KU's School of Social Welfare is an excellent place to pursue your interests in professional social work education. It is the oldest school of social welfare in the state and the only one to offer degree preparation from undergraduate through doctoral degrees in social work.

Social work education began at KU in 1937. The Master of Social Work program, established in Lawrence and at the KU Medical Center in Kansas City in 1946, has been continuously accredited since 1948. The Bachelor of Social Work degree has been awarded since 1971. In 1974, the B.S.W. program became one of the first in the nation to receive accredited status. The Council on Social Work Education (http://www.cswe.org), the accrediting body for social work education, most recently reaccredited the B.S.W. and M.S.W. programs in 2010. The doctoral program admitted its first students in 1981.

KU's Master of Social Work program consistently ranks among the top U.S. national public universities, according to U.S. News & World Report's "America's Best Graduate Schools". The School of Social Welfare is recognized internationally as an innovator in social work theory development and in research that makes positive contributions to our communities.

The school is housed on KU's Lawrence campus in Twente Hall, named for nationally renowned social work educator Esther Twente, who chaired the social work department from 1946 to 1957. The school offers the M.S.W. program in Lawrence, at the KU Edwards Campus in Overland Park, a suburb of Kansas City, and in western Kansas in collaboration with Fort Hays State University and Garden City Community College. The B.S.W. program is offered in Lawrence and at the KU Edwards campus.

Mission and Themes

Mission

The University of Kansas School of Social Welfare, rooted in the Strengths Perspective, aims to transform lives and social contexts and promote social, economic, and environmental justice in Kansas, the nation and the world. We do so by educating students to practice with integrity and competence; advancing the science and knowledge base of social work through scholarship and research; and participating in community-engaged service.

Guiding Principles and Themes

The work of the KU School of Social Welfare is guided and driven by a set of principles and values that inform our teaching, research endeavors, and service to community at various levels. These include:

Relationship Building: We engage in relationship building that fosters creativity, collaboration, and mutual learning. Relationship building is essential across practice, scholarship, education and service. We take a strengths approach as we serve our local, state, national, and global communities.

Diversity, Equity and Inclusion: We embrace the inherent worth of all people. By taking the position of cultural humility and applying the lens of intersectionality, we seek to develop and promote modes of anti-oppressive social work and dismantle structures of exclusion.

Practice with Integrity: We demonstrate our integrity and trustworthiness as scholars, educators, practitioners, and community members by promoting social work values, ethical practice, and the process of critical reflection.

Multisystem Competency: We recognize that social, economic, and environmental injustices are the root causes of inequalities and multiple strategies are necessary to address these. Our work integrates micro/macro social work and builds collaboration across systems and disciplines to create multi-level change.

Critical Perspective: We engage in deliberate and continuing examination of social conditions and solutions. We use critical inquiry to analyze and challenge existing structures and systems in order to advance the field and promote social, economic, and environmental justice.

Empirically Informed Social Work: We rigorously advance empirical research that impacts the social work knowledge base. By translating and applying evidence, we continually transform practice and policy across multiple systems.

The Programs

At the University of Kansas, students have the opportunity to prepare for professional careers in social work at the bachelor’s, master’s, and doctoral levels. The curriculum brings students from the introductory level through advanced study in clinical social work practice or social work macro practice. Under the umbrella of a practice orientation, the programs are structured to support the guiding principles and themes of the School.

Classroom work is one component of professional preparation; field placements comprise the other. Placements in social service agencies offer students the opportunity to apply skills learned in the classroom. B.S.W. and M.S.W. students spend time in practicum settings throughout the region. Our students provide more than 250,000 hours of service to underserved populations through practicum experiences.

The goal of the doctoral program in social welfare is to prepare students to become leaders nationally and internationally in advancing social work practice and policy through research, teaching, and scholarship. Our students graduate from the program with the critical knowledge and skills they need to become innovative stewards of the discipline who generate and disseminate knowledge as researcher, scholars, and educators.
