of courses in which papers are to be submitted for the degree.
   d. With approval of the DGS, students with a specific focus of study will work with a faculty member with knowledge of that field as their faculty advisor. The DGS will liaise with the advisor on all matters listed above.
   e. In the final semester of study, the DGS, faculty advisor, and student will work together to assemble an oral defense committee of three graduate faculty. The student will select one of the three papers to present and defend for their exam. The committee may also ask general questions about the two other research papers that were submitted to meet the non-thesis requirements.

**A language course result lower than ‘B’ may result in a departmental recommendation for probation status. If language coursework performance does not improve after one semester, the student may be recommended for dismissal.

Joint Degree Program in Law and East Asian Languages and Culture

Joint Degree Program in Law and East Asian Languages and Cultures

The J.D./M.A. EALC program combines the Juris Doctor program offered by the School of Law and the Master of East Asian Languages and Cultures program offered by the Department of East Asian Languages and Cultures in the College of Liberal Arts and Sciences into 4 years and one summer of full time study.

Growing interdependence with East Asia, particularly with China, provides a need for lawyers versed in culture and language. A joint degree in Law and East Asian Languages and Cultures opens many doors for its recipients. One can find opportunities in international trade and finance, immigration law, and other related fields, as well as a greater ability to work with clients from various backgrounds.

Funding

Joint J.D./M.A. students are eligible and strongly encouraged to apply for a Foreign Language and Area Studies (FLAS) (http://flas.ku.edu/) fellowship through the Center for East Asian Studies.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.
Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Joint Program**

To be admitted to the joint J.D./M.A. EALC Program, an applicant must hold an earned baccalaureate degree from an accredited college or university, complete the admission processes, meet the admission requirements for both the School of Law and the Department of East Asian Languages and Cultures, and be admitted to both programs no later than the end of the first year of study in Law or the completion of more than 16 credit hours in EALC. Full-time study is required for the joint J.D./M.A. EALC program. The Law School Admission Test (LSAT) is the only standardized test required for an applicant to the joint degree program.

For information about applying to the Law School, see the school website (http://www.law.ku.edu/admissions/). For information about applying to the EALC Department, please visit the graduate admissions page (https://ealc.drupal.ku.edu/_prerequisites/) of the EALC Department website, or contact the EALC Department Graduate Program directly at ealc@ku.edu.

**Degree Requirements**

To receive the J.D./M.A. EALC, a student must successfully complete a minimum of 106 credit hours, 81 in the School of Law and 25 in the Department of East Asian Languages and Cultures. The School of Law requires a 2.0 grade point average, while the office of Graduate Studies requires a 3.0 GPA for all courses counting toward the M.A. in EALC portion of the degree.

**J.D. Requirements**

Students must complete all required first year School of Law courses (29 credit hours) prior to enrolling in courses for the joint degree. In addition to these course requirements, the School of Law has an upper-class writing requirement, a residence requirement, and a time limit for completion of the degree.

In addition to the 44 TOTAL credit hours of coursework required of all law students, students in the joint J.D./M.A. EALC program must complete an additional 12 credit hours of coursework consisting of courses in any two of the following four areas of concentration:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAW 944</td>
<td>International Trade Law</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>LAW 879</td>
<td>Comparative Law</td>
<td>3</td>
</tr>
<tr>
<td>LAW 918</td>
<td>Islamic Law</td>
<td>3</td>
</tr>
</tbody>
</table>

Students may choose courses to complete the remaining hours necessary to reach the total of 81 hours of law school credit needed for the joint degree from any part of the Law School curriculum.

Please refer to the current School of Law Catalog for further details about the requirements for the J.D. portion of the degree.

**EALC Requirements**

Students shall consider the degree in East Asian Cultures to be interdisciplinary in nature:

1. A minimum of 22 graduate credit hours plus 1 of the 2 options listed in part 6.
2. Each student is expected to select 1 of the East Asian Cultures (Japan, China, or Korea) for concentration and to include in his or her program at least two courses dealing wholly with an East Asian culture outside of his or her concentration. Up to 2 courses can be pan-East Asian courses including the student’s country of concentration.
3. Students must complete a third year of language of the country of concentration.
4. No more than 6 hours of directed reading in a language may count toward the M.A. degree.
5. Students must take 1 literature or culture course with an EALC department graduate faculty member at the 500 level or above in the country of their concentration.
6. Students are required to fulfill 1 of the following requirements:
   a. Write a thesis (3 credit hours) which must deal with a subject within the concentration chosen by the student, or
   b. Practical thesis: Hold an internship or job in the country of concentration for a period of at least 8 weeks, at the advisor’s approval, and write a 40 page analysis of the cultural aspects of the experience (3 credits)

Students MUST consult with the EALC Director of Graduate Studies (DGS) immediately upon admission to the joint program to determine an enrollment plan and obtain a list of current approved joint courses. Joint students must also consult with the DGS during advising periods each semester.

First and second year language courses do not count toward the 25 credits required for M.A. degree completion in the J.D./M.A. program. Third year language is 6-10 credits and counts toward the degree. Third and fourth year Chinese, Japanese, and Korean language courses fulfill the requirements, as well.

**Students are strongly advised to complete the courses in the following order:**

1. Advanced Chinese Language
2. Elementary Chinese Language
3. Advanced Japanese Language
4. Elementary Japanese Language
5. Advanced Korean Language
6. Elementary Korean Language

Students are required to fulfill 1 of the following requirements:

a. Write a thesis (3 credit hours) which must deal with a subject within the concentration chosen by the student, or
b. Practical thesis: Hold an internship or job in the country of concentration for a period of at least 8 weeks, at the advisor’s approval, and write a 40 page analysis of the cultural aspects of the experience (3 credits)

**Graduate Certificate in East Asian Cultures**

Students pursuing the Graduate Certificate in East Asian Cultures will specialize in one of three areas of East Asia, and have the flexibility to study the country through the scope of other disciplines (Art History, Business, Film, History, Linguistics, Political Science, Religious Studies, Women, Gender & Sexuality Studies). Understanding the culture of China, Japan, or Korea is increasingly important in more and more fields - from environmental studies to supply chain management, from international finance to military affairs. This certificate enables students to document valuable expertise gained from the many faculty members at
KU who conduct research and teach about East Asia by choosing one of the following tracks:

- China Studies
- Japan Studies
- Korea Studies

Please contact Graduate Academic Advisor, Aley Pennington, at aleypennington@ku.edu for more information.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (p. 1382).

Applicants must submit the following materials for the East Asian Cultures Certificate:

1. A C.V. or Resume
2. A personal statement declaring your interest in East Asian Cultures and its relationship to your graduate course of study and/or career objectives.
3. 2 letters of recommendation from your graduate degree program.
4. A KU Advising report or an official transcript.

The East Asian Languages & Cultures Department offers an East Asian Cultures certificate for specialized study through three different tracks:

- China Studies
- Japan Studies
- Korea Studies

Students are required to complete 12 credits of graduate-level coursework to successfully earn an East Asian Cultures certificate in the area of concentration.

**Required Course:**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>EALC 704</td>
<td>Contemporary East Asia</td>
<td>3</td>
</tr>
</tbody>
</table>

**Elective Courses:** In consultation with the department's Director of Graduate Studies, students must choose three additional 3-credit courses from either:

- East Asian Languages and Cultures (EALC) graduate-level courses
- Approved additional Elective courses (see the EALC Graduate Student Handbook for current listing)

*One language course at 4th year level or above (500+) may fulfill one of the three elective course requirements

The following restrictions apply to the choice of electives:

- Two courses must concentrate on the country the student is studying.
- The third elective course may either concentrate on the country of study, OR on East Asia in general.

**East Asian Studies**

**About Center for East Asian Studies (CEAS)**

Founded in 1959, the Center for East Asian Studies (CEAS) at the University of Kansas is the only East Asian resource center in the Great Plains region. CEAS supports East Asian language instruction and promotes East Asian studies across the curriculum. Seventy affiliated faculty members teach in 29 departments and 10 professional schools at KU, offering over 250 courses fully or partially devoted to East Asia. Students who are interested in enrolling in graduate level coursework in CEAS without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (https://ceas.ku.edu/non-degree-seeking/) for further details.

The M.A. in Contemporary East Asian Studies is an interdisciplinary degree focused on 20th and 21st century East Asia. This program provides students with in-depth interdisciplinary knowledge of a selected East Asian country (China, Korea, or Japan); a broad knowledge of modern East Asia; and social science research skills and methods appropriate to international area studies. Two concentrations are available:

1. **Contemporary East Asia**

   A conventional M.A. program usually completed in 18 months to two years, depending on prior language training. This concentration can be used either for professional advancement or as preparation for a doctoral degree.

2. **Foreign Affairs Studies (FASt): Contemporary East Asia in a Global Context**

   An accelerated (12-month) program designed for students with second-level (intermediate) language proficiency and substantial first-hand experience in East Asia. This concentration is usually selected for professional advancement. For Foreign Area Officers, more information is available at: Graduate Military Program, Foreign Area Officer (FAO) (http://gmp.ku.edu/foa/). If you are a Foreign Area Officer interested in our program, please read Information for FAOs. (http://ceas.ku.edu/overview-0/)

**Courses**

**CEAS 200. Topics in East Asian Studies: ____. 1-3 Hours U.**

An introductory interdisciplinary topics course addressing contemporary issues related to one or more East Asian countries. Format and content will vary. Does not count toward the EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes. LEC.

**CEAS 500. Seminar in East Asian Studies: ____. 1-3 Hours U.**

An interdisciplinary seminar addressing contemporary issues related to one or more East Asian countries. Prerequisites to be determined by instructor(s) on the basis of course content. Does not count toward the
EALC major or minor requirements unless otherwise indicated by EALC in the Schedule of Classes. LEC.

CEAS 610. Minorities in Japan. 3 Hours S.
This course offers a sociological and historical exploration of Japan’s minorities: the Ainu, Okinawans, Burakumin, and Zainichi Koreans who are often excluded from narratives of Japanese history. Exclusion of the minority issue not only overlooks the existence of minority populations in Japan but also contributes to misconceptions of Japan as a homogeneous country. The course objective is to challenge the conventional master narrative of racial and cultural homogeneity. We shed light on Japan’s minorities, their historical experiences, current struggles, and future challenges. This course is taught at the 300 and 600-levels, with additional assignments required at the 600-level. (Same as EALC 610.) Prerequisite: An introductory East Asian Studies course or consent of the instructor. LEC.

CEAS 704. Contemporary East Asia. 3 Hours.
This graduate seminar explores rapidly changing societies in contemporary East Asia, particularly China, Japan, and Korea. The course provides a critical overview of East Asia and its diversity and complexity using cross-cultural perspectives and interdisciplinary social science approaches, and situates East Asian societies in the context of globalization. (Same as EALC 704.) LEC.

CEAS 710. Research Design for International Area Studies. 3 Hours.
This course addresses the challenges for students engaged in graduate research projects and theses in an interdisciplinary and international context. The course will guide the students through the structures of research design processes for various epistemological approaches, and will assist students in formulating strong research questions, reviewing and situating their own work within the literature, working with the library and subject librarians, appropriating theory, and modeling writing conventions for research within their selected epistemological community. Students will also be exposed to a variety of research methods and will practice designing projects utilizing a select number of them. During the course of the semester, students will be working toward a plan for a substantial graduate research project. (Same as GIST 710 and LAC 710.) Prerequisite: Consent of instructor. LEC.

CEAS 788. Topics in East Asian Studies: _____, 3 Hours.
An interdisciplinary graduate seminar addressing contemporary issues related to one or more East Asian countries. Course may be taken more than once if topic varies. This course may be cross-listed or meet with a 500 level seminar. Enrollment in this course will require additional assignments beyond those required of a 500 level seminar. Prerequisite: Graduate standing or consent of instructor. LEC.

CEAS 802. Research Seminar. 3 Hours.
Students will work with the instructor and, when appropriate, an additional faculty advisor to design, research and write up a research paper on an East Asian topic of their choosing. Students enrolling in this course are expected to have taken a social science research methods class prior to taking this course and to apply those methods to the research process. A core course for the MA in Contemporary East Asian Studies. Prerequisite: Permission of the instructor. SEM.

CEAS 898. Thesis and Research Project Writing. 3 Hours.
This course is primarily designed to guide MA students through the writing development of their concluding graduate research, whether a final graduate research project or a thesis. Students will learn and apply the practices of effective communication and writing of research while completing the various components of their final projects. The intention of the class is to help students complete a high quality draft of their research, though deadlines and assignment may relate to practice in graduate level research writing in general. Within an interdisciplinary framework and an understanding of rhetorical distinctions across various epistemologies, students will practice relevant modeling of academic literature reviews, transparency in communicating research practices, analyzing/interpreting texts, data, or other information, and introducing and concluding their work. (Same as GIST 898.) Prerequisite: GIST 710. THE.

Master of Arts in Contemporary East Asian Studies

The MA in Contemporary East Asian Studies is an interdisciplinary degree program focused on 20th and 21st-century East Asia that will provide students with 1) in-depth, interdisciplinary knowledge of the modern history, politics, economies, and societies of one East Asian country, e.g. China, Korea, or Japan; 2) broad knowledge of modern East Asia, and 3) social science research skills and methods appropriate to international area studies. Non-degree seeking students who have completed an undergraduate degree may apply to take graduate-level courses in CEAS.

Why consider a degree in Contemporary East Asian Studies?

East Asia has experienced rapid economic, political, and social changes that have not only strengthened and challenged intra-regional relationships but that have also led to increasingly close ties with countries outside of this world area. For strategic reasons, and owing to the close socioeconomic ties between the US and East Asia, the need for US-trained specialists on East Asia has greatly increased. Mutual interests in fields such as business, finance, technology, environment, education, and communication continue to grow and create demand for East Asia specialists both in the US and abroad.

Thus, the study of contemporary East Asia – particularly China, Japan, and Korea – is both relevant and important for American students. Various career opportunities exist for students who wish to pursue careers as East Asia specialists. M.A. degree holders in Contemporary East Asian Studies are qualified to move into jobs in fields such as international business, non-profit organizations, journalism, translation/interpreting, and government.

Our M.A. program in Contemporary East Asian Studies will help students to develop expertise on this dynamic and diverse region and would be ideal for students who want to realize their intellectual and career potential.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Admission Criteria

To be considered for admission to the M.A. program in Contemporary East Asian Studies, students must meet all University Policies and Degree Requirements for Admission (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Non-native speakers of English
must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Application Materials & Procedures

For all domestic or international M.A. applicants, please visit the CEAS MA application page (https://ceas.ku.edu/how-apply-0/).

Although May 1 is the final deadline for submitting an application for a Fall semester start, our graduate committee will complete a first round review of applications on or before May 1. To ensure that your application is included for first priority consideration, please ensure that all materials are received no later than April 1.

If you wish to learn more about the M.A. program in Contemporary East Asian Studies at The University of Kansas, please visit the CEAS M.A. Program in Contemporary East Asian Studies website (http://ceas.ku.edu/overview-1/), or contact Director of Graduate Studies, Dr. Ayako Mizumura at ceasma@ku.edu.

Master’s Program

All candidates for the M.A. degree in Contemporary East Asian Studies are required to complete 30 semester hours of graduate credit. Language requirements depend on the concentration.

In addition to completing required coursework, students in both concentrations must prepare one research paper and successfully pass an oral defense of that paper to the satisfaction of an M.A. examination committee.

At least 50% of the courses toward the master’s degree must be at the 700 level or above.

The Center for East Asian Studies offers two concentrations:

1) Contemporary East Asia (http://ceas.drupal.ku.edu/curriculum/)

2) Foreign Affairs Studies (FASt): Contemporary East Asia in Global Context (http://ceas.drupal.ku.edu/foreign-affairs-studies-fast-contemporary-east-asia-global-context/)

Degree Requirements for Contemporary East Asia Concentration

The conventional M.A. program is usually completed in 18 months to 2 years, depending on prior language training. Students selecting this concentration may or may not have previous language experience but proficiency at the second level (intermediate) is required for the degree. Students who plan to continue to move on to a Ph.D. program are strongly encouraged to pursue language at the third level. Credit earned in introductory and intermediate language courses will not count toward the required 30 hours. If such courses are taken after admission, they will add substantial time to the program. Students must fulfill the required 30 semester hours of graduate credit which include A) three (3) required courses, and B) seven (7) graduate-level elective courses.

A. Three (3) Required Courses:

• CEAS 704: Contemporary East Asia
• CEAS 710: Interdisciplinary Research Methods for Global Contexts, or a graduate level social science or history methodology course approved by the CEAS Program Advisor.
• CEAS 802: Research Seminar

B. Seven (7) Elective Courses which meet the following criteria:

• At least three (3) courses on one country (China, Korea, or Japan)
• Two (2) courses on a second country
• Four (4) of the courses must be in the social sciences
• No more than three (3) courses can be in a single discipline
• No more than two (2) courses can focus on periods prior to the 20th century
• Two (2) advanced East Asian language courses can be included
• No more than three (3) hours of directed readings can be counted

Degree Requirements for Foreign Affairs Studies (FASt) Concentration

Foreign Affairs Studies (FASt) is an accelerated, 12 month program for students with second-level (intermediate) language proficiency and substantial first-hand experience in East Asia. This concentration is usually selected for professional advancement and designated for students who intend to complete the M.A. in a twelve month period. This accelerated program requires an additional fee per semester for the first three semesters. Students must fulfill the required 30 semester hours of graduate credit which include A) four (4) required courses, and B) six (6) graduate-level elective courses:

A. Four (4) Required Courses:

• CEAS 704: Contemporary East Asia
• CEAS 710: Interdisciplinary Research Methods for Global Contexts
• GIST 701: Approaches to International Studies
• CEAS 802: Research Seminar

B. Six (6) Elective Courses which meet the following criteria:

• At least three (3) courses on one country (China, Korea, or Japan)
• Two (2) courses on a second country
• Four (4) of the courses must be in the social sciences
• No more than three (3) courses can be in a single discipline
• No more than two (2) courses can focus on periods prior to the 20th century
• Two advanced East Asian language courses can be included
• No more than three (3) hours of directed readings can be counted

If you are a Foreign Area Officer interested in our FAST program, please read information for FAOs (http://ceas.drupal.ku.edu/overview-0/).

Accelerated Master of Arts in Contemporary East Asian Studies

The Accelerated Master’s program enables qualified KU students to earn a Bachelor’s degree in GIST and count 12 hours of 500-level-or-above course work in the major completed in Year 4 of study for both the Bachelor’s and M.A. degrees. The M.A. degree is completed in the fifth year.

The M.A. may be pursued as a terminal degree or as preparation to petition for admission to doctoral studies at KU or to apply elsewhere.

Admission Criteria

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within a 5-year timeframe. All prospective students should discuss their interest in admission to the Accelerated Master’s in Contemporary East Asian Studies degree program with their
undergraduate advisor and faculty mentor no later than the first semester of the student’s Junior Year. Prospective students are eligible to apply to the graduate program in the second semester of their Junior year. The following requirements must be met by this time:

- Major and cumulative GPA of at least 3.00;
- On track to complete all requirements for a B.A. degree in Global and International Studies from KU by the end of the Senior year

**Application Process**

Applicants must complete an Application for Graduate Study (https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/)) online. The following information should be gathered in advance and uploaded with the application:

1. A two-page statement of purpose explaining your educational and academic objectives.
2. Three letters of recommendation preferably from KU faculty, each accompanied by the Graduate Letter of Recommendation Form (https://global.ku.edu/sites/global.drupal.ku.edu/files/docs/KU%20Recommendation%20for%20Graduate%20Admission%2010%2014.pdf).
3. A writing sample that demonstrates your writing skills and basic research capacity.
4. A current C.V. or resume

Upon review of the application for admission, the program will notify the student of his or her eligibility to begin coursework in the program. Final acceptance will be contingent upon the following:

- Successful completion of all requirements for the bachelor’s degree;
- A final cumulative undergraduate GPA of 3.0;
- Grades of B or above in all graduate-level coursework taken while an undergraduate

The course requirements for the Accelerated Master’s in Contemporary East Asian Studies are fulfilled by a combination of 12 hours of graduate credit courses taken while still an undergraduate degree-seeking student, which count toward both undergraduate and graduate degrees, and 18 hours of graduate credit courses taken in a final year of graduate study.

The student must be approved to begin coursework toward the Accelerated Master’s prior to enrolling in any courses that are to count for both undergraduate and graduate credit.

**Additional Language Requirement (3-5 hours/1 unit):** Students in the Accelerated CEAS MA program must complete the BA 4th semester language proficiency requirements in an East Asian Language (Chinese, Japanese, Korean, Tibetan, or Uyghur). In addition, these students are required to complete one additional language course (300 level or above) in their target East Asian Language.

**Issues in Global Studies.** (9 hours/3 units) Majors must take 3 courses from an approved list of GIST courses focusing on contemporary global themes on subjects such as human trafficking, the global environment, terrorism, transnational migration and borders, global issues in gender, citizenship, indigenous peoples, the global economic system, and globalization. Courses offered as: GIST 550 Issues in Global Studies: _______ are always approved to fulfill this requirement. Students intending to apply to the Accelerated CEAS MA program should make every effort to complete these courses in their 2nd and 3rd year.

Global & International Studies International Electives.

 Majors must take 3 courses from the list of approved international elective courses. Students in the Accelerated CEAS MA should consult with a faculty advisor to select courses that will develop their knowledge of a specific area in East Asian Studies. Students must take two of the three courses (6 credit hours) after approved to begin coursework in the Accelerated program. These two courses must be taken at the 500 level or above. They will count toward both undergraduate and graduate requirements. The following list shows many of the approved East Asia-related international electives that also fulfill the CEAS MA requirements. To see a full list of approved courses for the international electives, consult our website [http://global.ku.edu/courses-1/](http://global.ku.edu/courses-1/). Other courses may also be approved in consultation with the department.

Capstone Coursework (minimum 6 hours/2 units) The following courses must be completed after the student has been approved to begin coursework in the Accelerated program. Students must complete GIST 610 in the penultimate semester of undergraduate study, and CEAS 710 and GIST 698/GIST 699 in the final semester of undergraduate study. GIST 610 will count toward both BA and MA degree requirements. CEAS 710 will count toward MA degree requirements.

- GIST 610 Interdisciplinary Methods for Global Contexts
- CEAS 710 Research Design for International Area Studies
- GIST 698 Capstone Seminar or GIST 699 Capstone Seminar, Honors

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 11 units (minimum of 31 credit hours) of major courses.

**Major Hours in GIST**

Satisfied by a minimum of 6 GIST courses in the major.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 21 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator [http://clas.ku.edu/undergrad/tools/gpa/](http://clas.ku.edu/undergrad/tools/gpa/)

Requirements for the MA Degree

In addition to the 12 credit hours of graduate coursework taken while an undergraduate, students must complete an additional 18 credit hours of graduate coursework, for a total of 30 hours of graduate credit. At least 15 of the 30 credit hours must be taken at the 700 level or above.

Requirements include A) two (2) additional required courses, and B) four (4) additional graduate-level elective courses.

A. Two (2) Required Courses:

- CEAS 704 Contemporary East Asia
- CEAS 898 Thesis and Research Project Writing
B. Four (4) Elective Courses must meet the following criteria. These elective criteria also apply to the two (2) elective graduate courses taken during the 4th year:

- At least three (3) courses on the student’s declared country of concentration (China, Korea, or Japan)
- Four (4) of the courses must be in the social sciences
- No more than two (2) courses can focus on periods prior to the 20th century
- No more than three (3) hours of directed readings can be counted

Please go to https://ceas.ku.edu/courses to view a complete listing of graduate courses. The course list is updated every semester before you expect to enroll.

Students who plan to continue to move on to a Ph.D. program are strongly encouraged to pursue language at the third level or higher.

**M.A. Examination Requirements**

Students must prepare a research paper and successfully pass an oral defense of that paper to the satisfaction of an M.A. examination committee. For more information, please refer to the Graduate Student Handbook.

**Progression Requirements**

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Once approved to begin graduate coursework in the Junior year, the student will meet with the CEAS Academic Director of Graduate Studies and the Undergraduate Advisor for Global and International Studies to plan the final year of undergraduate study.

2. In the final semester of undergraduate study, the Director of Graduate Studies will review the student’s performance in all graduate EAS coursework. The student must earn a B or better in each of these courses to be eligible for regular graduate admission.

3. Following completion and award of the undergraduate degree, the admitted student will again meet with the Director of Graduate Studies to review the courses taken in the final year of undergraduate study and review/update the course plan for the final year of graduate study. The student’s performance in the final semester of graduate courses taken as an undergraduate will be evaluated.

4. The student will not be permitted to enroll in additional courses for graduate credit toward the CEAS MA degree until the baccalaureate degree has been conferred.

Students are expected to discuss their plans of study with the graduate advisor. The information that follows is only a guide toward that discussion, using fall admission as an example:

Department of Ecology and Evolutionary Biology

Ecology and Evolutionary Biology Graduate Programs

The department comprises a large number of biologists with a variety of research interests. 3 broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the department’s website (http://www2.ku.edu/~eeb/). Students who are interested in enrolling in EEB graduate-level coursework without admission to a graduate program are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (https://eeb.ku.edu/admission-requirements/) for further details.

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1241).)

Facilities

Departmental physical facilities include laboratories, natural history collections, and field-study sites near the university. Most laboratory facilities are in Dyche Hall, Higuchi Hall, McGregor Herbarium, Haworth Hall, and the Public Safety Building. Special facilities in Haworth include controlled-environment rooms, greenhouses, and various instrument rooms, including an excellent microscopy and analytical imaging facility (https://mai.ku.edu/).

The natural history collections are housed by the Biodiversity Institute and include approximately 8 million specimens, including mammals, birds, reptiles, amphibians, fishes, arthropods and other invertebrates, parasites, and plants, as well as fossils of vertebrates, arthropods, other invertebrates, and plants. Collections support diverse research in evolutionary biology, paleobiology, and ecology including systematics, phylogeography, biogeography, morphology, behavior, biodiversity informatics, and biotic surveys and inventories. The BI also has leading facilities for diverse analyses of biodiversity information, including well-equipped spatial analysis laboratories, and extensive facilities for molecular systematics.

The Kansas Biological Survey is a KU research and service unit and a non-regulatory state agency, whose mission it is to gather information on the kinds, distribution, and abundance of plants and animals in Kansas, and to compile, analyze, interpret, and distribute this information broadly. KBS is a nationally recognized leader in several fields of environmental research and maintains a strong tradition of natural history studies. Scientists at KBS study terrestrial ecosystem ecology, aquatic ecology, water quality, evolution, biodiversity, ecology and population biology of animals and plants, and conservation and restoration of natural communities. KBS researchers routinely use technologies such as satellite and airborne remote sensing, aerial photography, and Geographic Information Systems.

KBS administers the University of Kansas Field Station (https://biosurvey.ku.edu/field-station/), 3,700 acres of field-sites dedicated to environmental research and education, and is part of the prestigious National Ecological Observatory Network. KUFS sites are in the transition zone between the Eastern Deciduous Forest and Tallgrass Prairie biomes and include woodland, prairie, old fields, and wetlands. The Fitch Natural History Reservation and Baldwin Woods are used primarily to study unmanipulated ecological processes in undisturbed habitats. The John H. Nelson Environmental Study Area is used for experimental ecological studies and has experimental ponds, a dedicated lake and watershed, a common garden, small-mammal enclosures, and a succession facility.

Courses

BIOL 100. Principles of Biology. 3 Hours NB GE3N / N. Intended for non-science majors. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. An honors section, BIOL 101, is offered for students with superior academic records. BIOL 100 and BIOL 102 (or BIOL 101 and BIOL 103, honors) satisfy the College natural science with laboratory requirement. Concurrent enrollment in BIOL 102 is recommended. LEC.

BIOL 101. Principles of Biology, Honors. 3 Hours NB GE3N / N. Intended for non-science majors with superior academic records. The basic concepts of biology at the cellular, organismal, and population levels of organization and their applications to humans and modern society. Concurrent enrollment in BIOL 102 or BIOL 103 is recommended. BIOL 101 and either BIOL 102 or BIOL 103 satisfy the College natural science with laboratory requirement. Prerequisite: Membership in the College Honors Program or consent of instructor. LEC.

BIOL 102. Principles of Biology Laboratory. 1 Hour U / LFE. Intended for non-science majors. Exercises are designed to give the student hands-on experience with selected topics from the associated lecture course (BIOL 100). An honors laboratory (BIOL 103) is offered for students with superior academic records. Prerequisite: Concurrent enrollment in BIOL 100 is recommended. LAB.

BIOL 103. Principles of Biology Laboratory, Honors. 1 Hour U / LFE. Intended for non-science majors with superior academic records. Exercises are designed to give the students hands-on experience with selected topics from the associated lecture course (BIOL 101). Prerequisite: Membership in the College Honors Program or consent of instructor. Concurrent enrollment in BIOL 101 is recommended. LAB.

BIOL 105. Biology Orientation Seminar. 1 Hour N. Introduces interested students to information about majoring in the biological sciences at the University of Kansas. Students learn about degree requirements, academic advising, research opportunities, and career options, as well as how to align academic and professional goals. Graded on a satisfactory/unsatisfactory basis. LEC.
BIOL 116. Introduction to Evolutionary Biology. 3 Hours N / LFE.
An account of evolutionary thinking from classical to contemporary time.
The emphasis is on mainstream developments (Darwinism, Mendelism,
the Modern Synthesis, Cultural Ecology), but certain social issues will be
examined (social Darwinism, creationism). LEC.

BIOL 120. Insects in Your World. 3 Hours NB GE3N / N.
Students will learn about the global impact of insects on human concerns,
both positive (pollination and decomposition) and negative (competition
with humans for food, fiber, and shelter, and disease transmission) while
developing an appreciation for the ways in which scientists work with
real problems involving insects. The course will cover the overwhelming
abundance and diversity of insects, and their life history, ecology,
behavior, and physiology. This course is intended for both nonbiology
and biology majors. Format: two lectures and one discussion session per
week. LEC.

BIOL 150. Principles of Molecular and Cellular Biology. 3 Hours NB
GE3N / N / LFE.
A course for biology majors and students planning to take additional
courses in biology. This course covers basic biochemistry, cell structure
and function, molecular biology, genetics, physiology, and development
of plants and animals. Three hours of lecture per week. An honors
section (BIOL 151) is offered for students with superior academic records.
Prerequisite: Concurrent or prior enrollment in CHEM 190 and
CHEM 191; or consent of instructor. LEC.

BIOL 151. Principles of Molecular and Cellular Biology, Honors. 3
Hours NB GE3N / N / LFE.
A course for students with superior academic records who are biology
majors or who plan to take additional courses in biology. This course
covers basic biochemistry, cell structure and function, molecular biology,
genetics, physiology, and development of plants and animals. Three
hours of lecture per week. Prerequisite: Membership in the University
Honors Program and concurrent or prior enrollment in CHEM 190, CHEM
191, CHEM 150, or consent of instructor. LEC.

BIOL 152. Principles of Organismal Biology. 3 Hours NB GE3N / N / LFE.
A course for biology majors and students who plan to take additional
courses in biology. This course covers basic elements of plant and animal
morphology and physiology, principles of evolution, organismal diversity
and phylogeny, population biology, population genetics, ecology, and
behavior. Three hours of lecture per week. An honors section (BIOL
153) is offered for students with superior academic records. Prerequisite:
Concurrent or prior enrollment in CHEM 130; CHEM 190 and
CHEM 191; CHEM 150; or consent of instructor. LEC.

BIOL 153. Principles of Organismal Biology, Honors. 3 Hours NB
GE3N / N / LFE.
A course for students with superior academic records who are biology
majors or planning to take additional courses in biology. This course
covers basic elements of plant and animal morphology and physiology,
principles of evolution, organismal diversity and phylogeny, population
biology, population genetics, ecology, and behavior. Three hours
of lecture per week. Prerequisite: Concurrent or prior enrollment in
CHEM 130; CHEM 190 and CHEM 191; CHEM 150; or CHEM 170 and
membership in the University Honors Program; or consent of instructor.
LEC.

BIOL 154. Introductory Biology Lab for STEM Majors. 2 Hours N / LFE.
A hybrid laboratory course for majors in STEM fields. This hybrid
laboratory course will use online modules (~ 2 hours per week) to
introduce students to key core competencies (e.g., critical thinking,
quantitative reasoning, scientific communication, collaboration, etc.)
that are applicable to all STEM fields. Two hours of face-to-face laboratory
instruction will provide students hands-on opportunities to apply these
core competencies and skills to research questions in the biological
sciences. Students will apply research skills and engage in an authentic
research activity during the second half of the course and will present the
results to their peers in oral and written formats. LAB.

BIOL 155. Principle Lab in: ____. 1-3 Hours U / LFE.
This introductory laboratory exposes the students to basic principles in
biology and modern experimental techniques through an open-ended
authentic research experience directed by a faculty member. Prerequisite:
Consent of instructor. LEC.

BIOL 177. First Year Seminar: ____. 3 Hours NB GE11.
A limited-enrollment, seminar course for first-time freshmen, organized
around current issues in biology. Does not contribute to major
requirements in biology. First year seminar topics are coordinated and
approved through the Office of First Year Experiences. Prerequisite: First-
time freshman status. LEC.

BIOL 200. Basic Microbiology. 3 Hours NB GE3N / N.
Introduction to bacteria and viruses. Topics include historical development
of microbiology, bacterial structure and growth, enzymes and energy
production, disinfection, antibacterial drugs, gene transfer, viral
replication, infection and immunity, with emphasis on infectious diseases.
Can be substituted for BIOL 201 as a prerequisite for other microbiology
courses by consent of department. Not open to those with credit in BIOL
400, or BIOL 401. Prerequisite: A course in high school biology and a
course in high school chemistry. This course is not recommended for first
semester freshmen. LEC.

BIOL 203. Introductory Microbiology Laboratory. 2 Hours U / LFE.
Laboratory exercises to complement BIOL 200. Prerequisite: BIOL 200.
May be taken concurrently. LAB.

BIOL 210. Introduction to Clinical Laboratory Sciences. 1 Hour U.
An introductory overview of medical technology as a profession including
types of analyses performed, specialties, interrelationships in the health
care system and a visit to a clinical laboratory. This course will enable
those considering a major in medical technology to have a clear definition
of the profession. This course does not meet any degree requirements in
biology. No prerequisite. (Same as CLS 210.) LEC.

BIOL 225. Evolution and the History of Life. 3 Hours GE3N / N.
This introductory course for non-majors focuses on the significance of the
history of life and the fossil record for our understanding of evolution. Key
events in the history of life are considered, including the origins of life,
the eukaryotic cell, and humans, and also various mass extinctions. The
focus is on general scientific and evolutionary principles and mechanisms
that can be extracted from the study of the fossil record. It also uses the
lessons of the fossil record to consider the prospects for our own species.
LEC.

BIOL 240. Fundamentals of Human Anatomy. 3 Hours N.
Introduction to the gross anatomy of the human body. Covers the spatial
arrangement and appearance of structures throughout the body, including
visual identification of these structures. Musculoskeletal relationships, and
the anatomy of major organ systems, are emphasized. Not intended for
biology majors. Prerequisite: BIOL 100, or equivalent. LEC.

BIOL 241. Human Anatomy Observation Laboratory. 2 Hours U / LFE.
One of the two laboratories in gross anatomy designed to complement
BIOL 240. Emphasizes the three-dimensional appearance and spatial
relationships of anatomical structures through supervised observations of
pre-dissected human cadavers. Limited to students enrolled in, or seeking
admission to, programs that require a human anatomy observation
laboratory. Prerequisite: Concurrent or prior enrollment in BIOL 240 is required. LAB.

**BIOL 246. Principles of Human Physiology. 3 Hours N.**
An introduction to the physiological and biochemical processes and general physiological principles necessary to sustain life. Organ and organ system processes are emphasized. Intended for students majoring in allied health or sports related curricula who require a course in human physiology. Not intended for biology majors. Prerequisite: BIOL 100 or equivalent. LEC.

**BIOL 247. Principles of Human Physiology Laboratory. 2 Hours U / LFE.**
Designed to complement BIOL 246. Uses experiments and simulations to demonstrate laboratory techniques and representative processes in areas of human physiology. Concurrent or prior enrollment in BIOL 246 required. LAB.

**BIOL 350. Principles of Genetics. 4 Hours N.**
Why are related individuals more similar than unrelated individuals and what is the basis for heritable traits? From Mendel's discoveries of the patterns of genetic inheritance, to the study of transmissible hereditary factors, genetics is central to understanding the biological sciences. Topics include molecular genetics and genetic engineering; Mendelian genetics and mapping; control of gene expression; cytogenetics; epigenetics and non-Mendelian genetics; and population and quantitative genetics. Examples are taken from a wide variety of organisms, including viruses, bacteria, plants, fungi, insects, and humans. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher; or consent of instructor. LEC.

**BIOL 360. Principles of Genetics, Honors. 4 Hours N.**
The science of genetics aims to explain why individuals differ from one another and how these differences are inherited. Honors Genetics covers all core topics in fundamental genetics: Mendelian inheritance, meiosis and recombination, mutation, molecular genetics, population genetics, quantitative genetics and genomics. Special attention given to the practice of genetics and the complex relationship between genotype, phenotype and environment. A broader goal of Honors Genetics is to provide students a framework for understanding recent advances in medical genetics and the modern era of personal genomics. Prerequisite: CHEM 135 or CHEM 175 or CHEM 195 and CHEM 196, with a grade of C- or higher and BIOL 150 or BIOL 151 with a grade of C- or higher and BIOL 152 or BIOL 153 with a grade of C- or higher and membership in the University Honors Program; or consent of the instructor. LEC.

**BIOL 400. Fundamentals of Microbiology. 3 Hours NB GE3N / N.**
Fundamental principles of microbiology with emphasis on physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics, pathogenesis and immunity, industrially important microorganisms. Prerequisite: BIOL 150 or BIOL 151 with a grade of C- or higher and two semesters of college chemistry with a grade of C- or higher, or consent of the instructor. LEC.

**BIOL 401. Fundamentals of Microbiology, Honors. 4 Hours N.**
Honors section of BIOL 400 and BIOL 612, by application and invitation. Prerequisite: BIOL 150 or BIOL 151, two semesters of college chemistry, and membership in the University Honors Program, or consent of the instructor. LEC.

**BIOL 402. Fundamentals of Microbiology Laboratory. 2 Hours U / LFE.**
Laboratory exercises designed to complement BIOL 400 or BIOL 700. Prerequisite: BIOL 400 or BIOL 612, or BIOL 400 or BIOL 612 concurrently. LAB.

**BIOL 405. Laboratory in Genetics. 3 Hours U / LFE.**
A laboratory course that provides hands-on experience with classical genetics and modern molecular genetics. Experiments involve Mendelian genetics (dominance/recessivity, complementation, segregation, independent assortment) in eukaryotic organisms; recombinant DNA; basic bacterial genetics; polymerase chain reaction; DNA sequencing; computational genetics; and genome editing. Prerequisite: Concurrent or prior enrollment in BIOL 350. LAB.

**BIOL 412. Evolutionary Biology. 4 Hours N.**
Introduction to the patterns and processes of organic evolution. Considered are the history of evolutionary thought, molecular evolution, genetics and microevolution, selection and adaptation, and speciation and macroevolution. Emphasis will be placed on how scientists study and document change over time in natural populations, methods for testing hypotheses about events in evolutionary history, and how discovering evolutionary mechanisms at one level of organization can help to explicate general processes in the natural world. Prerequisite: BIOL 152 and BIOL 350, or consent of the instructor. LEC.

**BIOL 413. History and Diversity of Organisms. 3 Hours N / LFE.**
An integrated lecture and laboratory course presenting an overview of the variety and ancestry of life on earth. Using representatives from prokaryotes, protists, plants, fungi, and animals, principles of phylogenetic reconstruction are illustrated and evolutionary trends in the life history features, functional morphology, and structural complexity of extant and extinct organisms are presented. Two hours of lecture and three hours of laboratory per week. Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.

**BIOL 414. Principles of Ecology. 3 Hours N.**
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as EVRN 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.

**BIOL 415. Field and Laboratory Methods in Ecology. 2 Hours N.**
This course complements BIOL 414 with field trips and laboratory exercises that illustrate the basic concepts of ecology. Topics covered include methodologies for quantitative sampling of terrestrial and aquatic systems, design of field studies, computer simulation and digital data analysis techniques, and scientific writing. Prerequisite: Concurrent or prior enrollment in BIOL 414. A statistics course is recommended. FLD.

**BIOL 416. Cell Structure and Function. 3 Hours N.**
Lecture survey of molecular cell biology with emphasis on experimental approaches to understanding cell function; topics include biological membranes and transmembrane transport, vesicular trafficking (secretion and endocytosis), cell signaling, cell motility and the cytoskeleton, and the regulation of the cell division cycle. Prerequisite: BIOL 150 or BIOL 151; BIOL 350 or BIOL 360; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; or consent of the instructor. LEC.

**BIOL 417. Biology of Development. 3 Hours N.**
A general course designed to introduce students to the developmental biology of animals. Emphasis is placed on understanding how a single-celled fertilized egg develops into a complex multicellular organism by the processes of cell division, differentiation, growth, and morphogenesis. Lectures stress experimental approaches to investigating
development, including classic embryology and modern molecular genetics. Prerequisite: BIOL 350 and BIOL 416 or consent of the instructor. LEC.

BIOL 418. Laboratory in: ______. 1-3 Hours U / LFE.
A varied program of laboratory and fieldwork designed to introduce students to investigative approaches in the study of the basic concepts of biological science. Students may enroll in more than one section. Prerequisite: BIOL 100, BIOL 101, BIOL 150, BIOL 151, or exemption. Each section may have additional prerequisites to be determined by instructor. LAB.

BIOL 419. Topics in: ______. 1-3 Hours N / LFE.
Courses on special topics in biology, given as need arises. May be lectures, discussions, readings, laboratory, or fieldwork. Students may select sections according to their special needs. IND.

BIOL 420. Seminar: ______. 1-3 Hours N.
The preparation and presentation of oral reports on selected topics from the recent research literature. Students may choose one interest group each semester, but may enroll in a given interest group only once. Enrollment in each interest group limited to twenty students. Prerequisite: Course work varying with the topic of the seminar, or consent of instructor. LEC.

BIOL 421. Topics in Molecular Biosciences: ______. 3 Hours N.
Lecture instruction and the preparation and presentation of oral and written reports on selected topics from the recent research literature in molecular biosciences. Students may enroll in a given topic only once. Prerequisite: Course work varying with the topic of the seminar; or consent of instructor. LEC.

BIOL 423. Non-laboratory Independent Study. 1-3 Hours AE61 / N.
Original study in discussion or preparation of review papers on selected topics of current interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

BIOL 424. Independent Study. 1-9 Hours AE61 / N.
Original study in laboratory or field in selected topics of current research interest. May be undertaken only with the consent of the major advisor and of the faculty member who will guide the research. Prerequisite: Consent of instructor. IND.

BIOL 425. Teaching Apprenticeship in Biology. 1-9 Hours N.
Involvement as teaching assistant for a course in Biology. Credit hours shall not exceed the credits offered for the course being taught. May be undertaken only with the consent of the Director of Undergraduate Biology and of the faculty member who will teach the course. Prerequisite: Consent of instructor and Director of Undergraduate Biology. FLD.

BIOL 426. Laboratory in Cell Biology. 3 Hours U / LFE.
Laboratory exercises will examine the function, organization, and composition of eukaryotic cells. Prerequisite: BIOL 150 or BIOL 151; CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; concurrent or prior enrollment in BIOL 416 or BIOL 536; or consent of the instructor. BIOL 350 or BIOL 360 is highly recommended. LAB.

BIOL 428. Introduction to Systematics. 3 Hours N.
Basic elements of systematic theory and practice; phylogenetic reconstruction using morphological and molecular data; interpretation of phylogenetic hypotheses; principles of nomenclature and classification; evolutionary processes and patterns of species diversity; discussion of the aims and needs of taxonomy; species and speciation; construction of keys; significance of biological collections. Prerequisite: BIOL 152 or BIOL 153. Not intended for students with advanced systematics background. LEC.

BIOL 430. Laboratory in Molecular Biology. 3 Hours U / LFE.
Practical experience in recombinant DNA technology and molecular cloning. Prerequisite: BIOL 416 or a course in biochemistry or microbiology. LAB.

BIOL 435. Introduction to Neurobiology. 3 Hours N.
Basic principles of neurobiology. The focus will be on the nature of communication among nerve cells and their targets. Topics will include the development, structure and function of nerve cells, chemistry of neurotransmission, processing and integration including the cellular and molecular basis of higher functions and neurological disorders. Prerequisite: BIOL 350 and BIOL 416 or consent of the instructor. LEC.

BIOL 440. Advanced Human Anatomy. 6 Hours N / LFE.
Integrated lecture and laboratory course designed to provide students with a detailed understanding of the structure of the human body. Cadaver dissection will reinforce three-dimensional relationships discussed in lectures and each of the main organ systems will be considered using a regional approach to the body. Prerequisite: BIOL 152 or equivalent; BIOL 240 and BIOL 241, or BIOL 240 and BIOL 442 or BIOL 242; and consent of the instructor. LEC.

BIOL 442. Human Anatomy Dissection Laboratory. 3 Hours U.
Laboratory in gross anatomy designed to build on content from BIOL 240 and BIOL 241. Provides an opportunity to develop a comprehensive three-dimensional understanding of anatomical structures and spatial relationships while gaining substantial dissecting experience. Students perform supervised dissection of human cadavers. Limited to students enrolled in, or seeking admission to, programs that require a human anatomy laboratory. Prerequisite: BIOL 240 and BIOL 241, and consent of the instructor. LAB.

BIOL 448. Kansas Plants. 3 Hours N.
A study of common and important non-cultivated Kansas plants, with special emphasis on the ecology of the state; paleoclimatic and paleobotanical background of the central prairies and plains; present climate, physiography and vegetation; poisonous, edible, and medicinal plants; identification by means of simplified keys. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 449. Laboratory/Field Work in Human Biology. 1-3 Hours AE61 / N / LFE.
This biological anthropology lab course builds upon concepts introduced in ANTH 150 and ANTH 304. It provides students with practical, hands-on experience in biological anthropology laboratory methods and theory. Topics include: genetics, osteology, forensic anthropology, modern human biological variation, primatology, paleoanthropology, and human evolution. Students integrate their knowledge of human variation, genetics, and critical approaches to the concept of social and biological race. For the final project, students analyze genetic markers using a commercial ancestry test. They will either be given anonymous data to work with, or, if they pay an optional laboratory fee, they can investigate their own genome for the final project. This fee for self-study is not required for full participation in the final project. (Same as ANTH 449, PSYC 449, and SPLH 449.) Prerequisite: Either ANTH 304, ANTH 340, Human Biology major, or permission of instructor. LAB.

BIOL 451. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700
level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 451 and GEOG 451.) FLD.

BIOL 454. Brain Diseases and Neurological Disorders. 3 Hours N.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., are discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Prerequisite: BIOL 416 or BIOL 435 or BIOL 546, or consent of instructor. LEC.

BIOL 477. Ecology and Global Change. 3 Hours N.
Humans influence both natural and managed ecosystems. This course studies the effects of climate change, land-use change, and reductions in biodiversity on ecosystems. Emphasis is placed on how biological and physical processes may be perturbed by human influences. Topics include the greenhouse effect, species extinctions, human disease expansion, and the effects of global change on agricultural productivity. A combination of lectures and discussion address issues from a scientific basis and link these ecological issues to our everyday lives and society as a whole. Prerequisite: BIOL 152, BIOL 153, or equivalent, or permission of instructor. LEC.

BIOL 480. Biology and Diversity of Parasites. 3 Hours N.
Introductory lecture course to the field of Parasitology. Provides basic knowledge about the morphology and biology of parasitic animals. Coverage includes a diversity of protozoan and metazoan groups parasitizing animals, including humans (e.g., malaria, amoebas, hookworms, tapeworms). Some emphasis is given to groups of parasites of particular medical and/or economic importance. Selected principles of parasitism are introduced. Prerequisite: BIOL 152 or BIOL 153, or permission of instructor. LEC.

BIOL 481. Parasitology Laboratory. 1 Hour U / LFE.
Laboratory course in the study of protozoan and metazoan parasites of animal, including humans, emphasizing their diversity, classification, morphology, and identification. One three-hour laboratory each week. Prerequisite: Concurrent or prior enrollment in BIOL 480. LAB.

BIOL 490. Internship and Practical Applications. 1-6 Hours AE61 / N.
This course provides credit for supervised practical experiences in an occupational area of interest. In addition to the work-related activity, students will be expected to complete reading and writing assignments, participate in on-line discussions, and create a final summary of internship accomplishments. Hours of credit earned (1-6) are based on number of hours at internship site and agreement of instructor. Repeatable for up to 6 credit hours, provided the internship experiences are different. Prerequisite: Consent of Instructor. INT.

BIOL 494. Introduction to Mammalogy. 3 Hours / LFE.
A study of mammals, with emphasis on evolution, biogeography, systematics, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 152 or 153 or permission of instructor. LEC.

BIOL 499. Introduction to Honors Research. 2 Hours N.
Intended for sophomores planning to enroll in the Biology Honors Program. Students interested in pursing Biology Honors discuss with Biology faculty members the rationale, methods, and interpretations of research being carried out in individual faculty labs to learn how scientific research is conducted. Prerequisite: At least 17 credit hours of college level natural sciences coursework or consent of instructor. LEC.

BIOL 500. Biology of Insects. 3 Hours N.
Lectures and demonstrations providing an introduction to the study of insects, including general classification, structure, phylogeny, identification, development, physiology, behavior, ecology, and relations to human affairs. Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

BIOL 501. Physiological Adaptations of Plants to Extreme Environments. 3 Hours N.
Exploration of physiological adaptations of plants to bright sunlight deep shade, drought flooding, excess heat subfreezing, excess elements and too few elements. Examples of adaptations include: red leaves, blue leaves, succulence, root "knees", moving leaves, frozen leaves, heavy metal plants, carnivorous plants, parasitic plants, epiphytes. Prerequisite: BIOL 150 or BIOL 152 or consent of instructor. LEC.

BIOL 502. Laboratory in Insect Biology and Diversity. 2 Hours U / LFE.
Laboratory and field studies of insects, emphasizing their diversity, classification, ecological relationships, morphology, and behavior. Course provides practical application of principles covered in BIOL 500. Prerequisite: Concurrent or prior enrollment in BIOL 500 or the equivalent. LAB.

BIOL 503. Immunology. 3 Hours N.
Lectures on the nature and mechanisms of natural and acquired resistance including humoral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; ontogeny and cellular basis of immune responsiveness, hypersensitivity; specific immunologic tolerance. Prerequisite: BIOL 400 or BIOL 401, or consent of instructor. LEC.

BIOL 504. Immunology Laboratory. 2 Hours U / LFE.
Laboratory designed to complement BIOL 503. Prerequisite: BIOL 503, or BIOL 503 concurrently. LAB.

BIOL 506. Bacterial Infectious Diseases. 3 Hours N.
Explores bacterial infectious diseases from the perspective of how disease is established and the mechanisms that underlie disease, as well as how to treat and prevent infectious disease. Not open to freshmen or sophomores. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor. LEC.

BIOL 507. Bacterial Infectious Diseases Laboratory. 2 Hours U / LFE.
Laboratory to complement BIOL 506. Cultivation of pathogenic microorganisms, diagnostic procedures, and experiments to demonstrate various aspects of microbial pathogenicity and host responses. Prerequisite: BIOL 402 and BIOL 506 (or concurrent enrollment) or consent of instructor. LAB.

BIOL 509. Biology of Spiders. 3 Hours N.
An introduction to the evolution, anatomy, physiology, behavior, and ecology of spiders and other arachnids. Special topics include the action of spider venoms; the composition and uses of silk; courtship and mating; predation; social behavior; and the role of spiders in natural and agricultural ecosystems. Concurrent enrollment in BIOL 511 is encouraged. Prerequisite: BIOL 152, BIOL 153 or permission of instructor. LEC.

BIOL 510. Comparative Anatomy. 5 Hours N / LFE.
Structure, function, and evolution of the vertebrates. Lectures and laboratory study. A course designed for zoologists. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 511. Biology of Spiders Laboratory. 1 Hour U / LFE.
Topics will include comparative biology of arachnid orders (spiders, scorpions, harvestmen, mites, and others), external and internal anatomy of spiders, identification of common spider families and genera, and spider behavior. Students will be required to make a small collection (collect, preserve, and identify specimens). Prerequisite: BIOL 509; concurrent enrollment is preferred. LAB.
BIOL 512. General Virology. 3 Hours N.
Lectures and discussions covering the basic nature and characteristics of viruses from a general biological point of view: viruses of bacteria, animals and plants, physical-chemical properties; host cell-viral interactions; mode of replication of DNA and RNA viruses, tumor viruses. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher, or consent of instructor. LEC.

BIOL 513. Virology Laboratory. 2 Hours U / LFE.
Experiments involving cultivation, quantitation, and identification of animal viruses, continuous cell culture and primary chicken embryo culture techniques. Molecular biology techniques are used to demonstrate the steps in virus replication. The value of viruses as tools to understand normal cellular processes is emphasized in experiments which demonstrate the relative simplicity of viruses and the relative complexity of eukaryotic cells. Demonstrations include transformation of cells by tumor viruses and electron microscopy of virus particles. Prerequisite: BIOL 402 and BIOL 512, or consent of instructor. LAB.

BIOL 518. Microbial Genetics. 3 Hours N.
Bacteria and viruses as models of genetic systems. Mutagenesis and repair. Transformation, transductions, and recombination. Molecular biology of gene expression. Prerequisite: BIOL 400 or BIOL 401 with a grade of C- or higher or consent of instructor. LEC.

BIOL 519. Microbial Genetics Laboratory. 2 Hours U / LFE.
A laboratory course on the genetic analysis of bacteria. Includes mutagenesis, cloning, agarose and polyacrylamide gel electrophoresis, PCR, regulation of gene expression, and computational analysis of DNA sequences and protein structures. Prerequisite: BIOL 350 or BIOL 360. LAB.

BIOL 520. Marine Biology. 3 Hours N.
This introductory course covers biological, physical, and chemical ocean sciences, with an emphasis on ecological aspects. In addition to this Lawrence campus course, students may enroll for a supplementary 1 credit field trip class to a Caribbean coral reef island offered in December or January. Prerequisite: BIOL 414 or permission of the instructor. LEC.

BIOL 521. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and geological history of each order is covered. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 524. Mammalian Paleontology. 3 Hours.
Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as GEOL 524.) Prerequisite: One of the following: BIOL 225, BIOL 412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor. LEC.

BIOL 525. Aquatic Entomology. 4 Hours N.
Designed to enable students to develop skill in the area of identification of aquatic insects and to gain a detailed comprehension of their community structure and dynamics. The external morphology of all aquatic orders is covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500. LEC.

BIOL 527. Primate Evolution and the Fossil Record. 3 Hours N.
This course exposes students to fundamental concepts of paleontology and evolutionary biology using the mammalian order Primates as a high-profile case study. Primates are interesting partly because humans are primates. Hence, scientific understanding of human origins and human evolution must be grounded in knowledge of our nearest relatives. This course places human origins within the broader framework of how primates have evolved over the course of the Cenozoic Era, often in response to radical changes in the Earth’s physical environment. Prerequisite: BIOL 412 or BIOL 413, or consent of the instructor. LEC.

BIOL 528. External Morphology of Insects. 4 Hours N.
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 530. Biodiversity Discovery and Assessment. 2 Hours N.
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as EVRN 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

BIOL 531. Tropical Fieldwork in Biodiversity Discovery. 1 Hour U.
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as EVRN 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged. LAB.

BIOL 533. Biology of Fungi. 4 Hours N / LFE.
A study of the major groups of fungi from slime molds to mushrooms. Emphasis on their activities in natural substrates, isolation techniques, parasitic and mutualistic relationships with other organisms, uses in research, industrial applications, production of mycotoxins and poisons, and physiological, genetic and reproductive behavior. Lectures, laboratory, and field trips. Prerequisite: BIOL 100, BIOL 101, BIOL 150, or BIOL 151 and BIOL 152 or BIOL 153. LEC.

BIOL 536. Cell Structure and Function (Honors). 3 Hours N.
BIOL 536 is the honors version of BIOL 416. Completion of this class will satisfy the BIOL 416 requirement. Open to students in the Honors program or by permission of instructor. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 540. General Invertebrate Zoology. 4 Hours N / LFE.
Phylogeny, physiology, and embryology; evolutionary processes; characteristics of major ecological groupings. Laboratory will consider major taxonomic categories with emphasis on functional morphology and its evolutionary modifications. Prerequisite: BIOL 152 or BIOL 153. LEC.

BIOL 541. Biology of Freshwater Invertebrates. 3 Hours N.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be
studied, including aquatic insects, crustaceans, molluscs, and others. Prerequisite: BIOL 152 or BIOL 153; recommended BIOL 414 and/or BIOL 540. LEC.

BIOL 544. Comparative Animal Physiology. 3 Hours N.
An intermediate physiology course with lectures and discussions of the structures, functions, mechanisms, and interactions of vertebrate and invertebrate organ systems with a focus on the different ways in which animals adapt to their environments. Topics include digestion and nutrition, metabolism, gas exchange, circulation, excretion, neurophysiology, endocrinology, and muscle physiology. Prerequisite: BIOL 152 or BIOL 153, and CHEM 330, or consent of instructor. A college physics course is recommended but not required. LEC.

BIOL 545. Evolution of Development. 4 Hours AE61 / N.
An advanced course designed to expose students to evolutionary change in the developmental patterning of plant and animal form. This course includes a lecture component and a laboratory component to integrate multiple biological disciplines including comparative morphology, molecular evolution, developmental genetics and experimental development, to explore biodiversity at a mechanistic level. Lectures are designed to give students background on topics ranging from homology assessment to empirical examples of how changes in gene expression or function may have shaped morphological diversity. The laboratory complements these topics through observations of normal development in a diversity of plant and animal model organisms, and through conducting independent research experiments. Prerequisite: BIOL 350 or equivalent. LEC.

BIOL 546. Mammalian Physiology. 3 Hours N.
An intermediate course in the structures, functions, mechanisms, and interactions of mammalian organ systems. Discussions span topics from molecular to whole animal functions. Prerequisite: BIOL 150; BIOL 152 or BIOL 240; and CHEM 330 or consent of instructor. LEC.

BIOL 547. Mammalian Physiology Laboratory. 2 Hours U / LFE.
Laboratory experiments in representative areas of mammalian physiology designed to complement BIOL 546. Not open to students with credit in BIOL 247. Prerequisite: Corequisite: BIOL 546 or BIOL 646. LAB.

BIOL 555. General Plant Physiology. 3 Hours N.
The principal physiological processes of higher plants including photosynthesis, respiration, water relations, mineral nutrition, and factors associated with morphogenesis. Prerequisite: Consent of instructor. LEC.

BIOL 560. Histology. 3 Hours N.
Study of detailed microscopic anatomy of cells, tissues, and organs of mammals. Examples are drawn from normal and abnormal tissue, histochemistry, and electron microscopy. Lecture and demonstrations. A course in anatomy and physiology is highly recommended. Prerequisite: BIOL 152 or BIOL 153. LEC.

BIOL 570. Introduction to Biostatistics. 4 Hours N / LFE.
Statistical concepts related to biological problems. Topics include the scientific method, data representation, descriptive statistics, elementary probability distributions, estimation and hypothesis testing, emphasizing the analysis of variation. Prerequisite: College algebra and ten hours of natural science. LEC.

BIOL 571. Introduction to Biostatistics Laboratory. 2 Hours U / LFE.
Introductory statistical analyses on microcomputers. Data entry and export; simple graphs and exploratory data analysis; descriptive statistics; sampling; point and interval estimation; one and two sample t-tests; Chi-square; regression and correlation; analysis of variance; and nonparametric methods. Prerequisite: BIOL 570 or equivalent (may be taken concurrently). LAB.

BIOL 582. Principles of Biogeography. 3 Hours N.
An introduction to the study of the distribution of life on earth. Covers geographical patterns of species diversity and the processes that give rise to those patterns: speciation, extinction, dispersal, vicariance, continental drift, ecological interactions, and phylogeny. Topics are presented within the framework of evolutionary history and include discussion of the biology of species on islands, terrestrial biomes, altitudinal zonation of species, latitudinal species gradients, historical factors governing species distributions, macroevolutionary trends in the fossil record, and application of modern molecular techniques for testing biogeographical hypotheses. Prerequisite: BIOL 152 or 153 and past or concurrent enrollment in BIOL 412, 413, 414, or 550; or permission of Instructor. LEC.

BIOL 583. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion, thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. LEC.

BIOL 592. Ichthyology. 4 Hours N / LFE.
A study of fishes. Lecture topics include the structure and adaptations of fishes to the aquatic environment and a survey of major fish groups with emphasis on their evolution and biogeography. Laboratory topics include a survey of fish diversity using specimens and the use of keys to identify fishes, with emphasis on the Kansas fish fauna. This course meets with BIOL 792. Students taking this course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 and/or BIOL 413. LEC.

BIOL 593. Ornithology. 3 Hours N / LFE.
A lecture and laboratory course on the biology, evolution, and diversity of birds. Prerequisite: BIOL 412 (or BIOL 413), or permission of instructor. LEC.

BIOL 594. Forest Ecosystems. 3 Hours.
Students learn basic concepts of forest productivity, forest water relations, forest hydrology, nutrient cycling, through soils and vegetation, nutrient uptake, carbon cycling, decomposition, linkages to aquatic ecosystems, and agents of disturbance to these cycles. The class spends a significant part of the semester exploring forest soil profiles and the challenges they present to different forest ecosystems. We discuss the function of forested ecosystems in a global context and identify and understand smaller-scale processes that drive forest function. Prerequisite: CHEM 135, or CHEM 175, or CHEM 195 and CHEM 196; and BIOL 414. LEC.

BIOL 595. Human Genetics. 3 Hours N.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: BIOL 350 or BIOL 360. LEC.

BIOL 598. Research Methods. 3 Hours N / LFE.
An introduction to the foundational concepts that underpin scientific inquiry and problem solving. Coursework is built around three student-designed inquiries, and topics considered within that context include experimental variables, basic principles of statistics, safety and ethics of investigation, professional communication techniques, and appropriate literature review. Enrollment priority will be given to students currently admitted to the UKanTeach program. LEC.

BIOL 599. Senior Seminar: ______. 1 Hour AE61 / N.
A synthesis and discussion of current trends in a discipline or disciplines related to one of the degrees offered in the biological sciences. Emphasis is placed on providing seniors with an appreciation of the discipline's
state-of-the-art and on developing skills for success in the next stage of a career in the biological sciences. Topics depend on the associated degree program. Prerequisite: Must be taken in the final year of a degree and students must have completed most of the course work required for one of the degrees in the biological sciences. LEC.

**BIOL 600. Introductory Biochemistry, Lectures. 3 Hours N.**

Designed to offer the essentials of the chemistry of the constituents of living organisms and the changes these constituents undergo (during life processes) in the human body and other living forms. Prerequisite: BIOL 150 or BIOL 151 and one semester of organic chemistry. LEC.

**BIOL 601. Principles of Biochemistry Laboratory. 2 Hours.**

Theory and methods in the development of protein separation and purification, enzyme structure/function, and enzyme kinetics derived from primary literature searches and readings. Prerequisite: Corequisite: BIOL 600; or consent of instructor. LAB.

**BIOL 602. Plant Ecology. 3 Hours N.**

Introduction to basic concepts, focused at community and species level. Architectural ecophysiology of plants and their physiological responses to physical factors: solar radiation, climate, and soils. Plant succession as an interaction among species differing in ecophysiology and life style. Classification and ordination of plant communities: practice and theory. Other topics include: species diversity and lognormal distribution as to abundance classes; species/area relations and theory of island biogeography; allelochemical defenses; genealogy; paleoecology. Prerequisite: BIOL 414 or consent of instructor. Concurrent enrollment in parallel laboratory, BIOL 607, recommended. LEC.

**BIOL 603. Systematic Botany. 3 Hours N / LFE.**

A lecture/laboratory course providing hands-on experience with plant identification, a history of plant classification, the principles of nomenclature and character analysis, the basics of systematics theory, and a phylogenetically-oriented introduction to vascular plant diversity. Prerequisite: BIOL 413 or equivalent. LEC.

**BIOL 604. Ecological Plant Physiology. 3 Hours N.**

Physiological responses of higher plants to environmental factors are discussed. Major topics are: water relations, heat transfer, resistance to water and temperature stress, dormancy, photoperiodism, photosynthesis and respiration under natural conditions, and effects of environmental pollution. Prerequisite: Consent of instructor. LEC.

**BIOL 605. Field and Laboratory Exercises in Plant Ecology. 2 Hours U / LFE.**

Introduction to quantitative analysis of plant communities and correlated environmental parameters; field and/or laboratory measurements of ecophysiological traits and comparative ecomorphology of principal species. Prerequisite: BIOL 414. Concurrent enrollment in parallel lecture, BIOL 602, recommended, but not required. LAB.

**BIOL 612. Fundamentals of Microbiology. 3 Hours NB / N.**

Lectures. Fundamental principles of microbiology with emphasis in physical and chemical properties of the bacterial cell; microbial metabolism, cultivation, growth and death of bacteria; microbial genetics; pathogenesis and immunity, industrially important microorganisms. Meets with BIOL 400, but students will be given additional and more advanced assignments, and will carry higher expectations. Prerequisite: BIOL 150 or BIOL 151 and two semesters of college chemistry, or consent of instructor. LEC.

**BIOL 616. Medical Entomology. 3 Hours N.**

A study of the major human diseases transmitted by arthropods with emphasis on the biology and ecology of vectors, vector feeding mechanisms as related to disease transmission, epidemiology of arthropod-borne diseases, and the impact of arthropod-borne diseases on humans. Prerequisite: BIOL 152 or BIOL 153 and a course in microbiology or consent of instructor. LEC.
floras. (Same as GEOL 528.) Prerequisite: BIOL 413 or permission of instructor. LEC.

BIOL 641. Laboratory in Paleobotany. 1 Hour U / LFE.
An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. (Same as GEOL 529.) Prerequisite: BIOL 413 or permission of instructor. Must be taken concurrently with BIOL 640. LAB.

BIOL 642. Biochemistry III: Machines on Genes. 4 Hours N.
This one-semester lecture course for biochemistry majors is designed to complement the topics covered in BIOL 636 and BIOL 638. Emphasis will be placed on the various molecular machines involved in the transmission and utilization of genetic information, providing a biochemical perspective of replication, transcription, and translation. Prerequisite: BIOL 636 and BIOL 638 with a grade of C or higher. LEC.

BIOL 648. Systematics and Macroevolution. 3 Hours N.
An introduction to the theory of macroevolution and the fundamental principles of systematics. Intended for students planning to pursue advanced studies in organismal biology, evolution, and/or systematics. Topics in macroevolution will include hierarchy theory, species concepts, speciation and species selection. Methods of phylogenetic estimation will be discussed and include parsimony, Maximum likelihood and Bayesian inference. Evolutionary studies utilizing phylogenies including tests of homology, studies of character evolution, and biogeography will be discussed. An overview of classification and nomenclature will also be provided. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 650. Advanced Neurobiology. 3 Hours N.
The course builds an in depth knowledge about basic mechanisms of synaptic communication among nerve cells and their targets, and the structure and function of nervous systems. Topics include nervous system development and synapse formation, structure and function of neurons, physiological and molecular basis of synaptic communication between neurons, mechanisms of synaptic plasticity involved in learning and memory, sensory systems (vision, auditory, vestibular, motor reflexes and pain), processing of neural information at cellular and system levels, synapse regeneration and diseases of the nervous system. Prerequisite: BIOL 435 (Introduction to Neurobiology), or consent of instructor. LEC.

BIOL 652. Comparative Animal Behavior. 3 Hours N.
A comparative analysis of behavior as an adaptive mechanism; emphasis on ontogenetic and evolutionary aspects of behavior. Prerequisite: BIOL 152 or BIOL 153; and BIOL 412. Alternatively, BIOL 412 may be taken as a corequisite. LEC.

BIOL 654. Comparative Animal Behavior, Laboratory. 1 Hour U / LFE.
Laboratory and field phase of BIOL 652. Students may elect sections according to their special interests. Prerequisite: Prior or concurrent enrollment in BIOL 652. LAB.

BIOL 655. Behavioral Genetics. 3 Hours N.
a survey of behavioral genetics in animals and humans. Emphasis is on how the methods and theories of quantitative, population and molecular genetics can be applied to individual and group differences in animals. Behaviors covered may include circadian rhythms, foraging, courtship, learning and memory, anxiety, social structures and human behaviors. Prerequisite: BIOL 350 or consent of instructor. LEC.

BIOL 656. Ecosystem Ecology. 3 Hours N.
an introduction to the patterns and processes that affect terrestrial ecosystems. Emphasis is placed on understanding nutrient cycles (e.g., carbon nitrogen phosphorous), hydrologic cycles, and patterns of net primary productivity. The role of both natural and anthropogenic disturbances in structuring terrestrial ecosystems is examined in the context of global land-use patterns. Discussion of current research literature will be expected. (Same as EVRN 656.) Prerequisite: BIOL 414 and CHEM 130. LEC.

BIOL 660. Summer Field Ecology. 3 Hours N.
an introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as EVRN 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N). LAB.

BIOL 661. Ecology of Rivers and Lakes. 3 Hours N.
Study of the ecology and structure of creeks, rivers, ponds, lakes, and wetlands as well as some of the major human impacts. Prerequisite: One year of biology or permission of the instructor. BIOL 414 recommended.

BIOL 662. Aquatic Ecology Laboratory. 2 Hours U / LFE.
a field and laboratory course introducing biological, physical, and chemical characteristics of lentic (ponds and lakes) and lotic (creeks and rivers) habitats. Students learn sampling and monitoring techniques and how to classify aquatic biota at higher taxonomic levels. Prerequisite: Corequisite: CHEM 130, or CHEM 170, or CHEM 190 and CHEM 191; and BIOL 661. LAB.

BIOL 666. Evolutionary Ecology. 3 Hours N.
Emphasis will be on the themes that interface ecology and evolutionary studies. Topics will include selection theory; reproductive, foraging, and sex allocation problems; coevolution; patterns or morphological and behavioral adaptations; competition, predation, and population regulation. Special attention will be given to the philosophy and practice of resolving unanswered questions in evolutionary ecology. Prerequisite: BIOL 412 or permission of instructor. LEC.

BIOL 672. Gene Expression. 3 Hours N.
a study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 673. Cellular and Molecular Neurobiology. 3 Hours.
Mechanisms of neural function and development will be considered at the cellular and molecular levels. Synaptic mechanisms of learning and memory, modulation of transmitter release, and the molecular basis of neurodegenerative disorders will also be discussed. Prerequisite: BIOL 435, BIOL 646, or permission of instructor. LEC.

BIOL 680. Genomics. 3 Hours N.
Genomics is the study of the structure, function and evolution of the genome. High-throughput technologies have given us the ability to easily and quickly sequence genomes, and measure genomewide patterns of gene expression. These tools, and the vast amounts of genome-scale data they provide, have transformed biology and medicine. This course will cover the key technological and computational methods by which genomic DNA is sequenced, genomes are assembled, and how RNA and epigenetic patterns are measured. Subsequently, we will emphasize how
these genomics tools and techniques have deepened our understanding of biology, covering questions from diverse fields to illustrate the impact of genomics on evolutionary biology, molecular and developmental genetics, human medical genetics and personalized, precision medicine. Prerequisite: BIOL 350 or BIOL 360, or consent of instructor. LEC.

BIOL 688. The Molecular Biology of Cancer. 3 Hours N.
The basic concepts of molecular biology are examined and used to probe the process by which a normal cell becomes a cancer cell. The course investigates DNA damage and repair, chemical carcinogenesis, gene cloning and manipulation, the control of gene expression in eukaryotes, tumor viruses, the roles of oncogenes and tumor suppressor genes in carcinogenesis, and cancer therapy. Prerequisite: BIOL 350 and BIOL 416; or BIOL 536; or consent of instructor. LEC.

BIOL 694. The Art of Becoming a Professional Scientist. 3 Hours N.
Discusses aspects of graduate education that are directed at students entering graduate school and that focus on how to be successful in the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One three hour discussion per week. Senior standing and planning on entering graduate school. LEC.

BIOL 699. Biology Honors Research Colloquium. 1 Hour AE61 / U.
Students pursuing Honors in Biology will meet weekly to discuss, both formally and informally, their honors research. Background information and experimental approaches of the research will be examined and critiqued. Prerequisite: Enrollment in Biology Honors program and consent of instructor. LEC.

BIOL 700. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, GEOL 780, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 701. Topics in: ____. 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussions, readings, laboratory, or field work. Students may select sections according to their special interests. LEC.

BIOL 702. Laboratory Practice: Radiation Safety Procedures. 0.75 Hours.
An introduction to the basic properties of radioisotopes, and the fundamental safety practices needed for the safe use of low levels of radioactive materials. Risks associated with radiation exposures and applicable state and federal regulations are discussed. (Normally the content of the first ten hours of BIOL 703.) Prerequisite: Senior standing in one of the sciences. LAB.

BIOL 703. Radioisotopes and Radiation Safety in Research. 1.25 Hour.
An introduction to the properties of radioactive materials, radiations, and their interaction with matter, methods of radiation detection and measurement, protective measures, applicable state and federal regulations, design and implementation of safety management systems in the research laboratory, design of tracer experiments, and the risks associated with radiation exposure. Prerequisite: BIOL 702 or concurrent enrollment in BIOL 702, algebra and two semesters of either physics or chemistry. LEC.

BIOL 706. Natural Sciences Curation and Collections Management. 3 Hours.
This course explores collections in the KU Museum of Natural History through the eyes of their curators and collection managers. It addresses aspects of collecting, cataloging, preserving, storing, managing, and digitally archiving different types of natural science collections. The course format consists of lectures, readings, workshops, and guided tours of the museum’s paleontological, biological (flora and fauna) and archaeological division collections, as well as the Spencer Museum of Art’s ethnographic collections. Student projects will involve one of the museum’s collections with the opportunity for hands-on experience. (Same as MUSE 710.) LEC.

BIOL 708. External Morphology of Insects. 4 Hours.
A study of external structure common to all insect orders, with detailed comparative laboratory studies of representative species. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500, BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 711. Insect Systematics. 4 Hours N.
A study of the diversity of insects, including the classification of all living and fossil orders and the more common families primarily on the basis of external morphology. The biology, ecology, phylogeny, and geological history of each order will be covered. Includes both lectures and laboratory exercises. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 500 and BIOL 502 or equivalent, or permission of instructor. LEC.

BIOL 712. Evolutionary Biology - Graduate. 3 Hours.
A thorough survey of evolutionary biology. Topics include: the history of evolutionary thought, genetics and the nature of variation, adaptation, speciation, coevolution, macroevolution, the comparative method, and the history of life. Prerequisite: BIOL 350 or equivalent consent of instructor. LEC.

BIOL 714. Graduate Ecology. 3 Hours.
A thorough survey of the discipline of ecology. Topics include elements in physiological, population, community and ecosystem ecology. Overarching themes are 1) pattern and process, 2) ecology and evolution, 3) hierarchical nature of ecology, 4) variation in space and time, and 5) human dimensions of ecology. Prerequisite: Graduate standing or consent of instructor. LEC.

BIOL 720. Scientific Illustration. 3 Hours.
Lectures, demonstrations, and studio participation. Instruction in the preparation of illustrations for scientific publications, theses, and oral and poster presentations. Emphasis on basic drafting and layout skills, and pen and ink and tone renderings intended for publication. Attention given to preparation of photographs for publication and oral presentations. Instruction provided in use of specialized optical equipment for drawing. Prerequisite: Upper division or graduate standing and permission of instructor. LEC.

BIOL 725. Aquatic Entomology. 4 Hours.
Identification of aquatic insects and detailed study of their community structure and dynamics. The external morphology of all aquatic orders will be covered, followed by consideration of specific physiological and behavioral adaptations that facilitate an aquatic existence. Includes both lectures and laboratory exercises. Requirements include making a collection of aquatic insects. The course is offered at the 500 and 700 levels, with additional assignments at the 700 level. Prerequisite: BIOL 414 or BIOL 500 or permission of instructor. LEC.

BIOL 735. Scientific Communication. 3 Hours.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of
scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and oral communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as EVRN 735.) LEC.

BIOL 741. Biology of Freshwater Invertebrates. 3 Hours.
A lecture and laboratory course examining the classification, biological characteristics, and ecology of invertebrates in rivers, lakes, and wetlands. Major groups of benthic and planktonic invertebrates will be studied, including aquatic insects, crustaceans, molluscs, and others. Graduate students will be expected to submit either an original collection of freshwater invertebrates or write a research essay on a topic mutually agreed upon with the professor. Not open to students who have taken BIOL 541. Prerequisite: Graduate standing; recommended: undergraduate invertebrate biology class. LEC.

BIOL 742. Plant Population Biology. 3 Hours.
A survey of the major areas of plant population ecology and genetics including competition, demography, pollination ecology, gene flow, natural selection and mating systems. Each topic is introduced by a lecture and is further explored by discussion of the current literature. Prerequisite: BIOL 412 or equivalent. LEC.

BIOL 743. Population Genetics. 3 Hours.
Description and discussion of genetic variation in natural populations. The effects and interaction of selection, migration, mutation, mating systems, and finite population size on the maintenance of genetic variation. Discussion of the interface with evolution and population ecology. Prerequisite: BIOL 350 and BIOL 412 or equivalent. LEC.

BIOL 747. Quantitative Genetics. 3 Hours.
A discussion of genetic traits for which individual gene differences do not separate a population into qualitatively distinct groups. Includes the estimation of heritability, genetic determination, and number of loci, and a study of selection theory. Prerequisite: BIOL 404 or BIOL 412 or equivalent and a course in statistics. LEC.

BIOL 750. Advanced Biochemistry. 3 Hours.
The structures and dynamics of proteins and nucleic acids will be developed in terms of well-understood examples which will also be used to discuss the function of major classes of proteins. The application of structural and dynamical principles to biological membranes and their function will also be discussed. Prerequisite: BIOL 807 and BIOL 808, a general biochemistry course, or permission of instructor. LEC.

BIOL 752. Cell Biology. 3 Hours.
A lecture course emphasizing biochemical, developmental, and molecular aspects of cell structure and function. Prerequisite: BIOL 807 and BIOL 808, or BIOL 416 or BIOL 536, or permission of instructor. LEC.

BIOL 753. Advanced Genetics. 3 Hours.
An advanced course in modern genetic analysis of eukaryotes. Course material will consist mainly of primary literature in the field of genetics. Topics covered include: genomic structure and genome projects; nature of mutations; mutant analysis; genetic recombination and mapping; analysis of gene function; genetic buffering; RNAi and epigenetics; and the genetics of model organisms. This course is meant for graduate students in the Molecular Biosciences and Genetics programs. Prerequisite: BIOL 807 and BIOL 808, or a course in genetics and a course in biochemistry, or permission of the instructor. LEC.

BIOL 754. Brain Diseases and Neurological Disorders. 3 Hours.
Major brain diseases and neurological disorders such as stroke, Alzheimer's Disease, Parkinson's Disease, Huntington's Disease, Multiple Sclerosis, Epilepsy, Schizophrenia, etc., will be discussed in terms of the etiology, molecular, and cellular basis of potential therapeutic interventions. Graduate students are required to present original research paper assigned by the instructor to the class in addition to the other assignments for all the students enrolled. Prerequisite: BIOL 150, or consent of instructor. LEC.

BIOL 755. Mechanisms of Development. 3 Hours.
Molecular aspects of differential gene function, signal transduction, and cell polarity in the regulation of morphogenesis. Prerequisite: BIOL 807 and BIOL 808 for graduate students; BIOL 417 or equivalent for undergraduate students; or permission of instructor. LEC.

BIOL 757. Carcinogenesis and Cancer Biology. 3 Hours.
This course surveys the field of cancer research. The major goal is to introduce the breadth of cancer research while, at the same time, providing sufficient depth to allow the student to recognize problems in cancer and to design experiments which study cancer biology. Toward that end, the student should (at the conclusion of the course) be able to: define cancer, identify and discuss its causes; identify and discuss the genetic basis for cancer development and progression; discuss the theoretical basis for cancer therapy design and efficacy testing; discuss the biochemical, molecular and cellular events involved in the natural history of major human neoplasms. Prerequisite: Permission of instructor.

BIOL 759. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as EVRN 751 and GEOG 759.) FLD.

BIOL 772. Gene Expression. 4 Hours.
A study of the structure and expression of genes in prokaryotes and eukaryotes. Emphasis on the mechanisms of DNA, RNA, and protein biosynthesis. This course meets concurrently with BIOL 672 and is open to graduate students seeking a more rigorous treatment of techniques in molecular biology that students receive in BIOL 672. Prerequisite: A course in biochemistry or consent of instructor. LEC.

BIOL 775. Chemistry of the Nervous System. 3 Hours.
A detailed study of the molecular aspects of nerve transmission will be covered with special emphasis on the uptake, storage, release, biosynthesis and metabolism of specific neurotransmitters. Drugs affecting these processes and current research on receptor isolation and receptor mechanisms will be discussed from a chemical viewpoint. (Same as CHEM 775, MDCM 775, NURO 775, PTX 775, and PHCH 775.) Prerequisite: BIOL 600 or equivalent or consent of instructor. LEC.

BIOL 782. Principles of Biogeography. 3 Hours.
A synthesis of historical and ecological biogeography of plants and animals, treating vicariance, dispersal, and community patterns; lectures, readings, discussions. A course in systematics and a course in ecology are recommended. LEC.

BIOL 783. Herpetology. 3 Hours N.
A study of amphibians and reptiles. This lecture course will explore the taxonomic diversity of amphibians and reptiles, and current areas of active research in herpetology. Topics will be considered within a phylogenetic framework, and include discussion on systematics, biogeography, tetrapod origins, skeletal systems, growth, circulatory system, locomotion,
thermal and water regulation, hibernation, ecology, sexual behavior, parental care, and mimicry. Students taking the course at the 700 level will have additional work required of them. Prerequisite: BIOL 152 Principles of Organismal Biology, and/or BIOL 413 History and Diversity of Organisms. LEC.

BIOL 784. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, GEOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 785. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, GEOL 783, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 786. Fundamentals of Tropical Biology. 1-8 Hours.
The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Primarily a field course, taught in Costa Rica; two sessions per year, February-March, July-August. FLD.

BIOL 787. Introduction to Museum Exhibits. 3 Hours.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, GEOL 781, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 788. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, GEOL 782, HIST 720, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

BIOL 790. Paleontology of Lower Vertebrates. 3 Hours.
General account of the osteology, geologic distribution, and evolution of the principal groups of fishes, amphibians, reptiles, and birds. Lectures and laboratory. Prerequisite: GEOL 105 or GEOL 304, or GEOL 521. LEC.

BIOL 792. Ichthyology. 4 Hours.
A study of fishes. Lecture topics include the structure and function of fishes; the adaptations of fishes to the aquatic environment; and a survey of major fish groups with emphasis on evolutionary relationships and biogeography. Laboratory topics include a survey of fishes using specimens, and the use of keys to identify fishes with emphasis on the Kansas fish fauna. A research paper using primary scientific literature is required. Prerequisite: Graduate standing or permission of the instructor. LEC.

BIOL 794. Mammalogy. 3 Hours.
A study of mammals, with emphasis on systematics, biogeography, and natural history. Lectures, laboratory, and field study. Prerequisite: BIOL 100 or BIOL 413. LEC.

BIOL 795. Biology of Amphibians. 3 Hours.
Evolutionary biology of amphibians with emphasis on systematics, morphology, development, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: Permission of instructor. LEC.

BIOL 796. Biology of Reptiles. 3 Hours.
Evolutionary biology of reptiles with emphasis on systematics, morphology, reproductive strategies, and distribution; lectures and laboratory. Prerequisite: Permission of instructor. LEC.

BIOL 797. Field Course in Vertebrate Paleontology. 3-6 Hours.
Training in the techniques of collecting vertebrate fossils, description and interpretation of the stratigraphy of fossiliferous sediments, and interpretation of the adequacy and bias of samples. FLD.

BIOL 798. Introduction to Collections Management and Utilization. 3 Hours.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, GEOL 785, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor. LEC.

BIOL 801. Topics in: . 1-3 Hours.
Advanced courses on special topics in biology, given as need arises. Lectures, discussing readings, laboratory or field work. Students may select sections according to their special interests. LEC.

BIOL 802. The Art of Becoming a Professional Scientist. 3 Hours.
Discusses aspects of graduate education that are directed at the post PhD phases of a career, but that must be initiated early in the graduate student program of study. One 3-hour discussion per week. LEC.

BIOL 805. Scientific Integrity in Ecology and Evolutionary Biology. 1 Hour.
This course covers the responsible conduct of research to help students initiate research projects ethically. Topics covered include expectations of federal granting agencies and the university, best practices for data management and publishing, and professional development as a graduate student. Prerequisite: Admission to the graduate program in Ecology and Evolutionary Biology, or consent of instructor. LEC.

BIOL 807. Graduate Molecular Biosciences. 3 Hours.
An introduction to the advanced study of biochemistry, microbiology, genetics, cell and developmental biology, and neurobiology for all Molecular Biosciences graduate students. Topics can include macromolecular structure, metabolism, kinetics and thermodynamics, bioinformatics, prokaryotic and eukaryotic genetic mechanisms, cell structure and function, signal transduction, basic and pathogenic bacteriology, immunology, virology, membrane potentials, synaptic transmission, and sensory neurophysiology. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.
BIOL 809. Graduate Molecular Biosciences for Medicinal Chemists. 4 Hours.
An introduction to the advanced study of biochemistry, microbiology, and neurobiology for graduate students in Medicinal Chemistry. Prerequisite: Admission to the graduate program in Medicinal Chemistry and consent of instructor. LEC.

BIOL 811. Advanced Molecular and Cellular Immunology. 2 Hours.
Covers recent advances in immunobiology and immunobiology. Topics include structure and function of antibodies, receptor systems, idiotypes, induction and regulation of the immune response through cell interactions and cytokine action, and the role of immune activity in disease states such as hypersensitivity, autoimmunity, and cancer. Prerequisite: BIOL 807 and BIOL 808, or an introductory course in immunology, or consent of instructor. LEC.

BIOL 812. Mechanisms of Host-Parasite Relationships. 2 Hours.
Emphasis is on virulence factors of microorganisms and the host response to infection. Topics will include pathogenesis of intracellular and extracellular parasites, bacterial adhesins, and toxins, and the role of innate and acquired immunity in host resistance and the response to infection. Prerequisite: BIOL 807 and BIOL 808, or a course in virology, or consent of instructor. LEC.

BIOL 814. Advanced Molecular Virology. 2 Hours.
The course concentrates on evaluation of current literature concerning all aspects of molecular biology, biochemical characterization, and pathogenic mechanisms involved in host-virus interactions. Students will be expected to present articles and participate in discussions. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics and a course in virology, or consent of instructor. LEC.

BIOL 815. Advanced Molecular Genetics. 2 Hours.
A literature-based course that covers recent advances in microbial molecular genetics. Topics include transcription, translation, mutagenesis and repair, genetic exchange mechanisms, and regulation of gene expression. Prerequisite: BIOL 807 and BIOL 808, or a course in microbial genetics, or consent of instructor. LEC.

BIOL 816. Careers in the Biomedical Sciences. 1 Hour.
Advanced course examining career options open to PhD scientists in the biomedical sciences, and providing preparation for the different career paths. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings, and oral presentations. This course will be graded satisfactory/unsatisfactory. (Same as CHEM 816, MDCM 816 and PHCH 816.) Prerequisite: Permission of instructor. SEM.

BIOL 817. Rigor, Reproducibility and Responsible Conduct in Research. 3 Hours.
This class addresses the recognized problems in rigor, reproducibility, and transparency that are plaguing modern science. Students will learn the fundamentals of hypothesis design, avoiding bias, randomization, sampling, and appropriate statistical analyses, reagent validation, among other key topics. This course also introduces principles for being an ethical, responsible, and professional research scientist. Topics include: plagiarism, fabrication and falsification of data, record keeping and data sharing, mentor/mentee and collaborative relationships, among others. The class will include a mixture of lecture, case studies and discussion. (Same as CHEM 817/MDCM 817/PHCH 817.) Prerequisite: Graduate student. SEM.

BIOL 841. Biometry I. 5 Hours.
The application of statistical methods to data from various fields of biological research. Special emphasis is placed on practical computational procedures. Prerequisite: College algebra. LEC.

BIOL 848. Phylogenetic Methods. 4 Hours.
A survey of methods for inferring phylogenetic trees from character data and using phylogenies to address evolutionary questions. Lectures will present the relevant theory and algorithmic description of methods. Computer lab will familiarize students with software that implements the analyses discussed in lecture. Intended for graduate students specializing in systematics. Prerequisite: BIOL 845 and BIOL 841 or consent of instructor. LEC.

BIOL 860. Principles and Practice of Chemical Biology. 3 Hours.
A survey of topics investigated by chemical biology methods including: transcription and translation, cell signaling, genetic and genomics, biochemical pathways, macromolecular structure, and the biosynthesis of peptides, carbohydrates, natural products, and nucleic acids. Concepts of thermodynamics and kinetics, bioconjugations and bioorthogonal chemistry will also be presented. (Same as CHEM 860, MDCM 860 and PHCH 860.) Prerequisite: Permission of instructor. LEC.

BIOL 890. Advanced Study in Microbiology. 1-10 Hours.
Original investigation by students at the master's degree level. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Ten or more hours of microbiology and consent of department. RSH.

BIOL 895. Human Genetics. 3 Hours.
A lecture course providing balanced coverage of Mendelian and molecular genetics of humans; includes discussions and presentations on current issues in human and medical genetics. Prerequisite: A course in genetics. LEC.

BIOL 899. Master's Thesis. 1-10 Hours.
Research which is to be incorporated into an M.A. thesis. Not more than ten hours may be earned. Graded on a satisfactory progress/limited progress/no progress basis. THE.

BIOL 901. Graduate Seminar in Biochemistry and Biophysics. 1 Hour.
Advanced course examining current research topics in biochemistry and biophysics. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental admission. LEC.

BIOL 902. Graduate Seminar in Molecular, Cellular, and Developmental Biology. 1 Hour.
Advanced course examining current research topics in molecular, cellular, and developmental biology. Extensive student/faculty interaction is emphasized utilizing lectures, class discussion of assigned readings of research reports, and oral presentations. Prerequisite: Enrollment in graduate school, and departmental permission. SEM.

BIOL 905. Advanced Molecular Genetics. 1-3 Hours.
A review of current literature in molecular genetics. RSH.

BIOL 906. Advanced Genetics. 1-3 Hours.
May be repeated for credit up to six hours. Review of current literature and genetic theory of selected topics such as population, molecular, quantitative, and physiological genetics. RSH.

BIOL 918. Modern Biochemical and Biophysical Methods. 4 Hours.
This course emphasizes the use of techniques for solving problems of structure and function of biological macromolecules. Students will complete several modules that consist of lectures relating to theory and practical aspects of each methodological approach, and apply these techniques to solving a specific problem. Students will submit a paper describing the resulting data and conclusions. Prerequisite: BIOL 807, BIOL 817, or permission of instructor. LEC.
BIOL 925. Research Grant Proposal Preparation. 3 Hours.
This course introduces the basics of preparing a successful scientific grant application. Topics to be covered include how to develop a novel, fundable project, scientific writing and grantsmanship, and what criteria reviewers consider in evaluating grants. The course will be a mix of instruction and class discussion. Prerequisite: Admission to the graduate program in Molecular Biosciences, or consent of instructor. LEC.

BIOL 943. Multivariate Data Analysis. 3 Hours.
Matrix formulation of multivariate models and data. Specific methods covered include Principal Components Analysis, Factor Analysis, Multiple Group Discriminant Analysis and Canonical Analysis, and Canonical Correlation Analysis. Prerequisite: Knowledge of elementary matrix algebra. LEC.

BIOL 944. Topics in Quantitative Ecology. 1-3 Hours.
Presentation and discussion by instructor and students of mathematical and statistical concepts in ecology. Topics are selected from texts or sets of readings. LEC.

BIOL 950. Evolutionary Mechanisms. 3 Hours.
Reading and discussions of evolutionary mechanisms from the genetic, ecologic, and systematic viewpoints. Prerequisite: BIOL 412. LEC.

BIOL 952. Introduction to Molecular Modeling. 3 Hours.
Introduction to theory and practice of contemporary molecular modeling, including molecular mechanics, molecular dynamics, computer graphics, data analysis, use of structure and sequence databases, docking, and homology modeling. Weekly computer laboratory section aimed at allowing participants to pursue independent research projects that incorporate modeling aspects. Lectures, laboratory manuals, program descriptions, and technical notes are presented on course web page. Prerequisite: Graduate standing or consent of instructor. LEC.

BIOL 985. Advanced Study. 1-10 Hours.
Individual investigations; laboratory, field or museum; or reading assignments in specialized topics not ordinarily treated in other courses. Graded on a satisfactory/unsatisfactory basis. RSH.

BIOL 999. Doctoral Dissertation. 1-12 Hours.
Original research that is to be incorporated into a Ph.D. dissertation. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Master of Arts in Ecology and Evolutionary Biology

Ecology and Evolutionary Biology Graduate Programs

The department comprises a large number of biologists with a variety of research interests. Three broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the department’s website (http://www2.ku.edu/~eeb/).

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1241).)

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The departmental graduate admissions committee reviews the record of each applicant. Admission is based on background, preparation, test scores, and academic performance. The committee considers each candidate’s overall undergraduate record in the context of the institution(s) from which the record was received. A graduate student should have a broad undergraduate background in natural science and math, including calculus, physics, chemistry, organismal biology, genetics, ecology, and evolutionary biology. Faculty recommendations, honors, awards, undergraduate research experience, publications, and professional experience also are considered. Enthusiasm, scientific expertise, and clarity of writing as evidenced by the applicant’s essay are particularly important.

A bachelor's degree or equivalent and a minimum overall grade-point average of 3.0 on a 4.0 scale is required for regular admission. The master's degree is not a prerequisite for entering a Ph.D. program. Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/). For more details on admission requirements, visit the EEB website (http://www2.ku.edu/~eeb/).

Applicants are encouraged to seek a faculty sponsor through correspondence with one or more faculty members prior to or during the application process. Prospective doctoral students who would prefer to do rotations with two or three faculty members in their first year, should indicate a general field of interest and a short list of prospective faculty mentors on their application. Interested students are encouraged to visit campus to meet faculty members and graduate students. Graduate school is critically important in beginning a career, and the choice of a program in which to enroll should be made carefully.

The number of students admitted is limited. Qualified candidates may be denied admission because of lack of a faculty sponsor, financial support, or research facilities.

Applications and supplemental materials may be submitted online. Applications from underrepresented groups are encouraged. For a detailed description of the application process, visit the EEB website (http://www2.ku.edu/~eeb/). All application materials for fall
admission must be received no later than December 1. Only complete applications are considered. Send inquiries to the graduate coordinator (eebgradstudy@ku.edu).

M.A. Degree Requirements:
Ecology and Evolutionary Biology
Options I (Thesis) and II (Nonthesis)

Two options leading to the M.A. degree are offered. Option I (Thesis) is research-oriented and requires a thesis. Option II (Nonthesis) emphasizes broader graduate training without a concentration on research. For each option, the advisory committee must have at least 3 Graduate Faculty members, 2 of whom must be in EEB. No faculty member outside the department is required. A faculty member from a different department with a courtesy appointment in the student’s home department may serve in fulfillment of the committee majority.

Required Course Work

Most course work requirements are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add course requirements during annual meetings. Listed below are specific course requirements for all master’s students in the EEB department:

1. Students must complete BIOL 805 Scientific Integrity in Ecology and Evolutionary Biology during the first year of graduate education in the fall semester. Students are expected to attend departmental seminars in subsequent semesters.
2. Students must complete BIOL 801 Core Topics in Current EEB Research Seminar during the first year of graduate study in the spring semester.
3. Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.
4. Students pursuing Option I (Thesis) must complete a minimum of 1 credit hour of BIOL 899 Master’s Thesis.
5. 50% of the coursework required for the master’s degree must be taken at the 700 level or above.

Master’s students must meet a credit-hour-completion requirement. Those in the thesis program must complete a minimum of 30 graduate-level credit hours with no more than 10 of the 30 from enrollment in thesis, research, or advanced study hours. Those in the nonthesis program must complete a minimum of 36 graduate level credit hours with no more than 12 of the 36 from enrollment in thesis, research, or advanced study hours.

Master’s Defense for Option I (Thesis) Students

During the final semester of enrollment, students pursuing the Option I (Thesis) master’s degree must present the results of thesis research in a public forum and complete a thesis defense. The thesis presentation should follow the standard departmental seminar format. The master’s thesis defense consists of a substantive test of the student’s knowledge of the field and the thesis topic, with approximately 50 percent of the time devoted to questions in the general examination realm, covering the full breadth of the candidate’s field of study (i.e., general knowledge of ecology and evolutionary biology). At the discretion of the student and advisor, the exam may be held on the same day as the thesis presentation, or the events may be held on separate days. The defense examining committee must be composed of 3 members of the Graduate Faculty, the majority of which must be tenured, or tenure-track EEB faculty with regular or dissertation status on the Graduate Faculty. In some cases it may be possible for committee members to attend the examination via mediated means such as tele/video-conferencing (for details view the exam attendance policy [http://www.policy.ku.edu/graduate-studies/oral-exam-attendance/]). To pass the thesis defense, a student must receive a majority of passing votes from the examining committee. Students must contact the EEB graduate coordinator 2 weeks prior to the anticipated presentation and defense to request departmental and College permission to schedule the events.

Students planning to defend a master's thesis must submit copies of the thesis to the entire examining committee and to the GPC no less than 2 weeks (or longer if requested by the student's committee) in advance of the planned defense. The thesis should meet general formatting regulations (http://clas.ku.edu/coga/graduation/masters/).

Master’s Final Examination for Option II (Nonthesis) Students

During the final semester of enrollment in course work when nonthesis program activities are nearing completion, students pursuing the Option II (Nonthesis) master’s degree must successfully complete a general oral examination. The examination’s structure is similar to that of the doctoral oral comprehensive examination; however, the examination is shorter, and depth and breadth of knowledge required of the student are less comprehensive than expected of a successful doctoral aspirant. The examining committee must be comprised of at least 3 members of the Graduate Faculty, the majority of which must be tenured or tenure-track EEB faculty with regular or dissertation status on the Graduate Faculty. In some cases it may be possible for committee members to attend the examination via mediated means such as tele/video conferencing (for details view the exam attendance policy [http://www.policy.ku.edu/graduate-studies/oral-exam-attendance/]). To pass the master’s final examination, a student must receive a majority of passing votes from the examining committee. Students must contact the EEB graduate coordinator 2 weeks prior to the anticipated presentation to request departmental and College permission to schedule the event.

Research

Upon completion of their work, students in M.A. Option I (Thesis) must submit a thesis reporting original research. The committee-approved thesis must be submitted electronically to Graduate Studies. Instructions for formatting and submitting the electronic thesis are online (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/). The thesis also must be submitted to the department as a PDF document. Copies of the title and acceptance pages containing the signatures of the examining committee members must be submitted to both the College and the department.

Students in M.A. Option II (Nonthesis) must conduct research with 1 or more faculty members involving work on a research problem that requires use of literature, and laboratory or field techniques. Nonthesis students must submit a comprehensive written report to the advisory committee. Examples of research problems that could be the basis of the written report include a literature review of a critical issue in a scientific discipline, original research, or other creative activity approved by the advisory committee. The committee-approved report must be submitted to the department as a PDF document. A copy of the title page containing signatures of the advisory committee members also must be submitted.
Time Constraints

A student beginning graduate study with only a bachelor’s degree is expected to complete all work for the master’s degree within 2 or 3 years of initial enrollment at KU. A student beginning graduate study with a master’s degree in the biological sciences should complete all work for the doctoral degree within 4 to 5 years of initial enrollment at KU. A student beginning graduate study with only a bachelor’s degree in the biological sciences should complete all work for the doctoral degree within 5 or 6 years.

The maximum tenure for EEB graduate students varies according to degree program. Master’s students (http://policy.ku.edu/graduate-studies/ma-program-time-constraints/) are allowed a maximum of 7 years to complete the degree program, and doctoral students (http://policy.ku.edu/graduate-studies/doctoral-program-time-contraints/) are allowed 8 years. Students earning both an M.A. and a Ph.D. from KU have a total of 10 years to complete both degrees. Petitions to extend the time limits must be approved by the student’s advisory committee and forwarded to the EEB Graduate Program Committee for consideration before being forwarded to the College for final approval.

As required by the university, doctoral students must complete the equivalent of at least 3 academic years of full-time graduate study. This may include the time spent earning a master’s degree.

Doctor of Philosophy in Ecology and Evolutionary Biology

Ecology and Evolutionary Biology

Graduate Programs

The department comprises a large number of biologists with a variety of research interests. 3 broad overlapping themes capture the interests and activities in EEB — biodiversity and macroevolution, ecology and global change biology, and evolutionary mechanisms. The department offers graduate study leading to Master of Arts and Doctor of Philosophy degrees in ecology and evolutionary biology. General information about the department and its faculty, current graduate students, admission, and financial support may be found on the department’s website (http://www2.ku.edu/~eeb/).

Neotropical biodiversity is a special area of concentration among EEB faculty. Many faculty members have courtesy appointments in the Latin American Area Studies Program, which fosters multidisciplinary research in Latin America across the campus. KU is a member of the Organization for Tropical Studies, and many faculty members and students participate in advanced, field-oriented OTS courses. Graduate students can receive fellowships for courses, e.g. BIOL 786 Fundamentals of Tropical Biology, or research projects in Costa Rica. Other EEB faculty have research concentrations in Asia, Africa, Antarctica, and elsewhere, creating a genuinely global reach for EEB research activities.

(B.A. and B.S. degree programs in biology are listed under Biology Undergraduate Programs (p. 1241).)

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

The departmental graduate admissions committee reviews the record of each applicant. Admission is based on background, preparation, test scores, and academic performance. The committee considers each candidate’s overall undergraduate record in the context of the institution(s) from which the record was received. A graduate student should have a broad undergraduate background in natural science and math, including calculus, physics, chemistry, organismal biology, genetics, ecology, and evolutionary biology. Faculty recommendations, honors, awards, undergraduate research experience, publications, and professional experience also are considered. Enthusiasm, scientific expertise, and clarity of writing as evidenced by the applicant’s essay are particularly important.

A bachelor’s degree or equivalent and a minimum overall grade-point average of 3.0 on a 4.0 scale is required for regular admission. The master’s degree is not a prerequisite for entering a Ph.D. program. Non-native speakers of English must meet English proficiency requirements as described here (http://graduate.ku.edu/english-proficiency-requirements/). For more details on admission requirements, visit the EEB website (http://www2.ku.edu/~eeb/).

Applicants are encouraged to seek a faculty sponsor through correspondence with one or more faculty members prior or during the application process. Prospective doctoral students who would prefer to do rotations with two or three faculty members in their first year, should indicate a general field of interest and a short list of prospective faculty mentors on their application. Interested students are encouraged to visit campus to meet faculty members and graduate students. Graduate school is critically important in beginning a career, and the choice of a program in which to enroll should be made carefully.

The number of students admitted is limited. Qualified candidates may be denied admission because of lack of a faculty sponsor, financial support, or research facilities.

Applications and supplemental materials may be submitted online. Applications from underrepresented groups are encouraged. For a detailed description of the application process, visit the EEB website (http://www2.ku.edu/~eeb/). All application materials for fall admission must be received no later than December 1. Only complete applications are considered. Send inquiries to the graduate coordinator (eebgradstudy@ku.edu).

Ph.D. Degree Requirements:

Ecology and Evolutionary Biology

Required Course Work

Most course work requirements for EEB graduate students are identified during the student’s preliminary advisory meeting. Students are expected to take graduate-level courses (or have equivalent knowledge) in ecology, evolution, and systematics. A student’s advisory committee may add
course requirements to a student's degree program during annual meetings. Listed below are specific course requirements for all doctoral students in the EEB department:

1. **Students must complete BIOL 805 Scientific Integrity in Ecology and Evolutionary Biology during the first year of graduate education in the fall semester. They are expected to attend departmental seminars in subsequent semesters.**

2. **Students must complete the BIOL 801 Core Topics in Current EEB Research seminar course during the first year of graduate study in the spring semester.**

3. **Students must complete a graduate-level course in statistics, typically fulfilled by completing BIOL 841 Biometry I. Alternatively, students may demonstrate equivalent background knowledge.**

4. **Students pursuing the doctorate must complete at least 1 credit hour of BIOL 999 Doctoral Dissertation.**

### Assistantships

Doctoral students must complete at least 2 semesters of half-time supervised teaching, curatorial, or research assistantships. Alternative experiences may be approved by the student's advisory committee.

### Research Skills and Responsible Scholarship

All students aspiring to the Ph.D. are required by the Office of Graduate Studies to respond to the need for training in Research Skills and Responsible Scholarship (see official policy at [http://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship](http://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship)). In addition, students must develop, in consultation with their preliminary advisory committees, a list of additional research skills that will be necessary for successful completion of the doctoral program; these skills may include fluency in English (if not the native language); fluency (reading or speaking) in other foreign languages; and skills such as scientific illustration, phylogenetic methods, genomic analysis, geographic information systems, advanced mathematics and statistics, computer programming, biochemical analyses, advanced microscopy, and others. Students are strongly encouraged to develop foreign language skills pertinent to their research, in view of the need for effective communication in an increasingly global academic community. These research skills will be determined initially by the student's Preliminary Advisory Meeting and Research Advisory committees, with the potential for modification as specific dissertation plans evolve, proposed in a letter to the Graduate Coordinator of the department, and approved by the Graduate Program Committee; successful fulfillment will be determined by the student's Research Advisory Committee, documented in a letter to the Graduate Coordinator of the department, and approved by the Graduate Program Committee.

1. **Reading Knowledge of a Foreign Language**

   Students without prior experience must enroll in a 3-credit-hour reading course in a major modern language and achieve a final grade of A or B. Students with prior knowledge of a language may choose instead to translate, in a set amount of time, a pre-approved passage from the scientific literature in that language. Approval of the foreign language requirement must be obtained from the instructor of the reading course, from an appropriate representative of a language department, or from a qualified individual from EEB or another department.

2. **Fluency in a Foreign Language**

   Fluency in reading, writing, and speaking a language that is not native to the student is determined by a faculty member who is fluent in the chosen language. Whenever possible, a qualified faculty member from the department should make the determination; otherwise, the student should contact the appropriate language department to identify a qualified individual. The faculty member must submit a letter to the EEB graduate program committee indicating that the student is fluent.

   If the student is not a native English speaker, the student’s committee may determine fluency in reading, writing, and speaking English. Following the committee’s determination, the student’s advisor must provide a letter to the EEB graduate program committee indicating that the student is fluent.

3. **Other Research Skills**

   Other research skills may be attained either through course work or through completion of a project. A list of previously approved skills appears in the EEB Graduate Student Handbook ([http://eeb.ku.edu/student-handbook](http://eeb.ku.edu/student-handbook)). Other courses or projects can be added to this list by obtaining approval from the student’s mentor or by petitioning the EEB graduate program committee for pre-approval.

   Students with no prior experience using the chosen research skill should take a course recommended by the department; students with experience might choose to develop a project. A qualified faculty member must approve the choice of a project. Upon completion, a letter that describes the project and is signed by the supervising faculty member should be submitted to the departmental graduate coordinator for documentation purposes.

   **Note:** Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library ([https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/](https://policy.ku.edu/graduate-studies/research-skills-responsible-scholarship/)).

### Residence Requirement

Graduate Studies requires all doctoral students to complete 2 terms of full-time resident study at KU or the equivalent spread over several part-time semesters. Summer enrollment does not count toward fulfillment of the requirement. See the KU Policy Library ([https://policy.ku.edu/graduate-studies/doctoral-program-time-contraints/](https://policy.ku.edu/graduate-studies/doctoral-program-time-contraints/)) for complete details.

### Comprehensive Oral Examination

The comprehensive oral examination tests the depth and breadth of the student’s knowledge and explores the student’s ability to synthesize information and think critically. The examination should include, but is not limited to, questions relating to ecology and evolutionary biology, as well as information directly relevant to the proposed field of dissertation research. Examination committee members determine the questions, but the following is a suggested outline for oral comprehensive exams, in roughly equal proportions:

1. General ecology and evolutionary biology
2. Research area (e.g., ecology, systematics, or evolutionary genetics)
3. Specific research foci (e.g., sub-fields of research areas, taxonomic specialization, specific analytical methods)

Examinations are conducted in English. Students are encouraged to take the examination within four semesters of entering the program and are expected to complete the examination within five semesters. To be eligible to take the examination, both the Research Skills and Responsible Scholarship requirement and the doctoral residence requirement must be fulfilled and documented. Students must acquire approval to take the comprehensive oral examination from (1) dissertation adviser(s), (2) remaining Research Advisory Committee (RAC) members, and (3) Graduate Program Committee. Students must contact the EEB graduate coordinator no later than 2 weeks prior to the anticipated examination date to request departmental and College permission to schedule the event.

Doctoral committees must comply with the Graduate Studies Policy (http://policy.ku.edu/graduate-studies/doctoral-student-oral-exam-committee-composition/) on committee composition.

Exam outcomes are pass or fail; honors is not an option. A majority vote of the committee is required to pass the examination. If the adviser or committee members wish, secret ballots may be used. If the student fails the comprehensive oral examination, another examination may be scheduled a minimum of 90 days after the first examination, but under no circumstances may a student take the examination more than twice.

A successful pass of the comprehensive oral examination is considered valid by the university for 5 years. Doctoral candidates who do not complete the dissertation within 5 years may be required to take the examination again to demonstrate current knowledge in the field.

All doctoral students must prepare a dissertation proposal of 5–8 pages, with detail and clarity on par with NSF, NIH, or comparable proposals. Chapters should be described in sufficient detail that RAC members can assess scientific merit, feasibility, and whether the doctoral dissertation will fulfill the scope and requirements for a Ph.D. Dissertation proposals must be approved by the student’s RAC by the time the student submits their second annual report to the department (end of 5 semesters).

Failure to obtain approval of a dissertation proposal will result in an “unsatisfactory” annual evaluation. A suggested time frame would entail: Proposals distributed to the RAC committee at least two weeks prior to the second RAC meeting (end of 5 semesters). At this RAC meeting, students defend their proposal in the form of a presentation and must address any questions or concerns, before being approved by the RAC (majority) committee. Approval of dissertation proposal must be reported in the annual RAC report. Students are encouraged to develop the proposal ideas with their mentor and advisory committee well in advance of the meeting.

Research Progress, Final Oral Examination, and Dissertation Defense

After passing the comprehensive oral examination and advancing to degree candidacy, doctoral students are expected to focus on completing original research and writing of the dissertation. Although opportunities for taking valuable courses may arise, the majority of a doctoral candidate’s enrollment should be in dissertation credits (BIOL 999 Doctoral Dissertation).

It is generally expected that the dissertation should be completed two to three years after advancing to candidacy. During these years, the student should continue to meet with his or her advisory committee on an annual basis to receive guidance on research progress. Committee membership should follow university requirements.

When the student and the faculty advisor are able to reasonably predict when the dissertation research and writing will be done, the dissertation defense and final oral examination may be scheduled. At least 5 months must have elapsed between successful completion of the oral examination and the date of the defense. Students must contact the EEB graduate coordinator at least 2 weeks prior to the anticipated defense date to request departmental and university approval of the defense.

A complete dissertation must be provided to the EEB Graduate Program Committee and to the student’s entire dissertation committee no less than 2 weeks (or longer if requested by the student’s committee) in advance of the planned defense. All members of the dissertation committee are required to read and comment on the work. 3 members are designated readers and provide a more detailed review. The dissertation must be written to meet general university regulations (http://www.graduate.ku.edu/electronic-thesis-and-dissertation/).

The dissertation defense and final oral examination include a presentation of the candidate’s dissertation as a formal, public lecture. Whenever possible, the presentation should be part of the regular departmental seminar series. The presentation is followed by a question period, after which the final oral examination committee meets with the student for further discussion of the dissertation. A majority vote of the committee is required for the student to pass the examination; 80 percent of the committee must agree to award a student Honors. Both the dissertation and the presentation are considered in the decision. In rare cases it may be possible for committee members to attend the defense and examinations via mediated means such as tele/video-conferencing (for details view the exam attendance policy statement (http://www.policy.ku.edu/graduate-studies/oral-exam-attendance/)). After passing the final oral examination, the student will make any corrections to the dissertation that are required. Along with the title and acceptance pages, the final version will be submitted for approval to the department and the University.

Time Constraints

A student beginning graduate study with only a bachelor’s degree is expected to complete all work for the master’s degree in 2 or 3 years after initial enrollment at KU. A student beginning graduate study with a master’s degree in the biological sciences should complete all work for the doctoral degree within 4 or 5 years. A student beginning graduate study with only a bachelor’s degree in the biological sciences should complete all work for the doctoral degree within 5 or 6 years.

The maximum tenure for EEB graduate students varies according to degree program. Master’s students (http://policy.ku.edu/graduate-studies/ma-program-time-constraints/) are allowed a maximum of 7 years to complete the degree program, and doctoral students (http://policy.ku.edu/graduate-studies/doctoral-program-time-constraints/) are allowed 8 years. A student earning both an M.A. and a Ph.D. from KU has a total of 10 years to complete both degrees. Petitions to extend the time limits must be approved by the student’s advisory committee and forwarded to the EEB Graduate Program Committee for consideration before being forwarded to the College for final approval.

As required by the university, doctoral students must complete the equivalent of at least 3 academic years of full-time graduate study. This may include the time spent earning a master’s degree.
Department of Economics

Why study economics?
Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit “Big Data” to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among aggregate output, interest rates, inflation, unemployment levels and international exchange rates.

Undergraduate Programs
The study of economics offers students insight into some of the most fundamental issues facing societies today. What goods and services should we produce? How should they be produced? How should they be distributed around the world? Economics is outstanding preparation for a career in finance, business, policy analysis, international relations, or any other field that requires rigorous analytic thinking. It also makes an excellent foundation for graduate study in economics, business, law, political science, or public administration.

Courses for Nonmajors
ECON 104 is recommended for students who want only an introductory course. Students planning to teach social sciences should consult the School of Education. Students who plan to enter the School of Business in the junior year should consult the School of Business. Students who plan to enter the School of Journalism should consult the School of Journalism and Mass Communications.

Graduate Programs
The economics department offers a Master of Arts degree and a Doctor of Philosophy degree and, in conjunction with the School of Law, a program in which one can earn the Master of Arts and Juris Doctor degrees. These programs help students prepare for careers in education, government, and business.

Students who are interested in enrolling in graduate level coursework in the Department of Economics without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (https://economics.ku.edu/apply/) webpage for further details.

Courses
ECON 104. Introductory Economics. 4 Hours SF GE12/GE3S / S.
An introduction to modern economics designed primarily for students who do not plan to major in economics. Topics include economic history, the operation of economic institutions, and the formation and execution of economics policies to meet the current problems of the domestic and international economy. Course may be offered in lecture or online format. Prerequisite: MATH 101 or MATH 104, or LAS 108, or eligibility for MATH 115 or MATH 125. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. LEC.

ECON 110. The Economics of Globalization. 3 Hours SF AE42 / S.
The course emphasizes the application of economic methods of analysis to the public policy issues that globalization creates. Topics covered may include the following: winners and losers from trade; links between trade and labor markets; links between trade and foreign investment; the international financial system and exchange rates; outsourcing and multinational corporations; international institutions and regional trade agreements. LEC.

ECON 142. Principles of Microeconomics. 3 Hours SF GE12/GE3S / S.
An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. LEC.

ECON 143. Principles of Microeconomics, Honors. 3 Hours SF GE12/GE3S / S.
An honors section of ECON 142. An analytical introduction to microeconomics. Topics include theory of markets, public policy, international trade, economic efficiency, and equity. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. LEC.

ECON 144. Principles of Macroeconomics. 3 Hours SF GE12/GE3S / S.
An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. LEC.

ECON 145. Principles of Macroeconomics, Honors. 3 Hours SF GE12/GE3S / S.
An honors section of ECON 144. An analytical introduction to macroeconomics. Topics include determination of aggregate income, employment, inflation, exchange rates, and the role of fiscal and monetary policy in dealing with unemployment, inflation, and economic growth. Prerequisite: Consent of the Economics Department and MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. LEC.

ECON 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Economics. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ECON 250. Study Abroad Topics in: ______. 1-5 Hours S.
This course is designed for the study of special topics in economics at the freshman/sophomore level. Coursework must be arranged by the office of KU Study Abroad and approved by the Economics Department. This course may be repeated for credit if content varies. LEC.

ECON 310. Topics in Applied Economics: ______. 3 Hours S.
(Topic, instructor, and specific prerequisites to be announced in the Schedule of Classes.) This course will focus on an area of applied economics of current interest. This course cannot be used to fulfill the
elective course requirements for the Economics major or the Economics minor, LEC.

ECON 426. Statistics and Data Analysis for Economics. 3 Hours S.
An introduction to probability and statistical methods for empirical work in economics. Probability, random variables, sampling, descriptive statistics, probability distributions, estimation hypothesis testing, introduction to the regression model. Prerequisite: MATH 115 or MATH 125. LEC.

ECON 450. Study Abroad Topics in: ______. 1-5 Hours S.
This course is designed for the study of special topics in economics at the junior/senior level. Coursework must be arranged by the office of KU Study Abroad, approved by the Economics Department, and may count as an economics elective for economics majors. This course may be repeated for credit if content varies. LEC.

ECON 498. Oswald Undergraduate Seminar in Economics. 3 Hours S.
Examine issues in economics of contemporary interest. Enrollment is limited to current Oswald, Boynton, and Pritchard scholarship holders. May be repeated for credit, but does not fulfill the elective course requirements for the Economics major or minor. Prerequisite: ECON 520 or ECON 521, ECON 522 or ECON 523, and permission of department. LEC.

ECON 505. History of Economic Analysis. 3 Hours S.
The history of intellectual efforts to understand economic phenomena and the impact of these efforts on the social and economic development of the modern world. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 510. Energy Economics. 3 Hours S.
The application of basic economic concepts and methods to the analysis of energy markets, regulation, and policies. Topics covered include energy trends and projections, economic growth and resource exhaustion, the organization and regulation of fossil fuel industries, nuclear power and non-conventional energy technologies, the world oil market, energy conservation, environmental pollution, and national energy policies in the U.S. and other developed as well as developing countries. Prerequisite: ECON 142 or ECON 143. LEC.

ECON 513. Behavioral Economics. 3 Hours.
Decisions link our thoughts to our actions and as a result define who we are and who people think we are. This makes decision making a fundamental life skill. But, can we make better decisions? This course will introduce you to the science of decision making that has developed as scholars including biologists, economists, mathematicians, philosophers, psychologists, and others have sought to answer this very question. Over the course of the semester we will examine what we have learned so far such as how people predict and mispredict events, how people make decisions and how their decisions can be quite irrational from one perspective but simultaneously appear quite reasonable, how people bargain and why they sometimes choose to cooperate and other times not, and why negotiating can be so difficult. (Same as PSYC 513.) Prerequisite: PSYC 104 or ECON 142; MATH 101 or MATH 103 or MATH 104, or eligibility for MATH 115 or MATH 125 or MATH 126. LEC.

ECON 515. Income Distribution and Inequality. 3 Hours AE141 / S.
An analysis of the distribution of income and wealth in the United States and a few other developed countries. The concepts of economic inequality, economic justice, statistical measures of inequality and their applications will be discussed. Various theories of income distribution (e.g., Ricardian, Marxian, neoclassical, and neo-Keynesian) will be covered. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143. LEC.

ECON 516. Income Distribution and Inequality, Honors. 3 Hours AE41 / H.
This course examines the definition and impact of social and economic inequality. Beginning with a review of economic and philosophical perspectives of inequality, the course considers the measurement of inequality, current trends in U.S. and international inequality, and policies designed to eliminate inequality. The course requires both writing and quantitative analysis and includes a term paper. Students should be comfortable with methods of quantitative social science. The Honors section is taught as a seminar where philosophical perspectives on inequality are debated and discussed. Prerequisite: ECON 142 or ECON 143 and ECON 144 or ECON 145. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. LEC.

ECON 520. Microeconomics. 3 Hours S.
The theory of consumption, production, pricing, and resource allocation. Not open for credit to students with credit in ECON 524. Prerequisite: ECON 142 or ECON 143; and MATH 115 or MATH 125. LEC.

ECON 521. Microeconomics Honors. 3 Hours S.
The theory of consumption, production, pricing, and resource allocation. Prerequisite: ECON 142 or ECON 143; MATH 115 or MATH 125; and consent of department. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. LEC.

ECON 522. Macroeconomics. 3 Hours S.
The theory of national income and employment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 144 or ECON 145; and MATH 115 or MATH 125. LEC.

ECON 523. Macroeconomics Honors. 3 Hours S.
The theory of national income and unemployment, the analysis of aggregate demand, the general degree of utilization of productive resources, the general level of prices, and related questions of policy. Prerequisite: ECON 144 or ECON 145; and MATH 115 or MATH 125. Open only to students who have been admitted to the University Honors Program, or by consent of instructor. LEC.

ECON 526. Introduction to Econometrics. 3 Hours S.
An introduction to the statistical analysis of economic data and its application to economic inquiry. Includes extensive use of statistical software. Prerequisite: MATH 115 or MATH 125; ECON 426 or MATH 526. LEC.

ECON 530. American Economic Development. 3 Hours H.
An introductory study of the development of the American economy from colonial times to the present. Investigates long-term trends in output, population, and output per capita, as well as short-term fluctuations, and the variables and institutions that determined these fluctuations and trends. (Same as HIST 628.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 535. Economic History of Europe. 3 Hours S/W.
An introductory study of European economic history from the Middle Ages to the 1980s. Investigates the sources of economic growth, and the interaction between economic forces and social institutions. Topics covered will include the rise of commerce, the agricultural and industrial revolutions, imperialism, the Great Depression, and European recovery after World War II. (Same as HIST 528.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 536. Economic Issues of the European Union. 3 Hours S.
A survey of the economies of the European Union, with a focus on the economic development of the member states since World War II, and
an examination of the various economic issues confronting them today. (Same as EURS 536.) Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 540. Recent American Economic History. 3 Hours S.
An empirically oriented examination of the American economy designed to apply economic concepts to a wide variety of topics such as monetary and fiscal policy, income distribution, the Great Depression, poverty, population growth, the defense sector, education, research and development, technological change, and industrial organization. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]; ECON 520 or ECON 521 and/or ECON 522 or ECON 523 recommended. LEC.

ECON 550. Environmental Economics. 3 Hours U.
This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as EVRN 550.) Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143. LEC.

ECON 560. Economic Systems. 3 Hours S.
Critical analysis of economic theories underlying such economic systems as capitalism, different types of socialism, communism, and fascism. Comparative study of economic planning, production, distribution, price formation, economic institutions, and forms of government in countries under different economic systems. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 562. The Russian Economy. 3 Hours S/W.
An analytical survey of Russian economic development, with emphasis on the structure and operation of the Russian economy and transition issues. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 563. Current Economic Issues of East Europe. 3 Hours S.
An institutional and theoretical analysis of the issues arising from the transition from a command economy to a free market-oriented economy. With emphasis on the former Soviet Union, topics will include: assessment of the central planning experience; changes in property rights and their effect on resource allocation; market mechanisms and how they work when market institutions are at the formative stage; and public interest under privatization. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 564. Topics in Applied Economics: ______. 3 Hours S.
This course will focus on an area of applied economics of current interest. This course can be used to fulfill the elective course requirement for the Economics major. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143 or ECON 144 or ECON 145 or ECON 426. LEC.

ECON 570. Economics for Management Decisions. 3 Hours S.
Economic analysis of the firm with emphasis on managerial decisions in a business environment. Topics include supply and demand with applications, consumer behavior, quantitative demand analysis, production and cost, transactions costs and the organization of the firm, strategic decisions in alternative market environments, risk and uncertainty, imperfect information, and project evaluation. Prerequisite: ECON 142 or ECON 143. LEC.

ECON 582. Economic Development. 3 Hours S.
An introduction to economic growth and development in high and low income countries, problems of development, and development policy. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143. LEC.

ECON 583. Economic Issues of East Asia. 3 Hours S.
This course will study the economics of the East Asian countries, especially China, Japan, Korea, and Taiwan. Topics to be covered include economic growth, development and change, international trade, inflation, unemployment, income distribution, and urbanization. Emphasis will be on the post World War II period. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 584. Economic Development of Latin America. 3 Hours S.
This course explores development strategies followed in the countries of Latin America and the Caribbean, and analyzes current debates over development strategy. Topics covered include: debt, structural adjustment, and multilateral lending agencies; trade policy, and regional or hemispheric integration; state intervention in the economy; the role of elites; environmental degradation and sustainable development; land reform and agricultural policy; transnational enterprises and foreign investment; women in work and the household; migration (rural-urban, and international); and grassroots development projects. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 585. Economic Issues in China. 3 Hours S.
This course studies the Chinese economy, especially during the post-1979 reform period, and its relationship to the development of the Greater China Circle (China, Hong Kong, and Taiwan). Topics to be covered include economic development during the pre-1979 reform period, economic reform, and its impacts on China, Hong Kong, Taiwan, and lessons from the Chinese economic reforms. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 586. Economic Development of Africa. 3 Hours S.
This course studies current economic issues facing African countries. It studies the general characteristics of several African economies and examines the impact of economic development policies, including those of international organizations, on the economies of Africa. Topics include poverty, income inequality, debt, foreign investment policies, trade policies, and government regimes. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 587. Economic Development of Latin America. 3 Hours S.
An empirically oriented examination of the American economy designed to apply economic concepts to a wide variety of topics such as monetary and fiscal policy, income distribution, the Great Depression, poverty, population growth, the defense sector, education, research and development, technological change, and industrial organization. Prerequisite: ECON 104 or ECON 105 or [(ECON 142 or ECON 143) and (ECON 144 or ECON 145)]. LEC.

ECON 588. Economic Development. 3 Hours S.
This course will focus on an area of applied economics of current interest. This course can be used to fulfill the elective course requirement for the Economics major. Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143 or ECON 144 or ECON 145 or ECON 426. LEC.

ECON 590. Game Theory. 3 Hours S.
Analysis of strategic choice problems. Firms, voters, bargainers, animals, sports competitors, and persons in everyday life choose alternative options with the outcomes depending on the choices of one or more other similar decision makers. Strategies of rational choices will be derived and analyzed in economic and other environments. Prerequisite: ECON 142 or ECON 143. LEC.

ECON 597. Research in Economics. 1-3 Hours AE61 / S.
A directed reading and research course for economics majors. The course involves the preparation of a research paper under the supervision of a faculty member whose area of interest and specialization corresponds with the area of study selected by the student. Note that a maximum of 3 credits total of ECON 597 and ECON 697 can count for the elective requirements of any economics degree. Prerequisite: Completion of ECON 520 or ECON 522 or ECON 526, along with approval of the Director of Undergraduate Studies and selected faculty member. IND.

ECON 600. Money and Banking. 3 Hours S.
The basic principles of money, credit, and banking and their relation to prices and business fluctuations; a study of commercial and central
ECON 604. International Trade. 3 Hours S.
An introduction to the nonmonetary theory of international trade, the cause and pattern of trade, the gains from trade, and the contemporary issues in international economic policy. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125. LEC.

ECON 605. International Finance. 3 Hours S.
This course surveys theories of exchange rate and balance of payments determination. Included are the elasticity approach, Keynesian models, and the monetary approach. The mechanics of foreign exchange trading, balance of payments accounting, and the working of the international monetary system are also discussed. Prerequisite: ECON 522 or ECON 523, and MATH 115 or MATH 125. LEC.

ECON 609. Sports Economics. 3 Hours S.
The course covers the microeconomics of the sports industry. Topics include analysis of teams, leagues, players, incomes, strategies, history, and government policy. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125 or permission of instructor. LEC.

ECON 610. Resource Economics and Environmental Policy. 3 Hours.
Survey of the economics of natural resources, designed to introduce the student to the economic models and analytical methods commonly used in natural resource problems and policy issues. Topics covered include environmental pollution and regulation, environmental case studies and applications of cost-benefit analysis, theoretical models, policy issues in the utilization of renewable and nonrenewable resources, sustainable development, and global environmental problems. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125 or permission of instructor. LEC.

ECON 620. Elements of Mathematical Economics. 3 Hours S.
Selected aspects of economic theory with emphasis on those parts where the spirit of mathematical analysis, rather than dexterity, is utilized. The simplification of the subject matter is accomplished by stressing complete treatment of special cases such as a two commodity-two individual world. Prerequisite: ECON 520 or ECON 521; MATH 116 or MATH 126. LEC.

ECON 622. Public Finance. 3 Hours S.
A general introduction to the science of public finance. Topics covered include public expenditures, public revenues and public credit, and the shifting and incidence of taxation. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125. LEC.

ECON 630. Industrial Organization and Antitrust Policy. 3 Hours S.
An examination of the structure, conduct and performance of American industry applying the concepts and techniques of economic analysis. Topics covered include the theories of monopoly, competition and oligopoly, concentration, barriers to entry, price-fixing and other restrictive practices, mergers, technological change, and public regulation. The course will also focus on the historical development of American antitrust law. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125. LEC.

ECON 631. Economics of Regulation. 3 Hours S.
This course studies topics in the economic effects of industry regulation by administrative agencies as a substitute for market competition. Topics include various theories of regulatory behavior, the theory of natural monopoly, the economic effects of rate of return regulation on the performance of electric utilities, and the effects of recent social and environmental regulation. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125. LEC.

ECON 635. Science and Technology in Economic Growth. 3 Hours S.
An analytical and historical exploration of the roles that science and technology have played in the economic growth of industrial societies. This course will examine the forces that have shaped the rate and direction of technological change, and the impact of technological change on Western living standards. Topics covered will include factors influencing the pace of innovation, the diffusion of new technologies, international technology transfers, growth accounting, and models of aggregate economic growth. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125. LEC.

ECON 640. Labor Economics. 3 Hours S.
Analysis of labor markets and differences in wage rates and incomes. Topics include returns to education and training, labor unions, unemployment, anti-poverty programs, and other government policies influencing the labor market. Not open to students with credit in ECON 641. Prerequisite: ECON 520 or ECON 521; MATH 115 or MATH 125. LEC.

ECON 641. Labor Economics - Capstone. 3 Hours SI AE/S.
This course covers the analysis of labor markets and differences in wage rates and incomes. The course covers various topics, such as returns to education and training, labor unions, unemployment, anti-poverty programs, and other government policies influencing the labor market. This course represents the capstone version of Labor Economics (ECON 640) by exploring a package of economic studies in the primary literature. Not open to students with credit in ECON 640. Prerequisite: ECON 520 or ECON 521; ECON 526; MATH 115 or MATH 125; ECON 426 or MATH 526. LEC.

ECON 644. Topics in Economics: ______. 3 Hours.
This course focuses on a particular area of applied economics reflecting the current interests of students. Students can use this course to fulfill the elective course requirement for the Economics major. Repeatable for credit if topic varies. Prerequisite: ECON 520 or ECON 521 or ECON 522 or ECON 523 or ECON 526. LEC.

ECON 669. The Economics of Financial Markets. 3 Hours S.
This course introduces the fundamentals of derivatives pricing, leading to the celebrated Black-Scholes formula—a discovery that led to the Nobel Prize for Robert Merton and Myron Scholes in 1997. Students will derive explicitly the formula for themselves. To achieve this objective, the course introduces and applies a wide array of important concepts drawn from economics, finance, mathematics, and statistics, including no-arbitrage, stochastic calculus, self-financing portfolios, risk-neutral measures, hedging, and the fundamental equations for pricing. Prerequisite: MATH 126; MATH 526. LEC.

ECON 675. Introduction to Welfare Economics. 3 Hours S.
This course provides a nontechnical introduction to optimal resource allocation from the societal point of view as well as alternative individual mechanisms for achieving such an optimum. Prerequisite: ECON 520 or ECON 521, and MATH 115 or MATH 125. LEC.

ECON 680. Economic Growth. 3 Hours S.
This course studies growth with an emphasis on national evidence and macroeconomic policy issues. Classic and modern growth theories are developed and evaluated on the basis of how well they fit empirical evidence. Theories are developed in which productivity growth results from endogenous changes in technology or in the efficiency with which factors are utilized. The fundamental factors that affect productivity are examined, and they may include government policies, income inequality, geography, climate, resources and other factors. Prerequisite: ECON 522 or ECON 523, and MATH 115 or MATH 125. LEC.
ECON 697. Senior Research Honors. 1-3 Hours AE61 / S.
A directed reading and research course for qualifying seniors. Involves preparation of a research paper under the supervision of a faculty member whose area of interest and specialization corresponds with the area of study selected by the student. Note that a maximum of 3 credits total of ECON 597 and ECON 697 can count for the elective requirements of any economics degree. Prerequisite: Approval of major adviser and selected faculty member. RSH.

ECON 700. Survey of Microeconomics. 3 Hours.
A comprehensive survey of microeconomics, including the theories of consumption, production, distribution, pricing, and resource allocation. Prerequisite: ECON 520; MATH 116 or MATH 126. Students approved to begin coursework in the Accelerated Master's program are exempt from the ECON 520 prerequisite. LEC.

ECON 701. Survey of Macroeconomics. 3 Hours.
A comprehensive survey of the modern theory of national income determination with particular emphasis on the foundation of macroeconomic models and their empirical implementation. Prerequisite: ECON 522; MATH 116 or MATH 126. Students approved to begin coursework in the Accelerated Master's program are exempt from the ECON 522 prerequisite. LEC.

ECON 705. Development of Economic Thought. 3 Hours.
The development of economic thought from the time of the physiocrats through the modern period. Consideration is given to the works of the English Classical school, the school of Vienna, the historical school, the Lausanne school, and Cambridge school. In addition, the development of economic thought in the United States during the period is treated. Prerequisite: ECON 520 and ECON 522. LEC.

ECON 715. Elementary Econometrics. 3 Hours.
An elementary analysis of the problems of estimation, prediction, and hypothesis testing in the context of general linear, stochastic difference equation and simultaneous equations models. Applications of econometric theory to practical economic problems will be emphasized. Prerequisite: ECON 526 or MATH 526; MATH 116 or MATH 126. LEC.

ECON 716. Econometric Forecasting. 3 Hours.
An analysis of econometric forecasting techniques, including time-series models, single-equation regression models, and multiple-equation regression models. The course will examine forecasts of (a) macroeconomic variables, such as interest rates, investment, GNP, and the rate of inflation; and (b) market variables, such as price and quantity. Prerequisite: ECON 715. LEC.

ECON 730. Topics in Industrial Organization. 3 Hours.
Advanced study of recent research in applied microeconomics and business behavior. Topics include vertical integration, collusion, multi-plant and multi-product operations, regulated industries, tying arrangements, and the empirical links between monopoly power and profitability. Prerequisite: ECON 630. LEC.

ECON 735. Science and Technology in Economic Growth. 3 Hours.
An analytical and historical exploration of the roles that science and technology have played in the economic growth of industrial societies. Topics covered include factors influencing the pace and character of technological innovation, national systems of innovation, the diffusion of new technologies, measurement of the benefits of new technologies, and the role of technology in various growth theories. Prerequisite: ECON 520. LEC.

ECON 740. Theory of Economic Growth and Development. 3 Hours.
Advanced study of the theory of economic growth and development. Recent growth models, theory of underdevelopment, programming, policies and plans for development. Prerequisite: ECON 520 and ECON 522. LEC.

ECON 750. The Theory of International Finance. 2-3 Hours.
This course examines the modern, financial-asset market approach to exchange rate determination as well as dynamic exchange rate models. Possible topics may include exchange rate overshooting, exchange rate crises, and international policy coordination. Prerequisite: ECON 605; MATH 116 or MATH 126. LEC.

ECON 760. The Theory of Public Finance. 3 Hours.
An analysis of governmental fiscal activity and its economic effects with emphasis on the determination and incidence of budget policy. Prerequisite: ECON 520 and ECON 522; ECON 622 recommended. LEC.

ECON 761. Public Sector: Urban and Regional Finance. 3 Hours.
An analysis of the American state and local finance scene with special emphasis on urban and regional tax and expenditure problems and issues. Prerequisite: ECON 520 and ECON 522; ECON 622 recommended. LEC.

ECON 765. Advanced American Economic Development. 3 Hours.
A study of the process of economic growth as it has occurred in the American economy, with emphasis on 19th century developments. The structural changes that accompanied growth and the impact of technological change are among the major topics considered. Prerequisite: ECON 520, ECON 522 and ECON 530. LEC.

ECON 766. Economic History. 3 Hours.
The development of market economies and economic institutions. The course will focus on Europe, but will include comparisons with other developed nations. Topics include: long-run economic growth, the rise of capitalist agriculture and industry, the causes and consequences of technological change; changes in income distribution and economic organization; and the social and cultural effects of economic change. Prerequisite: ECON 520; ECON 522; ECON 530 or ECON 535. LEC.

ECON 769. Financial Economics. 3 Hours.
An introduction to the economic analysis of choice under uncertainty and asset pricing theory. Topics include the general equilibrium Arrow-Debreu model of complete markets; capital asset pricing model; stochastic dominance; portfolio frontiers; mutual fund separation theorems; arbitrage pricing theory; valuation of derivative securities. Both single-period models and multi-period models will be discussed. Students should have some background in elementary linear algebra, calculus, and probability theory. Prerequisite: MATH 127; ECON 526 or MATH 526; MATH 290 recommended. LEC.

ECON 770. Economics of the Labor Market. 3 Hours.
A theoretical and empirical analysis of labor supply and demand, human capital, information and labor mobility, unemployment, discrimination, and union behavior and influence. Prerequisite: ECON 520; MATH 116 or MATH 126. LEC.

ECON 780. Topics in Economics: _____ AE61 / S.
Selected topics in economics. Prerequisite: Consent of instructor. LEC.

ECON 790. Game Theory and Applications. 3 Hours.
This course covers basic game theory and applications. Topics covered include strategic games with complete information, Bayesian games (with incomplete information), extensive games with perfect information, and extensive games with imperfect information. Equilibrium concepts covered include Nash equilibrium, mixed-strategy Nash equilibrium, rationalizability, Bayesian Nash equilibrium, sub-game perfect Nash equilibrium, and sequential equilibrium. Depending on availability of time, additional topics may include strictly competitive games and repeated games. The course may include diverse applications such as in business
ECON 800. Optimization Techniques I. 3 Hours.
Economic models involving the maximization of a scalar (vector) function subject to equality and inequality constraint where the variables are in a finite dimensional Euclidean space. Characterization of optimal points by way of first and second order derivatives and by way of saddle points. Duality theorems of mathematical programming. Prerequisite: Consent of instructor. LEC.

ECON 801. Microeconomics I. 3 Hours.
An advanced course in price and distribution theory. Prerequisite: ECON 800 or consent of instructor. LEC.

ECON 802. Microeconomics II. 3 Hours.
The study of the operation of the economic system taking into account the diversity of goods and services. Primary attention is centered upon the competitive economy. A study is made of the existence, uniqueness, stability, and comparative statics of equilibrium positions. In addition, a study is made of ways of evaluating alternative states of the economy in terms of systems of value judgments. This includes a discussion of the Arrow Impossibility Theorem; the notion of a Pareto-satisfactory process is introduced and the relationship between Pareto-optimal states and competitive equilibrium positions is studied. Prerequisite: ECON 800 and ECON 801. LEC.

ECON 803. Growth Theory. 3 Hours.
The study of Harrod-Domar growth models; the Solow model; Uzawa's two sector model; n-sector growth models; the Ranis-Fei development models; and other application of growth theory to public policy. Prerequisite: ECON 700 and ECON 701. LEC.

ECON 805. Teaching Methods in Economics. 3 Hours.
The goal of the course is to enhance undergraduate student learning by refining and expanding the teaching techniques in the teaching assistant's arsenal. The course starts by discussing and illustrating the importance of setting the tone on the first day of class. Then the course turns to ways of creating intellectually exciting lectures and discussion sections. Active learning comes next as the course presents techniques to involve actively the students in their learning experience. Then the course examines ways for recognizing and broadening our teaching styles to include different learning styles. The course also discusses the evaluation of students by emphasizing the importance of matching the assessment of students with course objectives. This course will not assume any prior teaching experience. Prerequisite: Consent of instructor. LEC.

ECON 809. Optimization Techniques II. 3 Hours.
Economic models involving the maximization of an integral (a vector of integrals) subject to differential equality (inequality), integral equality (inequality), and finite equality (inequality) constraints. Characterization of optimal paths by way of first and second derivatives. Existence of optimal paths. Prerequisite: Consent of instructor. LEC.

ECON 810. Macroeconomics I. 3 Hours.
A survey of basic macroeconomic models, including Classical and Keynesian as well as more recent ones. Topics also cover monetary and fiscal stabilization policies, the role of rational expectations, and basic behavioral equations. Tradeoffs of inflation and unemployment are examined both theoretically and empirically. Prerequisite: ECON 809 or consent of instructor. LEC.

ECON 811. Macroeconomics II. 3 Hours.
Structure of dynamic models and intertemporal optimization. Monetary and real business cycle theories and long-run economic growth. Microeconomic foundations of macroeconomics, theories of explicit and implicit contracts, and implications of overlapping generations models. Prerequisite: ECON 810. LEC.

ECON 816. Probability and Statistics. 3 Hours.
Basic tools in probability theory, mathematical statistics, and stochastic optimization designed to provide Ph.D. students training in stochastic models useful for all fields in economics. Prerequisite: Ph. D. standing in economics or consent of instructor. LEC.
trade policies; transformations from planned to market economies; labor markets and labor mobility; and capital markets and capital mobility. LEC.

ECON 842. Theory of Economic Planning. 3 Hours.
Formal construction of the foundations of economic planning with emphasis on concise discussion of the logic behind the techniques utilized in economic planning. Topics that will be studied include: social welfare, short-term planning, price guided planning procedures, non-price guided planning procedures, long-term planning objectives, and characteristics of optimal plans. Prerequisite: ECON 802 or consent of instructor. LEC.

ECON 844. Macroeconomic Issues in Development Economics. 3 Hours.
This course will examine the process and policies of economic development from a macroeconomic perspective. Topics will include the theory of growth in the dual economy, the role of foreign trade in economic development, inflation and stabilization in developing economies, the problem of foreign debt, the relationship between financial and real development, and various development policies. Prerequisite: ECON 810 or consent of instructor. LEC.

ECON 850. The Advanced Theory of International Finance. 3 Hours.
This is an advanced course in international finance. Possible topics include optimizing, equilibrium models of exchange rate determination, empirical tests of international asset-pricing models, international policy coordination, and properties of different international monetary arrangements. Prerequisite: ECON 811. LEC.

ECON 851. The Theory of International Trade. 3 Hours.
The study of the pure theory of international trade; factor-price equalization, trade and welfare, general equilibrium in the international economy, comparative statics, and stability conditions. Prerequisite: ECON 700 and ECON 701. LEC.

ECON 855. Natural Resources. 3 Hours.
Advanced analysis of the economic relationships between natural resources, population, and environment. Emphasis is on the analytical techniques useful for solving the economic problems of natural resource allocation over time. Prerequisite: ECON 700. LEC.

ECON 866. Selected Problems in American Economic History. 3 Hours.
A critical study of selected aspects of American economic history with particular emphasis upon the testing of hypotheses that have been advanced to explain the growth and development of the American economy. Prerequisite: ECON 766. LEC.

ECON 869. Advanced Financial Economics. 3 Hours.
This course presents an analysis of financial markets and instruments, together with the quantitative tools essential for research in the field. The material will be presented in a discrete time setting and will stress the link between financial economics and equilibrium theory. Topics will include securities pricing in the absence of arbitrage, the theory of risk and utility in the basic portfolio problem, mean variance analysis and the CAPM, the Martingale properties of security prices, restricted participation, asymmetric information, and recent research results. Prerequisite: ECON 802 or consent of instructor. LEC.

ECON 870. Applied Microeconomics. 3 Hours.
This course introduces students to the data and empirical methods used in the fields of applied economics such as labor economics, public finance, and industrial organization. The course will focus on how to adjust for self-selection and identify causal relationships in applied microeconomic fields. Topics covered include economic data and statistical programming, instrumental variables, difference-in-differences, regression discontinuity, count data, sample selection, treatment effects, and duration models. Attention will be given to the suitability of the methods to the research question under consideration. Each topic will emphasize the proper application of the methods using the standard textbook treatment as well as assigned papers that examine the basic economic issues, the econometric techniques, and the applications to data. Prerequisite: ECON 817 and ECON 818, or consent of instructor. ECON 915 is recommended. LEC.

ECON 880. Advanced Topics in Economic Theory: _____. 1-3 Hours.
Selected topics in economics covered at an advanced level. Prerequisite: Consent of instructor. LEC.

ECON 899. Master's Thesis. 1-10 Hours.
THE.

ECON 901. Advanced Economic Theory I. 3 Hours.
Advanced study of current general equilibrium analysis, the mathematical tools involved in such analysis, and some applications to other branches of economic theory. Prerequisite: ECON 802 and ECON 810. LEC.

ECON 910. Economic Theory Seminar-Workshop. 1-3 Hours.
This seminar-workshop is designed to study advanced research topics in the areas of microeconomic and macroeconomic theory, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in these areas of specialization. LEC.

ECON 911. Applied Macroeconomics. 3 Hours.
This course studies tools for applied macroeconomic research. It uses modern analytical methods to investigate economic theories. Econometric techniques to identify structure from time series data are emphasized. The goal is for each student to be able to use this toolkit to answer important macroeconomic questions. Prerequisite: ECON 810. LEC.

ECON 912. Advanced Macroeconomics. 3 Hours.
An analysis of economic policy in dynamic economic models. The effects of various policies on the equilibrium, stability, and adjustment paths of the models will be considered. Both open and closed economies will be analyzed. Prerequisite: ECON 810. MATH 320 is recommended. LEC.

ECON 913. Monetary Economics. 3 Hours.
This course examines how money, monetary policy, and monetary institutions influence the macroeconomy. Modern theories of money demand are presented and critiqued. The function of commercial banks, non-bank financial intermediaries, and central banks in the money supply process is addressed. Interrelationships between the tools, the instruments, the operating procedures, the intermediate targets, and the goals of policy are examined. Additional topics may include the monetary transmission mechanism, the effect of uncertainty on optimal policy decisions, the rules versus discretion debate, the monetary implications of fiscal policy, the term structure of interest rates, the causes and consequences of bank runs and financial panics, and the optimal method of constructing weighted monetary aggregates. Prerequisite: ECON 811 or consent of instructor. LEC.

ECON 915. Advanced Econometrics I. 3 Hours.
The study of selected topics in applied cross-section econometrics for use mainly in applied microeconomics, public finance, and labor economics. Topics include traditional econometrics of production and demand, latent variable models, panel data studies, probabilistic choice models, censored and truncated models, sample selection, disequilibrium models, duration studies, and semi- and non-parametric models. Prerequisite: ECON 818, or consent of instructor. LEC.

ECON 916. Advanced Econometrics II. 3 Hours.
A study of selected topics in applied time-series econometrics for use mainly in applied macroeconomics, international finance, and development economics. Topics include empirical applications of ARCH models, VAR models (study of impulse response function and variance
decomposition), unit-root cointegration and long memory models. Bayesian unit root analysis, estimation and inference of dynamic general equilibrium models, model calibration and simulation are also possible topics of this course. Prerequisite: ECON 818, or consent of instructor. LEC.

ECON 917. Advanced Econometrics III. 3 Hours. A study of structural and nonlinear time series approaches to econometric modeling and inference. The course emphasizes techniques needed to use economic theory in system-wide econometrics. Emphasis is placed on selection of functional form for approximation to theoretical functions and the use of duality theorems for derivation of the resulting econometric systems of equation. Inference with those models will be by nonlinear parametric, semi-parametric, and nonparametric methods. Prerequisite: ECON 818. LEC.

ECON 918. Financial Econometrics. 3 Hours. This course is designed to provide a variety of new econometric tools useful to investigate financial data. It discusses how to measure and forecast financial volatility using models such as Stochastic Volatility, multivariate GARCH, and Dynamic Conditional Correlation models. It also covers Dynamic Factor models and State Space models, which can be used in many financial data analyses. The course will be particularly helpful for the students preparing dissertations in the field of finance, macro-finance, monetary economics, international finance, and development economics. It will also benefit the students interested in more practical use of tools in the field such as financial risk management, insurance, and commercial banking. Prerequisite: ECON 810. ECON 917 is recommended. LEC.

ECON 919. Health Economics. 3 Hours. An advanced course in the mathematical and graphical representations and classic and current literature in health economics. Students will be asked to read multiple academic papers per lecture. Topics may include measurement of health (height, infant mortality, life expectancy), health insurance, selection, Medicare, Medicaid, geographic variation, household finances, the Affordable Care Act, productivity of spending, international comparisons, health over the business cycle, hospitals, competition, physicians, nurses, health behaviors (alcohol, smoking, obesity, wellness), HIV/AIDS, pollution, malpractice, reproductive health, children, pharma, opioids, and machine learning. Prerequisite: ECON 802 and ECON 818. ECON 870 recommended. LEC.

ECON 920. Econometrics Seminar-Workshop. 1-3 Hours. This seminar-workshop is designed to study advanced research topics in the area of econometric theory and application, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in this area of specialization. LEC.

ECON 925. Economic Dynamics. 3 Hours. A study of the concepts of equilibrium and stability in various economic frameworks; static economies, changing economies, and disaggregated and aggregated economies. Prerequisite: ECON 802. LEC.

ECON 930. Economic History Seminar-Workshop. 1-3 Hours. This seminar-workshop is designed to study advanced research topics in the area of economic history, and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates in this area of specialization. LEC.

ECON 940. Economic Seminar-Workshop in: ______. 1-3 Hours. This seminar-workshop is designed to study advanced research topics in the specified area of applied economics (public finance, monetary analysis, environment-energy, economic growth and development, urban economics, health care economics, natural resources, labor-manpower, international trade and finance, comparative economic systems, Soviet economics), and also provide assistance in the preparation and development of the dissertations of Ph.D. candidates with dissertations in a specific area of applied economics. LEC.

ECON 950. Special Problems in Economics. 1-3 Hours. LEC.

ECON 999. Doctoral Dissertation. 1-10 Hours. THE.

Bachelor of Arts and Bachelor of General Studies in Economics

Why study economics?

Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit "Big Data" to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among aggregate output, interest rates, inflation, unemployment levels and international exchange rates.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credit.transfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Economics Majors

The economics department offers 3 degrees.

• The B.A. or B.G.S. major in economics is designed for the majority of students who will attend professional graduate schools or enter the work force.

• The Bachelor of Science degree in economics is designed for the student interested in attending graduate school in economics or a closely related field. It requires the minimum amount of preparation in economics and mathematics required to be successful in graduate
study. Students interested in pursuing a Ph.D. in economics are encouraged to double major in economics and mathematics.

First- and Second-Year Preparation

Students considering an economics major should enroll in ECON 142 (or ECON 143) Principles of Microeconomics or ECON 144 (or ECON 145) Principles of Macroeconomics no later than the end of the sophomore year. Students should also have completed at least 1 course in the calculus sequence (MATH 115 or MATH 125) by the end of the sophomore year.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 101</td>
<td>College Algebra: _____</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 104</td>
<td>Precalculus Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 115</td>
<td>Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>or MATH 125</td>
<td>Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>ECON 426</td>
<td>Statistics and Data Analysis for Economics</td>
<td>3</td>
</tr>
<tr>
<td>or ECON 526</td>
<td>Introduction to Econometrics</td>
<td>3</td>
</tr>
</tbody>
</table>

Requirements for the B.A. or B.G.S. Major

Economics Core Knowledge and Skills

Majors must complete a course in each of the following areas:
- Principles of Microeconomics. Satisfied by:
  - ECON 142 Principles of Microeconomics | 3 |
  - or ECON 143 Principles of Microeconomics, Honors |
- Principles of Macroeconomics. Satisfied by:
  - ECON 144 Principles of Macroeconomics | 3 |
  - or ECON 145 Principles of Macroeconomics, Honors |
- Microeconomics. Satisfied by:
  - ECON 520 Microeconomics | 3 |
  - or ECON 521 Microeconomics Honors |
- Macroeconomics. Satisfied by:
  - ECON 522 Macroeconomics | 3 |
  - or ECON 523 Macroeconomics Honors |
  - Introduction to Econometrics. Satisfied by:
  - ECON 526 Introduction to Econometrics | 3 |
  - or ECON 715 Elementary Econometrics |

Economics Required Electives

Majors must complete 2 courses (6 hours) in economics outside of the core courses at the 500-level or above.

Economics Required Capstone Elective Courses

Majors must complete 3 courses (9 hours) in economics at the 600-level or above.

Note: A maximum of 3 credits total from ECON 597 and ECON 697 may count as electives for the major.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major. At least 9 hours of the required elective courses must be taken from the KU Department of Economics.

Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Major Junior/Senior Major Attempts

Summary includes Economics junior/senior (300+) hours attempted, including F's and incompletes.

A sample 4-year plan for the BA degree in Economics can be found here: Economics (p. 1418), or by using the left-side navigation.

Sample 4-year plan for the BGS degree in Economics can be found here: Economics (p. 1419), or by using the left-side navigation.

Departmental Honors

Graduation with honors in economics is limited to undergraduate majors who have fulfilled these requirements:

1. Completed all economics major requirements and achieved a grade-point average of 3.5 or above in all economics courses at the time of graduation.
2. Completed ECON 697 Senior Research Honors
3. Submitted and defended a research paper before at least 3 faculty members of the Department of Economics.

Honors candidates should consult the department honors coordinator before enrolling in the first semester of the senior year and file a declaration of intent form with the coordinator at that time.

BA in Economics

Below is a sample 4-year plan for students pursuing the BA in Economics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Semester Hours: 17-19
Total Course Hours: 14
All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BGS in Economics**

Below is a sample 4-year plan for students pursuing the BGS in Economics. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

**Total Hours 120-125**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Economics Majors

The economics department offers 3 degrees.

- The Bachelor of Science degree in economics is designed for the student interested in attending graduate school in economics or a closely related field. It requires the minimum amount of preparation in economics and mathematics required to be successful in graduate study. Students interested in pursuing a Ph.D. in economics are encouraged to double major in economics and mathematics.
- The B.A. or B.G.S. major in economics is designed for the majority of students who will attend professional graduate schools or enter the work force.

First- and Second-Year Preparation

Economics Prerequisite or Co-Requisite Knowledge

Majors must complete courses as specified in each of the following areas. These hours do not contribute to the minimum number of hours required for the major.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 101</td>
<td>College Algebra: ______</td>

Bachelor of Science in Economics

Why study economics?

Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit "Big Data" to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among aggregate output, interest rates, inflation, unemployment levels and international exchange rates.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.
In addition to degree and major requirements, all students must complete the KU Core.

Minor in Economics

ECON Elective 700+ (Major Requirement) 3
Economics Elective (Total Hours) 3

Total Hours 120

1 Majors must complete 2 courses (6 hours) in economics outside of the core courses at the 500-level or above, 3 courses (9 hours) in economics at the 600-level or above, and 2 courses (6 hours) in economics at the 700-level or above.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Departmental Honors

Graduation with honors in economics is limited to undergraduate majors who have fulfilled these requirements:

1. Completed all economics major requirements and achieved a grade-point average of 3.5 or above in all economics courses at the time of graduation.
2. Completed ECON 697 Senior Research Honors.
3. Submitted and defended a research paper before at least 3 faculty members of the Department of Economics.

Honors candidates should consult the department honors coordinator before enrolling in the first semester of the senior year and file a declaration of intent form with the coordinator at that time.

Minor in Economics

Why study economics?

Economics offers the tools you need to understand our increasingly interconnected world. With these tools, you can exploit "Big Data" to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among aggregate output, interest rates, unemployment levels and international exchange rates.

Undergraduate Certificate in Macroeconomics

The economics department has two certificates: one in microeconomics and one in macroeconomics. They are best for students who have strong math backgrounds (e.g., MATH 115) but limited space in their schedules to complete a major or minor in economics. The course requirements and acceptable electives for each certificate are listed below. The certificates are mutually exclusive—a student can complete either or both.

<table>

**Master of Arts in Economics**

Economics studies the institutions and arrangements that are used to create, protect and allocate scarce resources that have alternative uses. The Master of Arts program in Economics at KU advances our understanding of the behavior of individuals, firms, governments and other organizations. Economics' deep intellectual roots, rigorous analytic methods and powerful ability to explain and evaluate social phenomena make it an exceptionally rewarding field of study in economics.

**Financial Aid**

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

**Facilities and Services**

In addition to KU computing and library facilities, students in the M.A. and Ph.D. programs may use the department's computer laboratory, which provides access to a variety of databases and econometric software packages useful for economics research.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Applicants to the M.A. and M.A./J.D. programs should have taken a minimum of 2 courses in calculus (6 to 10 semester hours) and a statistics course. Students with little background in economics may be advised to take ECON 520 Microeconomics and/or ECON 522 Macroeconomics and/or ECON 526 Introduction to Econometrics as preparation for M.A. courses. ECON 520, ECON 522, and ECON 526 do not count toward completion of M.A. degree requirements.

Applications submitted before May 1 receive first consideration for fall or summer admission. Applications submitted before November 1 receive first consideration for spring admission.

Submit your graduate application online (https://gradapply.ku.edu/apply/).

**English Proficiency**

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

**M.A. Degree Requirements**

The Master of Arts degree program serves students with little previous background in economics as well as students who majored in economics as undergraduates. The program provides maximum flexibility for students to pursue their own special interests.

Candidates for the M.A. degree must complete a minimum of 30 semester hours of graduate work— at least 18 hours of this coursework must be 700+ level. Economics has three required core classes—ECON 700, ECON 701, ECON 715—that count toward the 18 hours of 700+ level coursework required. Students must take at least 21 hours in economics, with the option of taking up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. At initial enrollment, each candidate must discuss a preliminary plan of study with his or her graduate advisor. This plan may be revised over time.

**Thesis and Nonthesis Options**

Candidates may pursue either a thesis or a nonthesis track. Students electing the thesis track must complete 24 hours of formal course work and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Students electing the nonthesis track must complete 30 hours of formal course work.
Written Comprehensive Examination

All candidates for the M.A. degree, including students enrolled in the M.A./J.D. program, must demonstrate proficiency in the application of economic theory through a written examination taken during the last semester of enrollment.

Plan of Study

Most M.A. students complete the program in 1.5 academic years. Unless they must complete prerequisites, new M.A. students enroll in ECON 700 Survey of Microeconomics and 2 electives during the first fall semester. In the first spring semester, M.A. students enroll in ECON 701 Survey of Macroeconomics, ECON 715 Elementary Econometrics, and 1-2 electives. Note: Doctoral level theory courses (ECON 801, ECON 810, ECON 817) can be substituted for—or taken in addition to—the corresponding master's level courses (700, 701, 715 respectively). Enrollments in subsequent semesters are electives until 30 credit hours are complete.

Accelerated Masters of Arts in Economics (BA or BS/MA)

Accelerated undergraduate-graduate degree tracks are increasingly becoming more common. A Master’s in Economics provides not only professional skills but also deeper foundational knowledge. This combination attract employers and strengthens the profiles of students preparing for further study in doctoral programs. As a result, many students see a master’s degree as essential to their future success.

KU’s Accelerated MA program is available to KU undergraduates only. Please see Admissions to learn more.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time frame. All prospective students should discuss their interest in admission to the Accelerated Master’s program with their undergraduate advisor and the department’s graduate advisor no later than the student’s Junior year, the first semester of Year 3.

Admission’s checklist

- KU student earning Economics BA;
- on-track to complete all undergraduate degree requirements by the second semester of Senior year (Year 4);
- Major and cumulative GPA of at least 3.25; and
- has submitted an online application for the Accelerated MA program in the second semester of Junior year (Year 3)

After review of the application for admission, the Economics Department will notify the student on their eligibility to begin coursework in the program.

Final acceptance to the graduate program will occur following the completion of Year 4 and be contingent upon the following:

- Successful completion of all requirements for the bachelor’s degree;
- an undergraduate cumulative GPA of at least 3.25;
- a GPA of at least 3.25 in graduate-level coursework taken in Year 4; and
- grades of B or above in all graduate-level coursework taken in Year 4.

This accelerated program uses a carefully planned combination of prerequisite coursework, graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. At initial enrollment in graduate coursework, each candidate must discuss a preliminary plan of study with his or her graduate advisor. This plan may be revised over time. The student must be approved to begin coursework toward the master’s prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

Students may choose between a BA/MA combination or a BS/MA combination.

BA Degree Option

First- and Second-Year Preparation for the BA Degree

Students considering an economics major should enroll in ECON 142 (or ECON 143) Principles of Microeconomics or ECON 144 (or ECON 145) Principles of Macroeconomics no later than the end of the sophomore year. Students should also have completed at least 1 course in the calculus sequence (MATH 115 or MATH 125) by the end of the sophomore year.

Additional math requirements

Calculus 2 (MATH 116 or MATH 126) is needed by the end of Junior year, MATH 526 is needed in the first semester of Senior year or prior to ECON 715.

BA Degree Requirements

</table>

Of the requirements listed above, ECON 700, ECON 701, ECON 715 and one elective course at the 500-level or above must be completed after the student has been approved to begin coursework toward the MA. ECON 700 is typically offered in the fall. ECON 701 and ECON 715 are typically offered in the spring. These courses will count toward both undergraduate and graduate degrees. The elective course may be in Economics or a related area (e.g., Business, Computer Science, Political Science, Psychology, Public Policy, or Mathematics). ECON 520 and ECON 522, which are listed as prerequisites for ECON 700 and ECON 701, are not required for those in the Accelerated Master's program.

**MA Degree Requirements**

**Coursework**

Upon completion of the bachelor’s degree, students must complete an additional 18 credit hours (6 courses) of graduate electives for a total of 30 graduate credit hours. At least 21 of the 30 hours must be in economics; but students may take up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. In total, 18 hours of coursework (out of 30 hours) must be 700 level or higher.

**Thesis and Nonthesis Options**

Candidates may pursue either a thesis or a nonthesis track. Students electing the thesis track must complete 24 hours of formal coursework and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Accelerated Master's students electing the thesis option may take longer than 5 years to complete the full program. Students electing the nonthesis track must complete 30 hours of formal coursework and demonstrate proficiency in the application of economic theory through a written examination taken during the last semester of enrollment.

**Progression Requirements**

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Once authorized to begin coursework in the Accelerated Master’s, the student must meet with the DGS to plan the final year of undergraduate study.
2. In the final semester of undergraduate study (Year 4), the student must meet with the DGS to review the student’s performance in ECON courses. The student must earn a grade of “B” or better in each of these courses to be eligible for regular admission to the master's degree.
3. Following completion and award of the undergraduate degree (end of final semester of undergraduate study), the admitted student will again meet with the DGS to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.25 for these courses, as well as a cumulative undergraduate GPA of 3.25.
4. For those students who do not meet the minimum GPA requirement of 3.25, an alternative plan of study to address the student’s deficiencies may be developed, at the department’s sole discretion.
5. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in additional courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the Accelerated Master’s within one year of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.
To view sample degree plans, please visit economics.ku.edu/accelerated-masters.

Accelerated Masters of Arts in Economics (Minor/MA)

Only current KU undergraduate students are eligible to apply to the Accelerated MA program. If you are not a current undergraduate student at KU, please review the admission requirements for the regular MA program.

Our Minor/Accelerated MA program is available to KU undergraduate students minoring in Economics. The ideal candidate will have a strong math foundation and have a complementary major (e.g., Engineering or similar math-intensive major).

Accelerated undergraduate-graduate degree tracks are increasingly becoming more common. A Master’s degree in Economics provides not only professional skills but also deeper foundational knowledge. This combination attracts employers and strengthens the profiles of students preparing for further study in doctoral programs. As a result, many students see a master’s degree as essential to their future success.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time frame. All prospective students should discuss their interest in admission to the Accelerated MA program with their undergraduate advisor and the department’s graduate advisor no later than the student’s Junior year, the first semester of Year 3.

Admission’s checklist

• KU student earning bachelor’s degree and Economics minor;
• on-track to complete all undergraduate degree requirements by the second semester of Senior year (Year 4);
• Major and cumulative GPA of at least 3.25; and
• has submitted an online application for the Accelerated MA program in the second semester of Junior year (Year 3)

After review of the application for admission, the Economics Department will notify the student on their eligibility to begin coursework in the program.

Final acceptance to the graduate program will occur following the completion of Year 4 and be contingent upon the following:

• Successful completion of all requirements for the bachelor’s degree and Economics minor;
• an undergraduate cumulative GPA of at least 3.25;
• a GPA of at least 3.25 in graduate-level coursework taken in Year 4; and
• grades of B or above in all graduate-level coursework taken in Year 4.

This accelerated program uses a carefully planned combination of prerequisite coursework, graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. At initial enrollment in graduate coursework, each candidate must discuss a preliminary plan of study with his or her graduate advisor. This plan may be revised over time. The student must be approved to begin coursework toward the master’s prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

ECON 520 and ECON 522, which are listed as prerequisites for ECON 700 and ECON 701, are not required for those in the Accelerated Master’s program.

Additional math requirements

Calculus 2 (MATH 116 or MATH 126) is needed by the end of Junior year, MATH 526 is needed in the first semester of Senior year or prior to ECON 715.

Graduate Degree Requirements

Coursework

Upon completion of the bachelor’s degree, students must complete an additional 18 credit hours (6 courses) of graduate electives for a total of 30 graduate credit hours. At least 21 of the 30 hours must be in economics; but students may take up to 9 hours in related areas, such as business administration, computer science, political science, or mathematics, subject to the approval of the M.A. advisor. In total, 18 hours of coursework (out of 30 hours) must be 700 level or higher.

Thesis and Nonthesis Options

Candidates may pursue either a thesis or a nonthesis track.

Students electing the thesis track must complete 24 hours of formal coursework and 6 hours of thesis under the direction of a thesis supervisor. This work is to be devoted to the completion of a satisfactory thesis. An oral examination is held on completion of the thesis. Accelerated Master’s students electing the thesis option may take longer than 5 years to complete the full program.
Students electing the nonthesis track must complete 30 hours of formal coursework and demonstrate proficiency in the application of economic theory through a written examination taken during the last semester of enrollment.

**Progression Requirements**

Given the accelerated nature of this program, each student’s progress will be closely monitored at various points during the program:

1. Once authorized to begin coursework in the Accelerated Master’s, the student must meet with the DGS to plan the final year of undergraduate study.
2. In the final semester of undergraduate study (Year 4), the student must meet with the DGS to review the student’s performance in ECON courses. The student must earn a grade of “B” or better in these courses to be eligible for regular admission to the master’s degree.
3. Following completion and award of the undergraduate degree (end of second semester Year 4), the admitted student will again meet with the DGS to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.25 for these courses, as well as a cumulative undergraduate GPA of 3.25.
4. For those students who do not meet the minimum GPA requirement of 3.25, an alternative plan of study to address the student’s deficiencies may be developed, at the department’s sole discretion.
5. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in additional courses for graduate credit toward the master’s degree until the baccalaureate degree has been conferred.
6. Students should complete all requirements for the Accelerated Master’s within one year of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

To view sample degree plans, please visit economics.ku.edu/accelerated-masters/.

**M.A.-J.D. Degree Program**

**Why study economics?**

Because it will give you the tools you need to understand our increasingly interconnected world. With these tools, you can exploit “Big Data” to explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among supply, consumption patterns, health care choices and energy use. You can explore human behavior in numerous economic settings such as labor supply, consumption patterns, health care choices and energy use. You can also examine the overall economy by assessing the links among supply, consumption patterns, health care choices and energy use.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**M.A.-J.D. Degree Program**

In this program a student can earn both the Juris Doctor (p. 777) and the Master of Arts in economics in 3 years and 1 summer session. The requirements for the combined degree are as follows:

1. Admission to the M.A./J.D. degree program must be approved by the School of Law (http://www.law.ku.edu/), the Department of Economics (http://www.economics.ku.edu/), and the College of Liberal Arts and Sciences (http://clas.ku.edu/).
2. The program requires 100 credit hours of course work, of which 82 hours must be completed in the law school and 18 hours in the Department of Economics. The department gives credit toward the M.A. degree for 12 hours of pertinent work in the law school, and the law school counts 8 credit hours in economics toward the J.D. degree. The 8 hours of economics courses that count toward the J.D. degree can be chosen from certain courses numbered 500-799 and from all 800-900 level courses. Prerequisites continue to apply, as does the requirement that all students seeking the M.A. degree must have taken several foundation courses that do not count toward a graduate degree in economics: microeconomics, macroeconomics, and calculus. In addition, ECON 700, ECON 701, and ECON 715 must be included in the M.A. program. The student takes only law classes the first year and spreads out the 18 hours of credit in economics in the following semesters (e.g., one course per semester).
3. The M.A./J.D. degree is a nonthesis degree in economics.
4. A written comprehensive examination in economics is required of all candidates for the M.A./J.D. degree.

**Doctor of Philosophy in Economics**

The Ph.D. program in economics provides a solid foundation in modern economic analysis, develops expertise in two fields in economics, provides milestones and incentives for dissertation research, and supports graduate student professional development and placement. The department has a long-standing tradition of producing Ph.D. economists with strong foundational skills and expertise. Please visit the department website (http://economics.ku.edu) for additional information.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.
Graduate Admission

The economics department seeks well-trained economists with strong quantitative skills for its Ph.D. program. In particular, applicants should have taken the equivalent of a minimum of three courses in calculus and a course in linear algebra (twelve to fifteen semester hours). A course in real analysis is not required, but exposure to logical mathematical derivation is very useful. Recent doctoral program data are available at http://graduate.ku.edu/current-program-profiles/.

The department strives to provide a comprehensive financial aid package to strong applicants. This typically includes a paid graduate teaching assistant (GTA) position for up to five years (up to a student’s fifth year in the program). A GTA position also includes a full tuition waiver and other benefits such as subsidized health insurance. Outstanding applicants may receive a fellowship that reduces or eliminates teaching commitment for one or two semesters and may include funding for summer research. The department also strives to provide some financial support for students to present research at academic conferences every year. For more information, please contact the economics office at econgrad@ku.edu (econ@ku.edu).

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/). Please note that the requirements for admission are different from those for a teaching/research assistant.

The deadline for an applicant to be considered for admission and financial aid is December 15. The final deadline for an applicant to be considered for admission (but not necessarily financial aid) is February 1. Applicants should submit a graduate application online (https://gradapply.ku.edu/apply/).

Ph.D. Degree Requirements

Course Requirements

In addition to meeting general requirements, the Ph.D. candidate in economics must complete a minimum of 48 credit hours of course work in economics and at least 1 credit hour of ECON 999 Doctoral Dissertation.

1. All Ph.D. candidates must complete these core courses in economic theory and quantitative methods

Qualifying Examinations

Each Ph.D. student is required to pass written qualifying examinations in microeconomics and macroeconomics after completion of the core courses in these areas. A student who does not pass a qualifying examination may be permitted one retake, ordinarily within a few weeks of the first attempt.

In order to demonstrate competency in econometrics, each Ph.D. student must complete ECON 817 and ECON 818, with a combined grade point average of 3.0. A student who does not achieve the 3.0 combined grade point average is required to pass, without retake, a written comprehensive examination in econometrics.

Fields of Specialization and Electives

Each student must demonstrate competence in at least 2 fields of specialization in economics by completing 2 courses in each of their chosen fields. In addition, each student takes 3 elective courses in economics. Fields of specialization and elective courses are selected in consultation with the advisor.

Seminar Workshops

Beginning in Year 3, each student is required to enroll in ECON 910 and attend the weekly department seminars for 5 continuous semesters or until graduation (whichever is earlier).

Second-Year Paper

Each student is required to complete a second-year paper by the end of the fourth semester (second year) of study.

Third-Year Paper

Each student is required to complete a third-year paper by the end of the sixth semester (third year) of study.

Research Skills and Responsible Scholarship

Every doctoral student is required to have training in research skills and responsible scholarship pertinent to economics research. Enrollment in one semester of ECON 910 and successfully completing the third year paper requirement satisfies these requirements.

Comprehensive Oral Examination

Each student is required to pass the comprehensive oral examination by the end of the eighth semester (fourth year) of study. It is strongly recommended that a student pass this exam by the end of the seventh semester.

Dissertation

Following the comprehensive oral examinations, the candidate must organize and write a dissertation on his or her chosen topic under the supervision of a dissertation committee.

Final Oral Examination

The candidate must defend the dissertation successfully in a final oral examination.

Department of English

Why study English language and literature?

Because reading and writing shape the world.

KU’s English Department is at the core of the humanities, highlighting the “human” through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to
teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

**A commitment to teaching and learning.**

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 15-25 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

**A variety of career and life paths.**

English students at all levels graduate and embark upon a variety of careers, including law, teaching, scholarship, publishing, library science, and journalism—as well as medicine, politics, design, and any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

**Engaged and innovative scholarship.**

KU’s English Department has several core strengths that cross tracks and periods, including Global and Cross-Cultural Approaches; Literature, Rhetoric, and Social Action; Diversity Studies; Language, Literature and Science; and Popular Expressive Forms.

In the KU English Department, students work closely with nationally-renowned writers and researchers. Our faculty have won national awards that recognize excellence in research, including grants from the National Endowment for the Humanities, the American Philosophical Society, and the Newberry Library, among others. English Department faculty members have also received major research funding from the University of Kansas, including the Hall Center for the Humanities Research fellowships and Keeler Intra-University Fellowships for interdisciplinary work. Undergraduate students can work one-on-one with faculty mentors in the Honors Program, McNair Scholars Program, and Dean’s Scholars Program, as well as through independent Directed Studies. Advanced graduate students have the opportunity to work collaboratively with faculty members as research assistants.

**Undergraduate Programs**

The English major prepares undergraduates for engagement with the world through language by helping them

- to cultivate the craft of writing in a variety of rhetorical contexts,
- to read and interpret a broad range of texts,
- to develop and sustain critical arguments, and
- to produce independent research.

The major is crafted to ensure students’ familiarity with

- written forms and genres;
- a range of literary histories and writers;
- multiple regional and historical contexts of literature and language;
- the theories, methodologies, and terminology of English Studies; and
- the relationship between literature, language, and the larger culture.

**Courses for Non-majors**

Many English courses fulfill KU Core requirements; see catalog course listings for details. All students are encouraged to take a 200-level English course before enrolling in 300+-level English courses. For students following University requirements prior to Fall 2013, please consult the principal and non-Western course lists. English principal courses under the Literature and the Arts heading are designated HL. Prospective English teachers in the public schools should consult the requirements of the School of Education.

**Transfer Credit**

English undergraduate majors may take up to 6 hours out of residence with the prior approval of the Director of Undergraduate Studies.

**Double Majors**

Double majors within the College or dual-degree programs are encouraged.

**Placement in English courses**

In general, entering KU students should enroll in ENGL 101, with the following exceptions:

**ACT English Scores:**

- 31-36 — Enroll in ENGL 105. 1/2 of KU Core Goal 2.1 (Written Communication, 6 hours) complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.
- 27-30 — Enroll in ENGL 102 and petition for honors placement for possible admittance to ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 102 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.
- 00-26 — Enroll in ENGL 101. ENGL 101 + ENGL 102 fulfill KU Core Goal 2.1 and CLAS BA-specific writing requirement.

**SAT Verbal Scores:**

- 650 or higher — Enroll in ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.
- 600-649 — Enroll in ENGL 102 and petition for honors placement for possible admittance to ENGL 105. 1/2 of KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.
- 00-599 — Enroll in ENGL 101. ENGL 101 + ENGL 102 fulfill KU Core Goal 2.1 and CLAS BA-specific writing requirement.

**Advanced Placement Scores — Literature and Composition Exam:**

- AP 5 — Enroll in ENGL 205; 3 hours of credit given. KU Core Goal 2.1 complete. ENGL 205 satisfies both KU Core Goal 2.1 and CLAS BA-specific writing requirement.
AP 4 — Enroll in ENGL 205 ENGL 205; 3 hours of credit given. 1/2 of KU Core Goal 2.1 complete. ENGL 205 ENGL 205 satisfies both KU Core Goal 2.1 and CLAS BA-specific writing requirement.

• AP 3 — Enroll in ENGL 105 or ENGL 102*. No credit is given for ENGL 101 or ENGL 102. KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

• AP 2 — Enroll in ENGL 101 and petition for honors placement. If the petition is successful, it admits the student to ENGL 105. ENGL 101 + ENGL 102 or ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course fulfill KU Core 2.1 and CLAS BA-specific writing requirement.

Advanced Placement Scores — Language and Composition Exam:

• AP 4 or 5 — Enroll in ENGL 205; 3 hours of credit given; KU Core Goal 2.1 complete. ENGL 205 satisfies both KU Core Goal 2.1 and CLAS BA-specific writing requirement.

• AP 3 — Enroll in ENGL 105 or ENGL 102*. No credit is given for ENGL 101 or ENGL 102. 1/2 of KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

• AP 2 — Enroll in ENGL 101 and petition for honors placement. If the petition is successful, it admits the student to ENGL 105. ENGL 101 + ENGL 102 or ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course fulfill KU Core 2.1 and CLAS BA-specific writing requirement.

International Baccalaureate Scores:

• IB 5 and up — Enroll in ENGL 102. 1/2 of KU Core Goal 2.1 complete; ENGL 102 or ENGL 105 + an additional KU Core Goal 2.1 course will fulfill CLAS BA-specific writing requirement.

*If you choose to take ENGL 102, you will need to petition if you want to enroll in ENGL 205 next. You could also choose to take ENGL 203, or ENGL 209, ENGL 210, or ENGL 211 for a second English course, or another KU Core Goal 2.1 course to fulfill the KU Core and the CLAS BA-specific requirements.

Graduate Programs

The department offers a full graduate program, leading to the Master of Arts (Literature, Literature & Literary Theory, Rhetoric & Composition, and English Language Studies), Master of Fine Arts in Creative Writing, and Doctor of Philosophy degrees with specializations in Literature, Rhetoric and Composition, English Language Studies, and Creative Writing.

The M.A./M.F.A. may be pursued as a terminal degree or as preparation to apply for specialized doctoral studies at KU or elsewhere. The Ph.D. may be pursued by students already holding an M.A. in English or a related field.

We also offer an accelerated doctoral program in Rhetoric, Composition intended for students who want to pursue a Ph.D. in this field at KU but who do not yet hold the M.A. degree in English.

All applicants are considered for competitive funding packages and GTA, GRA, and GA positions.

Students who are interested in enrolling in graduate level coursework in the Department of English without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department webpage for non-degree student admission for further details.

Courses

ENGL 100. Introduction to Literature. 3 Hours H.
An introduction to critical thinking skills through the study of works of literature drawn from a variety of genres and methods of critical inquiry. This course does not fulfill any KU writing requirement. LEC.

ENGL 101. Composition. 3 Hours GE21 / U.
Instruction and practice in writing in a variety of rhetorical contexts, including academic ones. LEC.

ENGL 102. Critical Reading and Writing. 3 Hours GE21 / U.
Builds upon the instruction in writing of ENGL 101, emphasizing critical thinking through careful, thoughtful reading and writing. Also instructs in the evaluation and use of secondary sources. Prerequisite: Completion of ENGL 101 or its equivalent, or an ACT score of 27-31, or an SAT score of 600-649, or an AP exam score of 3 on either the Literature and Composition exam or the Language and Composition exam, or an IB score of 5. LEC.

ENGL 105. Honors Introduction to English. 3 Hours GE21 / U.
Study of significant works of world literature. The primary aims are to develop reading and writing skills and to introduce the students to works of literature drawn from a variety of genres and historical periods. Prerequisite: An ACT score of 31-36, or an SAT score of 650 or higher, or an AP exam score of 3 on either the Literature and Composition exam or the Language and Composition exam, or membership in the University Honors Program. LEC.

ENGL 177. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in English. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ENGL 199. Orientation to English Studies. 1 Hour H.
Provides an overview of English Studies at the University of Kansas. Students learn about degree requirements and specializations; research, extracurricular, and study abroad opportunities; and career and internship options. Graded on a satisfactory/unsatisfactory basis. LEC.

ENGL 200. Study Abroad Topics in: _____. 1-6 Hours H.
This course is designed for the study of special topics in English. Coursework is completed through a KU study abroad program. Available only to KU study abroad participants. May be repeated for credit if content varies. Does NOT fulfill any part of the Freshman-Sophomore requirement. LEC.

ENGL 203. Topics in Reading and Writing: _____. 3 Hours GE11/GE21/GE3H / H.
In-depth reading and writing on a significant topic, theme, or genre. Includes a variety of textual types or a range of historical periods. Continues practice in critical reading and writing. May include but will not be limited to writing in literary genres. Prerequisite: Completion of ENGL 101 and ENGL 102, or their equivalent. LEC.

ENGL 205. Freshman-Sophomore Honors Proseminar: _____. 3 Hours GE11/GE21/GE3H / H.
Study of a major movement, topic, or theme in literature and culture. The primary aims are to further develop reading and writing skills and to consider significant cultural and artistic issues. Prerequisite: ENGL 105 or an AP exam score of 4 on either the Literature and Composition exam or the Language and Composition exam. LEC.
ENGL 209. Introduction to Fiction. 3 Hours GE11/GE21/GE3H / H.
In-depth reading of and writing about prose fiction with emphasis on
critical analysis of a variety of narrative types from different historical
periods. Prerequisite: Completion of ENGL 101 and ENGL 102, or their
equivalent. LEC.

ENGL 210. Introduction to Poetry. 3 Hours GE11/GE21/GE3H / H.
In-depth reading of and writing about poetry with emphasis on critical
analysis of a variety of forms and techniques used in poems from different
historical periods. Prerequisite: Completion of ENGL 101 and ENGL 102,
or their equivalent. LEC.

ENGL 211. Introduction to the Drama. 3 Hours GE11/GE21/GE3H / H.
Study of plays selected to familiarize the student with dramatic
masterpieces and with the drama as a literary type. Prerequisite:
Completion of ENGL 101 and ENGL 102, or their equivalent. LEC.

ENGL 220. Introduction to Creative Writing. 3 Hours GE21 / H.
In-depth reading and writing in multiple genres (e.g. poetry, fiction,
creative nonfiction, playwriting). Creative assignments combine with
critical analysis to help students identify, analyze, and employ forms
and techniques across various genres, audiences, and contexts. Written
assignments include creative works in multiple genres and critical
responses to reading. Prerequisite: ENGL 101 and ENGL 102, or their
equivalents. LEC.

ENGL 300. Introduction to English Studies. 3 Hours H.
An introduction to English Studies and its methods and areas, including
literary studies, cultural studies, creative writing, rhetoric and composition,
and language studies. Prerequisite: Recommended: Prior completion of the KU Core
Written Communication requirement. Recommended: Prior completion of
one 200-level English course. LEC.

ENGL 301. Topics in British Literature to 1800: ____. 3 Hours H.
Study of British literary works before 1800. Topics may focus on a
particular genre, theme, topic, historical period, author, or group of
authors. May be repeated for credit as the topic changes. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 302. Topics in British Literature Since 1800: ____. 3 Hours H.
Study of British literary works since 1800. Topics may focus on a
particular genre, theme, topic, historical period, author, or group of
authors. May be repeated for credit as the topic changes. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 305. World Indigenous Literatures. 3 Hours NW AE42 / H.
A survey of contemporary world indigenous literatures that includes
those from North America, Australia, New Zealand, the South Pacific, the
Arctic, and Latin America. Texts are in English (original or translation).
Genres studied include the novel, poetry, and drama, supplemented by
works from the oral tradition, the visual arts, and film. (Same as GIST
305/ISP 305.) Prerequisite: Prior completion of the KU Core Written
Communication requirement. Recommended: Prior completion of one
200-level English course. LEC.

ENGL 306. Global Environmental Literature. 3 Hours AE42 / H.
An examination of a variety of literary and other representations of
human and non-human environments and environmentalism. Particular
attention will be paid to how race, gender, class, sexuality, and geography
produce and are produced by those representations. (Same as EVRN
306 and GIST 306.) Prerequisite: Prior completion of the KU Core Written
Communication requirement. Recommended: Prior completion of one
200-level English course. LEC.

ENGL 308. Introduction to Literary Criticism and Theory. 3 Hours
GE3H / H.
Study of significant problems in literary interpretation and methodology,
in which basic critical principles and approaches are systematically
examined and applied. These approaches might include, but are not
limited to, feminism, Marxism, deconstruction, psychoanalysis, and
cultural studies. Prerequisite: Prior completion of the KU Core Written
Communication requirement. Recommended: Prior completion of one
200-level English course. LEC.

ENGL 309. The British Novel. 3 Hours HL / H.
Study of five or more significant novels representative of developments
in the British novel of the eighteenth, nineteenth, and twentieth centuries.
Prerequisite: Prior completion of the KU Core Written Communication
requirement. Recommended: Prior completion of one 200-level English
course. LEC.

ENGL 310. Literary History I. 3 Hours H.
A study of literature in English, including major forms and movements,
from the medieval period to Romanticism. Prerequisite: Prior completion
of the KU Core Written Communication requirement. Recommended:
Prior completion of one 200-level English course. LEC.

ENGL 312. Major British Writers to 1800. 3 Hours H.
Outstanding works of British literature, from the earliest times to the close
of the eighteenth century, studied in chronological sequence and with
some attention to the characteristics of the various periods of English
literary history embraced. Prerequisite: Prior completion of the KU Core
Written Communication requirement. Recommended: Prior completion of
one 200-level English course. LEC.

ENGL 314. Major British Writers after 1800. 3 Hours H.
Outstanding works of British literature, from 1800 to the present, studied
in chronological sequence and with some attention to the characteristics
of the various periods of English literary history embraced. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 315. Studies in British Literature. 3 Hours HL AE42 / H.
For students enrolled in the annual summer Study Abroad program, an
interdisciplinary program conducted with other humanities departments.
British literature is studied in the context of visits to relevant sites such as
London, the Lake District, and Edinburgh. Prerequisite: Prior completion
of the KU Core Written Communication requirement. Approval for
enrollment in the Summer Institute through the Study Abroad office is
required. Recommended: Prior completion of one 200-level English
course. LEC.

ENGL 316. Introduction to Major American Writers. 3 Hours H.
Outstanding works of American literature, studied in chronological
sequence and with some attention paid to the characteristics of the
various periods of American literary history embraced. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 317. Topics in American Literature to 1865: ____. 3 Hours H.
Study of American literary works before 1865. Topics may focus on a
particular genre, theme, topic, historical period, author, or group of
authors. May be repeated for credit as the topic changes. Prerequisite:
Prior completion of the KU Core Written Communication requirement.
Recommended: Prior completion of one 200-level English course. LEC.

ENGL 318. Topics in American Literature Since 1865: ____. 3 Hours
H.
Study of American literary works since 1865. Topics may focus on a
particular genre, theme, historical period, author, or group of authors. May
be repeated for credit as the topic changes. Prerequisite: Prior completion
of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 320. American Literature I. 3 Hours H.**
From the beginnings to 1865, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 322. American Literature II. 3 Hours H.**
From 1865 to the present, with emphasis on the major writers and movements. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 323. Twentieth Century Literature and Culture. 3 Hours H.**
The study of British and American literature, emphasizing important figures and movements since World War I. On occasion, the study of literature will be enriched with an investigation of other arts, such as music, film, and painting. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 324. Contemporary Authors: ______. 3 Hours H.**
Study of one or more recent British and/or American authors. (Different authors in different semesters.) May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 325. Recent Popular Literature. 3 Hours HL / H.**
Study of recent best sellers or other works of popular interest. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 326. Introduction to African Literature. 3 Hours NW AE42 / H/ W.**
Reading, analysis, and discussion of contemporary fiction, poetry, and drama from sub-Saharan Africa. Brief attention is paid to historical development and to traditional literature. (Same as AAAS 332.)
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 327. Studies in Twentieth-Century Drama: ______. 3 Hours H.**
A survey of major twentieth-century playwrights and theatre groups, to be selected by the instructor. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 328. Literature and Film: ______. 3 Hours H.**
The comparative study of the literary and film treatments of a particular topic or theme, with special attention to the generic qualities of literature and film. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 329. Topics in Forms and Genres: ______. 3 Hours H.**
An introductory study of a selected topic focused on a literary or rhetorical form or genre (e.g., Lyric Poetry, Captivity Narratives, Genre Theory). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 330. Literary History II. 3 Hours H.**
A study of literature in English, including major forms and movements, from the Romantics to the present. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 331. Chaucer. 3 Hours H.**
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 332. Shakespeare. 3 Hours H.**
A study of ten to fourteen of Shakespeare's plays. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 334. Major Authors: ______. 3 Hours H.**
Study of one or two major British and/or American authors. Different authors in different semesters. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 336. Jewish American Literature and Culture. 3 Hours AE41 / H.**
An examination of Jewish American literature and culture from the 17th century to the present. Materials may include a broad range of literary genres as well as folklore, music, film, and visual art. (Same as JWSH 336.)
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 337. Introduction to U.S. Latino/a Literature. 3 Hours AE41 / H.**
An historical survey of literature by U.S. Latina/o writers of Mexican, Puerto Rican, Cuban, Dominican, and Central/South American descent. Various genres, including oral forms such as corridos as well as novels, poetry, essays, and autobiographical writing, will be considered.
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 338. Introduction to African-American Literature. 3 Hours AE41 / H.**
An introduction to prominent works of African-American literature from the 18th century to the present as well as to the basic approaches to study and principles of this body of work, including its connection with African sources. Literature will include a wide variety of genres, and course materials may be supplemented by folklore, music, film, and visual arts.
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 339. Introduction to Caribbean Literature. 3 Hours AE42 / H.**
Reading, analysis, and discussion of fiction, poetry, and drama from the Caribbean, including a small selection of Spanish, French, and Dutch Antillean works in translation. (Same as AAAS 333.)
Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 340. Topics in U.S. Ethnic Literature: ______. 3 Hours AE41 / H.**
A study of literature by authors from one or more ethnic groups within the U.S., including but not limited to Asian American, African American, American Indian, Jewish American, Italian American, U.S. Latina/o.
Different topics in different semesters. May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written
Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 341. American Literature of Social Justice. 3 Hours AE41 / H. An examination of U.S. literature that addresses situations of political and economic oppression or repression with the potential function of enlisting readers' sympathies in a project of social justice. The course focuses on U.S. literary texts dealing with social injustice and the curtailment of human and civil rights and addresses debates surounding cultural authority and authenticity, identity politics, attempts to represent the voice of the "oppressed," revision of strategies used in slave narrative or in testimony, and ethical and rhetorical appeals to an assumed readership. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 342. Topics in Transcultural Literature, Language, or Rhetoric: _____. 3 Hours H. An introduction to a topic in the literatures, languages, or rhetorics of diverse cultural groups in the US or the world. A supermajority of the works considered were originally written in English. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 344. Black Feminist Theory. 3 Hours HL / H. This course will study the critical discourse produced by black female intellectuals, writers, and activists about their race, gender, sexual, and class identities. Students will explore black women's distinct positionality through an examination of their theory as well as their praxis from the nineteenth century to the contemporary moment. By tracing the evolution of black feminist thought, the class will explore black women's initiation of and engagement with political, social, and artistic conversations in various fields of scholarly inquiry including—but not limited to—literature, history, sociology, political science, and the law. (Same as AAAS 344 and WGSS 344.) Prerequisite: WGSS 101, AAAS 104, or prior completion of one 200-level English course. LEC.

ENGL 345. Fiction Writing I. 3 Hours H. A study of narrative techniques and practice in the writing of fiction. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 346. Poetry Writing I. 3 Hours H. A study of prosody and practice in the writing of verse. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 350. Screenwriting I. 3 Hours H. An introduction to the practice of writing and evaluating scripts for film. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 354. Playwriting I. 3 Hours H. An introduction to the practice of writing and evaluating scripts for stage. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 355. Nonfiction Writing I. 3 Hours H. An introduction to the literary techniques of nonfiction and practice in the writing of one or more of the genre's subtypes, such as the personal essay, the familiar essay, the lyric essay, the memoir, nature writing, or travel writing. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 359. English Grammar. 3 Hours U. A course in traditional English grammar for students who wish to understand and be able to analyze English sentence structure. Students might apply the course to studies of style (their own or other authors'), rhetorical analysis, literary interpretation, or teaching. This course may be offered in either lecture or online format. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

ENGL 360. Topics in Writing: _____. 3 Hours H. A writing course that helps students continue their writing practices at an advanced level, with a focus on particular varieties, purposes, audiences, media, or other issues in rhetorical writing. Topics vary (e.g., Writing for Social Action, Writing with Confidence, Writing Online, Writing for Style). May be repeated for credit as topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

ENGL 361. Professional Writing: _____. 3 Hours H. Principles of writing for specific professional contexts, which might include such areas as business writing, legal writing, and literary or arts reviewing, etc. May be repeated for credit as topic varies. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

ENGL 362. Foundations of Technical Writing. 3 Hours H. Introduces students to the principles of technical communication. Students learn to organize, develop, write, and revise various technical documents (e.g., letters, manuals, presentations, proposals, reports, resumes, websites) often needed in business, engineering and scientific settings. Includes an introduction to technical-writing software. This course fulfills the prerequisite for English 562 and English 564. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

ENGL 369. Introduction to Rhetoric and Composition. 3 Hours GESH / H. Introduces students to rhetoric and composition, a field that investigates questions about the nature, processes, teaching and historical, social and cultural contexts of writing. Students survey the themes, debates, and trends that inform the work of scholars in this field. Students also become acquainted with the historical traditions of discourse instruction, and the relevance of those traditions to our current understandings of writing. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

ENGL 381. Topics in Rhetoric and Composition: _____. 3 Hours H. An introductory study of a selected topic in rhetoric or writing studies (e.g., Multimeda Rhetoric, Rhetoric of Social Action, Teaching Writing). May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

ENGL 382. Composing Cultures. 3 Hours H. In this course, we will explore how texts are culturally situated and will carry out our own investigations of a subculture. Through analysis of the rhetorical and social situations that motivate writing and ethnographic investigation of a culture’s discursive interactions, we will explore how a group’s purposes and actions are shaped by cultural contexts for writing. We will complete a range of related writing projects (an observation of a place/setting for a culture’s interactions; an analysis of a culture’s language or cultural artifacts; interviews with participants in a culture or oral histories), culminating in a longer field study or ethnography—a descriptive and analytical account of a culture or subculture. We will also critically read and respond to multiple interdisciplinary texts and genres, including ethnographies and overviews of ethnographic research.
methods. As we explore the cultural embeddedness of writing, we will focus, in particular, on the positioning of the researcher and the ethics of conducting cultural research. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 383. Cultural Rhetorics. 3 Hours H.**

In this course, we will engage in the interdisciplinary study of cultural rhetorics, which is an approach to rhetorical study that considers the role of cultural forces in shaping the rhetorical practices of individuals, communities, and politics. Emphasizing feminist, queer, critical race, and/or disability studies work in rhetorical studies, this course will focus on the following questions: How does rhetoric enable the functioning of power, oppression, and resistance? How are cultural, political, economic, and ideological notions of identity, of the body, and even of the human rhetorically constructed? What counts as rhetoric, and who gets to decide what is worthy of rhetorical study? How do rhetorics of space, place, home, diversity/identity, and the nation influence culture, politics, and institutions? Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 385. The Development of Modern English. 3 Hours H.**

An introduction to the history of the English language, with special attention to general structural changes throughout its history, especially changes in vocabulary and meaning, and past influences of other languages upon present usage. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 386. Language and Social Justice in the US. 3 Hours H.**

In this course, we consider the social implications of using different varieties and dialects of the English language in the US. Questions covered may include (but are not limited to): different social characteristics attributed to different varieties (dialects, ethnolinguistic, genderlects) and their users; features of language that carry stigma and how such stigma is socially and historically constructed; and the role of media (news outlets, movies, "the Internet") in conveying what is seen as acceptable or unacceptable in language. We also explore how these language attitudes and evaluations impact different groups of people in their daily lives, and what possible recourses we have to address language injustice. As we discuss these issues, you will not only gain an understanding of the social nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 387. Introduction to the English Language. 3 Hours HL GE3H / H.**

A survey of the English language, its historical development, and its grammatical structure. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 388. Topics in English Language Studies. 3 Hours H.**

An introductory study of a selected topic in English language studies (e.g., World Englishes, Language and Literary Style, The Secret Life of English Words.) Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 389. Postcolonial and World Englishes. 3 Hours H.**

In this course, we explore the complex landscape of varieties of English or Englishes around the world. We chart the history of English and its spread through colonization and through the cultural and economic influence of especially the US and the UK. We get a sense of the diversity of Englishes by focusing on a selection of countries from various continents (including Africa and Asia), looking at the linguistic characteristics of these Englishes as well as the attitudes towards the Englishes within and outside the countries. This survey of Englishes leads us to consider broader questions such as how people evaluate different Englishes, who "owns" English, and similar issues. As we discuss these topics, you will not only gain an understanding of the variable and changeable nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of the KU Core Written Communication requirement. LEC.

**ENGL 390. Studies in: _____. 3 Hours H.**

A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 400. Teaching and Tutoring Writing. 3 Hours U.**

Students explore theories and strategies of teaching and tutoring writing across academic disciplines. They learn more about themselves as writers as they build a repertoire of writing techniques useful in their studies, in the workplace, and in their personal lives. By observing and consulting in the writing center, they understand how reflection leads to responsive, ethical, and engaged practice. (Same as LAS 400.) Prerequisite: ENGL 102 or equivalent. LEC.

**ENGL 466. Literature for Children. 3 Hours H.**

Wide reading in the great literature of the past and present suitable for children: folktales and epics, mythology, modern fantasy, fiction, poetry. Emphasis on extending the student's background and developing critical judgment. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 479. The Literature of: _____. 3 Hours H.**

A study of the literary treatment of a particular aspect of British and/ or American society. May be repeated for credit as the topic changes. Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

**ENGL 492. The London Review. 3 Hours AE42 / H.**

This class meets one day a week throughout the semester and includes a nine-day visit to London over the spring break period. Students spend the early part of the semester selecting special interests, researching places to visit and study, and exchanging information. After the trip, students compile and publish a journal entitled "The London Review", which is comprised of essays, photos, art work, and other reflections about their experience in London. Prerequisite: Admission to University Honors Program or permission of instructor. LEC.

**ENGL 494. Research Internship. 1-3 Hours H.**

Practical research experience in English studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis. May be used as a component of the Research Experience Program (REP). Prerequisite: At least one 300-level English course, declaration of English major, and permission of instructor. INT.

**ENGL 495. Directed Study: _____. 1-3 Hours H.**

Work for advanced majors in fields or on topics not covered in course work. May be repeated for a total of up to six hours. Does not satisfy specific course requirements for the English major. May be counted as part of the total junior-senior credit hours required. Prerequisite: Completion of three junior-senior courses in English and consent of instructor. IND.

**ENGL 496. Internship. 1-3 Hours H.**

Practical experience in the use of English skills in supervised academic or professional settings. Credit hours are graded on a satisfactory/unsatisfactory basis, according to the written evaluation provided by the supervisor to the director. Prerequisite: At least one 300-level English
course, declaration of English major, and permission of Undergraduate Director. INT.

**ENGL 497. Service Learning Internship. 1-3 Hours H.**
Practical experience in the use of English skills in a non-profit or advocacy context. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis, according to the written evaluation student provided by the on-site supervisor and on the student’s written reflective component assigned and evaluated by the supervising faculty member. May be used as a component of the Service Learning certification program. Prerequisite: At least one 300- or 400-level English course, declaration of English major, and permission of instructor. INT.

**ENGL 506. Science Fiction. 3 Hours AE61 / H.**
The development of science fiction as a literary genre, and as a literature of ideas for a future-oriented society. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 507. Science, Technology, and Society: Examining the Future through a Science-Fiction Lens. 3 Hours AE61 / H.**
Science and technology offer many benefits to individuals and to societies, yet they also present many challenges. This course explores the past, present, and possible future effects of science and technology on society through readings and discussions of nonfiction articles in conjunction with science-fiction stories and novels. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 508. Contemporary Literary Theory. 3 Hours AE61 / H.**
Study of selected works of literary theory and of current issues in literary studies. The course is designed for advanced undergraduates who intend to continue their study of literature in graduate school and for new graduate students who require a grounding in literary theory. According to each instructor’s interest, the course may survey contemporary literary theory or may focus on a particular topic (e.g., authorship, canon formation, creativity, metaphor, narrative, rhetoric) or on a theoretical position (e.g., cultural studies, deconstruction, feminism, historicism, Marxism, psychoanalysis). A student may repeat the course with the permission of the appropriate director. Prerequisite: Completion of three junior-senior courses in English (or their equivalent) or graduate standing. LEC.

**ENGL 520. History of the Book. 3 Hours AE61 / H.**
Brief history of writing materials and handwritten books; history of printed books from the fifteenth century as part of cultural history; technical progress and aesthetic change. (Same as HIST 500.) LEC.

**ENGL 521. Advanced Topics in British Literature 1800: ______. 3 Hours AE61 / H.**
A Study of texts written before 1800. May be organized around a particular genre, historical period, a group of writers, or a theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 522. Advanced Topics in British Literature After 1800: ______. 3 Hours AE61 / H.**
A study of texts written after 1800. May be organized around a particular genre, historical period, group of writers, or a theme. May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 525. Shakespeare: ______. 3 Hours AE61 / H.**
Intensive study of selected works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 530. Irish Literature and Culture: ______. 3 Hours AE61 / H.**
Study of topics in Irish literature and culture. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. (Same as EURS 512.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 531. James Joyce. 3 Hours AE61 / H.**
A study of the major works of James Joyce, with the majority of the semester dedicated to Ulysses. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 532. Whitman and Dickinson. 3 Hours AE61 / H.**
A study of selected works of Walt Whitman and Emily Dickinson. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 533. William Faulkner. 3 Hours AE61 / H.**
A study of selected works of William Faulkner. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 534. Major Authors (Capstone): ______. 3 Hours AE61 / H.**
Study of one or two major authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 536. Readings in the Holocaust. 3 Hours AE61 / H.**
An examination of Holocaust literature, which may include fiction, nonfiction, poetry, drama, and film. Theoretical concerns may include such issues as memory, trauma, representation, imagination, exile, alienation, silence, the body and emotions, and intergenerational transmission. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

**ENGL 545. Methodologies in Digital Humanities, Honors. 3 Hours H.**
This course addresses research possibilities and ongoing debates in the field of Digital Humanities. Students will examine how digital technologies and methodologies can enhance or suggest new modes of Humanities research. The course focuses on core topics in the field, including text analysis, data visualization, digital mapping, archiving and (digital) cultural studies. We will take a hands-on and critical approach to investigating the benefits and limitation of different digital methods. Course assignments will consist of blog posts and mini projects conducted throughout the semester. At the end of the semester, students will develop a proposal for a project that brings digital methodologies to bear on a research inquiry related to the student’s discipline. No prior experience in digital work or technical skills required. Prerequisite: Instructor permission. LEC.

**ENGL 551. Fiction Writing II. 3 Hours AE61 / H.**
Continuation of ENGL 351. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 351 or equivalent. LEC.

**ENGL 552. Poetry Writing II. 3 Hours AE61 / H.**
Continuation of ENGL 352. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 352 or its equivalent. LEC.

**ENGL 553. Screenwriting II. 3 Hours AE61 / H.**
A continuation of ENGL 353. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 353 or its equivalent. LEC.

**ENGL 554. Playwriting II. 3 Hours AE61 / H.**
A continuation of ENGL 354. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 354 or its equivalent. LEC.

**ENGL 555. Nonfiction Writing II. 3 Hours AE61 / H.**
Continuation of ENGL 355. May be repeated for undergraduate credit up to a total of six hours. Prerequisite: ENGL 355 or its equivalent. LEC.
ENGL 560. British Literature of the 20th Century: ______. 3 Hours AE61 / H.
Study of twentieth-century literary works. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 562. Advanced Technical Writing I. 3 Hours AE61 / H.
Stresses research methods in technical communication and simulates on-the-job training through live interviews and other forms of research. Students master the relevant software tools and begin to develop a technical-writing portfolio. Prerequisite: ENGL 362. LEC.

ENGL 563. Advanced Technical Writing and Editing. 3 Hours AE61 / H.
Students apply the principles of communicating business, scientific, and technical information to targeted readers. Concentration on the varying writing styles for online documents, proposals, reports, specifications, journal articles, and larger documents, as appropriate to their audience. Simulates an internship and helps students further develop a technical-writing or -editing portfolio. Students provide weekly status reports and a final report detailing their learning experience and present it to an appropriate technical communication class to help other students better understand the field. Prerequisite: Instructor permission. LEC.

ENGL 564. Advanced Technical Editing I. 3 Hours AE61 / H.
Students learn to use specialized vocabulary and editing tools such as proofreaders' marks, style guides, and standard editorial reference material; and they practice how to identify and correct common problems. Students usually work with writers in other technical writing courses, learning to work productively with other peoples' print and online documents. Students practice taking editing tests and develop a technical-editing portfolio. Prerequisite: ENGL 362. LEC.

ENGL 565. The Gothic Tradition. 3 Hours H.
This course explores and defines the Gothic tradition in British and American literature from its beginnings in the late eighteenth century to more recent twentieth-century texts in literature and film. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 567. Modern Drama: _____. 3 Hours AE61 / H.
A study of American, British, or comparative drama from the late nineteenth century to the present. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 568. American Literary Environmentalism. 3 Hours AE61 / H.
An examination of representations of nature and human/nature relations and their political, social and environmental consequences, with a special focus on the 19th and 20th centuries, including the writings of transcendentalists and conservationists, slave narratives, scientific writing on toxicity and other topics, and environmental justice literature. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 569. The Modern Tradition. 3 Hours AE61 / H.
An intensive study of the formative backgrounds of the "modern" spirit as it is expressed in imaginative literature. Readings from such influential spokesmen as W. James, Zola, Marx, Darwin, Henry Adams, Kierkegaard, Dostoevsky, Nietzsche, I.A. Richards, T.S. Eliot, Joyce, Auden, Rilke, Croce, Yeats, Malraux, Freud, Jung, D.H. Lawrence, Sartre, Camus, and Gide. Prerequisite: Prior completion of the freshman-sophomore English requirement or its equivalent. LEC.

ENGL 570. Topics in American Literature: _____. 3 Hours AE61 / H.
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 571. American Indian Literature: _____. 3 Hours NW AE41/AE61 / H/W.
The study of a wide range of American Indian literature, from various tribes and in a variety of genres. Satisfies the non-western culture course requirement. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 572. Women and Literature: _____. 3 Hours AE61 / H.
Different topics in different semesters. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 573. U.S. Latina/o Literature: _____. 3 Hours AE41/AE61 / H.
A study of the literature written by U.S. Latina/o writers of Mexican, Puerto Rican, Cuban, Dominican, and other Central/South American descent, in a variety of genres. Attention is given to the cultural and historical contexts of the literature and to the specificity of particular U.S. Latina/o groups. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 574. African American Literature: _____. 3 Hours AE41/AE61 / H.
A study of the literature written by African Americans from the pre-Civil War period to the present. Emphasis upon specific historical periods in the development of African American literature as well as on a critical analysis of major autobiographical, poetic, and fictional works. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 575. Literature of the American South. 3 Hours AE61 / H.
A survey of fiction, non-fiction, poetry, and drama written by selected writers of the American South from the pre-Civil War period to the present. The course will emphasize the critical analysis of individual texts as well as the cultural and historical context of the works. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 576. Advanced Topics in American Literature to 1865: _____. 3 Hours AE61 / H.
Study of American literary works before 1865. Topics may focus on a particular genre, theme, historical period, author, or group of authors. May be repeated for credit as the topic changes. (Same as AMS 554.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 577. Advanced Topics in American Literature Since 1865: _____. 3 Hours AE61 / H.
Study of American literary works after 1865. Topics may focus on a particular genre, theme, historical period, author, or group of authors. May be repeated for credit as the topic changes. (Same as AMS 555.) Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 578. Poetry, 1900-1945. 3 Hours AE61 / H.
A Study of English-language poetry of the early twentieth century. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.
ENGL 579. Poetry since 1945. 3 Hours AE61 / H.
A study of English-language poetry from the mid-twentieth century to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 580. Rhetoric and Writing: ______. 3 Hours AE61 / H.
A study of selected broad topics in rhetoric and writing, including such topics as the rhetoric of law, the rhetoric of education, persuasion in literature, literacy, and rhetorical genres. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 581. English Language Studies: ______. 3 Hours AE61 / H.
A study of selected topics in English language studies (e.g. World Englishes, Language and Literary Style, and The Secret Life of English Words). May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 582. Multimedia/Multimodal Rhetorics. 3 Hours H.
Digital culture and new media have transformed reading, writing, and research practices, revealing the multidimensionality of texts, blurring the roles of writer and audience, and creating new spaces for dialogue, collaboration, and participation in rhetorical acts. In this course, we will apply rhetorical principles across a variety of media genres—from blogs, to YouTube videos, to podcasts, to Tweets, to Instagram and Facebook posts—and will address the complex realities and challenges of composing ethical, persuasive, and effective arguments in the 21st century. The course will explore how traditional processes of writing and reading texts are challenged by communication across a range of diverse new media genres that employ multiple modes of communication (linguistic, visual, spatial, gestural, and aural ways of making meaning). We will examine the impact of multimedia/multimodal discourse on ourselves and our culture, and through our analysis and production of multimodal texts, we will explore how medium and mode shape the message, work to persuade multiple audiences, and alter the way that we understand, structure, and process knowledge. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 586. Language and Style. 3 Hours H.
When we talk about a writer’s style, or the style of a text or genre, what exactly do we mean? How do we identify, define, and analyze the elements that make up a style? What is it that makes us think that one style is “better” than another style? This is what we will explore in this course. We draw on a number of frameworks and theories from English language studies that can be used to discuss and analyze linguistic choices and strategies in texts; in other words, we will take apart the language of a text or writer (including your own!) in order to understand how it has been put together. As we approach language, text, and style from this perspective, you will not only gain an understanding of the flexible, yet structured nature of the English language, but you will also acquire the skills and tools to discuss, analyze, and write about language. Prerequisite: Prior completion of a 300- or 400-level English course. LEC.

ENGL 587. American English. 3 Hours AE61 / H.
A study of the structure, history, and varieties of the English language in the United States from the period of colonization to the present. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 590. Studies in: ______. 1-3 Hours AE61 / H.
A study of a specialized theme or topic in English studies. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of the first-and second-year English requirement or its equivalent, and at least one 300- or 400-level ENGL course; or permission of instructor. LEC.

ENGL 592. Survey of: ______. 3 Hours AE61 / H.
A broad view of major works and authors in a particular period, genre, or mode. May be repeated for credit as the topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 596. Technical Communication Internship. 1-3 Hours AE61 / H.
Practical experience in the use of technical-writing or editing skills in supervised professional settings for which the student normally does not receive pay. A 1-3 hour internship requires 40-120 hours of documented on-site work in one semester (40 hours per credit). Credit hours are graded on a satisfactory/unsatisfactory basis, according to a written recommendation from the student's workplace manager, student work logs and self-evaluation, and an oral report. Prerequisite: Advanced Technical Writing I (English 562) and permission of instructor. LEC.

ENGL 598. Honors Proseminar: ______. 3 Hours AE61 / H.
Directed reading and participation in small discussion groups, each formed to consider a specific and limited subject during the semester. Written work will be required, and will be judged on both content and form. The course is part of a departmental program leading to Honors in English. Prerequisite: Admission must be approved by the departmental director of undergraduate studies. LEC.

ENGL 599. Honors Essay. 3 Hours AE61 / H.
Independent study, culminating in a substantial essay prepared under the direction of a member of the Department of English who is a specialist in the area of the student's interest. Prerequisite: Admission must be approved by the departmental director of undergraduate studies. LEC.

ENGL 610. The Literature of England to 1500. 3 Hours AE61 / H.
A survey of the literature of medieval England (in translation). Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 620. Renaissance English Literature: ______. 3 Hours AE61 / H.
A broad view of literary works written between 1485 and 1660. Surveys may be offered with focus on a particular genre (poetry, drama, or prose), historical period (16th- or 17th-century literature), or group of authors (women writers). May be repeated for credit as topic varies. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 633. Milton. 3 Hours AE61 / H.
A close reading of Paradise Lost, Paradise Regained, Samson Agonistes, and the minor poems, with illustrative selections of prose. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 640. British Literature, 1600-1800: ______. 3 Hours AE61 / H.
Study of literary works from the Restoration and eighteenth century. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 650. Romantic Literature: ______. 3 Hours AE61 / H.
Study of literary works from the British Romantic period. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 655. Victorian Literature: ______. 3 Hours AE61 / H.
Study of literary works from the Victorian period. Topics may focus on a particular genre, theme, historical period or group of authors. May be
ENGL 660. Ecocriticism. 3 Hours AE61 / H.
A study of the relationship between various modes of representation and environmentalism. Particular attention paid to the intersection between ecocriticism and other forms of contemporary literary theory, including, for example, critical race studies, poststructuralism, postcolonial theory, gender and sexuality studies, class-based criticism, and animal theory. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 674. African Literature: _____. 3 Hours NW AE42/AE61 / H.
An advanced study of a topic, genre, or area of written and/or oral African literature. Emphasis is placed on the critical analysis of major works, as well as their cultural and historical contexts. The course also addresses central critical and theoretical debates in the field. May be repeated for credit as the topic changes. Prerequisite: At least one 300- or 400-level English course, or permission of instructor. LEC.

ENGL 690. Studies in: _____. 3 Hours AE61 / H.
A study of a major topic of concern to English literature. May be repeated for credit as the topic changes. Capstone course. Prerequisite: Prior completion of at least one 300- or 400-level English course. LEC.

ENGL 707. Literary Criticism to 1800. 3 Hours.
An introduction to the major writings of literary criticism, in their historical context, from Plato and Aristotle to Samuel Johnson. LEC.

ENGL 708. Literary Criticism after 1800. 3 Hours.
An introduction to modern criticism, in its historical context, from Wordsworth and Coleridge to the present. The emphasis will be on major critics and predominant schools. LEC.

ENGL 709. Critical Theory: Problems and Principles: _____. 3 Hours.
Study of a topic (such as mimesis, influence, deconstruction) that is important in critical theory. May be repeated for credit as topic varies. LEC.

ENGL 710. Introduction to Old English. 3 Hours.
A study of the grammatical features of the earliest form of written English, with readings in Old English prose and poetry. LEC.

ENGL 712. Beowulf. 3 Hours.
Prerequisite: An introductory course in Old English. LEC.

ENGL 714. Middle English Literature. 3 Hours.
Reading of selected works in Middle English (exclusive of the works of Chaucer). LEC.

ENGL 720. Chaucer: _____. 3 Hours.
Intensive study of either the Canterbury Tales or Troilus and Criseyde and the earlier poems. May be repeated for credit up to a maximum of six hours. LEC.

ENGL 725. Shakespeare: _____. 3 Hours.
Intensive study of selected plays. May be repeated for credit as the topic changes. LEC.

ENGL 730. Topics in Early Modern Literature: _____. 3 Hours.
Intensive study of texts written between 1485 and 1800. The course may be organized around a particular genre (poetry, prose, drama), historical period (e.g. Elizabethan literature), a major author (e.g. Milton), group of authors (e.g. women writers), or theme (e.g. literature and politics 1660-1800). Students will be expected to read and apply relevant criticism and theory as well as study primary texts. May be repeated for credit as topic varies. LEC.

ENGL 750. British Literature of the 19th Century: _____. 3 Hours.
Intensive study of British literary works of the 1800s. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

ENGL 751. Fiction Writing III. 3 Hours.
Practice in the writing of fiction under the direction of a member of the department working in conjunction with one or more writers in residence. Membership is limited to students who submit, well in advance enrollment, manuscripts showing unusual ability. May be repeated for credit. LEC.

ENGL 752. Poetry Writing III. 3 Hours.
Practice in the writing of poetry under the direction of a member of the department working in conjunction with one or more writers in residence. Membership is limited to students who submit, well in advance of enrollment, manuscripts showing unusual ability. May be repeated for credit. LEC.

ENGL 753. Writers Workshop. 3 Hours.
An intensive course in writing prose fiction and/or verse. Criticism (NEW) of manuscripts through group meetings and individual conferences with the instructor. Membership limited to students who submit manuscripts showing special ability in at least one of the creative writing forms. May be repeated for credit. LEC.

ENGL 756. Forms: _____. 3 Hours.
A study of literary works belonging to a particular genre or to multiple genres (fiction, nonfiction, poetry, drama etc), either in a particular form (short story, essay, sonnet, etc.), concerned with a particular topic, or illustrative of a particular element of craft (voice, point of view, character development, etc.). Intended primarily for creative-writing students with an interest in developing their skills at reading as writers. May be repeated for credit as the topic varies. LEC.

ENGL 757. Speculative Fiction Writing Workshop. 3 Hours.
An intensive, 2-week course in writing speculative fiction, including genres such as slipstream, magical realism, fantasy, horror, and science fiction. The course is part of the Center for the Study of Science Fiction Summer Institute. Application period: January 1 - April 15. Application includes note to instructor expressing interest and one story. May be repeated for credit with instructor’s permission. LEC.

ENGL 760. British Literature of the 20th Century: _____. 3 Hours.
Intensive study of British literary works written during the 20th century. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

ENGL 764. Modern Irish Literature: _____. 3 Hours.
Intensive study of topics in modern Irish literature. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

ENGL 767. Studies in Modern Drama: _____. 3 Hours.
Reading of selected works in modern and contemporary drama. May be repeated for credit as the topic changes. LEC.

ENGL 770. Studies in Life Writing: _____. 3 Hours.
This course focuses on or surveys individual writers in the tradition of life writing; or intensively examines topics such as "Autobiography," "Memoir and Diary," "Biography," "Slave Narrative," "Letters," "Personal Essays," or "Autobiographical Fictions." Special emphasis within a topic, such as period, gender, or ethnicity, are possible. May be repeated for credit up to a maximum of six hours. LEC.

ENGL 774. Topics in Literatures of Africa and the African Diaspora: _____. 3 Hours.
An intensive study of the literatures of Africa and/or African diaspora (people of African descent dispersed around the world). This study will
focus on the major characteristics of a particular period, genre, mode, and/or theme in literatures such as African, Caribbean, Afro-Brazilian, African American, African Canadian, Black British. Critical theories pertinent to writers and their work will be covered. Topics may include studies in drama, poetry, or the novel; migration narratives; literature of a particular era, such as the Harlem Renaissance, Négritude, or the Black Arts Movement; representations of gender, etc. As topics vary by semester, the course may be repeated for credit. (Same as AAAS 774.) LEC.

ENGL 776. American Literature to 1900: _______. 3 Hours. Intensive study of North American literary works before 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

ENGL 777. American Literature after 1900: _______. 3 Hours. Intensive study of North American literary works after 1900. Topics may focus on a particular genre, theme, historical period or group of authors. May be repeated for credit as the topic changes. LEC.

ENGL 779. U.S. Poetries Since 1900. 3 Hours. A colloquium for graduate students, sampling the range of poetries and poetics produced in the United States in the twentieth and twenty-first centuries. LEC.

ENGL 780. Composition Studies. 3 Hours. This course surveys the field of composition studies, examining major issues and theories in the study of writing. The course may include theories from classical to contemporary rhetoric, composition theory from the twentieth century, and the most current debates in the study of writing. LEC.

ENGL 781. Criticism and the Teaching of Literature. 3 Hours. A survey of selected critical theories and of the applicability of those theories to the teaching of literature. LEC.

ENGL 785. History of the English Language. 3 Hours. Historical study of the phonology, morphology, syntax, vocabulary, and semantics of English; the relation between linguistic and cultural change. LEC.

ENGL 787. Modern English Grammar. 3 Hours. A study of contemporary English: phonology, morphology, syntax, and usage. The emphasis is structural, but "traditional" grammar is referred to for contrast, example, and clarification. LEC.

ENGL 790. Studies in: _______. 3 Hours. Examination of a significant topic in literature or the English language. May be repeated for credit as the topic varies. LEC.

ENGL 800. Methods, Theory, and Professionalism. 3 Hours. Acquaintance with resources and practice in techniques that are essential to other graduate courses. Major concerns include the writing and documentation of scholarly papers; basic reference and bibliographical aids; critical approaches to literature and literary historiography; and the place of language and rhetoric in English studies today. LEC.

ENGL 801. Study and Teaching of Writing. 3 Hours. A survey of major concepts and issues in the study of writing, especially as applied to teaching composition. Practices in writing pedagogy are also discussed, and students' teaching of composition is observed and explored. Required of and enrollment limited to new teachers of English 101. May not be repeated for credit toward graduate degree. FLD.

ENGL 802. Practicum in the Teaching of College English. 1 Hour. A course concerned primarily with the pedagogy and practice of teaching English 102. Includes weekly group meetings, individual conferences, and class visitations. Required of and enrollment limited to new teachers of English 102. May not be repeated for credit toward graduate degree. Course graded on a satisfactory/unsatisfactory basis. FLD.

ENGL 803. Practicum in the Teaching of Creative Writing. 1 Hour. A course for graduate teaching assistants pursuing the M.F.A. or Ph.D. with emphasis in Creative Writing. Normally taken in the third year. Concerns primarily the pedagogy of creative writing: workshop techniques, approaches to conferencing, revision strategies, and the like. Includes weekly group meetings as well as class visitations and individual conferences. May not be repeated for credit towards graduate degree. Graded on a satisfactory/unsatisfactory basis. Prerequisite: ENGL 801 and 802. FLD.

ENGL 808. Topics in Composition Studies and Rhetoric: _______. 3 Hours. Examination of selected topics in composition and rhetoric, such as literary studies, genre theory, dialogism, or writing across the curriculum. May be repeated for credit as the topic changes. Prerequisite: ENGL 780 or equivalent. LEC.

ENGL 880. Writing Center Theory and Administration. 3 Hours. This course explores theories motivating writing center administration and practice. Students will investigate the multiple functions of writing centers, from writing labs associated with college composition instruction, to decentralized resources for writing faculty teaching writing across the disciplines, to elementary, secondary, and community support centers for writers, to online administrative perspective, design a research study and propose actions such as creating policy, developing curricula, designing materials, or conducting assessments. (Same as LAS 700.) Prerequisite: LAS 400, ENGL 400, or consent of instructor. LEC.

ENGL 894. Seminar in Composition Theory: _______. 3 Hours. Intensive study of one or more theoretical aspects of composition in English (e.g., rhetoric, text grammar, stylistics). Prerequisite: ENGL 800. LEC.

ENGL 904. Seminar in Literary Criticism: _______. 3 Hours. Close study of a major critical text. Prerequisite: ENGL 800. LEC.

ENGL 905. Seminar in the English Language: _______. 3 Hours. Close study of the English language in a particular period. Prerequisite: ENGL 800. LEC.
ENGL 915. Seminar in Medieval English Literature: ____. 3 Hours.
Study may center on either Old or Middle English language and literature. 
Prerequisite: ENGL 800. LEC.

ENGL 916. Seminar in Chaucer: ____. 3 Hours.
Prerequisite: ENGL 800. LEC.

ENGL 920. Seminar in Renaissance English Literature: ____. 3 Hours.
Close study of one or two major authors or of a group of related works. 
Prerequisite: ENGL 800. LEC.

ENGL 926. Seminar in Shakespeare: ____. 3 Hours.
Prerequisite: ENGL 800. LEC.

ENGL 932. Seminar in Milton: ____. 3 Hours.
Prerequisite: ENGL 800. LEC.

ENGL 940. Seminar in Restoration and 18th Century British Literature: ____. 3 Hours.
One or two authors are read closely, or a group of related works is studied. 
Prerequisite: ENGL 800. LEC.

ENGL 950. Seminar in 19th Century British Literature: ____. 3 Hours.
Concentrated study of one or two major figures, or a group of significant 
writers, or an aspect of the literary scene. Prerequisite: ENGL 800. LEC.

ENGL 960. Seminar in 20th Century British Literature: ____. 3 Hours.
Concentrated study of one or two authors, or a group of significant writers, 
or an aspect of the literary scene. Prerequisite: ENGL 800. LEC.

ENGL 970. Seminar in American Literature: ____. 3 Hours.
Concentrated study of one or two authors or of historical periods or 
important movements. Prerequisite: ENGL 800. LEC.

ENGL 974. Seminar in Literatures of Africa and the African Diaspora: 
_____ 3 Hours.
Advanced study in a topic related to literature, language, and cultures of 
Africa and the African Diaspora, such as a concentrated study of one or 
two authors, a group of significant writers, an historical period or important 
movement, or an aspect of the literary or cultural scene of Black writing. 
May be repeated for credit as the topic varies. LEC.

ENGL 980. Seminar In: ____. 3 Hours.
Advanced study in a topic related to literature, language, theory, or a 
special skill such as analytical bibliography or editing. Prerequisite: ENGL 800. LEC.

ENGL 997. Preparation for the Doctoral Examination. 1-12 Hours.
An independent reading course for students preparing to take the Ph.D. 
comprehensive examination. May normally be taken in the semester 
or summer session immediately preceding the semester in which 
the comprehensive examination is taken. Does not count toward the 
residence requirement. Graded on a satisfactory/unsatisfactory basis. 
Prerequisite: Consent of the Director of Graduate Studies. RSH.

ENGL 998. Investigation and Conference: ____ 1-6 Hours.
Individual work in (a) language, (b) literature, (c) composition, or (d) the 
teaching of English, by properly qualified graduate students under the 
direction of appropriate members of the Graduate Faculty as assigned 
by the Graduate Director. Limited to 6 hours of credit toward the M.A. or 
Ph.D. degree; only on three-hour enrollment may substitute for a formal 
course in satisfying a field distribution requirement. Normally offered for 
only up to three credit hours in any one enrollment. Permission of the 
supervising faculty member and of the Graduate Director required for 
enrollment. RSH.

ENGL 999. Doctoral Dissertation. 1-12 Hours.
Graded on a satisfactory progress/limited progress/no progress basis. 
THE.

Bachelor of Arts and Bachelor of General Studies in English

Why study English language and literature?

Because reading and writing shape the world.

KU's English Department is at the core of the humanities, highlighting the 
"human" through our individual, one-on-one interactions with our students, 
our emphasis on community and global engagement, and our abiding 
interest in our shared humanity through the stories of others. We seek 
to challenge the mind and to engage the imagination of our students, to 
teach them to ask questions and to seek for answers. We encourage 
them to grapple with the complexity of a culturally and commercially 
interconnected world and the global networks and processes of cultural 
exchange. We believe that words and ideas will shape the world. We 
teach our students life-long skills, so that they learn to write clearly, 
creatively, and effectively—discovering themselves even as they lay a 
firm foundation for professional success.

A commitment to teaching and learning.

Our department is renowned for its tradition of excellence in teaching. 
The vast majority of our undergraduate classes have 20-35 students, and 
much of the class time is dedicated to active learning and engagement 
with texts and ideas. In the last ten years, faculty members in the 
department of English have won ten Kemper Fellowships for Excellence 
in Teaching, two Chancellors Club Teaching Professorships, a Career 
Achievement Teaching Award, and a wide variety of other university-
level teaching and advising awards, and the department as a whole 
received the Center of Teaching Excellence (CTE) award for Department 
Excellence in Teaching at the University of Kansas.

A variety of career and life paths.

English majors graduate to a variety of careers, including law, teaching, 
scholarship, publishing, library science, and journalism--as well as 
medicine, politics, design, and any number of other fields that value clear 
communication, interpretive skill, and critical and creative thinking.

Engaged and innovative scholarship.

KU's English Department has several core strengths that cross tracks 
and periods, including Global and Cross-Cultural Approaches; Literature, 
Rhetoric, and Social Action; Diversity Studies; Language, Literature and 
Science; and Popular Expressive Forms.

At the KU English Department, students work closely with nationally-
renowned writers and researchers. Our faculty have won national awards 
that recognize excellence in research, including grants from the National 
Endowment for the Humanities, the American Philosophical Society, 
and the Newberry Library, among others. English Department faculty 
members have also received major research funding from the University 
of Kansas, including the Hall Center for the Humanities Research 
fellowships and Keeler Intra-University Fellowships for interdisciplinary 
work. Undergraduate students can work one-on-one with faculty mentors

of Kansas, including the Hall Center for the Humanities Research 
fellowships and Keeler Intra-University Fellowships for interdisciplinary 
work. Undergraduate students can work one-on-one with faculty mentors.
in the Honors Program, McNair Scholars Program, and Dean's Scholars Program, as well as through independent Directed Studies.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Undergraduate First- and Second-Year Preparation**

Prospective English majors and minors are encouraged to complete their KU Core Goal 2.1 requirements and their BA degree-specific written communication requirements with English Department coursework (i.e., ENGL 101, ENGL 102 or ENGL 105, and 200-level ENGL courses). Students are strongly encouraged to take a 200-level English course before taking 300- and 400-level coursework in English. Prospective English majors are encouraged to consult with the Director or Associate Director of Undergraduate Studies in order to declare the major, review major and degree requirements, and become familiar with departmental opportunities.

**Requirements for the B.A. or B.G.S. Major**

The major in English requires 30 hours (33 for Honors English).

**ENGL 300 Introduction to English Studies** (3 hours – must be taken within first year of declaring the English major):

**English Studies Coursework (21 hours, 300 or above)**

This includes at least one course chosen from:

- Rhetoric, Language and Writing studies
- Literature, Language, or Rhetoric prior to 1850
- Diverse identities, communities, and texts

The remaining courses may be chosen from any 300-level or above English course offerings. For students who are interested in focusing on a specific area of study, they may follow the optional emphases path outlined below.

- One 200-level course may be counted toward English Studies coursework.

**Capstone Requirements (6 hours, 500 or above)**

- Students must complete ENGL 300 and 2 other 300-level courses before they proceed to the capstone requirements. All 500-level or above English courses count as capstone courses.
- Students pursuing departmental honors may use ENGL 598 to fill one capstone requirement, and must also enroll in ENGL 599: Thesis hours.

Optional Emphases within the Major

- Students may pursue an emphasis in a particular field by taking at least 3 courses in it.
- These emphases include:
  - Literary Studies: one literary history course, one theory course, and one literary studies capstone
  - Creative Writing: 300-level workshops in two genres, and one creative writing capstone
  - Language, Culture, and Rhetoric: 380 or 387, another RCL course, and one RCL capstone
  - Students may also designate their own ‘custom’ emphasis, in consultation with a departmental advisor.

- 27 hours must be at the junior/senior level.
- No 100-level ENGL courses count toward major requirements.

Notes:

- Up to 6 credits combined of ENGL 494 Research Internship or ENGL 495 Directed Study: ______ may be applied as major electives.
- Up to 3 credit hours of ENGL 496 Internship or ENGL 497 Service Learning Internship may be applied as a major elective.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 30 hours of major courses (33 for Honors English).

Major Hours in Residence
Satisfied by a minimum of 25 hours of KU resident credit in the major; exceptions by permission of Director of Undergraduate Studies only.

Major Junior/Senior Hours
Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in English with the following concentrations can be found here: English General Track (p. 1443), Creative Writing (p. 1443), and Rhetoric, Language, and Writing (p. 1444).

Sample 4-years plans for the BGS degree in English with the following concentrations can be found here: English General Track (p. 1445), Creative Writing (p. 1446), and Rhetoric, Language, and Writing (p. 1447), or by using the left-side navigation.

Departmental Honors

To be admitted to the English Honors major program, an undergraduate must have a 3.5 grade-point average in English courses. Honors English majors must complete at least 1 section of ENGL 598 Honors Proseminar: ______ and ENGL 599 Honors Essay. This requirement, in effect, adds 3 hours of capstone-level coursework to the student’s emphasis.
BA in English

Below is a sample 4-year plan for students pursuing the BA in English. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Total Hours 120-123

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Before beginning 300+ level English courses it is recommended that students take a 200-level English course. One 200-level course may be counted toward English Studies coursework.
4. Students may pursue an emphasis in a particular field by taking at least 3 courses in it (including a capstone). These emphases include:
   - Literary Studies: one literary history course, one theory course, and one literary studies capstone
   - Creative Writing: 300-level workshops in two genres, and one creative writing capstone
   - Language, Culture, and Rhetoric: ENGL 380 or ENGL 387, another RCL course, and one RCL capstone
   - Students may also designate their own ‘custom’ emphasis, in consultation with a departmental advisor.
5. Capstone Requirements (6 hours, 500 or above): Students must complete ENGL 300 and 2 other 300-level courses before they proceed to the capstone requirements. All 500-level or above English courses count as capstone courses. Students pursuing departmental honors may use ENGL 598 to fill one capstone requirement, and must also enroll in ENGL 599: Thesis hour.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**Total Hours 120-123**

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website ([https://collegeadvising.ku.edu/sites/collegeadvising.ku.edu/files/docs/BA.QuantitativeReasoning.pdf](https://collegeadvising.ku.edu/sites/collegeadvising.ku.edu/files/docs/BA.QuantitativeReasoning.pdf)) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. English majors must choose courses from each of the following 7 categories: Individual Authors or Movements, Literary Theory, English Language or Rhetoric, Transcultural Approaches to Language, Literature, or Writing, Writing, Forms and Genres, and Literary History (2 courses). In addition to the courses taken for the Literary History category, one additional course focusing on literature before 1850 ([http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/#Pre1850](http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/#Pre1850), must be taken.
4. Creative writing students must complete workshops in at least two genres. For the purposes of the Creative Writing Tracks, the four major genres are: Fiction; Poetry; Playwriting, Screenwriting, and/or Scriptwriting; and Creative Non-Fiction.
5. Two ENGL courses must be taken at the 500+ level per major requirement.
6. Choose at least one of the required ENGL 500+ level courses, as required by the major, from the list of approved ENGL courses for Goal 6 of the KU Core.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Total Hours 120

1. Students must complete ENGL 101 and ENGL 102, or their equivalents to be eligible for 200-level and higher ENGL courses.
2. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
3. Before beginning 300+ level English courses it is recommended that students take a 200-level English course. One 200-level course may be counted toward English Studies coursework.

4. Students may pursue an emphasis in a particular field by taking at least 3 courses in it (including a capstone). These emphases include:
   - Literary Studies: one literary history course, one theory course, and one literary studies capstone
   - Creative Writing: 300-level workshops in two genres, and one creative writing capstone
   - Language, Culture, and Rhetoric: ENGL 380 or ENGL 387, another RCL course, and one RCL capstone
   - Students may also designate their own ‘custom’ emphasis, in consultation with a departmental advisor.

5. Capstone Requirements (6 hours, 500 or above): Students must complete ENGL 300 and 2 other 300-level courses before they proceed to the capstone requirements. All 500-level or above English courses count as capstone courses. Students pursuing departmental honors may use ENGL 598 to fill one capstone requirement, and must also enroll in ENGL 599: Thesis hours.

### Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

15 & 15

Total Hours 120

1. English majors are encouraged to take a 200-level English course before beginning 300+ level English courses.
2. English majors must choose courses from each of the following 7 categories: Individual Authors or Movements, Literary Theory, English Language or Rhetoric, Transcultural Approaches to Language, Literature, or Writing, Writing, Forms and Genres, and Literary History (2 courses). In addition to the courses taken for the Literary Theory category, one additional course focusing on literature before 1850, must be taken.
3. One course (3 hours) in addition to Literary History (2 courses) must focus on literature before 1850.
4. A total of 12 hours in Rhetoric, Language, and Writing courses are required for students pursuing in the Rhetoric, Language, and Writing track. 3 of the 12 credits will be fulfilled when completing the Rhetoric or Writing category. Three additional rhetoric, language, or writing courses may be chosen from other categories as appropriate.
5. Only one Creative Writing Workshop class is allowed to count toward the major.
6. Please note that the Bachelor of General Studies degree requires completion of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
7. Two ENGL 500+ level courses are required by the major. Attempt to choose at least one of the ENGL 500+ level courses from the list of approved Goal 6 courses for the KU Core.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Bachelor of Arts and Bachelor of General Studies in Literature, Language, and Writing

#### Why study English language and literature?

**Because reading and writing shape the world.**

KU's English Department is at the core of the humanities, highlighting the "human" through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

**A commitment to teaching and learning.**

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 20-35 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

**A variety of career and life paths.**

The Literature, Language, and Writing program at the Edwards campus helps to prepare undergraduate students for a variety of professions, including law, scholarship, publishing, library science, and marketing—as well as any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

### Undergraduate Admission

#### Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.
Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Requirements for the B.A. or B.G.S.
Literature, Language, and Writing Major

KU Edwards Campus

The undergraduate program in literature, language, and writing is offered in its entirety only at the KU Edwards Campus (http://edwardscampus.ku.edu/), 12600 Quivira Rd., Overland Park, KS 66213. This program is designed for students who have earned an associate's degree or equivalent hours and wish to complete the upper-level courses necessary for a bachelor's degree.

Literature, Language, and Writing Program

The major in Literature, Language and Writing requires 30 hours, of which 3 hours may be an appropriate 200-level English course. The program includes professional writing courses. Internship opportunities may be pursued as credit toward the major, offering students the opportunity to develop communication skills in specific professional contexts.

In today's rapidly changing work environment, employers are seeking people who can deal with concepts and abstractions, who are imaginative and creative, and who have good communication and people skills. A degree in English can help develop these skills, and it is good preparation for a variety of advanced professional degrees in areas such as business and law. English majors pursue a range of careers including editing, technical writing, advertising and public relations, teaching, market research, retail management, teaching English as a second language, nonprofit fund-raising and/or advocacy, Web design, speech writing, sales, video production, script reading, radio and television, and many others. Some career paths require an advanced degree or specialized post-graduate training, but an undergraduate degree in English is an excellent base from which to explore career options.

Contact the CLAS undergraduate advisor on the Edwards Campus, Ben Herron, bherron2@ku.edu, 913-897-8544 for more information.

Writing or English Language Required Electives

Majors must complete a total of 3 courses (9 hours) of writing and/or English language courses, of which 3 hours may be an appropriate 200-level English course.

English Required Elective

Majors must complete 3 courses (9 hours) of junior/senior level ENGL courses. Up to 6 credits combined of ENGL 494 (Research Internship) or ENGL 495 (Directed Study) may be applied as major electives; they may not count as English core equivalents. Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) can be applied as major elective credit. In addition, the following courses offered in other CLAS departments may be selected: HUM 304, HUM 308, HUM 312, FMS 373, FMS 773.

Total Hours 30

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours

Satisfied by 30 hours of major courses.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours

Satisfied by a minimum of 27 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Literature, Language, and Writing can be found here: Literature, Language and Writing (p. 1451), or by using the left-side navigation.

A sample 4-year plan for the BGS degree in Literature, Language, and Writing can be found here: Literature, Language and Writing (p. 1451), or by using the left-side navigation.

Departmental Honors

To be admitted to the English Honors major program, an undergraduate student must have earned a 3.5 grade-point average in English courses. The student should declare an English major, if enrolled in the College of Liberal Arts and Sciences, or an English concentration, if enrolled in the School of Business or the School of Education.

Honors English majors must complete at least 1 section of ENGL 598 Honors Proseminar: ______ and ENGL 599 Honors Essay. This requirement, in effect, adds 3 hours of capstone-level coursework to the student’s emphasis.

BA in Literature, Language & Writing

Below is a sample 4-year plan for students pursuing the BA in Literature, Language, & Writing. A 4-year plan for the BGS in Literature, Language, and Writing is coming soon. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

The Literature, Language & Writing major is only available to Edwards campus students.

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. Majors are required to complete two courses (6 hours) from courses that cover Literature Before 1900 (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-literature/#requirementstext).

4. Major must complete 3 courses (9 hours) in writing and/or English language courses.

5. Majors must complete one course each in British and American Literature (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-literature/#requirementstext).

6. Majors must complete 3 courses (9 hours) of junior/senior level ENGL courses. Up to 6 credits combined of ENGL 494 (Research Internship) or ENGL 495 (Directed Study) may be applied as major electives; they may not count as English core equivalents. Up to 3 credit hours of ENGL 496 (Internship) or ENGL 497 (Service Learning Internship) can be applied as major elective credit.

7. At least one major course must be taken at the 500+ level.

8. At least one major course should be chosen from the list of English courses approved to fulfill KU Core Goal 6 (http://kucore.ku.edu/courses/).

Please Note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Minor in English

Why study English language and literature?

Because reading and writing shape the world.

KU’s English Department is at the core of the humanities, highlighting the “human” through our individual, one-on-one interactions with our students, our emphasis on community and global engagement, and our abiding interest in our shared humanity through the stories of others. We seek to challenge the mind and to engage the imagination of our students, to teach them to ask questions and to seek for answers. We encourage them to grapple with the complexity of a culturally and commercially interconnected world and the global networks and processes of cultural exchange. We believe that words and ideas will shape the world. We teach our students life-long skills, so that they learn to write clearly, creatively, and effectively—discovering themselves even as they lay a solid foundation for professional success.

A commitment to teaching and learning.

Our department is renowned for its tradition of excellence in teaching. The vast majority of our undergraduate classes have 15-25 students, and much of the class time is dedicated to active learning and engagement with texts and ideas. In the last ten years, faculty members in the department of English have won ten Kemper Fellowships for Excellence in Teaching, two Chancellors Club Teaching Professorships, a Career Achievement Teaching Award, and a wide variety of other university-level teaching and advising awards, and the department as a whole received the Center of Teaching Excellence (CTE) award for Department Excellence in Teaching at the University of Kansas.

A variety of career and life paths.

The English minor is an excellent complement to any major or professional degree. English students graduate to a variety of careers, including law, teaching, scholarship, publishing, library science, and journalism—as well as medicine, business, politics, design, and any number of other fields that value clear communication, interpretive skill, and critical and creative thinking.

Engaged and innovative scholarship.

KU’s English Department has several core strengths that cross tracks and periods, including Global and Cross-Cultural Approaches; Literature, Rhetoric, and Social Action; Diversity Studies; Language, Literature and Science; and Popular Expressive Forms.

At the KU English Department, students work closely with nationally-renowned writers and researchers. Our faculty have won national awards that recognize excellence in research, including grants from the National Endowment for the Humanities, the American Philosophical Society, and the Newberry Library, among others. English Department faculty members have also received major research funding from the University of Kansas, including the Hall Center for the Humanities Research fellowships and Keeler Intra-University Fellowships for interdisciplinary work. Undergraduate students can work one-on-one with faculty mentors in the Honors Program, McNair Scholars Program, and Dean’s Scholars Program.

Requirements for the Minor

The minor in English requires students to complete 18 hours of English coursework in one of three tracks: Regular, Creative Writing, or Rhetoric, Language, and Writing.

Requirements for the English Minor, Regular Track

18 hours, of which 12 hours must be selected from 4 of the following categories that comprise the common requirements of the English major, and of which at least 15 must be jr/sr hours. No more than 1 creative writing course may count for the regular track. ENGL 494, ENGL 495, ENGL 496, and ENGL 497 may not be applied to English minor requirements.
Categories:
1. Individual Authors or Movements
2. Literary Theory
3. English Language or Rhetoric
4. Transcultural Approaches to Language, Literature, or Writing
5. Writing
6. Forms and Genres
7. Literary History

For full course lists for each category, see the General Track of the English Major (http://catalog.ku.edu/liberal-arts-sciences/english/ba-bgs-english/#Gen).

Requirements for the Creative Writing Track of the English Minor

18 hours, of which 12 hours must be creative writing workshops (see below) in at least two genres, and of which at least 15 must be jr/sr hours.

For the purposes of the creative writing tracks of the major and minor, genres are 1) fiction; 2) poetry; 3) playwriting, screenwriting, and/or scriptwriting; and 4) non-fiction. At least one workshop must be at the 500 level or above. ENGL 494, ENGL 495, ENGL 496, and ENGL 497 may not be applied to English minor requirements.

12 hours chosen from the following courses on English Language Studies and Rhetoric and Composition:

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

Minor Hours
Satisfied by 18 hours of minor courses.

Minor Hours in Residence
Satisfied by a minimum of 12 hours of KU resident credit in the minor.

Minor Junior/Senior Hours
Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.

Minor Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator.

Undergraduate Certificate in Creative and Analytical Writing

The Opportunity

Creativity and innovation are how businesses move forward and gain a competitive edge. They also present ways to explore your abilities and develop practical skills that help you see the big picture, while approaching problems in a constructive, unique way that helps you stand out from the crowd.

The KU Edwards Campus offers two undergraduate certificate programs that develop your writing and critical thinking skills for the professional world, and add a valuable KU qualification to your resume. Develop your creative side and critical thinking skills with the Creative and Analytical Writing certificate. If you’re more technically minded, develop your professional writing skills and critical analysis abilities with the Critical Thinking and Writing certificate.
Each certificate can be completed in three semesters, and offers a light course load and flexible curriculum that you can take at your own pace. Apply the skills and thought processes you learn to the work you’re already doing and become the innovative, constructive leader you’ve always wanted to be.

This certificate is designed to enhance written communication with an emphasis on strengthening creativity. The curriculum’s fiction and poetry writing classes allow you to stretch your creative muscles, while also developing critical thinking and feedback skills through the process of workshopping. Literature courses strengthen critical thinking and analysis skills through studying works in historical and cultural context.

The Creative and Analytical Writing certificate is 12 credits, to include two courses in each of the following categories. All 12 hours must be at the JR/SR level.

Undergraduate Certificate in Critical Thinking and Writing

Creativity and innovation are how businesses move forward and gain a competitive edge. They also present ways to explore your abilities and develop practical skills that help you see the big picture, while approaching problems in a constructive, unique way that helps you stand out from the crowd.

The KU Edwards Campus offers two undergraduate certificate programs that develop your writing and critical thinking skills for the professional world, and add a valuable KU qualification to your resume. Develop your creative side and critical thinking skills with the Creative and Analytical Writing certificate. If you’re more technically minded, develop your professional writing skills and critical analysis abilities with the Critical Thinking and Writing certificate.

Each certificate can be completed in three semesters, and offers a light course load and flexible curriculum that you can take at your own pace. Apply the skills and thought processes you learn to the work you’re already doing and become the innovative, constructive leader you’ve always wanted to be.

This certificate pairs technical writing and research courses with literature courses that study works in context. The program works directly on professional writing and critical analysis skills, honing your abilities and strengthening your capacity to accurately critique ideas and understand diverse points of view.

The certificate will require 12 credits and will require students to include two courses in each of the following two categories. All 12 hours must be at the JR/SR level.

Undergraduate Certificate in Writing

This certificate program gives students the opportunity to develop a variety of writing skills and a credential testifying to their abilities in written communication. It serves students who are interested in exploring writing and developing their writing skills in a wide range of genres and for varied purposes and contexts—from creative writing, to writing for the professions, to writing in the disciplines.

ENGL 580  Rhetoric and Writing: ______
ENGL 587  American English

Creative Writing
ENGL 351  Fiction Writing I
ENGL 352  Poetry Writing I
ENGL 354  Playwriting I
ENGL 355  Nonfiction Writing I

Writing in the Professions
ENGL 203  Topics in Reading and Writing: ______ ("Writing for Engineering")
ENGL 361  Professional Writing: ______
ENGL 362  Foundations of Technical Writing
ENGL 562  Advanced Technical Writing I
ENGL 563  Advanced Technical Writing and Editing
ENGL 564  Advanced Technical Editing I
BUS 305  Business Writing
COMS 330  Effective Business Communication

Digital and Multimedia Writing
COMS 320  Communication on the Internet
ENGL 580  Rhetoric and Writing: ______ ("Digital Rhetoric" or "Multimedia Rhetoric")

***NOTE*** Courses cannot be used to fulfill more than one category, unless special topic differs. Only one course outside the College (BUS, JOUR) may be used to fulfill certificate requirements.

Master of Arts in English

Why study English language and literature?

Because reading and writing shape the world.

The M.A. in Literature and the M.A. in Literature & Literary Theory provide students with a broad knowledge of literatures in English across a range of time periods, as well as an introduction to the basic concepts and methods of the discipline. This program has special strengths in ecocriticism and posthuman studies, African American & African diaspora literatures, nineteenth-century U.S. literature, science fiction & fantasy, and Victorian literature.

The M.A. in Rhetoric & Composition provides students with a broad knowledge of writing and the teaching of writing, including the study of composing across multiple genres, media and situations. This program has special strengths in genre and language theory, multimodality and digital rhetorics, public rhetoric, and writing pedagogy.

The M.A. in English Language Studies provides students with a broad introduction to empirical approaches to the study of the English language. This program has special strengths in historical linguistics, sociolinguistics, pragmatics, and discourse analysis.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

To be admitted to any of the department’s graduate degree tracks, a student must have a strong undergraduate record, particularly in the humanities. A grade-point average of at least 3.3 on a 4.0 scale normally is required. Applicants are expected to have some familiarity with British and American literary history and the work of the major writers in English. Applicants for graduate work in literary studies and rhetoric-composition studies should be able to demonstrate, with writing samples, their ability to produce advanced analytical and interpretive scholarly writing. For complete admission information, see the English department website (https://english.ku.edu/).

All applicants must submit their graduate application online (https://gradapply.ku.edu/apply/). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas
Department of English
Graduate Applications
1445 Jayhawk Blvd., Room 3001
M.A. Degree Requirements

While continuously enrolled, a student has a total of 7 years to complete the master’s degree; however, the expected time to degree is 2.5 to 3 years. The candidate’s program should be arranged in consultation with the director of graduate studies or a member of the departmental committee on graduate studies.

Students who elect to write a master’s thesis must enroll in ENGL 899. M.A. candidates in Options 1a, 1b, 2a and 2b must take at least 18 hours of their course work, in addition to ENGL 800, at the 700, 800, and 900 levels.

Option 1a—Literature

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). Portfolio option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily 708, 709, 800, or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 1 course must be pre-1700; at least 1 must be 1700-1900; and at least 1 must be after 1900. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

5. Exam option (3 hours): the student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on a 30-item exam list of literary and / or theoretical texts, including at least 6 items from before 1700; at least 6 items from 1700-1900; and at least 6 items from 1900-present. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

6. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

7. Portfolio Option (6 hours): The student must enroll in 6 hours of ENGL 898 (MA portfolio) over 2 semesters of work: (1) a first semester with the portfolio director, deciding on the shorter scholarly pieces to be included in the portfolio and drafting the cover essay (3-5 pages); and (2) a writing semester for crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).

Option 1b—Literature and Literary Theory

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). Portfolio option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily 708, 709, 800, or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 1 course (3 hours) must be pre-1800; at least 1 (3 hours) must be post-1800. At least 2 courses (6 hours), besides the course used to fulfill requirement 2 (Methods or Theory) must focus primarily on Literary Theory. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

5. Exam option (3 hours): the student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on a 30-item exam list of literary and / or theoretical texts, including at least 6 items pre-1800; at least 6 items post-1800; and at least 12 items in theory. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

6. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

7. Portfolio Option (6 hours): The student must enroll in 6 hours of ENGL 898 (MA portfolio) over 2 semesters of work: (1) a first semester with the portfolio director, deciding on the shorter scholarly pieces to be included in the portfolio and drafting the cover essay (3-5 pages); and (2) a writing semester for crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).

Option 2a—Rhetoric and Composition

1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). Portfolio option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Rhetoric and Composition, ordinarily 780, 781, 800, and 900 levels.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 1 course (3 hours) must be pre-1800; at least 1 (3 hours) must be post-1800. At least 2 courses (6 hours), besides the course used to fulfill requirement 2 (Methods or Theory) must focus primarily on Literary Theory. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

5. Exam option (3 hours): the student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on a 30-item exam list of literary and / or theoretical texts, including at least 6 items pre-1800; at least 6 items post-1800; and at least 12 items in theory. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

6. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis semester of writing leading to defense of finished thesis.

7. Portfolio Option (6 hours): The student must enroll in 6 hours of ENGL 898 (MA portfolio) over 2 semesters of work: (1) a first semester with the portfolio director, deciding on the shorter scholarly pieces to be included in the portfolio and drafting the cover essay (3-5 pages); and (2) a writing semester for crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).
1. A total of 30 hours in English courses carrying graduate credit. No more than 6 hours may be taken at the 600 level. At least 6 hours must be taken at the 900 or seminar level. ENGL 998 does not count as a seminar or 900-level class. Exam option students will take 9 conventional courses (27 hours), plus 3 hours of ENGL 897 (exam preparation hours) or another elective course. Thesis option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 899 (MA or MFA thesis hours). Portfolio option students will take 8 conventional courses (24 hours), plus 6 hours of ENGL 898.

2. 3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Rhetoric and Composition, ordinarily 780 (Composition Studies), or another course appropriately designated by the Graduate Director. A 998 (Directed Reading) directly focused on questions of methods and theory can fulfill this requirement if approved by the Graduate Director.

3. 3 hours on Pedagogy: the 801-802 sequence (required for TAs), 780, or other appropriate course as approved by the Graduate Director.

4. 18 (6 courses with thesis option) or 21 (7 courses with exam option) distribution hours (6 courses) to be selected in consultation with advisors (Graduate Director during first year and thereafter advisors with whom students plan to move toward exam or thesis options). At least 6 hours in Rhetoric and Composition courses (including at least 1 seminar) beyond the courses used to fulfill requirements 2 (Methods and Theory) and 3 (Pedagogy).

5. 6 hours of elective courses

6. For students selecting the exam option, 6 hours in second exam area (rhetoric and composition, literature, literary theory), including at least 1 seminar.

7. 2 courses (6 hours) outside the department may be included in the 18 distribution hours with approval of the Graduate Director.

8. Exam option (3 hours): The student will generally enroll in 3 hours of ENGL 897 (exam preparation hours) and must pass a 90-minute oral exam based on 2 lists developed in consultation with advisors: a) a 15-item exam list of works in English Language Studies, and b) a 15-item exam list of works in a second area: literature, literary theory, or rhetoric and composition. The student may opt to enroll in 1 additional 3-hour elective course instead of ENGL 897.

9. Thesis Option (6 hours): The student must enroll in 6 hours of ENGL 899 (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first semester of work with the thesis director leading to polished proposal with a bibliography; and (2) a thesis seminar of writing leading to defense of finished thesis.

10. Portfolio Option (6 hours): The student must enroll in 6 hours of ENGL 889 (MA portfolio) over 2 semesters of work: (1) a first semester with the portfolio director, deciding on the shorter scholarly pieces to be included in the portfolio and drafting the cover essay (3-5 pages); and (2) a writing seminar for crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).

Option 2b—English Language Studies

1. 10. Option 2b—English Language Studies (MA or MFA thesis hours) over 2 semesters of thesis work: (1) a first exam preparation hours) and must pass a 90-minute oral exam (2) a writing seminar for crafting and revising the scholarly pieces, leading to the oral defense (90 minutes) of the polished portfolio (40-50 pages or the digital equivalent).
Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

ADMISSION REQUIREMENTS:

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year timeframe. All prospective students should discuss their interest in admission to the accelerated master’s track with both the Undergraduate Director (UGD) and the Director of Graduate Studies (DGS) no later than the Fall of the student’s Junior year (Year 3).

Prospective students are eligible to apply to the graduate program in the Fall semester of their Senior Year. The following requirements must be met by this time:

- Major GPA of at least 3.5
- Overall GPA of at least 3.25
- On track to complete all requirements for a BA degree in English from KU by the spring semester of Senior year (Year 4).

GRE scores are not required.

Applicants must complete an Application for Graduate Study online (https://gradapply.ku.edu/apply/). The following information should be gathered in advance and uploaded with the application:

- 3 letters of recommendation (at least one from an English faculty member);
- resume or curriculum vitae (CV);
- one-page Statement of Purpose (maximum 750 words);
- writing samples (15 to 20 pages total; more than one paper preferred).

Upon review of the application for admission, the English Department will notify the student of her or his eligibility to begin coursework in the program. Final acceptance to the graduate program will be contingent upon the following:

- grades of B or above in all English graduate-level coursework taken in Year 4;
- successful completion of all requirements for the BA/BGS degree.

Application and admission procedures for the Accelerated Master’s program are different from the regular master’s program. For more information, please contact the Director of Undergraduate Studies.

DEGREE REQUIREMENTS:

The course requirements for the accelerated MA program are fulfilled by a combination of graduate-level courses taken for both undergraduate and graduate credit in Year 4, fulfilling both BA major requirements and MA degree requirements, and graduate credit courses taken in Year 5.

The student must be approved to begin coursework toward the accelerated program prior to enrolling in any classes that are to count for both undergraduate and graduate credit.

REQUIREMENTS for the BA MAJOR:

The major in English requires 31 hours (34 for Honors English), of which 3 hours may be an appropriate 200-level English course. Students in the accelerated program must take 6 credit hours at the 590 level or above, and 6 credit hours at the 700 level or above. These courses may be selected from those that count toward major distribution requirements or major electives. (See the 590+ level options in the course lists below).

As part of these 31 hours (34 for Honors English), all English majors must complete the Orientation to English Studies within their first two semesters as a declared major. In addition, they must also choose courses from each of the following 7 categories:

1. Individual Authors or Movements
2. Literary Theory
3. English Language or Rhetoric
4. Transcultural Approaches to Language, Literature, or Writing
5. Writing
6. Forms and Genres
7. Literary History (2 courses)

Note: courses may be listed in more than one category, but may only count in one category for an individual student. At least one course must be focused language, literature, or writing before 1850 (see course list below).

<td></td>
</tr>
</tbody>
</table>

DEGREE DISTRIBUTION REQUIREMENTS:

As part of the 31 hours required for the BA major, each student must complete the following 7 categories:

1. American Indian Literature: _____
2. Topics in American Literature Since 1865: _____
3. Shakespeare
4. The Literature of: _____
5. Major Authors: _____
6. Studies in British Literature
7. Studies in American Literature

ADMISSION OF TRANSFERS:

While the Department welcomes transfers of credit for coursework completed prior to admission to the Accelerated Master’s program, please note that students are expected to demonstrate a level of proficiency consistent with the rigor of graduate study in English. In cases where coursework is equivalent to courses offered at KU, the student will be required to complete additional coursework to demonstrate this level of proficiency.

Notes:

- 27 hours must be at the junior/senior level.
- One 200-level course may count toward major requirements. No 100-level ENGL courses count toward major requirements except ENGL 199.
- Only 1 (3 credits) creative writing workshop (fiction writing, nonfiction writing, poetry writing, screen writing or playwriting) may be applied as a major course.
- Up to 6 credits combined of ENGL 494 (http://catalog.ku.edu/search/?P=ENGL%20494) (Research Internship) or ENGL 495 (http://catalog.ku.edu/search/?P=ENGL%20495) (Directed Study) may be applied as major electives.
- Up to 3 credit hours of ENGL 496 (http://catalog.ku.edu/search/?P=ENGL%20496) (Internship) or ENGL 497 (http://catalog.ku.edu/search/?P=ENGL%20497) (Service Learning Internship) may be applied as a major elective.

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 31 hours of major courses (34 for Honors English).

**Major Hours in Residence**

Satisfied by a minimum of 25 hours of KU resident credit in the major; exceptions by permission of Director of Undergraduate Studies only.

**Major Junior/Senior Hours**

Satisfied by a minimum of 24 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**MA DEGREE REQUIREMENTS:**

In addition to the 12 graduate credit hours completed during the senior year, MA students must complete an additional 18 hours of graduate-level coursework. The candidate’s program should be arranged in consultation with the Director of Graduate Studies (DGS) or a member of the departmental committee on graduate studies. At least 12 hours of the 18 hours of graduate-level coursework for the MA must be taken at the 700 level or above, and the remaining hours may be taken at the 590-600 level or above. The following requirements also apply:

3 hours (1 course) on Methods or Theory appropriate to different areas of focus in Literary Studies: ordinarily 708, 709, 800, or another course appropriately designated by the Graduate Director. A 998 (Directed
have been met, the student will be able to graduate with a bachelor’s degree.

If the student performs poorly in Year 5 (dropping below a 3.0 GPA/“B” average in English classes), the student will fall out of Good Standing. The student’s name will be forwarded to the College and the student will be put on academic probation for one semester. The DGS and Graduate Committee senior staff will review the student’s progress regularly. If satisfactory progress is not being made, the student may be dismissed from the accelerated program. The student can also withdraw voluntarily.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Master of Fine Arts in Creative Writing

Why study English language and literature?

Because reading and writing shape the world.

The M.F.A. in Creative Writing provides students with a balance between the study of literature and intensive workshop experience. In the final year, students receive support and substantial feedback on a creative thesis.

Our award-winning faculty and alumni have received international recognition for their creative work; distinctions include the Pushcart Prize, the Nebula Award, the Hugo Award, the Kennedy Center Gold Medallion, the Gertrude Stein Award, the Kenyon Review Prize. Recent visiting writers include Sherman Alexie, Julia Alvarez, Margaret Atwood, Michael Chabon, Rita Dove, Naruddin Farah, Kent Haruf, Cherrie Moraga, Paul Muldoon, Salman Rushdie, George Saunders, and Natasha Trethewey. Graduate students also run a professional literary journal called Landlocked.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

To be admitted to any of the department’s graduate degree tracks, a student must have a strong undergraduate record, particularly in the humanities. Creative writing applicants need to submit writing samples that demonstrate an advanced level of writing skills in their respective genres. For complete admission information, see the English department website (https://english.ku.edu/).

All applicants must submit their graduate application online (https://gradapply.ku.edu/apply/). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas
Department of English
Graduate Applications
1445 Jayhawk Blvd., Room 3001
Lawrence, KS 66045

Master of Fine Arts in Creative Writing

Degree Requirements

Requirements for the M.F.A. in Creative Writing (http://www2.ku.edu/~englishmfa/) include

1. 4 graduate courses (12 hours) in literature, English or American.
2. 4 graduate courses (12 hours) in creative writing.
3. No more than 2 classes (6 hours) may be taken at the 600-level and no classes at the 500-level or below.
4. 7 to 9 hours in electives or practica, chosen from graduate courses in the Department of English, or approved courses in another department.
5. ENGL 899, Thesis (15 hours required). Original writing in prose fiction, poetry, drama, or nonfiction prose.

Doctor of Philosophy in English

Why study English language and literature?

Because reading and writing shape the world.
The Ph.D. degree offers the opportunity for advanced and concentrated research to students who hold an M.A. degree in English or a related field, from KU or elsewhere.

Our Literature and Literary Theory program has special strengths in ecocriticism and posthuman studies, African American & African diaspora literatures, nineteenth-century U.S. literature, science and technology studies, and Victorian literature.

Our Rhetoric & Composition program has special strengths in genre and language theory, public and professional discourses, multimodality and digital rhetorics, translingualism, writing pedagogy, and global writing research.

Our English Language Studies program has special strengths in historical linguistics, sociolinguistics, pragmatics, and discourse analysis.

Our Creative Writing program has special strengths in the novel, environmental writing, drama, mixed-genre work, and short story collections.

All of our programs boast distinguished and award-winning faculty with notable research publications and a deep foundation in their areas of specialization.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

To be admitted to any of the department's graduate degree tracks, a student must have a strong undergraduate record, particularly in the humanities. A grade-point average of at least 3.3 on a 4.0 scale normally is required. Applicants are expected to have some familiarity with British and American literary history and the work of the major writers in English. Most importantly, applicants for graduate work in literary studies and rhetoric-composition studies should be able to demonstrate, with writing samples, their ability to produce advanced analytical and interpretive scholarly writing. Similarly, creative writing applicants need to submit writing samples that demonstrate an advanced level of writing skills in their respective genres. For complete admission information, see the English department website (https://english.ku.edu/).

All applicants must submit their graduate application online (https://gradapply.ku.edu/). All supplemental materials (transcripts, writing samples, letters of recommendation, etc.) may be attached electronically and submitted with the online application. Those who cannot submit supplemental materials electronically may mail them to the department:

The University of Kansas
Department of English
Graduate Applications
1445 Jayhawk Blvd., Room 3001

Lawrence, KS 66045

Ph.D. in English Degree Requirements

Students entering the program with the B.A. have, while being continuously enrolled, 10 years to complete the M.A. and Ph.D. combined. Students entering with the M.A. have 7 years to complete the Ph.D.; however, the expected time to degree is 6-7 years for the M.A. plus Ph.D., and 4-5 years for the Ph.D.

Ph.D. Requirements: Literature and Creative Writing

1. At least 24 hours of credit in appropriate formal graduate courses beyond the M.A. or M.F.A. At least 15 hours (in addition to introduction to ENGL 800 if not taken for the M.A.) of this course work must be taken from among courses offered by the Department of English at the 700 level and above. ENGL 997 and ENGL 999 credits cannot be included among the 24 hours. Students may petition to take up to 6 hours outside the department.

2. Required courses: ENGL 800 and 2 seminars (courses numbered 900 or above) offered by the Department of English at KU beyond the M.A. ENGL 998 does not fulfill this requirement. Students with master's degrees earned elsewhere may be required by the director of graduate studies, acting on behalf of the graduate committee, to take additional course work.

3. A reading knowledge of 1 of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).

4. ENGL 999, Dissertation (at least 12 hours).

5. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of 3 areas of study.

6. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.

7. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Ph.D. Requirements: Composition and Rhetoric, M.A. to Ph.D., standard track

1. At least 24 hours of credit in appropriate formal graduate courses beyond the M.A. or M.F.A. At least 15 hours (in addition to introduction to ENGL 800 if not taken for the M.A.) of this course work must be taken from among courses offered by the Department of English at the 700 level and above. ENGL 997 and ENGL 999 credits cannot be included among the 24 hours. Students may petition to take up to 6 hours outside the department.

2. An introduction to the field: either ENGL 800 or ENGL 780.

3. 2 seminars (courses numbered 900 or above) offered by the Department of English at KU beyond the M.A., at least one of which
should be in Rhetoric and Composition. ENGL 998 does not fulfill this requirement.
4. A reading knowledge of 1 of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).
5. ENGL 999, Dissertation (at least 12 hours).
6. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of three areas of study.
7. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.
8. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Ph.D. Requirements: Composition and Rhetoric, B.A. to Ph.D. accelerated track

Each student admitted to the Ph.D. program in composition and rhetoric is assigned a graduate advisor from among the faculty in composition and rhetoric, who will help the student plan an initial course of study. After the first semester, students may ask other faculty members in the field to serve as their graduate advisors, depending on availability. The students and their graduate advisors together design and monitor a coherent program of study, individualized to serve each student’s goals within current expectations for a Ph.D. in composition and rhetoric. As an interdisciplinary field, study in composition and rhetoric might involve work in other departments, programs, or schools as well as English, including, for example, communication studies, linguistics, education, psychology, American studies, women’s studies, or history.

Each student’s individualized program of study must meet the minimum requirements detailed below.

1. At least 36 hours of credit in appropriate formal graduate courses beyond the B.A. At least 30 hours of this course work must be taken from among courses offered at the 700 level and above. ENGL 997 and ENGL 999 credit hours cannot be included among the 36 hours.
2. Students in this specialization may take up to 12 hours outside the department without petition, with written approval by the students’ graduate advisors. Students may petition to take more hours outside the department, with the approval of their graduate advisors, and provided they can demonstrate how the courses fit within their programs of study.
3. A course on methods, theory, and professionalism: Either ENGL 800 Introduction to Graduate Study in English or ENGL 780 Composition Studies
4. A reading knowledge of one of the following languages: French, German, Greek, Hebrew, Italian, Japanese, Latin, Russian, Old English, or Spanish, and completion of the Responsible Scholarship and Research Skills requirement (usually fulfilled with ENGL 800).
5. At least 3 seminars (numbered 900 or above) offered by the Department of English at the University of Kansas, at least 2 of which should be in composition and rhetoric. ENGL 998 does not fulfill this requirement.
6. ENGL 999 Dissertation (at least 12 hours).
7. A comprehensive examination, to be completed after satisfaction of formal course requirements. This examination, which has both written and oral components, consists of 3 areas of study.
8. In the semester following the comprehensive examination, a 90-minute review of the dissertation proposal, which is to provide formal direction for the dissertation.
9. At least 1 year of supervised quarter-time teaching for qualified candidates except for those who do not plan to undertake teaching careers or who have already had extensive teaching experience.
10. A dissertation of substantial merit.

Note: Contact your department or program for more information about research skills and responsible scholarship, and the current requirements for doctoral students. Current policies on Doctoral Research Skills and Responsible Scholarship are listed in the KU Policy Library.

Environmental Studies Program

Why study environmental studies?

The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives. Learning Pathways (http://esp.ku.edu/pathways/), thematic areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.

The program provides students with the tools they need to investigate environmental phenomena, including soil sampling and freshwater ecology to policy-making and social science. Environmental Studies students learn how to put together what other disciplines take apart.

Our pedagogy is focused on engaged learning. Learning Pathways (http://esp.ku.edu/pathways/) concentrations provide options for a deeper dive within our major, with recommended courses, faculty, and experiences. In addition to a vibrant classroom curriculum (http://esp.ku.edu/curriculum/), Environmental Studies students are encouraged to participate in the many exciting experiential learning opportunities that KU offers, including study abroad (http://esp.ku.edu/study-abroad/), undergraduate research (http://esp.ku.edu/independent-research-projects/), co-curricular projects (http://esp.ku.edu/projects/), and internships (http://esp.ku.edu/internships/).

Environmental Studies equips students to get involved in the intellectual life of the university and to connect to environmental projects in the surrounding community. These experiences enhance the success of students along their path to graduation and rewarding careers.

Undergraduate Programs

This interdisciplinary major gives students a fundamental knowledge of the human environment, the dimensions of human impact on the environment, and holistic approaches to solving problems resulting from this impact. The human environment includes all facets of human activity affecting the environment, such as philosophical and ethical issues,
environmental resource use and misuse, population biology, and the chemistry of the atmosphere.

**Electives**

The goals of the program are

1. To provide a holistic view of the environment, one in which the synergistic nature of perturbations, natural and anthropogenic, can be understood and
2. To provide the technical and evaluative skills for active participation in an environmental career.

The environment is the central theme around which a liberal arts education is focused.

Students may declare an interest in environmental studies or a major in environmental studies by filling out the appropriate forms. CLAS Interest Code and Major Declaration forms are available from College Advising & Student Services (https://collegeadvising.ku.edu/), 109 Strong Hall, or in the environmental studies office. Students are strongly encouraged to declare an environmental studies major as soon as possible.

Electives provide the opportunity to specialize, and these can be chosen by consulting the various pathways in the major (http://esp.ku.edu/pathways/), which contain a list of faculty members associated with the pathway who are available to help decide on electives and environmental careers. An elective approval form must be submitted to 109 Strong Hall before a student is allowed to graduate. Forms may be obtained from the environmental studies office. Except for study abroad, a maximum of 8 hours of nonclassroom course work may be counted toward electives (e.g., internship or research).

**Exceptions and Substitutions**

All substitutions must be approved by a student's environmental studies faculty advisor. A student must submit a requirement substitution form to the environmental studies faculty advisor. Forms can be obtained from the environmental studies office.

**Internships**

Internships allow majors to develop new skills and test their abilities and educational backgrounds. Students can assess their career objectives in professional settings. Internships are done in city, county, state, and federal agencies and in environmental organizations and private companies or agencies. Students are encouraged to participate at the end of the sophomore or junior year. Completion of an internship by the end of the junior year provides an opportunity to make career changes and final elective selections before the senior year. It is not possible to participate in an internship after graduation. The applicant must have a grade-point average of 2.5 or above, must have completed 12 hours of required environmental studies courses, and must have a suitable internship opportunity. A maximum of 3 hours may be applied to the 12 hours of required electives.

**Professional Science Masters**

The Professional Science Masters professional graduate degree is designed for graduates of bachelor's programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

The P.S.M. degree is a unique professional degree grounded in natural science, technology, engineering, mathematics and/or computational sciences and designed to prepare students for direct entry into a variety of career options in industry, business, government, or non-profit organizations. P.S.M. programs prepare graduates for high-level careers in science that have a strong emphasis on such skill areas as management, policy, entrepreneurship, communication and project management. P.S.M. programs consist of 2 years of academic training in an emerging or interdisciplinary area, along with a professional component that may include internships and "cross-training" in workplace skills.

**Graduate Certificate in Environmental Studies**

The Graduate Certificate in Environmental Studies is designed to give students already admitted to a graduate program at KU the opportunity for interdisciplinary coursework in Environmental Studies, spanning the humanities, natural/physical sciences, and social sciences.

Students wishing to be accepted into the Environmental Studies Certificate program must already be admitted to a graduate program at KU. Applicants must write a cover letter to the Environmental Studies Graduate Director explaining their interest in the certificate and how interdisciplinary training in Environmental Studies helps meet individual goals in research and training. This statement is to be attached on page 9 of the application. On page 6, please upload a copy of your advising report. A graduate GPA of 3.0 or higher is required, but provisional admittance can be granted for one semester to new graduate students.

Students must also have their thesis or dissertation advisor write a letter of recommendation to be admitted to the certificate program. The letter must address the importance of the certificate in the student's overall research and training plan. In addition to purposes of admission, this letter will also be used to consider the applicant for scholarship funding.

**Graduate Certificate in Environmental Assessment**

The Certificate in Environmental Assessment is designed for graduates of bachelor's programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

**Graduate Certificate in Environmental Justice**

The Certificate in Environmental Justice is designed for graduates of bachelor's programs in environmental studies or related fields who want to address issues such as social, economic, and political marginalization of minorities and low income populations. Key foci in the curriculum of this program are environmental law, governance, policy and planning, sustainability, development, and political ecology.
For admissions and application information for the P.S.M. and the Graduate Certificates in Environmental Assessment and Environmental Justice, go to the KU Edwards Campus website (https://edwardscampus.ku.edu/professional-science-masters-concentration-environmental-assessment-graduate-certificate/).

Students who are interested in enrolling in graduate level coursework in the Environmental Studies Program without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission (http://esp.ku.edu/admission/) webpage for further details.

Courses

EVRN 103. Environment and History. 3 Hours H.
Nature is our oldest home and newest challenge. This course surveys the environmental history of the earth from the extinction of the dinosaurs to the present with a focus on the changing ecological role of humans. It analyzes cases of ecological stability, compares cultural attitudes toward nature, and asks why this ancient relationship seems so troubled. (Same as HIST 103.) LEC.

EVRN 140. Global Environment I: The Discovery of Environmental Change, 5 Hours GE3N / U / LFE.
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 140 and HIST 140.) LEC.

EVRN 142. Global Environment II: The Ecology of Human Civilization. 5 Hours GE3S / U.
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as GEOG 142 and HIST 142.) LEC.

EVRN 144. Global Environment I: Discovery of Environmental Change, Honors. 5 Hours GE3N / U / LFE.
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as GEOG 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

EVRN 145. Global Environment II: The Ecology of Human Civilization, Honors. 5 Hours GE3S / U.
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics will include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as GEOG 145 and HIST 145.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

EVRN 148. Scientific Principles of Environmental Studies. 3 Hours NB GE3N / N.
This course provides the scientific knowledge necessary to understand the changing relationships between humans and the natural environment, with an emphasis on the assessment of current environmental problems and critical evaluation of potential solutions. Major topics include fundamental scientific concepts and principles, interactions among the biological and physical components of the environment, implications of a growing human population, water resources, the atmosphere, climate, and energy sources. (Same as GEOG 148.) LEC.

EVRN 149. Scientific Principles of Environmental Studies, Honors. 3 Hours NB GE3N / N / LFE.
This course presents an overview of our understanding of environmental processes and issues. Topics include scientific principles, resource issues, pollution and global change, among others. This course gives students a rigorous understanding of interactions between humans and their environment and provides students with a scientific basis for making informed environmental decisions. An honors section of EVRN 149, designed for superior students. (Same as GEOG 149.) Prerequisite: Membership in the University Honors Program or approval of instructor required. LEC.

EVRN 150. Environment, Culture and Society. 3 Hours SC GE3S / S.
An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere, and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as GEOG 150.) LEC.

EVRN 170. Introduction to Kansas Landscapes. 1 Hour N.
A course focused on the land and environment of Kansas. Field trips provide students with direct experience of the diverse landscapes in our area. Coursework also emphasizes the dynamic nature of the current landscape and the natural and cultural processes that have shaped it. LEC.

EVRN 171. Understanding Kansas Landscapes. 1 Hour N.
An introduction to the research methods used by scholars in diverse fields, applied to environmental issues introduced in EVRN 170. Prerequisite: EVRN 170. LEC.

EVRN 172. Kansas Landscape Projects. 1 Hour N.
Students participate in the design and execution of a simple research project focused on a local environmental topic. Prerequisite: EVRN 170, and EVRN 171. LEC.
EVRN 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Environmental Studies. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

EVRN 200. Study Abroad Topics In: ______. 1-6 Hours S.
This course is designed for the study of special topics in Environmental Studies. Coursework must be arranged through the Office of Study Abroad. May be repeated for credit if content varies. LEC.

EVRN 304. Environmental Conservation. 3 Hours NE GE3N / N.
A survey of current methods of describing and modeling the function, structure, and productivity of natural and anthropogenically modified earth resource systems, along with a discussion of contemporary views of what constitutes a natural landscape. Fundamental natural science principles about the interplay among lithospheric, atmospheric, hydrospheric, and biospheric components of earth systems are emphasized. Uses of natural resources, including fossil fuels, minerals, and water, are described with attention to the earth's total energy budget. Human activities that affect preservation, conservation, and multiple uses of earth regions receive attention. Systems under stress through population and other contemporary forces serve as examples. (Same as GEOG 304.) LEC.

EVRN 306. Global Environmental Literature. 3 Hours AE42 / H.
An examination of a variety of literary and other representations of human and non-human environments and environmentalism. Particular attention will be paid to how race, gender, class, sexuality, and geography produce and are produced by those representations. (Same as ENGL 306 and GIST 306.) Prerequisite: Prior completion of the KU Core Written Communication requirement. Recommended: Prior completion of one 200-level English course. LEC.

EVRN 320. Environmental Policy Analysis. 3 Hours N.
An historical and analytical study of the formulation, implementation, and consequences of environmental policy in the United States. Attention will be directed at relevant interest groups, issues specific to both rural and urban populations, relationships between national policies and international organizations concerned with environmental problems. Prerequisite: EVRN 140/GEOG 140/HIST 140 or EVRN 142/GEOG 142/HIST 142; or EVRN 144/GEOG 144/HIST 144 or EVRN 145/GEOG 145/HIST 145; or EVRN 148/GEOG 148; or concurrent enrollment. LEC.

EVRN 330. Sculpture Intercepting the Waste Stream. 3 Hours N.
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art.) Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as SCUL 330.) Prerequisite: Visual Art major or minor, or instructor permission. LAB.

EVRN 332. Environmental Law. 3 Hours U.
An introduction to how the American legal process improves, transforms, and damages the natural environment. Emphasizes and compares shifting responsibilities of legal forces and institutions: judges and litigants, legislators and statutes, agencies and administrations, and citizens and regulated entities. Prerequisite: EVRN 140/GEOG 140/HIST 140 or EVRN 142/GEOG 142/HIST 142; or EVRN 144/GEOG 144/HIST 144 or EVRN 145/GEOG 145/HIST 145; or EVRN 148/GEOG 148; or concurrent enrollment. LEC.

EVRN 335. Introduction to Soil Geography. 4 Hours N / LFE.
This course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body; genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between solid, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken EVRN 535 or GEOG 535. (Same as GEOG 335.) Prerequisite: GEOG 104 or GEOL 101 or consent of instructor; BIOL 100 and CHEM 190 and CHEM 191 recommended. LEC.

EVRN 336. Ethics, Ideas and Nature. 3 Hours AE51 / H.
This course examines the ethical frameworks developed for thinking about, using, and protecting the natural world. Examples of topics include indigenous approaches to nature, the history of ecological ideas, environmental movements, the role of the state in managing resources, utilitarianism and progressivism, environmental lawmaking, wilderness advocacy, nature and theology, the rights of nature, and environmental justice. Students are introduced to the theories of duty ethics, justice ethics, utilitarianism, and rights ethics, and required to apply ethical decision making to contemporary and historical environmental issues. Multiple perspectives on the history of human interactions with nature demonstrate the importance of reflecting upon the value systems inherent in human-centered environmental ethics and nature-centered environmental ethics. (Same as HIST 336.) LEC.

EVRN 338. Permaculture Design. 6 Hours N.
Students learn how a local, sustainable design system known as permaculture design creates an ecologically sound and economically viable way of living. The course consists of lecture, field, and practicum sessions. Lecture topics include food security, permaculture ethics, ecological principles, system design, sustainable soils, food production, food forests, earth works, and construction of human habitats. LEC.

EVRN 347. Environmental History of North America. 3 Hours H.
A survey of changes in the landscape and in people's perceptions of the natural world from 1500 to present. Topics include agroecology, water and energy, the impact of capitalism, industrialism, urbanization, and such technologies as the automobile and the origins of conservation. (Same as HIST 347.) LEC.

EVRN 350. Global Environmental Justice. 3 Hours.
Drawing on interdisciplinary fields of study, this course surveys a wide range of situated environmental injustices and environmental justice movements associated with toxic dumping, oil extraction and mining, climate change, deforestation, agri-business, and tourism. As students gain an understanding of the connections and differences among specific situations, and between environmental justice and other forms of environmentalism, they engage with salient theoretical and practical questions. The content of the course will also be shaped by the interests of students. For example, each student will present on an environmental justice movement of her/his own choosing, on the connections between it and other movements we have been studying, and on the ways this movement can help us understand some of the key practical and theoretical questions raised by environmental justice struggle. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in EVRN 650. Prerequisite: EVRN 140 or EVRN 142 or EVRN 144 or EVRN 145 or EVRN 336; or permission of instructor. LEC.

EVRN 362. Art and Ecology: Inhabiting the Ecosphere. 3 Hours N.
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological imbalance. (Same as SCUL 362.) Prerequisite: Visual Art major or minor, or instructor permission. LAB.
EVRN 363. Introduction to Environmental Hydrology and Water Resources. 3 Hours N.
Water is vital to life on earth. In this course we cover components of the water or "hydrologic" cycle, how management has altered them, and how they are predicted to change with the changing climate. We discuss the evolution of water policy, its implications for management and the economic impact of human perturbation on water. We study the physical processes that govern the water cycle, learn how they are measured, and estimate hydrologic fluxes. (Same as GEOG 336.) Prerequisite: GEOG 104 or GEOL 101. LEC.

EVRN 365. Invention of the Tropics. 3 Hours AE42 / H.
This course surveys the history of the tropical environment and its diverse peoples from early European encounters until the current boom in extractivism and ecotourism. It focuses on portrayals of the tropics in historical travel accounts and films. Through these sources, we will seek to understand cross-cultural interactions, and the ways in which science, technology, and tourism have reconstructed these environments over time. Case studies are drawn from Latin America, Africa, Oceania, and/or Asia. (Same as HIST 365.) LEC.

EVRN 371. Environmental Geopolitics. 3 Hours S.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as GEOG 371 and GIST 371.) LEC.

EVRN 374. Vulnerability and Adaptation. 3 Hours S.
The course objective is to understand and analyze human adaptation to environmental change by focusing on disasters and climate change. Each semester, the course rotates topics ranging from oil spills, hurricanes, sea-level rise to infectious disease. It provides undergraduate students with research experience and service learning, and offers opportunities for certificates through the Center for Undergraduate Research and the Center for Civic and Service Responsibility at KU. Students learn theories relevant to the case study, work in groups to generate research themes, conduct literature search and review, learn research methods, and write and present their work. LEC.

EVRN 385. Environmental Sociology. 3 Hours S.
This course invites students to study society and its impact on the environment. Environmental problems are social problems. This course will address such items as social paradigms, theories, inequalities, movements, and research. (Same as SOC 385.) LEC.

EVRN 386. Sociology of Global Food. 3 Hours U.
The Sociology of Global Food offers a critical examination of the global food system since the Industrial Revolution. Topics include the industrialization of agriculture, sustainable agriculture, and the role of food and agriculture in organizing society. This course discusses the emergence of current debates around food and agriculture including food activism, technological developments, human/environment relationships, and labor issues. There is a lab component to this course. (Same as BIOL 386.) Prerequisite: Junior standing. LEC.

EVRN 390. Disaster and Culture. 3 Hours.
This class explores representations of environmental disasters within various forms of cultural expression. Cultural beliefs and practices not only influence the ways environmental disasters are understood and responded to, but also shape the social dynamics that determine a population’s vulnerability and resilience to hazards. Thus, while an earthquake may trigger a disaster, its impact largely will be influenced by social factors that pre-date the actual seismic event. The course will apply cultural materials (e.g., film, science writing, literature, policy statements, etc.) that emerge from specific case studies to analyze the social causes and effects of disaster, while drawing on an interdisciplinary set of tools and perspectives (from sociology, literary studies, science, economics, etc.) that animates inquiry. LEC.

EVRN 405. Kansas Power. 3 Hours.
Where does our energy come from? How can we optimize our use of renewable and nonrenewable sources of energy? What are the drivers moving us to more renewable sources of energy? What are the impediments? In this course we will explore the use of fossil fuels, nuclear, wind, geothermal and solar energy in Kansas. We will visit nearby power plants, and alternative energy companies. Students will be expected to design an energy plan for a local entity, and present their ideas. Prerequisite: EVRN 140 and EVRN 142. LEC.

EVRN 410. Environmental Applications of Geographic Information Systems. 3 Hours N.
An introduction to the use, display, and analysis of spatial data. Students will acquire a foundational skill-set in geographic information systems and remote sensing using industry-standard GIS software and will apply these skills using environmental data and case studies. Prerequisite: EVRN 148 or EVRN 149 or GEOG 148 or GEOG 149; EVRN 103 or HIST 103, EVRN 150 or GEOG 150 or EVRN 347 or HIST 347. LEC.

EVRN 412. Ecology: Fundamentals and Applications. 3 Hours.
An introduction to the principles of ecology, with an emphasis on environmental applications. Major topics include physiological and functional ecology, population and community dynamics, biogeography, and ecosystems ecology. Intended for students seeking B.A. or B.G.S. degrees. Prerequisite: EVRN 140 or EVRN 144 or EVRN 148 or EVRN 149 or consent of the instructor. LEC.

EVRN 414. Principles of Ecology. 3 Hours N.
Study of the principles underlying species population density changes, community structure and dynamics, biogeochemical cycles, and energy flow and nutrient cycling in ecosystems. (Same as BIOL 414.) Prerequisite: BIOL 152 or BIOL 153, or consent of the instructor. LEC.

EVRN 420. Topics in Environmental Studies: ______. 1-6 Hours N / LFE.
Courses on special topics in Environmental Science and/or Policy. These courses may be lecture, discussions, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once. LEC.

EVRN 425. Global Water Scarcity. 3 Hours S.
Though natural factors are introduced, this course focuses primarily on the human factors that contribute to global water scarcity. This course also discusses the consequences of water scarcity and its effects on society. Prerequisite: EVRN 148 or permission of instructor. LEC.

EVRN 445. Introduction to Environmental Health. 3 Hours.
This course is designed to provide a foundation for understanding how the natural and built environment affect human health in industrialized and developing countries by examining the impact of physical, chemical, and biological factors external to humans. Students will gain an understanding of the interaction of individuals and communities with the environment, the potential impact on health of environmental agents, and specific applications of concepts of environmental health. (Same as HSCI 445.) LEC.

EVRN 451. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many
approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 451 and GEOG 451.) FLD.

EVRN 460. Field Ecology. 3 Hours N / LFE.
An introduction to research methods for environmental science. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). It emphasizes the development of skills in data analysis and interpretation that are essential to a full understanding of environmental issues. Enrollment limited to environmental studies majors, or by instructor permission. Prerequisite: Junior or Senior standing, completion of the natural sciences requirement of the KU Core (GE3N), and either EVRN 320 or EVRN 332. FLD.

EVRN 490. Internship in Environmental Studies. 1-8 Hours AE61 / N.
Supervised practical experience in a specific environmental area of interest. The advisor will schedule regular meetings to evaluate progress and provide assistance. A written summary of the internship experience and evaluation will be prepared independently by the student, a representative of the cooperating agency, and the advisor. Total credit may not exceed 8 hours. Prerequisite: Junior standing and consent of program director. Restricted to declared Environmental Studies majors. Restricted to students with a 2.5 overall GPA or above. INT.

EVRN 510. Advanced Environmental Applications in Geospatial Techniques. 3 Hours H/N.
This course focuses on applying advanced geospatial mapping and analysis techniques to "real-world" environmental issues. Course content may include lecture/lab time on advanced geospatial topics; a major class project, small-group projects, or individual projects; or half-semester internships with state agencies or campus entities that will culminate in an individual project. The specific nature of projects will be driven largely by student interest and ability, as well as agency/center needs. Prerequisite: EVRN 410 or equivalent course; or permission of the instructor. LEC.

EVRN 526. Remote Sensing of the Environment I. 4 Hours N.
Introduction to study of the environment through air photos and satellite imagery, including principles of remote sensing, interactions of electromagnetic energy with the atmosphere and earth's surface, aerial photography, satellite systems, and sensors (electro-optical, thermal, and radar). Emphasis in the latter part of the course is on such applications as global monitoring, land cover mapping, forestry, agriculture, and oceanography. Laboratory emphasizes visual interpretation of aerial photography and satellite imagery and an introduction to digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. (Same as GEOG 526.) Prerequisite: MATH 101 or equivalent. GEOG 358 recommended. LEC.

EVRN 528. Environmental Justice and Public Policy. 3 Hours S.
This course provides an overview of environmental justice, both as a social movement and as a public policy initiative. Environmental justice examines the distribution of environmental externalities across different socio-economic and racial groups. We will discuss several different public policy areas that have been impacted by the environmental justice movement: hazardous waste facility siting, urban redevelopment and Brownfields, transportation policy, and Native American sovereignty. We will also touch upon international environmental policy in an environmental justice context. Throughout the course we will evaluate empirical issues in studying environmental justice. (Same as POLS 528.) Prerequisite: POLS 306, or a statistics class, or consent of instructor. LEC.

EVRN 530. Biodiversity Discovery and Assessment. 2 Hours N.
An integrated lecture and laboratory course designed to provide an overview of modern methods in biodiversity exploration and discovery. Lectures cover the theory and practice of planning fieldwork in remote locations, documenting species and their natural history, how museum collections are made, calculating and comparing species richness estimates, and the process of describing and naming new species. The laboratory component provides students experience in documenting species and their natural history, processing and curating samples of natural history specimens, and the statistical analysis of biodiversity data. (Same as BIOL 530.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. LEC.

EVRN 531. Tropical Fieldwork in Biodiversity Discovery. 1 Hour U.
An introduction to modern field methods of assessing biodiversity. Fieldwork employs insects and various field methods to estimate and compare species diversity between different habitats and field sites. Taught at different sites in tropical South America over Spring Break. Contact Undergraduate Biology, or the Office of Study Abroad. (Same as BIOL 531.) Prerequisite: BIOL 152, 153, or equivalent, or permission of instructor. Concurrent or prior enrollment of BIOL 530 is strongly encouraged. LAB.

EVRN 535. Soil Geography. 4 Hours N / LFE.
A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as GEOG 535.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended. LEC.

EVRN 536. Environmental Remote Sensing. 3 Hours NE.
Covers fundamentals of remote sensing, including electromagnetic radiation principles and data collection and processing, followed by an introduction to the various remote sensing techniques and their application in understanding and managing environmental systems. Exercises are provided for students to be actively involved in evaluating, critically analyzing and interpreting images and data to determine implications for practice. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 736. Prerequisite: Junior or Senior standing. LEC.

EVRN 537. Water Resource Sustainability. 3 Hours NE.
Provides a framework for learning about our water future and ways we might define and achieve sustainability in water use and management. Concerns of ethics, culture, economics, politics, and environmental health will be discussed within the contexts of issues such as the global water crisis, water footprints, water pollution, human water systems, water security, and sustainable water technologies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 737. Prerequisite: Junior/senior standing. LEC.

EVRN 538. Soil Chemistry. 3 Hours N / LFE.
This course examines the chemical properties and processes of soils and methods of evaluation. Topics include solid and solution speciation, mineral solubility, soil colloidal behavior, ion exchange, surface complexation, soil salinity and sodicity, soil acidity, oxidation-reduction reactions, and kinetics of soil chemical processes. (Same as GEOG 538.) Prerequisite: GEOG 335 or GEOG 535 or EVRN 335 or EVRN 535, CHEM 135 or CHEM 195 and CHEM 196, MATH 125, or consent of the instructor. LEC.

EVRN 540. Ecohydrology. 3 Hours N.
Ecohydrology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key
EVRN 542. Ethnobotany. 3 Hours S.
Course will involve lectures and discussion of Ethnobotany - the mutual relationship between plants and traditional people. Research from both the field of anthropology and botany will be incorporated in this course to study the cultural significance of plant materials. The course has 7 main areas of focus: 1) Methods in Ethnobotanical Study; 2) Traditional Botanical Knowledge - knowledge systems, ethnolinguistics; 3) Edible and Medicinal Plants of North America (focus on North American Indians); 4) Traditional Phytochemistry - how traditional people made use of chemical substances; 5) Understanding Traditional Plant Use and Management; 6) Applied Ethnobotany; 7) Ethnobotany in Sustainable Development (focus on medicinal plant exploration by pharmaceutical companies in Latin America). (Same as ANTH 582 and ISP 542.) Prerequisite: EVRN 142, EVRN 145, EVRN 148, ANTH 150/151, ANTH 160/162/360 or permission of instructor. LEC.

EVRN 543. Natural Hazards and Environmental Risks. 3 Hours NE.
This course investigates the geophysical processes of the earth-atmospheric system that can create disastrous impacts on human life, society, and economics. Hazards, including earthquakes, tsunamis, floods, hurricanes, mass movements, wildfires, and many others, are examined by analyzing spatial and temporal dynamics as well as any precursory indicators that may be present. Attention is also given to management and mitigation strategies. Case studies are utilized to examine interaction between society and natural hazards. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 743. Prerequisite: Junior/senior standing. LEC.

EVRN 550. Environmental Economics. 3 Hours U.
This course provides an overview of the theory and empirical practice of economic analysis as it applies to environmental issues. Topics include externalities (a type of market failure), the valuation of nonmarket goods, the practice of benefit-cost analysis, and the efficiency and cost effectiveness of pollution control policies. Most importantly, the course permits students to perform economic field research, using state-of-the-art techniques in a manner accessible to undergraduate students. (Same as ECON 550.) Prerequisite: ECON 104 or ECON 105 or ECON 142 or ECON 143. LEC.

EVRN 553. Comparative Environmental Politics. 3 Hours S.
This course compares environmental politics and policies across a number of countries, including those in North America, Western Europe, East Asia, and Latin America. (Same as POLS 553.) LEC.

EVRN 555. Energy and Environment. 3 Hours NE.
This interdisciplinary course provides students with a broad understanding of the current energy system, including its challenges, with focus on changing global energy needs, current energy sources, developing and emerging renewable energy sources, and their economic, environmental, and societal implications. Analysis of energy fundamentals, fossil fuel exploration and use, nuclear energy, renewable energy sources, and subsequent environmental impacts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 755. Prerequisite: Junior/senior standing.

EVRN 563. U.S. Environmental Thought in the 20th Century. 3 Hours H.
Explores both leading and dissident ideas that Americans have had about the natural world since 1900. Broad chronological periods are explored in some depth, including the Progressive Era, New Deal, Cold War, the Sixties, and the Reagan Eighties. The course uses articles and books, as well as visual and aural forms of communication. Commercial speech, as well as scholarly and literary works, are considered. (Same as HIST 563.) Prerequisite: EVRN 148 or HIST 129, or by permission of instructor. LEC.

EVRN 577. The Andean World. 3 Hours H.
The Andean environment is defined by its mountains, but includes all of the earth's major biomes: from tropical rainforest to the world's oldest and driest desert. These diverse landscapes have nurtured one of the most ancient and durable, yet diverse sets of Indigenous cultural lifeways. Most of the Andes was governed by a single power during the Inca and Spanish colonial eras, but the region is now divided between seven independent states with their own regional traditions. The Andean World has long been recognized as a laboratory for understanding the relations between nature and culture, and the tensions between tradition and revolutionary change. This course will examine the history of this region from a long-term perspective, from its indigenous roots to contemporary struggles over globalization and extractivism. (Same as HIST 577, ISP 577 and LAC 577.) Prerequisite: Prior 300+ level course in related discipline (ANTH, EEB, EVRN, HIST, LAC, SPAN, etc.) or permission of instructor. LEC.

EVRN 611. Water Quality, Land Use, and Watershed Ecosystems. 3 Hours N.
Water quality issues are integrated with land use planning and the development of watershed management strategies. Interrelationships among the hydrologic cycle, atmospheric deposition, nutrient transformations and pesticide use are examined in regards to stream, lake, and groundwater quality. Prerequisite: CHEM 110 or CHEM 130 and BIOL 414, or consent of instructor. LEC.

EVRN 615. Capstone Project. 3 Hours AE61 / N.
The capstone project provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their environmental studies major. It rejoins the cohort that has separately pursued the BA/BGS and BS tracks and places them in situations in which they address real world environmental issues with a team approach and produce professionally meaningful analytical reports. Prerequisite: Junior standing; EVRN 320, EVRN 332, and EVRN 460. Restricted to declared Environmental Studies majors. LEC.

EVRN 616. Environmental Impact Assessment. 3 Hours N.
This course provides an overview of environmental laws and regulations. Additional focus is given to the process described in the National Environmental Policy Act (NEPA). Students will learn when NEPA is triggered, the difference between Environmental Impact Statements (EIS) and Environmental Assessments (EIA), and how to write an EIS/EIA. Prerequisite: An introductory course in environmental law, or consent of instructor. LEC.

EVRN 620. Environmental Politics and Policy. 3 Hours S.
Analysis of environmental politics and the formulation and implementation of environmental policy. Examines the history and development of environmental politics as well as current trends. Themes include interest groups, business interests, political institutions, and specific environmental policy issues. (Same as POLS 624.) LEC.
EVRN 624. Independent Study. 1-9 Hours AE61 / N.
A research course, in any of the fields of environmental studies, consisting of either experimental research, original policy analysis, or the preparation of an extensive paper based on library investigation. Project topic to be agreed upon in advance with supervising faculty member. Prerequisite: Consent of instructor. IND.

EVRN 625. Honors Research in Environmental Studies. 3 Hours AE61 / N.
A course giving eligible majors the opportunity to earn Departmental Honors by engaging in an intensive program of study leading to an original piece of research. Prerequisite: Senior standing, approval of the Environmental Studies Program, the Honors Project Director, and an overall 3.25 cumulative grade point average during the semester of enrollment. Restricted to declared Environmental Studies majors. IND.

EVRN 628. The Politics of Public Health. 3 Hours S.
This course examines the social, institutional and political context of public health policy in the United States. We will examine factors that shape the nation's public health, explore the role of government in reducing risk and promoting well being, and analyze the major institutions responsible for monitoring, protecting and promoting general public health. Themes include the social determinants of health, health disparities, emerging infectious diseases, food safety, transportation, and environmental health. (Same as POLS 628.) Prerequisite: POLS 110 and POLS 306 are recommended. LEC.

EVRN 630. Sculpture Intercepting the Waste Stream. 3 Hours N.
An introductory course using engaged learning to exploring the genre of ecological art practice (eco-art). Class focuses on the waste stream particularly as it affects the Kansas River. Through remediation events, students build works of art from trash, in turn auctioned for environmental efforts. Creative attention is focused on ecological imbalance. (Same as SCUL 630.) Prerequisite: Graduate standing or permission of instructor. LAB.

EVRN 635. Soil Physics. 3 Hours N.
Provides theoretical and practical foundations for understanding physical properties and processes of variably-saturated porous media. Focus is on the transport, retention, and transformation of water, heat, gas, and solutes through the soil. We examine modern vadose zone measurement methods, analytical tools, and numerical models for data collection and interpretation. (Same as GEOG 635.) Prerequisite: GEOG 335 or EVRN 335; or GEOG 535 or EVRN 535, and MATH 125, PHSX 114; or consent of instructor. LEC.

EVRN 636. Globalization and Environment. 3 Hours.
The focus is on the sociological facets of global environmental problems (e.g., climate change, biodiversity, fresh water problems, toxic waste; invasive species) and especially their relationship to globalization, growth, and what environmental sociologists have called the "human exemptionalist model." We address global environmental problems, political divisions over them, environmental movements and justice, and adaptation and mitigation strategies. The sociological literature on these issues and different environmental social theories are discussed (e.g., ecological modernization, treadmill theory, metabolic rift). Special attention is given to the impact of globalization and expansion of the global economy relative to the biosphere and consequent spikes in the consumption of resources and production waste. (Same as SOC 635.) Prerequisite: SOC 104 or EVRN 103 or EVRN 140 or permission of the instructor. LEC.

EVRN 640. Natural Resource Management from an Indigenous Perspective. 3 Hours.
The purpose of this course is to provide students with a solid understanding of how crucial the management of natural resources is, with emphasis on Indigenous communities. Indigenous communities are often ignored in such courses even though these peoples have distinctive views of how resources should be managed. This course allows students to focus on case studies and philosophical principles that compare management techniques derived from European based science with those derived from the cultural traditions and beliefs of Indigenous peoples and communities. Prerequisite: EVRN 140 and EVRN 142; or EVRN 144 and EVRN 145. LEC.

EVRN 645. Native and Western Views of Nature. 3 Hours.
This course emphasizes comparison of the attitudes and perspectives towards the natural world that have been developed by different cultural traditions. The primary example with which most of us are familiar is the contemporary Western attitude which emerges from traditions derived from Western European philosophy, i.e. the assumption that humans are autonomous from, and in control of, the natural world. A different approach is presented by Traditional Ecological Knowledge (TEK) of Indigenous peoples of the world, which are based on close observation of nature and natural phenomena; combined with a concept of community membership, which differs from that of Western political and social thought. Prerequisite: EVRN 140 and EVRN 142; or EVRN 144 and EVRN 145. LEC.

EVRN 650. Global Environmental Justice. 3 Hours.
Drawing on interdisciplinary fields of study, this course surveys a wide range of situated environmental injustices and environmental justice movements associated with toxic dumping, oil extraction and mining, climate change, deforestation, agri-business, and tourism. As students gain an understanding of the connections and differences among specific situations, and between environmental justice and other forms of environmentalism, they engage with salient theoretical and practical questions. The content of the course will also be shaped by the interests of students. For example, each student will present on an environmental justice movement of her/his own choosing, on the connections between it and other movements we have been studying, and on the ways this movement can help us understand some of the key practical and theoretical questions raised by environmental justice struggle. This course is offered at the 300 and 600 level with additional assignments at the 600 level. Not open to students with credit in EVRN 350. Prerequisite: EVRN 140 or EVRN 142 or EVRN 144 or EVRN 145 or EVRN 336; or permission of instructor. LEC.

EVRN 655. Ecosystem Ecology. 3 Hours N.
An introduction to the patterns and processes that affect terrestrial ecosystems. Emphasis is placed on understanding nutrient cycles (e.g., carbon nitrogen phosphorous), hydrologic cycles, and patterns of net primary productivity. The role of both natural and anthropogenic disturbances in structuring terrestrial ecosystems is examined in the context of global land-use patterns. Discussion of current research literature will be expected. (Same as BIOL 656.) Prerequisite: BIOL 414 and CHEM 130. LEC.

EVRN 660. Summer Field Ecology. 3 Hours N.
An introduction to research methods for environmental science. Similar to EVRN 460, formatted for summer term. The course includes fieldwork in diverse ecosystems (lakes, streams, forests, prairies). Assignments and group work emphasize analysis and interpretation of field data. (Same as BIOL 660.) Prerequisite: Junior, Senior, or graduate standing, completion of the natural sciences requirement of the KU Core (GE3N). LAB.

EVRN 662. Art and Ecology: Inhabiting the Ecosphere. 3 Hours N.
An introductory course exploring the genre of ecological art practice (eco-art) through a series of engaged learning projects that focus on habitat, the waste stream and natural resources, local ecologies and interventionist creative strategies that focus attention on ecological
imbalance. (Same as SCUL 630.) Prerequisite: Graduate standing or permission of instructor. LAB.

EVRN 673. Environmental Justice. 3 Hours NW / U.
An examination of the impact of environmental justice and security in Indigenous communities throughout the world with a focus on tactics and strategies that incorporate Indigenous perspectives in responses and mitigation schemes. A survey of mining, dumping, and storage of toxic and radioactive waste activities as related to Indigenous peoples. Case study analyses of economic, military and mining interests contrasted with perspectives emerging from cultural traditions and beliefs of Indigenous peoples and communities. (Same as ISP 673.) Prerequisite: Permission of instructor. LEC.

EVRN 700. The Anthropocene: Interdisciplinary Perspectives on Environmental Change. 3 Hours.
Have human activities become so pervasive that we have initiated a unique human epoch of earth history? This introductory, interdisciplinary graduate seminar will explore this question while examining the ways that different disciplines approach the understanding of environmental change, its impact on natural and human systems, and how these understandings have changed over time. SEM.

EVRN 701. Climate Change, Ecological Change and Social Change. 3 Hours.
This interdisciplinary graduate seminar examines the history of climate change from natural and physical science, social science, and humanities perspectives. The class explores the ways that different disciplines approach understanding climate change and its impact on natural and human systems and how these understandings have changed over time. The course is team-taught. Students will write a research paper on a climate change topic of their choice that reflects the historical and interdisciplinary approaches of the seminar. Prerequisite: Consent of instructor. LEC.

EVRN 702. Energy, Ecology and Community in Kansas. 3 Hours.
This interdisciplinary graduate seminar examines the role of climate in shaping energy, ecology, and community in Kansas from natural and physical science, social science, and/or humanities perspectives. The class will combine lectures, group projects, and field research to understand the ways that climate change and energy production are reshaping the human and natural systems in Kansas and the Great Plains. The course is team-taught by faculty from the natural and physical science, social science, humanities and professional schools, and will include faculty guest speakers from KU and off-campus. LEC.

EVRN 720. Topics in Environmental Studies: ______. 1-6 Hours.
Courses on special topics in Environmental Studies. These courses may be lecture, seminars, or readings. Students may enroll in more than one interest group but may enroll in a given interest group only once. LEC.

EVRN 721. Environmental Regulation and Policy. 3 Hours.
This course provides a survey of the environmental regulations, environmental problems, and environmental solutions that must be dealt with by environmental scientists in agencies and industry. Considers both theoretical and practical/applied aspects of environmental practices. LEC.

EVRN 725. Environmental Security. 3 Hours.
This course examines environmental issues, concerns, and policy as they relate to security through the framework of geopolitics. National security and conflict are increasingly discussed in relation to the environment, such as concerns regarding environmental change as well as stresses and demands on natural resources, e.g., water, energy, deforestation, desertification. The course will examine key contributions to the environmental security, resource conflicts, climate security and related literatures. LEC.

EVRN 730. Environmental Toxicology. 3 Hours.
Examines the effects of toxic chemicals on individuals, populations, communities and ecosystems. Topics include major classes of pollutants, movement, distribution and fate of pollutants in the environment, mechanisms of action, toxicity testing, and environmental assessment. LEC.

EVRN 735. Scientific Communication. 3 Hours.
Principles of English communication skills for the professional scientist. The course begins by exploring the role of narrative in all forms of scientific communication; it then applies the use of narrative tools to scientific writing, message honing and speaking. The course covers written and verbal communication of primary research. Students must have an independent research project on which to focus their communication assignments. (Same as BIOL 735.) LEC.

EVRN 736. Environmental Remote Sensing. 3 Hours.
Covers fundamentals of remote sensing, including electromagnetic radiation principles and data collection and processing, followed by an introduction to the various remote sensing techniques and their application in understanding and managing environmental systems. Exercises are provided for students to be actively involved in evaluating, critically analyzing and interpreting images and data to determine implications for practice. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 536. Prerequisite: Graduate standing. LEC.

EVRN 737. Water Resource Sustainability. 3 Hours.
Provides a framework for learning about our water future and ways we might define and achieve sustainability in water use and management. Concerns of ethics, culture, economics, politics, and environmental health will be discussed within the contexts of issues such as the global water crisis, water footprints, water pollution, human water systems, water security, and sustainable water technologies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 537. Prerequisite: Graduate standing. LEC.

EVRN 740. Soil Science for Environmental Assessment. 3 Hours.
Provides students with a solid understanding of soils in the environment, particularly as it relates to environmental assessment. Topics include soil geomorphology, soil physics/chemistry/biology, management of soils, and soil contaminants. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor. LEC.

EVRN 743. Natural Hazards and Environmental Risks. 3 Hours.
This course investigates the geophysical processes of the earth-atmospheric system that can create disastrous impacts on human life, society, and economics. Hazards, including earthquakes, tsunamis, floods, hurricanes, mass movements, wildfires, and many others, are examined by analyzing spatial and temporal dynamics as well as any precursory indicators that may be present. Attention is also given to management and mitigation strategies. Case studies are utilized to examine interaction between society and natural hazards. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 543. Prerequisite: Graduate standing. LEC.

EVRN 745. Environmental Data Analysis and Statistics. 3 Hours.
Survey of common statistical methods for analyzing environmental data. Includes techniques for environmental monitoring, impact assessment, and site reclamation, as well as methods for handling censored data, time series, and spatial analysis. Sampling design, data interpretation, and presentation of statistical results will be emphasized. Prior coursework or
practical experience in statistics is expected. Prerequisite: Permission of instructor. LEC.

EVRN 747. Fluvial Geomorphology. 3 Hours.
This course develops an understanding of the research processes as applied to river systems by means of qualitative and quantitative research methods and approaches to solve problems. Applications of fluvial principles to river management and stream restoration are examined, as well as interactions between land use and geomorphic processes. Prerequisite: Graduate standing. LEC.

EVRN 750. Environmental Air Quality Assessment. 3 Hours.
Addresses scientific, regulatory, and technical aspects of air quality monitoring, including pollutant formation and dispersion, pollution control, national emissions standards, and methods for monitoring pollutants and air quality. Prerequisite: CHEM 130 or CHEM 190 recommended or consent of the instructor. LEC.

EVRN 751. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 759 and GEOG 759.) FLD.

EVRN 755. Energy and Environment. 3 Hours.
This interdisciplinary course provides students with a broad understanding of the current energy system, including its challenges, with focus on changing global energy needs, current energy sources, developing and emerging renewable energy sources, and their economic, environmental, and societal implications. Analysis of energy fundamentals, fossil fuel exploration and use, nuclear energy, renewable energy sources, and subsequent environmental impacts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 759 and GEOG 759.) LEC.

EVRN 771. Project Management for Science and Technical Managers. 3 Hours.
Students will learn to use current project planning tools to develop project plans that aid in bringing a project to completion on time and within budget. They will demonstrate the ability to manage projects within a science organization. LEC.

EVRN 772. Organizational Management and Leadership in Science and Technical Organizations. 3 Hours.
Explores concepts and practices in leadership, organizational behavior and change management. Emphasis is placed on understanding dynamics of individuals and groups in organizational structures focused on research and innovation. Students will tackle organizational culture, management approaches, performance-building, and creativity and innovation management in science organizations. LEC.

EVRN 773. Organizational Communication and Supervision in Science and Technical Organizations. 3 Hours.
Explores the duties and responsibilities of a supervisor/manager. Addresses management of an integrated team, recruitment and interviewing, professional development of employees, performance management, effective workplace communications; collaboration, and managing organizational conflict. LEC.

EVRN 774. Financial Management in Science and Technical Organizations. 3 Hours.
The goal of this course is to gain an understanding of finance, budget, and accounting in a science organization. The student will learn how to interpret and understand basic financial statements; how to make good decisions based on them; learn essential accounting concepts and characteristics of accounting systems; and budgeting/forecasting in a science-based organization. LEC.

EVRN 775. Technical Communication for Scientists. 1 Hour.
Addresses challenges and approaches of communicating science concepts and results to technical and non-technical as well as internal and external audiences. Focuses on techniques to improve the effectiveness of written and oral communication, including technical writing of project and research proposals, scientific presentations, and effective workplace communications. LEC.

This course provides an overview of basic patent law, the patent process, patent interpretation (claims and prior art) and intellectual property law in science. LEC.

EVRN 777. Professional Development for Science Managers. 1 Hour.
Addresses professional development of the scientist as managers. Students will develop a personal and professional development plan and understand how to apply it to their own professional career, future career transitions, and lifelong career progression. LEC.

EVRN 778. Topics in Science and Technical Management. 1-3 Hours.
Addresses special topics in Science Management. Students may enroll in more than one interest group but may enroll in a given interest group only once. LEC.

EVRN 814. Professional Science Masters Environmental Assessment Capstone I. 1 Hour.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, or an internship or similar individual project for full-time students or students who are not employed in the area of study. This course will initiate the process of project development and will be taken prior to a student's final semester. This project is to be continued in EVRN 815 in the last semester of the student's graduate career. Prerequisite: Minimum 20 credit hours completed in program. SEM.

EVRN 815. Professional Science Masters Environmental Assessment Capstone II. 2 Hours.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, an internship or similar individual project for full-time students or students who are not employed in the area of study. The students will compile their project results in a formal written report and will give an oral presentation to the Environmental Studies faculty (2 minimum) and the student's employer or mentor. Prerequisite: EVRN 814. SEM.

EVRN 915. Capstone. 3 Hours.
The goal of this research seminar is to discuss individual students' research, culminating in the completion of a paper in Environmental Studies for presentation at a professional meeting and/or publication in a professional journal. SEM.
Bachelor of Arts and Bachelor of General Studies in Environmental Studies

Why study environmental studies?

The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives. Learning Pathways (http://esp.ku.edu/pathways/), thematic areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students with at least 24 hours of credit, prospective students must send transcripts to the Office of Admissions. Unless they are college transfer students, they must also send high school transcripts to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements and specific admission requirements.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a department/program. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credit.transfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

</table>
| Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 40 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Environmental Studies can be found here: Environmental Studies (p. 1475), or by using the left-side navigation.

Sample 4-year plans for the BGS degree in Environmental Studies can be found here: Environmental Studies (p. 1475), or by using the left-side navigation.
Departmental Honors

To graduate with honors in environmental studies, an undergraduate must maintain a minimum grade-point average of 3.5 in the major. The student must also complete an individual honors research project in cooperation with a faculty mentor. This project normally represents 2 semesters of original work, the completion of 3 credit hours of EVRN 624 Independent Study, and 3 credit hours of EVRN 625 Honors Research in Environmental Studies. All 6 hours may be applied to the 12 hours of environmental studies electives required for the major. Upon completion of the research project, honors candidates are required to present the results of their work at the department’s Undergraduate Research Colloquium.

BA in Environmental Studies

Below is a sample 4-year plan for students pursuing the B.A. in Environmental Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

</table>

1. The B.A. requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. The B.A. degree requires an additional Quantitative Reasoning course with MATH 101 as a pre-requisite. MATH 365 fulfills this requirement as do the courses on this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the B.A. Quantitative Reasoning requirement.

3. EVRN 322 and EVRN 460 are fall only courses; EVRN 320 is a spring only course; EVRN 660 is a summer only course.

4. A total of 12 hours of EVRN 300+ electives are required for the major. Students are encouraged to choose courses based on an emphasis area in consultation with an advisor.

5. Research Methods can be fulfilled by UBPL 538, ECON 550/EVRN 550, EVRN 410, EVRN 510, or GEOL 351.

6. visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the B.A. Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BGS in Environmental Studies

Below is a sample 4-year plan for students pursuing the BGS in Environmental Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

</tbody>
</table>

A total of 12 hours of EVRN 300+ electives are required for the major. Students are encouraged to choose courses based on an emphasis area in consultation with an advisor.

Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.

Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.

Pre-requisites for EVRN 320 and EVRN 332 are EVRN 140/GEOG 140/HIST 140 or EVRN 142/GEOG 142/HIST 142, or EVRN 144/GEOG 144/HIST 144 or EVRN 145/GEOG 145/HIST 145, or EVRN 148/GEOG 148, or concurrent enrollment.

EVRN 140, EVRN 332, and EVRN 460 are Fall only courses. EVRN 142 and EVRN 320 are Spring only courses. EVRN 660 is a summer only course.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Science in Environmental Studies

Why study environmental studies?

The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives. Learning Pathways (http://esp.ku.edu/pathways/), thematic areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.
Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

### Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

### Requirements for the B.S. Degree

#### General Education Requirements

In addition to degree and major requirements, all students must complete the KU Core.

**Total Hours 120-121**

1. Refer to the Degree Requirements tab for a list of courses that can fulfill this major requirement.
2. A total of 12 hours of EVRN 300+ electives are required for the major. Students are encouraged to choose courses based on an emphasis area in consultation with an advisor.
3. EVRN 332 and EVRN 460 are Fall only courses. EVRN 142 and EVRN 320 are Spring only courses. EVRN 660 is a summer only course.

**Please note:**

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Departmental Honors

To graduate with honors in environmental studies, an undergraduate must maintain a minimum grade-point average of 3.5 in the major. The student must also complete an individual honors research project in cooperation with a faculty mentor. This project normally represents 2 semesters of original work, the completion of 3 credit hours of EVRN 624 Independent Study, and 3 credit hours of EVRN 625 Honors Research in Environmental Studies. All 6 hours may be applied to the 12 hours of environmental studies electives required for the major. Upon completion of the research project, honors candidates are required to present the results of their work at the department’s Undergraduate Research Colloquium.

### Minor in Environmental Studies

**Why study environmental studies?**

The Environmental Studies Program at the University of Kansas, established in 1971, is one of the oldest environmental studies programs in the country. The KU Environmental Studies Program provides a rigorous interdisciplinary education and stimulates exchange concerning the environment from natural science, social science, and humanities perspectives. Learning Pathways (http://esp.ku.edu/pathways/), thematic
areas of study that match student interest to the environmental expertise of our faculty, are a key aspect of our unique program.

**Minor Hours & Minor GPA**

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

**Minor Hours**

Satisfied by 18 hours of major courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 junior/senior (300+) hours of KU resident credit in the major.

**Minor Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses in the minor. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**BA in Environmental Studies/Accelerated Master of Urban Planning**

Only current KU undergraduate students are eligible to apply to the Accelerated M.A. program. If you are not a current undergraduate student at KU, please review the admission requirements for regular MUP program.

The Accelerated Master’s program in Environmental Studies and Urban Planning is designed for students who have a passion for sustaining both our natural and built environments. It allows well-qualified students to earn a bachelor’s and a master’s degree in five years, rather than the six years it would take to earn each degree separately. This program combines in-depth training in environmental studies and analysis with a professional degree in urban planning. Graduates are prepared for careers in environmental planning in the public, private and not-for profit sectors.

Only current KU undergraduate students are eligible to apply to the Accelerated MA program. If you are not a current undergraduate student at KU, please review the admission requirements for regular MUP program.

Careful course selection and steady progression through the undergraduate career is necessary to ensure all requirements for both degrees may be completed within the 5-year time frame. All prospective students should discuss their interest with the undergraduate advisor for Environmental Studies and the Program Director of Urban Planning as soon as possible. A meeting with the Program Director of Urban Planning should take place no later than the student’s Junior year (Year 3) to discuss possible admission to the accelerated master's track.

Prospective student are eligible to apply to the graduate program in Spring semester of their Junior year. The following requirements must be met by this time:
• Major and cumulative GPA of at least 3.25;
• On track to complete all requirements for a B.A. or B.G.S. degree in Environmental Studies from KU by the Spring semester of the Senior Year (Year 4)

Applicants must complete an Application for Graduate Study (https://gradapply.ku.edu/apply/) online. The following information should be gathered in advance and uploaded with the application:

• Statement of interest that succinctly summarizes the students’ interests, education, their long term career goals, and how the accelerated degree program will help them achieve those goals;
• A copy of the student’s Advising Report
• The names of three persons qualified to comment on the applicant’s academic abilities and probable success in graduate study. These individuals will be asked to provide a letter of recommendation. At least two should be faculty members who have had the student in class.

Upon review of the Application for Admission, Urban Planning will notify the student of his or her eligibility to begin coursework in the program. Final acceptance to the Master of Urban Planning graduate program will be contingent upon the following:

• Successful completion of all requirements for the bachelor’s degree;
• Grades of B or above in all Urban Planning graduate-level coursework taken in Year 4

Any student who does not meet this minimum grade requirement may continue in the program but must repeat any graduate course for which they did not earn a B or above. Students should still aim to complete all requirements by the end of Year 5. Students may also elect to earn only the bachelor’s degree and re-apply to the graduate program at a later time.

This accelerated program uses a carefully planned combination of pre-requisite coursework, graduate-level courses taken for both undergraduate and graduate credit in Year 4, and graduate credit courses taken in Year 5. The student must be approved to begin coursework toward the master’s prior to enrolling in any classes that are to count for both undergraduate and graduate credit. Please see the Sample Academic Plan for more information.

### Environmental Studies Core Knowledge and Skills

Majors must complete each of the following:

- EVRN 320 Environmental Policy Analysis 3
- EVRN 332 Environmental Law 3
- EVRN 460 Field Ecology 3
- EVRN 615 Capstone Project 3

### Environmental Studies Required Electives/Options

- UBPL 736 Planning Institutions 3
- UBPL 738 Environmental Planning Techniques 3
- Complete two of the following courses: 6
  - UBPL 710 Introduction to Housing Policy
  - UBPL 730 City and County Planning
  - UBPL 750 Introduction to Transportation Planning
  - UBPL 765 Introduction to Sustainable Land Use Planning

Students should seek guidance from their advisor and refer to the degree plan for the specific enrollment sequence.

### Major Hours & Major GPA

While completing all required courses, majors also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 40 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Requirements for the Master’s Degree

During the Senior Year (Year 4), the student must take the following Urban Planning graduate coursework, in addition to the Major Requirements noted above:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>UBPL 741</td>
<td>Quantitative Methods I</td>
<td>3</td>
</tr>
<tr>
<td>UBPL 785</td>
<td>History and Theory of Planning</td>
<td>3</td>
</tr>
<tr>
<td>UBPL 742</td>
<td>Quantitative Methods II</td>
<td>3</td>
</tr>
<tr>
<td>UBPL 705</td>
<td>Urban Economic Theory and Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>
In Year 5, after the conferral of the undergraduate degree, the student will complete a total of 24 post-baccalaureate graduate credit hours, consisting of the following:

**UBPL Elective or Specialization Courses**  
UBPL 763  Professional Practice  
UBPL 850  Urban and Regional Theory  
18 Hours

Students in the accelerated masters must successfully pass a comprehensive exam. The examination provides a learning experience that encourages the student to synthesize the knowledge gained through course work and tests the student’s competence as a generalist/specialist planner. The examination consists of the student responding to a scenario or case study in which one is asked to synthesize knowledge gained in one's course work and apply it within a particular context. No academic credit is given for the examination.

**Progression Requirements**

Each student’s progress will be monitored at various points during the program:

1. Upon pre-admission acceptance to the accelerated masters, the student will meet with the UBPL Chair to plan the final year of undergraduate courses, graduate UBPL courses to be taken for elective undergraduate credit, and to outline the schedule of courses.

2. In the final spring semester of undergraduate study (Year 4), the student will meet with the UBPL Chair to review the student’s performance in UBPL courses. The student must earn a grade of “B” or better in these courses to be eligible for regular admission to the Master of Urban Planning degree.

3. Following completion and award of the undergraduate degree (end of Spring Semester Year 4), the admitted student will again meet with the UBPL Chair to review the course plan for the fifth year of study and update as needed. The student’s performance in the graduate-level courses taken as an undergraduate will be evaluated.

To continue in the track, students must earn a combined minimum GPA of 3.25 for these courses. At this time, the student will select a specialization area within the planning degree, and will meet with a faculty advisor who is overseeing that specialization to ensure the course plan is accurate.

1. For those students who do not meet the minimum GPA requirement of 3.25 in the first semester of Year 5 an alternative plan of study to address the student’s deficiencies may be developed, at the department’s sole discretion. Students may also be dismissed from the program.

1. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in courses for graduate credit toward the MUP degree until the baccalaureate degree has been conferred.

Students should complete all requirements for the master’s degree within one year of receiving the bachelor’s degree. If unforeseen circumstances prevent the timely completion of the master’s degree, the student must consult with their graduate advisor to develop an alternative plan for completion.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog. Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The admissions requirements for the Professional Science Master’s in Applied Science with a concentration in Environmental Assessment include:

1. Bachelor’s degree from an accredited institution. The student must have an undergraduate major in the natural, physical, or applied sciences, engineering, or related fields, OR coursework of at least 20 semester hours in the natural and applied sciences (biology, chemistry, geology, physical geography, physics, and/or engineering). For those without the necessary background courses in undergraduate science and mathematics, some additional coursework will need to be completed prior to the start of the graduate student program.

2. A grade-point average of B (3.0 on a 4.0 scale) for all previous university work is required. Under extenuating circumstances an average below 3.0 can be considered.

3. Graduate Record Examination (GRE) scores (General test only—verbal, analytical, and quantitative): for students with an undergraduate cumulative GPA of 3.0 or greater, the GRE is not required; for those with a GPA less than a 3.0, GRE scores are recommended, but can be waived based on professional experience. GRE scores should be from a test date within the last 5 years.

4. Statement of interest: This 1-2 page narrative should succinctly summarize your education, employment history, your long-term career goals, and how this degree program will help you achieve these goals.

5. At least two letters of recommendation from persons qualified to offer judgment on your ability to undertake graduate-level work.

6. International students must also meet the English proficiency (https://gradapply.ku.edu/english-requirements/), visa/I20, and financial requirements.

All PSMs must include a core of business, communication, and project management skills.

- **UBPL Elective or Specialization Course**: 3
- **3 UBPL Elective or Specialization Course**: 3

**Total Hours 146-147**

1. If MATH 365 is not selected, one of the electives in the plan must be switched to a BA Quantitative requirement.

### Professional Science Masters in Environmental Assessment

The Professional Science Masters professional graduate degree is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed, or wanting to be employed, in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, air, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

The Professional Science Master’s (PSM) is a relatively new interdisciplinary graduate degree that combines advanced coursework in science with a set of professional skills courses (project management, technical writing/communications, financial management), and a capstone/internship experience.

The PSM is designed for graduates who will be employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Application Deadlines for FAST-TRACK:

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (http://catalog.ku.edu/graduate-studies/) section of the online catalog.

Early Conditional Admission to the 4+1 Fast Track:

Students apply to the Accelerated Environmental Assessment PSM Program in the spring of their junior year for permission to start the Accelerated track. However, acceptance to the track does not guarantee acceptance to the Environmental Assessment PSM graduate program the following year.

Requirements for Early Conditional Admission (second semester, Junior Year):

- All requirements for a B.S., B.A., or B.G.S. degree in Environmental Studies from KU complete or in progress;
- Two letters of recommendation from faculty qualified to judge the student’s preparation for, and potential to successfully complete, the 4+1 accelerated track; at least one of the letters must be from an EVRN faculty member;
- Major and cumulative GPA of at least 3.2;
- Statement of interest that succinctly summarizes the students’ interests, education, their long-term career goals, and how the accelerated degree program will help them achieve those goals.

Upon acceptance by the Program to the accelerated track, the student will meet with the PSM-EA Program Director, the PSM Graduate Advisor, and the Undergraduate Advisor for Environmental Studies to plan the final year of undergraduate courses, graduate courses to be taken for elective undergraduate credit, and outline the schedule of courses.

In the final semester of their senior year, a student on the accelerated track must contact the PSM-EA Program Director to finalize the application process to the PSM-Environmental Assessment graduate program. In the final semester of undergraduate study (Year 4), the student will meet with the PSM-EA Program Director, the PSM Graduate Advisor, and the Undergraduate Advisor for Environmental Studies together to review the student’s performance in the PSM-EA graduate courses taken for elective undergraduate credit.

Following completion and award of the undergraduate degree (end of Year 4), the admitted student will again meet with the PSM-EA Program Director and the PSM Graduate Advisor to review the courses taken in the fifth year of study. The student’s performance in the graduate courses taken for elective undergraduate credit will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.0 in the 9 credit hours of undergraduate courses, with a grade of "B" or better attained in each course.

If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in courses for graduate credit toward the PSM-EA degree until the baccalaureate degree has been conferred.

Degree Requirements:

The KU Environmental Studies accelerated undergraduate-graduate degree track allows qualified EVRN B.S. students to graduate in 5 years with a Professional Science Masters in Environmental Assessment. The fast-track PSM provides excellent KU undergraduates in Environmental Studies an opportunity to complete an PSM in Professional Science Masters-Environmental Assessment within a year of completing the bachelor’s degree.

1. Upon acceptance by the Program to the 4+1 track, the student will meet with the PSM-EA Program Director, the PSM Graduate Advisor,

Total Hours: 8

1 Other elective chosen in consultation with an advisor
and the Undergraduate Advisor for Environmental Studies to plan the final year of undergraduate courses, graduate courses to be taken for elective undergraduate credit, and outline the schedule of courses.

2. Prior to applying for graduate admission in the final spring semester of undergraduate study (Year 4), the student will meet with the PSM-EA Program Director, the PSM Graduate Advisor, and the Undergraduate Advisor for Environmental Studies together to review the student’s performance in the PSM-EA graduate courses taken for elective undergraduate credit during the summer and/or fall. A grade of “B” or better must be attained in these courses to continue in the track.

3. Following completion and award of the undergraduate degree (end of Spring Semester Year 4), the admitted student will again meet with the PSM-EA Program Director and the PSM Graduate Advisor to review the courses taken in the final year of undergraduate studies and review/update the course plan for the fifth year of study. The student’s performance in the graduate courses taken for elective undergraduate credit will be evaluated. To continue in the track, students must earn a combined minimum GPA of 3.0 in the 9 credit hours of undergraduate courses.

4. If the baccalaureate degree is not completed at the end of Year 4, the student will not be permitted to enroll in courses for graduate credit toward the PSM-EA degree until the baccalaureate degree has been conferred.

Students must complete all requirements for the PSM-EA 4+1 within 1 year post-bachelor’s. If a student does not complete the requirements within 1 year post-bachelor’s, or is at any time determined to be ineligible to continue on the accelerated track, the student may petition the program for admission to the standard 33-hour PSM-EA degree track. Upon acceptance, students will be expected to either 1) repeat for graduate credit PSM coursework taken only for undergraduate credit, or 2) take additional elective coursework to complete the 33 hours. Specific coursework requirements in each case will be by agreement with the adviser.

Total minimum credit hours required (9 of these credit hours will be completed for undergraduate credit) is 33 hours.

Practica 3

Graduate Certificate in Environmental Assessment

Industries ranging from architecture, engineering and public policy require continued professional education for a variety of roles. The environmental assessment certificate provides certified specialization that professionals in these fields can add to existing credentials. Those in the field of environmental assessment identify possible environmental effects of a project or program, propose measures to decrease adverse effects and predict those effects. This certificate can be completed in its entirety online, or with an elective course option taken on campus.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Individuals interested in applying to the Graduate Certificate in Environmental Assessment should have a bachelor’s degree from an accredited institution in one of the following areas: natural, physical, or applied sciences, engineering, or related fields, OR coursework of at least 20 credit hours in the natural and applied sciences (biology, chemistry, geology, physical geography, environmental sciences, or engineering).

For those without the necessary background courses in undergraduate science, some additional coursework would need to be completed prior to the start of the graduate certificate program. Additional contact information can be found at the KU Edwards Campus website.

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

- A Statement of Interest in the environmental assessment certificate program. This 1-2 page narrative should summarize your education, employment history, your long-term career goals, and how this certificate will help you achieve these goals.
- Official undergraduate transcript.
- A letter of recommendation from someone familiar with your academic work or qualified to offer judgment on your ability to undertake graduate-level work (former professor or instructor, workplace supervisor).

Current KU graduate students wishing to enroll in the Graduate Certificate in Environmental Assessment program will apply through the Graduate School. A student must be in good standing with their graduate degree
program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. Completion of the certificate will appear on the graduate transcript. KU graduate students should submit the following materials:

- A Statement of Interest in the environmental assessment certificate program and its relationship to your graduate course of study.
- An unofficial copy of your KU transcript.
- A letter of support from your graduate degree program (your advisor or graduate director).

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).

Certificate Requirements

The Certificate in Environmental Assessment is designed for graduates of bachelor’s programs in physical/natural sciences, environmental studies, civil/environmental engineering or related fields who are currently employed in private firms, public agencies, and not-for-profit organizations that address a range of environmental issues. Key foci in the science curriculum of this program are environmental impact assessment; soils, water, and ecosystems science; geospatial analysis; environmental health and policy; and an understanding of environmental law and policy and the regulatory environment.

Graduate Certificate in Environmental Justice

Broadly defined, “Environmental Justice” is an interdisciplinary field of study that includes (but is not limited to) theories of the environment, theories of justice, environmental law and governance, environmental policy and planning, philosophy, development, sustainability, and political ecology. More narrowly, the United States Environmental Protection Agency defines environmental justice as "the fair treatment and meaningful involvement of all people regardless of race, color, sex, national origin, or income with respect to the development, implementation and enforcement of environmental laws, regulations, and policies."

Environmental justice emerged from an increased awareness of the disproportionately high impacts of environmental change and degradation on economically and politically disadvantaged communities. It addresses issues such as social, economic and political marginalization of minorities and low income populations.

The Graduate Certificate in Environmental Justice emphasizes the causes and consequences of the distribution of environmental problems. Students focus on why some poor and minority communities are more likely to experience a host of environmental burdens, as well as exploring the impact of that disproportionate environmental exposure. Understanding why some neighborhoods, communities, regions and countries benefit from environmental protection, while others do not, provides students with a concrete skill set and a critical perspective on environmental problems, community organizing and public participation, good governance, and research methods. Students who pursue this certificate will be well situated for careers in public policy, international relations, environmental advocacy, and environmental research.

The Environmental Justice Graduate Certificate can be completed at either Lawrence or Edwards Campus locations.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Individuals who are not already enrolled as KU graduate students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

- A Statement of Interest in the environmental justice certificate program. This 1-2 page narrative should summarize your education, employment history, your long-term career goals, and how this certificate will help you achieve these goals.
- A letter of recommendation from someone familiar with your academic work or qualified to offer judgment on your ability to undertake graduate-level work (former professor or instructor, workplace supervisor).

Current KU graduate students wishing to enroll in the Graduate Certificate in Environmental Justice program must apply through Graduate Studies (https://gradapply.ku.edu/apply/) and submit the required fee. A student must be in good standing with their graduate degree program in order to participate in the certificate program. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Office of Graduate Studies. Completion of the certificate will appear on the graduate transcript. KU graduate students should submit the following materials:

- A Statement of Interest in the environmental justice certificate program and its relationship to your graduate course of study.
- An unofficial copy of your KU transcript.
- A letter of support from your graduate degree program (your advisor or graduate director).
Please see the Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/) policy and the KU Edwards Campus page for additional information on admission.

Certificate students must complete 12 graduate credit hours.

**Total Hours** 12

Elective courses may have prerequisites or other requirements. Students should consult with the graduate advisor of that department to assess whether they will be permitted to enroll in a particular class.

### Graduate Certificate in Environmental Studies

The Graduate Certificate in Environmental Studies is designed to give students already admitted to a graduate program at KU Lawrence Campus the opportunity for interdisciplinary coursework in Environmental Studies, spanning the humanities, natural/physical sciences, and social sciences.

Thanks to the generous support of the late Ruben Zadigan, a limited number of scholarships are available for students enrolled in the certificate program. Applications for entering the certificate program are automatically reviewed for scholarship funding.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree-seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Graduate Admission

Prospective students must complete an application to Graduate Studies (https://gradapply.ku.edu/apply/) for admission into the certificate program and submit an application fee along with the following materials:

To submit an application, proceed to https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/) and search for the Graduate Certificate in Environmental Studies and submit required materials.

Applicants must include a cover letter to the Environmental Studies Graduate Director explaining their interest in the certificate and how interdisciplinary training in Environmental Studies helps meet individual goals in research and training. A graduate GPA of 3.0 or higher is required, but provisional admittance can be granted for one semester to new graduate students.

The student’s advisor must also write a letter of recommendation and the student must complete the coursework planning form (pdf) (http://esp.ku.edu/sites/esp.drupal.ku.edu/files/docs/EVRN%20Grad%20Cert %20Coursework%20Plan.pdf) and return it to the Environmental Studies Program office (215 Lindley).

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Submit your graduate application online (http://www.graduate.ku.edu/)

Lindley Hall
1475 Jayhawk Blvd., Room 215
Lawrence, KS 66045
785-864-8902
http://esp.ku.edu/

The Graduate Certificate in Environmental Studies is designed to give students already admitted to a graduate program at KU the opportunity for interdisciplinary coursework in Environmental Studies, spanning the humanities, natural/physical sciences, and social sciences.

Required coursework:

- **EVRN 700 The Anthropocene: Interdisciplinary Perspectives on Environmental Change** (3) Have human activities become so pervasive that we have initiated a unique human epoch of earth history? This introductory, interdisciplinary graduate seminar will explore this question while examining the ways that different disciplines approach the understanding of environmental change, its impact on natural and human systems, and how these understandings have changed over time.

- **EVRN 915: Capstone** (3)

Elective coursework
• Two graduate-level elective courses with at least 50% environmental content, approved by the student’s advisor and the Environmental Studies Graduate Director (6).

Scholarships

Thanks to the generous support of the late Ruben Zadigan, a limited number of scholarships are available for students enrolled in the certificate program. Applications for entering the certificate program are automatically reviewed for scholarship funding.

Department of French, Francophone, and Italian Studies

Why study French and/or Italian?

Speakers of French and Italian span five continents. French is spoken by over 220 million people. Italian is spoken by over 65 million people. By 2050, it is estimated that there will be over 750 million French speakers, 80% of whom will live in Africa, becoming the world’s most spoken language. French and Italian are the international languages of cooking, fashion, theater, the visual arts, dance and architecture. Thousands of US companies do business with Italy and the Francophone world. In an increasingly mobile and interconnected planet, the study of language, literature and culture has never been more crucial for our students’ success. It provides students with a competitive edge in an increasingly internationalized workplace; for example, four out of five new jobs in the US are created as a result of foreign trade. Above all, learning a second language enables a greater understanding of other cultures while enhancing your own.

Undergraduate French

The Department of French, Francophone, and Italian Studies offers a comprehensive undergraduate program in French language, literature, and culture, as well as Francophone literature and culture from around the world. In addition to first and second year courses in basics of grammar and conversation, advanced undergraduate courses in composition, literature, and culture are offered every semester. We offer a summer study abroad option in Paris, and a full semester study abroad program in Angers. Our summer and semester-long study abroad programs in Paris and Angers offer a wide variety of levels to students at all stages of linguistic competence. The major prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as interpreting, international business, art, art history, and travel. We encourage applicants from traditional and non-traditional backgrounds to learn French as a major or as a minor field.

Undergraduate Italian

The Department of French, Francophone, and Italian Studies offers a comprehensive undergraduate program in Italian language, literature, and culture, leading to the BA in French with the Italian Option or the Minor in Italian. Italian offers courses in basic grammar, composition and conversation, literature and culture. Our summer study abroad program in Florence offers a wide variety of levels to students at all stages of linguistic competence. The major prepares students for a variety of careers in teaching or in graduate studies, as well as in fields such as interpreting, international business, art, art history, architecture, and travel. We encourage applicants from traditional and non-traditional backgrounds to enrich their time at KU through the study of Italian.

Graduate French

The Department of French, Francophone, and Italian Studies offers M.A. and Ph.D. degrees in French and Francophone language, literature, and culture. Graduate study is supported through teaching assistantships offered to qualified candidates, who receive thorough training in language instruction. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation.

Undergraduate Programs

Course work in the Department of French, Francophone, and Italian Studies gives undergraduates a valuable and useful linguistic tool; offers cultural training for students specializing in other fields; trains majors in the literature, culture, and civilization of France and Italy; and prepares prospective language teachers. The department welcomes qualified students from all disciplines, regardless of major.

Placement

In general, placement depends on the overall proficiency of the student and on what was accomplished in previous French or Italian courses. A student entering KU with no previous French should enroll in FREN 110. A student entering KU with no previous Italian should enroll in ITAL 107, ITAL 110, or ITAL 111.

Students with past course work/experience in French should take the online French placement examination (http://languages.ku.edu/placement-exams/) offered through the Ermal Garinger Academic Resource Center (http://egarc.ku.edu/) at KU. Once the student has the placement score, he or she should contact the French language coordinator in the Department of French, Francophone, and Italian Studies to determine which French course is appropriate for his or her level. A student who has four years of high school French and wants to continue the study of French beyond the language requirement generally enroll in FREN 301 or FREN 326, depending on the placement examination results. Students who feel they are sufficiently prepared to test out of the language requirement may contact the department office to arrange to take a French proficiency test.

Any student with past course work or experience in Italian should contact the Italian program director in the Department of French, Francophone, and Italian Studies to determine which Italian course is appropriate for his or her level.

Retroactive Credit

Students with no prior college or university French or Italian course credit are eligible for retroactive credit according to this formula:

• 3 hours of retroactive credit are awarded to a student with 2 or 3 years of high school French or Italian who enrolls initially at KU in a third-semester French or Italian course (FREN 230 or FREN 231 or ITAL 230) and receives a grade of C– or higher.
• 6 hours of retroactive credit are awarded to a student with 3 or 4 years of high school French or Italian who enrolls initially at KU in a fourth-semester French or Italian course (FREN 240 or FREN 241 or ITAL 240) and receives a grade of C– or higher.
• 9 hours of retroactive credit are awarded to a student with 4 years of high school French or Italian who enrolls initially at KU in a French or Italian course with a fourth-semester course as a prerequisite and receives a grade of C– or higher.
Courses for Nonmajors
All courses are open to nonmajors who meet requirements. Candidates for the B.S. degree in education who want to major or minor in French (p. 227) should consult the School of Education and Human Sciences. Special concentrations in French and Italian are also available through business and journalism.

Graduate Program in French
The Department of French, Francophone, and Italian Studies offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (http://frenchitalian.ku.edu/faculty-0) is dynamic, professionally active, and committed to excellence in scholarship and teaching. The major emphasis of teaching and research is French and Francophone literature. The department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on all periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (https://frenchitalian.ku.edu/overview-phd/) of the department website for additional information.

Departmental Funding
The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, forming a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://frenchitalian.ku.edu/funding-opportunities/) of our departmental website.

Additional Funding
Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

Graduate Non-Degree Seeking Status
Students who are interested in enrolling in graduate-level coursework in the Department of French, Francophone, and Italian Studies without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s webpage (http://frenchitalian.ku.edu/nds-overview/) for further details.

Courses
FREN 100. French for Reading Knowledge. 3 Hours U.
Special course for candidates for advanced degrees in other departments. Fundamentals of grammar and reading of material of medium difficulty. Intended primarily for graduate students, but open also to seniors planning graduate study. Does not satisfy any part of the undergraduate language requirement. Presupposes no previous study of French. Conducted in English. LEC.

FREN 104. Elementary French, Overseas. 1-5 Hours U.
Basic language instruction in French for beginners participating in study abroad programs in France or a French-speaking country. Graded satisfactory/unsatisfactory. LEC.

FREN 107. Elementary French I for the Professional Schools. 3 Hours.
Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. LEC.

FREN 108. Elementary French II for the Professional Schools. 3 Hours U.
Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: FREN 107 or equivalent. LEC.

FREN 109. Elementary French III for the Professional Schools. 3 Hours U.
Essentials of French grammar; practice in speaking, reading, and writing French. Introduction to French business culture. Three hours of class per week. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: FREN 108 or equivalent. LEC.

FREN 110. Elementary French I. 5 Hours U / F1.
Five hours of class per week. A balanced approach stressing understanding, speaking, reading, and writing. LEC.

FREN 111. Introduction to French I. 3 Hours U.
Introduction to French for special purposes; no previous French required. Provides basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Introduction to the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: Instructor permission required. LEC.

FREN 112. Introduction to French II. 3 Hours U.
Continuation of FREN 111. Further development of basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Continued exploration of the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: FREN 111 or permission of instructor. LEC.
FREN 113. Introduction to French III. 1.5 Hour U.
Continuation of FREN 112. Further development of basic familiarity with the French language, focusing on speaking, listening, reading and the essentials of French grammar. Continued exploration of the culture of the French-speaking world. Three class hours per week; may be delivered by videoconference or face-to-face. Does not satisfy any KU language requirement. Prerequisite: FREN 112 or permission of instructor. LEC.

FREN 120. Elementary French II. 5 Hours U / F2.
Five hours of class per week. A balanced approach stressing understanding, speaking, reading, and writing. Prerequisite: FREN 110 or by departmental permission. LEC.

FREN 130. Critical Issues in Contemporary France. 3 Hours.
France is a society in transition. Profoundly altered by two World Wars and the aftermath of a colonial past, French culture has been propelled, in the last century, into the complexities of a modern, globalized world. While we have faced many similar challenges in United States to those confronted by our French counterparts, this course will help us think through the often drastically different outcomes of our respective approaches to such questions as immigration, national identity, education, and the perennial struggle between state and individual rights. This course is offered completely in English. It does not satisfy any requirements of the French major or minor. LEC.

FREN 150. Aliens, Monsters, and the Monstrous in the French Imagination. 3 Hours GE11.
A comprehensive, interdisciplinary survey of the treatment of the Other in French culture in different ages that may include vampires, zombies, fairy tales, villains and anti-heroes, the macabre, alien encounters, dystopias and utopias, and deviancy, with particular attention to literature, film and TV, and thought. Taught in English. Does not fulfill any requirement in the French major or minor. LEC.

FREN 152. France and the French. 3 Hours HL AE42/GE3H / H.
A comprehensive, interdisciplinary survey of French culture that may include topics ranging from the earliest times to the present, with particular attention to literature, the arts, thought, politics, society, food, and customs. Taught in English. Does not fulfill any requirement in the French major or minor. LEC.

FREN 153. Global Cultures: The French Connection. 3 Hours GE11 / H/W.
A comprehensive, interdisciplinary and critical survey of the French-speaking cultures outside France in North America, the Caribbean, Africa, the Middle East, and Southeast Asia. Will include a variety of cultural topics, with particular attention to, and critique of, French colonization, the effects of empire on indigenous cultures, and postcolonial interactions today between France and its former colonies and protectorates. Taught in English. Does not fulfill any requirement in the French major or minor. LEC.

FREN 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in French. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

Third-semester course stressing oral and written work in French; systematic review of grammar and introduction to reading in cultural texts. (See also FREN 231, FREN 234.) Prerequisite: FREN 120 or by departmental permission. LEC.

FREN 231. Intermediate French I, Honors. 3 Hours AE42 / U / F3.
Similar in approach and content to FREN 230; smaller class size; open to students who had done very good to excellent work in previous French classes. Prerequisite: Grade of B or A in FREN 120 or departmental permission. LEC.

One-semester course meeting five times a week for six hours credit. Material same as in FREN 230 and FREN 240. (FREN 234, FREN 240, FREN 241--each completes foreign language requirement.) Prerequisite: FREN 120 or by departmental permission. LEC.

Continuation of FREN 230. (FREN 234, FREN 240, FREN 241--each completes foreign language requirement.) (See also FREN 241.) Prerequisite: FREN 230, FREN 231, or by departmental permission. LEC.

Similar in approach and content to FREN 240; smaller class size; open to students who had done very good to excellent work in previous French classes. Prerequisite: A grade of A in FREN 230 or FREN 231, or departmental permission. LEC.

FREN 285. Headless Men: Conquest and Cultural Exchange Before the Age of Exploration. 3 Hours HL AE42/GE3H / H.
In fourteen hundred and ninety-two, Columbus sailed the ocean blue. But what happened before Columbus’ great journey? And, more to the point, why did he and his contemporaries feel entitled to simply claim whatever land they found? This course proposes to explore the medieval experiences of cultural and racial Otherness in order to better understand the roots of some of the assumptions about difference (interpersonal, intercultural, and international) that continue to play out in American society today. Taught in English. (Same as HIST 285.) LEC.

FREN 301. French Written and Oral Communication 1. 3 Hours H/W.
Designed to prepare students for oral and written work in advanced-level French. Prerequisite: FREN 234, or FREN 240, or FREN 241, or by departmental permission. LEC.

FREN 302. French Written and Oral Communication 2. 3 Hours H/W.
Designed to further students’ proficiency in oral and written expression for work in advanced-level French. Prerequisite: FREN 301, or by departmental permission. LEC.

FREN 310. French Phonetics. 3 Hours GE3S / H/W / FP.
A course in practical phonetics with exercises stressing rhythm, intonation, and individual sounds. Prerequisite: FREN 240, FREN 241, or by departmental permission. LEC.

FREN 315. Le Francais Pratique. 1-6 Hours H/W / FP.
Supplementary non-major language course that can be a sequel to the first four semesters of French. Primarily for students studying abroad. Covers vocabulary study, oral exercises, discussion of texts, writing, and free conversation. Prerequisite: FREN 230/231 or FREN 234, FREN 240/241. LEC.

FREN 326. Introduction to French Literature. 3 Hours HL AE42/GE3H / H / FP.
Analysis of selected texts from various genres; special emphasis on explication de texte. Prerequisite: FREN 301. LEC.

FREN 330. French Language and Civilization I. 3 Hours H / FP.
A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad programs. LEC.

FREN 334. Cities of the French-Speaking World. 3 Hours H/W.
The course will focus on one major city, or on a group of major cities, former French or Belgian colonies, where French language and Franco-
European cultures are still major elements. Emphasis will be on how today's citizens live the cities in their great diversity; how the colonial and decolonial past of each city has affected it; how these cities' responses to globalization are represented through culture and cultural works. Texts, novels, films, print and electronic documents, and other course materials will be used to paint the daily lives, cultural values and challenges of contemporary Francophone global urban communities. Prerequisite: FREN 301, FREN 302, and FREN 326. LEC.

**FREN 340. French Language and Civilization II. 3 Hours H / FP.**
A study of French grammar, conversation, and composition, with selected aspects of French civilization. Available to participants in the Summer Language Institutes, and selected Study Abroad Programs. LEC.

**FREN 350. Applied French Grammar and Composition I. 3 Hours H/W/FP.**
Systematic grammar review with extensive practice in writing French. Prerequisite: FREN 301 or FREN 326. LEC.

**FREN 352. French for Journalism and Business. 3 Hours H/W/FP.**
Practical acquisition of skills necessary to understand the language of journalism and business. Prerequisite: FREN 301. LEC.

**FREN 375. Intermediate French Conversation. 3 Hours H/W/FP.**
Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and acquire vocabulary. Sections limited to twelve students. Prerequisite: FREN 301 or concurrent enrollment in FREN 301. LEC.

**FREN 376. Advanced French Conversation. 3 Hours H/W/FP.**
Three meetings per week. Guided discussions designed to increase fluency, improve pronunciation, and knowledge of French culture and language. Classes have centered around topics such as the French Revolution, the Arts, Renaissance Festivals, and French cinema. Sections limited to twelve students. May be designated a KULAC class at the discretion of the instructor. Prerequisite: FREN 375. LEC.

**FREN 380. The Middle Ages in the Modern Imagination. 3 Hours GE21/H.**
Presents authentic French and non-French medieval literary and cultural content in the context of reflection on its role in modern popular culture. Themes may include Joan of Arc, Arthurian legend, the Chronicles of Narnia, Game of Thrones, and troubadour lyric. Taught in English. LEC.

**FREN 401. Paris, City of Lights and Legends. 3 Hours HL AE42/GE3H/H.**
An exploration of the French capital from its origins to present as emblem and icon of the social, literary, cultural, and political development of the French nation and of French ideals. Topics include great persons, events, works, symbols, and myths since the founding of the city to the present. Taught in English. Does not fulfill any requirement in the French major or minor. LEC.

**FREN 405. French Literature in Translation. 3 Hours HL AE42/GE3H/H.**
Readings and discussions of representative great masterpieces of French literature from the medieval Arthurian romances and chansons de geste to the present, with particular emphasis on the question of the interrelations of form and content. Includes such authors as Rabelais, Montaigne, Racine, Moliere, Voltaire, Balzac, Flaubert, Baudelaire, Proust, Gide, Camus, and Beckett. Conducted in English. A reading knowledge of French is extremely useful but not a requirement. LEC.

**FREN 406. Introduction to French Culture Through Film. 3 Hours AE42/GE3H/H/W.**
Discussion of great masterpieces of French film from the silent era to the present, with a particular emphasis on how film portrays and conveys important aspects of French culture past and present. The works of a variety of film-makers may be covered, and may include among others Georges Méliès, Jean Vigo, Jean Renoir, Abel Gance, Rene Clair, Marcel Carne, Jean Cocteau, Alain Resnais, Jean-Luc Godard, Francois Truffaut, Agnes Varda, Louis Malle, Eric Rohmer, and Claude Berri. Films will be shown in French with subtitles in English. Knowledge of French is useful, but not required. LEC.

**FREN 410. Survey of French Culture I. 3 Hours AE42/GE3H/H/W/FP.**
A survey of the historical, philosophical, literary, and artistic development of France, from the beginning through the 17th century. Prerequisite: FREN 301 and FREN 326. LEC.

**FREN 420. Survey of French Culture II. 3 Hours AE42/GE3H/H/W/FP.**
Continuation of FREN 410, from the 18th century to the present. Prerequisite: FREN 301 and FREN 326. LEC.

**FREN 430. La France d’Aujourd’hui. 3 Hours AE42/GE3H/H/W/FP.**
Cultures of the some 235 million persons in the five world areas whose everyday and/or official language is French: Canada; Caribbean (e.g., Haiti, Guadeloupe, Martinique); Europe (e.g., Belgium, Switzerland); Africa and Indian Ocean (23 former French or Belgian colonies); Pacific (e.g., Tahiti, New Caledonia). Also French-speaking settlers in the United States (Louisiana, South Carolina, New England, Kansas). French presence in Indo-China and the Near East. Prerequisite: FREN 301 and FREN 326. (May be taken concurrently with FREN 301 and/or FREN 326.) LEC.

**FREN 432. Francophone African Literature. 3 Hours NW AE42/GE3H/H/W.**
This course is an introduction of 20th Century African literature written in French, covering selected works by major authors from both sub-Saharan Africa and the Maghreb. Attention will be given primarily to the novel, although some poetry will also be read. Topics and themes include negritude, African identity in the wake of colonialism, Islam, and women's writing. Classes will be conducted in English. Students may read the texts in French or in translation. (Same as AAAS 432.) Prerequisite: ENGL 102 and a 200-level English course. LEC.

**FREN 433. French Global Culture Through Film. 3 Hours H/W.**
Discussion of great masterpieces of modern postcolonial Francophone and French global film, with a particular emphasis on how film portrays and conveys important aspects of the cultures of former French colonies and peoples in Quebec, the Caribbean, Africa, and Southeast Asia during and since independence, including immigrant populations in mainland France itself today. The works of a variety of French and indigenous filmmakers and cultures will be covered. Prerequisite: FREN 301, FREN 302, and FREN 326. LEC.

**FREN 440. Studies in French Culture: ______. 3 Hours H/W/FP.**
Representative topics are: History of Paris, Role of Women in French Literature and Culture, Interrelationships of the Arts, French-speaking African Culture, Culture of France Canada. May be repeated for credit with departmental permission; may also be repeated as part of major in French language and culture. Prerequisite: FREN 301 and FREN 326. LEC.

**FREN 441. The Story of France. 3 Hours H/W.**
This course provides an overview of the historical development of the French language and an introduction to different varieties of French, as...
well as some current language-related issues in the French-speaking world. The history of the French language is considered both from an external perspective, by examining important historical events in the language's history, and from an internal perspective, by looking at specific ways the language has changed over time. Variation is examined: how French differs geographically (i.e. dialects and regional varieties in France and in the French-speaking world), socially (i.e. how social groups such as socioeconomic class or sex are reflected in language use), and situationally (i.e. language modification depending on formality, context, etc.). Will include comparisons of spoken versus written French, slang, and le français populaire, as well as current issues, e.g., les néologismes (word creation), les anglicismes (English influence) and feminization of language. Taught in French. Prerequisite: FREN 301. LEC.

FREN 443. French Inside Out. 3 Hours H/W.
This course provides an introduction to the structure of modern French and the various subfields of French linguistics. Topics will include major aspects of phonetics/phonology (the sounds/sound system), morphology (word formation), syntax (sentence structure), semantics, pragmatics (language use) and sociolinguistic variation (social, stylistic, geographical), as well as language attitudes and policies in France and other Francophone regions. Students will be introduced to different theoretical approaches to the study of French linguistics and will work on linguistic analyses of first- and second-language data. Taught in French and no prior study of linguistics is necessary to take this course. Prerequisite: FREN 301. LEC.

FREN 450. French Literature of the Middle Ages. 3 Hours AE42 / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326. LEC.

FREN 455. French Literature of the Renaissance. 3 Hours AE42 / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326. LEC.

FREN 460. Identity, Absolutism, and Power in France, 1589-1715. 3 Hours AE42 / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and 326. LEC.

FREN 462. French Literature of the Eighteenth Century. 3 Hours AE42 / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and 326. LEC.

FREN 465. French Literature of the 19th Century. 3 Hours AE42 / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and 326. LEC.

FREN 470. French Literature of the Twentieth Century. 3 Hours AE42 / H/W / FP.
Study of the principal authors, movements, and themes of the period. Prerequisite: FREN 301 and FREN 326. LEC.

FREN 494. Research Internship. 1-3 Hours H.
Practical experience in the use of French skills in supervised academic, professional, or study-abroad setting. Credit hours are graded on a satisfactory/unsatisfactory basis. May be used as a component of the Research Experience Program (REP). Prerequisite: At least one 300-level French course and permission of instructor. IND.

FREN 495. Directed Readings in French. 1-15 Hours AE61 / U / FP.
Practical research experience in French and Francophone studies gained by assisting a faculty member on a faculty research, editorial, pedagogical, or outreach project. Credit hours are graded by faculty on a satisfactory/unsatisfactory basis. May be used as a component of the Research Experience Program (REP). Prerequisite: At least one 300-level French course and permission of instructor. RSH.

FREN 500. Advanced French Phonetics. 3 Hours GE35 / H/W / FP.
Advanced theory and practice of French pronunciation. Not open to students who have taken FREN 310, except by departmental permission. Prerequisite: FREN 301 or FREN 326 or graduate standing. LEC.

FREN 530. Studies in Film: _____. 3 Hours AE42/AE61 / H/W / FP.
Studies in an aspect of film, a director or group of directors. Emphasis on French film. Given in French or English. LEC.
revolution, city life versus country life, social classes, moral choice, and individual freedoms. The course will include discussion of the cultural and artistic significance of major French film movements like Poetic Realism. In addition to viewing and discussing films, students will read and analyze the writings of a number of French intellectuals, writers, and artists who have had a major influence on French culture as it appears in films from 1900-1950. May be taught in French or English. For students who already have some knowledge of French culture. LEC.

FREN 593. French Culture Through Film II, 1950-Present. 3 Hours AE42/AE61 / H/W / FP.
A survey of the major public images of French culture as surveyed in French silent and sound film from 1950 to present. Students will view and discuss a selection of films that address crucial aspects of French culture such as (but not limited to) gender, war and peace, daily life, art and artists, tradition and revolution, city life versus country life, colonialism and post-colonialism, social classes, moral choice, and individual freedoms. The course will include discussion of the cultural and artistic significance of major French film movements like the New Wave. In addition to viewing and discussing films, students will read and analyze the writings of a number of French intellectuals, writers, and artists who have had a major influence on French culture as it appears in films from 1950-present. May be taught in French or English. For students who already have some knowledge of French culture. LEC.

FREN 600. Studies in: _____, 3 Hours H/W / FP.
Topics vary by semester. May be repeated for credit. Prerequisite: Departmental permission. LEC.

FREN 610. Theme et Version. 3 Hours H/W / FP.
Exercises in English-French and French-English translation, designed to enable the student to write with greater clarity and precision in both languages. LEC.

FREN 620. Expository French Writing. 3 Hours H/W / FP.
Intensive practice in writing French, designed to clarify fine points of grammar and usage and to aid the student in developing an accurate and graceful prose style. LEC.

FREN 680. Language Teaching and Advanced Conversation. 2-3 Hours U.
A summer course designed principally for secondary school language teachers. Discussion of current theory in language acquisition integrated into an intensive oral review of French. Meets three hours daily for two weeks; includes lab. (Not applicable toward a major or graduate degree in French.) LEC.

FREN 681. Language Teaching for Oral Proficiency. 1 Hour AE61 / U.
A summer course designed principally for secondary school language teachers. Provides an orientation to proficiency-based models in foreign language instruction, national standards in the rating of foreign language proficiency, and curriculum development sessions which address issues of articulation in foreign language curricula. (Not applicable toward a major or graduate degree in German.) (Same as SPAN 681.) LEC.

FREN 700. Old French. 3 Hours.
Introduction to grammar and structure through the reading of representative works. LEC.

FREN 701. History of the French Language. 3 Hours.
Major aspects of development and growth. Conducted in English. LEC.

FREN 702. Provençal. 3 Hours.
Introduction to grammar and structure of the language through a reading of representative works from the Troubadour period. LEC.

FREN 703. Structure of Modern French. 3 Hours.
Linguistic analysis of the phonological, morphological, and syntactic structure modern French. Description in terms of current theories and models. Application of linguistic analyses to the teaching of French. LEC.

FREN 704. Methods in French Language Instruction. 3 Hours.
This course provides an overview of current and historical approaches to foreign language teaching, with reference to the instruction of French. Past and current trends and methodologies of language instruction are examined in order to acquaint students with various classroom approaches. Research findings in second language acquisition are explored and their implications discussed so as to show how these findings lead to more effective classroom practices. LEC.

FREN 720. Introduction to Graduate Studies in French. 3 Hours.
A summer course designed principally for secondary school language teachers. Discussion of current theory in language acquisition integrated into an intensive oral review of French. Meets three hours daily for two weeks; includes lab. (Not applicable toward a major or graduate degree in French.) (Same as SPAN 681.) LEC.
FREN 787. French Post-Romanticism. 3 Hours.
Literary movements developing out of reaction to Romanticism: Realism, Naturalism, Parnassianism. LEC.

FREN 790. Contemporary French Writers. 3 Hours.
Major 20th century authors, stressing Proust, Gide, Giraudoux, Claudel, Sartre, and Camus. LEC.

FREN 795. Investigation and Conference. 1-3 Hours.
Readings and research projects in French language, literature, and culture for students at the MA level. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Maximum credit for M.A.: Three hours. By special departmental permission only. RSH.

FREN 799. Masters Seminar. 1 Hour.
To meet Masters degree requirement for continual enrollment. This course will be graded satisfactory/unsatisfactory. FLD.

FREN 800. Studies in: ______. 3 Hours.
Study of topics not limited to one century. May be repeated for credit. LEC.

FREN 810. Criticism and Critical Methods. 3 Hours.
Literary criticism from historical, theoretical, and practical point of view. LEC.

Selected topics to be specified. Study of form, movements, or themes in the French Novel, not limited to one century. May be repeated for credit. LEC.

Selected topics to be specified. Study of form and theory of the French short story, not limited to one century. LEC.

FREN 842. Arthurian Literature in France. 3 Hours.
Origins and development of Arthurian legend; analysis of major texts. Prerequisite: FREN 700. LEC.

FREN 848. Studies in Medieval French Literature: ______. 3 Hours.
Various movements, themes, or genres. May be repeated for credit. Prerequisite: FREN 700. LEC.

FREN 850. Early Renaissance Literature. 3 Hours.
Emphasis on Rabelais, Marguerite de Navarre, Marot, Maurice Sceve and Louise Labe. LEC.

Various movements, themes, or genres. May be repeated for credit. LEC.

Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 871. Literature of the Enlightenment in France. 3 Hours.
Philosophical thought in 18th century as reflected in literature. Emphasis on philosophies, with discussion of external influences. LEC.

FREN 872. Novel of the Eighteenth Century in France. 3 Hours.
Origins and development to Revolution; thematic analysis with attention to critical attitudes and their influence upon evolution of novel as genre. LEC.

Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 887. Symbolist Movement in France. 3 Hours.
Works of major symbolist poets, including Baudelaire, Verlaine, Rimbaud, Mallarme, and Valery. LEC.

FREN 888. Studies in Nineteenth Century French Literature: ______. 3 Hours.
Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 897. New Directions in the French Novel. 3 Hours.
Samuel Beckett to the nouveau roman. LEC.

Various movements, themes, or genres. May be repeated for credit. LEC.

FREN 899. M.A. Thesis. 1-6 Hours.
THE.

FREN 900. Seminar in French: ______. 3 Hours.
Topics in literary, linguistic, and cultural research. May be repeated for credit. LEC.

FREN 995. Investigation and Conference. 1-3 Hours.
Readings and research projects in French language, literature, and culture for PhD students. Directed work to fulfill needs not met by available courses. One-three hours credit in any semester. Prerequisite: By Special Departmental Permission only. RSH.

FREN 999. Ph.D. Dissertation. 1-12 Hours.
THE.

Courses

ITAL 101. Studying Abroad: Italy at a Glance. 1 Hour W.
Online one-credit course which aims to prepare students for the study abroad experience in Italy. The course is taught in English and has no prerequisites. Students will improve their knowledge of Italy and gain a better understanding of the environment that they will find abroad. The course includes an overview of Italian habits and practices, a cross-cultural analysis of differences between Italy and the U.S., and an introduction to essential Italian vocabulary for daily usage while studying abroad. Graded on a satisfactory/unsatisfactory basis. Prerequisite: Instructor permission. LEC.

ITAL 103. Elementary Italian Language and Civilization. 3 Hours H.
A systematic review of the fundamentals of Italian grammar through practice in conversation and writing, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. No prerequisite. LEC.

ITAL 107. Elementary Italian Conversation I. 3 Hours U.
First part of a two-course sequence (with 108) for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120. LEC.

ITAL 108. Elementary Italian Conversation II. 3 Hours U.
A continuation of ITAL 107, second part of a two-course sequence for students with no previous study of a foreign language and minimal linguistic background as well as for students in professional schools who plan to participate in study abroad programs in Italy. Offers knowledge of essential grammar and basic oral communication skills through practice in grammar, listening comprehension, and conversation. Active participation required. Completion of both ITAL 107 and ITAL 108 is equivalent to ITAL 110 and allows students to enroll in ITAL 120. Prerequisite: ITAL 107 or Italian Coordinator's approval. LEC.
ITAL 110. Elementary Italian I. 5 Hours U / F1.
Introduction to Italian language and culture. Essentials of grammar and practice in speaking, understanding, reading, and writing. Active participation required. Five hours of class per week. LEC.

ITAL 111. Accelerated Elementary Italian I. 3 Hours U / F1.
This accelerated course covers the same content as ITAL 110 in three hours rather than five and prepares students to move on to ITAL 120 or ITAL 121. Students engage in activities and assignments that help them develop listening, speaking, reading and writing skills. Designed for students who have previous experience studying another foreign language or for those who desire to work at a faster pace. Active participation required. LEC.

ITAL 120. Elementary Italian II. 5 Hours U / F2.
Five hours of class. Reading of simple texts; diction; speaking; elementary composition. Prerequisite: ITAL 110, LEC.

ITAL 121. Accelerated Elementary Italian II. 3 Hours U / F2.
This accelerated course covers the same content as ITAL 120 in three hours rather than five and prepares students to move on to ITAL 230. Students engage in activities and assignments that help them develop and reinforce listening, speaking, reading and writing skills. Designed for students who completed ITAL 111 or who excelled in ITAL 110. Active participation required. LEC.

ITAL 152. Studies in Italian Heritage. 3 Hours AE41/GE11 / H.
A comprehensive, interdisciplinary survey of the ways in which the historical culture of Italy can be found in Lawrence, KS. Emphasis is on politics, sciences, philosophy, media, and immigration. Uses materials from various KU collections. Taught in English. Does not fulfill any requirement in the Italian major or minor. LEC.

ITAL 177. First Year Seminar: ______. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Italian. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ITAL 203. Intermediate Italian Language and Civilization. 3 Hours H.
A systematic review of Italian grammar through practice in conversation and composition, with an introduction to Italian culture. Available only to participants in study abroad programs. This course does not satisfy the College of Liberal Arts and Sciences foreign language requirement. Prerequisite: ITAL 120. LEC.

ITAL 230. Intermediate Italian I. 3 Hours U / F3.
Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 120 or ITAL 156. LEC.

ITAL 240. Intermediate Italian II. 3 Hours U / F4.
Continuation of ITAL 230. (ITAL 240 completes foreign language requirement.) Review and expansion of grammatical structures introduced in Elementary Italian I and II, with continued practice in speaking, understanding, reading, and writing, coordinated with the study of cultural texts. Active participation required. Prerequisite: ITAL 230. LEC.

ITAL 300. Composition and Conversation. 3 Hours H/W / FP.
Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 240 or permission of instructor. LEC.

ITAL 301. Introduction to Italian Literature and Textual Analysis. 3 Hours AE42/GE3S / H/W / FP.
Readings, textual analysis, and writing on a broad selection of Italian texts from different genres and periods, ranging from the medieval origins to contemporary literary culture. This course develops cultural and critical literacy as well as oral and written proficiency, and is a gateway to upper-division courses in the major and minor. Emphasis on study of Italian literature in its cultural context, history, politics, and society. Prerequisite: ITAL 240 or reading knowledge of Italian. LEC.

ITAL 303. Italian Language and Civilization I. 3 Hours U / FP.
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 240. LEC.

ITAL 304. Italian Language and Civilization II. 3 Hours U / FP.
An advanced study of Italian grammar, conversation, composition, with selected aspects of Italian civilization. Available only to participants in the KU summer language institute or semester abroad program in Florence or Rome. Prerequisite: ITAL 303. LEC.

ITAL 315. Advanced Composition and Conversation. 3 Hours H/W / FP.
Continuation of ITAL 300. Study of advanced grammatical structures with extensive practice in writing and conversation. Guided discussions on a variety of contemporary Italian literary, journalistic, and cinematic works. Active participation required. Prerequisite: ITAL 300 or permission of instructor. LEC.

ITAL 330. Cinematic Rome. 3 Hours H.
A study of cinematic representations of daily life, diversity, urban landscape, and social and political issues in modern and contemporary Rome as presented in different genres. Taught in English. (Same as FMS 330.) LEC.

ITAL 331. Mafia Movies. 3 Hours H.
This course investigates representations of the Italian mafia in Italian and American cinema since the 1960s, placing emphasis on conventions of the gangster genre and its evolution. We will examine films in relation to their socio-historical contexts and special attention will be dedicated to Italian films that glamourize the Italian mafia and champion the anti-mafia struggle. Taught in English. (Same as FMS 331.) LEC.

ITAL 336. Italy and the Italians. 3 Hours GE11/GE3H/GE3S / H.
Survey of Italian culture with study of art and architecture, literary masterpieces in translation, science, culinary arts, and cinema. Lecture, discussion, and supportive readings. Not open to native speakers of Italian. LEC.

ITAL 340. Studies in Italian Culture: ______. 3 Hours AE42 / H.
A study of particular aspects of and/or periods in Italian culture. May be repeated for credit with departmental permission. Prerequisite: ITAL 240 or permission of instructor. LEC.

ITAL 405. Italian Literature in Translation: ______. 3 Hours AE42/GE3S / H/W.
Major works representing various movements, themes, or genres. May be repeated with departmental permission. All work done in English. LEC.

ITAL 410. 19th and 20th Century Short Stories. 3 Hours AE42 / H/W / FP.
A survey of representative short stories of the 19th and 20th Centuries, including Verga, Panzini, Pirandello, Guaresechi, Moravia, Calvino, Landolfi, and Bigiaretti. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor. LEC.
ITAL 420. 19th and 20th Century Poetry. 3 Hours AE42 / H/W / FP. A survey of 19th and 20th century poets and their works, including Leopardi, Pascoli, d’Annunzio, Govoni, Palazzeschi, Gozzano, Marinetti, Boccioni, Ungaretti, Montale, Quasimodo, and Pasolini. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor. LEC.

ITAL 430. Dante’s Masterpiece. 3 Hours AE61 / H/W / FP. Detailed study of Dante’s epic poem with a close reading of the Inferno. Prerequisite: ITAL 300 or demonstrated knowledge of Italian. LEC.

ITAL 440. Italian Renaissance and Early Modern Literature. 3 Hours H/W / FP. Detailed study of selected masterpieces of the Italian Renaissance from the 13th to the 18th centuries. Prerequisite: ITAL 300 or demonstrated knowledge of Italian. LEC.

ITAL 450. Studies in Italian Cinema. 3 Hours AE42 / H/W. A study of significant moments in Italian film history, including analysis of themes, genres, stylistics, directors, and film culture. May be repeated for credit with departmental permission. Prerequisite: ITAL 336 or ITAL 340 or permission of instructor. LEC.

ITAL 465. 19th and 20th Century Novels I. 3 Hours AE42/GE3S / H/W / FP. With Italian 466, a survey of representative 19th and 20th century novels including those of Manzoni, Pirandello, Svevo, Deledda, Vittorini, Moravia, Pavese, Pratolini, Buzzati, Ginzburg, and Calvino. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor. LEC.

ITAL 466. 19th and 20th Century Novels II. 3 Hours AE42/GE3S / H/W / FP. See ITAL 465. Prerequisite: ITAL 240 or reading knowledge of Italian or permission of instructor. LEC.

ITAL 480. Studies in Italian Literature: ______. 3 Hours / FP. A study of a period, theme, group of authors, or cultural movement. Subject matter will vary; may be taken more than once if subject differs. Prerequisite: ITAL 300 or demonstrated knowledge of Italian. LEC.

ITAL 495. Directed Readings in Italian. 1-3 Hours AE61 / U / FP. May be taken more than once, total credit not to exceed nine hours. Various fields of Italian literature. Prerequisite: Consent of instructor, given only to those having demonstrated ease in reading Italian. IND.

ITAL 499. Honors in Italian. 3 Hours AE61 / H / FP. Various topics in Italian literature or culture. Minimum of three hours of Italian 499 required for a B.A. with Honors in the Italian option of the French degree. Students must discuss Honors eligibility and their topic with a faculty member before enrolling. Honors paper must be written in Italian. LEC.

ITAL 502. Dante’s Divine Comedy I. 3 Hours AE61 / H/W / FP. Detailed study of Dante’s masterpiece. Attention will also be given to such matters as the development of the Italian language at Dante’s period and the relation of the Comedy to Dante’s other works. Prerequisite: Reading knowledge of Italian. LEC.

ITAL 503. Dante’s Divine Comedy II. 3 Hours AE61 / H/W. Continuation of ITAL 502. Prerequisite: Completion of ITAL 502. LEC.

ITAL 695. Graduate Directed Readings in Italian. 1-3 Hours U / FP. May be taken more than once, total credit not to exceed nine hours. Directed readings, conferences with instructor. Prerequisite: ITAL 495 or consent of instructor. IND.

---

**Bachelor of Arts in French, Francophone and Italian Studies**

**Why study French and/or Italian?**

Speakers of French and Italian span five continents. French is spoken by over 220 million people. Italian is spoken by over 65 million people. By 2050, it is estimated that there will be over 750 million French speakers, 80% of whom will live in Africa, becoming the world’s most spoken language. French and Italian are the international languages of cooking, fashion, theater, the visual arts, dance and architecture. Thousands of US companies do business with Italy and the Francophone world. In an increasingly mobile and interconnected planet, the study of language, literature and culture has never been more crucial for our students’ success. It provides students with a competitive edge in an increasingly internationalized workplace; for example, four out of five new jobs in the US are created as a result of foreign trade. Above all, learning a second language enables a greater understanding of other cultures while enhancing your own.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**French and Italian Programs**

The department offers the major in French, an option in Italian, and an option in French and Italian studies. Prospective majors should consult the department during or before the second semester of the sophomore year.

Students pursuing a major in French or an option in Italian are encouraged to take courses in European studies, European history, art history, and philosophy, as well as English and foreign languages, literatures, and linguistics. Students often combine a major in French or the option in Italian with majors in business, humanities, journalism, the sciences, premedicine, or prelaw.
Language majors are useful in a variety of careers. The study of languages, literatures, and cultures enhances personal growth and broadens professional horizons, allowing fuller participation in an increasingly global community.

### First- and Second-Year Preparation

The normal course progression for first- and second-year students considering a major in French is FREN 110, FREN 120, FREN 230, and FREN 240. FREN 230 and FREN 240 may be replaced by FREN 234. Eligible students are encouraged to enroll in honors sections of third-semester French (FREN 231) and fourth-semester French (FREN 241). FREN 301 is the prerequisite for all other 300-level courses. FREN 326 is the prerequisite for all 400-level courses. The normal course progression for first- and second-year students considering a major in Italian is ITAL 110, ITAL 120, ITAL 230, and ITAL 240. Eligible students are encouraged to enroll in intensive sections of first-semester Italian (ITAL 155) and second-semester Italian (ITAL 156).

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours

Satisfied by 30 hours of major courses.

#### Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior Graduation GPA

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours
Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**
Satisfied by 30 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in French and Italian are available here: French & Francophone Studies (p. 1498), Italian Studies (p. 1499), or French, Francophone and Italian Studies (p. 1500), or by using the left-side navigation.

### Departmental Honors in French
Undergraduate students may graduate with honors in French by completing 6 hours of FREN 499, intensive honors tutorials on limited areas of French or Francophone literature or culture. Consult the department early in the junior year. To begin honors work and to graduate with honors, students must have minimum grade-point average of 3.5 in French.

### Departmental Honors in Italian
Undergraduate students may graduate with honors in Italian by completing 3 hours of ITAL 499 and one approved 3-hour course in a relevant field in addition to the 24-hour requirement for the option. Consult the department early in the junior year. To begin honors work and to graduate with honors, students must have minimum grade-point average of 3.5 in Italian.

---

### Summer Language Institute in Paris
The department conducts a 4-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L'Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend four days touring Normandy. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

### Summer Program in Florence, Italy
The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

### Semester and Year Programs in France
A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/).

### Semester Program in Rome, Italy
A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

### Semester Program in Florence, Italy
The department conducts a semester program in Florence for elementary, intermediate, or advanced students of Italian. Students take courses in intermediate and advanced Italian. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

### Total Hours 120-121

---

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website ([https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/](https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/)) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Choose from the list of electives in the degree requirements ([http://catalog.ku.edu/liberal-arts-sciences/french-italian/ba/#requirementstext](http://catalog.ku.edu/liberal-arts-sciences/french-italian/ba/#requirementstext)) tab.
4. Typically KU Core Goal 6 is fulfilled by taking a major course approved for this goal. See the list of French courses available to fulfill Goal 6 by visiting the KU Core Website ([http://kucore.ku.edu/courses/goal6/](http://kucore.ku.edu/courses/goal6/)).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BA in Italian Studies

Below is a sample 4-year plan for students pursuing the BA in Italian Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website ([http://kucore.ku.edu/courses/](http://kucore.ku.edu/courses/)).

</table>

#### Total Hours 120-121

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

3. For a list of courses to fulfill the Italian required electives, visit the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/french-italian/ba/#requirementstext) tab.

4. Typically KU Core Goal 6 is fulfilled by taking a major course approved for this goal. See the list of Italian courses available to fulfill Goal 6 by visiting the KU Core Website (http://kucore.ku.edu/courses/).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### BA in French, Francophone and Italian Studies

Below is a sample 4-year plan for students pursuing the BA in French, Francophone and Italian Studies. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Minor in French and Francophone Studies

Why study French?

Speakers of French span five continents. French is spoken by over 220 million people. By 2050, it is estimated that there will be over 750 million French speakers, 80% of whom will live in Africa, becoming the world’s most spoken language. French is the international language of cooking, fashion, theater, the visual arts, dance and architecture. Thousands of US companies do business with the Francophone world. In an increasingly mobile and interconnected planet, the study of language, literature and culture has never been more crucial for our students’ success. It provides students with a competitive edge in an increasingly internationalized workplace; for example, four out of five new jobs in the US are created as a result of foreign trade. Above all, learning a second language enables a greater understanding of other cultures while enhancing your own.

<tr>
<td>FREN 234</td>
<td>Intermediate French I and II</td>
<td></td>
</tr>
</tbody>
</table>

or FREN 240

Intermediate French II

or FREN 241

Intermediate French II, Honors

Required Courses

Students must complete the following three courses. Students who have received study abroad transfer credit for both FREN 375 and FREN 376 are exempt from the FREN 302 required class.

- FREN 301 French Written and Oral Communication 1
- FREN 302 French Written and Oral Communication 2
- FREN 326 Introduction to French Literature

Elective Courses

Students must complete three additional French courses, at least two of which must be at the 400 level or above. Minors may include one French course taught in English, when available.

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and grade-point average minimum standards:

Minor Hours

Satisfied by 18 hours of minor courses.

Minor Junior/Senior Hours

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

Minor Graduation GPA

Satisfied by a minimum of a 2.0 GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including Fs and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Summer Language Institute in Paris

The department conducts a 4-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend four days touring Normandy. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Summer Program in Florence, Italy

The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Semester and Year Programs in France

A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.
Semester Program in Rome, Italy
The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Semester Program in Florence, Italy
The department conducts a semester program in Florence for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Minor in Italian Studies

Why study Italian?
Italian is spoken by over 65 million people. Italian is the international language of cooking, fashion, theater, the visual arts, dance and architecture. Thousands of US companies do business with Italy. In an increasingly mobile and interconnected planet, the study of language, literature and culture has never been more crucial for our students’ success. It provides students with a competitive edge in an increasingly internationalized workplace; for example, four out of five new jobs in the US are created as a result of foreign trade. Above all, learning a second language enables a greater understanding of other cultures while enhancing your own.

Requirements for the Minor in Italian
The department offers minors in both French and Italian. Consult an advisor in the appropriate language.

Minor in Italian
18 credit hours are required, as follows:

Composition and Conversation
Satisfied by:
| ITAL 300 | Composition and Conversation | 3 |

Advanced Composition and Conversation
Satisfied by:
| ITAL 315 | Advanced Composition and Conversation | 3 |

Elective Courses: (Four)
Students choose four courses from among the courses already approved for the BA Option in Italian, one of which must be an Italian Literature course.
| ITAL 301 | Introduction to Italian Literature and Textual Analysis 1 |       |
| ITAL 330 | Cinematic Rome                                         |       |
| ITAL 331 | Mafia Movies                                           |       |
| ITAL 336 | Italy and the Italians                                  |       |
| ITAL 340 | Studies in Italian Culture: _____                      |       |

One approved 3-credit course offered by another department or program and with significant content related to Italian culture (300-500 level) may be counted toward the Italian minor.

1 Italian Literature Course

Summer Language Institute in Paris
The department conducts a 4-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend four days touring Normandy. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Summer Program in Florence, Italy
The department conducts a 4- or 8-week summer program for elementary, intermediate, or advanced students of Italian. Students take courses in language and culture at an institute where all instructors are native speakers. Students live with Italian families and usually have weekends free to travel. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Semester and Year Programs in France
A semester program is available in cooperation with CIDEF, the language institute of the Université Catholique de l’Ouest in Angers. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Year-long programs at French institutions are available through the International Student Exchange Program. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/).

Semester Program in Rome, Italy
The department conducts a semester program in Rome for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live in shared apartments with other students at the institute. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.
Semester Program in Florence, Italy

The department conducts a semester program in Florence for elementary, intermediate, or advanced students. Students take courses in Italian language and culture in a private language institute. All instructors are native speakers, and students live with Italian families. Consult the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Undergraduate Certificate in Francophone Studies

There are currently over 300 million French-speakers worldwide, 60% of whom live outside France. By 2050, there will be an estimated 750 million French-speakers, 80% of whom will live in Africa (“France Diplomatie”). The certificate provides linguistic and cultural cross-disciplinary training, not available in other programs, for students majoring in French and Francophone Studies, African and African-American Studies, and related programs, who wish to learn about interactions between French-speaking and indigenous peoples across the Francophone world, from Africa, North America, Indian Ocean, Southeast Asia, and Polynesia. The certificate requires one three-hour gateway course in FREN introducing the student to French-speaking global cultures; one course in an indigenous language (Arabic, Haitian Creole, Wolof, taught by AAAS); and two junior-/senior-level elective courses from related fields.

**Total Hours**: 12-14

1. Only one of these courses may count toward the requirement of 6 hours in Thematic Study of the Francophone World
2. A minimum of 6 credit hours must be taken at the Junior/Senior Level (300+)

### Master of Arts in French and Francophone Studies

The Department of French, Francophone, and Italian Studies offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (http://frenchitalian.ku.edu/faculty-0/) is dynamic, professionally active, and committed to excellence in scholarship and teaching. The major emphasis of teaching and research is French and Francophone literature. The department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on all periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (https://frenchitalianand.drupal.ku.edu/overview-5/) of the department website for additional information.

### Departmental Funding

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year and .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 3 years for M.A. students, and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (https://frenchitaliananddev.drupal.ku.edu/funding-opportunities/) of our departmental website.

### Additional Funding

Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

### Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

### Admission to the M.A. Program in French

In addition to the general admission requirements (https://gradapply.ku.edu/) from the Office of Graduate Studies, applicants should
have the equivalent of a major in French at the B.A. level, with a minimum of 9 hours of advanced undergraduate course work in French literature.

Submit your graduate application online (https://gradapply.ku.edu/). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admissions (http://frenchitalian.ku.edu/generaladmissions/) page of the department website, or contact the department’s Graduate Program Coordinator, Aley Pennington, aleypennington@ku.edu.

</tr>
</tbody>
</table>

As part of the 30-hour requirement, students may also take:

- A maximum of two graduate-level courses (up to 6 hours) outside the department. (e.g. Women, Gender and Sexuality Studies, Linguistics, Art History, Film Studies, etc.) This selection should be determined in consultation with the Director of Graduate Studies.
- A maximum of 3 hours of FREN 795 Investigation and Conference.

*In the event that a required course cannot be offered during the time when the student completes coursework, the student will take a substitute course in consultation with the DGS.

2. A reading knowledge of a second Romance language, Greek, Latin, German, Arabic, or other relevant language.

3. Comprehensive written and oral examinations.

At least 50% of coursework for the master’s degree must be taken at the 700 level or above.

Handbook for Graduate Students

A detailed presentation of departmental processes and regulations is included in the department’s Graduate Student Handbook (http://www.frenchitalian.ku.edu/graduate-program-manual/).

Summer Language Institute in Paris

The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Etoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

Graduate Study Abroad

Graduate students have the opportunity to serve as program assistants for the department’s Paris Summer Language Institute. The department also has a graduate exchange agreement with the Université de Franche-Comté, Besançon, France.

Doctor of Philosophy in French and Francophone Studies

The Department of French, Francophone, and Italian Studies offers a comprehensive graduate program (M.A. and Ph.D.) in French and Francophone language, literature, and culture. Our faculty (http://frenchitalian.ku.edu/faculty-0/) is dynamic, professionally active, and committed to excellence in scholarship and teaching. The major emphasis of teaching and research is French and Francophone literature. The department also offers courses in literary theory, cultural studies, and film. The department offers a balanced emphasis on all periods from medieval through twentieth and twenty-first centuries. Our students represent a diverse group, and we encourage equally applicants from traditional and nontraditional backgrounds. Excellent facilities, strong library holdings, and a faculty dedicated to both teaching and research assure students of a challenging and professional graduate preparation. Please visit the Graduate Program page (http://frenchitalian.ku.edu/overview-phd-french/) of the department website for additional information.

Departmental Funding

The department does its best to provide funding in the form of Graduate Teaching Assistantship (GTA) appointments to all incoming graduate students. GTA appointments are awarded for the academic year, .50 full-time equivalent (FTE) appointments come with:

- a competitive academic year (9 month) salary
- a 100% tuition waiver for all courses at KU
- payment of up to 3 hours of student fees
- optional University-subsidized group health insurance

The appointments are guaranteed based on performance for up to 5 years for Ph.D. students and 6 years for students who receive both an M.A. and a Ph.D. at The University of Kansas. GTAs in the department receive thorough training in language instruction, close mentoring, and the opportunity to teach French at a variety of levels, providing them with a strong base of teaching experience upon entering the job market. Additional information about teaching for the department is available on the Graduate Funding page (http://frenchitalian.ku.edu/funding-opportunities/) of our departmental website.

Additional Funding

Other funding opportunities for graduate students include the Office of Study Abroad’s Springer award; the department’s Cornell, Mahieu, and Magerus fellowships; awards for research abroad; and French university exchanges.

Visit the Graduate Studies website for additional information about funding opportunities (http://graduate.ku.edu/funding/) for graduate students at KU.
Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml) administers grants, loans, and need-based financial aid.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Admission to the Ph.D. Program in French**

In addition to the general admission requirements (https://gradapply.ku.edu/apply/) from the Office of Graduate Studies, applicants should have the equivalent of the M.A. in French offered at KU.

Submit your graduate application online (https://gradapply.ku.edu/apply/). For further information regarding the application process, including department-specific deadlines and required supplemental documentation, please visit the Admissions (http://frenchitalian.ku.edu/graduate-admissions/) page of the department website, or contact the department's Graduate Program Coordinator, Aley Pennington, aleypennington@ku.edu.

**Ph.D. Degree Requirements**

In addition to the general requirements for the Doctor of Philosophy (http://www.policy.ku.edu/graduate-studies/doctoral-degree-requirements/), a student must complete the following departmental requirements:

1. 24 hours of post-M.A. work (exclusive of dissertation hours). Ph.D. students who did not receive their MA in French at KU must complete a total of 30 post M.A. hours, including*:
   - FREN 704 Methods in Foreign Language Instruction
   - FREN 720 Introduction to Graduate Studies in French

   *Ph.D. students who have taken equivalent courses for either or both of these requirements as part of their M.A. studies elsewhere may petition the department for a waiver of FREN 704 and/or FREN 720 to reduce the total required hours. To determine equivalency, the student must submit course materials from the previous institution. Students petitioning this requirement should first consult with the DGS.

2. 6 hours of graduate-level coursework taken outside the department as an interdisciplinary minor field of concentration. These hours will count towards the 24 to 30 hours of post-MA coursework. Students may also apply these 6 hours of graduate-level coursework outside the department toward one of KU's Graduate Certificates (e.g. African Studies, Women, Gender and Sexuality Studies, etc.).

3. During their last semester of coursework, Ph.D. students must enroll in 3 hours of FREN 995 Investigation and Conference, with the faculty member who typically will become the student's dissertation director. These hours will count towards the 24 to 30 hours of post-MA coursework.

4. A successful written and oral comprehensive exam, which will be based on a portfolio containing the following items:
   - The 3 reading lists, highlighting which works have already been read
   - Prospectus draft and bibliography
   - Website. The website will include a professional profile, a CV, and pedagogical materials
   - A research paper that has been published or is publishable

5. At least 1 year of teaching in the department

6. A successful dissertation defense

**Research Skills & Responsible Scholarship Requirement**

The university also requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before attempting the comprehensive oral exam. For French doctoral students, this requirement is met by the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 704</td>
<td>Methods in Foreign Language Instruction</td>
<td>3</td>
</tr>
<tr>
<td>FREN 720</td>
<td>Introduction to Graduate Studies in French</td>
<td>3</td>
</tr>
</tbody>
</table>

Proficiency in a second language, which can be a second Romance language, Latin, Greek, German, Arabic, or another language pertinent to the student’s career path and approved by the faculty. (Students specializing in medieval or Renaissance literature are strongly encouraged to take Latin. Students specializing in Francophone Studies are strongly encouraged to take Arabic, Wolof, or Haitian Creole.) Proficiency may be demonstrated by completion of the fourth-semester course (or equivalent) or by examination.

Departmental new graduate student orientation, held each Fall semester during the week prior to the first instructional week of classes.

**Handbook for Graduate Students**

A detailed presentation of departmental processes and regulations may be found in the department’s Graduate Student Handbook (http://www.frenchitalian.ku.edu/graduate-program-manual/).

**Summer Language Institute in Paris**

The department conducts a 6-week summer institute in Paris focusing on French language and culture. Students take courses in intermediate and advanced French language at L’Étoile, a private language institute in the center of Paris. Before the stay in Paris, students spend 10 days to 2 weeks touring regions such as Normandy, Brittany, and the château country along the Loire River. Some scholarship aid is available. Consult the department (http://www.frenchitalian.ku.edu/) or the Office of Study Abroad (http://www.studyabroad.ku.edu/) for information.

**Graduate Study Abroad**

Graduate students have the opportunity to serve as program assistants for the department’s Paris Summer Language Institute. The department
also has a graduate exchange agreement with the Université de Franche-Comté, Besançon, France.

**Graduate Certificate in Medieval and Early Modern Studies**

The graduate certificate in Medieval and Early Modern Studies (ca. 500-1700) offers valuable training to students who specialize in Medieval, Early Modern, or Medieval & Early Modern fields. The program integrates important methodologies (in archival research, book history, digital humanities, for example) and a broad spectrum of specialized content. The aim is to enrich the interdisciplinary training of graduate students and foster an intellectual community of students and faculty supporting education and research. We offer a variety of courses from which students tailor electives to best enhance their degree program. This can be especially valuable for doctoral students as humanities faculty positions in early periods ask increasingly for competence across fields, especially in contingent periods.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

For information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at www.gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).

The Graduate Certificate in Medieval and Early Modern Studies requires the completion of 12 credits of coursework in the student’s area of research interest chosen from the list of approved courses available on the Department of French, Francophone & Italian Studies website (https://frenchitalian.ku.edu/sls/). The choices must be approved by a Medieval Studies advisor in advance.

**Geography and Atmospheric Science**

Geography as an academic discipline studies the spatial dimensions of, and links between, culture, society, and environmental processes. The study of Atmospheric Science involves weather and climate and how those affect human activity and life on earth. At the University of Kansas, our department’s programs work to understand human activity and the physical world.

**Why study geography?**

Because people, places, and environments interact and evolve in a changing world. From conservation to soil science to the power of geographic information science data and more, the study of geography at the University of Kansas prepares future leaders. The study of geography encompasses landscape and physical features of the planet and human activity, the environment and resources, migration, and more. Our program (http://geog.ku.edu/degrees/) has a unique cross-disciplinary nature with pathway options (http://geog.ku.edu/geography-pathways/) and diverse faculty (http://geog.ku.edu/faculty/) who are passionate about teaching and research. Our students are engaged through internships, undergraduate and graduate research, departmental organizations, and events. Alumni work in a variety of fields including academia, business, conservation, environmental regulation, GIS, regional planning, resource management, soil science, urban planning, and more. A variety of scholarship opportunities are offered through both the University of Kansas and the Department of Geography and Atmospheric Science for qualified undergraduate and graduate students.

**Why study atmospheric science?**

The study of atmospheric processes enables us to understand human interactions with the environment and generate solutions that make a real difference in people’s lives. The atmospheric science program at the University of Kansas is the only one of its kind in the state, following national meteorological guidelines set by both the American Meteorological Society (AMS) and the National Weather Service (NWS). Our program provides students with a solid foundation, but also options. Our students are engaged through research, internships, and several student organizations including the KU Chapter of the American Meteorological Society (AMS), which sponsors an annual Douglas County Severe Weather Symposium, in addition to monthly events. We recently partnered with the National Weather Service to provide opportunities for students to explore work in a variety of NWS regional offices through the Student Career On-Site Training (SCOut) program.

**Facilities**

The Department of Geography and Atmospheric Science is housed in Lindley Hall on the KU Lawrence campus, which includes multiple laboratories, computer labs, and a weather station. Additionally, the KU Field Station just north of Lawrence provides students an outdoor lab for field work, research projects and more. The station, established in 1947, is part of the National Ecological Observatory Network (NEON), a National Science Foundation initiative. Classes are held in both Lindley Hall and the new Earth, Energy, and Environment Center.

Geography labs include multiple computer labs and those for Soils and Geomorphology, Palynology, and Pedology. Additional campus resources include the map collections of the Spencer Research Library and University Map Library. The University of Kansas Undergraduate Research Center is another great resource. The center aids undergraduates interested in doing research, offers funding opportunities, and provides step-by-step workshops which provide students the skills necessary to explore, investigate, and excel.

Atmospheric Science labs include a Meteorology and Climate Hub (MACH) with state-of-the-art AWIPS II software used by the National Weather Service and computer lab and collaborative space dedicated to students doing research. Students also get hands-on experience, from forecasting and providing reports to university radio (KJHK 90.7 FM) and television (KUJH-TV) to research project opportunities through our department and the University of Kansas Undergraduate Research Center.

**Undergraduate Programs**

Geography
Geography integrates information from a variety of sources to study the nature of culture areas, the emergence of physical and human landscapes, and problems of interaction between people and the environment. Mapping and other techniques for gathering and displaying spatial information are integral parts of the field. We offer BA, BGS, and BS undergraduate degrees in Geography as well as a minor with an emphasis in General Geography or Geographical Information Science (GIS). We also offer an undergraduate GIS Geographical Information Science Certificate.

Geography Pathways include:
- Geopolitics and Political Geography
- Geospatial Analytics/Geoinformatics
- Climate and People
- Soils and Ecohydrology
- Urban/Economic Geography
- People, Migration, and Globalization

Atmospheric Science

The atmospheric science program offers undergraduates a fundamental knowledge of the atmosphere and the weather it generates. Interactions between weather phenomena and human decisions and activities give the subject important applications. Several pathways lead to a Bachelor of Science degree, with concentration options in General Meteorology, Air Pollution Meteorology, Hydrometeorology, and News Media Forecasting. A Minor in Atmospheric Science is also available.

Students from other disciplines such as biology, math, psychology, environmental studies, and other subjects, have chosen to have a double major, adding Atmospheric Science to enhance their education, skills, and career options.

Courses for Nonmajors

All geography courses below the 500 level are open to nonmajors, as are several above that level.

Graduate Programs

Geography

The graduate curriculum emphasizes broad geographic training while encouraging in-depth commitment to specialized concentrations. Students also are encouraged to take course work outside the department that complements their degree programs. Programs are tailored by the student and advisor to conform to the student’s interests and needs, as well as to fulfill the general degree requirements.

The central thrust of the department and the chief capabilities and interests of the faculty fall within these research-teaching areas:

1. Human geography including cultural geography, place, regional development, economic geography, health, diaspora, border conflicts, and environmental policy;
2. Geoinformatics including cartography, geographic information systems (GIS), and remote sensing;
3. Physical geography including geomorphology, soils, ecohydrology, and biogeography;
4. Regional geography including Africa, East Asia, Russia, Latin America, and the United States; and
5. Climatology.

Atmospheric Science

The purpose of the program is to expand the student’s knowledge of fundamental atmospheric processes and how the atmosphere interacts with other parts of the environment. Students become familiar with quantitative research methods and how these various approaches can be used to address different problems in atmospheric science. Students gain an in-depth ability to learn specific skills and apply them toward thesis work. These skills consist of, for example, statistical analysis techniques, numerical modeling, or work with atmospheric instrumentation. The breadth of the program and the diverse research topics explored by the faculty are able to accommodate students with a variety of interests.

Graduate Non-Degree Seeking Students

Students who are interested in enrolling in graduate level coursework in the Department of Geography and Atmospheric Science without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking status. See the department’s Admission (http://geog.ku.edu/graduate-1/) webpage for further details.

Courses

ATMO 105. Introductory Meteorology. 5 Hours NE GE3N / N / LFE.
A lecture and laboratory course introducing students to the atmosphere, weather, and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting. Prerequisite: Membership in University Honors Program or by permission of instructor. LEC.

ATMO 106. Introductory Meteorology, Honors. 5 Hours NE GE3N / N / LFE.
Honors version of ATMO 105. A lecture and laboratory course introducing students to the atmosphere, weather and climate phenomena, and their controlling physical processes. Topics covered include: the structure of the atmosphere, energy and energy budgets, climate and climate change, air pollution, clouds and precipitation, pressure and wind systems, severe weather, and weather forecasting. Prerequisite: Membership in University Honors Program or by permission of instructor. LEC.

ATMO 177. First Year Seminar: ____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Atmospheric Science. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

ATMO 220. Unusual Weather. 3 Hours GE11/GE3N / N.
An introductory lecture course which surveys the general principles and techniques of atmospheric science and illustrates their application through discussions of natural but unusual weather phenomena such as blizzards, hurricanes, tornados, and chinooks, of the effects of air pollution on weather, and of intentional human alteration of the atmosphere. LEC.

ATMO 321. Climate and Climate Change. 3 Hours N.
This course is designed to introduce students to the nature of the Earth’s physical climate. It introduces the basic scientific concepts underlying our understanding of our climate system. Particular emphasis is placed on energy and water balances and their roles in evaluating climate change. The course also evaluates the impact of climate on living organisms and the human environment. Finally, past climates are discussed and potential future climate change and its impact on humans is evaluated. (Same as GEOG 321.) Prerequisite: ATMO 105 or GEOG 104. LEC.

ATMO 499. Honors Course in Atmospheric Science. 2-3 Hours AE61 / N.
Open to students with nine hours of upper level credit in Atmospheric Science, an average of at least 3.5 in all Atmospheric Science courses, and an overall average of at least 3.25. Includes the preparation of an
honors paper and its defense before a committee of at least two regular faculty members. LEC.

ATMO 505. Weather Forecasting. 3 Hours N.
A first course in synoptic meteorology designed to introduce students to weather analysis and forecasting through the application of hydrodynamic and thermodynamic principles to operational analysis and forecasting. Topics include analysis and interpretation of surface and upper-air observations and data from satellites, radars, and wind profilers; chart and sounding analysis; and three-dimensional, conceptual models of weather systems. The course includes student-led weather briefings and analysis exercises. Prerequisite: ATMO 105 and MATH 125 or MATH 115. LEC.

ATMO 521. Microclimatology. 3 Hours N.
A study of climatic environment near the earth-atmosphere interface. Consideration of rural climates in relation to agriculture and urban climates as influenced by air pollution and other factors. Emphasis is on physical processes in the lower atmosphere, distribution of atmospheric variables, the surface energy budget and water balance. (Same as GEOG 521.) Prerequisite: ATMO 105 and MATH 125. LEC.

ATMO 525. Air Pollution Meteorology. 3 Hours N.
A study of background levels and concentrated sources of atmospheric pollution together with considerations of pollution buildup in urban areas as related to particular weather conditions. Inadvertent weather modifications and effects of atmospheric pollution on particular weather events and general climate will be discussed. Prerequisite: ATMO 105, MATH 125, EECS 138 and CHEM 130. LEC.

ATMO 531. Topics in Atmospheric Science: 1-3 Hours N.
An investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs. LEC.

ATMO 605. Operational Forecasting. 2 Hours N.
Students enhance their forecasting expertise by preparing forecasts for presentation to the public through a variety of media. Classroom activities include weekly map discussions and analysis of current weather situations. Forecasting topics such as forecast verification, aviation forecast products, severe weather, flash floods and watches and warnings are examined. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: ATMO 505 and ATMO 640. FLD.

ATMO 606. Forecasting Practicum - Private Industry. 2 Hours AE61 / N.
Practical experience in private industry working with current and/or archived meteorological data. Possibilities include the preparation of forecasts for TV stations and meteorological consulting firms, and working with environmental consulting firms to assess air pollution hazards. May be repeated two times for credit. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: Instructor permission. INT.

ATMO 607. Forecasting Intern - National Weather Service. 2 Hours AE52/AE61 / N.
Practical experience working in a National Weather Service forecasting center in analyzing weather data and preparing weather forecasts. May be repeated two times for credit. Credit for ATMO 605, ATMO 606, and ATMO 607 is limited to a total of eight hours, six of which may be counted toward a degree in atmospheric science. Prerequisite: Instructor permission. INT.

ATMO 615. Tropical Meteorology. 3 Hours N.
This course presents an undergraduate survey of tropical meteorology with an emphasis on clouds and convection ranging from fair-weather cumulus to hurricanes. Specific topics include the general circulation (climatology, air-sea interactions, Hadley and Walker circulation), convective processes in the topics (diurnal cycles, mesoscale convective systems, convectively coupled waves), and tropical variability (El Nino, Madden-Julian oscillation, monsoons, climate change). The genesis, thermodynamics, dynamics, and other topics related to tropical cyclones and hurricanes are also discussed. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in ATMO 715. Prerequisite: ATMO 640 and/or instructor permission. LEC.

ATMO 630. Synoptic Meteorology. 3 Hours N.
Interpretation, development, and analysis of synoptic charts. Prerequisite: ATMO 505 and ATMO 640. LEC.

ATMO 634. Physical Climatology. 3 Hours N.
Atmospheric processes are described and discussed in relation to the climate of the earth’s surface. Such topics as the greenhouse effect, ozone depletion, and the effect of solar irradiance on climatic change will be included. The physical processes and relationships between various climatic features will be studied. Prerequisite: ATMO 505 and DSCI 301 or MATH 526. LEC.

ATMO 640. Dynamic Meteorology. 3 Hours N.
This course introduces the student to the fundamentals of fluid dynamics necessary for understanding large scale atmospheric motions. Fundamental physical laws of conservation of mass, momentum and energy are examined and applied to atmospheric flows. Rotation in the atmosphere is examined quantitatively in terms of both circulation and vorticity. Prerequisite: MATH 127 and PHSX 214 or PHSX 212 and PHSX 236. LEC.

ATMO 642. Remote Sensing. 3 Hours AE61.
This course is designed to prepare students to effectively use remotely sensed data in operational or research settings for further work in this field. Topics include radiation and radiation transfer applied to active and remote sensing; radiative properties of space, sun, earth and atmosphere; instrument design considerations and operational characteristics; inversion methods for temperature or concentration profiling; surface temperature measurement; cloud top height determination; rain rate and wind velocity measurement; severe weather detection; satellite photograph interpretation. Prerequisite: ATMO 680, MATH 581. LEC.

ATMO 650. Advanced Synoptic Meteorology. 3 Hours N.
Analysis and interpretation of synoptic weather charts including treatment of numerical weather forecasting. Prerequisite: ATMO 630 and ATMO 660. LEC.

ATMO 660. Advanced Dynamic Meteorology. 3 Hours N.
Advanced study of the atmosphere including treatment of the vorticity equation. Prerequisite: ATMO 640 and MATH 220 or MATH 320. LEC.

ATMO 680. Physical Meteorology. 3 Hours N.
This course is designed to enhance the student's understanding of atmospheric processes through the study of these processes at molecular through micro scales. Topics include the properties and behavior of gases; transfer processes; phase change; solar and earth radiation; cloud drop, ice crystal and precipitation formation; atmospheric electricity; stratospheric chemistry. Prerequisite: MATH 127; PHSX 214, or PHSX 212 and PHSX 236. LEC.

ATMO 690. Special Problems in Meteorology. 1-3 Hours N.
Prerequisite: Nine hours in meteorology. IND.
ATMO 697. Seminar for Seniors. 1 Hour AE61 / N.
Current research in atmospheric science will be discussed. May be repeated for a total of two credit hours. Prerequisite: Senior level in atmospheric science. LEC.

ATMO 699. Undergraduate Research. 2 Hours AE61 / U.
Work on a research project under the supervision of a faculty member. Prerequisite: Nine credit hours in atmospheric science. May be taken up to three times for credit. IND.

ATMO 710. Atmospheric Dynamics. 3 Hours.
Presentation of contemporary approaches to the study of atmospheric dynamics. May include methodologies that provide insight into global, synoptic, mesoscale or microscale motions. Prerequisite: ATMO 660 or equivalent. LEC.

ATMO 715. Tropical Meteorology. 3 Hours.
This course presents a survey of tropical meteorology at the graduate level with an emphasis on clouds and convection ranging from fair-weather cumulus to hurricanes. Specific topics include the general circulation (climatological, air-sea interactions, Hadley and Walker circulation), convective processes in the topics (diurnal cycles, mesoscale convective systems, convectively coupled waves), and tropical variability (El Nino, Madden-Julian oscillation, monsoons, climate change). The genesis, thermodynamics, dynamics, and other topics related to tropical cyclones and hurricanes are also discussed. This course is offered at the 600 and 700 level with additional assignments at the 700 level. Not open to students with credit in ATMO 615. Prerequisite: Instructor consent. LEC.

ATMO 720. Atmospheric Modeling. 3 Hours.
Illustration and application of contemporary approaches to mathematical and statistical description of atmospheric phenomena. Prerequisite: Consent of instructor. LEC.

ATMO 725. Clouds, Climate and Precipitation. 3 Hours.
This course includes seminar-style lectures and discussions bridging cloud physics, physical climatology, and climate dynamics with a central theme regarding how clouds and precipitation interact with the Earth’s climate system. Specific topics include aerosol-cloud interactions, large-scale convective organization in the tropics, mid-latitudes, and polar regions, diabatic feedbacks on the general circulation, natural climate variability, and cloud effects in global climate models. How cloud systems have changed in recent decades, in addition to future model scenarios, are also discussed. LEC.

ATMO 731. Advanced Topics in Atmospheric Science: _____ 1-3 Hours.
Advanced investigation of special topics in atmospheric science. May include topics in dynamic, physical or synoptic meteorology or climatology as well as related topics in earth and physical sciences. May be repeated if topic differs. LEC.

ATMO 898. Readings in Atmospheric Science. 1-4 Hours.
Independent readings of special problems in Atmospheric Science. IND.

ATMO 899. Master’s Thesis. 1-10 Hours.
The thesis credit. Graded on a satisfactory progress/limited progress/no progress basis. THE.

ATMO 998. Research in Atmospheric Science. 1-5 Hours.
Individual investigation of special problems in Atmospheric Science. RSH.

ATMO 999. Doctoral Dissertation. 1-10 Hours.
Enrollment course for writing doctoral dissertation in Atmospheric Science. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Courses

GEOG 100. World Regional Geography. 3 Hours SC AE42 / N.
An introductory survey of the environmental setting, historically formative periods, and present-day issues that distinguish the major culture areas of the world. LEC.

GEOG 101. World Regional Geography, Honors. 3 Hours SC AE42 / S.
An introductory survey of the environmental setting, historically formative periods, and present-day issues that distinguish the major culture areas of the world. Open only to students in the College Honors Program, or by consent of instructor. LEC.

GEOG 102. People, Place, and Society. 3 Hours AE42/GE3S / S.
An examination of the relationships between humans and their environments. The course introduces students to basic concepts in human geography relating to economic activities, landscapes, languages, migrations, nations, regions, and religions. Serves as the basis for further course work in cultural, economic, political, population, and urban geography. LEC.

GEOG 103. People, Place, and Society, Honors. 3 Hours SC AE42/ GE3S / S.
An introduction to how human societies organize space and modify the world about them. Resultant patterns on the landscape are interpreted through principles of space perception, cultural ecology, diffusion, land use, and location theory. Comparisons are made between urban and rural areas and between subsistence and commercial societies. Open to students who have been accepted into the College Honors Program. LEC.

GEOG 104. Introduction to Physical Geography. 3 Hours NE GE3N / N.
The components of the physical environment are discussed in order to familiarize the student with their distributions and dynamic nature. Major topics include the atmosphere, landforms, soils, and vegetation together with their interrelationships and their relevance to human activity. This course and GEOG 105 together satisfy the laboratory science requirement. Both courses are required for geography majors. LEC.

GEOG 105. Introductory Laboratory in Physical Geography. 2 Hours U / LFE.
A laboratory course designed to complement GEOG 104 in satisfying the laboratory science requirement. It is required for geography majors. Laboratory exercises include a wide variety of analyses using data on the atmosphere, hydrosphere, biosphere, and lithosphere. Prerequisite: GEOG 104, which may be taken concurrently. LAB.

GEOG 111. Mapping Our Changing World. 4 Hours N / LFE.
This course is an introduction to geospatial technologies. It focuses on the conceptual and technical aspects of mapping technologies that transform information about locations, people, objects, environments, events, and phenomena to digital representations of the world and as end-products of geospatial analysis. Topics covered include surveying, aerial photography and photogrammetry, satellite remote sensing, global positioning systems (GPS), geographic information systems (GIS), and thematic mapping. Students will learn how to acquire and develop geospatial data as the sources for mapping, the skills of analyzing and interpreting spatial information, and how geovisualization can be used in addressing real-world problems. (Same as GIST 111.) LEC.

GEOG 140. Global Environment I: The Discovery of Environmental Change. 5 Hours GE3S / U / LFE.
This interdisciplinary course and laboratory sections survey the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences.
Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 140 and HIST 140.) LEC.

GEOG 142. Global Environment II: The Ecology of Human Civilization. 5 Hours GE3S / U.
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 142 and HIST 142.) LEC.

GEOG 144. Global Environment I: The Discovery of Environmental Change, Honors. 5 Hours U / LFE.
This interdisciplinary course surveys the foundations of environmental understanding and the process of scientific discovery from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the history of environmental systems and life on earth, the discovery of biotic evolution, ecological change, and climate change. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to earth systems and the development of environmental understanding using historical and present-day examples. (Same as EVRN 144 and HIST 144.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

GEOG 145. Global Environment II: The Ecology of Human Civilization, Honors. 5 Hours U.
This interdisciplinary course and its laboratory sections survey the history of humanity’s relationship with the natural world over the long term from perspectives that combine the principles and methodologies of the humanities, physical, life and social sciences. Key topics include the evolution of Homo sapiens and cultural systems; the development of hunter, gatherer, fisher, agricultural, and pastoral lifeways; the ecology of colonialism and industrial civilization, and the emergence of ideological and ethical perspectives on the relationship between nature and culture. Laboratory sections apply the principles and methodologies of the humanities, physical, life and social sciences to the humanity’s engagement with the global environment using historical and present-day examples. (Same as EVRN 145 and HIST 145.) Open only to students admitted to the University Honors Program or by permission of instructor. LEC.

GEOG 148. Scientific Principles of Environmental Studies. 3 Hours NB GE3N / N.
This course provides the scientific knowledge necessary to understand the changing relationships between humans and the natural environment, with an emphasis on the assessment of current environmental problems and critical evaluation of potential solutions. Major topics include fundamental scientific concepts and principles, interactions among the biological and physical components of the environment, implications of a growing human population, water resources, the atmosphere, climate, and energy sources. (Same as EVRN 148.) LEC.

GEOG 149. Scientific Principles of Environmental Studies, Honors. 3 Hours NB GE3N / N.
This course presents an overview of our understanding of environmental processes and issues. Topics include scientific principles, resource issues, pollution and global change, among others. This course gives students a rigorous understanding of interactions between humans and their environment and provides students with a scientific basis for making informed environmental decisions. An honors section of GEOG 148 designed for superior students. (Same as EVRN 149.) Prerequisite: Membership in the University Honors Program or approval of instructor required. LEC.

GEOG 150. Environment, Culture and Society. 3 Hours SC GE3S / S.
An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere, and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as EVRN 150.) LEC.

GEOG 154. Environmental Conservation. 3 Hours NE GE3N / N.
This course presents an overview of our understanding of environmental issues from the local to global scales. An introduction to geographic approaches to the study of the environment, emphasizing societal and cultural factors that influence human interaction with the biosphere, hydrosphere, lithosphere, and atmosphere. The course involves analysis of a broad range of contemporary environmental issues from the local to global scales. (Same as EVRN 150.) LEC.

GEOG 157. First Year Seminar: _____. 3 Hours GE11 / U.
A limited-enrollment, seminar course for first-time freshmen, addressing current issues in Geography. Course is designed to meet the critical thinking learning outcome of the KU Core. First-Year Seminar topics are coordinated and approved by the Office of First-Year Experience. Prerequisite: First-time freshman status. LEC.

GEOG 201. Culture and Health. 3 Hours AE42 / H/W.
This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 203 and GIST 210.) LEC.

GEOG 202. Culture and Health, Honors. 3 Hours AE42 / H/W.
Honors version of AAAS 203. GEOG 201 and GIST 210. This course offers a holistic, interdisciplinary approach to understandings of health, well-being, and disease within and across cultures. It draws upon the subfields of anthropology, as well as the humanities, natural sciences, and social sciences. This course should be of special interest to premedical students and majors in the allied health professions. (Same as AAAS 204 and GIST 211.) LEC.

GEOG 304. Environmental Conservation. 3 Hours NE GE3N / N.
A survey of current methods of describing and modeling the function, structure, and productivity of natural and anthropogenically modified earth resource systems, along with a discussion of contemporary views of what constitutes a natural landscape. Fundamental natural science principles about the interplay among lithospheric, atmospheric, hydrospheric, and biospheric components of earth systems are emphasized. Uses of natural resources, including fossil fuels, minerals, and water are described with attention to the earth’s total energy budget. Human activities that affect preservation, conservation, and multiple uses of earth regions receive attention. Systems under stress through population and other contemporary forces serve as examples. (Same as EVRN 304.) LEC.

GEOG 311. Introductory Cartography and Geovisualization. 4 Hours N / LFE.
This course is an introduction to cartography and focuses on computer-based map making skills. It begins with the history of cartography, cognitive maps, and the use of maps in the past and modern times. Topics covered in this course emphasize spatial data handling, principles of cartography and symbolization, map elements and design, and mapping techniques such as choropleth, proportional symbol and dot maps. Students will learn to adopt appropriate spatial data and mapping
techniques to create accurate and creative digital maps reflecting given phenomena. LEC.

GEOG 316. Methods of Analyzing Geographical Data. 4 Hours N / LFE.
Introduces the benefits and limitations of using quantitative methods to analyze geographical problems. Covers traditional descriptive (e.g., measures of central tendency) and inferential statistics (e.g., hypothesis testing) but also inherently geographical approaches such as shape and point pattern analysis, and spatial autocorrelation. Laboratory emphasizes using the computer to explore and analyze geographical problems. LEC.

GEOG 319. Topics in Techniques: ______. 1-3 Hours N.
An investigation of special topics in Techniques. May include coursework in cartography, GIS, or remote sensing. May be repeated if topic differs. LEC.

GEOG 321. Climate and Climate Change. 3 Hours N.
This course is designed to introduce students to the nature of the Earth's physical climate. It introduces the basic scientific concepts underlying our understanding of the Earth's climate system. Particular emphasis is placed on energy and water balances and their roles in evaluating climate change. The course also evaluates the impact of climate on living organisms and the human environment. Finally, past climates are discussed and potential future climate change and its impact on humans is evaluated. (Same as ATMO 321.) Prerequisite: ATMO 105 or GEOG 104. LEC.

GEOG 332. Glaciers and Landscape. 3 Hours N.
Elements from glaciology, geology, and climatology are merged to examine the interactions between glaciers and their natural environments, including the processes involved in glacier formation, the relationship between glaciers and climate, the mechanisms of glacier flow, and interpretation of the Earth's glacial record. Emphasis is placed on an interdisciplinary approach to study environmental change and paleoclimate reconstruction. Prerequisite: GEOG 104 or GEOL 101, or consent of instructor. LEC.

GEOG 335. Introduction to Soil Geography. 4 Hours N / LFE.
This course focuses on the properties and processes of soils as they occur in their environment. The student is introduced to the nature of soil as it functions as a body; genesis of soils; properties of soil solids, especially colloids; soil chemical composition, properties, and reactions; interaction between solid, liquid, and gaseous components in soils; plant-soil-water relationships; biological interactions with soil; classification of soils; and the distribution of soils on the landscape. Not open to students who have taken EVRN 535 or GEOG 535. (Same as EVRN 335.) Prerequisite: GEOG 104 or GEOL 101 or consent of instructor; BIOI 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended. LEC.

GEOG 336. Introduction to Environmental Hydrology and Water Resources. 3 Hours N.
Water is vital to life on earth. In this course we cover components of the water or "hydrologic" cycle, how management has altered them, and how they are predicted to change with the changing climate. We discuss the evolution of water policy, its implications for management and the economic impact of human perturbation on water. We study the physical processes that govern the water cycle, learn how they are measured, and estimate hydrologic fluxes. (Same as EVRN 363.) Prerequisite: GEOG 104 or GEOL 101. LEC.

GEOG 338. Introduction to River Systems. 3 Hours N.
A course of fluvial geomorphology. Topics include the drainage basin, fluvial processes, river channel adjustment and forms, human disturbance and geomorphic response, and research methods in fluvial geomorphology. Field trip. Prerequisite: GEOG 104. LEC.

GEOG 339. Topics in Physical Geography: ______. 1-3 Hours N.
An investigation of special topics in Physical Geography. May include coursework under headings of soils, vegetation, climate, or geomorphology. May be repeated if topic differs. LEC.

GEOG 351. Africa's Human Geographies. 3 Hours NW AE42/GE3H/GE3S / S/W.
An introduction to historical, cultural, social, political, and economic issues in Africa from a geographic perspective. The course begins with the historical geography of humanity in Africa, from ancient times through to the present. Other topics include cultural dynamics, demography, health, rural development, urbanization, gender issues, and political geography. Case studies from Eastern and Southern Africa will be used to illustrate major themes. (Same as AAAS 351.) LEC.

GEOG 352. Economic Geography. 3 Hours S.
This course offers an overview of contemporary economic geography with an underlying theme of uneven regional development. Topics examined include: the historical context in which capitalism emerged; the major theoretical approaches used to understand the temporal and spatial dynamics of capitalist society; a series of case studies of different economic sectors; and the global economy, including its development with respect to colonialism, neocolonialism, international trade, third world development, and population growth. LEC.

GEOG 354. Globalization: A Geographic Approach. 3 Hours S.
This course is designed to provide a broad overview of some major facets of the historical, economic, political, cultural, and geographical dimensions of contemporary globalization, the process by which individual regions and nations have become progressively linked to, and structured by, the world-system of states and markets, and the cultural contradictions associated with this process. (Same as AS 354.) LEC.

GEOG 358. Introduction to Geographic Information Systems. 4 Hours N / LFE.
An introduction to computer-based analysis of spatial data. Covers basic principles of collecting, storing, analyzing, and displaying spatial data. Emphasis is on problem-solving activities using common spatial analytical techniques (e.g., map overlay). The student will gain extensive hands-on experience with state-of-the-art GIS software. LEC.

GEOG 360. Computer Programming for Mapping and Spatial Analysis. 3 Hours N.
This course teaches basic computer programming concepts and skills for mapping and spatial analysis using various scripting languages. The goal is to enable students to write computer programs, develop mapping applications, and perform spatial data analysis. This course will lay the foundation for computerized problem solving skills that can be applied in later courses. This course assumes no previous programming experience. LEC.

GEOG 370. Introduction to Cultural Geography. 3 Hours GE3S / H.
Charts some of the major lines of research in cultural geography, including critical theory, political economy, poststructuralist thought, feminism, and global consumption. Through fieldwork, diverse research methods are applied to issues such as community development, cultural patterns on the landscape and global impacts on local economies. Prerequisite: GEOG 100, GEOG 101, GEOG 102 or GEOG 103; or consent of instructor. LEC.

GEOG 371. Environmental Geopolitics. 3 Hours S.
This course examines how human relationships with the biophysical world are politicized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. (Same as EVRN 371 and GIST 371.) LEC.
GEOG 372. Environmental Policy. 3 Hours N.
An historical and analytical study of the formulation, implementation, and consequences of environmental policy in the United States. Attention is directed at relevant interest groups, issues specific to both rural and urban populations, relationships between national policies and international organizations concerned with environmental problems. Prerequisite: GEOG 148 or EVRN 148; and either EVRN 103 or HIST 103, EVRN 347 or HIST 347, or GEOG 150 or EVRN 150. LEC.

GEOG 373. Political Geography. 3 Hours S.
Political Geography is concerned with spatial dynamics of power. It concerns issues such as territory, boundaries, and identity as well as feminist, post-colonial, geopolitical, and environmental perspectives. This class will consider the development of this subfield, the role it has played in imperial expansion, and ways in which more recent critiques have shaped political geography to be a means of understanding different forms of power and its relationship to people and places. Prerequisite: GEOG 100 or GEOG 102 or equivalent or consent of instructor. LEC.

GEOG 374. Vulnerability and Adaptation. 3 Hours S.
The course objective is to understand and analyze human adaptation to environmental change by focusing on disasters and climate change. Each semester, the course rotates topics ranging from oil spills, hurricanes, sea-level rise to infectious disease. It provides undergraduate students with research experience and service learning, and offers opportunities for certificates through the Center for Undergraduate Research and the Center for Civic and Service Responsibility at KU. Students learn theories relevant to the case study, work in groups to generate research themes, conduct literature search and review, learn research methods, and write and present their work. LEC.

GEOG 377. Urban Geography. 3 Hours S.
This course explores the city from the multiple perspectives of its inhabitants. The cultural viewpoints of place, gender, age, and ethnicity are stressed. Traditional topics such as urban hierarchy, functions of the city, suburbanization, and ongoing changes in core and peripheral areas also receive attention. The distinctive landscapes of individual North American cities are emphasized, but examples also are drawn from throughout the world. LEC.

GEOG 379. Topics in Cultural Geography: ____. 1-3 Hours S.
An investigation of special topics in Cultural Geography. May include coursework under headings of culture theory, material culture, language, foodways, or religion. May be repeated if topic differs. LEC.

GEOG 390. Geography of the United States and Canada. 3 Hours S.
A study of the different physical, economic, and cultural settings in the United States and Canada which form the basis for the various forms of livelihood. Emphasis on the United States. (Same as AMS 390.) Prerequisite: An introductory geography course or background in the United States or Canadian history, social science, or culture or consent of instructor. LEC.

GEOG 395. Environmental Issues of: ____. 3 Hours S.
This regional geography course examines contemporary environmental issues of a particular region of the world based on the expertise of the professor. Course emphasis is on the interaction of natural, socio-economic, and cultural factors of development that give rise to environmental problems. Students learn how local, national, and international government and non-governmental stakeholders address environmental problems. Course may be repeated with different professors. LEC.

GEOG 396. East Asia. 3 Hours NW AE42/GE3H/GE3S / S/W.
This course is an introduction to the contemporary politics, economy, and culture of Korea, China, and Japan in the context of globalization. In addition to the discussion of individual countries, the course examines the cross-cutting themes such as international relations, cultural exchange, and economic development in the region of East Asia. LEC.

GEOG 397. Geography of Kansas and the Plains. 3 Hours S.
A study of the different physical, economic, and cultural settings in Kansas and the Plains that form the basis for various kinds of livelihood. LEC.

GEOG 399. Topics in Regional Studies: ____. 1-3 Hours S.
An investigation of special topics in Regional Studies. May include coursework related to a specific country or region. May be repeated if topic differs. LEC.

GEOG 451. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the Anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 451 and EVRN 451.) FLD.

GEOG 458. Geographical Information Systems: ____. 1-6 Hours N.
An introduction to the organization and components of geographic information systems and their software. Fundamental concepts and their implementation with applications to physical and human systems. LEC.

GEOG 490. Geographic Internship. 1-6 Hours AE61 / N.
Supervised practical experience. The student submits a proposal describing the internship prior to enrollment. Upon acceptance, regularly scheduled meetings with the advisor provide assistance, guidance and evaluation of progress in the professional experience. A written summary of the experience or outcomes of the research project are prepared independently by the student, a representative of the host agency, and the advisor. Total credit not to exceed six hours. Prerequisite: Fifteen hours of geography and permission of instructor. INT.

GEOG 498. Special Topics in Geography: ____. 1-5 Hours U.
Prerequisite: Fifteen hours of geography. IND.

GEOG 499. Honors Course in Geography. 2-3 Hours AE61 / U.
Open to students with nine hours of upper level credit in geography, an average of at least 3.5 in all geography courses, and an overall average of at least 3.25. Includes the preparation of an honors paper and its defense before a committee of at least two regular faculty members. IND.

GEOG 500. Senior Capstone in Geography. 3 Hours AE61 / N.
The capstone project provides students with a broad-based, interdisciplinary educational experience and allows them to integrate and synthesize the knowledge they have gained in their studies. The major goals of this course are to help students synthesize an integrated view of geography, advance steps toward career preparation, and develop networking and professional skills. The course will provide an overview of geography as a unified, coherent discipline with multiple perspectives, emphasize writing and analytical skills, introduce students to a major research project that integrates elements of physical and human geography, cultivate knowledge for future professional development, and introduce students to professional organizations. Students will gain experience applying and/or interviewing for professional positions and be introduced to multiple professional development and career services on campus. Graduate students may take this course by permission only.
Prerequisite: Nine hours in Geography and status as a senior major in the department; or permission of instructor. LEC.

**GEOG 512. Advanced Cartography and Geovisualization. 4 Hours N.**
This is an advanced computer-based scientific cartography course. It covers mapping techniques such as dasymetric mapping, multivariate mapping, cartogram and flow map, map animation, geovisual analytics, web and interactive mapping, and mapping from remotely sensed imagery. This course focuses on practical and hands-on experience. Students will learn theoretical concepts, principles, and design examples, and produce a cartographic portfolio of well-designed and professional maps. Prerequisite: GEOG 311 or equivalent; or consent of instructor. LEC.

**GEOG 516. Applied Multivariate Analysis in Geography. 3 Hours N.**
An introduction to the application of multivariate statistical analysis in geography. Techniques covered include univariate and multivariate analysis of variance, multiple regression, logistic regression, principle components analysis, and spatial regression. Practical applications of the techniques in a geographical research context are emphasized. Students will learn how to use statistical packages such as SPSS. Prerequisite: GEOG 316 or equivalent. LEC.

**GEOG 518. Geoinformatics Internship. 1-3 Hours.**
Real world experience with geospatial technologies is not only essential for understanding and using geospatial knowledge but also beneficial for students to start a career path in geospatial technologies. Approved internships are supervised development and applications of geospatial technologies in business, government, non-profit, educational or other related fields. They can involve field work, data collection, processing, and analysis. Internship supervisors must agree to mentor the student and to complete necessary evaluations within a timely manner. Prerequisite: GEOG 358 or consent of instructor. INT.

**GEOG 521. Microclimatology. 3 Hours N.**
A study of climatic environments near the earth-atmosphere interface. Consideration of rural climates in relation to agriculture and urban climates as influenced by air pollution and other factors. Emphasis is on physical processes in the lower atmosphere, distribution of atmospheric variables, the surface energy budget, and water balance. (Same as ATMO 521.) Prerequisite: ATMO 105 and MATH 125. LEC.

**GEOG 526. Remote Sensing of Environment I. 4 Hours N / LFE.**
Introduction to study of the environment through air photos and satellite imagery, including principles of remote sensing, interactions of electromagnetic energy with the atmosphere and earth's surface, aerial photography, satellite systems, and sensors (electro-optical, thermal, and radar). Emphasis in the latter part of the course is on such applications as global monitoring, land cover mapping, forestry, agriculture, and oceanography. Laboratory emphasizes visual interpretation of aerial photography and satellite imagery and an introduction to digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. (Same as EVRN 526.) Prerequisite: MATH 101 or equivalent. GEOG 358 recommended. LEC.

**GEOG 528. Spatial Databases. 3 Hours N.**
This course covers concepts in spatial databases and their relevance in geographic information systems (GIS) and spatial analysis. It introduces the fundamental theories of data management behind Geographic Information Systems and imparts hands-on experience with mainstream spatial database management systems (DBMS), standard query languages and necessary tools to query/transform geospatial data, and perform spatial and network analysis. The course provides more in-depth coverage on database-oriented approaches for GIS geospatial analysis. Prerequisite: GEOG 358; or instructor permission. LEC.

**GEOG 531. Topics in Physical Geography: _____ 1-3 Hours N.**
An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated, if topic differs. LEC.

**GEOG 532. Geoarchaeology. 3 Hours N.**
Application of the concepts and methods of the geosciences to interpretation of the archeological record. The course will focus primarily on the field aspects of geoarchaeology (e.g., stratigraphy, site formation processes, and landscape reconstruction), and to a lesser extent on the array of laboratory approaches available. (Same as ANTH 517.) Prerequisite: GEOG 104, ANTH 110, or ANTH 310. LEC.

**GEOG 535. Soil Geography. 4 Hours N / LFE.**
A broad study of the principles and properties of soils and their distribution on the landscape. Topics covered include: pedology, clay mineralogy, soil physics, soil chemistry, management of soils, soil biology, taxonomy, and soil geomorphology. Laboratory section and a field project are required. Not open to students who have taken GEOG 335 or EVRN 335. (Same as EVRN 535.) Prerequisite: GEOG 104 or GEOL 101 or consent of the instructor; BIOL 100 and CHEM 130 or CHEM 190 and CHEM 191 recommended. LEC.

**GEOG 538. Soil Chemistry. 3 Hours N / LFE.**
This course examines the chemical properties and processes of soils and methods of evaluation. Topics include solid and solution speciation, mineral solubility, soil colloidal behavior, ion exchange, surface complexation, soil salinity and sodicity, soil acidity, oxidation-reduction reactions, and kinetics of soil chemical processes. (Same as EVRN 538.) Prerequisite: GEOG 355 or GEOG 535 or EVRN 335 or EVRN 535, CHEM 135 or CHEM 195 and CHEM 196, MATH 125, or consent of the instructor. LEC.

**GEOG 540. Ecohydrology. 3 Hours N.**
Ecohydrology is the discipline that answers real world hydrologic and biologic questions through integrating knowledge from hydrology, ecology, atmospheric science and biogeochemistry. We focus on the key concepts, methodological approaches and analytical techniques utilized in ecohydrology to understand and quantify: plant water use, evolution of hydrologic properties, groundwater-surface water interactions, controls on landscape patterns, spatial and temporal patterns of soil moisture and nutrient concentrations, and vegetation competition. Students should leave the class having developed critical skills in: 1) reviewing scientific literature, 2) collecting environmental samples, 3) analyzing ecohydrologic data, 4) writing a scientific research paper, 5) working collaboratively and independently. (Same as EVRN 540.) Prerequisite: GEOG 104 or GEOL 101 or EVRN 363 or GEOG 336 or permission of instructor. LEC.

**GEOG 541. Geomorphology. 4 Hours N / LFE.**
A critical study of land forms in relation to tectonics, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEOL 541.) Prerequisite: GEOG 101 and GEOL 103, GEOG 104 and GEOG 105, or GEOL 103 and GEOL 304. LEC.

**GEOG 550. Environmental Issues in Africa. 3 Hours S.**
Acquaints students with the complexities of debates on environmental problems in Sub-Saharan Africa. Topics addressed may include deforestation, desert expansion, wildlife conservation, soil erosion, climate change, coral reef destruction, water resources development, mangrove preservation, the environmental effects of war, industrialization, and urbanization. Class presentations and projects synthesize the
perspectives of both human and physical geography. (Same as AAAS 551.) Prerequisite: GEOG 104 or permission of instructor. LEC.

GEOG 552. Topics in Urban/Economic Geography: _____, 1-3 Hours S.
An investigation of special topics in urban/economic geography. May include specific course work under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated. LEC.

GEOG 553. Geography of African Development. 3 Hours AE42/GE3H/GE3S / W.
Acquaints students with the values and social parameters of African agricultural and pastoral practice. Topics include customary land rights, African perspectives on the natural world, gender issues in African agriculture, and the urbanization of African cultures. The course also contrasts African views with those of Western development practitioners and donor agencies. Case studies from different countries are used to highlight the continent's regional differences. (Same as AAAS 553.) LEC.

GEOG 555. Seminar in Urban Geography. 3 Hours S.
This course is a survey of recent literature and conceptual advances within the broad domain of urban geography. It begins by examining a few classic works, and then explores several topics within urban political economy, including the urban division of labor and restructuring, changing modes of urban governance, suburbanization, gentrification, global cities, and gender and the city. It also delves briefly into the issue of urbanization in the developing world. (Same as GIST 555.) Prerequisite: Any upper division course in human geography or urban planning, LEC.

GEOG 556. Geography of the Energy Crisis. 3 Hours S.
A discussion and analysis of the basic facts and causes of energy problems on a national and world scale. Examines current production, consumption, efficiency, reserves, conservation, and other energy policy options, including adjustments that will affect consumer use, national politics, and strategic issues. Prerequisite: GEOG 102. LEC.

GEOG 558. Intermediate Geographical Information Systems. 4 Hours N / LFE.
An intermediate level course in geographic information science designed for advanced undergraduate and graduate level students who already have an introductory understanding of GIS. Emphasis will be placed on the application of spatial analytical techniques to geographical problem-solving. Topics include spatial data structures, interpolation techniques, terrain analysis, cost surfaces, and database management technique. Students will apply knowledge gained in lecture and reading to natural resource, urban, and scientific applications using state-of-the-art GIS software. Prerequisite: GEOG 358 or consent of instructor. LEC.

GEOG 560. GIS Application Programming. 3 Hours N.
This course teaches programming within Geographic Information Systems. Students learn how to customize GIS applications to automate data processing and spatial analysis through programming languages. GIS programming concepts and methods are introduced from the aspects of spatial data management and analysis covering both the vector and raster data models. Prerequisite: GEOG 558 and a course in programming languages. LEC.

GEOG 570. Geography of American Indians. 3 Hours NW AE42/GE3H/GE3S / S.
A survey of the culture and history of selected indigenous peoples of the Americas. Emphasis is placed on the environmental setting, the settlement and subsistence patterns, and the impact of European colonization. Discussion includes present-day ethnic and resource issues. LEC.

GEOG 571. Topics in Cultural Geography: _____, 1-3 Hours S.
An investigation of special topics in cultural geography. May include specific course work under the headings of cultural theory and methodology, material culture, foodways, religion, and similar topics. May be repeated, if topic differs. LEC.

GEOG 574. Exploring Oceania. 3 Hours S.
Acquaints students with the culture and history of Oceania including its settlement and the impacts of European and American colonialism on Australasia, Melanesia, Micronesia and Polynesia. Emphasis is placed on applying broad geographical concepts to this vast Oceanic region through the lenses of development, media and migration studies. Prerequisite: GEOG 102 or GEOG 103; or consent of instructor. LEC.

GEOG 576. Cultural Geography of the United States. 3 Hours S.
Distributions of major culture elements including folk architecture, religion, dialect, foodways, and political behavior are systematically studied from a predominately historical perspective. These discussions are followed by a survey of the major culture regions in America. Although not absolutely necessary, familiarity with concepts treated in any of the following courses would be helpful: AMS 100, AMS 110, ANTH 108, ANTH 308, GEOG 102, or GEOG 390. (Same as AMS 576.) LEC.

GEOG 577. Human Dimensions of Global Change. 3 Hours S.
This class introduces concepts such as coupled human and natural systems, social-ecological resilience, and sustainability science, examines people's responses to major climate, land, water, and coastal change, and discusses case studies. One hour of each seminar will be devoted to individual needs that address topical or methodological issues. Class requirements include presentations, biweekly papers, and a term paper. (Same as GIST 577.) Prerequisite: One of the following: GEOG 100, GEOG 104, GEOG 374, or an Environmental Studies introductory course. LEC.

GEOG 582. Geopolitics and Genocide. 2-3 Hours S.
Explores the inherently geographical and geopolitical nature of genocide and related mass violence and introduces an overarching concept, territorial cleansing, that foregrounds the spatial and territorial nature of these events. Detailed studies of cases at a range of scales and locales provide the major context for critical examination and comparison of territorial cleansing concepts. Students enrolling for 3 credits will prepare and present a substantial independent research paper. (Same as GIST 582.) Prerequisite: GEOG 102 or GEOG 103; or ANTH 108 or ANTH 109; or permission of instructor. LEC.

GEOG 583. Migration, Diasporas and Development. 3 Hours S.
This course introduces students to key concepts in global migration and its implications on development in migrant sending states particularly those on the African continent. It will explore the various migration patterns from Africa (e.g. migration between North Africa and Europe in the aftermath of the Arab Spring), South-South migration, the 'brain drain' of skilled professionals and its implications for development, and the role of diasporas in development. The course will also assess the integration of migrants in major migrant destination regions. Finally, the course will provide students with an opportunity to critically examine the relationship between migration and development in a particular national context of their choice. (Same as AAAS 583.) Prerequisite: GEOG 102 or consent of instructor. LEC.

GEOG 586. Sustainable Food Systems and Food Security in the Global South. 3 Hours S.
The course adopts an interdisciplinary approach to study food systems and food security in the Global South. It incorporates multiple perspectives ranging from the local to the global level to explore the cultural, ecological/environmental, economic, sociopolitical, and ethical dimensions connected to the global food system. It also examines several
dimensions of food insecurity. Students will also examine the impact of food insecurity on health as well as racial and economic disparities in access to food. The course will also examine the research and conceptualization of food systems and analyze concepts such as “food deserts,” “food oases,” “food swamps,” and “food grasslands.” We will examine food production and food acquisition strategies in low-income areas. Case studies will be drawn on experiences from diverse regions particularly Southern Africa even though other regions such as Latin America and Southeast Asia will be considered. Prerequisite: GEOG 102 or consent of instructor. LEC.

GEOG 590. Understanding Central Asia. 3 Hours NW AE42 / S/W.
An intensive, multidisciplinary survey of Central Asia, focusing on the former Soviet republics-Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, Uzbekistan-with additional coverage of neighboring regions (the Caucasus and the Caspian basin, Afghanistan, and western China). The course addresses the history of the region (from the Silk Road to Soviet rule), geography, religion, and the building of post-Soviet states and societies. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in REES 710. (Same as REES 510.) Prerequisite: One previous interdisciplinary course or the instructor’s permission. LEC.

GEOG 591. Geography of Latin America. 3 Hours SC AE42/GE3S / S/W.
A study of the different physical, economic, and cultural settings in Latin America which form the basis for the various forms of livelihood. LEC.

GEOG 592. Middle American Geography. 3 Hours S.
This regional study of the natural environments and cultural-historical backgrounds of Mexico, Central America, and the Caribbean details the physical and historical processes that have shaped the cultural landscape. LEC.

GEOG 597. Geography of Brazil. 3 Hours S.
Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary and cultural geography of Brazil. Course also includes a survey of Brazil's South American neighbors. LEC.

GEOG 601. Indigenous Peoples of the World. 3 Hours S.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of external economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women's rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law are used. (Same as GIST 601 and ISP 601.) Prerequisite: Permission of instructor. LEC.

GEOG 635. Soil Physics. 3 Hours N.
Provides theoretical and practical foundations for understanding physical properties and processes of variably-saturated porous media. Focus is on the transport, retention, and transformation of water, heat, gas, and solutes through the soil. We examine modern vadose zone measurement methods, analytical tools, and numerical models for data collection and interpretation. (Same as EVRN 635.) Prerequisite: GEOG 335 or EVRN 335; or GEOG 535 or EVRN 535, and MATH 125, PHSX 114; or consent of instructor. LEC.

GEOG 648. Location Modeling. 3 Hours N.
This course provides an overview of advanced location analysis and modeling in the context of GIS. Introduces students to principles of location analysis, methods for making strategic location decisions as well as existing classic location problems. Demonstrates analytical approaches by which location problems can be solved using mathematical

programming, GIS and other optimization software. This course is a specialized course with an emphasis on the spatial analysis function of Geographic Information Systems, which covers many concrete applications of GIS geospatial analysis in urban planning, transportation, and service systems planning, ranging from firefighting stations to forestry management to transportation facilities. Prerequisite: GEOG 358; or instructor permission. LEC.

GEOG 658. Topics in Geospatial Technologies: ______. 1-6 Hours / LFE.
An investigation of special topics in geoinformatics. May include specific coursework under the headings of methodology, basic research, thematic or regional applications, geographic information systems (GIS), Global Positioning System (GPS), and geostatistics. May be repeated if topic differs. Prerequisite: GEOG 111 or GEOG 358 or consent of instructor. LEC.

GEOG 711. Advanced Topics in Geovisualization: ______. 4 Hours.
This course is an investigation of special topics in cartography and geovisualization. It takes the fundamentals learned in GEOG 311 and GEOG 512 and expands them in several aspects such as techniques and applications of web mapping, interactive web maps, virtual environments, volunteered geographic information (VGI), and uncertainty visualization. Prerequisite: GEOG 311 and GEOG 512. LEC.

GEOG 716. Advanced Geostatistics. 3 Hours.
An introduction to the practical application of advanced geospatial statistical techniques. Potential topics include: spatial regression, interpolation, clustering, and advanced nonparametric statistics. Knowledge of a statistical package and GIS is assumed. Prerequisite: GEOG 516 or equivalent and GEOG 358 or equivalent. LEC.

GEOG 719. Development of Geographic Thought. 2-3 Hours.
Critical analysis of the growth of geographic thought from antiquity to the present: emphasis on structure of modern geography. Prerequisite: Twenty hours of geography or consent of instructor. LEC.

GEOG 726. Remote Sensing of Environment II. 4 Hours.
An overview of techniques for computer analysis of digital data from earth orbiting satellites for environmental applications. Topics covered include: data formats, image enhancements and analysis, classification, thematic mapping, and environmental change detection. The laboratory exercises provide hands-on experience in computer digital image processing in the department's NASA Earth Science Remote Sensing Laboratory. Prerequisite: Introductory statistics and GEOG 526 or equivalent. LEC.

GEOG 731. Topics in Physical Geography: ______. 1-3 Hours.
An investigation of special topics in physical geography. May include specific course work under the headings of geomorphology, climatology, soils, vegetation, quaternary, paleoenvironments, hydrology, etc. May be repeated. RSH.

GEOG 735. Soil Geomorphology. 3 Hours.
Examines the interaction of pedogenic and geomorphic processes during the Quaternary with an emphasis on strategies and methodologies employed in soil-geomorphic studies. Group research projects incorporating field data collection and analyses are required. Prerequisite: GEOG 335 or GEOG 535 or consent of the instructor. LEC.

GEOG 752. Topics in Urban/Economic Geography: ______. 1-3 Hours.
An investigation of special topics in urban/economic geography. May include specific coursework under the headings of energy, economic development, international trade, environmental perception, housing, transportation, and migration. May be repeated. LEC.
GEOG 758. Geographic Information Science. 3 Hours.
This course integrates topics in geographical information science (GISci) with spatial analytical techniques to solve spatial problems. Focuses on the most current research in GISci and its relevance to the environmental sciences, natural resource management, and spatial decision-making. Students are expected to apply the concepts and techniques learned in this class to their own research projects. Prerequisite: GEOG 316 and GEOG 558, or consent of instructor. LEC.

GEOG 759. Ecosystems Stewardship. 3 Hours.
This course sits at the crossroads between the discipline of ecology and the practice of stewardship, specifically the Indigenous Knowledge that is born from these landscapes over millennia in a place. Students will interact with research that establishes scientific foundations as a method to engage environmental problems in the anthropocene. The concept of stewardship is a core tenet of this course, students will engage with many approaches of stewardship, centering primarily on humans as a part of, not apart from, the environment. This course is offered at the 400 and 700 level with additional assignments at the 700 level. Not open to students with credit in EVRN 451 or EVRN 751, GEOG 451 or GEOG 759, BIOL 451 or BIOL 759. (Same as BIOL 759 and EVRN 751.) FLD.

GEOG 771. Topics in Cultural Geography: ______. 1-3 Hours.
An investigation of special topics in cultural geography. May include specific course methodology, material culture, foodways, religion, and similar topics. May be repeated. LEC.

GEOG 781. Environmental Geopolitics. 3 Hours.
This course examines how human relationships with the biophysical world are politicalized. Examines key contributions to debates surrounding environmental security, resource conflicts, and related issues, as well as geopolitical assumptions on which these debates build. This course is a more advanced and rigorous version of the undergraduate version of this course. It is not open to students who have taken or are enrolled in GEOG 371 or EVRN 371, Environmental Geopolitics. (Same as GIST 781.) LEC.

GEOG 791. Latin American Regions: ______. 3 Hours.
A description and analysis of the principal sources of geographic information pertaining to portions or all of Latin America. Prerequisite: GEOG 591 or concurrent auditing of GEOG 591, or consent of instructor. LEC.

GEOG 801. Indigenous Peoples of the World. 3 Hours.
A survey of the varied responses of global Indigenous peoples as a result of the imposition of externally-dominated economic and political systems. An overview of diverse, thematic issues such as land rights, economic development, resources and cultural patrimony, languages, knowledge systems, and women’s rights from the perspectives of Indigenous societies around the world. Detailed studies of Indigenous peoples seeking recognition and protection under international law will be included. The course is offered at the 600 and 800 level, with additional assignments at the 800 level. (Same as ISP 801.) LEC.

GEOG 805. Perspectives in Geography. 2 Hours.
This course provides background on the discipline of geography and how it is practiced by the faculty in the department. It provides a foundation of knowledge of geography’s role within the human and physical sciences as well as the humanities. Students will gain a critical perspective onto the breadth of geography, including the ways in which geographers view the world through the lenses of place, space, and scale and the debates and approaches within the changing landscape of geographic inquiry. LEC.

GEOG 806. Proposal Writing and Research Design. 2 Hours.
The course is designed to assist graduate students in developing their research project, including refining research questions, creating a literature review, and defining appropriate methods to aid in successfully answering their questions. Learning outcomes include the production of an individual draft research proposal based upon the student’s research design. LEC.

GEOG 875. Qualitative Research Methods. 3 Hours.
This course provides background on qualitative research methods used in human geography. Students will gain a critical perspective into relevant issues of qualitative methods with specific regard to ethical concerns related to human subjects research within the social sciences and humanities and the debates and approaches within the changing landscapes of qualitative methods. Students will have the opportunity to practice these techniques and strategies in a group research project. Prerequisite: GEOG 805 or consent of instructor. LEC.

GEOG 890. Geographic Internship. 1-6 Hours.
Supervised professional experience. The student submits to the program committee a proposal describing the internship prior to enrollment. Upon acceptance, regularly scheduled meetings with the advisor provide assistance, guidance and evaluation of progress in the professional experience. A written summary of the experience or outcomes of the research project are prepared independently by the student, a representative of the host agency, and the advisor. Total credit not to exceed six hours. Prerequisite: Twelve hours of graduate level geography courses and consent of program committee. INT.

GEOG 896. Readings in Geography. 1-4 Hours.
RSH.

GEOG 899. Master’s Thesis. 1-10 Hours.
Thesis credit. Graded on a satisfactory progress/limited progress/no progress basis. THE.

GEOG 911. Seminar in Geovisualization. 3 Hours.
Students will explore current opportunities and challenges in geovisualization. This research seminar is devoted to topics of geospatial technology, cartographic visualization and communication, the history of cartography, and new perspectives and methodologies in geovisualization. Prerequisite: GEOG 311 and GEOG 512. LEC.

GEOG 980. Seminar in Geography: ______. 1-3 Hours.
LEC.

GEOG 990. Seminar in Regional Geography: ______. 1-3 Hours.
(Selected areas to be specified.) LEC.

GEOG 998. Research in Geography. 1-5 Hours.
RSH.

GEOG 999. Doctoral Dissertation. 1-10 Hours.
Dissertation credit. Graded on a satisfactory progress/limited progress/no progress basis. THE.

Bachelor of Arts and Bachelor of General Studies in Geography

Why study geography?

The BA and BGS degrees each offer a different educational experience and students should carefully consider which degree is most appropriate to meet their educational goals.

Bachelor of Arts (BA)

The Bachelor of Arts in Geography provides a broad liberal arts education and touches on all aspects of Geography. Study includes a minimum of 33 credit hours in Geography: a core of eighteen hours in regional, physical, human, and statistical geography plus another fifteen hours
of electives. Students need to meet the KU Core requirements and/or requirements set by the College of Liberal Arts and Sciences including a non-English language. Students taking the B.A. degrees should note that most Geography graduate programs require a statistics course, e.g., GEOG 316, and we highly recommend a basic course in GIS, e.g., GEOG 358.

Bachelor of General Studies (BGS)

The Bachelor of General Studies degree allows for more specialization in a student’s main area of interest while still providing a solid foundation. There are fewer principal courses required, but students must complete a concentration (three upper division courses) or a minor in a second field of study (usually 18 hours). There is no non-English language requirement for the BGS. Please note that most geography graduate programs require a statistics course, e.g., GEOG 316, and we highly recommend a basic course in GIS, e.g., GEOG 358.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Geography Programs

The B.A., B.G.S., and B.S. in geography provide general liberal arts enrichment, preparation for graduate work, and training for careers in geography and related fields. Geography may be combined with another program as a double major, or courses in another area may simply be added to those in geography.

First- and Second-Year Preparation

Students should begin the major by meeting the core requirements and preparing for major courses.

Requirements for the B.A. or B.G.S. Major

Geography Required Elective Hours

8-10 additional credit hours selected from any GEOG 177: First Year Seminar course, and from any 300-600 level GEOG classes for a total of at least 33 credit hours in major courses.

Major Hours & Major GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 33 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

A sample 4-year plan for the BA degree in Geography can be found here: Geography (p. 1519), or by using the left-side navigation.
Sample 4-year plans for the BGS degree in Geography can be found here: Geography (p. 1520), or by using the left-side navigation.

**Departmental Honors in Geography**

To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in geography with a grade-point average of 3.5 in all geography courses. In addition to outstanding work in geography, the program requires GEOG 499, an independent study course consisting of an honors paper.

The student presents the results of this paper in an oral examination to a committee of at least 2 faculty members, normally from the geography department, chaired by the GEOG 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 grade-point average.

**BA in Geography**

Below is a sample 4-year plan for students pursuing the BA in Geography. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.
2. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.
3. Geography majors must complete five courses (15 hours) at the 200-500 level, from at least 3 of the following 4 groups: Regional Studies, Physical Studies, Geographic Information Science, Human Studies.
4. GEOG 316 is a fall only course.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
BGS in Geography

Below is a sample 4-year plan for students pursuing the BGS in Geography. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses/)

BGS Career Prep Course                          3 Elective 300+ (Total Hours) 3
Elective 300+ (Total Hours)                     3 Elective 300+ (Total Hours) 3
Elective 300+ (Total Hours)                     3 Elective 300+ (Total Hours) 2

Total Hours 120

1. MATH 101 or higher recommended as some elective options have a MATH pre-requisite.
2. Please note that the Bachelor of General Studies degree requires completion of the requirements of a single BGS major AND a secondary field of academic study (a second major, co-major, or minor). This sample plan is based on the completion of a minor. If a second major is selected instead, elective hours on plan will be needed for these additional major requirements.
3. Geography majors must complete five courses (15 hours) at the 200-500 level, from at least 3 of the following 4 groups: Regional Studies, Physical Studies, Geographic Information Science, Human Studies.

* All major required Geography courses and most Geography elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Bachelor of Science in Geography

Why study geography?

A much more specialized degree, the Bachelor of Science offers concentrated specializations in one of two aspects of Geography: physical or geographic information science (GIS). The BS has fewer general education requirements and require solid backgrounds in mathematics and basic science.

There are two B.S. degree options:

Physical Geography Option
Students prepare for a career in environmental assessment and problem solving. Basic requirements include preparation in chemistry, biology, physics and mathematics. Advanced course work includes the study of the processes that affect the physical environment (soils, vegetation, climate and geomorphology), and techniques for performing statistical and computational analysis of these processes (statistics, GIS and remote sensing).

Geographical Information and Analysis Option
Students prepare for a career in the area of geographic information science and problem solving using a variety of spatial analysis techniques. Basic requirements include preparation in mathematics, science and computer science. Advanced course work includes work in cartography, GIS, remote sensing, spatial statistics, spatial analysis and data presentation and visualization. In addition, students are expected to
take some coursework in one of the other areas of geography (physical, human, and regional).

Beyond the basic requirements listed under each option, both Geography B.S. degrees have a common set of general education requirements, including courses in English, mathematics, communications, humanities, social sciences and a history or philosophy of science course. Some courses are shared by the two options; however, different course selection menus apply for the remaining requirements.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Geography Programs**

The B.A., B.G.S., and B.S. in geography provide general liberal arts enrichment, preparation for graduate work, and training for careers in geography and related fields. Geography may be combined with another program as a double major, or courses in another area may simply be added to those in geography.

**First- and Second-Year Preparation**

Students should begin the major by meeting the core requirements and preparing for major courses.

**Requirements for the B.S. Degree**

- Hours
- Select one of the following or consult undergraduate committee for approval of alternatives:
  - HIST 103 Environment and History
  - HIST 305 The Scientific Revolution
  - HIST 347 Environmental History of North America
  - HIST 407 History of Science in the United States
  - PHIL 370 Moral Issues in Medicine
  - PHIL 375 Moral Issues in Computer Technology
  - PHIL 380 Environmental Ethics
  - PHIL 620 Philosophy of Natural Science
  - PHIL 622 Philosophy of Social Science

- **Humanities - Understanding the Human Condition.** Satisfied by completing 2 principal courses in the humanities. Approved courses may be searched for availability through the Kyous portal.

- **Social and Behavioral Sciences - Understanding Society and Behavior.** Satisfied by completing 2 principal courses in the social sciences. Approved courses may be searched for availability through the Kyous portal.

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

- **Major Hours**
  - Satisfied by 44 hours of major courses.

- **Major Hours in Residence**
  - Satisfied by a minimum of 15 hours of KU resident credit in the major.

- **Major Junior/Senior Hours**
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

</table>
GEOG 104  Introduction to Physical Geography
& GEOG 105 and Introductory Laboratory in Physical Geography
GEOG 140  Global Environment I: The Discovery of Environmental Change

Maps and Mapping or Computers, Maps, and Geographical Analysis. Satisfied by:
GEOG 111  Mapping Our Changing World
or GEOG 355  Introduction to Geographic Information Systems

Principles of Human Geography. Satisfied by:
GEOG 102  People, Place, and Society
or GEOG 103  People, Place, and Society, Honors

2 GEOG 300+ courses. One in Physical and one in Human and/or Regional Geography

Core Geographic Information Science Courses 21
Six courses, at least one from each category:
Cartography and Visualization. Satisfied by:
GEOG 311  Introductory Cartography and Geovisualization
GEOG 512  Advanced Cartography and Geovisualization

Geographical Information Systems. Satisfied by:
GEOG 558  Intermediate Geographical Information Systems
GEOG 560  GIS Application Programming
GEOG 758  Geographic Information Science

Remote Sensing. Satisfied by:
GEOG 526  Remote Sensing of Environment I
GEOG 726  Remote Sensing of Environment II

Statistics. Satisfied by:
GEOG 316  Methods of Analyzing Geographical Data
GEOG 516  Applied Multivariate Analysis in Geography
GEOG 716  Advanced Geostatistics

Senior Capstone in Geography 3
Satisfied by:
GEOG 500  Senior Capstone in Geography

Geographic Information Science Electives 6
Two other courses from geographic information science

Allied Field
Three courses and nine hours minimum in one field (or a minor) (area studies, atmospheric science, biology, computer science, design, environmental studies, engineering, geology, psychology, urban planning).

Electives 14-23 credit hours of any university courses. 14-23

Geography Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 48 hours of major courses.

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior (300+) Hours
Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

Major Junior/Senior (300+) Graduation GPA
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Departmental Honors in Geography

To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in geography with a grade-point average of 3.5 in all geography courses. In addition to outstanding work in geography, the program requires GEOG 499, an independent study course consisting of an honors paper.

The student presents the results of this paper in an oral examination to a committee of at least 2 faculty members, normally from the geography department, chaired by the GEOG 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 grade-point average.

Bachelor of Science in Atmospheric Science

The Bachelor of Science in Atmospheric Science (B.S.) is designed to meet the recommendations of the American Meteorological Society for a bachelor’s degree in meteorology/atmospheric science. There are four options, each of which meet these recommendations.

1. General Option

This option is for students who want a broad background in atmospheric science. It is also the most suitable option for those who are aiming at a career in weather forecasting. It includes a third semester of synoptic meteorology as well as an air pollution course.

2. Air Pollution Option

Students prepare for a career emphasizing environmental aspects of meteorology. This option includes an additional semester of chemistry as well as environmental studies.

3. Hydrometeorology Option

Students prepare for a career involving the interface between meteorology and hydrology. These studies have important applications to flash floods, droughts and water supply. This option includes additional courses on fluid flow and hydrology from the School of Engineering.

4. News Media Option

This option is for students who wish to enter careers whose main function is to provide information to the general public. It requires additional courses from the School of Journalism.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the...
Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Advising

Students who may decide to major in atmospheric science should confer early with a departmental representative about the selection of courses.

Requirements for the B.S. Degree in Atmospheric Science

4 specialized options are available for students who plan professional careers in meteorology or atmospheric science. The general meteorology option satisfies all the traditional professional meteorology requirements for employment with the National Weather Service, airlines, or other agencies. The air pollution meteorology option meets the need for trained specialists. The hydrometeorology option may lead to a career as a meteorologist in one of the many water-related activities in private and governmental agencies. The news media forecasting option can lead to a career forecasting the weather on television or radio. The B.S. degree with any of these specialties also prepares students to begin graduate programs in meteorology or atmospheric science.

or CHEM 190 & CHEM 191 and Foundations of Chemistry I Laboratory, Honors

Vector Calculus. Satisfied by the following:

MATH 127 Calculus III
or MATH 147 Calculus III, Honors

Elementary Linear Algebra. Satisfied by the following:

MATH 290 Elementary Linear Algebra
or MATH 291 Elementary Linear Algebra, Honors

Applied Differential Equation. Satisfied by the following:

MATH 320 Elementary Differential Equations
or MATH 220 Applied Differential Equations

Statistics. Satisfied by the following:

MATH 526 Applied Mathematical Statistics I
or DSCI 202

Numerical Methods. Satisfied by the following:

MATH 581 Numerical Methods

GEOG 358 Introduction to Geographic Information Systems

Atmospheric Science Core Knowledge and Skills

Majors must complete all of the following:

Introductory Meteorology. Satisfied by:

ATMO 105 Introductory Meteorology

Climate and Climate Change. Satisfied by:

ATMO/GEOG 321 Climate and Climate Change

Weather Forecasting. Satisfied by:

ATMO 505 Weather Forecasting

Microclimatology. Satisfied by:

ATMO/GEOG 521 Microclimatology

Synoptic Meteorology. Satisfied by:

ATMO 630 Synoptic Meteorology

Dynamic Meteorology. Satisfied by:

ATMO 640 Dynamic Meteorology

Remote Sensing. Satisfied by:

ATMO 642 Remote Sensing

Advanced Dynamic Meteorology. Satisfied by:

ATMO 660 Advanced Dynamic Meteorology

Physical Meteorology. Satisfied by:

ATMO 680 Physical Meteorology

Seminar for Seniors. Satisfied by:

ATMO 697 Seminar for Seniors

Total Hours 77-80

Meteorology Option

Students selecting this major must select one of the following options:

General Meteorology Option

This option satisfies all the traditional professional meteorology requirements for employment with the National Weather Service, airlines, or other agencies.

Code Title Hours
Air Pollution Meteorology. Satisfied by:
ATMO 525 Air Pollution Meteorology 3

Advanced Synoptic Meteorology. Satisfied by:
ATMO 650 Advanced Synoptic Meteorology 3

Air Pollution Meteorology Option

This option meets the need for trained specialists.

Code Title Hours
Air Pollution Meteorology. Satisfied by:
ATMO 525 Air Pollution Meteorology 3

Foundations of Chemistry II. Satisfied by:
CHEM 135 General Chemistry II 5

or CHEM 195 & CHEM 196 Foundations of Chemistry II Laboratory, Honors

Introduction to Environmental Engineering and Science. Satisfied by:
CE 477 Introduction to Environmental Engineering and Science 3

Hydrometeorology Option

This option may lead to a career as a meteorologist in one of the many water-related activities in private and governmental agencies.

Code Title Hours
Air Pollution Meteorology. Satisfied by:
ATMO 525 Air Pollution Meteorology 3

Operational Forecasting. Satisfied by:
ATMO 605 Operational Forecasting 2

Statics and Dynamics. Satisfied by:
CE 301 Fluid Mechanics 5

or CE 330 Fluid Mechanics 3

Hydrology. Satisfied by:
CE 455 Hydrology 3

News Media Forecasting Option

This option can lead to a career forecasting the weather on television or radio.

Code Title Hours
Operational Forecasting. Satisfied by:
ATMO 605 Operational Forecasting 2

Advanced Synoptic Meteorology. Satisfied by:
ATMO 650 Advanced Synoptic Meteorology 3

Infomania: Information Management. Satisfied by:
JOUR 302 Information Exploration 3

Writing for Media. Satisfied by:
JOUR 304 Media Writing for Audiences 3

Multimedia Reporting. Satisfied by:
JOUR 415 Multimedia Reporting 3

Major Hours & Major GPA

While completing all required courses (above), majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours
Satisfied by 33 hours of major courses.

**Major Hours in Residence**
Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior (300+) Hours**
Satisfied by a minimum of 30 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior (300+) Graduation GPA**
Satisfied by a minimum of 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Departmental Honors in Atmospheric Science

To be accepted as a candidate for honors, an undergraduate major must have completed at least 9 hours of upper-division credit in atmospheric science with a grade-point average of 3.5 in all atmospheric science courses. In addition, the program requires ATMO 499, an independent study course consisting of the creation of an honors paper. The student presents the results of this paper in an oral examination to a committee of a minimum of 2 faculty members, normally from the geography department, and chaired by the ATMO 499 supervisor. To graduate with honors, the student must complete the paper and the examination and maintain the 3.5 grade-point average.

### BS in Geography with concentration in Geographical Information & Analysis

Below is a sample 4-year plan for students pursuing the BS in Geography with a concentration in Geographical Information & Analysis. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

#### Freshman

<table>
<thead>

</tbody>
</table>

**Total Hours 120**

¹ Geography BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.

² Geography BS majors are required to take a course in History or Philosophy of Science. A list of possible courses can be found under the Degree Requirements tab.

³ All major required Geography courses and most Geography elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
Six Geographic Information Science Core courses are required with at least one from each of the following categories: Cartography and Visualization, Geographical Information Systems, Remote Sensing, and Statistics. A list of courses for each can be found under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

**BS in Geography with concentration in Physical Geography**

Below is a sample 4-year plan for students pursuing the BS in Geography with a concentration in Physical Geography. To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

### Total Hours 120

1. Geography BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
2. A list of possible courses for History or Philosophy of Science can be found under the Degree Requirements tab.
3. All major required Geography courses and most Geography elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
4. Geography BS with a concentration in Physical Geography requires 9.0 hours of elective course work chosen from courses in the following categories: Ecohydrology, Climate, Geomorphology, Soil Geography, and other advanced courses in Physical Geography. A list of possible courses can found on the Degree Requirements tab.
5. GEOG 526 is recommended.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Minor in Geography

#### Why study geography?

We offer an undergraduate minor with two options, which augment other fields of study and broaden career opportunities: General Geography or Geographical Information Science (GIS). A minor in Atmospheric Science is also available from the Department. You should carefully consider which minor best meets your academic goals before choosing one.

**Minor in Geography - General Geography Option:**

Students take 18 hours of Geography courses with at least 12 hours from courses numbered 300 or above. Students must have a minimum grade point average of 2.0 in courses taken for the minor.

**Minor in Geography - Geographic Information Science (GIS) Option:**

The minor requires GEOG 111, GEOG 316, and GEOG 358. The minor has three additional courses from the geographic information science group (at 300 or above), and a minimum grade point average of 2.0 in the courses taken for the minor.

### Requirements for the Minor in Geography

The department offers 2 minor options. The first is a general minor in geography. The second is specifically designed to give students a background in geoinformatics. Students should carefully consider which minor best meets their academic goals before choosing one.
Geography General Option

Students selecting this minor must complete 6 GEOG courses (18 hours), 12 hours of which must be taken at the 300 level or above.

Geography Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 21 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Minor in Atmospheric Science

Why study atmospheric science?

The minor in Atmospheric Science (http://geog.ku.edu/overview-8/) augments other fields of study and broadens career opportunities. The minor requires ATMO 105, ATMO 321, and ATMO 505 plus three courses from the following: ATMO 521, ATMO 525, ATMO 630, ATMO 640, ATMO 642, or ATMO 680. Students must have a minimum grade point average of 2.0 in courses taken for the minor.

</table>

Atmospheric Science Minor Course Requirements

Introductory Meteorology. Satisfied by the following:

- ATMO 105 Introductory Meteorology
- ATMO 321 Climate and Climate Change
- ATMO 505 Weather Forecasting

Climate and Climate Change. Satisfied by the following:

- ATMO 521 Microclimatology
- ATMO 525 Air Pollution Meteorology
- ATMO 630 Synoptic Meteorology
- ATMO 640 Dynamic Meteorology
- ATMO 642 Remote Sensing
- ATMO 680 Physical Meteorology

Minor Hours & Minor GPA

While completing all required courses, minors must also meet each of the following hour and GPA minimum standards:

**Minor Hours**

Satisfied by 20 hours of minor courses.

**Minor Hours in Residence**

Satisfied by a minimum of 9 hours of KU resident credit in the minor.

**Minor Junior/Senior (300+) Hours**

Satisfied by a minimum of 15 hours from junior/senior courses (300+) in the minor.

**Minor Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in all departmental courses in the minor. GPA calculations include all departmental courses in the field of study including F’s and repeated courses. See the Semester/ Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Undergraduate Certificate in Climate and Climate Change

Climate Change is an increasingly important societal issue since it will impact how we secure water, energy, and food in the near future. The primary cause of current trends in global climate are emissions of carbon dioxide and other greenhouse gases into the atmosphere since the start of the Industrial Revolution and the rise of fossil fuels as primary energy sources. In 2013 the Intergovernmental Panel on Climate Change concluded that "the human influence on the climate system is clear. This is evident from the increasing greenhouse gas concentrations in the atmosphere, positive radiative forcing, observed warming, and understanding of the climate system."

The potential impacts from a changing climate are widespread and range from a rise in global sea level as ocean waters are heated and ice stored on land is transferred to the oceans at increasing rates; increasing surface temperatures; more widespread drought events of longer duration; and the possibility of more frequent and more intense hurricanes making landfall in the region surrounding the Gulf of Mexico. To cope with these consequences, and to build a more resilient society and infrastructure, there is an urgent need for an informed citizenry. It is critical to educate future decision makers who can influence national and international policies and adopt a more rational approach to dealing with impacts of climate change.

General requirements:

Students must maintain a 2.0 GPA in courses taken in the certificate program and maintain good standing in any University program of study for which they are enrolled. Students are encouraged to meet with the certificate Director to discuss progress in the program.

Course requirements:

To complete the certificate, 12-13 credit hours must be completed. Among them 6 credit hours are from two required core courses and the additional 6-7 credit hours are from electives.

Undergraduate Certificate in Geographic Information Science

"Everything is related to everything else, but near things are more related than distant things," said renowned geographer and cartographer Waldo Tobler. A certificate in Geographic Information Science (GIS) capitalizes on this by blending field equipment, computer hardware and software, data, and people to capture, manage, display, analyze, and distribute all forms of geographically referenced information. Through the application of GIS and its principles, you can perform quantitative analyses to make informed decisions and provide logistical support in virtually any field. Effective use of GIS has evolved into a requisite skill for most agencies in both the public and private sectors, and provides a transformative tool to address academic research. Students from such diverse disciplines as geography, atmospheric science, biology, engineering, economics, urban planning, landscape architecture, and sociology benefit from applying GIS and related technologies such as global positioning systems (GPS), remote sensing, spatial statistics, and computer programming to use location-based data. GIS has found wide applications in the sciences and engineering, as well as in business, government, military, and consumer areas. The director of the certificate program is available to meet with each student and design a curriculum that best meets your interests, goals, and academic level.

The certificate program is designed to provide undergraduate students with the knowledge and skills necessary to succeed in the rapidly expanding field of geographic information science (GIScience) or apply GIScience concepts in their own fields of study. A certificate in GIS shows employers you have the critical skills necessary to perform in public, private, and academic settings.

Students interested in pursuing the certificate should review the requirements and meet with Undergraduate Academic Advisor Lisa Hamblen at lhamblen@ku.edu, or the GIS program director, Professor Xingong Li at lixi@ku.edu. The University of Kansas is a member of the University Consortium for Geographic Information Science (UCGIS).

General requirements:

Students must maintain a 2.5 GPA in courses taken in the certificate program. A student pursuing the certificate can take no longer than 7 years to pursue the certificate unless a leave of absence or other extenuating circumstances are present.

Course requirements:

To complete the certificate, 14 credit hours must be completed within 7 academic years. Among them 8 credit hours are from two required core GIS courses and additional 6 credit hours are from electives. Only one course outside of the department can be included in these 14 credit hours.

Courses may be waived in consultation with the Director if the student can demonstrate satisfactory completion of similar coursework. If transfer courses are to be used to meet program requirements, the student must furnish the program director with a certified university transcript and, in some instances, a copy of the class syllabus. A maximum of 6 transfer credit hours may be used to meet program requirements.
Master of Arts in Geography

Why study geography?
The MA program develops a concentration in preparation for a career or further study. The student takes courses in several areas of the discipline, as well as at least three courses in an acceptable concentration. Our faculty are integral to graduate studies and have expertise in Human and Cultural Studies with a particular emphasis on Place, Economic Geography, Health and Diaspora, Environmental Policy, Borders and Border Conflicts, and more. Learn more about our faculty (http://geog.ku.edu/faculty/) on our website.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Graduate Admission
Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees. Applicants should have a minimum GPA of 3.0 on a 4.0 scale. Applicants with a GPA of less than 3.0 may be considered for admission on a probationary or provisional status.

The following items must be received to complete the application file:

Items 1 through 5 can be submitted on-line.

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply).
2. A current resume/CV.
3. A Statement of Interest and Goals. This is included in the on-line application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geography or atmospheric science and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography & Atmospheric Science helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.
4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant's possession as official.
5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

ADDITIONAL REQUIREMENTS
Non-native speakers of English must meet English proficiency requirements as described here.

NON-DEGREE SEEKING STUDENTS
Master of Urban Planning and Master of Arts in Geography

Joint Degree for Master of Arts in Geography and Master of Urban Planning

Urban planning is a professional field that addresses the health, welfare and sustainability of our cities, towns and regions. Planners are problem-solvers. They deal with both short- and long-range planning projects at scales from small to large. Planners seek to enhance overall quality of life by addressing aspects of communities such as housing, land use, transportation, and responsible development that preserves the natural environment. KU's Master of Urban Planning (M.U.P.) is an accredited, professional degree that prepares students to excel in planning practice. It is the normal academic qualification for planning and planning-related positions. Our graduates pursue careers in the public, private and not-for-profit sectors.

The MA in Geography program develops a concentration in preparation for a career or further study. The student takes courses in several areas of the discipline. Our faculty are integral to graduate studies and have expertise in Human and Cultural Studies with a particular emphasis on Place, Economic Geography, Health and Diaspora, Environmental Policy, Borders and Border Conflicts, and more. Learn more about our faculty (http://geog.ku.edu/faculty/) on our website.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Joint Degree application for M.A. and M.U.P

Admission details, including required application materials for the MA in Geography (http://geog.ku.edu/graduate-1/) and Master of Urban Planning (http://urbanplanning.ku.edu/application/), can be found on their respective web pages. Entering students should submit separate applications to each department.

Applicants without prior training in Geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees.

Submit your graduate application online (http://graduate.ku.edu/prospective-students/).

M.U.P. Degree Requirements

The M.U.P. portion of the joint degree requires 36 credit hours.
M.A. in Geography Degree Requirements

The M.A. in Geography portion of the joint degree requires a minimum of 30 credit hours. A maximum of 6 credits of 500 and 600 level courses may be included in the program. If a 500 or 600 level course is taken to fulfill the required Techniques/Research Methods course, those credits will not count toward this maximum.

Graduate Level coursework: 17

Total Hours: 30-31

Master of Science in Atmospheric Science

Atmospheric Science Graduate Program

The MS program in Atmospheric Science expands the student’s knowledge of fundamental atmospheric processes and how the atmosphere interacts with other parts of the environment. Atmospheric Science at KU is the only one of its kind in the state and has a unique interdisciplinary nature that pursues cutting-edge research and quality education that combines theory, modeling, diagnostic studies, and applications to generate solutions that make a real difference in people's lives. Our faculty (http://geog.ku.edu/faculty/) provide a rigorous educational experience through several specialized pathways for the undergraduate degree and through funded research opportunities for graduate students.

Check out our website (http://geog.ku.edu/) for more information.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Entering students are expected to have completed an undergraduate degree in a physical science (e.g., physics, chemistry, atmospheric science, oceanography), mathematics, or engineering and studied mathematics, including vector calculus and ordinary differential equations. Courses taken to remedy deficiencies may not count toward graduate degrees.

The following items must be received to complete the application file:

Items 1 through 5 can be submitted on-line.

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply).
2. A current resume/CV.
3. A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks — in particular, we are interested in learning about (1) your specific interests within geography and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.
4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant's possession as official.
5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once your application has been submitted, your references will be contacted directly via email with directions for submitting their letters of recommendation.
**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

**ADDITIONAL REQUIREMENTS**

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

**NON-DEGREE SEEKING STUDENTS**

Non-degree seeking students (NDS) are admitted on a rolling basis and must submit an application here (https://gradapply.ku.edu/apply/). Applications are accepted on a rolling basis. Applicants must include the materials below in their application.

1. Copy of official transcripts including proof of a bachelor's degree.
2. Proof of English proficiency, if it is a second language.

Submit your graduation application online (https://gradapply.ku.edu/apply/). For questions, contact:

Graduate Academic Advisor
kugeog@ku.edu

**Atmospheric Science M.S. Degree Requirements**

The purpose of the program is to expand the student's knowledge of fundamental atmospheric processes and how the atmosphere interacts with other parts of the environment. Students become familiar with quantitative research methods and how these various approaches can be used to address different problems in atmospheric science. Students gain an in-depth ability to learn specific skills and apply them toward his/her thesis work. These skills consist of, for example, statistical analysis techniques, numerical modeling, or work with atmospheric instrumentation. The breadth of the program and the diverse research topics explored by the faculty are able to accommodate students with a variety of interests.

Required credit hours:
30 credits 500 level or above.

**Thesis**

A master's thesis is a demonstration of a student's ability to formulate an atmospheric science research problem, collect and analyze relevant data, synthesize appropriate literature, arrive at logical conclusions, and present the entire exercise in a public academic forum. The thesis should address an original problem of scientific importance, though at the M.S. level, the research will to a significant degree be guided by the faculty advisor.

**Thesis proposal**

During the second semester in the program, the student must submit to his committee a thesis research plan. All M.S. thesis proposals are expected to contain three basic elements:

1. A statement of the research problem or questions to be investigated.
2. A survey of relevant literature and how it relates to the student’s research problem
3. An outline of the general methodology, if not specific techniques, to be utilized in addressing the research problem or answering the basic research questions.

**Thesis seminar and defense**

Students are required to make a formal presentation to the faculty and fellow students in the form of a research seminar, and subsequently defend orally to their committee the results of their thesis research. Ideally, the final examination takes place immediately following the research seminar, but if necessary the two can be scheduled at separate times.

As part of their research training, graduate students are expected to attend departmental colloquia and seminars.

Details of the regulations on graduate study are included in the department’s Policies for Graduate Study in Atmospheric Science, available on the department’s website (http://atmo.ku.edu/). Please also see the Graduate Studies section of the online catalog.

**Master of Science in Geography**

**Graduate Programs**

**Geography**

The graduate curriculum emphasizes broad geographic training while encouraging in-depth commitment to specialized concentrations. Students also are encouraged to take course work outside the department that complements their degree programs. Credit-hour requirements below are considered minimums for degree programs. Programs are tailored by the student and advisor to conform to the student’s interests and needs, as well as to fulfill the general degree requirements.

The central thrust of the department and the chief capabilities and interests of the faculty fall within these research-teaching areas:

1. Human geography including cultural geography, regional development, and environmental policy;
2. Geoinformatics including cartography, geographic information systems, and remote sensing;
3. Physical geography including geomorphology, soils, and biogeography;
4. Regional geography including Africa, East Asia, Russia, Latin America, and the United States; and
5. Atmospheric science and climatology.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Entering students are expected to have a B.S. degree in geography or in related physical science, earth science, mathematics, or engineering disciplines. Applicants should have a minimum GPA of 3.0 on a 4.0 scale. Applicants with a GPA of less than 3.0 may be considered for admission on a probationary or provisional status.

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees.

The following items must be received to complete the application file:

**Items 1 through 5 can be submitted on-line.**

1. A completed Graduate Application Form (https://gradapply.ku.edu/apply).
2. A current resume/CV.
3. A Statement of Interest and Goals. This is included in the on-line application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geography and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.
4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant’s possession as official.
5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Additional Requirements**

Non-native speakers of English must meet English proficiency requirements as described here.

**Non-degree seeking students (NDS)** are admitted on a rolling basis and must submit an application (https://gradapply.ku.edu/apply). Applications are accepted on a rolling basis. Applicants must include the materials below in their application.

1. Copy of official transcripts including proof of a bachelor’s degree.
2. Proof of English proficiency, if it is a second language.

Submit your graduate application online (https://gradapply.ku.edu/apply/). For questions, contact:

Graduate Academic Advisor
kugeog@ku.edu

**M.S. Degree Requirements**

The program requires a 30 credit hour minimum. A maximum of 6 credits of 500 and 600 level courses may count toward the required hours for the master's degree. Students must pass an oral examination and write a thesis. In addition, students are required to take the 2-day (non-credit) field trip before classes begin in the fall semester and GEOG 980 (Colloquium) for 1 credit hour during each of the first 2 semesters in residence at KU.

Physical Geography/Atmospheric Sciences

Regional/Human Geography

3 courses, 500 level or above, in an approved area of concentration 9-10

Physical Geography

GIScience, computer programming course must be one of the 3 electives for this concentration

Research
Doctor of Philosophy in Atmospheric Science

Atmospheric Science is the study of weather and climate. The atmosphere is a key component of the environment and affects many human activities ranging from daily weather prediction to the understanding of climate and human health. Our program provides graduate students with the advanced training to address a host of meteorological and climate-related issues facing humans today.

By the end of the program, Ph.D. students will be able to perform independent, creative research within their chosen sub-discipline. In addition to becoming an expert in their sub-discipline, students will obtain a solid background in the fundamentals of atmospheric physics and applied mathematics. The student’s research will often require knowledge of subject fields outside of atmospheric science that is related to their dissertation, which could include oceanography, physics, geophysics, mathematics, statistics, engineering, or similar fields.

Early in their program, students will take fundamental courses in atmospheric science including atmospheric dynamics, numerical modeling, and advanced statistics. A majority of the student’s time will be devoted to their research project.

KU offers a variety of specializations including:
- Atmospheric dynamics
- Cloud microphysics
- Mesoscale organization of cloud systems
- Tropical meteorology
- Synoptic meteorology
- Mesoscale meteorology
- Coastal meteorology
- Climate variability and change
- Regional climatology
- Climate models
- Aerosol and dust emission
- Biometeorology
- Microclimatology
- Land-atmosphere interactions
- Remote sensing of the surface and atmosphere
- Polar ice caps

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Entering students are expected to have a M.S. degree in atmospheric science or in another physical science, mathematics or engineering. Entering students will be expected to have studied mathematics, including vector calculus and ordinary differential equations. They should also have taken the equivalent of at least 2 semesters of calculus-based physics and one of chemistry. Applicants should have a minimum GPA of 3.0 on a 4.0 scale. Applicants with a GPA of less than 3.0 may be considered for admission on a probationary or provisional status.

The following items must be received to complete the application file:

**Items 1 through 5 can be submitted on-line.**

1. A completed Graduate Application Form (https://gradapply.ku.edu).
2. A current resume/CV
3. A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks — in particular, we are interested in learning about (1) your specific interests within Atmospheric Science and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography & Atmospheric Science helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.
4. A scanned copy of an official transcript can be uploaded at the time of application. Official, degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant’s possession as official.
5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school.

If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

ADDITIONAL REQUIREMENTS

Non-native speakers of English must meet English proficiency requirements as described here.

Submit your graduate application online (https://gradapply.ku.edu/). For questions, contact:

Cicily Corder  
Graduate Academic Advisor  
cscorder@ku.edu

Upon a student’s admission to the department, the Graduate Studies Committee (GSC) will appoint an advisor. Early in the first semester (preferably in the first week of classes), the student should meet with this advisor to outline a tentative program of coursework for the degree. Such programs should be solidified by the time of enrollment for the second
semester and submitted to the GSC for approval. The student and advisor then continue to discuss and update programs each semester, bearing in mind that any substantive changes must be approved by the GSC.

**Dissertation Requirements**

The student must submit a dissertation approved by his/her graduate committee. All candidates must pass a final oral examination and must submit an approved dissertation to UMI. The dissertation will be defended in a public presentation.

**Doctor of Philosophy in Geography**

The PhD program is for students interested in research, teaching opportunities, careers with NGOs, government consulting and more. The program offers concentrations in cultural-regional geography of Africa, East Asia, Latin America, Russia/Eurasia, and the United States; geographic information science (including cartography and remote sensing); and physical/environmental geography. The program includes courses, seminars, individual research and reading, and preparation of a dissertation. Although no “outside minor” is formally required of candidates, the department favors study in auxiliary departments. Learn more about our faculty (http://geog.ku.edu/faculty/) on our website.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Applicants without prior training in geography are welcome but are required to improve their basic knowledge of the broad divisions of geography: systematic, methodological, and regional. Courses taken to remedy deficiencies may not count toward graduate degrees. Applicants should have a minimum GPA of 3.0 on a 4.0 scale. Applicants with a GPA of less than 3.0 may be considered for admission on a probationary or provisional status.

The following items must be received to complete the application file:

- A completed Graduate Application Form (https://gradapply.ku.edu/apply).
- A current resume/CV
- A Statement of Interest and Goals. This is included in the online application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geography or atmospheric science and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geography & Atmospheric Science helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

---

**Comprehensive Examination Process**

All candidates must pass a comprehensive written examination. Program sheets are available in the department office and must be filed before the oral examination can be scheduled. The student will have a dissertation committee consisting of at least 5 faculty members. At least 4 of these faculty must regularly teach in the atmospheric sciences program. One of the faculty members on the committee must be from outside the geography and atmospheric science department.

**RSRS Requirement**

The Research Skill and Responsible Scholarship (RSRS) requirement will be met by 6 credits at the 500 level or above in mathematics and/or engineering. Alternatively, 6 credits at the 500 level or above in a related discipline which are approved by the student’s graduate committee may also be used for the RSS requirement. The courses for the RSRS requirement must be taken during the PhD program. Students must participate in the existing Geography Department ethical scholarship program.

Two-day (non-credit) orientation before classes begin in the fall semester

- GEOG 980 Seminar in Geography: ____ (Colloquium for 1 credit hour during each of the first 2 semesters of residence at KU.)
- 500 level and above courses in mathematics, engineering, or other research skill courses approved by student's committee

**Electives**

- 15-24

Electives are selected with approval of the committee and are tailored to fit the needs of the individual student (e.g. oriented to a subfield in meteorology, climatology, or other specializations) Sample courses include:

- ATMO 731 Advanced Topics in Atmospheric Science: ____
- MATH 647 Applied Partial Differential Equations
- MATH 781 Numerical Analysis I
- GEOG 558 Intermediate Geographical Information Systems
- GEOG 758 Geographic Information Science
- GEOG 538 Soil Chemistry
- BIOL 513 Virology Laboratory
- BIOL 570 Introduction to Biostatistics
- BIOL 594 Forest Ecosystems
- BIOL 841 Biometry I
- CE 730 Intermediate Fluid Mechanics
- CE 751 Physical Hydrology
- CE 779 Water Quality

**Dissertation Research**

30
4. A scanned copy of an official transcript can be uploaded at the time of application. Official degree conferred transcripts will be required prior to the second semester of study. NOTE: Documents uploaded with your application are not considered official. KU does not consider transcripts that come from applicants or that have been in the applicant’s possession as official.

5. Three confidential letters of recommendation sent by referees who are familiar with your academic and/or professional activities and who can address your likelihood of success in graduate school. If possible, we prefer letters from professors, but applicants returning to school after a lengthy absence may substitute letters from supervisors. Note that it is the responsibility of the applicant to request and to confirm that the required letters have been sent by the deadline. When using the on-line reference form to list references, you must include valid e-mail addresses. Once you have completed and submitted your application, your references will be contacted directly via email with directions for submitting their letters of recommendation.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

**ADDITIONAL REQUIREMENTS**

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

Submit your graduate application online (https://gradapply.ku.edu/apply/).

For questions, contact:

Cicily Corder
Graduate Academic Advisor
cscorder@ku.edu

**Geography Ph.D. Degree Requirements**

The aspirant is expected to demonstrate proficiency in research and achieve a teaching competence in geography. The student may concentrate in 1 area or may offer a concentration in a second area in the department or an outside discipline. Whatever the choice, the student develops the plan of research and study with the advice and supervision of professors in the chosen area(s) of concentration who also sit on the student’s examination and dissertation committees. A minimum of 30 hours of course and seminar work in addition to dissertation credit usually is required beyond the M.A.

Required Courses

GEOG 805 (History of Geographic Thought); 2-day (non-credit) orientation before classes begin in the fall semester; GEOG 980 (Seminar in Geography; Colloquium) for 1 credit hour during each of the first 2 semesters of residence at KU; Non-credit 8-hour Responsible Scholarship session held just before classes start in the spring semester.

Research Skills Requirement

Research skills are important elements of any graduate program and should complement the student’s research topic. Coursework necessary to meet this requirement should commence early in the program. Selection of a particular Research Skills option must be approved by the student’s advisor and student’s committee members. A student’s Research Skills requirement may be met by 1 of the following:

1. Demonstrate a reading, writing, and speaking capability in a single foreign language sufficient to enable the student to do field work without an interpreter. An examination for competence, including written and oral portions, will be conducted by the appropriate language department having expertise in that language.

2. Demonstrate a satisfactory capability in 1 research skill from the list below. The actual courses must be approved by the student’s advisor and committee members.

   a. Computer Science--complete a computer-programming course in the Department of Electrical Engineering and Computer Science (e.g., C++, Fortran, or Visual Basic) with a grade of B or higher and create a substantial computer program that illustrates a geographic application of that language. Both the course and computer program must be approved by the Computer Programming Committee of the Department of Geography.

   b. Mathematics--complete 9 hours of courses at the 500-level or above with a grade of B or higher.

   c. Statistics--complete 9 hours of courses outside the Geography Department at the 500-level or above with a grade of B or higher.

   d. An outside discipline relevant to the student’s field(s) of specialization within geography (e.g., anthropology, biology, economics, geology, history, or psychology) -- complete 9 hours of courses at the 500-level or above with a grade of B or higher. (Atmospheric science courses may be used for this option, but not courses listed or cross-listed as geography.) Students may petition the Graduate Affairs Committee to have 9 hours of courses at the 500-level or above in multiple departments fulfill this requirement.

Students whose native language is not English may, in some cases, use their native language to fulfill Research Skills but only if the language is considered an adequate research tool for their program and is endorsed by the student’s advisor and committee members. Using a native language to fulfill the Research Skills requirement must have GSC approval.

In addition, the department requires that any PhD student admitted after Fall 2011 must successfully complete the Responsible Scholarship seminar offered by the department.

**Handbook for Graduate Students**

Detailed information on departmental regulations is included in Policies for Graduate Study in Geography at the University of Kansas, available on the department’s website (http://www.geog.ku.edu/).

**Graduate Certificate in Geographic Information Science**

“Everything is related to everything else, but near things are more related than distant things,” said renowned geographer and cartographer Waldo Tobler. A certificate in Geographic Information Science (GIS) capitalizes on this by blending field equipment, computer hardware and software, data, and people to capture, manage, display, analyze, and distribute all forms of geographically referenced information. Through the application of GIS and its principles, you can perform quantitative analyses to make informed decisions and provide logistical support in virtually any field. Effective use of GIS has evolved into a requisite skill for most agencies in
both the public and private sectors, and provides a transformative tool to address academic research. Students from such diverse disciplines as geography, atmospheric science, biology, engineering, economics, urban planning, landscape architecture, and sociology benefit from applying GIS and related technologies such as global positioning systems (GPS), remote sensing, spatial statistics, and computer programming to use location-based data. GIS has found wide applications in the sciences and engineering, as well as in business, government, military, and consumer areas. The director of the certificate program is available to meet with each student and design a curriculum that best meets your interests, goals, and academic level.

The certificate program is designed to provide graduate students with the knowledge and skills necessary to succeed in the rapidly expanding field of geographic information science (GIScience) or apply GIScience concepts in their own field of study. Attaining the certificate shows employers you have the critical skills necessary to perform in public, private, and academic settings. It complements the existing M.A., M.S., and Ph.D. degrees and builds upon the existing graduate concentrations in GIScience within the department.

The University of Kansas is a member of University Consortium for Geographic Information Science (UCGIS).

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

The director of the certificate program, Professor Xingong Li (https://geog.ku.edu/xingong-li/), will be available to meet with each student and design a curriculum that best meets the student’s needs. Each student will have a personalized plan depending on their interests and, if applicable, current enrollment in a graduate program. All prospective students must complete the online application for the GIScience Graduate Certificate Program, including the statement of interest, found here (https://gradapply.ku.edu/).

Students who are in a graduate program in the Department of Geography & Atmospheric Science, please contact the Graduate Academic Advisor for an internal application.

All current graduate students not housed in the Department of Geography & Atmospheric Science entering the certificate program must speak with their academic advisor before entering the certificate program. Application requirements for those currently enrolled at KU:

1. A completed online application for the GIScience Graduate Certificate Program.
2. Statement of Interest.
3. A letter of support from your graduate program.
4. A current Degree Progress Report (DPR) if applicable.
5. A graduate GPA of 3.0 or higher is required if currently enrolled in a graduate program.

Application requirements for those not currently enrolled at KU:

1. A completed online application for the GIScience Graduate Certificate Program.
2. A statement of interest.
3. A copy of official transcripts from all previous post-secondary educational institutions.
4. A letter of recommendation from persons familiar with their academic work or potential for graduate school.

Please see the policy on Graduate Certificate Programs - Eligibility and Admission Criteria (http://catalog.ku.edu/graduate-studies/#certificate) for more information on minimum requirements for graduate certificate admission.

Submit your graduate application online (https://gradapply.ku.edu/). For questions, contact:

Graduate Academic Advisor
kugeog@ku.edu

A total of 12 credit hours are required to earn the certificate. Only one course outside of the Department of Geography and Atmospheric Science may be included in these 12 credit hours. Course requirements include the following:

Select 2 of the 3 core GIS courses (6-7 credit hours) listed below:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 528</td>
<td>Spatial Databases</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 558</td>
<td>Intermediate Geographical Information Systems</td>
<td>4</td>
</tr>
<tr>
<td>GEOG 560</td>
<td>GIS Application Programming</td>
<td>3</td>
</tr>
</tbody>
</table>

Core courses may be waived and replaced with approved electives in cases where students have completed the same course for undergraduate credit.

Select an additional 5-6 credit hours of electives from the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ATMO 642</td>
<td>Remote Sensing</td>
<td>3</td>
</tr>
<tr>
<td>GEOG 512</td>
<td>Advanced Cartography and Geovisualization</td>
<td>4</td>
</tr>
<tr>
<td>GEOG 518</td>
<td>Geoinformatics Internship</td>
<td>1-3</td>

</table>

Any graduate-level GIS application course from another department/school (in consultation with advisor)

Or, a third core course from the core GIS courses listed above

At least once per year students are required to meet with the certificate Director to discuss progress in the program.

A student can take no longer than 4 years to pursue the certificate unless a leave of absence or other extenuating circumstances are present. In either event a petition letter must be submitted to the Director during the 4th year of enrollment.
Department of Geology

The Department of Geology

In Geology, you get to apply techniques and knowledge from chemistry, physics, biology, and math to answer important questions about Earth processes, history, and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and develop solutions to environmental challenges confronting our society.

Financial Aid

Undergraduate Scholarships

The department awards scholarships from its endowment to meritorious incoming or continuing students in geology. Scholarships also are awarded to students enrolled in Field Courses (https://geo.ku.edu/field-activities/). For information, contact the chair.

KU Financial Aid

All undergraduates who wish to be considered for KU financial aid must complete applications with Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/).

Graduate Assistantships, Scholarships, and Fellowships

All prospective graduate students are considered for employment and financial aid. Employment may be in the form of teaching assistantships or research assistantships. Research assistantships may be supported with funds from external grants, KUEA funds, or appointments in other units on campus, such as the Kansas Geologic Survey or the Biodiversity Institute.

Graduate students are eligible for scholarships from the Geology Associates Program, as well as fellowship funds to support living expenses, field/laboratory research, and tuition and fees. Endowed scholarships include the Angino, Hall, Henbest, Holden, Ireland, McGee, Moore, Patterson, Peoples, and Walters scholarship funds. Other scholarships are awarded from donations to individuals and corporations. Scholarships are awarded on the basis of academic excellence; some funds are designated for protected minorities or women.

Through the Salig Fund and other donations, the department supports graduate student field work. Through the McCollum Fund and other donations, the department underwrites partially some other research expenses, such as purchase of time on analytical equipment. Funding requires an acceptable thesis or dissertation proposal. Students who have no other sources of research support are given preference. Degree-seeking students may apply for loans from the Fritz, Horner, and Johns loan funds.

Visit the Graduate Studies website for information about funding opportunities (http://graduate.ku.edu/ku-funding/) for graduate students at KU.

Financial Aid and Scholarships (http://affordability.ku.edu/steps/index.shtml/) administers grants, loans, and need-based financial aid.

Specialties

The Department of Geology strives in offering a variety of specialties to match student’s professional goals and attributes. We have trained faculty in the following specialties: tectonics, geophysics, sedimentary, stratigraphy, carbonates, stable-isotopes, siliciclastic/sequence stratigraphy, geomicrobiology, hydrogeology, paleontology, glaciology, and petroleum geology. Check out our faculty (http://geo.ku.edu/faculty/today/)

Careers

Career Opportunities

We train students for academic, government, and industry careers across the geosciences. On-campus interviews for industry internship opportunities occur annually.

Practice as a professional geologist often requires course work and training beyond the baccalaureate level.

Licensure

Formal study of geology at an accredited college or university is a principal requirement for becoming licensed to practice geology. During the senior year, students who plan to become licensed geologists should take the Fundamentals of Geology examination, offered twice a year. Information on registration is available from the department office or from the Kansas Board of Technical Professions. After passing the examination and after further practice, candidates can sit for the Practice of Geology examination to become licensed. Regulations for licensure may vary from state to state.

Undergraduate Programs

Geology is an interdisciplinary science that applies the principles of chemistry, physics, biology, and other fields to the study of the earth, its resources, and its natural processes. The field has many subdisciplines and specialties that offer stimulating challenges and careers. KU offers broad undergraduate programs in geology and geophysics but emphasizes research in paleontology, sedimentology, crustal evolution, hydrogeology, geobiology, seismology, applied geophysics, glaciology, and geomorphology.

Courses for Nonmajors

The department offers several courses of interest to nonmajors who wish to learn more about geology and related areas such as environmental science, oceanography, and economic resources. Principal courses include GEOL 101, GEOL 105, GEOL 121, GEOL 171, GEOL 302, and GEOL 351. GEOL 103 may be taken in conjunction with either GEOL 101 or GEOL 105 to fulfill the CLAS laboratory science requirement. GEOL 304, GEOL 360, and GEOL 552 all offer opportunities to study more specialized aspects of the earth and do not require advanced prerequisites.

Summer Field Courses

All undergraduate degree programs require field courses during 2 summers. Students should plan to take GEOL 360 in the summer after completing the introductory course. GEOL 560 and GEOL 581 (if required by the program) ideally are taken in the summer between the junior and senior years. Substantial scholarship support is available for geology majors who enroll in those courses.

Combined Degree Programs

A student may combine an interest in geology with a degree in business, education, or journalism.

Graduate Programs
The department offers the M.S. and Ph.D. in geology but permits specialization in a number of areas of geology and in geophysics and hydrogeology. Active areas of instruction and research include geophysics, geomorphology, geochemistry, microbial biogeochemistry, paleontology, sedimentology, tectonics, and petroleum geology. Students also may work with faculty supervisors at the Kansas Geological Survey and at Kansas State University.

Students who are interested in enrolling in graduate level coursework in the Department of Geology without formal admission to a graduate program at KU are encouraged to apply for graduate non-degree seeking student status. See the department’s admission webpage (https://geo.ku.edu/non-degree-seeking/) for further details.

Courses

GEOL 101. The Way The Earth Works. 3 Hours NE GE3N / N.
Introduction to the principles of earth science. Study of the formation, occurrence, and structure of minerals and rocks; action of streams, oceans, glaciers, and other agents in the formation and modification of the landscape; volcanism, earthquakes, and plate tectonics. Discussion of earth processes in the context of sustainable energy, environmental concerns, climate and other topical issues. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Course may be offered in lecture or online format. LEC.

GEOL 103. Geology Fundamentals Laboratory. 2 Hours U / LFE.
A course in geologic laboratory studies. This course plus GEOL 101, GEOL 105, GEOL 106, or GEOL 121 satisfies the College laboratory science requirement. Gives students practical, hands-on experience with identifying earth materials (rocks, minerals, fossils), understanding their relationships to earth processes, understanding topographic and geologic maps, interpreting results of surficial processes, and learning about deep-earth processes such as earthquakes. Includes short field trips to see geologic structures and results of local geologic processes. This lab course may be offered as an on-campus lab or online format. Prerequisite: Previous or concurrent enrollment in GEOL 101, GEOL 105, GEOL 106 or GEOL 121. LAB.

GEOL 105. History of the Earth. 3 Hours NE GE3N / N.
An introduction to the physical and biological history of the earth, the methods used to decipher earth history, and the development of the geological sciences. This course with GEOL 103 satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 103 is recommended for students taking both. Not open to students who have taken GEOL 106 or GEOL 304. LEC.

GEOL 108. Troubled Waters: Water Resource Issues and Principles. 3 Hours GE11/GE3N / N.
Worldwide, water security is necessary for life, and food, industry, and energy production, and is increasingly the source of conflict. This course explores water in the environment and the fundamental interactions between humans and water. Key topics and issues addressed include fundamentals of water and the water cycle; water in geologic processes; water availability, development and sustainability; climate effects including flooding and drought; economics; pollution, disease, sanitation, and health; culture, policy and law, and other challenging issues. Case studies explore examples from Kansas and around the world. LEC.

GEOL 121. Life Through Time: DNA to Dinosaurs. 3 Hours NB GE11/GE3N / N.
This course leads students on a journey through time to explore the interconnection between life and the geology of Earth, including our own complex relationship with the world around us. If taken with GEOL 122, this course satisfies the College laboratory science requirement. Concurrent enrollment in GEOL 122 is required for students taking both. LEC.

GEOL 122. Life Through Time: DNA to Dinosaurs Laboratory. 1 Hour N / LFE.
This online companion to GEOL 121 allows students a hands-on exploration of the principles and practices of paleontology research. Students will be guided through an individual term-length research project—from shaping a research question to collecting and analyzing data to drawing conclusions to presenting in front of an audience. This lab will not only allow students to explore the fossil record but it will bring them into the scientific conversation. Prerequisite: Corequisite: Students must be concurrently enrolled in GEOL 121. LAB.

GEOL 171. Earthquakes and Natural Disasters. 3 Hours NE GE3N / N.
Addresses the subject of natural disasters with concentration on earthquake effects and their mitigation. Briefly treats volcanic eruptions, tidal waves, floods, global warming, severe weather, and catastrophic meteorite impacts from the perspective of geological and human significance. Provides a basic background into earth-science processes. LEC.

GEOL 172. Earthquakes and Natural Disasters Laboratory. 1 Hour N.
This online companion to GEOL 171 allows students a hands-on exploration of the principles and practices of geologic and geophysical research. Students will be guided through an individual term-length research project—from shaping a research question to collecting and analyzing data to drawing conclusions to presenting in front of an audience. This lab will not only allow students to explore details of natural disasters, but it will bring them into the scientific conversation. Prerequisite: Corequisite: GEOL 171. LAB.

GEOL 177. First Year Seminar: ____. 3 Hours GE11.
A limited-enrollment, seminar course for first-time freshmen, organized around current issues in geology. May not contribute to major requirements in geology. First year seminar topics are coordinated and approved through the Office of First Year Experiences. Prerequisite: First-time freshman status. LEC.

GEOL 190. Introduction to Quantitative Geoscience. 3 Hours GE12 / N.
This applied, introductory-level program will explore topics in geology, hydrogeology, physics, chemistry, and biology from a mathematical perspective. The course is designed for students with a desire to expand their mathematical skills, building on practical applications in the natural sciences. The study of lab and field sciences and mathematical problem-solving through rigorous, quantitative, and interdisciplinary investigations will be emphasized. The course will take students from a review of arithmetic and algebraic manipulations, to the use of logarithms, and functions, through series, trigonometry and graphing, and finish with an introduction to the elements of calculus and statistics. The course will utilize Excel as platform for calculating and graphing numerical examples of the problems presented. We expect students in this course to emerge with confidence in the basic use of mathematics commonly applied to investigate and model the natural world. Prerequisite: MATH 002, or two years of high school algebra and a score of 22 or higher on ACT mathematics, or a qualifying score on the mathematics placement test. LEC.

GEOL 301. Introduction to Oceanography. 3 Hours GE3N / N.
The online course is an introduction to the Earth and its oceans, including a discussion of the history of ocean exploration using the approach of the scientific method. The course will explore theories that describe the origin of the solar system, the earth, the atmosphere, and the oceans, in addition to a discussion of the origin of life on the earth. The course will
cover the essential physics, chemistry, geology, biology, and the concepts of plate tectonics, as applied to understanding the oceans and seas. This course cannot be taken if a student has completed GEOL 302. LEC.

**GEOL 302. Oceanography. 4 Hours NE GE3N / N / LFE.**
An introduction to the origin, nature, and dynamics of the world's oceans, including aspects of geology, chemistry, biology, physics, and meteorology that are involved in ocean processes. The relations between the oceans and humans in the past, present, and future, and instruction in scientific reasoning as it applies to oceanography. Laboratory exercises in critical thinking about oceanography. This course cannot be taken if a student has completed GEOL 301. Prerequisite: An introductory science course. LEC.

**GEOL 304. Historical Geology. 3 Hours N.**
An introduction to the physical and biological history of the Earth, the methods used to decipher earth history, and the development of the geological sciences. Concepts of lithostratigraphy, chronostratigraphy and biostratigraphy, and methods of analysis of stratigraphic data focus on the interpretation of Earth history. Prerequisite: GEOL 101 and GEOL 103. LEC.

**GEOL 311. Mineralogy and Structure of the Earth. 3 Hours N / LFE.**
Basic identification and properties of rocks and minerals in the context of whole-earth structure and evolution. Includes basic chemical equilibria for rock and mineral systems and their bearing on processes involved with formation and evolution of Earth's crust, mantle, and core. Two lectures and one lab per week. Prerequisite: GEOL 101, CHEM 130, and eligibility for MATH 125 or MATH 115. LEC.

**GEOL 312. Mineral Structures and Equilibria Laboratory. 1 Hour U / LFE.**
A laboratory to accompany GEOL 311. Presents more rigorous analysis of the structures, compositions, and chemical equilibria governing the formation and stability of common rock-forming mineral systems. Prerequisite: GEOL 311 (may be taken concurrently), CHEM 130, and eligibility for MATH 125 or MATH 115. LAB.

**GEOL 315. Gemstones. 3 Hours GE3N / N.**
The properties, occurrence, description, determination, mineral affinities, and legend and lore of gems, ornamental stones, and gem materials. LEC.

**GEOL 316. Geochemistry. 3 Hours N.**
The course is intended to be an introduction to all types of geochemistry. It focuses on the chemistry of the natural world and the chemical evolution of the Earth over geological time. The course is composed of three modules: (a) geochemical fundamentals; (b) natural and anthropogenically perturbed aspects of the Earth's hydrosphere and its interaction with surficial rocks, sediments, soils, the biosphere and the atmosphere and (c) the origin and evolution of Earth (crust-mantle-core) and the solar system through nuclear and high temperature chemical processes. Prerequisite: GEOL 101, CHEM 130 or 190; and eligibility for MATH 115. LEC.

**GEOL 331. Sedimentology and Stratigraphy. 4 Hours N / LFE.**
Basic principles used in the study of sedimentology and stratigraphy. Physical, chemical, and biological processes in sedimentary environments applied to the recognition of the depositional environment, preservation, and alteration of sedimentary rocks. Field and laboratory study of sedimentary rocks with emphasis on interpretation of original depositional environments and preservation in the stratigraphic record. Prerequisite: GEOL 101 and GEOL 103; and GEOL 304 or taken concurrently. LEC.

**GEOL 332. Sedimentology for Petroleum Engineers. 4 Hours N.**
This course is designed for Petroleum Engineering majors. It covers basic principles used in the study of sedimentary environments. Topics include classification of sedimentary rocks, diageneis and the alteration of sedimentary rocks. Surface processes and recognition of depositional environments in the rock record is emphasized. Basic concepts of stratigraphy are introduced. Emphasis is placed on practical examples relating to petroleum reservoirs. Lecture, lab and field trips. Prerequisite: GEOL 101 and GEOL 103 and Petroleum Engineering Major. LEC.

**GEOL 351. Environmental Geology. 3 Hours GE3N / N.**
An introductory course dealing with the implications of geologic processes and materials for civilization. Topics to be considered include: geologic hazards such as floods, landslides, earthquakes, and volcanism; the availability of water, mineral, and energy resources; and the environmental impact of resource utilization. The importance of recognizing geologic constraints in land use planning and engineering projects is emphasized and illustrated by examples. LEC.

**GEOL 360. Field Investigation. 2 Hours N.**
Summer session. A field-geology course that provides beginning geology students with an initial understanding of the nature of geological evidence in the field, the breadth of geological phenomena, and the importance of the interplay of information from many geological disciplines in solving problems. Given at various geologically diverse locations. Fee. Prerequisite: GEOL 101. LEC.

**GEOL 370. Study Abroad in Greece: Natural Environment and Civilizations. 3 Hours AE42 / N.**
This course examines the profound influence of the natural environment on the development of civilizations and the course of history. Geologic processes responsible for natural resources, water, landscapes, natural hazards and climate are presented in the context of their impact on ancient Greek society. The class visits sites of geologic and historic interest such as Athens, Delphi, Mycenae and the Aegean Sea islands including Santorini volcano. Examples from other eras and regions of the world are discussed along with present-day analogues. Prerequisite: An introductory geology course or permission of the instructor. LEC.

**GEOL 391. Special Studies in Geology. 1-6 Hours N.**
Special reports upon subjects in which students have a particular interest. Prerequisite: Fifteen hours of geology. IND.

**GEOL 399. Senior Honors Research. 2-5 Hours AE61 / N.**
Normally two to five hours in any one semester with a maximum of eight hours. An undergraduate research course, in any of the fields of geology, open by permission of the department to seniors in the College who have an average grade of B or higher in geology courses. Prerequisite: Thirty hours of geology, five of which may be taken concurrently with this course. IND.

**GEOL 501. Simple Error Analysis with Matlab. 2 Hours NE GE3N / N.**
This course covers basic error analysis as it applies to geology. The course will emphasize the description and propagation of errors in data collection and reduction. Subjects include: how to report data and associated errors, error propagation in simple and complex equations, the Normal, Gaussian, and Poisson distributions, linear and higher order regression, and X-squared test. Prerequisite: MATH 125. LEC.

**GEOL 502. Linear Algebra for Earth Scientists. 2 Hours N.**
This course covers basic linear algebra as it applies to geology and emphasizes the description and use of linear algebra to solve geologic problems. Subjects include: how to solve systems of equations, determinants, inversion, vector spaces, matrix manipulation, eigenvectors and values, least squares solutions, and orthogonality. Prerequisite: MATH 125. LEC.

**GEOL 503. Numerical Methods in the Earth Sciences. 2-3 Hours N.**
The class will provide an introduction to writing and testing code in the numerical computing environment MATLAB, using examples from Earth
Science disciplines to introduce basic concepts and develop progressively more complex code. Prerequisite: MATH 125 and prior completion or co-enrollment in GEOL 502. LEC.

GEOL 511. Raman Spectroscopy of Crystalline Solids. 3 Hours N. This course introduces students to Raman scattering in crystalline solids. This class will cover light and polarization of light, phonons and magnons, Raman scattering, Raman Tensor, wave vectors and k space, reciprocal space and Brillouin zones (and zone edge), group theory and character tables, polarized Raman scattering (symmetry of zone center phonons), Frohlich intraband electro-optical coupling and other multiphonon Resonance Raman mechanisms in crystalline solids, and phonon confinement in nanomaterials. Prerequisite: GEOL 311 or PHSX 212. LEC.

GEOL 512. Igneous and Metamorphic Petrology. 3 Hours N. The study of minerals, rocks and fluids within the Earth's crust and mantle to elucidate their mechanisms of formation and the pressure-temperature-composition conditions within the Earth. The course emphasizes equilibrium thermodynamics, phase equilibria, fractionation mechanisms, tectonic control of petrogenesis, and quantitative analysis of mineral parageneses. Prerequisite: GEOL 311 and first semester calculus, or permission of instructor. LEC.

GEOL 513. Petrology Laboratory. 1 Hour U / LFE. A laboratory course to accompany GEOL 512. Material covered will include the use of the polarizing microscope in study of rocks in thin sections; identification of rock-forming minerals in thin section; study of textures as guides to the crystallization process; calculations of chemical changes during fractional crystallization and partial melting. Students will also make extensive study of igneous and metamorphic rocks in hand specimens, accompanied by thin section study, with emphasis on composition, texture, and structure. Students must co-enroll in GEOL 512. Prerequisite: GEOL 312. Concurrent enrollment in GEOL 512 required. LAB.

GEOL 521. Paleontology. 3 Hours N. A study of the structure and evolution of ancient life; the nature and diversity of life through time; the interactions of ancient organisms with their environments and the information that the study of fossils provides about ancient environments; the use of fossils to determine the ages of rocks and the timing of past events in earth history; and the patterns of extinction through time. (Same as BIOL 622.) Prerequisite: BIOL 100 or BIOL 152 or GEOL 105 or GEOL 304. LEC.

GEOL 523. Paleontology Laboratory. 1 Hour U. Laboratory course in the study of fossils with emphasis on the practice of paleontology and the morphology of ancient organisms. (Same as BIOL 623.) LEC.

GEOL 524. Mammalian Paleontology. 3 Hours N. Evolution of mammals, and anatomical modifications involved in the process as ascertained from the fossil record. Lectures and laboratory. (Same as BIOL 524.) Prerequisite: One of the following: BIOL 225, BIOL 412, BIOL 413, GEOL 304, GEOL 521, or consent of the instructor. LEC.

GEOL 525. Geobiology: The Coevolution of Life and Rocks. 3 Hours N. This course is an exploration of the parallel evolution of life and the Earth. In the almost 4 billion years since life first appeared, biological processes have been influencing and been influenced by physical and chemical processes in the atmosphere, cryosphere, hydrosphere, and inside the Earth. Microbial processes helped form fossils, reefs, and the oxygen we all breathe; the traces microbes leave behind in the rock record inform our understanding of how life originated and evolved on Earth, what environmental changes triggered the Big Five mass extinctions, and guide NASA's exploration of the solar system. Prerequisite: BIOL 152 and GEOL 101. LEC.

GEOL 528. The Biology and Evolution of Fossil Plants. 3 Hours N. A lecture course in which fossil plants, protists and fungi are examined throughout geologic time. Emphasis will be directed at paleoecology, biogeography and the stratigraphic distribution and composition of ancient floras. (Same as BIOL 640.) Prerequisite: BIOL 413, or permission of instructor. LEC.

GEOL 529. Laboratory in Paleobotany. 1 Hour U / LFE. An examination of selected fossil plants throughout geological time and the techniques used to study them; laboratory will include identification and the use of plant fossils in biostratigraphy. (Same as BIOL 641.) Prerequisite: BIOL 413 or permission of instructor. Must be taken concurrently with GEOL 528. LAB.

GEOL 532. Stratigraphy. 4 Hours AE61 / N / LFE. A study of the principles of lithostratigraphy, biostratigraphy, and sequence stratigraphy. Methods of analysis of stratigraphic data focus on the interpretation of earth history. The stratigraphic record of North America is presented for evaluation of its geologic history. Three lectures and one laboratory per week. Required field trip. Prerequisite: GEOL 101, GEOL 521, and GEOL 331. LEC.

GEOL 533. Shales and Other Mudstones. 3 Hours N. This course defines mudstones and shales. Deposition and constituents of fine-grained sediment; geochemistry, diagenesis and lithification of such deposits. Organic constituents of mudstone and their function as sources of crude oil and natural gas. Petrophysics and mechanical properties of mudstones and their potential as reservoirs of hydrocarbons. Not open to students with credit in GEOL 733. Prerequisite: GEOL 331. LEC.

GEOL 535. Petroleum and Subsurface Geology. 4 Hours N / LFE. A general study of the occurrence, properties, origin, and migration of petroleum. Studies of various oil fields and oil-bearing basins. Laboratory studies include well logs, subsurface mapping, and cross-sections. Prerequisite: GEOL 331 and either GEOL 562 or CPE 327, or permission of instructor. LEC.

GEOL 536. Geological Log Analysis. 1 Hour U. Application of well logging measurements to interpretation subsurface. Not open to students who have completed or are taking CPE 528. Prerequisite: GEOL 101. LEC.

GEOL 537. Petroleum Reservoir Characterization. 3 Hours N. Geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve oil recovery. Students who have completed GEOL 837 may not take GEOL 537 for credit. Prerequisite: GEOL 535 and permission of instructor. LEC.

GEOL 538. Basin Analysis. 3 Hours N. Overview of sedimentary basins, mechanisms of basin formation, and basin evolution through time. Topics include lithospheric stretching and flexure to form sedimentary basins, geohistory analysis and backstripping, and thermal history and controls on basin fill. This course consists of lectures, exercises, and a field trip. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 738. Prerequisite: GEOL 331 and GEOL 562. LEC.

GEOL 539. Sequence Stratigraphy. 3 Hours N. Principles and practical applications of sequence stratigraphy, the process of studying and correlating depositionally linked stratal successions in a
also surveys common groundwater pollutants, such as heavy metals, and contaminant transport from a qualitative perspective. The course introduces the basics of groundwater flow, water quality, and chemistry. LEC.

GEOL 541. Geomorphology. 4 Hours N / LFE.
A critical study of landforms in relation to tectonics, climatic environment, and geologic processes. The use of geomorphic methods in the interpretation of Cenozoic history is emphasized. Laboratory exercises in analysis of field observations, maps, and photographs. Required field trip and fee. (Same as GEOG 541.) Prerequisite: GEOL 101 and GEOL 103, GEOG 104 and GEOG 105, or GEOL 304 and GEOL 103. LEC.

GEOL 542. Energy and Society. 3 Hours AE51 / N.
In this course, you will gain the necessary understanding of energy technologies and policies to evaluate options for energy usage and its socioeconomic and environmental impacts. You will analyze different opportunities and impacts of energy systems that exist within and between groups defined by national, regional, household, ethnic, and gender distinctions. Analysis of the range of current and future energy choices will be stressed, as well as the role of energy in determining local environmental conditions and global climate. Prerequisite: A course in Biology, Chemistry, Physics, or Geology. LEC.

GEOL 543. Environmental Ethics: A View from the National Parks. 3 Hours AE51.
To what extent are our National Parks protected from pollution, invasive species, mining, climate change and tourism? In this course you will learn about the geologic processes that form our National Parks as well as the competing interests that stakeholders have on the land. Prerequisite: A course in Biology, Chemistry, Physics, or Geology. LEC.

GEOL 548. Geology and Culture of Polynesia. 3 Hours AE42 / N.
Polynesia, encompassing over 1,000 islands in the southern and central Pacific Ocean, was the last region of the Earth to be settled by humans. Around 3000-1000 BCE, people from northwest Melanesia first reached one of these islands, and over the next few centuries spread to colonize all of the islands. However, despite the fact that all of the Polynesian islands were settled by colonists who stemmed from a single population with a shared culture, language, technology, and agriculture, the cultures of these islands are incredibly rich and varied. In this course we will examine some of the cultural mores and practices of the Polynesian islands, including how these were shaped by the climate, geology, soil, hydrology, and marine resources of each individual island. In this course we will examine these factors and assess their potential impact on the cultures present in the region. Prerequisite: A course in Biology, Chemistry, Physics, or Geology. LEC.

GEOL 552. Introduction to Hydrogeology. 3 Hours N.
Physical description of hydrogeologic media. Elementary groundwater hydraulics: analytical and graphical solutions for steady-state application. Well hydraulics and pumping tests. Basic groundwater geology. Effects of topography and geology on regional flow systems. Field and numerical delineation and analysis of groundwater flow systems and applications. Chemical characteristics of groundwaters and their relationship to aquifer geology and hydrology. Investigations of groundwater quality and contamination. Prerequisite: Two semesters each of calculus, physics, and chemistry. LEC.

GEOL 554. Contaminants in Groundwater. 3 Hours N.
This course introduces the basics of groundwater flow, water quality, and contaminant transport from a qualitative perspective. The course also surveys common groundwater pollutants, such as heavy metals, organic compounds, radionuclides, salts, non-aqueous phase liquids, risk analysis, and forensic hydrogeology. Students are expected to work together to complete weekly reading assignments. A course field trip forms the basis for a term report that is expected to incorporate concepts and tools covered during the lectures and readings. This course requires no calculations, but mathematical and chemical terms are presented. Prerequisite: One semester of general chemistry, and at least one 100 level course or higher in Geology or physical geography (GEOG 104 or GEOG 105), or permission of the instructor. LEC.

GEOL 555. Climate Science. 3 Hours N.
This course explores the science of climate change. Students will learn how the climate system works; what factors cause climate to change across different time scales and how those factors interact; how scientists use models, observations and theory to make predictions about future climate; and the possible consequences of climate change for our planet. Students will learn how climate change today is different from past climate cycles and how satellites and other technologies are revealing the global signals of a changing climate. Finally, the course looks at the connection between human activity and the current warming trend and considers some of the potential social, economic and environmental consequences of climate change. Prerequisite: GEOL 101 or GEOL 121. LEC.

GEOL 556. Field Methods in Hydrology. 3 Hours N.
The course offers an overview on basic field methods for characterization of hydrologic systems. Topics to be covered include physical and chemical characterization techniques, such as: how to measure water levels; perform single well and aquifer tests; unsaturated zone parameterization; inorganic, organic, isotopic, and dissolved gas characterization; groundwater-surface water characterization techniques, and geophysical techniques for hydrogeology. Additionally, the class will visit a variety of sites of hydrogeologic interest. Prerequisite: GEOL 552 or permission from instructor. FLD.

GEOL 558. Applied Groundwater Modeling. 3 Hours N.
This course focuses on how to construct simple to complex computer models of groundwater systems and systems in which water flows between groundwater and surface water bodies such as springs, streams and lakes. We consider water flow, transport of solutes, density effects (from saltwater or brines), and the use of groundwater and surface water (demand-driven, supply-limited problems), and managed aquifer recharge (MAR). We consider three aspects of model development: (1) how to compare the computer models we construct to the systems modelers intend them to represent, (2) how accurate the models are likely to be and how uncertainty can be quantified, and (3) how useful the models are in practice. Prerequisite: GEOL 101 or permission from instructor. LEC.

GEOL 560. Introductory Field Geology. 3 Hours AE61 / N.
Summer session. The study of the principles of field geology and the application of field methods to solve geological problems. Includes use of topographic maps and aerial photographs for geological mapping, the study of stratigraphic methods by measuring sections, and working field trips to areas of regional geological interest. Offered at the University of Kansas Geology Field Camp near Canon City, Colorado. Fee. Prerequisite: GEOL 331, GEOL 360, and GEOL 562, or consent of instructor. FLD.

GEOL 561. Field Geology. 3 Hours N.
Summer session. The application of the principles of field geology to solve complex geological problems in the field. Offered at the University of Kansas Geology Field Camp near Canon City, Colorado, or at other sites as appropriate. Fee. Prerequisite: GEOL 560. FLD.

GEOL 562. Structural Geology. 4 Hours N / LFE.
A study of primary and secondary rock-structures and their genesis. Includes techniques of structural analysis and introduces mechanics
of rock deformations. Lectures, laboratory, and required field trip. Prerequisite: GEOL 311; PHSX 111, PHSX 114, or PHSX 211 and PHSX 216; and MATH 115 or MATH 126. LEC.

GEOL 563. Tectonics and Regional Geology. 3 Hours NE / N. Topics vary with demand and include fundamental features of plate tectonics, interpretation and distribution of regional geology of mountain belts with emphasis on tectonic setting and processes, regional geology, and tectonics of selected mountain belts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GEOL 763. Prerequisite: GEOL 562, GEOL 512, or GEOL 331, and GEOL 572. LEC.

GEOL 572. Geophysics. 3 Hours N. Introductory study of gravitational, magnetic, seismic, electrical, and thermal properties of the earth. Measurements, interpretation, and applications to exploration, earth structure, and global tectonics. Prerequisite: An introductory course in geology; MATH 116 or MATH 127; and PHSX 115 or PHSX 212 and PHSX 236. PHSX 115 or PHSX 212 may be taken concurrently. LEC.

GEOL 575. Seismic Exploration. 3 Hours N. Application of seismic reflection and refraction techniques to the description of near-surface geology and the exploration for energy and mineral resources. Theory of seismic information, data collection, data processing using computers, and geologic interpretation. Prerequisite: A course in computer programming, either FORTRAN or C, which may be taken concurrently. An introductory geophysics course, such as GEOL 572. LEC.

GEOL 576. Potential Fields Exploration. 3 Hours N. Use of gravity, magnetic, and electrical signals in the exploration for energy and mineral resources. Elementary potential field theory, data collection methods, data analysis, and interpretation using computers. Prerequisite: A course in computer programming, either FORTRAN or C, which may be taken concurrently. An introductory geophysics course, such as GEOL 572. LEC.

GEOL 577. Environmental Geophysics. 3 Hours. Application of the methods of geophysical exploration to evaluate, mitigate, and prevent environmental problems below the surface of the earth. Development of fundamental principles and discussion of environmental case histories using seismic, gravity, magnetic, electromagnetic, electrical, and radar methods. Prerequisite: An introductory course in geology; MATH 116 or MATH 126; and PHSX 115, PHSX 214, or PHSX 212 and PHSX 236. LEC.

GEOL 578. Seismic Data Analysis and Interpretation. 3 Hours N. Interpretation methods applied to seismic exploration and reservoir characterization. Topics include: rock physics, the convolutional model, synthetic seismograms, seismic response of hydrocarbon reservoirs, resolution, seismic velocity, depth conversion, seismic attributes, AVO, inversion, seismic anisotropy, 3-D 4-D interpretation, S-wave and converted wave interpretation, laboratory use of commercial seismic interpretation software. Prerequisite: GEOL 572 or consent of the instructor. LEC.

GEOL 579. Hydrogeophysics. 3 Hours N. This course is designed to introduce students to current hydrogeophysics research. Students will learn about determining, predicting, and studying the physical properties and hydrologic processes associated with groundwater flow, contaminant transport, and microbemineral interactions using geophysical measurements at different scales. This course combines lectures, literature review and discussion, and student presentations. Not open to students with credit in GEOL 779. Prerequisite: GEOL 101 or GEOL 121. LEC.

GEOL 591. Topics in Geology: ____. 1-5 Hours N. May include lectures, discussions, readings, laboratory, and field work in geology. Will be given as needed. May be taken more than once. LEC.

GEOL 714. Thermochronology. 3 Hours. This advanced course is intended to provide students with an in-depth understanding of the fundamentals and an appreciation of the complexities of thermochronology. The primary focus of this course is on modern thermochronological dating methods, a quantitative understanding of noble gas diffusion, data acquisition and interpretation, numerical modeling of complex thermochronological data, and hands-on laboratory experience in the KU thermochronology facilities. Prerequisite: GEOL 717; or consent of the instructor. LEC.

GEOL 715. Geochemistry. 3 Hours. Application of chemical equilibria and kinetics to geological environments and processes, with emphasis on processes involving solution equilibria. Includes introduction to thermodynamic aspects of equilibria. LEC.

GEOL 717. Geochronology. 3 Hours. Principles and applications of natural radioactive systems for geochronology and cosmochronology, including use of radiogenic isotopes as geochemical tracers. Prerequisite: GEOL 512 or consent of instructor. LEC.

GEOL 718. Stable Isotope Geochemistry. 1-3 Hours. Principles and applications of equilibration among stable isotopes in the geological environment, with emphasis on the isotopic systems of hydrogen, carbon, and oxygen. Prerequisite: GEOL 715 or consent of instructor. LEC.

GEOL 723. Museum Internship. 1-6 Hours. Provides directed, practical experience in research, collection, care, and management, public education, and exhibits with emphasis to suit the particular requirements of each student. Graded on a satisfactory/unsatisfactory basis. (Same as AMS 799, ANTH 799, and MUSE 799.) INT.

GEOL 728. Paleopedology. 3 Hours. Paleopedology is the study of ancient soils preserved in the geologic record. The course covers concepts of paleopedology and its applications to the interpretation of paleoenvironmental, paleoecologic, and paleohydrogeologic settings and its use in sequence stratigraphy and paleoclimatology. Prerequisite: GEOG 535, GEOL 331, or GEOL 532; or consent of the instructor. LEC.

GEOL 729. Ichnology. 3 Hours. Ichnology is the study of organism-substrate interactions. The class will cover concepts and applications of ichnology in the marine and continental realms, including the behavior of such organisms as microbes, plants, invertebrates, and vertebrates preserved in the geologic record as trace fossils. Ichnology is applied in geology and in the petroleum industry to interpret ancient environments, hydrogeology, ecology, and climate. Prerequisite: GEOL 331, GEOL 521, or GEOL 532; or consent of the instructor. LEC.

GEOL 731. Terrigenous Depositional Systems. 4 Hours. Processes that operate in recent sedimentary environments, responses of sediment to those processes, and criteria for determining depositional environments of ancient sedimentary rocks. Lectures, practical exercises, and field trips. Prerequisite: GEOL 331 or GEOL 532. LEC.

GEOL 732. Carbonate Depositional Systems. 3 Hours. Patterns and processes of contemporaneous carbonate deposition and diagenesis, depositional models; applications to interpretation of carbonate rocks. Lecture, discussion, laboratory and field trips. Prerequisite: GEOL 532 (may be taken concurrently). LEC.
GEOL 733. Shales and Other Mudstones. 3 Hours.
This course defines mudstones and shales. Deposition and constituents of fine-grained sediment; geochemistry, diagenesis and lithification such of deposits. Organic constituents of mudstone and their function as sources of crude oil and natural gas. Petrophysics and mechanical properties of mudstones and their potential as reservoirs of hydrocarbons. Not open to students with credit in GEOL 533. Prerequisite: GEOL 331. LEC.

GEOL 738. Basin Analysis. 3 Hours.
Overview of sedimentary basins, mechanisms of basin formation, and basin evolution through time. Topics include lithospheric stretching and flexure to form sedimentary basins, geohistory analysis and backstripping, and thermal history and controls on basin fill. This course consists of lectures, exercises, and a field trip. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 538. Prerequisite: GEOL 331 and GEOL 562. LEC.

GEOL 739. Sequence Stratigraphy. 3 Hours.
Principles and practical applications of sequence stratigraphy, the process of studying and correlating depositionally linked stratified successions in a chronostratigraphic framework. The concepts of depositional sequences, parasequences, bounding surfaces, systems tracts and incised valleys are studied through class exercises and a regional field trip. Seismic stratigraphic techniques and concepts are covered in the latter part of the course. This course is available at both the 500 and 700 level with additional assignments required at the 700 level. Not open to students with credit in GEOL 539. Prerequisite: GEOL 331 or GEOL 332. LEC.

GEOL 751. Physical Hydrogeology. 3 Hours.
Study of fluid flow in subsurface hydrologic systems. Investigation of the ground water environment including porosity, and hydraulic conductivity and their relationship to typical geologic materials. Examination of Darcy's law and the continuity equation leading to the general flow equations. Discussion of typical hydraulic testing methods to estimate aquifer parameters in various situations and apply these to water resource problems. Study of the basic mechanisms that determine the behavior of typical regional flow systems. (Same as CE 752.) LEC.

GEOL 753. Chemical and Microbial Hydrogeology. 3 Hours.
Lecture and discussion of chemical and microbiological controls on groundwater chemistry. Topics include thermodynamic and microbiological controls on water-rock reactions; kinetics; and microbiological, chemical and isotopic tools for interpreting water chemistry with respect to chemical weathering and shallow diagenesis. Origins of water chemistry, changes along groundwater flow paths, and an introduction to contaminant biogeochemistry will be discussed through the processes of speciation, solubility, sorption, ion exchange, oxidation-reduction, elemental and isotopic partitioning, microbial metabolic processes and microbial ecology. An overview of the basics of environmental microbiology, including cell structure and function, microbial metabolism and respiration, microbial genetics and kinetics of microbial growth will be covered. (Same as CE 753.) Prerequisite: One year of chemistry, one year of calculus, one year of biology, an introductory course in hydrogeology, or consent of the instructors. LEC.

GEOL 754. Contaminant Transport. 3 Hours.
A study of the transport of conservative and non-conservative pollutants in subsurface waters. Case studies are used to illustrate and develop a conceptual understanding of such processes as diffusion, advection, dispersion, retardation, chemical reactions, and biodegradation. Computer models are developed and used to quantify these processes. (Same as CE 754.) Prerequisite: Introductory Hydrogeology or consent of instructor. LEC.

GEOL 755. Site Assessment and Remediation. 3 Hours.
Site Assessment and Remediation encompasses both the academic and applied aspects of environmental geology. The student is presented with the historical, regulatory and risk characteristics of environmental issues as well as specific geologic principles such as GIS and remote sensing, geophysics, geomorphology and surface and groundwater practices. Site assessment concepts include surface and subsurface sampling, analyses and interpretations, conceptual site models, environmental geologic forensics, and environmental Phase I site assessments (USEPA and ASTM). Environmental geology project management principles and practices are examined in detail. These cores aspects of the course form the basic structure in understanding and applying environmental remediation and state-of-the-art/state-of-the-practice processes. Case studies are researched and analyzed for both the assessment and remediation phases of the program. Prerequisite: GEOL 751. LEC.

GEOL 758. Applied Groundwater Modeling. 3 Hours.
This course focuses on how to construct simple to complex computer models of groundwater systems and systems in which water flows between groundwater and surface water bodies such as springs, streams and lakes. We consider water flow, transport of solutes, and density effects (from saltwater or brines). We consider the conjunctive use of groundwater and surface water (demand-driven, supply-limited problems), and managed aquifer recharge (MAR). We consider three aspects of model development: (1) how to compare the computer models we construct to the systems modelers intend them to represent, (2) how accurate the models are likely to be and how uncertainty can be quantified, and (3) how useful the models are in practice. (Same as CE 731.) Prerequisite: GEOL 751 or CE 752, or approved by the professor. LEC.

GEOL 761. Topics in Regional Field Geology: ____. 1-5 Hours.
A detailed field study of a carefully selected area that includes features of several phases of geology. Field trip fee. Prerequisite: GEOL 561 or equivalent and departmental approval. FLD.

GEOL 763. Tectonics and Regional Geology. 3 Hours.
Topics vary with demand and include fundamental features of plate tectonics, interpretation and distribution of regional geology of mountain belts with emphasis on tectonic setting and processes, regional geology, and tectonics of selected mountain belts. This course is offered at the 500 and 700 level with additional assignments at the 700 level. Not open to students with credit in GEOL 563. Prerequisite: GEOL 562, GEOL 512, or GEOL 331, and GEOL 572. LEC.

GEOL 771. Advanced Geophysics: ____. 1-3 Hours.
Topics vary with demand and include heat flow, wave propagation, synthetic seismograms, groundwater exploration, geothermal exploration, electrical methods in exploration, rock mechanics–tectonophysics, rock magnetism, geomagnetism, paleomagnetism, geophysical inverse theory, and others upon sufficient demand. May be repeated for different topics. (Same as PHSX 727.) Prerequisite: GEOL 572 or consent of instructor. LEC.

GEOL 772. Geophysical Data Analysis. 3 Hours.
Fourier analysis, sampling theory, prediction and interpolation of geophysical data, filtering theory, correlation techniques, deconvolution. Examples will be chosen from various fields of geophysics. Prerequisite: MATH 250/AC 250/ARCE 250/CE 250/CP 250/EECS 250/EPHX 250/ME 250 and GEOL 572. LEC.

GEOL 773. Seismology. 3 Hours.
General theory of seismic waves, wave field extrapolation (migration) by finite difference methods, construction of travel-time curves, reflection and attenuation of coefficients, earthquake source mechanism, distribution and forecasting of earthquakes. Prerequisite: MATH 250/AC 250/ARCE
Theoretical and applied study of all aspects of near-surface reflection, refraction, and surface-wave seismology from design and acquisition to interpretation. Prerequisite: MATH 250, GEOL 572, or consent of the instructor. LEC.

GEOL 776. Ground Penetrating Radar. 3 Hours.
Theoretical and applied study of radar methods used for imaging the subsurface. Topics include EM theory relating to wave propagation through earth environments, GPR data acquisition, processing and interpretation. Prerequisite: Consent of the instructor. LAB.

GEOL 779. Hydrogeophysics. 3 Hours.
This course is designed to introduce students to current hydrogeophysics research. Students will learn about determining, predicting, and studying the physical properties and hydrologic processes associated with groundwater flow, contaminant transport, and microbemineral interactions using geophysical measurements at different scales. This course combines lectures, literature review and discussion, and student presentations. Not open to students with credit in GEOL 579. LEC.

GEOL 780. Conservation Principles and Practices. 3 Hours.
This course will acquaint the future museum professional with problems in conserving all types of collections. Philosophical and ethical approaches will be discussed, as well as the changing practices regarding conservation techniques. Emphasis will be placed on detection and identification of causes of deterioration in objects made of organic and inorganic materials, and how these problems can be remedied. Storage and care of objects will also be considered. (Same as AMS 714, BIOL 700, HIST 722 and MUSE 706.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 781. Introduction to Museum Exhibits. 3 Hours.
This course will consider the role of exhibits as an integrated part of museum collection management, research, and public service. Lecture and discussion will focus on issues involved in planning and producing museum exhibits. Laboratory exercises will provide first-hand experience with basic preparation techniques. Emphasis will be placed on the management of an exhibit program in both large and small museums in the major disciplines. (Same as AMS 700, BIOL 787, HIST 723, and MUSE 703.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 782. The Nature of Museums. 3 Hours.
The purpose of this course is to provide an overview of the kinds of museums, their various missions, and their characteristics and potentials as research, education, and public service institutions responsible for collections of natural and cultural objects. (Same as AMS 720, BIOL 788, HIST 720, and MUSE 702.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 783. Museum Management. 3 Hours.
Lecture, discussion, and laboratory exercises on the nature of museums as organizations; accounting, budget cycles, personnel management, and related topics will be presented using, as appropriate, case studies and a simulated museum organization model. (Same as AMS 731, BIOL 785, HIST 728, and MUSE 701.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 784. Introduction to Museum Public Education. 3 Hours.
Consideration of the goals of an institution's public education services, developing programs, identifying potential audiences, developing audiences, and funding. Workshops and demonstrations are designed for students to gain practical experience working with various programs and developing model programs. (Same as AMS 797, BIOL 784, HIST 721, and MUSE 705.) Prerequisite: Museum Studies student, Indigenous Nations Studies student, or consent of instructor. LEC.

GEOL 785. Introduction to Collections Management and Utilization. 3 Hours.
This course examines the roles collections play in fulfilling a museum's mission; the obligations ownership/preservation of collections materials create for a museum; and the policies, practices, and professional standards that museums are required to put in place. The course will cover utilization of collections for research, education, and public engagement; address how that utilization informs the need for and structure of collections policies, and introduce the basic practices of professional collections management. (Same as ANTH 798, AMS 730, BIOL 798, HIST 725, and MUSE 704.) Prerequisite: Museum Studies student, Indigenous Studies student, or consent of instructor. LEC.

GEOL 791. Advanced Topics in Geology: ______. 1-5 Hours.
Selected offerings in geology. Intended primarily for graduate students and qualified seniors. May include lectures, discussions, reading, laboratory and field work. May be taken more than once. LEC.

GEOL 814. Professional Science Masters Environmental Geology Capstone I. 1 Hour.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, or an internship or similar individual project for full-time students or students who are not employed in the area of study. This course will initiate the process of project development and will be taken prior to a student's final semester. This project is to be continued in GEOL 815 in the last semester of the student's graduate career. Prerequisite: Minimum 20 credit hours completed in program. SEM.

GEOL 815. Professional Science Masters Environmental Geology Capstone II. 2 Hours.
A culminating experience to develop a workforce project and produce a written report to be presented orally to a committee that may include an industry member. Students will develop an applied workforce project in the student's place of employment for full-time employees, an internship or similar individual project for full-time students or students who are not employed in the area of study. The students will compile their project results in a formal written report and will give an oral presentation to the Environmental Studies faculty (2 minimum) and the student's employer or mentor. Prerequisite: GEOL 814. SEM.

GEOL 837. Geoscience and Petroleum Engineering. 3 Hours.
Advanced geological, geophysical, and engineering characterization of a petroleum reservoir. Includes mapping; petrophysical, production, and pressure analysis; and numerical modeling. Considers economic analysis of steps to improve recovery. Students who have completed GEOL 537 may not take GEOL 837 for credit. LEC.

GEOL 851. Field and Laboratory Methods: Physical Hydrogeology. 1 Hour.
Introduction to field and laboratory methods commonly used in physical hydrogeology. Practical experience with common water level measurement techniques, various well pumping techniques, well installation and geologic core sampling, and hydraulic testing. Prerequisite: Introductory course in hydrogeology and familiarity with computer use for data processing, or consent of instructor. FLD.
GEOL 852. Field and Laboratory Methods: Contaminant Transport. 1 Hour.
Introduction to laboratory methods for evaluating reactive transport parameters, followed by development and implementation of computer models. Students will gain experience building models starting from basic transport equations using a spreadsheet platform and, where appropriate, commercial software packages. Prerequisite: GEOL 751 (may be taken concurrently) or equivalent, or consent of the instructor. LAB.

GEOL 853. Field and Laboratory Methods: Chemical Hydrogeology. 1 Hour.
Practical experience in measuring unstable chemical parameters in groundwater, including pH, Eh, dissolved oxygen, temperature, alkalinity, specific conductance, and turbidity. Practical experience in collecting water samples for chemical analysis, choosing appropriate sample containers and preservation methods, and special techniques for collecting samples for determination of parameters sensitive to environmental changes such as oxygen level or temperature. Prerequisite: GEOL 753 (may be taken concurrently) or equivalent, or consent of the instructor. FLD.

GEOL 854. Field and Laboratory Methods: Geobiology. 1 Hour.
Practical experience in cultivating, enumerating and visualizing groundwater microorganisms. Geochemical and molecular techniques for studying microbial community diversity, biominerализation and mineral dissolution, and biodegradation of organic contaminants will be covered. Practical experience in collecting water samples for preservation of microorganisms sensitive to environmental changes such as oxygen level or temperature. Prerequisite: GEOL 753 (may be taken concurrently) or equivalent, or consent of the instructor. FLD.

GEOL 855. Field and Laboratory Methods: Environmental Geophysics. 1 Hour.
Introduction to the application of geophysical methods to environmental investigations. Practical experience in designing, conducting, and interpreting information obtained using downhole and shallow surface geophysical methods will be addressed. Prerequisite: Introductory course in hydrogeology and GEOL 577 or concurrent enrollment, or consent of instructor. FLD.

GEOL 856. Field and Laboratory Methods Special Topics: ____. 1 Hour.
Practical experience in a special topic in Environmental Geology. Course may be repeated if topic varies. FLD.

GEOL 891. Special Studies in Geology. 1-5 Hours.
May be repeated. RSH.

GEOL 899. Master's Thesis. 1-12 Hours.
Thesis Hours. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing. THE.

GEOL 921. Advanced Invertebrate Paleontology: ____. 1-3 Hours.
Detailed study of systematics, morphology, stratigraphic distribution and paleoecology of major groups of organisms in the fossil record. Specific group or groups covered will vary according to student and faculty needs and interests. May be repeated. Prerequisite: An introductory course in invertebrate paleontology. LEC.

GEOL 932. Carbonate Petrology. 3 Hours.
Study of the physical and chemical factors important in the genesis and diagenesis of carbonate rocks. Includes the application of principles learned from research on modern marine environments to the interpretation of ancient carbonates. Various analytical techniques are covered with emphasis on thin section petrography. Prerequisite: GEOL 331 and GEOL 732. LEC.

GEOL 933. Sandstone Petrology. 3 Hours.
Description, classification, and interpretation of sedimentary rocks, emphasizing petrographic methods applied to terrigenous rocks and interpretation of provenance of sedimentary sequences. Prerequisite: GEOL 511 and GEOL 531 or GEOL 532. LEC.

GEOL 999. Doctoral Dissertation. 1-12 Hours.
Dissertation Hours. Graded on a satisfactory progress/limited progress/no progress basis. Prerequisite: Graduate standing. THE.

Bachelor of Arts in Geology

Why study geology?

In Geology you get to apply techniques and knowledge from chemistry, physics, biology and math to answer important questions about Earth processes, history and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and understand the environment.

The B.A. program (http://geo.ku.edu/overview-1/) allows many free electives for background courses in the sciences or liberal arts. The program permits study of traditional geology (with emphasis on the solid earth, the earth’s surface, or environmental geology and natural resources), environmental geology (with emphasis on water or urban environmental geology), or an individually tailored program.

Undergraduate Admission

Admission to KU

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

Admission to the College of Liberal Arts and Sciences

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

Geology Programs

The B.A. program allows many free electives for background courses in the sciences or liberal arts. The program permits study of traditional geology (with emphasis on the solid earth, the earth’s surface, or environmental geology and natural resources), environmental geology (with emphasis on water or urban environmental geology), or an individually tailored program.
Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

First- and Second-Year Preparation

Students interested in geology should see a department advisor as soon as possible. They should enroll in mathematics, chemistry, and English in addition to Introduction to Geology and electives. Students should take GEOL 360 as soon as possible.

Advising

Developing a strong relationship with a faculty advisor helps students get the most out of their educational programs in the shortest time. Most courses for majors are offered in only one semester each year. Advisors can guide the student through complexities of the curriculum or into a specialized program.

Requirements for the B.A. Major

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 30 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Sample 4-year plans for the BA degree in Geology with the following concentrations can be found here: General Geology (p. 1552) and Environmental Geology (p. 1553), or by using the left-side navigation.

### Departmental Honors

Pursuit of departmental honors in Geology is by invitation from the Department of Geology honors coordinator. Requirements include:

- 3.50 or higher KU geology-courses GPA at graduation.
- Completion of at least 2 credit hours of GEOL 399.

Completion and successful defense of an honor's thesis. Additional requirements and more information may be obtained from the Department of Geology honors coordinator and web site.

|---|---|---|---|
Total Hours 120-125

1 The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2 Geology majors are required to complete 15 hours of elective. The General Geology track offers electives in Solid Earth, Surface Earth, and Geology and Natural Resources. For a list of applicable electives see the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/geology/ba/#requirementstext) tab.

3 All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

4 Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

Total Hours 120-125

1. The BA requires completion of two courses of collegiate-level writing instruction. Students who test out of Composition will still need to complete ENGL 102 (or equivalent) and one additional Goal 2.1 course.

2. Geology majors are required to complete 15 hours of elective. The Environmental Geology track offers electives in Water, Geology, and the Environment; Urban Environmental Geology; and Other Electives. For a list of applicable electives see the degree requirements (http://catalog.ku.edu/liberal-arts-sciences/geology/ba/#requirementstext) tab.

3. All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

4. Visit this website (https://collegeadvising.ku.edu/ba-quantitative-reasoning-courses/) for a list of courses that fulfill the BA Quantitative Reasoning requirement.

Please note:

- All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

- The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

### Bachelor of Science in Geology

**Why study geology?**

In Geology you get to apply techniques and knowledge from chemistry, physics, biology and math to answer important questions about Earth processes, history and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and understand the environment.

The B.S. program (http://geo.ku.edu/overview/) provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The
environmental geology option combines training in geology with many different sciences.

**Undergraduate Admission**

**Admission to KU**

All students applying for admission must send high school and college transcripts to the Office of Admissions. Unless they are college transfer students with at least 24 hours of credit, prospective students must send ACT or SAT scores to the Office of Admissions. Prospective first-year students should be aware that KU has qualified admission requirements that all new first-year students must meet to be admitted. Consult the Office of Admissions (http://admissions.ku.edu/) for application deadlines and specific admission requirements.

Visit the International Support Services (http://www.iss.ku.edu/) for information about international admissions.

Students considering transferring to KU may see how their college-level course work will transfer on the Office of Admissions (http://credittransfer.ku.edu/) website.

**Admission to the College of Liberal Arts and Sciences**

Admission to the College is a different process from admission to a major field. Some CLAS departments have admission requirements. See individual department/program sections for departmental admission requirements.

**Geology Programs**

The B.S. program provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The environmental geology option combines training in geology with many different sciences.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

**First- and Second-Year Preparation**

Students interested in geology, especially in the B.S. degree, should see a department advisor as soon as possible. They should enroll in mathematics, chemistry, and English in addition to Introduction to Geology and electives. Students should take GEOL 360 as soon as possible.

**Advising**

Developing a strong relationship with a faculty advisor helps students get the most out of their educational programs in the shortest time. Most courses for majors are offered in only one semester each year. Advisors can guide the student through complexities of the curriculum or into a specialized program.

---

**Requirements for the B.S. Degree**

The B.S. program provides intensive training in geology and other sciences. B.S. majors may emphasize traditional geology, environmental geology (with a specialized track in hydrogeology), engineering geology, geophysics, or earth and space science licensure. The hydrogeology track, the engineering geology option, and the geophysics option combine basic training in geology with training in mathematics, engineering, physics, and geophysics. The environmental geology option combines training in geology with many different sciences.

Degree requirements may be altered to suit particular needs of a student upon petition to the undergraduate studies committee and in consultation with a geology faculty advisor. Special consideration is given to students with strong backgrounds in supporting sciences and students with superior records who decide to major in geology late in their programs.

### Geology Prerequisite or Co-requisite Knowledge

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

#### Calculus I
- Satisfied by:
  - MATH 125 Calculus I (Prerequisite: MATH 104; or MATH 103; or three years of college preparatory mathematics including trigonometry and a score of 28 or higher on ACT mathematics or 640 or higher on the SAT; or a qualifying score on the mathematics placement test.)

#### Calculus II
- Satisfied by:
  - MATH 126

#### Chemistry
- Satisfied by:
  - CHEM 130 General Chemistry I
  - & CHEM 135 and General Chemistry II

#### Physics
- Satisfied by:
  - PHSX 211 General Physics I
  - & PHSX 216 and General Physics I Laboratory
  - PHSX 212 General Physics II
  - & PHSX 236 and General Physics II Laboratory

#### Biology
- Satisfied by BIOL:
  - BIOL 152 Principles of Organismal Biology

#### Information Technology
- Satisfied by one of the following:
  - E ECS 138 Introduction to Computing: _____
  - C&PE 325 Numerical Methods and Statistics for Engineers

### Geology Core Knowledge and Skills

Majors must complete the following core courses:

#### Introduction to Geology
- Satisfied by:
  - GEOL 101 The Way The Earth Works

#### Geology Fundamentals Laboratory
- Satisfied by:
  - GEOL 103 Geology Fundamentals Laboratory

#### Historical Geology
- Satisfied by:
  - GEOL 304 Historical Geology

#### Mineralogy and Structure of the Earth
- Satisfied by:
  - GEOL 311 Mineralogy and Structure of the Earth

#### Mineral Structures and Equilibria Laboratory
- Satisfied by:
  - GEOL 312 Mineral Structures and Equilibria Laboratory

#### Sedimentology and Stratigraphy
- Satisfied by:
  - GEOL 331 Sedimentology and Stratigraphy

#### Field Investigation
- Satisfied by:
  - GEOL 360 Field Investigation

#### Igneous and Metamorphic Petrology
- Satisfied by:
  - GEOL 512 Igneous and Metamorphic Petrology

#### Petrology Laboratory
- Satisfied by:
  - GEOL 513 Petrology Laboratory

#### Introductory Field Geology
- Satisfied by:
  - GEOL 560 Introductory Field Geology

### Geology Required Electives

At least one course from each of the three categories listed below: Life; Water & Climate; Rocks. Additional elective credit requirements fulfilled by 500 level and above geology courses, although only one geology course fulfilling KU Core Goal 4 or 5 may count towards these 9 hours. Additionally, 3 hours of GEOL 121, if taken before the student has completed 60 hrs, GEOL 391 or GEOL 399 can also count towards these 9 credit hours.

#### Life
- GEOL 316 Geochemistry
- GEOL 521 Paleontology
- GEOL 525 Geobiology: The Coevolution of Life and Rocks
- GEOL 553 Biogeochemistry
- GEOL 591 Topics in Geology: _____ (Geobiology)

#### Rocks
- GEOL 501 Simple Error Analysis with Matlab
- GEOL 502 Linear Algebra for Earth Scientists
- GEOL 503 Numerical Methods in the Earth Sciences
- GEOL 511 Raman Spectroscopy of Crystalline Solids
- GEOL 533 Shaales and Other Mudstones
- GEOL 536 Geological Log Analysis
- GEOL 537 Petroleum Reservoir Characterization
- GEOL 538 Basin Analysis
- GEOL 535 Petroleum and Subsurface Geology
- GEOL 572 Geophysics

#### Water and Climate
- GEOL 552 Introduction to Hydrogeology
- GEOL 554 Contaminants in Groundwater
- GEOL 555 Climate Science
- GEOL 558 Applied Groundwater Modeling
- GEOL 577 Environmental Geophysics
- GEOL 579 Hydrogeophysics
- GEOL 591 Topics in Geology: _____ (Climate: Past, Present and Future)

### Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

#### Major Hours
Satisfied by 50 hours of major courses.

#### Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

#### Major Junior/Senior Hours
Satisfied by a minimum of 18 hours from junior/senior courses (300+) in the major.

#### Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of
study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

### Engineering Geology Option

**Written Communication - Core Skill and Critical Inquiry.**

GEOL 560  Introductory Field Geology  3
Structural Geology. Satisfied by:
GEOL 562  Structural Geology  4
Geophysics. Satisfied by:
GEOL 572  Geophysics  3

Geology Required Electives
Majors must complete additional courses to total at least nine hours numbered 500 or above. The following are recommended:
GEOL 391  Special Studies in Geology  1-6
GEOL 535  Petroleum and Subsurface Geology  4
GEOL 715  Geochemistry  3
GEOL 751  Physical Hydrogeology  3
CE 770 & CE 771  Concepts of Environmental Chemistry and Environmental Engineering Laboratory  6
GEOG 535  Soil Geography  4
GEOG 558  Intermediate Geographical Information Systems  4
GEOL 753  Chemical and Microbial Hydrogeology  3
BIOL 400  Fundamentals of Microbiology  3

Environmental Hydrogeology Track
Besides the general program above, a specialized track in hydrogeology satisfies degree requirements. In addition to College, supporting science, and geology courses, the environmental hydrogeology track requires the following mathematics and civil engineering/physics courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 220</td>
<td>Applied Differential Equations</td>
<td>3</td>
</tr>
<tr>
<td>MATH 290</td>
<td>Elementary Linear Algebra</td>
<td>2</td>
</tr>
<tr>
<td>CE 330</td>
<td>Fluid Mechanics</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, Technical Electives (9 hours). These normally are chosen from courses numbered 500 or above in geology, physics, mathematics, chemistry, engineering or computer science. Courses numbered below 500 must be approved by a geology advisor.

Major Hours & Major GPA
While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

| Major Hours | Satisfied by 49 hours of major courses. |

Major Hours in Residence
Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 45 hours from junior/senior courses (300+) in the major.

Major Junior/Senior Graduation GPA
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F’s and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

Geophysics Option

Written Communication - Core Skill and Critical Inquiry.

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.
Bachelor of Science in Geology

Calculus I. Satisfied by:

Calculus II. Satisfied by:

Vector Calculus and Elementary Linear Algebra. Satisfied by:

- MATH 125 Calculus I 4
- MATH 126 Calculus II 4
- MATH 127 Calculus III 4
- MATH 290 Elementary Linear Algebra 2

Elementary Differential Equations. Satisfied by:

- MATH 320 Elementary Differential Equations 3

Chemistry. Satisfied by:

- CHEM 130 General Chemistry I 10
- CHEM 135 General Chemistry II

Physics. Satisfied by:

- PHSX 211 General Physics I 5
- PHSX 212 General Physics II 4
- PHSX 236 General Physics II Laboratory
- PHSX 313 General Physics III 3
- PHSX 521 Mechanics I 3
- PHSX 531 Electricity and Magnetism 3
- or EECS 220 Electromagnetics I

Intro to Computing. Satisfied by one of the following:

- EECS 138 Introduction to Computing: _____ 3

Demonstrate equivalent programming skills

**Geology Core Knowledge and Skills**

Majors must complete the following core courses:

- Introduction to Geology. Satisfied by:
  - GEOL 101 The Way The Earth Works 3

- Geology Fundamentals Laboratory. Satisfied by:
  - GEOL 103 Geology Fundamentals Laboratory 2

- Historical Geology. Satisfied by:
  - GEOL 304 Historical Geology 3

- Mineralogy and Structure of the Earth. Satisfied by:
  - GEOL 311 Mineralogy and Structure of the Earth 3

- Sedimentology and Stratigraphy. Satisfied by:
  - GEOL 331 Sedimentology and Stratigraphy 4

- Field Investigation. Satisfied by:
  - GEOL 360 Field Investigation 2

- Igneous and Metamorphic Petrology. Satisfied by:
  - GEOL 512 Igneous and Metamorphic Petrology 3

- Introductory Field Geology. Satisfied by:
  - GEOL 560 Introductory Field Geology 3

- Structural Geology. Satisfied by:
  - GEOL 562 Structural Geology 4

- Geophysics. Satisfied by one of the following:
  - GEOL 572 Geophysics 3

**Additional Geology Courses**

Geophysics elective 500 and above (at least 9 hours) 9

- GEOL 575 Seismic Exploration
- GEOL 577 Environmental Geophysics
- GEOL 578 Seismic Data Analysis and Interpretation
- GEOL 776 Ground Penetrating Radar

**Technical Required Electives** 6

**Major Hours & Major GPA**

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

**Major Hours**

Satisfied by 45 hours of major courses.

**Major Hours in Residence**

Satisfied by a minimum of 15 hours of KU resident credit in the major.

**Major Junior/Senior Hours**

Satisfied by a minimum of 12 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**

Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Earth and Space Science Licensure Option**

This program fulfills the requirements for a Bachelor of Science degree in geology. The program also meets course requirements necessary to gain state licensure eligibility in earth and space science to become a secondary teacher in Kansas, but completion of the program does not guarantee the student's licensure. This list is a guideline. Contact the geology department for further information about meeting degree and additional licensure requirements. You may also contact the UKanTeach Office for information about similar tracks resulting in eligibility for licensure in this and other science and mathematics fields.

**Written Communication - Core Skill and Critical Inquiry.**

Humanities - Understanding the Human Condition. Satisfied by completing 2 courses (requirement code H). Approved courses may be searched for availability through the Kyou portal.

Social and Behavioral Sciences - Understanding Society and Behavior. Satisfied by completing 2 courses (requirement code S). Approved courses may be searched for availability through the Kyou portal. An introductory course in economics is recommended.

Geology Prerequisite or Co-requisite Knowledge

Majors must complete courses as specified in each of the following areas. Majors are advised to take honors courses when eligible. These hours do not contribute to the minimum number of hours required for the major.

Calculus I. Satisfied by:

- MATH 125  Calculus I 4
- MATH 126  Calculus II 4

Chemistry. Satisfied by:

- CHEM 130  General Chemistry I and General Chemistry II 10

Physics. Satisfied by:

- PHSX 211  General Physics I and General Physics I Laboratory 5
- PHSX 212  General Physics II and General Physics II Laboratory 4

Biology. Satisfied by:

- BIOL 152  Principles of Organismal Biology 3
- or BIOL 153  Principles of Organismal Biology, Honors 3

Geology Core Knowledge and Skills

Majors must complete the following core courses:

- GEOL 101  The Way The Earth Works 3
- GEOL 103  Geology Fundamentals Laboratory 2

Structural Geology. Satisfied by:

- GEOL 311  Mineralogy and Structure of the Earth 3
- GEOL 331  Sedimentology and Stratigraphy 4
- GEOL 360  Field Investigation 2

Paleontology. Satisfied by:

- GEOL 521  Paleontology 4
- & GEOL 523  Paleontology Laboratory

Introduction to Hydrogeology. Satisfied by:

- GEOL 552  Introduction to Hydrogeology 3

Introductory Field Geology. Satisfied by:

- GEOL 660  Introductory Field Geology 3

Earth and Space Required Electives

Majors must complete one of the areas below:

- Geology Focus. Satisfied by 4 hours in a geology course numbered 300 or above.

Space Science Core Knowledge and Skills

Majors must complete the following core courses:

- ATMO 105  Introductory Meteorology 5
- ASTR 191  Contemporary Astronomy 3

Research Methods

Satisfied by:

- CHEM 598  Research Methods 3

Professional Development Course Work

A minimum grade of C is required in all courses.

Liberal Arts and Sciences. Satisfied by:

- LA&S 290  Approaches to Teaching Science and Mathematics I 1
- LA&S 291  Approaches to Teaching Science and Mathematics II 1

Curriculum and Teaching (19 hours). Satisfied by:

- C&T 448 Reading and Writing across the Curriculum and 16 hours of courses approved by UKanTeach in curriculum and teaching. These should include courses such as Classroom Interactions (3), Knowing and Learning (3), Project Based Instruction (3), Student Teaching (6), and Special Topics Seminar (1).

Major Hours & Major GPA

While completing all required courses, majors must also meet each of the following hour and grade-point average minimum standards:

Major Hours

Satisfied by 46 hours of major courses.

Major Hours in Residence

Satisfied by a minimum of 15 hours of KU resident credit in the major.

Major Junior/Senior Hours
Satisfied by a minimum of 34 hours from junior/senior courses (300+) in the major.

**Major Junior/Senior Graduation GPA**
Satisfied by a minimum of a 2.0 KU GPA in junior/senior courses (300+) in the major. GPA calculations include all junior/senior courses in the field of study including F's and repeated courses. See the Semester/Cumulative GPA Calculator (http://clas.ku.edu/undergrad/tools/gpa/).

**Departmental Honors**
Pursuit of departmental honors in Geology is by invitation from the Department of Geology honors coordinator. Requirements include:
- 3.50 or higher KU geology-courses GPA at graduation.
- Completion of at least 2 credit hours of GEOL 399.
- Completion and successful defense of an honor's thesis.
Additional requirements and more information may be obtained from the Department of Geology honors coordinator and web site.

**BS in Geology with concentration in Earth & Space Science**

Below is a sample 4-year plan for students pursuing the BS in Geology with a concentration in Earth and Space Science (http://geo.ku.edu/earth-and-space-science-licensure/). To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website. (http://kucore.ku.edu/courses/)

Total Hours 120-129

1 Geology BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.
2 All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.
3 GEOL 360, GEOL 560, and GEOL 561 are offered only in the summer.
4 The Earth and Space Science concentration must complete electives in one of the following two areas: Geology Focus or Astronomy Focus. Course specifics are listed under the Degree Requirements tab.

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BS in Geology with concentration in Engineering Geology

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. However, overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
BS in Geology with concentration in Geophysics

Below is a sample 4-year plan for students pursuing the BS in Geology with a concentration in Geophysics (http://geo.ku.edu/geophysics-track/). To view the list of courses approved to fulfill KU Core Goals, please visit the KU Core website (http://kucore.ku.edu/courses/).

Please note:

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level. The same course cannot be used to fulfill more than one KU Core Goal. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.

BS in Geology with concentration in Geophysics

All major required Geology courses and most Geology elective courses numbered 300 and above are offered once a year, either in the fall, spring or summer term.

Geology BS majors are required to complete a third English, and a list of possible courses can be found under the Degree Requirements tab.

GEOL 360, GEOL 560, and GEOL 561 are offered only in the summer.

Geology majors must complete 18.0 hours of elective coursework, and three courses must come from each of the following categories: Life; Rocks; Water and Climate. A complete course list can be found under the Degree Requirements tab.

All students in the College of Liberal Arts and Sciences are required to complete 120 total hours of which 45 hours must be at the Jr/Sr (300+) level.

The same course cannot be used to fulfill more than one KU Core Goal. Overlap of a KU Core course with a major or degree-specific requirement is allowed. Overlapping is recommended to allow more opportunities to explore other majors and/or minors.
### Minor in Geology

#### Why study geology?

In Geology you get to apply techniques and knowledge from chemistry, physics, biology and math to answer important questions about Earth processes, history and future. Geologists are in demand to evaluate geologic hazards, evaluate natural resources, and understand the environment.

Our Geology Minor (http://geo.ku.edu/curriculum-1/) is built to be flexible depending on your interests! This is a great way to show future employers that you're dedicated to geology, but without taking the full suite of Major hours.

#### Requirements for the Minor

The minor requires 18 to 23 hours of geology courses, of which 12 hours must be junior/senior hours or higher (courses numbered 300 or above).

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 101</td>
<td>The Way The Earth Works</td>
<td>3</td>
</tr>
<tr>
<td>GEOL 103</td>
<td>Geology Fundamentals Laboratory</td>
<td>2</td>
</tr>
</tbody>
</table>

Students selecting this minor must complete the following:

**Introduction to Geology.** Satisfied by:

Students selecting this minor must complete a minimum of 13 hours in geology courses. GEOL 311 and GEOL 331 are recommended because they are necessary as prerequisites for many upper-division courses. Only one geology course fulfilling KU Core Goal 4 or 5 may count towards these 13 hours.

Students must work with an advisor to select courses to complete the requirements for the minor. Students must turn in a signed Geology Minor Advising form and a Minor Declaration form to the department office, 120 Lindley Hall, before taking any courses numbered 500 or above.

### Minor in Petroleum Geology

The Department of Geology offers a minor in Petroleum Geology with a focused list of courses that is appealing to many employers.
Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Admission

Admission is based on academic records including GPA and general preparedness in geology and supporting sciences, letters of recommendation, and the applicant’s stated academic and professional interests and goals. An attempt is made to balance the interests of students with the availability of faculty members to supervise them and laboratory space in which they may work.

You will need the following for your application:

1. **Official transcripts and proof of graduation:** U.S. universities generally indicate on transcripts if a degree has been conferred. However, if such a statement does not appear on a transcript, separate proof in the form of a degree certificate or diploma, issued directly by the institution, is required. Transcripts from all post secondary institutions that you have attended are necessary for your application. Failure to provide them could result in delay processing your application. If a student is admitted before completing his or her undergraduate degree, the documentation proving he or she did graduate must be supplied to the Dept. of Geology before the end of the student’s first semester at KU.

2. **3 Letters of Recommendation:** You will be asked for the names and email addresses of three people who can write a recommendation letter describing your qualifications for graduate school in geology. Once you submit the application, an email will be sent requesting a letter from each person that you name. Once the applicant submits the online application form (see point 1), referees will receive an email notification with detailed instructions on how to submit a letter of reference.

3. **Resume/CV**

4. **Personal Statement:** This is included in the on-line application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geology and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geology helps to meet those objectives, and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

**Graduate Record Examination (GRE) scores are not required for the application. Applicants may choose to submit GRE scores if they feel it will help inform the department of their academic abilities. However, choosing not to submit scores will not affect your chances of admission.**

**ADDITIONAL REQUIREMENTS**

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

---

### Master of Science in Geology

#### Geology Graduate Programs

KU Geology is comprised of students, faculty, staff, and alumni who are inspired by a collaborative and multidisciplinary mission to undertake scientific discovery that benefits society.

Our program is large enough to be led by world-renowned faculty with expertise in areas that span the geosciences, from energy to the environment, volcanology to the cryosphere, microbes to ancient rock, and more. At the same time, we are small enough to offer personalized, student-centered learning experiences. We are located in the world class Earth, Energy, and Environment Center (https://eeec.ku.edu/), which houses state-of-the-science laboratories, collaborative spaces, and classrooms.

Our program provides students with a comprehensive curriculum in geoscience with unique research opportunities, including acclaimed field experiences. KU Geology runs one of the oldest field camps (http://geo.ku.edu/field-activities/) in the nation (established in 1922 in Cañon City, CO (http://geo.ku.edu/field-camp-geol-560561/)) and our program emphasizes field instruction at all levels and in locations near and far.

Our students are generously supported by scholarships and resources (http://geo.ku.edu/facilities/) that allow them to take advantage of all that KU Geology has to offer. Geoscience is a prolific field, with high demand for our graduates in careers that significantly impact society. We maintain a long tradition of connecting our graduates to career and interview opportunities, as well as to our GHawk Community of successful geoscience alumni (http://geo.ku.edu/alumni/) and professionals around the world.

We invite you to explore further information about KU Geology on our website (http://geo.ku.edu/) and we welcome all inquiries related to our program.

The Department of Geology will review your application only after the application process is complete.

Submit your graduate application online (https://gradapply.ku.edu/apply/). Inquiries may be sent to the Department:

Graduate Academic Advisor
geology@ku.edu

M.S. Degree Requirements

Details of the regulations on graduate study are included in the department’s Ground Rules for Graduate Students, that is made available to admitted students online through Blackboard.

Prerequisites normally include credit in one year each of general biology, general chemistry, general physics, and calculus, plus junior- or senior-level courses in mineralogy, petrology, structural geology, paleontology, stratigraphy, geophysics, and a summer course in field geology. Students planning to specialize in geophysics also should have more advanced backgrounds in calculus and physics. Incoming graduate students meet with a departmental advisory review committee before enrollment to identify deficiencies and strengths and to set up curricula aimed at providing a broad background in geology at the intermediate to advanced level during the first year. Some deficiencies may be waived at this time if they are deemed nonessential.

Geology has many subdisciplines, and the department tailors each student’s curriculum to the needs of the individual. There is no departmental core curriculum or list of required courses.

Thesis Option (M.S. Degree)

The master’s degree curriculum requires completion of 30 credit hours, including up to six credit hours for thesis research, and an acceptable master’s thesis. At least 50% of coursework for the master's degree must be taken at 700 level or above. The student sets the curriculum in consultation with a 3-member advisory committee selected from the Graduate Faculty and approved by the Graduate Advisor. Course work counted toward the degree must be distributed to provide a comprehensive general knowledge of geology in addition to specialized knowledge required for the thesis. It may include courses in departments other than Geology.

Although the Department of Geology does not award a master’s degree in geophysics, students can specialize in geophysics at the master’s level. The requirements for the degree are overseen by geophysics faculty within the Department and scientists on the staff of the Kansas Geological Survey. Geophysics research projects are also supervised by Departmental geophysics faculty and scientists on the staff of the Survey. Similar arrangements with faculty outside the Department can be made for students specializing in geobiology, glaciology, hydrogeology, paleontology, sedimentology, or tectonics.

Students seeking to earn an M.S. in geology must maintain at least a 3.0 grade-point average in geology and supporting science courses and pass a final oral general examination with emphasis on the areas of geology relevant to the thesis project.

Nonthesis Option (M.S. Degree)

A student may complete an M.S. degree program based primarily on course work and specialized skills. For this degree, a minimum of 36 credit hours of graduate-level study must be completed, including two written reports based on small projects (non-thesis with projects) or a single written report on a prescribed topic (non-thesis without projects). At least 50% of coursework for the master’s degree must be taken at 700 level or above. The student determines the structure of the curriculum and projects in consultation with an advisory committee of 5 faculty members. A student must declare an intention to follow the nonthesis option during the first semester of graduate study. The nonthesis degree is a terminal degree and normally cannot lead to doctoral study. In addition to maintaining a 3.0 grade-point average in course work, the student must demonstrate proficiency in the areas of geology covered by the program. This is accomplished by satisfactory performance on a series of written examinations assembled and administered by the advisory committee (non-thesis with projects) or an oral examination (non-thesis without projects). These constitute the final examination for the degree and may be repeated once, if necessary.

During or after the period of residence, a student who wishes to change to an M.S. (thesis) program or a Ph.D. program must petition the Geology Graduate Studies Committee.

Professional Science Masters in Environmental Geology

The Department of Geology in collaboration with the KU Edwards Campus now offers an online professional science masters (PSM) degree in environmental geology. This applied two-year program separates itself from traditional thesis-based research MS degrees in Geology and/or Hydrogeology through its direct integration of management, communication, and case study based coursework, with a focus of developing future government and industry professional leaders in environmental geology with a broad toolbox to address environmental problems.

Coursework for the PSM in Environmental Geology degree (https://edwardscampus.ku.edu/environmental-geology-masters/) is offered online, with the exception of the three (3) required 1-credit-hour field techniques courses, offered in-person at the Edwards Campus. These courses are in a workshop format that will be a single day or a weekend.

Environmental geology is an interdisciplinary field that seeks to address and study anthropogenically-derived and naturally occurring environmental hazards on Earth. The field is grounded in basic geological sub-disciplines such as mineralogy, sedimentology and stratigraphy but has primary focus on hydrogeology, geochemistry, geophysics and components of engineering geology. These sub-disciplines and the associated field and laboratory techniques in the form of a PSM program lead to an applied understanding of how to utilize geophysical, geochemical and hydrogeological techniques to evaluate, remediate, and monitor the impact or potential impact of contamination.

Admission to Graduate Studies

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

PSM-Environmental Geology Degree - Admissions Requirements:

1. Bachelor’s degree from an accredited institution; the applicant must have an undergraduate major in geology or closely related field (natural, physical, or applied sciences, engineering) OR coursework of at least 20 credit hours in the natural and applied sciences (biology, chemistry, geology, physical geography, environmental sciences, or engineering)

2. A minimum grade-point average of B (3.0 on a 4.0 scale) for all previous university work is required. Under extenuating circumstances an average below 3.0 can be considered.

3. Graduate Record Examination (GRE) (school code 6871):
   a. The GRE is not required for applicants with an undergraduate degree in Geology from the University of Kansas with at least a grade-point average of B (3.0 on a 4.0 scale);
   b. The GRE may be waived upon departmental review, if the applicant has 2+ years of qualified professional and related experience, or has successfully passed the ASBROG Fundamentals of Geology examination.
   c. For applicants with an undergraduate cumulative GPA of 3.0 or greater, the GRE is recommended, but not required;
   d. For applicants with less than a 3.0 (seeking provisional admission), GRE scores are required. GRE scores should be from a test date within the last 5 years.

4. Statement of interest: This 1-2 page narrative should succinctly summarize the applicant’s education, employment history, long-term career goals, and how this degree program will help achieve these goals.

5. Three (3) letters of recommendation from persons qualified to offer judgment on the applicant’s ability to undertake graduate-level work;

6. International students must also meet the English proficiency (https://gradapply.ku.edu/english-requirements/), visa/I20, and financial requirements.

Applications Deadlines

- Spring: December 15
- Summer: May 15
- Fall: August 1

This program may be completed entirely online, with the exception of the required Field Workshops. The Field Workshops are offered at the KU Edwards Campus in Overland Park or at the KU Lawrence Campus, and can be completed over one day or weekend.

Doctor of Philosophy in Geology

Geology Graduate Programs

KU Geology is comprised of students, faculty, staff, and alumni who are inspired by a collaborative and multidisciplinary mission to undertake scientific discovery that benefits society.
Our program is large enough to be led by world-renowned faculty with expertise in areas that span the geosciences, from energy to the environment, volcanology to the cryosphere, microbes to ancient rock, and more. At the same time, we are small enough to offer personalized, student-centered learning experiences. We are located in the world class Earth, Energy, and Environment Center (https://eeec.ku.edu/), which houses state-of-the-science laboratories, collaborative spaces, and classrooms.

Our program provides students with a comprehensive curriculum in geoscience with unique research opportunities, including acclaimed field experiences. KU Geology runs one of the oldest field camps (http://geo.ku.edu/field-activities/) in the nation (established in 1922 in Cañon City, CO (http://geo.ku.edu/field-camp-geol-560561/)) and our program emphasizes field instruction at all levels and in locations near and far.

Our students are generously supported by scholarships and resources (http://geo.ku.edu/facilities/) that allow them to take advantage of all that KU Geology has to offer. Geoscience is a prolific field, with high demand for our graduates in careers that significantly impact society. We maintain a long tradition of connecting our graduates to career and interview opportunities, as well as to our GHawk Community of successful geoscience alumni (http://geo.ku.edu/alumni/) and professionals around the world.

We invite you to explore further information about KU Geology on our website (http://geo.ku.edu/) and we welcome all inquiries related to our program.

**Admission to Graduate Studies**

An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

**Graduate Admission**

Admission is based on academic records including GPA and general preparedness in geology and supporting sciences, letters of recommendation, and the applicant’s stated academic and professional interests and goals. An attempt is made to balance the interests of students with the availability of faculty members to supervise them and laboratory space in which they may work. Students with exceptional records may be invited to study for the Ph.D. without first earning the M.S. degree.

You will need the following for your application:

1. **Official transcripts and proof of graduation:** U.S. universities generally indicate on transcripts if a degree has been conferred. However, if such a statement does not appear on a transcript, separate proof in the form of a degree certificate or diploma, issued directly by the institution, is required. Photocopies are not accepted. Transcripts from all post secondary institutions that you have attended are necessary for your application. Failure to provide them could result in delay processing your application. If a student is admitted before completing his or her undergraduate degree, the documentation proving he or she did graduate must be supplied to the Dept. of Geology before the end of the student’s first semester at KU.

2. **3 Letters of Recommendation:** You will be asked for the names and email addresses of three people who can write a recommendation letter describing your qualifications for graduate school in geology. Once you submit the application, an email will be sent requesting a letter from each person that you name. Once the applicant submits the online application form (see point 1), referees will receive an email notification with detailed instructions on how to submit a letter of reference.

3. **Resume/CV**

4. **Personal Statement:** This is included in the on-line application form. The Graduate Studies Committee places considerable importance on the thoughtfulness of your remarks – in particular, we are interested in learning about (1) your specific interests within geology and why they are important and interesting to you, (2) what you envision as your educational and career objectives and how a degree from KU Geology helps to meet those objectives; and (3) which of our faculty members you think would be an appropriate graduate advisor and mentor.

**Graduate Admission. These may be found in the**

**Policies and procedures of Graduate Studies govern the process of**

**ADDITIONAL REQUIREMENTS**

Non-native speakers of English must meet English proficiency requirements as described here (https://gradapply.ku.edu/english-requirements/).

**The Department of Geology will review your application only after the application process is complete.**

Submit your graduate application online (https://gradapply.ku.edu/). Inquiries may be sent to the Department:

Cicely Corder
Graduate Academic Advisor
cscorder@ku.edu

**Ph.D. Degree Requirements**

Doctoral students can specialize in any area of faculty expertise, including sedimentology, paleontology, tectonics, geobiology, glaciology, geophysics and hydrogeology. Prospective Ph.D. candidates are subject to the same initial requirements as master’s students. The master’s degree is not a prerequisite for doctoral aspirancy. A student with a good background and good performance during the first two semesters may be invited to proceed directly toward the doctorate.

The student’s advisory committee and the student construct a curriculum that offers the best preparation for the chosen field of interest and satisfies the research skills requirement. Each student is expected to enroll in courses in supporting fields to develop a multidisciplinary approach to geology. The student must maintain at least a 3.0 grade-point average in geology and supporting science courses.
Research Skills & Responsible Scholarship
Requirements
The university requires that every doctoral student have training in responsible scholarship and research skills pertinent to the field of research and appropriate to the doctoral level. This requirement must be met before taking the comprehensive oral exam. Doctoral students in geology meet this requirement by the following:

- Completion of GEOL 791: Ethics in the Geosciences with a grade of “B” or higher.
- With the approval of the advisory committee, the student may meet the research skills requirement by taking either a curriculum of at least three graduate-level courses outside the department that are relevant to the specialty, or by completing a combination of languages, research skills, and courses.

Either coursework plan must be approved by the Director of Graduate Studies, and a list of these courses must be in the student’s file.

Please contact your advisor or the Director of Graduate Studies for further information about research skills and responsible scholarship, and see the current policy on Doctoral Research Skills and Responsible Scholarship in the Graduate Studies section of the online catalog and in the KU Policy Library.

Admission to Candidacy
To be admitted to Ph.D. candidacy, a student must pass an oral comprehensive examination on the specialty in geology in which the student is doing doctoral research and on other relevant areas of geology and supporting sciences. The student must prepare and have approved a research proposal based on the doctoral research project before the oral comprehensive examination. The examination is based on the material presented in the proposal and its application to geology in general. The examination is conducted by a 5-member faculty committee; one member of the committee must be from a KU department other than geology and is appointed by Graduate Studies on recommendation of the department. The same committee is also responsible for conducting a final oral examination based on the doctoral dissertation. Three members of the committee supervise research and preparation for the dissertation.

Shared Doctoral Program with Kansas State University
The Department has a shared education program whereby doctoral students may study under the direction of a faculty member of the Department of Geology at Kansas State University, with a KU faculty member as co-chair of the dissertation committee. After one year of course work in Lawrence to fulfill the residency requirement, students may enroll at Kansas State University. Degrees are awarded by KU. For specific information on departmental practices in shaping the same committee is also responsible for conducting a final oral examination based on the doctoral dissertation. Three members of the committee supervise research and preparation for the dissertation.

Graduate Certificate in Environmental Geology
The Department of Geology in collaboration with the KU Edwards Campus now offers an online graduate certificate in environmental geology. The certificate consists of 14 credit hours and coursework is completed online, with the exception of the required 1-credit-hour field techniques course, offered on-site at the Edwards or Lawrence campuses (or at a regional location), one per semester, on 1-2 weekdays or a weekend.

The certificate is a subset of the graduate science courses from the Professional Science Masters in Environmental Geology (PSM-EG) degree program. The graduate certificate can be completed as a stand-alone graduate certificate; as a graduate certificate paired with an appropriate graduate degree that the student is simultaneously enrolled in; or as a precursor to starting the full PSM-EG program.

Admission to Graduate Studies
An applicant seeking to pursue graduate study in the College may be admitted as either a degree-seeking or non-degree seeking student. Policies and procedures of Graduate Studies govern the process of Graduate admission. These may be found in the Graduate Studies (p. 2540) section of the online catalog.

Please consult the Departments & Programs (p. 803) section of the online catalog for information regarding program-specific admissions criteria and requirements. Special admissions requirements pertain to Interdisciplinary Studies degrees, which may be found in the Graduate Studies section of the online catalog.

Graduate Certificate in Environmental Geology – Admissions Requirements:
Individuals interested in applying to the Graduate Certificate in Environmental Geology should have a bachelor’s degree from an accredited institution in geology or closely related field (natural, physical, or applied sciences, engineering) OR coursework of at least 20 credit hours in the natural and applied sciences (biology, chemistry, geology, physical geography, environmental sciences, or engineering). For those without the necessary background courses in undergraduate science and mathematics, some additional coursework may need to be completed prior to the start of the graduate certificate program. Prospective applicants to the program are encouraged to contact the program to discuss past coursework.

Individuals who are not already enrolled as KU graduate students must complete an application to the Graduate School for admission into the certificate program and submit an application fee along with the following materials:

- Statement of interest: This 1-2 page narrative should succinctly summarize the applicant’s education, employment history, long-term
career goals, and how this graduate certificate will help achieve these goals.

- Official undergraduate transcript.
- A letter of recommendation from persons qualified to offer judgment on the applicant's ability to undertake graduate-level work; (former professor of instructor, workplace supervisor).

**Current KU graduate students** wishing to enroll in the Graduate Certificate in Environmental Geology program will apply through the Graduate School. A student must be in good standing with their graduate degree program in order to participate in the certificate program. A graduate GPA of 3.0 or higher is required for admission. Awarding of certificates will be handled consistent with guidelines and timing of degree awards of the Graduate School. Completion of the certificate will appear on the graduate transcript. KU graduate students should submit the following materials:

- A Statement of Interest in the environmental geology certificate program and its relationship to the applicant’s current graduate course of study.
- An unofficial copy of the applicant’s KU transcript.
- A letter of endorsement/support from the applicant’s graduate degree program (thesis/dissertation advisor or graduate director)

For more information on admission to a graduate certificate program at KU, see the policy on Admission to Graduate Study (http://policy.ku.edu/graduate-studies/admission-to-graduate-study/). Applications may be submitted at https://gradapply.ku.edu/apply (https://gradapply.ku.edu/apply/).

This program may be completed entirely online, with the exception of the required Field Workshops. The Field Workshops are offered at the KU Edwards Campus in Overland Park or at the KU Lawrence Campus, and can be completed over one day or weekend.

Students must complete 5 courses for a total of 13 graduate credit hours:

**Department of German Studies**

**Why study German Studies?**

Knowledge of the language and culture of German-speaking Europe provides students with linguistic and transcultural competence that will enable them to participate productively in a rapidly changing world. German is an official language in six central European countries and the most widely spoken language in the European Union. The United States maintains important economic, political, security, and cultural ties with the German-speaking countries. About 50 million people in the United States claim German ancestry.

Our students complete a diverse and challenging program that encompasses not only the German language but also courses that explore literature, the arts, history, business, and politics. Our program is characterized by interdisciplinary flexibility, a variety of co-curricular activities, and personalized academic advising and mentoring. German Studies students acquire research skills they need to study issues relevant to our field. Many German Studies majors and minors study abroad for a summer, semester, or year, often supported by departmental scholarships, and some complete internships in Germany. All German Studies students have opportunities to make use of the rich resources available at KU, including the Spencer Museum of Art, KU Libraries, Max Kade Center for German-American Studies, Office of Study Abroad, Center for Undergraduate Research, and University Career Center. Our students tend to have a second major or a minor in fields such as Global & International Studies, History, Business, Environmental Studies, Music, Microbiology, and Linguistics.

Our graduates have pursued their passion for language and culture in many ways: working for a non-profit organization affiliated with the U.S. Department of State; translating for a medical software company; serving on the human resources team of a global German sporting goods company; teaching high school German; working as copy editor of a newspaper; and pursuing graduate work in Germanic Languages & Literatures, social welfare, law, and speech pathology.

**Special Collections**

The Engel German Library is an endowed library with select German books, periodicals, and reference works as well as a space with a media suite.

The Max Kade Center for German-American Studies houses collections on German ethnic culture in the United States and fosters scholarship and student engagement in German-American and transatlantic studies. For further information, contact german@ku.edu.

**Undergraduate Program**

We offer students a diverse and challenging program in the language and culture of German-speaking Europe, including literature, the arts, history, business, and politics. Our program is characterized by personalized advising, interdisciplinary flexibility, co-curricular activities, and opportunities to conduct independent research and to study and undertake internships abroad. Courses at the 100, 200, and 300 levels emphasize student involvement with the aim of developing students’ use of the German language, including the ability to comprehend, interpret, and produce spoken, written, and multimedia texts in different genres. Cultural topics are integrated into instruction starting in the first semester. At the 400 and 500 levels, survey courses provide students with a broader perspective on German cultural traditions, while other advanced courses often have a thematic focus.

Most of our courses are taught in German. With permission of the Undergraduate Advisor, 6 credit hours (300-500 level) may be counted toward the major by completing two approved courses offered in English by German Studies or offered by other departments with significant content related to German-speaking Europe. Minors may take one
such course. Courses taken in departments such as the history of art, philosophy, political science, sociology, and theatre will enhance students’ study of the language and culture of German-speaking Europe.

Both the German Studies major and minor can be combined with majors and minors in other departments. Many students take advantage of this opportunity and combine their study of German with linguistics, business, philosophy, European studies, and history, for example.

Courses for reading knowledge are offered in German.

Placement

Students beginning the study of German at KU should take GERM 104. Students who have studied German before should take the online German placement examination and contact the department’s placement officer, Dr. Emily Wallace, Emily.wallace@ku.edu.

Retroactive Credit

Students with no prior college or university German course credit are eligible for retroactive credit as follows:

• 3 hours of retroactive credit are awarded to a student with 2 or 3 years of high school German who initially enrolls at KU in the third-semester German course (GERM 201) and receives a grade of C or higher.
• 6 hours of retroactive credit are awarded to a student with 3 or 4 years of high school German who initially enrolls at KU in the fourth-semester German course (GERM 202) and receives a grade of C or higher.
• 9 hours of retroactive credit are awarded to a student with 4 years of high school German who initially enrolls at KU in a German course with GERM 202 as a prerequisite and receives a grade of C or higher.
