

Minor in Public and Population Health

KU's minor in public and population health provide a broad exposure to the key concepts of public and population health, as well as an understanding of the connections between public health and the community. KU's programs focus on understanding the network of behavioral and social factors of health and how they're intertwined with the community. Students gain knowledge in understanding core concepts in epidemiology and biostatistics, disease prevention, population health and health disparities.

Minor Requirements

Coursework required for the minor is designed to provide a broad exposure to the key concepts of public health as well as an understanding of the connections between public health and other disciplines.
